 - (A) Tier 1A establishes conservative cleanup goals called modified Risk-Based Screening Levels (RBSLs). Only the Fate and Transport Parameters cited in the ORBCA Guidance Document may be replaced by site-specific information obtained through site investigation and assessment. Justification must be provided when changes in any of the default Fate and Transport Parameters are indicated. The default Exposure Factors cannot be modified, nor can degradation rates be used under a Tier 1A evaluation. This evaluation must be performed using the models cited in Appendix C of the ORBCA Guidance Document. The modified RBSLs take into consideration regional characteristics, aesthetic criteria, and other appropriate standards such as Maximum Contaminant Levels (MCLs) for water. Tier 1A modified RBSLs are derived from standard exposure scenarios using current Reasonable Maximum Exposure (RME) toxicological parameters and conservative contaminant migration models. RBSL values are determined by the PSTD using one (1) in one million (1,000,000) as a Target Risk Limit for carcinogens and a Hazard Quotient (HQ) not greater than one (1.0) as a Target Risk Limit for non-carcinogens. One (1) in ten thousand (10,000) is the acceptable Target Risk Limit for

carcinogens for future potential receptors.

(B) The most likely Point of Exposure (POE) for current and potential future beneficial use of fresh groundwater should be determined. The concentration at this Point of Exposure for each Chemical of Concern (COC) must not exceed the Target Risk Limits cited in this Section.

(C) Unless otherwise directed by PSTD under Tier 1A the owner or operator must drill and install a minimum of four (4) two-inch (2") diameter monitoring wells outside of the UST pit or AST containment or product piping trench excavation zones. These wells must be located as follows:

(i) One (1) well must be installed in an apparent upgradient location to any known potential source at the site on or as close to the release as possible.

(ii) One (1) well must be installed in a location most likely to be contaminated.

(iii) One (1) well must be installed in a location that will allow the determination of an accurate groundwater gradient.

(iv) One (1) well must be installed in the direction of the nearest probable Point of Exposure either at the nearest property line or fifty feet (50') from the source of contamination, whichever is closer, or at another location as determined by PSTD. This well will be the Point of Compliance (POC) well for the Tier 1A evaluation unless there is a Point of Exposure nearer to the source of contamination, in which case the Point of Exposure will also become the Point of Compliance. The concentration for each Chemical of Concern in the Point of Compliance well should not exceed the Tier 1A standards as calculated using the ORBCA Guidance Document. If a drinking water supply well has been identified within 330 feet of the site, groundwater MtBE must be tested at the Point of Compliance. 0.020 mg/L will be considered the level of concern for MtBE and may require further assessment and corrective action.

(2) Tier 1A: Risk-Based Screening Level corrective action goals developed using limited site-specific data.

(A) This evaluation must be performed using the same models as those which are cited in Appendix C of the Guidance Document.

(B) Only the Fate and Transport Parameters cited in the ORBCA Guidance Document may be replaced by site-specific information obtained through site investigation and assessment. Justification must be provided when changes in any of the Tier 1A default Fate and Transport Parameters are indicated. The Tier 1A default Exposure Factors cannot be modified, nor can degradation rates be used under a Tier 1A evaluation.

(3) Within forty-five (45) days of release confirmation, or according to a schedule established by PSTD, the owner or operator must submit the information required in the Tier 1A evaluation as a report. This report must be submitted in the online format established by PSTD.

(d) PSTD may re-evaluate a Tier 1A analysis of a site, for the purpose of closure, on a case-by-case basis.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Revoked at 18 Ok Reg 1085, eff 5-11-01]

165:29-3-78. Free product removal

At sites where an investigation indicates the presence of free product, the owner or operator must notify the PSTD within twenty-four (24) hours that free product is located on site. The owner or operator must, as required by the PSTD as a result of the ORBCA tiered process, remove free product to the extent required by the PSTD while continuing, as necessary, any other actions required by this Subchapter. To meet the requirements of this Section, the owner or operator must, unless otherwise directed by the PSTD:

- (1) Conduct free product removal in a manner that minimizes the spread of contamination into previously uncontaminated zones by using recovery and disposal techniques appropriate to the hydrogeologic conditions at the site, and that properly treats, discharges, or disposes of recovery byproducts in compliance with applicable state and federal regulations;
- (2) Use abatement of free product migration as a minimum objective for the design of the free product removal system;
- (3) Handle any flammable products in a safe and competent manner to prevent fires or explosions; and
- (4) In the event free product is encountered in a utility trench, the owner or operator must advise the appropriate utility company and the PSTD of the presence of free product within twenty-four (24) hours of discovery.
- (5) Using the format specified by the PSTD, prepare and submit to the PSTD within forty-five (45) days after discovering free product, continuing thereafter at intervals specified by the PSTD, a Free Product Removal Report that provides at least the following information:
 - (A) The name of the person(s) responsible for implementing the free product removal measures.
 - (B) The estimated quantity, type, and thickness of free product observed or measured in wells, boreholes, and excavations.
 - (C) The depth to free product and to groundwater in each monitor well.
 - (D) The type of free product recovery system used.
 - (E) Whether any discharge will take place on-site or off-site during the recovery operation and where this discharge will be located.
 - (F) The type of treatment applied to and the effluent quality expected from any discharge.
 - (G) The steps that have been or are being taken to obtain necessary permits for any discharge.
 - (H) The disposition of the recovered free product and PSTD Disposal/Recycler Report.
 - (I) Any permits required by federal, state, or local agencies.
 - (J) The screened interval for each monitor well.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 35 Ok Reg 1033, eff 10-1-18]

165:29-3-79. Tier 2 and Tier 3 ORBCA

(a) Tier 2: Site-Specific Corrective Action Goals

(1) Under Tier 2, the owner or operator may be required to perform additional site investigation as determined by PSTD. The Tier 2 analysis is conducted in order to determine Site-Specific Target Levels (SSTLs) and appropriate Points of Compliance (POCs). Tier 2 analysis differs from the Tier 1A analysis in that some of the conservative default parameter assumptions of Tier 1A are replaced with site-specific data and the plume is redefined accordingly.

(2) Target Risk Limits remain the same.

(3) A report in compliance with the ORBCA Guidance Document must be submitted to the PSTD in accordance with a schedule and format required by PSTD.

(b) Tier 3: Enhanced Site-Specific Corrective Action Goals

(1) Where, in the determination of, PSTD, site or near-site conditions dictate more detailed site assessment, the owner or operator may be required to perform a risk analysis using probabilistic evaluations and sophisticated chemical fate and transport models. The extent of this additional site assessment and risk analysis model must be acceptable to the PSTD and must follow the ORBCA Guidance Document.

(2) Target Risk Limits remain the same.

(3) A report in compliance with the ORBCA Guidance Document must be submitted to PSTD in accordance with a schedule and format required by PSTD.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 35 Ok Reg 1033, eff 10-1-18]

165:29-3-80. Remedial Action Plan

(a) At any point after reviewing the information submitted, PSTD may require additional information or a Remedial Action Plan for contaminated soils and groundwater. If a plan is required, it must be submitted in the online format specified by PSTD.

(b) PSTD will approve a Remedial Action Plan only after the Licensed Environmental Consultant ensures that implementation of the plan will adequately protect human health, safety, and the environment as determined by using the process outlined in the ORBCA Guidance Document.

(c) As directed by PSTD, the owner or operator must implement the Remedial Action Plan, including any modifications to the plan made by PSTD. Implementation for the purposes of this Chapter means that the Remedial Action Plan approved by PSTD is fully operational and is performing the task for which it was designed.

(d) The owner or operator will be required to perform remediation and compliance monitoring as directed by PSTD.

(e) The owner or operator may, with verbal pre-approval documented by fax or email of PSTD staff, begin cleanup of soil and groundwater before the Remedial Action Plan is approved, provided that the owner or operator:

(1) Notify PSTD of the intention to begin cleanup at least seven days prior to initiating any cleanup action, unless it is an emergency.

- (2) Comply with any conditions imposed by PSTD, including halting cleanup or mitigating adverse consequences from cleanup activities.
- (3) Incorporate these self-initiated cleanup measures in the Remedial Action Plan or closure by risk assessment that is submitted to PSTD for approval.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 32 Ok Reg 811, eff 8-27-15; Amended at 37 Ok Reg 1157, eff 10-1-20]

165:29-3-81. Property owners affected by releases; notice

(a) Upon confirmation that soil and/or groundwater contamination is above action levels, owners or operators must, at a minimum, notify adjacent or abutting property owners that have been, or may be impacted by the release. This notice should be made just after delineation of the release to Tier 2 clean-up levels or prior to a case closure based on Tier 1A modified RBSL's. The notice, unless otherwise directed by the PSTD, must include at a minimum:

- (1) The origin and extent of the release; impacted party, upon written request to owner/operator may receive reports;
- (2) The nature of the substance(s) released;
- (3) The name, address and telephone number of the owner or operator or his or her designee who may be contacted for more information about the release;
- (4) The phone number and name of the Project Environmental Analyst at the PSTD whom the property owner can contact for additional information.
- (5) If an adjacent or abutting property owner that has been or may be impacted by a release requests, in writing, copies of all reports, it is the responsibility of the owner/operator to assure past and future reports are delivered to the requesting property owner.

(b) For each confirmed release that requires remediation or closure by a risk assessment or Risk-Based Corrective Action, the owner or operator must notify property owners that have been or may be impacted by the release and provide:

- (1) The origin and extent of the release;
- (2) The nature of the substance(s) released;
- (3) A description of any planned remedial action or closure based upon a risk assessment of the release;
- (4) The name, address and telephone number of the owner or operator or his or her designee and of the PSTD Project Environmental Analyst working on the case who may be contacted for more information about the release, including any planned response action; and
- (5) A statement that additional information about the release, including any planned response action, is on file with the PSTD and available for public review.

(c) The notices required by this Section must be given by certified mail/return receipt requested. Copies of the return receipts must be included in the Public Participation Report submitted to the PSTD.

(d) The PSTD must ensure that any and all information concerning the release is made available to the public for review upon request.

(e) Before approving a remediation plan or closure based upon risk assessment, the PSTD may hold a public meeting to consider comments on the proposed remediation plan or closure if there is sufficient public interest, or for any other reasons. If no comments have been received within thirty (30) days of the receipt date of the certified mail notice letters required by paragraph (c) of this Section,

then remediation or closure activities may commence. Any public comments related to the proposed remediation or case closure must be submitted in writing to the OCC to the attention of the PSTD Project Environmental Analyst working on this case, whose name and address will be on the notice letter.

- (f) The notice required by this Section must also be given;
- (1) after implementation of an approved Remedial Action Plan that does not achieve the cleanup levels established in the plan, and
 - (2) when termination of the plan is subsequently approved by the PSTD.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 26 Ok Reg 1841, eff 7-1-09; Amended at 30 Ok Reg 594, eff 7-1-13; Amended at 37 Ok Reg 1157, eff 10-1-20]

165:29-3-82. Closure of a case

- (a) Closure occurs when PSTD has determined that the appropriate cleanup levels have been achieved for both BTEX and TPH and monitored as remaining below the cleanup level for a period of time as directed by PSTD, or when PSTD has determined the case is eligible for closure under Risk-Based Corrective Action.
- (b) Upon approval of the request for case closure or as directed by PSTD, the owner or operator must submit a final closure report on a form specified by PSTD and certified by the Licensed Environmental Consultant which provides evidence of proper decommissioning of equipment and corrective action materials.
- (c) All residual waste soil and/or fluid drums generated during case closure activities, or that remain on-site from prior case investigation activities, must be disposed of as part of case closure work and evidence of disposal of such drums documented in the final closure report. The final closure report will not be approved until all residual wastes have been disposed of.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 33 Ok Reg 626, eff 8-25-16]

165:29-3-83. Laboratory analysis

- (a) All samples required to be collected and analyzed pursuant to this Chapter must be analyzed by a DEQ certified laboratory.
- (b) The Total Petroleum Hydrocarbon (TPH) Lab Methodology EPA 418.1 will not be accepted for Part 5 of this Subchapter.
- (c) When air sampling is required inside any structure or vapor monitoring well, the sampling and the method(s) used must be pre-approved in writing by PSTD.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05]

PART 7. LICENSING PROCEDURES FOR ENVIRONMENTAL CONSULTANTS

165:29-3-90. Licensing for Environmental Consultants involved with closures and/or corrective action of releases from underground or aboveground storage tanks

- (a) Any individual seeking a license as an Environmental Consultant involved with closures, and/or corrective action of releases from either underground or aboveground storage tank sites must complete an application form prepared by PSTD. The application form requires information regarding education, experience, knowledge of applicable state and federal regulations, industry standards and practices and references.

- (b) All applicants must qualify in the following manner:
- (1) Satisfy requirements of the Occupational Safety and Health Administration (OSHA) 29 CFR 1910.120 (HAZWOPER) forty (40) hour course with eight (8) hour annual updates and the eight (8) hour supervisor course; must provide evidence of the successful completion of a PSTD approved Risk-Based Corrective Action course, seminar or school. At a minimum this course must include sixteen (16) hours of risk assessment/risk analysis and fate and transport of chemicals in the environment; eight (8) hours of which must be hands-on computer training with appropriate software; and
 - (2) Have seven (7) years' environmental experience with at least two (2) years' experience at regulated petroleum storage tank facilities and pass an examination, which must be taken no more frequently than once every six (6) months, authorized by the State of Oklahoma, which demonstrates knowledge of reference materials published by EPA:NWWA (Technical Enforcement Guidance Document-TEGD) and all applicable federal, state, and local regulations; or
 - (3) Have a four- (4-) year degree from an accredited college or university recognized by the state in Geology, Hydrology, Environmental Science, Environmental Engineering, Petroleum Engineering, Civil Engineering, Geologic Engineering or an equivalent engineering degree and at least four (4) or more years of environmental experience with at least two (2) years' experience at regulated petroleum storage tank facilities, and pass an examination approved by the PSTD. The examination will test an applicant's knowledge of industry standards, reference materials, laws and regulations, and may be taken no more frequently than once every six (6) months.
- (c) Licensed Environmental Consultants are required to pay fees for applications, examinations, and certifications prior to examination and license issuance as set forth in OAC 165:5.
- (d) Licensed Environmental Consultants must provide proof of attending (online or in-class) eight (8) hours of PSTD approved continuing professional education courses, classes, seminars or conferences to PSTD every year. Licensees may request to rollover a maximum of eight (8) credit hours from the current year to satisfy the following year's continuing education requirements. Approval of any rollover hours will be at the discretion of PSTD after evaluating the class, conference, course, or seminar. Licensees must also provide proof of attending eight (8) hours of HAZWOPER Refresher class updates every year.
- (e) Sampling, sampling at tank closures, investigations, and remediation or any other activities directed by PSTD must be under the supervision of a Licensed Environmental Consultant. All work requiring supervision by Licensed Environmental Consultants must contain a verification statement signed by the consultant in supervisory control.
- (f) Licensed Environmental Consultants must supervise and/or perform work only in the areas in which they are educated and/or experienced.

[Source: Added at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 26 Ok Reg 1841, eff 7-1-09; Amended at 30 Ok Reg 594, eff 7-1-13; Amended at 32 Ok Reg 811, eff 8-27-15; Amended at 35 Ok Reg 1033, eff 10-1-18; Amended at 36 Ok Reg 598, eff 8-1-19]

165:29-3-91. Licensee disciplinary action procedure

A license issued by PSTD is a designation of competence to the public in the area of licensee expertise. PSTD is not limited to, but may use the following disciplinary action for PSTD licensees:

- (1) **Informal reprimand.** The Manager of the appropriate PSTD department will call offending licensee for an informal discussion addressing the recent infraction and place a memo in the licensee's file documenting the discussion and nature of the violation.
- (2) **Formal reprimand.** The Manager of the appropriate PSTD department will prepare a letter of reprimand to the licensee addressing the offense. The letter of reprimand will provide the licensee an opportunity to formally dispute alleged violation(s). The reprimand letter, licensee's response, all recourse actions following licensee rebuttal, if any, and the Manager's final decision(s) will be placed in the licensee's file and maintained by PSTD.
- (3) **License suspension, revocation and/or refusal to renew a license.** If the Director elects to pursue suspension, revocation, or refusal to renew, a notice of such action will be sent to the licensee by certified mail/return receipt requested. The notice will state the date and time of the hearing scheduled before an Administrative Law Judge.

[Source: Added at 36 Ok Reg 598, eff 8-1-19]

165:29-3-92. License penalties

(a) PSTD has the responsibility to deny, suspend, refuse to renew or revoke the license of, or reprimand, any Licensed Environmental Consultant who is found in violation of:

- (1) The practice of any fraud or deceit in obtaining a license or in performing work pursuant to this Chapter.
- (2) Reckless or willful disregard, incompetence or misconduct in work performed pursuant to this Chapter.
- (3) Knowingly making false statements or signing false statements, certificates or affidavits to the PSTD or to clients.
- (4) Aiding or assisting another person in violating any provision of this Chapter.
- (5) Signing a verification statement for work performed pursuant to this Chapter that was not performed by the licensee.
- (6) Engaging in dishonorable, unethical or unprofessional conduct of a character likely to deceive, defraud or harm a customer or the public.
- (7) Failure to comply with this Chapter, OAC 165:25, 165:26, 165:27, and/or the Oklahoma Petroleum Storage Tank Consolidation Act (17 O.S. §§ 301 et seq.).
- (8) Being under indictment or convicted of a felony for any criminal offense that impacts their obligation to PSTD.

(b) Failure to submit required PSTD paperwork, test results, and/or reports in the online format established by PSTD within the required timeframe may result in enforcement action.

(c) Disciplinary action levels against PSTD licensees include but are not limited to informal reprimand, formal reprimand, license suspension, license revocation and refusal to renew.

(d) Any licensee in violation of Commission enabling statutes, PSTD rules, requirements and/or Commission orders may be subject to disciplinary action levels mentioned above and/or fines assessed by the Commission after notice and hearing.

[Source: Added at 36 Ok Reg 598, eff 8-1-19; Amended at 37 Ok Reg 1157, eff 10-1-20]

SUBCHAPTER 5. ADMINISTRATIVE PROVISIONS

165:29-5-1. Hearings, orders and exceptions

(a) Hearings to enforce or exceptions to the provisions of this Chapter will be conducted in accordance with OAC 165:5.

(b) The Commission will issue orders after notice and hearing as necessary to enforce the provisions of this Chapter or PSTD enabling statutes to protect property, the public health, and safety, and the environment.

CHAPTER 30. MOTOR CARRIERS, PRIVATE CARRIERS AND TRANSPORTATION NETWORK COMPANIES

Editor's Note: Effective 4-24-00, the Corporation Commission was given the authority to "promulgate rules to administer a hazardous waste transportation registration and permitting program for motor carriers engaged in transporting hazardous waste . . ." [Laws 2000, c. 130, § 3]. As a result, the Department of Environmental Quality revoked related sections 252:205-7-1, 252:205-7-3, and 252:205-21-3 by emergency action on 1-2-01 and permanent action on 6-1-01, and the Corporation Commission promulgated numerous revisions and additions to this Chapter 30 by emergency action on 10-11-00 and permanent action on 7-1-01. For additional information, see Laws 2000, c. 130.

[Authority: OKLA. CONST. Art IX, §§ 18, 19; 17 O.S., § 40; 47 O.S., §§ 161 through 230.34b, 966, 1013, 1106 and 1166 through 1170]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:30-1-1. Purpose

The public policy of this State, as declared by the Legislature, requires that motor carriers and private carriers, except as provided in this Chapter, should be regulated by the Oklahoma Corporation Commission, hereinafter referred to as the Commission, to protect the public interest, the environment and the highways of the state of Oklahoma and ensure compliance with applicable safety rules and

regulations. The public policy of this State, as further declared by the Legislature, requires that motor carriers of household goods be regulated by the Commission in such manner as to establish standards for public safety, fair competitive practices, adequate and dependable service and protection of shippers from deceptive or unfair practices. The public policy of this State, as further declared by the Legislature, requires that transportation network companies be regulated by the Commission in such a manner as to implement and enforce public safety standards and insurance requirements as required by statute. The rules in this Chapter are intended to implement that public policy and to carry out the Commission's statutory duty of regulation in the public interest. In case of doubt as to the meaning of any language of the rules in this Chapter, that construction should be adopted which is consistent with the Constitution and Statutes of Oklahoma.

[Source: Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Added at 26 Ok Reg 2947, eff 6-22-09 (emergency); Amended at 27 Ok Reg 1773, eff 7-1-10; Amended at 33 Ok Reg 633, eff 9-1-16]

165:30-1-2. Definitions

In addition to terms defined in 47 O.S., Sections 161 through 180m et seq., the Oklahoma Transportation Network Company Services Act and the Motor Carrier Act of 1995, the following words or terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"110% rule" means the household goods carrier must deliver the shipper's goods once the shipper pays 110% of the estimated or agreed upon charges.

"Alliance" means the Alliance for Uniform Hazardous Material Transportation Procedures, a confederation of state, local industry and environmental representatives for the purpose of administering and enforcing a uniform hazardous materials transporters program as established by HMTUSA.

"Accessorial services" means services provided by an intrastate motor carrier of household goods at the request of a shipper that may be in addition to the actual transportation of the household goods. Examples of accessorial services are packing, unpacking, appliance servicing, loading/unloading of large items (such as a piano), climbing/descending stairs, demurrage, etc.

"Audit" means an examination of records, source documents and any other information supporting a regulated entity's application or return; or a review performed by staff as a result of a complaint or prior enforcement actions taken.

"Authority" means a general term referring to permission issued by the Commission to a motor carrier to perform operations under the jurisdiction of the Commission. The term authority is not applicable to vehicle registrations, fuel licenses or permits, or TNC permits.

"Base state" means the state selected by a motor carrier according to the procedures established by a uniform program

"Binding estimate" means a written agreement made in advance between the intrastate household goods carrier and the shipper which guarantees the total cost of the transportation of the household goods based upon the quantities and services shown on the estimate.

"CFR" means the Code of Federal Regulations.

"Consignee" means the person or place shown on the shipping documentation as the location to which a carrier is directed to deliver a shipment.

"Consignor" means the person who offers goods for shipment.

"Commission" means the Oklahoma Corporation Commission.

"Corporate family" means a group of corporations consisting of a parent corporation and all subsidiaries in which the parent corporation owns directly or

indirectly one hundred percent (100%) interest.

"Deleterious substance" means any chemical, salt water, oilfield brine, waste oil, waste emulsified oil, basic sediment, mud or injurious substances produced or used in the drilling, development, production, transportation, refining and processing of oil, gas and/or brine mining.

"Environmental restoration" means restitution for loss, damage, or destruction of natural resources arising out of the accidental discharge, dispersal, release or escape into or upon the land, atmosphere, watercourse, or body of water, of any commodity transported by a motor carrier. This includes the cost of removal and the cost of necessary measures taken to minimize or mitigate damage to human health, the natural environment, fish, shellfish and wildlife.

"Exceeding authority" means a motor carrier operating outside or beyond the purview of an issued license, certificate, permit, registration or other authority issued by the Commission or a reciprocal state.

"FMCSA" means the Federal Motor Carrier Safety Administration.

"For-hire motor carrier" means a person operating upon any public highway engaged in the transportation of property or passengers for compensation or consideration or for commercial purposes.

"Gross Combination Weight Rating" (GCWR) means the value specified by the manufacturer as the loaded weight of a combination (articulated) vehicle. In the absence of a value specified by the manufacturer, GCWR will be determined by adding the GVWR of the power unit and the total weight of the towed unit and any load thereon.

"Gross Vehicle Weight" (GVW) means the registered weight of the vehicle or any lawful registered combination weight (Gross Combination Weight or GCW).

"Gross Vehicle Weight Rating" (GVWR) means the value specified by the manufacturer as the loaded weight of a single vehicle (gross vehicle weight rating) and may include any lawful combination.

"Harvest permit" means a document issued by the Commission to a motor carrier engaging in the commercial transportation of farm products in a raw state. A harvest permit encompasses vehicle registration, fuel permit and intrastate operating authority requirements of the State of Oklahoma.

"Hazardous waste" means any material that is subject to the "Hazardous Waste Manifest Requirements" of the United States Environmental Protection Agency specified in Title 40, CFR, Part 262.

"Hazardous waste permit" means the document issued by a participating state which represents a specific motor carrier's registration to transport hazardous waste in states that participate in the uniform hazardous waste program.

"HMTUSA" means the Hazardous Materials Transportation Uniform Safety Act of 1990.

"Household goods" means the used personal effects and property of a dwelling.

"Hunter's permit or Unladen permit" means a permit that provides temporary registration to an apportionable vehicle at the unladen (empty) weight of the vehicle. It is commonly used by a vehicle lessor to move a vehicle, without any load, to another jurisdiction so the lessor can establish a new contractual relationship with a different motor carrier.

"Identification device" means an annual, fee-paid, nontransferable device issued by the Commission to be carried in each and every vehicle.

"IFTA" means the International Fuel Tax Agreement. The IFTA is a motor fuel use tax reciprocity agreement between the United States contiguous states and certain Canadian provinces which allows a licensee to report and pay motor fuel use taxes to a base jurisdiction for distribution to other member jurisdictions in which the licensee traveled and incurred motor fuel use tax liability.

"Intercorporate hauling" means the transportation of property, passengers or household goods by motor vehicle, for compensation, by a carrier which is a member of a corporate family, as defined in this Section, when said transportation for compensation is provided for other members of the corporate family.

"Interstate" means a shipment having an origin or destination into, out of or through two or more states.

"Intrastate" means a shipment having an origin and destination wholly within one state.

"IRP" means the International Registration Plan. The IRP is a commercial vehicle registration reciprocity agreement between the United States contiguous states and certain Canadian providences which allows a registrant to pay and report commercial vehicle registration fees to a base jurisdiction for distribution to other member jurisdictions in which the registrant travels.

"IVDR" means an Individual Vehicle Distance Record which is a document where the required operational information, as set forth by IRP and IFTA, can be recorded.

"Letter of filing" means a document issued by the Commission to a motor carrier as evidence of temporary compliance with the hazardous waste uniform program.

"Motor carrier" means a for-hire motor carrier or a private motor carrier operating in interstate or intrastate commerce.

"Motor License Agent (MLA)" means any person meeting the requirements for appointment as a motor license agent pursuant to 47 O.S. § 1140 and authorized by the Oklahoma Corporation Commission to process vehicle registrations, collect associated fees and issue credentials pursuant to the IRP and the Oklahoma Vehicle License and Registration Act (47 O.S. Chapter 74).

"NAIC" means the National Association of Insurance Commissions.

"Non-binding estimate" means the estimated total cost to transport household goods intrastate based upon the weight of the shipment, volume of the shipment, amount of time to perform the movement and/or any accessorial services requested.

"OTNCS Act" means the Oklahoma Transportation Network Company Services Act, 47 O.S. § 1010 et seq.

"Participating state" means a state electing to participate in a uniform program by entering into a base state agreement.

"PIN" means personal identification number.

"Principal place of business" means a single location that serves as the motor carrier's headquarters and where it maintains or can make available its operational records.

"Private motor carrier" means a person who operates a commercial motor vehicle and is not a for-hire motor carrier.

"Process agent" means a representative upon whom court papers may be served in any proceeding brought against a motor carrier, broker, or freight forwarder.

"Registration" means the identification of hazardous waste transporters through a national base state system.

"Reciprocal state" means a jurisdiction with which the Commission has entered into a reciprocal agreement regarding the uniform registration, licensing or permitting of motor carriers.

"Shipper" means a person authorized to tender a shipment to a carrier and may include, but is not limited to, a consignor, consignee or beneficial owner of the shipment.

"TNC" means a Transportation Network Company.

"Trip permit" means a temporary authorization issued by the Commission granting permission to conduct operations as a motor carrier in intrastate and/or interstate commerce.

"Truck yard pit" means any pit used to store or catch fluids or wash fluids in a truck terminal or maintenance facility as the result of transportation related activities.

"UCR" means Unified Carrier Registration.

"Uniform application" means a uniform motor carrier registration, licensing or permit application form established under a uniform program.

"Uniform program" means any law, rule, policy, practice and/or all combinations thereof which pertain to the regulation of motor carriers by motor vehicle operating in interstate or intrastate commerce over the highways of Oklahoma and is recognized, adopted and enforced or administered by the Transportation Division only when in concert and reciprocal with one or more states which adopt, recognize, administer and enforce the exact same rule, law, policy, practice and/or all combinations thereof.

"Unprocessed agricultural commodities" means all products raised or produced by tillage and cultivation of the soil, pasture grasses, orchard products, trees in their raw state and products produced by livestock (such as milk, wool, eggs, honey and manure). The term also includes those products embraced within the above definition which have been processed for purposes of handling, storage, preservation or transportation (such as washing, cleaning, wrapping, packaging, boxing, baling, trimming, drying, sorting, sizing, grading, cooling, spraying and fumigating). The term does not include those products embraced within the above definition which, as a result of some treatment or processing, have been so changed that they are no longer in their natural or raw state, but possess new forms, qualities, or properties or result in combinations.

"USDOT" means the United States Department of Transportation.

SUBCHAPTER 3. INTRASTATE MOTOR CARRIERS

PART 1. APPLYING FOR A LICENSE

165:30-3-1. Obtaining a license

(a) No intrastate motor carrier shall operate upon any street, road, public highway or dedicated public thoroughfare of this State for the transportation of passengers or

property for hire without first obtaining from the Commission a license as provided in this Section. A license issued under this Subchapter shall not include transportation as a motor carrier of household goods. Motor carriers of household goods must comply with Subchapter 13 of this Chapter.

(1) An applicant for a license shall file with the Commission a written application on the appropriate form prescribed by the Commission (TDF 1), and shall tender with the application a filing fee as prescribed by law or by Commission rule.

(2) The application shall be assigned a personal identification number (PIN), which shall be the permanent identification number for all matters relating to authority granted therein. Any application thereafter filed to amend the license by the same applicant shall be filed in the same cause under the original PIN, and otherwise shall be governed by the provisions of this Chapter relating to an application for license. Each subsequent application shall also bear a sub-number in sequence.

(3) A license shall be personal to the holder thereof, and shall be issued only to an individual, a corporation, a limited liability corporation, a partnership or some other legally recognized entity.

(4) The filing of an application for a license does not of itself authorize any motor carrier operations by the applicant. Such operations are prohibited until after all requirements have been met, and a license has been issued. All requirements for compliance with this Chapter shall be met within thirty (30) days from date of receipt of a motor carrier license application by the Commission. Failure to comply will result in dismissal of the application for a license. Licenses issued shall be valid for a maximum of one year and may be renewed after application has been filed as provided by this Chapter.

(5) No license for intrastate operations shall be issued until after the applicant has provided a satisfactory USDOT safety rating or the applicant has demonstrated its ability to conduct operations in a safe and reasonable manner and applicant is in compliance with all applicable rules and laws of the State of Oklahoma; has furnished proper proof of all insurance required by this Chapter and all applicable state statutes; and has purchased an appropriate number of identification devices.

(6) The application shall require the following:

(A) Name, single trade name (if any), mailing address, physical address, email address, telephone number and domicile county of the applicant.

(B) The type of applicant (indicating if sole proprietorship, partnership, corporation or other legal entity), specifying the names of all partners, officers and/or directors listing the mailing, physical and email addresses of each.

(C) The type of operations for which the applicant is applying.

(D) The name and address of the motor carrier's process agent in Oklahoma (if the motor carrier does not maintain its principal place of business or a terminal in Oklahoma).

(E) Declaration of its USDOT number. Motor carriers without a USDOT number must obtain a USDOT number from FMCSA or the Commission prior to a license being issued.

(F) Declaration of its USDOT safety rating and safety compliance.

(G) Declaration of size and weight compliance.

(H) A listing of all power vehicles and trailers to be used, detailing the model, make and capacity of each vehicle and denoting whether each vehicle is owned or leased.

(I) A description of all terminal and dock facilities.

(J) Declaration the applicant is in full compliance with all other state laws, rules and regulations.

(K) Any other information the Commission deems pertinent.

(7) Every person operating under the Motor Carrier Act of 1995 and the rules of this Commission shall possess a copy of this Chapter governing the operations of motor carriers.

(8) A motor carrier desiring to modify its license operations shall file a sub application (TDF 1). Sub applications to include hazardous materials must comply with the provisions in this Section. Sub applications to modify other types of operations shall be exempt from (5) and (6) (D) -(I) of this subsection.

(9) A copy of the current license under which a motor carrier operates shall be carried at all times in each power unit by the motor carrier.

(b) A motor carrier engaged in intercorporate hauling shall be subject to this Subchapter.

(c) Motor carrier operations, other than motor carriers of passengers, are exempt from this Subchapter when:

(1) Conducted strictly within a municipality, or

(2) Conducted by a federal, state or local government.

(d) Motor carriers of passengers shall be exempt from this Subchapter when:

(1) Operating a taxicab, as defined by 47 O.S. § 1-174, wholly within a municipality, provided the operator of the taxicab is licensed by the municipality in which business is conducted;

(2) Operating a bus, as defined by 47 O.S. § 1-105, not between two or more cities or towns, provided the operator of the bus is licensed by a municipality in which business is conducted.

(e) Applicant may be issued a provisional intrastate license not to exceed ninety (90) days from the date application is filed, provided all other requirements for the intrastate license have been met. Applicant must provide a written request for the provisional intrastate license to the Director of the Transportation Division. If the provisional intrastate license is issued, a copy of the provisional intrastate license must be carried in each vehicle operated by the Applicant.

(f) The Commission may grant or deny the motor carrier license application or may impose conditions, stipulations and limitations on the license. If the Commission deems a hearing on the application to be necessary, the hearing shall be set within thirty(30) days of receipt of a complete application.

(g) No intrastate motor carrier license shall be issued to an applicant until all outstanding fines or judgments due the Commission or other state(s) regulatory agencies have been satisfied.

(h) All proceedings subsequent to the application, shall be governed by applicable provisions of the Commission's Rules of Practice, OAC 165:5.

165:30-3-1.1. Cancellation of intrastate certificates and permits [EXPIRED]

[Source: Added at 12 Ok Reg 1005, eff 1-1-95 through 7-14-95 (emergency)¹]

EDITOR'S NOTE: ¹This emergency action expired without being superseded by a permanent action. Upon expiration of an emergency action enacting a new Section, the Section is no longer effective. Therefore, on 7-15-95 (after the 7-14-95 expiration of the emergency action), Section 165:30-3-1.1 was no longer effective. For the official text of the emergency rule that was in effect from 1-1-95 through 7-14-95, see 12 Ok Reg 1005.

165:30-3-2. Temporary authority [REVOKED]

[Source: Revoked at 12 Ok Reg 1005, eff 1-1-95 (emergency); Revoked at 12 Ok Reg 2077, eff 7-1-95]

165:30-3-3. License and certificate renewals

(a) Any motor carrier desiring to continue intrastate motor carrier operations as granted in its license or certificate, shall, prior to the date of license or certificate expiration; apply for renewal by submitting the appropriate application form (TDF2 or MCF2) and all supporting documentation. Each renewal application shall be properly signed, attested to as follows:

- (1) Application of sole proprietorship must be signed by owner.
- (2) Application of partnership must be signed by one of the partners.
- (3) Application of corporation must be signed by an officer.

(b) All intrastate motor carrier licenses and certificates issued by the Commission shall expire the same calendar month as issued, and shall be valid for a period of one (1) year.

(c) Renewal applications shall be accompanied by a filing fee as prescribed by the Commission, unless filed simultaneously with a sub application to modify operations.

(d) A renewal application may be set for hearing at the discretion of the Commission for good cause.

(e) An intrastate motor carrier desiring to renew its license or certificate should apply for renewal of its license or certificate a minimum of thirty (30) days prior to its expiration.

(f) A renewal application will not be accepted if the license or certificate has previously expired, unless the Director of the Transportation Division reviews and approves the acceptance of the application for renewal.

(g) No intrastate motor carrier license or certificate shall be renewed until all outstanding fines or judgments due the Commission or other state(s) regulatory agencies have been satisfied.

(h) No intrastate motor carrier operations shall be performed under an expired motor carrier license or certificate.

PART 3. LICENSE REQUIREMENTS

165:30-3-11. Insurance

(a) No motor carrier whose principal place of business is in Oklahoma shall conduct any operations in this State unless such operations are covered by a valid primary bond or insurance policy issued by an insurer authorized or approved by

the Oklahoma Insurance Department. No motor carrier whose principal place of business is not in Oklahoma shall conduct any operations in this State unless such operations are covered by a valid bond or insurance policy issued by an insurer licensed or approved by the insurance regulatory authority of the state of their principal place of business or the Oklahoma Insurance Department. No holder of an authority shall conduct any operations before a proper certificate of insurance(s) has been filed with, and approved by the Commission. A surety bond containing all obligations provided by this Section may be substituted for an insurance policy.

(b) Every motor carrier shall file with, and must be approved by, the Commission a certificate on Form E or G certifying that there is in effect a valid bond or insurance policy covering operations in Oklahoma to protect the public against loss of life, injury, property damage, and including environmental restoration in minimum amounts, of combined single limits, for bodily injuries to, or death of all persons injured or killed in any accident, and loss or damage in any one accident to property or others (excluding cargo). Minimum liability insurance limits as set forth in 49 CFR Part 387 shall also be applicable to intrastate operations unless otherwise specified in subsections (b)(1)-(4).

(1) Motor carriers of property using vehicles with a gross vehicle weight rating (GVWR) of 10,000 pounds or more:

(A) Transporting property, non-hazardous commodities or transporting hazardous waste, materials or substances not listed in 49 CFR Part 387.9 - \$750,000.

(B) Transporting deleterious substances - \$750,000.

(C) Transporting hazardous waste, materials, or substances- as required by 49 CFR, Part 387.9.

(2) Motor carriers of property using only vehicles with a GVWR under 10,000 pounds:

(A) Transporting commodities not listed in (B) of this paragraph- \$300,000.

(B) Transporting hazardous waste, materials or substances - as required by 49 CFR Part 387.9.

(3) Motor carriers of the following types of property, materials, and products (also known or identified as restricted property) - \$350,000:

(A) Sand, rock, gravel, rip-rap, aggregate or dirt.

(B) Asphaltic mixtures and similar mixtures and compositions (excluding concrete and concrete mixtures) used in road, highway and other ground surface paving.

(C) Unprocessed forestry products and by products thereof not in a finished state.

(D) Unprocessed agricultural commodities.

(E) Ordinary livestock.

(4) Motor carriers of passengers (manufacturer's designed seating capacity includes the driver):

(A) Utilizing vehicles having a seating capacity of six (6) or less passengers - \$100,000.

(B) Utilizing vehicles having a seating capacity of seven (7) - nine (9) passengers - \$750,000.

(C) Utilizing vehicles having a seating capacity of ten (10) to fifteen (15) passengers - \$1,000,000.

(D) Utilizing vehicles having a seating capacity of sixteen (16) or more passengers \$5,000,000.

(5) Motor carriers of household goods - \$750,000.

(c) Every motor carrier of freight, except a motor carrier of household goods, shall be exempted from filing proof of cargo liability insurance. Every motor carrier of household goods shall file with, and be approved by, the Commission an additional certificate on Form H or J that there is in effect a valid bond or insurance policy issued by a State Insurance Department authorized provider as security required to compensate shippers or consignees for loss of or damage to property coming into the motor carrier's possession. Security in the amount of at least Five Thousand Dollars (\$5,000) is required to cover loss of or damage to property carried on any one motor vehicle in connection with its transportation service and in the amount of Ten Thousand Dollars (\$10,000) for the loss of or damage to or aggregate of losses of or damages to property occurring at any one time and place.

(d) Motor carriers of hazardous materials or hazardous waste shall maintain a properly executed Form MCS-82 or MCS-90 in effect as required by 49 CFR 387.

(e) The Commission may by order grant authority to operate or to continue operating as a motor carrier conditional upon carrying insurance coverage in amounts larger than prescribed by (b) of this Section

(f) No certificate of insurance or surety bond filed with the Commission pursuant to this Section shall be canceled, unless the authorization to conduct operations has been canceled, except after thirty (30) days written notice made to the Commission, on Form K or L, which notice shall be effective only upon actual receipt thereof by the Commission.

(g) Insurance certificates or surety bonds may be canceled without the thirty (30) days written notice on Form K or L only when the authorization to operate has previously expired or canceled, the motor carrier provides an affidavit stating no operations have been conducted and the effective date of the cancellation notice is not before the date the cancellation notice is received in the Commission.

(h) Insurance certificates or surety bonds not properly canceled or expired shall be considered expired one (1) year after the motor carrier's authorization to operate has been canceled or expired.

(i) Insurance certificates or surety bonds approved by this Commission shall be replaced by more recent insurance certificates or surety bonds. The liability of the retiring insurer or surety shall be terminated as of the effective date of the replacement insurance certificate or surety bond provided the replacement is approved by this Commission.

(j) No certificate of insurance shall be filed with the Commission, which contains a provision to the effect that liability thereunder may be limited or avoided because of the culpability, the recklessness, or the condition of the driver of the vehicle involved or any other restriction relating to the driving or operation of the vehicle.

(k) Every certificate of insurance filed with the Commission shall provide that the public is protected from damage sustained through operations of any and all vehicles operated by the motor carrier insured, whether or not listed or identified in the policy; and that liability is not limited by the description of any particular vehicle or route which may be traveled by the motor vehicle in transporting passengers or property under the certificate or permit or license.

(l) Every certificate of insurance filed with the Commission shall be executed by an officer or authorized agent of the insurance company; and if executed by an agent, a copy of his written authority or power of attorney to execute the same shall be attached to the certificate.

(m) When insurance is provided by more than one insurer in order to aggregate security limits for motor carriers, a separate insurance certificate and endorsement

- is required of each insurer. For each motor carrier, no more than one primary insurance filing and no more than two excess insurance filings shall be approved.
- (n) Every motor carrier shall maintain in force at all times all insurance required by state laws and by this Section. Failure for any cause to maintain any required insurance in force shall automatically and without notice suspend the license or authority of a motor carrier until proper insurance is filed.
- (o) Whenever the license or authority of a motor carrier is suspended for failure to maintain in force insurance required by this Section, the carrier must file, within sixty (60) days after commencement of the suspension, proper certificate(s) of insurance as provided in this Section and a sufficient showing, by affidavit or otherwise, that no operations were conducted during the period that insurance was not in force (TDF 18).
- (p) Whenever a motor carrier fails to provide proper certificates of insurance within sixty (60) days after suspension thereof as provided in this Section, the motor carrier's certificate or permit, license, or other authority shall be canceled by operation of law, and without notice. A certificate or permit, license, or other authority so canceled shall not be reinstated or otherwise made operative except upon proper showing, at a hearing, that the motor carrier was actually covered by proper insurance during the suspension or cancellation period, and that failure to file with the Commission was not due to the motor carrier's own negligence.
- (q) Any motor carrier conducting operations under a suspended or canceled authority shall not be eligible to apply for a new authority for a period of not less than one hundred eighty (180) days. The one hundred eighty (180) day period shall be determined by either the date insurance on file expires or the date a violation is discovered, whichever occurrence is later.
- (r) A person may not require indemnification from a motor carrier as a condition to the following:
- (1) The transportation of property by the motor carrier.
 - (2) Entrance onto property by the motor carrier for the purpose of loading, unloading or transporting property.
 - (3) Subsection (r)(2) of this Section does not apply to a claim arising from damages or losses from the wrongful or negligent act or omission of the motor carrier.
- (s) Insurance filings and cancellation notices required by this Chapter may be accepted electronically as set forth by the Transportation Division. Electronic insurance filings and cancellations shall be held to the same standard and carry the same force and effect as if accepted through traditional paper filings.
- (t) Insurance companies or their underwriters desiring a hard copy of an approved or disapproved insurance filing or insurance cancellation must submit the insurance filing or insurance cancellation in duplicate and additionally provide a self-addressed stamped envelope.

[Source: Amended at 10 Ok Reg 4447, eff 1-1-94 (emergency); Amended at 10 Ok Reg 4497, eff 1-1-94 (emergency); Amended at 11 Ok Reg 3727, eff 7-11-94; Amended at 11 Ok Reg 3735, eff 7-11-94; Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Amended at 13 Ok Reg 247, eff 11-1-95 (emergency); Amended at 13 Ok Reg 2419, eff 7-1-96; Amended at 14 Ok Reg 1251, eff 5-12-97; Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 18 Ok Reg 23, eff 10-11-00 (emergency); Amended at 18 Ok Reg 2384, eff 7-1-01; Amended at 26 Ok Reg 1398, eff 7-1-09; Amended at 27 Ok Reg 1773, eff 7-1-10; Amended at 29 Ok Reg 951, eff 7-1-12; Amended at 30 Ok Reg 1042, eff 7-1-13; Amended at 34 Ok Reg 977, eff 9-11-17; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-3-12. Identification device

- (a) Every motor carrier operating upon the public highways of the State of Oklahoma shall purchase and place within each power unit operated by said motor carrier an identification device issued by this Commission, and make available for

inspection upon request.

- (1) Only one (1) identification device is required for each power unit.
- (2) The annual fee for each identification device will be as prescribed by law or Commission rule.
- (3) Identification devices shall expire simultaneously with the expiration date of the annual license issued to the motor carrier.

(b) No identification device may be sold or otherwise transferred; except if such motor carrier provides a newly acquired vehicle in substitution therefor, each identification device on the discontinued vehicle, if such device is still in the possession of the motor carrier, may be transferred to the substitute vehicle or any subsequently substituted vehicle.

(c) Identification devices found to be in the possession of a carrier not authorized will be confiscated and returned to the Commission by a motor carrier enforcement officer.

(d) No identification devices will be issued to any motor carrier who does not meet all statutory, regulatory and Commission requirements.

(e) Identification device(s) must be purchased prior to the expiration of each annual expiration of a multiple year renewal license to extend the motor carrier license. Failure to timely purchase the identification device(s) will cause the motor carrier license to expire. Failure to purchase the identification device(s) within 30 days of the expiration of the license will cause the motor carrier license to automatically expire and subject to reinstatement rules as prescribed in OAC 165:30-3-103.

[Source: Amended at 10 Ok Reg 4447, eff 1-1-94 (emergency); Amended at 10 Ok Reg 4497, eff 1-1-94 (emergency); Amended at 11 Ok Reg 3735, eff 7-11-94; Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Amended at 13 Ok Reg 2419, eff 7-1-96; Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 21 Ok Reg 774, eff 7-1-04; Amended at 24 Ok Reg 1814, eff 7-1-07]

165:30-3-13. Deleterious Substance Transport Permit

(a) No person, motor carrier or private carrier shall transport any deleterious substance(s) in any quantity over twenty (20) gallons, without a Deleterious Substance Transport Permit (DSTP), to be issued by the Commission. A DSTP is required for soils contaminated by deleterious substances unless exempted under subsection (b) of this Section. The DSTP shall be required in addition to a motor carrier license as prescribed by this Chapter, when required.

(b) A DSTP is not required when:

- (1) Transporting deleterious substances to be applied to land pursuant to a soil farming permit. A valid copy of the soil farming permit must be carried in the vehicle at the time of transportation; or,
- (2) Transporting contaminated soil which surrounded a leaking underground storage tank or a leaking pipeline when such soil is being transported to and can be legally disposed of in a landfill permitted by the Oklahoma Department of Environmental Quality.

(c) No person, motor carrier or private carrier shall dump, disperse or otherwise release deleterious liquids or substances described herein upon a public highway, on private property, or at any place except as authorized by law.

(d) No motor vehicle used to transport salt water or other deleterious substances shall be equipped with a release device which can be operated in any manner from within the cab of any motor vehicle.

(e) The Commission may issue the permit upon applicant fulfilling all requirements. If issued, a copy of the permit must be carried in each motor vehicle transporting a deleterious substance. Motor carriers must maintain valid liability insurance on file with this Commission in accordance with OAC 165:30-3-11.

Failure to do so shall subject the permit to revocation.

(f) Notice of the application and hearing thereon shall not be required, unless the Commission shall so direct.

(g) Every person, motor carrier or private carrier holding a DSTP or transporting deleterious substances not requiring a DSTP pursuant to subsection (b) of this Section, shall maintain an accurate register in numerical order at the principal place of business and retain for inspection by Commission personnel at all times. The register shall consist of the shipping document or criteria as provided in (g) of this Section.

(h) Every vehicle transporting deleterious substances, whether under a DSTP or pursuant to subsection (b) of this Section, shall carry an individual shipping document for each load containing the information as follows:

- (1) Vehicle identification
- (2) Driver name
- (3) Shipper name
- (4) Legal description of the origin of the load
- (5) Volume and description of substance
- (6) Legal description of the destination of the load

(i) The shipping documentation may be transferred to the register. The register shall be maintained in numerical order by the permit holder and retained for inspection by Commission personnel at all times.

(j) Failure to maintain and preserve the records provided herein shall be grounds for revocation of the permit.

165:30-3-15. Annual report [REVOKED]

[Source: Amended at 11 Ok Reg 3727, eff 1-1-94 (emergency); Amended at 11 Ok Reg 3727, eff 7-11-94; Revoked at 12 Ok Reg 1005, eff 1-1-95 (emergency); Revoked at 12 Ok Reg 2077, eff 7-1-95]

165:30-3-16. Current address requirement

(a) Any notice required by law, the Commission's Rules of Practice, OAC 165:5, or this Chapter to be served upon or mailed to any holder of a certificate, permit or license shall be delivered or mailed to the last known mailing or email address as reflected by the records of the Commission. It is the duty of every holder of a certificate, permit or license to notify the Transportation Division by specific written request (TDF 17) of any change in the mailing, physical or email address of the principal place of business and mailing address thereof.

(b) Any non-resident motor carrier who has not filed a written designation of service agent with the Commission shall be deemed to have designated the Secretary of State of Oklahoma for the purpose of service of process by the Commission.

(c) Where such notice is required by law, Commission's Rules of Practice, OAC 165:5, or this Chapter is returned undeliverable, it will be grounds for revocation of the certificate, permit or license.

165:30-3-17. Markings

- (a) Every intrastate motor carrier shall obtain and display a USDOT number.
- (b) Each motor vehicle operated by a motor carrier shall be properly marked. The markings shall be in compliance with the Federal Motor Carrier Safety Regulations, 49 CFR Part 390.21 (b)-(d). A motor carrier vehicle operating under a DBA or trade name must first list the DBA or trade name on the carrier's operating authority.
- (c) If the motor carrier's USDOT number is designated as intrastate only, the letters OK must follow the carrier identification number.
- (d) A carrier shall immediately notify the Commission when filing changes on a USDOT identification report (MCS-150). This notification shall occur when a carrier updates its USDOT identification report (MCS-150) resulting in a change in name, dba, mailing, physical or email address, interstate to intrastate classification, intrastate to interstate classification, or any other modification that may affect the carrier's intrastate authority or permits issued by the Commission.
- (e) In the event a power unit is transferred or sold by a motor carrier, the carrier is responsible for removing the markings from the unit.

PART 5. CONDUCTING OPERATIONS

165:30-3-31. Compliance with laws and regulations

- (a) All intrastate motor carriers and private carriers, where applicable, shall conduct their operations in accordance with all applicable laws of the State of Oklahoma and all applicable rules of this Chapter. All licenses heretofore or hereafter granted by the Commission are subject to applicable provisions of law and of this Chapter as fully as if those laws and rules were set forth verbatim therein.
- (b) No intrastate motor carrier or private carrier shall operate or allow to be operated on the public highways of the State of Oklahoma any equipment that does not comply with safety criteria established by the USDOT, the rules of this Commission; or, the statutes of the State of Oklahoma. No motor carrier or private carrier shall permit any person to operate a motor vehicle in violation of any size or weight limits established by this Chapter, of OAC 595:30 or of the statutes of the State of Oklahoma. Every person operating vehicles upon the public highways of this State shall meet the minimum safety standards as established by the USDOT and the statutes of the State of Oklahoma. Any vehicle which fails to meet safety criteria, or size and weight standards, or which is operated by any person in violation of this subsection shall be prevented from continued use of the public highways of the State of Oklahoma.
- (c) The Commission adopts the oversize and overweight provisions of the rules as adopted by the Oklahoma Department of Public Safety in OAC 595:30.

[Source: Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Amended at 24 Ok Reg 1814, eff 7-1-07]

165:30-3-32. Shipping documentation

- (a) Every shipment shall be accompanied at all times by some form of written document of identification, which may be a bill of lading, freight bill, way bill, receipt, load ticket or other written instrument which sets out the date of shipment, commodity, weight, point of origin, point of destination, consignor and consignee.
- (b) Each shipping document shall represent a single shipment and shall not represent multiple shipments.
- (c) This Section 1 does not prohibit any motor carrier from utilizing an electronic system of documentation provided the information required in subsection (a) is evident.

[Source: Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Amended at 27 Ok Reg 1773, eff 7-1-10]

165:30-3-33. Records

- (a) All records required by this Subchapter shall be maintained at the location last designated by the motor carrier as its principal office. If no location in Oklahoma is so designated, upon demand, the records shall be made available at a location designated by the Commission, at the expense of the motor carrier.
- (b) All books, records and other documents required by this Subchapter must be retained for a period not less than three (3) years.

[Source: Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95]

165:30-3-34. Minimum standards

- (a) Every vehicle used for transportation of passengers or property shall be in safe operating condition, and shall possess all safety equipment required by the Statutes of Oklahoma and the regulations of the USDOT.
- (b) Every motor vehicle operating upon the highways of the State of Oklahoma shall be properly registered. Commercial motor vehicles with a GVWR/GCWR of 15,000 pounds or more must be registered by weight prior to transporting property.
- (c) A commercial motor vehicle may not be registered for a capacity less than its GVWR/GCWR.
- (d) Every motor vehicle used for transportation of passengers or property shall be adequate in size, design, and equipment to perform the transportation and other services required of it. Every vehicle used for transportation requiring specialized equipment shall be equipped with all features and equipment necessary to afford adequate protection to cargo and to the public. No vehicle shall be loaded in excess of applicable weight limits; nor in any event in excess of the reasonable capacity of the vehicle, or in such fashion as to endanger any portion of the cargo.
- (e) Every motor vehicle used for the transportation of explosives or any other dangerous substance shall comply with all applicable laws and rules as to safety, placarding and other transportation requirements.
- (f) All vehicles will be utilized in a manner that conforms with the manufacturer's design standards and specifications.
- (g) The Commission adopts the provisions of the rules and regulations as adopted by the Oklahoma Department of Public Safety in OAC 595:35, pertaining to 49 C.F.R. Federal Motor Carrier Safety Regulations, with all amendments and appendices thereto.

165:30-3-37. Leasing of equipment

(a) An authorized carrier may perform authorized intrastate transportation in equipment it does not own only under the following conditions:

- (1) There shall be a written lease granting the use of the equipment and meeting the requirements as set forth in (b) of this Section.
- (2) The authorized carrier acquiring the use of equipment under this Section shall identify the equipment in accordance with the Commission's requirements.
- (3) Upon termination of the lease, the authorized carrier shall remove all identification showing it as the operating carrier before giving up possession of the equipment.

(b) The written lease required pursuant to (a) of this Section shall contain the following provisions which shall be adhered to and performed by the authorized carrier as follows:

- (1) The lease shall be made between the authorized carrier and the owner of the equipment. The lease shall be signed by these parties or by their authorized representatives.
- (2) The lease shall specify the time and date or the circumstances on which the lease begins and ends.
- (3) The period for which the lease applies shall be for thirty (30) days or more when the equipment is to be operated for the authorized carrier by the owner or an employee of the owner.
- (4) The lease shall provide that the authorized carrier lessee shall have exclusive possession, control and use of the equipment for the duration of the lease. The lease shall further provide that the authorized carrier lessee shall assume complete responsibility for the operation of the equipment for the duration of the lease.
- (5) The amount to be paid by the authorized carrier for equipment and driver's services shall be clearly stated on the face of the lease or in an addendum which is attached to the lease. The amount to be paid may be expressed as a percentage of gross revenue, a flat rate per mile, a variable rate depending on the direction traveled or the type of commodity transported, or by any other method of compensation mutually agreed upon by the parties to the lease. The compensation stated on the lease or in the attached addendum may apply to equipment and driver's services either separately or as a combined amount.
- (6) The lease shall clearly specify the responsibility of each party with respect to the cost of fuel, fuel taxes empty mileage, permits of all types, tolls, detention and accessorial services, base plates and licenses, and any unused portions of such items. Except when the violation results from the acts or omissions of the lessor, the authorized carrier lessee shall assume

the risks and costs of fines for overweight and oversize trailers when the trailers are preloaded, sealed, the load is containerized, or when the trailer or lading is otherwise outside of the lessor's control, and for improperly permitted overdimension and overweight loads and shall reimburse the lessor for any fines paid by the lessor. If the authorized carrier is authorized to receive a refund or a credit for base plates purchased by the lessor from, and issued in the name of, the authorized carrier, or if the base plates are authorized to be sold by the authorized carrier to another lessor, the authorized carrier shall refund to the initial lessor on whose behalf the base plate was first obtained a prorated share of the amount received.

(7) The lease shall specify that payment to the lessor shall be made by the authorized carrier within fifteen (15) days after submission of the necessary delivery documents and other paperwork concerning a trip in the service of the authorized carrier. The paperwork required before the lessor can receive payment is limited to those documents necessary for the authorized carrier to secure payment from the shipper. The authorized carrier may require the submission of additional documents by the lessor but not as a prerequisite to payment.

(8) The lease shall clearly specify the right of the lessor whose revenue is based on a percentage of the gross revenue for a shipment to examine copies of the authorized carrier's freight bill before or at the time of settlement. The lease shall clearly specify the right of the lessor, regardless of method of compensation, to examine copies of the carrier's documentation upon which charges are assessed.

(9) The lease shall clearly specify all items that may be initially paid by the authorized carrier but ultimately deducted from the lessor's compensation at the time of payment or settlement together with a recitation as to how the amount of each item is to be computed. The lessor shall be afforded copies of those documents which are necessary to determine the validity of the charge.

(10) The lease shall specify that the lessor is not required to purchase or rent any products, equipment, or services from the authorized carrier as a condition of entering into the lease arrangement.

(11) As it relates to insurance, the lease shall clearly specify:

(A) The legal obligation of the authorized carrier to maintain insurance coverage for the protection of the public.

(B) The conditions under which deductions for cargo or property damage may be made from the lessor's settlements. The lease shall further specify that the authorized carrier must provide the lessor with a written explanation and itemization of any deductions for cargo or property damage made from any compensation owed to the lessor. The written explanation and itemization must be delivered to the lessor before any deductions are made.

(12) An original and two (2) copies of each lease shall be signed by the parties. The authorized carrier shall keep the original and shall place a copy of the lease in the equipment during the period of the lease. The owner of the equipment shall keep the other copy of the lease. Leases shall not be filed with the Transportation Division.

(c) All charges for transportation performed by equipment covered by this Section shall be made and billed by the lessee and all records shall be maintained as required by 165:30-3-33.

(d) A contract for lease of equipment with provision or option to purchase the equipment as part thereof shall be valid if otherwise in compliance with this Section.

(e) This Section shall not apply to a regular route carrier of passengers.

(f) No person shall rent equipment with driver to a private intrastate carrier or to a shipper, without appropriate certificate or permit or license from the Commission.

PART 7. CHANGE OF NAME OF LICENSE HOLDER

165:30-3-51. Name changes

(a) An application to change the name or business name of the holder of an intrastate motor carrier license, without any change in the legal identity of the holder or any change in the ownership of the license, except as provided in subsections (c), (d) or (e) below, shall be filed on the appropriate form prescribed (TDF3) under the permanent PIN of the holder with appropriate sub-number designation and with such filing fee as prescribed by law or by Commission rule. No notice or hearing shall be necessary unless the Commission so requires. Notice, if required, shall be as the Commission shall direct.

(b) Any change in legal identity of the holder of an intrastate motor carrier license, except as provided in subsections (c), (d) or (e) below, including but not limited to incorporation or dissolution of a corporation, formation or dissolution of a partnership or creation or dissolution of a trust shall require an original application for a license.

(c) Incorporation by a sole proprietor in which the sole proprietor is the majority shareholder of the corporation, limited liability corporation or limited liability partnership shall be deemed a name change. Incorporation by a partnership in which the partners are the majority shareholders of the corporation shall be deemed a name change.

(d) A change in legal entity from a corporation, limited liability corporation or a limited liability partnership to a sole proprietorship, a partnership, a limited liability corporation or a limited liability partnership in which the sole proprietor, partners or shareholders hold the majority of all issued and outstanding shares of the corporation shall be deemed a name change.

(e) The merger of two or more corporations in which the survivor is the holder of a current license shall be deemed a name change.

(f) The transfer of stock in a corporation that shall result in any entity controlling fifty one percent (51%) or more of the aggregate number of voting shares of the corporation shall not be deemed a name change.

(g) The employment of incorporation, change of name or similar action directly or indirectly as a device to circumvent the rules of this Chapter is prohibited.

PART 9. VIOLATIONS

165:30-3-71. Loading capacity - Safety compliance

- (a) No intrastate motor carrier or private carrier shall operate or allow any employee, agent or any other person to operate a motor vehicle owned or leased to it in violation of the size and weight limits established by the State Statutes. Factors to be considered when an application for suspension or revocation is made are set forth in subsection (d)(1) through (5).
- (b) No person, firm or corporation shall assist in the commission of such overweight violation or cause a motor vehicle to be overloaded.
- (c) No intrastate motor carrier shall operate or allow any employee, agent or any other person to operate a motor vehicle owned or leased to it in violation of the safety standards established by the state statutes.
- (d) A compliance audit may be conducted by the Commission and will be based upon, but not limited to the following:
- (1) Frequency of violations.
 - (2) Pattern of violations.
 - (3) Fleet size.
 - (4) Type of operation.
 - (5) Overweight excess.
- (e) Motor carriers obtaining a permit authorizing the operation of an oversize or overweight vehicle shall maintain a copy of the permit in accordance with 165:30-3-33.
- (f) When performing an overweight audit, a certified load ticket or scale ticket shall be considered the actual weight of the vehicle or vehicle combination unless other reliable evidence is presented.

165:30-3-73. Leasing of license

No intrastate motor carrier license, nor any part thereof, or rights thereunder shall be leased; nor shall the holder thereof sublet or in any manner permit the use thereof, or the exercise of any rights or privileges thereunder by another, except as provided in this Section. Violation of this Section shall be grounds for revocation of the license, and shall be grounds for denial of an application for a new or renewed license.

[Source: Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Amended at 13 Ok Reg 2419, eff 7-1-96]

165:30-3-74. Violations [REVOKED]

165:30-3-75. Advertising

(a) Any person who advertises to perform intrastate transportation services for which he does not hold a proper certificate or permit or license shall be in violation of this Section and subject to the penalties prescribed for contempt of the Commission.

(b) A motor carrier authorized to transport passengers must ensure all advertisements contain the motor carrier's USDOT number that is linked to the motor carrier's passenger authority license.

[Source: Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Amended at 29 Ok Reg 951, eff 7-1-12]

165:30-3-76. Contempt complaint

In addition to the procedures set forth in the Oklahoma Statutes and in the Commission's Rules of Practice, OAC 165:5 regarding the procedure in proceedings as for contempt, the following procedures may be followed for violations of this Chapter, and applicable statutes of Title 47 and Title 68:

(1) An enforcement officer/compliance inspector/ rate field agent (hereinafter referred to as "officer") of the Transportation Division may issue in the field a contempt citation for any violation of this Chapter or any applicable state statute. The officer shall furnish a copy of the citation to the person.

(2) The citation shall be in the form prescribed by the Commission's Transportation Division.

(3) A person served with a contempt citation may post bond or be released by the complaining officer upon personal recognizance as provided herein. The person shall indicate a plea on the citation, and sign the citation in the presence of the complaining officer. A person served with a citation may elect to change this plea to the citation at any time prior to and including the hearing date before the Administrative Law Judge. Any person electing to plead not guilty shall appear at the time and date set forth on the citation for a hearing on the matter before the Administrative Law Judge and, if not appearing, forfeit the bond posted. All Rules of Practice, OAC 165:5, of the Oklahoma Corporation Commission regarding procedures for hearing shall apply to the hearings provided for herein, except that the Administrative Law Judge may issue either an oral or written recommendation to the Commission en banc on the matter.

(A) The Commission shall accept bond payment of a fine in the form of cash, certified check, cashier's check, certified or guaranteed bank check, postal or commercial money order, guaranteed arrest bond certificate or any other form of payment accepted by the Commission. Such payment shall be in full satisfaction of the violation asserted in the complaint and the allegations and charges therein will be taken as confessed. The guaranteed arrest bond certificate must have been issued by either a trucking services club or surety company, officially authorized to issue such bonds for trucking violations in Oklahoma by the State Insurance Commission, or a trucking association authorized to transact business in Oklahoma by the State Insurance Commission. The guaranteed arrest bond certificate shall be signed by the person to whom it is issued and shall contain a printed statement that such surety company, trucking association or trucking services club guarantees to pay the fine imposed on such person.

(B) Any person may be released by the complaining officer on personal recognizance if the person is unable to post a bond and the person has been issued a valid license to operate the motor vehicle they are operating, by Oklahoma, or by another state jurisdiction within the United States, or by any party jurisdiction of the Nonresident Violator Compact; and the complaining officer is satisfied as to the identity of the person receiving the citation. A person released on personal recognizance shall post a bond with the Commission within ten (10) days of the writing of the citation. Failure to do so may result in detention of equipment or revocation of authority.

(C) The failure to timely appear at the hearing at the time and date set forth on the citation may result in a request for suspension of the person's driver's license in Oklahoma, or in the nonresident's home state pursuant to the Nonresident Violator Compact. The Commission's Transportation Division shall report all such requests for suspension to the Department of Public Safety which shall proceed as provided for by the provisions of Section 1115.5 of Title 22 of the Oklahoma Statutes.

(D) The violations for which fines shall be accepted and amounts thereof shall be as follows:

(i) Operating as a motor carrier without proper authority:

(I) First violation within a 12-month period -

\$300.00

(II) Second violation within a 12-month period -

\$400.00

(ii) Operating without carrying /producing a valid copy of the authority, permit, vehicle registration, fuel license, oversize or overweight permit, or display of fuel decal or identification device:

(I) First violation within a 12-month period -

\$125.00

(II) Second violation within a 12-month period -

\$200.00

(iii) Operating as a motor carrier carrying or producing an altered or fraudulent authority, oversize or overweight permit, vehicle registration, fuel license or license plate:

(I) First violation within a 12-month period -

\$1,000.00

(II) Second violation within a 12-month period -

\$1,500.00

(III) Third violation within a 12-month period -

\$2,000.00

(iv) Operating a commercial vehicle in excess of its registered weight by two thousand one (2,001) pounds or more:

(I) First violation within a 12-month period -

\$175.00

(II) Second violation within a 12-month period -

\$250.00

- (v) Transportation of a deleterious substance(s) without a current deleterious substance transport permit:
 - (I) First violation within a 12-month period - \$300.00
 - (II) Second violation within a 12-month period - \$400.00
- (vi) Operating a vehicle without proper registration:
 - (I) First violation within a 12-month period - \$175.00
 - (II) Second or third violation within a 12-month period - the amount as shown in (vi) above plus an amount as reflected in 47 O.S. §1133
- (vii) Operating motor vehicle without proper markings on vehicle:
 - (I) First violation within a 12-month period - \$175.00
 - (II) Second violation within a 12-month period - \$250.00
- (viii) Operating a commercial motor vehicle without a valid fuel permit:
 - (I) First violation within a 12-month period - \$175.00
 - (II) Second violation within a 12-month period - \$250.00
- (ix) Operating motor vehicle without valid lease agreement in vehicle:
 - (I) First violation within a 12-month period - \$125.00
 - (II) Second violation within a 12-month period - \$200.00
- (x) Operating motor vehicle without proper shipping or cargo ownership documentation in vehicle:
 - (I) First violation within a 12-month period - \$125.00
 - (II) Second violation within a 12-month period - \$200.00
- (xi) Failure to yield for inspection:
 - (I) First violation within a 12-month period - \$150.00
 - (II) Second violation within a 12-month period - \$200.00
- (xii) Operating as an interstate motor carrier while placed out of service by a federal agency:
 - (I) First violation within a 12-month period - \$300.00
 - (II) Second violation within a 12-month period - \$400.00
- (xiii) Operating as a transporter of hazardous waste without proper registration/permit:
 - (I) First violation within a 12-month period - \$350.00

- (II) Second violation within a 12-month period - \$500.00
- (xiv) Operating as an interstate motor carrier, freight forwarder, broker or leasing company without paying the appropriate UCR fee:
 - (I) First violation within a 12-month period - \$300.00
 - (II) Second violation within a 12-month period - \$400.00
- (xv) Operating as an interstate motor carrier, freight forwarder, leasing company or broker without an active USDOT number:
 - (I) First violation within a 12-month period - \$300.00
 - (II) Second violation within a 12-month period - \$400.00
- (xvi) Operating as an interstate motor carrier, freight forwarder, leasing company or broker without proper federal authority:
 - (I) First violation within a 12-month period - \$300.00
 - (II) Second violation within a 12-month period - \$400.00
- (xvii) Operating as motor carrier, carrier, freight forwarder, leasing company or broker without proper insurance on file:
 - (I) First violation within a 12-month period - \$300.00
 - (II) Second violation within a 12-month period - \$400.00
- (xviii) Operating oversize without a proper oversize permit; operating as an escort service without proper certification or violating its certification; failure to secure load; or failure to carry or produce a valid insurance security verification form, if required:
 - (I) First violation within a 12-month period - \$175.00
 - (II) Second violation within a 12-month period - \$250.00
- (xix) Refusal to weigh vehicle - \$500.00
- (xx) Operating a commercial vehicle in excess of its legal weight- amount as specified by state statute, or:
 - (I) From 700 to 2,000 pounds - \$200.00
 - (II) From 2,001 to 3,000 pounds - \$250.00
 - (III) From 3,001 to 4,000 pounds - \$300.00
 - (IV) From 4,001 to 5,000 pounds - \$350.00
 - (V) From 5,001 to 6,000 pounds - \$400.00
 - (VI) From 6,001 to 7,000 pounds - \$450.00
 - (VII) From 7,001 pounds and above - \$500.00
- (xxi) Violating a special permit or a variance permit - \$100.00

(xxii) Other violations, unless otherwise specified by the Oklahoma Statutes or by the Oklahoma Bond Schedule:

(I) First violation within a 12-month period - \$175.00

(II) Second violation within a 12-month period - \$250.00

(xxiii) The third violation within a twelve-month period of units (i) through (xviii) of the subparagraph, unless otherwise specified by the Oklahoma Statutes or the rules of this Subchapter, shall result in a contempt fine of \$500.00.

In addition, the Commission may suspend or revoke a motor carrier's authority, registration or permit.

(E) Every officer is authorized to serve process in motor carrier, private carrier and other Commission related matters.

PART 11. MISCELLANEOUS

165:30-3-91. Restricted parcel carriers [REVOKED]

[Source: Revoked at 12 Ok Reg 1005, eff 1-1-95 (emergency); Revoked at 12 Ok Reg 2077, eff 7-1-95]

165:30-3-92. Pollution abatement

(a) All transportation by motor vehicle of deleterious substances including salt water, brines, liquid mud, acids, or any other fluids used in the drilling, completion, operation or reworking of an oil or gas well and/or any fluids generated as a by-product or resulting from the production of an oil or gas well or the operation of a disposal facility or facility where equipment is cleaned shall be conducted in such a manner that prevents any pollution to the surface of the earth or any fresh water bearing formation. Pollution of surface water or subsurface water is hereby prohibited.

(1) This Section shall not be construed as modifying the rights, obligation or duties of any person under the law of this State, or any order, rule or regulation of the Oklahoma Water Resources Board, State Department of Health, Department of Environmental Quality, Oklahoma Wildlife Conservation Commission, State Board of Agriculture, Department of Pollution Control, Department of Public Safety or any other agency of this State with respect to the pollution of fresh water.

(2) When a complaint is received against any person or company alleging pollution as prohibited in this Section, or field investigations by Commission staff or other regulatory agencies indicates prohibited pollution occurring, the Transportation Division shall immediately initiate such action as is necessary or appropriate to abate the pollution.

(b) No transporters of fluids mentioned in this Section shall use an earthen pit for any storage of said fluids or the washing or otherwise cleaning of the inside of the trailer or container used to transport or store such fluids.

(c) Any truck yard pit used for the temporary storage of fluids from washing or cleaning activities of equipment used in the transportation of fluids mentioned in this Section shall not be utilized until the 1014T permit is issued by the Commission's Oil and Gas Division as set forth in OAC 165:10.

PART 13. SUSPENSION OR CANCELLATION OF LICENSE

165:30-3-101. Voluntary suspension or discontinuance of license

(a) An intrastate motor carrier may request cancellation of its license without notice or hearing.

(b) Any intrastate motor carrier requesting cancellation of its license while in good standing may reapply for a new license at any time.

[Source: Amended at 11 Ok Reg 3727, eff 7-11-94; Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Amended at 13 Ok Reg 2419, eff 7-1-96; Amended at 14 Ok Reg 2539, eff 7-1-97]

165:30-3-102. Involuntary suspension or revocation of license

(a) Any intrastate motor carrier license may be suspended or revoked by the Commission, or the holder thereof assessed a fine or other lawful punishment for violation of, or failure to comply with, any requirement or provision of law or of this Chapter.

(b) An application to revoke or suspend an intrastate motor carrier license may be filed by a member of the staff of the Commission or by a person adversely affected by the acts alleged. It shall be in the form of an application, and proceedings thereon, including notice and hearing if required, shall be as prescribed in the Oklahoma Corporation Commission's Rules of Practice, OAC 165:5.

(c) After hearing, the Commission may grant or deny the application, and may suspend or revoke the license, or any part thereof or rights thereunder, or the Commission may assess a fine or impose limitations or conditions upon the continuation of operations under the license as stated in the order.

(d) Any motor carrier conducting operations under a suspended or cancelled license, shall not be eligible to apply for a new license for a period of not less than one hundred eighty (180) days. Except for insurance violations as noted in 165:30-3-11, the one hundred eighty (180) day period shall begin the date a Commission order is signed suspending or cancelling a motor carrier license.

(e) The employment of incorporation, stock transfer, merger, change of name or similar action directly or indirectly as a device to evade subsection (d) of this Section is prohibited.

(f) Any violation of other state statutes or regulations shall be cause to initiate an application for suspension or revocation by staff or other adversely affected persons.

[Source: Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Amended at 14 Ok Reg 2539, eff 7-1-97]

165:30-3-103. Reinstatement of certificate or permit or license

(a) A motor carrier whose certificate, permit, license, or a portion thereof, has been cancelled by law or by order of the Commission, may file with the Commission a written application for reinstatement on the appropriate form prescribed by the Commission (TDF 8), and shall tender with the application a filing fee as

prescribed by law or by Commission rule.

(b) The application for reinstatement must be filed within three (3) months from the date the certificate, permit or license was cancelled by law or by Commission order and may be approved by the Director for Administrative reinstatement.

Applications not approved for administrative reinstatement may be set for hearing.

(c) The application shall be filed under the PIN as assigned to the certificate, permit, or license, with appropriate sub-number designation.

(d) If the authority was revoked due to lack of insurance on file and the carrier cannot furnish proper proof of continuous insurance, the Commission may reinstate the certificate, permit or license only after a hearing has been held and notice thereof has been given as prescribed by the Oklahoma Corporation Commission's Rules of Practice, OAC 165:5.

(e) No reinstatement shall be issued until all requirements of the certificate, permit or license have been fulfilled and a reinstatement fee as prescribed by law or Commission rule has been tendered.

[Source: Amended at 11 Ok Reg 3727, eff 7-11-94; Amended at 12 Ok Reg 1005, eff 1-1-95 (emergency); Amended at 12 Ok Reg 2077, eff 7-1-95; Amended at 13 Ok Reg 247, eff 11-1-95 through 7-14-96 (emergency); Amended at 14 Ok Reg 1251, eff 5-12-97; Amended at 21 Ok Reg 774, eff 7-1-04; Amended at 23 Ok Reg 509, eff 12-19-05 (emergency); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08]

165:30-3-104. Violations

(a) Every for-hire motor carrier, shipper, private motor carrier, their employees or any other person who violates or fails to comply with or procures, aids or abets in the violation of any provision of law or of any requirements of this Chapter; or who fails to obey, observe or comply with any order, decision, rule or regulation, direction, demand or requirement, or any part or provision thereof, of the Commission, or who procures, aids, or abets any corporation or person in its refusal or willful failure to obey, observe or comply with any such order, decision, rule, direction, demand or regulation, or part of provision thereof, after notice and hearing, is guilty of contempt of the Commission and is subject to a fine not to exceed Five Hundred (\$500.00) Dollars per violation per day or as otherwise provided for by law.

(b) All motor carriers must yield for inspection as directed by a duly authorized motor carrier enforcement officer or by posted road signs.

(c) Motor carrier enforcement officers may hold and detain equipment operated by a motor carrier for violations of applicable laws in the Oklahoma Statutes or rules of the Commission.

(d) If, in the judgment of a motor carrier enforcement officer, a detained vehicle poses an inherent risk to public health, public safety or welfare, upon direction of the Transportation Division Director or his designee, the motor carrier enforcement officer may arrange for impoundment of the detained vehicle at the expense of the motor carrier.

(e) Contents of impounded equipment must be inventoried, with any inventory expense incurred at the sole cost of the motor carrier.

SUBCHAPTER 6. TRANSPORTATION NETWORK COMPANIES

PART 1. APPLYING FOR A PERMIT

165:30-6-1. Obtaining a permit

(a) No Transportation Network Company ("TNC") shall operate upon any street, road, public highway or dedicated public thoroughfare of this State for the transportation of passengers for hire without the TNC first obtaining from the Commission a permit as provided in this Subchapter. A permit issued under this Subchapter shall not constitute authorization to conduct operations as a for-hire motor carrier or as a private carrier.

(1) An applicant for a permit shall file with the Commission a written application on the appropriate form prescribed by the Commission (TDF 29), and shall tender with the application a filing fee as prescribed by law or by Commission rule.

(2) A permit shall be issued only to an individual, a corporation, a limited liability company, a partnership or other legally recognized entity and shall be personal to the holder thereof.

(3) The filing of an application for a permit does not authorize any TNC operations by the applicant. Such operations are prohibited until after all requirements have been met, and a permit has been issued. All requirements for compliance with this Chapter must be met within thirty (30) days from date of receipt of a TNC permit application by the Commission. The Transportation Division Director may extend the thirty (30) day period upon request by a TNC for good cause shown. Failure to comply will result in dismissal of the application for a permit. Permits issued shall be valid for a maximum of one (1) year and may be renewed after application has been filed and all requirements met as provided by this Chapter.

(4) The application shall require the following:

(A) Name, single trade name (if any), mailing address, physical address, email address, telephone number and domicile county of the applicant.

(B) The type of applicant (indicating if sole proprietorship, partnership, corporation or other legal entity), specifying the names of all partners, officers and/or directors listing the mailing, physical and email addresses of each.

(C) The name and address of the TNC's process agent in Oklahoma.

(D) Name of the TNC's Digital Network and sources from which it can be accessed.

(E) Screenshots of items, or other information deemed acceptable by the Commission, that are required by the Oklahoma Transportation Network Company Services Act to be on the Digital Network.

(F) Copies of policies required by the Oklahoma Transportation Network Company Services Act.

(G) Declaration that the applicant is in full compliance with all other state laws, federal laws, rules and regulations.

(H) Any other information the Commission deems pertinent.

(5) Every TNC operating under the rules of this Commission shall possess a copy of this Chapter.

(b) The Commission may grant or deny the TNC permit application or may impose conditions, stipulations and limitations on the permit consistent with the requirements of the Oklahoma Transportation Network Company Services Act. If the Commission deems a hearing on the application to be necessary, the hearing shall be set within thirty (30) days of receipt of a complete application.

(c) No TNC permit shall be issued to an applicant until all outstanding fines or judgments due the Commission or other Oklahoma state agencies have been satisfied.

(d) All proceedings subsequent to the application, shall be governed by applicable provisions of the Commission's Rules of Practice, OAC 165:5.

[Source: Added at 33 Ok Reg 633, eff 9-1-16; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-6-3. TNC Permit renewals

(a) Any TNC desiring to continue operations as granted in its permit shall apply for renewal by submitting the appropriate application form (TDF 29) a minimum of thirty (30) days prior to the date of the permit's expiration. Each renewal application shall be properly signed.

(b) The applicant must supply updated documentation demonstrating eligibility for a TNC permit upon request.

(c) All TNC Permits renewed by the Commission shall become effective the same date as the prior permit's expiration.

(d) Renewal applications shall be accompanied by a filing fee as prescribed by law or by Commission rule.

(e) A renewal application may be set for hearing at the discretion of the Commission.

(f) All requirements for compliance with this Chapter must be met within thirty (30) days from date of receipt of a TNC permit renewal application by the Commission. Failure to comply will result in dismissal of the renewal application for a permit.

(g) A renewal application will not be accepted if the permit has previously expired, unless the Director of the Transportation Division reviews and approves the acceptance of the application for renewal.

(h) No TNC permit shall be renewed until all outstanding fines or judgments due the Commission or other Oklahoma state agencies have been satisfied.

(i) No TNC operations shall be performed under an expired permit.

[Source: Added at 33 Ok Reg 633, eff 9-1-16; Amended at 34 Ok Reg 977, eff 9-11-17]

165:30-6-5. Insurance

(a) No TNC shall conduct any operations in this State unless such operations are covered by a valid insurance policy issued by an insurer authorized or approved by the Oklahoma Insurance Department. No holder of a TNC permit shall conduct any operations before a proper certificate of insurance(s) has been filed with, and approved, by the Commission.

(b) Every TNC shall file with the Commission a certificate on form TDF 30 certifying that there is in effect insurance coverage as set forth in the Oklahoma Transportation Network Company Services Act.

(c) No certificate of insurance filed with the Commission pursuant to this Section shall be canceled, unless the authorization to conduct operations has been canceled, except after thirty (30) days written notice made to the Commission, on form TDF 31, which notice shall be effective only upon actual receipt thereof by the Commission.

(d) Insurance certificates may be canceled without the thirty (30) days written notice on form TDF 31 only when the authorization to operate has previously expired or canceled.

(e) Insurance certificates not properly cancelled or expired shall be considered expired one (1) year after the TNC's authorization to operate has been cancelled or expired.

(f) Insurance certificates approved by this Commission shall be replaced by more recent insurance certificates. The liability of the retiring insurer shall be terminated as of the effective date of the replacement insurance certificate provided the replacement is approved by this Commission.

(g) Every certificate of insurance filed with the Commission shall provide that the public is protected from damage sustained through operations of any and all vehicles operated by the TNC insured, subject to the terms and conditions provided for by the Oklahoma Transportation Network Company Services Act.

(h) Every certificate of insurance filed with the Commission shall be executed by an officer or authorized agent of the insurance company; and if executed by an agent, a copy of his written authority or power of attorney to execute the same shall be attached to the certificate.

(i) When insurance is provided by more than one insurer in order to aggregate security limits for TNCs, a separate insurance certificate is required of each insurer. For each motor carrier, no more than one (1) primary insurance filing and no more than two (2) excess insurance filings shall be approved.

(j) Every TNC shall maintain in force at all times all insurance required by state laws and by this Section. Failure for any cause to maintain any required insurance in force shall automatically and without notice suspend the permit of a TNC until proper insurance is filed. No TNC operations shall be conducted unless proper insurance is on file with the Commission.

(k) Whenever the permit of a TNC is suspended for failure to maintain in force insurance required by this Section, the TNC must file proper certificate(s) of insurance, as provided in this Section, within sixty (60) days after commencement of the suspension.

(l) Whenever a TNC fails to provide proper certificates of insurance within sixty (60) days after suspension thereof as provided in this Section, the TNC's permit shall be cancelled. A permit so cancelled shall not be reinstated or otherwise made operative except upon proper showing that the TNC was actually covered by proper insurance during the suspension or cancellation period, and that failure to file with

the Commission was not due to the TNC's own negligence.

(m) Any TNC conducting operations under a suspended or cancelled permit shall not be eligible to apply for a new permit for a period of not less than one hundred eighty (180) days. The one hundred eighty (180) day period shall be determined by either the date insurance on file expires or the date a violation is discovered, whichever occurrence is later.

(n) Insurance filings and cancellation notices required by this Chapter may be accepted electronically as set forth by the Transportation Division. Electronic insurance filings and cancellations shall be held to the same standard and carry the same force and effect as if accepted through traditional paper filings.

[Source: Added at 33 Ok Reg 633, eff 9-1-16; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-6-7. Name changes

(a) An application to change the name or business name of the holder of a TNC permit, without any change in the legal identity of the holder or any change in the ownership of the permit, except as provided in subsections (c), (d) or (e) below, shall be filed on the prescribed form (TDF 3) with such filing fee as prescribed by law or by Commission rule. No hearing shall be necessary unless the Commission so requires.

(b) Any change in legal identity of the holder of a TNC permit, except as provided in subsections (c), (d) or (e) below, including but not limited to incorporation or dissolution of a corporation, formation or dissolution of a partnership or creation or dissolution of a trust shall require an original application for a permit.

(c) The following shall be considered a name change:

(1) Incorporation by a sole proprietor in which the sole proprietor is the majority shareholder of the corporation, limited liability company or limited liability partnership.

(2) Incorporation by a partnership in which the partners are the majority shareholders of the corporation.

(3) A change in legal entity from a corporation, limited liability company or a limited liability partnership to a sole proprietorship, a partnership, a limited liability corporation or a limited liability partnership in which the sole proprietor, partners or shareholders hold the majority of all issued and outstanding shares of the corporation.

(4) The merger of two or more corporations in which the survivor is the holder of a current permit.

(d) The transfer of stock in a corporation that shall result in any entity controlling fifty one percent (51%) or more of the aggregate number of voting shares of the corporation shall not be deemed a name change.

(e) The employment of incorporation, change of name or similar action directly or indirectly as a device to circumvent the rules of this Chapter is prohibited.

[Source: Added at 33 Ok Reg 633, eff 9-1-16]

PART 3. CONDUCTING OPERATIONS

165:30-6-17. Current address requirement

(a) Any notice required by law, the Commission's Rules of Practice, OAC 165:5, or this Chapter to be served upon or mailed to any holder of a permit shall be delivered or mailed to the last known email or mailing address as reflected by the records of the Commission. It is the duty of every holder of a permit to notify the

Transportation Division by specific written request (TDF 17) of any change in the email address, address of the principal place of business or mailing address thereof.

(b) Any TNC that has not filed a written designation of service agent with the Commission shall be deemed to have designated the Secretary of State of Oklahoma for the purpose of service of process by the Commission.

(c) Where such notice is required by law, Commission's Rules of Practice, OAC 165:5, or this Chapter is returned undeliverable, it will be grounds for revocation of the permit.

[Source: Added at 33 Ok Reg 633, eff 9-1-16; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-6-19. Compliance with laws and regulations

(a) All TNCs shall conduct their operations in accordance with all applicable laws of the State of Oklahoma and all applicable rules of this Chapter. All permits heretofore or hereafter granted by the Commission are subject to applicable provisions of law and of this Chapter as fully as if those laws and rules were set forth verbatim therein.

(b) No TNC shall operate or allow to be operated any equipment that does not comply with safety criteria established by the rules of this Commission, the Oklahoma Transportation Network Company Services Act or the statutes of the State of Oklahoma on the public highways of the State of Oklahoma. No TNC shall permit any TNC driver to operate a motor vehicle in violation of any size limits established by this Chapter, of OAC 595:30 or of the statutes of the State of Oklahoma. The TNC shall suspend access to its digital network to a TNC driver, pending an investigation by the TNC, if it receives notice of or has reason to believe the driver has failed to meet the safety criteria or size standards of the Commission, the Oklahoma Transportation Network Company Services Act, or the statutes of the State of Oklahoma.

(c) TNCs shall provide notice to their TNC drivers that arranging for-hire passenger transportation services in any way other than through the TNC's digital network will subject the driver to the same regulation, authority requirements, and penalties as a motor carrier under the Motor Carrier Act of 1995.

(d) TNCs shall provide, via the TNC's Digital Network, a method whereby each TNC driver can present to a requesting law enforcement officer proof that the driver is operating as a TNC driver. TNC drivers unable to present such information may be considered to be engaged in motor carrier operations.

(e) No provisions may be included in the TNC's Terms of Service or Driver Contracts that are contrary to the OTNCS Act.

(f) No provisions in this Subchapter prohibit a TNC from contracting with a licensed intrastate for-hire motor carrier.

[Source: Added at 33 Ok Reg 633, eff 9-1-16; Amended at 34 Ok Reg 977, eff 9-11-17]

165:30-6-21. Records

All records required by the Transportation Network Company Services Act, or this Subchapter, shall be made available upon a request by the Commission within a reasonable time, as required by the Oklahoma Transportation Network Company Services Act. Records may be produced to the Commission in electronic form unless physical copies of specific records are requested by the Commission.

PART 5. VIOLATIONS

165:30-6-33. Leasing of TNC Permit

No TNC permit, nor any part thereof, or rights thereunder shall be leased; nor shall the holder thereof sublet or in any manner allow the use thereof, or exercise any of the rights or privileges thereunder by another, except as provided in this Section. Violation of this Section shall be grounds for revocation of the permit, and shall be grounds for denial of an application for a new or renewed permit.

[Source: Added at 33 Ok Reg 633, eff 9-1-16]

165:30-6-35. Operating or Advertising to Operate without a Permit

Any person or entity performing or advertising to perform TNC services without holding a proper permit granted by the Commission shall be in violation of this Section and be subject to the penalties prescribed for contempt of the Commission.

[Source: Added at 33 Ok Reg 633, eff 9-1-16]

165:30-6-37. Violations

- (a) Every TNC, their employees or independent contractors, or any other person who violates or fails to comply with or procures, aids or abets in the violation of any provision of law or of any requirement of this Chapter; or who fails to obey, observe or comply with any order, decision, rule or regulation, direction, demand or requirement, or any part of provision thereof, of the Commission, or who procures, aids or abets any corporation or person in its refusal or willful failure to obey, observe or comply with any such order, decision, rules, direction, demand or regulation, or part of provision thereof, after notice and hearing, is guilty of contempt of the Commission and is subject to a fine not to exceed Five Hundred Dollars (\$500.00) per violation per day or as otherwise provided for by law.
- (b) Only the Commission staff or other state or federal governmental agency may file an application for a contempt proceeding.

[Source: Added at 33 Ok Reg 633, eff 9-1-16]

PART 7. SUSPENSION OR CANCELLATION OF PERMIT

165:30-6-47. Voluntary cancellation of permit

- (a) A TNC may request cancellation of its permit without notice or hearing.
- (b) Any TNC requesting cancellation of its permit while in good standing may reapply for a new permit at any time.

[Source: Added at 33 Ok Reg 633, eff 9-1-16]

165:30-6-49. Involuntary suspension or revocation of permit

- (a) Any TNC permit may be suspended or revoked by the Commission, or the holder thereof assessed a fine or other lawful punishment for violation of, or failure to comply with, any requirement or provision of law or of this Chapter.
- (b) An application to revoke or suspend a TNC permit may be filed by a member of the staff of the Commission. It shall be in the form of an application, and proceedings thereon, including notice and hearing if required, shall be as prescribed in the Oklahoma Corporation Commission's Rules of Practice, OAC 165:5.
- (c) After hearing, the Commission may grant or deny the application, and may suspend or revoke the permit, or the Commission may assess a fine or impose limitations or conditions upon the continuation of operations under the permit as

stated in the order.

(d) Any TNC conducting operations under a suspended or cancelled permit shall not be eligible to apply for a new permit for a period of not less than one hundred eighty (180) days. Except for insurance violations as noted in 165:30-6-5, the one hundred eighty (180) day period shall begin the date a Commission order is signed suspending or canceling a TNC permit.

(e) The employment of incorporation, stock transfer, merger, change of name or similar action directly or indirectly as a device to evade subsection (d) of this Section is prohibited.

(f) Any violation of state statutes or regulations shall be cause to initiate an application for suspension or revocation by Commission staff or other state or federal governmental agency.

[Source: Added at 33 Ok Reg 633, eff 9-1-16]

165:30-6-51. Reinstatement of TNC Permit

(a) A TNC whose permit has been cancelled for lack of insurance, may file with the Commission a written application for reinstatement on the appropriate form prescribed by the Commission (TDF 8), and shall tender with the application a filing fee as prescribed by law or by Commission rule.

(b) The application for reinstatement must be filed within three (3) months from the date the permit was cancelled and may be approved by the Director of Transportation for administrative reinstatement. Applications not approved for administrative reinstatement may be set for hearing.

(c) If the authority was revoked due to lack of insurance on file and the TNC cannot furnish proper proof of continuous insurance, the Commission may reinstate the permit only after a hearing has been held and notice thereof has been given as prescribed by the Oklahoma Corporation Commission's Rules of Practice, OAC 165:5.

(d) No reinstatement shall be issued until all requirements of the permit have been fulfilled.

165:30-7-5. Forms

The following forms of the Commission relate to this Chapter:

- (1) Intrastate license forms.
 - (A) TDF 1 - Application for Intrastate Motor Carrier For-Hire or Private Carrier License
 - (B) TDF 2 - Application for renewal of Intrastate Motor Carrier License
- (2) Intrastate certificate forms.
 - (A) MCF 1 - Application for Household Goods Certificate
 - (B) MCF 2 - Application for Renewal of Household Goods Certificate
 - (C) MCF 8 - Application for Reinstatement of Household Goods Certificate
 - (D) Form H - Uniform Motor Carrier Cargo Certificate of Insurance
 - (E) Form J - Uniform Motor Carrier Cargo Surety Bond
- (3) Interstate Form - Unified Carrier Registration
- (4) Harvest Permit forms
 - (A) TOSS 1 - Application for Harvest Permit
 - (B) TOSS 2 - Application for Fifteen (15)-Day Harvest Permit Extension
- (5) Hazardous Waste forms.
 - (A) UPW - Part I - Registration
 - (B) UPW - Part II - Permit
 - (C) UPW - Part III - Other Information
 - (D) UPW - Part IV - Certification
 - (E) UPW - Uniform Program Fee Worksheet (Schedules A-D and Summary)
- (6) IFTA/IRP forms.
 - (A) IRP Schedule A - International Registration Plan Original Application-Schedule A
 - (B) IRP Schedule B - International Registration Plan- Schedule B
 - (C) IRP Schedule C - International Registration Plan Supplemental Application-Schedule
 - (D) IRP Schedule G - International Registration Plan Declaration of Estimated Miles- Schedule G
 - (E) IRP Misc 1 - International Registration Plan Affidavit for Lost/Stolen Tag and Additional Cab Cards
 - (F) IFTA Application - International Fuel Tax Agreement Registration Application
 - (G) IFTA QTR - International Fuel Tax Agreement Quarterly Report
- (7) Miscellaneous forms.
 - (A) TDF 3 - Application for Change of Name
 - (B) TDF 8 - Application for Reinstatement
 - (C) TDF 14 - Application for a Deleterious Substance Transport Permit
 - (D) TDF 16 - Application for Identification Devices

165:30-7-6. Applications and requests

- (a) All intrastate motor carrier, private carrier, transportation network company, deleterious, hazardous waste, registration and fuel permit applications must bear an original acceptable signature of the applicant. The applicant must be a legal entity with an optional single trade name listed that is not a legal entity. If signed by an attorney or agent in lieu of the applicant, a copy of the power of attorney must be attached to the application.
- (b) Acceptable signatures on applications for authority are as follows:
 - (1) Sole proprietorship - sole proprietor.
 - (2) Partnership - one of the partners.
 - (3) Corporation - one of the officers or directors.
 - (4) Limited liability company - the manager.
- (c) A name change relating to a partnership or a request to cancel a partnership must be signed by all partners.
- (d) All motor carrier and commercial motor vehicle applications filed by an applicant which does not maintain a terminal in Oklahoma must file and maintain a current listing of a valid Oklahoma process agent on behalf of the applicant.
- (e) All applications for authority shall contain the USDOT number of the operating motor carrier. Applications for registration shall additionally contain the USDOT number of the owner of each vehicle, and the registrant.
- (f) Motor carriers obtaining a name change with FMCSA in association with the motor carrier's DOT number must immediately update the name and/or trade name on the Commission issued authority, registrations, fuel licenses or permits. The Commission may require a name change or an application for new authority. Motor carriers obtaining a name change on Commission issued authority, registration, fuel licenses or permits must immediately obtain a name change with FMCSA in association with the motor carrier's DOT number. Failure to have the motor carrier

name and trade name, if any, identically shown on all authority, registrations, fuel licenses or permits may subject the motor carrier to penalties, suspension, revocation, roadside enforcement delays or delays in processing subsequent applications.

(g) Motor carriers changing their email, mailing or physical address with FMCSA in association with the motor carrier's DOT number must immediately update address(es) on the Commission issued authority, registrations, fuel licenses or permits. In the event the Commission determines a motor carrier has changed its address(es) with FMCSA prior to notifying the Commission, may cause the Commission to update its records to reflect the updated address(es) on file with FMCSA. The motor carrier may notify the Commission in writing if it chooses to maintain separate address(es) on file with the Commission from the address(es) on file with FMCSA. Failure to have current address(es) on file for authority, registrations, fuel licenses or permits may subject the motor carrier to penalties, suspension, revocation, roadside enforcement delays or delays in processing subsequent applications.

(h) An application for authority, commercial vehicle registration or fuel permit may not be processed when the motor carrier or the motor carrier responsible for safety has not updated its USDOT number within the prior twenty-four (24) months. Failure to update the USDOT number may subject the authority to revocation.

(i) Failure to properly complete any application may result in delay or denial of the relief sought.

(j) Applications may be denied due to outstanding monies owed to the Commission or other state or federal agencies.

(k) Interstate authority, fuel permits and registration cannot be issued to a motor carrier whose ability to operate in interstate commerce has been denied or revoked.

(l) If a fee is required for an application, and the funds are returned unpaid, any document or privilege granted as a result of that application shall be immediately revoked without notice. The document or privilege shall be reinstated provided valid payment is received in a timely manner.

[Source: Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 18 Ok Reg 23, eff 10-11-00 (emergency); Amended at 18 Ok Reg 2384, eff 7-1-01; Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 29 Ok Reg 951, eff 7-1-12; Amended at 33 Ok Reg 633, eff 9-1-16; Amended at 34 Ok Reg 977, eff 9-11-17; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-7-7. Records and inspections

(a) All persons engaged in an activity, which an authorized agent of the Commission has reasonable cause to believe appears to be within the purview of this Chapter, shall make its transportation related records available for inspection to an authorized agent of the Commission.

(b) Persons engaged in an activity within the purview of this Chapter, shall stop when ordered to do so by a motor carrier enforcement officer and yield the vehicle, its contents and its shipping documentation to the officer for inspection.

(c) All transportation related records shall be made available at the carrier's principal place of business upon request of the Commission. If no location in Oklahoma is so designated, the records shall be made available at a location designated by the Commission, at the expense of the person engaged in transportation matters.

(d) Every person who fails to provide the transportation related records, upon demand, is guilty of contempt of the Commission and is subject to a fine not exceed Five Hundred (\$500) Dollars or as otherwise provided for by law.

165:30-7-11. USDOT number

- (a) Every person operating or intending to operate as a motor carrier in intrastate or interstate commerce shall obtain a USDOT number.
- (b) Every person registering a commercial motor vehicle for apportionment shall obtain a USDOT number.
- (c) Every person applying for an IFTA license shall obtain a USDOT number.
- (d) USDOT numbers for interstate operations can be obtained utilizing a MCS-150 form available from FMCSA or online at www.fmcsa.dot.gov.
- (e) USDOT numbers for intrastate only operations can be obtained online at www.fmcsa.dot.gov.
- (f) Motor carriers, registrants and licensees obtaining a USDOT number for interstate operations shall comply with all provisions of 49 C.F.R. 390.19, with the exception that applicants for apportioned registration must update their MCS-150 a minimum of once every twelve (12) months.
- (g) Motor carriers operating intrastate only shall update their MCS-150 or TDF-19 a minimum of once every two (2) years.
- (h) All holders of a USDOT number shall notify the Commission, utilizing a TDF 19 if intrastate only, or file a new MCS-150 form with USDOT or this Commission when they cease operations in order to inactivate their USDOT number.
- (i) A USDOT number issued to an intrastate carrier will be inactivated when the intrastate carrier does not hold an active authority and two (2) or more Commission letters or notifications mailed to the last known email or mailing address on file are returned undeliverable.

[Source: Added at 25 Ok Reg 1546, eff 7-1-08; Amended at 27 Ok Reg 1773, eff 7-1-10; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-7-12. Revocation, suspension or denial of issuance of license, permit, certificate or registration

(a) The Commission may revoke, suspend or deny the issuance of any Commission issued motor carrier or commercial motor vehicle license, permit, TNC permit, certificate or registration issued pursuant to the Commission's jurisdiction for any of the following reasons:

- (1) Violation of applicable state law.
- (2) Violation of Commission rules.

- (3) Failure to observe or fulfill the conditions upon which the license, permit, certificate or registration was issued.
 - (4) Nonpayment of any delinquent tax, fee or penalty to the Commission or to the State of Oklahoma.
 - (5) Nonpayment of a uniform base state program delinquent tax, fee or penalty to a state or province participating with the Commission in that program.
 - (6) Placed out of service by a federal or state agency.
- (b) A motor carrier, private carrier, TNC or registrant who wishes to contest a revocation, suspension or denial of issuance of motor carrier license, permit, certificate or registration is entitled to a hearing under the procedures contained in the Commission's Rules of Practice, OAC 165:5.

[Source: Added at 26 Ok Reg 1398, eff 7-1-09; Amended at 29 Ok Reg 951, eff 7-1-12; Amended at 33 Ok Reg 633, eff 9-1-16]

165:30-7-13. Disqualification procedure

- (a) **General provisions.** Any person may, after notice and an opportunity for hearing, be disqualified from conducting business before the Transportation Division of the Commission if such person:
- (1) Is shown to be incompetent or disreputable;
 - (2) Refuses to comply with rules and regulations;
 - (3) With intent to defraud, in any manner willfully and knowingly deceives, misleads, or threatens any person;
 - (4) Advises a person to file a fraudulent or false report or return;
 - (5) Knowingly prepares or files a false or fraudulent report or return;
 - (6) Assists, aids or abets any person in or by concealing any information pertaining to said person's books, records, reports or returns;
 - (7) Delays proceedings of the Commission by disposing of or concealing information required in the filing of reports or returns under any Commission law or rule, or assisting another in such acts; or
 - (8) Commits any other misconduct determined by the Commission.
- (b) **Complaint and initial investigation.** The Commission may, upon its own initiative, or upon receiving a written complaint filed with the Director of the Transportation Division, cause the complaint to be investigated and a determination made as to whether good cause exists for initiating a disqualification proceeding. If it is determined that none of the conditions in subsection (a) above have been met, or if there is insufficient evidence to support the allegation, the investigation will be terminated. If a determination is made that good cause exists for initiating a disqualification proceeding, such proceeding will be promptly commenced.
- (c) **Commencement, notice, and conduct of hearing.** The commencement of the proceeding, notice to the respondent, and conduct of the hearing shall be held in compliance with the Commission's Rules of Practice, OAC 165:5.
- (d) **Burden of proof.** The Office of the General Counsel shall have the burden of establishing, by a preponderance of the evidence, that a condition in subsection (a) has been met such that respondent should be disqualified from conducting business before the Commission. Notice of the final disposition of the disqualification proceedings will be provided to the respondent.
- (e) **Scope of action.** The respondent may be found qualified to conduct business before the Commission, or may be disqualified from conducting business before the Commission for a stated period of time or indefinitely. The Commission may provide notice of the determination of the disqualification proceeding to other

agencies, boards, or Commissions who exercise jurisdiction or regulatory authority over the respondent or the activities involved in the violation. Nothing in this Section shall preclude the Commission from seeking any other remedies or legal proceedings available at law to enforce its orders or rules.

[Source: Added at 26 Ok Reg 1398, eff 7-1-09]

165:30-7-15. Operations conducted under government contract

- (a) Motor carriers conducting intrastate operations under contract with a governmental entity are exempt from Subchapters 3, 13 and 15 of this Chapter.
- (b) Persons conducting intrastate operations in furtherance of a governmental contract for the building or maintenance of roads, bridges, turnpikes or other road building projects are exempt from Subchapters 3 and 15 of this Chapter.
- (c) In an effort to assist law enforcement in identifying operations exempt as a result of a governmental contract, documentation should be carried in each vehicle operated under the contract. The documentation may consist of a complete copy of the contract or a copy of a portion of the contract(s) that contains the following information:
 - (1) The government entity.
 - (2) The contractor (which should also be the motor carrier).
 - (3) A description of the project.
 - (4) The project beginning date.
 - (5) The project ending date or project time span.
- (d) A subcontractor exempted under (b) of this Section, should in addition to the documentation listed in (c) of this Section, additionally carry a copy of the contract, or a portion of the contract, between the contractor and the subcontractor that clearly establishes the operations being performed are within the scope of the governmental contract.

[Source: Added at 29 Ok Reg 951, eff 7-1-12]

165:30-7-17. Insurance filing replacement

- (a) The Transportation Division may require a new insurance filing to be placed on file when the effective date of the current filing is more than three (3) years old.
- (b) Notification of the need for a new insurance filing to be placed on file shall be mailed to the official email or mailing address on file for the license, certificate or permit holder, which shall be considered official notice.
- (c) The new insurance filing shall be placed on file with the Transportation Division within ninety (90) days from the date of the notice.
- (d) Failure of the license, certificate or permit holder to have proper insurance placed on file within ninety (90) days shall subject the license, certificate or permit to revocation.
- (e) A notice to revoke shall be sent to the official email or mailing address on file with the Transportation Division. The license, certificate or permit holder will be allowed an additional thirty (30) days to comply with the provisions of this section.
- (f) Failure of the license, certificate or permit holder to comply with the provisions of this section shall cause the license, certificate or permit to be revoked without further notice.

[Source: Added at 33 Ok Reg 633, eff 9-1-16; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-7-27. Definitions

The following words and terms, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Electronic" means technology having electrical, digital, magnetic, wireless, optical, electromagnetic or similar capabilities.

"Electronic filing" means the usage of a computer to submit an application, insurance filing or information required using an electronic system supplied by or approved by the Corporation Commission.

"Electronic mail address" is the primary electronic mail address, commonly referred to as an "email address" provided by the registered user.

"Electronic signature" means a symbol or process attached to or logically associated with a document and executed or adopted by a person with the intent to sign the document.

"Electronic system" means a system supplied or used by the Corporation Commission to receive and process information, documents and payments electronically.

"Register" means the process for a person to request authority from the Corporation Commission to use an electronic system.

"Technical failure" means a malfunction of an electronic system's hardware, software, and/or telecommunications facility which results in the inability of a registered user to submit a document, supply information or make payment. It does not include the failure of a registered user's equipment, software, and/or telecommunications facility.

"User" means a registered user whose user identification and password are used to submit documents, information or payments electronically.

[Source: Added at 33 Ok Reg 633, eff 9-1-16]

165:30-7-29. Registration and signatures

- (a) To gain access to an electronic system, the User must make application or submit a request with the Transportation Division as specified on the appropriate Commission website.
- (b) The request shall contain information as required by the specific system in which the User has requested access.
- (c) In the event the electronic system is not maintained by the Corporation Commission, the User must contact the system administrator to gain access.
- (d) Users of the electronic system shall comply with all applicable instructions and the User agreement for electronic system usage.
- (e) Electronic signatures are required. By use of an electronic signature, the person represents that all requirements of the applicable authority requiring the person's signature have been satisfied and all duties and obligations imposed by law have been fulfilled.
- (f) An electronic signature is deemed to constitute a signature on the document for purposes of all signature requirements imposed and or/any other applicable law. An electronic signature shall have the same force and effect as a handwritten signature.

[Source: Added at 33 Ok Reg 633, eff 9-1-16]

165:30-7-31. Electronic system usage

- (a) Electronic systems are generally available twenty-four (24) hours a day, seven (7) days a week. Filing information or a document electronically does not, however, alter the filing deadline for that information or document. The official filing time is the filing time indicated on the electronic filing.

- (b) Risk of loss of transmission, of non-receipt, or of illegibility is borne by the person transmitting and filing documents electronically.
- (c) All documents submitted electronically to the Transportation Division shall conform to the rules and procedures for electronic filing. Any filing not conforming to the rules and procedures for electronic filing may be rejected by the Transportation Division.

[Source: Added at 33 Ok Reg 633, eff 9-1-16]

165:30-7-33. Technical failure

- (a) Technical failure of an electronic system may occur. Users should provide information, documents or payments in advance of any deadline to ensure timely filing.
- (b) A User whose deadline passes without appropriate information, documents or payments made as the result of a technical failure of the electronic system may seek appropriate relief from the Commission. Relief regarding enforcement actions taken by law enforcement, other than by the Commission, cannot be sought at the Commission.
- (c) Failures not originating with the electronic system, such as phone line problems, problems with the user's internet service provider, or hardware or software problems, will not constitute a technical failure or excuse an untimely filing.
- (d) A User may be able to make changes to information or documents after they have been electronically submitted, depending upon the application process. If a correction cannot be made, relief will have to be sought using established rules and procedures.

SUBCHAPTER 10. INTERSTATE MOTOR CARRIERS

PART 1. COMPLIANCE

165:30-10-1. USDOT number required

(a) All motor carriers engaged in interstate commerce, operating a commercial motor vehicle as defined by 49 C.F.R. 390.5, must obtain their USDOT number prior to commencing operations.

(b) Motor carriers required to obtain a USDOT number may not engage in interstate commerce within, into or out of Oklahoma without having an active USDOT number.

(c) All motor carriers engaged in interstate commerce shall comply with all provisions of 49 C.F.R. 390.21 with regard to vehicle markings.

(d) All motor carriers engaged in interstate commerce must comply with 49 C.F.R. 390.19.

165:30-10-2. [RESERVED]

[Source: Reserved at 24 Ok Reg 1814, eff 7-1-07]

165:30-10-3. Liability insurance

(a) All interstate motor carriers shall have valid insurance on file with FMCSA, as required by FMCSA.

(b) All interstate motor carriers not required to file insurance with FMCSA, shall carry a copy of its current and valid liability insurance security verification form in each vehicle and present it to an officer upon his/her request.

[Source: Reserved at 24 Ok Reg 1814, eff 7-1-07]

165:30-10-15. Compliance with laws and regulations

(a) An interstate motor carrier engaged in operations regulated by the FMCSA must comply with all FMCSA regulations.

(b) An interstate motor carrier shall conduct its operations in accordance with all applicable laws of the State of Oklahoma and all applicable rules of the Commission.

(c) No motor carrier engaged in interstate commerce shall operate or allow to be operated on the public highways of the State of Oklahoma any equipment that does not comply with safety criteria established by the USDOT, the rules of this Commission; or, the statutes of the State of Oklahoma. No motor carrier or private carrier shall permit any person to operate a motor vehicle in violation of any size or weight limits established by this Chapter, of OAC 595:30 or of the statutes of the State of Oklahoma. Every person operating vehicles upon the public highways of this State shall meet the minimum safety standards as established by the USDOT and the statutes of the State of Oklahoma. Any vehicle which fails to meet safety criteria, or size and weight standards, or which is operated by any person in violation of this subsection shall be prevented from continued use of the public highways of the State of Oklahoma.

(d) Violation of the rules of this Subchapter may result in the motor carrier being prohibited from using the public highways of the State of Oklahoma or any other penalties deemed appropriate by the Commission pursuant to authority granted to the Commission.

[Source: Added at 24 Ok Reg 1814, eff 7-1-07]

PART 5. VIOLATIONS

165:30-10-31. Contempt complaint

In addition to the procedures set forth in the Oklahoma Statutes and in the Commission Rules of Practice, OAC 165:5, regarding the procedure in proceedings as for contempt, the procedures set forth in 165:30-3-76 may be followed for violation for any requirement or provision of law or the rules of this Subchapter.

[Source: Added at 24 Ok Reg 1814, eff 7-1-07]

165:30-10-32. Violations

- (a) Every for-hire motor carrier, shipper, private motor carrier, their employees or any other person who violates or fails to comply with or procures, aids or abets in the violation of any provision of law or of any requirement of this Chapter; or who fails to obey, observe or comply with any order, decision, rule or regulation, direction, demand or requirement, or any part or provision thereof, of the Commission, or who procures, aids, or abets any corporation or person in its refusal or willful failure to obey, observe or comply with any such order, decision, rule, direction, demand or regulation, or part of provision thereof, after notice and hearing, is guilty of contempt of the Commission and is subject to a fine not to exceed Five Hundred (\$500.00) Dollars per violation per day or as otherwise provided for by law.
- (b) All motor carriers must yield for inspection as directed by a duly authorized motor carrier enforcement officer or by posted road signs.
- (c) Motor carrier enforcement officers may hold and detain equipment operated by a motor carrier for violations of applicable laws in the Oklahoma Statutes or rules of this Agency.
- (d) If, in the judgment of a motor carrier enforcement officer, a detained vehicle poses an inherent risk to public health, public safety or welfare, upon direction of the Transportation Division Director or his designee, the motor carrier enforcement officer may arrange for impoundment of the detained vehicle at the expense of the motor carrier.
- (e) Contents of impounded equipment must be inventoried, with any inventory expense incurred at the sole cost of the motor carrier.

PART 7. INTERSTATE MOTOR CARRIERS OPERATING IN INTRASTATE COMMERCE

165:30-10-41. Intrastate authority required

An interstate motor carrier must obtain intrastate authority from the Commission prior to commencing intrastate operations.

[Source: Added at 24 Ok Reg 1814, eff 7-1-07]

165:30-10-42. [RESERVED]

[Source: Reserved at 24 Ok Reg 1814, eff 7-1-07]

165:30-10-43. Exceptions to intrastate renewal requirements

An interstate carrier with intrastate authority must continue to conduct its operations in accordance with OAC 165:30-3 or OAC 165:30-15, with the exception of the following:

- (1) An interstate motor carrier with valid intrastate authority, issued pursuant to OAC 165:30-3 or OAC 165:30-15, shall not be required to comply with OAC 165:30-3-3 or OAC 165:30-15-5.
- (2) An interstate motor carrier with valid intrastate authority, issued pursuant to OAC 165:30-3 or OAC 165:30-15, shall not be required to renew its identification devices annually, after the first year of the license has elapsed.
- (3) An interstate motor carrier with valid intrastate authority, issued pursuant to OAC 165:30-3 or OAC 165:30-15, shall not be required to carry a copy of its intrastate license with current identification device annually, after the first year of the license has elapsed.

[Source: Added at 24 Ok Reg 1814, eff 7-1-07]

165:30-10-44. [RESERVED]

[Source: Reserved at 24 Ok Reg 1814, eff 7-1-07]

165:30-10-45. Miscellaneous

- (a) An interstate motor carrier with valid intrastate authority issued pursuant to OAC 165:30-3 or OAC 165:30-15, must maintain liability insurance on file as prescribed in OAC 165:30-3-11 or OAC 165:30-15-6, to retain its intrastate authority.
- (b) If a motor carrier's authorization to operate interstate is canceled, whether voluntary or involuntary, the motor carrier must immediately make application to the Commission for intrastate authority renewal and identification devices. Failure to make application within sixty (60) days shall cause the motor carrier's intrastate license to expire.

SUBCHAPTER 12. UNIFIED CARRIER REGISTRATION

165:30-12-1. Unified Carrier Registration

(a) The Commission shall comply with the provisions of the procedures adopted by the UCR Board.

(b) An interstate motor carrier, freight forwarder, leasing company or broker subject to UCR shall be known as a UCRant.

(c) A UCRant shall pay its applicable UCR fee to its base state, in accordance with the UCR procedures. The applicable UCR fee may include amounts owed for prior years as well as the fee for the current year.

- (d) UCR fees, once paid, will not be refunded unless provided for in the Unified Carrier Registration Agreement issued pursuant to 49 U.S.C.A. § 14504a.
- (e) Failure of a UCRant to pay its applicable UCR fee to its base state shall subject the UCRant to contempt complaint proceedings.
- (f) Interstate carriers excluding vehicles operating intrastate only from the UCR fee must comply with 165:30-10-45.

165:30-13-2. Obtaining a household goods certificate

- (a) No motor carrier shall operate upon any street, road, public highway or dedicated public thoroughfare of this State for the intrastate, including intracity, transportation of household goods for hire without first obtaining from the Commission a certificate as provided in this Section.
 - (1) An applicant for a certificate shall file with the Commission a written application on the appropriate form prescribed by the Commission (MCF 1), and shall tender with the application a filing fee as prescribed by law or by Commission rule.
 - (2) The application shall be assigned a PIN, which shall be the permanent identification number for all matters relating to authority granted therein. Any application thereafter filed to amend the authority or for additional authority by the same applicant shall be filed under the original PIN, and otherwise shall be governed by the provisions of this Subchapter relating to an application for authority. Each subsequent application shall also bear a sub-number in sequence.
 - (3) A certificate shall be personal to the holder thereof, and shall be issued only to an individual, a corporation, a limited liability corporation, a partnership or some other legally recognized entity.
 - (4) The filing of an application for a certificate does not of itself authorize any motor carrier operations by the applicant. Such operations are prohibited except pursuant to a certificate issued by the Commission, and only after all requirements have been met, and identification devices have been obtained.
 - (5) The application for a household goods certificate shall contain the following information:
 - (A) Name of applicant, trade name, email address, mailing address, principal place of business address which shall be the registered address for purposes of this Subchapter, telephone number and domicile county of the applicant. The applicant's name must be a legal entity. A trade name or "doing business as" (DBA) may be designated, but cannot be a corporate name or LLC or LLP or

another organized entity. If the applicant is an organized entity, a copy of the certificate of incorporation or other instrument as issued by the Oklahoma Secretary of State's Office shall be attached to the application.

(B) The type of applicant (indicating if sole proprietorship, partnership, corporation or other legal entity), specifying the names of all partners, officers and/or directors and listing the email, mailing and physical addresses of each.

(C) Declaration of its USDOT number. Carriers without a USDOT number must apply for a USDOT number. A USDOT number must be issued to the applicant prior to a certificate being issued.

(D) Declaration of its safety rating and provide a safety summary report.

(E) A size and weight summary report.

(F) A listing of all power vehicles and trailers to be used, detailing the model, make and capacity of each vehicle and denoting whether each vehicle is owned or leased.

(G) A description of all terminal and dock facilities to be utilized for household goods transportation operations. If no facilities exist within the state, the address where vehicles will be parked must be provided.

(H) The name and address of a process agent for Oklahoma must be filed and maintained for any applicant that does not maintain a physical address in Oklahoma.

(I) A declaration that the applicant is in full compliance with all other state laws, rules and regulations.

(J) Any other information the Commission deems necessary.

(b) Every person operating as a motor carrier of household goods pursuant to this Subchapter shall obtain a copy of this Chapter and be familiar with its content as it pertains to motor carriers of household goods.

(c) The Commission may consider any written protests or written complaints filed prior to granting or renewing a household goods certificate. If the Commission elects not to grant or renew a household goods certificate, the application shall be set for public hearing in accordance with Commission rules. At the hearing, the applicant shall have the burden of establishing it has the ability to conduct operations in a safe and reasonable manner and applicant is in compliance with all applicable rules and laws of the State of Oklahoma.

(d) After the hearing, the Commission may grant or deny the application in whole or in part; or may impose conditions, stipulations and limitations on the authority as stated in the order.

(e) Applicant may be issued a provisional household goods certificate not to exceed ninety (90) days from the date the application is filed, provided all requirements, with the exception of the educational compliance requirements, for the certificate have been met. Applicant must provide a written request for the provisional certificate. If the provisional certificate is issued, a copy of the provisional certificate must be carried in each vehicle operated by the Applicant.

(f) A certificate shall be valid for one year from date of issuance. Applicants for renewal of a certificate shall comply with OAC 165:30-3-3.

(g) A copy of the current certificate under which a carrier operates shall be carried at all times in each power unit by the motor carrier.

(h) A motor carrier of household goods engaged in intercorporate hauling shall be subject to this Subchapter.

(i) No household goods certificate shall be issued to an applicant until all outstanding fines or judgments due the Commission or other state(s) regulatory agencies have been satisfied.

(j) An intrastate motor carrier of household goods may additionally engage in intrastate for-hire transportation of property without an intrastate motor carrier license, but may not engage in the intrastate transportation of passengers, deleterious substances or hazardous materials without complying with Subchapter 3 of this Chapter.

(k) All proceedings subsequent to the application, and the conduct of the hearing, shall be governed by applicable provisions of the Commission's Rules of Practice, OAC 165:5.

165:30-13-4. Reissuance of certificate

(a) Intrastate household goods certificates and permits issued prior to November 1, 2009, shall expire sixty days after the effective date of this Section.

(b) Within sixty days of the effective date of this Section, intrastate motor carriers of household goods holding a valid certificate or permit on November 1, 2009, shall apply for a household goods certificate as set forth in this Subchapter. The filing fee as set forth in OAC 165:30-13-2 (a) (1) shall be waived.

(c) This Section does not apply to any household goods certificates or permits that are suspended or revoked prior to the effective date of this Section.

PART 3. HOUSEHOLD GOODS CERTIFICATE REQUIREMENTS

165:30-13-11. Insurance

All motor carriers of household goods shall comply with all provisions of OAC 165:30-3-11.

[Source: Added at 12 Ok Reg 2077, eff 7-1-95; Amended at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-12. Identification device

(a) Every motor carrier operating upon the public highways of the State of Oklahoma shall obtain and display a current identification device, issued by this Commission, for each power unit operated by said motor carrier.

(1) Only one (1) identification device is required for each power unit.

(2) The annual fee for each identification device will be as prescribed by law or Commission rule.

(3) Identification devices expire simultaneously with the expiration date of the annual certificate issued to the motor carrier.

(b) No identification device may be sold or otherwise transferred; except if such motor carrier provides a newly acquired vehicle in substitution therefore, each identification device on the discontinued vehicle, if such device is still in the

possession of the motor carrier, may be transferred to the substitute vehicle or any subsequently substituted vehicle.

(c) It is the duty of every motor carrier to remove and destroy identification devices upon transfer or sale of a power vehicle.

(d) Identification devices found to be in the possession of a carrier not authorized will be confiscated and returned to the Commission by a motor carrier enforcement officer.

(e) No identification devices will be issued to any motor carrier who does not meet all statutory, regulatory and Commission requirements.

PART 5. CONDUCTING OPERATIONS

165:30-13-20. Estimates

(a) Household goods carriers must provide written binding or non-binding estimates.

(b) The written estimate must clearly provide:

(1) Whether it is a binding or a non-binding estimate. Non-binding estimates must be based upon a reasonably accurate estimate of the charges for transportation and accessorial services to be performed.

(2) The form of payment that will be honored at delivery such as cash, certified check, money order, type of credit card, etc.

(3) The date of the estimate.

(4) The signatures of the carrier and of the shipper.

(5) If the household goods carrier's charges will be based upon inventoried items, a written itemized inventory for each shipment must be prepared and attached to the bill of lading.

- (6) The shipment will be transported at the released value of \$.60 per pound, at no additional cost to the shipper, unless the shipper elects full value protection.
- (c) Household goods carriers assessing charges based upon weight must obtain weight tickets of the vehicle before loading and after loading. The weight tickets must include:
- (1) The complete name and location of the scale.
 - (2) The date of each weighing.
 - (3) The signature of the weigh master.
 - (4) The identification of the weight entries as being the tare, gross or net weights.
 - (5) The last name of the shipper as it appears on the bill of lading (if the vehicle is loaded).
 - (6) The bill of lading number.
- (d) In the event of a binding estimate based upon weight, the shipper may elect to waive the weighing of the vehicle before loading and/or after loading, but such waiver must be specifically noted and initialed on the written estimate.
- (e) A shipper shall be granted the ability to observe the vehicle weighing or re-weighing as requested.
- (f) Household goods carriers assessing charges not based upon weight shall clearly specify the parameters for which charges will be assessed.
- (g) Services performed under an estimate are subject to the 110% rule, which means the household goods carrier must deliver the goods once the shipper pays 110% of the estimated charges. The 110% rule still applies to partial shipments when a prorated percentage is paid.
- (h) Additional charges may be added based upon mutual agreement of the carrier and the shipper. These charges must be in writing and signed by both parties. Additional charges may not be added after the goods are loaded, except as provided for in OAC 165:30-13-28.

[Source: Added at 27 Ok Reg 1773, eff 7-1-10; Amended at 29 Ok Reg 951, eff 7-1-12]

165:30-13-22. Consumer protection information

- (a) The Commission shall develop consumer protection information to be provided to each prospective household goods shipper or consignor.
- (b) The consumer protection information shall contain the following:
- (1) Intrastate and intracity household goods carriers are regulated by the Commission.
 - (2) Written estimates are required.
 - (3) The types of services provided by household goods vary.
 - (4) Explanation of valuation.
 - (5) Information on how to file a claim.
 - (6) The following recommendations:
 - (A) Contact more than one household goods carrier for an estimate so services and costs can be compared.
 - (B) Display of a USDOT number does not indicate the carrier holds an active household goods certificate. Contact the Commission to ensure the prospective household goods carrier is certificated.
 - (C) Contact the local Better Business Bureau regarding the prospective household goods carrier.
 - (D) Understand the terms and conditions of the contract.
 - (E) Understand the final charges the shipper will be required to pay.

(7) Any other information, derived from the Household Goods Act of 2009 or this Chapter, the Commission deems pertinent.

(c) The Commission shall post the consumer protection information online, where it will be accessible to both household goods carriers and the general public.

(d) Every household goods carrier shall provide the consumer protection information to each prospective shipper or consignor when a written estimate is provided.

(e) Household goods carriers may reprint the consumer protection information for handout as provided by the Commission or include the information in their own brochure, including additional information and logos as desired, provided all information required by the Commission is accurately contained within the carrier's brochure and no information inserted by the carrier contradicts or nullifies the Commission required information.

[Source: Added at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-24. Valuation and liability

(a) All household goods carriers shall obtain a written valuation selection from the shipper prior to shipment. A household goods carrier must ensure the shipper selects one of the two (2) following valuations:

(1) **Released value.** Released value is the minimum amount a household goods carrier is liable to a shipper for lost or damaged goods. An intrastate household goods carrier may not charge a shipper an extra charge for a released value selection. Under released value, a household goods carrier is responsible, at its option, to replace, repair or settle in cash any article(s) that is lost, damaged destroyed or otherwise not delivered, at an amount of \$.60 per pound of the weight of any article.

(2) **Full value.** Full value requires a household goods carrier to replace, repair or settle in cash any article(s) that is lost, damaged, destroyed or otherwise not delivered to the final destination while in the intrastate household goods carrier's custody. The carrier is required, at its option, to repair the article to the extent necessary to restore it to the same condition as when it was received by the carrier; pay the shipper for the cost of the repairs; replace the article with an article of like kind and quality; or, pay the shipper for the cost of article replacement, up to the amount of declared value of the shipment.

(b) Shippers electing full value protection shall declare the total value of their shipment.

(c) Shippers electing full value protection must declare, in writing, any articles that exceed a value of \$100 per pound, entitling the shipper to full recovery of the declared value of the article(s), not to exceed the declared value of the shipment.

(d) A household goods carrier shall not be liable for physical loss of or damage to any articles from external cause while being carried or held storage-in-transit due to:

(1) An act, omission or order of shipper.

(2) A defect or inherent vice of the article, including susceptibility to damage because of atmospheric conditions such as temperature and humidity or changes therein.

(3) Hostile or warlike action in time of peace or war, including action in hindering, combating or defending against an actual, impending or expected attack.

- (4) A government or sovereign power, or by any authority maintaining or using military, naval or air forces.
- (5) An agent of any such government, power, authority or forces.
- (6) Any weapon of war employing atomic fission or radioactive force whether in time of peace or war.
- (7) Insurrection, rebellion, revolution, civil war, usurped power, or action taken by governmental authority in hindering, combating, or defending against such an occurrence.
- (8) Seizure or destruction under quarantine regulations.
- (9) Confiscation by order of any government or public authority.
- (10) Risks of contraband or illegal transportation or trade.
- (11) Terrorist activity, including action in hindering or defending against an actual or expected terrorist activity. Such loss or damage is excluded regardless of any other cause or event that contributes concurrently or in any sequence to the loss. Terrorist activity means any activity which is unlawful under the laws of the United States or any state and which involves any of the following:

- (A) The hijacking or sabotage of any conveyance including an aircraft vessel, cab, truck, van, trailer, container or vehicle, or warehouse or other building.

- (B) The seizing or detaining and threatening to kill, injure or continue to detain another individual in order to compel a third person, including a governmental organization, to do or abstain from doing any act as an explicit or implicit condition for the release of the individual seized or detailed.

- (C) An assassination.

- (D) The use of any biological agent, chemical agent or nuclear weapon or device or explosive, firearm or other weapon or dangerous device, other than for mere personal monetary gain with intent to endanger directly or indirectly the safety of one or more individuals or to cause substantial damage to property.

- (E) A threat, attempt or conspiracy to do any of the foregoing.

- (12) Delay caused by strikes, lockouts, labor disturbances, riots, civil commotions or the acts of any person(s) taking part in any such occurrence or disorder, and from loss or damage when carrier, after notice to shipper or consignee of a potential risk of loss or damage to the shipment from such causes, is instructed by the shipper to proceed with such transportation and/or delivery, notwithstanding such risk.

- (13) Acts of God.

- (14) Delay caused by highway obstruction or faulty or impassable highways or lack of capacity of any highway or bridge or caused by breakdown or mechanical defect of vehicles or equipment or from any cause other than negligence of the carrier, nor shall the carrier be bound to transport by any particular schedule, means, vehicle or otherwise than with reasonable dispatch.

(e) Every carrier shall have the right in case of physical necessity to forward said property by any carrier or route between the point of shipment and the point of destination,

(f) The shipper shall indemnify carrier against loss or damage caused by inclusion in the shipment of explosives or dangerous articles or goods.

(g) The shipper, upon tender of the shipment to carrier, and the consignee, upon acceptance of delivery of shipment from carrier, shall be liable, jointly and severally, for all unpaid charges payable on account of a shipment including, but not limited to, sums advanced or disbursed by a carrier on account of such shipment. The extension of credit to either shipper or consignee for such unpaid charges shall not thereby discharge the obligation of the other party to pay such charges in the event the party to whom credit has been extended shall fail to pay such charges.

(h) If for any reason, other than the fault of the household goods carrier, delivery cannot be made to the address shown on the bill of lading or to another address of which carrier has been notified, the household goods carrier may, at its option, cause articles contained in the shipment to be stored in a warehouse selected by it at the point of delivery or at other available points at the cost of the owner, subject to a lien for all accrued charges.

(i) If shipment is refused by consignee at destination, or if shipper, consignee or owner of property fails to receive or claim it within fifteen (15) days after written notice by US mail addressed to shipper and consignee at post office addresses shown on the bill of lading, or if shipper fails or refuses to pay applicable charges in accordance with the written estimate, bill of lading and/or any valid amendments thereto, the household goods carrier may sell the property as follows:

(1) Upon notice at public auction to highest bidder for cash at a public sale to be held at a time and place named by carrier, thirty (30) days notice of which sale shall have been given in writing to shipper and consignee, and there shall have been published at least once a week for two consecutive weeks in a newspaper of general circulation at or near the place of sale, a notice thereof containing a description of the property as described in the bill of lading and the names of the consignor and consignee.

(2) Any perishable articles contained in said shipment may be sold at public or private sale without such notice if, in the opinion of the carrier, such action is necessary to prevent deterioration or further deterioration.

(3) The proceeds of any sale shall be applied toward payment of shipment charges and toward expenses of notice, advertising and sale, and of storing, caring for and maintaining property prior to sale. The balance, if any, shall be paid to the owner of the property.

(j) A shipper may not refuse a partial shipment due to loss of or damage to one or more articles.

[Source: Added at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-26. Bill of Lading

(a) No household goods shipments may be loaded until a valid bill of lading has been prepared. A bill of lading must contain:

(1) Date.

(2) The identification number for the shipment (may be a bill of lading number).

(3) The household goods carrier's information as follows:

(A) Legal name and dba (if any).

(B) Mailing address and physical address (if different from mailing address).

(C) Telephone number.

(D) USDOT number as linked to the intrastate household goods certificate.

- (E) Other motor carrier information, as required in this subsection, that will participate in the transportation of the shipment.
- (4) The shipper's information as follows:
- (A) Name.
 - (B) Mailing address and physical address (if different from mailing address).
 - (C) Telephone number.
- (5) Shipment information as follows:
- (A) Agreed upon pick up date and delivery date or agreed period of the entire move.
 - (B) Origin and destination of shipment.
 - (C) The inventory list signed by both parties or an inventory list waiver signed by the shipper.
 - (D) Identification information of the vehicle on which the shipment is loaded.
- (6) Payment and charges as follows:
- (A) Denote if the estimate was binding or non-binding.
 - (i) If non-binding, a reasonably accurate estimate of the amount of the total charges, the maximum amount (subject to the 110% rule) that must be paid at the time of the delivery to relinquish possession of the shipment.
 - (ii) If binding, the amount of charges that must be paid to relinquish possession of the shipment along with the terms of payment.
 - (B) The form of payment that will be honored upon delivery (which must be the same as shown on the estimate).
 - (C) The terms and conditions for payment of the total charges, including notice of any minimum charges.
 - (D) The maximum amount of payment that will be required at the time of delivery to obtain possession of the shipment.
 - (E) The declared value of the shipment or, if the shipper does not select the full value protection, the released value of the shipment.
 - (F) The cost to the shipper for full value shipment valuation, if selected by the shipper.
 - (G) Evidence of any insurance coverage sold to or procured for the shipper from an independent insurer, including the cost incurred for the insurance.
 - (H) A complete description of any accessorial services ordered and the charges associated with the services.
 - (I) Whether the shipper will be notified in advance of the charges before delivery. If yes, the shipper must provide fax number or address where the notifications are to occur and via method (fax, email, overnight courier, certified mail, etc.) as well as any additional charges associated with the notification.
- (7) Acknowledgments and Signatures as follows:
- (A) In the event the motor carrier of household goods reasonably believes an accessorial service is needed to safely transport a shipment, and the shipper refuses to pay for such a service, the carrier must refuse to accept the shipment and note this on the bill of lading.

- (B) Acknowledgment by the shipper that the consumer protection information "Moving in Oklahoma" was received at the time or prior to receipt of the written estimate.
- (C) Specification of the selection of the released rate of sixty cents (.60) per pound per article which is considerably less than the value of most articles transported or the full value protection with declared value of shipment specified.
- (D) Signature of carrier.
- (E) Signature of shipper.

- (b) A copy of the bill of lading must be provided to the shipper at the time of the shipper's signature. The bill of lading must be carried in the vehicle and presented to any law enforcement officer upon request.
- (c) A bill of lading may be amended only prior to the loading of the shipment and upon mutual agreement between the carrier and the shipper except as provided for in OAC 165:30-13-28. The amendment must be signed by both parties.
- (d) The bill of lading may not contain any language purporting to release or discharge the household goods carrier from liability, but may include a statement the property was received in apparent good condition except as noted on the delivery receipt.

[Source: Added at 27 Ok Reg 1773, eff 7-1-10; Amended at 29 Ok Reg 951, eff 7-1-12]

165:30-13-27. Blank or incomplete documents

A household goods carrier may provide a blank or incomplete non-binding estimate, bill of lading or other blank or incomplete documents pertaining to the move, as long as all the relevant shipping information is contained within the document to determine the final charges except the actual final shipment weight or other information necessary to finalize the shipping charges. These blank or incomplete areas or forms must be so noted at the time of the carrier's and shipper's signatures.

[Source: Added at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-28. Additional services

- (a) If the household goods carrier believes additional services are necessary to properly service a shipment after the bill of lading has been issued, the following actions must occur:
 - (1) The shipper must be allowed a minimum of one hour to determine whether it wants the additional services performed.
 - (2) If the shipper agrees to pay for the additional services, a written attachment to be made a part of the bill of lading contract must be signed by the shipper.
- (b) The shipper is not required to pay for the additional services until a minimum of thirty (30) days after delivery.
- (c) If the shipper requests additional services after the bill of lading has been issued, the following actions must occur:
 - (1) The household goods carrier must advise the shipper of the charges associated with the additional services.
 - (2) If the shipper agrees to pay for the additional services, a written attachment to be made a part of the bill of lading contract must be signed by the shipper.
- (d) The household goods carrier may require full payment at delivery for the additional services, and for 100% of the original binding estimate.

(e) When the household goods carrier is not aware of the need for shuttle services for shipment delivery, and shuttle services are required for shipment delivery, the household goods carrier may require full payment at delivery for the shuttle service.

[Source: Added at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-31. Compliance with laws and regulations

(a) All motor carriers of household goods shall conduct their operations in accordance with all applicable laws of the USDOT, State of Oklahoma and this Subchapter. All certificates heretofore or hereafter granted by the Commission are subject to applicable provisions of law and of this Subchapter as fully as if those laws and rules were set forth verbatim therein.

(b) No motor carrier of household goods shall operate or allow to be operated on the public highways of the State of Oklahoma any equipment that does not comply with safety criteria established by the USDOT, this Subchapter or, the statutes of the State of Oklahoma. No motor carrier of household goods shall permit any person to operate a motor vehicle in violation of any size or weight limits established by this Subchapter or statutes of the State of Oklahoma. Every person operating vehicles upon the public highways of this State shall meet the minimum safety standards as established by the USDOT and the statutes of the State of Oklahoma. Any vehicle which fails to meet safety criteria, or size and weight standards, or which is operated by any person under the influence of alcohol, amphetamines, stimulants or other drugs, in violation of this subsection shall be prevented from continued use of the public highways of the State of Oklahoma.

165:30-13-32. Shipping documentation [REVOKED]

[Source: Added at 12 Ok Reg 2077, eff 7-1-95; Revoked at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-33. Records

(a) Every motor carrier shall maintain accurate records of all operations, including work orders, estimates, bills of lading, freight bills, warehouse receipts, and complete information as to shipper, consignee, origin, destination, commodities hauled, charges, work performed, equipment used and date of shipment or work performed. All records shall be open to inspection at any time by an authorized agent of the Commission.

(b) All records required by this Subchapter shall be maintained at the location last designated by the motor carrier as its principal office. If no location in Oklahoma is so designated, upon demand, the records shall be made available at a location designated by the Commission, at the expense of the motor carrier.

(c) All books, records, accounts and other documents required by this Subchapter must be retained for a period of not less than three (3) years.

[Source: Added at 12 Ok Reg 2077, eff 7-1-95; Amended at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-34. Minimum standards

(a) Every vehicle used for transportation of household goods shall be in safe operating condition, and shall possess all safety equipment required by the Statutes of Oklahoma, the regulations of the USDOT and the rules of the Department of Public Safety.

(b) All vehicles will be utilized in a manner that conforms with the manufacturer's design standards and specifications.

(c) The Commission adopts the provisions of the rules and regulations as adopted by the Oklahoma Department of Public Safety in OAC 595:35, pertaining to 49 C.F.R. Federal Motor Carrier Safety Regulations, with all amendments and appendices thereto.

[Source: Added at 12 Ok Reg 2077, eff 7-1-95; Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-35. Credit [REVOKED]

[Source: Added at 12 Ok Reg 2077, eff 7-1-95; Revoked at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-36. Loss, damage and concealed claims

(a) Every motor carrier of household goods shall be liable for all loss, damage or injury it causes to goods or property while the same is being carried by it.

(b) A written claim shall be submitted to the household goods carrier and shall contain:

- (1) Tender of any agreed upon freight charges.
- (2) Facts sufficient to identify the shipment(s) of property involved.
- (3) A copy of the bill of lading.
- (4) Assertion of liability for alleged loss, damage, injury or delay.
- (5) A claim for the payment of a specific or determinable amount of money.
- (6) The basis for the amount of the claim, such as the date the article was purchased, original cost, actual cash value at the time of loss or damage, a repair estimate, etc.
- (7) When the loss of an entire package or shipment is involved, the consignee will provide a written certified statement the property has not been received from any other source.

(c) A claim shall be filed within nine (9) months after delivery to consignee, or in the case of failure to make delivery, then within nine (9) months after a reasonable time for delivery has elapsed, except as provided for in (h) of this Section.

(d) A lawsuit shall be instituted against the household goods carrier within five (5) years from the date a notice is received by the claimant that the claim was denied or any portion of said claim was disallowed by the carrier.

(e) Every motor carrier of household goods, upon receipt of a claim in writing for loss of or damage to cargo during transportation, some portion of which was performed by that carrier, regardless of the form in which the claim is presented, shall:

- (1) Acknowledge receipt of the claim in writing within thirty (30) days after receipt thereof by the household goods carrier.
- (2) Commence an investigation in good faith to determine whether the carrier acknowledges or denies liability for the loss or damage.
- (3) Either pay the claim in full, or as agreed to by mutual compromise, or deny liability for loss or damage in writing within ninety (90) days after receipt of the original claim by the carrier. Such action shall not be withheld or postponed pending receipt of payment or acknowledgment of liability from connecting carriers.

(f) Acknowledgment of liability shall be accompanied by payment in full of the value of property lost or damaged except where subject to released value. When a shipper, in the event of loss or damage and without prior approval from the consignee, elects to release a shipment at a value less than the full value of the

property shipped, said shipper will indemnify to the consignee the difference between the released value and the full value of the property shipped.

(g) Where intrastate shipments are received by the carrier of household goods from the shipper in apparent good order and with no exceptions noted on the bill of lading, and delivered by the carrier with written exceptions covering loss or damage thereto, the carrier shall have the burden of proof to establish nonliability for such loss or damage. Terms and conditions of the bill of lading contract referring to excepted causes shall remain applicable.

(h) Where intrastate shipments are received by the carrier of household goods from the shipper in apparent good order and with no exceptions noted on the bill of lading, and delivered by the carrier in the same manner with no exceptions noted, such concealed loss or damage claims must be submitted to the carrier by the shipper. Inspections covering loss or damage found after delivery must be requested to the delivering carrier in writing within fifteen (15) days after the delivery of the shipment involved. If more than fifteen (15) days have passed it is incumbent upon the consignee to offer reasonable evidence to the carrier or a representative of the carrier that loss or damage was not incurred by the consignee after delivery by the carrier.

(i) Every motor carrier of household goods shall maintain a separate numbered file on each claim for loss or damage, and shall keep in the file all documents, acknowledgments, instruments, correspondence, memoranda and other writings relating to the claim. Claim files shall be available at all times for inspection by Commission personnel and shall be retained for two (2) years after final disposition.

(j) If a carrier fails to process loss or damage claims as provided herein, or if it fails to express declinations of the claims in writing with proof of nonliability, the carrier may be found in contempt by the Commission after proper notice and hearing. Failure to pay any fine or otherwise resolve the complaint may result in a hearing by the Commission to determine if the operating authority of the carrier shall be revoked.

(k) Whenever property transported by a household goods carrier is damaged, or alleged to be damaged, and is as a consequence thereof not delivered or is rejected or refused upon tender thereof to the owner, consignee or person entitled to receive such property, the household goods carrier shall, after giving due notice to the owner and other parties that may have an interest therein and unless advised to the contrary after giving such notice, will undertake to sell or dispose of such property directly or by the employment of a competent salvage agent.

(1) The household goods carrier will dispose of the property in a manner that will fairly and equally protect the best interests of all persons having an interest therein.

(2) The household goods carrier will make an itemized record sufficient to identify the property involved so as to be able to correlate it to the shipment involved and claim, if any filed thereon.

(3) The household goods carrier will assign to each lot of such property a successive lot number and note that lot number on its record of shipment and claim, if any claim is filed thereon.

(4) Upon receipt of a claim on a shipment on which salvage has been processed in the manner required in this subsection, the household goods carrier will record in its claim file the lot number assigned, the amount of money recovered if any from the disposition of such property and the date of transmittal of such money to the person or persons lawfully entitled to

receive the same.

(5) Whenever disposition of salvage material or goods shall be made directly to an agent or employee of a carrier or through a salvage agent or company in which the carrier or one or more of its directors, officers or managers has any interest, financial or otherwise, that carrier's salvage records shall fully reflect the particular of each such transaction or relationship, or both as the case may be.

165:30-13-37. Leasing of equipment

(a) All motor carriers of household goods shall comply with all provisions of OAC 165:30-3-37.

(b) Motor carriers of household goods shall not rent equipment, with or without driver, to a private carrier or to a shipper.

[Source: Added at 12 Ok Reg 2077, eff 7-1-95; Amended at 27 Ok Reg 1773, eff 7-1-10]

PART 7. NAME CHANGES

165:30-13-51. Name changes

(a) An application to change the name or business name of the holder of an motor carrier of household goods certificate, without any change in the legal identity of the holder or any change in the ownership of the certificate, shall be filed on the appropriate form prescribed (TDF 3) under the permanent PIN of the holder with appropriate sub-number designation and with such filing fee as prescribed by law or by OAC 165:5. No notice or hearing shall be necessary unless the Commission so requires. Notice, if required, shall be as the Commission shall direct.

(b) Any change in legal identity of the holder of a motor carrier of household goods certificate, including but not limited to incorporation or dissolution of a corporation, formation or dissolution of a partnership or creation or dissolution of a trust shall require an original application for a certificate.

(c) Incorporation by a sole proprietor in which the sole proprietor is the sole shareholder of the corporation shall be deemed a name change. Incorporation by a partnership in which the partners are the sole shareholders of the corporation shall be deemed a name change.

(d) The merger of a corporate holder of a motor carrier of household goods certificate with another corporation under circumstances that the holder is not the survivor therein, shall require an original application for a certificate.

(e) The acquisition, through stock ownership or otherwise, of operating control of the business of the holder of a motor carrier of household goods certificate, by another holder of a certificate or by majority stockholders of a corporate holder, shall require an original application for a certificate.

(f) The transfer of stock in a corporation that shall result in any entity controlling fifty one percent (51%) or more of the aggregate number of voting shares of the corporation, shall require an original application for a certificate.

(g) The employment of incorporation, stock transfer, merger, change of name or similar action directly or indirectly as a device to circumvent the rules of this Chapter is prohibited.

165:30-13-72. Leasing of authority

No motor carrier of household goods certificate, nor any part thereof, or rights thereunder shall be leased; nor shall the holder thereof sublet or in any manner permit the use thereof, or the exercise of any rights or privileges thereunder by another. Violation of this Section shall be grounds for revocation of the certificate, and shall be grounds for denial of an application for authority to operate as an intrastate motor carrier of household goods.

165:30-13-73. Advertising

(a) All motor carriers of household goods shall comply with all provisions of OAC 165:30-3-75.

(b) Any person who willfully advertises to perform transportation services for which the person does not hold a proper certificate shall be subject to the penalties prescribed for contempt of the Commission.

(c) All advertisements must contain the motor carrier of household goods' USDOT number linked to the carrier's household goods certificate.

165:30-13-92. Involuntary suspension or revocation of a household goods certificate

(a) Any motor carrier of household goods certificate may be suspended or revoked by the Commission, or the holder thereof assessed a fine or other lawful punishment for violation of, or failure to comply with, any requirement or provision of law or of this Chapter.

(b) An application to revoke or suspend a motor carrier of household goods certificate may be filed by a member of the staff of the Commission or by a person adversely affected by the acts alleged. It shall be in the form of an application, and proceedings thereon, including notice and hearing if required, shall be as prescribed in the Commission's Rules of Practice, OAC 165:5.

(c) After hearing, the Commission may grant or deny the application, and may suspend, amend or revoke the certificate, or any part thereof or rights thereunder, or the Commission may assess a fine or impose limitations or conditions upon the continuation of operations under the certificate as stated in the order.

[Source: Added at 12 Ok Reg 2077, eff 7-1-95; Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-93. Reinstatement of certificate

All motor carriers of household goods shall comply with all provisions of OAC 165:30-3-103.

[Source: Added at 12 Ok Reg 2077, eff 7-1-95; Amended at 27 Ok Reg 1773, eff 7-1-10]

165:30-13-94. Violations

(a) Every motor carrier of household goods, shipper, their employees or any other person who violates or fails to comply with or procures, aids or abets in the violation of any provision of law or requirements of this Chapter; or who fails to obey, observe or comply with any order, decision, rule, regulation, direction, demand or requirement, or any part or provision thereof, of the Commission, or who procures, aids, or abets any corporation or person in its refusal or willful failure to obey, observe or comply with any such order, decision, rule, direction, demand or regulation, or part of provision thereof, after notice and hearing, is guilty of contempt of the Commission and is subject to a fine not to exceed One Thousand (\$1,000.00) Dollars for the first violation and for the second violation within a year, a penalty not to exceed Five Thousand (\$5,000.00) Dollars, or as otherwise provided for by law.

(b) All motor carriers must yield for inspection as directed by a duly authorized motor carrier enforcement officer or by posted signs.

(c) Motor carrier enforcement officers may hold and detain equipment operated by a motor carrier for violations of applicable laws in the Oklahoma Statutes or the rules of this Agency.

(d) If, in the judgment of a motor carrier enforcement officer, a detained vehicle poses an inherent risk to public health, safety or welfare, upon direction of the Transportation Division Director or his/her designee, the motor carrier enforcement officer may arrange for impoundment of the detained vehicle at the expense of the motor carrier.

(e) Contents of impounded equipment must be inventoried, with any inventory expense incurred at the sole cost of the motor carrier.

SUBCHAPTER 15. INTRASTATE PRIVATE CARRIERS

PART 1. GENERAL PROVISIONS

165:30-15-1. Purpose

The public policy of this State, as declared by the Legislature, requires private carriers shall be regulated by the Commission to protect the public interest, the environment and the highways of the State of Oklahoma and ensure compliance with applicable safety, size and weight laws, rules and regulations.

[Source: Added at 13 Ok Reg 247, eff 11-1-95 (emergency); Added at 13 Ok Reg 2419, eff 7-1-96]

PART 3. OBTAINING A PRIVATE CARRIER LICENSE AND LICENSE REQUIREMENTS

Editor's Note: ¹This Part initially included EMERGENCY Sections 165:30-15-11 through 165:30-15-16. However, in a later permanent action, the same numbers were used for different rules and placed in Part 5. The emergency rules initially numbered in Part 3 were either renumbered and moved into Part 5 or allowed to expire without being superseded by a permanent action. See the Source Note in each Section for more specific information.

165:30-15-4. Obtaining a license

(a) No intrastate private carrier, utilizing equipment with an actual weight, registered weight or combination weight or GVWR/GCWR in excess of twenty-six thousand (26,000) pounds and/or GCWR in excess of twenty-six thousand (26,000) pounds when the trailer's GVWR is greater than ten thousand (10,000) pounds, shall operate upon any street, road, public highway or dedicated public thoroughfare of this State for the transportation of property without first obtaining from the Commission a license as provided in this Section. A private carrier license is not required for a bona fide farmer transporting commodities from farm to market or market to farm; registered and valid non-profit organizations or any private carrier operating equipment leased or rented from a company that leases or rents vehicles on a commercial scale, provided the lease or rental contract is for thirty-one (31) days or less and a copy of the contract is carried in the vehicle. A license issued under this Subchapter shall not include transportation as a for-hire motor carrier. For-hire motor carriers must comply with Subchapter 3 and/or Subchapter 13 of this Chapter.

(1) An applicant for a private carrier license shall file with the Commission a written application on the appropriate form prescribed by the Commission (TDF 1), and shall tender with the application a filing fee as prescribed by law or by Commission rule.

(2) The application shall be assigned a personal identification number ("PIN"), which shall be the permanent identification number for all matters relating to the license granted therein. Any application thereafter filed to amend the license by the same applicant shall be filed in the same cause under the original PIN, and otherwise shall be governed by the provisions of this Subchapter relating to an application for license. Each subsequent application shall also bear a sub-number in sequence.

(3) A license shall be personal to the holder thereof, and shall be issued only to an individual, a corporation, a limited liability corporation, a partnership or some other legally recognized entity.

(4) The filing of an application for a license does not of itself authorize any private carrier operations by the applicant. Such operations are prohibited until after all requirements have been met, and a license has been issued. All requirements for compliance with this Subchapter shall be met within sixty (60) days from date of application recommending the license be

issued. Failure to comply may result in dismissal of the application for a license. Licenses issued shall be valid for a maximum of one (1) year and may be renewed after application has been filed as provided by this Chapter.

(5) No license for private carrier intrastate operations shall be issued until applicant has a satisfactory USDOT safety rating or the applicant has demonstrated its ability to conduct operations in a safe and reasonable manner and applicant is in compliance with all applicable rules and laws of the State of Oklahoma; has furnished proper proof of all insurance required by this Subchapter and all applicable state statutes.

(6) The application shall require the following:

(A) Name, a single trade name (if any), email address, mailing address, physical address, telephone number and domicile county of the applicant.

(B) The type of applicant (indicating if sole proprietorship, partnership, corporation or other legal entity), specifying the names of all officers, if any, and listing the email, mailing and physical addresses of each.

(C) The type of operations for which the applicant is applying.

(D) The name and address of the motor carrier's process agent in Oklahoma (if the motor carrier does not maintain its principal place of business in Oklahoma).

(E) Declaration of its USDOT number, safety rating and a safety summary report which details its safety program and lists all safety violations identified within the prior twelve (12) months. Carriers without a USDOT number must attach a copy of its previously submitted application for a USDOT number. The applicant shall notify the Commission in writing of its USDOT number once issued, unless the USDOT number is issued by the Commission.

(F) A size and weight summary report which details its size and weight compliance program and lists all size and weight violations identified within the prior twelve (12) months.

(G) A listing of all power vehicles and trailers to be used, detailing the model, make and capacity of each vehicle and denoting whether each vehicle is owned or leased.

(H) A description of all terminal, dock or motor pool facilities.

(I) A declaration that the Applicant is in full compliance with all other state laws, rules and regulations.

(J) Any other information the Commission deems necessary.

(7) Every person operating under the Motor Carrier Act of 1995 and the rules of this Commission shall possess a copy of this Chapter governing the operations of motor carriers and private carriers.

(8) A private carrier desiring to modify its license shall file a sub application (TDF 1). Sub applications to include hazardous materials must comply with the provisions in this Section. Sub applications to modify other types of operations shall be exempt from (6)(D)-(G) of this subsection.

(9) A copy of the current license under which a carrier operates shall be carried at all times in each power unit by the private carrier.

(b) Applicant may be issued a provisional intrastate license not to exceed ninety (90) days from the date application is filed, provided all requirements, with the

exception of the educational compliance requirements, for the intrastate license have been met. Applicant must provide a written request for the provisional intrastate license. If the provisional intrastate license is issued, a copy of the provisional intrastate license must be carried in each vehicle operated by the Applicant.

(c) No intrastate private carrier license shall be issued to an applicant until all outstanding fines or judgments due the Commission or other state(s) regulatory agencies have been satisfied.

(d) An intrastate private carrier additionally conducting intrastate motor carrier operations under a valid motor carrier license, certificate or permit need not obtain a private carrier license.

(e) If a hearing is held, the applicant shall have the burden of establishing its ability to conduct operations in a safe and reasonable manner and in compliance with all applicable rules and laws of the State of Oklahoma and that it has furnished or will furnish proper proof of all insurance required by this Chapter and all applicable state statutes. The Commission may grant or deny the application or may impose conditions, stipulations and limitations on the license.

(f) All proceedings subsequent to the application, and the conduct of the hearing, shall be governed by applicable provisions of the Commission's Rules of Practice, OAC 165:5.

[Source: Added at 14 Ok Reg 1251, eff 5-12-97; Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 15 Ok Reg 3041, eff 7-15-98; Amended at 18 Ok Reg 23, eff 10-11-00 (emergency); Amended at 18 Ok Reg 2384, eff 7-1-01; Amended at 23 Ok Reg 509, eff 12-19-05 (emergency); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 29 Ok Reg 951, eff 7-1-12; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-15-5. License renewals

(a) Any private carrier desiring to continue intrastate private carrier operations as granted in its license, shall, prior to the date of license expiration, apply for renewal by submitting the appropriate application form (TDF 2) and all supporting documentation. Each renewal application shall be properly signed and attested to as follows:

- (1) Application of sole proprietorship must be signed by owner.
- (2) Application of partnership must be signed by one of the partners.
- (3) Application of corporation must be signed by officer.

(b) All intrastate private carrier licenses issued by the Commission shall expire the same calendar month as issued, and shall be valid for a period of one year, but may be renewed for up to three years. Carriers renewing licenses for more than one year must maintain all requirements of that license as prescribed in Part 3 of this Subchapter in order for the license to be valid.

(c) Renewal applications shall be accompanied by a filing fee as prescribed by the Commission, unless filed simultaneously with a sub application to modify operations.

(d) A renewal application may be set for hearing in the discretion of the Commission for good cause. All proceedings subsequent to the application, and the conduct of the hearing, shall be governed by applicable provisions of the Commission's Rules of Practice, OAC 165:5.

(e) An intrastate private carrier desiring to renew its license should apply for renewal of its license a minimum of thirty (30) days prior to its expiration.

(f) A renewal application will not be accepted if the license has previously expired, unless the Director of the Transportation Division reviews and approves the acceptance of the application for renewal.

(g) No intrastate private carrier license shall be renewed until all outstanding fines or judgments due the Commission or other state(s) regulatory agencies have been satisfied.

(h) No intrastate private carrier operations shall be performed under an expired private carrier license.

[Source: Added at 14 Ok Reg 1251, eff 5-12-97; Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 18 Ok Reg 2384, eff 7-1-01; Amended at 21 Ok Reg 774, eff 7-1-04; Amended at 23 Ok Reg 509, eff 12-19-05 (emergency); Amended at 23 Ok Reg 2325, eff 7-1-06]

165:30-15-6. Insurance

(a) No intrastate private carrier required to obtain a private carrier license whose principal place of business is in Oklahoma shall conduct any operations in this State unless such operations are covered by a valid primary bond or insurance policy issued by an Oklahoma State Insurance Commission authorized provider. No private carrier required to obtain a private carrier license shall conduct any operations in this State unless such operations are covered by a valid bond or insurance policy issued by a NAIC certified state insurance commission licensed provider. No holder of a license shall conduct any operations before a proper certificate of insurance(s) has been filed with, and approved by the Commission. A surety bond containing all obligations provided by this Section may be substituted for an insurance policy.

(b) Every intrastate private carrier of property is required to obtain a private carrier license, and shall file with, and must be approved by, the Commission a certificate on Form E or G certifying that there is in effect a valid bond or insurance policy covering operations in Oklahoma to protect the public against loss of life, injury and property damage in minimum amounts, of combined single limits, for bodily injuries to or death of all persons injured or killed in any accident, and loss or damage in any one accident to property or other (excluding cargo), as follows:

- (1) Transporting non-hazardous commodities or commodities not mentioned in (B)-(C) of this subsection - \$350,000.
- (2) Transporting deleterious substances - \$750,000.
- (3) Transporting hazardous waste, materials, substances, explosives, poison gas or highway controlled radioactive materials as defined in and as required by 49 CFR, Parts 100 through 399.

(c) The Commission may by order grant authority to operate or to continue operating as a private carrier conditional upon carrying insurance coverage in amounts larger than prescribed by (b) of this Section.

(d) No certificate of insurance or surety bond filed with the Commission pursuant to this Section shall be canceled, unless the authorization to conduct operations has been canceled, except after thirty (30) days written notice made to the Commission, on Form K or L, which notice shall be effective only upon actual receipt thereof by the Commission.

(e) Insurance certificates or surety bonds may be canceled without the thirty (30) days written notice on Form K or L only when the authorization to operate has previously expired or cancelled, the carrier provides an affidavit stating no operations have been conducted and the effective date of the cancellation notice is not before the date the cancellation notice is received in the Commission.

(f) Insurance certificates or surety bonds not properly cancelled or expired shall be considered expired one (1) year after the carrier's authorization to operate has been cancelled or expired.

(g) Insurance certificates or surety bonds approved by this Commission shall be replaced by more recent insurance certificates or surety bonds. The liability of the retiring insurer or surety shall be terminated as of the effective date of the replacement insurance certificate or surety bond provided the replacement is approved by this Commission.

(h) No certificate of insurance shall be filed with the Commission which contains a provision to the effect that liability thereunder may be limited or avoided because of the culpability, the recklessness, or the condition of the driver of the vehicle involved or any other restriction relating to the driving or operation of the vehicle.

(i) Every certificate of insurance filed with the Commission shall automatically provide that the public is protected from damage sustained through operations of any and all vehicles operated by the private carrier insured, whether or not listed or identified in the policy; and that liability is not limited by the description of any particular vehicle or route which may be traveled by the motor vehicle in transporting passengers or property under the license.

(j) Every certificate of insurance filed with the Commission shall be executed by an officer or authorized agent of the insurance company; and if executed by an agent, a copy of his written authority or power of attorney to execute the same shall be attached to the certificate.

(k) When insurance is provided by more than one insurer in order to aggregate security limits for private carriers, a separate insurance certificate and endorsement is required of each insurer. For each motor carrier, no more than one (1) primary insurance filing and no more than two (2) excess insurance filings shall be approved.

(l) Every private carrier shall maintain in force at all times all insurance required by state laws and by this Section. Failure for any cause to maintain any required insurance in force on file with the Commission shall automatically and without notice suspend the license of a private carrier until proper insurance is filed.

(m) Whenever the license of a private carrier is suspended for failure to maintain in force insurance required by this Section on file with the Commission, the carrier must file, within sixty (60) days after commencement of the suspension, proper certificate(s) of insurance as provided in this Section and a sufficient showing, by affidavit or otherwise, that no operations were conducted during the period that insurance was not in force (TDF 18).

(n) Whenever a private carrier fails to provide proper certificates of insurance within sixty (60) days after suspension thereof as provided in this Section, the private carrier's license shall be cancelled by operation of law, and without notice. A license so cancelled shall not be reinstated or otherwise made operative except upon proper showing, at a hearing, that the private carrier was actually covered by proper insurance or proper certificate during the suspension or cancellation period, and that failure to file with the Commission was not due to the private carrier's own negligence.

(o) Any private carrier conducting operations under a suspended or cancelled license shall not be eligible to apply for a new license for a period of not less than one hundred eighty (180) days. The one hundred eighty (180) day period shall be determined by either the date insurance on file expires or the date a violation is discovered, whichever occurrence is later.

[Source: Added at 14 Ok Reg 1251, eff 5-12-97; Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 15 Ok Reg 3041, eff 7-15-98; Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-15-7. Current address requirement

(a) Any notice required by law, the Commission's Rules of Practice, OAC 165:5, or this Subchapter to be served upon or mailed to any holder of a private carrier license shall be delivered or mailed to the last known email or mailing address as reflected by the records of the Commission. It is the duty of every holder of a private carrier license to notify the Transportation Division by specific written request (TDF 17) of any change in the email address, address of the principal place of business or mailing address thereof.

(b) Any non-resident private carrier who has not filed a written designation of service agent with the Commission shall be deemed to have designated the Secretary of State of Oklahoma for the purpose of service of process by the Commission.

(c) Where such notice is required by law, Commission's Rules of Practice, OAC 165:5, or this Subchapter is returned undeliverable, it will be grounds for revocation of the private carrier license.

[Source: Added at 14 Ok Reg 1251, eff 5-12-97; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-15-8. Name changes

(a) An application to change the name or business name of the holder of an intrastate private carrier license, without any change in the legal identity of the holder or any change in the ownership of the license, except as provided in subsections (c), (d) or (e) below, shall be filed on the appropriate form prescribed (TDF 3) under the permanent PIN of the holder with appropriate sub-number designation and with such filing fee as prescribed by law or by Commission rule. No notice or hearing shall be necessary unless the Commission so requires. Notice, if required, shall be as the Commission shall direct.

(b) Any change in legal identity of the holder of an intrastate private carrier license, except as provided in subsections (c), (d) or (e) below, including but not limited to incorporation or dissolution of a corporation, formation or dissolution of a partnership or creation or dissolution of a trust, shall require an original application for a license.

(c) Incorporation by a sole proprietor in which the sole proprietor is the majority shareholder of the corporation, limited liability corporation or limited liability partnership shall be deemed a name change. Incorporation by a partnership in which the partners are the majority shareholders of the corporation shall be deemed a name change.

(d) A change in legal entity from a corporation, limited liability corporation or a limited liability partnership to a sole proprietorship, a partnership, a limited liability corporation or a limited liability partnership in which the sole proprietor, partners or shareholders hold the majority of all issued and outstanding shares of the corporation shall be deemed a name change.

(e) The merger of two or more corporations in which the survivor is the holder of a current license shall be deemed a name change.

(f) The transfer of stock in a corporation that shall result in any entity controlling fifty one percent (51%) or more of the aggregate number of voting shares of the corporation shall not be deemed a name change.

(g) The employment of incorporation, change of name or similar action directly or indirectly as a device to circumvent the rules of this Subchapter is prohibited.

[Source: Added at 14 Ok Reg 1251, eff 5-12-97]

165:30-15-9. Identification device

(a) Every private motor carrier operating upon the public highways of the State of Oklahoma shall obtain and display a current identification device issued by this Commission, for each power unit operated by said private motor carrier and make it available for inspection upon request.

(1) Only one (1) identification device is required for each power unit.

(2) The annual fee for each identification device will be as prescribed by law or Commission rule.

(3) Identification devices shall expire simultaneously with the expiration date of the annual license issued to the motor carrier.

(b) No identification device may be sold or otherwise transferred.

(c) Identification devices found to be in the possession of a carrier not authorized will be confiscated and returned to the Commission by the motor carrier enforcement officer.

(d) No identification devices will be issued to any private motor carrier who does not meet all statutory, regulatory and Commission requirements.

(e) Identification device(s) must be acquired prior to the expiration of each annual expiration of a multiple year renewal license to extend the motor carrier license. Failure to timely acquire the identification device(s) will cause the motor carrier license to expire. Failure to acquire the identification device(s) within 30 days of the expiration of the license will cause the motor carrier license to automatically expire and become subject to reinstatement rules as prescribed in OAC 165:30-3-103.

PART 5. CONDUCTING OPERATIONS

165:30-15-11.¹ Deleterious Substance Transport Permit

All intrastate private carriers transporting any deleterious substance(s) shall comply with all provisions of 165:30-3-13.

[Source: Added at 13 Ok Reg 247, eff 11-1-95 (emergency)²; Added at 13 Ok Reg 2419, eff 7-1-96; Amended at 14 Ok Reg 2539, eff 7-1-97]

EDITOR'S NOTE: ¹An emergency rule called "Obtaining a license" was promulgated at this number (165:30-15-11) and expired on 7-14-96 without being superseded by a permanent action. For the text of the emergency rule numbered at 165:30-15-11 and effective from 11-1-95 through 7-14-96, see 13 Ok Reg 247.

EDITOR'S NOTE: ²The emergency rule for "Deleterious Substance Transport Permit" was numbered at 165:30-15-14 and was later promulgated as a permanent rule at this number (165:30-15-11).

165:30-15-12.¹ Markings

Every motor vehicle of 26,001 pounds GVWR or greater operated by an intrastate private carrier shall comply with the provisions of 165:30-3-17.

[Source: Added at 13 Ok Reg 247, eff 11-1-95 (emergency)²; Added at 13 Ok Reg 2419, eff 7-1-96; Amended at 14 Ok Reg 1251, eff 5-12-97; Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 15 Ok Reg 3041, eff 7-15-98; Amended at 18 Ok Reg 23, eff 10-11-00 (emergency); Amended at 18 Ok Reg 2384, eff 7-1-01]

EDITOR'S NOTE: ¹An emergency rule called "License renewals" was promulgated at this number (165:30-15-12) and expired on 7-14-96 without being superseded by a permanent action. 165:30-15-29.² Name changes [EXPIRED]

[Source: Added at 13 Ok Reg 247, eff 11-1-95 through 7-14-96 (emergency)¹]

EDITOR'S NOTE: ¹This emergency action expired without being superseded by a permanent action. Upon expiration of an emergency action enacting a new Section, the Section is no longer effective. Therefore, on 7-15-96 (after the 7-14-96 expiration of the emergency action), the text of 165:30-15-29 was no longer effective. For the official text of the emergency rule that was effective from 11-1-95 through 7-14-96, see 13 Ok Reg 247.

EDITOR'S NOTE: ²On 5-12-97, a permanent rule called "Suspension or discontinuance of license" was added at this number (165:30-15-29), creating a duplication in numbering. The rule was editorially renumbered and codified at 165:30-15-35.

165:30-15-30.² Leasing of equipment [SUPERSEDED]

[Source: Added at 13 Ok Reg 247, eff 11-1-95 (emergency)¹]

EDITOR'S NOTE: ¹This emergency rule was superseded by a permanent rule numbered at 165:30-15-16, effective 7-1-96.

EDITOR'S NOTE: ²On 5-12-97, a permanent rule called "Reinstatement of a private carrier license" was added at this number (165:30-15-30), creating a duplication in numbering. The rule was editorially renumbered and codified at 165:30-15-36.

PART 7. VIOLATIONS, SUSPENSION OR CANCELLATION

165:30-15-31. Loading capacity-safety compliance

All intrastate private carriers shall comply with the provisions of 165:30-3-71.

[Source: Added at 13 Ok Reg 247, eff 11-1-95 (emergency); Added at 13 Ok Reg 2419, eff 7-1-96]

165:30-15-32. Contempt complaint

In addition to the procedures set forth in the Oklahoma Statutes and in the Oklahoma Corporation Commission Rules of Practice, OAC 165:5 regarding the procedure in proceedings as for contempt, the procedures as set forth in 165:30-3-76 may be followed for violation of any provision of law or of the rules of this Subchapter.

[Source: Added at 13 Ok Reg 247, eff 11-1-95 (emergency); Added at 13 Ok Reg 2419, eff 7-1-96]

165:30-15-33. Pollution abatement

All private carriers shall comply with the provisions of 165:30-3-92.

[Source: Added at 13 Ok Reg 247, eff 11-1-95 (emergency); Added at 13 Ok Reg 2419, eff 7-1-96]

165:30-15-34. Violations

(a) Every for-hire motor carrier, shipper, private motor carrier, their employees or any other person who violates or fails to comply with or procures, aids or abets in the violation of any provision of law or of any requirements of this Chapter; or who fails to obey, observe or comply with any order, decision, rule or regulation, direction, demand or requirement, or any part or provision thereof, of the Commission, or who procures, aids, or abets any corporation or person in its refusal or willful failure to obey, observe or comply with any such order, decision, rule, direction, demand or regulation, or part of provision thereof, after notice and hearing, is guilty of contempt of the Commission and is subject to a fine not to exceed Five Hundred (\$500.00) Dollars per violation per day or as otherwise provided for by law.

(b) All motor carriers must yield for inspection as directed by a duly authorized motor carrier enforcement officer or by posted signs.

(c) Motor carrier enforcement officers may hold and detain equipment operated by a motor carrier for violations of applicable laws in the Oklahoma Statutes or rules of this Agency.

(d) If, in the judgment of a motor carrier enforcement officer, a detained vehicle poses an inherent risk to public health, safety or welfare, upon direction of the Transportation Division Director or his designee, the motor carrier enforcement officer may arrange for impoundment of the detained vehicle at the expense of the motor carrier.

(e) Contents of impounded equipment must be inventoried, with any inventory expense incurred at the sole cost of the motor carrier.

[Source: Added at 13 Ok Reg 247, eff 11-1-95 (emergency); Added at 13 Ok Reg 2419, eff 7-1-96; Amended at 14 Ok Reg 2539, eff 7-1-97; Amended at 21 Ok Reg 774, eff 7-1-04; Amended at 25 Ok Reg 1546, eff 7-1-08]

165:30-15-35. Suspension or discontinuance of license

(a) An intrastate private carrier may request cancellation of its license without notice or hearing.

(b) Any intrastate private carrier requesting cancellation of its license while in good standing may reapply for a new license at any time.

(c) Any intrastate private carrier license may be suspended or revoked by the Commission, or the holder thereof assessed a fine or other lawful punishment for violation of, or failure to comply with, any requirement or provision of law or of this Chapter.

(d) An application to revoke or suspend an intrastate private carrier license may be filed by a member of the staff of the Commission or by a person adversely affected by the acts alleged. It shall be in the form of an application, and proceedings thereon, including notice and hearing if required, shall be as prescribed in the Oklahoma Corporation Commission's Rules of Practice, OAC 165:5.

(e) Any violation of other state statutes or regulations shall be cause to initiate an application for revocation by staff or other adversely affected persons.

(f) After hearing, the Commission may grant or deny the application, and may suspend or revoke the license, or any part thereof or rights thereunder, or the Commission may assess a fine or impose limitations or conditions upon the

continuation of operations under the license as stated in the order.

(g) Any private carrier conducting operations under a suspended or cancelled license, shall not be eligible to apply for a new license for a period of not less than ninety (90) days. Except for insurance violations as noted in 165:30-3-11, the ninety (90) day period shall begin the date a Commission order is signed suspending or canceling a private carrier license. This subsection shall not apply to private carrier licenses which have expired.

(h) The employment of incorporation, stock transfer, merger, change of name or similar action directly or indirectly as a device to evade subsection (f) of this Section is prohibited.

SUBCHAPTER 16. INTERSTATE PRIVATE CARRIERS

165:30-16-1. USDOT numbers and markings

All motor carriers engaged in interstate private commerce shall comply with all provisions of OAC 165:30-10-1.

[Source: Added at 23 Ok Reg 509, eff 12-19-05 (emergency); Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 29 Ok Reg 951, eff 7-1-12]

165:30-16-2. Lease agreement

All motor carriers engaged in interstate private commerce shall comply with all provisions of 49 C.F.R. 376.11 with regard to lease agreements.

[Source: Added at 23 Ok Reg 509, eff 12-19-05 (emergency); Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-16-3. Shipping documentation

All motor carriers engaged in interstate private commerce shall be required to carry at all times documents that establish legal possession of cargo.

[Source: Added at 23 Ok Reg 509, eff 12-19-05 (emergency); Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-16-4. Compliance with laws and regulations

(a) All motor carriers engaged in interstate private commerce shall conduct their operations in accordance with all applicable laws of the State of Oklahoma and all applicable rules of the Commission. All registrations heretofore or hereafter filed with the Commission are subject to applicable provisions of law and of the rules of this Subchapter as fully as if those laws and rules were set forth verbatim herein.

(b) No motor carrier engaged in interstate private commerce shall operate or allow to be operated on the public highways of the State of Oklahoma any equipment for hire that does not comply with safety criteria established by the Statutes of Oklahoma or by the Department of Public Safety. No motor carrier shall permit any person to operate a motor vehicle for hire when such person is intoxicated or under the influence of alcohol or under the influence of amphetamines, stimulants or other drugs. Any vehicle which fails to meet safety criteria, or which is operated by a person under the influence of alcohol, amphetamines, stimulants or other drugs, shall be prevented from continued use of the public highways of the State of Oklahoma.

(c) Violation of the rules of this Subchapter may result in the motor carrier being prohibited from using the public highways of the State of Oklahoma or any other

penalties deemed appropriate by the Commission pursuant to authority granted to the Commission.

[Source: Added at 23 Ok Reg 509, eff 12-19-05 (emergency); Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-16-5. Minimum standards

(a) Every vehicle used for interstate private commerce shall be in safe operating condition, and shall possess all safety equipment required by the Statutes of Oklahoma, the regulations of the USDOT and the rules of the Department of Public Safety.

(b) All vehicles will be utilized in a manner that conforms with the manufacturer's design standards and specifications.

(c) The Commission adopts the provisions of the rules and regulations as adopted by the Oklahoma Department of Public Safety in OAC 595:35, pertaining to 49 C.F.R. Federal Motor Carrier Safety Regulations, with all amendments and appendices thereto.

[Source: Added at 23 Ok Reg 509, eff 12-19-05 (emergency); Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-16-6. Loading capacity

All interstate private carriers shall comply with all provisions of OAC 165:30-3-71.

165:30-16-7. Contempt complaint

In addition to the procedures set forth in the Oklahoma Statutes and in the Commission Rules of Practice, OAC 165:5, regarding the procedure in proceedings as for contempt, the procedures set forth in 165:30-3-76 may be followed for violation for any requirement or provision of law or the rules of this Subchapter.

[Source: Added at 23 Ok Reg 509, eff 12-19-05 (emergency); Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-16-8. Pollution abatement

All motor carriers engaged in interstate private commerce shall comply with all provisions of OAC 165:30-3-92.

[Source: Added at 23 Ok Reg 509, eff 12-19-05 (emergency); Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-16-9. Deleterious Substance Transport Permit

All interstate private carriers transporting any deleterious substance(s) shall comply with all provisions of OAC 165:30-3-13 and OAC 165:30-3-11.

[Source: Added at 23 Ok Reg 509, eff 12-19-05 (emergency); Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-16-11. Violations

(a) Every private motor carrier, their employees or any other person who violates or fails to comply with or procures, aids or abets in the violation of any provision of law or of any requirement of this Chapter; or who fails to obey, observe or comply with any order, decision, rule or regulation, direction, demand or requirement, or any part or provision thereof, of the Commission, or who procures, aids, or abets any corporation or person in its refusal or willful failure to obey, observe or comply with any such order, decision, rule, direction, demand or regulation, or part of provision thereof, after notice and hearing, is guilty of contempt of the Commission and is subject to a fine not to exceed Five Hundred (\$500.00) Dollars per violation

per day or as otherwise provided for by law.

(b) All private motor carriers must yield for inspection as directed by a duly authorized motor carrier enforcement officer or by posted road signs.

(c) Motor carrier enforcement officers may hold and detain equipment operated by a motor carrier for violations of applicable laws in the Oklahoma Statutes or rules of this Agency.

(d) If, in the judgment of a motor carrier enforcement officer, a detained vehicle poses an inherent risk to public health, public safety or welfare, upon direction of the Transportation Division Director or her/his designee, the motor carrier enforcement officer may arrange for impoundment of the detained vehicle at the expense of the motor carrier.

(e) Contents of impounded equipment must be inventoried, with any inventory expense incurred at the sole cost of the private motor carrier.

[Source: Added at 29 Ok Reg 951, eff 7-1-12]

SUBCHAPTER 17. HAZARDOUS WASTE TRANSPORTERS

PART 1. GENERAL PROVISIONS

165:30-17-1. Purpose and applicability

(a) The rules in this Subchapter are intended to implement a uniform registration and permitting program for motor carriers who transport hazardous waste in interstate or intrastate commerce of a type and amount that requires the shipment to be accompanied by a Uniform Hazardous Waste Manifest contained in 40 CFR, Part 262; and to conform to the procedures and requirement contained in the report submitted to the secretary of transportation pursuant to Section 22 of the HMTUSA by the Alliance for Uniform Hazardous Materials Transportation Procedures (49 USC app 1801-1813 amended by Sec. 20).

(b) The rules in this Subchapter are intended to reflect or complement the procedures as set forth by the Alliance. In the event of conflict, the procedures as set forth by the Alliance will prevail.

(c) Motor vehicles owned and operated by a local, state, or federal government, or any other political subdivision, are not subject to the provisions of this Subchapter.

(d) The Transportation Division may enter into agreements with federal agencies, a national repository or other participating states as necessary to allow the reciprocal registration and permitting of motor carriers transporting hazardous waste. The agreements may include procedures for determining a base state, the collection and distribution of registration fees, dispute resolution, the exchange of information for reporting and enforcement purposes, and other provisions necessary to fully implement, administer and enforce the uniform program.

(e) This Subchapter preempts and supersedes any hazardous waste transportation registration or permitting program administered or enforced by any state agency, city, county, or other political subdivision of the state.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-2. Cooperation with other base states

The Commission will cooperate with other base states in exchanging information and transmitting funds relating to motor carriers registered and permitted under the Alliance.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

PART 3. APPLYING FOR HAZARDOUS WASTE REGISTRATION AND PERMIT

165:30-17-11. Selection of base state

- (a) A motor carrier transporting or intending to transport hazardous waste in and/or through a participating state must register and/or permit in a participating state.
- (b) If the motor carrier's principal place of business is in a participating state, the motor carrier must use its principal place of business state as its base state.
- (c) If the motor carrier's principal place of business is not in a participating state, the motor carrier shall select the participating state in which it operates the most miles (based upon IRP percentages).
- (d) A motor carrier's base state may change due to the motor carrier changing its principal place of business or due to the entry of new states into the uniform program. Procedures set forth by the Alliance will be followed as it pertains to the changing of a motor carrier's base state.

165:30-17-12. Obtaining a hazardous waste registration and permit

- (a) A motor carrier with its principal place of business in Oklahoma, or that designates Oklahoma as its base state, shall register as a hazardous waste transporter with and obtain a permit from the Commission before transporting a hazardous waste in or through Oklahoma. A motor carrier that designates another participating state as its base state shall register as a hazardous waste transporter and obtain a permit from that state before transporting a hazardous waste in or through the state of Oklahoma.
- (b) A motor carrier who engages in interstate or intrastate transportation of a hazardous waste and who is required to register its hazardous waste transportation in Oklahoma shall file parts I, II and IV of the uniform application (UPW) with the Commission and pay the prescribed fees for registration and permits for its Oklahoma waste transportation as well as fees for reciprocal states.
- (c) Upon a motor carrier's compliance with this Subchapter, the Commission shall issue a Hazardous Waste Registration and/or Permit to the motor carrier within ninety (90) days. Motor carriers must maintain valid liability insurance on file with this Commission in accordance with OAC 165:30-3-11. Failure to do so shall subject the registration or permit to revocation.
- (d) The Commission shall not issue a registration or permit to a motor carrier if the Commission determines that a motor carrier's conduct would constitute grounds for suspension or revocation under this Subchapter. The Transportation Division may elect to request additional information from the motor carrier to support the motor carrier's application for registration and/or permit. Additional information requested shall be based upon the motor carrier's compliance with the federal motor carrier safety regulations.
- (e) A registration is valid for one (1) year and a permit is valid for three (3) years unless the motor carrier fails to renew its registration, the permit is suspended or revoked or there is a substantial change in the motor carrier's operations during the permitting period.
- (f) Each motor carrier shall file a Part I - Registration of the uniform application (UPW - Part I) on an annual basis. However, for the first year after the effective date of this Subchapter, the Transportation Division may stagger the registration date for motor carriers. Registration fees shall be apportioned for any quarterly time frame exceeding one (1) year.

(g) Each motor carrier shall additionally file a Part II - Permitting of the uniform application (UPW - Part II) every (3) three years. However, for the first year after the effective date of this Subchapter, the Transportation Division may divide the total pool of applicants to be granted a uniform permit into three (3) classes. The first class may be granted uniform permits with a term of one (1) year; the second class may be granted uniform permits with a term of two (2) years; and the third class may be granted uniform permits for three (3) years. Permit fees shall be apportioned for any permit time not equaling a three (3) year time frame.

(h) Each uniform registration and permit application shall contain certification by a responsible official of the applicant who is authorized to certify applications for registrations and permits on behalf of the applicant. Such certification shall contain the following statement, "I certify that, to the best of my knowledge and after due investigation, the information contained in this application is true, accurate, and complete" and shall contain the name, title, and telephone number of the official certifying the application. Such certification must be signed and dated by the official certifying the application.

(i) No registration or permit shall be issued to a motor carrier with outstanding fines owed to another state agency.

(j) A registered and permitted motor carrier shall maintain a copy of its valid registration and permit for Hazardous Waste in each vehicle when transporting a hazardous waste.

(k) The hazardous waste registration and permit are nontransferable.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01; Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 35 Ok Reg 1044, eff 10-1-18]

165:30-17-13. Filing of proof of proper liability insurance

All motor carriers shall comply with the provisions of 165:30-3-11.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-14. Letter of filing

(a) A motor carrier may provide a written request for a letter of filing that, if issued, will allow a motor carrier to operate in the base state and reciprocal states for a period of up to 90 days while the motor carrier's application for registration and permit is being processed.

(b) The Commission shall not issue a letter of filing to a motor carrier until the motor carrier has complied with initial requirements of this Subchapter pending staff's review of the motor carrier's safety compliance. The letter of filing may be rescinded if the motor carrier fails to fully comply with all requirements of this Subchapter.

(c) A letter of filing cannot be issued by the Commission to a motor carrier whose principal place of business is located in a reciprocal state or to a motor carrier who is currently registered with a reciprocal state.

(d) A copy of the letter of filing shall be carried in each vehicle transporting hazardous waste operated by the applicant.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-15. Filing fee calculation

(a) Part I of the uniform application, (UPW - Part I) requires a processing fee of \$50.00 and must be submitted annually for renewal of registration. An amount, as set forth by the Alliance, shall be added to the annual registration processing fee to

be collected by the Commission and remitted to the Alliance.

(b) Each motor carrier shall submit with its registration application a double apportioned vehicle waste transporter registration fee which shall be equal to the percentage of Oklahoma transportation (IRP %) multiplied by the total number of vehicles the motor carrier operates, rounded up to the next whole number, multiplied by the percentage of the motor carrier's total hazardous waste activity multiplied by a per-vehicle fee of \$100.00.

(c) A motor carrier may use data from its most recently complete fiscal year or the most recent complete calendar year in calculating the percentages required in this Subchapter for transportation conducted during the previous year.

(d) Part II of the uniform application, Permitting, requires a permit review fee of \$500.00.

(e) Fee calculation for reciprocal states is found in the Uniform Program Fee Worksheet (Schedules A - D and Summary) of the uniform application.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-16. Ownership of registration and permit

Hazardous waste permits shall be considered personal to the holder thereof and shall be issued only to some definite legal entity. The motor carrier may list a single trade name provided the trade name is not a definite legal entity. Permits are not subject to lease, nor shall the holder thereof sublet or permit the exercise, by another.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

PART 5. CONDUCTING OPERATIONS

165:30-17-31. Shipping documentation

Each shipment shall be accompanied by a uniform hazardous waste manifest as specified in 40 CFR, Part 262 or other manifest as required by the state.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-32. Markings

All motor carriers shall comply with the provisions of 165:30-3-17.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-33. Leasing of equipment

All motor carriers engaged in interstate commerce will be required to carry a copy of the lease contract in each and every power unit.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-34. Name changes

(a) Any change in legal identity of the holder of a hazardous waste, except as provided in subsections (b), (c) or (d) below, including but not limited to incorporation or dissolution of a corporation, formation or dissolution of a partnership or creation or dissolution of a trust, shall require an original application for a registration and permit.

(b) Incorporation by a sole proprietor in which the sole proprietor is the majority shareholder of the corporation, limited liability corporation or limited liability partnership shall be deemed a name change. Incorporation by a partnership in

which the partners are the majority shareholders of the corporation shall be deemed a name change.

(c) A change in legal entity from a corporation, limited liability corporation or a limited liability partnership to a sole proprietorship, a partnership, a limited liability corporation or a limited liability partnership in which the sole proprietor, partners or shareholders hold the majority of all issued and outstanding shares of the corporation shall be deemed a name change.

(d) The merger of two or more corporations in which the survivor is the holder of a current license shall be deemed a name change.

(e) The transfer of stock in a corporation that shall result in any entity controlling fifty one percent (51%) or more of the aggregate number of voting shares of the corporation shall not be deemed a name change.

(f) A request for a name change shall be in writing and shall be accompanied by copy of the Certificate of Incorporation, Amended Certificate of Incorporation or similar documentation (if applicable) and a \$50.00 name change filing fee. The request for name change must be signed by the owner (if an individual). If a partnership is adding or removing a partner(s) all partners (whether existing, added or removed) must sign the request and current demographics information must be provided. If a corporation has amended its name, a corporate office must sign the request. If the officers of the corporation have changed, a listing of all officers including the email, mailing and physical addresses of each must additionally be attached to the request.

(g) Proper insurance filings or bonds must be placed on file with this Commission reflecting the new name.

(h) The employment of incorporation, change of name or similar action directly or indirectly as a device to circumvent the rules of this Subchapter is prohibited.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-17-35. Address changes

A motor carrier shall notify the Commission in writing of any change in the motor carrier's email, mailing or physical address or telephone number.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01; Amended at 36 Ok Reg 602, eff 8-1-19]

PART 7. VIOLATION, SUSPENSION OR REVOCATION OF A PERMIT

165:30-17-51. Inspections, reviews and audits

(a) The Commission will use its enforcement powers to ensure motor carrier compliance with federal safety regulations, state laws and the rules of this Commission.

(b) Authorized employees of the Commission shall perform the following duties:

- (1) Physically inspect vehicles, tanks, containers, cargo and/or drivers;
- (2) Perform on-site examinations of a motor carrier's operations including physical inspections and review of a motor carrier's operating systems;
- (3) Examine a company's records to verify information on which a permit is based;
- (4) An in-house review of a motor carrier's records sent by the motor carrier to the Commission;
- (5) Inspect vehicles and drivers; and,
- (6) Investigate alleged violations triggered by a public inquiry or complaint.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-52. Advertising

Any person who advertises to perform hazardous waste transportation services for which he does not hold a registration and permit shall be in violation of this Section and subject to the penalties prescribed for contempt of the Commission.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-53. Suspension, revocation and denial

(a) The Commission may suspend or revoke a permit issued under this Subchapter or order the suspension of the transportation of hazardous waste in Oklahoma by a motor carrier who has obtained a permit from another participating state under the uniform program if the Commission determines that a motor carrier has:

- (1) Committed a violation of 49 CFR, Parts 100 to 180, 382, 383, 387 or 390 to 397, while engaging in hazardous waste transportation if the violation posed an imminent hazard to the public or the environment;
- (2) Made a knowing falsification of a material fact in a uniform application;
- (3) Received an unsatisfactory safety rating from the Commission or the USDOT;
- (4) Failed to maintain proper liability insurance on file;
- (5) Failed to comply with requirements identified in this Subchapter;
- (6) Exhibited reckless disregard for the public and the environment; or,
- (7) Vehicle or driver out-of-service percentages higher than the national average.

(b) In determining if a motor carrier has exhibited reckless disregard for the public and the environment in violation of this Subchapter, the Commission shall consider;

- (1) Whether the motor carrier has engaged in a pattern of violations of 49 CFR, Parts 100 to 180, 382, 383, 387, or 390 to 397, or regulations governing the management of hazardous waste, while engaging in hazardous materials transportation, when the violations are viewed in relation to the number of truck-miles of hazardous material transportation and the number of vehicles in the motor carrier's fleet;
- (2) The actual or potential level of environmental damage resulting from an incident or a violation of the federal regulations referred to in this Section;
- (3) The response by the motor carrier to an incident or a violation of the federal regulations referred to in this Section;
- (4) The motor carrier's history of violations for the past three years;
- (5) Any mitigating factors;
- (6) Outstanding fines owed to the Commission or another state agency; and,
- (7) Other factors as justice requires.

(c) The Director of the Transportation Division may deny the issuance of a motor carrier's application based upon reasons as specified in this Section. An application may merit the Division's request for additional information from the motor carrier to show compliance with safety regulations.

(d) A motor carrier who wishes to contest a denial, suspension, or revocation is entitled to a hearing under the procedures as specified in the Commission's Rules of Practice, OAC 165:5.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-54. Reinstatement of a hazardous waste permit

If the permit holder believes the Commission has revoked its permit without good cause, the registrant may petition the Commission for relief, as prescribed in the Commission's Rules of Practice, OAC 165:5.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-55. Violations

The Commission may issue an order requiring violations of this Subchapter to be corrected. An order may include a fine of up to a maximum of \$500.00 for each violation of this Subchapter identified during a single inspection, investigation, or audit unless a different amount is specified under state or federal guidelines.

[Source: Added at 18 Ok Reg 23, eff 10-11-00 (emergency); Added at 18 Ok Reg 2384, eff 7-1-01]

165:30-17-56. Contempt complaint

In addition to the procedures set forth in state statutes and in the Commission's Rules of Practice, OAC 165:5 regarding the procedure for contempt proceedings, the procedures as set forth in 165:30-3-76 may be followed for violation of any requirement or provision of law or the rules of this Subchapter.

SUBCHAPTER 18. OVERWEIGHT VARIANCE PERMITS [REVOKED]

165:30-18-1. Overweight Variance Permits [REVOKED]

[Source: Added at 32 Ok Reg 823, eff 8-27-15; Revoked at 33 Ok Reg 633, eff 9-1-16]

SUBCHAPTER 19. REGISTRATION PURSUANT TO THE INTERNATIONAL REGISTRATION PLAN

Editor's Note: Effective 7-1-04, the rules in this Subchapter were transferred from the Oklahoma Tax Commission's rules [OAC 710:60-4-1 through 710:60-4-20]. Pursuant to Senate Bill 141 (2004), "rules promulgated by the Tax Commission related to the administration of the International Registration Plan authorized by Section 1120 of Title 47 of the Oklahoma Statutes, the International Fuel Tax Agreement authorized by Section 607 of Title 68 of the Oklahoma Statutes, or the enforcement of Section 1115.1 of Title 47 of the Oklahoma Statutes [were] transferred to and [became] a part of the administrative rules of the Corporation Commission." As directed by SB 141, an Editor's Notice was published in the

Oklahoma Register [21 Ok Reg 2927], announcing the transfer of these rules from OAC 710:60-4-1 through 710:60-4-20 to OAC 165:30-19-1 through 165:30-19-20. For additional information relating to this transfer, see Senate Bill 141 (2004).

165:30-19-1. Purpose

The provisions of this Subchapter have been promulgated to facilitate the administration, enforcement, and collection of fees under the International Registration Plan (IRP) and Oklahoma Motor Vehicle Licensing and Registration Act (47 O.S. §§ 1101 et seq.).

[Source: Transferred from OAC 710:60-4-1 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06]

165:30-19-2. Definitions

In addition to terms defined in the IRP, the Uniform Operational Audit Procedure Guidelines, and the IRP Policies and Procedures Manual, the following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Applicant" means any person making an application with the Oklahoma Corporation Commission seeking to register a vehicle or vehicles pursuant to the IRP.

"Application" means a filing with the Oklahoma Corporation Commission, seeking to register a vehicle or vehicles with the Commission pursuant to the IRP.

"Apportioned registration" means the proportional registration of a vehicle pursuant to the terms of the IRP and this Subchapter.

"Carrier" means a fleet operator which engages in the transportation of passengers or property for compensation or hauls its own commodity.

"Credentials" means identification plates and cab cards.

"Established account" means any prorated account for which a properly completed original application has been received by the IFTA/IRP Section and all corresponding and assessed fees have been paid in full.

"Grace period" means two (2) months following the expiration of the registration year.

"Interstate" means between or through two (2) or more jurisdictions.

"Intrastate" means from one (1) point within a jurisdiction to another point within the same jurisdiction.

"New operation" means a vehicle or fleet of vehicles not previously registered pursuant to the provisions of the IRP. "New operation" does not include an existing fleet that is expanding the number of vehicles or area of operation.

"Operations" means actual movement of a vehicle. For purposes of this Subchapter, operations may be classified as interstate or a combination of interstate and intrastate.

"Proportional registration" means registration of an apportionable vehicle pursuant to the terms of the IRP and this Subchapter.

"Records" means and includes operational records.

"Registration agent" means a person hired by an applicant or registrant to prepare and/or file applications, supplemental applications, and other documents required for proportional registration in Oklahoma.

"Regular business hours" means 8:30 a.m. to 4:30 p.m. local time.

"Reporting period" or **"mileage year"** means the period of twelve (12) consecutive months immediately prior to July 1 of the year preceding the year of

registration or license.

[Source: Transferred from OAC 710:60-4-2 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 34 Ok Reg 977, eff 9-11-17; Amended at 35 Ok Reg 1044, eff 10-1-18]

165:30-19-3. Registration

(a) Before a vehicle can be proportionally registered in the state of Oklahoma the applicant or registrant must:

(1) Have an established place of business located in Oklahoma. Absent an established place of business in any IRP jurisdiction, an applicant must satisfy the residency requirements in 165:30-19-6, prior to being allowed to base plate in Oklahoma. Under no circumstances can an independent contractor be used to establish a place of business or residence on behalf of a registrant.

(2) Complete the application, all required schedules, and provide backup documentation required by the Commission to verify the information submitted by the applicant:

(A) The application must include the email address, mailing address and telephone number of the applicant. In addition to providing the applicant's telephone number, the applicant may provide the telephone number of a third party who has knowledge of the applicant's whereabouts and is able to contact the applicant within a reasonable period upon request. An applicant or registrant may not utilize a telephone listing indicating the same telephone number as that of any other person in this state as a qualifying telephone number under this Section.

(B) If the application is signed by someone other than the applicant or registrant, pursuant to a power of attorney, the name or names of the individuals to whom such authority is granted must be included in the power of attorney executed by the applicant.

(3) Provide proof of payment (or suspension from levy) of Federal Heavy Vehicle Use Tax;

(4) Provide proof of financial responsibility pursuant to 47 O.S. § 7-602 (liability insurance);

(5) Motor vehicles operated by a motor carrier with valid liability insurance on file with FMCSA or this Commission are exempt from subsection (a) (4) of this Section;

(6) If the applicant is leased to a motor carrier, the applicant must provide a copy of the lease to satisfy Oklahoma's financial responsibility requirements (47 O.S. § 7-602). If multiple vehicles are under lease, a letter from the motor carrier listing each vehicle's year, make, model and vehicle identification number (VIN) under lease to the carrier may be provided in lieu of the lease, provided a copy of all leases shall be made available to the Commission upon request. The Commission does not perform analysis to ensure compliance with applicable CFRs on lease agreements provided to the Commission for administrative purposes under this Chapter. It is the lessor's responsibility to ensure leases are compliant with the federal CFR's.

(7) Provide proof of ownership;

(8) Provide proof of payment of prior registration fees, if the vehicle was registered pursuant to the IRP in another jurisdiction; and

- (9) Pay all applicable fees to complete registration. Continuous registration is required; therefore registration fees shall be assessed from the last vehicle registration date or the date of sale.
- (10) Provide the USDOT number and the social security number, federal employee identification number or taxpayer identification number of the carrier responsible for safety of each vehicle in the apportioned application.
- (11) Be the owner, the lessee, the motor carrier responsible for safety or an entity contracted by the owner or motor carrier responsible for safety.
- (b) Application for registration may be made at any time during a registration year.
- (c) Application for registration may be submitted through the mail to the IFTA/IRP Section, Transportation Division, Oklahoma Corporation Commission, P.O. Box 52948, Oklahoma City, Oklahoma, 73152-2948, or by applying in person at 2101 N. Lincoln Blvd., in Oklahoma City. A list of other locations where application may be submitted is available from the IFTA/IRP Section or the Commission website under the Transportation Division (<http://www.occeweb.com>).
- (d) No application for proportional registration shall be processed unless the applicant has submitted the documentation required in (a) of this Section. Failure to submit the required documentation shall result in denial of the application.
- (e) If an approved IRP application must be unapproved, corrected, and/or re-approved due to additional information submitted by the applicant after the initial approval or due to an error committed by the applicant, a reprocessing fee may be assessed as established by OAC 165:5-3-1.
- (f) Since registration with the Plan can affect other jurisdictions' registration fees and tax receipts, the Transportation Division must be diligent in ensuring that those registrants with Oklahoma as their base jurisdiction are indeed entitled to base in Oklahoma.
- (1) If after approval of the application and during the registration year, the Transportation Division has reason to believe that critical account information submitted on an application has changed, the Transportation Division shall allow the registrant thirty(30) days to provide the updated information. If the information is not provided within that time or is deemed insufficient, the Transportation Division shall revoke the registrants' credentials in accordance with OAC 165:5-25.
- (2) If after approval of the application and during the registration year the Transportation Division has evidence that critical account information submitted on an application was submitted erroneously or falsely, the Transportation Division shall revoke the registrants' credentials in accordance with OAC 165:5-25.
- (g) Non-expiring commercial trailer license plates are issued for trailers used in commercial enterprises regardless of their size or weight (other than trailer mounted special mobilized machinery and trailers used for transporting forest products). Once statutory registration fee(s) and any additional fees set by the Commission established by OAC 165:5-3-1 are remitted, a license plate will be issued upon the initial registration or any subsequent transfer of ownership. Trailer renewal fees, as established by statute and OAC 165:5-3-1, shall be paid annually to maintain active registration status.
- (h) Buses operating in more than one IRP jurisdiction are the only buses eligible for registration by the Commission and are subject to applicable rules of this Chapter. Registration fees for such vehicles are generally based on seating capacity.

[Source: Transferred from OAC 710:60-4-3 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 29 Ok Reg 951, eff 7-1-12; Amended at 31 Ok Reg 1024, eff 9-12-14; Amended at 33 Ok Reg 633, eff 9-

165:30-19-4. Title requirements and proof of ownership

(a) Owners of vehicles registered in Oklahoma must possess an Oklahoma title as proof of ownership unless the vehicle has been previously registered in another jurisdiction and engaged in interstate commerce.

(b) Proof of ownership must be submitted for all vehicles being registered through an original or supplemental application. Documents necessary to prove ownership include:

- (1) A copy of the front and back of the Oklahoma title, an Oklahoma title receipt or vehicle registration in the owner's name;
- (2) If previously registered in another jurisdiction and engaged in interstate commerce, a copy of another jurisdiction's IRP cab card indicating ownership or a copy of the IRP cab card and the front and back of the out of state title; and/or,
- (3) A lease-purchase agreement by which the applicant or registrant, under the terms of the agreement, is to become the owner of the vehicle at the end of the lease period for nominal or no additional consideration, and the vehicle is currently titled in the name of the leasing company and has been registered for interstate commerce with another jurisdiction.

[Source: Transferred from OAC 710:60-4-4 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 29 Ok Reg 951, eff 7-1-12; Amended at 35 Ok Reg 1044, eff 10-1-18]

165:30-19-5. Established place of business

(a) **General provisions.** To verify an applicant's or registrant's established place of business in Oklahoma, the applicant or registrant must provide proof of a physical structure, designated by a street number or road location and open during regular business hours, which contains within it:

- (1) A person or persons conducting the fleet applicant's or registrant's business; and
- (2) The operational records of the fleet, unless such records can be made available in accordance with the provisions of Section 1602 of the International Registration Plan.

(b) **Specific compliance provision (IRP Decis. 99-4).** An "established place of business" as utilized in these rules and in Section 305 of the International Registration Plan cannot be provided for the applicant or registrant by or in the form of a registration agent or other third party.

(c) **Physical structure.** A physical structure, owned, leased, or rented by the applicant or registrant, wherein operational records of the fleet can be made available for audit purposes, must be evidenced by:

- (1) A current real estate tax bill;
- (2) Photocopies of rent receipts or mortgage payments which indicate the business address;
- (3) A current real estate rental contract and an original power of attorney conforming with Section 20 of Title 16 of the Oklahoma Statutes, if the contract is signed by someone other than the applicant or registrant; or,
- (4) Proof of insurance coverage.

(d) **Person or persons conducting applicant's or registrant's business.** The person conducting the trucking-related business of the applicant or registrant must be in the permanent employment of the applicant or registrant, as evidenced by submission of the applicant's or registrant's federal employer's identification or

other identification number and verification by the Commission that the applicant or registrant is an employer for the purposes of Oklahoma Withholding.

(e) **Specific compliance provision** (IRP Decis. 99-4). An applicant or registrant may not utilize a registration agent or its employees to satisfy the requirement of the presence of a person or persons in this state conducting the applicant's or registrant's business.

(f) **Use of registration agent.** Nothing in this Section shall be construed as prohibiting a registration agent from preparing or filing proportional registration applications or other documents for an applicant or registrant who meets the requirements set forth in this Section.

(g) **Resubmission of documentation.** Registrants with accounts in good standing may not be required to resubmit the established place of business indicia each year, provided that the established place of business remains unchanged since previously documented to the satisfaction of the Commission. To avail itself of this provision, the registrant must certify to the Commission under penalties of perjury that the registrants' established place of business has not changed. Nothing herein shall prevent the Commission from periodically requiring registrants to re-submit documentation of their established place of business. Registrants will periodically be required to resubmit established place of business documentation in accordance with the schedule established by the Commission.

(h) **False or fraudulent submission.** Applicants who knowingly provide false or fraudulent information or abuse the provisions of 165:30-19-3 shall have their registration credentials immediately revoked and will be denied further application.

[Source: Transferred from OAC 710:60-4-5 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 25 Ok Reg 1546, eff 7-1-08]

165:30-19-6. Registration as a resident

(a) Applicants who have no established place of business in any IRP jurisdiction may register in Oklahoma once they prove to the satisfaction of the Commission that they are residents of the State of Oklahoma. Such applicants may register in Oklahoma, provided that they furnish a street address, and a telephone number, and satisfactorily demonstrate that the applicant is indeed a resident of the State of Oklahoma and can be located in Oklahoma for purposes of audit.

(b) The street address in Oklahoma must be the street address where the applicant's records are maintained or where the records will be delivered for the purpose of audit. An applicant may not utilize the address of a registration agent to satisfy the requirement of an address in Oklahoma.

(c) The applicant must submit at least three (3) current documents that indicate the applicant can be located in Oklahoma for purposes of audit. Documentation acceptable for meeting the requirements of this subsection includes:

- (1) An Oklahoma-issued driver's license;
- (2) An income tax filing from an Oklahoma address;
- (3) Documentation of ownership of real property in Oklahoma;
- (4) An Oklahoma utility bill in the name of the registrant;
- (5) An Oklahoma vehicle title in the name of the registrant;
- (6) Oklahoma incorporation documents;
- (7) Documentation showing registration to conduct business as a foreign corporation in Oklahoma;
- (8) Documentation showing the principle owner of the corporation is a resident of Oklahoma; or,

- (9) Other evidence of bona fide residency.
- (d) The Transportation Division shall make its decision on whether the applicant has met its burden of proof based on the totality of the evidence presented.

[Source: Transferred from OAC 710:60-4-6 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 33 Ok Reg 633, eff 9-1-16]

165:30-19-7. Operational records

Operational records shall be documents supporting miles traveled in each jurisdiction and the total miles traveled. These documents can be fuel reports, trip sheets, logs, or computer runs that can be supported by source documents, when requested. An acceptable source document to verify fleet mileage is some type of Individual Vehicle Distance Record (IVDR). IVDRs should contain the following basic information:

- (1) Date of trip (starting and ending);
- (2) Trip origin and destination;
- (3) Routes of travel and/or beginning and ending odometer readings;
- (4) Total trip mileage (including all movement, loaded, empty, deadhead, and/or bobtail miles);
- (5) Mileage by jurisdiction;
- (6) Unit number or vehicle identification number;
- (7) Vehicle fleet number;
- (8) Registrant's name; and
- (9) Driver's signature and/or name.

[Source: Transferred from OAC 710:60-4-7 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 34 Ok Reg 977, eff 9-11-17]

165:30-19-8. Maintenance and availability of operational records

- (a) Operational records must be maintained for a period of three (3) years after the close of the registration year for which the records were included in the application. Failure to maintain the required records may result in an assessment in accordance with Section 1015 of the IRP.
- (b) Failure to make records available upon proper request shall result in an assessment in accordance with Section 1015 of the IRP.
- (c) Failure to maintain or make records available may also subject the registrant to denial of apportion privilege.

[Source: Transferred from OAC 710:60-4-8 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 32 Ok Reg 823, eff 8-27-15; Amended at 34 Ok Reg 977, eff 9-11-17]

165:30-19-9. Failure to pay additional fee assessments

Failure to pay any additional fees shall constitute cause for denial, suspension or revocation of the registration and reciprocal privileges of the registrant, and notification to other IRP jurisdictions.

[Source: Transferred from OAC 710:60-4-9 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 31 Ok Reg 1024, eff 9-12-14]

165:30-19-10. Renewal applications

When an application for renewal of proportional registration is not received on or before the first day of the month of expiration, the applicant cannot be assured that a registration cab card and plate will be issued for display of credentials prior to the enforcement date. Registrants whose renewal application is

not received on or before the expiration date must renew all vehicles in their fleet unless proof of disposition of these vehicles is provided. If this proof shows that the vehicle(s) were disposed of after expiration, those vehicles must be included in the renewal fleet. Registrants whose renewal application is not received on or before the expiration date shall be subject to enforcement for display of credentials on the day following the expiration date.

[Source: Transferred from OAC 710:60-4-10 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 25 Ok Reg 1546, eff 7-1-08]

165:30-19-11. Enforcement

- (a) Credentials for the current registration year may be displayed upon receipt, but shall be displayed on the vehicle by 12:01 a.m., on the enforcement date, since enforcement for display of current registration year credentials will begin on the enforcement date, unless extended by the Commission.
- (b) Registrants whose renewal application is not received on or before the expiration date cannot avail themselves of the grace period and shall be subject to enforcement.
- (c) Vehicles apprehended for improper registration credentials may be subject to arrest and fine in the jurisdiction in which the violation occurs.
- (d) IRP apportioned registration does not include special fuel requirements, operating authority or over dimensional and overweight permits.

[Source: Transferred from OAC 710:60-4-11 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06]

165:30-19-12. Supplemental application

- (a) After an original application has been filed, vehicles can be added, deleted, or registration weight increased by filing a supplemental application form.
- (b) Registration fees for supplemental applications are calculated from the date of purchase or lease, unless the vehicle was previously registered in the fleet, then the fees shall be calculated upon an annual rate. For registrants who do not have possession of equipment on the date they purchased it, fees may be calculated from the date the equipment came into possession of the registrant. Registrants who wish to avail themselves of this provision must provide documentation of the receipt date of the equipment to the Transportation Division. In no case should the effective date of the registration be after equipment is placed in service.
- (c) When a supplemental application is filed to add a unit and delete a similar unit, a credit of the registration fees paid on the deleted unit will be given toward registration of the added unit for those states that allow credit. Credit is only available for vehicles subsequently added to the fleet in the registration year in which the credit was created. In no event shall credit be allowed for fees beyond such registration year. Credits are not transferable between fleets. In order for credit to be given on the registration fees, the cab card and license plate for the deleted vehicle must be returned with the supplemental application, or an affidavit of destruction must be submitted with the supplemental application. Under no circumstances can a license plate be transferred from one vehicle to another. No refund for unused deletion credits will be given for a deleted vehicle.
- (d) Supplemental applications may be filed with a future effective date to add a unit before the unit is placed in service. In no case shall the registration effective date be more than sixty (60) days after the filing date of the supplemental application. When a unit is added with a future effective date but the unit does not become part of the fleet, no refund of the fees will be allowed. The unit may be deleted and the

resulting deletion credits may be used toward the addition of subsequent unit.

(e) If the license plate is lost, an affidavit may be submitted in lieu of the plate.

(f) When the motor carrier responsible for safety changes during a registration year, the registrant is required to file for a cab card change for each vehicle. The cab card change application shall include the new motor carrier responsible for safety's USDOT number and taxpayer identification number (social security or federal employee).

[Source: Transferred from OAC 710:60-4-12 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 26 Ok Reg 1398, eff 7-1-09; Amended at 33 Ok Reg 633, eff 9-1-16; Amended at 34 Ok Reg 977, eff 9-11-17]

165:30-19-13. Amended mileage/adding states [REVOKED]

[Source: Transferred from OAC 710:60-4-13 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 32 Ok Reg 823, eff 8-27-15; Revoked at 35 Ok Reg 1044, eff 10-1-18]

165:30-19-14. Audits

(a) If operational records are not maintained at a location within the State of Oklahoma and cannot be made available for audit at a location within Oklahoma, the registrant may be required to reimburse the Corporation Commission, for expenses incurred for performance of an audit at a location outside Oklahoma.

(b) Registrants selected for audit whose fleet size exceeds two hundred (200) vehicles are required to submit detailed records in the electronic format established by the Commission in order to conduct an audit.

[Source: Transferred from OAC 710:60-4-14 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 34 Ok Reg 977, eff 9-11-17]

165:30-19-15. Mileage

(a) Any actual distance operated during the reporting period must be filed with the renewal application. If no actual distance was incurred in any jurisdiction during the reporting period, then the average-per-vehicle distance per member jurisdiction chart must be used to renew the fleet registration.

(b) If a registrant does not travel in more than one (1) jurisdiction for an entire registration year plus an additional six (6) months, the registrant is presumed not to intend to travel in more than one (1) jurisdiction, and therefore does not qualify for apportioned registration. That presumption may be overcome by current documentation of actual out of state travel presented by the registrant, which must be confirmed and approved by the Transportation Division.

[Source: Transferred from OAC 710:60-4-15 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 32 Ok Reg 823, eff 8-27-15; Amended at 35 Ok Reg 1044, eff 10-1-18]

165:30-19-16. Application disapproval

(a) An application will be denied if it is not properly completed. It is the responsibility of the applicant or registrant to submit all information required by the application instructions and attach all necessary documentation.

(b) The applicant or registrant or his agent will be notified if an application is denied and the reasons therefore or if additional information is needed.

(c) An application that has been denied may be resubmitted by the applicant or registrant but will be processed as a new application upon receipt of the resubmission.

(d) If the applicant believes that the application was wrongfully denied, the applicant may, within thirty (30) days from the notice of denial, file a written protest of the denial with the Transportation Division under the provisions of OAC 165:5.

(e) No extensions, temporary operating authority, or temporary credentials will be issued for vehicles listed on a denial application.

[Source: Transferred from OAC 710:60-4-16 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 31 Ok Reg 1024, eff 9-12-14]

165:30-19-17. Temporary registration

New fleet vehicles, or vehicles being added to any existing fleet, must have some form of temporary registration prior to operation if permanent IRP credentials have not been issued. All forms of temporary registration are valid for the period shown and will be honored by all IRP jurisdictions when properly completed and validated.

(1) Temporary registration may be obtained directly from the IFTA/IRP Section, Transportation Division, Oklahoma Corporation Commission, P.O. Box 52948, Oklahoma City, Oklahoma, 73152-2948 by filing a supplemental application with all required documents.

(2) Temporary registration or credentials may only be issued to new accounts after all required registration fees are paid.

(3) Self-issue temporary registrations are available only to established Oklahoma-based IRP registrants, and may be used for vehicle(s) added to the fleet, substitute license plates and weight increase applications to the registrant's account. Self-issued temporary registrations may not be used for renewal vehicles.

(A) Registrants with self-issue temporary authority are allowed to acquire temporary registration prior to the submission of a supplemental application. To be eligible to self-issue temporary registration, a registrant must:

- (i) Have no delinquencies;
- (ii) Be base plated in Oklahoma for the past two full registration years;
- (iii) Be the motor carrier responsible for safety;
- (iv) Be base plated in accordance with OAC 165:30-19-5 requirements; and,
- (v) Have over one hundred (100) power units in the apportioned fleet.

(B) Properly completed temporary registrations allow for immediate temporary registration for vehicles added to the fleet, duplicate cab cards, substitute license plates, and weight increase applications. Upon issuance, a copy of the temporary registration should be placed in the vehicle. Within fifteen (15) days of issuance, a completed supplemental application with all required documentation must be submitted for processing.

(C) Misuse of the temporary registration or failure to maintain proper accountability may result in the Prorate Section's refusal to issue the registrant self-issue temporary registrations.

(4) The issuance of temporary registration creates a debt to the State of Oklahoma who is then indebted to the participating jurisdictions of the

International Registration Plan. Registrants must pay registration fees for the remainder of the registration year for which a temporary registration is issued. Registration fees must be paid in full within thirty (30) days for the effective date of the temporary registration.

(A) Fees shall be calculated beginning with the effective date of the temporary registration, or the date determined by the Transportation Division, if earlier, and continue through the end of the registration year.

(B) In addition to collection actions, failure to pay the fees described in (A) above will cause the loss of apportioned registration privileges.

(C) The Transportation Division may withhold issuance of future temporary registration, to those registrants who have failed to timely file a registration application, or pay the registration fees associated with any vehicle, for which a temporary registration authorized by 47 O.S. § 1124.1 has been issued.

(D) The Transportation Division may revoke previously issued registration credentials and/or deny future registration privileges to registrants who use temporary registration issued under 47 O.S. § 1124.1 without paying registration fees.

[Source: Transferred from OAC 710:60-4-17 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 26 Ok Reg 1398, eff 7-1-09; Amended at 31 Ok Reg 1024, eff 9-12-14; Amended at 33 Ok Reg 633, eff 9-1-16; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-19-18. Compliance confirmation

(a) New registrants may be contacted within six (6) months of registration to determine if required records are being maintained and give guidance on maintaining proper records. Initial contact will be by telephone or in writing. If the initial contact is unsuccessful, contact will be made by visiting the registrant's established place of business or residence.

(b) New registrants who are not maintaining proper records at the time of initial contact will be provided guidance on maintaining proper records.

(c) The Commission will then notify the registrant who has received guidance pursuant to subsection (b), in writing, of the date on which proper second-year operational records must be made available by the registrant for inspection.

(d) If at that time, the registrant is unable to provide proper second-year operational records, the registrant will not be allowed to apportionally register in Oklahoma for the third year without a complete pre-registration audit of the renewal application.

(e) The Administrator of the IRP Section may deny or revoke the issuance of a registrant's IRP credentials based upon the registrants' motor carrier being placed out of service by the Federal Motor Carrier Safety Administration.

(f) A registrant who wishes to contest a denial, or revocation, of registrants' credentials is entitled to a hearing under the procedures contained in Subchapter 25 of the Commission's Rules of Practice, OAC 165:5.

[Source: Transferred from OAC 710:60-4-18 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 33 Ok Reg 633, eff 9-1-16]

165:30-19-19. Trip permits and hunters permits

(a) A seventy-two (72) hour trip permit provides full registration to trucks, truck-tractors, trailers, semi trailers, and motorbuses, which are not registered in

Oklahoma.

- (1) The permit is valid for either interstate or intrastate movement. This permit cannot be issued for a vehicle, which has been apprehended by law enforcement officers for improper registration.
- (2) Out of state vehicles eligible for apportioned registration, but not registered as such, will be required to purchase a seventy-two (72) hour trip permit before proceeding through the State of Oklahoma.
- (3) Trip permits are available from the Transportation Division of the Commission and Commission contracted wire services. The cost of the permit is set forth by 47 O.S. § 1124 (B) with any processing fee as set by Commission rule. Trip permits obtained through permit services may have additional fees associated with issuance. Once a trip permit is issued, no refunds will be allowed.
- (4) An operator of a motor vehicle possessing an expired, altered, or undated temporary permit shall be deemed to be operating an unregistered motor vehicle and shall be subject to full registration and penalty.
- (5) A permit must be issued on newly purchased trucks carrying a load and driving to another state for registration.
- (6) Only one (1) copy of a seventy-two (72) hour permit receipt will be given to applicant.
- (7) A trip permit effective date shall not be more than seventy-two (72) hours from the time it is issued.

(b) An unladen permit, otherwise known as a hunters permit, provides temporary registration to an apportionable vehicle at the unladen weight of the vehicle for a period of forty-five (45) days.

- (1) Hunters permits are typically obtained by a vehicle owner to move the vehicle, without any load, to another jurisdiction when apportioned registration credentials are no longer valid due to the severance of a lease with a motor carrier.
- (2) A Hunters permit is recognized as valid registration in all IRP participating jurisdictions at a weight not to exceed the unladen weight of the vehicle or the combined unladen weights of the power unit and trailer, provided however, an unregistered trailer must obtain a separate permit.
- (3) Hunters permits are available from the Commission at a fee as prescribed by 47 O.S. § 1124 (C) with any processing fee as set by Commission rule. Once an unladen permit is issued, no refunds will be allowed.
- (4) The operator of a motor vehicle possessing an expired, altered or undated hunters permit shall be deemed to be in violation of state statutes and the rules of this Commission and shall be subject to full registration and penalty.
- (5) An unladen permit effective date shall not be more than seventy-two (72) hours from the time it is issued.

[Source: Transferred from OAC 710:60-4-19 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 27 Ok Reg 1773, eff 7-1-10; Amended at 29 Ok Reg 951, eff 7-1-12; Amended at 31 Ok Reg 1024, eff 9-12-14; Amended at 35 Ok Reg 1044, eff 10-1-18]

165:30-19-20. Incorporation by reference

(a) **Reference to the International Registration Plan ("IRP").** When reference is made to the International Registration Plan or "IRP", it shall mean, unless the context clearly indicates otherwise, the registration reciprocity agreement among

the various states of the United States and the provinces of Canada, including the Audit Procedures Manual, which provides for payment of license fees for apportionable vehicles on the basis of fleet miles operated in the various jurisdictions, to which Oklahoma is a signatory state, as published by International Registration Plan, Inc., as currently amended.

(b) **Incorporation.** The following Articles are, unless otherwise specifically provided, incorporated by reference in their entirety:

- (1) Articles I through XV and all appendices of the International Registration Plan ("IRP"); and,
- (2) The International Registration Plan Audit Procedures Manual.

(c) **Inclusion of IRP citations and definitions.** When a provision of the IRP is incorporated by reference, all citations and definitions contained therein are also incorporated by reference.

(d) **Inconsistencies or duplication.** In the case of any inconsistency or duplication between the requirements of those provisions incorporated by reference in this Section, and the rules set out in this Subchapter, the provisions incorporated by reference shall prevail, except where rules set out in this Subchapter are more particular. The provisions incorporated by reference are subject to any limitations provided by Oklahoma law.

(e) IRP can be found online at <http://www.irponline.org>

[Source: Transferred from OAC 710:60-4-20 by SB 141 (2004), eff 7-1-04 (Editor's Notice published at 21 Ok Reg 2927); Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 32 Ok Reg 823, eff 8-27-15]

SUBCHAPTER 21. INTERNATIONAL FUEL TAX AGREEMENT

165:30-21-1. Purpose

The provisions of this Subchapter have been promulgated to facilitate the administration, enforcement, and collection of motor fuel taxes under the International Fuel Tax Agreement (IFTA) and Oklahoma Motor Fuel Tax Code (68 O.S. §§ 601 et seq.).

[Source: Added at 23 Ok Reg 509, eff 12-19-05 (emergency); Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-21-2. Definitions

In addition to terms defined in the IFTA, the IFTA Audit Manual, and the IFTA Procedures Manual, the following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Applicant" means any person making an application with the Oklahoma Corporation Commission seeking to license a fleet pursuant to the IFTA.

"Application" means a filing with the Oklahoma Corporation Commission, seeking a license with the Commission pursuant to the IFTA.

"Carrier" means a fleet operator, which engages in the transportation of passengers or property for compensation or hauls its own commodity.

"Credentials" means IFTA identification license and decals.

"Fleet" means one or more vehicles

"Grace period" means two months following the expiration of the license year.

"Interstate" means between or through two or more jurisdictions.

"Intrastate" means from one point within a jurisdiction to another point within the same jurisdiction.

"Operations" means actual movement of a vehicle. For purposes of this Subchapter, operations may be classified as interstate or a combination of interstate and intrastate.

"Person" means an individual, corporation, partnership, association, trust, or other entity

"Qualified Motor Vehicle" means a motor vehicle used, designed, or maintained for transportation of persons or property and:

(A) Having two axles and a gross vehicle weight or registered gross vehicle weight exceeding 26,000 pounds or 11,797 kilograms; or

(B) Having three or more axles regardless of weight; or

(C) Is used in combination, when the weight of such combination exceeds 26,000 pounds or 11,797 kilograms gross vehicle or registered gross vehicle weight. Qualified Motor Vehicle does not include recreational vehicles.

"Recreational Vehicle" means vehicles such as motor homes, pickup trucks with attached campers, and buses when used exclusively for personal pleasure by an individual. In order to qualify as a recreational vehicle, the vehicle shall not be used in connection with any business endeavor.

"Records" means all documents, files, and work product and includes but is not limited to, operational records.

"Registration" means the qualification of motor vehicles normally associated with a prepayment of fees for the privilege of using the highway and the issuance of license plate and a registration card or temporary registration-containing owner and vehicle data.

"Registration agent" means a person hired by a licensee to prepare and/or file applications, reports and other documents required for IFTA licensing and reporting in Oklahoma.

"Reporting Period" means a period of time consistent with the calendar quarterly periods of January 1 - March 31, April 1 - June 30, July 1 - September 30, and October 1 - December 31.

"Revocation" means withdrawal of a license and privileges by the licensing jurisdiction.

"Temporary Permit" means a permit issued by the Oklahoma Corporation Commission or its agent to be carried in a qualified vehicle in lieu of carrying the IFTA license and the display of the permanent annual decals. A temporary permit is valid for a period of 30 days to give the carrier adequate time to affix the annual permanent decals.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 34 Ok Reg 977, eff 9-11-17]

165:30-21-3. Application and renewal

Any person based in Oklahoma operating a qualified motor vehicle(s) in two or more member jurisdictions is required to license under this Agreement, except as indicated in IFTA Articles of Agreement Sections R310 and R500.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-21-4. Fuel permits

(a) In lieu of motor fuel tax licensing under IFTA, persons may elect to satisfy motor fuels use tax obligations for up to one hundred twenty (120) consecutive hours by purchasing a Fuel Permit.

(b) Fuel permits are valid for a period of one-hundred twenty (120) hours from the time the permit is effective, and may be obtained from the Commission or one of

the authorized fuel permitting services. Once a fuel permit is issued, no refunds will be allowed.

(c) A fuel permit effective date shall not be more than seventy-two (72) hours from the time it is issued.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 29 Ok Reg 951, eff 7-1-12; Amended at 33 Ok Reg 633, eff 9-1-16]

165:30-21-5. Application for license

A person shall file an application for licensing with the Commission on the prescribed form. The fuel tax license application shall have the following specified content:

- (1) The account identification number specified in IFTA Procedures Manual Section P200;
- (2) Name and social security number of owner(s), partners or corporate officers;
- (3) Legal business name (if different from the name given above);
- (4) Physical location of the business;
- (5) Mailing address of the business;
- (6) Email address;
- (7) Signature and date;
- (8) Number of IFTA decals required by licensee;
- (9) Decal fee, as set forth in OAC 165:5;
- (10) Statement of existence of bulk storage in all member jurisdictions;
- (11) A statement that the applicant agrees to comply with reporting, payment, recordkeeping, and license display requirements as specified in the International Fuel Tax Agreement. The applicant further agrees that base jurisdiction may withhold any refunds due if applicant is delinquent on payment of fuel taxes due any member jurisdiction. Failure to comply with these provisions shall be grounds for revocation of license in all member jurisdictions; and
- (12) A statement to the effect that the applicant certifies with his or her signature that, to the best of his or knowledge, the information is true, accurate, and complete and any falsification subjects him or her to appropriate penalties of perjury.
- (13) The USDOT number of the applicant.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-21-6. Designation of licensee

Tax licensing under the International Fuel Tax Agreement shall be in the name of the licensee. IFTA Articles of Agreement Section R500 designates the party responsible for reporting and payment of fuel taxes in the case of lessors/lessees, independent contractors, and household goods agents.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-21-7. Application processing

(a) Upon receipt of an IFTA fuel tax license application from a new or renewing applicant, the Commission shall check all entries on the application to ensure that they are complete. If the Commission feels more information is required, the licensee should immediately be contacted requesting the required information. Upon being satisfied that the application is correct and all fees prescribed by law or

Commission rule have been paid, the Commission shall issue the fuel tax credentials for the fleet.

(b) The Transportation Division may withhold issuing requested decals if fulfilling the request would result in the licensee having over 25% more decals in their possession than their fleet size. If the Division withholds decals under this provision, it will only withhold that portion of the decal request that causes the licensee's decal inventory to exceed the 25% figure.

(c) IFTA licensees are required to account for all decals issued to them under the IFTA program. Licensees must ensure that decals are assigned only to vehicles that are subject to the fuel and distance requirements of the IFTA program of the licensee. Decals, not issued to vehicles subject to fuel and distance requirements, must be produced for inspection upon request of the Transportation Division. Failure to adequately account for decals, or produce decals for inspection, may subject the licensee to penalty of \$250 per decal.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 26 Ok Reg 1398, eff 7-1-09]

165:30-21-8. Non-issuance of license

A license will not be issued if the applicant has been previously licensed under the IFTA and that license is still under revocation by any member jurisdiction or the application contains any misrepresentation, misstatement, or omission of information required in the application.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-21-9. Bond requirement

To protect the interests of the State of Oklahoma and the member jurisdictions of the International Fuel Tax Agreement, the Commission may, for cause, require licensees to file a surety bond payable to the State of Oklahoma for motor fuel taxes accruing against the licensee as a result of the IFTA program. Bonds may be required for failure to file timely returns, or remittances, or when an audit indicates problems severe enough that, in the Commission's discretion, a bond is required to protect the interests of Oklahoma and the member jurisdictions.

(1) Bonds may be required from licensees who have filed two or more delinquent IFTA tax returns, made two or more delinquent remittances, or made two or more payments drawn on accounts with insufficient funds, within the most recent 12 calendar months.

(2) A surety bond required for one of the above reasons must be in place before a licensee's suspended account can be reinstated.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 33 Ok Reg 633, eff 9-1-16]

165:30-21-10. Bond amount

Licensees who are required to post a surety bond shall provide the equivalent of at least twice the estimated average tax liability for the reporting period for which the licensee will be required to file a tax return. The Commission will direct that licensees required to post surety for severe audit problems, provide surety in the amount of the established audit liability, or at least twice the estimated average tax liability for the reporting period for which the licensee will be required to file a tax return depending on the circumstances, or BOTH if the Commission deems the problem severe enough.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-21-11. License renewal

(a) A renewal license and decals for the following calendar year will be issued upon application and payment of all fees prescribed by law or rules of the Commission, if the license has not been revoked or canceled, all returns have been filed, and all motor fuels use taxes, penalties and interest due have been paid.

(b) Licensees whose renewal application is not received on or before the expiration date shall be subject to enforcement for display of credentials on the day following the expiration date.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-21-12. Denial, revocation, and reinstatement

(a) The Administrator of the IFTA Section may deny the issuance of a motor carrier's IFTA license based upon the motor carrier's failure to provide IFTA returns and/or remittances to other member jurisdictions, or to prove it is qualified to obtain a IFTA license, or may revoke an IFTA license issued under 68 O.S. § 607

(E) if he determines a motor carrier has:

- (1) Made a knowing falsification of a material fact in a uniform application;
- (2) Failed to timely file a quarterly IFTA tax return;
- (3) Failed to timely pay in full a liability indicated on a quarterly IFTA tax return;
- (4) Failed to timely pay in full a liability determined by an audit of the motor carrier's records;
- (5) Paid any amount due under the IFTA program with a check drawn on an account with insufficient funds;
- (6) Any other just cause to protect the interests of the state of Oklahoma and/or the IFTA member jurisdictions.

(b) The Administrator of the IFTA Section may reinstate or deny reinstatement of an IFTA license if the following conditions exist:

- (1) A suspended motor carrier license may be reinstated if the motor carrier remedies the action that caused the suspension and pays the reinstatement fee of \$100.
- (2) If a bond is required, a suspended motor carrier license shall not be reinstated until the motor carrier has provided said bond.
- (3) A suspended motor carrier license may be denied reinstatement for habitual violations of this Section.
- (4) In lieu of requiring a bond, the Administrator may reinstate a license if the licensee agrees to make future remittances in certified funds.
- (5) A licensee may be suspended for their failure to make remittances under (4) in certified funds.

(c) A motor carrier who wishes to contest a denial, revocation, or a reinstatement denial is entitled to a hearing under the procedures contained in the Commission's Rules of Practice, OAC 165:5.

(d) A motor carrier is subject to a contempt citation when its IFTA License is revoked.

(e) A field contempt citation may be issued to any motor carrier operating with a revoked Oklahoma IFTA license.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 24 Ok Reg 1814, eff 7-1-07; Amended at 35 Ok Reg 1044, eff 10-1-18]

165:30-21-13. Reporting requirements

(a) Every person licensed under 68 O.S. § 607 shall make and transmit to the Commission, on or before the last day of April, July, October and January of each year, upon a form prescribed and furnished by the Commission, a verified quarterly return, showing the total distance traveled by the licensee in all jurisdictions and the total volume (in gallons) of motor fuel or diesel fuel purchased or received in each jurisdiction on which the motor fuel tax levied by that jurisdiction has been paid to that jurisdiction. The return will also show the total distance and the total taxable distance traveled by the licensee in each IFTA jurisdiction, and the total volume (in gallons) of motor fuel or diesel fuel consumed in each IFTA jurisdiction. The total volume (in gallons) of motor fuel or diesel fuel purchased or received in each IFTA jurisdiction shall be deducted from the total number of gallons of motor fuel or diesel fuel consumed by the licensee in each jurisdiction to determine the number of gallons of motor fuel or diesel fuel upon which each jurisdiction's motor fuel tax is to be computed and paid.

(b) Every person licensed under this article who travels less than five thousand (5,000) miles distance in all jurisdictions other than Oklahoma, based upon the four most recently filed consecutive quarterly returns, may request approval, at the option of the Commission, to file an annual return in lieu of filing the quarterly return.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08; Amended at 34 Ok Reg 977, eff 9-11-17]

165:30-21-14. Due and delinquency dates

Every licensee at the time of filing each quarterly report shall report and pay to the Commission the full amount of tax due for the preceding quarter at the rates provided for on the return. The completed report and tax remittance are due and payable on the first day of the succeeding quarter for which the report is filed, and if not paid, is delinquent from and after the last day of such month. If the last day of the month falls on a Saturday, Sunday, or legal holiday, the next business day shall be considered the final filing date.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06]

165:30-21-15. Penalty

(a) When any licensee fails to submit to the Commission any report required or the full amount of the tax due hereunder before the delinquency date, the licensee shall pay, in addition to the interest provided for herein, a penalty of Fifty Dollars (\$50.00) or 10% of the tax due, whichever is greater, for each occurrence.

(b) Penalty may be waived by the Commission for good cause shown when requested in writing by the licensee within 30 days of assessment or the filing of a return showing penalty due. The Transportation Division is authorized by the Commission to waive penalty amounts equal to or less than \$1,000 for good cause shown. Good cause while not limited to the items below may include:

- (1) Commission error causing the delinquency,
- (2) Extended history of timely filing (at least two years) and payments prior to the delinquency, or
- (3) Natural disaster causing the delinquency.

(c) Licensees who desire a waiver of penalty amounts greater than \$1,000 must file an appeal with the Court Clerk's Office in accordance with Commission administrative procedures.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 25 Ok Reg 1546, eff 7-1-08]

165:30-21-16. Interest

(a) When any licensee fails to make a required tax remittance to the Commission before the delinquency date, the licensee shall pay, in addition to the penalty provided for herein, interest in the amount as prescribed in the IFTA. When delinquencies of a fractional month occur, the effected jurisdictions will not receive their tax payments until the following transmittal month. Therefore, interest on delinquencies for a fractional portion of a month shall be calculated at the full month rate.

(b) In accordance with the International Fuel Agreement, the Commission cannot waive interest assessed and/or paid by a licensee on behalf of other jurisdictions. Licensees desiring other jurisdiction(s) interest waivers must receive written authorization from the other jurisdiction(s) and present such waivers to the Transportation Division. Upon confirmation, the Transportation Division may remove the amounts from an assessment, or if previously paid, refund those amounts to the licensee.

(c) Interest due on Oklahoma's portion of fuel taxes remitted on an IFTA quarterly return may be waived by the Commission for good cause shown. Good cause, while not limited to the items below, may include:

- (1) Commission error causing the delinquency,
- (2) Extended history of timely filing (at least two years) and payments prior to the delinquency, or
- (3) Natural disaster causing the delinquency.

(d) Licensee's who desire waiver of interest amounts greater than \$1,000 must file an appeal with the Court Clerk's Office in accordance with OCC administrative procedures.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 29 Ok Reg 951, eff 7-1-12]

165:30-21-17. Incorporating the International Fuel Tax Agreement

(a) When reference is made to IFTA, it shall mean, unless the context clearly indicates otherwise, the motor fuel use tax reciprocity agreement between the United States contiguous states and certain Canadian provinces, including the Procedures Manual and the Audit Manual, which allows a licensee to report and pay motor fuel use taxes to a base jurisdiction for distribution to other member jurisdictions in which the licensee traveled and incurred motor fuel use tax liability, as published by International Fuel Tax Association, Inc., as amended. IFTA can be found online at <https://www.iftach.org>.

(b) The following Articles are, unless otherwise specifically provided, incorporated by reference in their entirety:

- (1) Articles I through XXI of the International Fuel Tax Agreement (IFTA);
- (2) The International Fuel Tax Agreement Audit Manual; and
- (3) The International Fuel Tax Agreement Procedures Manual.

(c) When a provision of the IFTA is incorporated by reference, all citations and definitions contained therein are also incorporated by reference.

(d) In the case of any inconsistency or duplication between the requirements of those provisions incorporated by reference in this Section, and rules set out in this Subchapter, the provisions incorporated by reference shall prevail, except where the rules in this Subchapter are more particular. The provisions incorporated by reference are subject to any limitations provided by Oklahoma law.

[Source: Added at 23 Ok Reg 2325, eff 7-1-06; Amended at 34 Ok Reg 977, eff 9-11-17]

165:30-21-18. Operational records

Operational records shall be documents supporting miles traveled in each jurisdiction and the total miles traveled. These documents can be fuel reports, trip sheets, logs or computer runs that can be supported by source documents, when requested. An acceptable source document to verify fleet mileage is some type of Individual Vehicle Distance Record (IVDR). IVDRs should contain the following basic information:

- (1) Date of trip (starting and ending);
- (2) Trip origin and destination;
- (3) Routes of travel and/or beginning and ending odometer readings;
- (4) Total trip mileage (including all movement, loaded, empty, deadhead, and/or bobtail miles);
- (5) Mileage by jurisdiction;
- (6) Unit number or vehicle identification number;
- (7) Vehicle fleet number;
- (8) Registrant's name; and
- (9) Driver's signature and/or name.

[Source: Added at 34 Ok Reg 977, eff 9-11-17]

165:30-21-19. Maintenance and availability of operational records

(a) An IFTA licensee shall retain the records of its operations to which IFTA reporting requirements apply for a period of four (4) years following the date the IFTA tax return for such operations was due or was filed, whichever is later, plus any period covered by waivers or jeopardy assessments. Failure to maintain the required records may result in an assessment in accordance with the IFTA Procedures Manual.

(b) Failure to make records available upon proper request shall result in an assessment in accordance with the IFTA Procedures Manual.

(c) Failure to maintain or make records available may also subject the licensee to revocation of its IFTA license or denial of the issuance of a license.

[Source: Added at 34 Ok Reg 977, eff 9-11-17]

165:30-21-20. Audits

(a) If operational records are not maintained at a location within the State of Oklahoma and cannot be made available for audit at a location within Oklahoma, the licensee may be required to reimburse the Corporation Commission, for expenses incurred for performance of an audit at a location outside Oklahoma.

(b) Licensees selected for audit whose fleet size exceeds two hundred (200) vehicles are required to submit detailed records in the electronic format established by the Commission in order to conduct an audit.

[Source: Added at 34 Ok Reg 977, eff 9-11-17]

SUBCHAPTER 23. MOTOR LICENSE AGENTS ("MLA")

165:30-23-1. Responsibility for errors in application and computation

(a) A motor license agent shall be responsible for errors in tax application, computations, and/or fee computations and collections while performing registration of vehicles pursuant to Section 1120 of Title 47 of the Oklahoma Statutes.

(b) Upon demand for payment, the motor license agent must, within 15 days, remit the full amount of any error determined to be due, or if unable to pay the full amount, the agent may make a written request to the Commission for consideration of an extension of time to remit monies due.

[Source: Added at 24 Ok Reg 1814, eff 7-1-07]

165:30-23-2. Allowable fees and charges

(a) No fees may be charged to a taxpayer/registrant by a MLA for any service rendered pertaining to the processing of IRP applications other than fees as set forth in 47 O.S. § 1141.1, 1143 or any other Oklahoma statute that sets forth a MLA fee.

(b) All fees assessed a taxpayer/registrant must be documented in the MLA's records so they may be identified as to type, upon inquiry by the affected taxpayer/registrant or the Corporation Commission.

(c) All fees assessed a taxpayer/registrant by a MLA must be itemized and contained on a receipt provided to the taxpayer/registrant upon payment.

(d) Fees assessed for services not included on the IRP invoice shall be separately receipted.

(e) Non-IRP fee receipts shall be retained in the MLA's records and uploaded to the imaged documentation contained with the IRP registration application. A general, non-specific category such as "Miscellaneous Fee" is not sufficient. Each fee must be clearly identifiable and authorized by Oklahoma statutes.

[Source: Reserved at 24 Ok Reg 1814, eff 7-1-07; Added at 35 Ok Reg 1044, eff 10-1-18]

165:30-23-3. Responsibility for agency shortages

(a) A motor license agent shall be responsible for paying any balance determined to be due pursuant to Section 1120 of Title 47 of the Oklahoma Statutes as a result of a field audit conducted by the Commission.

(b) Upon demand for payment, the motor license agent must, within 15 days, remit the full amount of any shortage determined to be due, or if unable to pay the full amount, the agent may make a written request to the Commission for consideration of an extension of time to remit monies due.

[Source: Added at 24 Ok Reg 1814, eff 7-1-07]

165:30-23-5. Motor license agent conduct

(a) All transactions must be paid by the registrant at the time of processing. A motor license agent shall not process any transaction or release any item on credit before the taxpayer pays the tax and/or fee owed.

(b) A motor license agent shall not engage in any activity that will result in an actual or perceived conflict of interest.

(c) A MLA granted permission to process IRP applications shall service all IRP customers who desire the service. Commission permission given to a MLA to process IRP applications may be rescinded in the event a MLA refuses to process certain IRP applications or violates any provision of this subchapter.

[Source: Added at 33 Ok Reg 633, eff 9-1-16; Amended at 35 Ok Reg 1044, eff 10-1-18]

SUBCHAPTER 25. HARVEST PERMITS

165:30-25-1. Harvest permits

(a) Motor carriers engaged in the interstate or intrastate commercial transportation of farm products in a raw state on a seasonal basis may desire to meet their vehicle

registration, fuel permitting and/or intrastate operating authority requirements via a harvest permit.

(b) An applicant for a harvest permit shall file with the Commission a written application on the appropriate form prescribed by the Commission (TOSS1), and shall tender with the application a filing fee as prescribed by law or by Commission rule.

(c) The applicant shall be assigned a personal identification number (PIN) which shall be the permanent identification number for all matters relating to authority granted therein. Any application thereafter filed to extend the harvest permit or to obtain an additional harvest permit by the same applicant shall be filed under the same PIN.

(d) A harvest permit shall be personal to the holder thereof and shall be issued only to an individual, a corporation, a limited liability corporation, a partnership or some other legally recognized entity. A trade name or "doing business as" (DBA) may be designated, but cannot be a corporate name or LLC or LLP or another organized entity.

(e) The filing of an application for a harvest permit does not of itself authorize operations by the applicant. Such operations are prohibited until all requirements have been met and a harvest permit has been issued. All requirements for compliance with this Section shall be completed within ninety (90) days from receipt of the application or the application will be denied and any filing fees paid forfeited.

(f) The harvest permit application shall require the following:

(1) USDOT number of the applicant.

(2) Applicant's Name and DBA, if any.

(3) Type of applicant.

(4) Mailing, physical addresses, and optional email address.

(5) Taxpayer identification number.

(6) Vehicle listing which contains the following information for each vehicle to be operated under the permit:

(A) Owner of the vehicle.

(B) Vehicle registrant, if other than the owner.

(C) Make, model, year, and VIN.

(D) License plate number, State or Province of registration and registration expiration date.

(7) A liability insurance certificate valid in Oklahoma for a minimum of three hundred fifty thousand dollars (\$350,000) for each vehicle to be operated under the permit. The insured's name on the insurance certificate must match the owner or registrant's name as shown on the registration of the vehicle. A Form E liability insurance certificate issued on behalf of the motor carrier may be submitted in lieu of individual insurance certificates.

(8) Declaration stating the applicant shall comply with federal safety regulations and the state's size and weight laws and rules.

(9) Requested permit duration.

(10) Required permit effective date.

(g) No harvest permit shall be issued to an applicant until all outstanding fines or judgments due the Commission or other state(s) regulatory agencies have been satisfied.

(h) A copy of the harvest permit must be carried in each vehicle operated under the permit.

SUBCHAPTER 26. NONCONSENSUAL WRECKER AND TOWING SERVICES

PART 1. NONCONSENSUAL WRECKER AND TOWING SERVICES RATE CHANGE APPLICATIONS

165:30-26-1. Purpose

The purpose of this Subchapter is to define the specific financial, statistical, and other information required to be filed and made available with an application proposing an increase or change in rates, charges, or fees charged for the provision of nonconsensual wrecker or towing services. This Subchapter is intended to define the information required to be filed and made available in connection with a proposed rate increase or rate change in order to facilitate an investigation of and hearing on such proposed rate increase or rate change. This Subchapter does not preclude the filing or provision of any additional data, information, or calculations not herein specified, nor does this Subchapter preclude the Oklahoma Corporation Commission ("Commission") from requiring additional information as it deems necessary.

[Source: Added at 30 Ok Reg 1042, eff 7-1-13]

165:30-26-2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Accounting method" means generally accepted accounting practices recognized by the American Institute of Certified Public Accountants or other accounting methods approved by the Commission.

"Application package" means the application, the narrative explanation of the justification for the rate increase or rate change, all exhibits, schedules, testimony and evidence necessary to support the application.

"Day" means calendar day unless specifically defined otherwise.

"Deficient filing" means a filing which does not substantially comply with the formal or procedural requirements of this Subchapter and the Commission Rules of Practice.

"Director" means the Director of the Transportation Division of the Oklahoma Corporation Commission.

"Nonconsensual towing rate complaint" means any communication, whether verbal or written, from any person, which alleges that any wrecker service has billed rates, charges, or fees not authorized or in excess of those authorized by Commission Order. The Commission is not obligated to act on any complaint in which insufficient information is presented to establish that a violation has occurred.

[Source: Added at 30 Ok Reg 1042, eff 7-1-13]

165:30-26-3. Application; application package; and staff response to filed application package

(a) Applicant shall file with the Commission Court Clerk its request for a rate increase or rate change in a complete application package. Applicant shall also submit the filing fee with the application package, which is set forth in the Commission Rules of Practice. Applicant shall submit six (6) copies of the

- application package to the Commission Court Clerk at the time of filing.
- (b) The application shall be in the form required by the Commission Rules of Practice for commencement of a cause.
- (c) The application package shall contain the following:
- (1) A narrative explanation of the justification for the rate increase or rate change;
 - (2) The application shall contain all exhibits, schedules, testimony, and evidence necessary to support the application and shall be assembled in sections with index tabs identifying each section for referencing convenience;
 - (3) Filed testimony shall reference the exhibits, schedules, and evidence in the same manner used to file the application package;
 - (4) All exhibits, schedules, testimony, and evidence shall be both factually and mathematically correct using generally accepted accounting methods.
- (d) Service of the application shall be as required by the Commission Rules of Practice.
- (e) The applicant shall maintain the application package. The application shall include information to inform all Respondents and other interested parties of the location where the application package is being maintained. Such information shall include the name, address, telephone number, fax number, and e-mail address of the person maintaining the application package. The applicant shall make the application package available to all Respondents and other interested parties for examination between the hours of 8:00 a.m. and 5:00 p.m. on Monday through Friday, excluding legal holidays as defined in the Commission Rules of Practice. The application package shall also be available for public inspection at the Office of the Commission Court Clerk.
- (f) Unless otherwise indicated, all applicable provisions in the Commission Rules of Practice shall be followed in all nonconsensual wrecker and towing service causes.
- (g) Within twenty-one (21) business days of the receipt of an application package, the Director shall file with the Commission and provide to the applicant a copy of the staff response regarding the compliance or deficiency of the application and/or application package. The Division's staff response under this subsection shall only be required to assess the procedural filing compliance with Commission statute and rules, not on the merits of the requested rate change.
- (h) If the Director finds the application and/or application package is not in substantial compliance with the requirements of this Subchapter, the staff response shall state that the filing is a deficient filing. The deficiencies and the requirements necessary to cure the deficiencies shall be stated in the staff response. If the deficiencies noted in the staff response are not corrected within forty-five (45) calendar days of the date of the staff response, the application package shall be rejected. Resubmission of a rejected package shall be considered a new application package, and the application filing fee set forth in the Commission Rules of Practice shall be submitted with this filing.
- (i) An applicant may file exceptions to the staff response within ten (10) business days of receipt. Such exceptions shall be set for hearing before the Commission sitting en banc as soon as practically possible unless the parties agree to another date or the Commission directs otherwise. An order affirming a determination of deficiency renders the application rejected. If the application is rejected, the applicant may resubmit a new application package.

165:30-26-4. Limitations on filing rate cause

At the time of filing a request for a rate increase or rate change or at the time of entering an appearance in a rate increase or rate change cause, the filer shall not have any outstanding obligation to the Commission or to a consumer as the result of a nonconsensual towing rate complaint.

[Source: Added at 30 Ok Reg 1042, eff 7-1-13]

PART 3. RESPONSE TO NONCONSENSUAL TOWING RATE COMPLAINTS

165:30-26-10. Receipt of nonconsensual towing rate complaints

(a) Any nonconsensual towing rate complaint received by the Commission or any of its Divisions shall be recorded immediately upon receipt in such format as the Commission may designate.

(b) A written acknowledgement of receipt of a nonconsensual towing rate complaint will be communicated to the complainant, alleged violator, and other relevant parties, if known, within seven (7) calendar days following receipt of the nonconsensual towing rate complaint and shall provide the status of the nonconsensual towing rate complaint at that time. The written acknowledgement shall contain information necessary to identify the tow. The wrecker service invoice number, vehicle identification number, date, and time of the tow are examples of the kind of information that may be provided. The written acknowledgement shall also request initial records needed to commence the complaint investigation. Nothing herein restricts the Commission from requiring and examining additional records necessary to fully investigate a complaint.

[Source: Added at 30 Ok Reg 1042, eff 7-1-13]

165:30-26-11. Review of nonconsensual towing rate complaints

(a) The appropriate Division of the Commission shall immediately review each nonconsensual towing rate complaint and promptly refer any complaint concerning matters not regulated by the Commission to the appropriate state or federal agency.

(b) Nonconsensual towing rate complaints that are not referred shall be reasonably and sufficiently investigated, which may include on site investigation, to determine whether or not an action or actions should be initiated by the Commission.

(c) Nonconsensual towing rate complaints must be filed within the wrecker service documentation retention requirements of the Oklahoma Department of Public Safety.

[Source: Added at 30 Ok Reg 1042, eff 7-1-13]

165:30-26-12. Nonconsensual towing rate complaint resolution and contesting a Violation Notification.

(a) Nonconsensual towing rate complaint resolution is not achieved until either a written determination is issued or the Violation Notification process, initiated by a Notice of Probable Violation (NOPV) letter, is closed by the Transportation Division.

(b) If the complaint investigation results in a NOPV requiring restitution and/or a penalty, or other action is necessary, the disallowed amount must be remitted within twenty (20) calendar days of the NOPV to avoid enforcement action against the wrecker or towing service. The NOPV shall specify each charge that was in

violation of the Commission's rate order(s) and will list a member of Transportation Division staff as a point of contact. Restitution payments must be remitted to the person taking responsibility for the tow bill, whereas, penalties assessed must be remitted to the Commission along with a copy of the written determination.

(c) Any individual or entity that wishes to contest the NOPV must do so within twenty (20) calendar days of the date of mailing, by regular mail, of the NOPV by filing a Transportation Docket (TD) cause application conforming to Commission rules found in Subchapter 7 of this Chapter and the Commission's Rules of Practice (OAC 165:5). In the event the expiration of the twenty (20) days falls on a weekend or holiday for which the Commission is not open for regular business, the application may be filed the following business day the Commission is open to be considered timely filed.

[Source: Added at 30 Ok Reg 1042, eff 7-1-13; Amended at 36 Ok Reg 602, eff 8-1-19]

165:30-26-13. Closure

Nonconsensual towing rate complaints referred to other agencies, nonconsensual towing rate complaints that involve issues not within the Commission's jurisdiction, and nonconsensual towing rate complaints that involve issues for which an adequate remedy has already been implemented shall be closed in writing and a copy of the referral or other closure document shall be sent to the complainant, alleged violator, and other relevant parties, if known, within seven (7) calendar days of closure.

[Source: Added at 30 Ok Reg 1042, eff 7-1-13]

165:30-26-14. Nonconsensual towing rate complaints and audits

(a) The Commission hereby establishes a progressive system of actions to be taken by the Commission, or its designee, to achieve compliance with a Commission nonconsensual towing order. Violations of a Commission nonconsensual towing order may be established as a result of a nonconsensual towing rate complaint investigation or an audit.

(b) For purposes of progressive actions, the date shown on the service invoice serves as the violation date. The dated written notice of a violation issued by the Commission, or its designee, serves as the Violation Notification.

(c) The following stipulations are in place for violations established as a result of a complaint investigation:

(1) A Violation Notification will contain instructions on the proper rate calculation procedure and will be provided to the wrecker service. The Violation Notification will list the violations and remediation requirements. The Violation Notification may require the repayment of the overcharge to the person who paid for the services. The wrecker service shall comply with the written instructions within twenty (20) calendar days of the Violation Notification.

(2) Each subsequent Violation Notification of the same provision of a Commission nonconsensual towing order within an eighteen (18) month period will be treated as a progressive violation.

(A) A violation may progress to the next level only when the date of the second or succeeding Violation Notification is later than the previous violation date.

(B) Each progressive action may consist of a new remediation requirement as well as each of the preceding remediation action requirements.

(3) For the second Violation Notification of the same violation during aneigheten (18) month period, a penalty may be assessed in accordance with (f) of this Section. In addition, the Commission or its designee may recommend the wrecker service be temporarily removed from the Oklahoma Department of Public Safety and/or other political subdivision's rotation log. Any such recommendation for removal will include the justification for such request.

(4) For the third and any subsequent Violation Notification of the same violation during aneigheten (18) month period, the Commission or its designee may recommend to the Oklahoma Department of Public Safety that the license of the wrecker service be suspended or revoked. Any political subdivision with which the wrecker service maintains a contract to provide nonconsensual wrecker or towing services may also be notified of the violation(s) along with the justification for such notification.

(d) Audits of wrecker services may be conducted with or without specific cause. Typically, audits are conducted as a normal part of rate determination and economic analysis, as a result of a nonconsensual towing rate complaint, as a referral from another political subdivision or as a follow up to a previously conducted audit. Audit periods cannot extend beyond the records retention period as required by the Department of Public Safety in OAC 595:25.

(e) Violations discovered as the result of an audit shall be reviewed by the Director of the Transportation Division or his designee. Progressive action remedies in addition to penalties in accordance with (f) of this Section may be assessed or the Commission may issue an order requiring that violations of this Subchapter be corrected. The order may include a fine up to a maximum of \$500.00 for each violation.

(f) For violations established as a result of a nonconsensual towing rate complaint or as a result of an audit, the following penalties may be assessed by the Director of the Transportation Division:

- (1) A penalty in an amount up to \$175.00 for the second violation;
- (2) A penalty in an amount up to \$375.00 for the third violation; or,
- (3) A penalty in an amount up to \$500.00 for the fourth and subsequent violations.

165:30-26-18. Display of nonconsensual towing rates

(a) Each wrecker service licensed by the Department of Public Safety and placed upon an official rotation log to perform nonconsensual tows shall be required to conspicuously display a copy of the current Oklahoma Corporation Commission Nonconsensual Towing Maximum Wrecker Rate Chart at each location where a person will be paying for a vehicle release.

(b) The Maximum Wrecker Rate Chart size and text must be large enough to be easily read by the person paying for the vehicle release and contain fully legible text and figures.

(c) The Maximum Wrecker Rate Chart may be download from the Agency's website.

CHAPTER 32. RAILROADS

[Authority: OKLA. CONST. art IX, § 18; 17 O.S., §§ 71 et seq.; 66 O.S., §§ 1 through 309]

[Source: Codified 7-1-95]

SUBCHAPTER 1. GENERAL PROVISIONS

165:32-1-1. Authority and purpose

(a) Article IX, Sections 2 through 19 of the Oklahoma Constitution, 17 O.S. §§ 61 to 116.9, and 66 O.S. § 1 et seq. give the Commission the authority and responsibility to oversee, regulate, and control railroad companies in Oklahoma, and to enact rules and regulations in connection therewith. Pursuant to such constitutional and statutory authority, the Commission has adopted this Chapter and fixed the following standards for railroads. Any other railroad safety provisions, rules, or standards, previously adopted by this Commission, except variances by Commission order, to the extent of any conflict, are superseded by this Chapter. This Chapter is a compilation of previous Commission railroad safety rules and orders. Order No. 33847 as applied to railroads in Oklahoma is revoked as of the effective date of this Chapter.

(b) Except as provided in OAC 165:32-1-2 (e), any order of the Commission granting relief which would constitute an exemption from any provision of this Chapter shall not be superseded by this Chapter.

(c) This Chapter is intended to provide safety standards for railroads within the State of Oklahoma.

(d) To the extent federal authority preempts Commission regulation in this Chapter, federal law will control.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 15 Ok Reg 3053, eff 7-15-98]

165:32-1-2. Application and scope of rules

(a) This Chapter shall apply to the operations of any railroad corporation, as defined by the laws of the State of Oklahoma, operating within the State of Oklahoma under the jurisdiction of the Commission, and to all persons employed by such corporations and performing work in the State of Oklahoma, except in cases where the Commission shall otherwise order.

(b) The adoption of this Chapter shall in no way preclude the Commission from altering or amending it in whole or in part after notice and hearing, or from allowing or requiring additional or different service, equipment, facility, or standards than are prescribed by this Chapter, either upon complaint or application or upon the Commission's own motion. Nothing provided in this Chapter shall relieve any railroad from any duty prescribed by the laws of the State of Oklahoma.

(c) A railroad may prescribe safety rules and regulations not inconsistent with this Chapter.

(d) Whenever compliance with any provision or requirement of this Chapter would be unduly burdensome, or cause an unreasonable hardship or an excessive expense, or result in an unusual difficulty, or if other good cause can be shown, the Commission may, upon application by the railroad and after notice and hearing, suspend or excuse compliance therewith or make such other requirements as it shall deem appropriate. For good cause shown, the Commission may grant temporary relief pending the hearing. If, after the effective date of this Chapter, a railroad seeks an exception or variance from this Chapter, then upon approval by the Commission, the variance shall carry the number of the applicable Commission order.

(e) In any case where a controversy arises in connection with the interpretation of any provisions of this Chapter or the applicability thereof, the Commission will make such orders as it may deem appropriate upon application of any interested party and after notice and hearing.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-1-3. Definitions

The following words and terms, when used in this Chapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Commission" means the Oklahoma Corporation Commission.

"Continuous direction" means the movement of a locomotive engine or engines, coupled with or without cars, over any public rail highway crossing in any direction and maintaining that direction until the crossing is unoccupied.

"Crossing surface" means a combination of material such as treated timbers, reinforced concrete panels, and composite or rubber tiles that are combined with rail components such as the flangeway and flange filler, to produce a surface that makes it possible for vehicles to cross over the railroad track in comfort and safety.

"Noxious plants" means poison ivy, poison oak, or poison sumac, at any height or maturity.

"Public crossing" means a location where the tracks cross a road which is under the jurisdiction of and maintained by a public authority and which is open to public travel.

"Private Crossing" means a location where a physical crossing is present but the road does not meet the conditions for a public crossing and for which a private crossing agreement may have been entered into between landowner and railroad.

"Rank weeds" means all vegetation which can conceal or harbor rodents, refuse or vermin.

"Sight rectangle" means a rectangle which would have a beginning point from the center of the main track and the center point of the grade crossing extending along the center of the street or roadway approach for a distance of fifty feet (50') or to the railroad right-of-way property line, whichever is less, then extend along the property line for a distance of two hundred fifty feet (250') in either direction from the original beginning point.

"Sight triangle" means a triangle which would have a beginning point from the center point of the main track and the center point of the grade crossing extending along the center of the street or roadway approach for a distance of fifty feet (50') or to the railroad right-of-way property line, whichever is less, then extend at an angle until arriving at a point on the center of the main track two hundred fifty feet (250') from the original beginning point.

"Thickets" means any dense growth, briar patch, or wild shrubbery having stems or trunks one inch(1") or less in diameter.

"Trash" means, but is not limited to, refuse, litter, leaves, paper, combustible materials, offal, rubbish, waste, debris, and useless or unused or uncared for matter of all kinds.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 15 Ok Reg 3053, eff 7-15-98; Amended at 18 Ok Reg 2414, eff 7-1-01; Amended at 36 Ok Reg 618, eff 8-1-19]

165:32-1-4. Location and retention of records

(a) Any records which may be required to be generated or maintained pursuant to provisions in this Chapter, shall be kept in the normal course of business, which may include electronic media, within Oklahoma at the office or offices of the railroad, and shall be open and available for examination by the Commission or its representatives; provided that if the general office of the railroad is located outside of Oklahoma, the records may be kept in the normal course of business at the general office. Upon the Commission's request, each railroad shall identify the location of the office or offices at which the various classes of records are kept, and shall file with the Commission such reports as the Commission may require.

(b) Unless otherwise specified in this Chapter, all records required by this Chapter shall be preserved by the railroad in their original form and for a period of time not less than 2 years.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-1-5. [RESERVED]

[Source: Reserved at 12 Ok Reg 2107, eff 7-1-95]

165:32-1-6. Timetables and trackcharts

Upon request, railroads shall provide the Commission and the Oklahoma Department of Transportation with train-volume and operating speed data.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 31 Ok Reg 1028, eff 9-12-14]

165:32-1-7. Flammable materials

(a) Railroads and other persons, firms, or corporations maintaining or operating any railroad line, track or facility in the State of Oklahoma shall take all reasonable measures necessary to keep under control all flammable materials in the immediate areas of their tracks and on their rights-of-way.

(b) If such materials are disposed of by burning, the railroad shall take reasonable precautions to prevent the fire from spreading to railroad facilities or adjacent properties.

(c) Railroads and other persons, firms, or corporations operating any railroad locomotives over tracks within the State of Oklahoma shall ensure each locomotive is equipped with an efficient spark arrester or other spark deterrent system.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-1-8. Blocking crossings

(a) Every railroad shall be operated in such a manner as to minimize obstruction of emergency vehicles at public highway grade crossings.

(b) Any state, county or municipal entity may file a Transportation Docket (TD) cause application, conforming to the procedural requirements of OAC 165:5, requesting an order from the Commission requiring a separation of grade at a

crossing based on blockages that affect public safety. Such applications must include an engineering and budget proposal and assignment of costs. The assignment of cost must be reasonable and must include supporting justification for such assignment. If the budget proposal is part of a federal-aid project, railroad contributions requested in the application shall not exceed federal regulatory requirements unless by agreement.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 18 Ok Reg 2414, eff 7-1-01; Amended at 36 Ok Reg 618, eff 8-1-19]

165:32-1-9. Notice of accidents

A true and correct copy of all accident/incident reports pertaining to accidents/incidents occurring within the State of Oklahoma, which are prepared for the Federal Railroad Administration pursuant to 49 CFR Section 225 et seq. shall be submitted to the Commission in a timely manner.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-1-10. Fences

(a) A property owner owning land adjacent to a railroad track in the State of Oklahoma may make application for a lawful fence on a form provided by the Commission, which application shall include the following:

- (1) Signature of property owner.
- (2) General description of property, by Section, Township and Range, if possible.
- (3) Description of the property line or portion thereof to be fenced, including measurements or railroad mile pole locations, if known.
- (4) Statement as to whether all other sides of the property owned by the landowner are fenced and capable of retaining livestock.
- (5) Statement as to whether livestock is being raised on the property to be fenced, and if so, whether for commercial or personal purposes.
- (6) Attached to the application shall be a copy of written communication transmitted on behalf of the landowner to the railroad requesting the railroad to furnish the landowner a lawful fence.

(b) No application for a lawful fence shall be filed with the Commission until forty-five (45) days have expired from the date of the written notice from the landowner to the railroad requesting a lawful fence.

(c) When an accurate and complete application for a lawful fence has been received from a landowner, the Transportation Division shall provide a copy of the application to the affected Railroad's Manager accompanied by a letter requesting a lawful fence within sixty (60) days.

(d) If the lawful fence is not completed when the sixty (60) day period expires, the Transportation Division may file an enforcement action for contempt of Commission rules and order the building of a lawful fence.

(e) A landowner may request dismissal of the application for a lawful fence at any time.

[Source: Reserved at 12 Ok Reg 2107, eff 7-1-95; Added at 14 Ok Reg 2557, eff 7-1-97; Amended at 36 Ok Reg 618, eff 8-1-19]

165:32-1-11. Weed and trash abatement

(a) Railroads or other persons, firms or corporations operating a railroad company are responsible for the reasonable abatement of all rank weeds, noxious plants, thickets and trash, as defined in this Subchapter, along their rights-of-way and at

crossings within a sight rectangle within the boundaries of any city or town or unincorporated community in Oklahoma.

(b) Railroads or other persons, firms or corporations operating a railroad company are responsible for the reasonable abatement at public crossings of trees, shrubs and other obstructions within or encroaching within a sight triangle. Upon request of the Commission, the sight triangle may be extended to a sight rectangle if it is determined necessary for proper sight distance at the crossing. Devices, signs or structures necessary for the operation of the railroad and railroad equipment in the process of loading, unloading or switching are not considered obstructions.

(c) This responsibility exists as long as the railroad or other person, firm, or corporation operating as a railroad company, is the legal owner of the right-of-way, even if operations have ceased, and/or the tracks and facilities have been removed. Abatement must begin upon notification received from the Commission.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 15 Ok Reg 3053, eff 7-15-98]

165:32-1-12. Penalties

Upon violation of any of the regulations contained in this Chapter, per Title 17 O.S. § 1, the responsible party shall be assessed a fine in an amount up to five hundred dollars (\$500.00) per day per violation by the Commission unless otherwise specified by law.

165:32-1-13. Commission enforcement of blocked crossing citations [EXPIRED]

[Source: Added at 36 Ok Reg 1097, eff 6-27-19 (emergency)¹]

EDITOR'S NOTE: ¹This emergency action expired without being superseded by a permanent action. Upon expiration of an emergency action enacting a new Section, the Section is no longer effective. Therefore, on 9-15-20 (after the 9-14-20 expiration of the emergency action), Section 165:32-1-13 was no longer effective. For the official text of the emergency rule that was effective from 6-27-19 through 9-14-20, see 36 Ok Reg 1097.

SUBCHAPTER 3. RAILROAD GRADE CROSSINGS

165:32-3-1. Incorporation of federal regulations [REVOKED]

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Revoked at 31 Ok Reg 1028, eff 9-12-14]

165:32-3-2. General provisions

(a) **Specifications.** After the effective date of this Chapter, railroads shall install 12 inch signal heads during new or upgrade construction of crossing warning devices.

(b) **Crossbucks.** Railroads shall install and maintain one crossbuck on each roadway approach which complies with the minimum standards of the Manual on Uniform Traffic Control Devices ("MUTCD") for highway crossing crossbuck signs.

(c) **Private crossings exempt.** Private crossings are exempt from the regulations contained in this Subchapter.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 31 Ok Reg 1028, eff 9-12-14]

165:32-3-3. Changes in existing crossing warning devices

(a) **Notice.** No change, except in case of emergencies, shall be made in existing crossing warning devices at any grade crossing unless and until due notice thereof is given in writing to the Commission and the written approval of the Commission

is obtained where such approval is required by this Section. This Section shall not apply to the erection of additional signs, consistent with Commission rules or Orders, nor prevent a railroad from making changes in circuits to accommodate changes, but cannot be reduced.

(b) **Exceptions.** Changes in the existing crossing warning devices may be made without specific authority first having been obtained, provided written communication identifying the location, extent and permanent or temporary nature of the changes is given to the Commission, if the changes consist of any of the following:

- (1) Extending the hours of a flagman.
- (2) Installing bells or additional light units on flashing light signals, or additional units to meet special conditions at crossings where flashing light signals are already established.
- (3) Establishing new or additional lighting, either by flood light or by new or additional lamps placed on gates, signs or other warning equipment.
- (4) Removal of any sign not provided for in the Manual For Uniform Traffic Control Devices (MUTCD) or required by order of the Commission.
- (5) A temporary change, such as one made necessary by highway reconstruction work in progress, or the like.

(c) **Resolution.** Where a major change or reduction in existing crossing warning devices is proposed at any crossing within the limits of a city or town, the Commission may, at its discretion, require the applicant to file an appropriate resolution or other official act, if obtainable, indicating the attitude of the municipal authorities with reference to the proposed change.

(d) **Removal.** The railroad company shall not remove an automatic crossing device or reduce the hours during which any such device is maintained, or substitute any form of warning device for a form already maintained at any public crossing, unless the consent for such removal, reduction or substitution shall have been obtained from the Commission; provided, however, that a human flagman, assigned to temporarily warn the traveling public during an emergency, may be removed without such consent.

(e) **Damage.** Absence of crossing signals and signs, due to accidents or severe weather conditions, shall not be considered a violation of this Subchapter. This does not excuse the company from providing warning by train order or human flagmen in lieu of the missing or damaged sign or signal.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 31 Ok Reg 1028, eff 9-12-14]

165:32-3-4. Removal of crossing installations

- (a) Within one hundred twenty(120) days after removal of track which was formerly contiguous to a crossing, railroads are required to also remove the crossing surface which is unneeded, and replace the excavated area, matching width, grade and materials, to repair the existing roadway, making it contiguous.
- (b) Railroads are required to remove signal installations deemed not salvageable by the Oklahoma Department of Transportation, on abandoned rail lines, not more than one hundred twenty(120) days after the crossing surface(s) are removed.
- (c) Railroads shall relocate existing warning devices (passive or active) to a distance no less than twelve feet (12') and no greater than twenty feet (20') from the remaining railroad crossing surface(s). Said work to be completed not more than one hundred twenty(120) days after the track(s) or crossing surface(s) are removed.
- (d) If, upon notice and hearing, the Commission finds rail access to be cut on both sides of a public crossing, or the crossing cannot be physically utilized for rail

service, the Commission may order the rails to be removed within the crossing by the railroad or other property owner and the crossing to be resurfaced in conformity with (a) of this subsection. This subsection shall, in no way, affect the easement rights of the crossing property owner.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 36 Ok Reg 618, eff 8-1-19]

165:32-3-5. [RESERVED]

[Source: Reserved at 12 Ok Reg 2107, eff 7-1-95]

165:32-3-6. Notice of closure or detour

Railroads shall notify by regular or electronic mail the entity having roadway maintenance jurisdiction (City, County or State), no less than seven (7) calendar days in advance of closing or detouring any roadway for railroad maintenance or construction, unless an emergency exists.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 31 Ok Reg 1028, eff 9-12-14; Amended at 36 Ok Reg 618, eff 8-1-19]

165:32-3-7. AAR/DOT numbers

Railroads shall display the proper American Association of Railroads/Federal Department of Transportation (AAR/DOT) number at every railroad overpass, underpass, and at-grade crossing.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-3-8. Crossing surface quality

(a) A railroad or other persons, firms, or corporations operating a line of railroad within the State of Oklahoma shall maintain public grade level crossings, in reasonably smooth condition, unobstructed and in good condition pursuant to the United States Department of Transportation Railroad-Highway Grade Crossing Handbook. Such maintenance shall include all surfaces between the rails and three feet (3') on either side of the outer-most rail in the crossing surface; or two feet (2') on either side of the outer-most rail if the crossing is located within the limits of a municipality. To be considered reasonably smooth, unobstructed and in good condition the surface must conform to the following list of non-exclusive requirements and conditions:

- (1) Any crossing panels having material damages greater than two inches (2") in depth must be replaced.
- (2) Concrete, composite or rubber crossing panels with loose components rising above the roadway surface must receive temporary repair within seventy-two (72) hours and be replaced within thirty (30) days from the date and time of notice.
- (3) Timber crossing panels with loose components rising above the roadway surface must be repaired within seventy-two (72) hours after receiving notice of the condition.
- (4) Partial asphalt cover on existing crossing surfaces will be considered a temporary repair.
- (5) Crossing panels that receive temporary asphalt repairs must be replaced within ninety (90) days of original placement of asphalt.
- (6) Crossing panels shall be stable and adequately lagged to the underlying railroad at all times.

(7) The roadway surface will be in the same plane as the tops of the rails for a distance of at least three feet (3') beyond the rails for either single or multiple track crossings where practical.

(b) Any crossing surface that, in the determination of the Commission, poses an unreasonable risk to the life or property of the traveling public shall be rebuilt or repaired within a timeline set by the Commission.

[Source: Added at 36 Ok Reg 618, eff 8-1-19]

SUBCHAPTER 5. TRACK CLEARANCES

165:32-5-1. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"AREMA Manual" means, the American Railway Engineering and Maintenance-of-Way Association's Manual.

"MUTCD" means, the Manual on Uniform Traffic Control Devices, which is the Federal Highway Administration ("FHWA") standard for signs, signals and pavement markings in the U.S.

"Track clearance" means, the shortest horizontal distance between the center lines of adjacent tracks.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 31 Ok Reg 1028, eff 9-12-14]

165:32-5-2. Applicability to existing structures

All structures, operating appurtenances, pole lines, service facilities, and track arrangements existing on the effective date of this Chapter shall be exempt from these regulations except as may be provided in this Subchapter.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-3. Incorporation of AREMA Manual provisions

This Subchapter adopts and incorporates by reference all of the provisions and standards pertaining to clearances, as are currently published in the AREMA Manual, or as may be amended from time to time.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Amended at 31 Ok Reg 1028, eff 9-12-14]

165:32-5-4. [RESERVED]

[Source: Reserved at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-5. Bridges [REVOKED]

[Source: Added at 12 Ok Reg 2107, eff 7-1-95; Revoked at 31 Ok Reg 1028, eff 9-12-14]

165:32-5-6. Platforms

(a) **Combination platforms.** Platforms may be combined, provided that the lower platform presents a level surface to the face of the wall of the platform with which it is combined. No other combinations will be permitted.

(b) **Platform extensions.** Platforms which were constructed at the prevailing clearances, prior to the effective date of this Chapter, may be extended at those existing clearances.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-7. Interlockers and switch boxes

Switch boxes, switch operating mechanisms necessary for the control and operation of signals, and interlockers projecting 4 inches or less above top of rail, shall each have side clearances of no less than 3 feet.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-8. [RESERVED]

[Source: Reserved at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-9. Signals, signal poles and switch stands

(a) **Signals and switch stands 3 feet high or less.** Side clearances at signals and switch stands shall be 6 feet when said signals and switch stands are 3 feet high, or less, above top of rail when located between tracks, or where not practical to provide clearances otherwise prescribed in this Subchapter.

(b) **Signals, signal poles and switch stands over 3 feet.** Signals, signal poles and switch stands which stand higher than 3 feet above top of rail shall have all the portions thereof, which exceed higher than 4 feet above top of rail and less than 16 feet above top of rail, be located no less than 8 feet 6 inches from center of track. Those portions below 4 feet and over 16 feet shall not exceed the minimum clearances described above.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-10. Track clearances

(a) **Standard gauge railroad tracks.** The minimum distance between the center line of parallel standard gauge railroad tracks, which are used or proposed to be used for transporting freight cars, shall be 14 feet.

(b) **Main and subsidiary tracks.** The minimum distance between the center line of two parallel main tracks or passing tracks shall be 14 feet. When another track is constructed adjacent to a passing track the clearance may be no less than 14 feet.

(c) **Parallel team, house or industry tracks.** The minimum clearances between center lines of parallel team, house or industry tracks shall be 13 feet.

(d) **Ladder tracks.** The minimum clearance between center lines of ladder track and any parallel track except another ladder track, shall be 17 feet, and the minimum clearance between center lines of ladder track and another parallel ladder track shall be 20 feet.

(e) **Existing tracks.** Existing tracks may be extended at the clearances prevailing prior to the effective date of this Chapter.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-11. Changes

No change in track location or elevation shall be made which will reduce existing vertical or horizontal structural clearance below the minimums specified in this Subchapter, except where tracks are constructed as part of the existing facility, and in such cases the clearance shall conform to existing conditions.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-12. [RESERVED]

[Source: Reserved at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-13. Partial replacements

Where existing structure provide clearance less than the standards which are specified in this Subchapter, the portion of the structure producing the impaired clearance may be repaired or maintained by partial replacements, which shall in no case reduce the existing clearance.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-14. Rebuilds

When the owner shall replace in its entirety, a portion of a structure which has not previously provided standard clearance, the rebuilt portion must, when complete, provide the full standard clearance as provided by this Subchapter, unless otherwise ordered by the Commission.

[Source: Added at 12 Ok Reg 2107, eff 7-1-95]

165:32-5-15. Emergencies

No restricted clearances set forth herein, shall apply to shoo-fly tracks or other temporary emergency conditions caused by derailments, washout, slides or other unavoidable disasters.

165:32-5-18. Exemptions

Exemptions from any of the requirements contained in this Subchapter will be considered by the Commission upon proper application from a carrier, industry representative, or other interested person. The application must be accompanied by a full statement of the conditions existing, and the reason(s) why such exemption is being requested. Any exemption so granted shall be limited to the particular case covered by the application.

CHAPTER 35. ELECTRIC UTILITY RULES

[Authority: OKLA. CONST. art IX, § 18; 17 O.S., §§ 158.21 et seq. and 160.11 et. seq.]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:35-1-1. Purpose, authority, and scope

(a) The Electric Utilities rules and regulations of this Chapter were adopted by the Oklahoma Corporation Commission by virtue of Article IX, Section 18 et seq., of the Oklahoma Constitution and sundry enactments of the Oklahoma Legislature, which give the Commission the authority and responsibility to supervise, regulate, and control electric utilities in Oklahoma, and to enact rules and regulations in connection therewith.

(b) Pursuant to such statutory authority, the Commission has adopted this Chapter and fixed the following standards for electric utilities, to become effective upon publication as required by Article IX, Section 18 of the Oklahoma Constitution. General Order Nos. 689, 755, 2072, 16061, 13336, 104932, 109443, 110178, 135207, 147881, 179618, 179219, and 186936 as applied to electric utilities in Oklahoma are revoked as of the effective date hereof. Service provisions, rules, standards, and/or terms and conditions of service of electric utilities in Oklahoma, which have been approved by and filed with the Commission by the electric utilities to the extent of any conflict, are superseded by this Chapter.

(c) No tariff, special contract, agreement, rule, or terms and condition of service shall be filed with the Commission by electric utilities, after the effective date of this Chapter, which is in conflict with this Chapter except as provided for in OAC 165:35-1-3(f).

(d) Except as provided in OAC 165:35-1-3, any order of the Commission granting relief which would constitute an exemption from any provision of this Chapter shall not be superseded by this Chapter.

[Source: Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Affiliate" means any person, entity, or business section, or division that directly or through one or more intermediaries controls, is controlled by, or is under common control with the entity in question. Control includes, but is not limited to, the possession, directly or indirectly and whether acting alone or in conjunction with others, of the authority to direct the management or policies of a person or entity. Control may be exercised through management, ownership of voting securities or other right to vote, by contract or otherwise. A voting interest or ownership of five percent (5%) or more creates a presumption of control.

"ANSI" means the American National Standards Institute.

"Capacity" means the quantity of electric power produced by a generating facility at a point in time, as measured in kilowatts or megawatts.

"Commission" means the Oklahoma Corporation Commission.

"Company submeter" means a kWh measuring device provided by the utility located on line beyond the point of delivery of electrical service providing service to another consumer. Usage from these meters are deducted from the meter at point of delivery.

"Competitive bidder" means any entity that submits a competitive bid in response to a request.

"Competitive bidding process" means a process to solicit offers to provide fuel supplies, electric generation service, fuel transportation services, and other goods or services related to a utility's provision of electric service to end users.

"Complaint" means an expression of dissatisfaction regarding the utility's billings, service procedures, or employee conduct which requests or requires some remedial or corrective action be taken by the utility. Complaints may be made by the consumer or other interested party. A complaint may be made orally, electronically or in writing, but must be made or received at the utility's offices.

"Conduit" means any structure, or section thereof, containing one or more ducts, manholes, or handholes, used for any telephone, cable television, electrical, or communications conductors or cables, owned or controlled, in whole or in part, by one or more public, telecommunications, or consumer-owned utilities.

"Consumer rate class" means a division of rates as provided by a utility's tariff for pricing electric service.

"Consumer sector" means a major division of consumers, i.e., residential, commercial, or industrial.

"Consumer submeter" means a kWh measuring device provided by the customer and located on line beyond the point of delivery of electrical service.

"Consumer" means any person, member of a cooperative, firm, corporation, municipality or agency, other political subdivision of the United States, or the State of Oklahoma receiving electric service of any nature from a utility. Any reference to a "customer" or "end-user" or "ratepayer" contained in a tariff, or in this Chapter, shall be deemed to mean a "consumer," unless the context clearly indicates otherwise.

"Corporate Support Services" or **"Shared Services"** means human resources, procurement services, information technology, regulatory services, administrative services, real estate services, legal services, accounting, environmental services, research and development, internal audit, community relations, corporate communications, financial services, financial planning and management support services shared between or among a utility, its parent holding company or an affiliated entity and such other services authorized by the Commission on a case-by-case basis.

"CSD" means the Consumer Services Division of the Oklahoma Corporation Commission.

"Delinquent" means a payment not received on or before the due date as posted on a utility's bill.

"Disconnection" means electric service has been discontinued by consumer request or by the utility.

"Economy energy" means electric energy that is purchased during the course of the day to take advantage of the opportunity to purchase power from unexpected surpluses on or available to the grid more cheaply than producing it oneself or purchasing power under existing contracts.

"Electric consuming facility" means anything that utilizes electric energy from a central station source.

"Electric energy" means the quantity of electric power that is generated over a specific interval of time, measured in kilowatt-hours or megawatt-hours.

"Electronic notification" means any automated communication received by e-mail, phone, text message or fax.

"Electric plant" means facilities and equipment owned or operated by a utility, including but not limited to generating stations, substations, transformers, towers, poles, conductors, transportation equipment, conduits, meters, motors, real estate, buildings, and dams.

"Electric service" means the supply of electricity, including generation, transmission, distribution and ancillary services (e.g. spinning and supplemental reserves) for ultimate consumption.

"Electricity" means electric power and energy produced, transmitted, distributed, or furnished by a utility.

"Energy" means a quantity of electricity produced over a given time, as measured in kilowatt-hours.

"FERC" means the Federal Energy Regulatory Commission.

"Filed" means to present a document and have it accepted by the Court Clerk of the Oklahoma Corporation Commission.

"Fuel procurement plan" means a plan that (1) establishes the parameters of a fuel supply portfolio for a utility and (2) strikes an appropriate balance between fuel costs and the related risks to which consumers are exposed (e.g., fuel cost increases and supply disruptions) over the term of the resource plan.

"Fuel supplies" means the coal, oil, natural gas and other fuels that generation facilities consume to produce electricity and the transportation and transmission services used to deliver those fuels.

"Generation facility" means a machine or machines capable of producing capacity, energy or other electricity products.

"Generation service" means the production of energy, capacity and other electricity products to meet customer demands for electricity.

"Generation supplier" means an entity capable of providing generation service.

"Independent power producer" means any generation supplier that is not a utility or an affiliate thereof.

"Integrated resource plan" means a utility's plan as further defined and established in Commission rules found at OAC 165:35-37 to ensure that sufficient supply- and demand-side resources are available to meet its obligation to serve and to achieve public policy objectives, including those prescribed by law, rule, or Commission order.

"Interested party" means any individual or entity with appropriate authority to act on behalf of a particular consumer or group of consumers, or any other party involved in, or affected by, the provision of electric generation service.

"kW" means kilowatts, and **"kWh"** means kilowatt-hours.

"Legal holiday" means any day declared by law or proclamation of the Governor of Oklahoma to be a legal holiday or a day on which the United States Parcel Service does not deliver mail.

"Load" means the amount of electric power delivered or required at any specific point or points on an electric transmission and distribution system.

"Local forecast" means a statement of what the weather is predicted to be, that is issued by the National Weather Service for a specific county, city, and/or zip-

code area.

"Long-term" means longer than one year.

"Major event" means a catastrophic event that exceeds the design limits of the electric power system, such as an extreme storm, tornado or earthquake, wherein there is a significant loss of service.

"Meter" means any device or devices used to measure or register electric power and energy.

"Meter shop" means a shop used for the inspection, testing, and repair of meters.

"Municipality" means an incorporated city or town in Oklahoma.

"MW" means megawatts, and **"MWh"** means megawatt-hours.

"NEC" means the National Electrical Code issued by the National Fire Protection Association.

"NWS" means the National Weather Service.

"Owner" means a public utility, telecommunications utility, or consumer-owned utility that owns or controls poles, ducts, conduits, rights-of-way, manholes, handholes, or other similar facilities.

"Planned interruption" means electric service has been suspended by the utility.

"Planning period" means the ten (10) year period that begins on the date that the utility files its integrated resource plan with the Commission.

"Pole" means any pole that carries distribution lines, telecommunications lines, and that is owned or controlled by a public utility, telecommunications company, or consumer-owned utility.

"Pole occupant" means any licensee or other entity that constructs, operates, or maintains attachments on poles or within conduits.

"Premises" means any piece of land or real estate, or any building or other structure or portion thereof, or any facility where electric service is furnished to a consumer.

"Prudence review" means a comprehensive review that examines as fair, just, and reasonable, a utility's practices, policies, and decisions regarding an investment or expense at the time the investment was made or expense was incurred; including direct or indirect maximization of its positive impacts and mitigation of adverse impact upon its ratepayers, consideration of its ultimate used and useful nature.

"PUD" means the Public Utility Division of the Oklahoma Corporation Commission.

"Purchased-power procurement plan" means a plan that establishes the parameters of a purchased-power portfolio for a utility that meets the utility's planning objectives and strikes an appropriate balance between power supply costs and the related risks to which consumers are exposed (e.g., purchased-power cost increases and power supply disruptions) over the term of the resource plan.

"Records" means documentation maintained by the utility either in electronic or paper form.

"Residence" means any dwelling unit containing kitchen appliances, permanent sewer, or septic facilities and water service. A weekend cabin and a mobile home are residences when used as such. An individual room in a hotel or motel is not a residence.

"Resources" means supply-side generating facilities including life extension and repowering projects for such facilities (and the output thereof), and non-supply side programs, including energy efficiency programs and demand

response programs.

"RFP" means "request for proposal," the document that publicly opens a competitive bidding process by describing the utility's needs and seeking bids to fulfill those needs.

"Risk management plan" means a systematic method utilized by a utility to, among other things:

(A) Identify risks inherent in procuring and obtaining a supply portfolio;

(B) Establish the means by which the utility plans to address and balance or hedge the identified risks related to cost, price volatility and reliability; and

(C) Address the fuel, purchased-power and utility supply costs implicit in the utility's supply portfolio, and also energy efficiency and demand response programs as a potential hedge against risk.

"RUS" means the Rural Utilities Service.

"Special contract" means a written agreement between a utility and a consumer providing for furnishing electric service on terms different from those prescribed in approved tariffs.

"Stakeholder" means an interested party, as defined above.

"Statistical sampling" means a method for drawing elements from a population such that all possible elements in the population have a known and specified probability of being drawn and such that the set of chosen elements has approximately the same distribution of characteristics as the population from which it was drawn.

"Subdivision" means any land, wherever located, whether improved or unimproved, contiguous or not, which is divided into lots or proposed to be divided for the purpose of disposition pursuant to a common promotional scheme or plan of advertising for disposition.

"Submit" means to present a document to the Director of the Public Utility Division.

"Subsidize" means to furnish financial support by the utility to the affiliate.

"Support equipment" means guy wires, anchors, anchor rods, and other accessories of the pole owner used to support the structural integrity of the pole.

"Tariff" includes every rate schedule, or provision thereof, and all terms, conditions, rules, and regulations for furnishing electric service.

"Unplanned or emergency interruption" means service has been suspended due to circumstances beyond the control of the utility.

"Utility" means any person, firm, partnership, or corporation furnishing electric service to the public in Oklahoma and subject to the regulatory jurisdiction of the Commission.

[Source: Amended at 10 Ok Reg 3561, eff 7-12-93; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 21 Ok Reg 2085, eff 7-1-04; Amended at 23 Ok Reg 699, eff 2-17-06 (emergency); Amended at 23 Ok Reg 1666, eff 7-1-06; Amended at 25 Ok Reg 1566, eff 7-1-08; Amended at 26 Ok Reg 1849, eff 6-25-09; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-1-3. Application of rules

(a) This Chapter shall apply to the operations of any electric utility operating within the State of Oklahoma under the jurisdiction of the Commission.

(b) This Chapter is intended to define good business practice under normal conditions, to ensure adequate service and prevent unfair charges to the public, and to protect the utilities from unreasonable demands.

- (c) In any case where a controversy arises in connection with the interpretation of any provisions of this Chapter or the applicability thereof, the Commission will make such orders as it may deem appropriate upon application of any interested party and after notice and hearing.
- (d) A utility may decline initial service to a consumer until service may be rendered in compliance with this Chapter and applicable municipal ordinances and regulations.
- (e) A utility may prescribe rules and regulations for furnishing service not inconsistent with this Chapter. No such rules shall be valid until filed with and approved by the Commission. A utility may refuse or discontinue service for noncompliance with its service rules only in cases where its approved rules specifically so provide.
- (f) Whenever compliance with any provision or requirement of this Chapter would be unduly burdensome, or cause an unreasonable hardship or an excessive expense, or result in an unusual difficulty, or for other good cause shown the Commission may, upon application of the utility or the consumer and after notice and hearing, suspend or excuse compliance therewith or make such other requirements as it shall deem appropriate. For good cause shown, the Commission may grant temporary relief pending the hearing. If, after the effective date of this Chapter, a utility seeks an exception or variance from this Chapter in its tariffs or terms and conditions of service, such exception or variance shall be clearly shown on such tariffs or terms and conditions of service, sufficient to plainly bring to the Commission's attention to the exact nature of the said exception or variance. Any exception or variance not so marked or identified in such tariff or terms and conditions of service shall be superseded by this Chapter to the extent that said exception or variance is in conflict therewith. Upon approval by the Commission, the variance should indicate the number of the authoritative Commission order.
- (g) The adoption of this Chapter shall in no way preclude the Commission from altering or amending this Chapter in whole or in part after notice and hearing, or from allowing or requiring additional or different service, equipment, facility, or standards than prescribed by this Chapter, either upon complaint or application or upon its own motion. Nothing provided in this Chapter shall relieve any utility from any duty prescribed by the laws of the State of Oklahoma.
- (h) A utility shall not be required to take any action to ensure that a consumer follows or takes any action in compliance with any Commission rule or regulation concerning submetering activities, and no utility shall in any way be deemed to be responsible for any failure by a consumer or third party to follow or take actions in compliance with such Commission rules and regulations.
- (i) The utility shall be subject to a fine per day per occurrence for any violation of this Chapter. The fine shall be determined pursuant to 17 O.S. § 1, after notice and hearing.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-1-4. Location and retention of records

- (a) **Record retention.** Unless otherwise specified herein, all records required by this Chapter shall be preserved by the utility in the form and for a period of time not less than that specified by applicable rules of FERC or the RUS; or in absence thereof, for two (2) years.
- (b) **Record location.** All records required by this Chapter shall be made available for review in Oklahoma at the office or offices of the utility and shall be open for

examination by the Commission or its representatives; provided that if the general office of the utility is located outside of Oklahoma, the records may be kept at the general office. Each utility shall maintain records in such detail that the cost of property located and business done in the State of Oklahoma, including cost of fuel for generation purposes, can be accurately and readily ascertained, and the utility shall make available any such records for examination by the Commission or its authorized representative. Each utility shall notify the Commission as to the location of the office or offices at which the various classes of records are kept and shall file with the Commission such reports as the Commission may from time to time require.

(c) **Submetering records.** In the event of the use of company submetering, all submetering records shall be retained for a period of two (2) years and shall be available for inspection by the Commission, the affected consumer and/or duly interested party at a location accessible to the consumer affected by submeters.

(d) **Contact persons.** Each utility shall notify in writing, the PUD Director within thirty (30) days of a change in the company-designated contacts for PUD and CSD issues.

(1) The update shall include the name(s), physical street address(es), electronic mail addresses and telephone number(s) of the designated individual(s), and shall be furnished applicable to each operating district, town or any segment of the utility so that PUD will be able to reach the responsible person at any time. If this information is unavailable, the utility may seek a waiver from the PUD Director by making the request in writing.

(2) The contact name(s) provided pursuant to this subsection shall be the individual(s) primarily responsible for:

- (A) Providing customer service;
- (B) Repair and maintenance;
- (C) Answering complaints;
- (D) Authorizing and/or furnishing refunds to customers;
- (E) Tariff issues;
- (F) Regulatory matters;
- (G) PUD Fee Assessment (and Fee Assessment Payments, if different);
- (H) Primary emergency;
- (I) After hours emergency;
- (J) Annual reporting;
- (K) Attorney for regulatory matters;
- (L) Community liaison; and
- (M) Engineering operations, meter tests and repairs.

(e) **Other information.** Each utility shall promptly furnish such other information as PUD or the Commission may request, unless otherwise ordered by the Commission.

[Source: Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-1-5. Sale or disposal of jurisdictional facilities by utility

(a) Except upon order of the Commission made upon application, notice and hearing, no utility shall discontinue or abandon any segment of its jurisdictional distribution system or sell, transfer, or dispose to another any portion of its jurisdictional plant or property then constituting an integrated operating system, or major fractional part thereof, unless the following criteria are satisfied:

(1) The Commission shall determine the functional division of utility property. If the function of the property intended to be sold by a utility will remain a utility function after the sale as determined by the Commission, the Commission retains jurisdiction;

(2) Unless otherwise ordered by the Commission, after notice and hearing, no property shall be sold which may have a detrimental impact on rates or service levels of customers, shippers or producers;

(3) This Section shall not apply to discontinuance of service pursuant to OAC 165:35-21, nor to routine retirement or replacement of plant or equipment; and

(4) Any portion of a utility's plant or operating system which has previously been included in the rate base of such utility will remain as part of such utility's jurisdictional plant or operating system, unless otherwise ordered by the Commission

(b) When filing an application for the sale or transfer of ownership of a portion of its jurisdictional plant or operating system, the seller/transferor shall provide to the buyer or transferee all documents, from the previous two (2) calendar years, required by the Commission to be maintained, and customer deposit records required to be maintained pursuant to OAC 165:35-19-1.

(c) The buyer/transferee shall be required to maintain the records set forth in this Section for a period of two (2) years from the time of the date of the sale or transfer.

(d) Prior to approval of the sale or transfer, the seller/transferor shall be required to have all annual reports, monthly fuel filings and monthly reports current.

(e) The application for sale or transfer shall indicate whether the utility has any outstanding fines from the Commission, whether the utility has any outstanding Public Utility fee assessment, or whether the utility has any outstanding deficiencies which have been identified by PUD or CSD.

(f) This Subchapter shall not prohibit sale or exchange of individual items of equipment not affecting the service or area of service.

[Source: Added at 16 Ok Reg 2237, eff 7-1-99; Amended at 21 Ok Reg 2091, eff 7-1-04; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-1-6. Submission of distribution system mapping [REVOKED]

[Source: Added at 33 Ok Reg 645, eff 8-25-16; Revoked at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 3. [RESERVED]

SUBCHAPTER 5. RATE, TARIFF, MAP SUBMISSION REQUIREMENTS, AND SUBMISSION OF SYSTEM MAPPING

165:35-5-1. Filing of rate schedules, contracts, agreements, and rules

(a) It shall be unlawful for a utility to furnish, charge for, or receive payment for electric service, except strictly in accordance with a tariff, special contract, or rate schedule approved by and on file with the Commission.

(b) No jurisdictional tariff or rate schedule shall be instituted, added, deleted, changed, closed, or discontinued except pursuant to order of the Commission upon application, and after such notice and hearing as may be ordered by the Commission.

(c) Annual tariff submissions submitted for review and approval by the PUD Director, pursuant to prior Commission order, may be accepted or rejected. If there

is a dispute and resolution is not accomplished, the tariff shall be subject to refund as of the date of notice of filing of a cause before the Commission to resolve the dispute.

(d) A special contract or agreement other than a filed tariff under which electric service is furnished to a consumer shall be deemed a tariff for the purpose for which approved and for purposes of this Chapter. No special contract for electric service shall become effective until it has been filed with and approved by order of the Commission, after notice and hearing when directed by the Commission.

(e) The utility shall maintain the following in each business office or furnish to a member of the public on request:

(1) A copy of every tariff and rate schedule under which electric service is being furnished to consumers within the area serviced by that business office.

(2) A copy of the approved rules and regulations of the utility which govern the furnishing of electric service.

(3) A copy of this Chapter and all amendments thereto.

(f) An agency for collection of utility bills, not operated by utility employees, shall not be deemed a local office for purposes of this Section.

(g) A utility shall submit to PUD a copy of the following:

(1) Every franchise, contract, irrevocable permit, or similar agreement between a utility and a municipality.

(2) Each contract for the wholesale purchase of power or energy.

(3) Every electric power exchange agreement.

(4) Each rate schedule and contract approved by the FERC or the RUS applicable to purchases or sales of power and energy by the utility in Oklahoma.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-5-2. Map Submission Requirements and Submission of System

Mapping

(a) Each utility shall provide upon request within ten (10) business days to the Commission suitable, detailed maps, a size and media as agreed by the utility and the PUD Director, of its general system and shall maintain suitable, detailed maps of its entire system, which shall be made available to the Commission on request. The general system maps may be provided by sections or counties where necessary to meet the size requirements. Such maps shall be brought up to date annually, not later than ninety (90) days after the end of the utility's fiscal year. Electronic submission is preferred; however, all forms of submission will be accepted.

(b) No later than one (1) year after the effective date of this rule, each utility having a distribution system within the State of Oklahoma shall endeavor to provide the locations of the distribution lines within the utility's service territory, including all lines extending more than one mile outside of the utility's service territory, to the PUD Director using geographic information system data or standards as prescribed by the PUD Director. Electronic submission is preferred; however, all forms of submission will be accepted.

(c) For purposes of this subsection, transmission facilities shall be excluded from mapping submissions. Transmission facility maps shall be retained at the utility, and shall be made available onsite upon request by PUD, subject to other regulatory requirements.

(d) The Commission finds, pursuant to Article IX, Section 18 of the Oklahoma Constitution, and 51 O.S. § 24A.22, that all general system maps that are not otherwise publicly available are hereby classified as confidential. All documents and information considered to be confidential must be clearly marked as such. All information classified as confidential shall be used by PUD, an ALJ, any party to filed cause pending before the Commission, and the Commission solely in connection with the review and disposition of all matters relating to this Section. PUD, the ALJ, the Commission and all other parties that receive or review information deemed confidential herein shall keep all such information confidential.

[Source: Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-5-3. Streamlined approval process

- (a) A streamlined approval process shall be available for Commission review of minor changes to the utility's Commission-approved tariffs for optional or non-basic services, for new optional or nonbasic services, and/or minor terms and conditions of service.
- (b) The streamlined approval process will not be available for a general rate change pursuant to OAC 165:70-1-2.
- (c) The projected impact on annual revenues caused by the requested tariff change, when combined with the actual revenues received from other tariff changes obtained under this streamlined approval process within the previous twelve months, shall not exceed one percent of the utility's jurisdictional annual gross operating revenue.

[Source: Added at 13 Ok Reg 2433, eff 7-1-96]

165:35-5-4. Applications for streamlined approval

- (a) The utility seeking approval of an application under the streamlined process shall file an application with the Commission's Court Clerk stating the name of the applicant, the specific change or changes requested, and the anticipated annual revenue effect.
- (b) When the utility files an application for approval under the streamlined process, it shall submit to PUD a complete streamlined application package which conforms to the requirements set forth in this Subchapter. The streamlined application package shall contain a statement by the applicant that the package is in compliance with the filing requirements for streamlined application packages.
- (c) Streamlined application packages shall contain at a minimum the following:
- (1) Evidence that the application meets the requirements contained at OAC 165:35-5-3.
 - (2) Annual impact of such change or new service on the utility's customers, in aggregate and on a per customer basis for each customer class.
 - (3) Documentation and schedules that quantify the annual revenue change anticipated, and the cost of providing the new service, when applicable.
 - (4) Evidence that the change or new service is not unjustly discriminatory.
 - (5) Evidence that good cause exists for the approval of the change or new service.
 - (6) A list of all Commission orders applicable to the applicant issued within the twelve month period prior to filing pursuant to this streamlined procedure.
 - (7) The amount per month of both projected and actual revenues or reductions derived from the applications approved relating to the orders

identified within the filing package within the twelve month period prior to filing.

(8) A statement containing the utility's jurisdictional gross operating revenues for the twelve month period immediately preceding the filing.

[Source: Added at 13 Ok Reg 2433, eff 7-1-96; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-5-5. Response to application for streamlined approval and subsequent pleading

(a) The tariff and/or terms and conditions of service will be effective pursuant to Commission order. If an objection to the streamlined application is filed within thirty (30) calendar days of the original filing, the Commission may set the matter for hearing and shall issue an order approving, denying or modifying the application within sixty (60) calendar days of the date the application was filed, unless otherwise ordered by the Commission.

(b) If an objection is not filed, the Commission shall issue an order approving, denying or modifying the application within forty-five (45) calendar days of the date the application was filed, unless otherwise ordered by the Commission.

(c) Applicant shall respond to data requests for additional data or information within five (5) business days of receiving the request.

[Source: Added at 13 Ok Reg 2433, eff 7-1-96; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-5-6. Streamlined approval - notice and intervention

(a) The applicant shall provide notice of the application for streamlined approval, which shall include notice to the Office of the Attorney General of the State of Oklahoma.

(b) If the application proposes a service or tariff that alters the current rate or offers a new rate for customers, the applicant shall provide notice of the application by publication for two (2) weeks. The first publication shall be no later than fifteen (15) calendar days after the Commission approves the notice. Publication shall be in a newspaper of general circulation published in each county in which are located utility customers affected thereby, unless the Commission orders otherwise.

[Source: Added at 13 Ok Reg 2433, eff 7-1-96; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-5-7. Effect of streamlined approval on subsequent proceedings

Any addition, deletion, or amendment to a tariff or term and condition of service, obtained through the streamlined process shall not preclude an examination of the impact of the change upon the utility's revenue requirement or operations in subsequent proceedings.

[Source: Added at 13 Ok Reg 2433, eff 7-1-96]

SUBCHAPTER 7. PROMOTIONAL POLICIES AND PRACTICES

165:35-7-1. Provisions governing promotional policies and practices

The promotional policies and practices of each utility shall be governed by 17 O.S. Supp. (1981), §180.1 et seq., and future amendments or supplements thereto.

[Source: Amended at 16 Ok Reg 2237, eff 7-1-99]

165:35-7-2. Promotional practices prohibited [REVOKED]

[Source: Revoked at 16 Ok Reg 2237, eff 7-1-99]

165:35-7-3. Promotional practices permitted [REVOKED]

[Source: Revoked at 16 Ok Reg 2237, eff 7-1-99]

165:35-7-4. Advertising expenditures prohibited [REVOKED]

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Revoked at 16 Ok Reg 2237, eff 7-1-99]

165:35-7-5. Advertising expenditures permitted [REVOKED]

[Source: Revoked at 16 Ok Reg 2237, eff 7-1-99]

165:35-7-6. Contributions [REVOKED]

[Source: Revoked at 16 Ok Reg 2237, eff 7-1-99]

165:35-7-7. Submission of promotional practices

The utility shall submit an annual submission of current promotional practices by May 1, and as programs are updated, to PUD. The report shall include a list and description of all promotional practices and activities. Although submission by the utility shall not assume approval by PUD, it will allow PUD and the utility to review and dialogue as to the appropriateness of the promotional practices, whether or not the expenses should be recovered through rates, and ensure that the promotional practices are provided on a nondiscriminatory basis.

165:35-7-8. Exceptions; prior conditions and rules [REVOKED]

[Source: Revoked at 16 Ok Reg 2237, eff 7-1-99]

SUBCHAPTER 9. EXTENT OF SERVICE

165:35-9-1. Extent of service

(a) **Point of delivery.** The point of delivery of electrical service shall be the point at which the electrical supply system of the utility connects to the wiring system of the consumer.

(b) **Service at primary distribution voltage.** When the consumer accepts service at primary distribution voltage, the delivery point shall be at or near the property line or point of transformation.

(c) **Service at secondary voltage.**

(1) For overhead construction, the point of delivery is that point where the utility's overhead service drop connects to the consumer's service entrance conductors.

(2) For underground construction, the point of delivery is that point where the utility's service lateral connects to the consumer's service entrance conductors.

(d) **Installation and maintenance responsibility.**

(1) A utility shall furnish and install all transformation and/or conductors of proper voltage and adequate capacity and be responsible for maintenance of all electrical wiring and equipment up to the point of delivery for every bona fide applicant for service who has complied with this Chapter and the provisions of the utility's terms and conditions of service as approved by the

Commission. Unless specifically designated in their terms and conditions to the contrary, a utility shall provide its standard size connectors and connect the consumer's service entrance conductors at the point of delivery.

(2) All standard metering equipment stocked by the utility shall be furnished and maintained by the utility. Meters shall be furnished, installed, and maintained by the utility. All meter bases, enclosures, and other associated equipment furnished by the utility shall be maintained by the utility and remain its property. Required installation of this equipment by the consumer shall be in compliance with this subsection. A consumer may locate submetering equipment beyond the point of delivery of electrical service and such equipment shall conform to the NEC.

(3) Subject to OAC 165:35-17-3, all electrical wiring and equipment including meter bases, enclosures, and other associated equipment furnished by the utility, except for the meter furnished by the utility, installed on the consumer's side of the point of delivery shall be at the consumer's expense and shall be installed and maintained by the consumer in accordance with the NEC. In the event of conflict between the NEC and an applicable municipal code, the latter shall prevail. The utility has no duty to conduct inspections of electric wiring and equipment except for such wiring and equipment which is installed, owned, or controlled by the utility.

(e) **Metering equipment at a point other than the point of delivery.** A utility may locate metering equipment at a point other than the point of delivery of electrical service. In such cases where the metering equipment is located on the consumer's side of the point of delivery, the utility may establish requirements for conductors and equipment to provide proper operation, accessibility and security.

(f) **Proper location of the point of delivery.** Either before, or during construction of the consumer's facility, the utility shall, upon request, and without charge, advise the consumer as to the proper location of the point of delivery. Whenever the consumer and the utility are unable to agree upon the point of delivery and equipment to be installed, the utility shall advise the consumer of the Commission's regulatory ability to resolve the dispute. The Commission, upon application of either, shall make a determination as to the appropriate location.

(g) **Permanent discontinuance of delivery of electric service.** When the utility permanently discontinues delivery of electric service to any consumer's premises, the utility shall have the right at any reasonable time thereafter, to enter upon the premises and remove its meter and any other property the utility has located there.

[Source: Amended at 11 Ok Reg 3745, eff 7-11-94; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 11. ALLOCATION OF TERRITORIES/CONSUMERS; CHANGES IN SERVICE/SUPPLIER

165:35-11-1. Allocating territories and/or consumers between utilities

An agreement between utilities for the purpose of allocating territories or consumers shall be valid only if it is entered into by the utilities and approved by the Commission in accordance with the following provisions which provide *"Notwithstanding the effectuation of certified territories established by or pursuant to this act, and the exclusive right to service within such territory, a retail electric supplier may contract with another retail electric supplier for the purpose of allocating territories and consumer between such retail electric suppliers and designating which territories and consumers are to be served by which of said*

retail electric suppliers. Notwithstanding any other provisions of law, a contract between retail electric suppliers as herein provided when approved by the Commission shall be valid and enforceable. The Commission shall approve such contract if it finds that the contract will promote the purposes of (Section 158.23 of this title) and will provide adequate and reasonable service to all areas and consumers affected thereby." [17 O.S. 1981, Section 158.26]

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-11-2. Change of service

If a change in service to a consumer is required for the convenience or benefit of the utility, the utility shall pay such part of the cost associated with electric change out as determined by mutual agreement or by the Commission in absence of such agreement.

[Source: Amended at 16 Ok Reg 2237, eff 7-1-99]

165:35-11-3. Changing retail suppliers in incorporated areas [REVOKED]

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 10 Ok Reg 3561, eff 7-12-93; Amended at 14 Ok Reg 2558, eff 7-1-97; Revoked at 16 Ok Reg 2237, eff 7-1-99]

165:35-11-4. New large load equal to or greater than 1,000 kW notice

Any retail electric supplier, not excluded by 17 O.S. § 158.28 of the Retail Electric Supplier Certified Territory Act, that intends to provide retail electric service to a new electric-consuming facility within the certified territory of another retail electric service provider shall notify that incumbent retail electric service provider and PUD, either in writing or by electronic mail, after a bid has been selected, and no less than three (3) business days prior to implementation of service. This notice shall provide information including but not limited to the following:

- (1) A description of the anticipated location of the new electric-consuming facility, and the identification of the certified territory retail electric service provider.
- (2) A general description of the size of the load to be added.
- (3) Identification of the tariff, on file with PUD, under which the retail electric supplier intends to serve the electric-consuming facility.

[Source: Added at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 13. DISPOSITION OF ELECTRIC ENERGY

165:35-13-1. Resale of electricity

(a) Except as set forth in subsection (b) below, no utility shall knowingly furnish electricity under a retail tariff for purposes of resale, except pursuant to a tariff or special contract approved by and on file with the Commission.

(b) If it comes to the attention of the utility that any consumer is reselling electricity, it shall notify the PUD Director of the name and address of any consumer reselling electricity. Unless otherwise directed, the utility may continue to provide electric service pending review by the PUD Director.

(c) Sales of charging services from an electric vehicle charging station, not owned by a regulated utility, for the purpose of fueling an electric vehicle, including the ability to sell on a kWh basis, shall not be considered resale of retail electricity, and such sales from the electric vehicle charging station shall not be subject to rate

regulation by the Commission. Utility service to an electric vehicle charging station shall be provided subject to the utility's terms and conditions.

[Source: Amended at 22 Ok Reg 1799, eff 7-1-05; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-13-2. Resale of power or energy

No utility shall knowingly sell power or energy to any consumer for resale under Commission jurisdiction pursuant to a tariff providing for resale unless the Commission has been advised fifteen (15) calendar days prior to commencement of deliveries. No such sale shall be made unless the purchaser from the utility has tariffs on file with and approved by the Commission, rate schedules, rules, and regulations covering such resale, or is exempt by law from such requirements.

[Source: Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-13-3. Rented single, residence units

Where four (4) or fewer rooms within a residence are rented to the public for residence purposes only, by one owning or occupying the residence and where a single meter is installed, a single application of the residential rate shall apply to the entire service.

165:35-13-4. Point(s) of delivery

In serving a consumer, regardless of classification, the utility shall regard each point of delivery as a separate consumer or contract and shall separately meter and charge accordingly, and shall not combine meter readings for the purpose of giving the consumer a lower rate unless the approved tariffs of the utility provide otherwise. More than one point of delivery to a single consumer at one premise or location will be permitted when the physical or electrical characteristics of the facilities served require more than one point of delivery according to good engineering and operating practices, in which case total usage at multiple points of delivery shall be combined for billing purposes.

165:35-13-5. Meter service measurement

All electric service rendered by a utility shall be on the basis of meter measurement, except for installations where the load is constant and the consumption may be readily computed, or as provided for in its filed rate schedules, or as otherwise authorized by the Commission.

165:35-13-6. Records and reports of measurement of input and output

(a) Each utility shall keep a record of the input and output of its system in kilowatt-hours per month.

(b) The totals of input and output measurements shall be reported each month to PUD on its Forms E.D. and E.T., "Comparative Monthly Report of Revenues and Expenses." A copy of RUS Form 7 may be filed in lieu thereof.

[Source: Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-13-7. Multiple residence units

(a) The basic statewide standard for service to multiple residences, apartment complexes, or similar residential units shall be individual metering, one (1) meter per residence with billing under the applicable residential rate schedule.

(b) Exceptions to the standard for service to multiple residences set forth in (a) of this Section may be granted by the Commission with respect to new and future multiple residence units. A utility or the owner of such a multiple residence unit may submit an application seeking authorization to furnish service at one or more points of delivery. The Commission shall grant such authority if it determines that providing service in the manner requested will encourage:

- (1) Conservation of energy.
- (2) The efficient use of facilities and resources by the utility providing such service.
- (3) Equitable rates to the consumers of such service.

(c) Except as provided in this Chapter, no consumer shall separately meter and separately bill another consumer for electricity. A landlord or innkeeper may include the cost of electricity in rent.

(d) Multiple residences, apartment complexes, or similar residential units being served under and with a single or multiple meters and at a commercial rate schedule may be continued without block billing or, at the option of the consumer, may revert to and have service by individual meters at the applicable residential rate.

(e) As an alternative to (a), (b), (c), and (d) of this Section, residences, apartment complexes, or similar residential units and multicommercial unit complexes may be or may continue to be served with a single utility meter and consumer submeter system, if such measuring of electrical service is deemed to:

- (1) Encourage conservation of energy.
- (2) Contribute to the efficient use of facilities and resources of electric utilities.
- (3) Results in equitable rates to the electrical consumers affected by such meters. Application for utilization of such electric utility meters and consumer submeters referred to in (e) of this Section may be made by a letter jointly submitted by both the affected utility and consumer of electric service to the PUD Director, requesting administrative approval by the Commission. In the event the PUD Director shall deny such a joint letter application or in the event such a joint letter application is not presented, either the affected utility or the consumer shall have the right to file a formal application with notice for hearing before the Commission seeking such approval. The applicable rate for such service shall be the applicable utility commercial rate without block billing or similar type billing.

[Source: Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 15. METER REQUIREMENTS

PART 1. INSTALLATION, READING, AND RECORDS

165:35-15-1. Meters

(a) Except as provided in OAC 165:35-13-5, each utility shall provide and install at its own expense and shall continue to own, maintain, and operate proper and sufficient equipment for the accurate measurement of electricity delivered to each consumer.

(b) Where additional meters are furnished by the utility for the convenience of the consumer, a charge for such meters may be made in accordance with a tariff filed with and approved by the Commission.

(c) No meter shall be installed which is known to be defective, or to have incorrect constants or which has not been tested and adjusted, if necessary, in accordance with this Chapter. The meter shall be consistent with the electric requirements of the consumer.

[Source: Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-15-2. Meter reading, meter reading records, cards, and charts

(a) **Meter reading records.** The meter reading records shall show:

- (1) Consumer's name, address, and rate schedule symbol.
- (2) Identifying number or description of the meter.
- (3) Meter readings and dates thereof.
- (4) If the reading has been estimated.
- (5) Any applicable multiplier or constant.

(b) **Meter charts.** All charts taken from recording meters shall be marked with the date of record, the meter number, consumer's name and location, and the chart multiplier.

(c) **Meter constants or multipliers.** Each service meter shall clearly indicate the reading from which the charge is made to the consumer. In any case where the dial reading of a meter must be multiplied by a constant to obtain the units consumed, the proper constant to be applied shall be clearly marked on the face or dial of the meter.

(d) **Meter reading information.** Each service meter shall be read by the utility, or a utility may by its rules prescribe a procedure for reading of meters by consumers.

(1) **Meters read by the utility.** For each utility that regularly reads its own meters, each service meter shall be read at monthly intervals at least ten (10) times a year, weather permitting, on approximately the same day of each meter reading period. The utility may, if specified and approved in its tariffs, delegate the reading of the meter to the consumer; however, the reading must be verified by the utility every six (6) months. Whenever it is not possible, with reasonable diligence, to read a meter for a billing period, the utility may submit an estimated bill based upon previous usage and other available information, the amount of such estimated bill to be adjusted as necessary when the next actual meter reading is obtained. No more than two (2) consecutive estimated bills shall be rendered without the utility reading the meter. If it is necessary for the utility to estimate more than two (2) bills per year due to the actions of the consumer regarding meter accessibility, and where the inaccessibility is beyond the control of the utility, it will be permissible for the utility to submit an estimated bill based on consumer reading or past service records. The amount of such estimated bill will be adjusted as necessary when the next actual reading is obtained.

(2) **Meters read by the consumer.** For each utility whose normal procedure is to have its consumers regularly read their own meters, the procedure for meter reading by the consumer shall provide for meter reading at approximately monthly intervals or annually, if an annual rate applies. The utility shall verify such readings not less than once every six (6) months. When the consumer fails to furnish meter readings, the utility may submit an estimated bill based on the consumer's previous usage and other available information, the amount of such estimated bill to be adjusted, as necessary, when the next actual reading is obtained. No more than two (2) consecutive estimated bills shall be rendered without the utility

reading the meter. When by reason of a consumer's failure to furnish meter reading, the utility reads the meter, it may charge the service fee for reading the meter prescribed in its approved tariffs.

(3) **Access to meters and other property.** The utility shall at all reasonable times have access to meters, service connections, and other property owned by it on a consumer's premises. Refusal on the part of the consumer to provide reasonable access for the above purposes shall be deemed to be sufficient cause for discontinuance of service on the part of the utility, after at least ten (10) calendar days written notice. In the event the consumer is a tenant, the utility should attempt to notify the property owner of the access violation and pending disconnection of service. Service will be reconnected after a method of permanent access on the meter reading date is agreed upon by the customer consumer and utility. If the consumer and/or property owner does not correct unsafe conditions or obstructions, including aggressive animals, the utility may relocate the meter to a safe and accessible location at the expense of the consumer and/or property owner. The utility shall provide its employees with a means of identification to claim the right of access.

(4) **Special meter reading request.** Whenever a special meter reading is required following a request by a consumer, the utility shall not make a charge for the special meter reading, whether or not its applicable tariff authorizes a charge for a special meter reading, unless the consumer has requested and received special meter reading within the previous twelve (12) month period.

(e) **Consumer submeter record information.** Consumer submeter records shall contain the information set forth in (a) and (c) of this Section and such meters shall be read within three (3) business days of the applicable utility meter being read by the utility.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 22 Ok Reg 1799, eff 7-1-05; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

PART 3. METER LOCATION, TESTING, AND OPERATION

165:35-15-10. Location of meters

(a) Outdoor meters.

(1) Where a meter is installed outdoors, it shall be placed on the exterior of a building or on a support or pole in a location readily accessible to authorized utility representatives for meter reading, testing and maintenance; and shall not be subject to severe vibration, dust, vapors or corrosive liquids. The meter shall be the temperature compensating type.

(2) A meter shall not be placed in a location where it may be accidentally damaged or at a location on a building where it will cause inconvenience, either to the consumer or the utility's representative.

(3) An outdoor meter, except for unusual circumstances, shall not be more than five and one-half feet (5 ½') or less than two and one-half (2½') feet above ground level, measured from the center of the meter cover.

(b) Indoor meters.

(1) No residential meter shall be installed inside a residence after the effective date of this Chapter unless agreed upon by the utility and the consumer.

(2) Where a meter is installed indoors, it shall be located where it will be readily accessible to authorized utility representatives for meter reading, testing, and maintenance and shall not be subject to severe vibration or excessive dampness.

(3) A meter shall not be located in a hazardous location nor in a location where accessibility is difficult. A meter shall not be placed in any location where the visits of the meter reader will cause inconvenience either to the consumer or the utility.

(4) An indoor meter shall not be more than five and one-half feet (5½') or less than two and one-half (2½') feet above floor level, measured from the center of the meter cover.

(c) **Relocation of meters.** A utility may, at its option and at its expense, relocate any meter, except that in case of a relocation which is made necessary due to inaccessibility or hazardous location caused by the consumer, dangerous conditions, including aggressive animals, or to prevent a recurrence of discovered tampering or unauthorized diversion of service, the utility may, at the consumer's expense, relocate the meter loop and service entrance facilities to a location agreeable to the utility and consumer; and if no location can be agreed upon, the Commission will designate the location upon request by either party.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-15-11. Meter testing facilities and equipment

(a) **General.** Each utility furnishing metered electric service shall own or arrange for equipment and facilities and follow test procedures necessary for testing its meters to limits of accuracy specified in this Chapter. The equipment facilities and procedures shall be available for inspection by PUD or its authorized representative. A utility may contract for testing of its meters by another utility or by a non-utility concern performing meter testing service.

(b) **Test standards.**

(1) Each utility furnishing metered electric service shall provide for and have available portable indicating electrical testing instruments or watt-hour meters of suitable range and type for testing service watt-hour meters, demand meters, switchboard instruments, recording voltmeters, and other electrical instruments.

(2) For testing the accuracy of portable watt-hour meters, commonly called "rotating standards", and other portable instruments used for testing service meters, each utility shall provide for and have available as reference or check standards suitable indicating electrical instruments, watt-hour meters, watt meters, or any or all of them, hereinafter called reference standards. Service type of watt-hour meters may be used as a check standard, but if so, such watt-hour meters shall be permanently mounted in a meter testing facility and shall be used for no purpose other than for checking working rotating standards.

(c) **Reference standards.** Reference standards shall be submitted at least once each year to the National Bureau of Standards or to a laboratory approved by the Commission for the purpose of test, adjustment, and certification. Utilities maintaining standardizing laboratories will be permitted to make their own test and certifications of reference standards, provided the instruments and methods in use are acceptable to the Commission.

(d) **Portable test standards.** All working rotating standards (portable watt-hour meters) shall be compared with the reference standards at least once every three (3)

months, and solid-state watt-hour standards every six (6) months, during the time such working standards are being regularly used. Each rotating standard (portable watt-hour meter) shall at all times be accompanied by a calibrating card, giving the date when it was last calibrated and adjusted. Records of calibration shall be kept on file in the office of the utility, for the life of the instrument.

[Source: Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-15-12. Accuracy requirements for service watt-hour meters

(a) **General.** No meter shall be placed in service, or allowed to remain in service, which has an incorrect register multiplier, watt-hour constant, gear ratio, or dial train; or which is mechanically or electrically defective, incorrectly connected, installed, or applied; or which registers outside the limits specified in (c) of this Section. All tolerances in this Chapter are to be interpreted as maximum permissible variations from conditions of zero error. No meter or associated device shall be adjusted to be in error, even within the tolerances permitted by this Chapter.

(b) **Test loads.** For self-contained meters, the heavy load test current shall be approximately one hundred percent (100%) of the meter test amperes (TA), and the light load test current shall be approximately ten percent (10%) of the meter test amperes (TA). For meters used with current transformers, the current at heavy load shall be approximately one hundred percent (100%) of either the meter test amperes (TA) or the secondary rating of the current transformer, and at light load approximately ten percent (10%) of that rating.

(c) **Accuracy limits.**

(1) **Acceptable performance.** The performance of a watt-hour meter is considered to be acceptable when the average percentage registration is not more than one hundred and two percent (102%), nor less than ninety-eight percent (98%), calculated in accordance with one of the methods described in (d) of this Section.

(2) **Adjustment limits.** When the test of a watt-hour meter indicates that the error in registration exceeds one percent (1%) at either light load or heavy load at unity power factor, or exceeds two percent (2%) at heavy load at approximately 0.5 power factor lag, the percentage registration of the meter shall be adjusted to within these limits of error, as closely as practicable to the condition of zero error. Where instrument transformers are used in conjunction with the meter, these limits apply to the meter equipment as a whole. All meters which are tested shall be left without creep.

(3) **Creeping.** No watt-hour meter which creeps shall be placed in service or allowed to remain in service. A meter creeps if, with load wires removed and with test voltage applied to the voltage circuits, the rotor moves continuously. For the practical recognition of creep in a meter in service, it is considered to creep when, with all load wires disconnected, the rotor makes one (1) revolution in ten (10) minutes or less.

(d) **Percentage registration.**

(1) **Method 1.** Weighted average percentage registration is the weighted average of the percentage registration at light load (LL) and at heavy load (HL) registration a weight of four (4). By this method: Weighted Average Percentage Registration = $(LL + 4HL) \div 5$.

(2) **Method 2.** Average percentage registration is the average of the percentage registration at light load (LL) and at heavy load (HL). By this

method: Average Percentage Registration = $(LL + HL) \div 2$.

(e) **Compliance with ANSI.** The consumer who utilizes a consumer submeter or consumer submeters shall not place in service such meters unless said consumer submeters comply with the current version of ANSIC12 Standard, or equivalent ANSI standard as later amended.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 16 Ok Reg 2237, eff 7-1-99]

165:35-15-13. Accuracy requirements for demand meters

(a) **Acceptable performance.** The performance of a demand meter or register shall be acceptable when the error in registration does not exceed four percent (4%) in terms of full scale value when tested at any point between twenty-five percent (25%) and one hundred percent (100%) of full scale value.

(b) **Adjustment limits.**

(1) When a demand meter or register indicates that the error in registration exceeds \pm four percent (4%) in terms of full scale value, the demand meter or register shall be adjusted to within \pm two percent (2%) full scale value.

(2) The timing element when used to keep a record of time of day at which the demand occurs, shall be adjusted to a condition of as near zero error as practicable when it is found to be in error by more than \pm 0.25 percent.

165:35-15-14. Place and methods for testing metering equipment

(a) **Testing in place.** Tests on watt-hour and demand meters in service may be made either on the consumer's premises or in an approved meter testing facility.

(b) **Instrument transformers.**

(1) **Preinstallation tests.** Prior to installation, all new instrument transformers shall be tested for voltage withstand, ratio correction factor, and phase angle in an approved laboratory, meter shop, or by the manufacturer.

(2) **Transformers removed from service.** All instrument transformers removed from service, unless damaged, shall be tested for ratio correction factor and phase angle prior to reinstallation.

(3) **In-service tests.** When metering installations are tested on periodic schedules, the instrument transformers associated with the installation shall be inspected for correctness of connections and evidence of any damage. Current transformers shall be tested with a suitable variable burden device to determine if the windings of the secondary circuit have developed an open circuit, short circuit or unwanted grounds. When the primary voltage is known, potential transformers may be tested by measuring the secondary voltage to reveal defects in the transformers or secondary circuit which affects its accuracy.

165:35-15-15. Installation tests

(a) **New meters.** New meters shall be inspected and tested in a meter testing facility, or by the manufacturer, either on a one hundred percent (100%) basis or on a statistical sampling basis acceptable to the Commission, and appropriate action shall be taken by the utility to assure that the meters conform to the accuracy requirements outlined in this Chapter.

(b) **Meters installed with instrument transformers.** Meters installed with instrument transformers shall be tested on a one hundred percent (100%) basis and adjusted to conform to the accuracy requirement outlined in this Chapter prior to installation. In addition, a complete inspection shall be made of the wiring after

installation to assure proper connections for metering.

(c) **Separate test of meters and transformers.** The watt-hour meters may be tested independently of instrument transformers, provided the transformer ratios and phase angles have been determined and are taken into account in the calibration of the meters. The transformer errors may be neglected in the calibration of the meters if instrument transformers are used that conform to the 0.3 accuracy class limits of the ANSI requirements with the actual secondary burden.

165:35-15-16. Schedule for testing watt-hour meters

(a) **Selective testing of alternating current watt-hour meters.** Meters shall be tested in accordance with the provisions of this Section, except that any utility may, upon written request to the Commission, be authorized by the Commission to utilize a selective testing program for alternating current watt-hour meters.

(b) **Periodic schedule for testing alternating current watt-hour meters with surge-proof magnets and without demand registers or pulse initiators (in lieu of selective testing program).** The word "year" in the periodic test schedule stated below means calendar year. The periods stated are required test intervals.

(1) Meters used with instrument transformers:

(A) Polyphase meters-at least once in 16 years.

(B) Single phase meters-at least once in 16 years.

(2) Self-contained single phase meters - at least once in 16 years.

(3) Self-contained single phase meters and three-wire network meters - at least once in 16 years.

(c) **Varhour meters.** Varhour meters shall be tested in accordance with the schedule for the associated watt-hour meters.

(d) **Other meters.** Meters without surge-proof magnets and without demand registers or pulse initiators - at least once in 8 years.

(e) **Adoption of utility testing schedule.** In lieu of the schedule prescribed by this Section, the utility may adopt its own testing schedule when approved by order of the Commission.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93]

165:35-15-17. Schedule for testing demand meters

The following schedule is required for testing demand meters:

(1) Block interval demand-registers-equipped watt-hour meters.

(A) Meters with surge-proof magnets - 12 years.

(B) Meters without surge-proof magnets - 8 years.

(2) Block interval graphic watt-hour demand meters - 2 years.

(3) Lagged demand meters - 8 years.

(4) Pulse recorders and pulse-operated demand meters in combination with pulse-initiator-equipped watt-hour meters - 2 years. If a comparison is made between the meter registration and the recorder registration each billing period, and the recorder registration agrees within one percent (1%) of that registered by the associated meter, the schedule for pulse recorders and pulse-operated demand meters should be as indicated in (A) and (B) of this paragraph. If recorder meter registration checks do not agree within one percent (1%), the demand metering equipment should be tested.

(A) Meters with surge-proof magnets - 16 years.

(B) Meters without surge-proof magnets - 8 years.

[Source: Amended at 10 eff 6-25-93]

165:35-15-18. Prepayment meters

No utility shall use prepayment meters geared or set as to produce a rate or amount higher than would be paid if a standard type meter was used, except pursuant to a special rate schedule for the particular class of service which has been filed with and approved by the Commission.

165:35-15-19. Meter records and reports

(a) **General.** Current records shall be kept, systematically arranged, of the identification number of each watt-hour meter and the location of the meter.

(b) **Selective test date.** Any utility authorized to utilize a selective testing program for alternating current watt-hour meters may retain the test date of the groups of lots of the meter selected for test, in lieu of the records required in (c) of this Section.

(c) **Test records.** Each utility shall keep the most recent test record of any installed meter for the period installed and for six (6) months after the meter is removed from service. Each record shall contain:

- (1) Sufficient information to identify the meter.
- (2) The date of the test.
- (3) Reading of the meter.
- (4) Results of the test.

165:35-15-20. Meter testing on request of consumer

(a) Upon receipt at an office of a utility of a written request of a consumer, the utility shall, within twenty (20) calendar days, test the accuracy of the meter through which the consumer is being served.

(b) No charge shall be made for a meter test requested by the consumer, unless the meter is found to test within limits of accuracy prescribed by this Chapter, in which case the utility may make the charge prescribed in its approved tariffs.

(c) A consumer may make written request to be present when the utility conducts the test on his/her meter and have an expert or other representative present at the time; in which case, the utility shall conduct the test in the presence of the consumer or the consumer's representative, but during regular working hours of the utility.

(d) A written report stating the name of the consumer requesting the test, the date of the request, the location of the premise where the meter has been installed, the type, make, size, and serial number of the meter, the date of removal, the date tested, and the result of the test shall be supplied to such consumer within ten (10) business days after the completion of the test.

(e) Each party affected by a consumer submeter may make demand of the consumer to test the consumer submeter, and the testing requirements and the time for such testing shall be as set forth in (a) through (d) of this Section.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-15-21. Referee meter tests by Commission [REVOKED]

[Source: Revoked at 22 Ok Reg 1799, eff 7-1-05]

165:35-15-22. Adjustment of bills

(a) **Fast meters.** Whenever any meter tested by PUD or the utility is found to have an average error of more than two percent (2%) fast (or in favor of the utility), the

utility shall refund to the consumer the overcharge based upon the last test, but not to exceed six (6) months, unless it can be established that the error was due to some cause, the date of which can be fixed with reasonable certainty, or the error was due to meter tampering or theft, in which case the overcharge shall be computed from that date.

(b) **Slow meters.** Whenever a meter tested by PUD or the utility is found to have an average error of more than two percent (2%) slow (or in favor of the consumer), the utility shall charge for the electricity consumed, but not included, in bills previously rendered, based upon the corrected meter reading, for a period equal to one-half (1/2) of the time elapsed since the last previous test, but not to exceed six (6) months, unless it can be established that the error was due to meter tampering or theft. The utility shall allow the consumer to pay the corrected amount, in installment payments, over the same period of time in which the incorrect billing took place, but not to exceed six (6) months, unless otherwise agreed to by the utility and consumer.

(c) **Nonregistering meters.** If a meter is found not to register or to register intermittently for any period, the utility may charge for an estimated amount of electricity used, which shall be calculated by averaging the amounts registered over corresponding periods in previous years, or in the absence of such information, over similar periods of known accurate measurement preceding or subsequent thereto. The estimated billing shall not exceed six (6) months, unless it can be established that the error was due to meter tampering or theft. The utility shall allow the consumer to pay the estimated billing amount, in installment payments, over six (6) months, unless otherwise agreed to by the utility and consumer.

(d) **Incorrect register, connection of the meter, or multiplier on meters.** If a meter is found to have an incorrect register, connection, multiplier, or constant, the error shall be corrected. Where the error is adverse to the consumer, the utility shall refund the excess charged for the amount of electricity incorrectly metered for the period of time the meter was used in billing the consumer. Where the error is adverse to the utility, the utility shall charge the consumer the undercharge for the amount of electricity incorrectly metered for the period of time, not to exceed six (6) months, the meter was used in billing the consumer, unless it can be established that the error was due to meter tampering or theft. The utility shall allow the consumer to pay any unbilled amount over the same period of time in which the undercharge took place, but not to exceed six (6) months, unless otherwise agreed to by the utility and consumer.

(e) **Compliance.** This Section shall not apply to routine testing and replacement of meters.

(f) **Conformity.** Consumer submeters shall conform to the adjustments set forth in subsections (a) through (e) of this Section.

[Source: Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 17. FREQUENCY, VOLTAGE, AND EQUIPMENT SERVICING REQUIREMENTS

165:35-17-1. Standard frequency

The standard frequency for alternating current distribution systems shall be 60 hertz.

165:35-17-2. Voltage limits

(a) **Secondary voltages.** The voltage at the utility's point of delivery, as installed for each consumer, shall be maintained within the limits specified in (1) through (4) of this subsection. If a utility adopts any standard voltage not included in the table in (4) of this subsection, it shall advise the Commission that the Commission may establish appropriate voltage limits. Where three-phase service is provided, the utility shall exercise reasonable care to assure that the phase voltages are balanced. The preferred and tolerable voltage ranges conform to the current version of ANSI Standard C84.1, or equivalent ANSI standard as later amended.

(1) **Preferred secondary voltages.** The secondary voltage described above shall normally be maintained within the preferred range specified in the table in (4) of this subsection.

(2) **Tolerable secondary voltage.** The secondary voltage described above will be permitted in the tolerable range specified in the table in (4) of this subsection under abnormal conditions if it is limited in frequency of occurrence and duration, providing that measures are initiated within a reasonable period of time to bring the voltage within the preferred range.

(3) **Emergency secondary voltages.** Voltages outside the limits specified in (4) of this subsection may infrequently occur due to:

- (A) Addition of significant loads without proper notice to the utility.
- (B) Adverse action of the elements.
- (C) Failure of principal supply line or equipment necessitating use of alternate routes.
- (D) Temporary separation of part of the system from the main system.
- (E) Causes beyond the control of the utility.

(4) **Table.**

NORMAL VOLTAGE	PREFERRED VOLTAGE RANGE		TOLERABLE VOLTAGE RANGE	
	MINIMUM	MAXIMUM	MINIMUM	MAXIMUM
120	114	126	110	
208Y/120	197Y/114	218Y/126	191Y/110	220Y/127
240/120	228/114	252/126	220/110	254/127
208	197	218	191	220
416Y/240	395Y/228	436Y/252	381Y/220	440Y/254
480/240	456/228	504/252	440/220	508/254
460Y/265	437Y/252	483Y/279	422Y/244	487Y/281
480Y/277	456Y/263	504/Y291	440Y/254	508Y/293
440	418	462	403	466
480	456	504	440	508
832Y/480	790Y/456	873Y/504	762Y/440	880Y/508
600	570	630	550	655

(b) **Primary voltages.** The following limits shall apply where the utility supplies service at primary voltage.

(1) **Industrial consumers.** For services rendered principally for industrial or power purposes, the voltage shall not exceed ten percent (10%) above or ten percent (10%) below the nominal voltage of the low side of the transformer.

(2) **Special contract extension.** The limitations in (1) of this subsection do not apply to special contracts in which the consumer specifically agrees to accept service with a different voltage regulation.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-17-3. Servicing utilization control equipment

Each utility shall service and maintain any equipment it installs, owns, and uses on consumer's premises and shall correctly set and keep in proper adjustment any thermostats, clocks, relays, time switches, or other devices which control the consumer's service.

SUBCHAPTER 19. CONSUMER DATA, DEPOSITS, AND BILLING

PART 1. CONSUMER RECORDS, INFORMATION, AND INTERRUPTIONS OF SERVICE

165:35-19-1. Consumer records

(a) The utility shall maintain such records of each consumer as may be necessary to reflect compliance with the Commission's rules, which shall be retained for the period prescribed in OAC 165:35-1-3.

(b) Records referred to in subsection (a) of this Section, where applicable, shall show, but not be limited to:

- (1) KWH meter readings per billing period.
- (2) KWH consumption per billing period.
- (3) KW meter readings per billing period.
- (4) KW measured demand per billing period.
- (5) KW billing demand per billing period.
- (6) Total amount of bill per billing period.
- (7) Dates and amounts of payments by consumers.
- (8) Adjustments of bills.
- (9) In service performance meter and/or equipment test.
- (10) Complaints by name and account number in accordance with OAC 165:35-23-2(a) that such records be maintained in a matrix format with the type (or category) of complaint listed across the top and the consumer's name or account number listed down the left hand side. However, if the account number only is utilized, a cross reference with the consumer's name must also be readily available.

(c) Consumers that utilize consumer submeters shall keep the following records pertaining to the parties affected by submetering:

- (1) KWH meter readings per billing period.
- (2) KWH consumption per billing period.
- (3) Total amount of bill per billing period.
- (4) Dates and amount of payments by parties.
- (5) On request of a party affected by the submetering, consumer shall furnish a clear and concise statement of the actual consumption of electric energy for said party for each billing period during the prior year.

[Source: Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-19-1.1. Consumer electric usage data

The standards for consumer electric usage data shall be governed by the Electric Usage Data Protection Act codified at 17 O.S. § 710.1 *et seq.*, and future amendments or supplements thereto.

[Source: Added at 31 Ok Reg 1030, eff 9-12-14]

165:35-19-2. Consumer information

(a) Each utility shall:

(1) Maintain maps, plans, or records of its transmission and distribution systems, with such other information as may be necessary to enable the utility to advise prospective consumers and others entitled to the information as to the facilities available for serving in any locality.

(2) Transmit to each of its consumers no less frequently than once each year:

(A) A clear and concise summary of the existing rate schedules applicable to each of the major classes of its consumers for which there is a separate rate.

(B) An identification of any classes whose rates are not summarized.

(3) Upon request of a consumer, but not more frequently than once each calendar year, provide a clear and concise statement of such consumer's actual consumption of electric energy for each billing period during the prior year.

(4) Assist the consumer or prospective consumer in selecting the most economical rate schedule.

(5) Provide information to each new consumer at the time of application or by enclosure with the first month's bill or by separate mailing, or by electronic notification to customers who make an affirmative election to receive electronic notification of such information, prior to the first month's bill as to the correct method of reading watt hour meters.

(b) Where economically feasible, each electric utility shall provide an office, agent, or authorized pay site in or convenient to each municipality serviced by it where the consumer may pay bills, which office, agency, or authorized pay site, shall be open for business during reasonable business hours at least five days per week, holidays excepted. Whenever service prescribed in this subsection is not furnished for economic reasons, the Commission may, upon application and after notice and hearing, prescribe the service to be furnished and conditions thereof.

(c) The utility shall provide, in each telephone directory covering any area it serves, a telephone listing of the number by which the utility can be notified at any time during a twenty-four (24) hour day of any utility service deficiency or emergency, or the information may be published in a regular newsletter or publication furnished to its subscribers. In addition, the telephone number shall be published on the homepage of a utility sponsored website, if applicable.

(d) The utility shall advise its residential consumers through its consumer mailing or by electronic notification to customers who make an affirmative election to receive electronic notification of such information, no less than once a year, of the Commission rules regarding the following:

(1) Disconnection information which states the rights listed in the "Disconnect Notice," as outlined in OAC 165:35-21-20 *et seq.*

- (2) Commission-approved deferred payment plans;
 - (3) Twenty (20) day government and/or private financial aid assistance deferral;
 - (4) Life Threatening Certificate and consumer responsibilities;
 - (5) Elderly or Consumers with disabilities can request their account to be flagged by the utility so that CSD can intervene on their behalf, when requested by the consumer, in the event of a disconnection of service notice and extend the disconnection date by up to five (5) business days;
 - (6) Average Monthly payment plans;
 - (7) The address and telephone number of the Commission's CSD;
 - (8) The limitations for disconnection, including days or periods of time when service shall not be disconnected as outlined in OAC 165:35-21-10(c); and
 - (9) The availability of a list of agencies providing assistance to consumers for their utility bills as outlined by OAC 165:35-21-3.
- (e) The utility shall provide the location of pay agents upon the consumer's request.
- (f) The utilities are strongly encouraged to have bilingual customer service personnel available to assist non-English speaking consumers regarding disconnection and related matters.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 19 Ok Reg 1968, eff 7-1-02; Amended at 22 Ok Reg 1799, eff 7-1-05; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-19-3. Interruptions of service

- (a) Whenever service is interrupted other than under emergency conditions, the interruption shall be made at a time which will cause least reasonable inconvenience to consumers, and where feasible, installations affected (such as hospitals, police, fire, schools, and other public buildings affected with interest of public health and safety) will be notified in advance.
- (b) Each utility shall keep a record of any condition resulting in an interruption of service affecting its entire system or major division thereof, including the time, duration, and cause of any such interruption, and such record shall be available to the Commission or its representative upon request.
- (c) A utility may cause emergency interruption of service without notice when required by failure of equipment, unexpected and prolonged increase in load, fire, storm, strike, or other cause beyond its control. Each utility shall establish and train employees in emergency procedures designed to prevent or shorten service interruption where conditions require. The utility may, in good faith, select the areas or consumers whose service is interrupted as emergency conditions require.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 19 Ok Reg 1968, eff 7-1-02]

165:35-19-4. Restoration of service

This Section establishes general parameters to ensure timely communication to the Commission, of the utility's implementation of its restoration of service plan, following an unplanned service interruption. Each electric utility shall have a written restoration of service policy/plan, which shall include a telecommunication plan to be followed during unplanned or emergency interruptions, with a current copy on file with the CSD Director. No later than September 30 of each year, this policy shall be reviewed by the utility at least annually, and updated as deemed necessary and appropriate. A statement detailing all changes from the previous edition shall be filed with the Commission and

included at the front of the policy on file. Each electric utility shall provide and keep current, the phone number of any 24-hour emergency operations center or a list with a minimum of two individuals having 24-hour contact numbers, by September 30 of each year, to the CSD Director. The following items are guidelines to be addressed in the policy:

- (1) Assessment of the extent of the service interruption and what resources (equipment, materials, and labor) will be required to restore service. The utility should also attempt to determine the number of consumers affected and the geographic extent of the service interruption.
- (2) Determination as to whether or not the service restoration can be accomplished by use of in-house personnel only, or if contractors (personnel obtained from other utilities or third-party entities) will be required. The objective is to have service restored as soon as possible.
- (3) Identification of priorities for service restoration, based upon emergency needs and upon ease of restoration for the greatest number of consumers for the least expenditure of money, time, and effort. Priority shall be given to any life-threatening situations known or discovered during restoration of service.
- (4) Once electricity to installations affected with the interest of public health and safety has been restored (such as hospitals, fire and police departments and 911 centers), service shall be restored to schools as quickly as feasible, during such time of the year that school is in session.
- (5) Attempted notification of high-priority consumers or major electric consuming facilities that are affected by the service outage, when possible. Radio and/or television should be utilized to notify larger numbers of consumers as to the type of service outage, extent of the service outage, and the expected time to restore service. Other means of notification may also be utilized, so long as the result is mass notification on an efficient, effective, and timely basis.
- (6) Commission notification through the CSD Director and the Commission's Emergency Liaison to implement the process outlined in paragraphs A through C below. The Commission notification process to the designated CSD individual(s) and the Commission's Emergency Liaison may be accomplished by one or more of the following methods: business telephone and/or e-mail address during the business hours of 8:00 a.m. through 4:30 p.m. Monday through Friday, or emergency cellular telephone number after normal business hours, weekends and holidays. The notification shall consist of the following:
 - (A) An initial contact to notify Staff of outages, which involve a major utility substation or facility; or which may cause a high degree of public interest or concern; or which have a duration of 4 hours or more and involve 1% or fifty (50) consumers or more, whichever is greater, of the utility's meter count.
 - (B) Intermediate contact to provide status reports, as deemed necessary by the utility, or as may be requested by Commission and CSD Staff.
 - (C) A conclusory contact detailing the results and completion of the restoration of service plan implementation.

[Source: Added at 12 Ok Reg 2113, eff 7-1-95; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 19 Ok Reg 1968, eff 7-1-02; Amended at 22 Ok Reg 1799, eff 7-1-05; Amended at 23 Ok Reg 1674, eff 7-1-06; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

PART 3. DEPOSITS

165:35-19-10. Deposits and interest

(a) Each utility shall prepare and submit a plan containing criteria for deposits to the Commission for approval. The plan shall include criteria for residential and nonresidential consumers with residential being defined in each utility's tariff.

(1) The residential plan shall conform to all subsections of this Section.

(2) The nonresidential plan shall conform to all subsections of this Section except (b), (c), (e), and (1).

(b) No utility shall require a deposit of a residential consumer who has received the same or similar type and classification of service for twelve (12) consecutive months and service was not terminated for nonpayment nor was payment late more than twice nor was a check for payment dishonored. The twelve (12) month service period shall have been within eighteen (18) months prior to the application of new service. The utility plan may establish other relevant criteria which will qualify the consumer for nonpayment of a deposit.

(c) No utility shall require a deposit of more than one-sixth (1/6) the estimated annual bill. The utility may allow smaller deposits to be made, in conformance with relevant, objective criteria written in the utility's plan. The utility plan may allow consumers to pay deposits in installments.

(d) A utility may require an advance deposit as a condition of service for consumers other than those addressed in (b) and non-residential consumers.

(e) A residential consumer may be required to post a deposit as a condition of continued service if undisputed charges have become delinquent, with delinquent meaning a payment not received on or before the due date as posted on the bill, in two (2) out of the last twelve (12) billing periods or if the consumer has had service disconnected during the last twelve (12) months pursuant to OAC 165:35-21-2 or has presented a check subsequently dishonored.

(f) A non-residential consumer may be required to post a deposit as a condition of continued service if undisputed charges have become delinquent, with delinquent meaning a payment not received on or before the due date as posted on the bill, in two (2) out of the last twenty-four (24) billing periods or if the consumer has had service disconnected during the last twenty-four (24) months pursuant to OAC 165:35-11-11 or has presented a check subsequently dishonored.

(g) Interest on cash deposits shall be paid by the utility at no less than the rate calculated as follows:

(1) For all consumer deposits returned within one (1) year or less, the interest rate shall be established on January 1 of each year to equal the average of the weekly percent annual yields of one (1) year U.S. Treasury Securities for September, October, and November of the preceding year. The interest rate shall be rounded to the nearest basis point.

(2) For all consumer deposits held by the utility for more than one (1) year, the interest rate shall be established on January 1 of each year to equal the average of the weekly percent annual yields of 10 year U.S. Treasury Securities for September, October, and November of the preceding year. The interest rate shall be rounded to the nearest basis point. The utility may pay the average of the one (1) year Treasury Security, as referenced in (g) (1) of this Section, for the first year the deposit is held.

(3) Provided, however that after the interest rates are initially established pursuant to this subsection, the interest rate shall not change unless the application of the formula in (g)(1) and/or (2) results in a change in interest

rate(s) that is/are greater than fifty (50) basis points.

(4) The PUD Director shall calculate the interest rate(s) as pursuant to (g) (1) and (2) of this Section, and shall post notice on the Commission's website by December 15 of each year, pursuant to subsection (g), otherwise the current interest rate(s) will remain in effect.

(h) If refund of deposit is made within thirty (30) days of receipt of deposit, no interest payment is required. If the utility retains the deposit more than thirty (30) days, payment of interest shall be made retroactive to the date of deposit. No interest shall accrue on a deposit after discontinuance of service.

(i) The deposit shall cease to draw interest on the date it is returned or credited to the consumer's account.

(j) The utility plan shall provide the date of payment of interest and whether the interest shall be paid by negotiable instrument, or by credit against current billing, or by issuance of a bank card.

(k) Each consumer posting deposit shall receive a nonassignable receipt in writing at the time of making the deposit, or within ten (10) days thereafter, or such deposit shall appear as a notation on the consumer's next bill. When a consumer pays a deposit as a portion of an electric service bill, payment of the bill shall serve as a receipt of the deposit. If the deposit is not paid by the due date, the amount of the deposit will become a part of the past due amount owed and monies paid shall be applied to the oldest past due amount. The utility plan shall provide reasonable means whereby a depositor who applies for the return of his/her deposit, or any deposit to which he/she is entitled, but who is unable to produce the original receipt may not be deprived of his/her deposit or balance.

(l) The utility shall automatically refund the deposit for residential service, with accrued interest, after twelve (12) months' satisfactory payment of undisputed charges and where payment was not late more than twice; provided, however, that service has not been disconnected within the twelve (12) month period. Payment of a charge shall be deemed satisfactory if received on or prior to the date the bill is due. Payment of a charge shall be deemed not satisfactory if made by a check subsequently dishonored.

(m) The utility shall automatically refund non-residential service deposits of less than \$20,000, with accrued interest, after twenty-four (24) months' satisfactory payment of undisputed charges and where payment was not late more than twice; provided, however, that service has not been disconnected within the twenty-four (24) month period. Non-residential consumers, who meet the above-referenced eligibility criteria, must have a minimum of five (5) years continuous service at the service location with the utility before a deposit will be refunded.

(n) The utility plan shall provide for the review of all deposits for residential service at least annually and deposits for non-residential service at least once every twenty-four (24) months and shall provide whether refunds will be paid by negotiable instrument, upon request of the consumer, provided the consumer's bill is not delinquent, or by credit against current billing.

(o) The amount of the deposit, with accrued interest, shall be applied to any unpaid charges at the time of a discontinuance of service. The balance, if any, shall be returned to the consumer within thirty (30) days following the settlement of the consumer's account, either in person or by mailing it to the consumer's last known address.

(p) The utility shall provide payment of accrued interest for all consumers annually by negotiable instrument, or by credit against current billing, or by issuance of a bank card.

(q) The utility may withhold refund or return of the deposit, pending the resolution of a dispute with respect to charges secured by the deposit.

(r) The utility shall keep records to show:

- (1) The name, account number, and address of each depositor.
- (2) The amount of the deposit and date received.
- (3) Each transaction concerning the deposit.

(s) Such records shall be retained for two (2) years after the deposit and/or interest is refunded or applied.

(t) Upon the sale or transfer of any public utility or operating units thereof, the seller shall file, with the application of transfer, a verified list of all consumers from whom a deposit is being held, the date such deposit was made, the amount thereof, and the unpaid interest thereon. The information provided shall be treated as confidential and shall not be available for public inspection unless ordered by the Commission after notice and hearing.

(u) Deposits shall not include membership fees in cooperatives.

(v) The deposit made by the consumer with the utility at the time of application for electricity shall not constitute an advance payment to cover service bills, but for all purposes it is to be considered as security for the payment of monthly bills or other proper charges.

165:35-19-11. Interest on deposits required by cooperative

A utility having provision in its bylaws for assignment of margins to members or consumers shall be required to pay interest on security deposits deposited after the effective date of this Chapter in compliance with OAC 165:35-19-10. [Order No. 326194, issued May 23, 1988]

[Source: Amended at 31 Ok Reg 1030, eff 9-12-14]

PART 5. BILLING

165:35-19-30. Information on bills

The utility shall bill each consumer as promptly as possible following the reading of his/her meter. The bill shall show:

- (1) The reading of the meter at the end of the period for which the bill is rendered.
- (2) The date on which the meter was read, or the end of the billing period.
- (3) The number and kind of units used for billing.
- (4) The total amount due for electricity used.
- (5) Items of tax separately billed, pursuant to OAC 165:35-27-2.
- (6) The date by which the consumer must pay the bill to avoid addition of a penalty.
- (7) The total amount due after addition of any penalty for nonpayment within a designated period. The terms "gross bill" and "net bill" or other similar terms implying the granting of a discount for prompt payment shall not be used where a penalty is added for nonpayment within a designated period.
- (8) A distinct marking to identify an estimated bill.
- (9) If there is a conversion from meter reading units to billing units, or any calculation to determine billing units from recording or other devices, or

any other factors used in determining the bill, full information shall be furnished on request.

(10) In the case of a special form of billing, such as a level payment plan, any of the above information which is inappropriate may be omitted.

(11) The fuel adjustment or purchased power adjustment factor associated with the respective clauses on the consumer's bill.

(12) The electric bill submitted by the utility furnishing electric service to the consumer shall be allocated to the party(ies) affected by such consumer submeters in a manner approved by and on file with the PUD Director.

(13) Utilities that serve 150,000 Oklahoma customers or more shall provide historical usage information, e.g., a chart, table or graph, which shall be displayed prominently on each bill, and depict the actual usage of the residential consumer, at the place of service for which the bill is issued. Such historical usage shall be tracked and displayed over the previous twelve (12) month period.

(14) Utilities that serve less than 150,000 Oklahoma Customers consumers shall provide, in a conspicuous manner, notice on each residential consumer bill that historical usage information is available at no charge, upon the consumer's request.

(15) The name and toll-free telephone number of the Commission's CSD, to which the end-user may direct complaints and questions regarding utility services.

[Source: Amended at 19 Ok Reg 1968, eff 7-1-02; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-19-31. Average monthly payment plan [AMPP]

(a) Each utility shall offer to its residential consumers the option of being billed on an "average monthly payment plan" (AMPP). Each utility's plan shall be submitted to the Commission for approval and shall then become a part of that utility's approved tariffs.

(b) At least once a year, and consistent with OAC 165:35-19-2(d) above, the utility shall give written notice to its residential consumers of the availability of an Average Monthly Payment Plan.

[Source: Amended at 19 Ok Reg 1968, eff 7-1-02]

165:35-19-32. Penalty or charge for late payment of bills and dishonored negotiable instruments

(a) **Meters read by the utility.** A utility may make a penalty charge in an amount not to exceed one and one-half percent (1.1/2%) for delay in receipt of payment by the utility past the due date of the bill. The due date shall be stated on the face of the bill and shall not be earlier than ten (10) days after the bill is mailed or provided by electronic notification to customers who make an affirmative election to receive electronic notification of such information, except that for residential consumers it shall not be earlier than twenty (20) days after the bill is mailed or provided electronically to consenting consumers.

(b) **Late payment penalty.** A utility shall clearly state upon the face of its bills the amount of any late payment penalty, and the date on or before which payment must be received in order to avoid paying the late payment penalty. In its billing, the utility shall not use the term "prompt payment discount" or other words of similar import which suggest that the consumer will receive a discount or reduction of charges for electric service for payment prior to a certain date. The late payment

penalty may be applied to any unpaid balance due at each monthly billing period.

(c) **Meters read by the consumer.** A utility which allows its consumers to read their own meters may make a late payment charge on past due bills, not to exceed one and one-half percent (1.1/2%) of the amount due per billing period and, in such event, the due date stated on the bill shall not be earlier than twenty (20) days after the bill is mailed or provided by electronic notification to customers who make an affirmative election to receive electronic notification of such information.

(d) **Payment acceptance.** The utility shall not refuse to accept payment by check from any consumer unless the utility has, within the preceding twelve (12) months, received as tendered payment of the consumer's account two (2) or more negotiable instruments which were dishonored by the financial institution on which they were drawn. The utility may make a charge outlined in its tariffs for negotiable instruments which are dishonored.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 31 Ok Reg 1030, eff 9-12-14]

PART 7. APPLICATION FOR SERVICE AND TAMPERING OF EQUIPMENT

165:35-19-40. Failure to make application for electric service

(a) A utility may elect not to disconnect electric service to a premises when an application or contract for service is terminated, provided the meter is read and the reading recorded when service is terminated and the meter is read and the reading recorded when initiating service to subsequent consumer. Such election does not constitute consent of the utility for a new occupant of such premises to use the service without making proper application or contract for service.

(b) Any person who uses electric service of the utility, but fails to make application or contract for such service of the utility, shall be liable to the utility for payment therefore under the applicable rate schedule. Proper notice as set forth in OAC 165:35-21-20(a) must be given prior to the utility making a disconnection. The utility may prorate the charge to this consumer, based on the date of occupancy.

[Source: Amended at 23 Ok Reg 1674, eff 7-1-06; Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-19-41. Tampering with measuring equipment or other property

(a) No regulating or measuring equipment, or other property or equipment owned by a utility, wherever situated, whether upon consumer's premises or elsewhere, shall be tampered with or interfered with, either for the purpose of adjustment or otherwise, except by representatives of the utility owning it; and official responsibility under authority of a municipal government shall not constitute an exception to this Section.

(b) If the consumer tampers with the utility's equipment or receives the benefit of the tampered service, the utility may;

- (1) Disconnect service.
- (2) Charge a tampering fee in accordance with the utility's tariff.
- (3) Charge a reconnect fee in accordance with the utility's tariff.
- (4) Charge a deposit in accordance with the OAC 165:35-19-10 to be paid prior to restoration of service.

[Source: Amended at 22 Ok Reg 1799, eff 7-1-05; Amended at 31 Ok Reg 1030, eff 9-12-14]

SUBCHAPTER 21. DISCONNECTION OF SERVICE

PART 1. DISCONNECTION OF SERVICE

165:35-21-1. Disconnection of service by a consumer

A consumer may be required to give up to five (5) days notice, excluding legal holidays, Saturdays and Sundays, of intention to have service disconnected or to have the account closed and shall be responsible for all charges for service until the expiration thereof. This 5-day notice provision may be waived by the utility. Such disconnection or closing of the account does not relieve the consumer of obligations incurred prior to disconnection. At the time the consumer requests disconnection or closing of the account, the utility will advise the consumer of any reconnection and service fees, if any reconnection and or service fee applies pursuant to the utility's approved tariffs.

[Source: Amended at 12 Ok Reg 2115, eff 7-1-95; Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-21-2. Disconnection of service by a utility

(a) **Sufficient reasons for disconnection of service.** A utility may disconnect service to a consumer for any of the following reasons:

- (1) Nonpayment of all or any portion of undisputed utility bills or a utility bill which is no longer disputed or for which the Commission's dispute process has been completed.
- (2) Nonpayment of an account for service of a similar character previously supplied to such applicant or consumer by the utility.
- (3) Failure to comply with the terms and conditions of a settlement agreement or any type of deferred payment agreement or with a Commission order.
- (4) Failure to post a deposit as prescribed in OAC 165:35-19-10.
- (5) Failure to make application for service.
- (6) Misrepresentation of identity or facts for the purpose of obtaining service or use of an alias, trade name, business name, relative's name or another person's name as a device to escape payment of an unpaid obligation for utility service provided to the consumer.
- (7) Violation of any rule or regulation of the Commission or Commission-approved rule of the utility.
- (8) Unauthorized use of electricity accomplished through bypassing of the utility's measuring equipment or tampering with wires, pipes, meters, or other utility equipment.
- (9) Whenever the utility has reason to believe that continued service will create a condition on the consumer's premises that is dangerous to persons or property.
- (10) Refusal to grant access at reasonable times for the purpose of installation, inspection, maintenance, replacement, or reading of utility equipment installed upon the premises of the consumer, or maintaining any obstruction that would deny access for these purposes.
- (11) Potential adverse effect of the service required by the consumer on the service of other consumers of the utility, provided the consumer has been notified and given a reasonable opportunity to correct the adverse effect.
- (12) Abandonment of the premises served.
- (13) Upon request of the consumer pursuant to OAC 165:35-21-1.
- (14) Causing injury or threatening to cause injury to an employee of the utility or the family of an employee of the utility or the property of the utility for the purpose of preventing a utility employee from engaging in

activities authorized by law or in retaliation for such activities.

(15) Violation of the utility's rules regarding the operation of nonstandard equipment or unauthorized attachments, if the consumer was notified first and given a reasonable opportunity to comply with the rules.

(16) Violation of federal, state, or local laws or regulations through use of the service.

(17) Causing damage to utility property.

(18) A condition exists which poses a health or safety hazard.

(b) Insufficient reasons for disconnection of service. A utility shall not disconnect service to a consumer for any of the following reasons:

(1) Failure to pay for a different kind or classification of service from that requested.

(2) Failure to pay a bill correcting a previous underbilling, due to misapplication of rates, unless the utility offers the consumer a deferred payment agreement as provided elsewhere in this Chapter.

(3) Failure of a previous owner or occupant at the premises or user of the service to pay an unpaid or delinquent account, except where the previous occupant remains an occupant or user of the utility service.

(4) Failure of a consumer to pay any portion of an estimated billing which the consumer disputes, except where the consumer fails to allow a utility representative access to the meter, or if the consumer regularly reads the consumer's own meter and fails to supply a current meter reading.

(5) If a current consumer in good standing who accepts an additional household member owing a previous bill to the utility unless that additional household member is listed on the lease arrangements or another utility service as a responsible party, or unless the household member shared service with the subscriber at a different or same location.

(6) If a consumer or potential consumer for a previously unpaid account from a different utility beyond the boundaries of the utility's service territory.

(7) Pending verification, service cannot be withheld or disconnected from a consumer whose name was used to obtain service at another location without the consumer's permission or knowledge.

(8) Nonpayment of an amount past due for more than three (3) years if the utility cannot substantiate the charges with a copy of the consumer's complete billing history reflecting usage, consumption and relevant charges.

(9) Failure to pay a past due amount to another utility.

(c) Effective period of notice. A utility may disconnect service on the date specified in the notice or within thirty (30) calendar days thereafter, during regular business hours, so long as the disconnection does not occur within the last two (2) hours of the business day, nor shall service be disconnected on a holiday, nor after noon (12:00 p.m.) on Fridays until Monday morning.

(d) Documentation of reason(s). The utility shall provide documentation to the consumer indicating the reason(s) that service is being withheld or disconnected.

[Source: Amended at 12 Ok Reg 2115, eff 7-1-95; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 22 Ok Reg 1799, eff 7-1-05; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-21-3. Utilities encouraged to keep current lists of energy assistance programs

(a) **Compilation.** The utilities are strongly encouraged to compile a list with the names, addresses, and phone numbers of known payment assistance programs, including information regarding any bilingual services offered, that are applicable to each service area within the utility's areas of operation. The list should include but is not limited to: local, state, federal, and tribal energy assistance programs. The list should also include public/private charitable organizations offering or known to offer energy payment assistance, which have given prior consent to their inclusion on this list. The utilities are encouraged to use due diligence in compiling and updating this information, with updates to occur on an annual basis. However, the Commission encourages the addition of new assistance programs to the list, as the information becomes available.

(b) **Availability.** The utility shall provide a copy of this list to any consumer who asks for requests such assistance.

(c) **Liability.** The offer of any such list under this Section is meant as an informative resource only, for the utility to better assist its consumers. Failure of the consumer to gain funding in full or in part, from any of the proffered resources under this Section shall not result in any liability to the utility.

[Source: Added at 19 Ok Reg 1968, eff 7-1-02; Amended at 31 Ok Reg 1030, eff 9-12-14]

PART 3. SPECIAL PROVISIONS REGARDING RESIDENTIAL DISCONNECTION

165:35-21-10. Delays to disconnection of residential service

(a) **Limitations on disconnections.** After notice and hearing, the Commission may issue an order that may include limitations on disconnection of residential utility service used or needed for the primary heating or cooling source.

(b) **Temporary ban on disconnections.** The Commission shall have the authority to order a temporary ban on any or all disconnections during periods of extremely severe weather or when circumstances exist such that disconnection could create a situation dangerous to the life or health of consumers or to property.

(c) **Severe weather.**

(1) If the NWS issues a local forecast predicting the temperature will drop below 32 degrees Fahrenheit for any time period during the following twenty-four (24) hours, the utility shall suspend its disconnection of service if the electric service is used for heating purposes. The utility must obtain the most recent local forecast for the customer's location from the NWS reports between the hours of 6:00 a.m. and 8:00 a.m. on the morning of the day that the customer's shut-off is scheduled. If the NWS issues an updated forecast on the day of disconnection, then such updated forecast shall be used in place of the earlier obtained forecast.

(2) If the NWS issues a local forecast predicting the heat index will be 101 degrees Fahrenheit or higher on the day of disconnection, or if the actual heat index is 101 degrees Fahrenheit or higher, the utility shall suspend its disconnection of service activity if the electric service is used for cooling purposes. The utility must obtain the most recent local forecast for the customer's location from the NWS reports between the hours of 6:00 a.m. and 8:00 a.m. on the morning of the day that the customer's shut-off is scheduled. If the NWS issues an updated forecast on the day of disconnection, then such updated forecast shall be used in place of the earlier obtained forecast.

(3) Nothing in this Section shall prohibit a utility from establishing a higher temperature threshold for residential heating purposes below which it will not discontinue utility service or from establishing a lower temperature threshold for residential cooling purposes above which it will not discontinue utility service. The utility may continue to disconnect utility service for unauthorized use of the utility's measuring equipment or tampering with wires, pipes, meters, or any other utility equipment or obtaining service without contract.

(d) **Financial assistance delay.** When a residential consumer has applied for and is awaiting financial assistance, including social security income, from a federal, state, or local social service agency, and the utility has initiated written notice of disconnection, it shall delay disconnection of service for a period of at least twenty (20) calendar days from the date when such notice was either delivered or mailed to the premises where service is rendered, provided:

- (1) The reason for disconnection is for nonpayment of the utility bill.
- (2) The consumer has notified the utility that the consumer has applied for and is awaiting financial assistance.
- (3) Verification from the involved agency must be provided in a form as prescribed by the utility upon its request.
- (4) If the expected financial assistance is less than the amount owed for services, the utility may require the consumer to enter into a deferred payment agreement as prescribed pursuant to (e) of this Section.
- (5) Under no condition is the utility required to furnish service to the consumer unless there is a reasonable expectation of payment for such service except where other rules of this Commission apply.

(e) **Deferred payment agreement.** The utility shall be required to offer a deferred payment agreement before disconnecting service when a residential consumer is unable to pay an account in full. The utility shall not disconnect service for nonpayment of a bill if the consumer enters into a deferred payment agreement with the utility. The utility shall mail, or by electronic notification to customers who make an affirmative election to receive electronic notification of such, a confirmation of the terms of the deferred payment agreement if it is made orally. A deferred payment agreement may be entered into by the consumer up to, but not including, the day of disconnection. Except where payment assistance for the total amount of the bill is pending, the utility may require a reasonable partial payment in accordance with paragraph one (1) of this subsection, at the time the deferred payment agreement is made.

(1) Deferred payment agreement means a just and reasonable agreement offered by the utility and agreed to by the consumer which provides for the payment of all future bills during the period of agreement by the due date and the payment of the balance of any outstanding bills in reasonable installments based upon:

- (A) Consideration of the consumer's gross income.
- (B) Size of the delinquent account.
- (C) Consumer's ability to pay.
- (D) Consumer's payment history with the utility.
- (E) Length of time and reasons why the debt has not been paid.
- (F) Other extraordinary expenses of the consumer.
- (G) Loss of income through unemployment or illness.
- (H) Any other relevant factors concerning the circumstances of the consumer.

- (2) The payments under such an agreement need not be equal in amount.
- (3) The consumer shall initiate renegotiation prior to breach of the deferred payment agreement. The deferred payment agreement shall be renegotiated if financial circumstances, such as loss of income through unemployment or illness or any other relevant factors concerning the circumstances of the consumer, change during the payment period.
- (4) If a consumer fails to comply with the terms of the deferred payment agreement, the consumer will be subject to disconnection without further notice, so long as the disconnection date on the first and second notice has not been passed. If the disconnection date has passed, the utility shall provide at least twenty-four (24) hours' notice of disconnection to the consumer.
- (5) Under no condition is the utility required to furnish service to the consumer unless there is a reasonable expectation of payment for such service except where other rules of the Commission apply.

(f) Life-threatening situation.

- (1) For purposes of this Section, a life-threatening situation is defined as one where the consumer or other permanent resident of the household is dependent upon equipment that is prescribed by a physician, operates on electricity, and is needed to sustain the person's life. Examples of life-sustaining equipment would be: kidney dialysis machine, iron lung, oxygen concentrators and certain other oxygen machines, cardiac monitor, heating and air conditioning equipment, or any other equipment that is prescribed by a licensed medical doctor. If the life-sustaining equipment without a battery backup is prescribed by a licensed medical doctor, then it shall be considered life-sustaining equipment. The following are not considered to be life-sustaining equipment: hot water heater, refrigerator, range/stove, nebulizers that are battery-driven or hand-driven or self-contained, battery-driven sleep apnea monitors, battery-driven cardiac monitors.
- (2) When a consumer to whom service is provided is unable to pay the account in full, the utility shall suspend discontinuance of service, or reconnect if disconnected, if the consumer notifies the utility that disconnection of service will give rise to a life-threatening condition for the consumer or other permanent resident of the household should electric service be terminated, and within thirty (30) calendar days of the initial notification, the consumer shall return the Medical Certificate described in (3) of this subsection.
- (3) The consumer shall use a Medical Certificate Form which verifies the existence of a life-threatening situation. The form shall be provided by the utility at no cost to the consumer. The form shall provide certification by a licensed medical doctor or osteopath. The consumer may choose the appropriate medical personnel. At a minimum, the Medical Certificate Form provided by the utility shall contain, substantially, the information in the form as set forth in Appendix A to this Chapter. The service account name holder shall sign the Medical Certificate Form at the appropriate space, indicating knowledge that a permanent resident of the household is applying for the life-threatening situation certificate and further acknowledging the responsibility for payment of bills rendered for electric service.
- (4) Completion of (2) and (3) of this subsection will suspend disconnection of electrical service to the specified residence for a period of thirty (30)

calendar days from the initial notification. This 30-day period allows the consumer, if eligible, to pay the account in full or enter into a deferred payment agreement with the utility and/or make alternative arrangements for the person(s) named on the certified form as having the life-threatening condition. After thirty (30) calendar days, normal collection action will resume. The 30-day period may be extended by the utility at the request of the service account name holder for one (1) additional contiguous 30-day period, but only if necessitated by the life-threatening condition (as indicated on the Medical Certificate Form). The request for the additional 30-day extension must be made before the end of the initial 30-day period. The utility is not required to furnish service to the consumer beyond a total of sixty (60) calendar days for the life-threatening condition without full payment of the account or acceptable payment arrangements on any unpaid balance.

(5) Verification of the medical condition of the consumer or other permanent resident in the household by the utility may include the following:

(A) Utility personnel may visit the consumer's residence with the consumer's permission to verify that life-sustaining equipment is being used.

(B) Utility personnel may verify the doctor's signature and clarify the medical terms of the diagnosis which is the reason for the life-threatening certificate.

(6) This collection abeyance in no way absolves the consumer from full responsibility for the payment in full of the utility services rendered, and is intended for the purpose of providing the consumer an opportunity to maintain service during the life-threatening situation within the prescribed time frames.

(7) Failure of the service account name holder to fully comply with this subsection may result in denial of life-threatening status and renewed collection activities of the utility, to include termination of service to said residence.

(8) Any consumer who uses this subsection to avoid disconnection or for reconnection of service and does not complete the required documentation will be subject to disconnection.

(9) A consumer is not prohibited from claiming life threatening situation once full payment of the account balance from a previous life-threatening claim is made and a Medical Certificate Form signed by a licensed medical doctor has been received by the utility.

(g) **False information.** If a consumer provides false or misleading information to the utility to avail the consumer of the provisions applicable to the financial assistance delay, deferred payment agreement, life-threatening situation, or Commission notification procedure for elderly and/or consumers with disabilities, the false information shall be grounds for disconnection of service by the utility. The utility may disconnect service upon the utility providing notice to the customer in accordance with OAC 165:35-21-20(a).

(h) **Consumer liability.** Reconnection or continuance of service under this Section shall not in any way relieve the consumer of the consumer's liability incurred for utility service.

165:35-21-11. Commission notification procedure for the elderly and/or consumers with disabilities

(a) At any time prior to disconnection of service, the notification procedure shall be available to those elderly and/or consumers with disabilities who have notified the utility that they wish to be included in the following notification procedure:

(1) For those who have registered with the utility as elderly and/or consumer with disabilities, the utility shall delay disconnection of service for five (5) additional business days upon request of the Commission's CSD.

(2) Elderly and/or consumers with disabilities are those consumers who have notified the utility in writing that they:

(A) Have a permanent impairment which substantially limits the disabled consumer's ability to pay for utility service; or

(B) Are sixty-five (65) years of age or older.

(b) The utility shall notify the consumer or other person responsible for the bill, during the initial application for service, annually thereafter, and at any time disconnection is imminent, of this additional notification procedure.

(c) The utility may require verification of the consumer's qualifications.

[Source: Revoked at 12 Ok Reg 2115, eff 7-1-95]

165:35-21-14. Service limiters and other restrictions on utility service

(a) If a utility has met all of the conditions delineated in this Subchapter and the consumer is now subject to disconnection of service, the utility may, with the consumer's permission, place a service limiter on the consumer's meter to restrict usage in lieu of disconnecting the consumer's service.

(b) If the consumer has consented and a limiter is placed on the consumer's meter, the utility will leave proper notification that a limiter has been placed on the electric meter and information on how to reset the limiter if an overload should occur.

(c) Any costs incurred by the utility in placing or removing this limiter shall not be passed on directly to that consumer, unless specifically outlined in the utility's terms and conditions of service. [Per Order No. 326294, issued May 23, 1988].

PART 5. NOTICE REQUIREMENTS

165:35-21-20. Notice of disconnection of service

(a) **Twenty-four hour notice.** Except as provided in subsections (b), (c) and (f) of this Section and OAC 165:35-21-30, service shall be disconnected only after at least twenty-four (24) hours written notice has been given to the consumer by leaving a copy of such notice with the consumer or by leaving a copy of such notice in a conspicuous place at the premises where service is provided. This notice shall be in writing, in bolded lettering, and state the reason for the disconnection, the amount due, if applicable, and the utility company's name, telephone number, and contact information. After the utility company's contact information, the notice shall include the telephone number of CSD in a printed size smaller than the print size used for the utility company's contact information, not bolded, and shall include the following statement: "For clarification of statutes and rules governing services, or escalations of disputes, you may contact the Oklahoma Corporation Commission's Consumer Services Division." The utility shall submit a copy of the notice to PUD for approval prior to usage.

(b) **First residential notice.** When service to a residential consumer is to be disconnected for nonpayment of a bill for utility service or failure to make a required security deposit, the utility shall give at least ten (10) days written notice from the date of mailing to the consumer (when the deposit is required as a condition of service, the ten (10) day notice is not required. Refer to OAC 165:35-21-30(4) Disconnection of service without notice). Said written notice shall be sent by first-class mail, address correction requested, by the utility to the consumer's billing address, unless the mail is returned from that address as undeliverable, in which case the notice shall be delivered to the premises at which the service was rendered.

(1) Notice will be deemed delivered to the consumer three (3) business days after mailing by the utility, which shall not extend the ten (10) days written notice from the date of mailing to the consumer requirement above.

(2) A notice of disconnection shall contain the following information:

(A) The words "DISCONNECTION NOTICE" or "CUT OFF NOTICE" in bold print no smaller than one-half inch (1/2") tall.

(B) The name and address of the consumer.

(C) A statement of the reason for the proposed disconnection of service.

(D) The date on or after which service will be disconnected unless appropriate action is taken.

(E) The telephone number in bold print of the utility where the consumer may make an inquiry.

(F) The approved charges for reconnection.

(G) A statement that the consumer must contact the utility regarding the disconnection, prior to contacting CSD, and should contact CSD if they cannot reach a resolution with the utility.

(H) The address and telephone number of CSD, in print size which is smaller than the print size used for the utility's telephone number.

(I) A statement that advises the consumer of the availability of a deferred payment agreement.

(J) A statement that advises the consumer of the elderly/consumer with disabilities notification.

(K) A statement that advises the consumer of the life-threatening certificate.

(L) A statement that advises the consumer of the availability of the twenty (20) day financial aid assistance delay.

(M) A statement that advises the consumer of the availability of a list of agencies providing assistance to consumers for their utility bills as outlined by OAC 165:35-21-3.

(3) The utility shall provide to consumers, upon request, the name and address of the authorized payment agencies, other than the utility's offices, where consumers may make payments.

(c) **Second residential notice.** During the time period of November 15 through April 15, the utility shall give a minimum of forty-eight (48) hours notice (at least two (2) business days) prior to disconnection of residential service that service will be disconnected unless the consumer enters into a deferred payment agreement as prescribed in OAC 165:35-21-10(e) or unless disconnection of service would create a life-threatening situation for the consumer or other permanent resident of the premises where the utility service is rendered. If the utility elects to give oral notice, it shall only be after it has complied with (b) of this Section. The second notice may be in writing, in person or by telephone.

(1) If the second residential notice is in writing, it shall be entitled "CUT OFF NOTICE" in bold letters of not less than one-half inch (1/2") in height and shall contain, in nontechnical language, the following information:

(A) The reason for service disconnection and the amount of the unpaid bills, if any.

(B) The date on or after which service will be disconnected unless the consumer takes appropriate action.

(C) The telephone number of the utility office, in bold print, where a consumer may call for assistance, make inquiries, enter into a deferred payment agreement, obtain information on utility assistance programs, pay the bill or notify the utility of a life-threatening situation.

(D) The telephone number of CSD in print size which is smaller than the print size used for the utility's telephone number.

(2) The utility shall keep a written log of all oral communication with at least the following information when contact has been made:

(A) The date and time of call or personal visit and identity of utility representative.

(B) The name of the individual and relationship to the account. If the contact is with a designated representative for the consumer, a statement of authority to represent the account should be included.

(C) The nature of the call and telephone number called.

(D) A narrative of the communication between the utility and the consumer.

(E) A statement that the consumer must notify the utility on the day of payment, as to the place and method of such payment, when the bill is paid at a place other than the office of the utility.

(F) A statement that the consumer was advised of the telephone number of CSD.

(3) The oral communications log shall be maintained and retained in accordance with the record keeping requirements contained in this Chapter.

(4) A copy of the oral communications log shall be provided to CSD or to the consumer and/or their designated representative upon oral or written request.

(5) Oral communications with the consumer shall not begin before 8:00 a.m. or continue beyond 9:00 p.m. during normal business days.

- (6) Oral communications shall be deemed as not to have occurred, including but not limited to the following circumstances:
- (A) When there is no answer, the telephone line is busy or no one is home.
 - (B) When a message is left on an answering device or made on a recording device.
 - (C) When the message or attempted message is left with an individual having a physical and/or mental impairment that impedes communication or mutual understanding.
 - (D) When the communication is with a minor under the age of eighteen (18), unless the minor is the consumer or the spouse of the consumer.
 - (E) When the communication is with an individual who is not either the consumer or the designated representative of the consumer.
 - (F) When the communication is with a consumer or consumer's designated representative whose primary language is other than English and the consumer or consumer's designated representative has a language barrier, unless the communication is made in the primary language of the consumer or the consumer's designated representative.

(7) Unless otherwise directed by CSD, the utility company shall not contact the consumer regarding the consumer's account after CSD has notified the utility company of a complaint or inquiry from the consumer. CSD shall be the intermediary between the utility and the consumer until the resolution of the problem has been completed.

(8) Notice will be deemed delivered to the consumer three (3) business days after mailing by the utility company, which shall not extend the two (2) days written notice from the date of mailing to the consumer requirement above.

(d) **Third party notice.** A utility shall permit residential consumers to designate a consenting individual or agency to receive the applicable notice of disconnection.

(e) **Tenant notice.** Where a master metered apartment complex, building, or trailer court is subject to disconnection, the written notice to the consumer shall also be posted in a common area of the premises at least ten (10) days prior to disconnection of service. The utility may contract with tenants for residential service.

(f) **Commercial or business notice.** Nonresidential service shall be disconnected for nonpayment of all or any portion of an undisputed utility bill only after at least five (5) business days written notice has been mailed to the consumer by the utility or after the notice is left in a conspicuous place at the premises where service is provided.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 12 Ok Reg 2115, eff 7-1-95; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 19 Ok Reg 1968, eff 7-1-02; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-21-21. Manner of disconnection of service

When service is disconnected at the premises of the consumer:

(1) The utility employee may receive payment of past due bills or accept a copy of the consumer's payment assistance application, or accept a copy of the cancelled check or a utility company receipt showing payment; and upon the receipt thereof, cancel the disconnection order. If payment is

offered in a form other than cash or negotiable instrument, the utility employee may verify the payment with the appropriate entity involved. If payment is offered by negotiable instrument, the utility employee may contact the financial institution involved for verification of sufficient funds in the account to cover the negotiable instrument. If the account does not contain sufficient funds for payment, then the utility employee may reject the offered negotiable instrument for payment for past due bills.

(2) Receipt of a subsequently dishonored negotiable instrument in response to a notice of disconnection shall not constitute payment of the consumer's account, and after the consumer is notified of such, the utility shall allow one (1) business day for the consumer to make payment at the utility company or its authorized agent(s) in cash, cashiers check, money order, or a check from a social service agency.

(3) The utility employee shall leave a written statement at the premises that service has been disconnected, the reason for the disconnection, and the telephone number and address where the consumer may arrange to have the service reconnected.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 12 Ok Reg 2115, eff 7-1-93; Amended at 19 Ok Reg 1968, eff 7-1-02]

PART 7. EXCEPTIONS AND RECONNECTION PROCEDURES

165:35-21-30. Disconnection of service without notice

Notwithstanding any other Section regarding disconnection of service, a utility may at any time disconnect service without notice and without delaying disconnection of service as prescribed in other Sections of this Part, if:

(1) It reasonably believes that such action is necessary to correct a condition that poses a health or safety hazard to the consumer, the general public, or the equipment of the utility. Prior to or immediately upon disconnection of service, the utility shall make a good faith effort to notify the consumer of the reason for disconnection either by telephone, electronic notification, personal contact, or notice left at the premises.

(2) For the purpose of essential repair, maintenance, or testing of utility equipment, the utility shall make such efforts as are reasonable under the circumstances to minimize the adverse effects of disconnection of service and to inform affected consumers prior to disconnection of service.

(3) The utility may disconnect for unauthorized use of electricity accomplished through bypassing of the utility's measuring equipment or tampering with wires, pipes, meters, or any other utility equipment or obtaining service without a contract. Prior to or immediately upon disconnection of service, the utility shall make a good faith effort to notify the consumer of the reason for disconnection either by telephone, electronic notification, personal contact, or notice left at the premises. If service is disconnected under this paragraph, the utility may require the consumer to pay the following applicable charges before service is restored:

(A) The applicable charges for reconnecting service prescribed in the utility's approved tariffs.

(B) The amount due for unmetered or unpaid usage, if such usage can be determined exactly. If the exact usage cannot be determined, the utility may compute and charge for the previous six (6) months an estimated usage based on historical usage from the previous two

- (2) years billing period or billing information; and/or
- (C) The cost associated with the testing, repair, or replacement of any damaged equipment.

(4) The utility may disconnect for failure by consumer to post deposit, when the deposit has been required as a condition of service. Prior to or immediately upon disconnection of service, the utility shall make a good faith effort to notify the consumer of the reason for disconnection either by telephone, by personal contact, or by notice left at the premises. If service is disconnected under this paragraph, the utility may require the consumer to pay applicable charges before service is restored.

[Source: Amended at 12 Ok Reg 2115, eff 7-1-95; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-21-31. Reconnection of service

(a) A utility shall reconnect service upon the consumer's request as soon as the reason for disconnection of service has been eliminated. The utility shall give precedence to reconnection of service when disconnection was the fault of the utility; the utility shall reconnect service in the normal course of its reconnection workload, as soon as possible but no later than twenty-four (24) hours after the consumer eliminates the reason for disconnection and requests reconnection, when disconnection of service was the fault of the consumer. If the reason for disconnection is unauthorized use of electricity accomplished through bypassing the utility's measuring equipment or tampering with the wires, pipes, meters, or other utility equipment, the utility may, prior to reconnecting service, require a reasonable payment for estimated service rendered or may refuse to reconnect service until ordered by the Commission. A utility may require payment of a reconnection charge when disconnection of service was the fault of the consumer, if such a charge is provided in the utility's tariffs.

(b) When the disconnection of service was for nonpayment of service and disconnection took place on a Friday morning, service shall be restored as soon as possible, but no later than twenty-four (24) hours from when the consumer eliminates the reason for disconnection and requests reconnection, subject to an intervening Act of God.

(c) When a disconnection for nonpayment of service has occurred immediately preceding periods of severe weather as described in OAC 165:35-21-10(c), the utility shall reconnect service as soon as possible but no later than twenty-four (24) hours, subject to an intervening Act of God, upon receipt of one of the following:

- (1) Payment of the past due bill for which service was disconnected.
- (2) Submission of a life-threatening certificate from the consumer pursuant to OAC 165:35-21-10.
- (3) Guarantee by a federal, state, or local social service agency that payment will be made directly to the utility.

(d) Reconnection or continuance of service under this Section shall not in any way relieve the consumer of the consumer's liability incurred for utility service.

[Source: Amended at 12 Ok Reg 2115, eff 7-1-95; Amended at 19 Ok Reg 1968, eff 7-1-02]

PART 9. MEDIATION AND COMMISSION REVIEW

165:35-21-40. Mediation

(a) Whenever there is a dispute between the utility and the consumer as to the following, the matter may be brought by either party to CSD:

- (1) The existence of or seriousness of a life-threatening situation.
 - (2) The existence of elderly or handicapped status.
 - (3) The question of financial assistance or guarantee of payment by a federal, state, or local social service agency.
 - (4) The provisions of a deferred payment agreement.
 - (5) The terms and conditions of payment of any part of a bill as rendered.
 - (6) The proper interpretation of this Section.
 - (7) Other issues addressed in this Chapter.
- (b) CSD shall review the matter and issue an informal review decision in writing, setting forth the terms and conditions for continued service, disconnection of service, or deferred payment agreement (DPA). If it is the desire of the consumer, they may be represented by a third party, if the consumer is available for verification. If the dispute can be resolved by telephone with the party seeking review, the review decision need not be in writing unless requested by either party. During any period of time when a disconnection dispute is before the Commission or in mediation, the utility shall suspend disconnection procedures.
- (c) If CSD is unable to resolve the dispute to the mutual satisfaction of the parties, either party may file a Complaint with the Commission for final determination.
- (d) Whenever the consumer informs the utility that the consumer disputes a charge for service, the utility shall investigate the dispute promptly and thoroughly, and make a diligent effort to reach a mutually satisfactory settlement. If the consumer is dissatisfied with the decision of the utility, the consumer may report the dispute to CSD. Upon complaint by the consumer to the Commission, disconnection of service shall be held in abeyance provided the consumer pays the portion of the bill which is not in dispute.

[Source: Amended at 12 Ok Reg 2115, eff 7-1-95; Amended at 22 Ok Reg 1799, eff 7-1-05; Amended at 23 Ok Reg 1674, eff 7-1-06; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-21-41. Commission review

The utility's disconnect notice, service violation disconnection notice, life-threatening certificate, and any notice or form used by the utility to comply with the requirements of this Subchapter shall be submitted to the Commission for approval. Upon approval, the forms or notice shall become a part of the utility's approved tariff.

SUBCHAPTER 23. SERVICE REQUIREMENTS

165:35-23-1. Denial of service to a consumer

- (a) A utility may refuse to provide service to an applicant or consumer from whom there remains owing an unpaid account for service of a similar character previously supplied to such applicant or consumer at any location in Oklahoma by an electric utility governed by this Chapter. The utility shall not be required to provide service to an applicant or consumer who uses an alias, trade name, business name, the name of a relative or other person as a device to escape payment of an unpaid obligation for utility service provided to such applicant or consumer; however, subject only to the above, the utility may not require a payment of unpaid utility bills of any other person, except where the previous consumer remains an occupant or user, as a condition to furnishing utility service.
- (b) A utility shall not deny service to a consumer for failure to pay any obligation to the utility except the amount due for utility service actually furnished.

(c) The utility may refuse to provide service to an applicant when the applicant has not provided an acceptable valid and non-expired proof of identity. Acceptable valid and non-expired proof of identity may include the following:

- (1) Driver's license or state identification card;
- (2) Department of Defense identification;
- (3) Employment identification;
- (4) Social Security card;
- (5) Student identification card;
- (6) Passport;
- (7) Birth certificate; or
- (8) Any other verifiable proof which would establish identity.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-23-2. Records of complaints as to service

(a) Each utility shall make a full and prompt investigation of every complaint made to it by its consumers, and or members of the public, either directly or through the Commission. It shall keep a record of each complaint received, which record shall show the name and address of the complainant, the date and character of the complaint, and the adjustment or disposal made thereof, which record shall be retained for two (2) years. Records shall be kept of all complaints as defined by this Chapter.

(b) In the event of a dispute between the consumer and the utility as to the accuracy of a metering device, the utility shall make such investigation as shall be required by the particular case and report the result thereof to the consumer. In the event that the complaint is not reconciled, the utility or the consumer may make application to the Commission for review of the complaint.

(c) When a utility has been notified that a complaint regarding meter accuracy has been referred to the Commission, the questioned metering equipment shall not be changed in any manner without prior authorization of the Commission. Violation of this provision will be considered as a substantiation of the complainant's contentions.

[Source: Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-23-3. Replacement of meters

(a) A request from a consumer for replacement of the service meter on his/her premises because of alleged inaccuracy of the meter shall be deemed a request for the test of the meter, pursuant to OAC 165:35-15-20.

(b) The utility shall make no charge for initial connection of electric service for a consumer except the charges specified in the approved tariffs and rules of service of the utility; provided that for each disconnection and reconnection of service requested for the same consumer at the same location within twelve (12) months after the most recent connection of service, the utility may make a charge prescribed in its approved tariffs.

[Source: Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-23-4. Service to consumer's appliances or electrical installations

(a) Upon the effective date of this Chapter, each electric utility shall file with the Commission a detailed statement of all free service of any nature furnished or offered to any consumer or class of consumers. The utility shall offer the same free service to all consumers of the same class. The utility shall not discontinue, change,

or amend its policy or offer any new free service or type of free service to any consumer or class of consumers except upon order of the Commission, made upon application, notice, and hearing.

(b) A utility shall not, without approval of the Commission, service or repair appliances or electrical installations of its consumers beyond the point of delivery as defined in 165:35-9-1. The Commission, upon application of the utility and after notice and hearing, may grant the utility authority to service and repair all types of appliances or specified types of electrical installations or specified types of appliances of consumers in a specified town, city, or locality for the sole reason that service and repair facilities for the type of appliances or electrical installations are otherwise not available. The Commission may revoke the authority as to any city, town, or locality on application of any person, and after notice and hearing, upon a showing that facilities for such service and repair are available.

[Source: Amended at 16 Ok Reg 2237, eff 7-1-99]

165:35-23-5. Service to mobile home parks

(a) No utility shall be required to furnish electrical service to a mobile home park until the utility has been furnished, at no cost to the utility, any necessary easements which may terminate when the property ceases to be used as a mobile home park.

(b) After the effective date of this Chapter, mobile home spaces shall be served by the utility through individual meters and billed under the residential rate.

165:35-23-6. Standby service

A utility shall not supply standby or breakdown service to consumers whose premises are regularly serviced with light, electrical heat or power from a source or supply other than the utility, except pursuant to a tariff or special contract filed with and approved by the Commission.

165:35-23-7. Temporary service

(a) A consumer requiring temporary service shall pay the regular rates applicable to the class or classes of service rendered for all energy used and in addition shall pay the installation and removal cost, less salvage value, of facilities installed by the utility to furnish temporary service to the consumer.

(b) Temporary service is defined as service for purposes which by their very nature indicate short duration, and shall not exceed ninety (90) calendar days without notification and justification being provided to CSD prior to the expiration of the ninety (90) calendar day period.

[Source: Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-23-8. Request for service

Every electric utility shall initiate service to each qualified applicant for service within its service area in accordance with this Section.

(1) Applications for new electric service under 500 kVA of connected demand not requiring line extensions or construction of new facilities shall be filled by the end of the fifth (5th) business day after the applicant has met the credit requirements and complied with all applicable state and municipal regulations. This requirement must be met at least ninety-five percent (95%) of the time, weather permitting, and after the customer's location is ready for service.

(2) Applications for new or upgraded electric service under 500 kVA of connected demand requiring construction of new facilities shall be filled by the end of the ninetieth (90th) business day, or within a time period agreed to by the customer and the electric utility, after the applicant has met the credit requirements, has made satisfactory payment arrangements for construction charges, and has complied with all applicable state and municipal regulations. This requirement must be met at least ninety-five percent (95%) of the time, weather permitting, and after the customer's location is ready for service.

(3) Applications for new or upgraded industrial electrical service over 500 kVA of connected demand requiring construction shall be completed within 180 calendar days, or within a time period agreed to by the customer and the electric utility, if the applicant has met the credit requirements, has made satisfactory payment arrangements for construction charges, and has complied with all applicable state and municipal regulations. This requirement must be met ninety-five percent (95%) of the time, weather permitting, and after the customer's location is ready for service.

(4) For customers with less than 500 kVA of connected demand, if facilities must be constructed, then the electric utility shall contact the customer within ten (10) business days of receipt of the application. The electric utility shall provide a cost estimate and estimated completion date within sixty (60) calendar days of receipt of the application and all necessary information being provided by the customer.

(5) For customers with over 500 kVA of connected demand, if facilities must be constructed, then the electric utility shall contact and meet with the customer within ten (10) business days of receipt of the application. The utility shall include customer representatives in the planning for the construction and assessment of the work during the actual construction, unless the customer affirmatively indicates no desire to be so involved. The electric utility shall provide a cost estimate and estimated completion date within ninety (90) calendar days of receipt of the application and all necessary information being provided by the customer.

(6) Unless the delay is beyond the reasonable control of the electric utility, where no construction is required for requests from customers with under 500 kVA of connected demand, a delay of more than ten (10) business days and where construction is required for requests from customers under and over 500 kVA of connected demand a delay of more than 180 calendar days, shall constitute failure to serve unless the customer and electric utility have otherwise agreed in writing, to a longer term.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-23-9. Utility acknowledgement of customer complaint inquiries

If PUD contacts a utility concerning a customer complaint, the utility shall respond to PUD within the following time periods:

(1) Inquiries regarding disconnection, suspension, or termination of service shall be acknowledged by the utility within one (1) business day of receipt of inquiry from PUD.

(2) Inquiries other than for disconnection, suspension, or termination of service shall be acknowledged by the utility within three (3) business days of receipt of inquiry from PUD.

[Source: Added at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 25. OPERATIONS REQUIREMENTS FOR UTILITIES

PART 1. OPERATION MAINTENANCE AND RECORDS

165:35-25-1. Clearance for house and equipment moving

Where a house, structure, or equipment is to be moved upon, across or over roadways, or along a way over which electric wires are strung, advance notice in writing must be made to the utility of the dimensions of the object, the time to be moved, and the precise route over which to be moved. Payment shall be made in advance to the utility of the cost of providing clearance of wires. In no case shall anyone other than authorized employees of the utility remove, cut, rise, or handle any wires in connection with the moving and providing of clearance.

165:35-25-2. Extension of distribution systems

(a) **Free extension.** The utility shall extend its overhead distribution lines a distance of three hundred feet (300') to provide service to each bona fide application for residential service, without cost to the consumer. The utility may prescribe terms and conditions of extending service to applicants for other types of service, and for extensions for low load service such as wells, security lights, and fence charges, and for extension policy required by law or by the terms of a financing agreement; which provisions, when filed with and approved by the Commission, shall be deemed to constitute compliance with this Section.

(b) **Tariff requirements of extension.** A utility shall include in its filed tariffs, terms and conditions of furnishing underground service which shall provide for determining and recovery by the utility for the additional cost of providing underground service, and the responsibility for trenching and backfilling, and the method of calculating costs of construction.

(c) **Extension above free limit.** If the extension of the distribution system necessary to furnish service to an applicant or group of applicants is greater than specified in (b) of this Section, the utility shall require payment of the cost of the extension over the free limit before extending the distribution system.

(d) **Extension may be made above free limit when economically justified.** In lieu of making an extension pursuant to (a) and (b) of this Section, the utility may make an extension above the free limit upon receipt of a lesser payment or no payment, when the gross anticipated annual revenue from the extension will provide the utility with adequate return upon its investment, pursuant to a formula approved by the Commission or contained in its approved terms and conditions of service.

(e) **Determination of the length and cost of an extension.** For purposes of measuring extensions under this Section, the distance shall be measured along lines of proper construction from the nearest point of connection to the point of delivery on the property to be served. A required advance for construction shall be calculated from the total construction cost of the extension from which there shall be deducted:

(1) Any cost incident to excess capacity above that required to serve the applicant or group of applicants.

(2) Any cost incident to future expansions or to continue a construction plan of the utility.

(3) The cost of the free extension to which the applicant would be entitled.

(f) **Extensions applicable to prospective real estate subdivisions.**

(1) In lieu of extensions pursuant to other provisions of this Section, the utility may require a developer desiring an extension to a prospective real estate subdivision to make an advance for construction equal to the estimated total cost of the project before construction or the extension is started, which advance for construction shall not draw interest. The term "project" includes the entire distribution construction necessary to serve the subdivision and all line extensions to serve the individual parcels of said subdivision. In no case shall the total amount refunded exceed the amount advanced for construction with the utility. Consumers locating on an extension made pursuant to this paragraph shall not be required to make an extension advance for construction.

(2) The utility may require the developer desiring service to a prospective real estate subdivision to make an advance for construction equal to the estimated cost of the distribution system without line extensions. In such cases no refund to the developer will be made upon connection of individual line extension within the subdivision.

(3) A utility may enter into a contract with a developer which shall be deemed a special contract governed by OAC 165:35-5-1(c).

(g) **Appeals to the Commission.** If the extension above the free limits is of such length and the future anticipated revenues therefrom so small that it is doubtful that the extension would ever make a fair return on the investment, the utility or any interested person may apply to the Commission for an appropriate order.

(h) **Property of extension.** Every extension shall at all times be the property of the utility, regardless of whether an advance for construction is made in aid of its construction. At the end of five (5) years, any unrebated portion of a contribution or advance for construction made subject to refund shall become the property of the utility.

(i) **Adoption of policy by utility.** The utility may adopt a policy for extension to be made for the purpose of serving irrigation wells and/or oil field water flooding projects and for advances for construction for payment of all or part of the cost thereof by such consumer, which policy shall be prescribed in its approved tariffs.

[Source: Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-25-3. Maintenance of plant, equipment, and facilities

(a) **Safety of plant and system.** Each utility shall install, operate, and maintain its entire plant and system in such condition as will enable it to furnish safe and adequate service, subject only to emergency conditions beyond its control. Utilities shall also perform routine inspections of overhead electric supply lines and accessible facilities for hazards to the public.

(b) **Accepted good practice.** The generating, transmission, and distribution system, including but not limited to generating plants and equipment, transmission lines, substations, overhead systems, underground systems, street lighting systems, service wires and support equipment attachments, transformers, meters and measuring equipment, and remote meter reading equipment shall be constructed, installed, maintained, and operated in accordance with accepted good practice up to and including the point of delivery to the consumer. "Accepted good practice" shall be defined by the applicable rules governing installation, operations, maintenance, and safety contained in the NEC.

(c) **Compliance with the NEC.** The installation and maintenance of electric utility systems shall comply with the NEC minimum standard requirements.

(1) Only the specific minimum clearances required by the NEC shall be required by this Chapter. Construction and facilities which meet the specific minimum clearances shall be deemed to meet the purpose of the NEC of the "practical safeguarding of persons." Any additional clearances provided will be at the discretion of the electric utility, or as directed by the Commission, and shall not be required or necessary to provide additional public safety.

(2) On all underground construction completed after the effective date of this Chapter, the utility shall place warning labels (of a Commission-approved design) at all locations where aboveground equipment and facilities are readily accessible to the public.

(3) The utility shall perform detailed inspections of its overhead facilities to identify any potential safety issues that could impact service or public safety. Utilities shall submit their inspection programs to PUD.

(d) Duties of pole owners and pole occupants.

(1) A pole owner must establish, maintain, and make available to pole occupants its joint use construction standards for attachments to its poles, and for joint space in conduits. Standards for attachment must apply uniformly to attachments by all operators, including the pole owner.

(2) A pole owner must establish and maintain mutually agreeable protocols for communications between the pole owner, pole occupants, and PUD. Such protocols shall include, but not be limited to including, standards for notification of pole abandonment, replacements, or moves. Such protocols shall be available upon request to PUD.

(3) Primary responsibility to rectify safety problems shall lie with the pole occupant whose facilities are in violation. In the event facilities are abandoned, the pole owner shall work with PUD to rectify the safety concern, and shall correct any unsafe condition to alleviate a safety risk, or a potential risk, to the general public and/or property.

(4) Nothing in this section shall be interpreted as requiring pole owners to allow pole occupants access to their poles. Further, nothing in this section indicates that the Commission shall have any right to regulate the rates charged by pole owners for access to poles.

(5) After a major event, a utility shall be given a ninety (90) day grace period to complete service restoration to the affected area and to conduct any post-inspection analyses. Utilities may request an extension of the grace period from the PUD Director by submitting the request in writing.

(e) Reliability of supply. The generating capacity of a utility's plant, supplemented by the electric power regularly available from other sources or firm contracts for electric power by a utility which operates no generating plants, must be sufficiently large to meet all normal demands for service and provide a reasonable reserve for emergencies.

(f) Quality of service.

(1) In the event that any consumer operates or connects any electrical device to his/her electric system which causes an interference, noise, distortion of the 60 Hz sine wave, or other disturbance on the system of the utility which results in a disruption, disturbance, or interference to the utility, its consumers, or a communication company or its consumers, the utility shall:

(A) Require the consumer causing the problem to take corrective measures by installing suitable or special equipment necessary to

eliminate or reasonably limit such adverse effect, or
(B) Install, at the consumer's expense, equipment specifically designed to reasonably limit such adverse effect.

(2) The consumer causing the problem shall bear all expenses necessary to eliminate the adverse conditions or be subject to a discontinuance of service after written notice so that other consumers are not deprived of the quality of service provided prior to the existence of the problem. Where the utility believes the condition creates a hazard to the public, the utility, or the property, the disconnection may be made without prior notice. However, the utility shall notify the consumer as soon as practical after the disconnection.

(g) **Harmonics.** In 60 Hertz electric power systems, a harmonic is a sinusoidal component of the 60 Hertz fundamental wave having a frequency that is an integral multiple of the fundamental frequency. "Excessive harmonics," in this subsection, shall mean levels of current or voltage distortion at the point of common coupling (metering point) between the utility and the consumer outside the levels recommended in the IEEE standard referenced in subsection (g)(1). Each utility shall assist every consumer or communications provider affected with problems caused by excessive harmonics and consumers or communications providers affected in exceptional cases as described in subsection (f)(5).

(1) **Applicable standards.** In addressing harmonics problems, the utility and the consumer shall implement, to the extent reasonably practicable and in conformance with prudent operation, the practices outlined in IEEE Standard 519-1992, *IEEE Recommended Practices and Requirements for Harmonic Control in Electric Power Systems*, or any successor IEEE standard, to the extent not inconsistent with law, including state and federal statutes, orders, and regulations, and applicable municipal regulations.

(2) **Investigation.** After notice by a consumer or communications provider that it is experiencing problems caused by harmonics, or if a utility otherwise becomes aware of harmonics conditions adversely affecting a consumer or communications provider, the utility shall determine whether the condition constitutes excessive harmonics. If so, the utility shall investigate and determine the cause of the excessive harmonics.

(3) **Excessive harmonics created by consumer.** If a utility determines that a consumer has created excessive harmonics that cause or are reasonably likely to cause another consumer or communications provider to receive unsafe, unreliable or inadequate electric service, the utility shall provide written notice to the consumer creating excessive harmonics. The notice shall state that the utility has determined that the consumer has created an excessive harmonics condition and that the utility has explained the source and consequences of the harmonics problem. The notice shall give the consumer two options to cure the problem.

(A) The utility may cure the problem by working on the consumer's electric facilities at a mutually agreeable time and assess the investigation and repair costs to the consumer.

(B) The consumer may elect to cure the problem at its option and its cost, but the remedy shall occur within a reasonable time, which will be specified in the notice.

(4) **Failure of the consumer to remedy the problem.** Failure of the consumer to remedy the problem may require the utility to disconnect the consumer's service. The utility shall then remedy the excessive harmonics

condition, or the utility may determine that the consumer has remedied the condition within the time specified. In the event the consumer refuses to allow the utility to remedy the problem and does not stop creating excessive harmonics within the time specified, the utility may disconnect the consumer's service. Before disconnecting pursuant to this subsection, the utility shall provide written notice of its intent to disconnect at least five (5) business days before doing so, unless the consumer grants the utility access to its electric facilities or ceases creating excessive harmonics. The utility may disconnect the consumer five (5) business days after providing the notice, unless the consumer grants the utility access to its electric facilities or ceases creating excessive harmonics.

(5) **Excessive harmonics created by a utility or third party.** If a utility determines that its operation or facilities, or the operations or facilities of a third party other than a consumer, created excessive harmonics that causes, or is reasonably likely to cause, a consumer or communications provider to receive unsafe, unreliable or inadequate electric service, the utility shall remedy the excessive harmonics condition at the earliest practical date.

(6) **Excessive total harmonic distortion created by two or more harmonic sources within IEEE 519 limits.** If, in its investigation of a harmonics problem, an electric utility determines that two or more consumer's harmonic loads are individually within IEEE 519 limits but the sum of the loads are in excess of the IEEE 519 limits, the utility may require each consumer to reduce its harmonic levels below the limits specified in IEEE 519.

(7) **Cost responsibility.** Each utility or third party that created an excessive harmonics condition, or that investigated or remedied an excessive harmonics condition created by a third party other than a consumer, must bear the costs incurred in investigating and remedying the condition, and shall not assess any fees to the affected consumer.

(h) **Power quality monitoring.** In addressing power quality monitoring, each utility shall implement, to the extent reasonably practicable and in conformance with prudent operation, the practices outlined in IEEE Standard 1159-1995, *IEEE Recommended Practice for Monitoring Electric Power Quality*, or any successor IEEE standard, to the extent not inconsistent with law, including state and federal statutes, orders, and regulations, and applicable municipal regulations.

(i) If PUD informs the utility of any safety issues concerning the utility's plant, equipment, or facilities by identifying the relevant NEC, Commission rule, or other applicable Federal or State laws implicated by the safety issue, the utility shall electronically provide photographic evidence to PUD showing completion of work and that the issue has been resolved.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 14 Ok Reg 2560, eff 7-1-97; Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 19 Ok Reg 1968, eff 7-1-02; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-25-4. Daily record of generating plants

Each utility shall keep a daily record of the operation of each of its generating plants showing the energy generated, station use, net output of plant, length of time each unit is in operation, and cause and reason for any unexpected plant shutdown. A utility having only generating plants of 5,000 KW or less is exempt from this Section.

[Source: Amended at 21 Ok Reg 2091, eff 7-1-04; Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-25-5. Load reduction

No utility shall execute plans or procedures, without proper authorization of the Commission, which will reduce the utility's load in Oklahoma, for the purpose of diverting power for use outside of Oklahoma, except to provide power and energy to its own system outside Oklahoma.

165:35-25-6. Record of accidents

Each utility shall maintain adequate records of accidents occurring in connection with its operations resulting in injury to persons or damage to property. Accident reports shall be available for inspection by the Commission or its representative.

PART 3. RELIABILITY OF SERVICE AND RELIABILITY PROGRAM

165:35-25-12. Adoption of Standards

For the purposes of this Subchapter, the Commission adopts the most current edition of the IEEE's Std. 1366, *IEEE Guide for Electric Power Distribution Reliability Indices*.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04]

165:35-25-13. Definitions

In addition to the definitions set forth in IEEE's Std. 1366, *IEEE Guide for Electric Power Distribution Reliability Indices*, the following words and terms, when used in this Part, shall have the following meaning:

"Major event" means a catastrophic event that exceeds the design limits of the electric power system, such as an extreme storm, tornado or earthquake. These events shall include situations where there is a loss of service to 10% or more of the customers in a region, and where full restoration of all affected customers requires more than 24 hours from the beginning of the event.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04]

165:35-25-14. Reliability program

(a) Each utility, to the maximum extent practicable, shall design and maintain a program to limit the frequency and duration of electric service interruptions and to maintain acceptable electric service reliability levels and to sustain that reliability over time. This program must address all the factors that impact the reliability of the distribution system, including, but not limited to:

- (1) The age, distribution, and location of equipment on each circuit;
- (2) The number, density, and location of customers on each circuit;
- (3) The location and density of trees on the system;
- (4) Annual vegetation management plan; and
- (5) The impacts on distribution system reliability of animals, wind, storms, ice, and automobile accidents.

(b) The program shall include inspection, maintenance, repair and replacement standards that ensure timely and efficient service restoration as well as preventive and emergency maintenance. In establishing such standards it is imperative that the utility locate sufficient personnel, equipment, repair materials, and supplies strategically throughout its service territory to fully and adequately meet the reliability standards established herein.

(c) The program shall give special emphasis to the improvement of the worst-performing circuits in each region of the utility's service territory.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04; Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-25-15. Vegetation management plan

(a) Vegetation management means all activities associated with the trimming, removal, or control of plant material in the proximity of energized electric utility conductors and equipment.

(b) As part of its Reliability program, each utility shall prepare an annual vegetation management plan and submit this plan to the Commission for review prior to implementation. This plan shall be an integrated part of the utility's Reliability program and shall include, but not be limited to:

- (1) Definitions of activities;
- (2) Calendar of activities;
- (3) Implementation plan;
- (4) Criteria to assess results of the vegetation management plan; and
- (5) The name and contact information of a company representative who is knowledgeable about the plan, its implementation and potential results.

(c) Each utility shall, at a minimum, perform vegetation management on a 4-year cycle, unless needed otherwise or unless otherwise ordered by the Commission. The utility may request an exemption from this requirement by submitting an alternative(s) to the 4-year cycle to the Commission in its annual vegetation management plan for review and hearing.

(d) Each utility shall track and record all vegetation management costs for easy identification upon Commission review.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04]

165:35-25-16. Notification for vegetation management activities

When trimming trees and trimming or removing other vegetation in electric line right-of-way maintenance in urban areas, the utility shall make a reasonable attempt to contact the landowner, customer, or tenant at a minimum of twenty-four (24) hours prior to beginning work on the property. In rural areas the utility shall make a reasonable attempt to contact the landowner, customer or tenant, if known, a reasonable time prior to beginning work on the property. This contact may take the form of a written notice delivered to the landowner's, customer's, or tenant's residence; a telephone call to the landowner, customer, or tenant; or an in-person contact. Reasonable effort shall be made by the utility to accommodate a landowner's, customer's, or tenant's desire to be present when work is done on his or her property. Vegetation management related to emergency repairs is exempt from this notification requirement.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04]

165:35-25-17. [RESERVED]

[Source: Reserved at 21 Ok Reg 2091, eff 7-1-04]

165:35-25-18. Performance levels

(a) **Utility's responsibility and indices used.** It shall be the utility's responsibility to maintain and compile the data necessary to compute System Average Interruption Duration Index (SAIDI) and System Average Interruption Frequency Index (SAIFI) (and to the maximum extent practicable, Momentary Average

Interruption Frequency Index (MAIFI)). These indices shall be computed by the utility for each reporting year, or any sub-period thereof, as requested by PUD. The data maintained and compiled for the computation of the indices shall conform strictly to their respective definitions as set forth in this Part. The indices shall be computed for the utility's entire service territory, for each region, and for each distribution circuit. Computation of the indices shall not include interruptions that have resulted from operating conditions that are beyond the utility's control (such as a major event, as that term is defined and used under this subchapter). Each utility shall maintain the raw interruption and duration data as well as the computation of the indices for each reporting year, for a period of not less than three years after the annual report filing deadline. The utility shall maintain all data necessary to compute SAIDI and SAIFI (and to the maximum extent practicable, MAIFI), for all major events but is not required to make such computations except as requested by PUD.

(b) **Minimum performance level.** Upon receipt of the utility's annual report, PUD will compare the indices computed for the utility's service territory to the minimum performance level. The minimum performance level shall represent the lower threshold of adequate service below which further review, analysis, and corrective action may be required. The minimum performance levels shall be reached when the SAIDI and SAIFI values of each utility's service are equal to or better than the minimum performance levels for these indices. The base performance level for SAIDI and SAIFI for the period January 2005 through December 2009 shall be established through engineering and economic studies of historical performance and system operations prepared by each utility, in consultation with PUD Staff, and submitted as part of each utility's reliability report submitted March 1, 2005. This base performance level shall be recomputed by each utility every fifth (5th) year and submitted to PUD in the next year's reliability report. After notice and hearing, the Commission may modify the minimum performance level of any utility. The minimum performance level for a utility with less than 100,000 customers shall be adjusted to account for variances in the rural nature or other special characteristics of their distribution system. The adjusted minimum performance level for a utility with less than 100,000 customers shall be determined by multiplying the annual minimum performance level by the ratio of miles of line per customer plus 1 for the reporting year. It will be the responsibility of the utility to determine the adjusted minimum performance level using this formula for each reporting year. The utility's average number of customers for the prior reporting year shall determine the standards to be applied to the current reporting year.

(c) **Objective performance level.** The objective performance level shall represent a fully adequate level of service that each utility should strive to achieve and maintain. It shall be reached when the SAIDI and SAIFI values of each utility's service territory are for the year is within the bandwidth established based on the data gathered pursuant to the process described in OAC 165:35-25-18(b).

(d) **Commission Review.** In its review of a utility's cost of service and rate of return, the Commission may consider, in general rates cases, the utility's reliability reporting and levels for SAIDI, SAIFI, Customer Average Interruption Duration Index (CAIDI), and MAIFI.

(e) **Limitations to technology.** Utilities that do not have the technological capability to maintain and compile all such data, shall maintain and compile such data that it has available and utilizes to define and identify system reliability levels as well as outline progress towards attainment of additional technologies.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-25-19. Individual circuit reliability

Each utility shall maintain a program for identifying and analyzing its worst performing circuits during the course of each reporting year. The program shall include, but should not be limited to, an analysis of the top 5% worst performing circuits for the entire utility and for each of the utility's operating regions, if the utility is divided into regions, and the actions taken to improve their performance. The worst performing circuits shall be identified and ranked using the SAIDI and SAIFI (and to the maximum extent practicable, MAIFI) values computed for each circuit, and in any other manner chosen by the utility. The details and results of the ranking and program to improve the performance of these circuits shall be submitted as part of the annual reliability report described in 165:35-25-20.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04]

165:35-25-20. Annual reliability report

(a) Each utility shall submit an annual reliability report to PUD by March 1 of each year, beginning March 1, 2005.

(b) The annual reliability report shall include the following:

(1) A description of all vegetation management it performed for the previous calendar year and the vegetation management it plans to perform for the current year.

(2) SAIDI and SAIFI (and to the maximum extent practicable, MAIFI) values computed for the entire service territory and displayed in tabular form. SAIDI and SAIFI events should be calculated using a sustained time of five (5) minutes or more for Root Mean Square (RMS) zero voltages; MAIFI events should be calculated using any time less than five (5) minutes for RMS zero voltages. Multiple interruptions within five (5) minutes are considered one momentary interruption event.

(3) SAIDI and SAIFI (and to the maximum extent practicable, MAIFI) values computed for each of the utility's regions and displayed in tabular form. SAIDI and SAIFI events should be calculated using a sustained time of five (5) minutes or more for RMS zero voltages; MAIFI events should be calculated using any time less than five (5) minutes for RMS zero voltages. Multiple interruptions within five (5) minutes are considered one momentary interruption event.

(4) A detailed report for each major event that is not included in the calculation of the reliability indices. The major event report shall include the interruption cause or causes, date, regional location, percentages of consumers without service in that region as a result of the event, the time or time frame in which service was lost to 10% or more of that region, the time the last consumer's service was restored in that region, and any other details that the utility or PUD believes will further justify the exclusion of the event from the calculations.

(5) A description of the program the utility has in place for analyzing and improving worst performing circuits and a summary of the results of the program for the reporting year.

(6) A description and map identifying the utility's service regions or operations divisions. Documentation and illustration of any changes in region boundaries as defined by the utility, and justification for such

changes.

(7) For each utility with less than 100,000 consumers, show the data used to calculate as well as the calculation of the rural adjusted minimum performance level.

(c) PUD reserves the right to request additional data and/or documents if necessary.

(d) **Limitations to technology.** Utilities that do not have the technological capability to maintain and compile all such data, shall maintain and compile such data that it has available and utilizes to define and identify system reliability levels as well as outline progress towards attainment of additional technologies.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

PART 5. UTILITY SCORECARD

165:35-25-24. Utility performance scorecard

(a) Using the data submitted pursuant to OAC 165:35-25-20, PUD shall annually prepare a scorecard for each utility covering the following areas:

- (1) SAIFI;
- (2) SAIDI;
- (3) MAIFI (to the extent that this measure is utilized);
- (4) Vegetation management; and
- (5) Worst performing circuits.

(b) The scorecard shall be prepared such that the performance of utilities of differing sizes and number of consumers can be directly compared.

(c) PUD's utility performance scorecards will be published annually not later than May 1.

[Source: Added at 21 Ok Reg 2091, eff 7-1-04; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 27. COST REPORTING AND ACCOUNTING

165:35-27-1. Cost of services, materials, or facilities for other types of business or subsidiaries

(a) When a utility is engaged in any type of nonutility business or operations, through subsidiaries or otherwise, or in any business not considered in ratemaking process by the Commission, and personnel, material, equipment, or any facility of the utility is supplied for the operation of such other type of business or subsidiary, the utility shall keep an accurate account of allocation of all of the cost of personnel, services, material, equipment, or any facility between utility and nonutility operations. There shall be a written accounting thereof for utility and nonutility operations on a monthly basis. This accounting will clearly delineate company's utility and non-utility expenses and revenues for the purposes of accurate ratemaking.

(b) The cost of keeping the records and any other expense caused by furnishing such services, materials, or facilities shall be charged to the recipient thereof. The term "all of the cost" in this Section shall mean actual cost plus any direct or indirect charges related to the cost of services, materials, or facilities calculated on the same basis used in allocating direct or indirect charges to the utility operations.

(c) Records of and reports on services, materials, or facilities of other types of business or subsidiaries referred to in this Section shall be available to PUD or its representative.

[Source: Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-27-2. Municipal fees, taxes, and other exactions

The aggregate amount of all franchise payments, or contributions or payments in lieu thereof, or other exactions imposed upon utilities or electric cooperatives by any municipality of this state for engaging in business within the municipality or for the use and occupancy of its streets and public ways is a matter between the municipality and the utility or electric cooperative. The amount of the exactions charged to and collected from the consumers by the utility shall be in accordance with the respective municipal ordinance or statute. The amount of such exactions shall be charged to consumers within said municipality pro rata in accordance with actual revenue associated with the provided service. The amount of such charges shall be separately stated as a line item on the regular billings to consumers as a dollar amount.

[Source: Amended at 13 Ok Reg 2435, eff 7-1-96; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-27-3. Method for compensating fuel or power cost changes; reporting for rate adjustment and billing purposes [REVOKED]

[Source: Revoked at 12 Ok Reg 2125, eff 7-1-95]

165:35-27-3.1. Reporting of purchased fuel and power for adjustment purposes

A utility having a purchased power adjustment clause or a fuel adjustment clause in its approved tariffs shall file periodic and detailed reports of its fuel and power purchases in such form as the Commission may require and as set forth in OAC165:50.

[Source: Added at 12 Ok Reg 2125, eff 7-1-95]

165:35-27-4. Accounting

- (a) The Uniform System of Accounts of FERC prescribed for Public Utilities and Licensees (Class A, B, C, and D) or prescribed by the RUS or other uniform system acceptable to the Commission may be adopted by a utility.
- (b) Electric utilities operating within Oklahoma shall be classed by revenue as follows:

CLASS ANNUAL GROSS OPERATING REVENUE

A	\$2,500,000 or more
B	\$1,000,000 to \$2,500,000
C	\$150,000 to \$1,000,000
D	\$25,000 to \$150,000

(c) No change in or departure from the system used by the utility will be permitted except upon order of the Commission, made after notice and hearing.

(d) The Annual Report FERC Form 1 - Class A and B Electric Companies and FERC Form 1A - Class C and D Electric Utility Companies promulgated by the FERC and RUS Report Form 7A promulgated by the RUS are hereby adopted for purposes of the annual report to this Commission by all Class A, B, C, and D

Electric Utilities filing such reports with the FERC and the RUS. Each utility having multistate utility operations, in addition to submitting with the Commission a copy of its annual report to the FERC if any, shall submit an annual report on a form furnished or approved by the Commission, of its utility service and operations in the State of Oklahoma. Any allocation of costs or revenues necessary in developing results of utility operations for the State of Oklahoma shall be accomplished on a basis acceptable to the Commission.

(e) The results of operations reported by each electric utility in its annual report to the Commission shall be reconciled with the results of operations shown on its books, records and in its other reports to the Commission.

(f) Each utility shall report to the Commission at the end for the utility's fiscal year on forms furnished or approved by the Commission, the book value of its utility plant. These reports and annual reports required by (d) of this Section shall be delivered to the Commission within five (5) business days of the date such reports are filed with either the FERC or RUS; provided that the Commission may grant an extension for time for good cause shown. In the event that the utility has requested an extension of time from FERC or RUS, it will advise the PUD Director, in writing, of such filing delay.

[Source: Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 29. ELECTRICITY PURCHASES FOR PRODUCERS AND PARALLEL OPERATION

165:35-29-1. Purchase of electricity from cogenerators or small power producers

(a) Purchases under this Section shall be from cogenerators and small power producers (producers) as defined and qualified under Section 201 of the Public Utility Regulatory Policies Act (PURPA) of 1978. Producers shall not be utilities as defined elsewhere in the Chapter.

(b) Unless otherwise provided for by this Section and in an approved experimental purchase tariff, the utility's Terms and Conditions of Service shall apply to joint consumer producers.

(c) Each utility will maintain a list available to the Commission for all potential cogenerators and small power producers who have been in written contact with the utility and record the disposition of each such line of inquiry.

(d) Each utility will maintain an experimental purchase tariff on file applicable to purchases from certain facilities of 300 KW or less. This tariff will consist of a Purchase Agreement form prepared by the utility and approved by the Commission; Purchase Rate Schedules for wind, photo-voltaic and stored water hydro power, which reflect the utility's avoided costs, as approved by the Commission; and the experimental standard Terms and Conditions of Purchase of the Commission.

(e) Each utility will maintain on file for all other potential cogenerators and small power producers information sufficient to guide such parties in regard to avoided costs and procedures. Such information shall include, but not be limited to:

- (1) The utility's response to avoided cost interrogatories as requested by the Commission.
- (2) A copy of this Chapter.
- (3) A copy of the experimental tariff.
- (4) Such reports and analyses as shall be prescribed by the Commission.
- (5) For investor owned utilities, the information required by Section 210 of the Public Utility Regulatory Policies Act (PURPA) of 1978.

- (f) A cogenerator or small power producer has the right:
- (1) To generate in parallel with the utility.
 - (2) To sell, at his/her option, his/her total generation or his/her generation net of electrical requirements.
 - (3) To receive for his/her generation a fair rate based on the costs avoided by the utility because of his/her delivery, reliability, dispatchability and other factors, as determined by the Commission.
 - (4) To other substantive rights granted by PURPA.
 - (5) To good faith negotiation by the utility.
 - (6) To bring complaint or dispute to the Commission for mediation, hearing or other resolution.
- (g) Nothing in this Section will prevent a qualified producer from executing a special purchase contract with a utility, provided that the contract must be approved by the Commission prior to its effective date.

[Source: Amended at 10 Ok Reg 2633, eff 6-25-93; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-29-2. Parallel operation of generation facilities

- (a) This Section applies to any party (interconnected party) who wishes to operate or who is operating generation facilities in parallel with a utility except the following:
- (1) Other utilities subject to the rules of this Commission or FERC or its successor organization, if any.
 - (2) Parties qualifying under OAC 165:35-29-1, and who have not agreed with the utility to operate under this Section.
 - (3) Parties operating in parallel according to an agreement signed prior to March 20, 1981, who have not agreed with the utility to operate under OAC 165:35-29-1.
- (b) As a condition of service, no interconnecting party may interconnect or operate generation facilities in parallel with a utility without prior written approval by the utility of such parallel operation and for the interconnection facilities.
- (c) Interconnection requirements shall be reasonable and all costs (over normal policies under the terms of service) shall be borne by the interconnecting party.
- (d) Any party meeting the requirements in (a) through (d) of this Section shall have the right to operate in parallel with the utility using a detented service meter so that no credits are obtained for amounts returned to the utility system. The utility may establish buy back rates or enter into special contracts that are otherwise consistent with this Chapter.
- (e) All agreements and contracts for such interconnection and parallel operation shall be submitted to the Commission for approval prior to interconnection, except as otherwise ordered by the Commission. In no event shall the terms of such agreement or contract be less favorable to the utility than those provided under OAC 165:35-29-1.
- (f) Upon interconnection, the PUD Director shall be notified by the utility of the date, name, and legal address of the interconnecting party, and the location and description of the facilities.

[Source: Amended at 16 Ok Reg 2237, eff 7-1-99; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 31. AFFILIATE TRANSACTIONS AND FINANCIAL TRANSACTIONS OF UTILITIES AND AFFILIATES

165:35-31-1. Purpose, scope and application of Subchapter

(a) The affiliate transactions and financial transactions (such as stock, bond, derivatives, and any financing instrument issuance) rules are promulgated to establish enforcement, reporting and monitoring provisions of utilities as to these transactions.

(b) The intention of this Subchapter includes [but is not limited to]:

- (1) The establishment of standards for transactions between utilities and their affiliates for purposes of determining fair, just and reasonable rates and charges;
- (2) The prevention of subsidization of an affiliate by a utility;
- (3) The support of fair and clear cost allocations; and
- (4) The protection of the customers of a utility from being subjected to any unreasonable financial obligation or costs of an affiliate.

[Source: Added at 21 Ok Reg 2085, eff 7-1-04]

165:35-31-2. Determination of confidential information

(a) If a utility that seeks to provide electric utility services is required by this Subchapter to submit information to the Commission that is alleged to be confidential, a motion for a protective order concerning said confidential information may be filed requesting a determination be made by the Commission to protect said information pursuant to 51 O.S. § 24A.22.

(b) After a determination regarding approval of any protective order by the Commission, PUD, and the Attorney General's Office may, at its option, review the information claimed to be confidential at a mutually agreed upon location.

(c) In the absence of a protective order, all information considered by the Commission in establishing utility tariffs and in determining compliance with the rules of this Subchapter shall not be maintained in confidence by the Commission.

[Source: Added at 21 Ok Reg 2085, eff 7-1-04; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-31-3. Exemption for corporate and shared services

Corporate and support services are exempt from asymmetrical pricing, to the extent that the affiliate information requirements in Chapter 70 and OAC 165:35-31-4 are satisfied.

[Source: Added at 21 Ok Reg 2085, eff 7-1-04; Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-31-4. Request for Information

Required Information. Upon request by the Commission, affiliate information shall be provided pursuant to this Subchapter and shall contain records and work papers which provide, at a minimum, the following information and such other information that the Commission shall request:

- (1) Consolidated Companies and Subsidiaries Balance Sheet.
- (2) Income Statements.
- (3) Cost Allocation Basis, if applicable.
- (4) Affiliate/Subsidiary General Data: Narrative(s) providing:
 - (A) The date of establishment of each affiliate and/or subsidiary;
 - (B) A statement of each affiliate and/or subsidiary's core businesses;
 - (C) The utility company resources used in establishment of each affiliate and/or subsidiary; and

(D) The utility company resources currently being used by each affiliate and/or subsidiary, either directly or indirectly.

(5) Affiliate/Subsidiary Contracts: Copies of any and all contracts with affiliates and/or subsidiaries.

(6) Assets Sold/Transferred to Affiliates/Subsidiaries: A listing, by asset category and net book value, of assets sold or transferred to any affiliate and/or subsidiary since the utility's last rate case.

(7) Services/Products from Affiliates/Subsidiaries: A listing and description of the services and/or products (and related costs) provided by each affiliated and/or subsidiary company to the utility for the required period.

(8) Services/Products to Affiliates/Subsidiaries: A listing of any significant utility company facilities and/or resources, whether plant, other assets or personnel that were used during the required period, by each affiliate and/or subsidiary. The cost of the resources shall be indicated.

(9) Cost of Debt or Financing: A listing of debt instruments bearing any cost of financing transactions, in part or in full, or any debt, equity, trading activity, or derivative which has a direct or indirect financial or cost impact upon the utility.

165:35-31-19. Standards for transactions between utilities and affiliate(s)

Electric utilities must conduct their business to conform to the following standards:

- (1) Electric utilities must apply any tariff provision in the same manner to the same or similarly situated persons if there is discretion in the application of the provision.
- (2) Electric utilities must strictly enforce a tariff provision for which there is no discretion in the application of the provision.
- (3) Except as necessary for physical operational reasons, electric utilities may not, through a tariff provision or otherwise, give their affiliates or knowingly give customers of their affiliates preference over other utility customers in matters relating to any service offered including, but not limited to: generation, transmission, distribution and ancillary services, scheduling, balancing, or curtailment policy.
- (4) Unless such disclosure is made public simultaneously or as near to the event as possible, electric utilities shall not disclose to their affiliates any information which they receive from, a non-affiliated customer, a potential customer, any agent of such customer, or potential customer, or other entity seeking to supply electricity to a customer or potential customer.
- (5) An electric utility's operating employees and the operating employees of its affiliate must function independently of each other and shall be employed by separate corporate entities.
- (6) Electric utilities and their affiliates shall keep separate books of accounts and records.
- (7) Electric utilities shall establish a complaint procedure. In the event the electric utility and the complainant are unable to resolve a complaint, the complainant may address the complaint to the Commission.
- (8) With respect to any transaction or agreement relating in any way to electric generation, transmission, distribution and ancillary services, an electric utility shall conduct all such transactions with any of its affiliates on an arm's length basis.
- (9) The Commission shall resolve affiliate transaction disputes or abuses on a case-by-case basis. Any aggrieved party may file a complaint with the Commission alleging the particulars giving rise to the alleged dispute or abuse. The Commission shall consider at a minimum, the following issues when hearing a complaint:

(A) Whether or not the information or data furnished to the affiliate was generally available to other market participants.

(B) Whether or not the electric utility conducted business in such a manner that actual or expected expenses were shifted from the non-regulated subsidiary to the regulated entity.

(C) Whether or not the electric utility conducted business in such a manner that actual or expected revenues were shifted from the regulated entity to the non-regulated entity.

(D) Whether or not the regulated entity offered terms, condition or rates for the provision of electric services to the affiliate that it refused to provide to other customers or whether such resulted in the affiliate having an unfair advantage.

(10) Electric utilities must process all similar requests for electric services in the same manner and within the same period of time.

(11) Electric utilities shall not provide leads to their affiliates and shall refrain from giving any appearance that the electric utility speaks on behalf of its affiliate(s). Nor shall the affiliate trade upon, promote or advertise its affiliation or suggest that it receives preferential treatment as a result of its affiliation. The use of a common corporate or parent holding company name shall not be a violation of this provision so long as the regulated utility and the affiliate entities can be distinguished.

(12) Electric utilities, except for billing and collection services and customer service, or by order of the Commission, shall not share their customer list or related customer information with affiliates unless the information is simultaneously shared with non-affiliate entities.

(13) The electric utility shall not communicate with any third party that any advantage in the provision of electric services may accrue to such third party as a result of that third party's dealings with the electric utility's affiliate.

[Source: Added at 21 Ok Reg 2085, eff 7-1-04]

165:35-31-20. Sales of services, products, or assets between regulated and unregulated affiliates

(a) **Transactions between a utility and its affiliates.** A utility shall not subsidize the business activities of any affiliate with revenues from a regulated service. A utility cannot recover more than its reasonable fair share of the fully allocated costs for any transaction or shared services.

(b) **Contemporaneous record requirement.** A utility shall maintain a contemporaneous written record of all individual transactions with a value equal to or over one million dollars with its affiliates, excluding those involving shared services or corporate support services and those transactions governed by tariffs or special contracts. Such records, which shall include at a minimum, the date of the transaction, name of affiliate(s) involved, name of a utility employee knowledgeable about the transaction, and a detailed description of the transaction with appropriate support documentation for review purposes, shall be maintained by the utility for three years.

(c) **Transfers of assets.** Except as otherwise required by federal statute or regulation, or pursuant to Commission authorized competitive bidding, tariffs, special contract, or as otherwise ordered by the Commission; cost recovery for property transferred from a utility to its affiliate shall be priced at the "higher of cost or fair market value." Except as otherwise required by federal statute or

regulation, or pursuant to Commission authorized competitive bidding, tariffs, special contract or as otherwise ordered by the Commission; asset valuation and transfers of property transferred from an affiliate to its utility shall be priced at the "lower of cost or fair market value." No matter the origin of the transaction, all transfers between a utility and an affiliate will be individually scrutinized by the Commission on a case-by-case basis.

(d) **Sale of products or services.** Except as otherwise required by federal or state statute or regulation, or pursuant to Commission authorized competitive bidding, tariffs, special contract or as otherwise ordered by the Commission; any sale of products and services provided from the affiliate to the utility shall be priced at the "lower of cost or fair market value." Except as otherwise required by federal statute or regulation, or pursuant to Commission authorized competitive bidding, tariffs, special contract or as otherwise ordered by the Commission; any sale of jurisdictional products and services provided from the utility to the affiliate shall be priced at the "higher of cost or fair market value."

(e) **Joint purchases.** A utility may make a joint purchase with its affiliates of goods and services involving goods and/or services necessary for utility operations. The utility must ensure that all joint purchases are priced, reported, and conducted in a manner that permits clear identification of the utility's and the affiliate's allocations of such purchases.

(f) **Tying arrangements prohibited.** Unless otherwise allowed by the Commission through a rule, order or tariff, a utility shall not condition the provision of any product, service, pricing benefit, waivers or alternative terms or conditions upon the purchase of any other good or service from the utility's affiliate.

165:35-31-21. [RESERVED]

[Source: Reserved at 21 Ok Reg 2085, eff 7-1-04]

165:35-31-22. Financial transactions by utilities or their affiliate(s)

(a) **Financial transactions.** Financial transactions include, but are not limited to, stock, bond, derivatives, and any financing instrument issuance as well any debt, equity, derivative or related transaction.

(b) **Separate books and records.** A utility shall keep separate books of accounts and records from its affiliates. The Commission may review records relating to any transaction between a utility and an affiliate to ensure compliance with this Subchapter including the records of both the utility and the affiliate relating to any transaction.

(1) In accordance with generally accepted accounting principles, a utility shall record all transactions with its affiliates, whether they involve direct or indirect expenses.

(2) A utility shall prepare non-GAAP financial statements that are not consolidated with those of its affiliates.

(3) A utility shall have a cost allocation manual or upon Commission request, be able to provide its cost allocation methodology in written form with supporting documentation. Such records shall reflect the transaction and the allocated costs, with supporting documentation, to justify the valuation.

(c) **Limited credit, investment or financing support by a utility.** A utility may share credit, investment, or financing arrangements with its affiliates if it complies with paragraphs (1) and (2) of this Subsection.

(1) The utility shall implement adequate safeguards precluding employees of an affiliate from gaining access to information in a manner that would allow or provide a means to transfer confidential information from a utility to an affiliate, create an opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create opportunities for subsidization of affiliates.

(2) Where an affiliate obtains credit under any arrangement that would include a pledge of any assets in the rate base of the utility or a pledge of cash necessary for utility operations the transactions shall be reviewed by the Commission on a case-by-case basis.

(d) **Cost of financing transactions of any affiliate.** The cost of any financial transactions, in part or in full, or any debt, equity, trading activity, or derivative, of any parent company, holding company or any affiliate, which has a direct or indirect financial or cost impact upon the utility shall be reviewed by the Commission on a case-by-case basis.

165:35-31-25. Remedies and enforcement for violation of the standards of conduct

(a) A complaint may be brought to the Commission at any time. The Commission encourages informal resolutions. Whenever a controversy does exist in connection with the interpretation of this Subchapter, the applicability of the requirements set forth herein, or any right or duty imposed thereby; the Commission, upon application of any interested party and after notice and hearing, will enter such order thereon as it may deem appropriate.

(b) Each violation of this Subchapter shall be considered to be a separate occurrence.

(c) If the Commission determines, after investigation and an evidentiary hearing, that the electric utility has violated these affiliate rules, the Commission may assess a fine against the utility for contempt as set forth in 17 O.S. § 1 *et seq.* and may order such further action as may be fair, just and reasonable under the circumstances of the proceeding.

(d) The Commission may act upon any violation of these standards including but not limited to the following:

(1) Prospective limitation or restriction of the amount, percentage or value of cost recovery for transactions entered into between a utility and an affiliate;

(2) Denial of recovery of costs, all or in part, for business transactions between the utility and the affiliate; or

(3) Application of any other remedy available to the Commission, including financial penalties.

(e) **No immunity from state law.** Nothing in this subchapter shall relieve any utility from any duty prescribed by the laws of the State of Oklahoma.

SUBCHAPTER 33. HOMELAND SECURITY AND CRITICAL INFRASTRUCTURE

165:35-33-1. Purpose and scope

- (a) The purpose of this Subchapter is to require utilities to take all reasonable measures necessary to protect their critical infrastructures from extended interruption of service from all extraordinary events, natural and man-made.
- (b) The Commission requires electric utilities to develop, implement, and maintain Homeland Security and Critical Infrastructure Plans according to the industry standards enumerated in sub-section (d) below.
- (c) To the extent that a utility seeks to recover costs for security measures outside of a general rate review for the implementation of Homeland Security and/or Critical Infrastructure protections, the utility shall comply with all provisions of this Subchapter.
- (d) Each electric utility serving Oklahoma jurisdictional ratepayers is required to follow the most current applicable North American Electric Reliability Corporation's (NERC's) Security Guidelines and Standards or equivalent cybersecurity framework, as may be amended from time to time, for use as guidelines for protecting the utility's Critical Infrastructure from extended service interruption.
- (e) Each electric utility seeking to recover costs for security measures from Oklahoma jurisdictional ratepayers outside of a general rate review shall develop, implement, and maintain a Critical Infrastructure and Security Plan as further set forth within this Subchapter.
- (f) If the utility has implemented a Security Plan or process in accordance with the applicable industry guidelines but is not seeking or receiving cost recovery for security-related costs, the utility shall submit the Certification Letter required by OAC 165:35-33-7(f) and the Plan shall be subject to review pursuant to the Authorized Participation and Confidentiality provisions of OAC 165:35-33-10 and OAC 165:35-33-11. The utility is not otherwise required to comply with the provisions of this Subchapter.
- (g) The Commission retains its jurisdictional and supervisory authority to address the reasonableness and/or prudence of any proposed security cost recovery.
- (h) Nothing in this subchapter shall relieve any utility from any duty otherwise prescribed by the laws of the State of Oklahoma or this Commission's rules.
- (i) Nothing in this Subchapter is intended to divest the utility of its right to object to any discovery requests from intervenors seeking access to "Highly Sensitive Confidential" materials.
- (j) If any provision of this Subchapter is held invalid, such invalidity shall not affect other provisions or applications of this Subchapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Subchapter are declared to be severable.

[Source: Added at 22 Ok Reg 704, eff 7-1-05; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-33-2. [RESERVED]

[Source: Reserved at 22 Ok Reg 704, eff 7-1-05]

165:35-33-3. Definitions

The following words and terms, when used in this Subchapter 33, shall have the following meaning, unless the context clearly indicates otherwise:

"Annual Report" means the Annual Report submitted by Commission Staff to the Commission beginning December 30, 2005 and by July 1 of each year thereafter, summarizing the results of Staff's review of each utility's Security Plan (and any Plan Update Reports), along with any recommendations that Staff may have regarding such Plan(s).

"Authorized Participant" means those persons authorized by the utility or as may otherwise be authorized by law and/or ordered by the Commission, to view highly sensitive confidential information. Such authorization shall be granted on a case-by-case basis and may extend to the utility, state government officials, persons having been granted intervenor status by the Commission and Commission authorized designees of the parties.

"Certification Letter" means the written certification to the Director of the Public Utility Division made by August 1, 2005 and on March 1 of each subsequent year thereafter, indicating that as of the date of the Certification Letter, the utility has a Plan or that it has updated the Plan and/or previous Plan Update Reports, has a Plan but is not seeking cost recovery or has no Plan in place.

"Critical Infrastructure" means the property of a utility located in the State of Oklahoma, comprised of either physical assets or computer software which, if severely damaged or destroyed, would have a significant impact on the ability of the utility to serve large numbers of customers for an extended period of time, would have a detrimental impact on the reliability or operability of the energy grid, or would cause significant risk to public health and safety.

"Highly Sensitive Confidential" means that the information is of such a sensitive nature that its public disclosure could be harmful to the security of a utility's critical infrastructure and as such it may only be viewed by those persons authorized by the utility or as may otherwise be ordered by the Commission.

"NERC" means the North American Electric Reliability Corporation.

"Plan" means a Homeland Security and Critical Infrastructure Plan including any subsequent Plan Update Reports that have been prepared with reference to the NERC GUIDELINES.

"Plan Update Report" means the written redlined changes made by the utility updating the Plan and/or previous Plan Update Reports. At the utility's option, changes will either be redlined or a history of changes may be maintained.

"Security Cost Rider" means the per billing unit rate mechanism whereby a utility may, upon approval and Order of this Commission, recover the costs of providing security for its Critical Infrastructure as defined under this Subchapter 33.

165:35-33-4. [RESERVED]

[Source: Reserved at 22 Ok Reg 704, eff 7-1-05]

165:35-33-5. Utility Security Plan

(a) Each electric utility is required to prepare and make available for inspection, a "Homeland Security and Critical Infrastructure Plan" ("Plan") that has been prepared with reference to the applicable NERC Security Guidelines and Standards or equivalent cybersecurity framework and standard as guidance with a defined cybersecurity strategy.

(b) The Plan shall be marked as "Highly Sensitive Confidential" and designate those facilities that the utility considers to be Critical Infrastructure (physical assets and computer software as defined in OAC 165:35-33-3 above), and shall set forth the utility's measures to secure such facilities from extended service interruption. The Plan shall also include an estimate of the costs necessary to achieve such measures.

(c) The Plan shall remain on site at the utility's business office in accordance with OAC 165:35-33-7(g) below and shall have the most current version of the redlined Plan Update Report attached to the clean version of the utility's latest Plan. At the utility's option, changes will either be redlined or a history of changes may be maintained.

(d) The Plan shall list all locations deemed by the utility to be critical, as well as identification of any subsequently increased security measures. All locations and security measures shall be identified by code known only to the utility and designated state government officials and their designees.

(e) Any subsequent security measures identified in the Plan shall contain an estimate of the cost necessary to implement such measures, a description of the measures necessary to adequately secure each specific location and an estimated schedule for completion of each measure.

(f) All locations identified by the Plan that require additional security measures shall be prioritized by the utility.

(g) Beginning December 30, 2005 and on July 1 of each year thereafter, Commission Staff shall submit an Annual Report marked as "Highly Sensitive Confidential" to the Commission, summarizing the results of Staff's review of a utility's Plan (and any Plan Update Reports), along with any recommendations that Staff may have regarding such Plan(s).

(h) Beginning December 30, 2005, where the Attorney General elects to submit recommendations to the Commission regarding a utility's Plan, such recommendations shall be marked as "Highly Sensitive Confidential" and shall also be due by July 1 of each subsequent year thereafter.

165:35-33-6. [RESERVED]

[Source: Reserved at 22 Ok Reg 704, eff 7-1-05]

165:35-33-7. Reporting requirements

(a) Subsequent to the preparation of the initial Plan prepared under OAC 165:35-33-5(a), each utility shall prepare a Plan Update Report by March 1 of each succeeding year, following the same format as the initial Plan with redlines of all new changes, marked "Highly Sensitive Confidential" and kept on site at the utility's business office.

(b) Each subsequent Plan Update Report shall update the previous year's report by indicating for each specific coded location, all costs and completion dates (actual

and projected) for all current and prior additional security measures claimed under this Subchapter.

(c) The utility is required to report cybersecurity or infrastructure security events that affect customers immediately to the PUD Director or designee.

(d) For those security measures previously reported that have not yet been completed, revised estimated costs and estimated completion dates shall be provided.

(e) The Plan Update Report shall also include (by specific coded location) a description of each proposed security measure that has not been previously reported, the estimated costs for each, as well as the estimated completion date for each measure.

(f) Costs reflected in the initial Plan and in subsequent Plan Update Reports, whether estimated or actual, shall be identified as either capital or expense costs.

(g) Beginning August 1, 2005 and by March 1 of every year thereafter, and/or when a change is made, each utility shall submit a Certification Letter to the PUD Director, marked as "Highly Sensitive Confidential" and certifying that as of the date of the Certification Letter:

(1) The utility does not have a Homeland Security and Critical Infrastructure Plan as contemplated and defined by this Subchapter;

(2) The utility does not have a Homeland Security and Critical Infrastructure Plan as contemplated or defined by this Subchapter but has otherwise taken steps to secure Critical Infrastructure and is not seeking cost recovery under this Subchapter;

(3) The utility does have a Plan but is not seeking cost recovery; or

(4) The utility has a Plan and/or has prepared its Plan Update Report updating the Plan and/or previous year's Plan Update Report;

(A) The redlines contained within the current Plan Update Report encompass in the entirety, all of the changes made to the utility's Plan since the Plan's inception or the previous year's certification; and

(B) The Plan is available for Commission and/or Attorney General review at the utility's local place of business.

(h) A utility shall not be required to file its initial Plan or any of its subsequent Plan Update Reports with the Commission. Each utility shall instead, secure and maintain on site, at the utility's local place of business, its initial Plan and all subsequent Plan Update Reports.

[Source: Added at 22 Ok Reg 704, eff 7-1-05; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-33-8. [RESERVED]

[Source: Reserved at 22 Ok Reg 704, eff 7-1-05]

165:35-33-9. Cost recovery

(a) Each utility seeking cost recovery of expenditures outside of a general rate review related to securing its Critical Infrastructure shall prepare and make available for inspection, its Plan and any subsequent Plan Update Reports in accordance with this Subchapter.

(b) A utility shall file an application with the Commission for cost recovery as provided for within this Subchapter. Such cost recovery shall only occur to the extent the utility has incurred all or a portion of its actual security-related costs.

(c) Unless otherwise ordered by the Commission, the utility shall have the burden of proving compliance with all of the provisions of this Subchapter prior to

obtaining any cost recovery for security related measures.

(d) Upon approval and Order of the Commission, a utility shall be allowed to recover a return based on its weighted cost of long-term debt and equity on all capital expenditures made for security measures. The utility shall also be allowed to recover related depreciation expense and ad valorem taxes. Such recoveries shall be based upon similar ratemaking treatment for corresponding cost elements from the utility's most recent general rate case.

(e) Upon approval and Order of the Commission, a utility shall be allowed to recover expenses typically classified as operations and maintenance expenses for ratemaking purposes. The utility may request inclusion of any such similar costs incurred as long as these costs are directly associated with the security measures taken.

(f) The total costs incurred under this Subchapter shall be combined for recovery purposes, for consideration by the Commission.

(g) All costs approved by the Commission for recovery, shall be recovered from the utility's customers through a "Security Cost Rider" based on the projected annual billing units for the utility and shall be subject to annual true-up.

(h) Unless otherwise ordered by the Commission, a utility shall immediately discontinue recovery of the "Security Cost Rider" when the earlier of the following occurs: natural expiration due to the full recovery provided for in a Rider granted under this Subchapter or forced expiration required pursuant to OAC 165:35-33-9(i) and/or OAC 165:35-33-9(j). Under no circumstances, shall the utility be permitted to double recover Homeland Security and Critical Infrastructure related costs.

(i) Unless otherwise ordered by the Commission, any utility with a "Security Cost Rider" currently in effect, that files for a general rate change, shall include in the rate case, all security-related costs and those costs shall be accorded standard ratemaking treatment. A utility shall discontinue its "Security Cost Rider" when the change in rates becomes effective upon Final Order in the rate case.

(j) Unless otherwise ordered by the Commission, all "Security Cost Riders" approved by the Commission, shall expire five years from the initial date of the "Security Cost Rider's" implementation.

(k) Upon the filing of a cost recovery request by a utility, Commission Staff, the state Attorney General's office (based upon that entity's statutory authority) and all other Authorized Participants shall review the cost recovery proposal submitted by the utility and file testimony in accordance with:

- (1) Any applicable protective orders issued by the Commission in the security-related cost recovery cause;
- (2) OAC 165:35-33-11 (below);
- (3) The Commission's Rules of Practice (OAC 165:5); and
- (4) Any other protective measures or requirements prescribed by law or the Commission.

(l) Testimony of Commission Staff, the state Attorney General and all other Authorized Participants, shall detail each of the parties' respective recommendations and any objections to the utility's Plan and the utility's request for cost recovery related to the Plan. Also in accordance with the Commission's Rules of Practice, Commission Staff, the state Attorney General and all other Authorized Participants shall provide copies of their respective individual testimonies to one another, with redacted versions of each individual testimony filed with the Commission's Court Clerk.

(m) Upon notice and hearing, the Commission shall issue an Order regarding any requests for security-related cost recovery.

[Source: Added at 22 Ok Reg 704, eff 7-1-05; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-33-10. PUD authorized participation

(a) **PUD Staff.** Only PUD and PUD's designees authorized by PUD to participate in a cause before the Commission regarding a utility's Plan and then, shall do so only after meeting all applicable requirements for PUD authorization, which shall be determined on a case-by-case basis. All PUD and PUD's designees authorized to participate in a security cause shall comply with the requirements for protecting information obtained under the "Highly Sensitive Confidential" designation.

(b) **Attorney General.** Only those Attorney General personnel who have formally entered an appearance pursuant to Oklahoma Statute and the Commission's Rules of Practice and that entity's Commission authorized designees shall be granted review of a utility's Plan and/or Plan Update Reports. All Attorney General personnel and their designees authorized to participate in a security cause shall meet all applicable requirements for Commission authorization, to be determined on a case-by-case basis, and shall comply with the protections afforded information obtained under the "Highly Sensitive Confidential" designation.

(c) **Intervenors.**

(1) For the purposes of this Subchapter, all intervenors, including but not limited to counsel and experts for intervenors, shall be deemed "Authorized Participants" in accordance with OAC 165:35-33-3 above. All Authorized Participants wishing to participate in a security-related cause before the Commission shall meet all applicable requirements for Commission authorization, which shall be determined on a case-by-case basis, and shall comply with the protections afforded information obtained under the "Highly Sensitive Confidential" designation.

(2) In addition to acquiring "Authorized Participant" status from the Commission, each intervenor and its designees desiring to participate in a cause before the Commission regarding a utility's Plan shall post a bond or other security acceptable to the Commission, in an amount to be determined by the Commission, to protect the utility from harm in the event the Authorized Participant breaches the confidentiality terms established under this Subchapter or as may otherwise be established by the Commission. A copy of such bond or other security shall be filed with the Commission's Court Clerk. This subsection shall not apply to the Attorney General of the State of Oklahoma or the Oklahoma Corporation Commission Commissioners and Staff.

(3) Any Authorized Participant found in violation of a Commission issued Protective Order and Proprietary Agreement, shall be liable for contempt penalties pursuant to the penalty provisions found in Article IX, § 19 of the Oklahoma Constitution, Title 17 of the Oklahoma Statutes and the Commission's Rules of Practice at OAC 165:5. This subsection shall not apply to the Attorney General of the State of Oklahoma or the Oklahoma Corporation Commission Commissioners and Staff.

(4) In addition to the above protections, all Authorized Participants may be required by the Commission to enter into a separate non-disclosure agreement as a pre-requisite to being granted intervention and "Authorized Participant" status.

[Source: Added at 22 Ok Reg 704, eff 7-1-05; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-33-11. Confidentiality

(a) Pursuant to the Commission's jurisdiction granted under Article IX, Section 18 of the Oklahoma Constitution, 51 O.S. (2001) §24A.22 of the Oklahoma Statutes and OAC 165:5, the Commission's Rules of Practice; all un-redacted documents related to a utility's Homeland Security and Critical Infrastructure Plan shall be considered "Highly Sensitive and Confidential" and shall only be admitted into evidence in en camera proceedings.

(b) "Highly Sensitive Confidential" designation and protection shall extend but not be limited to the following: initial Plans (including underlying documents), Plan Update Reports, Certification Letters, Annual Reports made by Commission Staff, recommendations submitted by the Attorney General of the State of Oklahoma and un-redacted documents used in cost recovery proceedings. For all other documents, the "Highly Sensitive Confidential" designation may be granted upon hearing and Final Order of the Commission.

(c) Each utility's Plan and/or Plan Update Report prepared in accordance with this Subchapter, shall be marked "Highly Sensitive Confidential" and shall be kept and maintained on site at the utility's business office in accordance with OAC 165:35-33-7(g), above. Only those individuals on the Staff of the Commission and in the State Attorney General's office and their respective experts who have been authorized by the Commission, shall have access to the Plan and Plan Update Reports prepared by each utility and any related or supporting documentation thereto. All other parties granted authorized intervenor status to a security cause pursuant to OAC 165:35-33-10(c) may also have access to the Plan, Plan Update Reports and supporting documentation after notice and hearing.

SUBCHAPTER 34. COMPETITIVE PROCUREMENT

165:35-34-1. Purpose of this Subchapter

(a) This Subchapter establishes a fair, just, and reasonable process that best serves the public interest of all electricity consumers and that will complement and improve the state's economic growth by, among other things, making the most efficient use of Oklahoma's coal, natural gas, and power generation and transmission assets and furthers the policy of the Commission that a competitive procurement process is among the most effective means to achieve these objectives. To obtain a presumption of prudence, a utility shall employ the competitive bidding procedures set forth in this subchapter, when purchasing or self-building of new longterm electric generation, long term purchase power agreements, or long-term fuel supply for self-generation of electricity as set forth in this subchapter. A utility may exercise managerial discretion and enter into contracts, fixed-priced or index-based, without seeking a presumption of prudence. However, if a utility does not employ the competitive bidding process set forth in this subchapter, there shall be no presumption of prudence and the determination of prudence will be decided during a subsequent Commission review. The competitive bidding process shall be open to Commission scrutiny, as are other regulated utility practices.

(b) It is the intent of the Commission to create an open, transparent, fair and nondiscriminatory competitive bidding process for the utility to meet its needs. It should not be construed that this Subchapter absolves or relieves any utility or competitive bidder from any duty prescribed by the laws of the State of Oklahoma or the United States including, but not limited to, the federal Public Utility

Regulatory Policies Act (Public Law 95-617, as amended) and any other state or federal law regarding contractual rights and obligations, antitrust enforcement or liability, or laws against improper restraint of trade or "takings" of property.

(c) This Subchapter also establishes reasonable standards of conduct for transactions between utilities and their affiliates and standards for transactions between utilities and competitive bidders conducting business within the State of Oklahoma.

(d) This Subchapter shall not be applicable to a utility with no generation plant within the boundaries of Oklahoma and less than ten percent of its customers within the state.

(e) Wherever Independent Evaluator is referred to in this subchapter, it is understood that particular reference is only applicable if an Independent Evaluator has been retained by the Commission.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06; Amended at 25 Ok Reg 1566, eff 7-1-08; Amended at 29 Ok Reg 1541, eff 7-12-12; Amended at 31 Ok Reg 1030, eff 9-12-14]

165:35-34-2. Confidential Information

(a) A person or entity may file a motion with the Commission for an order to protect confidential information pursuant to 51 O.S., Section 24A.22.

(b) Bids submitted in a competitive bidding process and the resulting contracts shall be considered confidential information. Such bidding documents and contracts shall be available for review subject to a protective order issued by the Commission except that such protective order may limit access to appropriate non-competitive representatives such as lawyers and consultants, of bidders participating in the RFP, so that such persons may review the details of all the bids, the bid process and the bid evaluation-related materials. The Commission may determine, on a case-by-case basis, that certain information about the winning bid and resulting contract shall be publicly disclosed so long as such disclosure does not reveal confidential information.

(c) Pending a determination by the Commission regarding any protective order, the person or entity seeking the protective order, the Commission, the Attorney General and the Independent Evaluator may, at their option, review the information claimed to be confidential at a mutually agreed upon location.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06; Revoked at 25 Ok Reg 1566, eff 7-1-08]

165:35-34-3. RFP Competitive Bidding Procurement Process for Long Term Fuel Transportation, Long Term Fuel Storage, Long Term Electric Generation and Long Term Purchase Power Agreements

(a) Competitive Bidding Structure and Process Guidelines for Long Term Fuel Transportation, Long Term Fuel Storage, Long Term Electric Generation and Long Term Purchase Power Agreements.

(1) The soliciting utility shall notify the Commission of its intent to engage in a competitive bidding process at least thirty (30) calendar days before issuing a request for proposal ("RFP"), as required by subsection (4) below.

(2) The soliciting utility shall prepare the initial draft of the RFP documents, including but not limited to RFP procedures, and a pro forma power purchase agreement that, to the maximum extent practicable, utilizes industry standard contractual terms and contains all expected material terms and conditions and a solicitation schedule (collectively, the "RFP Document").

(3) In addition to the information required by (1) of this Section, the RFP and RFP Document, at a minimum, shall identify clearly:

- (A) Term;
- (B) Amount of megawatts, if applicable, and types of products being solicited;
- (C) All price and non-price evaluation factors to be considered;
- (D) Respective weight for each price and non-price evaluation factor; and
- (E) Utility's preliminary analysis of transmission availability and the utility's plan for evaluation of transmission availability for each proposal received, including, but not limited to:
 - (i) Description of the role of transmission analysis to be conducted by the utility in the bid evaluation process. This analysis should use publicly available tools provided by the controlling entity, such as the Southwest Power Pool Scenario Analyzer; and
 - (ii) Any role of the transmission analysis to be conducted by the controlling entity, currently the Southwest Power Pool, in the bid evaluation process.

(4) The draft of the RFP Document, supporting documentation, and bid evaluation procedures shall be provided to the Commission, Attorney General, non-competitive representatives and Independent Evaluator and posted on the utility's website at least fifteen (15) calendar days prior to the technical conference referenced below. After the draft RFP is issued, a technical conference shall be scheduled by the utility to discuss the draft RFP and the bidding process. After receiving input from interested persons, and holding the technical conference the soliciting utility shall post the draft RFP Document and any comments received, on the soliciting utility's website or electronic bulletin board, or by some other publicly accessible method. After due consideration of all comments, the soliciting utility will submit the final RFP Document to the Commission and post the final RFP Document on its website or electronic bulletin board, or by other publicly accessible method. RFPs shall include the Southwest Power Pool's time requirements to conduct transmission analyses, i.e. the aggregate study.

(b) Independent Evaluator.

(1) The Commission may, at its discretion, retain and arrange compensation for an Independent Evaluator to monitor the RFP and competitive bidding process. Notwithstanding the foregoing, the Commission shall retain an Independent Evaluator to monitor the RFP and competitive bidding process in the following instances: (i) when an affiliate of the utility is anticipated to participate in the competitive bidding process; (ii) when the RFP and bid resulting there from is expected to have a material impact on the utility's cost of providing electricity to its customers, or (iii) when it is anticipated that the utility may participate as a bidder in the competitive bidding process. The Commission shall establish the minimum qualifications and requirements for an Independent Evaluator and ensure the Independent Evaluator is financially and substantively independent from any soliciting electric utility or affiliate thereof, complaining entity, and any potential bidder.

(2) The Independent Evaluator will report to the Commission and the Attorney General.

(3) If the Independent Evaluator's conclusion is different from the conclusion of the soliciting utility about the winning bidder(s), the Independent Evaluator and utility may attempt to resolve such differences. In the event the Independent Evaluator and utility cannot resolve their differences, the soliciting utility will determine which bid(s) is successful. The Independent Evaluator shall submit its independent evaluation to the Commission.

(4) As part of its contract with the Independent Evaluator, the Commission shall require the Independent Evaluator, to enter into an agreement to keep all information confidential that pertains to the disclosure and use of any models, analytical tools, data, or other materials of a confidential or proprietary nature provided or made available by the soliciting utility in conjunction with the competitive bidding process.

(c) Affiliate Bidders' Requirements.

(1) Each soliciting utility affiliate that intends to bid shall disclose publicly, in writing, the names and titles of the members of the affiliate's "Bid Team." Each soliciting utility shall disclose publicly, in writing, the names and titles of the members of its "Evaluation Team." A Bid Team develops the affiliate's bid and, to assure fairness, is not involved, directly or indirectly, in the evaluation or selection of bids. An Evaluation Team evaluates bids, selects the successful bidder and, to assure fairness, is not involved, directly or indirectly, in the development of the affiliate's bid.

(2) Each soliciting utility and bidding affiliate shall assure that the Bid Team and the Evaluation Team and any member of either do not engage in any communications, either directly or indirectly, regarding the RFP or the competitive bidding process. For bidder and Commission assurance, the soliciting utility and bidding affiliate shall execute an acknowledgement that the utility and affiliate have not and will not in the future so communicate, other than to submit and receive the bid at the appropriate time. The Bid Team and Evaluation Team may communicate as part of a bidding technical conference of which potential bidders or all actual bidders, if bids have already been submitted, are given adequate notice and opportunity to attend.

(3) The Evaluation Team shall report to the Independent Evaluator, any contact or communications by any bidder, including the Bid Team, and advise the bidder any future contact must be directed to the Independent Evaluator. Bidders and the Evaluation Team may communicate as part of a bidding technical conference of which potential bidders or all actual bidders, if bids have already been submitted, are given adequate notice and opportunity to attend.

(d) Evaluation of Responses to the RFP.

(1) The evaluation of the responses to the RFP will proceed as follows:
(A) The soliciting utility will evaluate all timely submitted bids to determine the lowest reasonable cost for long-term reliable power or reliable long-term fuel sought that minimizes ratepayer cost, including but not limited to charges for or costs relating to long-term fuel supply, long-term fuel transport, long-term fuel storage, long-term fuel processing, or increased cost of capital, consistent with the principles and procedures contained in this Subchapter and in the utility's resource plan and associated procurement plans.

(B) The Commission, Attorney General, non-competitive representatives and Independent Evaluator will be included in the evaluation of all bids submitted to the soliciting utility. The soliciting utility shall include within the RFP the time and place for the opening of the bids so that the Commission, Attorney General, non-competitive representatives and the Independent Evaluator may attend and monitor the opening of bids. Bids shall be opened by the soliciting utility at the time and place so indicated in the RFP whether or not any or all of those parties are in attendance.

(2) All bids shall be evaluated on the basis of the bidder's final best offer. No bidder shall be permitted to unilaterally submit a refreshed bid unless all bidders are given a meaningful opportunity to submit a refreshed bid as a result of some material, documented change. The Independent Evaluator shall be charged with evaluating any such changes and ensuring that the changes are substantive and not an attempt to influence the final selection process in favor of a particular bidder.

(3) Should any bid be unclear to such extent that the lack of clarity could impact the outcome of the bidding, the soliciting utility, Commission, Attorney General, non-competitive representatives or Independent Evaluator may request further information from any bidder regarding its bid, provided, any such communication between or among the soliciting utility, Commission, Attorney General, non-competitive representatives or Independent Evaluator and bidder should be conducted through an open process in which the utility, Independent Evaluator, Commission, non-competitive representatives and Attorney General are given adequate notice and an opportunity to attend.

(4) The Commission, Attorney General, non-competitive representatives and Independent Evaluator, as well as the soliciting utility, may rely on the Southwest Power Pool to conduct all necessary transmission analyses concerning bids received. Southwest Power Pool analyses provided to the Commission, Attorney General, non-competitive representatives or Independent Evaluator shall be equivalent in quality and content to that provided to the soliciting utility. No bidder, including any bidder that is an affiliate (including the Bid Team) of the soliciting utility, shall communicate with the Southwest Power Pool Transmission group during the course of the competitive bidding process regarding any aspect of the RFP or process.

(5) In conducting the evaluation of the responses, the soliciting utility shall not:

(A) Waive or otherwise modify any evaluation factor or evaluation weight for any bidder;

(B) Add any adjustments on the basis of expected effects on the utility's cost of capital if not already contained in the RFP;

(C) Impose any penalty on the price of purchased power; or

(D) Include any discount for utility self-generation on the basis of reliability as part of the utility's resource mix.

(e) Prior to a utility taking long-term procurement action other than the competitive procurement process set forth in this Subchapter, such utility shall seek a waiver of all or any part of these competitive bidding rules by filing a cause with the Commission.

(f) The utility shall promptly submit its decision concerning the successful bid with the Commission and mail copies of such submission to all bidders, non-competitive representatives, the Independent Evaluator, and the Attorney General. Included within that mailing, the utility shall provide the non-winning bidders the rationale and analysis used for the selection of the winning bid.

(1) Any unsuccessful bidder, non-competitive representatives, the Independent Evaluator, or the Attorney General shall have fifteen (15) calendar days following submission of the successful bid decision with the Commission to file with the Commission a complaint challenging the decision as not meeting the criteria for decision specified in this subchapter or waiver previously obtained pursuant to 165:35-34-3(e) and the RFP document and bid evaluation procedures developed pursuant to 165:35-34-3(a).

(2) In the event of the filing of such a complaint, after notice to all bidders and hearing, the Commission shall determine whether the utility's decision reveals either a clear departure from the criteria stated in these rules or previously obtained waiver, the RFP Document and bid evaluation procedures for decision or is erroneous, in which event the utility shall be required immediately to rebid, in accordance with this Subchapter, the items which were the subject of such determination.

(g) Upon determination of the successful bidder, the utility and successful bidder shall promptly proceed to finalize contracts necessary to implement the bid.

(1) The contract shall contain appropriate guarantees, as set by the Commission, regarding the reliability of services.

(2) At the request of either party and upon notice and hearing, the Commission shall have authority to determine any disputes between the parties as to terms incidental to the bid. All matters to be determined by the Commission under this provision shall be heard on an expedited basis and a decision rendered thereon within thirty (30) calendar days from filing.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06; Amended at 24 Ok Reg 1827, eff 7-1-07; Revoked at 25 Ok Reg 1566, eff 7-1-08; Amended at 27 Ok Reg 2129, eff 7-11-10; Amended at 29 Ok Reg 1541, eff 7-12-12; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-34-4. Commodity fuel supply competitive bidding procurement process for a term greater than five years

(a) **Pre-approval filing.** When a Utility contracts for commodity fuel supply for self-generation of electricity for a term greater than five years, and seeks a pre-determination of prudence, the Utility shall file an application and receive the Commission's approval of the Utility's proposed Request for Proposal (RFP) Competitive Bidding Procurement Process prior to the Utility issuing the RFP. The evaluation and approval of the RFP shall contain, but not be limited to, the proposed bidding process, the evaluation process, consistency with the Integrated Resource Plan (IRP), and a determination of need for the proposed fuel supply. The evaluation and approval of the RFP may contain a consideration of opt-out provisions. The process shall focus on and result in the lowest reasonable cost for ratepayers. The request shall be processed as follows:

(1) An Independent Evaluator may be utilized pursuant to 165:35-34-4(b);

(2) The soliciting Utility shall file a cause for pre-approval of the RFP and will provide notice to the Commission and Attorney General to engage in the RFP approval process at least thirty (30) calendar days before issuing a request for pre-approval of the proposed RFP;

- (3) The soliciting Utility shall prepare the initial draft of the RFP documents that, to the extent practicable, utilizes industry standard contractual terms and contains all expected material terms and conditions and a solicitation schedule;
- (4) In addition to the information required by (3) of this Section, the RFP, at a minimum, shall identify clearly:
- (A) Term and Renewals;
 - (B) Types and quantity of fuel being solicited;
 - (C) All price and non-price evaluation factors to be considered;
 - (D) Respective weight for each price and non-price evaluation factor;
 - (E) The Utility's preliminary analysis of desired delivery points or options as appropriate; and
 - (F) The extent to which a consideration of hedging and price volatility mitigation has been included in the RFP; and
- (5) A Commission order approving or disapproving the RFP shall be issued in no more than 180 calendar days following the filing of the Utility's application.

(b) Independent evaluator.

- (1) The Commission Staff or Office of the Attorney General may, at their discretion, file a request with the Commission for the assessment of specific costs, which shall be deemed recoverable costs associated with conducting the prudence review analysis, related to the retention of an Independent Evaluator to monitor the RFP and competitive bidding process. Notwithstanding the foregoing, the Commission, or the Attorney General shall retain an Independent Evaluator to monitor the RFP and competitive bidding process in the following instances: (i) when an affiliate of the Utility is anticipated to participate in the competitive bidding process; (ii) when the RFP and bid resulting there from is expected to have a material impact on the Utility's cost of providing electricity to its customers, or (iii) when it is anticipated that the Utility may participate as a bidder in the competitive bidding process. The Commission shall establish the minimum qualifications and requirements for an Independent Evaluator and ensure the Independent Evaluator is financially and substantively independent from any soliciting electric Utility or affiliate thereof, complaining entity, and any potential bidder.
- (2) The Independent Evaluator will report to the Commission or the Office of the Attorney General.
- (3) If the Independent Evaluator's conclusion is different from the conclusion of the soliciting Utility about the winning bidder(s), the Independent Evaluator and Utility may attempt to resolve such differences. In the event the Independent Evaluator and Utility cannot resolve their differences, the soliciting Utility will determine which bid(s) is successful. The Independent Evaluator shall submit its independent evaluation to the Commission.
- (4) As part of its contract with the Independent Evaluator, the Commission shall require the Independent Evaluator, to enter into an agreement to keep all information confidential that pertains to the disclosure and use of any models, analytical tools, data, or other materials of a confidential or proprietary nature provided or made available by the soliciting Utility in conjunction with the competitive bidding process.

(c) Affiliate bidders' requirements.

(1) Each soliciting Utility affiliate that intends to bid shall disclose publicly, in writing, the names and titles of the members of the affiliate's "Bid Team." Each soliciting Utility shall disclose publicly, in writing, the names and titles of the members of its "Evaluation Team." A Bid Team develops the affiliate's bid and, to assure fairness, is not involved, directly or indirectly, in the evaluation or selection of bids. An Evaluation Team evaluates bids, selects the successful bidder and, to assure fairness, is not involved, directly or indirectly, in the development of the affiliate's bid.

(2) Each soliciting Utility and bidding affiliate shall assure that the Bid Team and the Evaluation Team and any member of either do not engage in any communications, either directly or indirectly, regarding the RFP or the competitive bidding process. For bidder and Commission assurance, the soliciting Utility and bidding affiliate shall execute an acknowledgement that the Utility and affiliate have not and will not in the future so communicate, other than to submit and receive the bid at the appropriate time. The Bid Team and Evaluation Team may communicate as part of a bidding technical conference of which potential bidders or all actual bidders, if bids have already been submitted, are given adequate notice and opportunity to attend.

(3) The Evaluation Team shall report to the Independent Evaluator, any contact or communications by any bidder, including the Bid Team, and advise the bidder any future contact must be directed to the Independent Evaluator. Bidders and the Evaluation Team may communicate as part of a bidding technical conference which potential bidders or all actual bidders, if bids have already been submitted, are given adequate notice and opportunity to attend.

(d) Evaluation of responses to the RFP.

(1) The evaluation of the responses to the RFP will proceed as follows:

- (A) The soliciting Utility will evaluate all timely submitted bids to determine the lowest reasonable cost for fuel supply that results in the lowest reasonable cost with consideration given to all other bid terms outlined in the RFP; and
- (B) The Commission, Attorney General, Independent Evaluator, and non-competitive representatives will be included in the evaluation of all bids submitted to the soliciting Utility pursuant to the provisions of the Protective Order. The soliciting Utility shall include within the RFP the time and place for the opening of the bids so that the Commission, Attorney General, the Independent Evaluator and non-competitive representatives may attend and monitor the opening of bids. Bids shall be opened by the soliciting Utility at the time and place so indicated in the RFP whether or not any or all of those parties are in attendance.

(2) All bids shall be evaluated on the basis of the bidder's final best offer. Bids will be evaluated on all relevant economic and non-economic factors. No bidder shall be permitted to unilaterally submit a refreshed bid prior to award unless all bidders are given a meaningful opportunity to submit a refreshed bid as a result of some material, documented change. The Independent Evaluator shall be charged with evaluating any such changes and ensuring that the changes are substantive and not an attempt to influence the final selection process in favor of a particular bidder.

(3) Should any bid be unclear to such extent that the lack of clarity could impact the outcome of the bidding, the soliciting Utility, Commission, Attorney General, Independent Evaluator and non-competitive representatives may request further information from any bidder regarding its bid, provided, any such communication between or among the soliciting Utility, Commission, Attorney General, Independent Evaluator and non-competitive representatives and bidder should be conducted through an open process in which the Utility, Independent Evaluator, Commission, Attorney General and noncompetitive representatives are given adequate notice and an opportunity to attend.

(4) In conducting the evaluation of the responses, the soliciting Utility shall not: waive or otherwise modify any evaluation factor or evaluation weight for any bidder.

(e) Bid award.

(1) The Utility shall submit its decision, rationale and analysis concerning the successful bid with the Commission, non-competitive representatives, the Independent Evaluator, and the Attorney General within 24 hours of the selection. The utility shall provide the non-winning bidders notice that they were not selected as the winning bid.

(2) The PUD Director, any unsuccessful bidder, the Independent Evaluator, Intervenors, or the Attorney General shall have two (2) business days following submission of the successful bid decision to file with the Commission a complaint challenging the Utility's adherence to the approved RFP and the resulting bid award.

(3) In the event of the filing of such a complaint, after notice to all parties and hearing, the Commission shall determine whether the Utility's decision reveals a clear departure from the criteria stated in the previously obtained waiver or the RFP Document in which event the bid award may not be pre-approved by the Commission.

(4) The Commission shall endeavor to hear the complaint in camera within three (3) business days of the filing of the complaint.

(5) The Commission shall endeavor to enter a final order within fifteen (15) calendar days of the initial bid award letter. If the Commission has not entered a final order within fifteen (15) calendar days, the winning bidder may be allowed to refresh their bid pursuant to the provisions of the RFP.

(6) The Commission shall endeavor to enter a final order no later than thirty (30) calendar days after the initial bid award.

(7) Upon determination of the successful bidder, the Utility and successful bidder shall promptly proceed to finalize contracts necessary to implement the bid.

(8) The final order, if awarding a pre-determination of prudence, will provide as follows:

(A) Purchases made according to the terms of the contract shall be deemed prudent;

(B) Variances from the terms of the contract shall be subject to additional prudence review and determination.

(f) Waiver. Prior to a utility taking competitive procurement action other than the competitive procurement processes set forth in this Subchapter, such Utility shall seek a waiver of all or any part of these competitive bidding rules by filing a cause with the Commission if the Utility will seek pre-approval.

[Source: Added at 29 Ok Reg 1541, eff 7-12-12; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 35. PRUDENCE REVIEWS

165:35-35-1. Prudence Reviews

(a) The Commission shall conduct prudence reviews on all generation, purchased power and fuel procurement processes and costs. The first prudence review will be selected by March 31, 2006. Utilities serving four hundred thousand (400,000) consumers or more shall be reviewed at least once every two (2) years. The utility shall bear the burden of proof as to prudence. Utilities serving fewer than four hundred thousand (400,000) consumers shall be reviewed at least once every three (3) years.

(b) All fuel and generation expenses, including purchased-power-related expenses, shall be reviewed by the Commission in adjudicatory proceedings to determine that such expenses were prudently incurred. Additional prudence reviews shall be conducted when the Commission determines that circumstances warrant such review.

(c) The Commission may impose any corrective action or penalty allowed explicitly or implicitly by law, including refund, as the result of a prudence review.

(d) Nothing in this Subchapter shall diminish the authority of the Commission to review for prudence or other reasons any utility contract, decision or other action for the provision of electric power capacity or energy.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 37. INTEGRATED RESOURCE PLANNING

165:35-37-1. Purpose of this Subchapter

(a) The purpose of this Subchapter is to establish fair, just, and reasonable rules and procedures for Commission review of the resource plans of utilities. The utility resource plans establish additional bases for substantial investment and expenses incurred by utilities to provide electric supply to retail consumers. The practices and policies embodied in a utility's resource plan have direct, substantial effects on the costs and reliability of the electric supply to be provided to retail consumers in Oklahoma. Resource planning is a complex process affecting decisions that account for a substantial portion of the total cost of electricity over the long term, including investments in generation and transmission facilities, purchases of power and fuel supply, price volatility mitigation, and investments in energy efficiency.

Recognizing the significance of the costs incurred based on resource plans, the Commission believes it is in the best interest of retail ratepayers and the utilities providing regulated retail electric supply to establish regular review of the utilities resource plans to ensure that the utilities' resource planning and resulting investment are reasonably and prudently conducted and that the overall cost of power supply to retail ratepayers is fair, just, and reasonable.

(b) This Subchapter establishes fair, just, and reasonable procedures for:

- (1) Setting standards for prudent resource planning;
- (2) Conducting periodic reviews of utility resource plans;
- (3) Participation of stakeholders, particularly those representing ratepayer interests, to review and have input into the utility's resource plans and the Commission's resource planning policies;

- (4) Establishing the need for additional resources serving as the basis for long-term competitive procurement of resources, including, but not limited to, utility construction of new electric generation facilities, the utility purchase of existing electric generation facilities, and the purchase of long-term power supplies;
- (5) Establishing objectives and action plans consistent with Commission resource planning policies;
- (6) Establishing a clear standard of prudent financial management including but not limited to a utility's demonstration of consideration of physical and financial hedging, cost effectiveness, and other tools of prudent financial management;
- (7) Establishing appropriate plans for capital expenditures for equipment or facilities at utility generation facilities necessary to comply with the Federal Clean Air Act, as amended, and other federal, state, local, or tribal environmental requirements;
- (8) Establishing a clear, before-the-fact foundation for the recovery of prudently incurred investment and expenses in subsequent rate and fuel and purchased-power cost recovery proceedings; and
- (9) Establishing the appropriate portfolio of products to be obtained through competitive procurement.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06; Amended at 29 Ok Reg 1541, eff 7-12-12]

165:35-37-2. Confidential Information

- (a) If a utility is required by this Subchapter to submit information to the Commission that is alleged by the utility to be confidential, a motion for a protective order concerning such information may be filed requesting a determination to be made by the Commission to protect the information pursuant to 51 O.S., Section 24A.22.
- (b) Pending a determination regarding approval of any protective order by the Commission, the Commission and Attorney General, at their option, may review the information claimed to be confidential at a mutually agreed upon location, provided that for purposes of 51 O.S., Section 24A.22, the information shall be deemed confidential pending such determination by the Commission.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06]

165:35-37-3. Public Meeting

- (a) A utility shall notify the Commission that it has prepared a proposed initial integrated resource plan at least thirty (30) calendar days prior to submission pursuant to 165:35-37-4. After giving notice, the Commission shall conduct a public meeting on the record concerning the utility's proposed initial integrated resource plan, allowing comment from interested persons as to the strengths and weaknesses of the proposed plan.
- (b) The utility shall take into account the comments made at the public meeting and make such changes to the plan as seem reasonable.
- (c) The utility shall make the proposed plan available prior to the public meeting to any person who requests it, except any portions subject to a Commission protective order.
- (d) The Commission may conduct similar public meetings at its discretion concerning updates to the integrated resource plan as provided by 165:35-37-4.

165:35-37-4. Integrated Resource Plan Reviews

(a) Each utility shall submit to the Commission a proposed integrated resource plan. The utility's first integrated resource plan was due on October 1, 2006, and subsequent plans shall be due every three (3) years thereafter, unless the utility requests an extension from the PUD Director or the utility requests a waiver from the Commission. The extension granted by the PUD Director shall not exceed six (6) months. Subsequent plans shall be developed and submitted as provided by the procedure set forth in OAC 165:35-37-5. The proposed resource plan shall include, among other things, a fuel procurement plan, purchased-power procurement plans, a risk management plan, an environmental compliance plan, and other elements as described further in this Subchapter. This plan will be made available upon request by any person or entity to the soliciting utility, except any portions subject to a Commission protective order.

(b) Each utility shall have an ongoing obligation to monitor markets and inputs and to notify the Commission when material changes in planning assumptions occur. As the integrated resource plan changes from year to year, the utility shall submit updates to the Commission. The Commission may require the utility to submit an interim, updated integrated resource plan to reflect material change(s) in planning assumptions.

(c) The integrated resource plan shall include, at a minimum, a tabular summary of each of the following Sections:

- (1) Schedule A: An electric demand and energy forecast;
- (2) Schedule B: A forecast of capacity and energy contributions from existing and committed supply- and demand-side resources;
- (3) Schedule C: A description of transmission capabilities and needs covering the forecast period;
- (4) Schedule D: An assessment of need for additional resources;
- (5) Schedule E: A description of the supply, demand-side and transmission options available to the utility to address the identified needs;
- (6) Schedule F: A fuel procurement plan, purchased-power procurement plan, and risk management plan;
- (7) Schedule G: An action plan identifying the near-term (i.e., across the first five [5] years) actions that the utility proposes to take to implement its proposed resource plan;
- (8) Schedule H: Any proposed RFP(s), supporting documentation, and bid evaluation procedures by which the utility intends to solicit and evaluate new resources; and
- (9) Schedule I: A technical appendix for the data, assumptions and descriptions of models needed to understand the derivation of the resource plan.
- (10) Schedule J: A description and analysis of the adequacy of its existing transmission system to determine its capability to serve load over the next ten (10) years, including any planned proposed changes to existing transmission facilities.
- (11) Schedule K: An assessment of the need for additional resources to meet reliability, cost and price, environmental or other criteria established by the Commission, the State of Oklahoma, the Southwest Power Pool, North American Electric Reliability Council, or the Federal Energy

Regulatory Commission. This assessment should address both base line forecast condition and important uncertainties, including but not limited to load growth, fuel prices, and availability of planned supplies.

(12) Schedule L: An analysis of the utility's proposed resource plan and any alternative scenarios necessary to demonstrate how the preferred plan best meets the planning criteria. Technical appendices should be included to document the planning analysis and assumptions used in preparing this analysis.

(13) Schedule M: A description and analysis of the Utility's consideration of physical and financial hedging to determine the Utility's ability to mitigate price volatility for the term covered by the IRP.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06; Amended at 24 Ok Reg 1827, eff 7-1-07; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 29 Ok Reg 1541, eff 7-12-12; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-37-5. Procedure for subsequent integrated resource plans

(a) A utility shall notify the Commission that it has prepared a proposed update of its integrated resource plan at least sixty (60) calendar days prior to submission pursuant to 165:35-37-4.

(b) To allow all stakeholders the opportunity to review and provide input regarding utility objectives, assumptions, planning scenarios, and other information contained in the proposed updated integrated resource plan, after giving notice and prior to submitting the final integrated resource plan, the utility shall conduct at least one technical conference for all stakeholders. Stakeholders then may submit comments to the utility as to the strengths and weaknesses of the proposed plan.

(c) The utility shall make the proposed plan available prior to the technical conference to any person who requests it, except any portions subject to a Commission protective order or confidentiality agreement.

(d) The utility shall take into account any comments received prior to or at the technical conference and make such changes to the plan as seem reasonable.

(e) The utility shall provide a facilitator to coordinate and assist the stakeholders in their discussions at the technical conference. The facilitator provided by the utility shall prepare meeting minutes from the technical conference and prepare a summary of stakeholder input for inclusion as an exhibit in the final integrated resource plan.

(f) The Commission and/or the Attorney General may, at its discretion, retain third party consultants and/or expert witnesses to review the proposed plan and participate in the technical conference on its behalf. The utility shall be responsible for, and be allowed recovery of, the cost of such third party consultants and/or expert witnesses.

(g) The Commission may conduct similar technical conferences at its discretion concerning updates to the integrated resource plan as provided by OAC 165:35-37-4.

(h) After the above procedure has occurred, the utility shall present its final integrated resource plan at a public meeting held at the Commission.

[Source: Added at 27 Ok Reg 2098, eff 7-11-10; Amended at 31 Ok Reg 1030, eff 9-12-14; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 38. RECOVERABLE COSTS

165:35-38-1. Purpose of Subchapter

The purpose of this Subchapter is to provide for utility recovery of (1) costs directly associated with transmission upgrades approved by a regional transmission organization of which such utility is a member and which upgrades are the result of an order by a federal regulatory authority having legal jurisdiction over interstate regulation of transmission rates; (2) capital expenditures for equipment or facilities necessary to comply with the Federal Clean Air Act (Public Law 84-159), as amended, and, as the Commission may deem appropriate, federal, state, local or tribal environmental requirements that apply to generation facilities; and (3) costs associated with the purchase or construction of a generation facility needed to provide reliable service using the competitive bidding RFP Process.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06]

165:35-38-2. Application and Scope of Subchapter

(a) This Subchapter is applicable to all electric utilities operating within the State of Oklahoma under the jurisdiction of the Commission.

(b) These cost recovery rules are promulgated to establish processes, procedures, enforcement, reporting, and monitoring provisions that apply to electric utilities regarding the expenditures referenced in 165:35-38-1.

(c) The intention of this Subchapter includes, but is not limited to:

(1) The provision of rules for the recovery of costs associated with transmission upgrades, environmental facilities installed at generation facilities, generation assets constructed by the utility, and generation assets acquired by the utility; and

(2) The protection of customers of a utility from imprudent financial obligations or costs.

(d) All amounts subject to recovery are subject to Commission audit and review. The Commission will resolve any disputes regarding this Subchapter.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06]

165:35-38-3. Transmission Upgrades

(a) Costs incurred by a utility that are directly related to transmission upgrades as set forth in 165:35-38-1 are presumed recoverable by such utility. However, the presumption may be rebutted by evidence presented by a complainant or through the audit and review process that the costs so incurred by the utility for such transmission upgrades exceed the scope of the project authorized by the regional transmission organization or federal regulatory authority order.

(b) Before costs set forth in 17 O.S. Section 286(A), as amended, are allowed to go into effect, a cause will be opened by the utility before the Commission. After notice and hearing and upon proper evidence, the Commission may authorize an electric utility to recover all or a portion of the costs incurred by the utility for such transmission upgrades.

(c) A utility seeking cost recovery for transmission upgrades as they pertain to this subsection may file an application to recover such costs and shall provide, at a minimum:

(1) A detailed summary of the costs for which recovery is sought;

(2) Evidence of the approval received by the utility from the regional transmission organization or order received from the federal regulatory authority giving rise to the transmission upgrade; and

(3) A proposed recovery mechanism to recover such costs, which shall be in accordance with Commission's traditional rate making procedures.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06; Amended at 27 Ok Reg 2098, eff 7-11-10]

165:35-38-4. Capital Expenditures to Meet Environmental Requirements

- (a) A utility may file an application pursuant to 17 O.S. Section 286(B), as amended, and this subchapter seeking Commission authorization of the utility's plan to make capital expenditures for equipment or facilities necessary to comply with the environmental requirements applicable to generation facilities as set forth in 17 O.S. Section 286(B).
- (b) If approved by the Commission after notice and hearing, the equipment or facilities specified in the approved utility plan shall be conclusively presumed used and useful.
- (c) The utility may elect periodically to adjust its rates to recover the costs of such expenditures provided that the utility shall file a request for a review of its rates pursuant to Section 152 of Title 17 of the Oklahoma Statutes.
- (d) Periodic rate adjustments as contemplated above shall not prevent a utility from seeking cost recovery of capital expenditures as otherwise may be authorized by the Commission. However, the reasonableness of the costs to be recovered by the utility shall be subject to Commission review and approval.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06; Amended at 27 Ok Reg 2098, eff 7-11-10]

165:35-38-5. Self-build or Purchase Options

- (a) An electric utility may elect to file an application pursuant to 17 O.S. Section 286(C), as amended, and this subchapter seeking approval by the Commission to construct a new electric generating facility, to purchase an existing electric generation facility or to enter into a long-term contract for purchased power and/or energy.
- (b) Upon application by an electric utility pursuant to this Subchapter, the Commission shall review the requested cost recovery.
- (c) If the soliciting utility wishes to consider an option for full or partial ownership of a self-build option, the utility must submit its construction proposal ("Self-build Proposal") to provide all or part of the capacity requested in the RFP stated in 165:35-34 at the same time the bids are requested.
- (d) Once submitted, the Self-build Proposal may not be modified by the soliciting utility. If a Self-build Proposal is selected and approved by the Commission, the amount the soliciting utility shall recover through the rate base or other cost-recovery methods without additional Commission approval is limited to the total project cost identified in the Self-build Proposal.
- (e) A Cause shall be opened by the utility for cost recovery if the competitive bidding RFP process established in 165:35-34 is not utilized and the utility wishes to gain approval of cost before construction starts.
- (f) Bid responses will be opened with the Independent Evaluator, Commission and the Attorney General present.
- (g) Bid award terms and conditions shall be posted on the utility's web site or electronic bulletin board within sixty (60) calendar days after receipt, with a notice to the Commission.
- (h) The Commission decision approving or denying the plan shall address the contents of the utility's resource plan, including its fuel procurement plan, purchased-power procurement plan, and risk management plan. If the record contains sufficient evidence, the Commission shall specifically approve or reject:

- (1) The utility's proposed plans for resources in the planning period,
 - (2) The utility's proposed plans for acquiring additional resources through the competitive acquisition process, and
 - (3) The utility's proposed RFP(s).
- (i) Upon the filing of an application pursuant to this Subchapter, the Commission will establish a procedural schedule, which shall provide for a Commission order within two hundred forty (240) calendar days of the date of such filing.

[Source: Added at 23 Ok Reg 699, eff 2-17-06 (emergency); Added at 23 Ok Reg 1666, eff 7-1-06; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 39. MINIMUM FILING REQUIREMENTS

165:35-39-1. Purpose and Scope of this Subchapter

- (a) The purpose of this Subchapter is to establish fair and reasonable rules and procedures for the Minimum Filing Requirements ("MFR") associated with the annual audit of fuel, purchased power cost recovery and purchased power supply acquisitions, of a utility ("Fuel Audit"), including but not limited to Prudence Reviews. These MFRs set forth the information to be filed and the documentation to be made available for examination by PUD Staff, the Attorney General, and to those parties that have intervened in the proceeding, subject to the appropriate confidentiality measures.
- (b) It is the intent of the Commission to establish a set of standards for the filing of MFR Packages that will facilitate the Commission's responsibilities in conducting Fuel Audits and Prudence Reviews and reflect the practices and policies of the Commission.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07; Amended at 28 Ok Reg 2252, eff 7-25-11; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-39-2. Definitions and Acronyms

The following terms and acronyms shall have the meanings set forth below for the purpose of this Subchapter 39 to the Commission's Electric Rules (OAC 165:35):

"EIS market" means the Energy Imbalance Service market implemented pursuant to FERC-approved amendments to SPP's OATT on February 1, 2007.

"FERC" means the Federal Energy Regulatory Commission.

"Fuel Audit" means the statutory audit of an electric utility's costs of fuel and purchased power costs as delivered into the utility's system pursuant to 17 O.S. §§251 *et seq.*

"Fuel Supply Portfolio and Risk Management Plan" means the documentation required to be submitted to the Commission by each utility by Commission Order.

"Material Change," "Material Deviation," or "Material Impact" means any change deviation from planned operations, or cost impact to the utility's customers equal to or greater than three percent (3%) for any single line item or event reflected in the utility's total cost of fuel burned and purchased power during the Review Period.

"Minimum Filing Requirements" or "MFR" means the minimum filing requirements established by this Subchapter 39 of the Electric Rules to be filed or made available by a utility to the Commission, PUD Staff, the Attorney General, and interested parties, subject to appropriate confidentiality protection, upon the filing by PUD Staff of an application initiating a Fuel Audit or a Prudence Review.

"MFR Package" means all of the documentation to be provided or made available by the utility as identified in this Subchapter.

"Monthly Fuel Adjustment Clause ("FAC") filings" means the information electric utilities are required to file pursuant to 17 O.S. §253.B prior to implementing fuel and fuel related costs pursuant to a Commission approved fuel and purchased power adjustment tariff.

"OATT" means an Open Access Transmission Tariff as approved by the FERC.

"Production Tax Credits" or "PTCs" means an income tax credit available to owners or operators of electric generation facilities that produce electricity from "qualified energy resources". These include wind, geothermal, solar and hydropower. (26 USC 45 Electricity produced from certain renewable resources, etc.; Title 68 O.S. Section 2357.32A Credit for Electricity Generated by Zero-Emission Facilities).

"Prudence Review" means the biennial review of the fuel, generation, and purchased power related expenses incurred by a utility pursuant to OAC 165:35-35-1.

"Renewable Energy Certificates," "Green Tags," "Renewable Energy Credits," "Renewable Electricity Certificates," "Tradable Renewable Certificates," or "RECs" means tradable, non-tangible energy commodities in the United States that represent proof that 1 megawatt-hour (MWh) of electricity was generated from an eligible renewable energy resource (renewable electricity). Solar Renewable Energy Certificates are RECs that are specifically generated by solar energy.

"Review Period" means the period of time, in calendar year increments, identified by PUD Staff in an application initiating a Fuel Audit or a Prudence Review.

"SPP", means the Southwest Power Pool, the Regional Transmission Organization recognized by the FERC and encompassing the State of Oklahoma and all or parts of surrounding jurisdictions.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07; Amended at 28 Ok Reg 2252, eff 7-25-11; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-39-3. Confidential Information

(a) The Commission recognizes that some information to be disclosed within the MFR Package may be proprietary or business sensitive and such information should be treated as confidential for the protection of the utility and/or its customers. Schedules requiring the disclosure of confidential information shall contain, a statement to that effect in the MFR Package, and disclosure of confidential information shall be withheld until the Commission issues an appropriate protective order pursuant to 17 O.S. §24A.22. Any confidential information shall be specifically identified in each such schedule contained within the MFR Package. The utility shall file a motion for a protective order identifying the confidential information to be protected simultaneously with the filing of the MFR Package, and the Commission shall determine the manner in which confidential information should be protected.

(b) Information deemed to be confidential by the utility may be withheld from disclosure until the Commission issues an appropriate protective order.

(c) All information supplied by the utility in connection with any Fuel Audit or Prudence Review, except that information subject to a requested or existing protective order, shall be considered in the public domain.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07]

165:35-39-4. Initiation of Fuel Audit or Prudence Review

(a) PUD Staff shall initiate a Fuel Audit or Prudence Review by filing an application identifying the utility or utilities subject to the Fuel Audit or Prudence Review and identifying the period of time the Fuel Audit or Prudence Review is intended to cover. PUD Staff shall file its application for a Fuel Audit or Prudence Review no sooner than one hundred fifty (150) calendar days subsequent to the end of the period identified for review.

(b) Each utility being reviewed shall make a filing meeting the MFRs, sixty (60) calendar days after PUD has filed an application commencing a Fuel Audit or Prudence Review. The MFR Package shall contain documentation as described in this Subchapter covering January through December, of the period identified in the application.

(c) All Class A Electric Companies as outlined in OAC 165:70-1-4(a)(1)(A), whether for Fuel Audit or Prudence Review, shall file direct testimony concurrently with the filing of the MFR Package.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07; Amended at 28 Ok Reg 2252, eff 7-25-11; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-39-5. Actual Fuel and Purchased Power Expenses

Under this Section, a utility must file documentation of actual fuel expenses, purchased power expenses, and off-system power sales revenues that occurred during the Review Period. This information should be contained in Schedule A of the MFR Package, consisting of the following:

- (1) A thorough and detailed narrative of the fuel and purchased power expenses, procurement practices, and procedures;
- (2) An electronic spreadsheet summary of annual volumes and expenses and revenues for fuel and purchased power, consistent with the format of the utility's monthly Fuel Adjustment Clause (FAC) filings;
- (3) Electronic copies of the utility's monthly FAC filings. The spreadsheet should include a tabular summary of the type, volume and expense/revenues associated with affiliate fuel and purchased power transactions, and the summary should address energy production by separate fuel types;
- (4) A comparison in matrix form of fuel and purchased power expenses and off-system sales revenues for the Review Period identified in PUD's application and for the previous two most recent years;
- (5) A narrative explanation of the key factors and events that had a Material Impact on the utility's actual fuel and purchased power expenses, and their relative magnitudes.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07; Amended at 28 Ok Reg 2252, eff 7-25-11; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-39-6. Fuel and Purchased Power Procurement, and REC Management Practices

Schedule B of the MFR Package shall include a thorough and detailed narrative for the fuel and purchased power procurement practices and procedures, both short-term and long-term, of the utility during the Review Period, and REC management practices, with the following information:

- (1) A list of the fuel and purchased power procurement practices, REC management practices, and Risk Management Plans relevant to the Review Period that are filed with the Commission together with copies of all such plans previously submitted but not filed;
- (2) A list of Material Deviations from the fuel and purchased power procurement and Risk Management Plans as the plans were implemented during the Review Period to include a discussion of any resulting price exposure and the causes for the Material Deviations from the plans to include material sales and/or purchases from the Southwest Power Pool Energy Imbalance Service (EIS) Market;
- (3) A description of the safeguards in place concerning affiliate transactions to ensure fair treatment of non-affiliated potential providers of commodities or services;
- (4) A list of fuel and purchased power solicitations and actions during the Review Period, including the type of competitive procurement methods used, the timeline for each solicitation, a narrative description of each solicitation, and copies of major fuel and purchased power transactions resulting from such solicitations of one month or more in duration.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07; Amended at 28 Ok Reg 2252, eff 7-25-11; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-39-7. Fuel, Purchased Power, Wind Energy Purchased Power and Fuel-Related Contracts

Schedule C of the MFR Package shall include the following information related to fuel, purchased power, wind energy purchased power and fuel-related contracts in effect during the Review Period:

- (1) A list of all fuel and fuel-related contracts in effect during the Review Period between the utility and any affiliate of the utility that supplied fuel or fuel-related services to the utility;
- (2) A list of all natural gas contracts in effect during the Review Period including natural gas contracts having a term less than one year, which are considered "spot market" contracts. The utility may provide one or more "generic" contracts which represent the terms of individual spot market contracts, in lieu of the natural gas contracts. The following information relating to all gas purchase contracts, including contracts with affiliates, shall be provided in summary form:
 - (A) Contract number/serial number/other designation;
 - (B) Supplier;
 - (C) Negotiation date or date signed; and
 - (D) Term and specific service provided under the contract
- (3) Upon request, each contract identified in this schedule shall be made available, subject to any confidentiality provisions contained therein;
- (4) A list of all applicable fuel supply contracts in effect during the Review Period including coal purchases, oil purchases, and any other fuel commodity contracts;
- (5) A list of all purchase power contracts, including wind energy purchase power agreements, in effect during the Review Period for all purchases of energy, capacity or both having a term of thirty (30) calendar days or longer;
- (6) For those contracts requiring the use of government or other published indices to adjust the price, provide the monthly values for each index

during the Review Period and identify the source of the values for each index;

(7) With respect to each contract, provide monthly minimum, maximum and actual takes by contract for the Review Period;

(8) Documentation for all occurrences when the minimum take or pay volumes under contract were not met during the Review Period;

(9) Documentation of analyses performed to evaluate any fuel or fuel related solicitations having contract terms of thirty (30) calendar days or longer during the Review Period that affected fuel costs during the period. It is not necessary to provide documentation for contracts previously approved by the Commission; and

(10) With respect to wind energy purchase power agreements and limited to those PTCs and RECs owned by the utility pursuant to the terms of any such agreements, the utility shall report the amount of PTCs and RECs generated in the reporting year; the PTC and REC balance carried forward from prior years; PTCs and RECs available to be used; PTCs and RECs expected to be utilized; PTCs and RECs actually used and related credits and sales revenue, PTCs and RECs expiring unused and the PTC and REC balance carried forward.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07; Amended at 28 Ok Reg 2252, eff 7-25-11; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-39-8. Fuel Transportation Agreements

Schedule -D- of the MFR Package. Provide a list of each transportation agreement that was in place for natural gas and coal, the associated volumes transported, and the annual expense. Identify the agreements utilized during the Review Period.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07]

165:35-39-9. Disclosure of all Fuel Related and Purchased Power Affiliate Transactions

Schedule -E- of the MFR Package. To the extent that a utility has not provided a complete disclosure of all fuel related affiliate transactions during the recovery period in response to the disclosure requirements otherwise set forth in this Subchapter, the utility shall provide a narrative explanation of any such transactions.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07]

165:35-39-10. Material Public Filings and Disclosures

Schedule -F- of the MFR Package. Each utility shall file a list of all material public filings and disclosures made to this Commission, the FERC, or the SEC in which the utility disclosed information related to fuel, purchased power, off-system sales, or fuel procurement relevant to the Review Period.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07]

165:35-39-11. Generator Availability and Dispatch

Schedule G of the MFR Package shall include generator availability and dispatch during the Review Period and a narrative description of the same, including Material Deviations from planned operations including the following:

- (1) A tabular summary of the monthly availability and output of each utility generating unit and any major non-utility generating unit under long-term contract to the extent available;
- (2) A narrative description of each generating unit utilized by the utility during the Review Period, the manner in which it operated (i.e. baseload energy, peaking, load following service, ancillary services, etc.) during the Review Period, and the annual average heat rate achieved by each generating unit during the Review Period including the actual average monthly heat rate by including MMBtu burned per unit per month and the KWH generated each month for each unit;
- (3) A narrative explanation of all significant unusual events with respect to generating unit availability and the extent to which the events affected the utility's fuel and purchased power expenses;
- (4) A list of forced and scheduled outages and deratings whether it was an unplanned outage or forced outage that occurred during the fuel Review Period. Information submitted should contain unit name, date started, date ended, duration of outage or power reduction in hours, reason for outage or information may be reported consistent with North American Electric Reliability Corporation (NERC) Generating Availability Data Survey (GADS) reporting requirements in effect during the Review Period for each utility generating unit, including a description of the reason(s) for each outage and derating;
- (5) Description and explanation of any limitations on the output of utility generating units, including excess supplies or shortages of fuel; and
- (6) A tabular summary of utility owned wind generation which includes:
 - (A) Name of wind facility;
 - (B) Name plate capability for each facility;
 - (C) Monthly capacity factor for each facility;
 - (D) Annual capacity factor for each facility;
 - (E) Actual MWH output;
 - (F) Unit value amount of PTC (credit/MWH);
 - (G) PTCs generated; and
 - (H) REC information, including amount sold, sales revenue, and expiration dates.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07; Amended at 28 Ok Reg 2252, eff 7-25-11]

165:35-39-12. Eligible Fuel Costs

Schedule -H- of the MFR Package shall contain the following:

- (1) The utility shall provide in this schedule a distribution of eligible fuel expenses for each month of the eligible period, in the following categories for each generating station:
 - (A) Coal and Lignite: Coal and lignite costs as delivered to the utility's plants;
 - (B) Natural Gas:
 - (i) Gas cost;
 - (ii) Gas transportation (if contracted separately);
 - (iii) Gas storage (if contracted separately); and
 - (iv) Other costs (specify);
 - (C) Fuel Oil:
 - (i) Oil cost, and
 - (ii) Other costs (specify).

(D) Other costs: If costs are not readily identifiable and separable in the Company's accounting system, and are included in a cost category listed above, then indicate the type of costs and the cost category in which they are included.

[Source: Added at 24 Ok Reg 1827, eff 7-1-07]

165:35-39-13. Sunset Provisions [REVOKED]

[Source: Added at 24 Ok Reg 1827, eff 7-1-07; Revoked at 28 Ok Reg 2252, eff 7-25-11]

SUBCHAPTER 41. DEMAND PROGRAMS

165:35-41-1. Purpose

The purpose of this subchapter is to establish fair and reasonable rules for planning and implementation of Demand Programs that may receive cost-recovery treatment from the Commission. The rules in this Subchapter shall apply to Demand Portfolios having program years that begin on January 1, 2016 and thereafter.

[Source: Added at 26 Ok Reg 1849, eff 6-25-09; Amended at 31 Ok Reg 1057, eff 1-1-16]

165:35-41-2. Goals

- (a) The goals of Demand Programs are to:
- (1) Minimize the long-term cost of utility service,
 - (2) Avoid or delay the need for new generation, transmission, and distribution investment, and
 - (3) Encourage and enable utility customers to make the most efficient use of utility capacity and energy and reduce wasteful use of energy.
- (b) The Commission shall set specific savings goals for each utility to reduce the rate of growth of peak demand, energy usage, and capacity addition without adversely affecting customer comfort or state economic activity, based on market potential studies, integrated resource plans, or other evidence presented as part of the hearing process for approval of a utility's Demand Programs.

[Source: Added at 26 Ok Reg 1849, eff 6-25-09; Amended at 31 Ok Reg 1057, eff 1-1-16]

165:35-41-3. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Administrative Cost" means the expenses incurred in controlling and supporting Demand Programs that are not tied to the marketing and delivery of those programs. These expenses include:

- (A) reviewing and selecting Demand Programs in accordance with this section;
- (B) providing regular and special reports to the Commission, including reports of Demand Program savings;
- (C) a utility's costs for an annual review of Demand Programs or true-up proceeding for cost recovery mechanism;
- (D) Supervisory functions performed by Demand Portfolio Manager that are related to supervision of employees and related human resource administration.

"Average customer bill" means the value derived from the sum of all ratepayer bills in a particular customer sector divided by the number of ratepayers

in that sector; i.e., the arithmetic mean. A utility may provide average customer bills for customer rate classes rather than customer sectors if it chooses to do so and clearly identifies the choice.

"Barrier" means any physical or non-physical necessity, obligation, condition, constraint, or requisite that obstructs or impedes electricity user participation in Demand Programs. Barriers may include but are not limited to language, physical or mental disability, access to capital, educational attainment, utility meter type, economic status, property status, or geography.

"Base line" means kilowatt-hour energy use, trend in kilowatt-hour energy use, percentage of capacity use over time, trend in percentage of capacity use, and description of conditions affecting such uses and trends prior to implementation of a Demand Program designed to affect particular uses and trends. When evaluating energy efficiency measures implemented or installed as a result of the Demand Programs, the base lines to be used in savings calculations shall be either the performance standard base line (the minimum efficiency prevailing in the market) or a customized, project specific base line. For Demand Programs that replace existing equipment before the end of its expected useful life, savings calculations must incorporate a two-part baseline. First, for the period of the remaining life of the replaced equipment, the baseline is the difference between the energy usage of new equipment and that of the replaced equipment. Second, for the remainder of the life of the new equipment that extends beyond the remaining life of the old equipment, the baseline is the difference between the new equipment and the standard equipment that otherwise would have been purchased at the end of the useful life of the old equipment.

"California Standard Practice Manual" means The California Standard Practice Manual: Economic Analysis of Demand Side Programs and Projects, 2001 edition, produced by the California Energy Commission and the California Public Utility Commission.

"Cost effective" and **"cost effectiveness"** mean utilizing a specified amount of money, in a way that delivers the most benefit from available alternative uses, so long as the benefit's value exceeds the money spent.

"Customized opportunity" means a Demand Program tailored to an individual electricity user's needs, including opportunities for high-volume electricity usage customers to self administer and self fund their own programs.

"Deemed savings" means an estimate of energy or peak demand savings for a single unit of an installed energy-efficiency or renewable-energy measure that (1) has been developed from data sources and analytical methods that are widely considered acceptable for the measure and purpose, and (2) will be applied to measures that are deployed in significant numbers in similar ways.

"Demand portfolio" means a collection of energy efficiency and demand response programs offered or proposed by an electric utility; for example, a residential weatherization program, a program to trade ordinary commercial fluorescent ballasts for equipment with a higher efficiency rating, a general education program for energy efficiency, and a program to provide financial inducement for purchase of properly sized industrial motors is a demand portfolio.

"Demand portfolio administrator" means the utility employee responsible for supervising the utility's energy efficiency and demand response efforts as proposed in compliance with this subchapter.

"Demand program(s)" means the Energy Efficiency and Demand response programs offered or proposed by an electric utility. Collectively, the Demand Programs make up the company's Demand Portfolio.

"Demand response" means any load management program in which a utility offers electricity users payments or other inducement to reduce their demand for electricity for specified periods of time.

"Education" means any formal program, training, or activity designed to raise awareness of, and participation in company specific Demand Programs or increase general knowledge concerning energy savings opportunities and efficiency topics. These programs may include communication efforts designed to reach customers with energy efficiency information through a variety of mediums, including but not limited to, television, radio, print and web-based media.

"Electricity user" means a real property freeholder or leaseholder at a specific location who consumes energy at that location, regardless of whether the consumer receives an energy bill directly from a utility.

"Energy efficiency" means reducing electricity consumption on the customer's side of the meter while achieving substantially the same level of end-use service.

"Evaluation, measurement, and verification or EM&V" means a systematic, objective study conducted periodically to authenticate, assess, and report how well a Demand Program is achieving its objectives, including identification and quantification of inputs, outputs, outcomes, and unintended effects.

"EM&V Costs" means the costs associated with performance of studies and activities intended to determine the actual savings and other effects from Demand Programs.

"Free rider" means a program participant who would have implemented the program measure or practice in the absence of the Demand Program. A free rider can be total, in which the participant's activity would have completely replicated the program measure; partial, in which the participant's activity would have partially replicated the program measure; or deferred, in which the participant's activity would have completely replicated the program measure, but at a time after which the program measure was implemented.

"Fuel switching" means changing from natural gas to electricity or from electricity to natural gas for a particular end-use service or installing electric heating devices in new construction where natural gas service is available or can be economically made available. It does not include installation of any device that relies primarily on on-site renewable energy, such as, but not limited to, a solar water heater, geothermal heat pump, or biomass gas-powered furnace.

"Goal" means a target to be achieved by a utility's demand portfolio. A goal may be expressed in kilowatts, kilowatt-hours, percentage reduction or limitation, years that anticipated construction of utility plant is delayed, and/or another quantifiable measurement approved by the Commission. When determining whether a goal is met, reductions or increases attributable to weather and economic activity will not be counted.

"Gross savings" means the values reported by an electric utility after the Demand Program activities have been completed, but prior to the time an independent, third-party evaluation of the savings is performed. As with projected savings estimates, these values may utilize results of prior evaluations and/or values in technical reference manuals. However, they are adjusted from projected savings estimates by correcting for any known data errors and actual installation rates and may also be adjusted with revised values for factors such as per-unit savings values, operating hours, and savings persistence rates. Gross savings can be indicated as first year, annual demand or energy savings, and/or lifetime energy or

demand savings values.

"Hard-to-reach customers" means

(A) Residential electricity users who rent their residences from persons other than kin related to the third degree of affinity or consanguinity, trusts operated by and for the benefit of the users, or the users' legal guardians,

(B) Commercial electricity users who rent their business property from persons other than the users' owners, parent companies, subsidiaries of their parent companies, their own subsidiaries, or trusts operated by and for the benefit of the same;

(C) Residential or commercial electricity users who traditionally fail to engage in energy efficiency or demand response programs because of one or more severe barriers beyond those experienced by average residential or commercial customers in a utility's service area.

"High-volume electricity user" means a customer within a utility company's service territory whose annual consumption is 15 million kWh of electricity or greater regardless of the number of meters or service locations.

"Incentive" means a sum of money a utility may be allowed to recover--in addition to program costs and lost net revenues. Incentives shall be based on the utility's verified savings from the Demand Portfolio for the previous program year and shall be calculated as described in 165:35-41-8.

"Inducement" means anything of value offered by a utility to encourage an electricity user or trade ally to engage in Demand Programs approved pursuant to this subchapter. While inducements can include a variety of costs, direct payments to customers or trade allies on behalf of customers shall make up the majority of total inducement costs.

"Lost net revenue" means income from the retail sale of electricity forgone by a utility directly resulting from the success of its demand portfolio, less expenses the utility was not required to pay by forgoing the sales. Lost net revenue shall be calculated using verified net savings, shall exclude customer service charge revenues (non-volumetric revenues), and shall exclude revenues collected from riders with annual true-ups.

"Low-income customer" means a residential electricity user who provides proof to a utility that the user has been determined by the appropriate authority to be eligible to receive services through the Oklahoma Department of Commerce Weatherization Assistance Program State Planas provided by OAC 150:80; Health Care Authority SoonerCare Choice or fee-for-service programs, as provided by OAC 317:25, 35, and 40; or Department of Human Services Temporary Assistance for Needy Families, State Supplemental Payment, Low Income Home Energy Assistance, Food Stamp, or Refugee Resettlement programs as provided by OAC 340:10, 15, 20, 50, and 60, respectively, or similar program.

"Market potential study" means an evaluation that assesses customer population base lines, customer needs, target customer populations, and how best to address these issues.

"Market transformation" means the strategic process of influencing customer population and trade ally's decision-making that creates lasting change in customer behavior by removing barriers or exploiting opportunities to accelerate adoption of cost-effective energy efficiency as a matter of standard practice.

"Measure" means the equipment, materials, or actions that are installed or used within a Demand Program that results in measurable or verifiable savings; for

example, a measure would include caulking around windows or weather stripping around doors to prevent heat loss.

"Net benefits" equal the difference between total benefits and total costs as calculated for cost-effectiveness. The economic objective of Demand Resource portfolios is to maximize net benefits. A Demand Portfolio is cost-effective if it yields positive net benefits.

"Net savings" means the total change in load that is directly attributable to a Demand Program or the Demand Portfolio. This change in energy and/or demand use shall include, implicitly or explicitly, consideration of appropriate factors. These factors shall include free ridership, participant and non-participant spillover and induced market effects.

"Net-to-gross" means a factor representing net program savings divided by gross program savings that is applied to gross program impacts to convert them into net program impacts. The factor may be made up of a variety of factors that create differences between gross and net savings, commonly considering the effects of free riders and spillover.

"Peak demand" means a utility system's maximum annual customer-driven electricity requirement, measured in kilowatts.

"Peak shaving" means reducing demand for electricity during high-use hours.

"Program" means an organized set of activities or measures directed toward the common purpose of energy efficiency or demand response that a utility undertakes or proposes to undertake to reduce peak demand or future growth in energy or capacity demand; for example, a general offer to assist homeowners in weatherizing their homes is a program.

"Program cost" means the expenditures, including expenditures paid to a third -party to deliver a program, incurred by a utility to achieve capacity, energy, and peak demand savings through Demand Programs. Expenditures made by customers or third parties are not included. Programs costs must be reported in nominal dollars in the year in which they are incurred, regardless of when the savings occur. The utility's demand program costs are all Administrative Costs, Education costs, labor, equipment, inducement, marketing, monitoring, measurement and evaluation, and other program delivery expenditures incurred by the utility for operation of the Demand Programs, regardless of whether the costs are expensed or capitalized.

"Program implementer" means the person who puts a Demand Program into practical effect.

"Projected incentives" means the amount of estimated annual incentives calculated at the time the Demand Portfolio is submitted to the Commission for initial approval, or subsequent modification, of the Demand Portfolio.

"Projected savings" means the values reported by an electric utility prior to the implementation of the Demand Programs. These are typically estimates of savings prepared for Program and/or Demand Portfolio design or planning purposes. These values are based on pre-program or Demand Portfolio estimates of factors such as per-unit savings values, operating hours, Net-to-Gross ratios, installation rates, and savings persistence rates. These values can be indicated as first year, annual demand or energy savings, and/or lifetime energy or demand savings values. These values can also be indicated as Gross savings and/or Net savings. Projected savings are reflected in the goal reduction as set in this subchapter.

"Research and development" means a planned activity aimed at discovering new knowledge with the hope of developing new or improved energy efficiency processes, products, or services and the translation of these research findings into a plan or design for new or improved energy efficiency processes, products, and services.

"Savings" means a reduction in the rate of growth of energy use, as measured in kilowatt-hours, or capacity addition, as measured in kilowatts, or peak demand, as measured in kilowatts.

"Spillover" means the reductions in energy consumption and/or demand caused by the presence of a Demand Program beyond the Demand Program-related gross savings of the participants and without financial or technical assistance from the program. Spillover can be applied to participants, consumers directly participating in a Demand Program, and/or non-participants.

"Standard offer" means a Demand Program available to a group of customers or customers generally on the same terms and without customization.

"Trade allies" means contractors, retailers, skilled laborers, service providers, and wholesale distributors who support programs Demand Programs through sale or installation of goods and services.

"Verified savings" means values reported by an electric utility after review by an independent third party evaluator. The third party evaluator shall be chosen by the utility and such costs shall be determined to be a Program Cost. These values should reflect all adjustments, including corrections for any known data errors and actual installation rates, and should also be adjusted by revised values for known factors such as per-unit savings values, operating hours, savings persistence rates, and net to gross adjustments.

[Source: Added at 26 Ok Reg 1849, eff 6-25-09; Amended at 31 Ok Reg 1057, eff 1-1-16]

165:35-41-4. Demand portfolio submission and implementation

(a) All electric utilities under rate regulation of the Commission having more than 10,000 meters in the state of Oklahoma shall propose, at least once every three years, and be responsible for the administration and implementation of a Demand Portfolio of Demand Programs within their service territories. Such proposals shall be made by filing an application with the Commission on or before July 1 prior to the year the programs will be effective. The application shall describe the Demand Portfolio and contain the following information:

- (1) A description of the intent of the Demand Portfolio as a whole;
- (2) A description of the intent of each Demand Program;
- (3) A description and quantification of the target market of each Demand Program, differentiated by customer sectors;
- (4) A base line describing the state of the market that each Demand Program is intended to address, taking into account applicable building energy codes and appliance and equipment energy standards;
- (5) A description of the barriers to investment in energy efficiency and demand response in the absence of each Demand Program and the ways each program Demand Program will reduce or eliminate these barriers;
- (6) A description of research and public input that contributed to the development of the content of each Demand Program;
- (7) A report of the cost-effectiveness of each Demand Program and the Demand Portfolio, including program and measure-level supporting data which shall include, but not be limited to, cost-effectiveness screening assumptions of gross and net energy and demand savings, coincident

demand factors, energy allocation factors for seasonal and for peak, off-peak and shoulder periods, non-electric resource benefits, non-resource benefits, participation and/or measure unit numbers, inducement levels, measure cost, and other non-inducement program costs;

(8) A detailed description of the derivation of the energy, generation, and transmission and distribution avoided costs, retail cost projections, reserve margins, discount rates, and average and peak line loss assumptions used in the cost-effectiveness calculations.

(9) A description of how each Demand Program is expected to change over its course to reflect expected changes in market penetration, technology, and other market information, as well as lessons learned;

(10) A plan for evaluation, measurement, and verification of performance and results of the demand portfolio and each program, including a plan for the use of deemed savings, if applicable, or the use of statistical sampling, if applicable, or the use of metering, where appropriate; provided that costs associated with the EM&V plan shall not exceed five percent (5%) of the total three-year Demand Portfolio budget;

(11) A plan for evaluation of the market effects of each Demand Program or applicable group of programs;

(12) A plan for evaluation of administration and implementation of each Demand Program or applicable group of programs;

(13) A plan for ending a Demand Program, if applicable;

(14) A process for amending a Demand Program;

(15) An annual budget for each Demand Program, providing detail for program costs, and differentiating evaluation, measurement, and verification costs from other program costs;

(16) A report on how the Demand Portfolio is expected to affect rates, sales, average bills and total revenue requirement for each customer sector;

(17) A report on how the Demand Portfolio meets savings goals that may be in place at the time of filing;

(18) An estimate of expected savings in peak demand, energy use, and capacity, with location information about the source of savings if savings are not expected to be evenly distributed throughout the utility system;

(19) Detailed explanation of the utility's request for recovery of prudently incurred program costs, recoupment and calculation of lost net revenue, and additional incentives the utility proposes it requires to make the programs workable; and

(20) Identification of the Demand Portfolio administrator, including name, job title, business postal address, business electronic mail address, and business telephone number.

(b) Demand Portfolios shall:

- (1) Contain Demand Programs for all customer sectors;
- (2) Strike a balance among procuring peak demand reduction, procuring energy savings, procuring capacity savings, educating the public, and transforming markets for energy efficiency;
- (3) Include standard offers to customers and trade allies to encourage simple ways to participate, where appropriate;
- (4) Contain customized opportunities for energy efficiency and demand response among larger customers;
- (5) Not include programs or measures that promote fuel switching. For new construction, an electric utility shall not offer customer or builder

inducements for the use of specific electric equipment or appliances with the exception of programs or measures that promote renewable technologies such as geothermal, solar and other renewable resources;

- (6) Be consistent with the utility's integrated resource plan;
- (7) Have an implementation schedule of no more than three years;
- (8) Address opportunities presented by new construction and renovation;
- (9) Promote comprehensive energy efficiency and demand response in buildings;
- (10) Address programs for low-income customers and hard-to-reach customers to assure proportionate Demand Programs are deployed in these customer groups despite higher barriers to energy efficiency investments. Demand Programs targeted to low-income or hard-to-reach customers may have lower threshold cost-effectiveness results than other Demand Programs; and
- (11) Allow any High-Volume Electricity User, after the utility has a reasonable opportunity to contact and present customized opportunities to such user, to opt out of some or all Demand Programs by submitting notice of such decision to the director of the Public Utility Division and to the electric utility that submits the Demand Portfolio.

(A) High-Volume Electricity Users may opt out with thirty (30) days notice after the company has received final approval of the Demand Portfolio.

(B) High-Volume Electricity Users who chose to participate in Demand Programs shall remain as a participant for the Demand Portfolio period (three years) and shall pay their calculated contribution to the Demand Programs recovery for the Demand Portfolio period. This requirement does not apply to High-Volume Electricity Users who participate only in the demand response portion of the Demand Programs.

(C) High-Volume Electricity Users who chose to opt out may not opt back in unless they agree to pay their calculated contribution to the Demand Programs recovery for the Demand Portfolio period. This requirement does not apply to High-Volume Electricity Users who participate only in the demand response portion of the Demand Programs.

(D) Once a High Volume Electricity User has opted out of Demand Programs, none of the costs of any Demand Programs shall be charged to such User, including its affiliate or subsidiary listed on such User's opt out notice, unless and until the User chooses to opt back into the Demand Programs.

(c) Demand portfolios may:

- (1) Integrate energy efficiency and demand response;
- (2) Include research and development and pilot programs that would lead to effective Demand Programs or other energy end use efficiency for Oklahoma so long as the total budget for such programs does not exceed five percent of the total budget for Demand Programs and the Commission finds the cost-effectiveness for the Demand Portfolio remains sufficient;
- (3) Encourage utility cooperation in state, regional and national programs that have the potential to save energy, reduce peak demand, or avoid capacity addition in Oklahoma; and

- (4) Encourage utility cooperation in state, regional and national programs to take advantage of economies of scale, provide consistent mass media messages, or otherwise improve program administration or customer acceptance.
- (5) Encourage utility cooperation in state, regional and national efforts to accelerate the development and improve the enforcement of building energy codes and product efficiency standards.

[Source: Added at 26 Ok Reg 1849, eff 6-25-09; Amended at 31 Ok Reg 1057, eff 1-1-16]

165:35-41-5. Commission consideration

- (a) In reviewing Demand Portfolios, the Commission will consider:
 - (1) The quality of the programs in all their elements relative to their program objectives;
 - (2) Experience of the program administrator and program implementer, if known, at designing and implementing programs;
 - (3) The cost-effectiveness for each program and for the Demand Portfolio; individual programs or individual measures for a specific program do not have to be cost-effective if their inclusion is expected to provide for greater comprehensiveness, customer or trade ally participation, or address Hard to Reach Customer participation
 - (4) The savings goals;
 - (5) The availability of programs to all customers;
 - (6) The degree to which programs include innovative ways of increasing savings, increasing participation in programs, increasing market transformation, increasing customer education, or decreasing the cost to obtain savings or promote participation and include stakeholder interests;
 - (7) The effect on rates, average customer bills, and total cost of service;
 - (8) Forecasts of utility plant that would be required absent savings from the energy efficiency and demand response programs;
 - (9) Consistency with the most recently filed integrated resource plan;
 - (10) The effect on the environment, to the extent of Commission authority;
 - and
 - (11) Other evidence the Commission finds relevant.
- (b) The Commission will endeavor to issue an order within ninety days of the filing of the application.
- (c) Whether a program is cost effective will be determined by the Commission and may be based on the tests found in the California Standard Practice Manual. The California Standard Practice Manual tests are to be used in conjunction with one another and no one test may be used to deem a program to be lacking cost-effectiveness. Results of the Rate Impact Measure Test contained in the California Standard Practice Manual shall also include an estimate of the impact on average customer bills.
- (d) A utility's recovery of prudently incurred program costs in rates or riders shall be determined by the Commission on a utility-specific basis, provided that:
 - (1) Administrative costs shall not exceed ten percent (10%) of portfolio costs;
 - (2) All Program Costs should not add more than \$2.50 to the residential sector's monthly average customer bill unless benefits and rationale for exceeding cap can be proven; bill impacts on other classes of customers shall reflect allocated Demand Program cost recovery.

- (3) The cost of time-of-use devices or other equipment required for billing purposes and their installation shall be specifically excluded from program costs (directly or indirectly);
- (4) Tariffs covering rates or riders for Demand Programs shall be updated to be in compliance with this subchapter or in accordance with OAC165:35-1-3 (f).
- (e) Programs may be modified by the utility with forty-five days notice to the Commission without prior approval by the Commission under the following conditions:
 - (1) The program is not terminated earlier than specified in the program; and
 - (2) The modification does not result in a shift of more than ten percent of the total demand portfolio budget resources away from programs serving any customer sector.
- (f) If the Commission receives an objection to the proposed program modification no later than thirty days after receiving the utility's notice, the Commission may, but is not required to, set a hearing before the Commission or an administrative law judge.

[Source: Added at 26 Ok Reg 1849, eff 6-25-09; Amended at 31 Ok Reg 1057, eff 1-1-16]

165:35-41-6. Evaluation, measurement, and verification

- (a) Utilities are responsible for timely evaluation, measurement, and verification (EM&V) of their energy efficiency and demand response programs. The EM&V should be conducted by an independent third party evaluator chosen by the utility and cost of such EM&V shall be determined to be a Program Cost.
- (b) The intent of the evaluation, measurement, and verification process is:
 - (1) To provide a reliable calculation of the net savings produced by energy efficiency and demand response programs;
 - (2) To assess the effects of programs on the market for energy efficient products and services and products and services that support demand response programs; and
 - (3) To assess the effectiveness of the administration and implementation of energy efficiency and demand response programs.
- (c) Utilities shall prepare and maintain a program-tracking database.
- (d) Each evaluation, measurement, and verification plan for a program will explain the methods that will be applied with an explanation of how those methods will meet the requirements of this rule.
- (e) Deemed savings, customer bill analysis, on-site metering, and statistical sampling will be permitted in appropriate applications.
- (f) Assumptions with any supporting research about the ratio between gross savings in energy consumption by utility customers and net savings attributable to energy efficiency and demand response programs will be included in the evaluation, measurement, and verification plan.
- (g) The evaluation, measurement, and verification process shall produce reports that are fully documented, auditable, and transparent.

[Source: Added at 26 Ok Reg 1849, eff 6-25-09; Amended at 31 Ok Reg 1057, eff 1-1-16]

165:35-41-7. Reporting

- (a) Each utility shall submit an annual report by July 1 of each year on the performance of the Demand Portfolio for the preceding program year and cumulative program performance which shall include the information enumerated in this section.

- (b) The annual report shall be submitted with any true-up mechanism for cost recovery in order for the Public Utility Division to evaluate and review cost recovery, lost revenue and incentive calculations proposed to be recovered from consumers.
- (c) Energy efficiency program results and demand response program results will be reported separately.
- (d) The report shall contain a Demand Portfolio summary reflecting the scale of each Demand Program as a part of the Demand Portfolio and will include the following:
- (1) Name of Demand Program listed by customer category;
 - (2) The date each Demand Program was started or the date each Demand Program was revised;
 - (3) The number of participating customers per Demand Program;
 - (4) By Demand Program, approved projected energy and demand savings;
 - (5) Gross energy and demand savings and performance of each Demand Program;
 - (6) Verified energy and demand savings by Demand Program and methods used to verify these savings;
 - (7) For education programs, measurements of outreach efforts, including pre-program and post program results. Copies of evaluations, surveys, focus group results, and other measurement techniques used to gauge effectiveness of education efforts;
 - (8) Levelized cost per kWh for the Demand Portfolio, Demand Program, and levelized cost per kWh by customer sector including all assumptions used to make the calculation;
 - (9) Demand Portfolio funding as a percent of total annual electricity revenue;
 - (10) Demand Portfolio energy savings as a percent of total annual energy sales;
 - (11) The projected program costs.
 - (A) These costs should be separated into the following categories to allow review of spending:
 - (i) Administrative costs;
 - (ii) Inducements: direct payments and other inducements;
 - (iii) Education and marketing costs;
 - (iv) Program delivery costs;
 - (v) EM&V costs.
 - (B) Workpapers to allow review and reconciliation of accounting information:
 - (i) Utilities shall provide workpapers with working formulas, calculations, and linkages to support all costs;
 - (ii) General Ledger: a copy of, or access to, the general ledger and subledgers; and
 - (iii) Comparative Trial Balances: a schedule of, or access to, comparative trial balances detailed by account for the test year and the first preceding year.
 - (12) The actual program costs.
 - (A) These costs should be separated into the following categories to allow review of spending:
 - (i) Administrative costs;
 - (ii) Inducements: direct payments and other inducements;

- (iii) Education and marketing costs;
 - (iv) Program delivery costs; and
 - (v) EM&V costs.
- (B) Workpapers to allow review and reconciliation of accounting information.
- (i) Utilities shall provide workpapers with working formulas, calculations, and linkages to support all costs;
 - (ii) General Ledger: a copy of, or access to, the general ledger and subledgers; and
 - (iii) Comparative Trial Balances: a schedule of, or access to, comparative trial balances detailed by account for the test year and the first preceding year;
- (13) Projected lost revenues;
- (14) Actual calculated lost net revenues, including workpapers and working spreadsheets (formulas, calculations, linkages, and assumptions) in sufficient detail to allow review of adjustments to verify energy and demand savings;
- (15) Projected incentives, including project cost effectiveness tests;
- (16) Actual calculated incentives, including workpapers and working spreadsheets (formulas, calculations, linkages, and assumptions) for updated cost effectiveness tests, in sufficient detail to allow review of cost effectiveness calculations;
- (17) The utility's annual growth in metered energy and peak demand for the previous three (3) years, with a calculation of the average growth rate over that entire period by customer class or major customer class segments;
- (18) The most current information available comparing the base line and milestones to be achieved under market transformation programs with actual conditions in the market;
- (19) The amount of reduced emissions and water consumption experienced by the utility, including all assumptions and calculations details, during the Demand Program period for the current program year;
- (20) By Demand Program, a summary of spending including the following:
- (A) Administrative costs;
 - (B) Inducements: direct payments and other inducements;
 - (C) Education and marketing costs;
 - (D) Program Delivery Costs; and
 - (E) EM&V costs;
- (21) A statement of any funds that were committed but not spent during the year, by program, with an explanation for non-spending;
- (22) A detailed description of each Demand Program reflecting the scale of the program as a part of the Demand portfolio that includes the following:
- (A) Number of customers served by each Demand Program or program category;
 - (B) Program or program category expenditures;
 - (C) Verified energy and peak demand savings achieved by the Demand Program or program category, when available; and
 - (D) A description of proposed changes in the Demand Program plans;
- (23) A list of research and development activities included in the Demand Portfolio, their status, and a report on the connection between each activity and effective Demand Programs;

- (24) Identification of Demand Program implementers, including names, job titles, business postal addresses, business electronic mail addresses, and business telephone numbers;
 - (25) The number of customers eligible for High-Volume Electricity User opt out, their aggregate load as a percentage of total energy sales, the number of such customers that have opted out, and the percentage of total energy sales that they comprise. The number of municipal or state customers that have opted out and the aggregated load this represents as percentage of total energy sales; and
 - (26) Identification of instances in new construction or renovation when a natural gas main served a location so a gas furnace or water heater could have been installed but the customer installed an electric device and an electric utility inducement was provided.
- (d) After receiving the report, the Commission:
- (1) May schedule a hearing about the performance of the programs, the outlook for the future, and other relevant issues and may consider requests from parties for a hearing; and
 - (2) Will endeavor to act on the report within ninety (90) days by accepting the report, rejecting the report, or opening an investigation to inquire further into the report.
- (e) The Commission may direct the utility to make brief quarterly or monthly reports including measurements of key metrics and news of any unexpected developments in program administration, delivery or planning.

[Source: Added at 26 Ok Reg 1849, eff 6-25-09; Amended at 31 Ok Reg 1057, eff 1-1-16]

165:35-41-8. Incentives

- (a) Each utility shall be eligible to receive an incentive for successful implementation of their Demand Portfolio if:
- (1) the Demand Portfolio achieves a minimum of 80% of the individual utility's goal ratio (Verified savings divided by the Projected savings);and
 - (2) the Demand Portfolio achieves a total resource cost test benefit/cost ratio (TRC:B/CR) that is greater than one; and
 - (3) the Demand Portfolio achieves a utility cost (UC) test benefit/cost ratio that is greater than 1.2.
- (b) No incentive shall be allowed for performance of the Demand Portfolio if the Utility fails to pass all of these threshold measures (OAC 165:35-41-8(a)(1)and(2)).
- (c) The Incentive will be calculated as follows:
- (1) A maximum incentive of 15 percent of Net Benefits will be paid for achievement of 100 percent (100%) or greater of the total annual energy savings goal.
 - (A) The goal ratio (Verified savings divided by the Projected savings) must be 80 percent (80%) or greater to receive an incentive.
 - (B) Incentive for savings achieved between 80 and 100 percent of the savings goal will be determined by multiplying the goal ratio by the maximum incentive percentage.
 - (2) The Demand Portfolio costs to be included for review of achievement of Demand Portfolio shall include all costs incurred for implementation of Demand Programs including all program costs, education or outreach program costs, Administrative costs, and EM&V costs.

- (3) Costs incurred for the implementation or reporting of the Demand Programs which are not directly incurred for a specific program are to be allocated to all Demand Programs and included as part of the Demand Program costs in determining Demand Portfolio cost effectiveness.
- (d) The Incentive will be capped at 15 percent of Demand Portfolio costs inclusive of program delivery costs, education and/or marketing outreach costs, Administrative costs and EM&V costs.

[Source: Added at 31 Ok Reg 1057, eff 1-1-16]

165:35-41-9. Stakeholder process

- (a) Each utility shall have, at a minimum semi-annual stakeholder meetings, one of which is to be held within 30 days of the submittal of the Annual Report, as set forth in 165:35-41-7. Notice of such meetings shall be made at least 30 days prior to the date of the stakeholder meeting.
- (b) At each meeting the utilities will present their most current data as to savings goal attainment and budget expenditures at the Demand Portfolio, customer sector and Demand Program level. The utility will highlight any program changes implemented since the previous meeting and any planned changes that will occur prior to the next meeting.
- (c) In the years in which a utility plans to file a Demand Portfolio application as required by OAC 165:35-41-4, the Public Utility Division shall use one of the semi-annual stakeholder meetings to obtain stakeholder feedback on the proposed application.

[Source: Added at 31 Ok Reg 1057, eff 1-1-16]

SUBCHAPTER 43. TRANSMISSION ONLY UTILITY

165:35-43-1. Purpose of this Subchapter

The purpose of this Subchapter is to establish fair, just and reasonable rules and procedures for a Utility that builds, constructs, owns, operates, controls, manages or maintains Transmission Line(s) or services within the State of Oklahoma. This Subchapter applies to Transmission Only Utilities that build, construct, own, operate, control, manage or maintain Transmission Line(s) within the State of Oklahoma. This Subchapter does not address a Utility's authority to exercise eminent domain, condemnation, siting, or project-specific approval.

[Source: Added at 29 Ok Reg 1541, eff 7-12-12]

165:35-43-2. Definitions

The following words and terms, when used in this Sub-chapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Interconnection" means two or more electric systems having a common transmission tie that permits a flow of energy between them. An Interconnection includes a common transmission tie between a Transmission Line and generation facilities, between a Transmission Line and load facilities, or between a Transmission Line and one or more other Transmission Line(s).

"NERC" means the North American Electric Reliability Corporation.

"SPP" means the Southwest Power Pool, Inc.

"Transmission Line" means a set of conductors, insulators, supporting structures, and associated equipment used to move power at 60 kilovolts (kV) or above.

"Transmission Only Utility" or "TOU" means an entity that builds, constructs, owns, operates, controls, manages, or maintains Transmission Line(s) within the State of Oklahoma and provides no retail service subject to the rate jurisdiction under 17 O.S. Section 151 et seq. by this Commission. This shall not include Utilities operated by municipalities, governmental bodies, or unregulated cooperatives.

[Source: Added at 29 Ok Reg 1541, eff 7-12-12; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-43-3. Recognition by the Commission

(a) If an entity wishes to seek recognition by the Commission that such entity is a Public Utility, as is defined by Title 17 O.S. Section 151, such entity shall file an application before the Commission seeking such recognition as a Public Utility.

(b) Appropriate assessment fees may be applied to such entity during the application for recognition process as provided by Commission rules.

[Source: Added at 29 Ok Reg 1541, eff 7-12-12]

165:35-43-4. Reporting

(a) For a TOU providing electric transmission services, other than those facilities operating for the purpose of directly connecting generation resources to the existing grid, regular review of operations is reasonable to preserve the reliability of electric transmission service, to ensure public safety, and the enhancement of economic efficiency in the production and consumption of electricity for the electric consumer. This Subchapter establishes annual reporting requirement(s) to each TOU under Commission jurisdiction.

(b) On or before June 15 of each year, each TOU shall submit information to PUD about any Transmission Line(s) the TOU has built, constructed, owned, operated, managed and/or maintained based on the preceding calendar year. Additionally, on or before June 15 of each year, each TOU shall submit information about any additional Transmission Line(s) it plans to build, own, operate, manage and/or maintain subsequent to June 15. Within such submission, the TOU shall provide information, which includes but is not limited to the following:

- (1) A description of any new transmission route(s) that the TOU has submitted to the SPP's regional planning process or other applicable regional planning process, or that has been approved by a Federal authority;
- (2) A status report of any Interconnection proposal that the TOU has submitted to a regional planning process or that has been approved by a Federal authority;
- (3) Identification of the allocation of transmission costs to Oklahoma Utilities from SPP;
- (4) An analysis of the costs and benefits to Oklahoma rate payers of any transmission project or portfolio of transmission projects, if the TOU or regional planner has prepared such a study, and excluding projects done primarily to comply with NERC standards;
- (5) The expected number of Oklahoma residents that will be employed during construction of any project and the specific type of job(s) utilizing Oklahoma residents;
- (6) The expected number of Oklahoma residents that will continue to be employed after construction of any project and the specific type of job(s) utilizing Oklahoma residents;
- (7) A statement reflecting any known annual property or ad valorem tax assessed to the TOU for Transmission Lines and related operations;

- (8) Aggregate total payments made to private landowners for transmission right-of-way, reported after all right-of-way for a particular project has been acquired;
 - (9) Aggregate total payments made to public landowners for transmission right-of-way, reported after all right-of-way for a particular project has been acquired;
 - (10) Identification of any new energy resource(s) to which the transmission project is directly connected or, to the extent known, resources to which the transmission project could be connected to integrate existing natural gas or other resource generation;
 - (11) Copies of any impact studies previously provided to state or federal agencies concerning the environment and the wildlife in the area of any new Transmission Line(s) built by the TOU will be made available for onsite review as requested;
 - (12) An attestation that the TOU's insurance coverage will be made available for onsite review as requested.
- (c) Any additional information required by the Commission shall be requested from all TOU at such time as the Commission determines the need for such information.
- (d) Information submitted in the reports required by this section shall be deemed confidential records or trade secrets of the reporting TOU under the Open Records Act as provided for by 51 O.S. Section 24A.22 and shall be made available for Commission onsite review, unless such records are successfully challenged or become the subject matter of an enforcement action at the Commission. Utilities will clearly mark all confidential documents as confidential.

[Source: Added at 29 Ok Reg 1541, eff 7-12-12; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-43-5. Public Utility Division consideration

- (a) PUD shall review and may investigate all reported transmission information for compliance with reporting requirements.
- (b) After receiving a report from a TOU pursuant to the preceding Section, PUD:
- (1) Will determine whether the report is compliant with the requirements of the Commission rules; and
 - (2) Inform the TOU of PUD's determination regarding compliance within ninety (90) calendar days of receipt of the report. In the event PUD determines the TOU's report is not in compliance with the rules, PUD shall contact the TOU to require additional information, and such information shall be provided within fifteen (15) calendar days of such notice. If the TOU fails to correct such non-compliance, PUD may reject the report or open an investigation to inquire further into the reported or submitted information.

[Source: Added at 29 Ok Reg 1541, eff 7-12-12; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-43-6. Determining assessment fees

- (a) In causes initiated on the Public Utility Docket to meet requirements of this subsection, fees shall be assessed upon a motion of PUD Staff or upon motion of the Attorney General.
- (b) The Commission shall make a determination of the estimated costs of PUD and the Attorney General required to process, analyze and review filed information as required by this subsection. These estimated costs shall be the basis of the fee assessed on a TOU subject to this Subchapter.

(c) After notice to the TOU to be assessed and hearing, the Commission shall issue an order which shall include the following:

- (1) Whether or not the TOU will be assessed fee(s);
- (2) The amount of the fee(s) to be assessed; and
- (3) The date payment(s) shall be paid.

[Source: Added at 29 Ok Reg 1541, eff 7-12-12; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-43-7. Decommissioning of transmission lines

(a) A TOU shall be responsible, at its expense, for the decommissioning of any and all of its equipment upon abandonment or the end of the useful life of a Transmission Line or other electric transmission facility. After the decommissioning of any Transmission Line, a TOU shall restore the land upon which a decommissioned Transmission Line or other electric transmission facility was located consistent with the TOU's decommissioning plan.

(b) A TOU shall submit a decommissioning plan to identify the methodology used to mitigate potential impacts resulting from the cessation of operation at the end of the project's useful life. The plan shall consist of but not limited to the following:

- (1) Identification of the specific project components that will be removed;
- (2) A description of the decommissioning process in the event of abandonment during construction and abandonment during operation;
- (3) A description of the process used for soil and road restoration; and
- (4) An attestation that a statement of financial capability or insurance coverage sufficient to decommission the project outlined in the plan will be made available to the Commission upon request.

[Source: Added at 29 Ok Reg 1541, eff 7-12-12; Amended at 36 Ok Reg 620, eff 7-25-19]

SUBCHAPTER 45. WIND ENERGY

165:35-45-1. Purpose of this subchapter

The purpose of this Subchapter is to implement provisions of the Oklahoma Wind Energy Development Act, 17 O.S. §§ 160.11 *et seq.*, by establishing rules and procedures for an entity that builds, constructs, owns, operates, controls, manages or maintains a wind energy facility within the State of Oklahoma. This Subchapter applies to the components of wind energy facilities built, constructed, owned, operated, controlled, managed or maintained within the State of Oklahoma, provided however it does not apply to any TOU.

[Source: Added at 33 Ok Reg 645, eff 8-25-16; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-45-2. Definitions

In addition to terms defined in the Oklahoma Wind Energy Development Act, 17 O.S. § 160.11 *et seq.*, the following word(s) or term(s), when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Clearinghouse" means the Military Aviation and Installation Assurance Siting Clearinghouse.

"Determination of No Hazard" means a document issued by the Federal Aviation Administration.

"FAA" means the Federal Aviation Administration.

"Project boundary" means a graphic depiction of a wind energy facility's outer boundary, which should adequately demonstrate the project's outer perimeter,

inclusive of all wind turbines.

[Source: Added at 33 Ok Reg 645, eff 8-25-16; Amended at 36 Ok Reg 485, eff 12-7-18 (emergency); Amended at 36 Ok Reg 620, eff 7-25-19; Amended at 37 Ok Reg 97, eff 10-2-19 (emergency); Amended at 37 Ok Reg 1167, eff 9-15-20]

165:35-45-3. Annual reporting requirements

On or before March 1 of each year, each wind energy facility owner or operator shall submit information required by PUD. This submission shall provide to PUD information about wind energy facilities the owner constructs, owns, operates, manages or maintains within the State of Oklahoma. Within such submission, the wind energy facility owner or operator shall provide information, which includes but is not limited to the following:

- (1) The commercial generation date of each wind energy facility;
- (2) If a wind energy facility fails to generate power, an explanation of the cause of the failure to generate;
- (3) An attestation indicating that the wind energy facility's insurance coverage will be made available for onsite review by PUD as requested;
- (4) For the first annual report(s) associated with a wind energy facility's first year of commercial operation, the report shall also include: a final project description and a final location description for each turbine, as constructed, and an attestation indicating that setback and notice requirements have been complied with.
- (5) For those wind energy facility components that are otherwise subject to the rules applicable to the annual reports of TOUs, this Subchapter does not require duplicative reporting.
- (6) Electronic submission is preferred; however, all forms of submission will be accepted.

[Source: Added at 33 Ok Reg 645, eff 8-25-16; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-45-4. Notification of intent to build a wind energy facility and other notices

- (a) Within six (6) months of the initial filing with the FAA, the owner of a wind energy facility shall electronically submit to the PUD Director all initial 7460-1 forms for all individual wind turbines or any other individual structure that requires a FAA Form 7460-1 that is part of a wind energy facility, an attestation of compliance with the provisions of 17 O.S. § 160.20(A), and a map of the project boundary. Within thirty (30) days of the initial filing with the FAA, the owner of a wind energy facility shall submit copies of all initial 7460-1 forms for individual wind turbines and other individual structures that require a 7460-1 that are part of a wind energy facility to the Aeronautics Commission.
- (b) PUD shall provide the owner of a wind energy facility with affirmation of submission of the notification of intent to build by either providing proof of receipt stamp or confirmation of receipt if submission is made electronically.
- (c) The owner of the wind energy facility shall send copies of the notification with the board of county commissioners of every county in which all or a portion of the wind energy facility is to be located within twenty-four (24) hours of submission with the Commission. If all or a portion of the wind energy facility is to be located within the incorporated area of a municipality, copies of the notification shall also be sent to the governing body of the municipality within twenty-four (24) hours of submission with the Commission.
- (d) Within six (6) months of submitting the notification with the Commission as provided for in subsection (a) of this section, the owner of the wind energy facility

shall cause a copy of the notification to be published in a newspaper of general circulation in the county or counties in which all or a portion of the wind energy facility is to be located. Proof of publication shall be submitted to the PUD Director.

(e) Within sixty (60) calendar days of publishing the notification in a newspaper as provided for in subsection (f) of this section, the owner of the wind energy facility shall hold a public meeting. Notice of the public meeting shall be published in a newspaper of general circulation and submitted to the board of county commissioners in the county or counties in which all or a portion of the wind energy facility is to be located. The notice shall contain the place, date and time of the public meeting. Proof of publication of the notice shall be submitted to the PUD Director. The public meeting shall be held in one of the counties in which all or a portion of the wind energy facility is to be located.

(f) If the owner of a wind energy facility is required to file subsequent 7460-1 forms with the FAA due to changing locations or heights of individual structures from the locations or heights originally proposed in the initial 7460-1 forms submitted to the Oklahoma Aeronautics Commission, the owner shall, within ten (10) calendar days of filing with the FAA, submit such subsequent 7460-1 forms to the Corporation Commission and Aeronautics Commission. A wind energy facility owner shall not be required to start the notification processes over unless the subsequent 7460-1 forms expand the project beyond its original project boundary submitted to the Corporation Commission.

(g) The owner of a wind energy facility shall not commence construction on the facility until the notification and public meeting requirements of this section have been met. If an owner of a wind energy facility fails to submit the information as required in this section, the owner shall be subject to an administrative penalty from the Commission not to exceed One Thousand Five Hundred Dollars (\$1,500) per day, per violation following hearing and issuance of a final order of the Commission.

(h) No individual wind turbine or any other individual structure that requires a FAA 7460-1 form that is part of a wind energy facility may be constructed or expanded unless there is an active Determination of No Hazard from the FAA and adverse impacts to the United States Department of Defense, pursuant to Title 32 of the Code of Federal Regulations, Section 211.6, have been resolved as evidenced by documentation from the Clearinghouse for the individual wind turbine or other individual structure. The Mission Compatibility Certification Letter or successor form may serve as such evidence of adverse impacts being resolved with the Department of Defense or successor agency. Determinations of No Hazard and documentation of the resolution of adverse impacts to the Department of Defense shall be submitted by the owner of a wind energy facility to the Corporation Commission and the Aeronautics Commission.

(i) If an owner of a wind energy facility fails to submit an active Determination of No Hazard and documentation that adverse impacts to the Department of Defense have been resolved by the Clearinghouse for the individual turbine or other individual structure prior to the start of construction, the owner shall be subject to an administrative penalty not to exceed One Thousand Five Hundred Dollars (\$1,500.00) per day, per violation from the Corporation Commission.

(j) All notices, notifications, Determinations of No Hazard, and proof of compliance with all provisions of the Oklahoma Wind Energy Development Act, shall be retained by the wind energy developer, for a period of three (3) years after commercial operation date; and, upon reasonable request, PUD may inspect these

documents to ensure compliance.

(k) The owner of a wind energy facility shall electronically provide a notice to the PUD Director indicating that it has commenced the 60-day notice as required by 17 O.S. § 160.21(F). Such notice shall be sent to the PUD Director prior to commencement of construction of the wind energy facility. The notice to the PUD Director shall also include an affirmation that all required notices and notifications have been properly provided, and a list of the recipients of all required notices and notifications shall be retained by the wind energy developer and made available to PUD upon reasonable request.

(l) All submissions shall be submitted electronically to PUD, unless prior approval is granted by the PUD Director.

[Source: Added at 33 Ok Reg 645, eff 8-25-16; Amended at 36 Ok Reg 485, eff 12-7-18 (emergency); Amended at 36 Ok Reg 620, eff 7-25-19; Amended at 37 Ok Reg 97, eff 10-2-19 (emergency); Amended at 37 Ok Reg 1167, eff 9-15-20]

165:35-45-5. Commission consideration

(a) PUD shall review and may investigate all wind energy facility information reported or submitted for compliance with the annual reporting requirements in this Subchapter or in 17 O.S. § 160.18 or with the notice requirements in this Subchapter or in 17 O.S. § 160.20 or 17 O.S. § 160.21.

(b) After receiving a report or submission from a wind energy facility pursuant to the annual reporting requirements in this Subchapter or in 17 O.S. § 160.18 or the notice requirements in this Subchapter regarding notice of intent to construct in 17 O.S. § 160.20 or 17 O.S. § 160.21, PUD will:

- (1) Determine whether the report or submission is compliant with the annual reporting or notice requirements; and
- (2) Inform the wind energy facility owner or operator of PUD's determination within thirty (30) calendar days of receipt of the report or submission if it is not in compliance. In the event PUD determines the wind energy facility's report or submission is not in compliance, PUD shall contact the owner or operator to require additional information; and, such information shall be provided within fifteen (15) calendar days of such notice. If the facility owner fails to correct such non-compliance, PUD may reject the report or submission and may open an investigation to inquire further into the reported or submitted information.

[Source: Added at 33 Ok Reg 645, eff 8-25-16; Amended at 36 Ok Reg 485, eff 12-7-18 (emergency); Amended at 36 Ok Reg 620, eff 7-25-19; Amended at 37 Ok Reg 97, eff 10-2-19 (emergency); Amended at 37 Ok Reg 1167, eff 9-15-20]

165:35-45-6. Determining assessment of fees

(a) In wind energy facility causes initiated on the Public Utility Docket for alleged violation(s) of any provision of this Subchapter, fees shall be assessed upon motion of the PUD in wind energy facility causes.

(b) The Commission shall make a determination of the estimated costs of PUD required to process, analyze and review wind energy facility causes initiated on the Public Utility Docket. These estimated costs shall be the basis of the fee assessed to a wind energy facility subject to this Subchapter.

(c) After notice to the wind energy facility to be assessed and hearing, the Commission shall issue an order which shall include the following:

- (1) Whether or not the wind energy facility will be assessed a fee(s);
- (2) The amount of the fee(s) to be assessed; and
- (3) The date payment(s) of the fee(s) shall be made.

(d) In causes wherein the wind energy facility owner is also a public utility, as defined in 17 O.S. § 151, required to pay the public utility assessment fee pursuant to 17 O.S. § 180.11 and OAC 165:5-3-20, the above assessment of fees shall not apply.

[Source: Added at 33 Ok Reg 645, eff 8-25-16; Amended at 36 Ok Reg 620, eff 7-25-19]

165:35-45-7. Decommissioning of wind energy facilities

(a) The owner of a wind energy facility shall be responsible, at its expense, for the proper decommissioning of the facility upon abandonment or the end of the useful life of the commercial wind energy equipment in the wind energy facility.

Decommissioning shall be in a manner consistent with 17 O.S. § 160.14 and 17 O.S. § 160.15.

(b) Evidence of financial security to cover the anticipated costs of decommissioning may be in the form of a surety bond, collateral bond, parent guaranty, cash, cashier's check, certificate of deposit, bank joint custody receipt, or irrevocable letter of credit.

(c) The owner of a wind energy facility shall submit to the PUD Director, a notice of decommissioning for the proper retirement of the facility upon abandonment or the end of the useful life of the commercial wind energy facility. Such notice of decommissioning shall be submitted not less than sixty (60) calendar days prior to commencement of decommissioning in a manner consistent with 17 O.S. § 160.15.

CHAPTER 40. STANDARD TERMS OF PURCHASES FROM PURCHASERS OF 300 KW OR LESS

[Authority: 17 O.S., § 34.1]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:40-1-1. Purpose

These terms and conditions of purchase of this Chapter were adopted by the Oklahoma Corporation Commission through Cause No. 27208, Order No. 326195, May 23, 1988, pursuant to Section 210 of the Public Utility Regulatory Policies Act of 1978 (PURPA) and Order No. 69 of the Federal Energy Regulatory Commission (FERC) as amended. This Chapter shall govern the supplying and delivering of power to the cooperative/utility's electric system by a small power producer or cogenerator (producer) of 300 kW or less who:

- (1) Is qualified under an approved purchase rate schedule.
- (2) Has made a proper purchase application.
- (3) Has executed a purchase agreement with the cooperative/utility.

[Source: Amended at 36 Ok Reg 666, eff 7-25-19]

165:40-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Cogenerator" means a producer qualified under Section 201 of the Public Utility Regulatory Policies Act of 1978 as a cogeneration facility. A facility's power production capacity:

(A) Must be used to produce both electrical and useful thermal energy for industrial commercial, heating or cooling purposes, through the sequential use of energy.

(B) Must meet the applicable standards as to fuel use and efficiencies.

(C) Shall be qualified by FERC.

"Commission" means the Oklahoma Corporation Commission.

"Consumer" means any person, firm, corporation, municipality, or agency or any political subdivision of the United States or the State of Oklahoma receiving electric service of any nature from the cooperative/utility. (Where or when it becomes necessary to designate the particular party who is the consumer/producer for any reason, the person who contracts for electric service or in whose name it is received shall be considered the consumer/producer.)

"Cooperative/utility" means the electric distributive cooperative/utility or the investor owned utility.

"Electricity" means electric power and energy produced, transmitted, distributed, or furnished by or delivered to the cooperative/utility.

"Force majeure" means a cause reasonably beyond the control of the party affected, such as, but without limitation to, injunction, strike of the party's employees, war, invasion, fire, accident, floods, backwater caused by floods, acts of God, or inability to obtain or ship essential services, materials, or equipment because of the effect of similar causes on the party's suppliers or carriers.

"Fraudulent use or sale of electricity" means any unauthorized use of the cooperative/utility electric service by the producer, or unauthorized use of producer generated electricity.

"Meter" means any device or devices used to measure or register electric power and energy.

"NEC" means the National Electrical Code issued by the National Fire Protection Association.

"Premises" means any piece of land or real estate, or any building or other structure or portion thereof or any facility where electric energy is furnished to or delivered by a producer.

"Producer" means a small power producer or cogenerator.

"Prudent utility practices" means the practices, methods, and acts which, in the exercise of reasonable judgment in light of the facts (including but not limited to the practices, methods, and acts engaged in or approved by a significant portion of the electric utility industry prior thereto) known at the time the decision was made, would have been expended to accomplish the desired result at the lowest reasonable cost consistent with good business practices, reliability, safety, and expedition, taking into account the facts that the term "prudent utility practice" is not intended to be limited to the optimum practice, methods, or acts to the exclusion of all others, but rather to be a spectrum of possible practices, methods, or acts which could have been expected to accomplish the desired result at the lowest reasonable cost consistent with reliability, safety, and expedition. "Prudent

utility practice" includes due regard for manufacturer's warranties and requirements of governmental agencies of competent jurisdiction.

"PUD" means the Public Utility Division of the Oklahoma Corporation Commission.

"Small power producer" means a facility qualified under Section 201 of the Public Utility Regulatory Policies Act of 1978 as a small power production facility.

"Tariff" shall include every rate schedule, purchase rate schedule or provision thereof, service agreement, purchase agreement and all terms, conditions, rules, and regulations for furnishing electric service or purchasing electric energy.

[Source: Amended at 36 Ok Reg 666, eff 7-25-19]

165:40-1-3. Application of terms and conditions of purchase

(a) The terms and conditions of purchase of this Chapter, and any modifications thereof and additions thereto lawfully made, are applicable to all purchase applications, agreements, and rate schedules of producers defined in 165:40-1-1.

(b) Cooperative/utility shall receive and purchase and producer will furnish and sell either all energy produced or net energy in excess of producer's needs, as the producer shall choose.

(c) If producer is also a consumer, the applicable rate schedules for service, service agreement, and terms and conditions of service will continue to apply to such service, except as modified in this Chapter.

(d) The cooperative/utility may decline to serve a producer or prospective producer until such producer has complied with the rules and regulations of the Commission and any applicable federal, state, and municipal or other local laws and rules and regulations. The cooperative/utility may refuse to purchase from any producer for noncompliance with these terms and conditions of purchase or related purchase agreement and purchase rate schedule.

[Source: Amended at 10 Ok Reg 2641, eff 6-25-93]

165:40-1-4. Modification of terms and conditions of purchase

No agent, representative, or employee of the cooperative/utility shall have authority to modify the terms and conditions of purchase of this Chapter; provided, however, the cooperative/utility shall have the right to request amendment of these terms and conditions of purchase or to request additional terms and conditions of purchase as it may deem necessary from time to time, subject to the approval of the Commission

165:40-1-5. Administration of purchase tariff

Each party shall designate one person as its representative for the purchase agreement. The representative shall carry out the provisions of the purchase tariff and provide liaison between the parties.

165:40-1-6. Dispute resolution

Dispute on any matter relating to the purchase tariff shall first be discussed by the representatives. If either party feels that the other party is not using their best efforts to amicably and properly resolve the dispute, that party shall have the right to submit the dispute to the Commission for mediation, hearing, or other resolution.

165:40-1-7. Notices

Any notice, demand, or request required or permitted to be given by either party to the other, and any instrument required or permitted to be tendered or delivered by either party to the other shall be so given, tendered, or delivered:

- (1) For consumer/producers, in the same manner as specified in the terms and conditions of service.
- (2) For producers, by depositing the same in any United States Post Office with postage prepaid, for transmission by certified or registered mail, addressed to the party, or personally delivered to the party, at the address furnished for the representative. Changes in such designation may be made by notice similarly given. Oral notices between the representatives will be sufficient if confirmed in writing.

SUBCHAPTER 3. GENERAL REQUIREMENTS AND INFORMATION

PART 1. BILLING AND PURCHASE AGREEMENTS

165:40-3-1. Application for purchase agreement

- (a) Each producer, before interconnecting and before selling electric energy, shall make written application to the cooperative/utility to purchase the producer's electricity under the applicable purchase rates.
- (b) A written purchase agreement, when signed by the producer and accepted and approved by the cooperative/utility, constitutes a contract. Each application for electric purchase shall be made in the true name of the producer.
- (c) A single application for purchase cannot be made to apply to different locations, nor to cover more than one point of purchase at the same location to be used by the same producer, unless the cooperative/utility determines that the physical or electrical characteristics of the facility requires more than one point of purchase according to good engineering and operating practice.
- (d) The contract is not transferable by the producer. A producer no longer desiring a purchase agreement on a premises must notify the cooperative/utility of his intent to discontinue. When there is a new occupant of the premises or a change in responsibility for operations, a new application for purchase must be made before purchase is begun.
- (e) Any person who delivers electric energy into the cooperative/utility's system without having made application to sell such energy shall be liable to the cooperative/utility for payment thereof under the applicable rate schedule and for any damages caused thereby.

165:40-3-2. Selection of purchase rates or options

- (a) The cooperative/utility's purchase rate schedules state the conditions under which the schedules are available.
- (b) The cooperative/utility, at any time upon request, will determine for any producer the rates or other options best adapted to existing and anticipated electric purchase or service requirements as defined by the producer, but the producer shall always have the final responsibility for the choice between such applicable rates or options.
- (c) The cooperative/utility's purchase rate schedules state the term or period of time for which each is established. A producer having selected a purchase rate or option may not apply for another purchase rate or option during the applicable term.
- (d) A new producer will be given reasonable opportunity (normally not to exceed three (3) months time) to determine his purchase availability before definitely

selecting the most favorable purchase rates and options.

165:40-3-3. Extension of producer's system through public space

For the purpose of obtaining a lower rate by receiving electric service or a higher rate by supplying electricity for purchase through one meter, the producer will not be permitted to extend or connect his electric wiring installation across or under a street, alley, or other public space in order to obtain connection with adjacent property, unless such extension is made pursuant to a special contract or filed rate schedule.

165:40-3-4. Billing for electric purchase

(a) **Consumer/producer.** Billing for electric purchase will be done in the same manner and by the same persons as is done for electric service to the same premises. Invoices for purchases will be prepared by the cooperative/utility and submitted at the same time to the consumer/producer as a separate statement or as a separate item on the bill for service. This procedure will be followed unless otherwise agreed upon between the producer and the cooperative/utility. Any charge for late payment for service will be made in accordance with the terms and conditions of service except that the amount will be calculated after netting for any amounts purchased.

(b) **Producer only.** Purchase meters shall be read by the producer at approximately monthly intervals at a time specified by the cooperative/utility. Invoices will be prepared by the producer. Cooperative/utility will normally make payment within its usual payment cycle. This procedure will be followed unless otherwise agreed upon between the producer and the cooperative/utility.

165:40-3-5. Testing of purchase meters upon request of producers

The cooperative/utility will test the accuracy of any producer's purchase meter in the same manner as for service meters under the terms and conditions of service.

165:40-3-6. Adjustment of invoices for meter inaccuracy and incorrect billing

Adjustment of invoices will be done in the same manner as under the terms and conditions of service.

PART 3. CONTINUITY OF PURCHASES BY COOPERATIVE/UTILITY

165:40-3-10. Continuity and quality of electric connection

(a) The cooperative/utility will use reasonable diligence to receive continuous electric delivery at the point of purchase with the producer within the voltage limits specified by applicable Chapters of this Title.

(b) It shall be the responsibility of the producer to install and maintain protective devices which will protect the producer's equipment or process during abnormal service conditions or the failure of part or all of the electric service.

(c) In order to make repairs to or changes in the cooperative/utility's facilities for supplying electric service or taking electric purchases, the cooperative/utility reserves the right, without incurring any liability therefore, to suspend purchase without notice to a producer for such periods as may be reasonably necessary. Insofar as is practicable, the interruption shall be made at a time which will cause least reasonable inconvenience to producers.

- (d) The cooperative/utility also reserves the right to discontinue purchase from any producer, without advance notice, when a defective condition of wiring or equipment upon the premises of the producer results, or is likely to result in danger to life or property or interference with proper service to others. Upon becoming aware of any condition resulting in discontinuance of purchase, the cooperative/utility shall immediately take action to notify the affected producer. Electric purchase from the producer will not be resumed until the dangerous condition has been remedied to the satisfaction of the cooperative/utility.
- (e) If such dangerous condition is the result of tampering with cooperative/utility equipment, the provisions in 165:40-3-23 shall also apply.

[Source: Amended at 10 Ok Reg 2641, eff 6-25-93]

165:40-3-11. Effect of force majeure

- (a) Neither party to a purchase agreement shall be deemed to be in default if failure of performance is due to force majeure, except for the duty to make timely payments when due. The party unable to perform due to force majeure has the duty to notify the other party in writing as soon as practical of the nature and period of delay and shall exercise due diligence to remove the inability to perform, except with respect to settling labor disputes.
- (b) If party's failure of performance is due to removable or remediable causes which it fails to remove or remedy with reasonable dispatch, party is not relieved of liability as a result of the force majeure event.

165:40-3-12. Change of occupancy

- (a) When a producer elects to terminate purchase, the cooperative/utility is to be notified, either by telephone, if subsequently confirmed in writing, or in writing, as to the proposed effective date of such termination. The cooperative/utility will read the meter(s) as required by the terms and conditions of service.
- (b) Leaving an interconnection to vacant premises does not constitute consent by the cooperative/utility for the new occupant of such premises to interconnect or deliver electric energy without making proper application for said purchase.

[Source: Amended at 10 Ok Reg 2641, eff 6-25-93]

165:40-3-13. Discontinuance of electric purchase

- (a) The cooperative/utility may discontinue electric purchase from a producer for the reasons set forth below, after written notice stating the reason for such discontinuance has been given to the producer:
- (1) At any time service is discontinued under the terms and conditions of service.
 - (2) If the producer refuses to provide cooperative/utility reasonable access to its equipment upon producer's premises.
 - (3) Violation of any rule, regulation, or order of the Commission or noncompliance with any applicable federal, state, municipal, or other local laws, rules or regulations.
 - (4) Violation of or noncompliance with any approved tariff or these terms and conditions of purchase.
 - (5) Failure of the producer to make application for purchase.
 - (6) Failure of the producer to make application for electric purchase in the true name of the producer for the purpose of avoiding payment of an unpaid obligation for electric service provided.

- (b) The cooperative/utility may discontinue electric purchase from a producer without advance notice for any of the following reasons:
- (1) Existence of a dangerous or defective condition of wiring or equipment on producer's premises.
 - (2) Fraudulent use or sale of electricity.
 - (3) Tampering with the cooperative/utility's regulating and measuring equipment or other property.
- (c) The cooperative/utility may discontinue purchase for nonpayment of a utility bill, net of purchases, in the same manner as for retail electric service.
- (d) The fact that the cooperative/utility holds a deposit authorized by the terms and conditions of service will not prevent discontinuance of purchase pursuant to this Section.
- (e) As soon as is practicable, after the condition has been remedied for which the producer's purchase was discontinued, the cooperative/utility shall restore purchase; provided, however, where purchase has been discontinued for fraudulent use or sale of electricity or for tampering with the cooperative/utility's regulating and measuring equipment or other property, the cooperative/utility may refuse to restore purchase until ordered to do so by the Commission.
- (f) Whenever purchase has been discontinued for fraud or tampering as defined in this Section, the cooperative/utility may charge a reconnection fee of \$5.00 during normal working hours and \$10.00 during other hours, in addition to any charges under the retail terms and conditions of service. The producer must pay, or make arrangements for paying same, before purchase will be reconnected.
- (g) Noncancellation of purchase does not waive right to cancel for future breach.

[Source: Amended at 10 Ok Reg 2641, eff 6-25-93]

PART 5. RETAIL SALES BY COOPERATIVE/UTILITY

165:40-3-20. Exclusive use of cooperative/utility's electric service

The standard retail rate schedules for service, now on file and approved by the Commission, are based on exclusive use of cooperative/utility's service. Purchase under these terms and conditions and applicable purchase rate schedules is not a violation of those rate schedules.

165:40-3-21. Resale of the cooperative/utility's electric service

The producer will not resell the electricity purchased from the cooperative/utility or sell its own electricity to any other party.

165:40-3-22. Deposits as security for payment of bills

Any deposits required as security for payment of bills and any deposit procedures specified in the terms and conditions of service shall not be modified as a result of a purchase agreement.

165:40-3-23. Fraudulent use or sale of electricity

(a) In the event fraudulent use or sale of electricity or evidence of attempting fraudulent use or sale of electricity is discovered, or where the cooperative/utility's regulating or measuring equipment or other property has been tampered with, electric purchase may be discontinued by the cooperative/utility without advance notice to the producer.

(b) Unless otherwise ordered by the Commission, purchase from the producer will not be resumed until such producer shall have paid all bills including:

- (1) The charge for the estimated amount of electricity fraudulently consumed or sold.
- (2) The cost of replacement or repair of any damaged meter or associated equipment.
- (3) The cost of installation of system protection facilities, or of relocation of the meter, if determined necessary by the cooperative/utility.
- (4) All reconnection charges.

(c) If it has been shown to the satisfaction of the cooperative/utility that the producer or applicant for purchase had no connection with, or knowledge of, such fraudulent use or sale of electricity or such tampering, electric purchase may be resumed after the condition causing or permitting the fraudulent usage or sale has been corrected and such producer or applicant for purchase has paid for any unmetered service received.

PART 7. LIABILITY AND RESPONSIBILITY FOR PROPERTY

165:40-3-30. Liability

(a) Each party hereto shall indemnify and save the other party harmless from any loss or damage to the facilities of the other party due to the sole negligence of other party; provided however, that the producer shall provide, install, and maintain at his own expense all electrical wiring and apparatus, including any protective equipment, required either by the National Electrical Code and/or the applicable municipal code and with all requirements prescribed by any governmental authority having jurisdiction thereof, and compliance with such duty shall be a condition to liability of the company under this indemnity.

(b) Neither party is liable for revenue loss resulting from interruption or partial interruption of service.

(c) Should the producer dispute the interpretation by the cooperative/utility of the requirements of the National Electrical Code and/or any applicable municipal code, such producer may request the dispute be resolved by the Commission.

(d) The cooperative/utility reserves the right to refuse to connect to any wiring or apparatus which does not meet these requirements, and the cooperative/utility may, without advance notice, discontinue its connection with any producer's wiring or apparatus when a dangerous condition of wiring or equipment upon the premises of the producer is discovered.

[Source: Amended at 10 Ok Reg 2641, eff 6-25-93]

165:40-3-31. Responsibility for cooperative/utility property

(a) Notwithstanding any provisions of this Chapter to the contrary, the producer shall be responsible for all damage to, or loss of, the cooperative/utility's property located upon the producer's premises, unless occasioned by causes beyond the producer's control. The producer shall not authorize anyone to change, remove, or tamper with cooperative/utility's property.

(b) No regulating or measuring equipment or other property or equipment owned by the cooperative/utility, wherever situated, whether upon producer's premises or elsewhere, shall be tampered with or interfered with, either for the purpose of adjustment or otherwise.

SUBCHAPTER 5. INSTALLATION AND PARALLEL OPERATION

PART 1. PRODUCER'S WIRING AND INTERCONNECTION

165:40-5-1. Producer's wiring and apparatus

(a) Interconnection agreements between an electric utility and a producer must include provisions which address subsections (b), (c) and (d) below:

(b) All apparatus and electrical wiring connected or to be connected to the cooperative/utility's distribution system point of delivery shall be at the producer's expense, and shall be installed and maintained in accordance with the NEC, as adopted by the Commission in OAC 165:35, to the extent consistent with law, including state and federal statutes, orders, and regulations, and applicable municipal regulations, and with all requirements prescribed by governmental authority having jurisdiction thereof. In the event of a conflict between the NEC and an applicable municipal code, the latter shall govern. The cooperative/utility reserves the right to refuse to connect at the point of delivery to any wiring or apparatus which does not meet the requirements in (b) of this Section, and the cooperative/utility may, without advance notice, discontinue purchase from any producer when a defective condition of wiring or equipment upon the premises of the producer is discovered. In the event a producer desires to change the size of his electrical equipment and maintain his status, he shall notify the cooperative/utility in writing sufficiently in advance so that its meter and other equipment may be enlarged to properly handle the increased load or generation.

(c) Power inverter based apparatus utilized in the system to be connected to the cooperative/utility's distribution system point of delivery shall be Underwriters Laboratory ("UL") 1741 listed or certified by a nationally recognized testing laboratory as being compliant with UL 1741, 2nd Revision standards before the system is connected to the cooperative/utility's distribution system point of delivery. Proof of this certification must be provided at the producer's expense. The cooperative/utility reserves the right to refuse to connect at the point of delivery to any apparatus which does not meet the requirements in (c) of this Section, and the cooperative/utility may, without advance notice, discontinue connection with any producer when a defective condition of equipment upon the premises of the producer is discovered.

(d) All relevant apparatus utilized in the system to be connected with the cooperative/utility's distribution system point of delivery shall be certified by a nationally recognized testing laboratory as compliant with the Institute of Electrical and Electronics Engineers (IEEE) 1547 *Standard for Interconnecting Distributed Resources with Electric Power Systems* before the system is connected to the cooperative/utility's distribution system point of delivery. Proof of this certification must be provided at the producer's expense. The cooperative/utility reserves the right to refuse to connect at the point of delivery to any apparatus which does not meet the requirements in (d) of this Section, and the cooperative/utility may, without advance notice, discontinue connection with any producer when a defective condition of equipment upon the premises of the producer is discovered.

(e) Beginning December 31, 2014, and annually thereafter, each utility shall submit a Certification Letter to the PUD Director certifying that as of the date of the Certification Letter, the utility's interconnection agreements meet the requirements in (b), (c) and (d) of this Section, or if the interconnection agreements do not meet the requirements in (b), (c) and (d) the reason therefor.

[Source: Amended at 31 Ok Reg 1065, eff 9-12-14; Amended at 36 Ok Reg 666, eff 7-25-19]

165:40-5-2. Availability of electric interconnection

The type of electric interconnection which will be required of the producer will depend on and must be compatible with the location, size, and type of load to be served as well as the generating equipment and capacity. It is necessary that the producer obtain from the local office of the cooperative/utility the phase and voltage of the interconnection that will be furnished before proceeding with the purchase of generators or other equipment. Also, the point of purchase on the premises must be determined before the producer's wiring installation is made.

165:40-5-3. Single-phase and three-phase connection

- (a) Producers shall normally be furnished single-phase or three-phase purchase under the corresponding provisions of electric service.
- (b) Generation itself may represent a load, such as for some inductive wind generators. The class of service may be different than it would be without the generator load.

165:40-5-4. Point of delivery of electric service

The point of delivery for purchase shall be the same as the point of delivery for service for consumer/producers or a point similarly determined for producers only.

165:40-5-5. Meters

- (a) All purchase meters and detents shall be furnished, installed, and maintained by the cooperative/utility, and remain its property. All meter bases, enclosures, and other associated equipment shall be furnished and owned by the cooperative/utility and maintained by the producer. Producer shall reimburse the cooperative/utility for all furnished meters, bases, and associated equipment.
- (b) No metering equipment shall be bypassed for any reason, without prior approval of the cooperative/utility.
- (c) Location of self-contained installations and instrument transformers shall be governed by the corresponding terms and conditions of service.

165:40-5-6. Relocation of meters

- (a) The cooperative/utility may, at its option and at its expense, relocate any meter.
- (b) In case of a relocation which is made necessary by the producer's conditions or actions, the producer shall, at his expense, relocate the metering equipment and service entrance facilities to a location agreeable to the cooperative/utility and the producer.
- (c) Under no circumstances shall any meter be moved or relocated except as authorized by the cooperative/utility.

165:40-5-7. Ownership, design, operations, and maintenance

- (a) Producer will, except as otherwise noted, design, construct, install, own, operate, and maintain all equipment required to generate and deliver energy and/or capacity specified in this Chapter.
- (b) Producer will further provide all necessary easements, licenses, and other rights to enable cooperative/utility to deliver, purchase, and sell.
- (c) Cooperative/utility may set reasonable requirements for the producer's facilities and equipment.

165:40-5-8. Plans and specifications

- (a) Producer will submit all equipment specifications to cooperative/utility for review prior to interconnection and as part of the application.
- (b) Producer will allow cooperative/utility to make facility description available and public to aid in evaluating performance.

165:40-5-9. Inspections and tests

- (a) The cooperative/utility shall have the right to inspect the producer's electric generating facilities, to be present at initial tests, to measure power factor at any time, to conduct such operating tests as are necessary to ascertain that the protective devices function properly, to review any data collected from such facilities at all reasonable times, and to independently monitor the aforesaid system and related energy regime.
- (b) The producer shall have the right to review and copy, at producer's expense, any data collected by the cooperative/utility.

165:40-5-10. Access by cooperative/utility authorized agents

The producer shall give authorized agents of the cooperative/utility permission to enter the producer's premises at all reasonable times for any purpose incidental to the purchasing of electricity, including tree trimming and tree removal. Refusal on the part of the producer to provide reasonable access for the above purposes shall be deemed to be sufficient cause for discontinuance of service and/or purchase.

165:40-5-11. Disconnect and location of producer facilities

- (a) Producer shall install, own, and maintain a disconnecting device at a location which shall at all times be accessible to cooperative/utility personnel.
- (b) The producer shall be responsible for locating and installing all facilities in compliance with applicable laws codes, and regulations, and shall locate all such facilities sufficiently away from utility lines to avoid falling or making contact with utility lines.

PART 3. COOPERATIVE/UTILITY FACILITIES

165:40-5-20. System extension, reinforcement, and protection facilities

- (a) For consumer/producers the cooperative/utility will construct and maintain facilities in accordance with the standard extension policy contained in the terms and conditions of service. Calculations will be made on the estimated load including any generating load. The producer will reimburse the cooperative/utility for all facilities in excess of these amounts as provided for in the retail terms and conditions of service.
- (b) Those who only produce electric energy will reimburse the cooperative/utility for all necessary system extension, reinforcement, and protection facilities.

165:40-5-21. Change of facility requirements

- (a) The cooperative/utility shall have the right to change transformers and interconnection voltage when necessary.
- (b) The producer shall make or bear the cost of changes in interconnection, protection, and reinforcement facilities necessary to meet changing system conditions and requirements.

PART 5. OPERATING PROCEDURES

165:40-5-30. Reactive power

- (a) Producer will generate sufficient reactive power reasonably necessary to meet requirements of the service agreement.
- (b) Cooperative/utility may request new capacity and/or reactive power rating for facility if it is reasonably apparent they are no longer correct.
- (c) To the extent that producer's facility fails to achieve a power factor of at least eighty-five (85%) percent, producer shall pay for var support under the appropriate tariff.

165:40-5-31. Operating procedure

- (a) Producer and cooperative/utility shall develop mutually acceptable operating procedures and employ prudent utility practices.
- (b) Producer will have qualified personnel available to operate the cogeneration or small power production facility for testing at cooperative/utility request.

165:40-5-32. Equipment which adversely affects electric service

- (a) Many types of electric equipment can adversely affect the quality of electric service. This is true of all generating equipment. Close consultation between the producer and the cooperative/utility will be required before such equipment is interconnected and to remedy unsatisfactory operating conditions.
- (b) Producers whose use of or production of electricity is intermittent and subject to violent fluctuations may be served with other electrical loads or by a transformer dedicated solely to that equipment and served as a separate account. Producers contemplating the installation of such equipment must make specific prior arrangements with the cooperative/utility.
- (c) Producers contemplating the installation of electric equipment, whose performances may be adversely affected by voltage fluctuations and distorted 60 Hz. wave forms, must make specific prior arrangements with the cooperative/utility.
- (d) Producers found to be operating electric equipment which produces frequencies that result in interference or generate distorted wave forms into the 60 Hz. electric supply system, which adversely affects the operation of equipment owned by producer or by other consumers of the cooperative/utility or the cooperative/utility's system, shall be required to consult with the cooperative/utility and to eliminate the cause of the interference.
- (e) If it is determined by the cooperative/utility that remedial action is required to correct an adverse effect produced by the producer through use of any equipment causing such adverse effect, the cooperative/utility reserves the right to have the producer install, at the producer's expense, any system protection facilities necessary to reasonably limit such adverse effect.
- (f) In lieu of requesting the producer to install such system protection facilities, the cooperative/utility may, at its option, install additional facilities (which may or may not be dedicated solely to such producer) or other equipment specially designed to reasonably limit such adverse effect. The cost of these facilities will be paid for by the producer.

SUBCHAPTER 7. STANDARD PURCHASE RATE SCHEDULE FOR POWER PRODUCERS OF 300 KW OR LESS

165:40-7-1. Area affected

Standard purchase rate schedule for power producers of 300 kW or less is effective in all territories served.

[Source: Amended at 36 Ok Reg 666, eff 7-25-19]

165:40-7-2. Availability

Standard purchase rate schedule for power producers of 300 kW or less is available to cogenerators or small power producers who:

- (1) Have a maximum rated capacity of 300 kW or less.
- (2) Employ equipment compatible with the particular line segment of the cooperative/utility.
- (3) Sign a purchase agreement with the cooperative/utility.

[Source: Amended at 36 Ok Reg 666, eff 7-25-19]

165:40-7-3. Purchase option

Producer shall have the option of selling gross production of energy from the generating unit, or net production of energy after serving own load.

165:40-7-4. Purchase rate (firm vs. non-firm)

The purchase for firm vs. non-firm power will be set forth in the rate schedule as follows:

- (1) Firm power at _ cents per kWh. Contracts may provide that if producer fails to provide firm power, as contracted, the producer shall reimburse the cooperative/utility for the difference between the firm and non-firm rate;
- (2) Non-firm power at _ cents per kWh; or
- (3) Purchase rate described in 165:40-7-5.

165:40-7-5. Purchase rate (summer vs. winter)

The purchase rate for summer vs. winter power will be set forth in the rate schedule as follows:

- (1) Winter from _ to _ at _ cents per kWh.
- (2) Summer from _ to _ at _ cents per kWh.
- (3) Plus the fuel adjustment as calculated under the Commission order.

165:40-7-6. Design, operation, and maintenance data

In addition to the requirements of the terms and conditions of purchase, the producer shall maintain a diary of the facility including installation date, date and nature of any changes, non-routine maintenance and repair, and date and reason for any extended periods of non-generation, and such other information as is reasonably necessary to evaluate the facility and its potential impact on the cooperative/utility electrical system. The producer shall make such records available to the cooperative/utility and to the Commission.

165:40-7-7. Rights of producer

The producer has the right:

- (1) To generate in parallel with the cooperative/utility in a manner which does not degrade the integrity of the cooperative/utility's system. The cooperative/utility shall make reasonable effort to operationally accommodate the producer's facility.

- (2) To good faith negotiation with the cooperative/utility.
- (3) To bring complaint or dispute to the Commission for mediation, hearing, or other resolution.

165:40-7-8. Modifications

The purchase agreement, purchase rate schedules, and conditions of purchase may be changed from time to time as approved by the Commission. The purchase rates will change as additional information becomes available on avoided costs, reliability of technologies, and other pertinent factors.

SUBCHAPTER 9. OPTIONAL NET ENERGY BILLING PURCHASE RATE

165:40-9-1. Area affected

Optional net energy billing purchase rate is effective in all territories served.

165:40-9-2. Availability

Optional net energy billing purchase rate is available to cogenerators or small power producers who:

- (1) Have a maximum rated capacity of 300 kW or less.
- (2) Employ equipment compatible with the particular line segment of the cooperative/utility.
- (3) Sign a purchase agreement with the cooperative/utility.

[Source: Amended at 36 Ok Reg 666, eff 7-25-19]

165:40-9-3. Purchase rate

(a) For power produced in excess of on-site requirements, subject to OAC 165:40-9-2, the producer will be compensated by the retail purchase meter running in reverse. The cooperative/utility shall bill the producer for the excess of energy supplied by the cooperative/utility over and above the energy supplied by the producer during each billing period according to the cooperative/utility's applicable retail rate schedule.

(b) When the energy supplied by the producer exceeds the energy supplied by the cooperative/utility during a billing period, the monthly charge and/or minimum bill of the retail rate schedule shall be billed by the cooperative/utility; any net excess energy for the billing period shall be credited, or paid, in dollars in the next billing period(s), at the utility's avoided energy cost.

(c) The billing period shall be considered the monthly bill period associated with the monthly meter reading.

(d) Systems with an installed capacity greater than 125% of the customer's peak load may be excluded from the net-metering provision, and shall be paid under the small power producer or qualifying facilities tariff, subject to Subchapter 11 herein.

(e) The utility shall file a tariff with the Commission to enact the provisions of this rule.

[Source: Amended at 36 Ok Reg 666, eff 7-25-19]

SUBCHAPTER 11. METHOD OF CALCULATING PURCHASE RATES FOR THE STANDARD RATE SCHEDULE

165:40-11-1. Costs

All costs in calculating purchase rates for the standard rate schedule are in current dollars and shall be updated annually.

165:40-11-2. Firm power purchase rates

Annual firm power purchase rates will be calculated by the following method:

- (1) The purchase rate (PR) will be equal to the sum of the capacity component (CC), the energy component (EC), and the fuel adjustment component (FA); thus, the equation being $PR = CC + EC + FA$.
- (2) The initial capacity component (CC) will be equal to the average annual cost of the next unit of capacity or the next unit of capacity of the wholesale power supplier per kWh (CAP/KWH); thus, the equation being $CC = CAP/KWH$. The next unit of capacity may be equal to the average annual cost of a purchased power contract.
- (3) In turn, the average annual cost of the next unit (CAP/KWH) is equal to the product of the initial total capital investment per KW (CI/KW) times annual carrying, fixed operation, and fixed maintenance and administrative expense per dollar of investment (ACI/CI) divided by the product of the hours in the year times the capacity utilization ratio. The initial capacity utilization ratio will be .60., resulting in $(CI/KW \times ACI/CI)/(8760 \times .60)$.
- (4) The energy component (EC) shall equal the current average cost per kWh of fuel embedded in the base retail rates or the fuel imbedded in the base wholesale rates of the wholesale power supplier(s) (ER), and shall be changed if the base rate amounts change; plus, an amount equal to average variable generation operations and maintenance expense (OM) per kWh; plus, the savings in line loss. The savings will be calculated as five percent (5%) of energy charges, resulting in equation of $EC = ER + .05ER + OM$.
- (5) The fuel adjustment component (FA) for each month shall be the current month's retail fuel adjustment for investor owned utilities or the current month's fuel adjustment of the wholesale power supplier(s) for distribution cooperatives.
- (6) Firm power means energy delivered to the cooperative/utility with at least a sixty-five percent (65%) on-peak season capacity factor. The on-peak season is those hours specified as peak period in the cooperative/utility's retail tariffs or in the tariff of the wholesale power supplier. If not specified in either the retail or wholesale supplier tariffs, the on-peak season shall be 4:00 p.m. to 8:00 p.m., June through September.

165:40-11-3. Non-firm purchase rates

Non-firm power purchase rates shall be calculated as the energy component (EC) plus the fuel adjustment component as for firm power purchases. No capacity component shall be applied for non-firm power.

165:40-11-4. Seasonal purchase rated

Seasonal buy-back (purchase) rates may be selected in lieu of annual rates at the cooperative/utility's option if there are seasonal rates for standard retail service. If selected, the seasonal rates will be calculated as follows: the sum of the months in effect for each period times the rate for each period must equal twelve months times the annual rate, and the difference between the summer and winter rates for purchase must be the same as the difference between rates for service at the standard residential service rates. The following formula will calculate the

summer purchase rate (SPR):

CHAPTER 45. GAS SERVICE UTILITIES

[Authority: OKLA. CONST. art IX, § 18; 17 O. S., §§ 151 et seq. and 160.1 et seq.]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:45-1-1. Purpose

The rules in this Chapter are intended to define good business practice under normal conditions, to insure safe, adequate and reliable service, and to ensure fairness to the public and to the utility.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Affiliate" means any person, entity, or business section, or division that directly or through one or more intermediaries controls, is controlled by, or is under common control with the entity in question. Control includes but is not limited to, the possession, directly or indirectly and whether acting alone or in conjunction with others, of the authority to direct the management or policies of a person or entity. Control may be exercised through management, ownership of voting securities or other right to vote, by contract or otherwise. A voting interest or ownership of five percent (5%) or more creates a presumption of control.

"Aggregation point" means any Commission approved interconnection point of more than one citygate at which gas can be aggregated for the purposes of supplying reliable and least cost natural gas services for more than one city or municipality.

"ANSI" means the American National Standards Institute, Inc.

"Attorney General" means the Oklahoma Attorney General.

"Business day" means Monday through Friday, excluding all legal holidays which have been declared legal holidays by law or proclamation of the Governor of Oklahoma, or those days on which mail is not delivered.

"Citygate" means the interconnection point between the local distribution facilities which are located downstream of such interconnection point and the transmission lines and/or other facilities located upstream of such interconnection point at a point in time to be determined by the Commission during the unbundling plan hearing, or as otherwise ordered by the Commission.

"Citygate gas service(s)" means any one or more of the services of natural gas supply, gathering, storage or transmission of natural gas upstream of the citygate or other delivery point acquired by a gas utility at the citygate or other delivery point pursuant to the competitive bidding procedures in Subchapter 17 of this Chapter in order to provide natural gas service to end-users on its local distribution facilities.

"Competitive bid" means a response provided based on a public competitive bidding process.

"Commission" means the Oklahoma Corporation Commission.

"Complaint" means an oral or written communication by an interested party requesting an investigation or corrective action regarding the provision of

natural gas services. A complaint may be made orally, electronically or in writing, but must be made or received at the utility's offices.

"Consumer" means any person, firm, corporation, municipality, or agency, other political subdivision of the United States or the State of Oklahoma receiving any type of natural gas service. Any reference to a "customer" or "end-user" or "ratepayer" contained in a tariff, or in this Chapter, shall be deemed to mean a "consumer," unless the context clearly indicates otherwise.

"Corporate Support Services" or **"Shared Services"** are human resources, procurement services, information technology, regulatory services, administrative services, real estate services, legal services, accounting, environmental services, research and development, internal audit, community relations, corporate communications, financial services, financial planning and management support services shared between or among a gas utility, its parent holding company or an affiliated entity and such other services authorized by the Commission on a case-by-case basis.

"CSD" means the Consumer Services Division of the Oklahoma Corporation Commission.

"Customer rate class" means a division of rates as provided by a utility's tariff for pricing natural gas service.

"Customer sector" means a major division of consumers, i.e., residential, commercial, or industrial.

"Distribution main" means a distribution line that serves as a common source of supply to service lines.

"Distribution system" means any pipeline, meter, metering station, valve, regulator, regulating station and/or delivery station which receives natural gas from a transmission system, gathering line, or other natural gas supply source for service to one or more consumers.

"Distribution" or **"Distribution service"** means the downstream transportation of natural gas services from the citygate to end-users through a utility's local distribution facilities unbundled from all citygate gas services, but generally bundled with any one or more of the services of billing, metering, customer service and similar services.

"Downstream (or "merchant" or "retail") service" means any one or more of the citygate(s) service(s) of natural gas supply, gathering, storage or transmission of natural gas marketed downstream by an entity at the retail or merchant level to end-users rather than through the competitive bidding process pursuant to Subchapter 17 of this Chapter, and which entity uses the local distribution facilities of a utility, rather than bypass for ultimate delivery of such downstream or merchant or retail service to the end-user.

"Electronic notification" means any automated communication received by e-mail, phone, text message, or fax.

"End-user" means any consumer receiving natural gas service of any nature.

"FERC" means the Federal Energy Regulatory Commission.

"Filed" means to present a document and have it accepted by the Court Clerk of the Oklahoma Corporation Commission.

"Gas" means manufactured gas, natural gas, other hydrocarbon gas, or any mixture of gases produced, transmitted, distributed or furnished by a utility unless otherwise specifically designated.

"Gas supply source" means gas from the wellhead, any type of storage, processing plant, or other provider of gas.

"Gathering line" means a pipeline that transports gas from a production facility within a gathering system.

"Gathering system" means a pipeline system bringing gas from the wellhead to an aggregation point or transmission line or other gas handling facility.

"Gas utility" means natural gas utility as defined in this Chapter.

"Independent producer" means, for purposes of this Chapter only, any person who produces natural gas and is not engaged in marketing natural gas except for its own account or for other working interest owners in operated wells or who derives a majority of his or her oil or natural gas related income from working interests.

"Interested party" means any individual or entity with appropriate authority to act on behalf of a particular consumer or group of consumers or any other party involved in, or affected by, the provision of natural gas services.

"Intrastate pipeline" means a common carrier transmission pipeline as defined in 52 O.S. § 24 and as applied in this Chapter.

"Legal holiday" means any day declared to be a legal holiday by law or proclamation of the Governor of Oklahoma, or a day on which mail the United States Postal Service does not deliver mail.

"Local distribution company" means the utility distributing natural gas, delivered to its citygate from a transmission pipeline or gathering system, to residential, commercial and industrial end-users over a local geographic area.

"Local distribution facilities" means facilities whose function is the local distribution of natural gas to residential, commercial and industrial consumers and which facilities are characterized by a system of pipes, meters, stations, valves and other equipment for distributing natural gas among consumers within a particular local community or in smaller diameter lines at lower pressures in contrast to movement in larger diameter lines at higher pressures characteristic of transmission, unless otherwise ordered by the Commission.

"Local forecast" means a statement of what the weather is predicted to be, that is issued by the National Weather Service for a specific county, city, and/or zip-code area.

"Meter" means any device that measures the quantity of gas transferred from one party to another.

"Meter shop" means a shop used for the inspection, testing and repair of meters.

"Municipality" means an incorporated city or town in the State of Oklahoma.

"Natural gas services" means any of the services in the natural gas industry, including, but not limited to, local distribution, transmission, gathering, storage, and gas supply, and as specified in Subchapter 17 of this Chapter.

"Natural gas utility" means a natural gas utility as defined in 17 O.S. § 151 *et seq.*, and that includes all utility affiliate assets which the Commission has determined to be included in ratebase.

"NWS" means the National Weather Service.

"P.s.i.a." means pounds per square inch absolute.

"Pipe" means any tubing used in the gathering, transmission or distribution of gas which meets the specifications of the U.S. Department of Transportation (U.S.D.O.T.).

"Premises" means any piece of land or real estate, or any building or other structure or portion thereof, or any facility where gas service is furnished to a consumer.

"Prudency review" means, for purposes of this Chapter, a comprehensive review that examines as fair, just and reasonable, a utility's practices and policies and judgment regarding an investment or expense at the time the investment was made or expense was incurred; including direct or indirect maximization of its positive impacts and mitigation of adverse impact upon its ratepayers, without consideration of its ultimate used and useful nature.

"PUD" means the Public Utility Division of the Oklahoma Corporation Commission.

"Public competitive bidding process" means a gas utility process to solicit from all entities offers to provide natural gas services upstream of the citygate as provided in Subchapter 17 of this Chapter.

"Regulator" means a device used to reduce the gas pressure.

"Residence" means any dwelling unit containing kitchen appliances, permanent sewer or septic facilities and water service. A weekend cabin and a mobile home are residences when used as such. An individual room in a hotel or motel is not a residence.

"Request for bid" means a gas utility's request for proposals to provide natural gas services at a Commission approved gas utility's designated citygate or aggregation point.

"Service line" means a line that branches off a distribution main or distribution line in order to transport gas from the common source of supply to utility meters or to a consumer's piping, whichever is farther downstream, or the connection to a consumer's piping if there is no utility meter.

"Shipper" means any person, firm or corporation engaged in the intrastate or interstate transmission of natural gas for third parties.

"Special contract" means a written Commission-approved agreement between a utility and a consumer for the provision of gas service on terms and conditions which are different from those authorized by a tariff.

"Statistical sampling" means a method for drawing elements from a population such that all possible elements in the population have a known and specified probability of being drawn and such that the set of chosen elements has approximately the same distribution of characteristics as the population from which it was drawn.

"Storage" means an underground natural or man-made facility used to store natural gas for extended periods of time.

"Stranded costs" means those prudent and verifiable costs and investments incurred by a natural gas utility, which were "used and useful" to meet the needs of its end-users, including but not limited to, its upstream capacity and supply commitments that cannot be avoided or mitigated or recovered from end-users under an existing tariff which have been caused as a result of the restructuring of the natural gas industry which were incurred prior to February 19, 1997, the date of issuance of Commission Order No. 409563, which closed the Notice of Inquiry, Cause No. PUD 960000133, and which ordered the promulgation of rules to restructure the natural gas service industry, such date being the date the gas utilities were placed on notice of the Commission's intent to restructure natural gas utility service(s). Prior to or during the utilities' stranded cost hearing, this date may be modified by order of the Commission, after notice and hearing. Stranded costs may include prudent and verifiable transition costs.

"Subdivision" means any land, wherever located, whether improved or unimproved, contiguous or not, which is divided into lots or proposed to be divided, for the purpose of disposition pursuant to a common promotional scheme

or plan of advertising.

"Submit" means to present a document to the Director of the Public Utility Division.

"Subsidize" means to furnish financial support by the utility to the affiliate.

"Tariff" means every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing gas service filed with the Commission and approved by the Director of the Public Utility Division.

"Therm" means 100,000 British thermal units of heat.

"Transition costs" means those prudent and verifiable costs and investments incurred by a public gas utility after February 18, 1997, in implementing the Commission's gas utility restructuring rules and to restructure its facilities, contracts and operation. Such costs as determined by the Commission may include education for the public related to the natural gas industry restructuring.

"Transmission or transmission service" means the upstream transportation of natural gas through pipelines and/or other facilities from a well-head, gathering line or other receipt point to a local distribution facilities or an end-user located on the transmission pipeline.

"Transmission pipeline" means a pipeline, either a gas utility owned transmission line or an intrastate pipeline, other than a gathering system that transports gas from a gathering system, interstate pipeline or storage facility to a citygate, aggregation point, storage facility or other delivery point.

"Unbundling" means the identification and separation of natural gas services and/or products and the associated costs to provide each such service and/or product which have been part of the "bundled" complement of services provided by a public gas utility.

"Unbundling plan" means a public utility's proposal(s) to separate its previously bundled services offered upstream of the citygate and to price these services individually.

"Uniform System of Accounts (USOA)" means the system of accounts as currently prescribed the Federal Energy Regulatory Commission (FERC), those accounting systems as published by the National Association of Regulatory Utility Commissioners (NARUC) or other accounting methods approved by the Commission.

"Upstream of the Citygate" means all natural gas services provided at the gas utility's citygate or other point of delivery to local distribution facilities which are necessary to serve end-users.

"Upstream related entity" means an affiliate of a gas utility or that portion of a gas utility which provides citygate gas services.

"U.S.D.O.T." means the United States Department of Transportation.

"Utility" means a natural gas utility as defined in this Chapter.

165:45-1-3. Commission authority

The Commission has authority to promulgate rules concerning the provision of natural gas service to all end-users within the State of Oklahoma pursuant to Okla. Const. Art IX, §§ 18 and 34, 17 O.S. § 151 et seq., and 52 O.S. § 24 et seq.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 15 Ok Reg 2177, eff 7-1-98; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-1-4. Scope of this Chapter

(a) This Chapter shall apply to the operations of any gas utility, including gas supply gathering, transmission and storage facilities operating within the State of Oklahoma subject to the jurisdiction of the Commission. Amendments or changes to this Chapter shall not apply retroactively to existing systems that were in physical compliance with all applicable laws that were in effect at the time of their installation, unless otherwise specifically stated in this Chapter.

(b) All tariffs filed by gas utilities shall conform to this Chapter. The filing or acceptance of a tariff which is in conflict herewith shall not be deemed a waiver of this Chapter, unless it specifically states that this Chapter is waived and cites the specific authority for the waiver.

(c) Gas utilities shall submit proposed tariffs which conform to the provisions of this Chapter, as revised, within one hundred twenty (120) calendar days after July 1, 1996.

(d) Gas utilities shall submit proposed tariffs which conform to the provisions of Subchapter 17 of this Chapter within thirty (30) calendar days from the effective date of Subchapter 17, or the date of the Commission order approving the utility's unbundling plan or alternative to an unbundling plan, as applicable.

(e) Nothing provided in this Chapter shall relieve any utility from any duty prescribed by the laws of the State of Oklahoma or the United States.

(f) No rate, special contract, agreement, rule, or term and condition of service which is in conflict with the rules of this Chapter shall be effective unless the utility has been granted a waiver by the Commission pursuant to OAC 165:45-1-4.2.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 15 Ok Reg 2177, eff 7-1-98; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-1-4.1. Interpretation of rules of this Chapter

(a) The words contained in this Chapter shall be given their ordinary and customary meanings, with technical terms and words being construed as generally understood in the gas industry, except where otherwise expressly provided.

(b) This Chapter shall not be construed so as to enlarge, diminish, modify, or alter the jurisdiction, powers, or authority of the Commission or the substantive rights of any person.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

165:45-1-4.2. Relief from rules of this Chapter

(a) Whenever compliance with any requirement of this Chapter would result in unreasonable hardship upon or excessive expense to a party or parties subject to the requirements of this Chapter, or for other good cause shown, the Commission may waive or modify the requirements of this Chapter consistent with Federal and/or State law, upon application of an affected party and after notice and hearing. Such application shall set forth the specific rule or rules sought to be waived and the reasons for requesting such waiver.

(b) If relief from Subchapter 17 is requested, a copy of the application requesting a waiver shall be served on all parties who participated in the rulemaking docket in which Subchapter 17 was promulgated by the Commission. The Commission may determine, after notice and hearing, whether to grant such waiver.

(c) The Commission may grant temporary relief from the requirements of this Chapter pending hearing.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

165:45-1-4.3. Controversy over rules of this Chapter

Whenever a controversy exists in connection with the interpretation of this Chapter and the applicability of the requirements set forth herein, or any right or duty imposed thereby, the Commission, upon application of any interested party and after notice and hearing, will enter such order thereon as it may deem appropriate.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

165:45-1-4.4. Severability

If any provision of this Chapter is held invalid, such invalidity shall not affect other provisions or applications of this Chapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Chapter are declared to be severable.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

165:45-1-5. Exceptions or variances

(a) A utility shall not prescribe terms and conditions for furnishing service that are inconsistent with this Chapter. Utility-prescribed terms and conditions shall not be valid until filed with and approved by the Commission.

(b) A utility may refuse or discontinue service for noncompliance with its service terms and conditions only in cases where its terms and conditions, as approved by the Commission, specifically so provide.

(c) If a utility seeks an exception or variance from this Chapter in its rates or terms and conditions of service, such exception or variance shall be clearly shown by a footnote on each respective page of the tariff. The footnote must be sufficient to plainly bring to the Commission's attention the exact nature of the requested exception or variance. Any exception or variance not so marked or identified in the tariff shall be superseded by this Chapter to the extent that said exception or variance is in conflict therewith. Such waiver or modification shall apply only to the party seeking such waiver or modification unless otherwise stated in the order approving the variance. Upon approval by the Commission, the tariff shall state the Commission order number approving the variance.

(d) The provisions of this Chapter shall in no way preclude the Commission from allowing or requiring additional or different terms and conditions of service, service, equipment, facilities, or standards other than those prescribed by this Chapter.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 15 Ok Reg 2177, eff 7-1-98]

165:45-1-6. Violations

Aviolation of this Chapter shall constitute contempt of the Commission pursuant to 17 O. S. § 1 et seq.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

SUBCHAPTER 3. PLANT, EQUIPMENT, AND FACILITIES

165:45-3-1. Maintenance of plant, equipment, and facilities

(a) Each utility shall install, operate, and maintain its entire plant and system in such condition as will enable it to furnish safe, adequate and reliable gas service, subject only to emergency conditions beyond its control.

(b) The transmission and distribution systems, including transmission lines, distribution mains, compressing equipment, regulators, meters, services, etc., shall be constructed, installed, and maintained in accordance with the U.S. Department of Transportation, Regulations for Transportation of Natural and other Gas by Pipeline - Title 49 C.F.R. §192; and all applicable rules adopted by the Commission.

(c) Each utility shall file with the Commission, annually, a statement regarding its plant, equipment, and facilities in such form as the Commission may require.

(d) If PUD informs the utility of any safety issues concerning the utility's plant, equipment, or facilities by identifying the relevant Commission rule, or other applicable Federal or State laws implicated by the safety issue, the utility shall electronically provide photographic evidence to PUD showing completion of work and that the issue has been resolved. These safety issues shall not include those under the jurisdiction of the Commission's Pipeline Safety Department.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-3-2. Extent of system in which utility shall maintain service

(a) Each utility shall operate and maintain in safe, efficient, and proper condition all of its facilities and instrumentalities used in connection with the transmission, distribution, storage, regulation, measurement, and delivery of gas to each consumer up to and including the point of delivery into the piping owned by the consumer. Unless otherwise agreed by the utility and the consumer, the point of delivery shall be at the outflow side of the meter.

(b) Customer owned piping shall conform to requirements of the applicable city or town ordinances. In towns, villages, and suburban territory where there are no applicable regulations as to gas service, customer owned piping, and venting shall comply with the International Gas Code.

(c) Customer owned piping shall include a shut-off valve on the outside of the structure for the consumer's use. The consumer shall cause to have one installed on all new construction or when the customer owned piping is altered outside the structure.

(d) All gas lines, pipes, and equipment owned by the consumer shall be maintained in safe, efficient, and proper condition by and at the expense of the consumer. The utility shall have the right to inspect a new installation prior to furnishing service, the right to inspect an existing installation under reasonable conditions, and may refuse or discontinue service until the provisions of this Chapter are complied with. Service may be refused or discontinued wherever a test reveals excessive loss of gas through leakage on consumer's premises.

[Source: Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-3-3. Service lines

(a) Upon application by any bona fide applicant for service, a utility shall, at its own expense, furnish and install a stopcock and service line of suitable capacity to the meter location.

(b) Where by agreement between the utility and the consumer the meter is located at a point other than at the property line or curb line of the consumer, the proper consumer's service line shall be installed and maintained by or at the expense of the consumer. The utility shall install and maintain the service line up to the property or curb line and all measurement equipment wherever located. Any such agreement hereafter made shall be in writing, signed by the consumer first taking service thereunder, and shall be binding upon all consumers subsequently receiving service at the premises. The agreement shall not be deemed a special contract under 165:45-15-2.

(c) Where a utility and consumer cannot agree upon the location, dimensions, and type of equipment to be installed, the Commission shall, upon application of either the consumer or the utility and after notice and hearing, designate the installation to be made.

(d) When the installation of a service line requires a trench to remain open on the consumer's property for an inspection or waiver of inspection, the utility shall perform the inspection, or request that the inspection be performed if done by a third party, within fourteen (14) calendar days of the installation.

(e) All open trenches shall be clearly marked for the safety of the public using, at a minimum, caution tape or flags.

[Source: Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-3-4. Extension of distribution mains

(a) **General.** A utility shall extend its distribution mains to serve consumers within the corporate limits of a municipality served by the utility, or any recorded addition thereof, or within a reasonable distance from the utility's existing distribution system in accordance with the provisions of this Chapter.

(b) **Free extensions.** A utility shall extend its distribution system, as needed, up to one hundred feet (100') per residence without cost to the "party" requesting service. In arriving at the length of such main extension necessary to render service to the party, the distance shall be measured along lines of proper construction from the nearest distribution main with adequate capacity.

(c) **Extension above free limit - advance.** If the extension necessary to furnish service is greater than allowed as a free extension under subsection (b) of this Section, a utility may require an advance of the cost of the main extension over the free limit. However, the utility shall not arbitrarily or with disparity impose the obligation of requiring an advance, but rather shall determine whether to require an advance and the amount thereof on a case-by-case basis. Whenever such advance is made, the utility shall be required to refund to the party who made the advance an amount equal to the cost of one hundred feet (100') of free extension for each additional consumer whose service line is connected to such main within a period of ten (10) years from the making of the extension. No refunds shall be made for consumers connected to future extensions tied into such an extension. This refund will cease after ten (10) years from the making of the extension but the total of all refunds shall not exceed the original advance. The advance shall not draw interest.

(d) **Extensions above free limit - revenue basis.** The Commission may authorize a utility to make extensions above the free limit upon receipt of a lesser advance, or no advance, when the gross anticipated annual revenue from an extension will provide the utility with an adequate return on its investment pursuant to a formula or other method approved by the Commission. After such authorization, the utility shall make extensions when requested by the party pursuant to such approved formula or method.

(e) **Extension above free limit - special contract.** In lieu of making an extension pursuant to subsections (c) or (d) of this Section, a utility may make an extension above the free limit with a lesser advance or no advance, when the utility has entered into an agreement whereby the party proposing to provide the advance guarantees a minimum annual revenue from the extension to the utility. Such an agreement shall be deemed a special contract governed by OAC 165:45-15-2.

(f) **Determining cost of extension.** In determining the amount of advance, if any, which shall be made for an extension pursuant to this Section, the total construction cost of the extension shall first be determined in accordance with the approved system of accounts for gas utilities and from such total construction cost there shall be deducted:

(1) Costs incident to any increase in size of the main in excess of that required to adequately and satisfactorily provide service, costs incident to future expansion or to continue a construction plan of the utility, and costs necessary to correct inadequate capacity.

(2) The total construction cost of that portion of the extension constituting a free extension, which includes meters, service regulators, stopcocks, and service connections.

(g) **Extensions applicable in prospective real estate subdivisions.** In lieu of an extension pursuant to other provisions of this Section, a utility may require a developer desiring an extension to a prospective real estate subdivision to make an advance equal to the estimated cost of the extension before construction is started, and such advance shall not draw interest. At least annually for a period not to exceed ten (10) years, the utility shall refund to the developer a sum equivalent to the cost of the free extension under subsection (b) of this Section for each consumer connected to the extension during the calendar year. In no case will the total amount refunded exceed the amount advanced to the utility. Consumers locating on an extension made pursuant to this Section will not be required to make an advance for an extension.

(h) **Extension above free limit.** If the extension above the free limit is of such length and the future anticipated revenues therefrom so small that it is doubtful that the extension would ever make a fair return on the investment, the utility or any interested party may apply to the Commission for an appropriate order after notice and hearing.

(i) **Property of extension.** Every extension shall at all times be the property of the utility regardless of whether an advance or contribution is made for its construction. Any unrefunded portion of an advance shall become the property of the utility.

(j) **Filing an extension policy.** In lieu of the extension provisions described in subsections (b)-(i) of this Section, a gas utility may file with the Commission an Extension of Facilities Policy governing reasonable extensions of facilities to consumers. This plan must be approved by the Commission.

(k) **Other extensions of facilities.** A utility may implement a policy whereby consumers who request gas service requiring the installation of new distribution mains may apply to the utility for service in compliance with Commission-approved tariffs, and may negotiate with the utility to perform some of the work necessary to install the new mains. If a mutually acceptable agreement is reached, the utility and the consumer shall enter a written agreement which conforms with the requirements provided in the utility's Commission-approved tariff. The utility shall own any distribution main installed pursuant to this subsection, and shall be responsible for proper maintenance and operation of the line.

165:45-3-5. Sale or disposal of jurisdictional facilities by utility

(a) The parties to a transaction, the performance of which will result in the transfer of any portion of a natural gas utility's jurisdictional plant or operating system or the transfer of some or all of a natural gas utility's customers to a person or entity that is not an affiliate of such utility, shall, at least ninety (90) calendar days before the effective date of such sale or transfer, request the approval of the Commission of the transaction by filing an original and eight (8) copies of a joint application, consistent with 165:5-7-1, with the Commission's Court Clerk, accompanied by the applicable filing fee. At the time the joint application is filed, the parties to the transaction shall serve a copy of the joint application, with all attachments thereto, upon the Attorney General and the Pipeline Safety Division. Additionally, the person or entity receiving the facilities or customers shall, at the time of the filing, be providing natural gas service to Oklahoma customers or be seeking approval, in the joint application or in a separate cause, to provide such service to Oklahoma customers.

(b) The joint application referred to in (a) of this Section shall include the following information:

- (1) The names of the parties to the transaction and the addresses of their respective principal places of business;
- (2) A narrative description of the transaction, including, without limitation, a description of the transferring party's jurisdictional plant or operating system to be transferred to the acquiring party, the number and types of customers to be transferred to the acquiring party as a result of the transfer of those jurisdictional assets, the contemplated effective date of the transfer, and the consideration to be given for consummating the transfer;
- (3) A statement as to whether the consideration to be given for consummating the transfer is below or above the net book value of the transferred assets;
- (4) A narrative description of how the transferred customers will continue to receive safe and reliable natural gas service after the effective date of the transaction, any proposed changes to the rates charged for that service after the effective date of the transaction, including a summary of the effect that the proposed changes to rates would have on an average customer's bill, and any other proposed changes in the terms and conditions of that service after such effective date subject to the terms of (g) of this Section;
- (5) A narrative description of the principal occupation or business of the acquiring party and all affiliates thereof during the previous five (5) years, and the names and relevant biographical information of all principals, officers, and directors of the acquiring party;
- (6) A narrative description of the operational and managerial experience of the acquiring party's personnel to be responsible for the operation and management of the facilities to be used to provide natural gas service to the transferred customers after the effective date of the transaction;
- (7) The names, addresses, and telephone numbers of representatives of the acquiring party who will be the contacts for PUD and CSD and who will be primarily responsible for:
 - (A) Customer service issues;
 - (B) Repair and maintenance issues;
 - (C) Customer complaint issues;
 - (D) Authorizing and furnishing refunds to customers;

(E) Tariff issues; and

(F) Receiving notices related to causes docketed at the Commission.

(8) Audited financial statements of the acquiring party, to include but not be limited to balance sheets and income statements, covering the previous three (3) years;

(9) An unaudited financial statement of the acquiring party, covering the most recent quarter closed immediately preceding the filing of the application;

(10) An affidavit by the acquiring party stating that the acquiring party possesses the financial and managerial ability to provide safe and reliable natural gas utility service to the transferred customers and that the acquiring party is aware of and will abide by all Commission rules applicable to the provision of such service;

(11) The information required by 165:45-11-1(q) and (s) and an affirmation that the records and reports required by 165:45-9 exist and may be subject to review by the Commission during the application process.

(12) A copy of the agreement governing the terms of the transaction;

(13) If the acquiring party is also a public utility subject to the jurisdiction of the Commission, a statement to that effect. The information listed in (5) through (9) of this subsection is not required if the acquiring party is a public utility currently engaged in the furnishing of public utility services under the jurisdiction of the Commission at the time that the application is filed; and

(14) The name and address of the acquiring party's service agent registered with the Oklahoma Secretary of State.

(c) Upon Commission approval of the joint application referred to in (a) of this Section, the transferring party shall also transfer to the acquiring party the records required by the Commission to be maintained pursuant to 165:45-9 and 165:45-11-1(q) and (s), to the extent they pertain to the transferred customers.

(d) After notice and hearing, the Commission shall issue an order approving the application if it finds that the transaction is fair, just, and reasonable and in the public interest. The acquiring party shall have the burden of establishing that the proposed transaction is fair, just and reasonable, as well as in the public interest.

(e) Unless otherwise ordered by the Commission, the hearing referred to in (d) of this Section shall be commenced within sixty (60) calendar days after the joint application referred to in (a) of this Section is filed. Upon motion by any interested party in the proceeding, or *sua sponte*, the Commission shall establish a procedural schedule setting forth dates for the filing of written testimony, discovery, and the hearing on the merits and such other dates, as the Commission deems appropriate.

(f) Notice of the hearing referred to in (d) of this Section shall be mailed to the Attorney General and to each customer of record of the transferring party who will be transferred to the acquiring party, and to any other person directed by the Commission to receive notice, at least twenty (20) calendar days prior to the date of the hearing. The form of the notice must be approved by the Commission prior to such mailing.

(g) If the application is approved, the rates for natural gas service in effect for the transferred customers prior to the effective date of the transfer shall continue to be charged by the acquiring party with respect to those customers, unless and until different rates are reviewed and approved by the Commission in the current cause or in a subsequent cause. If different rates are reviewed and approved and/or changes in the terms and conditions of service are approved by the Commission in

the current cause or in a subsequent cause, the acquiring party shall have thirty (30) calendar days after the final order has been issued to submit an original and two (2) copies of the proposed tariffs, which conform to 165:45-15-2, reflecting the changes or additions to rates and/or terms of service to PUD for review and approval.

(h) Upon motion, a party may request a waiver from or modification to any of the requirements of this section pursuant to 165:45-1-4.2.

(i) This section does not apply to transactions that involve the acquisition, control, or merger of a domestic public utility pursuant to 17 O.S. §§ 191.1 through 191.13, discontinuance of service pursuant to 165:45-11-10 or 165:45-11-11, nor routine retirement or replacement of facilities.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 15 Ok Reg 2177, eff 7-1-98; Amended at 25 Ok Reg 2215, eff 7-11-08; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-3-5.1. Acquisition, control, or merger of domestic public gas utilities

(a) An original and four (4) copies of an application for approval, consistent with 165:5-7-1, shall be filed with the Commission's Court Clerk no less than forty-five (45) calendar days prior to the effective date of any of the following transactions pursuant to 17 O.S. §§191.1 through 191.13:

- (1) acquisition of all or any controlling interest in a domestic public utility,
- (2) merger of a domestic public utility,

(b) At the time the application is filed, the filing party shall serve a copy of the application with all attachments upon the Attorney General and the Commission's Pipeline Safety Division. The application shall include the following additional information, made under oath or affirmation:

- (1) The name and address of each acquiring party and all affiliates thereof; and

(A) If such acquiring party is an individual, his principal occupation and all offices and positions held during the past five (5) years, and any conviction of crimes other than minor traffic violations during the past ten (10) years, or

(B) If such acquiring party is not an individual, a report of the nature of its business and its affiliates' operations during the past five (5) years or for such lesser period as such acquiring party and any predecessors thereof shall have been in existence; an informative description of the business intended to be done by such acquiring party and its subsidiaries; and a list of all individuals who are or who have been selected to become directors or officers of such acquiring party, or who perform or will perform functions appropriate or similar to such positions. Such list shall include for each such individual the information required by (A) of this paragraph.

- (2) *The source, nature and amount of the consideration used or to be used in effecting the merger or other acquisition of control, a detailed description of any transaction wherein funds were or are to be obtained for any such purpose, and the identity of persons furnishing such consideration; provided, however, that where a source of such consideration is a loan made in the lender's ordinary course of business, the identity of the lender shall remain confidential if the person filing such statement so requests. [17 O.S. § 191.3(A)(2)]*

(3) Audited financial information in a form acceptable to the Commission as to the financial condition of an acquiring party of the preceding three (3) fiscal years of each such acquiring party, or for such lesser period as such acquiring party and any predecessors thereof shall have been in existence, and similar information as of a date not earlier than one hundred thirty-five (135) calendar days prior to the filing of the application or the period of the most recent closed quarter prior to the filing of the application.

(4) *Any plans or proposals which an acquiring party may have to liquidate such public utility, to sell its assets or a substantial part thereof, or merge or consolidate it with any person, or to make any other material change in its investment policy, business or corporate structure, or management. If any change is contemplated in the investment policy, or business or corporate structure, such contemplated changes and the rationale therefore shall be explained in detail. If any changes in the management of the domestic public utility or person controlling the domestic public utility are contemplated, the acquiring party shall provide a resume of the qualifications and the names and addresses of the individuals who have been selected or are being considered to replace the then current management personnel of the domestic public utility or the person controlling the domestic public utility.* [17 O.S. § 191.3(A)(4)]

(5) *The number of shares of any voting security which each acquiring party proposes to acquire, and the terms of the offer, request, invitation, agreement, or acquisition referred to in 17 O.S. §191.2 . . . ;*

(6) *The amount of each class of any voting security which is beneficially owned or concerning which there is a right to acquire beneficial ownership by each acquiring party.* [17 O.S. § 191.3(A)(6)]

(7) *A full description of any contracts, arrangements, or understandings with respect to any voting security in which any acquiring party is involved, including but not limited to transfer of any securities, joint ventures, loan or option arrangements, puts or calls, guarantees of loans, guarantees against loss or guarantees of profits, division of losses or profits, or the giving or withholding of proxies. Such description shall identify the persons with whom such contracts, arrangements, or understandings have been entered into.* [17 O.S. § 191.3(A)(7)]

(8) *A description of the purchase of any voting security during the twelve (12) calendar months preceding the filing of the application, by any acquiring party, including the dates of purchase, names of the purchasers, and consideration paid or agreed to be paid therefore.* [17 O.S. § 191.3(A)(8)]

(9) *Copies of all tender offers for, requests for, advertisements for, invitations for tenders of, exchange offers for, and agreements to acquire or exchange any voting securities and, if distributed, of additional soliciting material relating thereto.* [17 O.S. § 191.3(A)(9)]

(c) Such additional information as the Commission may prescribe as necessary or appropriate for the protection of ratepayers of the domestic public utility or in the public interest shall be provided as directed by the Commission.

(d) If a person required to file the application is a partnership, limited partnership, syndicate or other group, the Commission may require that the information called for in (b) of this Section shall be given with respect to each partner of such partnership or limited partnership, each member of such syndicate or group and each person who controls such partner or member. If any such partner, member,

person or acquiring party is a corporation or if a person required to file the application is a corporation, the Commission may require that the information called for by (b) of this Section be given with respect to such corporation, each officer and director of such corporation, and each person who is directly or indirectly the beneficial owner of more than ten percent (10%) of the outstanding voting securities of such corporation and each affiliate of such corporation.

(e) If any material change occurs in the facts set forth in the application filed with the Commission and sent to such domestic public utility, an amendment setting forth such change, together with copies of all documents and other material relevant to such change, shall be filed with the Commission and sent by the person filing the application to the domestic public utility within two (2) business days after such person learns of such change.

(f) Unless otherwise ordered by the Commission, a hearing shall be commenced within sixty (60) calendar days after the application is filed and shall be concluded within sixty (60) calendar days after its commencement. Notice of hearing shall be mailed to the domestic gas utility and to each of its customers prior to the date of the hearing as ordered by the Commission.

(g) Any application for merger and other acquisition of control shall be deemed approved unless the Commission has, within sixty (60) calendar days after the conclusion of such hearing, entered its order approving or disapproving the merger or other acquisition.

165:45-3-6. Tampering with measuring or regulating equipment

(a) No regulator, regulator station, meter, meter house, or other property or equipment owned by a utility wherever situated, whether upon the consumer's premises or elsewhere, shall be tampered with or interfered with, either for the purpose of adjustment or otherwise, except by representatives of the utility owning the same. Official responsibility under authority of a municipal government shall not constitute an exception to this Section.

(b) If the customer tampers with the utility's equipment or receives the benefit of the tampered service, the utility may:

- (1) Disconnect service.
- (2) Charge a tampering fee in accordance with the utility's tariff.
- (3) Charge a reconnect fee in accordance with the utility's tariff.
- (4) Charge a deposit in accordance with OAC 165:45-11-1.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 22 Ok Reg 1808, eff 7-1-05]

165:45-3-7. Supply of gas and pipeline capacity

The supply of gas and the pipeline capacity to transport this supply must be sufficient to meet all normal peak day demands for service and provide a reasonable reserve for emergencies. This subsection is not applicable to curtailable or interruptible gas service contracts, to less than full requirements gas supply and/or transmission service contracts, whether firm or interruptible, to stand-by gas supply and/or transmission service contracts, whether firm or interruptible, to service under interruptible tariffs or to where gas supply is obtained from or furnished by a third-party supplier.

[Source: Added at 13 Ok Reg 3259, eff 7-25-96; Amended at 15 Ok Reg 2177, eff 7-1-98]

SUBCHAPTER 5. METERS AND REGULATORS

PART 1. GENERAL PROVISIONS

165:45-5-1. Installation

- (a) Each utility shall provide and install, at its own expense, and shall continue to own, maintain, and operate sufficient equipment for the regulation and accurate measurement of gas delivered to each consumer.
- (b) Where additional meters are furnished by the utility for the convenience of the consumer, a charge for such meters may be made in accordance with a schedule filed with and approved by the Commission.
- (c) No residential meter shall be installed inside a residence after the effective date of this Chapter.
- (d) Every meter shall be installed at the nearest feasible point to the property line or curb line of the premises of the consumer except where the utility and consumer agree upon a different location.

165:45-5-2. Adjustment of bills for meter error

- (a) **Fast meters.** Whenever any meter tested by PUD or the utility is found to have an average error of more than two percent (2%) fast (or in favor of the utility), the utility shall refund to the consumer the overcharge based upon the corrected meter reading for a period equal to one-half ($\frac{1}{2}$) of the time elapsed since the last test, but not to exceed six (6) months unless it can be established that the error was due to some cause, the date of which can be fixed with reasonable certainty, or the error was due to meter tampering or theft, in which case the charge shall be computed from that date.
- (b) **Slow meters.** Whenever any meter tested by PUD or the utility is found to have an average error of more than two percent (2%) slow (or in favor of the consumer), the utility may charge for the gas consumed, but not included in bills previously rendered based upon the corrected meter reading for a period equal to one-half ($\frac{1}{2}$) the time elapsed since the last previous test, but not to exceed six (6) months unless it can be established that the error was due to meter tampering or theft. The utility shall allow the consumer to pay the corrected amount, in installment payments, over the same period of time in which the incorrect billing took place, unless otherwise agreed to by the utility and consumer.
- (c) **Nonregistering meters.** If a meter is found not to register or to register intermittently for any period, the utility may charge for an estimated amount of gas used which shall be calculated by averaging the amounts registered over corresponding periods in previous years or, in the absence of such information, over similar periods preceding or subsequent thereto. The estimated billing shall not exceed six (6) months, unless it can be established that the error was due to meter tampering or theft. The utility shall allow the consumer to pay the estimated billing amount, in installment payments, over six (6) months, unless otherwise agreed to by the utility and consumer.
- (d) **Incorrect register, regulator, or multiplier on meter.** If a meter is found to have an incorrect register, regulator, or multiplier, the error shall be corrected. Where the error is adverse to the consumer, the utility shall refund the excess charged for the amount of gas incorrectly metered over the period of time the meter was used in billing the consumer. Where the error is adverse to the company, the utility may charge the consumer the undercharge for the amount of gas incorrectly metered for the period of time, not to exceed six (6) months, the meter was used in billing the consumer, unless it can be established that the error was due to meter tampering or theft. The utility shall allow the consumer to pay any unbilled amount

over the same period of time in which the under-billing took place, but not to exceed six (6) months, unless otherwise agreed to by the utility and consumer.

(e) Notwithstanding the provisions set forth in (a)-(d) above, any corrections for billing as set forth in said subsections shall not exceed a period of three (3) years from the date of discovery.

(f) **Scope.** This Section shall not apply to routine testing and replacement of meters pursuant to OAC 165:45-5-13.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-5-3. Information as to reading of meters

(a) **Means of informing consumers concerning the method of reading meters.**

Each utility supplying metered service shall adopt a means of informing its consumers as to its method of reading meters, either by printing on its bills a description of the method of reading meters, by distributing booklets or folders describing the method, or by notice to the effect that the method will be explained at the office of the utility upon application for service.

(b) **Clarification of method by which quantity is determined.** Each service meter shall indicate clearly the number of cubic feet of gas registered by the meter. Where gas is measured under high pressure or where the quantity is determined by calculation from recording devices, the utility, upon request, shall supply the consumer with sufficient information clarifying the method by which the quantity is determined.

(c) **Meter reading information.** Each service meter shall be read by the utility or their designated representative at monthly intervals at least ten (10) times a year, on approximately the same day of each meter reading period. If it is necessary for the utility to estimate more than two (2) bills per year due to actions of the consumer regarding meter accessibility, and where the inaccessibility is beyond the control of the utility, it will be permissible for the utility to submit an estimated bill based upon consumer reading or past service records, and the amount of such estimated bill shall to be adjusted as necessary when the next actual reading is obtained.

(d) **Meters read by consumers.** For each utility which permits its consumers to regularly read their own meters, the procedure for meter reading by the consumer shall provide for meter reading at monthly intervals. The utility shall verify such readings not less than once every six (6) months; however, a utility which has a residential rate schedule which does not have seasonal variations shall verify such readings not less than once a year. The utility shall file its proposed plan for implementing this subsection for approval by the Commission. Upon approval, said plan will become part of the utility's terms and conditions of service. When the consumer fails to furnish meter readings, the utility may submit an estimated bill based on the consumer's previous two (2) months average usage and other available information or based on previous usage adjusted for weather or other comparative data. The amount of such estimated bill will be adjusted as necessary when the next actual reading is obtained.

(e) **Authorization of meter reading.** Upon application of the utility and after notice and hearing, the Commission may authorize the reading of meters less frequently than required by this Section and prescribe conditions and procedures therefore. However, a utility is not prohibited from reading meters more frequently than required by this Section.

(f) **Utility records.** The utility records shall show the following:

- (1) Consumer's name, address and rate schedule symbol;
- (2) Identifying number and type of the meter;

- (3) Meter reading and dates thereof;
- (4) Whether the reading has been estimated; and,
- (5) Any applicable multiplier or constant.

(g) **Meter charts.** All charts taken from recording meters shall be marked with the date of recording and sufficient information to identify the location.

(h) **Meter constants or multipliers.** Each service meter shall clearly indicate the reading from which the charge is made to the consumer. In any case where the dial reading of a meter must be multiplied by a factor due to gas being delivered at a pressure not consistent with the meter index pursuant to OAC 165:45-7-12(a), the gas bill will be calculated with the correction factor.

(i) **Access to meters and other property.** The utility shall, at all reasonable times, have access to meters, service connections, and other property owned by it on a consumer's premises for the purpose of meter reading, maintenance, inspection and discontinuance of service. Refusal on the part of the consumer and/or property owner to provide reasonable, safe and unobstructed access for the above purposes shall be deemed to be sufficient cause for discontinuance of service on the part of the utility, after ten (10) business days written notice. In the event the customer is a tenant, the utility shall attempt to notify the property owner of the access violation and the pending disconnection. If the consumer and/or property owner does not correct unsafe conditions or obstructions, including dangerous animals, the utility may relocate the meter to a safe and accessible location at the expense of the consumer and/or property owner. The utility shall provide its employees with a means of identification in order to claim the right of access.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 15 Ok Reg 2177, eff 7-1-98; Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 36 Ok Reg 668, eff 7-25-19]

PART 3. TESTING

165:45-5-10. Meter testing facilities and equipment

(a) **Equipment and facilities arranged for accurate testing of meters.** Each utility furnishing metered gas service shall own or arrange for equipment and facilities and follow test procedures necessary for accurate testing of its meters to the limits of accuracy specified in this Subchapter. The laboratory apparatus and equipment shall be available at all times for inspection or use by the Commission or its authorized representative. A utility may contract for testing of its meters by another utility. A facility operated by a person other than a utility engaged in the repair and testing of meters, may, after inspection by the Commission, be authorized to test and certify meters for utilities as provided in this Section.

(b) **Equipment for testing small capacity meters.** Each utility shall own and maintain, or have available, a minimum of one (1) meter prover of approved type and of a capacity adequate for the testing of small capacity meters. Each meter prover shall be equipped with all accessories needed for accurate meter testing, and it shall be maintained in proper adjustment so that it will be capable of determining the accuracy of any service meter to within plus or minus one-half (1/2) of one (1) percent. Each meter prover shall be so placed that it will not be subjected to drafts and excessive changes of temperature.

(c) **Equipment for testing large capacity meters.** Each utility furnishing metered gas service through large capacity meters shall have available and maintain in proper adjustment, proving equipment, equipped with all accessories needed for accurate meter testing and suitable for determining the accuracy of any large capacity meter to within plus or minus one-half (1/2) of one (1) percent

(d) **Equipment for testing orifice meters.** Each utility furnishing metered gas through orifice meters shall have available and maintain in proper working condition, equipment suitable for the testing and calibration of such devices to ensure the accuracy based upon nationally recognized industry standards and practices such as American Gas Association Report Number 3.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-5-11. Place and methods for meters and test equipment

(a) Domestic meters-diaphragm type (under 500 c.f.h. capacity).

(1) All tests on domestic meters in service, provided for in this Chapter, shall be made at an approved testing facility with a suitable meter prover as specified in OAC 165:45-5-10. The differential pressure carried on the prover shall not exceed two inches (2") of water column pressure.

(2) Meters shall be tested at two or more rates of flow as needed to ascertain their accuracy. When two rates are used, the low flow rate shall be equivalent to 20% to 40% of the applicable badged capacity and the high flow rate shall be equivalent to 80% to 120% of the applicable badged capacity (See ANSI B109.1 Section 4.2.4). Before being placed in service, meters shall be adjusted to an accuracy of 100% within the limits of plus or minus one (1) percent at a low flow rate (20% to 40% of capacity) and a high flow rate (80% to 120% of capacity). The numerical difference between the test values for these two rates should not exceed one (1) percentage point.

(b) Special meters-diaphragm type (500 c.f.h. or more capacity).

(1) All tests on large positive meters in service provided for in this Chapter shall be made with approved testing apparatus as specified in OAC 165:45-5-10. Such meters shall be tested on location on the consumer's premises, if feasible. Meters shall be tested with air at one or more rates of flow as needed to ascertain their accuracy. When two rates are used, the low flow rate shall be equivalent to 20% to 40% of the applicable meter capacity and the high flow rate shall be equivalent to 80% to 120% of the applicable meter capacity. These tests shall be conducted on the basis of either the 0.5 or 2 inch water column (125 or 500 Pa) capacity of the meter as appropriate for its use. (See ANSI B109.2 Section 4.2.4). Before being placed in service, meters shall be adjusted to an accuracy of 100% within limits of plus or minus one percent at low flow (20% to 40% of capacity) and a high flow rate (80% to 120% of capacity). The numerical difference between the test values for those two rates should not exceed one percentage point.

(2) All tests on orifice meters in service provided for in this Chapter shall be made in their permanent location on the consumer's premises with approved testing apparatus as specified in OAC 165:45-5-10. The accuracy of the differential pressure registration shall be determined on a rising and falling pressure throughout the entire range of the differential element. The accuracy of the static pressure registration shall be determined at zero or atmospheric pressure and at least a second point which approximates the normal operating pressure of the recorder.

(c) Rotary type meters. Rotary meters shall be tested and calibrated at the factory and/or the utility's meter shop in accordance with recognized and accepted practices, and shall be correct to within plus or minus one percent when operating at rated capacity. Meter accuracy shall be 100% plus or minus one percent from approximately 20% to 100% of the meter's rated capacity (See ANSI B109.3

Section 4.2.3.). Rotary meters may be tested and calibrated on location or at the utility's facilities with an approved apparatus as specified in OAC 165:45-5-10. Meters shall be tested at one or more rates of flow to ascertain their accuracy. When one rate of flow is used, it shall be 10% to 30% of the rated capacity. When two rates are used, one of the flow rates shall be the same as the single test. The high flow rate shall be 60% to 100% of the rated capacity. If this is not attainable, then it shall be the maximum capacity of the proving equipment. If an intermediate flow rate is used, it should be approximately midway between the low and high rates. After the initial accuracy tests have been made by the manufacturer or user, differential tests may be used to confirm the continued accuracy of in-service rotary meters (See ANSI B109.3 Section 4.2.2.).

(d) **Turbine meters.** Turbine meters shall be tested and calibrated at the factory and/or the utility's meter shop in accordance with recognized and accepted practices and shall be correct to within plus or minus one (1) percent when operating at rated capacity (See American Gas Association Report No. 7 Sections 8 and 9). Turbine meters may be tested and calibrated on location or at the utility's facilities with an approved testing apparatus as specified in OAC 165:45-5-10.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-5-12. Meter accuracy requirements

(a) Installation test.

(1) Every domestic meter, whether new, repaired, or removed from service for any cause, shall be in good order when installed and shall not be more than plus or minus one (1) percent in error on check proof, and the open proof shall be within plus or minus one (1) percent of the check proof. Each repaired meter shall be marked to indicate the month and year of the last test made on that meter.

(2) Every orifice meter, linear, or positive meter with more than 500 c.f./hr. capacity, whether new, repaired, or removed from service for any cause, shall be in good order when installed and shall not be more than plus or minus one (1) percent in error when operating at any rate of flow within the limits of its capacity as specified in OAC 165:45-5-11.

(b) **Allowable error in adjustment of charges.** Whenever any gas meter is tested, at the request of the Commission or by the utility at the request of the consumer to determine its accuracy, it shall be considered correct if it is found to have an average error of no more than plus or minus two (2) percent. The utility shall not be required to make an adjustment in past charges for gas service, unless the error revealed by such a test exceeds plus or minus two (2) percent.

(c) **Average error.** The average error of a meter shall be determined as follows:

(1) **Domestic meters.** For domestic meters, one-half of the algebraic sum of the error at check proof and the error at open proof.

(2) **Special meters.** For orifice, linear, and positive meters with more than 500 c.f./hr. capacity, the algebraic average of the errors determined at the various rates of flow at which the meter was tested as specified in OAC 165:45-5-11; however, if the rates of flow at which the meter has been registering in service can be definitely established, the weighted average error shall be determined.

(d) **Prepayment meters.** No utility shall use prepayment meters geared or set to produce a rate or amount higher than would be paid if a standard type meter were used, except pursuant to a special rate schedule approved by the Commission for the particular class of service.

(e) General.

- (1) All meters and/or associated metering devices, when tested, shall be adjusted as closely as practicable to the condition of zero error.
- (2) All tolerances set forth in this Subchapter are to be interpreted as maximum permissible variations from the condition of zero error. No meter shall be adjusted to be in error, even within the tolerance authorized by this Subchapter.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-5-13. Periodic testing of meters and test equipment

(a) Every utility shall make periodic tests of all meters, associated devices, and instruments to insure their accuracy. Such tests shall be scheduled within the calendar year, or earlier, when the interval is stated in years; or within the calendar month, or earlier, when the interval is stated in months. The basic periodic test interval shall not be longer than provided in the following schedule (Note: Maintenance programs suggested by manufacturers of the following meters and devices should be carefully followed.):

- (1) Positive displacement meters:
 - (A) Schedule as provided in programs submitted to and approved by the Commission as provided in subsection (b) of this Section
 - (B) 500 c.f./hr. or less - 10 years
 - (C) 501 to 1500 c.f./hr. - 7 years
 - (D) 1501 to 2500 c.f./hr. - 5 years
 - (E) Over 2500 c.f./hr. - 3 years
- (2) Orifice meters - 6 months
- (3) Base pressure correcting devices - 24 months
- (4) Base volume correcting devices - 24 months
- (5) Secondary standards:
 - (A) Immersion Type Cubic-Foot Bottle, one (1) cubic foot - 10 years
 - (B) Dead weight tester - 10 years
 - (C) Pneumatic dead weight tester - 2 years
- (6) Working standards:
 - (A) Bell provers - 5 years
 - (B) Rotary displacement test meters - 5 years
 - (C) Flow provers - 5 years
 - (D) Laboratory quality indicating pressure gauges - 6 months

(b) The Commission may, upon application of the utility and after notice and hearing, extend the test intervals on any meters or class of meters, based upon a statistical sampling methodology or a similar methodology, upon proper showing that the extension would not be detrimental to consumers.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-5-14. Meter testing on request of consumer

- (a) If a written request of a consumer is received at an office of a utility, the utility shall, within twenty (20) calendar days, test the accuracy of the meter through which the consumer is being served.
- (b) A charge may be made for a meter test requested by the consumer if it is found to test within limits of accuracy prescribed by OAC 165:45-5-12. The utility may make the charge if prescribed in the utility's Commission-approved tariffs.

(c) A consumer may make a written request to be present when the utility conducts the test on the meter, and may have an expert or other representative present at that time. The utility shall conduct the test in the presence of the persons requested during regular working hours of the utility.

(d) A written report stating the name of the consumer requesting the test, the date of the request, the location of the premises where the meter has been installed, the type, make, size, and serial number of the meter, the date of removal, the date tested, and the result of the test shall be supplied to such consumer within ten (10) business days after the completion of the test.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-5-15. Meter tests monitored by the Commission

(a) Upon request to the Commission by a consumer, a test may be made of the meter through which the consumer is being served by the utility in the presence of a representative of the Commission. The test shall be made within twenty (20) calendar days after receipt of the request, during regular working hours of the utility and the Commission. The consumer shall be notified of the scheduled test and be invited to attend or have a representative present to witness the testing of the meter.

(b) Upon receipt of such request, the Commission shall either notify the utility to remove and seal the meter in the presence of the consumer for the purpose of testing the meter at a meter testing facility, or shall notify the utility to perform the meter test at the consumer's premises if feasible. If directed to seal the meter, the utility shall keep the meter in the same condition with the seal unbroken until the test can be made in the presence of the consumer and/or his representative and the representative of the Commission.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 22 Ok Reg 1808, eff 7-1-05]

165:45-5-16. Replacement of meters

A request from a consumer for replacement of the service meter on his premises shall be deemed a request for the test of the meter pursuant to OAC 165:45-5-14. If such meter tests within the tolerances set forth in this Subchapter, the meter may be left in place. Any meter which cannot be repaired to operate within the tolerances set forth in this Subchapter shall be replaced by the utility at no cost to the consumer.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

SUBCHAPTER 7. GAS PRESSURE, MEASUREMENT, AND ODORIZATION

PART 1. GAS PRESSURE

165:45-7-1. Gas pressure limits

As a safety measure, the pressure of gas as measured at the outlet of the utility's service pipe to any consumer, or in the case of high pressure system, at the outlet of the utility's service regulator, shall be maintained as uniformly as practicable. It shall not be less than one-half nor more than twice the pressure at which the regulator is set, provided, however, that such limit may be exceeded by 2 p.s.i.g. if the regulator fails.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-7-2. Allowable variations

(a) The maximum pressure of gas at the outlet of the utility's service supply or regulator on any day to any consumer shall not be greater than twice the minimum set pressure on that day at that outlet.

(b) The utility shall not be deemed to have violated (a) of this Section if the variations in gas pressure were due to documented temporary conditions beyond the control of the utility.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-7-3. Pressure testing equipment

Each utility shall comply with the pressure control, testing and other requirements imposed by the U.S.D.O.T., Regulations for Transportation of Natural and other Gas by Pipeline - Title 49 C.F.R. §§ 192.195, 192.197, 192.199, 192.739, 192.741, and 192.743.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-7-4. Pressure surveys

Each utility shall comply with the pressure survey, recording, and other requirements imposed by the U.S.D.O.T., Regulations for Transportation of Natural and other Gas by Pipeline - Title 49 C.F.R. §§ 192.195, 192.197, 192.199, 192.739, 192.741, and 192.743. Each utility shall regularly record the pressures in various parts of its distribution system. The charts or records thus obtained shall bear the date and place where the pressure was taken and shall be retained for a period of at least two (2) years.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

PART 3. GAS MEASUREMENT

165:45-7-10. Definition of a cubic foot of gas

(a) For the purpose of determining heating value of gas under this Chapter, a cubic foot of gas means that amount of gas having a gross heating value of at least nine hundred (900) British thermal units, which when saturated with water vapor at a temperature of sixty degrees Fahrenheit (60°F) and subjected to an absolute pressure equivalent to 14.73 p.s.i.a. and occupies a volume of one (1) cubic foot.

(b) For the purpose of measurement of gas to a consumer, a cubic foot of gas shall contain no less than the heating value prescribed in subsection (a) of this Section, and shall be that amount of gas occupying one (1) cubic foot at a pressure base which shall be stated in the utility's tariffs on file with and approved by the Commission.

(c) No gas regulator shall be adjusted to allow gas to be metered to a consumer at less than the pressure base stated in the utility's tariffs on file with and approved by the Commission.

(d) Where gas delivered to the consumer is measured at a pressure greater than the pressure base upon which it is computed, the volume registered by the meter shall be corrected by a multiplier accepted by industry standards.

(e) Where a utility has a contract or a tariff in effect on the effective date of this Chapter specifying a pressure base other than 14.73 p.s.i.a., the pressure base so specified may continue to be used for billing purposes. However, all reports to the Commission will be at 14.73 p.s.i.a. pressure base, detailing the conversion

multipliers used.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-7-11. Gas measurement requirements

- (a) All gas transmitted by any utility shall be measured accurately by proper apparatus prior to entering the pipe line, and all gas consumed for light, heat or power in connection with its transmission shall be measured accurately in order that the "lost and unaccounted for" gas may be accurately determined.
- (b) All gas transmitted by any utility shall be measured accurately by proper apparatus, and all gas consumed for light, heat, or power in connection with its distribution shall be measured in order that the "lost and unaccounted for" gas in distribution may be accurately determined.
- (c) Each utility shall keep a record of the monthly input and output of its system.
- (d) All the measurements required by this Section shall be recorded and the totals of the input and output measurements shall be reported each month to the Commission on its Forms G.D. and G.T., "Comparative Monthly Report of Revenues and Expenses." The measurements shall be reported on the 14.73 (p.s.i.a.) pressure base. Sales to consumers may be reported as billed when the pressure at which the gas is delivered is at standard delivery pressure.
- (e) The utility shall treat each point of delivery as a separate consumer, or contract, and shall separately meter and charge accordingly. The utility shall not combine meter readings for the purpose of giving the consumer a lower rate, except as otherwise authorized by the Commission. More than one point of delivery to a single consumer at a single location will be permitted only if required by the physical characteristics of the facilities served. In such cases, total usage at multiple points of delivery shall be combined for billing purposes.
- (f) All gas service rendered by a utility shall be subject to meter measurement, except as otherwise authorized by the Commission.
- (g) Service to newly-constructed multiple residences, apartment complexes or similar residential units shall be individually metered, one meter per residence, and billed under the applicable rate schedule.
- (h) Where four (4) or fewer rooms are rented to the public, for strictly residential purposes, within a residence with a single meter, the residential rate shall be applied to service for the entire residence.
- (i) Exceptions to the standard set forth in subsection (g) of this Section for service to multiple residences may be granted by the Commission with respect to newly-constructed multiple residence units. A utility or the owner of such a multiple residence unit may submit an application seeking authorization to furnish service at one or more points of delivery. While the Commission may deny authorization for safety and other reasons, the Commission shall grant such authorization only if it determines that providing service in the manner requested will encourage:
 - (1) Conservation of energy;
 - (2) The efficient use of facilities and resources by the utility providing such service; and,
 - (3) Equitable rates to the consumers of such service.
- (j) Except as provided in this subsection, no consumer shall separately meter or submeter and separately bill another consumer for gas. A landlord or innkeeper may include the cost of gas in rent. A landlord may utilize any formula in computing the energy component of rent, provided that component is not separately metered and billed as "gas." A consumer violating this Section is subject to termination of service by the utility. This Section shall not apply to the sales of natural gas to or by

a distributor for use as a vehicular fuel.

(k) Service to previously constructed multiple residences, apartment complexes or similar residential units may continue to be provided with a single or multiple meters. At the option of the utility, individual consumers may be served with individual meters at the applicable rate schedule.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-7-12. Measurement of gas under high pressure

(a) When gas is measured through positive or linear meters at a pressure greater than the pressure base used for measurement, such meters shall either be equipped with reliable pressure-volume recording gauges or compensating devices, as necessary or as otherwise required by the Commission, for accurately determining, in accordance with contracts or other tariff provisions, the quantity of gas that has passed through the meter, or the dial reading of the meter shall be multiplied by a correction factor.

(b) In computing the volume of gas on a given pressure base from a pressure volume chart, the multiplier shall be obtained by the weighted average method, which method consists of determining the average pressure for each unit volume indicated on the chart.

(c) In computing the volume of gas on a given pressure base from an orifice meter chart or charts, the average static pressure and the average differential pressure shall be determined for periods not exceeding one (1) hour. Where pressure variations are extreme during the hour, such average should be based on measurements taken at no more than fifteen (15) minute intervals.

(d) The calculation of volume shall be made in accordance with the Ideal Gas Law and may be corrected for deviations from Boyle's Law, all in accordance with methods and tables generally recognized by and commonly used in the natural gas industry.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-7-13. Calorimeter equipment and heating value requirements

(a) **Method of determining heat content.** Each utility shall maintain or have access to an approved type calorimeter or other accurate method of determining heat content, and shall periodically test representative samples of gas being distributed in its system.

(1) A recording calorimeter shall be checked at least once a month with an approved standard calorimeter or by some other accurate means.

(2) Whenever the utility materially changes its operations or source of gas, a new test will be made of the heating content of gas furnished.

(3) Both calorimeter and method of testing shall be subject to inspection and approval by a representative of the Commission.

(4) The results of all tests shall be kept on file by the utility for a period of three (3) years.

(b) **Standard of heating value.** Each gas utility shall establish its own minimum heating value for the gas it furnishes the consumer, provided the standard it establishes shall not be less than nine hundred (900) British thermal units per cubic foot at 14.73 p.s.i.a. and sixty degrees Fahrenheit (60°F).

(c) **Daily average heating value.** At no time shall the daily average heating value be less than the utility's minimum provided in subsection (b) of this Section.

(d) **Adopted heating value.** The minimum adopted heating value by the utility shall be stated in its Commission-approved tariffs.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

PART 5. ODORIZATION AND PURITY OF GAS

165:45-7-20. Odorization and purity of gas

- (a) Odorization of gas will comply with the U.S. Department of Transportation Regulations for Transportation of Natural and Other Gas By Pipeline - Title 49 C.F.R. 192.625.
- (b) The purity of all gas distributed shall be substantially free from dangerous or objectionable quantities of impurities such as hydrogen sulphide, nitrogen, or other combustible or noncombustible constituents which, if the gas is completely burned, yield noxious or toxic products of combustion.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

SUBCHAPTER 9. RECORDS AND REPORTS

165:45-9-1. Preservation and availability of records; reporting contact persons

- (a) Unless otherwise specified, all records required by this Subchapter shall be preserved by the utility in the form and for a period of time not less than that specified by rules of FERC or, in the absence thereof, for two (2) years.
- (b) All records required by this Subchapter shall be kept within the State of Oklahoma at the office or offices of the utility, and shall be open for examination by the Commission or its authorized representatives; provided, if the principal place of business of the utility is located outside of the State of Oklahoma, the records may be kept at the principal place of business of the utility or at such other location where the records are regularly kept. Each utility shall maintain accurate and detailed records reflecting the original cost of property located in and required for doing business in the State of Oklahoma, including the cost of fuel. The utility shall make any such records available for examination by the Commission or its authorized representative. Each utility shall notify the Commission as to the location of the office or offices at which the various classes of records are kept, and shall file with the Commission's Court Clerk such reports as the Commission may from time to time require.
- (c) **Contact persons.** Each utility shall notify in writing, the PUD Director within thirty (30) days of a change in the company-designated contacts for PUD and CSD issues.

- (1) The update shall include the name(s), physical street address(es), electronic mail addresses and telephone number(s) of the designated individual(s), and shall be furnished applicable to each operating district, town or any segment of the utility so that PUD will be able to reach the responsible person at any time. If this information is unavailable, the utility may seek a waiver from the PUD Director by making the request in writing.
- (2) The contact name(s) provided pursuant to this subsection shall be the individual(s) primarily responsible for:
 - (A) Providing customer service;
 - (B) Repair and maintenance;
 - (C) Answering complaints;
 - (D) Authorizing and/or furnishing refunds to customers;
 - (E) Tariff issues;
 - (F) Regulatory matters;

- (G) PUD Fee Assessment (and Fee Assessment Payments, if different);
- (H) Primary emergency;
- (I) After hours emergency;
- (J) Annual reporting;
- (K) Attorney for regulatory matters;
- (L) Community liaison; and
- (M) Engineering operations, meter tests and repairs.

(d) **Other information.** Each utility shall promptly furnish such other information as PUD or the Commission may request, unless otherwise ordered by the Commission.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-9-2. Interruptions of service

- (a) It shall be the duty and responsibility of the utility to make reasonable effort to notify all affected consumers when the gas supply is to be turned off, or turned on after having been turned off.
- (b) Whenever service is interrupted, other than under emergency conditions, the interruption shall be made whenever possible at a time which will cause the least inconvenience to consumers. Where feasible, the utility shall give advance notice to consumers who will be affected (including hospitals, police, fire, schools and other public buildings responsible for public health and safety).
- (c) Each utility shall keep a record of any condition resulting in an interruption of service affecting its entire system, or major division thereof, including a statement of the time, duration, and cause of any such interruption and such record shall be available to the Commission or its authorized representative upon request. Class C and D utilities shall be required to keep records should an interruption of service occur affecting fifty (50) or more consumers, of the time and nature of the interruption of service, the time and method of restoration of service, and the approximate number of consumers affected and areas of the system affected. Class A and B utilities shall be required to keep records should an interruption of service occur affecting two hundred or more consumers, of the time and nature of the interruption of service, the time and method of restoration of service, and the approximate number of consumers affected and areas of the system affected. These records shall be retained for five (5) years.
- (d) A utility may cause emergency interruption of service without notice when required by failure of equipment, unexpected and prolonged increase in load, fire, storm, strike, or other cause beyond its control. Each utility shall establish and train employees in emergency procedures designed to prevent or shorten service interruption where conditions require interruption of service. The utility may in good faith select the areas or consumers whose service is to be interrupted as emergency conditions require.
- (e) Each utility shall prepare and maintain a plan for scheduled interruptions, emergency interruptions, and restoration of service which is consistent with this Section.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 19 Ok Reg 1977, eff 7-1-02]

165:45-9-2.1. Restoration of service

This Section establishes general parameters to ensure timely communication to the Commission, of the utility's implementation of its restoration of service plan, following an unplanned service interruption. Each gas utility shall

have a written restoration of service policy/plan, which shall include a communication plan to be followed during unplanned or emergency interruptions, with a current copy on file with the CSD Director and the Commission's Emergency Liaison, and updated as changes occur. No later than September 30 of each year, this policy shall be reviewed by the utility at least annually and updated as deemed necessary and appropriate. A statement detailing all changes from the previous edition shall be filed with the Commission and included at the front of the policy on file. Each gas utility shall provide and keep current, the phone number of any 24 hour emergency operations center or a list with a minimum of two individuals with 24-hour contact numbers, to the Commission's CSD Director and the Commission's Emergency Liaison. The following items are guidelines to be addressed in the policy:

- (1) Assessment of the extent of the service interruption and what resources (equipment, materials, and labor) will be required to restore service. The utility should also attempt to determine the number of customers affected and the geographic extent of the service interruption.
- (2) Determination as to whether or not the service restoration can be accomplished by use of in-house personnel only, or if contractors (personnel obtained from other utilities or third-party entities) will be required. The objective is to have service restored as soon as possible.
- (3) Identification of priorities for service restoration, based upon emergency needs and upon ease of restoration for the greatest number of consumers for the least expenditure of money, time, and effort. Priority shall be given to any life-threatening situations known or discovered during restoration of service.
- (4) Once gas service to installations affected with the interest of public health and safety has been restored (such as hospitals, fire and police departments and 911 centers), service shall be restored to schools as quickly as feasible, during such time of the year that school is in session.
- (5) Attempted notification of high-priority customers or major gas consuming facilities who are affected by the service outage, when possible. Radio and/or television should be utilized to notify larger numbers of customers as to the type of service outage, extent of the service outage, and the expected time to restore service. Other means of notification may also be utilized, so long as the result is mass notification on an efficient, effective, and timely basis.
- (6) Commission notification through the CSD Director and the Commission's Emergency Liaison to implement the process outlined in paragraphs A through C of this subsection. The Commission notification process to the designated Consumers Services Division individual(s) and the Commission's Emergency Liaison may be accomplished by one or more of the following methods: business telephone and/or e-mail address during the business hours of 8:00 a.m. through 4:30 p.m. Monday through Friday, or emergency cellular telephone number after normal business hours, weekends and holidays. The notification shall consist of the following:
 - (A) An initial contact to notify Staff of outages which involve a major utility substation or facility; or which, may cause a high degree of public interest or concern; or which have a duration of 4 hours or more and involve 1% or fifty (50) customers or more, whichever is greater, of the utility's meter count.

(B) Intermediate contact to provide status reports, as deemed necessary by the utility, or as may be requested by Commission Staff.

(C) A conclusory contact detailing the results and completion of the restoration of service plan implementation.

[Source: Added at 19 Ok Reg 1977, eff 7-1-02; Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 23 Ok Reg 1677, eff 7-1-06; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-9-3. Records of service complaints; investigations

(a) Each utility shall make a full and prompt investigation of every formal complaint made to it by its consumers, either directly, or through the Commission after the consumer or other interested party has contacted the utility. It shall keep a record of all formal complaints received, which record shall show the name and address of the complainant, the date, the character of the complaint, and the adjustment, or disposal made thereof, which record shall be retained for examination by the Commission or its Staff. For purposes of this Section, a formal complaint is an oral or written communication by a consumer or other interested party to the utility's business office that prompts an investigation by the utility. All records of formal complaints shall be retained for a period of at least two (2) years from the date of final disposition.

(b) In the event of a dispute between the consumer and the utility regarding the accuracy of a metering device, the utility shall make such investigation as shall be required by the particular case and report the result thereof to the consumer. In the event that the complaint is not reconciled, the utility or the consumer may request that the Commission's CSD mediate the dispute, or make application to the Commission for review of the complaint.

(c) When a utility has been notified that a complaint regarding meter accuracy has been referred to the Commission, the questioned meter equipment shall be handled in accordance with OAC 165:45-5-15. Violation of this subsection will be considered substantiation of the complainant's contentions.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-9-4. Record of meter and meter test

(a) Whenever any service meter is tested, the original test record shall be preserved, including the information necessary for identifying the meter, the reason for making the test, the reading of the meter before and after the test, together with all data taken at the time of the test in sufficiently complete form as to permit the convenient checking of the method employed and the calculations. After removal from service, only the record of the latest test need be preserved.

(b) A record shall be made for each meter used by any utility showing the date of acquisition, the most recent test and/or repair to which it has been subjected, and its present location. The record shall be retained until six (6) months after the meter is permanently retired from service.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-9-5. Record of accidents [REVOKED]

[Source: Revoked at 13 Ok Reg 3259, eff 7-25-96]

165:45-9-6. Filing of maps

Each utility shall maintain suitable detailed maps of its entire system, which shall be made available to the Commission upon request. The general system maps shall be filed with the Commission when a utility files its original application for approval of its rate schedules.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-9-7. Reporting of storage gas

Each utility having gas in underground storage shall report to the Commission on or before the 60th day following the last day of each month the amount and purchased cost of gas in storage as of the last day of the preceding month as set forth in OAC 165:50-3-2(a)(2)(D). The report shall be made as prescribed by the Director of the Public Utility Division.

[Source: Amended at 12 Ok Reg 2127, eff 7-1-95]

165:45-9-8. Reporting of nonutility operations or subsidiaries

(a) When a utility is engaged in any type of nonutility operations through subsidiaries or otherwise, or in any business not considered in the ratemaking process, and personnel, services, material, equipment, or the use of any facility of the utility is supplied for the operation of such other type of business or subsidiary, the utility shall keep an accurate account of the allocation of all such costs between utility and nonutility operations. All such costs shall mean actual cost plus any direct or indirect charges related to the cost of personnel, services, material, equipment or facilities calculated on the same basis used in allocating direct and indirect charges to the utility operations. There shall be a written accounting of the allocation of these costs between utility and nonutility operations on a monthly basis.

(b) The cost of keeping records and any other expense caused by furnishing such personnel, services, material, equipment or facilities shall be charged to the recipient thereof. Such costs shall be calculated as set forth in subsection (a) of this Section.

(c) Records of and reports on personnel, services, material, or facilities allocated to other types of business or subsidiaries referred to in this Section shall be available to the Commission or its representatives.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-9-9. Reporting of purchased gas for adjustment purposes

A utility having an adjustment for cost of purchased gas clause in its approved tariffs shall file periodic and detailed reports of its gas purchases in such form as the Commission may require and as set forth in OAC 165:50.

[Source: Amended at 12 Ok Reg 2127, eff 7-1-95]

165:45-9-10. Accounting

(a) Gas utilities operating within the State of Oklahoma shall be classified as prescribed by OAC 165:70-1-4 (a) and (b).

(b) All gas utilities having multi-state operations shall maintain records in such detail that the costs of property located in and required for doing business in the State of Oklahoma in accordance with jurisdictional boundaries can be accurately and readily ascertained.

(c) No change in or departure from the system used by the utility will be permitted except upon order of the Commission made after notice and hearing.

(d) The Annual Report FERC Form 2 - Class A and B Natural Gas Companies and FERC Form 2A - Class C and D Natural Gas Companies promulgated by the FERC are hereby adopted for purposes of the annual report to this Commission by all Class A, B, C, and D Gas Companies filing reports with the FERC. Each utility, in addition to filing with the Commission a copy of its annual report to the FERC, if any, shall file an annual report on a form furnished by the Commission of its utility service and operations in the State of Oklahoma. Any allocation of costs or revenues necessary in developing results of operations for the State of Oklahoma shall be accomplished on a basis approved by the Commission.

(e) The results of operations reported by each gas utility in its annual report to the Commission shall be reconciled with the results of operations shown on its books, records and in its other reports to the Commission.

(f) Each utility shall report to the Commission, at the end of the utility's fiscal year and on summary sheets furnished or approved by the Commission, the book value of its utility plant. These reports and the annual reports required by subsection (d) of this Section shall be delivered to the Commission not later than ninety (90) calendar days after the end of the fiscal year, provided that the Commission may grant an extension of time for good cause shown.

(g) Each utility shall make special reports at such time and in such form as the Commission may from time to time require.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-9-11. Utility acknowledgement of customer complaint inquiries

If PUD contacts a utility concerning a customer complaint, the utility shall respond to PUD within the following time periods:

(1) Inquiries regarding disconnection, suspension, or termination of service shall be acknowledged by the utility within one (1) business day of receipt of inquiry from PUD.

(2) Inquiries other than for disconnection, suspension, or termination of service shall be acknowledged by the utility within three (3) business days of receipt of inquiry from PUD.

[Source: Added at 36 Ok Reg 668, eff 7-25-19]

SUBCHAPTER 11. CUSTOMER SERVICE

PART 1. INITIATION OF SERVICE

165:45-11-1. Deposits and interest

(a) Each utility shall prepare and submit a plan containing criteria for deposits to the Commission for approval. The plans shall include criteria for residential and nonresidential consumers with residential being defined in each utility's tariff.

(1) The residential plan shall conform to all subsections of this Section.

(2) The nonresidential plan shall conform to all subsections of this Section except (b), (c), (d) and (k).

(b) No utility shall require a deposit of a residential consumer who has received the same or similar type and classification of service for twelve (12) consecutive months and service was not terminated for nonpayment nor was payment late more than twice nor was a check for payment dishonored. The twelve (12) month service period shall have been within eighteen (18) months prior to the application for new service. The utility plan may establish other relevant criteria which will qualify the

consumer for nonpayment of a deposit.

(c) No utility shall require a deposit of more than one-sixth (1/6) the estimated annual bill. The utility may allow smaller deposits to be made in conformance with relevant objective criteria written in the utility's plan. The utility plan may allow consumers to pay deposits in installments. The utility may also require consumers to pay the entire deposit prior to initiating service.

(d) A residential consumer may be required to post a deposit as a condition of continued service if undisputed charges have become delinquent, with delinquent meaning a payment not received on or before the due date as posted on the bill, in two (2) out of the last twelve (12) billing periods or if the consumer has had service disconnected during the last twelve (12) months pursuant to OAC 165:45-11-11 or has presented a check subsequently dishonored.

(e) A non-residential consumer may be required to post a deposit as a condition of continued service if undisputed charges have become delinquent, with delinquent meaning a payment not received on or before the due date as posted on the bill, in two (2) out of the last twenty-four (24) billing periods or if the consumer has had service disconnected during the last twenty-four (24) months pursuant to OAC 165:45-11-11 or has presented a check subsequently dishonored.

(f) Interest shall be paid on cash deposits by the utility at no less than the rate calculated as follows:

(1) For all consumer deposits returned within one (1) year or less, the interest rate shall be established the 1st day of January of each year to equal the average of the weekly percent annual yields of one (1) year U.S. Treasury Securities for September, October, and November of the preceding year. The interest rate shall be rounded to the nearest basis point.

(2) For all consumer deposits held by the utility for more than one (1) year, the interest rate shall be established the 1st day of January of each year to equal the average of the weekly percent annual yields of 10-year U.S. Treasury Securities for September, October, and November of the preceding year. The interest rate shall be rounded to the nearest basis point. The utility may pay the average of the one (1) year Treasury Security, as referenced in subsection (e)(1) of this Section, for the first year the deposit is held.

(3) Provided, however, that after the interest rate is initially established pursuant to this subsection, the interest rate(s) shall not change unless the application of the formula in paragraph (1) and/or (2) of this subsection results in a change in interest rate(s) that is/are greater than fifty (50) basis points.

(4) The PUD Director shall calculate the interest rates as pursuant to (e)(1) and (2) of this Section, and shall mail notice to the gas utilities by December 15th of each year, only if a change in the rate(s) is/are necessary pursuant to subsection (e) of this Section, otherwise the current interest rate(s) will remain in effect.

(g) If refund of deposit is made within thirty (30) days of receipt of deposit, no interest payment is required. If the utility retains the deposit more than thirty (30) days, payment of interest shall be made retroactive to the date of deposit. No interest shall accrue on a deposit after final discontinuance of service.

(h) The deposit shall cease to draw interest on the date it is returned or credited to the consumer's account.

(i) The utility plan shall provide the date of payment of interest and whether the interest shall be paid by negotiable instrument or by credit against current billing.

(j) Each consumer posting a cash deposit shall receive a nonassignable receipt in writing at the time the deposit is made or within ten (10) days thereafter. When a consumer pays a deposit as a portion of a gas service bill, payment of the bill shall serve as a receipt for payment of the deposit. If the deposit is not paid by the due date, the amount of the deposit will become a part of the past due amount owed and monies paid shall be applied to the oldest past due amount. The utility plan shall provide reasonable means whereby a depositor who applies for the return of his/her deposit, or any balance to which he/she is entitled, but who is unable to produce the original receipt may not be deprived of this deposit or balance.

(k) The utility shall automatically refund the deposit for residential service, with accrued interest, after twelve (12) months satisfactory payment of undisputed charges and where payment was not late more than twice; provided, however, that service has not been disconnected within the twelve (12) month period. Payment of a charge shall be deemed satisfactory if received on or prior to the date the bill is due. Payment of a charge shall be deemed not satisfactory if made by a check subsequently dishonored.

(l) The utility shall automatically refund non-residential service deposits of less than \$20,000, with accrued interest, after twenty-four (24) months' satisfactory payment of undisputed charges and where payment was not late more than twice; provided, that service has not been disconnected within the twenty-four (24) month period. Non-residential consumers, who meet the above-referenced eligibility criteria, must have a minimum of five (5) years continuous service at the service location with the utility before a deposit will be refunded.

(m) The utility plan shall provide for the review of all residential deposits at least annually and deposits for non-residential service at least every twenty-four (24) months and shall provide that refunds will be paid by negotiable instrument, upon request of the consumer provided the consumer's bill is not delinquent, or by credit against current billing.

(n) The amount of the deposit, with accrued interest, shall be applied to any unpaid charges at the time of a discontinuance of service. The balance, if any, shall be returned to the consumer within thirty (30) days either in person or by mailing it to the consumer's last known address.

(o) The utility shall provide payment of accrued interest for all consumers annually by negotiable instrument or by credit against current billing.

(p) The utility may withhold refund or return of the deposit pending the resolution of a dispute with respect to charges secured by such deposit.

(q) The utility company shall keep records to show:

- (1) The name, account number, and address of each depositor;
- (2) The amount of the deposit and date received; and,
- (3) Each transaction concerning the deposit.

(r) Such records shall be retained for two (2) years after the deposit and/or interest is refunded or applied.

(s) Upon the sale or transfer of any public utility or operating units thereof, the seller shall file with the application of transfer a verified list of all consumers for whom a deposit is being held, the date such deposit was made, the amount thereof, and the unpaid interest thereon. The information provided shall be treated as confidential and shall not be available for public inspection unless ordered by the Commission after notice and hearing.

(t) The deposit made by the consumer with the utility at the time of application for gas service shall not constitute an advance payment to cover service bills, but for all purposes it is to be considered as security for the payment of monthly bills or

other proper charges.

165:45-11-2. Right to refuse service

- (a) The utility may refuse to provide service to an applicant or consumer from whom there remains owing an unpaid account for service of a similar character previously supplied to such applicant or consumer at any location within that utility's service territory by a gas utility governed by this Chapter, or a judgement arising from an unpaid account remains unpaid in the applicant's name.
- (b) The utility shall not deny service to a consumer for failure to pay any obligation to the utility except the amount due for utility service. Utilities shall not deny service to a consumer for nonpayment of an amount past due for more than three (3) years if the utility cannot substantiate the charges with a copy of the consumer's complete billing history reflecting usage, consumption and relevant charges.
- (c) The utility may refuse to provide service to an applicant for misrepresentation of identity or facts for the purpose of obtaining service or use of an alias, trade name, business name, relative's name or another person's name as a device to escape payment of an unpaid obligation for utility service provided to the consumer.
- (d) The utility shall provide documentation to the consumer indicating the reason(s) that service is being withheld, upon request of the consumer.
- (e) The utility may refuse to provide service to an applicant when the applicant is not in compliance with a Commission order, a deferred payment agreement, or an extension agreement with the utility entered into with respect to service previously rendered by the utility to the applicant.
- (f) The utility may refuse to provide service to an applicant when the applicant has not paid the utility an approved fee, charge, or deposit as provided for in this Subchapter or the utility's approved tariffs.
- (g) The utility may refuse to provide service to an applicant when the applicant has not furnished adequate assurance of payment in the form of a deposit or other security for service within twenty (20) calendar days of an order for relief under the United States Bankruptcy Code, U.S.C.A. Title 11 Section 366.
- (h) The utility may refuse to provide service to an applicant when there is evidence that the applicant is using service in an unauthorized manner or is tampering with the equipment furnished and owned by the utility.
- (i) The utility may refuse to provide service to an applicant when the applicant has not provided an acceptable valid and non-expired proof of identity. Acceptable valid and non-expired proof of identity may include the following:
 - (1) Driver's license or state identification card.
 - (2) Department of Defense identification.
 - (3) Employment identification.
 - (4) Social security card.
 - (5) Student identification card.
 - (6) Passport.
 - (7) Birth certificate.
 - (8) Any other verifiable proof which would establish identity.
- (j) The utility may refuse to provide service when:
 - (1) The applicant is not in compliance with all state and/or municipal regulations governing the service for which applied.

- (2) The applicant is not in compliance with the utility's tariffs which have been approved by this Commission.
- (3) The service applied for is of such character that it is likely to unfavorably affect the service of other consumer.
- (4) The connection of utility service to the applicant's equipment would create a hazard.
- (5) The applicant is causing or threatening injury to a utility employee or an employee's family to retaliate for or prevent an act the utility performs in the course of business.
- (6) The applicant is causing or threatening damage to utility's property.

165:45-11-3. Connection, disconnection, and reconnection charges

The utility shall make no charge for connection, disconnection or reconnection of gas service for a consumer except the charges specified in the approved tariffs and terms and conditions of service of the utility.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95; Amended at 15 Ok Reg 2177, eff 7-1-98]

165:45-11-4. Consumer information

(a) Each utility shall:

- (1) Maintain maps, plans or records of its transmission and distribution systems, with such other information as may be necessary to enable the utility to advise prospective consumers and others entitled to the information as to the services available in any locality; and,
- (2) Annually, transmit to each of its nonresidential consumers a statement that the rate tariff on which they are served is available upon request. Additionally, the consumer shall be advised that the utility company, upon request, will review the consumer's applicable rate tariff to determine if the consumer is receiving the rate tariff that is best suited to the consumer.

(b) The utility shall provide, in each telephone directory covering any area it serves, a telephone listing of the number by which the utility can be notified at any time during a twenty-four (24) hour day of any utility service deficiency or emergency, or the information may be published in a regular newsletter or publication furnished to its subscribers. In addition, the telephone number shall be published on the homepage of a utility sponsored website, if applicable.

(c) The utility shall advise its residential consumers through its consumer mailing, no less than once a year, of the Commission rules regarding the following:

- (1) Disconnection information which states the rights listed in the "Disconnect Notice," as outlined in OAC 165:45-11-16 *et seq.*;
- (2) Commission-approved deferred payment plans;
- (3) Twenty (20) calendar day government and/or private financial aid assistance deferral;
- (4) Life Threatening Certificate and consumer responsibilities;
- (5) Elderly or Consumers with disabilities can request their account to be flagged by the utility so that CSD can intervene on their behalf, when requested by the consumer, in the event of a disconnection of service notice and extend the disconnection date by up to five (5) business days;
- (6) Average Monthly payment plans;
- (7) The address and telephone number of the Commission's CSD;
- (8) The limitations for disconnection, including days or periods of time when service shall not be disconnected as outlined below in OAC 165:45-

11-14(c); and

(9) The availability of a list of agencies providing assistance to consumers for their utility bills as outlined by OAC 165:45-11-12.

(d) The mailing required by paragraph (b) of this Section, shall occur during the months of September and/or October of each year.

(e) The utility shall provide the location of pay agents upon the consumer's request.

(f) The utilities are strongly encouraged to have bilingual customer service personnel available to assist non-English speaking consumers regarding disconnection and related matters.

[Source: Added at 13 Ok Reg 3259, eff 7-25-96; Amended at 19 Ok Reg 1977, eff 7-1-02; Amended at 21 Ok Reg 2095, eff 7-1-04; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-5. Identification of class of service

(a) Upon application for service by the consumer, it is the responsibility of the utility to provide each consumer, orally or in writing, if requested, with the proper tariff and the identity of the consumer's respective class of service. The utility may rely upon the information supplied by the consumer to the utility for purposes of identifying the proper class of service and appropriate tariff rate. Upon notice from the consumer or upon discovery by the utility in the normal course of business of an alleged incorrect service classification, tariff rate or apparent change in the consumer's type of service, the utility shall make a prompt review and, when appropriate, change the consumer's account to the appropriate service classification, tariff rate or any other service modifications which are necessary to ensure future service is delivered under the proper service classification and tariff rate.

(b) If the consumer has not been charged the appropriate tariff rate for that consumer's class of service, the utility shall be responsible for correcting the billings that have occurred since the last notification of available rates by the utility as set forth in OAC 165:45-11-14(a)(2). In the absence of such notification, the period of time for which billing corrections shall be made shall not exceed three (3) years from the date of discovery. When the billing corrections result in a credit account balance for the consumer, the utility shall apply the credit to future billings or, at the consumer's request, refund the credit account balance to the consumer.

(c) Utilities that have volumetric tariffs that do not classify consumer accounts by type of service shall not be subject to the retroactive billing corrections as stated in subsection (b) of this Section, except in the following circumstances:

(1) The consumer's volumetric billing rate was changed without written notification to the affected consumer and the utility had available to it historical volume usage levels which contradict the volumetric rate applied to the consumer's billing; or

(2) The utility failed to complete reasonable investigation of consumer-supplied estimates of volume usage used to identify the tariff for billing purposes.

(d) The utility shall annually notify consumers in billing inserts that the consumer must advise the utility if there has been a change in usage necessitating a change of service classification.

[Source: Added at 13 Ok Reg 3259, eff 7-25-96]

PART 3. DISCONNECTION OF SERVICE

165:45-11-10. Discontinuance of service by a consumer

A consumer may be required to give up to five (5) business days notice of intention to have service disconnected or to have the account closed and shall be responsible for all charges for service until the expiration thereof. This 5-day notice provision may be waived by the utility. Such disconnection or closing of the account does not relieve the consumer of obligations incurred prior to disconnection. At the time the consumer requests disconnection or closing of the account, the utility will advise the consumer of any reconnection and or service fees, if any reconnection and or service fee applies pursuant to the utility's approved tariff.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95; Amended at 15 Ok Reg 2177, eff 7-1-98; Amended at 31 Ok Reg 1067, eff 9-12-14]

165:45-11-11. Physical disconnection of service by a utility

(a) **Sufficient reasons for physical disconnection of service.** A utility may physically disconnect service to a consumer for any of the following reasons:

- (1) Nonpayment of all or any portion of undisputed utility bills.
- (2) Nonpayment of an account for service of a similar character previously supplied to such applicant or consumer by the utility.
- (3) Failure to comply with the terms and conditions of a settlement agreement or any type of deferred payment agreement or with a Commission order.
- (4) Failure to post a deposit as prescribed in OAC 165:45-11-1.
- (5) Failure to make application for service.
- (6) Misrepresentation of identity or facts for the purpose of obtaining service or use of an alias, trade name, business name, relative's name or another person's name as a device to escape payment of an unpaid obligation for utility service provided to the consumer.
- (7) Violation of any rule or regulation of the Commission or Commission-approved rule of the utility.
- (8) Unauthorized use of gas accomplished through bypassing of the utility's measuring equipment or tampering with pipes, meters, or other utility equipment.
- (9) Whenever the utility has reason to believe that continued service will create a condition on the consumer's premises that is dangerous to persons or property.
- (10) Refusal to grant access at reasonable times for the purpose of installation, inspection, maintenance, replacement, or reading of utility equipment installed upon the premises of the consumer, or maintaining any obstruction that would deny access for these purposes.
- (11) Potential adverse effect of the service required by the consumer on the service to other consumers of the utility, provided the consumer has been notified and given a reasonable opportunity to correct the adverse effect.
- (12) Abandonment of the premises served.
- (13) Upon request of the consumer pursuant to OAC 165:45-11-10.
- (14) Causing injury or threatening to cause injury to an employee of the utility or the family of an employee of the utility or the property of the utility for the purpose of preventing a utility employee from engaging in activities authorized by law or in retaliation for such activities.
- (15) Violation of the utility's terms and conditions regarding the operation of nonstandard equipment or unauthorized attachments, if the consumer was notified first and given a reasonable opportunity to comply with the

terms and conditions.

(16) Violation of federal, state, or local laws or regulations through use the service.

(17) Causing damage to utility property.

(18) A condition exists which poses a health or safety hazard.

(b) Insufficient reasons for disconnection of service. A utility shall not disconnect service to a consumer for any of the following reasons:

(1) Failure to pay for a different kind or classification of service.

(2) Failure to pay a bill correcting a previous underbilling, due to misapplication of rates, unless the utility offers the customer a deferred payment agreement as provided elsewhere in this Chapter.

(3) Failure of a previous owner or occupant of the premises, or user of the service to pay an unpaid or delinquent account, except where the previous occupant remains an occupant or user of the utility service.

(4) Failure of a consumer to pay any portion of an estimated billing which the consumer disputes, except where the consumer fails to allow a utility representative access to the meter or the consumer regularly reads the consumer's own meter and fails to supply a current meter reading.

(5) If a current consumer is good standing who accepts an additional household member owing a previous bill to the utility unless that additional household member is listed on the lease arrangements or another utility service as a responsible party, or unless the household member shared service with the subscriber at a different or same location.

(6) If a consumer or potential consumer has a previously unpaid account from a different utility beyond the boundaries of the utility's service territory.

(7) Pending verification, service cannot be withheld nor disconnected from a consumer whose name was used to obtain service at another location without the consumer's permission or knowledge.

(8) Nonpayment of an amount past due for more than three (3) years if the utility cannot substantiate the charges with a copy of the consumer's complete billing history reflecting usage, consumption and relevant charges.

(9) Failure to pay a past due amount to another utility.

(c) Effective period of notice. A utility may disconnect service on the date specified in the notice or within thirty (30) calendar days thereafter, during regular business hours, so long as the disconnection does not occur within the last two (2) hours of the business day, nor shall service be disconnected on a holiday, nor noon (12:00p.m.) on Fridays until Monday morning.

(d) Documentation of reason(s). The utility shall provide documentation to the consumer indicating the reason(s) that service is being withheld or disconnected.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95; Amended at 15 Ok Reg 2177, eff 7-1-98; Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-12. Utilities encouraged to keep current lists of energy assistance programs

(a) Compilation. The utilities are strongly encouraged to compile a list with the names, addresses, and phone numbers of known payment assistance programs, including information regarding any bilingual services offered, that are applicable to each service area within the utility's areas of operation. The list should include but is not limited to: local, state, federal, and tribal energy assistance programs and

public/private charitable organizations offering or known to offer energy payment assistance, which have given prior consent to their inclusion on this list. The utilities are encouraged to use due diligence in compiling this information and updating this information, with updates to occur on an annual basis. However, the Commission encourages the addition of new assistance programs to the list, as the information becomes available.

(b) **Availability.** The utility shall give a copy of this list to any consumer who asks for such assistance.

(c) **Liability.** The offer of any such list under this Section is meant as an informative resource only, for the utility to better assist its consumers. Failure of the consumer to gain funding in full or part, from any of the proffered resources under this Section shall not result in any liability to the utility.

[Source: Added at 19 Ok Reg 1977, eff 7-1-02; Amended at 31 Ok Reg 1067, eff 9-12-14]

165:45-11-13. Commission notification procedures for the elderly and/or consumers with disabilities

(a) At any time prior to disconnection of service, the notification procedure shall be available to those elderly and/or consumers with disabilities who have notified the utility that they wish to be included in the following notification procedure:

(1) For those who have registered with the utility as elderly and/or consumer with disabilities, the utility shall delay disconnection of service to the elderly and/or consumers with disabilities for five (5) additional business days upon request of the Commission's CSD.

(2) Elderly and/or consumers with disabilities are those consumers who have notified the utility in writing that they:

(A) Have a permanent impairment which substantially limits the disabled consumer's ability to pay for utility service; or

(B) Are sixty-five (65) years of age or older.

(b) The utility shall notify the consumer or other person responsible for the bill, during the initial application for service, annually thereafter, and at any time disconnection is imminent, of this additional notification procedure.

(c) The utility may require verification of the consumer's qualifications.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95; Amended at 19 Ok Reg 1977, eff 7-1-02; Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 31 Ok Reg 1067, eff 9-12-14; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-14. Delays to disconnection of residential service

(a) **Limitations on disconnection.** After notice and hearing, the Commission may issue an order that may include limitations on disconnection of residential utility service used or needed for the primary heating or cooling source.

(b) **Temporary ban on disconnections.** The Commission shall have the authority to order a temporary ban on any or all disconnections during periods of extremely severe weather or when circumstances exist such that disconnection could create a situation dangerous to the life or health of consumers or to property.

(c) **Severe weather.**

(1) If the NWS issues a local forecast predicting the temperature will drop below 32 degrees Fahrenheit for any time period during the following twenty-four (24) hours, the utility shall suspend its disconnection of service if the gas service is used for heating purposes. The utility must obtain the most recent local forecast for the customer's location from the NWS reports between the hours of 6:00 a.m. and 8:00 a.m. on the morning of the day that the customer's shut-off is scheduled. If the NWS issues an updated forecast

on the day of disconnection, then such updated forecast shall be used in place of the earlier obtained forecast.

(2) If the NWS issues a local forecast predicting the temperature will be 101 degrees Fahrenheit heat index or higher on the day of disconnection, or if the actual heat index is 101 degrees Fahrenheit or higher, the utility shall suspend its disconnection of service activity if the gas service is used for cooling purposes. The utility must obtain the most recent local forecast for the customer's location from the NWS reports between the hours of 6:00 a.m. and 8:00 a.m. on the morning of the day that the customer's shut-off is scheduled. If the NWS issues an updated forecast on the day of disconnection, then such updated forecast shall be used in place of the earlier obtained forecast.

(3) Nothing in this Section shall prohibit a utility from establishing a higher temperature threshold for residential heating purposes below which it will not discontinue utility service or from establishing a lower temperature threshold for residential cooling purposes above which it will not discontinue utility service.

(d) **Financial assistance delay.** When a residential consumer has applied for and is awaiting financial assistance, including social security income, from a federal, state, or local social service agency, and the utility has initiated written notice of disconnection, it shall delay disconnection of service for a period of at least twenty (20) calendar days from the date when such notice was either delivered or mailed to the premises where service is rendered, provided:

(1) The reason for disconnection is for nonpayment of the utility bill.

(2) The consumer has notified the utility that the consumer has applied for and is awaiting financial assistance.

(3) Verification from the involved agency is provided in a form as prescribed by the utility upon its request.

(4) If the expected financial assistance is less than the amount owed for services, the utility may require the consumer to enter into a deferred payment agreement as prescribed pursuant to (e) of this Section.

(5) Under no conditions is the utility required to furnish service to the consumer unless there is reasonable expectation of payment for such service except where other rules of this Commission apply.

(e) **Deferred payment agreement.** The utility shall be required to offer a deferred payment agreement before disconnecting service when a residential consumer is unable to pay an account in full. The utility shall not disconnect service for nonpayment of a bill if the consumer enters into a deferred payment agreement with the utility. The utility may mail or provide electronic notification to customers who make an affirmative election to receive electronic notification of such information a confirmation of the terms of the deferred payment agreement if it is made orally. A deferred payment agreement may be entered into by the consumer up to, but not including, the day of disconnection. Except where payment assistance for the total amount of the bill is pending, the utility may require a reasonable partial payment in accordance with paragraph (1) of this subsection, at the time the deferred payment agreement is made.

(1) Deferred payment agreement means a just and reasonable agreement offered by the utility and agreed to by the consumer which provides for the payment of all future bills during the period of agreement by the due date and the payment of the balance of any outstanding bills in reasonable installments based upon:

- (A) Consideration of the consumer's gross income.
- (B) Size of the delinquent account.
- (C) Consumer's ability to pay.
- (D) Consumer's payment history with the utility.
- (E) Length of time and reasons why the debt has not been paid.
- (F) Other extraordinary expenses of the consumer.
- (G) Loss of income through unemployment or illness.
- (H) Any other relevant factors concerning the circumstances of the consumer.

- (2) The payments under such an agreement need not be equal in size.
- (3) The consumer shall initiate renegotiation prior to breach of the deferred payment agreement if the consumer's financial conditions change, such as loss of income through unemployment or illness, or any other relevant factors concerning the circumstances of the consumer change during the payment period.
- (4) If a consumer fails to comply with the terms of the deferred payment agreement, the consumer will be subject to disconnection without further notice, so long as the disconnection period as provided in OAC 165:45-11-11(c) on the first and second notice has not been passed. If the disconnection period has passed, the utility shall provide at least twenty-four (24) hours notice of disconnection to the consumer.
- (5) Under no condition is the utility required to furnish service to the consumer unless there is a reasonable expectation of payment for such service except where other rules of the Commission apply.

(f) Life-threatening situation.

- (1) For purposes of this Section, a life-threatening situation is defined as one where the consumer or other permanent resident of the household is dependent upon equipment that is prescribed by a physician, operates on gas, and is needed to sustain the person's life. Examples of life-sustaining equipment would be: kidney dialysis machine, iron lung, oxygen concentrators and certain other oxygen machines, cardiac monitor, heating and air conditioning equipment, or any other equipment that is prescribed by a licensed medical doctor. The following are not considered to be life-sustaining equipment: hot water heater, refrigerator, and range/stove.
- (2) When a consumer to whom service is provided is unable to pay the account in full, the utility shall suspend disconnection of service, or reconnect if disconnected, if the consumer notifies the utility that disconnection of service will give rise to a life-threatening condition for the consumer or other permanent resident of the household should gas service be terminated, and within thirty (30) calendar days of the initial notification, the consumer shall return the Medical Certificate described in (3) of this subsection
- (3) The consumer shall use a Medical Certificate Form which verifies the existence of a life-threatening condition. This form is provided by the utility at no cost to the consumer. The form shall provide certification by a licensed medical doctor or osteopath. The consumer may choose the appropriate medical personnel. At a minimum the Medical Certificate Form provided by the utility shall contain, substantially, the information in the form as set forth in Appendix A to this Chapter. The service account name holder shall sign the Medical Certificate Form at the appropriate space, indicating knowledge that a permanent resident of the household is

applying for the life-threatening situation certificate and further acknowledging the responsibility for payment of bills rendered for gas service.

(4) Completion of (2) and (3) of this subsection will suspend disconnection of gas service to the specified residence for a period of thirty (30) calendar days from the initial notification. This 30-day period allows the consumer to pay the account in full or enter into a deferred payment agreement with the utility and/or make alternative arrangements for the person(s) named on the certified form as having the life-threatening condition. After thirty (30) calendar days, normal collection action will resume. The 30-day period may be extended by the utility at the request of the service account name holder for one (1) additional contiguous 30-day period, but only if necessitated by the life-threatening condition (as indicated on the Medical Certificate Form). The request for the additional 30-day extension must be made before the end of the initial 30-day period. The utility is not required to furnish service to the customer beyond a total of sixty (60) calendar days for the life-threatening condition without full payment of the account or acceptable payment arrangements on any unpaid balance.

(5) Verification of the medical condition of the consumer by the utility may include the following:

(A) Utility personnel may visit the consumer's residence with the consumer's permission to verify that life-sustaining equipment is being used.

(B) Utility personnel may verify the doctor's signature and clarify the medical terms of the diagnosis which is the reason for the life-threatening certificate.

(6) This collection abeyance in no way absolves the consumer from full responsibility for the payment in full of the utility services rendered, and is intended for the purpose of providing the consumer an opportunity to maintain utility service during the life-threatening situation within the prescribed time frames.

(7) Failure of the service account name holder to fully comply with this subsection may result in denial of life-threatening status and renewed collection activities of the utility, to include termination of service to said residence.

(8) Any consumer who uses this subsection to avoid disconnection or for reconnection of service and does not fulfill the required documentation will be subject to disconnection.

(9) A consumer is not prohibited from claiming a life-threatening situation once full payment of the account balance from a previous life-threatening claim is made and a valid Medical Certificate Form signed by a licensed medical doctor has been received by the utility.

(g) **False information.** If a consumer provides false or misleading information to the utility in order to avail the consumer of the provisions applicable to the financial assistance delay, deferred payment agreement, life-threatening situation or Commission notification procedure for elderly and/or consumers with disabilities, the false information shall be grounds for disconnection of service by the utility. The utility may disconnect service upon the utility providing notice to the customer in accordance with OAC 165:45-11-16(a).

(h) **Consumer liability.** Reconnection or continuance of service under this Section shall not in any way relieve the consumer of the consumer's liability incurred for

utility service.

165:45-11-15. [RESERVED]

165:45-11-16. Notice of disconnection of service

(a) **Twenty-four hour notice.** Except as provided in subsections (b), (c) and (f) of this Section, OAC 165:45-11-14(e) and OAC 165:45-11-18, service shall be disconnected only after at least twenty-four (24) hours written notice has been given to the consumer by leaving a copy of such notice with the consumer or by leaving a copy of such notice in a conspicuous place at the premises where service is provided. This notice shall be in writing, in bolded lettering, and state the reason for the disconnection, the amount due, if applicable, and the utility company's name, telephone number, and contact information. After the utility company's contact information, the notice shall include the telephone number of CSD in a printed size smaller than the print size used for the utility company's contact information, not bolded, and shall include the following statement: "For clarification of statutes and rules governing services, or escalations of disputes, you may contact the Oklahoma Corporation Commission's Consumer Services Division." The utility shall submit a copy of the notice to PUD for approval prior to usage.

(b) **First residential notice.** When service to a residential consumer is to be disconnected for nonpayment of a bill for utility service or failure to make a security deposit after a reasonable time, the utility company shall give at least ten (10) days written notice from the date of mailing to the consumer. Said written notice shall be sent by first-class mail, address correction requested, by the utility company to the consumer's billing address, unless the mail is returned from that address as undeliverable, in which case the notice may be delivered to the premises at which the service was rendered.

(1) Notice will be deemed delivered to the consumer three (3) business days after mailing by the utility company, which shall not extend the ten (10) days written notice from the date of mailing to the consumer requirement above.

(2) A notice of disconnection shall contain the following information:

(A) The words "DISCONNECTION NOTICE" or "CUT OFF NOTICE" in bold print no smaller than one-half inch (½") tall.

(B) The name and address of the consumer.

(C) A statement of the reason for the proposed disconnection of service.

(D) The date on or after which service will be disconnected unless appropriate action is taken.

(E) The telephone number in bold print of the utility company where the consumer may make an inquiry.

(F) The approved charges for reconnection.

(G) A statement that the consumer must contact the utility company regarding the disconnection, prior to contacting the Commission's CSD, and should contact CSD if they cannot reach a resolution with the utility.

(H) The address and telephone number of the Commission's CSD, in print size which is smaller than the print size used for the utility company's telephone number.

(I) A statement that advises the consumer of the availability of a deferred payment agreement.

(J) A statement that advises the consumer of the elderly/consumer with disabilities notification.

(K) A statement that advises the consumer of the life-threatening certificate.

(L) A statement that advises the consumer of the availability of the 20-day financial aid assistance delay.

(M) A statement that advises the consumer of the availability of a list of agencies providing assistance to consumers for their utility bills as identified by OAC 165:45-11-12.

(N) A statement that advises the consumer, that a list of pay agents is available upon request.

(3) The utility company shall notify the consumers in writing, at least annually, of the availability of and the method of accessing the name and address of the authorized payment agencies, other than the utility company's offices, where consumers may make payments.

(c) **Second residential notice.** During the time period of November 15 through April 15, the utility shall give a minimum of forty-eight (48) hours notice (at least two (2) business days) prior to disconnection of residential service that service will be disconnected unless the consumer enters into a deferred payment agreement as prescribed in OAC 165:45-11-14(e) or unless disconnection of service would create a life-threatening situation for the consumer or other permanent resident of the premises where the utility service is rendered. If the utility elects to give oral notice, it shall only be after it has complied with (b) of this Section. The second notice may be in writing, in person or by telephone.

(1) If the second residential notice is in writing, it shall be entitled "CUT OFF NOTICE" in bold letters of not less than one-half inch (½") in height and shall contain, in nontechnical language, the following information:

(A) The reason for service disconnection and the amount of the unpaid bills, if any.

(B) The date on or after which service will be disconnected unless the consumer takes appropriate action.

(C) The telephone number of the utility office, in bold print, where a consumer may call for assistance, make inquiries, enter into a deferred payment agreement, obtain information on utility assistance programs, pay the bill or notify the utility of a life-threatening situation.

(D) The telephone number of the Commission's CSD in print size which is smaller than the print size used for the utility's telephone number.

(2) The utility company shall keep a written log of all oral communication with at least the following information when contact has been made:

(A) Date and time of call or personal visit and identity of utility company representative.

(B) Name of the individual and relationship to the account. If the contact is made with a designated representative for the consumer, then a statement of authority to represent the account should be

included.

(C) Nature of the call and telephone number called.

(D) A narrative of the communication between the utility and the consumer.

(E) A statement that the consumer must notify the utility company on the day of payment, as to the place and method of such payment, when the bill is paid at a place other than the office of the utility company.

(F) A statement that the consumer was advised of the telephone number of the Commission's CSD.

(3) The oral communications log shall be maintained and retained in accordance with the record keeping requirements contained in this Chapter.

(4) A copy of the oral communications log shall be provided to the Commission or to the consumer and/or their designated representative upon oral or written request.

(5) Oral communications with the consumer shall not begin before 8:00 a.m. or continue beyond 9:00 p.m. during normal business days.

(6) Oral communications shall be deemed as not to have occurred, including but not limited to the following circumstances:

(A) When there is no answer, the telephone line is busy or no one is home.

(B) When a message is left on an answering device or made on a recording device.

(C) When the message or attempted message is left with an individual having a physical and/or mental impairment that impedes communication or mutual understanding.

(D) When the communication is with a minor under the age of eighteen (18), unless the minor is the consumer or the spouse of the consumer.

(E) When the communication is with an individual who is not either the consumer or the designated representative of the consumer.

(F) When the communication is with a consumer or consumer's designated representative whose primary language is other than English and the consumer or consumer's designated representative has a language barrier, unless the communication is made in the primary language of the consumer or consumer's designated representative.

(7) Unless otherwise directed by the CSD, the utility company shall not contact the consumer regarding the consumer's account after the Commission has notified the utility company of a complaint or inquiry from the consumer. The Commission shall be the intermediary between the utility and the consumer until the resolution of the problem has been completed.

(8) Notice will be deemed delivered to the consumer three (3) business days after mailing by the utility company, which shall not extend the two (2) days written notice from the date of mailing to the consumer requirement above.

(d) **Third party notice.** A utility shall permit residential consumers to designate a consenting individual or agency to receive the applicable notice of disconnection.

(e) **Tenant notice.** Where a master metered apartment complex, building, or trailer court is subject to disconnection, the written notice to the consumer shall also be

posted in a common area of the premises at least ten (10) days prior to disconnection of service. The utility may contract with tenants for residential service.

(f) **Commercial or business notice.** Nonresidential service shall be disconnected for nonpayment of all or any portion of an undisputed utility bill only after at least five (5) business days written notice has been mailed to the consumer by the utility or after the notice is left in a conspicuous place at the premises where service is provided.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95; Amended at 19 Ok Reg 1977, eff 7-1-02; Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-17. Manner of disconnection of service

When service is disconnected at the premises of the consumer:

- (1) Receipt of a subsequently dishonored negotiable instrument in response to a notice of disconnection shall not constitute payment of the consumer's account, and after the consumer is notified of such, the utility shall allow one (1) business day for the consumer to make payment at the utility company or its authorized agent(s) in cash, cashier's check, money order, or a check from a social service agency.
- (2) The utility employee shall leave a written statement at the premises that service has been disconnected, the reason for the disconnection, and the telephone number and/or address where the consumer may arrange to have the service reconnected.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95; Amended at 19 Ok Reg 1977, eff 7-1-02; Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-18. Exceptions to Section regarding discontinuance of service

Notwithstanding any other Section regarding disconnection of service, a utility may at any time disconnect service without notice and without delaying disconnection of service as prescribed in other Sections of this Part, if:

- (1) It reasonably believes that such action is necessary to correct a condition that poses a health or safety hazard to the consumer, the general public, or the equipment of the utility. Prior to or immediately upon disconnection of service, the utility shall make a good faith effort to notify the consumer of the reason for disconnection either by telephone, electronic notification to customers who make an affirmative election to receive electronic notification of such information, personal contact, or notice left at the premises.
- (2) For the purpose of essential repair, maintenance, or testing of utility equipment, the utility shall make such efforts as are reasonable under the circumstances to minimize the adverse effects of disconnection of service and to inform affected consumers prior to disconnection of service.
- (3) The utility may disconnect for unauthorized use of gas accomplished through bypassing of the utility's measuring equipment or tampering with pipes, meters, or any other utility equipment or obtaining service without a contract. Prior to or immediately upon disconnection of service, the utility shall make a good faith effort to notify the consumer of the reason for disconnection either by telephone, electronic notification to customers who make an affirmative election to receive electronic notification of such information, personal contact, or notice left at the premises. If service is disconnected under this paragraph, the utility may require the consumer to

pay the following applicable charges before service is restored:

- (A) The applicable charges for reconnecting service prescribed in the utility's approved tariffs.
- (B) The amount due for unmetered or unpaid usage, when such usage can be determined exactly. If the exact usage cannot be determined, the utility may compute the charge for the estimated usage based on historical usage from the date the consumer became an occupant or user or began unauthorized use.
- (C) The cost associated with the disconnection, testing, repair, or replacement of any damaged equipment.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95; Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 31 Ok Reg 1067, eff 9-12-14]

165:45-11-19. Reconnection of service

(a) The utility shall give priority to reconnection of service when disconnection was the fault of the utility.

(b) When disconnection of service was the fault of the consumer, the utility shall reconnect service in the normal course of its reconnection workload, as soon as possible, but no later than two (2) business days, not to exceed three (3) calendar days after the consumer eliminates the reason for disconnection and requests reconnection, except as provided for in subsection c of this Section. If the reason for disconnection is unauthorized use of gas accomplished through bypassing the utility's measuring equipment or tampering with the pipes, meters, or other utility equipment, the utility may, prior to reconnecting service, require a reasonable payment for estimated service rendered or may refuse to reconnect service until ordered by the Commission. A utility may require payment of a reconnection charge when disconnection of service was the fault of the consumer, if such a charge is provided in the utility's tariffs.

(c) During the time period of November 15 through April 15, the utility shall reconnect service in the normal course of reconnection workload, as soon as possible, but no later than forty-eight hours; however, if disconnection for nonpayment of service has occurred immediately preceding periods of severe weather pursuant to OAC 165:45-11-14(c), the utility shall reconnect service as soon as possible but no later than twenty-four (24) hours, while the consumer or the consumer's representative is present, subject to an intervening Act of God, upon receipt of one of the following:

- (1) Payment of the past due bill for which service was disconnected; or
- (2) Submission of a Life-threatening Certificate from the consumer as described in OAC 165:45-11-14.
- (3) Guarantee by a federal, state, or local social service agency that payment will be made directly to the utility.

(d) Reconnection or continuance of service under this Section shall not in any way relieve the consumer of their liability incurred for utility service.

(e) The consumer of record or their representative must be present in order for service to be restored. If the consumer or their representative fails to be present for service to be restored through no fault of the utility, the return trip may be scheduled in accordance with subsection b and c of this Section.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95; Amended at 19 Ok Reg 1977, eff 7-1-02; Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-20. Mediation

(a) Whenever there is a dispute between the utility and the consumer as to any of the following, the matter may be brought by either party to the Commission's CSD:

- (1) The existence of or seriousness of a life-threatening situation.
- (2) The existence of elderly or handicapped status.
- (3) The question of financial assistance or guarantee of payment by a federal, state or local social service agency.
- (4) The provisions of a deferred payment agreement.
- (5) The terms and conditions of payment of any part of a bill as rendered.
- (6) The proper interpretation of this Section.
- (7) Other issues addressed in this Chapter.

(b) The Commission's CSD shall review the matter and issue an informal review decision in writing setting forth the terms and conditions for continued service, disconnection of service, or deferred payment plan agreement. If it is the desire of the consumer, the consumer may be represented by a third party, if the consumer is available for verification. If the dispute can be resolved by telephone with the party seeking review, the review decision need not be in writing unless requested by either party. During any period of time when a disconnection dispute is before the Commission or in mediation, the utility shall suspend disconnection procedures.

(c) If the Commission's CSD is unable to resolve the dispute to the mutual satisfaction of the parties, either party may file a complaint with the Commission for final determination.

(d) Whenever the consumer informs the utility that the consumer disputes a charge for service, the utility shall investigate the dispute promptly and thoroughly, and make a diligent effort to reach a mutually satisfactory settlement. If the consumer is dissatisfied with the decision of the utility, the consumer may report the dispute to the Commission's CSD. Upon complaint by the consumer to the Commission, disconnection of service shall be held in abeyance, for as long as a resolution of the complaint is pending at the Commission, provided the consumer pays the portion of the bill which is not in dispute.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95; Amended at 15 Ok Reg 2177, eff 7-1-98; Amended at 23 Ok Reg 1677, eff 7-1-06; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-21. Commission review

The utility's disconnect notice, service violation disconnection notice, life-threatening certificate, and any notice or form used by the utility to comply with the requirements of this Part shall be submitted to the Commission for approval. Upon approval, the forms or notice shall become a part of the utility's approved tariff.

[Source: Amended at 12 Ok Reg 2129, eff 7-1-95]

PART 5. CHARACTER OF SERVICE

165:45-11-30. Service to irrigation consumers

(a) Irrigation consumers are to be served pursuant to tariffs on file for irrigation consumers.

(b) Irrigation consumers being served under special contracts, which are on file with this Commission, shall continue to be served under such contracts.

(c) The utility may adopt a policy for extensions to be made for the purpose of serving irrigation wells and for deposits for payment of all or part of the cost thereof by the consumer, which policy shall be prescribed in its approved tariffs.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-11-31. Temporary service

(a) A consumer requiring temporary service shall pay the regular rates applicable to the class or classes of service rendered for all energy used. In addition, the consumer shall pay the installation and removal cost, less salvage value, of facilities installed by the utility to furnish temporary service to the consumer. The utility may require a deposit of such cost in advance.

(b) "Temporary service" is defined as service for purposes which, by their very nature, indicate short duration, and shall not exceed ninety (90) calendar days without notification and justification being provided to CSD prior to the expiration of the ninety (90) calendar day period.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-32. Service to mobile homes and mobile home parks

(a) No utility shall be required to furnish gas service to a mobile home park until the utility has been furnished, at no cost to the utility, the necessary easements. Such easements may terminate when the property ceases to be used as a mobile home park if the utility no longer needs the easement to maintain service to other consumers adjacent to or beyond the park.

(b) A mobile home shall be served by an individual meter under the same terms as a single residence. Service to mobile home parks existing on or before the effective date of this Chapter may continue to be provided with a single or multiple meter.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-11-33. Service from other than distribution system

(a) When a consumer desires natural gas service from a production, gathering or transmission line which is not a part of the distribution system, the utility may, at its sole discretion, make a tap on the line and furnish the consumer with natural gas service under the applicable rate schedule approved by the Commission for the type of service rendered or, if there is no such rate schedule, pursuant to a Special Contract approved by the Commission. When necessary for operational efficiencies or safety reasons, the utility may discontinue or abandon service to the nondistribution system consumer or remove, abandon or relocate the pipeline from which the nondistribution system consumer is furnished natural gas service, upon thirty (30) calendar days written notice to the consumer at the consumer's last known address. If the pipeline is owned and operated by a company that also has a gas distribution system, the pipeline will be considered part of the distribution system if, for a period of three (3) years, the volume of gas sold off the pipeline is equal to or more than fifty percent (50%) of the gas transported by the pipeline. The utility may seek a waiver of an impending recharacterization before or after the three (3) year period if the pipeline leakage is minimal and the utility desires to continue to provide natural gas service from the pipeline.

(b) If a consumer requests service from a transmission line that is not owned by the utility and the company owning the line assesses a fee for making the tap, the consumer requesting the tap will be responsible for paying the fee.

(c) Unless otherwise ordered by the Commission, after notice and hearing, a utility shall not provide service from a production, gathering or transmission line unless the gas in the line is of a suitable quality and free of liquid hydrocarbons. When it has come to the attention of the utility that a temporary gas quality problem exists in a line, the utility shall be allowed a reasonable time in which to correct the

problem. This subsection shall not apply to existing consumers receiving service. (d) Under this Section, a private line served from other than a distribution system will not be considered to be a distribution system, and private line customers on these systems will be considered as a single service under the master meter agreement for purposes of abandonment.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-34. Free service; service to consumer's appliances

(a) Each gas utility shall have on file with the Commission a detailed statement of all free service of any nature furnished or offered to any consumer or class of consumers. The utility shall offer the same free service to all consumers of the same class. The utility shall not discontinue, change or amend its policy, or offer any new free service or type of free service to any consumer or class of consumers except upon order of the Commission made upon application, and such notice and hearing as the Commission shall direct.

(b) A utility may, with approval of the Commission, service or repair gas appliances or gas piping owned by its consumers and make a charge for such service. The Commission, upon application of the utility and after notice and hearing, may grant the utility authority to service and repair all specified types of gas appliances or gas installations of consumers in the State of Oklahoma or in a specified town, city, or locality. Each utility shall maintain books and records with regard to service and repair of consumer appliances pursuant to 17 O.S. (1991) § 154. Any authority granted pursuant to this Section shall not supersede any federal, state, or local requirements for licensing of service providers.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-11-35. Change in character of service

(a) If a change in service to a consumer is required for the convenience or benefit of the utility, the utility shall pay such part of the cost of changing the consumer's equipment as determined by mutual agreement, or by the Commission in the absence of such an agreement, including the cost of making the necessary change in consumer piping. This subsection shall not apply to discontinuance of service because of abandonment of nondistribution piping.

(b) Each utility shall, upon request, give its consumers such information and assistance as is reasonable in order that consumers may secure safe and efficient service. Upon request, the utility shall render every reasonable assistance in securing appliances properly adapted and adjusted to the service furnished. This Section shall not be interpreted to authorize servicing or repair of appliances of a consumer by a utility.

(c) Any change in the heating value or the characteristics of the gas service which may impair safe operation or materially affect the utilization of the gas in the consumer's appliances shall not be made without the approval of the Commission and adequate notice to all consumers affected. In such event, the gas utility shall make any necessary adjustments to the consumer's appliances without charge and shall conduct the adjustment program with a minimum of inconvenience to the consumers.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

PART 7. BILLS

165:45-11-40. Office location and telephone listing

(a) Where economically feasible, each gas utility shall provide an office or agent in or convenient to each municipality served by it where the consumer may pay bills, which office or agency shall be open for business during posted business hours.

(b) The utility shall provide in each directory published by the telephone company in any areas the utility serves, a telephone listing of the number by which the utility can be notified at any time during a twenty-four (24) hour day of any utility service deficiency or emergency.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96]

165:45-11-41. Information on bills

The utility shall bill each consumer as promptly as possible following the reading of the consumer's meter. The bill shall show:

- (1) The reading of the meter at the end of the period for which the bill is rendered.
- (2) The date on which the meter was read, or the end of the billing period.
- (3) The number and kind of units metered.
- (4) The applicable rate schedule or identification of the applicable rate schedule. If the actual rates are not shown, the bill shall carry a statement to the effect that the applicable rate schedule will be furnished upon request.
- (5) The total amount due for gas used. In the case of prepayment meters, the amount of money collected shall be shown.
- (6) The date by which the consumer must pay the bill in order to avoid addition of a penalty.
- (7) The total amount due after addition of any penalty for nonpayment within a designated period or the dollar amount of the penalty or the rate at which the penalty will be calculated. The terms "gross bill" and "net bill" or other similar terms implying the granting of a discount for prompt payment shall not be used where a penalty is added for nonpayment within a designated period.
- (8) A distinct marking to identify an estimated bill.
- (9) Any conversions from meter reading units to billing units, any calculations to determine billing units from recording or other devices, or any other factors used in determining the bill.
- (10) Total tax amount billed, pursuant to OAC 165:45-15-3.
- (11) The purchased gas adjustment ("PGA") amounts associated with the respective clauses on the consumer's bill.
- (12) The amount due pursuant to an Equalized (Average, Budget, Equal, Levelized, etc.) Monthly Payment Plan shall be shown on the bill, when applicable.
- (13) Utilities that serve one-hundred fifty-thousand Oklahoma Customers or more; the historical usage, e.g., a chart, table or graph, shall be displayed prominently on each bill, depicting the actual usage of the residential customer, at the place of service for which the bill is issued. Such historical usage shall be tracked and displayed over the previous twelve (12) month period.
- (14) Utilities that serve less than one hundred fifty thousand Oklahoma Customers shall provide, in a conspicuous manner, notice on each residential customer bill that historical usage information is available at no charge, upon the consumer's request.

(15) The name and toll-free telephone number of the Commission's CSD, to which the end-user may direct complaints and questions regarding utility services.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 19 Ok Reg 1977, eff 7-1-02; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-11-42. Penalty or charge for late payment and payment by negotiable instrument

(a) **Late payment penalty.** A utility may make a penalty charge in an amount not to exceed one and one-half percent of the charges for gas service for delay in receipt of payment by the utility past the due date of the bill. If a utility, prior to the effective date of the 1996 amendments to this Section, is charging a penalty in excess of one and one-half percent of the charges for gas service, such utility will be allowed to continue to collect the previously approved percentage until such time as its rates are next reviewed by the Commission. The due date shall be stated on the face of the bill and shall not be earlier than ten (10) calendar days after the bill was mailed or provided electronically to customers who had made an affirmative election to receive electronic notification of such information, except that for residential consumers, the due date shall not be earlier than twenty (20) calendar days after the bill is mailed, or provided electronically to customers who had made an affirmative election to receive electronic notification of such information. If no late charge is imposed, the due date of a bill shall not be less than fourteen (14) calendar days after the date a bill is mailed. The late payment penalty may be applied at any time after the due date to any unpaid balance due at the time of assessment.

(b) **Delay of monthly bill.** Utilities offering billing programs that delay issuing the monthly bill (i.e., summary billing, preferred due date billing, etc.) may request an earlier due date.

(c) **Payment by negotiable instrument.** The utility shall not refuse to accept payment by check from any consumer unless the utility has, within the preceding twelve (12) months, received as tendered payment of the consumer's account two (2) or more negotiable instruments which were dishonored by the financial institution on which they were drawn. If payment by a negotiable instrument is given in response to a disconnect notice, the utility may contact the financial institution involved for verification of sufficient funds in the account to cover the negotiable instrument. If the account does not contain sufficient funds for payment, the utility may reject the offered negotiable instrument. The utility may make a charge outlined in its tariffs for negotiable instruments which are dishonored.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 31 Ok Reg 1067, eff 9-12-14]

165:45-11-43. Equalized Monthly Payment Plan (EMP)

(a) Each utility shall offer to its residential consumers the option of being billed on an Equalized (Average, Budget, Equal, Levelized, etc.) Monthly Payment Plan. Each utility's plan shall be submitted to the Commission for approval and shall then become a part of that utility's approved tariffs.

(b) At least once a year, and consistent with OAC 165:45-11-4(b) above, the utility shall give written notice to its residential consumers of the availability of an Equalized Monthly Payment Plan.

[Source: Added at 13 Ok Reg 3259, eff 7-25-96; Amended at 19 Ok Reg 1977, eff 7-1-02]

SUBCHAPTER 13. PROMOTIONAL POLICIES AND PRACTICES

165:45-13-1. Provisions governing promotional policies and practices

The promotional policies and practices of each utility shall be governed by 17 O.S. (1991) §§180.1 et seq., and future amendments or supplements thereto.

[Source: Revoked at 13 Ok Reg 3259, eff 7-25-96]

165:45-13-7. Submission of promotional practices

The utility shall submit an annual submission of current promotional practices by May 1, and as programs are updated, to PUD. The report shall include a list and description of all promotional practices and activities. Although submission by the utility shall not assume approval by PUD, it will allow PUD and the utility to review and dialogue as to the appropriateness of the promotional practices, whether or not the expenses should be recovered through rates, and ensure that the promotional practices are provided on a nondiscriminatory basis.

SUBCHAPTER 15. MISCELLANEOUS PROVISIONS

165:45-15-1. Resale of gas prohibited

(a) Gas and/or service furnished by a utility shall not be resold or caused to be resold by any consumer except pursuant to a tariff or special contract on file with and approved by the Commission which authorizes resale. Except as set forth in subsection b below, no utility shall knowingly furnish gas and/or service under a retail tariff for purposes of resale, except pursuant to a tariff or special contract approved by and on file with the Commission.

(b) If it comes to the attention of the utility that any consumer is reselling gas, it shall notify the Commission's Pipeline Safety Department and the PUD Director of the name and address of any consumer reselling gas and/or service. Unless

otherwise directed, the utility may continue to provide gas and/or service to the consumer pending review and action by the Commission's Pipeline Safety Department or the PUD Director. This Section shall not apply to the sales of natural gas to or by a distributor for use as a vehicular fuel.

[Source: Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 22 Ok Reg 1808, eff 7-1-05; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-15-2. Filing of rate schedules, contracts, agreements, and terms and conditions

(a) It shall be unlawful for a utility to furnish, charge for, or receive payment for gas service, except as authorized by a tariff, special contract or rate schedule on file with and approved by the Commission.

(b) No jurisdictional tariff or rate schedule shall be added, deleted, changed, closed, discontinued, or instituted except by order of the Commission after such notice and hearing, if any, as directed by the Commission or otherwise pursuant to the laws of the state of Oklahoma.

(c) Annual tariff submissions submitted for review and approval by the PUD Director, pursuant to prior Commission order, may be accepted or rejected. If there is a dispute and resolution is not accomplished, the tariff shall be subject to refund as of the date of notice of filing of a cause before the Commission to resolve the dispute.

(d) A utility shall not demand or accept payment for service of any kind of a sum greater or less than specified in an approved tariff.

(e) A special contract or agreement other than a filed tariff under which gas service is furnished to one (1) or more consumers shall be deemed a tariff for purposes of this Section. No service shall be furnished pursuant to such a contract which has not been filed with and approved by the Commission. Any special contract for gas service shall not become effective except after approval by order of the Commission as herein provided for a tariff.

(f) The utility shall maintain in each local office or furnish to a member of the public on request:

(1) A copy of every tariff and rate schedule under which gas service is being furnished to consumers within the area serviced by that local office.

(2) A copy of the approved terms and conditions of service of the utility governing furnishing of gas service.

(3) A copy of this Chapter, and all amendments thereto.

(4) A copy of every franchise, agreement, or permit granted a utility by any municipality and a copy of each rate schedule and contract approved by the FERC applicable to sales by the utility in the State of Oklahoma.

(g) An agency for collection of utility bills, not operated by utility company employees, shall not be deemed a local office for purposes of this Chapter.

[Source: Amended at 10 Ok Reg 2645, eff 6-25-93; Amended at 13 Ok Reg 3259, eff 7-25-96; Amended at 15 Ok Reg 2177, eff 7-1-98; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-15-3. Municipal fees, taxes, and other exactions

The aggregate amount of all franchise payments, or contributions or payments in lieu thereof, or other exactions imposed upon gas utilities by any municipality of this state for engaging in business within the municipality, or for the use and occupancy of its streets and public ways is a matter between the municipality and the gas utility. The amount of the exactions charged to and collected from the consumers by the utility shall be in accordance with the

respective municipal ordinance or statute. The amount of such exactions shall be charged to consumers within said municipality pro rata in accordance with actual revenue associated with the provided service. The amount of such charges shall be separately stated as a line item on the regular billings to consumers as a dollar amount.

[Source: Amended at 14 Ok Reg 2561, eff 7-1-97; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-15-4. Settlement of disputes

Whenever a dispute or disagreement arises involving the furnishing of utility service or the interpretation of this Chapter, either the utility or any person affected may request the Commission's CSD to mediate the dispute, or file a written application or complaint with the Commission. The Commission, after notice and hearing, will make such order thereon as it may deem proper. Proceedings upon such an application or complaint will be governed by the provisions of OAC 165:5.

SUBCHAPTER 17. COMPETITIVE BIDDING AND AFFILIATE TRANSACTION RULES FOR THE PROVISION OF NATURAL GAS SERVICES OF GAS SUPPLY, GATHERING, TRANSMISSION AND STORAGE OF NATURAL GAS UTILITIES UPSTREAM OF THE CITYGATE

165:45-17-1. Purpose of this Subchapter

(a) The purpose of Subchapter 17 is to establish a fair and reasonable process, wherein, the natural gas utility service industry can be restructured in such a manner that will be in the best public interest of all natural gas consumers, and that would complement and improve the state's economic growth by increasing its market base for Oklahoma's greatest natural resource, natural gas. To accomplish this two-fold objective, Subchapter 17 provides for the unbundling of the currently bundled services of gas supply, transmission, storage and gathering upstream of the citygate by the utility, and further provides that these services be competitively bid by entities desiring to participate in a competitive market. Accordingly, the Commission believes that a competitive bidding process is among the most effective means to achieve these objectives. Therefore, it is the policy determination of the Commission that competitive bidding and an unbundling process be utilized by natural gas utilities, and further, the Commission expects Oklahoma gas utilities to comply with this policy determination of the Commission.

(b) It is not the intent of Subchapter 17 to be applicable to downstream unbundling or competition.

(c) Since it is recognized that competitive bidding is not the only means to acquire and receive reliable and least cost natural gas services, this Subchapter also allows for other processes to be proposed by the utility for Commission consideration to acquire and receive those services. A utility seeking to propose processes other than competitive bidding must notify and obtain Commission approval, after notice and hearing, within thirty (30) calendar days prior to implementation of those processes in nonemergency situations. In emergency situations, the utility must notify the Commission within thirty (30) calendar days following implementation.

(d) Failure to utilize competitive bidding to obtain the natural gas services of gas supply, gathering, transmission and storage at the least cost, shall subject the utility to a prudency review, as defined in OAC 165:45-1-2, by the Commission.

Subsequent to this review, after notice and hearing, the Commission shall make a determination as it deems necessary and proper, including, but not limited to, disallowance of recovery of the difference between the market price and the price at which the natural gas services were purchased.

(e) It is the intent of the Commission to create a fair and nondiscriminatory competitive market for natural gas services. It should not be construed that this Subchapter absolves or relieves any utility, competitive bidder, or downstream marketer or provider from any duty prescribed by the laws of the State of Oklahoma or the United States including, but not limited to, any state or federal law regarding contractual rights and obligations, antitrust enforcement or liability, or laws against improper restraint on trade or "takings" of property.

(f) This Subchapter also establishes reasonable standards of conduct for transactions between the natural gas utilities and their affiliates conducting business on the utility-owned transmission pipeline within the State of Oklahoma, and for competitive bidders.

(g) To ensure that the public interest is best served by the restructuring of the natural gas industry, the Commission may implement a consumer education program of its own design. The Commission may seek assistance of those parties directly or indirectly involved in the retail sale of natural gas.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-17-2. Scope of Subchapter

(a) The competitive bidding, affiliate transactions and financial transactions rules (such as stock, bond, derivatives, and any financing instrument issuance) are promulgated to establish enforcement, reporting and monitoring provisions of utilities regarding these transactions.

(b) The intention of this Subchapter includes [but is not limited to]:

- (1) The establishment of standards for transactions between utilities and their affiliates for purposes of determining fair, just and reasonable rates and charges;
- (2) The prevention of subsidization of an affiliate by a utility;
- (3) The support of fair and clear cost allocations; and
- (4) The protection of customers of a utility from being subjected to any unreasonable financial obligations or costs of an affiliate.

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98; Added at 21 Ok Reg 2095, eff 7-1-04]

165:45-17-3. Application of Subchapter

(a) This Subchapter is applicable to all natural gas utilities operating within the State of Oklahoma.

(b) All services rendered by natural gas utilities shall remain subject to Commission rate regulation pursuant to this Subchapter until or unless the Commission, after notice and hearing, makes an affirmative determination that rate regulation as to a customer, citygate, or aggregation point of natural gas service at a particular location is no longer required and further makes a finding that effective competition exists upstream of each citygate for each individual service. Accordingly, there shall be no presumption of effective competition upstream of any citygate for any service prior to a Commission order reflecting the same.

- (c) To the extent that any entity seeks to competitively bid to provide the natural gas services of gas supply, gathering, transmission and storage to natural gas utilities upstream of the citygate, the Commission shall impose reasonable standards of conduct to establish and preserve a fair competitive bid process.
- (d) **Required Information.** Upon request by the Commission, affiliate information shall be provided pursuant to this Subchapter and shall contain records and work papers which provide, at a minimum, the following information and such other information that the Commission shall request:
- (1) Consolidated Companies and Subsidiaries Balance Sheet.
 - (2) Income Statements.
 - (3) Cost Allocation Basis, if applicable.
 - (4) Affiliate/Subsidiary General Data: Narrative(s) providing:
 - (A) The date of establishment of each affiliate and/or subsidiary;
 - (B) A statement of each affiliate and/or subsidiary's core businesses;
 - (C) The utility company resources used in establishment of each affiliate and/or subsidiary; and
 - (D) The utility company resources currently being used by each affiliate and/or subsidiary, either directly or indirectly.
 - (5) Affiliate/Subsidiary Contracts: Copies of any and all contracts with affiliates and/or subsidiaries.
 - (6) Assets Sold/Transferred to Affiliates/Subsidiaries: A listing, by asset category and net book value, of assets sold or transferred to any affiliate and/or subsidiary since the utility's last rate case.
 - (7) Services/Products from Affiliates/Subsidiaries: A listing and description of the services and/or products (and related costs) provided by each affiliated and/or subsidiary company to the utility for the required period.
 - (8) Services/Products to Affiliates/Subsidiaries: A listing of any significant utility company facilities and/or resources, whether plant, other assets or personnel that were used during the required period, by each affiliate and/or subsidiary. The cost of the resources shall be indicated.
 - (9) Cost of Debt or Financing: A listing of debt instruments bearing any cost of financing transactions, in part or in full, or any debt, equity, trading activity, or derivative which has a direct or indirect financial or cost impact upon the utility.

165:45-17-4. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-5. Confidential information

- (a) If a utility or any entity that seeks to competitively bid to provide the natural gas services of gas supply, gathering, transmission and storage upstream of the citygate, is required by this Subchapter to submit information to the Commission that is alleged to be confidential, a motion for a protective order concerning said confidential information may be filed requesting a determination be made by the Commission to protect said information pursuant to 51 O.S. § 24A.22.
- (b) A bid which is determined to be a successful bid, pursuant to the competitive bidding process of OAC 165:45-17-13, must be publicly disclosed and shall not be subject to the confidentiality provisions of this Subchapter, unless otherwise ordered by the Commission.

(c) Pending a determination regarding approval of any protective order by the Commission, the Staff may, at its option, review the information claimed to be confidential at a mutually agreed upon location.

(d) In the absence of a protective order, all information considered by the Commission in establishing utility unbundled tariffs shall not be maintained in confidence by the Commission.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-6. Exemption for corporate and shared services

Corporate and support services are exempt from asymmetrical pricing, to the extent that the affiliate information requirements in Chapter 70 and 165:45-17-3 (d) are satisfied.

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98; Added at 21 Ok Reg 2095, eff 7-1-04]

165:45-17-7. Unbundling of natural gas services of gas supply, gathering, transmission and storage of all natural gas utilities upstream of citygates and proposed aggregation points

(a) To establish a fair and reasonable process, wherein, the natural gas service industry can be restructured in such a manner that will be in the best public interest of all natural gas consumers, and that would complement and improve the state's economic growth by increasing its market base for natural gas and to effectuate the policy of the Commission that a competitive bidding process is among the most effective means to achieve these objectives, the natural gas services of gas supply, gathering, transmission and storage of all natural gas utilities shall be unbundled upstream of the citygate or proposed aggregation points. Any entity, including an intrastate pipeline, an interstate pipeline, a utility owned transmission pipeline and, where applicable, any marketer, gas producer or natural gas aggregator, may seek to competitively bid to provide these natural gas services. Gas supply, gathering, transmission and storage of all natural gas utilities upstream of the citygate shall be provided and priced on a separate and individual basis. All customers of a gas utility located upstream of a citygate and/or proposed aggregation point shall have the opportunity to purchase these services on an unbundled basis. Any customer which is subject to an existing pipeline tariff agreement or other tariff agreement shall not have the opportunity to purchase these services on an unbundled basis until the expiration or termination of such tariff agreement except upon order of the Commission. The Commission shall consider an application to modify any tariff agreement upon good cause shown as a result of the change in circumstances due to the restructuring of the natural gas service industry as reflected in this Subchapter, or for such other reason as the Commission may determine.

(b) Customers shall have the choice of what services to purchase and can pay for only the services which they need or desire:

(1) Each natural gas service offered on an unbundled basis by a gas utility shall be identified and provided under a separate tariff and available on a separate basis from other natural gas services offered by such utility.

(2) The rates to be charged by a gas utility for any unbundled natural gas service shall be based upon the cost of providing that service. In determining the costs of providing a specific unbundled service, no costs of providing any other natural gas service shall be charged or allocated to such specific unbundled service. These rates shall be system-wide rates by customer class or a sub-group of a customer class applicable to the particular unbundled service subject to subsection (a).

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-8. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-9. Unbundling of utility services and access

(a) An application shall be filed by gas utilities with the Commission proposing an unbundling plan for the natural gas services of gas supply, gathering, transmission and storage upstream of all citygates and proposed aggregation points and the appropriate cost allocation and rate design for each of the unbundled services, as classified in OAC 165:70, as follows:

(1) Class A natural gas utilities which provide natural gas services upstream of all citygates and proposed aggregation points shall file an application for an unbundling plan by April 1, 1998, with appropriate documentation including, but not limited to, maps and lists of facilities owned and unbundling of the natural gas services of gas supply, gathering, transmission and storage upstream of the citygate and the appropriate cost allocation and rate design for each of the unbundled services.

(2) Class A natural gas utilities which, at the time of the effective date of Subchapter 17, do not provide natural gas services, except gas supply, upstream of all citygates and proposed aggregation points, shall provide a letter to the PUD Director, within sixty (60) calendar days after the effective date of this Subchapter, stating the same with appropriate documentation, including but not limited to, maps and lists of facilities owned. After review, PUD will make a recommendation to the Commission regarding exempting the utility from the requirement to file an unbundling plan.

(3) Class A natural gas utilities which provide natural gas services upstream of all citygates and proposed aggregation points that have less than 25,000 customers may have an automatic waiver for one year or until April 1, 1999, whichever is the shorter time period, to file their respective unbundling plan. The utility seeking said automatic waiver shall contact the PUD Director of such intention within sixty (60) calendar days of the effective date of this Subchapter.

(4) Class B, C and D natural gas utilities which provide natural gas services upstream of all citygates and proposed aggregation points may have an automatic waiver for two years or until April 1, 2000, to file their respective unbundling plan. The utility seeking said automatic waiver shall contact the PUD Director of such intention within sixty (60) calendar days of the effective date of this Subchapter.

(5) Class B, C and D natural gas utilities which, at the time of the effective date of Subchapter 17, do not provide natural gas services, except gas supply, upstream of all citygates and proposed aggregation points, shall provide a letter to the PUD Director, within sixty (60) calendar days after the effective date of this Subchapter, stating the same with appropriate documentation, including but not limited to, maps and lists of facilities owned. After review, PUD will make a recommendation to the Commission regarding exempting the utility from the requirement to file an unbundling plan.

(6) Recognizing the unique situations of small utilities, those utilities serving one thousand (1000) customers or less, regardless of their

classification, may file an application requesting an alternative plan or process in lieu of an unbundling plan or may request a complete waiver of the unbundling provisions. The Commission may grant such requested relief if the applicant natural gas utility can establish one or more of the following:

- (A) The utility adequately shows that unbundling the natural gas services of gas supply, gathering, transmission and storage upstream of the citygate would create an unreasonable financial hardship for the utility;
- (B) The utility would be unable to solicit reasonable competitive bids;
- (C) The Commission finds it would not be in the best interest of public health and safety to require natural gas unbundling; or
- (D) For other good cause shown as determined by the Commission, after notice and hearing.

(b) **Informal collaborative process.** Prior to the filing of the unbundling plan, the Commission desires that an informal collaborative process and dialogue commence between each Class A utility and potential competitive bidders, including but not limited to, amounts and volumes needed or available, interconnection points, requests for bids, engineering and operational issues, metering, eminent domain, and any other information which can be reasonably discussed prior to approval of the unbundling plan. Any interested party may file a statement with the Commission, with a copy mailed to the utility and the Attorney General, giving its notice of intent to participate in the collaborative process set forth in this subsection.

(c) **Open access to intrastate pipelines.** Comparable nondiscriminatory open access by intrastate pipelines shall be required. Intrastate pipelines shall not take any action that imperils or impedes a competitive bidding process directly or indirectly.

(d) **Access by the utility.** All natural gas utilities must provide comparable, non-discriminatory open access to their facilities and services upstream of the citygate.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-17-10. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-11. Application requirements for an unbundling plan; public hearing and plan implementation

(a) In an application for approval of an unbundling plan, the utility shall identify in detail the following:

- (1) All Oklahoma jurisdictional facilities it owns and those owned by an affiliate, which have been or can be used in the provision of natural gas services of gas supply, gathering, transmission or storage upstream of the citygate or proposed aggregation point.
- (2) The capacity of such facilities identified in paragraph (1) of this Subsection.
- (3) Each Oklahoma geographic area in which the utility or an affiliate has provided or can provide the services of gas supply, gathering, transmission or storage upstream of the citygate,
- (4) The proposed citygates or other delivery points for which the aforementioned services will be competitively bid. There will be a

designated citygate for every city and municipality regardless of the recommended aggregation point. Such designation does not mean actual installation, unless ordered by the Commission.

(5) All natural gas service agreements which may have sole supplier and full requirements provisions or other provisions which may have the effect of restricting competition.

(6) A schedule for competitive bidding for each citygate or proposed aggregation point.

(7) Actual or estimated volumes of natural gas supply delivered to each citygate and proposed aggregation point for the utility's distribution service over each of the thirty-six (36) months preceding the date of application and an estimate for each of the subsequent twelve (12) months.

(8) The actual or reasonable estimate of the peak volume requirements by month of each citygate and/or proposed aggregation point.

(9) The actual or reasonable estimate of the maximum daily and hourly demand for each citygate and proposed aggregation point during the year.

(10) Separate proposed tariffs reflecting all of the natural gas services upstream of the citygate and/or proposed aggregation point including gas supply, gathering, transmission and storage, which the utility proposes to make available for competitive bidding and which the utility will make available. Full documentation together with disaggregated cost of service studies identifying the system wide cost by consumer class or subgroup of each of the services and the allocation of those costs to each citygate or proposed aggregation point, together with all workpapers supporting such studies, shall be included with the proposed tariffs. In addition, an allocation of these system wide costs to each of the utility's citygates and proposed aggregation points shall be included, together with the methodology for making such allocation and workpapers supporting such allocation. The proposed tariff shall also contain the terms and conditions associated with each such service and, with the exception of gas supply, the rate to be charged for each such service based upon the supporting disaggregated cost of service study.

(11) Standard form requests for competitive bidders for gas supply, gathering, transmission and storage upstream of the citygate or proposed aggregation point.

(12) A detailed, itemized estimate to the extent known of the utility's total prudent and verifiable stranded and transition costs together with all workpapers supporting such estimate and the competitive market and any other assumptions underlying such estimate(s).

(13) A standard competitive bidder contract for natural gas services, which shall include appropriate guarantees regarding the delivery of the natural gas services to the citygate.

(14) A map(s) of the gas utility's facilities which includes;

(A) Separate delineation of gathering facilities, storage facilities, transmission facilities and local distribution facilities;

(B) The location of each citygate and/or proposed aggregation point;

(C) The operating pressures of all facilities at and upstream of each citygate and/or proposed aggregation point; and

(D) The capacity of all facilities at and upstream of each citygate and/or proposed aggregation point.

(15) All contracts regarding upstream natural gas services executed subsequent to February 18, 1997.

(16) Any amendments or addendums to any existing contracts regarding upstream natural gas services that were executed after February 18, 1997.

(b) All information and data submitted pursuant to subsection (a) shall be updated annually by supplemental filings. Such filings shall be public information.

(c) Each utility's unbundling application shall be subject to public review, comment and hearing. All hearings on each utility's unbundling application shall be completed and a final Commission order issued no later than one hundred and twenty (120) calendar days following the filing date of the utility's unbundling application, unless otherwise ordered by the Commission.

(d) Upon approval of the unbundling plan, the utility shall implement said plan within twenty (20) calendar days from the date of the Commission's order, unless otherwise ordered by the Commission

[Source: Added at 15 Ok Reg 2177, eff 7-1-98; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-17-12. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-13. Competitive bidding

(a) To effectuate the policy of the Commission that a competitive bidding process is among the most effective means to restructure the natural gas service industry in such a manner that will be in the best public interest of all natural gas consumers, and that would complement and improve the state's economic growth by increasing its market base for natural gas, natural gas utilities are to acquire citygate or Commission approved aggregation point gas services through a public bidding process, unless otherwise ordered by the Commission, in accordance with the schedule set forth in each utility's Commission approved unbundling plan, which bidding process shall be subject to Commission oversight.

(b) Recognizing the importance to expediently implement the Commission's policy to begin a competitive bidding process by the heating season of 1998, the citygates of Oklahoma City and Tulsa will have an in-service date of November 1, 1998, subject to a final order by the Commission approving the utility's unbundling plan prior to September 1, 1998. Such bidding shall not commence until the utility's unbundling plan is approved by the Commission.

(c) Any entity desiring to provide the natural gas services of gas supply, gathering, transmission or storage upstream of the citygate or Commission approved aggregation point for a utility may file with the Commission, with a copy mailed to the utility, a written notice of its desire to provide one or more of such citygate natural gas service(s). Such notice shall identify with specificity:

(1) The type of natural gas services it proposes to provide and the geographic areas in which the service(s) would be rendered;

(2) The facilities which would be used in the provision of such service; and

(3) The capacity of such facilities.

(d) All upstream citygate or Commission approved aggregation point gas services required, acquired, or obtained by a gas utility for its citygate(s) or Commission approved aggregation point(s) shall be acquired or obtained by a competitive bid procedure with the following exceptions:

(1) Such citygate or Commission approved aggregation point gas supply which the natural gas utility is obligated to purchase under existing long-term gas purchase or transmission contracts which were entered into prior

to February 18, 1997, and were not amended after that date with non-affiliated entities, or were entered into or amended after February 18, 1997 with affiliates or nonaffiliates if such contracts or amendments were approved by Commission order, after notice and hearing; provided that these contracts are in effect and such contracts shall be terminated at their earliest opportunity. Nothing in this subpart shall diminish the authority of the Commission to review any contract of a gas utility for prudence or other reasons.

(2) Such citygate or Commission approved aggregation point gas service required during a bona fide emergency; provided, however, until the initial commencement of competitive citygate or Commission approved aggregation point service to such citygate(s) or Commission approved aggregation point(s), the gas utility shall continue to acquire natural gas services in a manner consistent with all other Commission rules and orders.

(3) Services which are generally not available through competitive bidding such as emergency services, or services which the Commission has found to be acceptable following a prudence review.

(4) Class A utilities shall notify the Commission within fifteen (15) calendar days of the effective date of Subchapter 17, of all contracts that fall under the exception of subsection (d)(1). The utility shall make such contracts available for inspection by the Commission and to intervening parties upon Commission order, after notice and hearing.

(e) When a citygate or Commission approved aggregation point becomes available for competitive bidding pursuant to the schedule set forth in the utility's Commission approved unbundling plan and a notice for such citygate or Commission approved aggregation point has been received as provided under subsection (c), the utility shall provide a request for competitive bid.

(f) If no notice has been received when the citygate or Commission approved aggregation point becomes initially available for competitive bid, the utility shall submit a request for competitive bid within thirty (30) calendar days after receipt of a notice under subsection (c).

(g) A request for competitive bid shall be in accordance with the requirements of this subsection as follows:

(1) The gas utility shall provide a request for competitive bid to the sender of such written notice and any other person or entity the gas utility reasonably believes would be capable of providing natural gas services in question, as well as to the Commission.

(2) Each request for bid shall set out in detail the natural gas services required with sufficient specificity as to volumes, delivery dates, term of contract not less than two (2) years or more than five (5) years for bids submitted prior to the year 2002, and the types of service or other pertinent information, which would permit an informed and meaningful bid to be made.

(3) Each request for bid shall provide for an in service date of not later than six (6) months from the date the bid is awarded to the successful bidder.

(4) If the successful bidder is unable to complete construction by the designated in service date, the bid shall provide that a third party may provide service to the citygate or Commission approved aggregation point on an interim basis until construction can be completed to initiate new service.

(5) Any successful bidder that requires third party service by the utility or its affiliate, pursuant to subsection (g)(4), shall be assessed no more than the rate proposed by that successful bidder. Such interim service shall not exceed one hundred twenty (120) calendar days, except upon order of the Commission.

(h) Any interested person may, within a period of fifteen (15) calendar days following the filing of such request for competitive bid with the Commission, file a complaint with the Commission challenging the criteria or parameters of the request for bid as non-competitive or not necessary to meet the needs or not in the best interest of the customers of the natural gas utility. The Commission shall set the matter for hearing at which all interested persons may appear and the Commission shall determine the criteria.

(i) Any person interested in submitting a bid in response to a request for bid shall submit its bid to the Commission and submit a copy of such bid, under seal, to the utility within thirty (30) calendar days after the natural gas utility's filing of the request for bid with the Commission, or if a complaint is filed challenging the criteria of the request for bid within twenty (20) calendar days following a determination of proper criteria by the Commission. It is the intent that a bid will be sufficiently definite and firm so that, when taken together with the request for bid, its acceptance will result in the formation of an enforceable contract.

(j) To reinforce the integrity of the process, the gas utility and the Commission Staff shall promptly open all sealed bids received, at a date certain, and at the Commission.

(k) The gas utility shall promptly evaluate all bids and make a decision thereon within thirty (30) calendar days following the deadline for submitting bids. A gas utility shall make its decision on an arm's length, stand-alone basis showing no preferential treatment to its affiliate.

(l) The gas utility shall promptly file its decision with the Commission and mail copies of such filing to all bidders and the Attorney General identifying the successful bidder, which filing shall include a copy of the successful bid. Any unsuccessful bidder and the Attorney General shall have fifteen (15) calendar days following filing of the successful bid decision with the Commission to file with the Commission a complaint challenging the decision as not meeting the criteria for decision specified in this subsection and the request for bids.

(m) Upon a determination of the successful bidder, the gas utility and the successful bidder shall promptly proceed to finalize contracts necessary to implement the bid. The contract shall contain appropriate guarantees, as set by the Commission, regarding the reliability of services to be delivered at the citygate or Commission approved aggregation point.

(n) At the request of either party and upon notice and hearing, the Commission shall have authority to determine any disputes between the parties as to terms incidental to the bid. All matters to be determined by the Commission under this Section shall be heard on an expedited basis and a decision rendered thereon within thirty (30) calendar days from filing.

(o) After notice to all bidders and hearing, the Commission shall determine whether the gas utility's decision reveals either a clear departure from the criteria for decision or is erroneous, in which event the gas utility shall be required immediately to rebid, in accordance with this Section, the citygate gas services which were the subject of such determination.

(p) An upstream related entity or an affiliate of the gas utility may bid competitively to furnish citygate gas service to such natural gas utility in response

to such natural gas utility's request for bid. In no event may a gas utility give any preferential treatment or consideration to an upstream entity, including an affiliate of the gas utility, in the preparation of the request for bid, evaluation of bids or in the award of any contract for the supplying of natural gas services to a citygate or Commission approved aggregation point, and no person shall have any right to match any bid made by others or any right of first refusal.

(q) The Commission believes that the public interest would be best served by having independent producers participate in the competitive bidding process. To encourage independent producers, including those new market entrant producers that aggregate their production or that have their production aggregated through amended or prospective agency agreements as service providers to citygates or Commission approved aggregation points, to participate in the competitive bidding, the following provisions apply:

(1) 10% of the competitive bid for gas supply to each citygate or Commission approved aggregation point, which is the subject of a request for bid, will be awarded to the independent producers, provided the independent producers' bids are sufficient to serve 10% for such bid package.

(2) 10% of transmission services for each Commission approved citygate and aggregation point shall be designated for independent producers pursuant to (q)(1).

(3) Independent producers receiving the award pursuant to (q)(1) and/or the discount pursuant to (q)(2) shall be required to match the lowest bid for the service and/or supply.

(4) Upon Commission determination, after notice and hearing, that effective competition exists, any future awards available pursuant to (q)(1) and the discount pursuant to (q)(2) shall be discontinued.

(r) All costs of the utility in providing the natural gas services to a citygate or Commission approved aggregation point that are competitively bid and provided shall be removed from the utility's rates effective the date the competitively bid services are provided to a citygate or Commission approved aggregation point pursuant to this Subchapter. The utility shall file with the Commission documentation of the removal of such costs, which shall be subject to the review and approval or disapproval of the Commission. The utility will be allowed to recover the actual costs paid, as ordered by the Commission, for competitively bid services through either the utility's purchased gas adjustment (PGA) or through a surcharge with a time period which coincides with the contract term for such services. The Commission may determine the method of recovery at the time the utility's unbundling plan is approved. A Commission determination on the recovery of costs should not be construed as deregulation of the utility's facilities and assets. For competitively bid services, the gas utility shall utilize the cost and allocation data filed pursuant to OAC 165:45-17-11 in determining the costs to be removed from the utility's rates with amounts to be adjusted upward or downward by the Commission as appropriate.

(s) No gas utility may charge or allocate any of the costs of furnishing unregulated service or competitively bid service to other regulated service or recover any of the costs of furnishing unregulated service or competitively bid service in its rates and charges for other regulated service. Facilities serving competitively bid service and other regulated service and unregulated service shall be allocated between competitively bid service, other regulated service and unregulated service based on the fully allocated costs actually incurred and separately determined for

competitively bid service, other regulated service and unregulated service.

(t) After Commission review of the results of the competitive bidding process, the Commission will make a finding as to whether or not effective competition exists at each citygate or Commission approved aggregation point for each individual service which was competitively bid and what level of regulation is appropriate, if any, and will issue an order to that effect. Accordingly, there shall be no presumption of competition at any citygate or Commission approved aggregation point for each individual service that is being competitively bid prior to a Commission order reflecting the same.

(u) Once there has been a determination by the Commission that effective competition exists at a citygate or Commission approved aggregation point for any individual service which is being competitively bid for such citygate or Commission approved aggregation point, the utility owned transmission pipeline shall not be required to maintain tariffs for services obtained through the competitive bidding process for such specific citygate or Commission approved aggregation point, or in the alternative, the utility shall maintain tariffs as a ceiling level and may be allowed to discount its tariff in order to competitively bid to a specific citygate or Commission approved aggregation point, unless otherwise ordered by the Commission.

165:45-17-15. How effective competition is to be determined

(a) Upon application by an interested party, the Commission may commence an investigation to determine whether the provision of one or more natural gas services is subject to effective competition. Such determination may only be made on an unbundled and citygate by citygate or other Commission approved geographic area basis.

(b) In determining whether a natural gas service is subject to effective competition, factors which the Commission may consider include, but are not limited to:

- (1) The number and size of competing providers operating in the relevant geographic area;
- (2) The extent to which comparable natural gas services are available from competing providers in the relevant market;
- (3) The ability of competing providers to provide equivalent natural gas services quantity and reliability at competitive rates, terms and conditions;
- (4) Market barriers;
- (5) Public interest consideration; and
- (6) Other indicators of market power with respect to the subject service, which may include market share, growth in market share, and whether the competing providers of natural gas services are affiliated with the natural gas utility.

(c) In considering these or other factors, the Commission is not required to give equal weight to each factor in subsection (b), but has discretion to give more weight to a particular factor or factors, based on the evidence.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-16. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-17. Public information regarding competitive bidding; bypass and partial and standby service

(a) **Public information regarding competitive bidding.** Each intrastate pipeline or utility owned transmission pipeline shall establish and operate a public web site. The public web site shall be accessible through the Internet and will allow for the posting of gas bidding information in the State of Oklahoma. Within one hundred and twenty (120) calendar days from the effective date of this Subchapter, the transmission pipeline shall submit a good faith statement of operation to the PUD Director which states that the public web site has been established, is operational and is accessible via the Internet, and shall give the specific address of the site.

(1) The following information shall be posted to the site within a reasonable time of the transaction:

(A) Operationally available capacity at mutually agreeable citygate or Commission approved aggregation points and selected interstate delivery points; and

(B) Prices for operationally available capacity at those delivery points itemized in (A) above.

(2) PUD shall have free and unrestricted access to the site.

(3) Any entity seeking to competitively bid or requesting access to a transmission pipeline shall be given access to that transmission pipeline's public web site.

(4) Pursuant to the complaint procedures established in OAC 165:45-17-29, PUD will assist in negotiations regarding disputes related to information posted to the public web site or nondiscriminatory open access. If no successful agreement can be reached by the parties, any party to the dispute may file an application with the Commission for relief.

(b) **Bypass.** While neither encouraged nor prohibited, it is recognized by the Commission that competition in the natural gas industry creates the opportunity for some end-users of gas utilities, which receive natural gas services pursuant to their respective tariffs, to now, through bypass or duplication of facilities, receive these services from other providers.

(c) **Partial service and standby service.** Any utility, which provides citygate or Commission approved aggregation point natural gas services, must make available partial service and standby service at rates appropriate for such service. Pursuant to this Subchapter, partial service means providing some fractional percentage of service which is less than one-hundred percent (100%) and standby service means a type of service wherein the utility does not provide service continuously but rather stands ready to do so when called upon by the customer. Provision of partial and standby service by a utility shall not jeopardize the reliability of service to residential and other small volume customers. When necessary to protect residential and small volume customers, partial and standby service shall be provided on an interruptible basis.

165:45-17-18. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-19. Utility stranded costs

It is recognized that a utility, as a result of the restructuring and unbundling of its natural gas services pursuant to this Subchapter, may have stranded costs. After the Commission has approved the utility's unbundling plan, any utility may seek to recover its prudent and verifiable stranded costs through the filing of a general rate cause or through an application for recovery of its stranded costs. If the utility elects to file an application for recovery of its stranded costs outside of a general rate cause, the utility shall provide information and data comparable to the information and data required pursuant to OAC 165:70, unless otherwise ordered by the Commission. The Commission shall conduct a hearing and the utility shall have the burden of identifying proposed stranded costs, the amount of such costs and proposed methods for recovery of its stranded and/or transitional costs. When reviewing the utility's request to recover said costs, the Commission may consider mitigation strategies of the utility. Following notice and hearing, the Commission shall determine the amount of any stranded cost which may be recovered from the utilities' customers and the manner in which such recovery shall occur. The Commission recognizes that after the initial hearing process there may be a need to allow for additional hearings for "true-up" purposes.

165:45-17-20. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-21. Transitional costs

Transitional costs, upon application, after notice and hearing and order of the Commission, shall be entitled to immediate recovery to the extent that such transition costs are incurred as a result of the restructuring of the natural gas service industry. Further the Commission recognizes that small utilities may need to seek recovery of transitional costs earlier in the unbundling process.

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-23. Standards of conduct between utilities and affiliate(s)

Natural gas utilities upstream of the citygate, including those utilities which have customers subject to pipeline tariff agreements downstream of the citygate or aggregation point, must conduct their business to conform to the following standards:

- (1) Natural gas utilities must apply any tariff provision in the same manner to the same or similarly situated persons if there is discretion in the application of the provision.
- (2) Natural gas utilities must strictly enforce a tariff provision for which there is no discretion in the application of the provision.
- (3) Except as necessary for physical operational reasons, natural gas utilities may not, through a tariff provision or otherwise, give their affiliates or knowingly give customers of their affiliates preference over shippers or other utility customers in matters relating to any service offered to shippers including, but not limited to: scheduling, balancing, metering, storage, standby service or curtailment policy.

- (4) Unless such disclosure is simultaneously made public, natural gas utilities shall not disclose to their affiliates any information which they receive from, a non-affiliated customer, shipper or supplier, a potential customer, shipper or supplier, any agent of such customer, or potential customer, or shipper, or supplier, or a marketer or other entity seeking to supply gas to a customer or potential customer.
- (5) A natural gas utility's operating employees and the operating employees of its marketing affiliate must function independently of each other, and shall be employed by separate corporate entities to the maximum extent practicable.
- (6) Natural gas utilities and their affiliates shall keep separate books of accounts and records.
- (7) Natural gas utilities shall establish a complaint procedure. In the event the natural gas utility and the complainant are unable to resolve a complaint, the complainant may address the complaint to the Commission.
- (8) With respect to any transaction or agreement relating in any way to gas sales, supply, transmission, storage, distribution or marketing, a natural gas utility shall conduct all such transactions with any of its affiliates on an arm's length basis.
- (9) The Commission shall resolve affiliate transaction disputes or abuses on a case-by-case basis. Any aggrieved party may file a complaint with the Commission alleging the particulars giving rise to the alleged dispute or abuse. The Commission shall consider at a minimum the following issues when hearing a complaint:
- (A) Whether or not the information or data furnished to the affiliate was generally available to other market participants.
 - (B) Whether or not the natural gas utility conducted business in such a manner that actual or expected expenses were shifted from the non-regulated subsidiary to the regulated entity.
 - (C) Whether or not the natural gas utility conducted business in such a manner that actual or expected revenues were shifted from the regulated entity to the non-regulated entity.
 - (D) Whether or not the regulated entity offered terms, condition or rates for the provision of natural gas services to the affiliate that it refused to provide to other customers or whether such provision resulted in the affiliate having an unfair advantage.
- (10) Natural gas utilities must process all similar requests for natural gas services in the same manner and within the same period of time.
- (11) Natural gas utilities shall not provide leads to upstream affiliates and shall refrain from giving any appearance that the natural gas utility speaks on behalf of its affiliate(s). Nor shall the affiliate trade upon, promote or advertise its affiliation or suggest that it receives preferential treatment as a result of its affiliation. The use of a common corporate or parent holding company name shall not be a violation of this provision so long as the regulated utility and the affiliate entities can be distinguished.
- (12) Natural gas utilities, except for billing and collection services and customer service, or by order of the Commission, shall not share their customer list or related customer information with affiliates unless the information is simultaneously shared with non-affiliate entities.
- (13) The natural gas utility shall not communicate with any third party that any advantage may accrue to such third party in the use of the natural gas

utility's upstream services as a result of that third party dealing with the upstream natural gas utility's affiliates unless the information is simultaneously shared with non-affiliated entities.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98; Amended at 21 Ok Reg 2095, eff 7-1-04]

165:45-17-24. Sales of services, products, assets between regulated and unregulated affiliates

- (a) **Transactions between a utility and its affiliates.** A utility shall not cross-subsidize the business activities of any affiliate with revenues from a regulated service. A utility cannot recover more than its reasonable fair share of the fully allocated costs for any transaction or shared services.
- (b) **Contemporaneous record requirement.** A utility shall maintain a contemporaneous written record of all individual transactions with a value equal to or over one million dollars with its affiliates, excluding those involving shared services or corporate support services, those transactions governed by tariffs or special contracts and daily scheduling of gas supply. Such records, which shall include at a minimum, the date of the transaction, name of affiliate(s) involved, name of a utility employee knowledgeable about the transaction, and a detailed description of the transaction with appropriate support documentation for review purposes, shall be maintained by the utility for three years.
- (c) **Transfers of assets.** Except as otherwise required by federal statute or regulation, or pursuant to Commission authorized competitive bidding, tariffs, special contract, or as otherwise ordered by the Commission; cost recovery for property transferred from a utility to its affiliate shall be priced at the "higher of cost or fair market value." Except as otherwise required by federal statute or regulation, or pursuant to Commission authorized competitive bidding, tariffs, special contract or as otherwise ordered by the Commission; asset valuation and transfers of property transferred from an affiliate to its utility shall be priced at the "lower of cost or fair market value." No matter the origin of the transaction, all transfers between a utility and an affiliate will be individually scrutinized by the Commission on a case-by-case basis.
- (d) **Sale of products or services.** Except as otherwise required by federal or state statute or regulation, or pursuant to Commission authorized competitive bidding, tariffs, special contract or as otherwise ordered by the Commission; any sale of products and services provided from the affiliate to the utility shall be priced at the "lower of cost or fair market value." Except as otherwise required by federal statute or regulation, or pursuant to Commission authorized competitive bidding, tariffs, special contract or as otherwise ordered by the Commission; any sale of jurisdictional products and services provided from the utility to the affiliate shall be priced at the "higher of cost or fair market value."
- (e) **Joint purchases.** A utility may make a joint purchase with its affiliates of goods and services involving goods and/or services necessary for utility operations. The utility must ensure that all joint purchases are priced, reported, and conducted in a manner that permits clear identification of the utility's and the affiliate's allocations of such purchases.
- (f) **Tying arrangements prohibited.** Unless otherwise allowed by the Commission through a rule, order or tariff, a utility shall not condition the provision of any product, service, pricing benefit, waivers or alternative terms or conditions upon the purchase of any other good or service from the utility's affiliate.

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98; Amended at 21 Ok Reg 2095, eff 7-1-04]

165:45-17-24.1. Financial transactions by utilities or their affiliate(s)

(a) **Financial transactions.** Financial transactions include, but are not limited to, stock, bond, derivatives, and any financing instrument issuance as well any debt, equity, derivative or related transaction.

(b) **Separate books and records.** A utility shall keep separate books of accounts and records from its affiliates. The Commission may review records relating to any transaction between a utility and an affiliate to ensure compliance with this Subchapter including the records of both the utility and the affiliate relating to that transaction.

(1) In accordance with generally accepted accounting principles, a utility shall record all transactions with its affiliates, whether they involve direct or indirect expenses.

(2) A utility shall prepare non-GAAP financial statements that are not consolidated with those of its affiliates.

(3) A utility shall have a cost allocation manual or upon Commission request, be able to provide its cost allocation methodology in written form with supporting documentation. Such records shall reflect the transaction and the allocated costs, with supporting documentation, to justify the valuation.

(c) **Limited credit, investment or financing support by a utility.** A utility may share credit, investment, or financing arrangements with its affiliates if it complies with paragraphs (1) and (2) of this Subsection.

(1) The utility shall implement adequate safeguards precluding employees of an affiliate from gaining access to information in a manner that would allow or provide a means to transfer confidential information from a utility to an affiliate, create an opportunity for preferential treatment or unfair competitive advantage, lead to customer confusion, or create opportunities for subsidization of affiliates.

(2) Where an affiliate obtains credit under any arrangement that would include a pledge of any assets in the rate base of the utility or a pledge of cash necessary for utility operations the transactions shall be reviewed by the Commission on a case-by-case basis.

(d) **Cost of financing transactions of any affiliate.** The cost of any financial transactions, in part or in full, or any debt, equity, trading activity, or derivative, of any parent company, holding company or any affiliate, which has a direct or indirect financial or cost impact upon the utility shall be reviewed by the Commission on a case-by-case basis.

[Source: Added at 21 Ok Reg 2095, eff 7-1-04]

165:45-17-25. Standards of conduct for competitive bidders

(a) Any entity shall have the opportunity to competitively bid to provide the natural gas services of gas supply, gathering, transmission and storage upstream of the citygate.

(b) The successful competitive bidder must sign a contract with the utility detailing the terms for providing natural gas services to each citygate or Commission approved aggregation point for which it is the successful bidder, such contract will govern all the terms and conditions of service. The Commission may review all contracts between the utility and the competitive bidder. Competitive bidders must agree to abide by the Commission's standards of conduct. The Commission may arbitrate disputes regarding compliance with the requirements of this Subchapter.

(c) Both the gas utility and any competitive bidder(s) shall not engage in marketing, advertising or public display which is discriminatory, predatory, deceptive or which impedes fair competitive bidding.

(d) The competitive bidder must apply any tariff or contract provision for transportation services which provides for discretion in the application of the provision, in a similar manner to similarly-situated shippers.

(e) The competitive bidder must enforce any tariff or contract provision for transportation services, if there is no discretion stated in the tariff or contract in the application of the provision, in a similar manner to similarly-situated shippers.

(f) The competitive bidder must not give any shipper preference in the provision of transportation services over any other similarly-situated shippers.

(g) The competitive bidder must process requests for transportation services from any shipper in a similar manner and within a similar period of time as it does for any other similarly-situated shipper; and maintain its books of account in such a fashion that transportation services provided to an affiliate can be identified and segregated.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-26. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-27. Remedies and enforcement for violation of the standards of conduct

(a) Pursuant to OAC 165:45-17-29 below, a complaint may be brought to the Commission at any time. The Commission encourages informal resolutions. Whenever a controversy does exist in connection with the interpretation of this Subchapter, the applicability of the requirements set forth herein, or any right or duty imposed thereby; the Commission, upon application of any interested party and after notice and hearing, will enter such order thereon as it may deem appropriate.

(b) Each violation of this Subchapter shall be considered to be a separate occurrence.

(c) If the Commission determines, after investigation and an evidentiary hearing, that the natural gas utility has violated these affiliate rules, the Commission may assess a fine against the utility as set forth in OAC 165:45-1-6; for contempt and may order such further action as may be fair, just and reasonable under the circumstances of the proceeding.

(d) The Commission may act upon any violation of these standards including but not limited to the following:

(1) Prospective limitation or restriction of the amount, percentage or value of transactions entered into between a utility and any entity that seeks to competitively bid to supply the natural gas services of gas supply, gathering, transmission and storage upstream of the citygate;

(2) Denial of recovery of costs - all or in part - for business transactions between the utility and the affiliate; or

(3) Application of any other remedy available to the Commission, including financial penalties.

(e) **No immunity from state law.** Nothing in this subchapter shall relieve any utility from any duty prescribed by the laws of the State of Oklahoma.

165:45-17-28. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-29. Complaints procedure regarding competitive bidding

(a) **Informal complaints.** Any party who is aggrieved by a competitive bidding process is encouraged to seek informal resolution of their complaints before filing a formal complaint with the Commission. Complaints concerning the competitive bidding process may be submitted in writing to the PUD Director, along with all supporting documentation. PUD may assist in negotiations regarding complaints. If no successful agreement can be reached by the parties, any party to the dispute may file an application with the Commission for relief.

(b) **Formal complaints.** Any party aggrieved by a competitive bidding process shall have the right to file a complaint with the Commission, in compliance with OAC 165:5 and this Subchapter, against any competitive bidder, if such party believes it has been:

- (1) Wrongfully denied access to any intrastate or utility owned transmission pipeline;
- (2) Discriminated against with respect to the natural gas services of gas supply, gathering, transmission and storage upstream of the citygate;
- (3) Placed at a competitive disadvantage by virtue of the actions of any competitive bidder, or
- (4) Adversely impacted by violation of the provisions of this Subchapter.

165:45-17-30. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-17-31. Interconnection

(a) In order to facilitate the Commission's policy to encourage new market entrants, upon the effective date of the rules of this Subchapter, each gas utility shall have the duty to provide for the interconnection of the facilities and equipment of any requesting pipeline with such utility's facilities:

- (1) At any technically feasible point with the gas utility's system at or upstream of each citygate or Commission approved aggregation point;
- (2) In a manner that is, at least equal in quality to that provided by the utility to itself or to any affiliate, or any other party to which the utility provides interconnection.

(b) Although the Commission seeks to encourage new market entrants, new market entrants are strongly encouraged to bear the reasonable financial costs associated with interconnections. However, in no circumstances should the bid of the new market entrant be deemed inadequate due to the desire of the entrant to have the utility bear the cost for interconnection. In no event shall the utility seek recovery for the interconnection costs borne by the new market entrant.

(c) The requesting party shall reimburse the utility for all reasonable costs of an interconnection, unless the Commission, after notice and hearing, finds that it is in the best interests of the utilities' consumers for the utility to bear the cost of the interconnection.

(d) The utility may recover from its utility customers the costs involved with providing the interconnection which the Commission has determined, after notice

and hearing, to be economically justified.

SUBCHAPTER 19. DOWNSTREAM SERVICES

165:45-19-1. Purpose of this Subchapter

The purpose of this Subchapter is to establish an orderly unbundling of natural gas services. Accordingly, this Subchapter anticipates that natural gas services downstream at the retail or merchant level will be provided pursuant to a utility downstream unbundling plan with service to commence by October 1, 1999.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98]

165:45-19-2. [RESERVED]

[Source: Reserved at 15 Ok Reg 2177, eff 7-1-98]

165:45-19-3. Downstream service unbundling plan

(a) No later than September 1, 1998, each Class A utility with 25,000 or more customers shall commence a collaborative process wherein a downstream unbundling plan shall be developed. Interested parties, including, but not limited to, downstream service providers (marketers), the Attorney General, and the Commission's PUD, may participate in the collaborative process. The downstream unbundling plan should include but not be limited to the following requirements:

- (1) The unbundling of all downstream natural gas services for all classes of customers.
- (2) The establishment of an appropriate cost allocation and rate design for the downstream unbundled services.
- (3) Standards of conduct for transactions between the utility and its affiliate.
- (4) Tariffs reflecting all of the natural gas services that will provide open access to the utility's system by entities desiring to provide downstream services, establish interconnection requirements and that will allow end-users a choice to obtain natural gas services from entities other than the utility. Each tariff shall identify the terms and conditions under which such service will be made available to any end-user and the maximum rate which the utility may charge for such service.
- (5) That transportation shall be provided on a firm and interruptible basis to all end-users on a non-discriminatory basis. Therefore, unless otherwise ordered by the Commission, the transportation proposal should:
 - (A) Eliminate volume restrictions.
 - (B) Remove alternate fuel requirements.
 - (C) Permit aggregation, where operationally and administratively feasible, for the purpose of making small consumer transportation viable; including nomination and imbalance provisions suitable for economically serving such customers.
 - (D) Specify under what conditions "returning" customers will be accepted and how they will be charged.
- (6) Storage and balancing shall be provided as a separately priced service for customers interested in using storage and/or balancing services. This may include options keyed to varying conditions and/or time periods, wherein, each will be separately priced.

(7) Standby shall be provided as a separately priced service for transportation customers who have had their capacity or commodity curtailed.

(8) The utilities should clearly define if, when and how additional metering is required to provide additional services. The utility should be ready to demonstrate that the proposed metering requirements are not discriminatory and are truly necessary for operational reasons.

(9) The utility should propose a mechanism for notifying in-state customers of available interstate capacity. The proposal should include creditworthiness standards, bidding criteria and recall rights for such capacity. The aim of the capacity release program should be to provide the greatest contribution to the system's fixed capacity costs, while maintaining reliability for the firm sales customers.

(10) Curtailment plans should be updated in light of Order No. 636. Transportation customers should not be arbitrarily interrupted. The utilities should consider an operational condition that requires an interruption of load and also consider ways of interrupting only customers in those constrained areas. A pro-rata cutback arrangement may be put in place to relieve capacity constraints. If the utility finds that it is economical, it should arrange for the emergency/peak period use of customer owned gas under prearranged conditions and for a prescribed rate of compensation.

(11) Rate schedules should reflect the appropriate costs to provide each of the above services. Rate structure should be supported by work papers and a description of the methodology employed.

(12) Standards to allow customers to aggregate.

(b) To ensure that the public interest is best served by the restructuring of the natural gas industry, the Commission may implement a consumer education program of its own design. The Commission may seek the assistance of those parties directly or indirectly involved.

(c) The foregoing are intended as guidelines for a competitive rate and tariff structure. Utilities may find that one or more aspects of these guidelines are not practical for various reasons. Where this is the case the utilities may request an exemption from complying with that part of the guidelines. In such cases the utility should provide substantial documentation to support an exemption.

(d) Any interested party may by August 1, 1998, file a statement with the Commission, with a copy mailed to the utility and the Attorney General, giving its notice of intent to participate in the collaborative process set forth in subsection (a).

(e) Each collaborative process set forth in subsection (a) shall establish financial performance standards and appropriate consumer protection measures and safeguards.

(f) On or before April 1, 1999, the utility shall file with the Commission an application for approval of the proposed downstream unbundling plan that was developed as a result of the collaborative process set forth in subsection (a). The Commission shall conduct an examination and review of the utility's application. It is intended that the collaborative process continue between the applicant utility, the entity(ies) desiring to provide the downstream service, the Attorney General and any other party granted intervention status.

(g) The Commission shall conduct a public hearing on the utility's application for approval of its downstream unbundling plan and shall issue an order on or before June 1, 1999.

(h) Upon issuance of the Commission order, the utility shall begin implementation of the approved downstream unbundling plan for an in service date of October 1, 1999.

(i) It is recognized that the unbundling of the downstream system of a currently regulated utility may have potential tax implications. It is, therefore, contemplated that this subsection is subject to modification by the legislature or the Commission regarding tax implications, if any, and that the dates set forth herein may be modified by Commission order as appropriate to address tax issues.

(j) The Commission will, from time to time, reconvene the collaborative group(s) formed in response to subsection (a) for the purposes of monitoring the progress of the unbundling implemented pursuant to this Subchapter and refining, as necessary, the terms, conditions, and rates adopted as a result of those collaborative discussions. New parties may join the collaborative group at any time by giving notice of their intent to participate to a collaborative group as it then exists.

(k) The dates, stated herein, may be reestablished by order of the Commission for utilities with less than 25,000 customers.

(l) In lieu of the requirements of this Subchapter, a utility that has not begun implementation of a downstream unbundling plan as of July 1, 2014, shall submit a statement annually, detailing the basis for which implementation has not occurred, to the PUD Director.

[Source: Added at 15 Ok Reg 2177, eff 7-1-98; Amended at 31 Ok Reg 1067, eff 9-12-14; Amended at 36 Ok Reg 668, eff 7-25-19]

SUBCHAPTER 21. HOMELAND SECURITY AND CRITICAL INFRASTRUCTURE

165:45-21-1. Purpose and scope

(a) The purpose of this Subchapter is to require utilities to take all reasonable measures necessary to protect their critical infrastructures from extended interruption of service from all extraordinary events, natural and man-made.

(b) The Commission requires gas utilities to develop, implement, and maintain Homeland Security and Critical Infrastructure Plans according to the industry standards enumerated in sub-section (d) below.

(c) To the extent that a utility seeks to recover costs for security measures outside the scope of a general rate review for the implementation of Homeland Security and/or Critical Infrastructure protections, the utility shall comply with all provisions of this Subchapter.

(d) Each gas utility serving Oklahoma jurisdictional ratepayers is required to follow the most current applicable United States Department of Transportation, Office of Pipeline Safety's "Pipeline Security Information Circular" and "Pipeline Security Contingency Plan Guidance" ("DOT/OPS Guidelines") or equivalent cybersecurity framework, as may be amended from time to time, for use as guidelines for protecting the utility's Critical Infrastructure from extended service interruption.

(e) Each gas utility seeking to recover costs for security measures from Oklahoma jurisdictional ratepayers outside of a general rate review shall develop, implement, and maintain a Critical Infrastructure and Security Plan as further set forth within this Subchapter.

(f) If the utility has implemented a Security Plan or process in accordance with the applicable industry guidelines but is not seeking or receiving cost recovery for security-related costs, the utility shall submit the Certification Letter required by OAC 165:45-21-7(g) and the Plan shall be subject to review pursuant to the

Authorized Participation and Confidentiality provisions of OAC 165:45-21-10 and OAC 165:45-21-11. The utility is not otherwise required to comply with the provisions of this Subchapter.

(g) The Commission retains its jurisdictional and supervisory authority to address the reasonableness and/or prudence of any proposed security cost recovery.

(h) Nothing in this subchapter shall relieve any utility from any duty otherwise prescribed by the laws of the State of Oklahoma or this Commission's rules.

(i) Nothing in this Subchapter is intended to divest the utility of its right to object to any discovery requests from intervenors seeking access to "Highly Sensitive Confidential" materials.

(j) If any provision of this Subchapter is held invalid, such invalidity shall not affect other provisions or applications of this Subchapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Subchapter are declared to be severable.

165:45-21-2. [RESERVED]

[Source: Reserved at 22 Ok Reg 708, eff 7-1-05]

165:45-21-3. Definitions

The following words and terms, when used in this Subchapter 21, shall have the following meaning, unless the context clearly indicates otherwise:

"Annual Report" means the Annual Report submitted by Commission Staff to the Commission beginning December 30, 2005 and by July 1 of each year thereafter, summarizing the results of Staff's review of each utility's Security Plan (and any Plan Update Reports), along with any recommendations that Staff may have regarding such Plan(s).

"Authorized Participant" means those persons authorized by the utility or as may otherwise be authorized by law and/or ordered by the Commission, to view highly sensitive confidential information. Such authorization shall be granted on a case-by-case basis and may extend to the utility, state government officials, persons having been granted intervenor status by the Commission and Commission authorized designees of the parties.

"Certification Letter" means the written certification to the PUD Director made by August 1, 2005 and by March 1 of each subsequent year thereafter, indicating that as of the date of the Certification Letter, the utility has a Plan or that it has updated the Plan and/or previous Plan Update Reports, has a Plan but is not seeking cost recovery or has no Plan in place.

"Critical Infrastructure" means the property of a utility located in the State of Oklahoma, comprised of either physical assets or computer software which, if severely damaged or destroyed, would have a significant impact on the ability of the utility to serve large numbers of customers for an extended period of time, would have a detrimental impact on the reliability or operability of the utility system, or would cause significant risk to public health and safety.

"DOT/OPS Guidelines" means the guidelines, as may be amended from time to time, that are distributed by the United States Department of Transportation, Office of Pipeline Safety: "Pipeline Security Information Circular" and "Pipeline Security Contingency Plan Guidance."

"Highly Sensitive Confidential" means that the information is of such a sensitive nature that its public disclosure could be harmful to the security of a utility's critical infrastructure and as such it may only be viewed by those persons

authorized by the utility or as may otherwise be ordered by the Commission.

"Plan" means a Homeland Security and Critical Infrastructure Plan including any subsequent Plan Update Reports that have been prepared with reference to the DOT/OPS GUIDELINES.

"Plan Update Report" means the written redlined changes made by the utility updating the Plan and/or previous Plan Update Reports. At the utility's option, changes will either be redlined or a history of changes may be maintained.

"Security Cost Rider" means the per billing unit rate mechanism whereby a utility may, upon approval and Order of this Commission, recover the costs of providing security for its Critical Infrastructure as defined under this Subchapter 21.

165:45-21-4. [RESERVED]

[Source: Reserved at 22 Ok Reg 708, eff 7-1-05]

165:45-21-5. Utility Security Plan

- (a) Each gas utility is required to prepare and make available for inspection, a "Homeland Security and Critical Infrastructure Plan" ("Plan") that has been prepared with reference to the applicable DOT/OPS GUIDELINES or equivalent cybersecurity framework and standard as guidance with a defined cybersecurity strategy.
- (b) The Plan shall be marked as "Highly Sensitive Confidential" and designate those facilities that the utility considers to be Critical Infrastructure (physical assets and computer software as defined in OAC 165:45-21-3 above), and shall set forth the utility's measures to secure such facilities from extended service interruption. The Plan shall also include an estimate of the costs necessary to achieve such measures.
- (c) The Plan shall remain on site at the utility's business office in accordance with OAC 165:45-21-7(h) below and shall have the most current version of the redlined Plan Update Report attached to the clean version of the utility's latest Plan. At the utility's option, changes will either be redlined or a history of changes may be maintained.
- (d) The Plan shall list all locations deemed by the utility to be critical, as well as identification of any subsequently increased security measures. All locations and security measures shall be identified by code known only to the utility and designated state government officials and their designees.
- (e) Any subsequent security measures identified in the Plan shall contain an estimate of the cost necessary to implement such measures, a description of the measures necessary to adequately secure each specific location and an estimated schedule for completion of each measure.
- (f) All locations identified by the Plan that require additional security measures shall be prioritized by the utility.
- (g) Beginning December 30, 2005 and on July 1 of each year thereafter, Commission Staff shall submit an Annual Report marked as "Highly Sensitive Confidential" to the Commission, summarizing the results of Staff's review of a utility's Plan (and any Plan Update Reports), along with any recommendations that Staff may have regarding such Plan(s).
- (h) Beginning December 30, 2005, where the Attorney General elects to submit recommendations to the Commission regarding a utility's Plan, such recommendations shall be marked as "Highly Sensitive Confidential" and shall also

be due by July 1 of each subsequent year thereafter.

[Source: Reserved at 22 Ok Reg 708, eff 7-1-05]

165:45-21-7. Reporting requirements

- (a) Subsequent to the preparation of the initial Plan prepared under OAC 165:45-21-5(a), each utility shall prepare a Plan Update Report by March 1 of each succeeding year, following the same format as the initial Plan with redlines of all new changes, marked "Highly Sensitive Confidential" and kept on site at the utility's business office.
- (b) Each subsequent Plan Update Report shall update the previous year's report by indicating for each specific coded location, all costs and completion dates (actual and projected) for all current and prior additional security measures claimed under this Subchapter.
- (c) The utility is required to report cybersecurity or infrastructure security events that affect customers immediately to the PUD Director or designee.
- (d) For those security measures previously reported that have not yet been completed, revised estimated costs and estimated completion dates shall be provided.
- (e) The Plan Update Report shall also include (by specific coded location) a description of each proposed security measure that has not been previously reported, the estimated costs for each, as well as the estimated completion date for each measure.
- (f) Costs reflected in the initial Plan and in subsequent Plan Update Reports, whether estimated or actual, shall be identified as either capital or expense costs.
- (g) Beginning August 1, 2005 and by March 1 of every year thereafter, and/or when a change is made, each utility shall submit a Certification Letter to the PUD Director, marked as "Highly Sensitive Confidential," certifying that as of the date of the Certification Letter:
 - (1) The utility does not have a Homeland Security and Critical Infrastructure Plan as contemplated and defined by this Subchapter;
 - (2) The utility does not have a Homeland Security and Critical Infrastructure Plan as contemplated and defined by this Subchapter but has otherwise taken steps to secure its Critical Infrastructure and is not seeking cost recovery under this Subchapter;
 - (3) The utility does have a Plan but is not seeking cost recovery; or
 - (4) The utility has a Plan and/or has prepared its Plan Update Report updating the Plan and/or previous year's Plan Update Report;
 - (A) The redlines contained within the current Plan Update Report encompass in the entirety, all of the changes made to the utility's Plan since the Plan's inception or the previous year's certification; and
 - (B) The Plan and Plan Update Report are available for Commission and/or Attorney General review at the utility's local place of business.
- (h) A utility shall not be required to file its initial Plan or any of its subsequent Plan Update Reports with the Commission. Each utility shall instead, secure and maintain on site, at the utility's local place of business, its initial Plan and all subsequent Plan Update Reports.

165:45-21-8. [RESERVED]

[Source: Reserved at 22 Ok Reg 708, eff 7-1-05]

165:45-21-9. Cost recovery

- (a) Each utility seeking cost recovery of expenditures outside of a general rate review related to securing its Critical Infrastructure shall prepare and make available for inspection, its Plan and any subsequent Plan Update Reports in accordance with this Subchapter.
- (b) A utility shall file an application with the Commission for cost recovery as provided for within this Subchapter. Cost recovery shall be subject to established rate-making principles. Such cost recovery shall only occur to the extent the utility has incurred all or a portion of its actual security-related costs.
- (c) Unless otherwise ordered by the Commission, the utility shall have the burden of proving compliance with all of the provisions of this Subchapter prior to obtaining any cost recovery for security related measures.
- (d) Upon approval and Order of the Commission, a utility shall be allowed to recover a return based on its weighted cost of long-term debt and equity on all capital expenditures made for security measures. The utility shall also be allowed to recover related depreciation expense and ad valorem taxes. Such recoveries shall be based upon similar ratemaking treatment for corresponding cost elements from the utility's most recent general rate case.
- (e) Upon approval and Order of the Commission, a utility shall be allowed to recover expenses typically classified as operations and maintenance expenses for ratemaking purposes. The utility may request inclusion of any such similar costs incurred as long as these costs are directly associated with the security measures taken.
- (f) The total costs incurred under this Subchapter shall be combined for recovery purposes, for consideration by the Commission.
- (g) All costs approved by the Commission for recovery, shall be recovered from the utility's customers through a "Security Cost Rider" based on the projected annual billing units for the utility and shall be subject to annual true-up.
- (h) Unless otherwise ordered by the Commission, a utility shall immediately discontinue recovery of the "Security Cost Rider" when the earlier of the following occurs: natural expiration due to the full recovery provided for in a Rider granted under this Subchapter or forced expiration required pursuant to OAC 165:45-21-9(i) and/or OAC 165:45-21-9(j). Under no circumstances, shall the utility be permitted to double recover Homeland Security and Critical Infrastructure related costs.
- (i) Unless otherwise ordered by the Commission, any utility with a "Security Cost Rider" currently in effect, that files for a general rate change, shall include in the rate case, all security-related costs and those costs shall be accorded standard ratemaking treatment. A utility shall discontinue its "Security Cost Rider" when the change in rates becomes effective upon Final Order in the rate case.
- (j) Unless otherwise ordered by the Commission, all "Security Cost Riders" approved by the Commission, shall expire five years from the initial date of the "Security Cost Rider's" implementation.
- (k) Upon the filing of a cost recovery request by a utility, Commission Staff, the state Attorney General's office (based upon that entity's statutory authority) and all other Authorized Participants shall review the cost recovery proposal submitted by

the utility and file testimony in accordance with:

- (1) Any applicable protective orders issued by the Commission in the security-related cost recovery cause;
- (2) OAC 165:45-21-11 (below);
- (3) The Commission's Rules of Practice (OAC 165:5); and
- (4) Any other protective measures or requirements prescribed by law or the Commission.

(l) Testimony of Commission Staff, the state Attorney General and all other Authorized Participants, shall detail each of the parties' respective recommendations and any objections to the utility's Plan and the utility's request for cost recovery related to the Plan. Also in accordance with the Commission's Rules of Practice, Commission Staff, the state Attorney General and all other Authorized Participants shall provide copies of their respective individual testimonies to one another, with redacted versions of each individual testimony filed with the Commission's Court Clerk.

(m) Upon notice and hearing, the Commission shall issue an Order regarding any requests for security-related cost recovery.

[Source: Added at 22 Ok Reg 708, eff 7-1-05; Amended at 36 Ok Reg 668, eff 7-25-19]

165:45-21-10. Commission authorized participation

(a) **Commission Staff.** Only those Commission Staff and Staff's designees authorized by the Commission shall participate in a cause before the Commission regarding a utility's Plan, and then shall do so only after meeting all applicable requirements for Commission authorization, which shall be determined on a case-by-case basis. All Commission Staff and Staff's designees authorized to participate in a security cause shall comply with the requirements for protecting information obtained under the "Highly Sensitive Confidential" designation.

(b) **Attorney General.** Only those Attorney General personnel who have formally entered an appearance pursuant to Oklahoma Statute and the Commission's Rules of Practice and that entity's Commission authorized designees shall be granted review of a utility's Plan and/or Plan Update Reports. All Attorney General personnel and their designees authorized to participate in a security cause shall meet all applicable requirements for Commission authorization, to be determined on a case-by-case basis, and shall comply with the protections afforded information obtained under the "Highly Sensitive Confidential" designation.

(c) **Intervenors.**

(1) For the purposes of this Subchapter, all intervenors, including but not limited to counsel and experts for intervenors, shall be deemed "Authorized Participants" in accordance with OAC 165:45-21-3 above. All Authorized Participants wishing to participate in a security-related cause before the Commission shall meet all applicable requirements for Commission authorization, which shall be determined on a case-by-case basis, and shall comply with the protections afforded information obtained under the "Highly Sensitive Confidential" designation.

(2) In addition to acquiring "Authorized Participant" status from the Commission, each intervenor and its designees desiring to participate in a cause before the Commission regarding a utility's Plan shall post a bond or other security acceptable to the Commission, in an amount to be determined by the Commission, to protect the utility from harm in the event the Authorized Participant breaches the confidentiality terms established under this Subchapter or as may otherwise be established by the Commission. A

copy of such bond or other security shall be filed with the Commission's Court Clerk. This subsection shall not apply to the Attorney General of the State of Oklahoma or the Oklahoma Corporation Commission Commissioners and Staff.

(3) Any Authorized Participant found in violation of a Commission issued Protective Order and Proprietary Agreement, shall be liable for contempt penalties pursuant to the penalty provisions found in Article IX, § 19 of the Oklahoma Constitution, Title 17 of the Oklahoma Statutes and the Commission's Rules of Practice at OAC 165:5. This subsection shall not apply to the Attorney General of the State of Oklahoma or the Oklahoma Corporation Commission Commissioners and Staff.

(4) In addition to the above protections, all Authorized Participants may be required by the Commission to enter into a separate non-disclosure agreement as a pre-requisite to being granted intervention and "Authorized Participant" status.

[Source: Added at 22 Ok Reg 708, eff 7-1-05]

165:45-21-11. Confidentiality

(a) Pursuant to the Commission's jurisdiction granted under Article IX, Section 18 of the Oklahoma Constitution, 51 O.S. (2001) §24A.22 of the Oklahoma Statutes and OAC 165:5, the Commission's Rules of Practice; all un-redacted documents related to a utility's Homeland Security and Critical Infrastructure Plan shall be considered "Highly Sensitive and Confidential" and shall only be admitted into evidence in en camera proceedings.

(b) "Highly Sensitive Confidential" designation and protection shall extend but not be limited to the following: initial Plans (including underlying documents), Plan Update Reports, Certification Letters, Annual Reports made by Commission Staff, recommendations submitted by the Attorney General of the State of Oklahoma and un-redacted documents used in cost recovery proceedings. For all other documents, the "Highly Sensitive Confidential" designation may be granted upon hearing and Final Order of the Commission.

(c) Each utility's Plan and/or Plan Update Report prepared in accordance with this Subchapter, shall be marked "Highly Sensitive Confidential" and shall be kept and maintained on site at the utility's business office in accordance with OAC 165:45-21-7(h), above. Only those individuals on the Staff of the Commission and in the State Attorney General's office and their respective experts who have been authorized by the Commission, shall have access to the Plan and Plan Update Reports prepared by each utility and any related or supporting documentation thereto. All other parties granted authorized intervenor status to a security cause pursuant to OAC 165:45-21-10(c) may also be granted access to the Plan, Plan Update Reports and supporting documentation after notice and hearing.

[Source: Added at 22 Ok Reg 708, eff 7-1-05; Amended at 36 Ok Reg 668, eff 7-25-19]

SUBCHAPTER 23. DEMAND PROGRAMS

165:45-23-1. Purpose

The purpose of this subchapter is to establish fair and reasonable rules for planning and implementing Demand Programs that may receive cost-recovery treatment from the Commission. The rules in this Subchapter shall apply to Demand Portfolios having program years that begin on January 1, 2017 and

thereafter.

[Source: Added at 26 Ok Reg 1856, eff 6-25-09; Amended at 31 Ok Reg 1074, eff 1-1-17]

165:45-23-2. Goals

(a) The goals of Demand Programs are to minimize the long-term cost of utility service, to encourage and enable utility customers to make the most efficient use of energy, and to discourage the inefficient and wasteful use of energy.

(b) The Commission shall set specific savings goals for each utility to achieve Net Source Energy Usage Savings without adversely affecting customer comfort or state economic activity, based on market potential studies, base line studies, gas supply portfolios, risk management plans, or other evidence presented as part of the hearing process for approval of a utility's Demand Programs.

[Source: Added at 26 Ok Reg 1856, eff 6-25-09; Amended at 31 Ok Reg 1074, eff 1-1-17]

165:45-23-3o2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Administrative Cost" means the expenses incurred in controlling supporting Demand Programs that are not tied to the marketing and delivery of those programs. These expenses include:

- (A) reviewing and selecting Demand Programs in accordance with this section;
- (B) providing regular and special reports to the Commission, including reports of Demand Program savings;
- (C) a utility's costs for an annual review of Demand Programs or true-up proceeding for cost recovery mechanism;
- (D) Supervisory functions performed by Demand Portfolio Manager that are related to supervision of employees and related human resource administration.

"Average customer bill" means the value derived from the sum of all consumer bills in a particular customer sector divided by the number of consumers in that sector; i.e., the arithmetic mean. A utility may use the average customer bills for the customer rate classes rather than the customer sectors if it chooses to do so and clearly identifies the choice.

"Barrier" means any physical or non-physical necessity, obligation, condition, constraint, or requisite that obstructs or impedes natural gas user participation in Demand Programs. Barriers may include but are not limited to language, physical or mental disability, access to capital, educational attainment, utility meter type, economic status, property status, or geography.

"Base line" means natural gas use, trend in natural gas use, and description of conditions affecting such uses and trends prior to implementation of a Demand Program designed to affect particular uses and trends. When evaluating energy efficiency measures implemented as a result of non-fuel switching Demand Programs, the base line to be used in savings calculations shall be either the performance standard base line (the minimum efficiency available in the market), or a customized, project specific base line. When evaluating energy efficiency measures implemented as a result of fuel switching or non-prescriptive Demand Programs, the base line to be used in calculations shall be the replaced equipment efficiency.

"California Standard Practice Manual" means The California Standard Practice Manual: Economic Analysis of Demand Side Programs and Projects, 2001

edition, produced by the California Energy Commission and the California Public Utility Commission.

"Cost effective" and **"cost effectiveness"** mean utilizing a specified amount of money, in a way that delivers a benefit from available alternative uses, so long as the benefit's value exceeds the money spent.

"Customized opportunity" means an energy efficiency program tailored to an individual natural gas user's needs.

"Deemed savings" means an estimate of natural gas savings for a single unit of an installed energy-efficiency or renewable-energy measure that (1) has been developed from data sources and analytical methods that are widely considered acceptable for the measure and purpose, and (2) will be applied to measures that are deployed in significant numbers in similar ways.

"Demand portfolio" means a collection of energy efficiency programs, or as defined in this subchapter, Demand Programs including fuel switching programs offered or proposed by a natural gas utility; for example, a residential weatherization program and a program to trade tankless water heaters for tank water heaters or a general education program for energy efficiency may be contributors to a demand portfolio.

"Demand portfolio administrator" means the utility employee responsible for supervising the utility's energy efficiency efforts as proposed in compliance with this subchapter.

"Demand Program(s)" means the Energy Efficiency programs offered or proposed by a natural gas utility. Collectively, the Demand Programs make up the company's Demand portfolio.

"Education" means any formal program, training, or activity designed to raise awareness of, and participation in company specific Demand Programs or increase general knowledge concerning energy savings opportunities and efficiency topics. These programs shall include communication efforts designed to reach customers with energy efficiency information through a variety of mediums including but not limited to television, radio, print and web-based media.

"Energy efficiency" means reducing natural gas consumption on the customer's side of the meter while achieving substantially the same level of end-use service.

"Evaluation, measurement, and verification" or "EM&V" means a systematic, objective study conducted periodically to authenticate, assess, and report how well a Demand program is achieving its objectives, including identification and quantification of inputs, outputs, outcomes, and unintended effects.

"EM&V Costs" means the costs associated with performance of studies and activities intended to determine the actual savings and other effects from Demand Programs.

"Free rider" means a program participant who would have implemented the program measure or practice in the absence of the Demand Program. Free riders can be total, in which the participant's activity would have completely replicated the program measure; partial, in which the participant's activity would have partially replicated the program measure; or deferred, in which the participant's activity would have completely replicated the program measure, but at a time after the time the program measure was implemented.

"Fuel switching" means changing from rate regulated natural gas to rate regulated electricity or from rate regulated electricity to rate regulated natural gas for a particular end-use service. It does not include installation of any device that

relies primarily on on-site renewable energy, such as, but not limited to, a solar water heater, geothermal heat pump, or biomass gas-powered furnace.

"Goal" means a target to be achieved by a utility's Demand Portfolio. A goal may be expressed in thousand cubic feet, dekatherms, percentage reduction or limitation, and/or another quantifiable measurement approved by the Commission. When determining whether a goal is met, reductions or increases attributable to weather and economic activity will not be counted.

"Gross savings" means the values reported by a gas utility after the Demand Program activities have been completed, but prior to the time an independent, third-party evaluation of the savings is performed. As with projected savings estimates, these values may utilize results of prior evaluations and/or values in technical reference manuals. However, they are adjusted from projected savings estimates by correcting for any known data errors and actual installation rates and may also be adjusted with revised values for factors such as per-unit savings values, operating hours, and savings persistence rates. Gross savings can be indicated as first year, annual demand or energy savings, and/or lifetime energy or demand savings values.

"Hard-to-reach customers" means:

(A) Residential natural gas users who rent their residences from persons other than kin related to the third degree of affinity or consanguinity, trusts operated by and for the benefit of the users, or the users' legal guardians;

(B) Commercial natural gas users who rent their business property from persons other than the users' owners, parent companies, subsidiaries of their parent companies, their own subsidiaries, or trusts operated by and for the benefit of the same;

(C) Residential or commercial natural gas users who traditionally fail to engage in Demand Programs because of one or more barriers beyond those experienced by average residential or commercial customers in a utility's service area.

"Incentive" means a sum of money a utility may be allowed to recover, in addition to program costs and allowed lost net revenues. Incentives shall be based on the utility's verified savings from the Demand Portfolio for the previous program year and shall be calculated as described in 165:23-45-8.

"Inducement" means anything of value offered by a utility to encourage natural gas users or trade allies to engage in a Demand Program approved pursuant to this subchapter.

"Lost net revenue" means income from the retail sale of natural gas forgone by a utility directly resulting from the success of its demand portfolio, less expenses the utility was not required to pay by forgoing the sales. Lost net revenue shall be calculated using verified savings, shall exclude customer service charge revenues (non-volumetric revenues), and shall exclude revenues collected from riders with annual true-ups.

"Low-income customer" means a residential natural gas user who provides proof to a utility that the user has been determined by the appropriate authority to be eligible to receive services through the Oklahoma Department of Commerce Weatherization Assistance Program State Plan, as provided by OAC 150:80; Health Care Authority SoonerCare Choice or fee-for-service programs, as provided by OAC 317:25, 35, and 40; or Department of Human Services Temporary Assistance for Needy Families, State Supplemental Payment, Low Income Home Energy Assistance, Food Stamp, or Refugee Resettlement programs

as provided by OAC 340:10, 15, 20, 50, and 60, respectively, or similar program.

"Market potential study" means an evaluation that assesses customer population base lines, customer needs, target customer populations, and how best to address these issues.

"Market transformation" means the strategic process of influencing customer population and trade ally's decision-making that creates lasting change in customer behavior by removing barriers or exploiting opportunities to accelerate adoption of cost-effective energy efficiency as a matter of standard practice.

"Measure" means the equipment, materials, or actions that are installed or used within a Demand Program that results in measurable or verifiable savings; for example, a measure would include caulking around windows or weather stripping around doors to prevent heat loss.

"Natural gas user" means a real property freeholder or leaseholder at a specific location who consumes natural gas at that location, regardless of whether the consumer receives a gas bill directly from a utility.

"Net benefits" equal the difference between total benefits and total costs as calculated for cost-effectiveness. The economic objective of Demand Resource portfolios is to maximize net benefits. A portfolio is cost-effective if it yields positive net benefits.

"Net savings" means the total change in load that is directly attributable to a Demand Program or the Demand Portfolio. This change in energy and/or demand use shall include, implicitly or explicitly, consideration of appropriate factors. These factors shall include free ridership, participant and non-participant spillover and induced market effects.

"Net Source Energy Usage Savings" means the total change in source energy usage that is directly attributable to a Demand Portfolio. This change in source energy usage will reflect the pre-treatment source energy usage of a device or process less the post-treatment source energy usage of a device or process and shall include, implicitly or explicitly, consideration of appropriate factors. These factors shall include free ridership, participant and non-participant spillover and induced market effects.

"Net-to-gross" means a factor representing net program savings divided by gross program savings that is applied to gross program impacts to convert them into net program impacts. The factor shall be made up of a variety of factors that create differences between gross and net savings, and commonly consider the effects of free riders and spillover.

"Program" means an organized set of activities or measures directed toward the common purpose of energy efficiency that a utility undertakes or proposes to undertake to reduce future natural gas usage or growth in natural gas usage; for example, a general offer to assist homeowners in weatherizing their homes is a program.

"Program cost" means the expenditures including expenditures paid to a third-party to deliver a program, incurred by a utility to achieve natural gas savings through Demand Programs. Expenditures made by customers or third parties are not included. Programs costs must be reported in nominal dollars in the year in which they are incurred, regardless of when the savings occur. The utility's Demand Program costs are all Administrative Costs, Education costs, labor, equipment, inducement, marketing, monitoring, measurement and evaluation, and other program delivery expenditures incurred by the utility for operation of the Demand Programs, regardless of whether the costs are expensed or capitalized.

"Program implementer" means the person who puts a Demand Program into practical effect.

"Projected incentives" means the amount of estimated annual incentives calculated at the time the Demand Portfolio is submitted to the Commission for initial approval, or subsequent modification, of the Demand Portfolio.

"Projected savings" means the values reported by a natural gas utility prior to the implementation of the Demand Programs. These are typically estimates of savings prepared for Demand Program and/or Demand Portfolio design or planning purposes. These values are based on pre-program or Demand Portfolio estimates of factors such as per-unit savings values, operating hours, Net-to-Gross ratios, installation rates, and savings persistence rates. These values can be indicated as first year, annual energy savings, and/or lifetime energy values. These values can also be indicated as Gross savings and/or Net savings. Projected savings are reflected in the goal reduction as set in this Subchapter.

"Research and development" means a planned activity aimed at discovering new knowledge with the hope of developing new or improved energy efficiency processes, products, or services and the translation of these research findings into a plan or design for new or improved energy efficiency processes, products, and services.

"Savings" means a reduction in the use of natural gas or rate of growth of natural gas use, as measured in dekatherms or thousand cubic feet.

"Spillover" means the reductions in energy consumption caused by the presence of a Demand Program, beyond the Demand Program-related gross savings of the participants and without financial or technical assistance from the program. Spillover can be applied to participants, consumers directly participating in a Demand Program, and/or non-participants.

"Standard offer" means a Demand Program available to a group of customers or customers generally on the same terms and without customization.

"Trade allies" means contractors, builders, developers, retailers, skilled laborers, service providers, and wholesale distributors who support Demand Programs through sale or installation of goods and services.

"Transportation Customer" means any customer who buys gas on the open market from any provider, and engages a regulated utility's pipeline to transport the gas to the customer's facility.

"Verified savings" means values reported by a natural gas utility after review by an independent third-party evaluator. The third party evaluator shall be chosen by the utility and such costs shall be determined to be a Program cost. These values should reflect all adjustments including corrections for any known data errors and actual installation rates, and should also be adjusted by revised values for known factors such as per-unit savings values, operating hours, savings persistence rates, and net to gross adjustments.

165:45-23-4. Demand portfolio submission and implementation

(a) All natural gas utilities under rate regulation of the Commission having more than 25,000 meters in the state of Oklahoma shall propose, at least once every three years, and be responsible for the administration and implementation of a Demand Portfolio of Demand Programs within their service territories. Such proposals shall be made by filing an application with the Commission on or before May 1 of the year the programs will be effective. The application shall describe the Demand Portfolio and contain the following information:

- (1) A description of the intent of the DemandPortfolio as a whole;
- (2) A description of the intent of each Demand Program;
- (3) A description and quantification of the target market of each Demand Program, differentiated by customer sectors;
- (4) A base line describing the state of the market that each program is intended to address, taking into account applicable building energy codes and appliance and equipment energy standards;
- (5) A description of the barriers to investment in energy efficiency in the absence of each Demand Program and the ways each Demand Program will reduce or eliminate these barriers;
- (6) A description of research and public input that contributed to the development of the content of each Demand Program;
- (7) A report of the cost-effectiveness of each Demand Program and the Demand Portfolio, including program and measure-level supporting data which shall include, but not be limited to, cost-effectiveness screening assumptions of gross and net energy savings, participation and/or measure unit numbers, inducement levels, measure cost, and other non-inducement program costs;
- (8) A detailed description of the derivation of the energy, generation, and transmission and distribution avoided costs, retail cost projections, reserve margins, discount rates, and average and peak line loss assumptions used in the cost-effectiveness calculations;
- (9) A description of how each Demand Program is expected to change over its course to reflect expected changes in market penetration, technology, and other market information, as well as lessons learned;
- (10) A plan for evaluation, measurement, and verification of performance and results of the Demand Portfolio and each program, including a plan for the use of deemed savings, if applicable, or the use of statistical sampling, if applicable, or the use of metering, where appropriate; provided that costs associated with the EM&V plan shall not exceed five percent (5%) of the total three-year Demand Portfolio budget;
- (11) A plan for evaluation of the market effects of each Demand Program or applicable group of programs;
- (12) A plan for evaluation of administration and implementation of each Demand Program or applicable group of programs;
- (13) A plan for ending a Demand Program, if applicable;
- (14) A process for amending a Demand Program;
- (15) An annual budget for each Demand Program, providing detail for program costs, and differentiating evaluation, measurement, and verification costs from other program costs;
- (16) A report on how the Demand Portfolio is expected to affect rates, sales, average bills and total revenue requirement for each customer sector;
- (17) A report on how the Demand Portfolio will meet savings goals that may be in place at the time of filing and or that are otherwise proposed in the filing;
- (18) An estimate of the expected savings in natural gas usage, with location information about the source of savings, if savings are not expected to be evenly distributed throughout the utility system;
- (19) A detailed explanation of the utility's request for recovery of prudently incurred program costs, recoupment of lost net revenue, and any additional incentives the utility proposes it requires to make the programs workable;

(20) Identification of the Demand Portfolio administrator, including name, job title, business postal address, business electronic mail address, and business telephone number; and

(b) Demand Portfolios shall:

- (1) Contain Demand Programs for all customer sectors;
- (2) Strike a balance among procuring natural gas savings, educating the public, and transforming markets for energy efficiency;
- (3) Include standard offers to customers and trade allies to encourage simple ways to participate, where appropriate;
- (4) Contain customized opportunities for energy efficiency among larger customers;
- (5) Not include programs or measures that promote fuel switching, with the exception of:
 - (A) programs or measures that promote renewable technologies such as biomass-derived methane, geothermal, solar and other renewable resources; or
 - (B) in the event after notice and hearing, such programs or measures are shown to promote the goals of the Commission pursuant to this Subchapter and/or otherwise to be in the public interest;
- (6) Have an implementation schedule of no more than three years;
- (7) Address opportunities presented by new construction and renovation;
- (8) Promote comprehensive energy efficiency in buildings; and
- (9) Address programs for low-income customers and hard-to-reach customers to assure proportionate Demand Programs are deployed in these customer groups despite higher barriers to energy efficiency investments. Programs targeted to low-income or hard-to-reach customers may have lower threshold cost-effectiveness results than other programs.

(c) Demand portfolios may:

- (1) Include research and development and pilot programs that would lead to effective Demand Programs or other energy end use efficiency for Oklahoma so long as the total budget for such programs does not exceed five percent of the total budget for Demand Programs and the Commission finds the cost-effectiveness for the Demand Portfolio remains sufficient;
- (2) Encourage utility cooperation in state, regional and national programs that have the potential to save natural gas in Oklahoma;
- (3) Encourage utility cooperation in state, regional and national programs to take advantage of economies of scale, provide consistent mass media messages, or otherwise improve program administration or customer acceptance; and
- (4) Encourage utility cooperation in state, regional and national efforts to accelerate the development and improve the enforcement of building energy codes and product efficiency standards.

(d) Natural gas utilities having fewer than 25,000 meters in this state are exempt from filing application requirements in subsections (a) through (c); however, each qualifying natural gas utility shall submit to the director of the Public Utility Division for review, evidence of why it is not economically feasible to file the application requirements in subsections (a) through (c), and shall submit the following as evidence to further the goals of this Subchapter:

- (1) A description of the Demand Programs that are economically feasible to implement; and

- (2) The target market of each Demand Program.
- (e) Transportation customers shall not be subject to Demand Programs and related Program costs implemented pursuant to this Subchapter.

[Source: Added at 26 Ok Reg 1856, eff 6-25-09; Amended at 31 Ok Reg 1074, eff 1-1-17]

165:45-23-5. Commission consideration

- (a) In reviewing Demand Portfolios, the Commission will consider:
 - (1) The quality of the Demand Programs in all their elements relative to their program objectives;
 - (2) Experience of the program administrator and program implementer, if known, at designing and implementing programs;
 - (3) The cost-effectiveness for each program and for the Demand Portfolio; individual programs or individual measures for a specific program do not have to be cost-effective if their inclusion is expected to provide for greater comprehensiveness, customer or trade ally participation, or address Hard to Reach Customer participation;
 - (4) The savings goals;
 - (5) The availability of programs to all customers;
 - (6) The degree to which programs include innovative ways of increasing savings, increasing participation in programs, increasing market transformation, increasing customer education, or decreasing the cost to obtain savings or promote participation and include stakeholder interests;
 - (7) The effect on rates, average customer bills, and total cost of service;
 - (8) The effect on the environment, to the extent of Commission authority; and
 - (9) Other evidence the Commission finds relevant.
- (b) The Commission will endeavor to issue an order within ninety days of the filing of the application.
- (c) Whether a program is cost effective will be determined by the Commission and may be based on the tests found in the California Standard Practice Manual. The California Standard Practice Manual tests are to be used in conjunction with one another and no one test may be used to deem a program to be lacking cost-effectiveness. Results of the Rate Impact Measure Test contained in the California Standard Practice Manual shall also include an estimate of the impact on average customer bills.
- (d) A utility's recovery of prudently incurred program costs in rates or riders shall be determined by the Commission on a utility-specific basis; provided that:
 - (1) Administrative costs shall not exceed ten percent (10%) of program costs;
 - (2) All program costs should not add more than \$1.60 to the residential sector's monthly average customer bill, unless benefits and rationale for exceeding cap can be proven; bill impacts on other classes of customers should be reviewed and adjusted to reflect allocated Demand Program cost recovery; and
 - (3) Tariffs covering rates or riders for Demand Programs shall be updated to be in compliance with this Subchapter or in accordance with OAC 165:45-1-4(b) and (f).
- (e) Programs may be modified by the utility with forty-five days notice to the Commission without prior approval by the Commission under the following conditions:
 - (1) The program is not terminated earlier than specified in the program; and

- (2) The modification does not result in a shift of more than ten percent of the total demand portfolio budget resources away from programs serving any customer sector.
- (f) If the Commission receives an objection to the proposed program modification no later than thirty days after receiving the utility's notice, the Commission may, but is not required to, set a hearing before the Commission or an administrative law judge.

[Source: Added at 26 Ok Reg 1856, eff 6-25-09; Amended at 31 Ok Reg 1074, eff 1-1-17]

165:45-23-6. Evaluation, measurement, and verification

- (a) Utilities are responsible for timely evaluation, measurement, and verification (EM&V) of their Demand Programs. The EM&V should be conducted by an independent third party evaluator chosen by the utility and cost of such EM&V shall be determined to be a Program Cost.
- (b) The intent of the evaluation, measurement, and verification process is:
- (1) To provide a reliable calculation of the net savings produced by Demand Programs;
 - (2) To assess the effects of Demand Programs on the market for energy efficient products and services; and
 - (3) To assess the effectiveness of the administration and implementation of Demand Programs.
- (c) Utilities shall prepare and maintain a program-tracking database.
- (d) Each evaluation, measurement, and verification plan for a program will explain the methods that will be applied with an explanation of how those methods will meet the requirements of this rule.
- (e) Deemed savings, customer bill analysis, on-site metering, and statistical sampling will be permitted in appropriate applications.
- (f) Assumptions with any supporting research about the ratio between gross savings in energy consumption by utility customers and net savings attributable to Demand Programs will be included in the evaluation, measurement, and verification plan.
- (g) The evaluation, measurement, and verification process shall produce reports that are fully documented, auditable, and transparent.

[Source: Added at 26 Ok Reg 1856, eff 6-25-09; Amended at 31 Ok Reg 1074, eff 1-1-17]

165:45-23-7. Reporting

- (a) Each utility shall submit an annual report by May 1 of each year on the performance of Demand Portfolio for the preceding program year and cumulative program performance which shall include the information enumerated in this section.
- (b) The annual report shall be submitted with Verified savings information in order for PUD to evaluate incentives levels to be recovered from consumers. PUD will provide Company with written notification of incentive levels, confirming or identifying disputed amounts with rationale for dispute by September 1. Any undisputed incentives may be included in recovery according to formula rate or other tariff terms. Any disputed incentives amounts will be resolved during the subsequent formula rate filing or other tariff recovery reviews. True-up mechanisms and recovery for all other Demand Program Costs shall be included with formula rate filings or other tariff recovery mechanisms.
- (c) The report shall contain a Demand Portfolio summary reflecting the scale of each program as a part of the Demand Portfolio and will include the following:
- (1) The name of Demand Program listed by customer category;

- (2) The date program was started or date the Demand Program was revised;
- (3) The number of participating customers per Demand Program;
- (4) By Demand Program, approved projected energy savings (in decatherms) as approved;
- (5) The gross energy savings (in decatherms) and performance of each Demand Program;
- (6) The verified energy savings (in decatherms) by Demand Program and methods used to verify;
- (7) For Education programs measurements of outreach efforts, including pre-program and post-program results and copies of evaluations, surveys, focus group results, and other measurement techniques used to gauge the effectiveness of education efforts;
- (8) The levelized cost per decatherm for the Demand Portfolio, Demand Programs, and by customer sector, including all assumptions used to make the calculation;
- (9) The amount of reduced emissions and water consumption experienced by the utility, including all assumptions and calculations details, during the Demand Program period for the current program year;
- (10) The Demand Portfolio funding as a percent of total annual gas revenue;
- (11) The Demand Portfolio Net source energy savings as a percent of total gas annual usage;
- (12) The projected program costs;
 - (A) These costs should be separated into the following categories to allow review of spending:
 - (i) Administrative costs;
 - (ii) Inducements: direct payments and other inducements;
 - (iii) Education and marketing costs;
 - (iv) Program delivery costs; and
 - (v) EM&V costs.
 - (B) Workpapers to allow review and reconciliation of accounting information:
 - (i) Utilities shall provide workpapers with working formulas, calculations, and linkages to support all costs;
 - (ii) General Ledger: A copy of, or access to, the general ledger and subledgers; and
 - (iii) Comparative Trial Balances: A schedule of, or access to, comparative trial balances detailed by account for the test year and the first preceding year.
- (13) The actual program costs;
 - (A) These costs should be separated into the following categories to allow review of spending:
 - (i) Administrative costs;
 - (ii) Inducements: direct payments and other inducements;
 - (iii) Education and marketing costs;
 - (iv) Program delivery costs; and
 - (v) EM&V costs.
 - (B) Workpapers to allow review and reconciliation of accounting information:
 - (i) Utilities shall provide workpapers with working formulas, calculations, and linkages to support all costs;

- (ii) General Ledger: A copy of, or access to, the general ledger and subledgers; and
 - (iii) Comparative Trial Balances: A schedule of, or access to, comparative trial balances detailed by account for the test year and the first preceding year.
- (14) Projected incentives - including projected cost effectiveness tests;
 - (15) Actual calculated incentives - including workpapers and working spreadsheets (formulas, calculations, linkages, and assumptions) for updated cost effectiveness tests, in sufficient detail to allow review of cost effectiveness calculations;
 - (16) The utility's annual growth in metered energy for the previous three years, with a calculation of the average growth rate over that entire period by customer class or major customer class segments;
 - (17) The most current information available comparing the base line and milestones to be achieved under market transformation programs with actual conditions in the market;
 - (18) By Demand Program, provide a summary of spending, including the following:
 - (A) Administrative costs;
 - (B) Inducements, including direct payments and other inducements;
 - (C) Education and marketing costs;
 - (D) Program Delivery Costs; and
 - (E) EM&V costs.
 - (19) A statement of any funds that were committed but not spent during the year, by program, with an explanation for non-spending;
 - (20) A detailed description of each Demand Program reflecting the scale of the program as a part of the Demand Portfolio that includes the following:
 - (A) Number of customers served by each Demand Program or program category;
 - (B) Program or program category expenditures;
 - (C) Verified energy and peak demand savings achieved by the Demand Program or program category, when available; and
 - (D) A description of proposed changes in the Demand Program plans.
 - (21) A list of research and development activities included in the Demand Portfolio, their status, and a report on the connection between each activity and effective Demand Program; and
 - (22) Identification of Demand Program implementers, including names, job titles, business postal addresses, business electronic mail addresses, and business telephone numbers.
- (d) After receiving the report, the Commission:
- (1) May schedule a hearing about the performance of the programs, the outlook for the future, and other relevant issues and may consider requests from parties for a hearing;
 - (2) Will endeavor to act on the report within ninety days by accepting the report, rejecting the report, or opening an investigation to inquire further into the report.
- (e) The Commission may direct the utility to make brief quarterly or monthly reports including measurements of key metrics and news of any unexpected developments in Demand Program administration, delivery or planning.

165:45-23-8. Incentives

(a) Each utility shall be eligible to receive an incentive for successful implementation of their Demand Portfolio if:

- (1) The Demand Portfolio achieves a minimum of 80% of the company's goal ratio (Verified savings divided by Projected savings);
- (2) and the Demand Portfolio achieves a total resource cost test benefit/cost ratio (TRC:B/CR) that is greater than one; and
- (3) No incentive shall be allowed for performance of the Demand Portfolio if the Utility fails to pass all of these threshold measures (OAC 165:45-23-8(a)(1) and (2)).

(b) The Incentive will be calculated as follows:

- (1) A maximum incentive of 15 percent of Net Benefits will be paid for achievement of 100 percent (100%) or greater of the Utility's total annual Net Energy Source savings goal.
 - (A) The goal ratio (Verified savings divided by the Projected savings) must be 80% or greater to receive an incentive.
 - (B) Incentive for savings achieved between 80 and 100 percent of the savings goal will be determined by multiplying the goal ratio by the maximum incentive percentage.
- (2) The Demand Portfolio costs to be included for review of achievement of Demand Portfolio shall include all costs incurred for implementation of Demand Programs including all program costs, education or outreach program costs, Administrative costs, and EM&V costs.
- (3) Costs incurred for the implementation or reporting of the Demand Programs which are not directly incurred for a specific program are to be allocated to all Demand Programs and included as part of the Demand Program costs in determining Demand Portfolio cost effectiveness.

(c) The Incentive will be capped at 15 percent of Demand Portfolio costs inclusive of program delivery costs, education, and/or marketing outreach costs, Administrative costs and EM&V costs.

[Source: Added at 31 Ok Reg 1074, eff 1-1-17]

165:45-23-9. Stakeholder process

(a) Each utility shall have, at a minimum semi-annual stakeholder meetings, one of which is to be held within 30 days of the submittal of the Annual Report, as set forth in 165:45-23-7. Notice of such meetings shall be made at least 30 days prior to the date of the stakeholder meeting.

(b) At each meeting the utilities will present their most current data as to savings goal attainment and budget expenditures at the Demand Portfolio, customer sector and Demand Program level. The utility will highlight any Demand Program changes implemented since the previous meeting and any planned changes that will occur prior to the next meeting.

(c) In the years in which a utility plans to file a Demand Portfolio application as required by OAC 165:45-23-4, the Public Utility Division shall use one of the semi-annual stakeholder meetings to obtain stakeholder feedback on the proposed application.

**CHAPTER 50. FUEL, PURCHASED GAS, AND PURCHASED POWER
ADJUSTMENT CLAUSES**

[Authority: OKLA. CONST. art IX, § 18; 17 O.S., §§ 151 et seq. and 250 et seq.]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:50-1-1. Purpose

The General Rules Relating to Fuel, Purchased Gas, and Purchased Power Adjustment Clauses of this Chapter were promulgated in furtherance of 17 O.S. 1971, Section 152, and more specifically, 17 O.S. 1977 Supp., Section 250-64, which provided for the approval, regulation, and effectiveness of "fuel adjustment clauses," which are defined as including fuel, purchased power, and purchased gas adjustment clauses and requires certain filings, authorizes certain hearings, requires certain disclosures, and provides for certain investigations. Pursuant to such statutory authorization and requirements, the Oklahoma Corporation Commission adopted the rules of this Chapter through Cause No. 26134, Order No. 135207, effective November 1, 1977.

165:50-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"**Act**" means 17 O.S. 1977 Supp. § 250-64 and as it may hereafter be amended.

"**Affiliate,**" "**affiliated person,**" "**corporation,**" "**firm,**" or "**subsidiary**" means any person, subsidiary, firm, or corporation which is controlled by an entity that also controls the utility, or the utility or an entity controlling the utility has directly or indirectly the power to control.

"**Commission**" shall mean or refer to the Oklahoma Corporation Commission.

"**Electric distribution cooperative**" means a cooperative corporation organized and doing business under the Rural Electric Cooperative Act, 18 O.S. 1971, §§ 437-437.30, engaged in the retail distribution of electric energy.

"**Electric generation cooperative**" means a cooperative corporation organized and doing business under the Rural Electric Cooperative Act, 18 O.S. 1971, §§ 437-437.30 engaged in the generation and distribution for resale of electric energy.

"**Emergency sales of gas**" means sales of natural gas made by a public utility or subsidiary thereof to one or more interstate pipelines or other out-of-state customer pursuant to federal law which exempts such transactions from the jurisdiction of the Federal Power Commission.

"Fair field price" means the value attributed to gas produced from wells owned by a public utility, or a subsidiary, or affiliate of a public utility, which shall be the going price paid by the utility, subsidiary, or affiliate to others in the field where such production is located. If the utility, subsidiary, or affiliate is not purchasing gas in such field, then such value shall be the price paid by the utility, subsidiary, or affiliate in the nearest field where conditions are similar. The value to be attributed to residue gas owned by a public utility, or a subsidiary, or affiliate of a public utility, from gas processing plants shall be the going price paid by the utility, subsidiary, or affiliate to others from the same plant. If the utility, subsidiary, or affiliate is not purchasing gas from said plant, then the value shall be the price paid by the utility, subsidiary, or affiliate at the nearest plant where conditions are similar. However, the Commission may require an adjustment of the fair field price when it deems it proper to do so based on information before it.

"Fuel adjustment clause" means any mechanism which allows a public utility or electric generating cooperative to automatically adjust its charges above or below the base amount included in its rates, based upon changes in costs of fuel for generation of electricity, purchased power, or purchased gas, and shall include purchased gas adjustment clauses.

"Heat rate" means a measure of the efficiency of an electric generating station, computed by dividing the total British thermal unit content of the fuel burned by the resulting net kilowatt-hours generated.

"Line loss" means the kilowatt-hours of electricity lost in the operation of an electric transmission or distribution system.

"Public utility" or **"utility"** means any individual, firm, association, partnership, corporation, or any combination thereof, other than a municipal corporation or their lessees, trustees and receivers, owning or operating for compensation in this state equipment or facilities for producing, generating, transmitting, distributing, selling, or furnishing electricity, or transmitting, directly or indirectly, or distributing combustible hydrocarbon natural or synthetic natural gas for sale to the public or for wholesale, unless its wholesale rates are regulated by a federal agency.

"PUD" means the Public Utility Division of the Oklahoma Corporation Commission.

"Purchased gas adjustment clause" means fuel adjustment clause which allows a public utility to automatically adjust its charges above or below the base amount included in its rates, based upon changes in the cost of purchased gas.

"Purchased power adjustment clause" means any mechanism which allows an electric public utility or electric distribution cooperative to adjust its charges above or below the base amount included in its rates based upon changes in costs of wholesale power purchased from others.

"Thousand cubic feet" or **"Mcf"** means that quantity of gas occupying one thousand cubic feet of space at 60 degrees Fahrenheit (60° F) and an absolute pressure as stated in the utility's tariffs.

[Source: Amended at 36 Ok Reg 704, eff 7-25-19]

165:50-1-3. Applicability of rules of practice

Insofar as practicable and except as otherwise specified either in this Chapter or by statute, the Commission's Rules of Practice [OAC 165:5] shall be applicable to all proceedings contemplated by this Chapter.

SUBCHAPTER 3. CONTENTS AND STANDARD PROVISIONS OF ADJUSTMENT CLAUSES

165:50-3-1. Contents of adjustment clauses

This Chapter shall apply in the design of all fuel, purchased gas, and purchased power adjustment clauses:

(1) For the purpose of determining fuel or gas costs, the price paid for the fuel or gas shall be computed at the actual cost of fuel or gas purchased from nonaffiliated persons, firms, and corporations; and the actual cost of the production of fuel owned by the public utility or received from affiliated persons, firms or corporations, and in the case of gas, the fair field price for gas owned by the public utility or received from affiliated persons, firms, or corporations.

(2) The cost of fuel or gas shall be the price paid at the point of delivery into the utility system. In the event the transportation is performed by an affiliated person, firm, or corporation as defined in 165:50-1-2, which is not subject to the regulatory jurisdiction of the Commission, a regulatory agency of another state having jurisdiction, or the Federal Energy Regulatory Commission or successor agency, the charges made for transportation shall be, if allowed at all, only such as the Commission finds fair, just, and reasonable, for purposes of this Chapter. Transportation charges approved by this Commission, a regulatory agency of another state having jurisdiction, or by the Federal Energy Regulatory Commission, or successor agency shall be included for purposes of this Chapter, if allowed by the Commission. In instances where the affiliate's approved transportation charges are adjustable, the Commission may evaluate the reasonableness of the rate paid in terms of the maximum and minimum allowed by the adjustable charges, taking into account all of the terms and conditions of, and the circumstances surrounding, the transportation service being provided. The proposed adjustment charge shall not include the cost of transportation beyond its point of delivery into that portion of the utility system regulated by the Commission unless there is presented to the Commission and the Commission is persuaded by reliable evidence which clearly points to the conclusion that failure to do so will substantially threaten the ability of the utility to earn a reasonable rate of return.

(3) The amount of electric energy produced by hydro-electric generating plants and purchased by the public utility proposing the adjustment charge shall be deducted from the amount of electric energy to which any fuel cost applies.

(4) The actual efficiency or heat rate of electric public utilities shall be utilized and line losses shall be considered only if reliable evidence clearly points to the conclusion that failure to do so will substantially threaten the ability of the utility to earn a reasonable rate of return.

(5) Fuel removed from stockpiles or gas removed from storage shall be taken into consideration on the basis of the last-in first-out method of inventory accounting.

(6) No estimated fuel adjustment shall be allowed.

(7) Each public utility authorized by the Commission to recover the cost of fuel, purchased gas, or purchased power shall adhere to the standard fuel, purchased gas, or purchased power adjustment provisions of this Chapter

unless the Commission determines after an appropriate evidentiary hearing that the public interest is better served by permitting the utility to file a special tariff for the recovery of costs addressed in this Chapter.

[Source: Amended at 12 Ok Reg 2139, eff 7-1-95]

165:50-3-2. Standard fuel and purchased gas adjustment clause provisions

(a) Standard fuel and purchased gas adjustment provisions set forth in (1) and (2) of this subsection are hereby adopted for use, insofar as feasible, by the public utilities subject to the jurisdiction of the Commission.

(1) **Electric.** The method for use in compensating for charges in cost of fuel is as follows:

(A) Each utility generating electricity and having an approved cost of fuel adjustment clause in its tariff, subject to the Commission's jurisdiction, shall compensate for any variations in the average cost of fuel burned at the utility's thermal generating plant(s) above or below the cost of fuel used in each tariff on which the rate was based, by adjusting the charges, either upward or downward per kWh, billed under its tariffs, approved agreements and special contracts by employing a method approved by the Commission in a public hearing process.

(B) The monthly average actual heat content of each fuel burned and thermal efficiency of each generating plant shall be reported in British Thermal Units (BTU) on a monthly basis to PUD. The actual fuel burned and generation for each generating plant shall be reported by fuel type in BTU content, tons, or gallons, as appropriate.

(C) Line losses shall be considered only if reliable evidence clearly points to the conclusion that failure to do so will substantially threaten the ability of the utility to earn a reasonable rate of return. If line losses are allowed by the Commission, the utility will submit a copy of the most recent applicable line loss study. Line losses will be evaluated for reasonableness on a case-by-case basis.

(2) **Gas.**

(A) **Pressure base.** For the purposes of calculations made in this paragraph, all volumes of gas will be adjusted to a pressure base of the pounds per square inch absolute on which the utility's rates are established and in accordance with gas measurement procedures standard in the industry. All reports to the Commission will be at 14.73 p.s.i.a. pressure base, detailing the conversion multipliers used.

(B) **Determination of Mcf and price paid therefore upon initial receipt of gas.** The total Mcf and the dollar amounts paid therefore shall be calculated for each accounting month on the basis of:

(i) The volumes of gas purchased by the utility or an affiliate from nonaffiliated producers, gatherers, processors, pipelines, and transporters, and the price paid for such gas, and

(ii) The volumes valued at the fair field price represented by gas received from wells owned by the utility or an affiliate and residue gas owned by the utility or an affiliate from gas processing plants, which gas is delivered into the utility's

pipeline system, into the pipeline system of an affiliate of the utility, or directly to the utility's customers.

(C) Adjustments to calculations. Adjustments to the total Mcf and dollar amounts as determined pursuant to (B) of this paragraph shall be made for volumes of gas removed by treating or processing facilities and compression facilities located on the downstream side of any initial volume or value determination point. The total Mcf and associated value removed from the gas stream due to such treating, processing, and compression shall be subtracted from the total Mcf and dollar amounts as determined pursuant to (B) of this paragraph.

(D) Gas storage injections and withdrawals. Accurate records shall be kept to determine the total Mcf and associated value of gas injected into or withdrawn from storages. Each utility having gas in underground storage shall report to the Commission on or before the sixtieth (60th) calendar day following the last day of each month the amount and purchased cost of gas in storage as of the last day of the preceding month. This report shall be made on a form as approved by the Commission. Total Mcf and associated value shall be subtracted from the total amounts determined pursuant to (B) of this paragraph for any gas injected into storage during the accounting month for which the average cost of gas is being determined. Total Mcf and associated value for any gas withdrawn from storage during the accounting month for which the cost of gas is being determined shall be determined using the last-in, first-out method of inventory accounting and shall be added to the total amounts determined pursuant to (B) of this paragraph.

(E) Other provisions. Special provisions which are approved by the utility tariffs.

(F) Determination of the weighted average cost per Mcf. The weighted average cost per Mcf for each accounting month shall be calculated by totaling the Mcf and dollar amounts as determined pursuant to the preceding subparagraphs and divided the total dollar amount by the total Mcf.

(G) Application of the average cost of purchased gas. Whenever the average cost of purchased gas, determined as provided in the preceding subsections, is less than the base cost per Mcf as specified in the utility's approved tariff, the applicable rate per Mcf of gas delivered will be reduced by an amount equal to the amount that the utility's average cost of purchased gas is less than the base cost per Mcf as specified in the utility's approved tariff. When the average cost of purchased gas is more than the base cost per Mcf as specified in the utility's approved tariff, the applicable rate per Mcf of gas delivered will be increased by an amount equal to the amount that the utility's average cost of purchased gas is more than the base cost per Mcf as specified in the utility's approved tariff. The purchased gas adjustment to be applied to any bill will be based on the average cost of purchased gas for the latest gas purchase accounting month for which said cost has been determined.

(H) Credits. Any credits, refunds, or allowances on previously purchased gas received by the utility from any supplier shall be

deducted from the cost of gas before computations are made each month.

(I) **Average actual heat content.** Where available, monthly average actual heat content of gas delivered to end users shall be provided in BTUs to PUD during its annual fuel audit of the utility. The information shall be supplied by utility-defined regions, if available.

(b) Variations from the standard provisions set forth in this Section must be sought pursuant to applications for permission to use such clauses to be filed pursuant to 165:50-5-1.

[Source: Amended at 12 Ok Reg 2139, eff 7-1-95; Amended at 36 Ok Reg 704, eff 7-25-19]

165:50-3-3. Standard purchased power adjustment clause provisions; electric cooperatives

(a) A Commission-approved purchased power adjustment provision may be adopted for use by electric distribution cooperatives subject to the jurisdiction of the Commission. The method for use by electric distribution cooperatives in compensating for change in the cost of purchased power is as follows:

(1) Each electric distribution cooperative having an approved purchased power adjustment clause in its tariffs designed to compensate for any variation in the cost of purchased power above or below the base costs upon which the tariffs are based, by adjusting the charges, either upward or downward per kWh, billed under its tariffs, agreements, and special contracts approved by the Commission, shall employ the following formula to compensate for such variation: $P.A. = (A)$, where:

(A) P.A. = Power cost adjustment per kWh to be made, and

(B) A = the amount in cents or fraction thereof by which the average cost of power per kWh paid to suppliers of power by the cooperative exceeds or is less than the cost of power per kWh used in the tariffs as the cost of power on which the rate was based. Any credits, refunds, or allowances on previously purchased power by the cooperative from any suppliers shall be deducted from the cost of purchased power before calculating "A" each month.

(2) The Commission shall include in a purchased power adjustment clause an allowance for line losses if a preponderance of evidence points to the probable conclusion that failure to do so will result in less than a reasonable rate of return for the cooperative. When line losses are included in the purchased power adjustment charge, the following formula shall be used:

$P.A. = A \div (1-B)$, where:

(A) P.A. and A have the same meaning as in the formula in (a)(1) of this Section.

(B) B = The actual percentage of power losses expressed decimally.

(C) This power loss will be computed monthly based on the following formula:

(i) X = The total purchases in the twelve (12) month period ending one (1) month prior to the sales period.

(ii) Y = The total sales for the preceding twelve (12) month period.

(D) Then: $B = (X - Y) \div X$

(3) Each electric distribution cooperative shall submit the following to PUD, and other parties as directed by a Commission Order or tariff, on a monthly basis:

- (A) The purchased power adjustment clause, including the factors enumerated in (2) above;
 - (B) A rolling twelve (12) month average line loss schedule.
- (4) Each electric distribution cooperative shall file annually each calendar year a five (5) year analysis of the line loss by month with the purchased power adjustment clause that coincides with the filing of the annual Rural Utility Service (RUS) Form 7.
- (5) Line losses will be evaluated for reasonableness on a case-by-case basis. Variations from the standard provisions set forth in this Section must be sought pursuant to applications for permission to use such clauses, to be filed pursuant to 165:50-7-1.

[Source: Amended at 12 Ok Reg 2139, eff 7-1-95; Amended at 36 Ok Reg 704, eff 7-25-19]

SUBCHAPTER 5. REQUIREMENTS AND PROCEDURES RELATING TO ADJUSTMENT CLAUSES EMPLOYED BY PUBLIC UTILITIES

165:50-5-1. Authorization for use of adjustment clauses

- (a) If upon application by any public utility, after investigations and public hearing, the Commission finds that the changes in the price of fuels required for the generation of electricity by any electric public utility, the changes in the price of purchased electricity required for distribution by any public utility, or the changes in the price of purchased gas required for distribution by any gas utility portends a likely and substantial threat to the ability of the utility to earn a reasonable rate of return, or are likely to cause the utility to have an excessive rate of return, or are likely to substantially impair the ability of the utility to acquire adequate supplies of fuel or gas, the Commission may approve suitable fuel adjustment clauses to be superimposed upon the existing rate schedules of the public utility. The Commission shall design the fuel adjustment clause to allow the electric or gas public utility to increase or decrease charges to the consumer according to changes in the cost of fuel, purchased power, or purchased gas as compared to the price of such fuels or power as reflected in the base rates.
- (b) Insofar as feasible, the standard fuel and purchased gas adjustment provision adopted pursuant to 165:50-3-2, shall be employed by public utilities subject to the jurisdiction of the Commission. However, each public utility which applies, pursuant to (a) of this Section, for authorization to employ fuel, purchased gas, and/or purchased power adjustment clauses shall be entitled to show that by reason of special circumstances affecting such utility, the standard provisions or portions thereof are not appropriate for use by it; in such case the Commission shall prescribe an appropriate clause for such utility, which clause shall, however, conform to the requirements of 165:50-3-1.
- (c) Notice of hearings held pursuant to (a) of this Section shall be given in the form and manner prescribed by the Commission

[Source: Amended at 10 Ok Reg 2647, eff 6-25-93]

165:50-5-2. Monthly adjustments with respect to any approved fuel adjustment clause

- (a) No proposed monthly fuel adjustment, purchased power adjustment, or purchased gas adjustment by any public utility shall become effective until after the Commission has had an opportunity, as provided in (c) of this Section, to determine that the adjustment is calculated in accordance with the terms and conditions of the

applicable fuel adjustment clause.

(b) Prior to the effectiveness of any monthly fuel, purchased gas, or purchased power adjustment proposed by a public utility, such utility shall file with the Commission, by submitting the following to PUD and other parties as directed by a Commission Order or tariff:

- (1) A statement of the items and costs making up the average cost of fuel per million Btu and associated costs in dollars and cents or fraction thereof.
- (2) A summary of its fuel and gas purchase invoices and its computations of the proposed monthly fuel adjustment or purchased gas adjustment charges.
- (3) A summary of inventory records of fuel and gas going into and taken out of stockpile or storage.
- (4) A report containing the average unit price, the change in the average unit price, the volume purchased, and a brief explanation of such unit cost increase.
- (5) Any other records which PUD may request, including, but not limited to, the heat rate efficiency and delivery efficiency for affected electric public utilities and the actual capacity factor for each generating facility utilized to produce electric power.

(c) The records and computations submitted pursuant to (b) of this Section shall be open to public inspection at the Commission.

(d) PUD or any other affected party shall have five (5) business days after the records and computations prescribed in (b) of this Section have been submitted to request a hearing thereon. If a hearing is not requested, the proposed adjustment charge shall become effective as submitted. In the event PUD or an affected party requests a hearing, and the Commission decides to hold a hearing on the information submitted, it shall notify the public utility within such five (5) business day period, set the matter for a public hearing to commence within thirty (30) calendar days thereafter, and give notice thereof at least three (3) business days prior to the commencement of such hearing by publication in a newspaper of general circulation in the area served by such utility. The issue to be determined at such hearing shall be either or both of the following determinations

- (1) Whether charges or credits made under the fuel adjustment clauses are based upon the actual prices paid for fuel, purchased gas, or purchased power and are properly computed in accordance with the applicable adjustment clause.
- (2) Whether the fuel adjustment clauses should be discontinued, amended, or suspended.

(e) In the event that the Commission determines that it is necessary to set any proposed adjustment charge for hearing, the proposed charge shall nevertheless become effective at the option of the utility following the expiration of the five (5) business day period after its records and computations have been submitted, pending the Commission's finding with respect to such charges. However, in the discretion of the Commission, the effectiveness of the proposed charge may be conditioned upon the submission by the utility with the Commission of an assurance satisfactory to the Commission, which may include a bond with surety of the utility's ability and willingness to refund to its customers any such amounts as the utility may collect from them in excess of the charge approved by the Commission in its finding. If the Commission has not approved, in whole or in part, or denied the proposed charge within seven (7) business days subsequent to the commencement of such hearing, it shall promptly submit a written explanation of its failure to do so to the President Pro Tempore of the Senate, the Speaker of the

House of Representatives, and the Office of the Governor.

[Source: Amended at 10 Ok Reg 2647, eff 6-25-93; Amended at 16 Ok Reg 2260, eff 7-1-99; Amended at 36 Ok Reg 704, eff 7-25-19]

165:50-5-3. Monitoring of fuel adjustment clauses

The Commission shall continually monitor and oversee the application of all fuel adjustment clauses. A general public hearing relating to the fuel, purchased gas, and purchased power adjustment clauses of all public utilities shall be held whenever the Commission deems it necessary, but no less frequently than once every twelve (12) months. The following procedure shall be followed with respect to such hearings:

(1) Upon application by PUD, an order shall be entered setting a hearing date, and notice shall be given in the form and manner prescribed by the Commission in such order.

(2) PUD, or any other person or entity objecting to the operation of a utility's fuel, purchased gas, or purchased power adjustment clause, shall, at or before such general hearing, file with the Commission a complaint in writing setting forth the reasons for such objection. Thereafter, a separate proceeding involving such utility shall be conducted, in accordance with the Commission's Rules of Practice [OAC 165:5].

(A) If no complaint is filed before or at such general hearing with respect to the operation of the fuel, purchased gas, or purchased power adjustment clauses of a utility, no further proceedings shall be had thereon.

(B) If a complaint is filed, the Commission shall at the general hearing set a date for a further hearing with respect to each utility against which a complaint has been filed. The issues to be determined at such further hearing shall be one or more of the following determinations:

(i) Whether the charges or credits are based upon the actual prices paid for fuel, purchased power, or purchased gas.

(ii) Whether the charges or credits are properly computed in accordance with the applicable fuel adjustment clause.

(iii) Whether the fuel adjustment clause should be amended, discontinued, or suspended because of a change in circumstances since the fuel adjustment clause was approved.

(3) If the Commission finds that the charges or credits are not based upon the actual prices paid for fuel, purchased gas, or purchased power or are not properly computed in accordance with the applicable adjustment clause, it shall recompute the charges or credits and shall direct the public utility to take such action as may be required to insure that the charges or credits properly reflect the actual prices paid for fuel, purchased gas, or purchased power and are properly computed in accordance with the applicable adjustment clause for the applicable period.

[Source: Amended at 10 Ok Reg 2647, eff 6-25-93; Amended at 36 Ok Reg 704, eff 7-25-19]

165:50-5-4. Disclosure in customer bills

Each public utility subject to a fuel adjustment clause shall separately disclose in its customer bills the per unit cost of its fuel, purchased power, or purchased gas adjustment. Upon request by any individual consumer, such utility

shall also disclose for the month for which the request is received:

- (1) The actual amount of the adjustment in dollars and cents.
- (2) The per unit rate and amount thereof in dollars and cents of fuel, purchased power, or purchased gas included in its basic rate.

165:50-5-5. Report of fuel adjustment clauses by the electric generation cooperatives

(a) Electric generation cooperatives which determine to utilize a fuel adjustment clause shall report such fuel adjustment clause to the Commission. Such cooperatives shall file monthly with PUD and other parties as directed by Commission Order or tariff by submitting the following:

- (1) A report of adjustments charged or credited to its wholesale electric customers on its current monthly billing.
- (2) A statement of the items and costs making up the average cost of fuel per million Btu and associated costs in dollars and cents or fraction thereof.
- (3) A summary of its fuel and gas purchase invoices and its computation of the proposed monthly fuel adjustment charges.
- (4) A summary of inventory records of fuel going into and taken out of stockpile or storage.
- (5) A report containing the average unit price, the change in the average unit price, the volume purchased, and a brief explanation of any change in such unit cost.
- (6) Any other records pertaining to fuel adjustment charges deemed necessary by the Commission including, but not limited to, the heat rate efficiency and delivery efficiency for affected electric generating cooperatives and the actual capacity factor for each generating facility utilized to produce electric power.

(b) The records and computations provided for in this Chapter shall be open to public inspection at the office of the Commission.

[Source: Amended at 16 Ok Reg 2260, eff 7-1-99; Amended at 36 Ok Reg 704, eff 7-25-19]

165:50-5-6. Inapplicability of certain rules to electric distribution cooperatives

Sections 165:50-3-1, 165:50-3-2, and 165:50-5-1 through 165:50-5-5 in this Chapter shall be inapplicable to electric distribution cooperatives, except as provided in this Chapter.

[Source: Amended at 36 Ok Reg 704, eff 7-25-19]

165:50-5-7. Periodic rate investigations

The rates charged to their customers by public utilities and electric distribution cooperatives which utilize fuel, purchased gas, or purchased power adjustment clauses shall be periodically investigated by the Commission in order to determine whether such rates are just and reasonable. In conducting such investigations, the following procedures shall be followed:

- (1) Except in those cases described in (3) of this Section, such proceedings by the Commission shall be commenced by application made by the Commission staff or by order of the Commission.
- (2) Such proceedings shall include public hearings.
- (3) A general rate proceeding instituted by a public utility or cooperative shall be deemed to constitute a rate investigation hereunder.

(4) In such rate investigations or proceedings, income, expenses and investments of affiliated persons, subsidiaries, firms, or corporations and emergency and off-system sales of electricity or gas shall be given appropriate consideration by the Commission in determining the financial requirements of the utility or cooperative.

[Source: Amended at 10 Ok Reg 2647, eff 6-25-93; Amended at 12 Ok Reg 2139, eff 7-1-95]

SUBCHAPTER 7. PURCHASED POWER ADJUSTMENT CLAUSES FOR ELECTRIC DISTRIBUTION COOPERATIVES

165:50-7-1. Approval of purchased power adjustment clauses

(a) No purchased power adjustment clause of any kind shall apply nor be used in computing bills for retail electric service which has not been first approved by the Commission.

(b) If the Commission finds that the changed price of purchased wholesale power required for distribution by any electric distribution cooperative threatens the ability of the cooperative to earn a reasonable rate of return, the Commission may, after investigation and public hearing, approve a suitable purchased power adjustment clause to be superimposed upon the existing retail electric rate schedule of the cooperative and designed only to recapture such increased cost of wholesale power.

(c) The Commission shall design the purchased power adjustment clause to allow the electric distribution cooperative to increase or decrease its charges for retail electric service as provided in its approved electric rates only for the changes in the cost of purchased power when the price of such purchased power differs from the price which is reflected in its basic approved retail rates. It shall include in a purchased power adjustment clause an allowance for line losses if a preponderance of evidence points to the probable conclusion that failure to do so will result in less than a reasonable rate of return for the cooperative.

165:50-7-2. Monitoring of application of adjustment clauses

Whenever the Commission approves a purchased power adjustment clause pursuant to 165:50-3-3 and 165:50-7-1, the clause shall apply to all similar distribution cooperatives affected by such increased cost. In addition, the Commission shall continually monitor and oversee the application of the adjustment clauses. The Commission shall hold a public hearing thereon whenever it deems it necessary, but no less frequently than once every twelve (12) months.

The following procedure shall be followed with respect to such hearings:

(1) Upon application by the Commission staff, an order shall be entered setting a hearing date and notice thereof shall be given in the form and manner prescribed by the Commission in such order.

(2) The Commission staff, or any other person or entity objecting to the operation of an electric distribution cooperative's purchased power adjustment clause, shall, at or before such general hearing, file with the Commission a complaint in writing setting forth the reasons for such objection. Thereafter, an appropriate proceeding involving such electric distribution cooperative shall be conducted, in accordance with the Commission's Rules of Practice [OAC 165:5].

(A) If no complaint is filed before or at such general hearing with respect to the operation of the purchased power adjustment clause of an electric distribution cooperative, no further proceeding shall

be had thereon.

(B) If a complaint is filed, the Commission shall at the general hearing set an appropriate time for the complaint to be heard, and the issues to be determined at such hearing shall be one or more of the following determinations:

(i) Whether the charges or credits made under the adjustment clauses are based upon the actual prices paid for purchased power.

(ii) Whether the charges or credits are properly computed in accordance with the applicable adjustment clause.

(iii) Whether that portion representing fuel adjustment charges made by an electric generation cooperative are fair, equitable, and properly computed.

(iv) Whether the purchased power adjustment clause should be amended, suspended, or discontinued because of a change in circumstances since the purchased power adjustment clause was approved.

(3) If the Commission finds that the charges or credits are not based upon the actual prices paid for purchased power or are not properly computed in accordance with the applicable adjustment clause, it shall re-compute the charges or credits and shall direct the electric distribution cooperative to take such action as may be required to insure that the charges or credits properly reflect the actual price paid for purchased power and are properly computed in accordance with the applicable adjustment clause for the applicable period.

[Source: Amended at 12 Ok Reg 2139, eff 7-1-95; Amended at 36 Ok Reg 704, eff 7-25-19]

165:50-7-3. Disclosure of per unit rate in consumer's bill

Each electric distribution cooperative applying a purchased power adjustment charge in its bills shall separately disclose the per unit rate of the purchased power adjustment charge. Upon request by any individual consumer, such cooperative shall also disclose for the month for which the request is received:

- (1) The dollars and cents of the purchased power adjustment charge.
- (2) The base cost of purchased power included in the retail rate.

165:50-7-4. Applications through a common representative

Nothing in this Chapter shall prevent similarly situated electric distribution cooperatives from making, or the Commission from accepting, filings and applications as shall be required simultaneously and through a common representative.

CHAPTER 55. TELECOMMUNICATIONS SERVICES

[Authority: OKLA. CONST. art IX, § 18; 17 O.S., §§ 131 et seq., 137, and 139.101 et seq.]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:55-1-1. Purpose; short title

(a) This Chapter establishes the Oklahoma Corporation Commission Rules and Regulations Governing and Regulating the Operations of Telecommunications

Service Providers and Telecommunications in Oklahoma which may be cited by the short title as the Oklahoma Telecommunications Rules.

(b) This Chapter is intended to define good business practices under normal conditions, assure adequate service and prevent unfair charges to the customers and/or end-users and protect the telecommunications service provider from unreasonable demands.

(c) This Chapter is further intended to allow Oklahoma consumers to receive timely benefits from lawful market-driven price and service competition among interexchange carriers ("IXCs") and telecommunications service providers in the long distance and local exchange markets by applying such regulatory requirements as are necessary to assure public access to long distance and local exchange services under tariff provisions and Terms of Service which are not unjustly discriminatory and to preclude unjust and unreasonable rates or charges in such markets. It is also intended that if an IXC provides local exchange service, the local exchange portion of its business shall be subject to the rules and regulations prescribed in this Chapter for telecommunications service providers.

(d) Notwithstanding the provisions of OAC 165:55-1-12, nothing in this Chapter is intended to supersede the Commission's extant orders regarding intraLATA toll competition or imputation. In the event future Commission orders modify the scope of such competition or imputation, such orders shall be controlling.

[Source: Amended at 10 Ok Reg 2651, eff 6-25-93; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2661, eff 7-1-99; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-1-2. Jurisdiction

The Oklahoma Corporation Commission, by virtue of Article IX § 18 *et seq.* of the Constitution of the State of Oklahoma, enactments of the Oklahoma Legislature, and federal law has the authority and responsibility to supervise, regulate, and control the Oklahoma businesses of telecommunications service providers and interexchange telecommunications carriers in Oklahoma which are subject to regulation of the Commission. In addition, the Commission has the authority to designate eligible telecommunications carriers, to grant certificates of convenience and necessity to data-only providers and to enact rules and regulations in connection therewith. No person or corporation not otherwise a telecommunications service provider within the meaning of this Chapter shall be deemed such solely because of the manufacture, distribution, installation, or maintenance of end-user premises communication equipment and accessories.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-1-3. Application of rules

This Chapter shall apply to every telecommunications service provider, data-only provider, and IXC in Oklahoma subject to the jurisdiction of the Commission. This Chapter shall apply to a Telephone Cooperative Corporation only to the extent specifically authorized by 18 O.S. § 438.1 *et seq.* This Chapter shall not apply to the interexchange portion of an IXC's business, except as set forth in OAC 165:55-1-8. This Chapter shall not apply to the non-regulated services offered by a data-only provider, except as specified in OAC 165:55-3-1.

[Source: Amended at 10 Ok Reg 2651, eff 6-25-93; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-1-4. Definitions

The following words and terms, when used in this Chapter, shall have the following meanings, unless the context clearly indicates otherwise. These definitions shall be supplemented by the definitions contained in 17 O.S. § 139.102. To the extent there is a conflict between a definition contained in 17 O.S. § 139.102 and a definition in this Section, the definition in this Section shall be applicable to this Chapter:

"Access service" means any tariffed wholesale service provided by one LEC to another LEC, CLEC, interexchange carrier certificated by the Commission or an end-user that allows for access to the local exchange telecommunications network, excluding local interconnection arrangements.

"Applicant for telecommunications service" means any person, partnership, cooperative corporation, corporation, or lawful entity requesting service(s) from a telecommunications service provider.

"Authorized carrier" means any telecommunications carrier that submits a change, on behalf of an end-user, in the end-user's selection of a provider of telecommunications service with the end-user's authorization verified in accordance with the procedures specified in this Chapter.

"Base rate area" means the developed area within each exchange service area designated in the tariffs of the telephone company or if not so designated, an area within one-half (1/2) mile radius of the serving central office.

"Basic local service" means all residential and business telecommunications voice and/or relay service which meets the standards set forth in 165:55-13-10, including lines beyond the first line into a residence or business.

"Billing agent" means an entity which provides bills to an end-user for services received from a telecommunications service provider.

"Billing and collection service" means the wholesale service provided by a TSP or IXC for the processing and delivery of customer bills, on behalf of a third party.

"Bona Fide Request" means a written request delivered to a telecommunications service provider requesting services and interconnection provided for in this Chapter.

"CIC" means carrier identification code which identifies a provider of toll services by a three- or four-digit number.

"Campus" means multiple buildings located on a single tract or area of land or on adjacent and abutting tracts of land where all the buildings and land are subject to majority ownership by the same person. A campus may be intersected or traversed by public thoroughfares provided that the segments created would be continuous in the absence of the thoroughfare. A tract or tracts of land used for farming and/or ranching shall not be considered a "campus."

"Carrier of last resort" means a telecommunications service provider as designated by the Commission pursuant to OAC 165:55-13-12.

"Central office" means an operating unit of a telecommunications service provider by which connections are established between end-users' lines and between end-users' lines and trunks or toll lines.

"Circuit" or **"Channel"** means one communication path between two (2) or more points suitable for transmitting information.

"Class of service" or **"Customer class"** means a description of service furnished to an end-user in terms of type of rate, location, and use.

"CLEC" means a Competitive Local Exchange Carrier.

"Clear and conspicuous" means notice that would be apparent to the reasonable consumer.

"Competitive Provider" means an entity providing the same or equivalent services through the use of its own or leased facilities including resellers. The service must satisfy the Commission's rules of minimum service standards regardless of whether the provider is regulated by the Commission.

"Competitive service" means a telecommunications service determined by the Commission to be subject to effective competition for a relative geographic and service(s) market, after notice and hearing.

"Competitive Test" means an evaluation by the Commission to determine after notice and hearing, for a particular service on an exchange by exchange basis, the existence of competition among an ILEC, a non-affiliated facilities based Competitive Provider, and one (1) other non-affiliated Competitive Provider. Such exchanges shall be the same as those on file with the Commission on the date of approval of the Transition Plan.

"Cramming" means the placement of unauthorized, misleading, or deceptive charges on a customer's telephone bill for products or services that were never ordered by the customer.

"CSD" means the Consumer Service Division of the Public Utility Division of the Oklahoma Corporation Commission.

"Customer" means any person, firm, partnership, cooperative corporation, corporation, or lawful entity that receives regulated telecommunications services supplied by any telecommunications service provider or IXC.

"Customer trouble report" means any oral or written report given to a telecommunications service provider's repair service by an end-user of telephone services relating to a physical defect or difficulty or dissatisfaction with the provision of the telecommunications service provider's regulated services. Each trouble report shall count as a separate report regardless of whether subsequent reports relate to the same physical defect, difficulty, or dissatisfaction with the provision of the telecommunications service provider's regulated services.

"Data-only provider" means a company exclusively providing non-voice services, to include Special Universal Services as defined at 17 O.S. § 139.102(39), which, pursuant to OAC 165:55-3-1, has obtained a Certificate of Convenience and Necessity.

"Demarcation point" means the physical location at which responsibility for operating and maintaining facilities passes from one person to another.

"Deniable charge" means a charge for those regulated services for which nonpayment may result in a disconnection of basic local service.

"Dialing parity" means that a person that is not an affiliate of a telecommunications service provider is able to provide telecommunications services in such a manner that end-users have the ability to route automatically, without the use of any access code, their telecommunications to the telecommunications service provider of the end-user's designation from among two (2) or more telecommunications service providers.

"Directory" means the published listing of all telephone numbers, other than those requested by the end-user not to be published, for all end-users in a service area regardless of the local exchange telecommunications service provider selected by the end-user.

"Disconnection of service" means an arrangement made by the end-user or TSP for permanently discontinuing service by terminating the contract and/or removing the telephone service from the end-user's premises.

"Eligible Telecommunications Carrier" ("ETC") means a common carrier designated by the Commission pursuant to OAC 165:55-23-2 and 47 U.S.C.

§§ 254 and 214(e). ETC also means a Lifeline Broadband Provider designated by the Federal Communications Commission.

"End-user" means the customer to whom a telephone number is assigned.

"Executing carrier" means any telecommunications carrier that effects a request that an end-user's telecommunications carrier be changed. A carrier may be treated as an executing carrier, however, if it is responsible for any unreasonable delays in the execution of carrier changes or for the execution of unauthorized carrier changes, including fraudulent authorizations.

"Facilities-based provider" means an entity providing telecommunications services predominately through the use of its own facilities, including UNEs, and other technologies capable of meeting all local telecommunications service requirements while complying with the Commission's quality of service rules.

"FCC" means the Federal Communication Commission.

"Filed" means to present a document to and have it accepted by the Office of the Court Clerk of the Oklahoma Corporation Commission.

"ILEC" means an Incumbent Local Exchange Company.

"Individual Case Basis" ("ICB") means a condition, pursuant to the provisions of the tariff, in which the rates and charges for an offering are developed based on the circumstances of each customer.

"Initial Tariffs" means the first tariffs approved after, or in conjunction with, the granting of a Certificate of Convenience and Necessity.

"Interexchange telecommunications service" means telecommunications service provided between locations within different certified telephone exchange service areas.

"InterLATA call" means any call which is originated in one LATA and terminated in another LATA.

"Interstate call" means any call which is originated in one state and terminated within the boundaries of another state.

"IntraLATA call" means any call which is originated and terminated within the boundaries of the same LATA, regardless of whether such call crosses LATA boundaries prior to reaching its termination point.

"Internet Subscriber Fee" means any fee that is paid to a telecommunications service provider for Internet service that is in addition to the access connection charge.

"Intrastate call" means any call which is originated and terminated within the boundaries of the State of Oklahoma, regardless of whether such call crosses state boundaries prior to reaching its termination point.

"LATA" means Local Access and Transport Area as defined in the Code of Federal Regulations, Title 47 Part 53.3.

"Less than Minimum Service Provider" means a CLEC which offers local exchange service that does not meet all minimum service standards, as set forth in OAC 165:55-13-10.

"Letter of Agency" ("LOA") means the written authorization that gives permission to change the customer's telecommunications services and/or the customer's provider or to share that customer's network information with representatives or associates of the telecommunication company or telecommunications carrier.

"Local interconnection arrangements" means a contract for interconnection, including resale, as governed by section 251 of the Communications Act of 1934 (47 U.S.C. § 251), as amended, the Federal

Communication Commission rules and the rules of the Commission.

"Local operator services" means the automatic or live assistance provided to a customer, which enables the customer to arrange for billing or completion of a local call. Local operator services may include, but are not limited to, line status verification, busy line verification, emergency interrupt, and calls to emergency numbers (e.g., 911).

"Long run incremental cost" ("LRIC") means the long run forward-looking additional cost caused by providing all volume-sensitive and volume-insensitive inputs required to provide the total demand associated with a service or network element offered as a service, using economically efficient current technology efficiently deployed. LRIC also equals the cost avoided, in the long run, when a service or network element offered as a service is no longer produced. LRIC excludes costs directly and solely attributable to the production of other services or network elements offered as services, and unattributable costs which are incurred in common for all the services supplied by the firm. The long run means a period long enough so that the cost estimates are based on the assumption that all inputs are variable.

"Network element" means a facility or equipment used in the provision of a telecommunications service. Such term also includes features, functions and capabilities that are provided by means of such facility or equipment, including end-user numbers, databases, signaling systems and information sufficient for billing and collection or used in the transmission, routing or other provision of a telecommunications service.

"Network interface" means the normal demarcation point separating the telecommunications service provider's regulated facilities and equipment from the unregulated facilities, equipment, or systems provided by the end-user. The provision of the network interface is the responsibility of the telecommunications service provider.

"New service provider" means a service provider that did not bill the end-user for service during the service provider's last billing cycle. This definition excludes service providers which bill the customer solely on a per transaction basis.

"New services" means any service(s), except access services or interconnection services, for which a rate element does not presently exist, which does not replace an existing service, and that enlarges the range of service options available to end-users.

"Nonbasic service" means any telecommunication service not included in basic local service, local interconnection arrangements and/or access service.

"Non-deniable charge" means a charge for those not-regulated services for which nonpayment shall not result in a disconnection of basic, local service.

"Not-regulated service" or "Non-regulated service" means the offering of service(s) where the rates and/or terms and conditions for such service(s) are not-regulated by the Commission. These would include any interstate services offered FCC tariffs or rules, and any taxes, fees and surcharges applicable to those services, as well as any intrastate services that are not regulated by the Commission.

"Number Portability" means the ability of end-users of telecommunications services to retain, within the same wire center, their existing telecommunications number without impairment of quality, reliability or convenience when switching from one telecommunications service provider to another.

"Packaging" means the sale of two or more services offered by or in conjunction with the services of a TSP to a customer of a TSP for a single price.

"Rates" means all charges assessed by a TSP or IXC.

"Regulated telecommunications service" means the offering of telecommunications service(s) directly to the public where the rates and/or terms and conditions for such service(s) are regulated by the Commission. These would include services offered from intrastate tariffs approved by the Commission including any taxes, fees and surcharges applicable to those services, and interstate services when the Commission is enforcing the FCC slamming rules.

"Rural telephone company" means a LEC to the extent that such entity:

(A) Provides telecommunications service to any local exchange study area that does not include either:

- (i) Any incorporated place of 10,000 inhabitants or more, or any part thereof, based on the most recently available population statistics of the U.S. Bureau of Census; or,
- (ii) Any territory, incorporated or unincorporated, included in an urbanized area, as defined by the U.S. Bureau of Census as of August 10, 1993.

(B) Provides local exchange service, including exchange access, to fewer than 50,000 access lines;

(C) Provides local exchange service to any local exchange carrier study area with fewer than 100,000 access lines; or,

(D) Has less than fifteen percent (15%) of its access lines in communities of more than 50,000 on the date of enactment of the Federal Telecommunications Act of 1996.

"RUS" means the Rural Utility Services.

"Service" means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used. Service shall not include the provision of nontelecommunications services, including but not limited to the printing, distribution, or sale of advertising in telephone directories, maintenance of inside wire, customer premises equipment and billing and collection, nor does it include the provision of mobile telephone service, enhanced services and other not-regulated services.

"Service interruption" means service outage, total failure, or complete loss of service due to a trouble condition in the facilities of a telecommunications service provider.

"Service provider" means any entity that offers a product or service to a customer, the charge for which appears on the bill of the billing agent. This definition shall include only providers that have continuing relationships with the end-user that will result in periodic charges on the end-user's bill, unless the service is subsequently canceled.

"Service territory" means a geographic area served by a telecommunications service provider.

"Slamming" means the unauthorized switching of an end-user's telecommunications service provider or presubscribed IXC.

"Submit" means to present a document to the Director of the Public Utility Division.

"Submitting carrier" means any telecommunications carrier that requests on the behalf of an end-user that the end-user's telecommunications carrier be changed and seeks to provide retail services to the end-user. A carrier may be

treated as a submitting carrier, however, if it is responsible for any unreasonable delays in the submission of carrier change requests or for the submission of unauthorized carrier change requests, including fraudulent authorizations.

"Supported Services" means services identified in 47 CFR part 54, or OAC 165:59, as amended from time to time, for which an ETC receives support from the federal USF, OUSF or OLF, or as otherwise may be ordered by the Commission.

"Suspension of service" means an arrangement made at the initiative of the TSP for temporarily discontinuing service without terminating the contract or removing the telephone service from the customer's premises.

"SWBT" means Southwestern Bell Telephone Company d/b/a AT&T Oklahoma.

"Tariff" means all or any part of the body of rates, tolls, charges, classifications, and terms and conditions of service relating to regulated services offered, the conditions under which offered and the charges therefore, which have been filed with and approved by the Commission.

"Telecommunications carrier or Company" means a telecommunications service provider ("TSP") or an interexchange telecommunications carrier ("IXC").

"Telecommunications service provider" ("TSP") means all authorized providers of local exchange service, whether an incumbent LEC or a competitive LEC.

"Telephone bill" means a billing agent's invoice, issued in compliance with this Chapter, for products or services rendered by itself and by a service provider(s), if any.

"Telephone company" or "Company" means any person, firm, partnership, corporation, or other entity engaged in furnishing regulated local exchange telephone services under the jurisdiction of the Commission on July 1, 1995, pursuant to a Certificate of Convenience and Necessity or grandfathered authority.

"Terms of Service" means rates, charges and terms and conditions for regulated services that a TSP or IXC elects to post, in a searchable format, on a publicly availability website.

"Tribal Land" means any federally recognized Indian tribe's reservation, Pueblo, or Colony, including former reservations in Oklahoma, Alaska Native regions established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688), Indian allotments; Hawaiian Home Lands-areas held in trust for Native Hawaiians by the state of Hawaii, pursuant to the Hawaiian Homes Commission Act, 1920 July 9, 1921, 42 Stat. 108, et.seq., as amended; and any land designated as such by the Commission for purposes of this subpart pursuant to the designation process in 47 CFR § 54.412.

"Unauthorized carrier" means any telecommunications carrier that submits a change, on behalf of an end-user, in the end-user's selection of a provider of telecommunications service but fails to obtain the end-user's authorization verified in accordance with the procedures specified in this Chapter.

"Unauthorized change" means a change in an end-user's selection of a provider of telecommunications service that was made without authorization verified in accordance with the verification procedures specified in this Chapter.

"Unbundled network element" ("UNE") means a component of the ILEC's telecommunications network utilized to provide telecommunications services.

"Unbundling" means to provide to any telecommunications service provider nondiscriminatory access to network elements on an unbundled basis at any technically feasible point on rates, terms and conditions that are just, reasonable and nondiscriminatory.

"Unfilled application" means a firm application by an end-user for new service or a different class of service which has not yet been accomplished.

"Wireless Provider" means provider of radio communication service carried on between mobile stations or receivers and land stations, and by mobile stations communicating among themselves and which permits a user generally to receive a call that originates and/or terminates on the public switched network or its functional equivalent, regardless of the radio frequencies used.

"Zone" means a service territory described as such by an incumbent LEC.

165:55-1-5. Interpretation of rules

The words contained in this Chapter shall be given their ordinary and customary meanings, with technical terms and words being construed as generally understood within the telecommunications industry, except where otherwise expressly provided. Where the rules of this Chapter establish service standards or objectives, substantial compliance will be deemed in compliance with this Chapter. Where the rules of this Chapter impose an absolute obligation upon the telecommunications service provider or IXC, strict compliance is required.

[Source: Amended at 10 Ok Reg 2651, eff 6-25-93; Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-1-6. Relief from rules

Whenever compliance with any requirement of this Chapter would result in unreasonable hardship upon or excessive expense to the telecommunications service provider, IXC, data-only provider, an end-user, consumer or for other good cause shown, the Commission may, by order, waive or modify the requirements of this Chapter upon application of any interested person filed in accordance with the Commission's Rules of Practice, OAC 165:5. The Commission may grant temporary relief pending hearing.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-1-7. Exceptions or variances

If a telecommunications service provider receives an exception or variance from this Chapter in its tariffs or terms and conditions of service, such exception or variance shall be clearly shown on such tariffs or terms and conditions of service, sufficient to plainly bring to the Commission's attention the exact nature of the said exception or variance. Any exception or variance not so marked or identified in such tariff or terms and conditions of service shall be superseded by this Chapter to the extent that said exception or variance is in conflict therewith. Upon approval by the Commission, the variance shall indicate the number of the pertinent Commission order.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-1-8. Supremacy

(a) Every tariff, rule, regulation, or agreement relating to the subject matter of this Chapter is superseded by this Chapter and is deemed amended to conform with this Chapter.

(b) The interexchange portion of an IXC's business shall continue to operate under the regulatory requirements and procedures prescribed by their respective certification orders and OAC 165:55-1-1, 165:55-1-3, 165:55-1-4, 165:55-1-5, 165:55-1-6, 165:55-1-11, 165:55-1-15, 165:55-1-16, 165:55-3-1, 165:55-3-2, 165:55-3-3, 165:55-3-22, 165:55-3-23, 165:55-5-3, 165:55-5-10, 165:55-5-10.2, 165:55-5-10.4 165:55-5-11, 165:55-5-13, 165:55-5-14, 165:55-5-20, 165:55-5-34, 165:55-5-35, 165:55-9-2.1, 165:55-15-1, 165:55-15-5, 165:55-19-1, 165:55-19-3, and 165:55-21-1.

[Source: Amended at 10 Ok Reg 2651, eff 6-25-93; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 15 Ok Reg 3054, eff 7-15-98; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-1-9. Rules conform to law

This Chapter shall be construed to conform with the Constitution and laws of Oklahoma.

165:55-1-10. Controversy over rules

Whenever a controversy exists in connection with the interpretation of the rules of this Chapter or their applicability, or any right or duty imposed thereby, the Commission, upon application of any interested person and after notice and hearing, will enter such order thereon as it may deem appropriate.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-1-11. Severability

This Chapter will not relieve in any way a telecommunications carrier or end-user from any of its duties under the laws of this State or the United States. If any provision of this Chapter is held invalid, such invalidity shall not affect other provisions or applications of this Chapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Chapter are declared to be severable. This Chapter shall not be construed so as to enlarge, diminish, modify, or alter the jurisdiction, powers, or authority of the Commission or the substantive rights of any person. The Commission may make exceptions to this Chapter for good cause shown.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 17 Ok Reg 19, eff 9-27-99 (emergency); Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-1-12. Conflict with Commission order

This Chapter shall not alter or amend any order of the Commission directed to a telecommunications service provider, except where the provisions thereof are in direct conflict with this Chapter, in which case this Chapter shall supersede the provisions of any such order to the extent of conflict only.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-1-13. Conflict with filed tariffs

All tariffs and terms and conditions of service heretofore filed or submitted by a telecommunications service provider and approved or deemed approved by the Commission are not revoked, altered or amended by this Chapter, except to the extent they are in direct conflict with any provision of this Chapter, in which event such tariffs and terms and conditions of service are superseded by this Chapter to the extent of conflict only.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Revoked at 16 Ok Reg 2261, eff 7-1-99]

165:55-1-15. Exclusions

The term "telecommunications service provider" as used in this Chapter shall not include IXCs, which shall be regulated as provided for by OAC 165:55-1-8.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-1-16. Universal service

Consistent with 17 O.S. § 139.107, all Contributing providers, as defined at 17 O.S. § 139.102, operating within the State of Oklahoma shall contribute, on a nondiscriminatory basis, into the Oklahoma Universal Service Fund. Further, each Contributing provider, whether subject to the jurisdiction of the Commission or not, shall annually provide contact information to the OUSF Administrator for the purpose of correspondence regarding contributions to the OUSF. Compliance with this requirement can be accomplished by the submission of an annual report, submission of an affirmation that the Contributing provider filed the FCC Form 499, or submission of full contact information for the Contributing provider.

[Source: Added at 15 Ok Reg 3054, eff 7-15-98; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

SUBCHAPTER 3. CERTIFICATES, REPORTS, AND RECORDS

PART 1. CERTIFICATES OF CONVENIENCE AND NECESSITY

165:55-3-1. Certificate of Convenience and Necessity

(a) **Requirement for Certificate of Convenience and Necessity.** No person, firm, association, corporation or cooperative shall furnish telecommunications service to any end-user or customer in the State of Oklahoma without first having secured a Certificate of Convenience and Necessity from the Commission.

(b) **Requirement for Certificate of Convenience and Necessity prior to receiving funding from the Oklahoma Universal Service Fund.** Any provider, excluding OneNet, requesting funding from the Oklahoma Universal Service Fund for the provision of Special Universal Services shall first obtain a Certificate of Convenience and Necessity from the Commission.

(c) **Application for Certificate of Convenience and Necessity.** Every provider of telecommunications services making application to the Commission for a Certificate of Convenience and Necessity in accordance with 17 O.S. § 131 *et seq.* shall be required to demonstrate its financial, managerial and technical ability to provide the requested telecommunications services in the State of Oklahoma. An application for a certificate to provide telecommunications service in the State of

Oklahoma shall be made pursuant to and in conformance with the requirements of Oklahoma law and any additional requirements set forth in this Chapter. An original and five (5) copies of the application for Certificate of Convenience and Necessity shall be filed at the Commission's Office of the Court Clerk. A filing fee pursuant to the Commission's Rules of Practice, OAC 165:5, shall be required.

(d) Application requirements for Certificate of Convenience and Necessity. An application for a Certificate of Convenience and Necessity shall include information and attachments which are certified as true and correct by an officer of any corporate applicant, or an authorized representative of an unincorporated applicant. The Commission reserves the right to deny or dismiss, without prejudice, any application found not to be in compliance with this subchapter. If an applicant is unable to produce any information required in this subsection, the applicant must provide a statement explaining why the information is not included.

(1) The application shall contain the following information:

(A) The complete name, including any and all trade name(s) under which business will be conducted pursuant to 18 O.S. § 1140, corporate or other headquarters street address and names/addresses of principal or corporate officers of the entity proposing to sell telecommunications service or provide Special Universal Services to the public in the State of Oklahoma. The telephone number and, if applicable, the toll-free number will also be included.

(B) If different from those provided pursuant to subparagraph (1) (A) of this Section, the names and address(es) of all officers and corporate or primary offices of the applicant for a Certificate of Convenience and Necessity located in the State of Oklahoma and the name(s) and address(es) of senior management personnel responsible for Oklahoma operations.

(C) A description of any facilities that will be used to provide services in Oklahoma, and whether applicant intends to add additional facilities that will be used to provide services in Oklahoma.

(D) A written affirmation, signed before a Notary Public by someone with authority to bind the corporation or entity, containing the following statements:

(i) That the information contained in the application is true and correct;

(ii) That the applicant is familiar with and will comply with all federal and state laws, and the rules and orders of this Commission;

(iii) That for each area or exchange(s) an applicant proposes to serve, the applicant agrees to offer the provisioning of service to all end-users within that area or exchange(s) on a nondiscriminatory basis;

(iv) That the applicant understands the Commission's contempt authority;

(v) That the applicant will contribute to the Oklahoma Universal Service Fund pursuant to OAC 165:59;

(vi) That the applicant will comply with the provisions of 165:55-13-10.1 and will include a statement to this effect in its tariffs;

(vii) That the applicant is a data-only provider or is seeking a CCN exclusively in order to seek reimbursement from the OUSF under 17 O.S. § 139.109.1(B)(4) for the provision of Special Universal Services, or, if not, that prior to commencing to provide local exchange service the applicant will notify each Public Safety Answering Point ("PSAP") within their service area that they will be providing service within the area served by the PSAP, and provide each PSAP with contact information in case there are issues with the completion of calls by the customers of the Applicant. The attachment shall also state that the Applicant will comply with the requirements of 17 O.S. § 131 and will collect and disburse the E911/911 fee as required by 63 O.S. § 2814. Such affirmation should also include a statement that applicant will provide proof to the Commission of such compliance within thirty (30) days following Applicant's initial provisioning of local service;

(viii) That the applicant understands that before it ceases, discontinues, or curtails operations and/or service, it must file with the Commission and provide each affected customer, in the manner required by the Commission, notice of the intended action, and, if the change impacts the availability or operation of E911 service, must also provide notice to any E911/911 Database Management Service Provider, pursuant to OAC 165:55-15-5;

(ix) A statement that the applicant, its owners (individuals and/or entities) or investors holding more than five (5) percent ownership, or companies, or officers and senior management, are not currently under investigation or involved in any pending or concluded investigations or litigation, either in this state or in another state or jurisdiction, for violation of any deceptive trade or consumer protection law or regulation related to the operation of a regulated industry, if that is the case;

(x) A statement that the applicant, or its owners (individuals and/or entities) or investors holding more than five (5) percent ownership, or companies, or officers and senior management, have not been fined, found guilty, sanctioned or otherwise penalized either in this state or in another state or jurisdiction for violation of any consumer protection law or regulation related to the operation of a regulated industry, if that is the case; and

(xi) If either of the statements required in (ix) and (x) above is untrue, a detailed explanation of the circumstances of the investigation or fine, sanction, or penalization including a detailed description of the cause(s), the number of customers involved, and current status of the proceeding.

(xii) A statement as to whether applicant currently seeks state or federal universal service funding of any kind for services provided in the state(s) in which applicant is currently authorized to provide service, and whether

applicant intends to seek Oklahoma Universal Service Fund funding in Oklahoma.

- (2) The attachments to the application shall include the following:
- (A) Copies of the applicable Articles of Incorporation, Articles of Organization, and/or partnership agreement, and/or Joint Venture agreement and, where they exist, by-laws or operating agreement of the applicant for a Certificate of Convenience and Necessity and any entity or individual owning a whole or controlling interest in the applicant for a Certificate of Convenience and Necessity.
 - (B) A copy of the applicable certificate, issued by Oklahoma's Secretary of State, to transact business in the State of Oklahoma, and evidence that applicant is in good standing with the Oklahoma Secretary of State.
 - (C) A copy of the Corporate Trade Name Report, issued by Oklahoma's Secretary of State, shall be provided for each and every trade name utilized by the telecommunications service provider, data-only provider, or IXC, i.e. a "d/b/a".
 - (D) Proof that the third-party surety bond, surety bond or letter of credit required in subsection (h) of this Section has been obtained, if applicable.
 - (E) Documentation indicating the applicant's organizational structure and ownership such as:
 - (i) For corporations, limited liability companies, partnerships and/or joint ventures, the applicant's stockholders annual reports and SEC 10Ks for the last three (3) years, if applicable, or, if the company is not publicly traded, its financial statements for the last three (3) years, if available, or other documentation as may be requested by the Commission.
 - (ii) A sole proprietor, as well as a limited liability company, shall provide financial statements for the last three (3) years, if available, or other documentation as may be requested by the Commission.
 - (F) A brief description of its history of providing the requested telecommunications service, Special Universal Services, or other telecommunications services, in order to demonstrate its managerial experience. The history shall include a list of the geographic areas in which it previously provided service and/or is currently providing service and such other documentation as may be requested by the Commission. Applicants for a Certificate of Convenience and Necessity without prior experience shall list the experience of each principal officer, partner, or the sole proprietor in order to demonstrate its managerial ability, and/or provide other documentation as may be requested by the Commission.
 - (G) A description of the applicant's experience in providing telecommunications services or Special Universal Services in order to demonstrate its technical abilities. In the case of applicants for a Certificate of Convenience and Necessity without prior experience, the applicant shall provide documentation which supports its technical abilities or other documentation as may be requested by the Commission.

(H) The name, address and toll-free telephone number that an end-user may contact concerning repairs and maintenance, complaints, billing questions, refunds and any other customer service-related inquiries.

(I) The contact name, address, and telephone number of the individual with overall responsibility for repairs and maintenance, complaints, billing questions, refunds, and any other customer service-related inquiries. This will be the principal contact for CSD regarding complaints involving the telecommunications service provider, IXC or data-only provider.

(J) The contact name, address and telephone number of the principal contact to be utilized by the Commission's Public Utility Division regarding any questions which are not related to customer service.

(K) A list of all other states, if any, where:

- (i) The applicant is authorized to operate;
- (ii) Authorization to operate is pending;
- (iii) A request for authorization has been denied, including the reason stated for denial, with a certified copy of the denial document attached; and/or,
- (iv) Authorization has been revoked, with a certified copy of the revocation document attached.

(L) A complete set of proposed initial tariffs which include the terms and conditions of service and all rates and charges for each service classification shall be in a format consistent with Subchapter 5 of this Chapter or a statement that the applicant will file tariffs pursuant to OAC 165:55-3-3. A company may elect to post Terms of Service on a publicly available website, subsequent to the approval of their initial tariffs.

(M) A description of the applicant's proposed service territory.

(N) A description of the deposit, if the applicant intends to collect deposits, and disconnection rules to be applied to end-users by the applicant, all of which shall conform to Subchapters 9 and 11 of this Chapter.

(O) A statement setting forth the accounting system to be utilized by the applicant (the FCC-approved Uniform System of Accounts or another accounting system) and a Chart of Accounts.

(P) A listing of the complete name(s), including any trade name(s), corporate or primary headquarters street address(es) and names/addresses of principal officers of any affiliates, individuals or investors holding more than five (5) percent ownership, and/or subsidiaries providing telecommunications and/or other services to the entity making the application proposing to sell the requested telecommunications service or Special Universal Services to the public in the State of Oklahoma, unless otherwise ordered by the Commission.

(Q) An affirmation that the Applicant will maintain a record of complaints in a manner consistent with OAC 165:55-3-23.

(R) A copy of the applicant's proposed letter of authorization to be used by the telecommunications service provider to obtain written authorization from an end-user to switch telecommunications

service providers or a copy of the text of the proposed script of the verification, which must be approved by the Director of the Public Utility Division, consistent with OAC 165:55-19-1.

(S) A statement regarding whether the applicant intends to utilize the services of a billing agent to issue bills to end-users.

(T) A description of applicant's parameters for determining creditworthiness if applicant intends to perform credit checks prior to providing service to a potential end-user.

(3) The Public Utility Division Staff may issue data requests for additional information during its initial review of an application.

(4) Agreements in accordance with OAC 165:55-17-7, if any, between telecommunications service providers shall be provided to the Public Utility Division as soon as such agreement(s) become available. Protective relief may be sought pursuant to 51 O.S. § 24A.22.

(e) Requirements applicable to CCN requests exclusively for purposes related to 17 O.S. § 139.109.1(B)(4). An applicant for a CCN for the limited purpose of qualifying as an eligible provider, as that term is defined at 17 O.S. § 139.102(11), in order to be eligible to seek reimbursement from the OUSF for the provision of Special Universal Services as provided at 17 O.S. § 139.109.1(B)(4) shall submit an application consistent with the requirements of this subsection.

(1) All applications for a CCN pursuant to this subsection shall include the information specified at OAC 165:55-3-1(d)(1)(A), 165:55-3-1(d)(1)(B), 165:55-3-1(d)(1)(D)(i), 165:55-3-1(d)(1)(D)(ii), 165:55-3-1(d)(1)(D)(iv), 165:55-3-1(d)(1)(D)(v), 165:55-3-1(d)(1)(D)(vii), 165:55-3-1(d)(1)(D)(ix), 165:55-3-1(d)(1)(D)(x), 165:55-3-1(d)(1)(D)(xi), 165:55-3-1(d)(1)(D)(xii), 165:55-3-1(d)(2)(A), 165:55-3-1(d)(2)(B), 165:55-3-1(d)(2)(C), 165:55-3-1(d)(2)(E), 165:55-3-1(d)(2)(F), 165:55-3-1(d)(2)(G), 165:55-3-1(d)(2)(H), 165:55-3-1(d)(2)(I), 165:55-3-1(d)(2)(J), 165:55-3-1(d)(2)(K), and 165:55-3-1(d)(2)(P).

(2) The application shall also contain the following information:

(A) A full description of any investigations of the applicant, its owners (individuals and/or entities) or investors holding more than five (5) percent ownership, or companies, or officers or senior management in conjunction with participation in any local, state or federal universal service fund or subsidy program.

(B) A full description of any investigations of the applicant, its owners (individuals and/or entities) or investors holding more than five (5) percent ownership, or companies, or officers or senior management officers, owners, senior management, investors or affiliates for potential violations of laws, rules or regulations related to the operation of an entity within a regulated industry.

(C) For each investigation described in (A) and/or (B) provide an indication of the disposition of any ongoing investigations and, if concluded, the investigating agency's findings.

(D) A listing of all affiliates, subsidiaries, or partnerships that participate or collaborate in any manner with the applicant in providing and/or administering any services supported by a local, state or federal universal service fund or subsidy program.

(E) An affirmative statement that the applicant understands and agrees that any request for CCN authority beyond the limited purpose of qualifying for reimbursement from the OUSF for the

provision of Special Universal Services under 17 O.S. § 139.109.1(B)(4) would require an application for authority under OAC 165:55-3-1(C).

(F) An informational tariff describing the services to be offered, any limitations on the availability of those services within Oklahoma, and general terms and conditions.

(f) **Requirements for expanding authority under an existing CCN.** An Applicant wishing to expand its service authority under an existing Certificate of Convenience and Necessity granted pursuant to Chapters 55, 56, 57 and/or 58, must make application to the OCC and provide all information and notice as required in Sections 165:55-3-1(c) and 165:55-3-2. However, information submitted in support of a previous Application for certification, if such Application was approved by the OCC, may be used in support of the current Application by providing a written affirmation, signed before a Notary Public, and by someone with authority to bind the Applicant, stating that the previously submitted information is still true and correct, and circumstances have not changed. If the previously submitted information is no longer true and correct, or if circumstances have changed, Applicant shall submit updated information along with a written affirmation fully explaining all changed circumstances. This section shall not apply to an Applicant wishing to expand its existing service territory granted under an existing CCN. Such an application shall be filed pursuant to OAC 165:55-17-3.

(g) **Approval requirement.** No Certificate of Convenience and Necessity shall be granted except by order of the Commission, after notice and hearing, if any, as directed by the Commission or unless otherwise provided in this Chapter, or by the laws of the State of Oklahoma.

(h) **Surety requirements for an applicant for Certificate of Convenience and Necessity.** To ensure the protection of the applicant's end-users, the applicant that intends to collect deposits from end-users, for a Certificate of Convenience and Necessity shall maintain a third-party surety bond, surety bond or irrevocable letter of credit, as may be determined by the Commission during the certification process, as set forth in this subsection.

(1) An applicant that does not have at least one million dollars (\$1,000,000) net book value invested in telephone plant and/or telephone facilities located in Oklahoma shall be required to post and maintain a third-party surety bond, surety bond or irrevocable letter of credit in, at a minimum, an amount sufficient for the indemnification of one hundred ten percent (110%) of its projected customer deposits.

(2) The third-party surety bond, surety bond or irrevocable letter of credit shall be maintained as long as the telecommunications service provider is furnishing telecommunications services in the State of Oklahoma pursuant to this Chapter, unless modified or released pursuant to Commission order.

(3) The Commission may modify the requirements of this subsection for good cause shown, after such notice and hearing, if any, as the Commission may require.

(i) **Transferability of certificates.** Any certificate granted under this section shall not be transferable without prior approval of the Commission and shall continue in effect until further order of the Commission.

(j) Prior to providing service in Oklahoma, the Applicant shall jointly test interoperability with the 911/E911 PSAPs in their service area and provide verification of interoperability to the Commission and the PSAP. If testing is not applicable to the services for which CCN authority has been requested, a statement

to that effect will be included in the CCN application.

165:55-3-2. Notice requirements when filing an Application for Certificate of Convenience and Necessity

Applicants seeking a Certificate of Convenience and Necessity shall meet all notice requirements as set forth in this Section.

(1) Requirements for filing an Application of a Certificate of Convenience and Necessity. An Application of a Certificate of Convenience and Necessity shall be delivered by mail, electronic mail or by personal service to the following people and/or entities:

(A) The Attorney General of the State of Oklahoma;

(B) The Director of the Public Utility Division of the Oklahoma Corporation Commission;

(i) The Application delivered to the Director of the Public Utility Division shall be file-stamped by the Oklahoma Corporation Commission Court Clerk's Office and shall be delivered to the Director of the Public Utility Division in electronic copy form only.

(ii) The Director of the Public Utility Division shall place the Application of Certificate of Convenience and Necessity on the Commission's website, <http://www.occeweb.com>, within five (5) business days of receipt.

(C) The governing body of each Enhanced 911 Public Safety Answering Point (E911 PSAP) operating in the proposed service territory of the Applicant.

(D) The ILEC in the proposed service territory.

(E) Sections (C) and (D) of this subsection shall not apply to applications for a certificate of convenience and necessity filed exclusively for the limited purpose of receiving reimbursement from the OUSF for the provision of Special Universal Services in accordance with 17 O.S. § 139.109.1(B)(4).

(2) Publication of a Notice of Application of a Certificate of Convenience and Necessity. The Notice required by 17 O.S. § 132 shall be published as follows:

(A) In a newspaper of general circulation once a week for two (2) consecutive weeks with at least seven (7) days apart in each service territory affected.

(B) Publication shall be at the expense of the applicant.

(C) A "Proof of Publication" document shall be filed with the Oklahoma Corporation Commission Court Clerk's Office within fifteen (15) days of the last publication date.

(3) Requirements for a Notice of Hearing on an Objection to a Certificate of Convenience and Necessity.

(A) When an objection is made in a cause of an Application of a Certificate of Convenience and Necessity, the Applicant shall promptly file a Notice of Hearing at the Oklahoma Corporation Commission Court Clerk's office requesting a date for a hearing on

the merits of the application.

(B) Within ten business days prior to the date of the hearing, the Applicant shall serve the notice by delivering a file-stamped copy by mail, electronic mail or by personal service to the following people and/or entities:

- (i) The Attorney General of the State of Oklahoma;
- (ii) The Director of the Public Utility Division of the Oklahoma Corporation Commission; and
- (iii) Any Interveners, including the person or entity filing the objection.

165:55-3-3. Approval of initial tariffs

(a) No later than twelve (12) months after being granted a Certificate of Convenience and Necessity, pursuant to OAC 165:55-3-1, a telecommunications service provider, or IXC shall file an application requesting approval of its initial tariffs, unless filed pursuant to OAC 165:55-3-1(d)(2)(L), which include the terms and conditions of service and all rates and charges for each service classification, in a format consistent with Subchapter 5 of this Chapter. Notice of such filings shall comply with OAC 165:55-5-11(d).

(b) The initial tariffs shall not become effective except by order of the Commission after such notice and hearing, if any, as directed by Commission.

(c) Not later than thirty (30) days after approval of the initial tariffs, an original and two (2) copies of the approved tariffs, which conform to OAC 165:55-5-20, shall be provided to the Public Utility Division.

(d) With the application requesting approval of a complete set of proposed initial tariffs, the telecommunications service provider, or IXC, shall file proof that the third-party surety bond, surety bond or letter of credit required in OAC 165:55-3-1(h) has been obtained, if applicable.

(e) This subsection does not apply to providers with a Certificate of Convenience and Necessity limited to authority to receive reimbursement for the provision of Special Universal Services in accordance with 17 O.S. § 139.109.1(B)(4). Such entities will provide informational tariffs in accordance with OAC 165:55-3-1(e)(2)(F).

PART 3. GENERAL REQUIREMENTS FOR RECORDS AND REPORTS

165:55-3-10. Who shall file [REVOKED]

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Revoked at 16 Ok Reg 2261, eff 7-1-99]

165:55-3-11. Accounting system

(a) The Uniform System of Accounts of the FCC prescribed for Class A and Class B telephone companies, or other system of accounts acceptable to the Commission, may be adopted by a telecommunications service provider.

(b) Regardless of the system of accounts adopted by a telecommunications service provider pursuant to subsection (a), in a general rate proceeding, the Commission Staff may request the production of data and reports in a format other than as kept pursuant to the designated system of accounts. Disputes related to this Section may

be submitted to the Commission for resolution.

(c) No change in, or departure from, the system utilized by the telecommunications service provider will be permitted except upon order of the Commission made after notice and hearing.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

PART 5. RECORD REQUIREMENTS

165:55-3-20. Location of records

All records, including tariffs, required by this Chapter shall, at the option of the telecommunications service provider, be kept at the general office of each telecommunications service provider or on a publicly available website and shall be made available to the Commission or its authorized representative at any reasonable time upon request.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-3-21. Retention of records

All records required by this Chapter shall be preserved for two (2) years, except for an ETC's records confirming subscriber's eligibility for purposes of the State and/or Federal Lifeline programs as well as the records confirming household eligibility for State and/or Federal Lifeline support. Records confirming subscriber and household eligibility for purposes of initial or annual recertification for State or Federal Lifeline programs shall be kept for three (3) years.

[Source: Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-3-22. Records to be provided to the Commission

(a) **Annual report of operations.** Each telecommunications service provider and IXC shall provide to the Director of the Public Utility Division an annual report, in a format developed by the Director of the Public Utility Division, no later than April 1 of the year following the reporting year. Proposed revisions to the Annual Report format will be posted to the OCC website at least ninety (90) days prior to their effective date. All carriers will be notified of the posting via e-mail, based on addresses supplied by carriers. Any carrier that objects to the proposed revisions to the Annual Report format may file an Application with the Commission requesting relief from the applicability of the format changes. The filing of an Application will suspend the applicability of the proposed format revisions until an Order is issued by the Commission. Unless an Order revising the Annual Report format is entered at least 90 days prior to the April 1 filing deadline, carriers will not be required to file an Annual Report in the revised format until the following year.

(b) **Confidentiality of annual report.** All non-publicly available information included in the annual report or an ETC's FCC Form 481 or FCC Form 555 will be considered confidential by the OCC.

(c) **Proof of third-party surety bond, surety bond or irrevocable letter of credit.** Where applicable, not later than May 1 of each year, each telecommunications service provider and IXC which does not have at least one million dollars (\$1,000,000) net book value invested in telecommunications plant and/or telecommunications facilities located in the State of Oklahoma, shall provide annually, to the Director of the Public Utility Division, proof of the continuing existence and sufficiency of the required third-party surety bond, surety bond or irrevocable letter of credit providing coverage at a level of at least one

hundred and ten percent (110%) of customer deposits. Such proof shall be in a format developed by the Director of the Public Utility Division and approved by the Commission.

(d) **Exchange maps.** Each telecommunications service provider shall provide the Director of the Public Utility Division two (2) copies of updated exchange maps when the boundaries of an exchange(s) are changed. The maps and descriptions shall be in sufficient detail to permit the location of exchange boundaries on the ground, and be consistent with the format set forth in this subsection.

(1) Each exchange map provided after the effective date of this Chapter shall conform to the following:

(A) One exchange service area per sheet.

(B) Each map shall be on eight and one-half by eleven inches (8.5" x 11") (or larger sheet which folds down to eight and one-half by eleven inches (8.5" x 11")), twenty pounds (20 lbs.) or heavier, white paper.

(C) Each township and range will be specified along the side of the map and, at a minimum, each corner section will be numbered.

(D) The outline of the exchange service area will be a heavy black line with an "E" every one inch (1") or two inches (2") along the boundary.

(E) The name of adjacent incumbent LEC exchanges will be indicated on the exchange map to identify their relative location.

(2) When said boundary map changes involve more than one telephone exchange and more than one incumbent LEC, the changes involved shall be coordinated between the incumbent LECs concerned and a "Joint Application" submitted. After an order is issued by the Commission the incumbent LECs shall submit revised exchange maps containing the revised territory, the new certificate number, the cause number, the order number, and the date of the order approving the change. A copy of each current exchange map shall be made available for review to any interested person upon reasonable notice containing:

(A) Application number.

(B) Maps showing the changes in contrasting colors.

(C) Metes and bounds of changes.

(D) Proposed orders (one for each exchange) with complete metes and bounds of the revised exchange(s).

(e) **Competitive LEC service territories maps.** Each competitive LEC shall either identify the LEC exchanges of their service territory or maintain up-to-date maps showing its service territory. The maps and descriptions shall be in sufficient detail to establish the location of incumbent LEC exchange boundaries on the ground. Each map provided shall conform to the format set out in OAC 165:55-3-22(c)(1). Two (2) copies of each map shall be provided to the Director of the Public Utility Division.

(f) **Contracts and agreements.** Upon request by the Director of the Public Utility Division, a TSP or IXC shall provide a copy of a contract entered into by the TSP or IXC for regulated services.

(g) **Contact names.** Each telecommunications service provider and IXC shall notify, in writing, the Director of the Public Utility Division within thirty (30) days of a change in the company-designated contacts for Public Utility Division and CSD issues. If the below information is unavailable, the telecommunications service provider or IXC may seek a waiver from the PUD Director by making a

request in writing.

(1) The update shall include the name(s), physical street address(es), electronic mail addresses and telephone number(s) of the designated individual(s).

(2) The contact name(s) provided pursuant to this subsection shall be the individual(s) primarily responsible for:

- (A) Providing customer service;
- (B) Repair and maintenance;
- (C) Answering complaints;
- (D) Authorizing and/or furnishing refunds to customers;
- (E) Tariff issues;
- (F) Billing inquiries;
- (G) Regulatory matters;
- (H) Oklahoma Universal Service Fund (and Monthly Payout, Fee Assessment, Requests for Funding, if different);
- (I) PUD Fee Assessment (and Fee Assessment Payments, if different);
- (J) Primary emergency;
- (K) Afterhours emergency;
- (L) Annual reporting;
- (M) Attorney for regulatory matters; and
- (N) Community Liaison.

(h) Other information. Each telecommunications service provider and IXC shall promptly furnish such other information as PUD or the Commission may request, unless otherwise ordered by the Commission.

165:55-3-23. Complaints report

Each telecommunications service provider and IXC shall maintain customer complaints that have been received by the company. These should be maintained for a period of no less than two (2) years.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 15 Ok Reg 3054, eff 7-15-98; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 29 Ok Reg 1549, eff 7-12-12; Amended at 32 Ok Reg 828, eff 8-27-15]

PART 7. REPORTING REQUIREMENTS

165:55-3-30. Report attestation

All reports required by this Chapter to be submitted to the Commission shall be attested to by an officer or manager of the telecommunications service provider under whose direction the report is prepared, or if under trust or receivership, by the receiver or a duly authorized person, or if not incorporated, by the proprietor, manager, superintendent, or other official in charge of the telecommunications service provider's operation.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-3-31. Due dates of reports [REVOKED]

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 18 Ok Reg 2415, eff 7-1-01; Revoked at 29 Ok Reg 1549, eff 7-12-12]

SUBCHAPTER 5. RATES AND TARIFFS

PART 1. TARIFF FILING

165:55-5-1. Tariffs and/or Terms of Service required

(a) Except as provided in this Subchapter, a telecommunications service provider or IXC shall charge for the provisioning of regulated telecommunications services to its end-users only the rates and charges contained in its tariffs on file with and approved by the Commission or Terms of Service. No deviation from a tariff or Terms of Service shall be permitted, except as permitted by OAC 165:55-5-10.3 or unless otherwise authorized by the Commission. The provisions of each telecommunications service provider's or IXC's filed tariff and/or Terms of Service are binding upon the telecommunications service provider, IXC and the end-user as to the rates and charges for service and the terms and conditions of service.

Notwithstanding the foregoing and OAC 165:55-3-3, neither a telecommunications service provider nor an IXC shall be required to file a written tariff with the Commission for any service except payphone access services, E911/911 access services, or switched access services.

(b) A telecommunications service provider or an IXC which has a written tariff on file with the Commission may withdraw the tariff, except for payphone access services, E911/911 services, or switched access services if the telecommunications service provider or IXC:

- (1) provides written notice to the Director of Public Utility Division and the Attorney General, that it is withdrawing the tariff,
- (2) posts the Terms of Service, and
- (3) provides the Commission with the web page information where the language is posted.

(c) The Commission maintains the same authority to review the Terms of Service, of a telecommunications service provider or IXC, as permitted by OAC 165:55-5-10.

(d) All tariff revisions shall be deemed approved by the Commission on the day following the day the tariff revision is submitted to the Commission. Revisions to the Terms of Service on a telecommunications service provider's or IXC's website will become effective on the day following the day the revision is posted on the website, or as otherwise indicated on the website.

(e) A data-only provider, with a CCN granted exclusively for the purpose of seeking reimbursement from the OUSF under 17 O.S. § 139.109.1(B)(4), shall maintain an informational tariff with current terms, conditions and rates applicable to the Special Universal Services it provides. Any modifications to the data-only provider's terms, conditions or rates, shall be submitted to the Director of Public Utility Division prior to the effective date of such modifications.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12; Added at 33 Ok Reg 645, eff 8-25-16; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-5-2. Contents of tariffs

Except as provided in OAC 165:55-5-1, every telecommunications service provider shall file with the Commission its tariffs containing detailed schedules of its rates and charges for all intrastate regulated telecommunications services. The tariffs shall be in sufficient detail and shall be accompanied by such explanatory material, so as to permit determination of the applicability of the tariff. For standard

services, the tariff should be structured to permit determination of the exact charges from the tariffs alone. Services, whose rates and charges are determined on an individual case basis, need not indicate the exact charges in the tariff. Related provisions, such as the circumstances under which services are available, classes of service offered, and line extension policy, will be set out in the tariff or by reference to other filed tariffs. Unless provided otherwise in this Chapter, no tariff shall be effective except by order of the Commission or otherwise pursuant to the laws of the State of Oklahoma.

[Source: Amended at 10 Ok Reg 2651, eff 6-25-93; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-5-3. Terms and conditions of service [REVOKED]

[Source: Amended at 10 Ok Reg 2651, eff 6-25-93; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 14 Ok Reg 2847, eff 7-15-97; Revoked at 29 Ok Reg 1549, eff 7-12-12]

165:55-5-4. Exchanges served by a competitive LEC

Each competitive LEC shall file and maintain an up-to-date listing of the service territory to which the competitive LEC provides services. Such competitive LEC listings shall be revised in accordance with the requirements of this Subchapter.

[Source: Added at 13 Ok Reg 2437, eff 7-1-96]

PART 3. APPROVAL AND NOTICE REQUIREMENTS

165:55-5-10. Tariff approval and revisions to tariffs

(a) Except as provided in OAC 165:55-5-1, no new or revised tariff shall be effective without Commission order after notice and hearing, if any, as directed by the Commission unless otherwise provided in this Chapter, or by the laws of the State of Oklahoma. Tariffs filed under this section will be deemed lawful and effective thirty (30) days after filing unless an objection is filed in advance of the thirtieth day that a hearing is required.

(b) Notwithstanding the provisions of subsection (a) of this Section:

(1) New or revised tariffs describing a regulated service may be submitted in accordance with subsection (c) of this section unless otherwise prohibited by this Chapter, including but not limited to, subsection (b)(2) of this section or by the laws of the State of Oklahoma.

(2) No new or revised tariff describing a switched access service, E911/911 service, or payphone access service, shall become effective without Commission order after notice and hearing, if any, as directed by the Commission.

(3) A packaged service may include any combination of basic local services, regulated services and non-regulated services. A packaged service shall be treated as a single optional service by the Commission. A packaged service may be submitted in accordance with subsection (c) of this section unless otherwise prohibited by this Chapter or by the laws of the State of Oklahoma.

(4) Any tariffed service utilizing ICB pricing, or amendment thereto, shall become effective without Commission order according to the terms of the agreement with the customer and/or the provider's tariffs.

(c) To the extent that this Chapter allows the submission of new or revised tariffs, new or revised tariffs shall have an effective date on or after the day following the

day the submission is delivered to the Director of the Public Utility Division, subject to the following conditions:

- (1) The submission delivered to the Public Utility Division shall include a cover letter, one (1) mark-up copy of the new or revised tariff pages in legislative format, and one (1) final copy of the new or revised tariff pages.
- (2) The effective date of the new or revised tariff submitted to the Commission shall be stated on the face of the new or revised tariff pages.
- (3) A new or revised tariff submitted to the Commission shall comply with the notice requirements of OAC 165:55-5-11. A copy of the notice shall accompany the submission. The submission shall clearly identify the date of notice and the method used to provide notice.
- (4) The Commission may permit electronic submission of new or revised tariffs when technically feasible.

(d) The Public Utility Division may, after an informal investigation, file an application with the Commission seeking to revoke or modify any tariff. After notice and hearing, the Commission may issue an order prospectively revoking or modifying any tariff for good cause.

(e) The burden of proof to show that a proposed or revised tariff is just and reasonable shall be upon the company proposing the new or revised tariff.

(f) The Commission shall protect against anti-competitive behavior and the abuse of monopoly power by rejecting, revoking or modifying tariffs that are predatory, anti-competitive or discriminatory. In its review, the Commission may consider the incremental cost of the service, the potential impact on competition, the potential impact on end-users generally, and such other factors as the Commission may deem necessary. The Commission maintains the same authority to review the Terms of Service that are posted on the publicly available website, of a telecommunications service provider or IXC, as permitted by OAC 165:55-5-10. This retention of authority shall not be interpreted to mean that the Commission has approved the Terms of Service.

(g) Unless otherwise ordered by the Commission, all proposed rates must cover the long-run incremental cost of the service, including imputation where ordered by the Commission.

(h) For purposes of this Section, the Commission shall allow an ILEC or CLEC that serves less than seventy-five thousand (75,000) access lines as of July 1, 1997, at the option of the company, to adopt the cost studies approved by the Commission for an ILEC or CLEC that serves seventy-five thousand (75,000) or more access lines or to adopt the surrogate cost studies approved by the FCC.

(i) Nothing in these rules is intended to modify, affect or nullify the responsibilities of the Commission or providers of telecommunications services as required by state or federal antitrust laws or the Communications Act of 1934, as amended by the Telecommunications Act of 1996.

165:55-5-10.1. Competitive services [REVOKED]

[Source: Added at 14 Ok Reg 2847, eff 7-15-97; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 19 Ok Reg 1985, eff 7-1-02; Amended at 21 Ok Reg 2101, eff 7-1-04; Amended at 26 Ok Reg 1127, eff 7-1-09; Revoked at 29 Ok Reg 1549, eff 7-12-12]

165:55-5-10.2. Promotional offerings

(a) Telecommunications service providers or IXC's may offer Promotional rates and/or terms and conditions of service for any purpose. Promotional offerings are not intended to replace any obligation of a TSP or IXC to submit tariffs or to post the Terms of Service.

(b) TSPs and IXC's must maintain a log of all current promotional offerings and shall provide the log to the Commission upon request.

[Source: Added at 16 Ok Reg 2261, eff 7-1-99; Amended at 19 Ok Reg 1985, eff 7-1-02; Amended at 20 Ok Reg 2301, eff 7-15-03; Amended at 22 Ok Reg 712, eff 7-1-05; Amended at 26 Ok Reg 1127, eff 7-1-09; Amended at 29 Ok Reg 1549, eff 7-12-12; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-5-10.3. Customer-specific contracts under ICB pricing

(a) Telecommunications service providers or IXC's may enter into customer-specific contracts for business services provided that the pricing is not predatory.

(b) At the direction of the Commission, the Director of the Public Utility Division shall periodically select a sample of ICBs for review. If a review of any ICB reveals that said ICB is not fair, just, reasonable, not priced at or above LRIC, or not in the public interest, the Commission may issue an order to revoke the TSP's or IXC's ability to enter into ICBs until further order of the Commission.

165:55-5-10.4. Name changes and/or trade name additions and/or address changes

Tariff revisions to reflect a change to the name and/or change, deletion or addition of a trade name under which the telecommunications service provider or IXC will be doing business in the State of Oklahoma, and/or change of address shall become effective, without Commission order, the date of filing such tariffs, provided the filing contains the attestation required by subparagraph (5) of this Section. The request for name change or request for change, addition, or deletion of a trade name shall be accompanied by the following, as applicable:

- (1) An amended Certificate of Incorporation effecting a change of name pursuant to 18 O.S. § 1076, 1077 or 1031;
- (2) A Trade Name Report filed with the Secretary of State as provided in 18 O.S. § 1140;
- (3) A Withdrawal of Trade Name Report filed with the Secretary of State as provided in 18 O.S. § 1140.1;
- (4) A Transfer of Trade Name Report filed with the Secretary of State as provided in 18 O.S. § 1140.2; and,
- (5) An attestation that the tariffs are identical, except for the name change or change, addition or deletion of a trade name, to the existing tariffs of the telecommunications service provider or IXC.

[Source: Added at 16 Ok Reg 2261, eff 7-1-99; Amended at 19 Ok Reg 1985, eff 7-1-02]

165:55-5-11. Type of notices

(a) **Notice.** Except with respect to tariffs filed pursuant to OAC 165:55-5-10(b) or where the Commission, by order, directs otherwise, any notice of hearing on an application for approval or amendment of rates or charges for service shall be published once a week for two consecutive weeks in a newspaper(s) of general

circulation within the territory served by the telecommunications service provider.

(b) Notice of tariff revisions and new service offerings by telecommunications service providers. Telecommunications service providers shall serve proposed tariff revisions for switched access, payphone access, or E911/911 services on the Office of the Attorney General at the time of their filing with the Commission, and shall provide a copy of their proposed tariff revisions pursuant to OAC 165:55-5-10 to each IXC and telecommunications service provider that has previously requested in writing to receive such filings. Notice of tariff revisions to E911/911 services shall also be provided to the governing body of each E911/911 Public Safety Answering Point operating in the service territory of the TSP.

(c) Notice requirements. All entities seeking to interconnect with the ILEC, including CLECs and Wireless providers, shall provide Notice of the Application to be given by mail, electronic mail or personal service to the Attorney General of the State of Oklahoma and each E911 Public Safety Answering Point within the territory of the service area affected by the proposed Agreement. Each governmental entity operating an E911 Public Safety Answering Point that wishes to receive notice of interconnection agreement approvals shall register its contact persons with the Commission.

(d) Notice of proposed initial tariff. All entities seeking approval of an initial tariff shall serve the file-stamped Application by mail, electronic mail, or personal service to the Oklahoma Attorney General and the Director of the Public Utility Division.

(e) End-user notice of rate increase. Prior to or concurrent with the effective date of any increased rate to an end-user, each telecommunications service provider or IXC shall provide notice to the Director of the Public Utility Division, the Office of the Attorney General and the affected end-users of the rate increase. The notice shall be provided by any of the following:

- (1) Prominent display on the end-user's bill;
- (2) Direct mailing;
- (3) Prominent display on an insert in the end-user's bill; or
- (4) Any other method approved by the Director of the Public Utility Division.

(f) Notice of rate increase to the OCC and Attorney General. The notice required by Subsection (d) above to be given to the Director of the Public Utility Division and the Office of the Attorney General shall be given by any of the following:

- (1) Direct mailing or email;
- (2) Through a website posting of all customer notifications and Terms of Service changes; or
- (3) Identification on the website posting of the effective date of the Terms of Service.

(g) End-user notice of service offering restrictions/limitations. Any restrictions/limitations imposed for "non-voice" minutes of use beyond a maximum identified in the provider's tariff shall be noticed under the following conditions:

- (1) Written notice of the restriction/limitation and clear and concise explanation of when the penalty is imposed will be given to the end-user(s) prior to or concurrent with the initial bill for the service offering which contains the restriction/limitation. The notice will advise the end-users of the exact restriction/limitation and the penalty assessed.
- (2) The notice shall be provided by any of the following:
 - (A) Prominent display on the end-user's bill;

- (B) Direct mailing;
- (C) Fulfillment and/or welcome packages;
- (D) Prominent display on an insert in the end-user's bill; or
- (E) Any other method approved by the Director of the Public Utility Division.

(h) Failure to provide the information required by this Section at the time of filing may result in the proposed tariff revision(s) and/or new service offering(s) being suspended pursuant to OAC 165:55-5-13 and, if suspended, the tariff revision(s) and/or new service offering(s) shall not be placed into effect under any circumstances, until further order of the Commission.

165:55-5-13. Suspension of tariff or Terms of Service

The Commission Staff, the Office of the Attorney General, or any aggrieved party may file an application to suspend or set aside prospectively any tariff provision or Terms of Service that violates any Commission rule or law or that is not in the public interest.

[Source: Added at 10 Ok Reg 2651, eff 6-25-93; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 14 Ok Reg 2847, eff 7-15-97; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 17 Ok Reg 306, eff 11-2-99 (emergency); Amended at 17 Ok Reg 1043, eff 5-11-00; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-5-14. Objections

(a) Any person may file an objection to a proposed tariff or proposed tariff revision or Terms of Service or proposed Terms of Service amendment within thirty (30) days after the proposed tariff or proposed tariff revision is filed or Terms of Service are posted on the telecommunication service provider's or IXC's publicly available website.

(b) Any such objection shall comply with the requirements of OAC 165:5-9-2 and must contain a specific description of the basis for the objection and all information necessary to allow evaluation of the objection. The objecting person shall promptly serve its objections on the IXC or telecommunications service provider that filed the proposed changes, new service offering, or revised Terms of Service; and upon the Director of the Public Utility Division and the Attorney General.

PART 5. TARIFF STRUCTURE AND COMPOSITION

165:55-5-20. Requirements as to size, form and identification of tariffs

(a) Except as provided for in OAC 165:55-5-1, when applying for, or after receiving, a Certificate of Convenience and Necessity for authority to operate as a telecommunications service provider or IXC in the State of Oklahoma, the telecommunications service provider or IXC shall file with the Commission an original and five (5) copies of its tariff containing schedules of all its rates, tolls, charges, rules, and regulations pertaining to all of its telecommunications services. It shall also file an original and five (5) copies of each subsequent revision. Each revision shall be accompanied by a cover page which contains a list of the pages being revised, a statement describing each change, its effect, if any, and a statement as to the impact on rates of the change by customer class, if any. The telecommunications service provider shall also file a copy of the current tariff page with changes superimposed thereon. If a proposed tariff revision constitutes an increase in existing rates of a particular customer class or classes, the Commission shall require that notice be given to the affected customer class.

(b) All tariffs shall be in loose-leaf form of a size eight and one-half by eleven inches (8 1/2" x 11"), in 10 point or larger type and shall be plainly printed or reproduced on paper of good quality. The front page of the tariff shall contain the name of the telecommunications service provider, including all trade names under which the telecommunications service provider is providing telecommunications service in the State of Oklahoma, and the location of its principal office. Incumbent LEC local exchange tariff map sheets reflecting the physical bounds of the exchange may be on larger sheets, when required for the purposes of clarity and legibility.

(c) Each rate tariff must clearly state the territory, city, county, or exchange wherein said tariff is applicable.

(d) Tariff sheets are to be numbered consecutively per schedule. Each sheet shall show the Cause Number wherein the tariff was approved by the Commission and, where applicable, the Order Number for such approval. Each sheet shall show an effective date, a revision number, section number or title, sheet number, name of the telecommunications service provider, along with all trade names used in the State of Oklahoma, and the name of the tariff, each in a consistent manner. Sheets issued under new numbers are to be designated as original sheets. Sheets being revised should show the number of the revision, and the sheet numbers shall be the same.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 15 Ok Reg 3054, eff 7-15-98; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 29 Ok Reg 1549, eff 7-12-12; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-5-21. Composition of filed or submitted tariffs

The tariff shall contain sections setting forth:

- (1) A preliminary statement containing a brief description of the tariff's application.
- (2) A list of the exchanges or description of service territories in which service is provided.
- (3) The rate schedules.
- (4) The service rules and regulations.
- (5) Title sheet.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 20 Ok Reg 2301, eff 7-15-03; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-5-22. Tariff filings in response to Commission orders

Tariff filings for switched access, E911/911 services, or payphone access services made in response to an order issued by the Commission shall include a transmittal letter stating that the tariffs attached are in compliance with the order, giving the cause number, date of the order, a list of tariff sheets filed, and any other necessary information. Said tariff sheets shall comply with all other provisions of this Chapter and shall include only changes ordered. The effective date and/or wording of said tariffs shall comply with the provisions of the order. Each tariff sheet shall include the cause and order number(s) and the effective date(s).

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-5-23. Symbols for changes

(a) Each proposed filed or submitted tariff sheet shall contain notations indicating each change made on these sheets. Notations (referred to as tariff symbols) to be used are:

- (1) (AT) means added to text.
- (2) (C) means a correction.
- (3) (CP) means change in practice.
- (4) (CR) means change in rate.
- (5) (CT) means change in text.
- (6) (DR) means discontinued rate.
- (7) (FC) means a change in format lettering or numbering.
- (8) (MT) means moved text.
- (9) (NR) means new rate.
- (10) (RT) means removal of text.

(b) In addition to symbols for changes, each changed provision in the tariff shall contain a vertical line which clearly shows the exact number of lines being changed.

[Source: Amended at 29 Ok Reg 1549, eff 7-12-12]

PART 7. MISCELLANEOUS TARIFF AND/OR TERMS OF SERVICE REQUIREMENTS

165:55-5-30. Accessibility of tariffs and/or Terms of Service

Each telecommunications service provider shall make available to the public all of its tariffs currently on file with the Commission and/or all Terms of Service. All telecommunications service providers shall also provide copies of any portion of the tariffs at a reasonable cost to reproduce such tariff for a requesting party.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-5-31. Rejection

Any tariff filed with the Commission and found not to be in compliance with this Chapter shall be so marked and returned to the telecommunications service provider with a brief explanation of the reasons for rejection.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-5-32. Change by other regulatory authorities

Tariffs and/or Terms of Service which reflect changes in rates or regulations set by other regulatory authorities shall reference the source of authorization for such change.

[Source: Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-5-33. Custom or individual services

With respect to all custom work, a telecommunications service provider, upon rendering a written estimation of charges for such services to an end-user or applicant for telephone service, will not deviate from that agreement for thirty (30) days. Verbal estimates shall be reduced to writing and furnished to the end-user or applicant for telephone service when requested.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-5-34. Data and information on proposed tariff revisions

(a) Except as otherwise provided for in OAC 165:55-5-35, when filing proposed tariff revisions for switched access service, E911/911 service or payphone access service, as provided in OAC 165:55-5-10(b)(2) at least twenty (20) days prior to the effective date of the filing, each IXC and telecommunications service provider shall deliver to the Public Utility Division Staff and Office of the Attorney General:

(1) A copy of the Notice required by OAC 165:55-5-11(d) that will be sent to the end-users affected by any increased rate or Notice required by OAC 165:55-5-11(f) that will be sent to the end-users affected by the restriction/limitation(s);

(2) A telecommunications service provider offering packages of bundled services containing both regulated and non-regulated services, or both intrastate and interstate services shall, at the time of filing or submitting the bundled packages to the Public Utility Division, provide the methodology used to separate revenues in order to identify jurisdictional revenues to be assessed for funding state regulatory fees and assessments

(3) The rationale for the proposed tariffs.

(b) Consistent with OAC 165:55-5-20(a), a copy of the existing tariff page(s) with the requested change(s) denoted shall be filed with the application, and shall be included in the copy sent to the Attorney General, but need not be included with copies of the tariff revision sent to the service list.

(c) The information addressed in paragraphs (2) and (3) in subsection (a) of this Section will be accepted, but not required to be provided, from IXCs.

(d) The Public Utility Division may issue data requests for additional relevant information during its review of the requested revision(s). Each telecommunication service provider and IXC shall answer, within ten (10) business days from the date of receipt, all data requests issued, unless an objection is filed or the parties agree in writing to a different response time.

(e) Failure to provide the information required by this Section at the time of filing may result in the proposed tariff revision(s) and/or new service offering(s) being suspended pursuant to OAC 165:55-5-13 and, if suspended, the tariff revision(s) and/or new service offering(s) shall not be placed into effect under any circumstances, until further order of the Commission.

165:55-5-35. Confidential information

(a) With the exception of information and data related to the dollar and percentage impacts of the proposed change(s) on end-user rates and the rationale for the

proposed tariffs, all information and data required by OAC 165:55-5-34(a), OAC 165:55-5-10.2, and OAC 165:55-5-10.3 to be delivered to the Public Utility Division Staff concurrent with the filing of a proposed tariff revision or notification of a promotional offering and any additional financial or cost data or data that is identifiable to a specific customer requested by the Public Utility Division Staff, shall be deemed confidential records or trade secrets of the telecommunications service provider and IXC under the Oklahoma Open Records Act as provided for by 51 O.S. § 24A.22 and shall be kept confidential by the Commission, unless successfully challenged.

(b) All confidential information and data submitted to the Public Utility Division Staff under subsection (a) of this Section shall be conspicuously labeled "Confidential information and data submitted pursuant to OAC 165:55-5-35."

(c) For each tariff filing submitted by a telecommunications service provider or IXC in accordance with OAC 165:55-5-10(b), OAC 165:55-5-10.2, or OAC 165:55-5-10.3, the same confidential information and data provided to the Public Utility Division Staff shall also be provided to the Office of the Attorney General upon the signing of a Proprietary Agreement by the Attorney General or its representative.

(d) All confidential information and data provided to the Office of the Attorney General under subsection (c) of this Section shall be conspicuously labeled "Confidential information and data submitted pursuant to OAC 165:55-5-35."

SUBCHAPTER 7. DIRECTORIES, TELEPHONE NUMBERS, AND CUSTOMER-PROVIDED EQUIPMENT

165:55-7-1. Telephone directories

(a) **Provision of directory to end-users; frequency.** Each telecommunications service provider shall provide in conjunction with the provisioning of local exchange service, or make arrangements to provide to its end-users an alphabetical telephone directory for each service territory, exchange or group of exchanges. Telecommunications service providers may furnish white page directories in a variety of electronic formats, including CD-Rom, via the internet, or as printed directories. Such directory shall be issued at intervals consistent with satisfactory service, which, in the absence of unusual circumstances, will be at least once each

year. If any alternative format of a white page directory is to be provided in place of a printed paper directory, impacted customers are to be furnished with notification that the telecommunications service provider will no longer provide a printed directory at least ninety (90) calendar days prior to the date the printed directory will no longer be made available. The notification to impacted customers shall, at a minimum, include notice by bill insert. A directory for an exchange or calling area may be issued.

(b) **Listing in directory.** Each telecommunications service provider shall provide its end-users in conjunction with the provisioning of local exchange service, without charge, one listing in the white page directory issued pursuant to this Chapter and inclusion in a database used to provide directory assistance for the end-user's geographic area.

(c) **Provision of directory.** Unless the Commission directs otherwise, a telecommunications service provider that issues a printed paper directory shall furnish each customer, at the customer service address, one (1) directory under current tariffs, unless the customer and the telecommunications service provider that issues a directory, regardless of format, agree this requirement can be fulfilled in an alternative manner. Each telecommunications service provider shall make available its directory to telecommunications service providers for distribution to their end-users.

(d) **Contents of directory.** The directory provided to end-users pursuant to this Section shall contain the following information:

(1) Minimum requirements. Each telecommunications service provider shall assure that its end-users receive a directory which includes the following information:

- (A) The name of the exchange or area covered and the date of issue prominently displayed;
- (B) Emergency numbers;
- (C) Instructions to access directory assistance;
- (D) Instructions to access repair service;
- (E) Instructions for placing long distance and local calls;
- (F) Instructions for obtaining an itemization of the end-user's current monthly statement;
- (G) Instructions to access Telecommunication Relay Service; and
- (H) A notice prominently displayed which shall state: "This directory contains important information about your rights as a telephone end-user described at (Here the telecommunications service provider will insert a clear reference to the location at which the notice shall appear)". Said notice shall be prominently displayed within the directory.

(2) A statement shall be submitted to CSD for approval, at least thirty (30) days prior to being submitted for publication or inclusion in a directory or distributed as a mailing or otherwise. Unless notified to the contrary by CSD within fifteen (15) days after submission, the statement shall be considered approved. Once approved by CSD, the statement need not be resubmitted to CSD for further approval, unless and until this Chapter is changed by the Commission to require additional data. The statement shall at least describe or include:

- (A) Billing procedures.
- (B) Customer payment requirements and procedures.
- (C) Deposit and guarantee requirements.

(D) Conditions of termination, discontinuance, and reconnection of service.

(E) Procedures for handling inquiries.

(F) A procedure whereby an end-user may avoid discontinuance of service during a period of absence.

(G) The telephone number and address of all offices of CSD.

(H) The statement that the telecommunications service provider is regulated by the Commission.

(I) Notification that the end-user may request an adjustment if service is interrupted for periods in excess of twenty-four (24) hours.

(3) Additional information. The directory shall contain additional information concerning a telecommunications service provider, as requested by a telecommunications service provider, to the same extent that the directory provider includes similar information for itself or its affiliates offering local exchange service within the geographic area covered by the directory based on rates, terms and conditions that are just, reasonable and nondiscriminatory.

(e) **Liability for errors.** The liability of the telecommunications service provider for an error or omission in its telephone directory, or for an error or omission on intercept service, shall not exceed the amount of actual damage suffered, and in no event shall its liability exceed an amount equal to local exchange service charged to the end-user for the listed service for the period during which the directory containing the error or omission is the last published directory of the exchange.

(f) **Access to publishing information.** Upon request, a telecommunications service provider shall provide directory listings gathered in its capacity as a provider of local exchange service on a timely and unbundled basis, under nondiscriminatory and reasonable rates, terms, and conditions, and to any person upon request for the purpose of publishing directories.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 26 Ok Reg 1127, eff 7-1-09; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17; Amended at 36 Ok Reg 709, eff 7-25-19]

165:55-7-2. Telephone numbers and changes

(a) A telephone number shall be deemed a national resource and is not the property of either the telecommunications service provider or the end-user. Initial telephone numbers for end-users establishing a local exchange service account shall be assigned by the telecommunications service provider then serving the end-user. Local exchange service end-users shall not be required to change telephone numbers solely due to a change in telecommunications service providers. The telecommunications service provider may change the number assigned to a customer upon reasonable notice but only in order to give better service and not as an accommodation to another customer. Changes in telephone numbering plans may be made upon reasonable notice, in order to meet the needs of expansion or better service. Unless changed by the number portability requirements or the numbering administration guidelines established by the FCC, a customer who supersedes an account in order to obtain the telephone number of a previous customer will accept all liabilities for that account. The superseding customer will then retain the telephone number until the account is superseded or the superseding customer has no further use of it for service purposes. Any unresolved dispute arising between end-users or between an end-user and a telecommunications

service provider over use of a telephone number may be mediated by CSD.

(b) Whenever an end-user's number is changed on the initiative of the telecommunications service provider after the directory has been issued, the telecommunications service provider shall at no charge to the end-user intercept all calls to the former number and give the calling party the new number. Such intercept service shall be provided until the next directory is published, if the central office equipment permits and the number is not in service or the end-user agrees otherwise. Such numbers have last priority for reassignment. In the event the change in an end-user's telephone number is necessitated by action of the telecommunications service provider providing intercept service, the telecommunications service provider serving the end-user shall be exempt from any charges for intercept service

(c) Whenever the end-user's number is changed by reason of change of location or service to the end-user, or at their request, intercept service will be provided for a reasonable time (of at least thirty (30) days) if central office equipment permits and the number is not in service.

(d) In the event of error in the listed number of any end-user in the telecommunications service provider's directory, the telecommunications service provider shall, at no charge to the end-user, intercept all calls to the listed number until the next directory is published provided central office equipment permits and the number has not been assigned to another end-user, or make other reasonable arrangements. In such case, and in the case of an error in or omission of the name listing of an end-user, the correct listing and number shall be available through directory assistance. If the directory listing error is caused by the telecommunications service provider providing intercept service, the telecommunications service provider serving the end-user shall be exempt from any charges for intercept service.

(e) In areas equipped with E911 emergency service, whenever the end-user's number is changed by reason of change of location or service to the end-user or there is a change in service provider with or without a change to the end-user's number, the telecommunications service provider shall report such changes to the appropriate E911 emergency number database within two (2) business days, or as required by agreement with appropriate E911 agencies within the state, after completion of service orders. In the event of an error report, the telecommunications service provider shall correct the error within two (2) business days, unless the agreement with the appropriate E911 agency allows otherwise. This subsection shall not apply to telecommunications service providers who provide data service only.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-7-2.1. 211 Services

(a) **Scope and purpose.** This Section applies to the assignment, provision, and termination of 211 service. Through this Section, the Commission intends to enhance the ability of the public to access services that provide free information and referral to community resources in situations that are not immediately life-endangering, but still represent a serious but less urgent threat to basic human needs and individual's health or welfare.

(b) **Definitions.** The following words and terms, when used in this Chapter, shall have the following meanings unless the context indicates otherwise:

- (1) **"Alliance of Information and Referral Systems (AIRS)"** means a professional organization whose mission is to unite and serve the field and to advance the profession of information and referral as a vital means of bringing people and services together. AIRS has developed national quality standards and methods of evaluating information and referral services.
- (2) **"211 Call Center"** means a free 24-hour telephone information and referral service for a specified geographical area or region that connects people in need with health and human service agencies and programs that can provide assistance.
- (3) **"Community resource"** means a for-profit or nonprofit resource that provides health or human services in a designated geographic area.
- (4) **"Information and referral service"** means a free service whose primary purpose is to maintain information about human service resources in the community and to link people who need assistance with appropriate service providers and/or to supply descriptive information about the agencies or organizations which offer services.
- (5) **"211 service"** means a telecommunications service provided by a telecommunications service provider to a 211 Call Center through which the end-user of a public phone system has the ability to access information and referral services.

(c) **Requirements of a 211 Call Center.** An entity desiring to be a 211 Call Center shall meet the following requirements:

- (1) Ensure 24-hour, seven day a week operations.
- (2) Ascribe to the AIRS standards for information and referral and have a plan in place to become accredited by AIRS.
- (3) Serve the area or region designated by the 211 Call Center in consultation with telecommunications service provider.
- (4) Agree to provide information and referral service consistent with the national standards set out by the AIRS and this Section.
- (5) Agree to use the 211 service exclusively for the distribution of information and referral, and not use the service for commercial advertisements.
- (6) Provide information and referral service to a caller without charging a fee on either a per-call or per-use basis.

(d) **Provision of 211 service to a 211 Call Center.** Upon request, a telecommunications service provider shall provide 211 service within a specific geographic area or region to an entity which has self certified that it meets the requirements as set out in subsection (c) above; has been certified by the statewide 211 Advisory Committee as the 211 Call Center for that geographic area or region; and has provided maps or other identifying information to the Commission sufficient to identify the area it will serve. In the event that two or more entities request 211 service as the 211 Call Center for the same geographic area or region, the statewide 211 Advisory Committee shall resolve the dispute.

(e) **Fee.** The telecommunications service provider shall charge the 211 Call Center tariffed rates for tariffed services.

[Source: Added at 20 Ok Reg 2301, eff 7-15-03]

165:55-7-3. Trouble caused by customer-provided equipment (CPE) or inside wiring

The customer will be liable for charges incurred as a result of a premises visit by the telecommunications service provider for a trouble report caused by

nonregulated customer provided equipment or inside wiring. The customer shall be advised of the potential for charges prior to the premises visit if the customer reports the trouble. If the telecommunications service provider finds the trouble through routine checks of its system, the customer will be notified of the charges before any work is done by the telecommunications service provider. The customer shall not be charged for a premises visit if the customer reports the trouble before the visit and is not advised before the visit of the potential for charges relating to the proposed visit by the telecommunications service provider.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-7-4. Availability of rules and tariffs

A telecommunications service provider shall maintain and make available for public inspection a copy of this Chapter and a printed copy of its tariffs. Conspicuous signs shall be posted at its office(s) in the State of Oklahoma indicating that this tariff information is available for public inspection. Further, information will be maintained and made available to the public upon request indicating the websites at which the TSP's posted Terms of Service are available. Any telecommunications service provider that does not maintain an office in the State of Oklahoma shall, upon request by an end-user, provide a copy of this Chapter, or any relevant portion thereof, and the requested printed tariff(s) to such end-user, free of charge.

SUBCHAPTER 9. CUSTOMER BILLING AND DEPOSITS

PART 1. BILLING AND PAYMENT REQUIREMENTS

165:55-9-1. Billing period

(a) All TSPs and IXC's shall comply with the Truth-in-Billing Rules 47 C.F.R. § 64.2401.

(b) All end-users who are customers as of July 1, 2012, shall receive their bills via the United States Mail, unless the end-user opts to receive a bill through different means, such as electronically via the internet. Customers who begin service with a provider after July 1, 2012, may be provided an electronic bill unless they opt to receive a bill through the United States Mail. In no event shall there be a charge for providing a bill through the United States Mail. Whatever the method of delivery, bills shall comply with OAC 165:55-9-2.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-9-2. Content of bills

(a) Telecommunications service provider's and IXC's bills should comply with the Federal Truth-in-Billing standard. 47 C.F.R. § 64.2401.

(b) Disclosure of inquiry contacts.

(1) Telecommunications service providers and IXC's shall prominently display on each bill, a toll-free number or numbers by which end-users may inquire or dispute any charges on the bill. Where the end-user does not receive a paper copy of his or her telephone bill, but instead accesses that bill only by e-mail or internet, the telecommunications service provider and IXC may comply with this requirement by providing the disclosure

information on the bill, an e-mail, or web site address. Each telecommunications service provider and IXC must make a business address available upon request from an end-user.

(2) A telecommunications service provider and IXC may list a toll-free number for itself, a clearinghouse, or other third party, provided such party possesses sufficient information to answer questions concerning the end-user's account and is fully authorized to resolve the end-user's complaints on the service provider's behalf.

(3) A telecommunications service provider and IXC shall also provide a phone number for CSD.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 29 Ok Reg 1549, eff 7-12-12; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-9-2.1. Bills rendered by a billing agent

(a) A telecommunications service provider or an IXC shall not act as a billing agent for an IXC, reseller or another telecommunications service provider, unless the telecommunications service provider or IXC fully discloses on the bill the toll-free number of the certificated entity for whom the bill is being rendered or, if the billing agent has been given authority to make adjustments to the customer's bill, its toll-free number.

(b) A telecommunications service provider or IXC shall not utilize the services of a billing agent unless the telecommunications service provider or IXC requires that the billing agent follow the procedures set forth in in this Subchapter.

[Source: Added at 15 Ok Reg 3054, eff 7-15-98; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-9-3. Due date and penalty

Unless otherwise authorized by the Commission, bills shall be payable immediately upon receipt and past due fifteen (15) days after the date of the telecommunications service provider mailing or after any deferred payment date previously established either by oral or written agreement between an end-user and the telecommunications service provider. The date after which the bill is past due shall be stated on the bill. If the bill is not paid when past due, the telecommunications service provider may apply late payment charges of 1.5% unless otherwise approved on any unpaid balance for regulated telecommunications services as provided in its filed, approved tariffs. Payment shall not be considered late if it is received by the due date at an authorized office.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 20 Ok Reg 2301, eff 7-15-03; Amended at 21 Ok Reg 2101, eff 7-1-04]

165:55-9-4. Request for payments other than normal billings

The telecommunications service provider shall issue a bill for any additional charges other than those charges normally billed on the regular billing cycle. The telecommunications service provider shall not issue a notice of disconnection prior to five days after providing notice/issuance of a bill for additional charges. Additional billings could include but are not limited to:

- (1) New or additional deposits.
- (2) High toll charges.
- (3) Other advance payments.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-9-5. Billing disputes

(a) In the event of a dispute between an end-user and a telecommunications service provider, the telecommunications service provider shall make such investigation as is required by the particular case, and report the results thereof to the end-user. A TSP shall not make any attempt to collect disputed amounts or disconnect service over the disputed portion of a bill for sixty (60) calendar days from the date the dispute is received.

(b) In the event the dispute is not resolved, the telecommunications service provider shall inform the end-user that the end-user may utilize the complaint procedures of CSD. The information to be provided to consumers shall be:

- (1) The street address of CSD, which is Oklahoma Corporation Commission, Consumer Services Division, 2101 N. Lincoln Blvd. Suite 580, Oklahoma City, OK 73105.
- (2) The mailing address of the Consumer Services Division, which is P.O. Box 52000, Oklahoma City, OK 73152-2000.
- (3) The telephone numbers of the Consumer Services Division, which are (405) 521-2331 and (800) 522-8154.
- (4) The hours of operation of the Consumer Services Division, which are 8:00 a.m. to 4:30 p.m. Monday through Friday, excluding State holidays.

(c) When a complaint has been made with CSD, the telecommunications service provider shall be required to forego disconnect procedures on account of nonpayment of any portion of accumulated disputed charges pending investigation by CSD. The end-user shall be required to pay the undisputed part of the bill, and if not paid, the telecommunications service provider may discontinue service.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 15 Ok Reg 3054, eff 7-15-98; Amended at 19 Ok Reg 1985, eff 7-1-02; Amended at 32 Ok Reg 828, eff 8-27-15; Added at 33 Ok Reg 645, eff 8-25-16; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-9-6. Refunds for service interruptions

Whenever service to any customer is inoperative, other than by reason of negligence, or willful act of the customer, or causes beyond the control of the telecommunications service provider, and remains inoperative for more than twenty-four (24) consecutive hours after being reported by the customer or having been found to be interrupted by the telecommunications service provider, the telecommunications service provider shall refund upon request of the customer the prorated part of that month's local exchange service charges and any regulated equipment charges for the period of days during which the telephone service was not provided. The refund may be accomplished by an identified credit, on the next bill for telephone service. The maximum credit during a single billing period shall not exceed the amount of local exchange service charges. There shall be no diminution of allowed message units where billing is on a message unit basis or for toll charges. The telecommunications service provider shall have no other liability for service interruptions.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99]

165:55-9-8. Customer preferences

The terms and conditions of Subchapter 9 may be changed, modified, revised, supplemented or deleted upon written agreement between a business end-user and the telecommunications service provider or IXC. This Section shall not apply to residential end-users.

PART 3. CREDIT REQUIREMENTS

165:55-9-10. Establishment of credit for residential applicants and customers

- (a) Each telecommunications service provider may require a residential applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the end-user from complying with the telecommunications service provider's policy(ies) regarding the prompt payment of bills.
- (b) For purposes of this Section, "applicant" is to be defined as a person who applies for service for the first time or reapplies at a new or existing location after a previous discontinuance of service; "customer" is defined as someone who is currently receiving service.
- (c) Subject to this Chapter, a residential applicant shall not be required to pay a deposit:

(1) If it can be verified that the residential applicant has been an end-user of any telecommunications service provider in the State of Oklahoma for the same type of service within the last two years and is not currently delinquent in payment of any such telecommunications service provider account provided however, a telecommunications service provider may elect to require a deposit if, during the last twelve (12) consecutive months, the residential applicant: (1) was delinquent in the payment of a telecommunications service provider account on more than two (2) occasions; (2) presented a dishonored check for payment of a telecommunications service account; or, (3) had service disconnected due to nonpayment of a telecommunications service account.

(2) If the residential applicant furnishes, in writing, a satisfactory guarantee to secure the payment of bills for the telecommunications service requested.

(A) Unless otherwise agreed to by the guarantor, the guarantee shall be for the amount of deposit the telecommunications service provider would normally require on the applicant's account. The amount of guarantee shall be clearly indicated on any documents or letters of guarantee signed by the guarantor.

(B) Upon written request by the customer, after a period of four (4) consecutive months during which time the average amount of toll charges is shown to have decreased by fifty percent (50%) or more:

(i) The telecommunications service provider shall re-evaluate the amount of the guarantee in order to determine if the original guarantee amount continues to be consistent with the guidelines set forth in this Section.

(ii) The amount of the letter of guarantee shall be reduced to an amount which is consistent with the guidelines set forth in Section 165:55-9-14.

(C) When the end-user has paid bills for telecommunications service for twelve (12) consecutive residential billings without having service disconnected for nonpayment of bills and without having more than two (2) occasions in which a bill was delinquent, did not present a dishonored check for payment of a telecommunications service account, and is not delinquent in the payment of current telecommunications service bills, the

telecommunications service provider shall void and return, to the guarantor, any documents or letters of guarantee placed with the telecommunications service provider.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 15 Ok Reg 3054, eff 7-15-98]

165:55-9-11. Establishment of credit for business service

In the case of business service, if the credit of an applicant for telecommunications service has not been established to the satisfaction of the telecommunications service provider, the applicant may be required to make a deposit.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

**165:55-9-12. New or additional collateral from existing customers
[REVOKED]**

[Source: Revoked at 10 Ok Reg 2649, eff 6-25-93]

165:55-9-13. Reestablishment of credit

Any applicant who previously has been an end-user of a telecommunications service provider and whose service has been suspended or disconnected for nonpayment of bills shall be required, before service is rendered by that TSP, to pay all amounts due the telecommunications service provider for regulated telecommunications services or execute a deferred payment agreement, if offered, in accordance with OAC 165:55-11-3(d), and reestablish credit as provided in OAC 165:55-9-10 through OAC 165:55-9-14 or apply for a less than basic local exchange service, if offered in an approved tariff.

[Source: Amended at 10 Ok Reg 2649, eff 6-25-93; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99]

165:55-9-14. Deposits and interest

(a) Each telecommunications service provider shall prepare and submit a plan containing the criteria for deposits to the Commission for approval. The plan shall include criteria for residential and nonresidential consumers with residential being defined in each telecommunications service provider's tariffs.

(1) The residential plan shall conform to all subsections of this Section.

(2) The nonresidential plan shall conform to all subsections of this Section except for (b), (c), (d), and e(1).

(b) No telecommunications service provider shall require a deposit of a residential end-user who has received the same or similar type of classification of service for twelve (12) consecutive months and to whom service was not terminated for nonpayment nor was payment late more than twice nor was a check for payment of a telecommunications service account dishonored. The twelve (12) months service period shall have been within eighteen (18) months prior to the application for new service. The telecommunications service provider's plan may establish other relevant criteria which will qualify the end-user for nonpayment of a deposit.

(c) The amount of the deposit shall not exceed an amount equal to two (2) months local exchange charges and/or two (2) months toll charges determined by actual or anticipated usage. Where local exchange charges are billed in advance, the deposit shall include only one (1) month's such charges. The telecommunications service provider's plan may allow customers to pay deposits in installments. Upon request, the telecommunications service provider shall provide a written explanation of the

deposit calculation. The explanation shall separately state the amount of the deposit which is related to local exchange service and the amount related to toll service.

(1) Upon written request by the customer, after a period of four (4) consecutive months during which time the average amount of toll charges is shown to have decreased by fifty percent (50%) or more, the telecommunications service provider shall re-evaluate the amount of the deposit in order to determine if the original deposit amount continues to be consistent with the guidelines set forth in this Section.

(2) The amount of the deposit shall be reduced to an amount which is consistent with the deposit guidelines set forth in this Section.

(3) Any excess amount of the deposit resulting from the reduction required in paragraph (2) of this subsection shall be refunded to the customer.

(d) A present end-user may be required to post a deposit as a condition of continued service if undisputed charges have become delinquent, with delinquent meaning a payment not received on or before the due date as posted on the bill, in two (2) out of the last twelve (12) billing periods or if the end-user has had service disconnected during the last twelve (12) months pursuant to OAC 165:55-11-2 or has presented a check to the telecommunications service provider that was subsequently dishonored.

(e) Interest on cash deposits shall be paid by each telecommunications service provider at no less than the rate calculated as follows:

(1) For all consumers deposits returned more than thirty (30) days after receipt of the deposit, the interest rate shall be established the 1st day of January of each year to equal the average of the weekly percent annual yields of one (1) year U.S. Treasury Securities for September, October, and November of the preceding year. The interest rate shall be rounded to the nearest basis point.

(2) Provided, however, that after the interest rate is initially established pursuant to this subsection, the interest rate(s) shall not change unless the application of the formula in paragraphs (e)(1) results in a change in interest rate(s) that is/are greater than fifty (50) basis points.

(3) The Director of the Public Utility Division shall calculate the interest rate(s) pursuant to paragraphs (e)(1) of this Section, and shall provide notice to the telecommunications service providers via mail, e-mail or posting on the OCC's website by December 15th of each year, only if a change in the rate(s) is/are necessary pursuant to subsection (e), otherwise the current interest rate(s) will remain in effect.

(f) If a refund of the deposit is made within thirty (30) days of receipt of the deposit, no interest payment is required. If the telecommunications service provider retains the deposit more than thirty (30) days, payment of interest shall be made retroactive to the date of deposit. No interest shall accrue on a deposit after discontinuance of service.

(g) The telecommunications service provider shall provide payment of accrued interest for all end-users annually by negotiable instrument or by credit against current billing.

(h) The deposit shall cease to draw interest on the date it is returned or credited to the end-user's account.

(i) In determining the amount of any deposit permitted by this Chapter, no charges for estimated telephone directory advertising may be used.

(j) The amount of the deposit, with accrued interest, shall be applied to any unpaid charges at the time of a discontinuance of services. The balance, if any, shall be

returned to the end-user within thirty (30) days after settlement of the consumer's account, either in person or by mailing it to the end-user's last known address.

(k) If service is not connected, or after disconnection of service, the telecommunications service provider shall promptly and automatically refund the customer's deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. A transfer of service from one (1) premise to another within the area of the telecommunications service provider shall not be deemed a disconnection within the meaning of this Part, and no additional deposit may be required unless otherwise permitted by this Subchapter.

(l) The telecommunications service provider shall automatically refund the deposit for residential service, with accrued interest, after twelve (12) months' satisfactory payment of undisputed charges and where payment was not late more than twice; provided, however, that service has not been disconnected within the twelve (12) month period. Payment of a charge shall be deemed satisfactory if received on or prior to the date the bill is due. Payment of a charge shall be deemed not satisfactory if made by a check that is subsequently dishonored. If the end-user does not meet these refund criteria, the deposit and interest may be retained in accordance with subsection (d) of this Section.

(m) The telecommunications service provider may withhold refund or return of the deposit, pending the resolution of a dispute with respect to charges secured by the deposit.

(n) The telecommunications service provider shall keep records to show:

- (1) The name, account number, and address of each depositor.
- (2) The amount and date of the deposit.
- (3) Each transaction concerning the deposit.

(o) The telecommunications service provider shall issue a receipt of deposit to each applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost.

(p) Such records shall be retained for two (2) years after deposit and/or interest is refunded or applied.

(q) Upon the sale or transfer of any telecommunications service provider or operating units thereof, the seller shall file, with the application of transfer, a verified list of the information in subsection (n) of this Section, and the unpaid interest thereon. The information provided shall be treated as confidential and shall not be available for public inspection unless ordered by the Commission after notice and hearing.

(r) The deposit made by the end-user with the telecommunications service provider at the time of application for telephone service shall not constitute an advance payment to cover service bills, but for all purposes it is to be considered as security for the payment of monthly bills or other proper charges.

SUBCHAPTER 11. SERVICE DENIAL, SUSPENSION AND DISCONNECTION

PART 1. NOTICE REQUIREMENTS

165:55-11-1. Denial or termination of service without notice

A telecommunications service provider may refuse service or terminate existing service to an end-user without notice for tampering with the telecommunications service provider's equipment, or misuse or abuse thereof in order to avoid payment of lawful charges or use thereof in such manner as to create danger to life or property of the telecommunications service provider or other end-users.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-11-2. Denial or termination of service after notice

(a) A telecommunications service provider may refuse service or terminate existing service to an end-user pursuant to the suspension and disconnect procedure provided in Part 3 of this Subchapter for any of the following reasons:

- (1) Nonpayment of a bill for regulated telecommunications services within the period prescribed by this Chapter.
- (2) Failure to make a security deposit as set forth in this Chapter.
- (3) Violation of or noncompliance with any provision of law, or of this Chapter, or of the tariffs or terms and conditions of service of the telecommunications service provider filed with and approved by the Commission.
- (4) Refusal to permit the telecommunications service provider reasonable access to its telecommunications facilities for recovery, maintenance, and inspection thereof.
- (5) Interconnection of a device, line, or channel to telecommunications service provider facilities or equipment contrary to the telecommunications service provider's terms and conditions of service on file with and approved by the Commission.
- (6) Use of telephone service in such manner as to interfere with reasonable service to other end-users.

(b) The telecommunications service provider shall provide documentation to the end-user upon request, indicating the reason(s) that service is being withheld.

(c) Upon an end-user's request to terminate local exchange service, the end-user's local exchange telecommunications service provider shall inform such end-user of the end-user's responsibility to contact the end-user's IXC regarding continuance or termination of such service from the IXC.

[Source: Amended at 12 Ok Reg 2143, eff 7-1-95; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 18 Ok Reg 2415, eff 7-1-01]

165:55-11-3. Responsibility for accounts

(a) A telecommunications service provider shall not be required to provide service to an applicant or end-user who has not paid for prior telephone service rendered by a telecommunications service provider in the same or different location, and furnished to the same person or legal entity.

(b) A telecommunications service provider shall not be required to furnish or continue furnishing service when applied for in the name of another person or legal

entity, or a fictitious name or other member of the same household, for the purpose of avoiding payment of an unpaid obligation for telephone service previously furnished.

(c) Customers shall not be held responsible for the nonpayment of another customer's bill unless the customer superseded the service or was a co-applicant or guarantor for the service or shared the service of the nonpaid account.

(d) The telecommunications service provider shall be required to extend a payment arrangement to an applicant for a prior bill, unless the applicant has not fulfilled prior payment arrangements within the past twelve (12) months.

[Source: Amended at 12 Ok Reg 2143, eff 7-1-95; Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-11-4. Insufficient reasons for denial or suspension or disconnection of service

(a) A telecommunications service provider may not refuse service or suspend existing service or disconnect existing service by reason of nonpayment for telephone service by a previous occupant at the premises for which service is sought, or by reason of nonpayment of any amount back-billed due to misapplication of rates provided the applicant enters into a deferred payment plan. The telecommunications service provider shall not disconnect or suspend service without issuing a bill to the end-user for the amount due to the telecommunications service provider in accordance with OAC 165:55-9-4.

(b) Residential service cannot be suspended or disconnected for failure to pay a bill for a business service.

(c) Business service cannot be suspended or disconnected for failure to pay a bill for a residential service.

(d) Service may not be withheld from an end-user whose name was fraudulently used to obtain service at another location without the end-user's permission or knowledge.

(e) The telecommunications service provider shall not deny service to an end-user for nonpayment of an amount past due for more than three (3) years, if the company cannot substantiate the charges with a copy of the end-user's bill.

(f) Service shall not be suspended or discontinued to a current end-user in good standing who accepts an additional household member owing a previous bill to the telecommunications service provider, unless that additional household member is listed on the lease arrangements or another utility service as a responsible party, or unless the household member shared service with the end-user at a different or same location.

(g) No telecommunications service provider shall provide billing and collection for any provider of intrastate telecommunications services who does not have proper authority to operate in the State of Oklahoma.

(h) Local exchange service shall not be denied or terminated for nonpayment of not-regulated services or disputed charges in accordance with OAC 165:55-9-5, OAC 165:55-11-6, or OAC 165:55-19-3.

[Source: Amended at 12 Ok Reg 2143, eff 7-1-95; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-11-5. Suspended accounts

A telecommunications service provider may require each end-user whose service has been suspended for nonpayment of bills, to pay all amounts due the telecommunications service provider for regulated services or execute a deferred payment agreement, if offered, in accordance with OAC 165:55-11-3(d), before

service is restored.

[Source: Amended at 12 Ok Reg 2143, eff 7-1-95; Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-11-6. Service disputes

(a) In case of controversy arising out of the refusal of a telecommunications service provider to extend service or out of its efforts to disconnect existing service, either party or the Commission staff may make application to the Commission for relief pursuant to OAC 165:55-1-7, OAC 165:55-1-10. If there is an unresolved dispute pending with the Commission concerning a bill and the end-user pays the undisputed portion of that bill, disconnection procedures shall be held in abeyance until the dispute is resolved.

(b) If service is denied or terminated pursuant to this Subchapter, the telecommunications service provider shall advise the end-user of end-user's right to contact CSD and shall provide the end-user with CSD's address and the telephone number.

(c) The telecommunications service provider or the end-user may seek assistance from the Commission to review records of the telecommunications service provider and the end-user concerning the end-user's complaint.

(d) After the Commission has notified the telecommunications service provider of a complaint or inquiry from the end-user regarding the end-user's account, the telecommunications service provider shall coordinate communication with the Commission Staff regarding the complaint. The Commission Staff shall be the intermediary between the telecommunications service provider and the end-user until the resolution of the problem has been completed.

165:55-11-7. Written correspondence

(a) Any written correspondence or notices to the end-user by the telecommunications service provider or IXC relating to billing disputes or complaints, which are not otherwise provided for in this Chapter, shall meet the following criteria:

(1) The correspondence shall be sent to the end-user via the method of delivery chosen by the end-user as provided for in OAC 165:55-9-1 or as otherwise agreed by the end-user and telecommunications service provider. This would include paper, electronic, or other delivery methods.

(2) The correspondence shall clearly state that it is from the telecommunications service provider or IXC.

(3) The correspondence shall clearly state any applicable deadlines within which the end-user must take the appropriate action.

(4) The correspondence shall clearly state that if the end-user is unable to resolve any disputes with the telecommunications service provider or IXC regarding the subject of the correspondence, the end-user may contact CSD at the address and telephone numbers stated on the correspondence.

(b) Written correspondence shall be considered delivered three (3) business days after the correspondence has been mailed, or if written correspondence is provided electronically to end-user, delivery shall be deemed to occur the same date as sent, unless the electronic notice is returned as undeliverable.

165:55-11-8. Notice of suspension of service [REVOKED]

[Source: Added at 16 Ok Reg 2261, eff 7-1-99; Revoked at 18 Ok Reg 2415, eff 7-1-01]

PART 3. SUSPENSION AND DISCONNECTION PROCEDURES

165:55-11-10. Suspension or disconnection for nonpayment or failure to make security deposit

(a) When service to an end-user is to be disconnected for nonpayment of a bill for telephone service after service has been suspended or failure to make a security deposit after a reasonable time, the TSP shall give at least ten (10) days from the date of notice to the end-user of the TSP's intent to discontinue service. Said notice shall be given by the TSP as follows:

- (1) mailed or delivered to the end-user's billing address;
- (2) electronically via the internet to the email address provided by the end-user; or
- (3) telephonically to the end-user's assigned telephone number or other number provided by the end-user;

(b) If the mailed notice is returned from that address as undeliverable, the notice may be delivered to the premises at which the service was rendered. Mailed notice will be deemed given to the end-user three (3) business days after mailing by the TSP.

(c) If electronic notice is returned from the email address as undeliverable, the TSP shall give notice to the end-user using an alternative method as listed above. If the electronic notice is not returned, notice shall be deemed given to the end-user on the date the email was sent.

(d) If telephonic notice is not confirmed to have reached the end-user's telephone number, the TSP shall give notice to the end-user using an alternative method as listed above. If confirmation of telephonic notice is obtained by the TSP, notice shall be deemed given to the end-user on the date the telephonic notice is confirmed as given.

(e) Unless a dangerous condition exists or the end-user requests disconnection, a TSP may suspend or disconnect service only on the date specified in the notice or within thirty (30) days thereafter, during regular business hours, so long as the suspension or disconnection does not occur within the last two (2) hours of the business day, nor shall service be disconnected on a holiday, nor after noon (12:00 p.m.) on Fridays until Monday morning.

[Source: Amended at 12 Ok Reg 2143, eff 7-1-95; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 26 Ok Reg 1127, eff 7-1-09]

165:55-11-11. Suspension or disconnection for reasons other than nonpayment

(a) Unless otherwise provided in this Chapter, service to an end-user may be suspended or disconnected only upon order of the Commission, upon application and after notice and hearing. Prior to the merit hearing, the Commission may order suspension or disconnection of service for good cause with or without notice to the end-user.

(b) End-users that communicate with the TSP's employee(s) in any manner that is reasonably expected to frighten, abuse, torment, or harass such employee(s) or engage in actions reasonably construed as threat(s) against the TSP's physical assets are subject to immediate disconnection, without notice. A TSP that disconnects an end-user's service under this section will:

- (1) provide written or verbal notice to CSD of the disconnect action prior to the actual disconnect;
 - (2) within three (3) business days of the actual disconnect, provide a written description of the circumstances leading to the disconnect action; and
 - (3) give the customer written notice, which will include an address and telephone number, for CSD.
- (c) CSD may, after an informal inquiry and review of the written description of the circumstances leading to the disconnect action, direct the TSP to restore services to the affected end-user and/or file an application with the Commission requesting a finding of contempt and the imposition of a fine or other penalty against a TSP that unreasonably suspends or disconnects an end-user pursuant to subsection (b) of this section.

[Source: Amended at 12 Ok Reg 2143, eff 7-1-95; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 26 Ok Reg 1127, eff 7-1-09; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-11-12. Notice of Disconnection and Notice of Suspension

- (a) A notice of disconnection or suspension shall contain the following information:
- (1) The words "NOTICE OF DISCONNECTION" or "NOTICE OF SUSPENSION" or words with the same meaning, in print type larger than the print type of the notice text.
 - (2) The name and address and the telephone number of the end-user.
 - (3) A statement of the reason for the proposed disconnection or suspension of service.
 - (4) The date on or after which service will be disconnected or suspended unless appropriate action is taken.
 - (5) The telephone number in bold print of the telecommunications service provider where the end-user may make an inquiry.
 - (6) The approved charges and procedure for reconnection or approved charges and procedure to avoid suspension.
 - (7) A statement that the end-user must contact the telecommunications service provider regarding the disconnection or suspension, prior to contacting CSD.
 - (8) The address and telephone number of CSD, in print size which is smaller than the print size used for the telecommunications service provider's telephone number.
 - (9) The services that are being disconnected or suspended, whether local and/or toll, and if the service to be disconnected or suspended is local service, a statement that the end-user must also contact their IXC if such end-user wishes to terminate such service in order to avoid incurring additional charges for such service.
 - (10) Notice of suspension of service relating to past-due amounts shall inform the end-user that the total amount due may include charges for non-deniable and/or not regulated services which would not cause interruption of local service. The notice must indicate a toll-free telephone number of a service center where questions can be referred and payment arrangements made.
- (b) The following additional information shall be in the notice unless said information can be obtained in the telephone directory and the notice refers the end-user to the location in the directory where the information can be obtained:
- (1) A statement of how an end-user may avoid the disconnection of service or suspension of service, including a statement that the end-user must notify

the telecommunications service provider on the day of payment as to the place and method of such payment when the bill is paid at a place other than the office of the telecommunications service provider.

(2) A statement that informs the end-user where payments may be made or how to obtain a listing of authorized payment agencies.

[Source: Amended at 12 Ok Reg 2143, eff 7-1-95; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 29 Ok Reg 1549, eff 7-12-12; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-11-12.1. Emergency service following suspension

Regardless of the reason for suspension of service, if the end-user is served by a central office capable of providing emergency service following suspension, the telecommunications service provider shall also provide access to 911 or E911 service, where available, for a period of at least thirty (30) days.

[Source: Added at 13 Ok Reg 2437, eff 7-1-96; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-11-13. Reconnection

(a) Where service to any end-user has been refused or disconnected as authorized by 165:55-11-11, the telecommunications service provider shall not be required to connect or reconnect service except by order of the Commission and, if so ordered, only upon the terms and conditions specified in the order.

(b) When service to any end-user has been suspended or disconnected pursuant to this Subchapter, upon reconnection, the telecommunications service provider shall be authorized to make a reconnection charge prescribed in its approved tariffs or Terms of Service.

(c) Except in those instances where an order of the Commission is required prior to reconnection, once the reason for suspension or disconnection has been remedied, the telecommunications service provider shall restore service as soon as practical.

[Source: Amended at 12 Ok Reg 2143, eff 7-1-95; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 18 Ok Reg 2415, eff 7-1-01; Amended at 20 Ok Reg 2301, eff 7-15-03; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-11-14. Multi-State customers

The terms and conditions of Subchapter 11 may be changed, modified, revised, supplemented or deleted upon written agreement between a business end-user and the telecommunications service provider or IXC. This Section shall not apply to residential end-users.

[Source: Added at 26 Ok Reg 1127, eff 7-1-09; Amended at 29 Ok Reg 1549, eff 7-12-12]

SUBCHAPTER 13. OPERATING AND MAINTENANCE REQUIREMENTS

PART 1. NEW AND UNFILLED APPLICATIONS FOR SERVICE

165:55-13-1. Service objectives; service period

A telecommunications service provider shall install service consistent with the service objectives within the TSP's tariff or Terms of Service. Service orders should be filled as quickly as practicable, but within no longer than thirty (30) days unless unavoidable delays are experienced.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-13-2. Unfilled applications

Priority in filling unfilled applications will be given to furnishing service essential to public health and service, after which priority will be given to furnishing residential service to premises not otherwise served. The telecommunications service provider will prepare and shall submit the plan to the Commission upon request.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12]

PART 3. SERVICE STANDARDS

165:55-13-10. Minimum service standards

A telecommunications service provider shall meet service standards within the terms and conditions of service stated within the TSP's tariff or Terms of Service.

[Source: Amended at 11 Ok Reg 2585, eff 6-13-94; Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 15 Ok Reg 3054, eff 7-15-98; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 19 Ok Reg 1985, eff 7-1-02; Amended at 20 Ok Reg 2301, eff 7-15-03; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-13-10.1. Calling areas

(a) Wide Area Calling Plans ("WACPs") and Extended Area Service ("EAS") arrangements established as of the effective date of this Section, and any modifications thereafter approved by the Commission, shall be the standard level of service provided by all incumbent LECs providing service within said WACPs and EAS arrangements, unless the end-user elects otherwise pursuant to subsection (b) of this Section.

(b) An incumbent LEC may offer a calling scope which is different than an established WACP or EAS arrangement as an optional service, after notice and hearing, provided however, that end-users shall be deemed to have elected to receive the entire EAS or WACP area until such time as the end-user makes an affirmative election of a different calling scope.

(c)

In the event the competitive LEC provides an optional toll service that is consistent with an EAS or WACP calling scope, the competitive LEC shall be required to pay any contribution associated with minutes of use as established by the Commission in Order No. 399040, issued in Cause Nos. PUD 950000117 and PUD 950000119.

[Source: Added at 13 Ok Reg 2437, eff 7-1-96; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-13-11. Maximum number of parties on one line [REVOKED]

[Source: Revoked at 13 Ok Reg 2437, eff 7-1-96]

165:55-13-12. Extension of facilities

(a) Each incumbent LEC serving fewer than seventy-five thousand access lines is designated as a Carrier of Last Resort for the territory for which it was certified on the date of the adoption of the Federal Telecommunications Act of 1996.

(b) A Carrier of Last Resort will extend its distribution plant to furnish permanent service to any applicant located within one-quarter (1/4) mile of its existing facilities without requiring a construction charge, provided that the amount of plant to be constructed does not exceed that amount deemed necessary to serve the end-user's location. When an end-user requests services requiring an excessive quantity of facilities which will have extremely little potential for reuse, should that end-

user move or otherwise discontinue service, a construction charge based on the cost of the facilities would apply.

(c) A Carrier of Last Resort shall extend its distribution plant to applicants in an area located more than one-quarter (1/4) mile from its existing facilities under the following conditions:

(1) New extensions or reinforcement of existing line facilities required for furnishing access lines associated with the service offered by a Carrier of Last Resort shall be constructed under the following conditions, when application is by an individual end-user or a developer for service of a permanent nature:

(A) An allowance of a one-quarter (1/4) mile, route measurement, per applicant will be made for such extensions without the application of a construction charge.

(B) Where construction is required in excess of the allowance stated in subparagraph (b)(1)(A) of this Section, applicants for service may be required to pay a construction charge for all reasonable costs in excess of the free allowance.

(C) A Carrier of Last Resort may make, at its option, an extension of its facilities above the free limit upon receipt of a lesser payment, or no payment, when the gross anticipated revenue from the extension will provide a Carrier of Last Resort with adequate return upon its investment pursuant to a formula approved by the Commission or contained in its approved terms and conditions of service.

(D) Additional charges may be applicable where natural or other barriers are encountered which require undue circuitous routing or abnormal costs to be incurred by a Carrier of Last Resort.

(E) When a Carrier of Last Resort requires a charge for the extension of facilities into an area more than one-quarter (1/4) mile from its existing facilities, the end-user(s) may apply to be provided telecommunications services by a Carrier of Last Resort providing service an adjacent certified area, if the Commission so orders. This subparagraph shall be limited to situations where a Carrier of Last Resort will not provide service to an area located within its service territory without the payment of construction charges.

(2) Nothing in this Chapter shall prohibit any RUS borrower from making extensions in compliance with RUS rules or terms and conditions contained in any loan documents.

(d) In the event the Carrier of Last Resort is denied access to a premises or property by the owner or lessee, and is asked at a later date to fulfill the Carrier of Last Resort obligation with regard to that premises or property, the Carrier of Last Resort may request a Motion for Waiver of OAC 165:55-13-12 if the costs associated with fulfillment of the Carrier of Last Resort obligation are deemed excessive by the Carrier of Last Resort.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 21 Ok Reg 2101, eff 7-1-04; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-13-12.1. New Developments

A TSP may require a developer desiring an extension to a prospective real estate subdivision to post a surety bond or make a cash deposit or bank letter of credit (at the option of the developer) equal to the estimated total costs of the

extension before the construction of the extension is commenced. Total cost of construction shall not include drops to individual users off the telephone distribution facilities. At least annually, for a period of five (5) years, the TSP shall give the developer a credit equal to the percentage which the number of installations made in said twelve (12) months period bears to seventy-five percent (75%) of the total number of installations contemplated by the developer and the TSP for the completed subdivision. The credit referred to in this Chapter, in the case of deposit, shall be returned to the developer annually; with respect to a surety bond posted by the developer, the credit shall be in the form of an annual reduction of the face amount of the surety bond posted. Upon the developer receiving the applicable credit for each installation as set forth in this Chapter, the TSP shall release or cause to be released the obligation of the developer and the surety, if a surety bond was posted; provided, however, if within five (5) years from the date of the surety bond or cash deposit, the proposed development area has not been developed in a sufficient amount for the developer to receive credit for the total cost of extension to the development as agreed upon, then the developer shall be obligated to pay the TSP the total construction costs reduced by all credits previously allowed. In the event that said amount is not paid within sixty (60) days of the date due and a surety bond has been posted, the TSP may declare a default and shall have the right to call upon the surety for payment of the remaining unpaid amount due. In the event of dispute over the circumstances requiring the posting of a surety bond or cash deposit, and/or the reasonableness of the face amount of such bond or cash deposit, a TSP or the developer may apply to the Commission for an appropriate order resolving the dispute.

165:55-13-14.1. Tribal Land Link-up program

(a) Each telecommunications service provider who has been designated as an ETC and is receiving high-cost support on Tribal lands, pursuant to 47 CFR Part 54, Subpart D, shall file tariffs or post Terms of Service which offer a Tribal Land Link-up assistance program. This program shall offer:

- (1) For an eligible resident living on Tribal land, a reduction consistent with 47 CFR § 54.413(a)(1). The charge from which the reduction is made shall not exceed the customary charge for commencing telecommunications service for a single telecommunications connection at a subscriber's principal place of residence.
- (2) A deferred payment schedule consistent with 47 CFR § 54.413(a)(2) may be offered to the subscriber. The charge assessed for initiating service shall not exceed the customary charge for commencing telecommunications service for a single telecommunications connection at a subscriber's principal place of residence.

(b) A qualifying low-income end-user living on Tribal land may choose one or both of the programs set forth in (a)(1) and (a)(2) above of this Section.

(c) A telecommunications service provider, who has been designated as an ETC and is receiving federal high-cost support on Tribal lands, pursuant to 47 CFR Part 54, Subpart D, shall allow an end-user to receive the benefit of the Link-up program for a second or subsequent time only for a principal place of residence with an address different from the residence address at which the Tribal land Link-up assistance was provided previously.

(d) An eligible telecommunications service provider, who has been designated as an ETC and is receiving federal high-cost support on Tribal lands, pursuant to 47 CFR Part 54, Subpart D, shall publicize the availability of Link-up support throughout their designated ETC service area in a manner reasonably designed to reach those likely to qualify for the support.

(e) The end-user qualification criteria for Tribal land Link-up shall be the same as the criteria established for Lifeline in accord with 47 C.F.R. § 54.409.

[Source: Added at 19 Ok Reg 1985, eff 7-1-02; Amended at 31 Ok Reg 1082, eff 9-12-14; Amended at 34 Ok Reg 989, eff 9-11-17]

PART 5. SERVICE QUALITY STANDARDS

165:55-13-20. Responsibility for adequate and safe service

(a) A telecommunications service provider is responsible for providing adequate and efficient telephone service to every end-user served by it.

(b) A telecommunications service provider that uses its own local exchange facilities to provide service shall install and maintain its system so as to render safe, efficient, and continuous service, and shall keep all of its lines, equipment, and facilities in a good state of repair.

(c) The recommendations contained in the 2014 Edition of the National Electrical Code (NEC) and the 2012 Edition of the National Electrical Safety Code (NESC) are hereby adopted as the minimum standards governing the installation, construction, and maintenance of communication lines. The recommendations contained in the 2014 NEC will apply on a prospective basis effective September 1, 2017. Local and municipal electrical codes shall not apply to the installation of telecommunications facilities.

(d) The dominant criteria for these standards is voice grade service quality.

(e) All telecommunications service providers, that install temporary drops and temporary cables as interim facilities to ensure service to customers pending permanent placement of those facilities, are required to:

(1) Permanently remove, bury, or install drops and temporary cables as soon as practical, but in no circumstances shall that time exceed ninety (90) days without notification and justification being provided to CSD prior to expiration of the ninety (90) day period.

(2) Keep records of all temporary drops and temporary cables in each of its exchanges and provide the records to the Commission upon request.

165:55-13-22. Emergencies

(a) All telecommunications service providers shall make adequate provision for emergencies in order to prevent interruption of continuous telecommunications service throughout the area it serves.

(b) Central office(s) shall have an emergency power source, either on the premises or available on short notice.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

165:55-13-23. Adequacy of service

The telecommunications service provider shall ensure that there is a sufficient operating force and, where appropriate, sufficient equipment to serve its end-users.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-13-24. Adequacy of equipment

A telecommunications service provider shall, where appropriate, install sufficient equipment and ensure that there are sufficient personnel to handle the average busy hour, busy season traffic.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-13-25. Response to customer complaint inquiries

A telecommunications service provider and IXC shall respond to the Commission upon written or electronic inquiry from the Commission within the following time periods:

(1) Inquiries regarding disconnection, suspension or termination of local service - within one (1) business day of receipt of inquiry from the Commission.

(2) Inquiries other than for disconnection, suspension or termination of local service - within three (3) business days of receipt of inquiry from the Commission.

PART 9. LOCATION OF DEMARCATION POINTS AND NETWORK INTERFACES

165:55-13-40. Location of demarcation points and network interfaces

(a) **Simple residence and business locations.** The normal demarcation point for simple residence and business locations will be the network interface. The network

interface normally will be located on the exterior of a building, or inside the building if the interface device can not be provided on the exterior of the building.

(b) **Other buildings.** The normal demarcation point for regulated services offered by any telecommunications service provider in buildings commenced after June 30, 1992, will be at or near the point of minimum penetration. The point of minimum penetration is the location where the telecommunications service provider's regulated facilities enter the building, subject to an agreement to the contrary. The actual demarcation point in new buildings shall be located as close to the point of minimum penetration as appropriate environmental protection and space requirements allow. The telecommunications service provider will normally terminate its regulated services by placing an FCC approved network interface at the demarcation point.

(c) **Campuses.** The normal demarcation point for regulated services offered by telecommunications service providers in campuses commenced after June 30, 1992, will be in one of the buildings on the campus at or near the point of minimum penetration. The point of minimum penetration is the location where the telecommunications service provider's regulated facilities enter the building. The actual demarcation point in the building shall be located as close to the point of minimum penetration as appropriate environmental protection and space requirements allow. Telecommunications service providers will normally terminate their regulated services by placing an FCC-approved network interface at the demarcation point.

(d) **Apartment building.** The demarcation point for residential service in residential apartment buildings or high-rise apartment buildings may be placed at each individual living unit or at a central location within each building if adequate security is available.

(e) **Other demarcation points.** The point(s) of demarcation may be at a location(s) different than set forth in this Section if mutually agreed between the end-user and the telecommunications service provider.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96]

PART 11. INTERRUPTIONS OF SERVICE

165:55-13-50. Service standards; sufficient operating and maintenance force

A telecommunications service provider shall maintain an operating and maintenance force sufficient to meet service objectives and minimum standards for restoration of service after interruption as follows:

- (1) Provisions will be made to receive customer trouble reports at all times, twenty-four (24) hours per day.
- (2) Provision will be made to correct interruptions of service to persons and agencies required to respond to emergencies involving human life and safety at all times, consistent with the bona fide needs of the end-user and the availability and safety of telecommunications service provider personnel.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-13-51. Records of trouble reports

Each telecommunications service provider and IXC shall make a full and prompt investigation of every trouble report made to it by its end-users, either directly or through the Commission.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12]

165:55-13-52. Notice of service interruptions

(a) The Commission shall be notified as soon as possible, through the Director of the Public Utility Division and the Commission's Public Information Officer, of interruptions in telecommunications services which affect the entire system; a major division thereof; or which, in the judgment of the telecommunications service provider, may cause a high degree of public interest or concern.

(b) The Commission notification process required in subsection (a) of this Section, may be accomplished by facsimile or by electronic methods, twenty-four (24) hours a day, seven (7) days a week; or by phone, during the business hours of 8:00 a.m. through 4:30 p.m., Monday through Friday, and should consist of the following:

- (1) An initial contact to advise of the outage; the cause of such outage; the area affected; and, the estimated time for repair;
- (2) Intermediate contact to provide status reports, as deemed necessary by the telecommunications service provider, or as may be requested by the Commission Staff; and,
- (3) A conclusory contact detailing the results and completion of the restoration of service.

[Source: Amended at 13 Ok Reg 2437, eff 7-1-96; Amended at 29 Ok Reg 1549, eff 7-12-12; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-13-53. Restoration of service plan

Each telecommunications service provider shall have a written restoration of service plan (Plan) and submit the Plan to the Commission upon request.

[Source: Added at 18 Ok Reg 2415, eff 7-1-01; Amended at 29 Ok Reg 1549, eff 7-12-12]

SUBCHAPTER 15. NOTIFICATION OF TRANSACTIONS AFFECTING CUSTOMERS OR BUSINESS OPERATIONS

165:55-15-1. Notification of certain transactions affecting the customers or operations of a telecommunications service provider or IXC

(a) The parties to an agreement, the performance of which will result in the movement of some or all of the regulated telecommunications services customers of one or more certificated telecommunications services providers or IXCs to a different legal entity, shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and five (5) copies of a Notification of Transaction with the Commission's Office of the Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction. Any related relief, including but not limited to new Certificates of Convenience and Necessity or tariffs, shall be filed as separate causes.

(b) The parties to an agreement, the performance of which will result in the transfer of a Certificate of Convenience and Necessity, with or without the transfer of a tariff, from one legal entity to another legal entity shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and five (5) copies of a Notification of Transaction with the Commission's Office of the Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(c) The parties to an agreement, the performance of which will result in the merger of one or more legal entities with a surviving legal entity which is certificated to provide local and/or interexchange telecommunications services, shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and five (5) copies of a Notification of Transaction with the Commission's Office of the Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(d) This Section shall not require notification to the Commission of transactions which involve only changes in the ownership of the stock of a telecommunication service provider or IXC. Such transactions are not subject to regulation by the Commission.

(e) The Notification of Transaction shall include a copy of the agreement, with all exhibits and schedules, and set forth the following information, if applicable:

(1) The name of the acquiring entity and the acquired entity.

(2) Identification of the acquired assets.

(3) The anticipated completion date and the effective date (if different) of the transaction.

(4) The name of the entity(ies) which will be providing telecommunications services in Oklahoma subsequent to the effective date of the transaction (the "surviving entity").

(5) The name, address and telephone number of a contact person for purposes of the Notification of Transaction.

(6) The names and qualifications of the individuals who will serve as officers and management of the surviving entity.

(7) The name(s), address(es) and telephone number(s) of the representatives of the surviving entity who will be the contact(s) for the Public Utility Division and CSD and will be primarily responsible for:

(A) Providing customer service;

(B) Repair and maintenance;

(C) Answering complaints;

(D) Authorizing and/or furnishing refunds to customers

(E) Tariff issues; and,

(F) Receiving Notices related to causes docketed at the Commission.

(8) An affidavit that states that the surviving entity possesses the financial ability to provide telecommunications services in the State of Oklahoma.

(9) A copy of the notice which will be provided to affected customers informing them of the transaction and any change in the name of the entity which provides telecommunications services to them or in their rates, charges or terms and conditions of service as a result of the transaction.

(10) Identification of any changes in services to be offered or tariffed rates to affected customers required by the transaction.

(11) A narrative and/or schematic description of the relationship between or among the acquired and acquiring entities and the surviving entity.

(12) An acknowledgment that any tariff revisions shall only be accomplished in a separate filing.

(13) A statement of the approximate number of Oklahoma customers.

(14) In addition, this Section shall not apply to transactions between affiliates that have an Oklahoma Certificate of Convenience and Necessity. If the transaction is going to modify the company name on the customer's bill, forty-five (45) days advance notice must be provided to affected

customers.

(f) At the time of filing the Notification of Transaction, the acquiring entity shall provide a copy of the Notification of Transaction, with all attachments thereto, to the Office of the Attorney General of the State of Oklahoma.

(g) The Commission Staff shall review the Notification of Transaction for the purpose of determining whether the proposed transaction should be approved and, in the case of mergers, whether the surviving entity should be allowed to provide telecommunications service in Oklahoma after the effective date of the transaction under the authority of any existing Certificate of Convenience and Necessity. The Commission shall act on a notification within forty-five (45) days of the date the notification is filed. No reportable transaction shall be consummated except by order of the Commission. Any person wishing to object to the proposed filing must file an objection with the Commission's Office of the Court Clerk no later than fifteen (15) days after the proposed filing. The Attorney General of the State of Oklahoma shall be granted intervention in such proceeding, if requested.

(h) Within forty-five (45) days of the filing of the Notification of Transaction, the Commission Staff may file a Continuance of Review in the Cause stating that the Commission Staff has not completed its review of the transaction and shall require an additional specified time, not to exceed an additional thirty (30) calendar days, in which to complete such review. The Commission Staff shall accompany such a Continuance of Review with a specification of the additional information, if any, needed to complete this review.

(i) The Commission Staff may, if it determines appropriate, file a Notice in the Cause requiring the acquiring entity and/or the surviving entity to show cause that the proposed transaction and/or merger is lawful, fair to the customers and in the public interest. The filing of such Notice by the Commission Staff will not alone suspend the authority of any entity to operate under an existing Certificate of Convenience and Necessity. Simultaneously with the filing of any such Notice, the Commission Staff shall propose a procedural schedule, including a date for hearing which shall be held within ninety (90) calendar days of the date of the filing of the Notification of Transaction, unless otherwise ordered by the Commission. If such a Notice is filed by the Commission Staff, the acquiring entity and/or surviving entity shall have the burden of establishing that the proposed transaction(s) is lawful, fair to the customers and in the public interest.

(j) After approval of notification of transaction(s), and not later than thirty (30) days after transaction consummation, an original and two (2) copies of the approved tariffs, if necessary, which conform to OAC 165:55-5-20, shall be provided to the Public Utility Division.

165:55-15-5. Cessation of business in Oklahoma

- (a) At least thirty (30) days before the effective date of the cessation of the provisioning of telecommunications service(s) in the State of Oklahoma, a telecommunications service provider or IXC shall file an original and five (5) copies of an application for withdrawal of its Certificate of Convenience and Necessity and cancellation of its tariffs and provide Notice of such filing to the Attorney General of the State of Oklahoma.
- (b) An application for withdrawal shall include as attachments the following information, which must be certified as true and correct by an officer of any corporate applicant, or an authorized representative of an unincorporated applicant:
- (1) The contact person who will be responsible for concluding all outstanding business with the Commission and customers;
 - (2) A statement regarding the amount of any outstanding customer deposits and the date refund checks will be sent to customers; and,
 - (3) The date of withdrawal.
- (c) Notice of discontinuance shall be provided at least thirty (30) days prior to the date that service will cease by regular mail to all of the customers of the telecommunications service provider or IXC. The form and method of notice shall be approved by the Director of the Public Utility Division, and shall give the exact date that service will cease and contain information as to the procedure for any refunds due customers.
- (d) Notice of discontinuance will be sent at least thirty (30) days prior to the date service will cease, by certified mail, to any E911/911 Database Management Service Provider within the exchanges served by the applicant. Notice shall include:
- (1) The exact date the applicant will cease to do business in Oklahoma.
 - (2) A statement that until the date applicant ceases to do business in Oklahoma, the applicant will continue to submit transactions to the E911/911 Database Management Service Provider for transferring and keeping up-to-date customer's information.
 - (3) A statement that the applicant will unlock or release all E911/911 records effective with its termination date, thereby enabling the migration of existing E911/911 records with a telephone number ported by the customer to a different telecommunications service provider.
- (e) Unless provided otherwise in this Chapter, no application for withdrawal and/or cancellation of an existing Certificate of Convenience and Necessity and tariff shall be granted except by Order of the Commission, after such notice and hearing, if any, as directed by the Commission.
- (f) The Commission Staff may file an application to cancel an existing Certificate of Convenience and Necessity and tariff, at the company's request and at the option of the Commission Staff. The request may be in the form of a letter to the Director of the Public Utility Division. The letter will conform to OAC 165:55-15-5 (b) and (c).

165:55-15-5.1. Withdrawal of competitive services

(a) Upon at least thirty (30) days advance notice to the Director of the Public Utility Division, an ILEC serving more than 75,000 customers on January 1, 2015 may withdraw any service that has been deemed competitive by the Commission as of January 1, 2014.

(b) Notice of discontinuance shall be sent at least thirty (30) days prior to the date that service will cease by regular mail to all of the affected customers of the telecommunications service provider. The notice shall be in a form approved by the Director of the Public Utility Division, and shall give the exact date that service will cease and contain information as to the procedure for any refunds due customers.

SUBCHAPTER 17. FACILITATION OF LOCAL EXCHANGE COMPETITION

165:55-17-1. Rules governing local exchange competition

The provisioning of local exchange service by any telecommunications service provider subject to the jurisdiction of the Oklahoma Corporation Commission, shall be subject to all requirements of 47 U.S.C. §251 *et seq.* and OAC 165:55.

[Source: Added at 13 Ok Reg 2437, eff 7-1-96; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-17-2. [RESERVED]

[Source: Reserved at 13 Ok Reg 2437, eff 7-1-96]

165:55-17-3. Designation of service territory

(a) The Commission shall determine whether a telecommunications service provider's service territory is in the public interest at the time the competitive LEC seeks certification or proposes changes to its service territory. In determining whether the proposed service territory meets the public interest, the Commission shall consider factors, including but not limited to, the existence and location of the competitive LEC's facilities, the number of potential customers to be served and the potential impact on universal service.

(b) No service territory shall be changed except by Order of the Commission after such notice and hearing, if any, as directed by the Commission. Applications for change to an existing service territory shall be accompanied by revised tariff pages or an initial tariff reflecting the proposed new service territory.

165:55-17-4. [RESERVED]

[Source: Reserved at 13 Ok Reg 2437, eff 7-1-96]

165:55-17-5. Obligations of telecommunications service providers to facilitate competition

(a) **General duty of telecommunications service providers.** Each telecommunications service provider has the duty:

- (1) To interconnect directly with or indirectly with the facilities and equipment of other telecommunications service providers; and,

(2) Not to install network features, functions, or capabilities that do not comply with established guidelines and standards.

(b) **Obligations of all telecommunications service providers.** Each telecommunications service provider furnishing local exchange services has the following duties:

(1) **Resale.** The duty not to prohibit, and not to impose unreasonable or discriminatory conditions or limitations on, the resale of its telecommunications services.

(2) **Number portability.** The duty to provide, to the extent technically feasible, number portability in accordance with requirements established by the FCC.

(3) **Dialing parity.** The duty to provide dialing parity to competing providers of local exchange and long distance telecommunications services, and the duty to permit all such providers to have nondiscriminatory access to telephone numbers, operator services, directory assistance and directory listings, with no unreasonable dialing delays.

(4) **Access to rights of way.** The duty to afford access to the poles, ducts, conduits, and rights-of-way of such telecommunication service provider to competing providers of telecommunications services on rates, terms and conditions that are consistent with existing laws, regulations and contract rights.

(5) **Reciprocal compensation.** The duty to establish reciprocal compensation arrangements for the transport and termination of telecommunications services.

(c) **Additional obligations of incumbent LECs.** In addition to the obligations described in OAC 165:55-17-5(b), each incumbent LEC and any competitive LEC that is treated as an incumbent LEC pursuant to 47 U.S.C. § 251(h), has the following duties:

(1) **Negotiations.** The duty to negotiate in good faith the particular terms and conditions of agreements to fulfill the duties described in this Section. The requesting telecommunications service provider also has the duty to negotiate in good faith the terms and conditions of such agreements.

(2) **Interconnection.** The duty to provide, for the facilities and equipment of any requesting telecommunications service provider, interconnection with the incumbent LEC's network as follows:

(A) For the transmission and routing of telephone exchange service and access service;

(B) At any technically feasible point within the incumbent LEC's network;

(C) That is at least equal in quality to that provided by the incumbent LEC to itself or to any subsidiary, affiliate, or any other party to which the incumbent LEC provides interconnection; and,

(D) On rates, terms, and conditions that are just, reasonable, and nondiscriminatory, in accordance with the terms and conditions of the agreement and requirements of this Section.

(3) **Unbundled access.** The duty to provide, to any requesting telecommunications service provider for the provision of telecommunications services, nondiscriminatory access to network elements required by OAC 165:55-17-11 on an unbundled basis and at any technically feasible point on rates, terms, and conditions that are just, reasonable, and nondiscriminatory in accordance with the terms and

conditions of the agreement and requirements of this Chapter. An incumbent LEC shall provide such unbundled network elements in a manner that allows requesting telecommunications service providers to combine such elements in order to provide such telecommunications services.

(4) **Resale.** The duty to provide resale as follows:

(A) To offer for resale at wholesale rates any telecommunications service that the incumbent LEC provides at retail to subscribers who are not telecommunications service providers; and,

(B) Not to prohibit, and not to impose unreasonable or discriminatory conditions or limitations on, the resale of such telecommunications services, except that telecommunications service providers may resell local exchange service only to the same class of customers to which the incumbent LEC sells such services.

(5) **Notice of changes.** The duty to provide reasonable public notice of changes in the information necessary for the transmission and routing of services using the incumbent LEC's facilities or networks, as well as of any other changes that would affect the interoperability of such facilities and networks.

(6) **Collocation.** The duty to provide, on rates, terms and conditions that are just, reasonable, and nondiscriminatory, for physical collocation of equipment necessary for interconnection or access to unbundled network elements at the premises of the incumbent LEC, except that the incumbent LEC may provide for virtual collocation if the incumbent LEC demonstrates that physical collocation is not practical for technical reasons or because of actual space limitations.

(d) **Exemptions for rural telephone companies.** OAC 165:55-17-5(c) shall not apply to a rural telephone company until:

(1) Such company has received a bona fide request for interconnection, services, or network elements, and,

(2) The Commission determines that such request is not unduly burdensome, is technically feasible, and is consistent with established universal service principles.

(A) **Termination of exemption.** In order to terminate the exemption of a rural telephone company, the following must occur:

(i) The telecommunications service provider making a bona fide request of a rural telephone company for interconnection, services, or network elements shall submit a notice of its request to the Commission.

(ii) The Commission shall conduct an inquiry for the purpose of determining whether to terminate the exemption under this subsection.

(B) **Limitation on exemption.** The exemption provided by this subsection shall not apply to a request under OAC 165:55-17-5(c) from a cable operator providing video programming, and seeking to provide any telecommunications service, in the area in which the rural telephone company begins providing video programming after February 8, 1996.

(e) **Suspensions and modifications for rural telephone companies.** An incumbent LEC with fewer than two percent (2%) of the end-user lines installed in

the aggregate within the United States may apply to the Commission for suspension or modification of any requirement of OAC 165:55-17-5(b) or OAC 165:55-17-5(c) applicable to network facilities specified in such application. The Commission will grant such application to the extent that, and for such duration as, the Commission determines that such suspension or modification:

(1) Is necessary to:

(A) Avoid a significant adverse economic impact on users of telecommunications services generally;

(B) Avoid imposing a requirement that is unduly economically burdensome; or,

(C) Avoid imposing a requirement that is technically infeasible; and,

(2) Is consistent with the public interest, convenience and necessity.

(f) Time for Commission review. The Commission will issue an Order regarding any application:

(1) For termination of an exemption, pursuant to OAC 165:55-17-5(d), within one hundred twenty (120) days after the Commission receives notice of the request:

(A) The Commission shall terminate the exemption if the request is:

(i) Not unduly economically burdensome;

(ii) Is technically feasible; and,

(iii) Is consistent with established universal service principles.

(B) Upon termination of the exemption, the Commission will establish an implementation schedule for compliance with the request.

(2) For a suspension or modification of OAC 165:55-17-5(b) or OAC 165:55-17-5(c), within one hundred eighty (180) days after receiving such application.

(g) Failure to act on a bona fide request. Any telecommunications service provider that makes a bona fide request for services or network elements to another telecommunications service provider, but fails to begin the necessary steps to introduce competition in the requested exchange(s) or zone(s) within twelve (12) months after satisfactory unbundling and/or interconnection agreements have been approved by the Commission, shall be liable for the reasonable expenses incurred by the requested telecommunications service provider.

(h) Each TSP shall have the duty to comply with 47 U.S.C. §251 and §252 and 17 O.S. §139.101 *et seq.*

[Source: Reserved at 13 Ok Reg 2437, eff 7-1-96]

165:55-17-7. Procedures for negotiation, arbitration and approval of agreements

(a) Agreements arrived at through voluntary negotiations. Upon receiving a request for interconnection, services, or network elements pursuant to OAC 165:55-17-5, an incumbent LEC may negotiate and enter into a binding agreement with the requesting telecommunications service provider or providers without regard to the standards set forth in OAC 165:55-17-5 (b) and (c). The agreement shall include a detailed schedule of itemized charges for interconnection and each

service or network element included in the agreement. The agreement, including any interconnection agreement negotiated before the date of enactment of the Telecommunications Act of 1996 (February 8, 1996), shall be filed with the Commission under subsection (e) of this Section.

(b) **Mediation.** Any party negotiating an agreement under this Section may, at any point in the negotiations, ask the Commission to participate in the negotiations and mediate any differences arising in the course of the negotiations. The Public Utility Division shall provide the mediator, unless otherwise directed by the Commission.

(c) **Agreements arrived at through compulsory arbitration.** During the period from the 135th to the 160th day (inclusive) after the date on which an incumbent LEC receives a request for negotiation under this Section, the incumbent LEC or any other party to the negotiation may seek arbitration at the Commission of any open issues. Nothing in this subsection shall preclude negotiating parties from filing a joint application.

(1) **Responsibilities of the applicant with regard to the Commission.** A party that seeks arbitration from the Commission pursuant to this subsection shall, contemporaneously with the filing of its application, provide the Commission all relevant documentation concerning:

(A) The unresolved issues and the position of each of the parties with respect to those issues; and,

(B) Any other issue discussed and resolved by the parties.

(2) **Responsibility of the applicant with regard to other parties.** A party that seeks arbitration from the Commission pursuant to this subsection shall, provide a copy of the application and any documentation to the other party or parties not later than the day on which the application is filed.

(3) **Opportunity to respond.** A nonpetitioning party to a negotiation under this Section may respond to the other party's petition and provide such additional information as it wishes within twenty-five (25) days after the Commission receives the petition.

(4) **Action by the Commission.** When an application for arbitration is filed, the Commission will utilize the following procedures.

(A) The Commission will limit its consideration of any petition under this subsection, and any response thereto, to the issues set forth in the petition and in the response, if any, filed under paragraph (3) of this subsection.

(B) The Commission may require the petitioning party and the responding party to provide such information as may be necessary for the Commission to reach a decision on the unresolved issues. If any party refuses or unreasonably fails to respond on a timely basis to any request from the Commission, then the Commission may proceed on the basis of the best information available to it, from whatever source derived.

(C) The Commission will resolve each issue set forth in the petition and the response, if any, by imposing appropriate conditions as required to implement subsection (d) of this Section upon the parties to the agreement, and shall conclude the resolution of any unresolved issues not later than nine (9) months after the date on which the telecommunications service provider received the request under this Section.

(5) **Refusal to negotiate.** The refusal of any other party to the negotiation to participate further in the negotiations, to cooperate with the Commission

in carrying out its function as an arbitrator, or to continue to negotiate in good faith in the presence, or with the assistance, of the Commission shall be considered a failure to negotiate in good faith.

(d) **Standards for Arbitration.** In resolving by arbitration, under subsection (c) of this Section, any open issues and imposing conditions upon the parties to the agreement, the Commission will:

- (1) Ensure that such resolution and conditions meet the requirements of OAC 165:55-17-5 and applicable FCC requirements;
- (2) Establish rates for interconnection, services, or network elements consistent with OAC 165:55-17-27; and,
- (3) Provide a schedule for implementation of the terms and conditions by the parties to the agreement.

(e) **Approval by the Commission and grounds for rejection.** Any interconnection agreement adopted by negotiation or arbitration shall be submitted for approval by filing an application with the Commission's Office of the Court Clerk and comply with OAC 165:55-17-13(e). After review of the application, the Commission will approve or reject the agreement, with written findings as to any deficiencies. The Commission will only reject an agreement, or any portion thereof, if it finds that:

- (1) The agreement, adopted by negotiation under subsection (a) of this Section, either:
 - (A) Discriminates against a telecommunications service provider that is not a party to the agreement; or,
 - (B) The implementation of such agreement or portion is not consistent with the public interest, convenience, and necessity.
- (2) The agreement adopted by compulsory arbitration under this Section does not meet the requirements of OAC 165:55-17-5 or the agreement does not meet the standards in OAC 165:55-17-27.
- (3) **Notice requirements.** Applicants seeking approval of an Interconnection Agreement shall provide Notice of the Application to be given by mail, electronic mail or personal service to the Attorney General of the State of Oklahoma.

(f) **Reservation of authority.** Notwithstanding subsection (e), the Commission, consistent with the requirements of 47 § 253, shall enforce other requirements of State law in its review of an agreement, including requiring compliance with Subchapter 13 of this Chapter.

(g) **Statement of generally available terms.** In conformance with 47 U.S.C. § 252(f), SWBT may prepare and file with the Commission a statement of the terms and conditions that SWBT generally offers within Oklahoma to comply with the requirements of 47 U.S.C. § 251, and the regulations thereunder and the standards applicable under this Section. In the event SWBT files such a statement, the Commission will:

- (1) Approve the statement provided the statement complies with Subchapter 13 of this Chapter, OAC 165:55-17-5 and OAC 165:55-17-27 and is consistent with 47 U.S.C. § 253;
- (2) Complete the Commission's review of SWBT's statement not later than 60 days after the date of such submission, (including any reconsideration thereof), unless SWBT agrees to an extension of the period for such review; or permit such statement to take effect.

(h) **Continued review of SWBT's statement of generally available terms.** In the event the Commission has permitted the statement of SWBT to take effect pursuant to paragraph (2) of subsection (g), the Commission may continue to review said

statement after it is effective and the Commission may approve or disapprove said statement if it does not meet the requirements of paragraph (1) of subsection (g).

(i) **Duty to negotiate not affected.** The submission or approval of a statement under subsection (g) shall not relieve SWBT of its duty to negotiate the terms and conditions of an agreement pursuant to OAC 165:55-17-5.

(j) **Consolidation of proceedings.** Where not inconsistent with the requirements of the Federal Telecommunications Act of 1996, the Commission may, to the extent practical, consolidate proceedings under OAC 165:55-17-5 and OAC 165:55-17-7, in order to reduce administrative burdens on telecommunications service providers, other parties to the proceedings, and the Commission in carrying out its responsibilities under the Telecommunications Act of 1996.

(k) **Availability for public inspection.** The Commission will make a copy of each agreement approved under subsection (e) and each statement approved under subsection (g) available for public inspection and copying within 10 days after the agreement or statement is approved. The Commission will charge the fees set forth in OAC 165:5-3-1 to cover the costs of processing an application and copying.

(l) **Availability to other telecommunications service providers.** A telecommunications service provider shall make available any interconnection, service, or network element provided under an agreement approved under this Section to which it is a party, to any other requesting telecommunications service provider; upon the same terms and conditions as those provided in the agreement.

(m) Each TSP shall have the duty to comply with 47 U.S.C. §252 and 17 O.S. §139.101 *et seq.*

165:55-17-9. Resale of local telecommunications service

(a) **Elimination of resale restrictions.** Except as provided in this Subchapter, each telecommunications service provider has the duty not to prohibit, and not to impose unreasonable or discriminatory conditions or limitations on, the resale of its telecommunications services. Telecommunications services may be resold, either on a stand-alone basis, or as part of a package of services.

(b) **Allowable resale restriction.** A telecommunications service provider that obtains, at wholesale rates, a telecommunications service that is available at retail only to a specified category of end-users may only resell such service to the same category of end-users.

(c) **Incumbent LEC wholesale rates.** Each incumbent LEC has the duty to offer for resale, at wholesale rates, any telecommunications service that the incumbent LEC provides at retail to end-users who are not telecommunications service providers. Wholesale rates of services shall exclude costs attributable to marketing, billing, collection and other costs that will be avoided by the incumbent LEC in providing the service on a wholesale basis.

(d) **Automated Interfaces.** To the extent an incumbent LEC provides itself, its affiliate, or its subsidiary automated interface for purpose of service ordering, maintenance, or repair, it shall make such interfaces available to the extent it protects customer privacy and system integrity, to other telecommunications service providers on rates, terms, and conditions that are just, reasonable and nondiscriminatory. The provision of such interfaces shall not permit access to or

manipulation of the underlying systems themselves.

165:55-17-10. [RESERVED]

[Source: Reserved at 13 Ok Reg 2437, eff 7-1-96]

165:55-17-11. Unbundling of incumbent LEC networks

(a) Upon receipt of a bona fide request, each incumbent LEC shall enter into good faith negotiations to unbundle its network elements to the exchange(s) and/or zone(s) specifically requested in the bona fide requests. Said unbundling shall be available at any technically feasible point on rates, terms, and conditions that are just, reasonable, and nondiscriminatory.

(b) Subsection (a) of this Section shall not be applicable to a rural telephone company until such time as the Commission has determined that the bona fide request is not unduly economically burdensome, is technically feasible and is consistent with universal service.

(c) Unbundling issues not addressed or resolved by these rules, shall be addressed and resolved through the negotiation and arbitration process in a manner consistent with the Federal Telecommunications Act of 1996 and FCC regulations prescribed thereto.

165:55-17-12. [RESERVED]

[Source: Reserved at 13 Ok Reg 2437, eff 7-1-96]

165:55-17-13. Interconnection of networks

(a) Local exchange telecommunications networks shall be interconnected, where technically feasible, so that end-users of any telecommunications service provider can seamlessly send and/or receive calls without any diminution in service quality regardless of the telecommunications service provider selected by the end-user or the called party. Such interconnection shall be made available, when requested by a competing telecommunications service provider, on an unbundled basis equally and on a nondiscriminatory basis.

(b) A telecommunications service provider shall make available any interconnection, service, or network element, provided under an agreement to which it is a party and which has been approved by the Commission pursuant to OAC 165:55-17-7, to any other requesting telecommunications service provider upon the same terms and conditions as those provided in the agreement.

(c) Interconnection issues not addressed or resolved by these rules, shall be addressed and resolved through the negotiation and arbitration process provided for in a manner consistent with the Federal Telecommunications Act of 1996 and FCC regulations prescribed thereto.

(d) When filing an amendment to an interconnection agreement, the effective date, order number and cause number of the original interconnection agreement or the subsequent amendment that is being modified must be included.

(e) When filing an application for approval of an agreement or an amendment to an existing interconnection agreement, a file-stamped copy will be provided to the Director of the Public Utility Division, the Oklahoma Attorney General, each E911 public safety answering point within the territory of the service area affected by the proposed agreement and any other party to the agreement. The copy to the Director

of the Public Utility Division may be contained on compact disk, formatted in an IBM compatible form using Microsoft Word for Windows, or compatible software.

165:55-17-15. Reciprocal compensation

(a) Local telecommunications traffic shall be terminated on a nondiscriminatory basis for reciprocal compensation. The Commission will not consider the terms and conditions for reciprocal compensation to be just and reasonable unless:

- (1) Such terms and conditions provide for the mutual and reciprocal recovery by each telecommunications service provider of the costs associated with the transport and termination on each telecommunications service provider's network facilities related to traffic that originates on the network facilities of the other telecommunications service provider; and,
- (2) Such terms and conditions determine said costs on the basis of a reasonable approximation of the additional costs of terminating said traffic.

(b) This Section shall not be construed:

- (1) To preclude arrangements that afford the mutual recovery of costs through the offsetting of reciprocal obligations, including arrangements that waive mutual recovery (such as bill-and-keep arrangements); or,
- (2) To require telecommunications service providers to maintain records with respect to the additional costs of said traffic.

[Source: Reserved at 13 Ok Reg 2437, eff 7-1-96]

165:55-17-17. Number portability and dialing parity

(a) **In General.** All telecommunications service providers have the duty to provide number portability in accordance with requirements prescribed by the FCC.

(b) **Additional State Requirements.** To the extent a telecommunications service provider allows an end-user to retain the same telephone number when changing service locations within a wire center, said telecommunications service provider must allow an end-user to retain the same telephone number when changing service locations and telecommunications service providers within a wire center.

165:55-17-25. Costing standards

(a) To facilitate the Commission's ability to arbitrate agreements between telecommunications service providers when negotiations have resulted in a party requesting the Commission to arbitrate, the telecommunications service provider owning facilities that are the subject of arbitration shall provide to the Commission the following cost studies, for those services in dispute, no later than one hundred sixty (160) days after the receipt of a request for negotiation:

- (1) Long-run incremental cost ("LRIC") studies and studies identifying a contribution to common costs for interconnection of facilities and network elements; or,
- (2) Marketing, billing, collection and other costs that will be avoided by the telecommunications service provider for any resold services.

(b) To facilitate the Commission's ability to review and approve negotiated agreements between telecommunications service providers, both parties shall provide to the Commission Staff, within ten (10) days following the request, any information, including LRIC studies, necessary to demonstrate that the negotiated agreement does not discriminate against a telecommunications service provider which is not a party to the agreement.

(c) Nothing in this Section precludes a party from requesting production of cost studies during the negotiation process provided for under federal law, nor precludes a party from objecting to such request. Disputes related to such requests or objections may be submitted by either party to the Commission for mediation pursuant to OAC 165:55-17-7.

165:55-17-27. Pricing and imputation standards

(a) **Interconnection and network element charges.** The Commission will determine just and reasonable prices for network elements and interconnection of facilities and equipment as follows:

- (1) Prices shall be based on the cost, determined without reference to a rate-of-return or other rate-based proceeding, of providing the interconnection or network element, whichever is applicable;
- (2) Prices shall be nondiscriminatory; and,
- (3) Prices may include a reasonable profit.

(b) **Charges for transport and termination of traffic.** The terms and conditions for reciprocal compensation shall be consistent with OAC 165:55-17-15 and 47 U.S.C. §252(d)(2).

(c) **Wholesale prices for telecommunications services.** Incumbent LECs shall provide wholesale rates for all retail telecommunications services sold to end-users on the basis of the retail rates, excluding the portion thereof attributable to any marketing, billing, collection and other costs that will be avoided by telecommunications service providers in providing the service on a wholesale basis.

(d) **Southwestern Bell Telephone Company imputation.** Southwestern Bell Telephone Company shall charge its affiliates, or impute to itself if using the access for provision of its own services, an amount for access to its telephone service and exchange access that is no less than the amount charged to any unaffiliated IXCs for such service.

(e) **Prohibition of subsidization.** A telecommunications service provider may not use services that are not competitive to subsidize services that are subject to competition. With respect to intrastate services, the Commission may establish any necessary cost allocations, rules, accounting safeguards, and guidelines to ensure that no such subsidization occurs.

165:55-17-30. Customer choice

(a) Where choices are available, every customer shall have the right to choose his or her TSP.

(b) Where choices of TSPs are available, a TSP shall not enter into a contract or agreement with any person or entity, including but not limited to; property developers, multi-tenant property owners or managers, homeowners associations, or any agent or representative of such person or entity that would prohibit or restrict an end-user's right to select the carrier of his or her choice. Should a carrier become aware that such a property owner, manager, or agent is prohibiting or restricting an end-user's right to select the carrier of his or her choice, the carrier shall notify the Director of the Public Utility Division for the Commission.

(c) The Public Utility Division may, after an informal investigation, file an application requesting a finding of contempt and the imposition of a fine or other

penalty against a TSP that enters into a contract or agreement that prohibits or restricts an end-user's right to select the carrier of his or her choice.

(d) The investigation and findings of the Public Utility Division shall not be contrary to federal rules regarding customer

SUBCHAPTER 19. UNLAWFUL PRACTICES

PART 1. SLAMMING

165:55-19-1. Slamming

Slamming is prohibited.

[Source: Added at 15 Ok Reg 3054, eff 7-15-98; Amended at 16 Ok Reg 2261, eff 7-1-99; Amended at 18 Ok Reg 2415, eff 7-1-01]

165:55-19-1.1. Verification of order for telecommunications service

(a) No telecommunications carrier shall submit or execute a change on the behalf of an end-user in the end-user's selection of a provider of telecommunications service except in accordance with the procedures prescribed in this Part 1 of this Subchapter.

(1) **Requirement for submission of changes of provider.** No submitting carrier shall submit a change on the behalf of an end-user in the end-user's selection of a provider of telecommunications service prior to obtaining:

(A) Authorization from the end-user, and

(B) Verification of that authorization in accordance with the procedures prescribed in this Section. The submitting carrier shall maintain and preserve records of verification of end-user authorization for a minimum period of two years after obtaining such verification.

(2) **Executing carriers shall not verify changes of provider.** An executing carrier shall not verify the submission of a change in an end-user's selection of a provider of telecommunications service received from a submitting

carrier. For an executing carrier, compliance with the procedures described in Part 1 of this Subchapter shall be defined as prompt execution, without any unreasonable delay, of changes that have been verified by a submitting carrier.

(3) Exclusion of commercial mobile radio services providers.

Commercial mobile radio services (CMRS) providers shall be excluded from the verification requirements of this Section as long as they are not required to provide equal access to common carriers for the provision of telephone toll services, in accordance with 47 U.S.C. § 332(c)(8).

(b) Requirement for separate verification for each type of service. Where a telecommunications carrier is selling more than one type of telecommunications service (*e.g.*, local exchange, intraLATA/intrastate toll, interLATA/interstate toll, and international toll) that carrier must obtain separate authorization from the end-user for each service sold, although the authorizations may be made within the same solicitation. Each authorization must be verified separately from any other authorizations obtained in the same solicitation. Each authorization must be verified in accordance with the verification procedures prescribed in Part 1 of this Subchapter.

(c) Requirement for confirmation of change order. No telecommunications carrier shall submit a preferred carrier change order unless and until the order has been confirmed in accordance with one of the following procedures:

(1) **Written authorization.** The telecommunications carrier has obtained the end-user's written authorization in a form that meets the requirements of 165:55-19-1.2; or

(2) **Electronic authorization.** The telecommunications carrier has obtained the end-user's electronic authorization to submit the preferred carrier change order. Such authorization must be placed from the telephone number(s) on which the preferred carrier is to be changed and must confirm the information in (c)(1) of this Section. Telecommunications carriers electing to confirm sales electronically shall establish one or more toll-free telephone numbers exclusively for that purpose. Calls to the number(s) will connect an end-user to a voice response unit, or similar mechanism, that records the required information regarding the preferred carrier change, including automatically recording the originating automatic number identification; or

(3) **Third-party authorization.** An appropriately qualified independent third party has obtained the end-user's oral authorization to submit the preferred carrier change order that confirms and includes appropriate verification data (*e.g.* the end-user's date of birth or social security number). The independent third party must not be owned, managed, controlled, or directed by the carrier or the carrier's marketing agent; must not have any financial incentive to confirm preferred carrier change orders for the carrier or the carrier's marketing agent; and must operate in a location physically separate from the carrier or the carrier's marketing agent. The content of the verification must include clear and conspicuous confirmation that the end-user has authorized a preferred carrier change.

(d) Submission of carrier changes to executing carriers.

(1) Preferred carrier change orders submitted by IXC's or TSP's to an executing carrier other than through an electronic change order processing system must contain the customer name, telephone number to be changed, and a contact name and number for the submitting carrier. Failure of the

submitting carrier to include the above information will relieve the executing carrier from complying with OAC 165:55-19-1.4(a).

(2) Preferred carrier change orders submitted by IXCs or TSPs to executing carriers through an electronic change order processing system must be submitted in the industry recognized standards established by the Alliance for Telecommunications Industry Solution (ATIS) Ordering and Billing Forum (OBF).

[Source: Added at 18 Ok Reg 2415, eff 7-1-01; Amended at 19 Ok Reg 1985, eff 7-1-02]

165:55-19-1.2. Letter of agency form and content

(a) A telecommunications carrier may use a letter of agency to obtain written authorization and/or verification of an end-user's request to change his or her preferred carrier selection. A letter of agency that does not conform to this Section is invalid for purposes of Part 1 of this Subchapter.

(b) The letter of agency shall be a separate document (or an easily separable document) containing only the authorizing language described in (e) of this Section having the sole purpose of authorizing a telecommunications carrier to initiate a preferred carrier change. The letter of agency must be signed and dated by the end-user to the telephone line(s) requesting the preferred carrier change.

(c) The letter of agency shall not be combined on the same document with inducements of any kind.

(d) Notwithstanding (b) and (c) of this Section, the letter of agency may be combined with checks that contain only the required letter of agency language as prescribed in (e) of this Section and the necessary information to make the check a negotiable instrument. The letter of agency check shall not contain any promotional language or material. The letter of agency check shall contain in easily readable, bold-face type on the front of the check, a notice that the end-user is authorizing a preferred carrier change by signing the check. The letter of agency language shall be placed near the signature line on the back of the check.

(e) At a minimum, the letter of agency must be printed with a type of sufficient size and readable type to be clearly legible and must contain clear and unambiguous language that confirms:

- (1) The end-user's billing name and address and each telephone number to be covered by the preferred carrier change order;
- (2) The decision to change the preferred carrier from the current telecommunications carrier to the soliciting telecommunications carrier;
- (3) That the end-user designates the named carrier to act as the end-user's agent for the preferred carrier change;
- (4) That the end-user understands that only one telecommunications carrier may be designated as the end-user's interstate or interLATA preferred interexchange carrier for any one telephone number. To the extent that a jurisdiction allows the selection of additional preferred carriers (e.g., local exchange, intraLATA/intrastate toll, interLATA/interstate toll, or international interexchange) the letter of agency must contain separate statements regarding those choices, although a separate letter of agency for each choice is not necessary; and,
- (5) That the end-user understands that any preferred carrier selection the end-user chooses may involve a charge to the end-user for changing the end-user's preferred carrier.

(f) Any carrier designated in a letter of agency as a preferred carrier must be the carrier directly setting the rates for the end-user.

(g) Letters of agency shall not suggest or require that an end-user take some action in order to retain the end-user's current telecommunications carrier.

(h) If any portion of a letter of agency is translated into another language then all portions of the letter of agency must be translated into that language. Every letter of agency must be translated into the same language as any promotional materials, oral descriptions or instructions provided with the letter of agency.

[Source: Added at 18 Ok Reg 2415, eff 7-1-01; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-19-1.3. Carrier liability for slamming

(a) **Carrier liability for charges.** Any submitting telecommunications carrier that fails to comply with the procedures prescribed in Part 1 of this Subchapter shall be liable to the end-user's properly authorized carrier in an amount equal to one-hundred and fifty percent (150%) of all charges paid to the submitting telecommunications carrier by such end-user after such violation, as well as for additional amounts as prescribed in 165:55-19-1.6. The remedies provided in Part 1 of this Subchapter are in addition to any other remedies available by law.

(b) **End-user liability for charges.** Any end-user whose selection of telecommunications services provider is changed without authorization verified in accordance with the procedures set forth in Part 1 of this Subchapter is liable for charges as follows:

(1) If the end-user has not already paid charges to the unauthorized carrier, the end-user is absolved of liability for charges imposed by the unauthorized carrier for service provided during the first thirty (30) days after the unauthorized change. Upon being informed by an end-user that an unauthorized change has occurred, the authorized carrier, the unauthorized carrier, or the executing carrier shall inform the end-user of this thirty (30) day absolution period. Any charges imposed by the unauthorized carrier on the end-user for service provided after this thirty (30) day period shall be paid by the end-user to the authorized carrier at the rates the end-user was paying to the authorized carrier at the time of the unauthorized change in accordance with the provisions of 165:55-19-1.5(e).

(2) If the end-user has already paid charges to the unauthorized carrier, and the authorized carrier receives payment from the unauthorized carrier as provided for in 165:55-19-1.2(a), the authorized carrier shall refund or credit to the end-user any amounts determined in accordance with the provisions of 165:55-19-1.6(c).

(3) If the end-user has been absolved of liability as prescribed by this Section, the unauthorized carrier shall also be liable to the end-user for any charge required to return the end-user to his or her properly authorized carrier, if applicable.

[Source: Added at 18 Ok Reg 2415, eff 7-1-01; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-19-1.4. Procedures for resolution of unauthorized changes in preferred carrier

(a) **Notification of alleged unauthorized carrier change.** Executing carriers who are informed of an unauthorized carrier change by an end-user must immediately notify both the authorized and allegedly unauthorized carrier of the incident. This notification must include the identity of both carriers.

(b) **Referral of complaint.** Any carrier, executing, authorized, or allegedly unauthorized, that is informed by an end-user or an executing carrier of an unauthorized carrier change shall direct that end-user to the Commission for

resolution of the complaint.

(c) **Notification of receipt of complaint.** Upon receipt of an unauthorized carrier change complaint, the Commission will notify the allegedly unauthorized carrier of the complaint and order that the carrier remove all unpaid charges for the first 30 days after the slam from the end-user's bill pending a determination of whether an unauthorized change, as defined by 165:55-1-4, has occurred, if it has not already done so.

(d) **Proof of verification.** Not more than thirty (30) days after notification of the complaint, or such lesser time as is required by the Commission, the alleged unauthorized carrier shall provide to the Commission a copy of any valid proof of verification of the carrier change. This proof of verification must contain clear and convincing evidence of a valid authorized carrier change, as that term is defined in 165:55-19-1.4 and 165:55-19-1.5. The Commission will determine whether an unauthorized change, as defined by 165:55-1-4, has occurred using such proof and any evidence supplied by the end-user. Failure by the carrier to respond or provide proof of verification will be presumed to be clear and convincing evidence of a violation.

[Source: Added at 18 Ok Reg 2415, eff 7-1-01; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-19-1.5. Absolution procedures where the end-user has not paid charges

(a) **Applicability.** This Section shall only apply after an end-user has determined that an unauthorized change, as defined by 165:55-1-4, has occurred and the end-user has not paid charges to the allegedly unauthorized carrier for service provided for thirty (30) days, or a portion thereof, after the unauthorized change occurred.

(b) **Removal of charges for the first 30 days.** An allegedly unauthorized carrier shall remove all charges incurred for service provided during the first thirty (30) days after the alleged unauthorized change occurred, as defined by 165:55-1-4, from an end-user's bill upon notification that such unauthorized change is alleged to have occurred.

(c) **Challenging an end-user's allegation of unauthorized charges.** An allegedly unauthorized carrier may challenge an end-user's allegation that an unauthorized change, as defined by 165:55-1-4, occurred. An allegedly unauthorized carrier choosing to challenge such allegation shall immediately notify the complaining end-user that:

(1) The complaining end-user must file a complaint with the Commission within thirty (30) days of either:

(A) The date of removal of charges from the complaining end-user's bill in accordance with (b) of this Section or

(B) The date the allegedly unauthorized carrier notifies the complaining end-user of the requirements of this Section, whichever is later; and

(2) A failure to file such a complaint within this thirty (30) day time period will result in the charges removed pursuant to (b) of this Section being reinstated on the end-user's bill and, consequently, the complaining end-user's will only be entitled to remedies for the alleged unauthorized change other than those provided for in 165:55-19-1.3(b)(1). No allegedly unauthorized carrier shall reinstate charges to an end-user's bill pursuant to the provisions of this Section without first providing such end-user with a reasonable opportunity to demonstrate that the requisite complaint was timely filed within the 30-day period described in this Section.

(d) Procedure if thirty (30) days or fewer of unauthorized charges were incurred. If the Commission determines after reasonable investigation that an unauthorized change, as defined by 165:55-1-4, has occurred, CSD shall issue a factual determination stating that the end-user is entitled to absolution from the charges incurred during the first thirty (30) days after the unauthorized carrier change occurred, and neither the authorized or unauthorized carrier may pursue any collection against the end-user for those charges.

(e) Procedure if more than thirty (30) days of unauthorized charges were incurred. If the end-user has incurred charges for more than thirty (30) days after the unauthorized carrier change, the unauthorized carrier must forward the billing information for such services to the authorized carrier, which may bill the end-user for such services using either of the following means:

(1) The amount of the charge may be determined by a re-rating of the services provided based on what the authorized carrier would have charged the end-user for the same services had an unauthorized change, as described in 165:55-1-4, not occurred; or

(2) The amount of the charge may be determined using a fifty percent (50%) Proxy Rate as follows: Upon receipt of billing information from the unauthorized carrier, the authorized carrier may bill the end-user for fifty percent (50%) of the rate the unauthorized carrier would have charged the end-user for the services provided. However, the end-user shall have the right to reject use of this fifty percent (50%) proxy method and require that the authorized carrier perform a re-rating of the services provided, as described in (e)(1) of this Section.

(f) End-user payments for services provided after the first thirty (30) days. If the unauthorized carrier received payment from the end-user for services provided after the first thirty (30) days after the unauthorized change occurred, the obligations for payments and refunds provided for in this Section shall apply to those payments.

(g) Re-billing. If the Commission determines after reasonable investigation that the carrier change was authorized, the carrier may re-bill the end-user for charges incurred.

[Source: Added at 18 Ok Reg 2415, eff 7-1-01; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-19-1.6. Reimbursement procedures where the end-user has paid charges

(a) Applicability. The procedures in this Section shall only apply after an end-user has determined that an unauthorized change, as defined by 165:55-1-4, has occurred and the end-user has paid charges to an allegedly unauthorized carrier.

(b) Order requirements.

(1) If CSD determines after reasonable investigation that an unauthorized change, as defined by OAC 165:55-1-4, has occurred, it shall issue a factual determination requiring the unauthorized carrier to forward to the authorized carrier the following:

(A) An amount equal to one hundred and fifty percent (150%) of all charges paid by the end-user to the unauthorized carrier; and

(B) Copies of any telephone bills issued from the unauthorized carrier to the end-user.

(2) This factual determination shall be sent to the end-user, the unauthorized carrier, and the authorized carrier.

(c) End-user refund or credit by authorized carrier if payment is received.

Within ten days of receipt of the amount provided for in this Section, the authorized carrier shall provide a refund or credit to the end-user in the amount of fifty percent (50%) of all charges paid by the end-user to the unauthorized carrier. The end-user has the option of asking the authorized carrier to re-rate the unauthorized carrier's charges based on the rates of the authorized carrier and, on behalf of the end-user, seek an additional refund from the unauthorized carrier, to the extent that the re-rated amount exceeds the fifty percent (50%) of all charges paid by the end-user to the unauthorized carrier. The authorized carrier shall also send notice to the Commission that it has given a refund or credit to the end-user.

(d) Billing and collection charges. If an authorized carrier incurs billing and collection expenses in collecting charges from the unauthorized carrier, the unauthorized carrier shall reimburse the authorized carrier for reasonable expenses.

(e) End-user refund or credit by authorized carrier if payment is not received.

If the authorized carrier has not received payment from the unauthorized carrier as required by (c) of this Section, the authorized carrier is not required to provide any refund or credit to the end-user. The authorized carrier must, within forty-five (45) days of receiving a factual determination as described in (b) of this Section, inform the end-user and the Commission if the unauthorized carrier has failed to forward to it the appropriate charges, and also inform the end-user of his or her right to pursue a claim against the unauthorized carrier for a refund of all charges paid to the unauthorized carrier.

(f) Reinstatement into programs. Where possible, the properly authorized carrier must reinstate the end-user in any premium program in which that end-user was enrolled prior to the unauthorized change, if the end-user's participation in that program was terminated because of the unauthorized change. If the end-user has paid charges to the unauthorized carrier, the properly authorized carrier shall also provide or restore to the end-user any premiums to which the end-user would have been entitled had the unauthorized change not occurred. The authorized carrier must comply with the requirements of this Section regardless of whether it is able to recover from the unauthorized carrier any charges that were paid by the end-user.

[Source: Added at 18 Ok Reg 2415, eff 7-1-01; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-19-1.7. Preferred carrier freezes

(a) A preferred carrier freeze (or freezes) prevents a change in an end-user's preferred carrier selection for intraLATA/intrastate toll, interLATA/interstate toll, interLATA/intrastate toll, and international toll unless the end-user gives the carrier from whom the freeze was requested his or her express consent. All local exchange carriers who offer preferred carrier freezes must comply with the provisions of this Section. No local exchange carrier shall impose a preferred carrier freeze on local exchange service.

(b) All local exchange carriers who offer preferred carrier freezes shall offer freezes on a nondiscriminatory basis to all end-users, regardless of the end-user's carrier selections.

(c) Preferred carrier freeze procedures, including any solicitation, must clearly distinguish among telecommunications services (e.g., intraLATA/intrastate toll, interLATA/interstate toll, interLATA/intrastate toll, and international toll) subject to a preferred carrier freeze. The carrier offering the freeze must obtain separate authorization for each service for which a preferred carrier freeze is requested.

(d) Solicitation and imposition of preferred carrier freezes.

(1) All carrier-provided solicitation and other materials regarding preferred carrier freezes must include:

- (A) An explanation, in clear and neutral language, of what a preferred carrier freeze is and what services may be subject to a freeze;
- (B) A description of the specific procedures necessary to lift a preferred carrier freeze; an explanation that these steps are in addition to the Commission's verification rules in 165:55-19-1.4 and 165:55-19-1.5 for changing an end-user's preferred carrier selections; and an explanation that the end-user will be unable to make a change in carrier selection unless he or she lifts the freeze; and
- (C) An explanation of any charges associated with the preferred carrier freeze.

(2) No local exchange carrier shall implement a preferred carrier freeze unless the end-user's request to impose a freeze has first been confirmed in accordance with one of the following procedures:

- (A) The local exchange carrier has obtained the end-user's written and signed authorization in a form that meets the requirements of (d)(3) of this Section; or
- (B) The local exchange carrier has obtained the end-user's electronic authorization, placed from the telephone number(s) on which the preferred carrier freeze is to be imposed, to impose a preferred carrier freeze. The electronic authorization should confirm appropriate verification data (e.g., the end-user's date of birth or social security number) and the information required in (d)(3)(B) of this Section. Telecommunications carriers electing to confirm preferred carrier freeze orders electronically shall establish one or more toll-free telephone numbers exclusively for that purpose. Calls to the number(s) will connect an end-user to a voice response unit, or similar mechanism that records the required information regarding the preferred carrier freeze request, including automatically recording the originating automatic numbering identification; or
- (C) An appropriately qualified independent third party has obtained the end-user's oral authorization to submit the preferred carrier freeze and confirmed the appropriate verification data (e.g., the end-user's date of birth or social security number) and the information required in (d)(3)(B) of this Section. The independent third party must not be owned, managed, or directly controlled by the carrier or the carrier's marketing agent; must not have any financial incentive to confirm preferred carrier freeze requests for the carrier or the carrier's marketing agent; and must operate in a location physically separate from the carrier or the carrier's marketing agent. The content of the verification must include clear and conspicuous confirmation that the end-user has authorized a preferred carrier freeze.

(3) **Written authorization to impose a preferred carrier freeze.** A local exchange carrier may accept an end-user's written and signed authorization to impose a freeze on his or her preferred carrier selection. Written authorization that does not conform with this Section is invalid and may not

be used to impose a preferred carrier freeze.

(A) The written authorization shall comply with 165:55-19-1.5(b), (c), and (h) concerning the form and content for letters of agency.

(B) At a minimum, the written authorization must be printed with a readable type of sufficient size to be clearly legible and must contain clear and unambiguous language that confirms:

(i) The end-user's billing name and address and the telephone number(s) to be covered by the preferred carrier freeze;

(ii) The decision to place a preferred carrier freeze on the telephone number(s) and particular service(s). To the extent that a jurisdiction allows the imposition of preferred carrier freezes on additional preferred carrier selections (e.g., for intraLATA/intrastate toll, interLATA/interstate toll service, interLATA/intrastate toll, and international toll), the authorization must contain separate statements regarding the particular selections to be frozen;

(iii) That the end-user understands that she or he will be unable to make a change in carrier selection unless she or he lifts the preferred carrier freeze; and

(iv) That the end-user understands that any preferred carrier freeze may involve a charge to the end-user.

(e) **Procedures for lifting preferred carrier freezes.** All local exchange carriers who offer preferred carrier freezes must, at a minimum, offer end-users the following procedures for lifting a preferred carrier freeze:

(1) A local exchange carrier administering a preferred carrier freeze must accept an end-user's written and signed authorization stating her or his intent to lift a preferred carrier freeze; and

(2) A local exchange carrier administering a preferred carrier freeze must accept an end-user's oral authorization stating her or his intent to lift a preferred carrier freeze and must offer a mechanism that allows a submitting carrier to conduct a three-way conference call with the carrier administering the freeze and the end-user in order to lift a freeze. When engaged in oral authorization to lift a preferred carrier freeze, the carrier administering the freeze shall confirm appropriate verification data (e.g., the end-user's date of birth or social security number) and the end-user's intent to lift the particular freeze.

[Source: Added at 18 Ok Reg 2415, eff 7-1-01; Amended at 21 Ok Reg 2101, eff 7-1-04; Amended at 32 Ok Reg 828, eff 8-27-15]

PART 3. CRAMMING

165:55-19-2. [RESERVED]

[Source: Reserved at 15 Ok Reg 3054, eff 7-15-98]

165:55-19-3. Cramming

(a) Cramming is prohibited.

(b) TSPs and IXC's, after a complaint of cramming by the customer, shall not disconnect or seek payment of the charge(s) pending resolution of the dispute.

(c) The telecommunications service provider or IXC shall be subject to a fine, per day per occurrence, for any violation of this Section, on an intrastate basis. The

amount of the fine shall be determined pursuant to 17 O.S. § 1 et seq., after notice and hearing.

[Source: Added at 15 Ok Reg 3054, eff 7-15-98; Amended at 16 Ok Reg 2261, eff 7-1-99]

SUBCHAPTER 21. PAY-PER-CALL SERVICES

165:55-21-1. Prohibition of certain pay-per-call services or interactive programs

Each TSP or IXC is prohibited from violating 17 O.S. § 140.1. et seq.

[Source: Added at 16 Ok Reg 2261, eff 7-1-99]

SUBCHAPTER 22. RESOLUTION DISPUTES

165:55-22-1. Resolution procedures arising under interconnection agreements

(a) **Purpose.** This Subchapter establishes procedures for Commission resolution of disputed issues arising under or pertaining to interconnection agreements approved by the Commission pursuant to its authority under the Federal Telecommunications Act of 1996 and Subchapter 17 of this Chapter.

(b) **Type of disputed issues.** The dispute resolution procedures set forth in this Subchapter are intended to resolve disputes concerning:

- (1) Proper interpretation of terms and conditions in the interconnection agreement;
- (2) Implementation of activities explicitly provided for, or implicitly contemplated in, the interconnection agreement;
- (3) Enforcement of terms and conditions in such interconnection agreements; and
- (4) Any issue not explicitly addressed in the interconnection agreement that the parties agree to resolve pursuant to this Subchapter; provided the resolution of the issue would facilitate the provisioning of service pursuant to the interconnection agreement.

(c) **Use of this Subchapter.** The procedures described in this Section are not intended to replace the dispute resolution procedures set forth in the Interconnection and Resale Agreements ("Agreements") between the parties. However, the procedures set forth in this Subchapter may be used to resolve disputes arising out of the Agreements.

(d) **Best efforts.** As a prerequisite to utilizing this Subchapter, the parties must be able to demonstrate that they have exhausted the dispute resolution procedures, if any, in accordance with their Agreements.

[Source: Added at 16 Ok Reg 2832, eff 7-15-99]

165:55-22-2. [RESERVED]

[Source: Reserved at 16 Ok Reg 2832, eff 7-15-99]

165:55-22-3. Facilitation

(a) **Informal process.** Facilitation is an informal, voluntary process wherein both parties to the dispute agree to bring the dispute before the Commission and to be bound by the facilitator's decision.

(b) **Facilitation request.** The request for an informal facilitation conference may be made by a joint written request to the Director of the Public Utility Division. The joint written request should include the following from each party:

- (1) The name, address, telephone number and facsimile number of each party to the interconnection agreement and each party's designated representative;
 - (2) A description of the parties' efforts to resolve their differences by negotiation;
 - (3) A list of the narrow issues in dispute, with a cross-reference to the area of the agreement applicable or pertaining to the issues in dispute;
 - (4) Each party's proposed solution to the dispute; and
 - (5) Identification of the agreed upon facilitator.
- (c) **Facilitator.** The facilitator may be:
- (1) Any individual agreed to by the parties, including a Commission employee with knowledge regarding telecommunications; or
 - (2) An individual selected by the Commission in an open meeting from names submitted by the parties.
- (d) **Facilitation conference.** The facilitator shall be responsible for notifying the parties of the time, date, and location of the meeting which shall be held no later than ten (10) business days from the date the request was filed. The parties shall provide the appropriate personnel with settlement authority to discuss and to resolve the disputes at the facilitation conference.
- (e) **Procedure.** The facilitation conference shall be conducted as an informal meeting and will not be transcribed. Only parties to the interconnection agreement may participate as parties to the facilitation conference. Interim relief is not applicable for either party to the dispute. Discovery will not be allowed and notice will not be provided concerning the facilitation. At any time during the facilitation, either party may request that the dispute resolution be moved to one of the formal processes set forth in this Subchapter.
- (f) **Results of the facilitation conference.** The informal facilitation conference may result in an agreement on the resolution of the dispute described in the request. If an agreement is reached, the agreement will be binding on the parties. In the event that the parties do not reach an agreement as a result of the informal facilitation conference, the parties agree to have the decision of the Commission appointed facilitator be binding on the parties. The facilitator's decision will be binding on both parties. The decision from the informal facilitation conference shall be rendered within thirty (30) days from the joint written request for facilitator.

[Source: Added at 16 Ok Reg 2832, eff 7-15-99; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-22-4. [RESERVED]

[Source: Reserved at 16 Ok Reg 2832, eff 7-15-99]

165:55-22-5. Formal non-expedited dispute resolution

- (a) **Commencement.** This procedure is a formal proceeding for dispute resolution and will commence when a party ("complainant") files a complaint with the Court Clerk of the Commission and, on the same day, delivers a copy of the complaint either by hand delivery, certified mail, electronic mail or facsimile to the Director of the Public Utility Division, to the other party ("respondent") to the interconnection agreement from which the dispute arises, to the Office of General Counsel, and to the Office of the Attorney General. If facsimile is used, a certificate of service shall be provided.
- (b) **Process.** Unless otherwise ordered by the arbitrator, parties shall file with the Commission Court Clerk's office five (5) copies of pleadings. The complaint shall be in a consistent format approved by the Director of the Public Utility Division

and shall include:

- (1) The name, address, telephone number, facsimile number of each party to the interconnection agreement, and the complainant's designated representative;
- (2) A description of the parties' efforts to resolve their differences by negotiation;
- (3) A detailed list of the precise issues in dispute, with a cross-reference to the area or areas of agreement applicable or pertaining to the issues in dispute; and
- (4) An identification of pertinent background facts and relevant law or rules applicable to each disputed issue.
- (5) The complainant's proposed solution to the dispute.

(c) **Arbitrator.** Upon receipt of a dispute resolution complaint filed under this Section, an arbitrator shall be selected to act for the Commission, unless two or more of the Commissioners choose to hear the complaint *en banc*. The parties shall be notified of the Commission designated arbitrator, or of the Commissioners' decision to act as arbitrator themselves. The arbitrator may be advised on legal and technical issues by members of the Commission Staff. The Commission staff members selected to advise the arbitrator shall be determined by the Director of the Public Utility Division and shall be identified to the parties. Within five (5) days of the selection of the arbitrator being named, any challenge to the appointment shall be brought forth. No parties to the dispute resolution process may have *ex parte* discussions with the arbitrator regarding the complaint, except those persons designated by the Director of the Public Utility Division.

(d) **Response to complaint.** The respondent shall file a response to the complaint within twenty (20) days after the filing of the complaint and shall serve a copy of the response on the complainant, the Office of the Attorney General, the Office of General Counsel, and to the Director of the Public Utility Division. The response shall specifically affirm or deny each allegation in the complaint. The response shall include the respondent's position on each issue in dispute, a cross-reference to the area or areas of the contract applicable or pertaining to the issue in dispute, and the respondent's proposed solution on each issue in dispute. In addition, the response also shall stipulate to any undisputed facts and identify relevant law or rules applicable to each disputed issue.

(e) **Reply to response to complaint.** The complainant may file a reply within five (5) business days after the filing of the response to the complaint and serve a copy to the respondent, the Office of the Attorney General, the Office of General Counsel, and to the Director of the Public Utility Division. The reply shall be limited solely to new issues raised in the response to the complaint.

(f) **Notice and hearing.** As soon as possible after his or her selection, the arbitrator shall schedule a prehearing conference with the parties to the arbitration. The arbitrator shall make arrangements for the hearing to address the complaint, which shall commence no later than fifty (50) days after filing of the complaint. The arbitrator shall notify the parties, not less than fifteen (15) days before the hearing of the date, time, and location of the hearing. The hearing shall be held in Oklahoma City unless otherwise ordered by the Commission.

(g) **Transcripts.** The hearing shall be transcribed by a court reporter designated by the arbitrator. Copies of the transcript may be obtained from the designated court reporter at the expense of the requesting party.

(h) **Participation.** Only parties to the interconnection agreement, the Commission Staff, or the Office of the Attorney General, may participate as parties in the dispute

resolution process subject to this Subchapter, unless otherwise ordered by the Commission upon a showing of good cause.

(i) **Authority of the arbitrator.** The arbitrator has broad discretion in conducting the dispute resolution proceeding. The arbitrator shall have the authority within the Commission to award remedies or relief deemed necessary by the arbitrator to resolve a dispute subject to the procedures established under this Subchapter.

(j) **Discovery.** Parties may obtain discovery by submitting a discovery request consistent with the Commission's Rules of Practice, OAC 165:5, which include requests for inspection and production of documents, requests for admissions, and depositions by oral examination, as provided by the Commission rules and as allowed within the discretion of the arbitrator.

(k) **Pre-filed evidence and witness list.** The arbitrator may require the parties to file a direct case, under the same deadline, and a joint issues list on or before the commencement of the hearing under the following guidelines:

(1) The prepared direct case shall include all of the party's direct evidence, including written direct testimony of all its witnesses and all exhibits that the party intends to offer. The joint issues list shall identify all issues to be addressed, the witnesses who will be addressing each issue, and a short synopsis of each witness's position on each issue. Confidential information shall be treated in accordance with the Commission's Rules of Practice, OAC 165:5.

(2) Each witness presenting written direct testimony shall be available for cross-examination by the other parties to the complaint. The arbitrator shall judge the credibility of each witness and the weight to be given his or her testimony based upon his or her response to cross-examination. If the arbitrator determines that a witness' responses are evasive or non-responsive to the questions asked, the arbitrator may disregard the witness' testimony on the basis of lack of credibility.

(3) The arbitrator may ask clarifying questions at any point during the proceeding and may direct a party or witness to provide additional information as needed to fully develop the record of the proceeding. If a party fails to present information requested by the arbitrator, the arbitrator shall render a recommendation on the basis of the best information available from whatever source derived.

(4) The arbitrator may require the parties to submit post-hearing briefs or written summaries of their positions. The arbitrator shall determine the filing deadline and any limitations on the length of such submissions.

(l) **Recommendation.** Timelines and appeals to the arbitrator's recommendation shall be governed by the following guidelines:

(1) The written recommendation of the arbitrator shall be filed with the Commission within fifteen (15) days after the close of the hearing and shall be faxed to all parties of record in the dispute resolution proceeding. The recommendation of the arbitrator shall be based upon the record of the dispute resolution hearing, and shall include a specific ruling on each of the disputed issues presented for resolution by the parties. The recommendation shall include a narrative report explaining the arbitrator's rationale for each of the rulings included in the final decision.

(2) Within ten (10) days from the date of the arbitrator's recommendation is issued, any party may appeal the arbitrator's recommendation to the Commission *en banc* by the filing of a written appeal. The appellant shall serve, concurrent with filing, copies of the appeal and notice of hearing for

the appeal to all parties of record and the arbitrator. The appeal shall be heard by the Commission *en banc* within ten (10) days of the filing of such appeal, unless the Commission orders otherwise.

(3) With respect to the recommendation by the arbitrator, the Commission *en banc* may affirm, reverse, or modify the findings of fact or conclusions of law of the arbitrator based on the record, hold additional hearings, or may remand the cause to the arbitrator for further hearing. The Commission shall enter its order on the complaint no later than one hundred (100) days after the filing of the complaint, unless otherwise agreed to by the parties.

165:55-22-6. [RESERVED]

[Source: Reserved at 16 Ok Reg 2832, eff 7-15-99]

165:55-22-7. Formal expedited dispute resolution

(a) **Need for expedited resolution.** This procedure is a formal proceeding for dispute resolution with an expedited ruling when the dispute directly affects the ability of a party to provide uninterrupted service to its customers or precludes the provisioning of any service, functionality or network element. The arbitrator has the discretion to determine whether the resolution of the complaint may be expedited based on the complexity of the issues or other factors deemed relevant. The provisions and procedures relating to OAC 165:55-22-5 apply, except as otherwise specifically set forth in this Section.

(b) **Response to complaint.** The respondent shall file a response to the complaint within five (5) business days after the filing of a complaint and shall serve a copy of the response on the complainant, the Office of the Attorney General, the Office of General Counsel, and to the Director of the Public Utility Division. The response shall specifically affirm or deny each allegation in the complaint.

(c) **Process.** Any request for expedited ruling shall be filed at the same time and in the same document as the complaint filed pursuant OAC 165:55-22-5. The complaint shall be entitled "Complaint and Request for Expedited Ruling." In addition to the requirements listed in section OAC 165:55-22-5, the complaint shall also state specific circumstances that make the dispute eligible for an expedited ruling.

(d) **Notice and hearing.** After reviewing the complaint and the response, the arbitrator will determine whether the complaint warrants an expedited ruling. If so, the arbitrator shall schedule a prehearing conference with the parties to the arbitration. The arbitrator shall make arrangements for the hearing to address the complaint, which shall commence no later than seventeen (17) days after filing of the complaint. The arbitrator shall notify the parties of the date, time, and location of the hearing not less than three (3) days before the hearing. The hearing shall be transcribed by a court reporter designated by the arbitrator. If the arbitrator determines that the complaint is not eligible for an expedited ruling, the arbitrator shall so notify the parties within five (5) days of the filing of the response.

(e) **Recommendation.** Timeliness and appeals to the arbitrator's recommendation shall be governed by the following guidelines:

(1) The oral recommendation of the arbitrator shall be filed with the Commission within three (3) days after the close of the hearing and shall be faxed to all parties of record in the dispute resolution proceeding. The recommendation of the arbitrator shall be based upon the record of the

dispute resolution hearing, and shall include a specific ruling on each of the disputed issues presented for resolution by the parties.

(2) Within three (3) days from the date of issuance of the arbitrator's recommendation, any party may appeal the arbitrator's recommendation to the Commission *en banc* by the filing of a written appeal. The appellant shall serve, concurrent with filing, copies of the appeal and notice of hearing for the appeal to all parties of record and the arbitrator. The appeal shall be heard by the Commission *en banc* within five (5) days of the filing of such an appeal.

(3) With respect to the recommendation by the arbitrator, the Commission *en banc* may affirm, reverse, or modify the findings of fact or conclusions of law of the arbitrator based on the record, hold additional hearings, or may remand the cause to the arbitrator for further hearing. The Commission shall enter its order on the complaint no later than one hundred (100) days after the filing of the complaint, unless otherwise agreed to by the parties.

[Source: Added at 16 Ok Reg 2832, eff 7-15-99; Amended at 22 Ok Reg 712, eff 7-1-05; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-22-8. [RESERVED]

[Source: Reserved at 16 Ok Reg 2832, eff 7-15-99]

165:55-22-9. Interim relief

(a) **Need for interim relief.** This Section establishes procedures whereby a party who requests dispute resolution pursuant to OAC 165:55-22-5 or OAC 165:55-22-7 may also request an interim ruling on whether the party is entitled to relief pending the resolution of the merits of the dispute. This relief is intended to provide an interim remedy when the dispute compromises the ability of a party to provide uninterrupted service or precludes the provisioning of scheduled service or as a means to guarantee that funds are available in a billing dispute.

(b) **Filing a request.** Any request for an interim ruling shall be filed at the same time and in the same cause as the complaint filed pursuant to OAC 165:55-22-5 or OAC 165:55-22-7. The heading of the complaint shall include the phrase "Request for Interim Ruling." The complaint shall set forth the specific grounds supporting the request for interim relief pending the resolution of the dispute, as well as a statement of the potential harm that may result if interim relief is not provided. A complaint that includes a request for interim ruling shall be verified by affidavit. Such complaint must list the contact person, address, telephone number, and facsimile number for both the complainant and respondent.

(c) **Service.** The complainant shall serve a copy of the complaint and request for an interim ruling on the respondent, the Office of the Attorney General, the Office of General Counsel, and to the Director of the Public Utility Division by hand-delivery or facsimile on the same day as the pleading is filed with the Commission.

(d) **Hearing.** Within three (3) business days, if feasible, of the filing of a complaint and request for interim ruling, the arbitrator selected under this Subchapter shall conduct a hearing to determine whether interim relief should be granted during the pendency of the dispute resolution process. The arbitrator will notify the parties of the date and time of the hearing by facsimile within one (1) business day of the filing of a complaint and request for interim ruling. The parties should be prepared to present their positions and evidence on factors including but not limited to: the type of service requested; the economic and technical feasibility of providing that service; and the potential harm in providing or not providing the service.

(e) **Ruling.** Based upon the evidence provided at the hearing, the arbitrator shall issue a written ruling on the request within twenty-four (24) hours of the close of the hearing and will notify the parties by facsimile of the ruling. The interim ruling will be effective throughout the dispute resolution proceeding until a final order is issued by the Commission pursuant to this Subchapter. The interim ruling shall have no precedential impact.

SUBCHAPTER 23. ELIGIBLE TELECOMMUNICATIONS CARRIERS

PART 1. GENERAL PROVISIONS

165:55-23-1. Requirements

The requirements of this Subchapter pertain to the designation of Eligible Telecommunications Carriers by the Commission or the Federal Communications Commission pursuant to 47 U.S.C. § 214(e) and the provision of Supported Services by Eligible Telecommunications Carriers (hereinafter referred to as "ETCs"). All ETCs shall comply with federal requirements, the requirements of this Subsection, and, if also eligible for participation in the Oklahoma Lifeline Fund, the requirements of OAC 165:59-9-1 *et seq.*

[Source: Added at 21 Ok Reg 2101, eff 7-1-04; Amended at 29 Ok Reg 1549, eff 7-12-12; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-23-2. ETC Designation

(a) No person shall receive federal Lifeline funds for Oklahoma customers or Connect America Funds for investment in Oklahoma without first being designated an Eligible Telecommunications Carrier ("ETC") by the Commission or as otherwise provided in 47 C.F.R. § 54.201 and § 54.202. A person seeking to be designated an ETC by the Commission shall file an Application with the Commission, meeting the requirements of the Commission's Rules of Practice, OAC 165:5, and shall provide the following additional information in support of the Application:

- (1) A description of whether the applicant intends to offer the Supported Services over its own facilities, by resale of another carrier's facilities and/or services, or through a combination of its own facilities and resale of third party facilities and/or services;
- (2) A description of the service area for which ETC designation is sought, to include a list of exchanges;
- (3) A description of the applicant's proposed Supported Services;
- (4) A description of the applicant's plans to advertise the availability of Supported Services within the service area sought;
- (5) A complete description of the terms, conditions and rates applicable to the applicant's offering of Supported Services.
- (6) Submit a two-year plan that describes with specificity proposed improvements or upgrades to the applicant's network throughout its proposed service area. Each applicant shall estimate the area and population that will be served as a result of the improvements. Except, a common carrier seeking designation as an ETC in order to provide supported services only under 47 C.F.R. Part 54 Subpart E does not need to submit such a five-year plan.

(7) Demonstrate its ability to remain functional in emergency situations, including a demonstration that it has a reasonable amount of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations.

(8) Demonstrate that it will satisfy applicable consumer protection and service quality standards. A commitment by wireless applicants to comply with the Cellular Telecommunications and Internet Association's Consumer Code for Wireless Service will satisfy this requirement. Other commitments will be considered on a case-by-case basis.

(9) For common carriers seeking designation as an ETC for purposes of receiving support only under 47 C.F.R. Part 54 Subpart E, demonstrate that it is financially and technically capable of providing the Lifeline service in compliance with 47 C.F.R. Part 54 Subpart E.

(b) Each incumbent LEC is designated as an ETC for the territory for which it was certified on the date of the adoption of the Federal Telecommunications Act of 1996.

(c) For the purpose of eligibility to receive federal universal service support under 47 U.S.C. § 214(e), an ETC shall, throughout its service territory:

(1) Offer the telecommunications services that are supported by Federal universal service support mechanisms under 47 U.S.C. § 254(c), either using its own facilities or a combination of its own facilities and resale of another telecommunications service provider's services, including the services offered by another eligible telecommunications service provider; and,

(2) Advertise the availability of such telecommunications services and the charges thereof using media of general distribution.

[Source: Reserved at 21 Ok Reg 2101, eff 7-1-04; Amended at 32 Ok Reg 828, eff 8-27-15; Added at 33 Ok Reg 645, eff 8-25-16; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-23-3. Records to be provided to the Commission

(a) **Terms, conditions and rates for Supported Services.** An ETC shall maintain current terms, conditions and rates applicable to its Supported Services in an approved tariff on file with the Commission or pursuant to Terms of Service posted on its website and provided to the Commission. Any modification to an ETC's terms, conditions and rates for Supported Services, shall be submitted to the Director of Public Utility Division prior to the effective date of such modification. Failure to comply with this Section may result in the filing of an application by the Director of the Public Utility Division to revoke the Telecommunication Service Provider's or wireless provider's ETC designation.

(b) **Location of records.** All records including terms, conditions and rates for its Supported Services, required by this Subchapter shall, be kept at the general office of each ETC and shall be made available to the Commission or its designee upon reasonable request. The ETC shall make such records available to the Commission or its designee at reasonable times for examination and inspection at a location designated by the Commission.

(c) **Retention of certification records.** All records, including the Lifeline application form showing proof of eligibility and a report from the third party verification system that shows the identity and address of the Lifeline customer was verified (unless the ETC has obtained a waiver from the requirement to utilize a third party verification system), shall be preserved for a minimum of three (3)

years.

(d) **Required information to be reviewed.** Each ETC shall obtain information as follows: At the time a prospective Lifeline subscriber signs up for initial service, each ETC shall obtain:

- (1) a legible copy of the subscriber's Lifeline application or service request form showing the customer's name, physical address and proof of eligibility;
- (2) the subscriber's information necessary to demonstrate eligibility under 47 C.F.R. § 54.410; and
- (3) the subscriber's government issued photo identification unless the ETC utilizes a third party verification system that has been approved by the Director of the Public Utility Division.
- (4) Each ETC shall provide annually to the Director of the Public Utility Division a copy of the ETC's FCC Form 555 as filed with Universal Service Administrative Company ("USAC") and the FCC.

(e) **Contact names.** Each ETC shall notify, in writing, the Director of the Public Utility Division within thirty (30) days of a change in the company-designated contacts for Public Utility Division and CSD issues.

- (1) The update shall include the name(s), address(es) and/or telephone number(s) of the designated individual(s).
- (2) The contact name(s) provided pursuant to this subsection shall be the individual(s) primarily responsible for:
 - (A) Providing customer service;
 - (B) Repair and maintenance;
 - (C) Answering complaints;
 - (D) Authorizing and/or furnishing refunds to customers; and,
 - (E) Terms, conditions and rates of Supported Services.

(f) **Other information.** Each ETC shall promptly furnish such other information as the Commission Staff may reasonably request, unless otherwise ordered by the Commission.

(g) **Supported Services.** Each ETC shall provide confirmation that each Lifeline plan of the ETC provides the Supported Services.

(h) **Exchanges.** Each ETC shall retain a listing of all of the exchanges within which the ETC has provided Lifeline Service during the preceding twelve (12) months and the addresses of households who requested service and were denied Lifeline service for reasons other than the household did not meet eligibility requirement.

(i) **Annual report of operations.** No later than May 1 each year, unless otherwise determined by the Commission, each ETC shall provide an annual report of operations for the preceding calendar year, to the Director of the Public Utility Division, in a format approved by the Director of the Public Utility Division. In addition, each ETC shall provide a copy of any annual report required to be filed with any federal regulatory agency(ies). As a component part of the annual report of operations, each ETC shall attach a copy of its Annual Report to Stockholders. All non-publicly available information included in the annual report will be considered confidential by the OCC. On or before July 1, of each year, each ETC shall submit its FCC Form 481 to the Commission, in accordance with FCC regulations.

(j) **Complaints report.** Each ETC shall maintain a record of customer complaints that it has received regarding Supported Services provided by the ETC, consistent with 47 CFR §54.313(a)(4) and 47 CFR §54.422(b)(2).

(k) **Report attestation.** All reports required by this subchapter to be submitted to the Commission shall be attested to by an officer or authorized agent of the ETC.

(l) **Due dates of reports.** All periodic reports required by this Commission must be received on or before the due dates unless otherwise agreed to by the Director of the Public Utility Division.

(m) **Changes affecting Customers or Business Operations.** An ETC proposing changes to operations that affect either customers or business operations in the State, including but not limited to name changes; and additions, modifications or deletions of trade names under which Supported Services will be operated, shall comply with Subchapter 15 of this Chapter.

165:55-23-5. Emergency service reporting requirements

In areas equipped with E911 emergency service, when the end-user's number is changed due to a change of location or service to the end-user or there is a change in service provider with or without a change to the end-user's number, the ETC shall report such changes to the appropriate E911 emergency number database within two (2) business days, or as required by agreement with the appropriate E911 agencies within the state, after completion of service orders. In the event of an error report, the ETC shall correct the error within two (2) business days, unless the agreement with the appropriate E911 agency allows otherwise.

165:55-23-9. Billing disputes

(a) In the event of a dispute between an end-user and an ETC, the ETC shall make such investigation as is required by the particular case, and report the results thereof to the end-user.

(b) In the event the dispute is not resolved, the ETC shall inform the end-user that the end-user may utilize the complaint procedures of CSD. The information to be provided to consumers shall be:

- (1) The street address of CSD, which is Oklahoma Corporation Commission, Consumer Services Division, 2101 N. Lincoln Blvd. Suite 580, Oklahoma City, OK 73105.

- (2) The mailing address of the Consumer Services Division, which is P.O. Box 52000, Oklahoma City, OK 73152-2000.
 - (3) The telephone numbers of the Consumer Services Division, which are (405) 521-2331 and (800) 522-8154.
 - (4) The hours of operation of the Consumer Services Division, which are 8:00 a.m. to 4:30 p.m. Monday through Friday, excluding State holidays.
- (c) When a complaint has been made with CSD, the ETC shall be required to forego disconnect procedures on account of nonpayment of any portion of accumulated disputed charges pending investigation by CSD. The end-user shall be required to pay the undisputed part of the bill and, if not paid, the ETC may discontinue service.

165:55-23-11. Minimum service standards and Supported Services

- (a) The purpose of this Section is to create a uniform standard governing the minimum components of the Supported Services for all end-users of an ETC. Supported Services shall be offered by each ETC pursuant to OAC 165:55-23-15 and OAC 165:55-23-17.
- (b) If required by the FCC, each ETC shall make available to each end-user subscribing to its Supported Services within its designated service area voice telephony service with the following functionalities:
- (1) voice grade access to the public switched network or its functional equivalent;
 - (2) minutes of use for local service provided at no additional charge to end-users;
 - (3) access to the emergency services provided by local government or other public safety organizations;
 - (4) toll limitation for qualifying low-income consumers.
- (c) In addition to the foregoing voice telephone functionalities applicable to all ETCs, wireless providers shall provide a level of voice service consistent with the minimum service standards detailed at 47 C.F.R. § 54.408(b)(3).
- (d) Any plan that is marketed as an unlimited plan that does not contain unlimited local voice minutes must be approved by the Director of the Public Utility Division. If the Director denies the requested unlimited plan, the ETC may seek approval of the plan by Commission Order, after notice and hearing.

[Source: Added at 21 Ok Reg 2101, eff 7-1-04; Amended at 22 Ok Reg 712, eff 7-1-05; Amended at 30 Ok Reg 1565, eff 7-11-13; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-23-12. Lifeline eligibility requirements

- (a) In order to qualify for the federal Lifeline Service Program, an applicant for Lifeline service must meet the qualification requirements of 47 CFR § 54.409 and be certified as eligible consistent with 47 CFR § 54.410. Qualification for the Oklahoma Lifeline Fund program is to be in accordance with OAC 165:59-9-3(b).
- (b) The Lifeline provider shall also advise each end-user customer enrolled in either the State or Federal Lifeline Service program that in order to continue receiving Lifeline service, the end-user customer must provide the ETC with documentary proof of program eligibility annually, in accordance with the recertification

requirements at OAC 165:59-9-5, and that the subscriber has a duty to inform the ETC within thirty (30) calendar days whenever the subscriber ceases to be eligible to receive State or Federal Lifeline service support. The requirement to annually provide documentary proof of program eligibility shall not apply if a Lifeline provider utilizes USAC to conduct its annual recertification, unless such documentation is required by USAC at the time of the annual recertification.

[Source: Reserved at 21 Ok Reg 2101, eff 7-1-04; Added at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-23-13. Service Installation Intervals

Each ETC, shall meet the following service installation requirements for customer requests for Supported Services:

- (1) Each ETC shall provide a Supported Service to a requesting customer in accordance with such request no later than ninety (90) days from the date of the customer's bona fide reasonable request.
- (2) If the ETC determines that it cannot provide Supported Services within that time frame, it may seek a waiver of this requirement from the Commission, and upon notice and, if necessary, hearing, the Commission shall determine if such waiver shall be granted.

[Source: Added at 21 Ok Reg 2101, eff 7-1-04; Amended at 32 Ok Reg 828, eff 8-27-15]

165:55-23-14. [RESERVED]

[Source: Reserved at 21 Ok Reg 2101, eff 7-1-04]

165:55-23-15. Lifeline program

- (a) Each telecommunications service provider or wireless provider who has been designated as an ETC shall submit tariffs to the Commission or post informational terms, conditions, and rates on the Company's website and provide to the Commission; implementing a program for which qualifying low-income end-users pay reduced charges as a result of the Lifeline support amount described in (e) below.
- (b) If the ETC has toll services, the ETC shall offer toll restriction to all qualifying low-income end-users at the time such end-user subscribes to Lifeline service. If the end-user elects to receive toll restriction, that service shall become part of that end-user's Lifeline service. ETCs may not collect a deposit in order to initiate Lifeline service if the qualifying low-income end-user voluntarily elects toll restriction, where available, from the ETC. If toll restriction is unavailable, or if it is available and the qualifying low-income end-user does not elect toll restriction, the ETC may charge a deposit as detailed in OAC 165:55-9-14.
- (c) Each ETC shall publicize the availability of Lifeline service throughout their designated ETC service area in a manner reasonably designed to reach those likely to qualify for the service.
- (d) Qualifying end-users must meet the eligibility criteria set out in OAC 165:55-23-12.
- (e) For a qualifying low-income end-user who is not an eligible resident of Tribal lands, the Lifeline support amount shall not exceed the federal support amount at 47 C.F.R. § 54.403(a)(1) and § 54.403(a)(2) plus, when qualified, the state support amount established by Commission order or by 17 O.S. § 139.105. For an eligible low-income end-user who lives on Tribal Land, the Lifeline support amount shall not exceed the federal support amount at 47 CFR § 54.403(a)(1), § 54.403(a)(2)

and 47 C.F.R. § 54.403(a)(3) plus, when qualified, the state support amount established by Commission order or by 17 O.S. § 139.105.

(f) The ETC shall instruct applicants to the Lifeline program to indicate, at the time of application, in writing, all qualifying programs under which the applicant is eligible for or receives assistance or benefits.

(g) The wireless provider must provide access to its own customer service department by dialing 611 from the wireless handset or have a toll free number for contacting the ETC programmed in the phone and clearly identified.

(h) Any wireless handset provided in conjunction with the Lifeline Service must clearly identify the provider of the service.

(i) An ETC may not provide Lifeline Service purely by resale without a Commission order.

(j) An approved Lifeline product may not be modified without submitting the modification to the Director of the Public Utility Division at least fifteen (15) days prior to the effective date of the proposed change for the purpose of receiving a determination whether the modification is in the public interest. Unless the ETC receives written notification that its modification is NOT IN THE PUBLIC INTEREST within fifteen (15) days after its submission, the submission is deemed to be in the public interest and may be implemented.

(k) The ETC shall utilize a third party verification system that has been approved by the Director of the Public Utility Division to verify the customer's identity and address, or obtain a waiver from the Director of the Public Utility Division from this requirement.

(l) The ETC must retain a copy of the signed application for Lifeline Service, and any recertification information for three (3) years.

(m) The ETC shall maintain a database sufficient to identify any duplicates among all companies affiliated with the ETC.

(n) Any Lifeline plan offered by a wireless provider must comply with the minimum service standards for voice services detailed at 47 C.F.R. § 54.408.

(o) In addition to other remedies available to the Commission, violations of the marketing rules may result in a minimum of a thirty (30) days suspension of an ETC's ability to sign up new customers.

(p) The ETC shall comply with the recordkeeping requirements with respect to records on customer identity and addresses, along with corresponding documentation confirming customer eligibility for either State or Federally supported Lifeline Service, as identified in 17 O.S. § 139.105.

(q) If there is no usage of the wireless provider's handset for thirty (30) days, the ETC shall de-enroll the customer, according to federal guidelines.

[Source: Added at 21 Ok Reg 2101, eff 7-1-04; Amended at 30 Ok Reg 1565, eff 7-11-13; Amended at 32 Ok Reg 828, eff 8-27-15; Amended at 34 Ok Reg 989, eff 9-11-17]

165:55-23-16. Limitations on Marketing of Supported Services by ETCs

(a) All marketing efforts, including outdoor mobile marketing and door to door sales, must clearly identify the ETC by its d/b/a name.

(b) All enrollment in any Lifeline Services from any outdoor mobile location is prohibited unless the following conditions are met:

(1) There are at least two banners identifying the name of the ETC, in print that is readable from at least thirty (30) feet away;

(2) The banners are at least three (3) foot by five (5) foot in size and the identification of the ETC takes up at least fifty percent (50%) of the banner;

- (3) Employees must wear a shirt that has the ETC's d/b/a name permanently affixed to the shirt;
 - (4) The available terms, conditions and rates for the Lifeline product(s) must be prominently posted at the location where the marketing is taking place;
 - (5) The marketer must have permission from either the owner of the property where the marketing is taking place or from the individual responsible for the property;
 - (6) The marketer must have all required city and county licenses necessary for selling a service at that location; and
 - (7) The marketing must be done in a manner that it does not create a traffic hazard or distraction.
 - (8) Marketing may only be done from a tent of at least ten (10) foot x ten (10) foot in size or from an enclosed trailer or panel truck that has the name of the ETC permanently affixed on the truck or trailer in letters that are at least eighteen (18) inches in height. If the tent is clearly marked with the name of the ETC on the top of the tent, the tent markings may be considered as one of the two banners required by paragraph (b)(1) of this Section.
 - (9) The ETC must provide PUD a list of locations by email where mobile marketing is taking place, including the date, time and location, prior to the mobile marketing taking place, in a format prescribed by the Director of the Public Utility Division. The carrier must also notify PUD of any changes to times or cancellations of previously scheduled events, prior to the change or cancellation. In addition, the ETC shall maintain an active phone number the Commission can call to obtain information regarding past marketing events. The information regarding past marketing events shall be retained by the ETC for a minimum of six (6) months.
 - (10) The ETC has obtained a waiver from the Director of the Public Utility Division regarding a specific requirement of this paragraph.
- (c) All enrollment from door to door marketing is prohibited unless the following conditions are met:
- (1) Enrollment forms used for door to door marketing must have clear disclosure that customers will lose any existing landline Lifeline service if they enroll for Lifeline service from the door to door activity;
 - (2) Employees conducting door to door sales must wear a shirt that has the ETC's d/b/a name permanently affixed to the shirt;
 - (3) The customer must be offered a copy of the terms, conditions and rates for the Lifeline product they select;
 - (4) The marketer must have appropriate licenses for door to door sales;
 - (5) The marketer must provide PUD an address range, date and time where door to door marketing will take place, prior to the marketing being initiated.
 - (6) The ETC has obtained a waiver from the Director of the Public Utility Division regarding a specific requirement of this paragraph.

165:55-23-17. Link-up program on Tribal Lands

(a) Each ETC providing service on Tribal Land and receiving High Cost Support on Tribal lands, pursuant to 47 CFR Part 54, Subpart D, shall file informational tariffs that offer a Link-up assistance program. This program shall offer:

(1) For an eligible resident living on Tribal Land, a reduction consistent with 47 CFR § 54.413(a)(1). The charge from which the reduction is made shall not exceed the customary charge for commencing telecommunications service for a single telecommunications connection by customers initiating non-Lifeline service with the ETC.

(2) A deferred payment schedule consistent with 47 CFR § 54.413(a)(2). The charge assessed for initiating service may include any charges that the ETC customarily assesses to connect end-users, but may not include any security deposit requirements.

(b) A qualifying low-income end-user who resides on Tribal land may choose one or both of the programs set forth in (a)(1) and (a)(2) above of this Section.

(c) An ETC that is receiving federal High-cost support on Tribal land, pursuant to 47 CFR Part 54, Subpart D, shall allow an end-user to receive the benefit of the Link-up program for a second or subsequent time only for service billed at a principal place of residence with an address different from the residence address at which the Link-up assistance was provided previously.

(d) An ETC shall publicize the availability of Link-up support throughout its designated service area, in a manner reasonably designed to reach those likely to qualify for the support.

(e) The end-user qualification criteria for Link-up shall be the same as the criteria established for Lifeline in accordance with 47 C.F.R. § 54.409.

165:55-23-19. Responsibility for adequate and safe service

(a) An ETC is responsible for providing adequate and efficient service to every served end-user for which the ETC reports and receives federal or state universal service support.

(b) An ETC that uses its own facilities to provide Supported Service shall install and maintain its system so as to render safe, efficient, and continuous service, and shall keep all of its equipment and facilities in a good state of repair.

165:55-23-23. Response to customer complaint inquiries

An ETC shall respond to the Commission upon written or electronic inquiry from the Commission within the following time periods:

- (1) Inquiries regarding disconnection, suspension or termination of Supported Services - within one (1) business day of receipt of inquiry from the Commission.
- (2) Inquiries other than for disconnection, suspension or termination of Supported Services - within three (3) business days of receipt of inquiry from the Commission.

PART 3. TRANSMISSION OBJECTIVES

165:55-23-50. Service standards; sufficient operating and maintenance force

An ETC shall maintain an operating and maintenance force sufficient to meet service objectives and minimum standards for restoration of service after interruption as follows:

- (1) Provisions will be made to receive customer trouble reports at all times, twenty-four (24) hours per day.
- (2) Provision will be made to correct interruptions of service to persons and agencies required to respond to emergencies involving human life and safety at all times, consistent with the bona fide needs of the end-user and the availability and safety of ETC personnel.

165:55-23-52. Records of trouble reports

- (a) Each ETC shall make a full and prompt investigation of every trouble report made to it by its end-users, either directly or through the Commission.
- (b) The ETC shall maintain its network so as to minimize customer trouble reports for Supported Services in an economical manner, but shall not exceed eight (8) reports per one hundred (100) customers per month per service area averaged over a three-month period. An occurrence of a violation of this procedure shall be considered as each day in the month for which the three-month average of trouble reports for that month and the preceding two (2) months exceed this criteria for the service area in question.
- (c) The response of a ETC to customer trouble reports shall be eighty-five percent (85%) of all trouble reports cleared within twenty-four (24) hours.

165:55-23-54. Notice of service interruptions

- (a) The Commission shall be notified, through the Director of the Public Utility Division and the Commission's Public Information Officer, of all interruptions in Supported Services, which cause a customer to not have access to Supported Services within the designated service area for more than twelve (12) hours; or any

interruption which, in the judgment of the ETC, may cause a high degree of public interest or concern.

(b) The Commission notification process required in subsection (a) of this Section, may be accomplished by facsimile, and email twenty-four (24) hours a day, seven (7) days a week; or by phone, during the business hours of 8:00 a.m. through 4:30 p.m., Monday through Friday, and should consist of the following:

- (1) An initial contact to advise of the outage; the cause of such outage; the area affected; and, the estimated time for repair;
- (2) Intermediate contact to provide status reports, as deemed necessary by the telecommunications service provider, or as may be requested by the Commission Staff; and,
- (3) Concluding information detailing the results and completion of the restoration of service.

SUBCHAPTER 25. HOMELAND SECURITY AND CRITICAL INFRASTRUCTURE

165:55-25-1. Purpose and scope

(a) The purpose of this Subchapter is to encourage facilities-based providers (FBPs) to take all reasonable measures necessary to protect their critical infrastructures from extended interruption of service from all extraordinary events, natural and man-made.

(b) The Corporation Commission encourages FBPs to develop, implement, and maintain Homeland Security and Critical Infrastructure Plans according to the industry standards enumerated in subsection (d) below.

(c) To the extent that a FBP seeks cost recovery for the implementation of Homeland Security and/or Critical Infrastructure protections, the FBP shall comply with all provisions of this Subchapter.

(d) Each FBP serving Oklahoma jurisdictional customers is encouraged to follow the most current Network Reliability and Interoperability Council (NRIC) Best Practices (<http://www.atis.org/bestpractices/Search.aspx>) security guidelines and standards and the National Fire Protection Association's ("NFPA") NFPA 1600 - Standard on Disaster/Emergency Management and Business Continuity Programs (<http://www.nfpa.org/assets/files/PDF/NFPA1600.pdf>), as may be amended from time to time, for use as guidelines for protecting the FBP's Critical Infrastructure from extended service interruption.

(e) Each FBP seeking cost recovery for security measures from Oklahoma jurisdictional customers shall develop, implement, and maintain a Critical Infrastructure and Security Plan in accordance with this Subchapter.

(f) If the FBP has implemented a Security Plan or process in accordance with the applicable industry guidelines but is not seeking or receiving cost recovery for security-related costs, the FBP shall submit the Certification Letter required by OAC 165:55-25-7(f) and the Plan shall be subject to review pursuant to the Authorized Participation and Confidentiality provisions of OAC 165:55-25-10 and OAC 165:55-25-11. The FBP is not otherwise required to comply with the provisions of this Subchapter.

(g) The Commission retains its jurisdictional and supervisory authority to address the reasonableness and/or prudence of any proposed security cost recovery.

(h) Nothing in this Subchapter shall relieve any FBP from any duty otherwise prescribed by the laws of the State of Oklahoma or the Commission's rules.

(i) Nothing in this Subchapter is intended to divest the FBP of its right to object to any discovery requests from intervenors seeking access to "Highly Sensitive Confidential" materials.

(j) If any provision of this Subchapter is held invalid, such invalidity shall not affect other provisions or applications of this Subchapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Subchapter are declared to be severable.

165:55-25-3. Definitions

The following words and terms, when used in this Subchapter 25, shall have the following meaning, unless the context clearly indicates otherwise:

"Annual Report" means the Annual Report submitted by Commission Staff to the Commission by July 1 of each year, summarizing the results of Staff's review of each FBP's Security Plan (and any Plan Update Reports), along with any recommendations that Staff may have regarding such Plan(s).

"Authorized Participant" means those persons authorized by the FBP or as may otherwise be authorized by law and/or ordered by the Commission, to view highly sensitive confidential information. Such authorization shall be granted on a case-by-case basis and may extend to the FBP, state government officials, persons having been granted intervenor status by the Commission and Commission authorized designees of the parties.

"Certification Letter" means the written certification to the Director of the Public Utility Division made by March 1 of each year, indicating that the FBP has updated the Plan and/or previous Plan Update Reports, has a Plan but is not

seeking cost recovery or has no Plan in place.

"Critical Infrastructure" means the property of a FBP located in the State of Oklahoma, comprised of either physical assets or computer software which, if severely damaged or destroyed, would have a significant impact on the ability of the FBP to serve large numbers of customers for an extended period of time, would have a detrimental impact on the reliability or operability of the telecommunications grid, or would cause significant risk to public health and safety.

"FBP" or "Facilities-Based Provider" means all carriers regulated by the Commission, other than wireless Eligible Telecommunications Carriers, that own, operate or otherwise control facilities, network and /or other physical plant used to provide telecommunications to persons in Oklahoma.

"Highly Sensitive Confidential" means that the information is of such a sensitive nature that its public disclosure could be harmful to the security of a FBP's critical infrastructure and as such it may only be viewed by those persons authorized by the FBP or as may otherwise be ordered by the Commission.

"NFPA" means National Fire Protection Association.

"NRIC" means Network Reliability and Interoperability Council.

"Plan" means a Homeland Security and Critical Infrastructure Plan including any subsequent Plan Update Reports that have been prepared with reference to NRIC and/or NFPA guidelines.

"Plan Update Report" means the written redlined changes made by the FBP updating the Plan and/or previous Plan Update Reports. At the FBP's option, changes will either be redlined or a history of changes may be maintained.

"Security Cost Rider" means the per billing unit rate mechanism whereby a FBP may, upon approval and Order of the Commission, recover the costs of providing security for its Critical Infrastructure as defined under this Subchapter 25.

165:55-25-4. [RESERVED]

[Source: Reserved at 22 Ok Reg 708, eff 7-1-05]

165:55-25-5. FBP Security Plan

- (a) Each FBP is encouraged to prepare and make available for inspection, a "Homeland Security and Critical Infrastructure Plan" ("Plan") that has been prepared with reference to the NRIC safety guidelines and standards.
- (b) The Plan shall be marked as "Highly Sensitive Confidential" and designate those facilities that the FBP considers to be Critical Infrastructure (physical assets and computer software as defined in OAC 165:55-25-3 above), and shall set forth the FBP's measures to secure such facilities from extended service interruption. The Plan shall also include an estimate of the costs necessary to achieve such measures.
- (c) The Plan shall remain on site at the FBP's business office in accordance with OAC 165:55-25-7(g) below and shall have the most current version of the redlined Plan Update Report attached to the clean version of the FBP's latest Plan. At the FBP's option, changes will either be redlined or a history of changes may be maintained.
- (d) The Plan shall list all locations deemed by the FBP to be critical as well as identification of any subsequently increased security measures. All locations and security measures shall be identified by code known only to the utility and designated state government officials and their designees.

(e) Any subsequent security measures identified in the Plan shall contain an estimate of the cost necessary to implement such measures, a description of the measures necessary to adequately secure each specific location and an estimated schedule for completion of each measure.

(f) All locations identified by the Plan that require additional security measures shall be prioritized by the FBP.

(g) On July 1 of each year, the Commission Staff shall submit an Annual Report marked as "Highly Sensitive Confidential" to the Commission summarizing the results of Staff's review of each FBP's Plan (and any Plan Update Reports), along with any recommendations that Staff may have regarding such Plan(s).

(h) When the Attorney General elects to submit recommendations to the Commission regarding a FBP's Plan, such recommendations shall be marked as "Highly Sensitive Confidential" and shall also be due by July 1 of each subsequent year thereafter.

165:55-25-6. [RESERVED]

[Source: Reserved at 22 Ok Reg 708, eff 7-1-05]

165:55-25-7. Reporting requirements

(a) Subsequent to the preparation of the initial Plan prepared under OAC 165:55-25-5(a), each FBP shall prepare a Plan Update Report by March 1 of each succeeding year, following the same format as the initial Plan with redlines of all new changes, marked "Highly Sensitive Confidential" and kept on site at the FBP's business office.

(b) Each subsequent Plan Update Report shall update the previous year's report by indicating for each specific coded location, all costs and completion dates (actual and projected) for all current and prior additional security measures claimed under this Subchapter.

(c) For those security measures previously reported that have not yet been completed, revised estimated costs and estimated completion dates shall be provided.

(d) The Plan Update Report shall also include (by specific location) a description of each proposed security measure that has not been previously reported, the estimated costs for each, as well as the estimated completion date for each measure.

(e) Costs reflected in the initial Plan and in subsequent Plan Update Reports, whether estimated or actual, shall be identified as either capital or expense costs.

(f) By March 1 of every year each FBP shall submit a Certification Letter to the Director of the Public Utility Division, marked as "Highly Sensitive Confidential" and certifying that as of the date of the Certification Letter:

(1) The FBP does not have a Homeland Security and Critical Infrastructure Plan as contemplated and defined by this Subchapter;

(2) The FBP does not have a Homeland Security and Critical Infrastructure Plan as contemplated or defined by this Subchapter but has otherwise taken steps to secure its facilities and Critical Infrastructure and is not seeking cost recovery under this Subchapter;

(3) The FBP does have a Plan but is not seeking cost recovery; or

(4) The FBP has prepared its Plan Update Report updating the Plan and/or previous year's Plan Update Report and that the redlines contained within the current Plan Update Report encompass in the entirety, all of the changes made to the FBP's Plan since the Plan's inception or the previous year's

certification and that the Plan is available for Commission and/or Attorney General review at the FBP's local place of business.

(g) A FBP shall not be required to file its initial Plan or any of its subsequent Plan Update Reports with the Commission. Each FBP shall instead, secure and maintain on site, at the FBP's local place of business, its initial Plan and all subsequent Plan Update Reports.

165:55-25-8. [RESERVED]

[Source: Reserved at 22 Ok Reg 708, eff 7-1-05]

165:55-25-9. Cost recovery

(a) Each FBP seeking cost recovery of expenditures related to securing its Critical Infrastructure shall prepare and make available for inspection, its Plan and any subsequent Plan Update Reports in accordance with this Subchapter.

(b) Each FBP shall file an Application with the Commission for cost recovery as provided for within this Subchapter. Such cost recovery shall only occur to the extent the FBP has incurred all or a portion of its actual security-related costs.

(c) Unless otherwise ordered by the Commission, a FBP shall have the burden of proving compliance with all of the provisions of this Subchapter prior to obtaining cost recovery for security related measures.

(d) The total costs incurred under this Subchapter shall be combined for recovery purposes, for consideration by the Commission.

(e) All costs approved by the Commission for recovery, shall be recovered from the FBP's customers through a "Security Cost Rider" based upon the number of access lines for the FBP and shall be subject to annual true-up.

(f) Unless otherwise ordered by the Commission, A FBP shall immediately discontinue recovery of the "Security Cost Rider" when the earlier of the following occurs: natural expiration due to the full recovery provided for in a Rider granted under this Subchapter or forced expiration pursuant to OAC 165:55-25-9(g). Under no circumstances, shall the FBP be permitted to double recover Homeland Security and Critical Infrastructure related costs. Where a "Security Cost Rider" is utilized, Homeland Security and Critical Infrastructure related costs shall not be recoverable through a rate increase pursuant to 17 O.S. §137 et seq. or from the Oklahoma Universal Service Fund ("OUSF") pursuant to 17 O.S. §139.106.

(g) Unless otherwise ordered by the Commission, all "Security Cost Riders" approved by the Commission, shall expire five years from the initial date of the "Security Cost Rider's" implementation.

(h) Upon the filing of a cost recovery request by a FBP, Commission Staff, the state Attorney General's office (based upon that entity's statutory authority) and all other Authorized Participants shall review the cost recovery proposal submitted by the FBP and file testimony in accordance with:

- (1) Any applicable protective orders issued by the Commission in the security-related cost recovery cause;
- (2) OAC 165:55-25-11 (below);
- (3) The Commission's Rules of Practice (OAC 165:5); and
- (4) Any other protective measures or requirements prescribed by law or the Commission.

(i) Testimony of Commission Staff, the state Attorney General and all other Authorized Participants shall detail each of the parties' respective recommendations and any objections to the FBP's Plan and the FBP's request for cost recovery related

to the Plan. Also in accordance with the Commission's Rules of Practice, Commission Staff, the state Attorney General and all other Authorized Participants shall provide copies of their respective individual testimonies to one another, with redacted versions of each individual testimony filed with the Court Clerk at the Commission.

(j) Upon notice and hearing, the Commission shall issue an order regarding any requests for security-related cost recovery.

[Source: Added at 22 Ok Reg 708, eff 7-1-05]

165:55-25-10. Commission authorized participation

(a) **Commission Staff.** Only those Commission Staff and Staff's designees authorized by the Commission shall participate in a cause before the Commission regarding a FBP's Plan, and then shall do so only after meeting all applicable requirements for Commission authorization, which shall be determined on a case-by-case basis. All Commission Staff and Staff's designees authorized to participate in a security cause shall comply with the requirements for protecting information obtained under the "Highly Sensitive Confidential" designation.

(b) **Attorney General.** Only those Attorney General personnel who have formally entered an appearance pursuant to Oklahoma Statute and the Commission's Rules of Practice and that entity's Commission authorized designees shall be granted review of a FBP's Plan and/or Plan Update Reports. All Attorney General designees authorized to participate in a security cause shall meet all applicable requirements for Commission authorization, to be determined on a case-by-case basis, and shall comply with the protections afforded information obtained under the "Highly Sensitive Confidential" designation.

(c) **Intervenors.**

(1) For the purposes of this Subchapter, all intervenors, including but not limited to counsel and experts for intervenors, shall be deemed "Authorized Participants" in accordance with OAC 165:55-25-3 above. All Authorized Participants wishing to participate in a security-related cause before the Commission shall meet all applicable requirements for Commission authorization, which shall be determined on a case-by-case basis, and shall comply with the protections afforded information obtained under the "Highly Sensitive Confidential" designation.

(2) In addition to acquiring "Authorized Participant" status from the Commission, each intervenor and its designees desiring to participate in a cause before the Commission regarding a FBP's Plan shall post a bond or other security acceptable to the Commission, in an amount to be determined by the Commission, to protect the utility from harm in the event the Authorized Participant breaches the confidentiality terms established under this Subchapter or as may otherwise be established by the Commission. A copy of such bond or other security shall be filed with the Commission's Court Clerk. This subsection shall not apply to the Attorney General of the State of Oklahoma or the Oklahoma Corporation Commission Commissioners and Staff.

(3) Any Authorized Participant found in violation of a Commission issued Protective Order and Proprietary Agreement, shall be liable for contempt penalties pursuant to the penalty provisions found in Article IX, § 19 of the Oklahoma Constitution, Title 17 of the Oklahoma Statutes and the Commission's Rules of Practice at OAC 165:5. This subsection shall not apply to the Attorney General of the State of Oklahoma or the Oklahoma

Corporation Commission Commissioners and Staff.

(4) In addition to the above protections, all Authorized Participants may be required by the Commission to enter into a separate non-disclosure agreement as a pre-requisite to being granted intervention and "Authorized Participant" status.

[Source: Added at 22 Ok Reg 708, eff 7-1-05]

165:55-25-11. Confidentiality

(a) Pursuant to the Commission's jurisdiction granted under Article IX, Section 18 of the Oklahoma Constitution, 51 O.S. (2001) §24A.22 of the Oklahoma Statutes and OAC 165:5, the Commission's Rules of Practice; all un-redacted documents related to a FBP's Homeland Security and Critical Infrastructure Plan shall be considered "Highly Sensitive and Confidential," and shall only be admitted into evidence in en camera proceedings.

(b) "Highly Sensitive Confidential" designation and protection shall extend but not be limited to the following: initial Plans (including underlying documents), Plan Update Reports, Certification Letters, Annual Reports made by Commission Staff, recommendations submitted by the Attorney General of the State of Oklahoma and un-redacted documents used in cost recovery proceedings. For all other documents, the "Highly Sensitive Confidential" designation may be granted upon hearing and Final Order of the Commission.

(c) Each FBP Plan and/or Plan Update Report prepared in accordance with this Subchapter, shall be marked "Highly Sensitive Confidential" and shall be kept and maintained on site at the FBP's business office in accordance with OAC 165:55-25-7(g), above. Only those individuals on the Staff of the Corporation Commission and in the State Attorney General's office and their respective experts who have been authorized by the Commission, shall have access to the Plan and Plan Update Reports prepared by each FBP and any related or supporting documentation thereto. All other parties granted authorized intervenor status to a security cause pursuant to OAC 165:55-25-10(c) may also be granted access to the Plan, Plan Update Reports and supporting documentation after notice and hearing.

CHAPTER 56. RESELLERS OF INTEREXCHANGE TELECOMMUNICATIONS SERVICES

[Authority: OKLA. CONST. art IX, § 18; 17 O.S., §§ 131 et seq.]

[Source: Codified 7-1-95]

SUBCHAPTER 1. GENERAL PROVISIONS

165:56-1-1. Purpose; short title

(a) This Chapter establishes the Oklahoma Corporation Commission rules governing the regulation and operations of resellers of interexchange telecommunications services in Oklahoma which may be cited by the short title as the Telecommunications Reseller Rules.

(b) This Chapter is intended to define good business practices under normal conditions, to assure adequate service, to prevent unfair charges to the customer, and to protect resellers of intrastate telecommunications toll services from unreasonable demands.

(c) This Chapter is further intended to permit Oklahoma consumers to receive timely benefits from lawful market-driven price and service competition among resellers by applying only such regulatory requirements to those companies as are necessary to assure public access to telecommunications services, under tariff provisions which are not unjustly discriminatory and to preclude unjust and unreasonable rates and charges in such market.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-2. Jurisdiction

The Oklahoma Corporation Commission, by virtue of Article IX § 18 of the Constitution of the State of Oklahoma and Title 17 § 131 et seq. of the Oklahoma statutes, has authority and responsibility to supervise, regulate, and control the resale of intrastate telecommunications services in Oklahoma and to enact rules and regulations in connection therewith. No person or corporation not otherwise a reseller of telecommunications services within the meaning of this Chapter shall be deemed such solely because of the manufacture, distribution, installation or maintenance of customer premises communication equipment and accessories.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-3. Application of rules

This Chapter shall apply to every company that resells telecommunications services to the public, which company is by law subject to the jurisdiction of the Commission.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-4. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Authorized carrier" means any telecommunications carrier that submits a change, on behalf of an end-user, in the end-user's selection of a provider of telecommunications service with the end-user's authorization verified in accordance with the procedures specified in this Chapter.

"Billing agent" means an entity which provides bills to an end-user for services received from a reseller.

"CIC" means carrier identification code which identifies a provider of toll services by a three or four-digit number.

"Class of service" means a description of service furnished a customer in terms of grade of service, type of rate, location, and use.

"Clear and conspicuous" means notice that would be apparent to the reasonable consumer.

"Commission" means the Oklahoma Corporation Commission.

"Competitive service" means a telecommunications service determined by the Commission to be subject to effective competition for a relative geographic and service(s) market, after notice and hearing.

"Complaint" means any oral or written report given to a reseller by an end-user of a reseller's service and/or the Commission's Consumer Services Division relating to dissatisfaction with the provision of or the rate(s) charged for the reseller's service(s). Each complaint shall count as a separate report regardless of whether subsequent reports relate to the same situation giving rise to the dissatisfaction with the provision of or the rate(s) charged for the reseller's regulated services.

"Cramming" means the placement of unauthorized, misleading, or deceptive charges on a customer's telephone bill for products or services that were never ordered by the customer.

"Customer" means any person, firm, partnership, cooperative corporation, corporation, or lawful entity that receives regulated telecommunications services provided by an entity reselling intrastate telecommunications services.

"Customer class" means class of service provided to a group of customers.

"Customer trouble report" means any oral or written report given to the reseller's repair service or contact person, and/or the Commission's Consumer Services Division by a customer relating to a defect or difficulty or dissatisfaction with the provision of the telecommunications service provided by the reseller.

"Deniable charge" means a charge for those regulated services for which nonpayment may result in a disconnection of basic local service.

"Disconnection of service" means an arrangement made by the end-user or reseller for permanently discontinuing service by terminating the contract and/or removing the telephone service from the end-user's premises.

"End-user" means the customer to whom a telephone number is assigned.

"Exchange" means a geographic area established by a telephone company and approved by the Commission for the administration of local telephone service in a specified area which usually embraces a city, town, or village and its environs. It may consist of one or more central offices together with associated plant used in furnishing communication service in that area.

"Executing carrier" means any telecommunications carrier that affects a request that an end-user's telecommunications carrier be changed. A carrier may be treated as an executing carrier, however, if it is responsible for any unreasonable delays in the execution of carrier changes or for the execution of unauthorized carrier changes, including fraudulent authorizations.

"FCC" means the Federal Communications Commission.

"IXC" means interexchange carrier or interexchange company which is a carrier or company authorized by the Commission to provide long distance communications services, but not local exchange services, within the State of Oklahoma borders.

"Initial Tariffs" means the first tariffs approved after, or in conjunction with, the granting of a Certificate of Convenience and Necessity.

"LATA" means Local Access and Transport Area as defined in the Code of Federal Regulations, Title 47 Part 53.3.

"LEC" means a local exchange company which is providing local exchange service.

"Letter of Agency" ("LOA") means the written authorization that gives permission to change the customer's telecommunications services and/or the customer's provider or to share that customer's network information with representatives or associates of the telecommunication company.

"New service provider" means a service provider that did not bill the end-user for service during the service provider's last billing cycle. This definition excludes service providers which bill the customer solely on a per transaction basis.

"Non-deniable charge" means a charge for those non-regulated services for which nonpayment shall not result in a disconnection of basic local service.

"Not-regulated service" means the offering of service(s) where the rates and/or terms and conditions for such service(s) are not regulated by the Commission. These would include any services offered from FCC tariffs such as interstate service offerings and any taxes, fees and surcharges applicable to those services, as well as any intrastate services not contained in tariffs approved by the Commission.

"Regulated telecommunications service" means the offering of telecommunications service(s) directly to the public where the rates and/or terms and conditions for such service(s) are regulated by the Commission. These would include services offered from intrastate tariffs approved by the Commission and any taxes, fees and surcharges applicable to those services, and interstate services when the Commission is enforcing the FCC slamming rules.

"Reseller" means any person, partnership, cooperative corporation, corporation, or lawful entity that offers interexchange telecommunications services to the public through the use of the transmission facilities of other carriers or a combination of its own facilities and the transmission facilities of other carriers for resale to the public for profit. The term "reseller" as used in this Chapter shall not include LECs or IXC, which shall be regulated as provided for by 165:55.

"Rules of Practice" means OAC 165:5.

"Service" means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used. Service shall not include the provision of non telecommunications services, including but not limited to the printing, distribution, or sale of advertising in telephone directories, maintenance of inside wire, customer premises equipment and billing and collection, nor does it include the provision of mobile telephone service, enhanced services and other services which are not-regulated.

"Service provider" means any entity that offers a product or service to a customer, the charge for which appears on the bill of the billing agent. This definition shall include only providers that have continuing relationships with the end-user that will result in periodic charges on the end-user's bill, unless the service is subsequently canceled.

"Slamming" means the unauthorized switching of an end-user's presubscribed IXC or reseller.

"Streamlined tariff revision(s)" means revision(s) proposed by a reseller which will become effective without notice and hearing or order of the Commission, in the time frame established in OAC 165:56-5-5, unless suspended.

"Submitting carrier" means any telecommunications carrier that requests on the behalf of an end-user that the end-user's telecommunications carrier be changed and seeks to provide retail services to the end user. A carrier may be

treated as a submitting carrier, however, if it is responsible for any unreasonable delays in the submission of carrier change requests or for the submission of unauthorized carrier change requests, including fraudulent authorizations.

"Suspension of service" means an arrangement made at the initiative of the reseller for temporarily discontinuing service without terminating the contract or removing the telephone service from the customer's premises.

"Telecommunications company" or **"Telecommunications carrier"** means a reseller.

"Telecommunications service" means service provided by a reseller including voice, data, and all other types of communications services, under the reseller's tariffs on file with the Public Utility Division of the Commission.

"Telephone bill" means a billing agent's invoice, issued in compliance with this Chapter, for products or services rendered by itself and by a service provider(s), if any.

"Terms of Service" means rates, charges and terms and conditions for regulated services that a reseller elects to post, in a searchable format, on a publicly available website.

"Territory" means the reseller's area of operation which may include the entire State of Oklahoma or some specified portion thereof.

"Unauthorized carrier" means any telecommunications carrier that submits a change, on behalf of an end-user, in the end-user's selection of a provider of telecommunications service but fails to obtain the end-user's authorization verified in accordance with the procedures specified in this Chapter.

"Unauthorized change" means a change in an end-user's selection of a provider of telecommunications service that was made without authorization verified in accordance with the verification procedures specified in this Chapter.

"Underlying carrier(s)" means the provider of facilities utilized by a reseller in the provisioning of its interexchange service to its customers.

165:56-1-5. Interpretation of rules

The words contained in this Chapter shall be given their ordinary and customary meaning, with technical terms and words being construed as generally understood within the telecommunications industry, except where otherwise expressly provided. Where, by its context, this Chapter establishes service standards or objectives, substantial compliance therewith under normal operating conditions will be deemed in compliance with this Chapter. Where, by its context, this Chapter imposes an absolute obligation upon the reseller, strict compliance is required.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-6. Relief from rules

Whenever compliance with any requirement of this Chapter would result in unreasonable hardship upon or excessive expense to the reseller or the customer, or for other good cause shown, the Commission may, by order, waive or modify the requirements of this Chapter, upon application of any interested person, in accordance with the provisions of OAC 165:5. The Commission may grant temporary relief pending hearing.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97]

165:56-1-7. Exceptions or variances

If a reseller seeks an exception or variance from this Chapter in its tariff, such exception or variance shall be clearly shown on such tariff, sufficient to plainly bring to the Commission's attention the exact nature of said exception or variance. Any exception not so marked or identified in such tariff shall be superseded by this Chapter to the extent that said exception or variance is in conflict therewith. Upon approval by the Commission, the exception or variance shall indicate the number of the pertinent Commission order.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-8. Supremacy

Every tariff, rule, regulation, or agreement relating to the subject matter of this Chapter is superseded by this Chapter and is deemed amended to conform with this Chapter.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-9. Rules conform to law

This Chapter shall be construed to conform with the Oklahoma Constitution and with the laws of Oklahoma.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-10. Controversy over rules

Whenever a controversy exists in connection with the interpretation of this Chapter or its applicability, or any right or any duty imposed thereby, the Commission, upon application of any interested person and after notice and hearing, in accordance with the provisions of OAC 165:5, will enter such order thereon as it may deem appropriate.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97]

165:56-1-11. Severability

This Chapter shall not relieve, in any way, a reseller or customer from any of its duties under the laws of this State or the United States. If any provision of this Chapter is held invalid, such invalidity shall not affect other provisions or applications of this Chapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Chapter are declared to be severable. This Chapter shall not be construed so as to enlarge, diminish, modify, or alter the jurisdiction, powers, or authority of the Commission or the substantive rights of any person.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-12. Conflict with Commission order

This Chapter shall not alter or amend any order of the Commission directed to a reseller, except where the provisions thereof are in direct conflict with this Chapter, in which case this Chapter shall supersede the provisions of any such order to the extent of conflict only.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-13. Tariff conformance [REVOKED]

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Revoked at 14 Ok Reg 2855, eff 7-15-97]

165:56-1-14. Exclusions

The term "reseller" as used in this Chapter shall not include LECs or IXC, which shall be regulated as provided for by 165:55.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-1-15. Universal service

Pursuant to OAC 165:59-3-40, every entity that operates or provides telecommunications service within the State of Oklahoma shall contribute, on a nondiscriminatory basis, into the Oklahoma Universal Service Fund.

SUBCHAPTER 3. CERTIFICATES, REPORTS, AND RECORDS

165:56-3-1. Certificate of Convenience and Necessity

(a) Requirement for Certificate of Convenience and Necessity. No person shall resell any telecommunications service obtained from a certificated carrier to any customer in Oklahoma, without first having secured a Certificate of Convenience and Necessity from the Commission.

(b) Application for Certificate of Convenience and Necessity. An application for a Certificate of Convenience and Necessity shall be made pursuant to the requirements of 17 O.S. § 131 *et seq.* and shall conform to the requirements thereof and with the Commission's Rules of Practice, OAC 165:5, and any additional requirements set forth in this Chapter. An original and four (4) copies of the application for a Certificate of Convenience and Necessity shall be filed with the Commission's Court Clerk. A filing fee pursuant to the Commission's Rules of Practice, OAC 165:5, shall be required.

(c) Application requirements for Certificate of Convenience and Necessity. An applicant to the Commission for a Certificate of Convenience and Necessity to provide reseller service in the State of Oklahoma shall be required to demonstrate its financial, managerial, and technical ability to provide the requested reseller service in the State of Oklahoma. An application for a Certificate of Convenience and Necessity to provide reseller services shall include as attachments to the application the following information, which must be certified as true and correct by an officer of any corporate applicant, or an authorized representative of an unincorporated applicant, in a format approved by the Director of the Public Utility Division:

(1) As applicable, the complete name, including each and every trade name under which business will be conducted, corporate or other headquarters address and names/addresses of principal corporate officers or partners of the entity proposing to resell telecommunications service to the public in the State of Oklahoma. Also, include the telephone number and, if applicable, the toll-free telephone number.

(2) If different from those provided in paragraph (1) of this subsection, the name(s) and address(es) of all officers and corporate offices of the reseller located in the State of Oklahoma and the name(s) and address(es) of employee(s) responsible for Oklahoma operations.

(3) A copy of the applicable certificate, issued by Oklahoma's Secretary of State, to transact business in the State of Oklahoma.

- (4) A copy of the Corporate Trade Name Report, issued by Oklahoma's Secretary of State, shall be provided for each and every trade name, i.e. a d/b/a, utilized by the reseller.
- (5) A financial statement.
- (6) Contact name(s), address(es) and telephone number(s) of the individual(s) responsible for providing service to customers, for repairs and maintenance, for answering complaints, and supplying refunds. This will be the principal contact to be utilized by the Commission's Consumer Services Division and Public Utility Division regarding questions and complaints against the reseller.
- (7) A description of the reseller's proposed procedures used to verify customer- ordered changes in presubscribed carriers, including, but not limited to, a proposed letter of agency that is consistent with the requirements of 47 CFR Ch. I, Section 64.1150, proposed independent third-party verification script and/or proposed telephone contact script.
- (8) A complete set of proposed tariffs which shall include terms and conditions of service and all rates, charges, and service classifications in a format approved by the Director of the Public Utility Division. The proposed tariffs shall comply with OAC 165:56-5-1 through OAC 165:56-5-3.
- (9) A copy of the applicant's proposed complaint report form which is consistent with OAC 165:56-7-5. The complaint report form and complaint codes suggested by the Director of the Consumer Services Division are included as Appendix H and Appendix I, respectively, to this Chapter.
- (10) A written affirmation, signed before a Notary Public by someone with authority to bind the applicant, that:
 - (A) The information contained in the application is true and correct;
 - (B) The reseller is familiar with and will comply with all applicable federal and state laws and the rules and orders of the Commission;
 - (C) The applicant possesses the financial ability to provide reseller services in the State of Oklahoma;
 - (D) The reseller will contribute to the Oklahoma Universal Service Fund annually pursuant to OAC 165:59;
 - (E) The reseller understands the Commission's contempt authority;
 - (F) A statement that the applicant is not currently under investigation, either in this state or in another state or jurisdiction, for violation of any deceptive trade or consumer protection law or regulation, if that is the case;
 - (G) A statement that the applicant has not been fined, sanctioned or otherwise penalized either in this state or in another state or jurisdiction for violation or any consumer protection law or regulation, if that is the case;
 - (H) If either of the statements required in (F) and (G) above is untrue, a detailed explanation of the circumstances of the investigation or fine, sanction, or penalization including a detailed description of the cause(s), the number of customers involved, and current status of the proceeding; and
 - (I) A statement as to whether the applicant currently seeks state or federal universal service funding of any kind for services provided in the state(s) in which applicant is currently authorized to provide service, and whether applicant intends to seek Oklahoma Universal

Service Fund funding in Oklahoma.

(11) The reseller's carrier identification code (CIC) and a statement that the reseller will provide its CIC to each LEC providing service in the State of Oklahoma, in order for the reseller to be identified. In the event the reseller does not have an assigned CIC, proof shall be provided that efforts to obtain the code have been initiated. If the reseller uses more than one CIC, each CIC and all associated trade name(s) shall be provided.

(12) A statement regarding whether the applicant intends to utilize the services of a billing agent to issue bills to end-users.

(13) A brief description of its history of providing the requested telecommunications service, or other telecommunications services, in order to demonstrate its managerial experience. The history shall include a list of the geographic areas in which it previously provided service and/or is currently providing service and such other documentation as may be requested by the Commission. Applicants for a Certificate of Convenience and Necessity without prior experience shall list the experience of each principal officer, partner, or the sole proprietor in order to demonstrate its managerial ability, and/or provide other documentation as may be requested by the Commission.

(14) A description of the applicant's experience in providing telecommunications services in order to demonstrate its technical abilities. In the case of applicants for a Certificate of Convenience and Necessity without prior experience, the applicant shall provide documentation which supports its technical abilities or other documentation as may be requested by the Commission.

(15) A list of all other states, if any, where:

(A) The applicant is authorized to operate;

(B) Authorization to operate is pending;

(C) A request for authorization has been denied, including the reason stated for denial, with a certified copy of the denial document attached; and,

(D) Authorization has been revoked, with a certified copy of the revocation document attached.

(16) A statement that the service territory is to be the State of Oklahoma or, if less than the State of Oklahoma, a description of the proposed service territory is to be provided.

(d) Requirements for expanding authority under an existing CCN. An Applicant wishing to expand its service authority under an existing Certificate of Convenience and Necessity granted pursuant to Chapters 55, 56, 57 and/or 58, must make application to the Commission and provide all information and notice as required in Sections 165:56-3-1(c) and 165:56-3-2. However, information submitted in support of a previous Application for certification, if such Application was approved by the Commission, may be used in support of the current Application by providing a written affirmation, signed before a Notary Public, and by someone with authority to bind the Applicant, stating that the previously submitted information is still true and correct, and circumstances have not changed. If the previously submitted information is no longer true and correct, or if circumstances have changed, Applicant shall submit updated information along with a written affirmation fully explaining all changed circumstances.

(e) Amended application. During the Staff's review of the reseller's application, certain revisions and/or corrections to documents attached to the application may

be requested. After the parties have agreed to the necessary revisions and/or corrections, such revisions and/or corrections shall be attached to an amended application. The reseller shall file an original and four (4) copies of its amended application with the Commission's Court Clerk. Requested revisions and/or corrections may include, but shall not be limited to:

- (1) Revisions to the applicant's proposed tariffs;
- (2) Provision of documents omitted from the originally filed application; and/or,
- (3) Correction of the statement, in the body of the application only, regarding the services for which authority to provide is being sought.

(f) **Additional information.** The Public Utility Division Staff may issue data requests for additional relevant information as may be necessary. Data request responses shall be submitted to the Staff member requesting the information, and not filed with the Commission's Court Clerk.

(g) **Approval requirement.** Unless provided otherwise in this Chapter, or by the laws of the State of Oklahoma, no Certificate of Convenience and Necessity shall be granted except by Order of the Commission, after such notice and hearing, if any, as directed by the Commission.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97; Amended at 15 Ok Reg 3075, eff 7-15-98; Amended at 16 Ok Reg 2290, eff 7-1-99; Amended at 19 Ok Reg 2000, eff 7-1-02; Amended at 21 Ok Reg 2123, eff 7-1-04; Amended at 35 Ok Reg 1050, eff 9-14-18]

165:56-3-2. Notice requirements when filing for Certificate of Convenience and Necessity

Applicants seeking a CCN shall meet all notice requirements set forth in this Section.

(1) Requirements for filing an Application of a CCN. An application of a CCN shall be delivered by mail, electronic mail or by personal service to the following people and/or entities:

- (A) The Oklahoma Attorney General;
- (B) The Commission's Director of the Public Utility Division;
 - (i) The Application delivered to the Director of the Public Utility Division shall be file-stamped by the Commission's Court Clerk and shall be delivered to the Director of the Public Utility Division in electronic copy form only.
 - (ii) The Director of the Public Utility Division shall update and post a report that includes reference to the Application of CCN on the Commission's website, within five (5) business days of receipt.

(2) Publication of a Notice of Application of a CCN. The Notice required by 17 O.S. § 132 shall be published as follows:

- (A) In newspapers of general circulation, sufficient to reach each territory affected, once a week for two (2) consecutive weeks with at least seven (7) days apart. Unless otherwise specified in the application, the reseller's area of CCN authority will be the State of Oklahoma.
- (B) Publication shall be at the expense of the applicant.
- (C) A "Proof of Publication" document shall be filed with the Commission's Court Clerk within fifteen (15) days of the last publication date.

(3) Requirements for a Notice of Hearing on an Objection to a CCN.

(A) When an objection is made in a cause of an Application of a CCN, the Applicant shall promptly file a Notice of Hearing at the Commission's Court Clerk requesting a date for a hearing on the merits of the application.

(B) Within ten (10) business days prior to the date of the hearing, the Applicant shall serve the notice by delivering a file-stamped copy by mail, electronic mail or by personal service to the following people and/or entities:

- (i) The Oklahoma Attorney General;
- (ii) The Commission's Director of the Public Utility Division; and
- (iii) Any Intervenors, including the person or entity filing the objection.

[Source: Reserved at 15 Ok Reg 3075, eff 7-15-98; Added at 16 Ok Reg 2290, eff 7-1-99; Amended at 35 Ok Reg 1050, eff 9-14-18]

165:56-3-3. Company contact names

Each reseller shall notify, in writing, the Director of the Public Utility Division and the Director of the Consumer Services Division within thirty (30) days of a change in the company-designated contacts for Public Utility Division and Consumer Services Division issues.

- (1) The update shall include the name(s), address(es) and/or telephone number(s) of the designated individual(s).
- (2) The contact name(s) provided pursuant to this subsection shall be the individual(s) primarily responsible for:
 - (A) Providing customer service;
 - (B) Repair and maintenance;
 - (C) Answering complaints;
 - (D) Authorizing and/or furnishing refunds to customers; and,
 - (E) Tariff issues.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98]

SUBCHAPTER 5. TARIFFS

165:56-5-1. Tariffs and/or Terms of Service required

(a) All resellers must file a tariff describing the services offered, the terms and conditions under which each of the services are provided and all effective rates and charges. Except as provided in this Subchapter, only those services contained in the reseller's tariff filed and approved by the Commission or Terms of Service may be provided to customers and only those rates and charges contained in the reseller's tariff on file with the Commission or Terms of Service may be charged to customers. The filed tariffs or Terms of Service are binding on the reseller and no deviation of any kind from the filed tariff or Terms of Service is permitted. Notwithstanding the foregoing and OAC 165:56-3-1(c)(8), a reseller, shall not be required to file a written tariff with the Commission.

(b) A reseller which has a written tariff on file with the Commission may withdraw the tariff if the reseller:

- (1) provides written notice to the Director of the Public Utility Division and the Oklahoma Attorney General, that it is withdrawing the tariff,
- (2) posts the Terms of Service, and

- (3) provides the Commission with the web page information where the language is posted.
- (c) The Commission maintains the same authority to review the Terms of Service, of a reseller, as permitted by OAC 165:56-5-5.
- (d) Failure to comply with this Section may result in the filing of a Motion to Cease and Desist and could result in revocation of the reseller's Certificate of Convenience and Necessity.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 15 Ok Reg 3075, eff 7-15-98; Amended at 16 Ok Reg 2290, eff 7-1-99; Amended at 19 Ok Reg 2000, eff 7-1-02; Amended at 35 Ok Reg 1050, eff 9-14-18]

165:56-5-2. Information to be included in tariffs

The tariff shall include the following information:

- (1) Table of contents.
- (2) Symbols for changes in tariff.
- (3) Applicability of the tariff.
- (4) Accessibility and availability of tariff. Each reseller shall, upon request by an end-user, provide a copy of any relevant portion of this Chapter, and/or the applicable portion of the requested tariff(s) to such customer, at a reasonable charge.
- (5) Detailed billing and collection information.
- (6) Detailed credit requirements and deposit information.
- (7) Detailed information regarding disconnection by reseller of customer/past due accounts.
- (8) Detailed information regarding handling of complaints and disputed charges.
- (9) All services provided by the reseller and a detailed explanation of each.
- (10) A schedule of all rates and charges applicable to services provided in Oklahoma.
- (11) Title sheet.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97; Amended at 20 Ok Reg 2316, eff 7-15-03]

165:56-5-3. Requirements as to size, form, and identification of tariffs

- (a) All tariffs shall be in loose leaf form of a size eight and one-half inches by eleven inches (8-1/2"× 11") and shall be plainly printed or reproduced on only one side of paper of good quality. The tariff shall be in the format presented in Appendix B to this Chapter. The front page of the tariff shall contain the name of the reseller, including all trade names under which the reseller is providing telecommunications service in the State of Oklahoma, and the location of its principal office.
- (b) Tariff sheets are to be numbered consecutively per schedule. Each sheet shall show the Cause Number, wherein the tariff was approved by the Commission, and, where applicable, the Order Number for such approval. Each sheet shall show an effective date, an issue date, a revision number, section number or title, sheet number, name of the reseller, along with all trade names used by the reseller in the State of Oklahoma, and the name of the tariff in a consistent manner. Sheets issued under new numbers are to be designated as original sheets. Sheets being revised should show the number of the revision, and the sheet numbers shall be the same.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97; Amended at 15 Ok Reg 3075, eff 7-15-98]

165:56-5-4. Symbols for changes

(a) Each reseller shall include in their tariff, notations indicating each change made with the proposed application revision. Notations (referred to as tariff symbols) to be used are:

- (1) (AT) means addition to text.
- (2) (C) means correction.
- (3) (CP) means change in practice.
- (4) (CR) means change in rate.
- (5) (CT) means change in text.
- (6) (DR) means discontinued rate.
- (7) (FC) means change in format lettering or numbering.
- (8) (MT) means moved text.
- (9) (NR) means new rate.
- (10) (RT) means removal of text.

(b) In addition to symbols for changes, each provision or rate element changed shall contain a vertical line which clearly shows the exact number of lines being changed.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 15 Ok Reg 3075, eff 7-15-98]

165:56-5-5. Revisions to tariffs

(a) Resold interexchange services are determined to be competitive.

(b) New or revised tariffs describing resold interexchange services shall have an effective date on or after the day following the day the submission is delivered to the Director of the Public Utility Division, subject to the following conditions:

- (1) The submission delivered to the Public Utility Division shall include a cover letter, a mark-up copy of the new or revised tariff pages in legislative format, and a final copy of the new or revised tariff pages.
- (2) The effective date of the new or revised tariff submitted to the Commission shall be stated on the face of the new or revised tariff pages.
- (3) A new or revised tariff submitted to the Commission shall comply with the notice requirements of OAC 165:56-5-12. A copy of the notice shall accompany the submission and shall include the date sent to customers.
- (4) The Commission may permit electronic submission of new or revised tariffs when technically feasible.

(c) Revisions to the Terms of Service on a reseller's website will become effective on the day following the day the revision is posted on the website, or as otherwise indicated on the website.

(d) After an investigation, the Public Utility Division may file an application with the Commission seeking to revoke or modify any tariff or Terms of Service. After notice and hearing, the Commission may issue an order revoking or modifying any tariff or Terms of Service for good cause.

(e) The burden of proof to show that a proposed or revised tariff or Terms of Service is just and reasonable shall be upon the company proposing the new or revised tariff or Terms of Service.

165:56-5-5.1. Confidential information related to tariffs

(a) With the exception of information and data related to the dollar and percentage impacts of the proposed change(s) on end-user rates and the rationale for the proposed tariffs, any additional financial or cost data, or data which is identifiable to a specific customer, that is requested by the Public Utility Division Staff shall be deemed confidential records or trade secrets of the reseller under the Oklahoma Open Records Act as provided for by 51 O.S. § 24A.22 and shall be kept confidential by the Commission, unless successfully challenged.

(b) All confidential information and data submitted to the Public Utility Division Staff under subsection (a) of this Section shall be conspicuously labeled "Confidential information and data submitted pursuant to OAC 165:56-5-5.1".

(c) For each tariff filing submitted by a reseller in accordance with OAC 165:56-5-5, the same confidential information and data provided to the Public Utility Division Staff shall also be provided to the Office of the Attorney General upon the signing of a Proprietary Agreement by the Attorney General or its representative.

(d) All confidential information and data provided to the Office of the Attorney General of the State of Oklahoma under subsection (c) of this Section shall be conspicuously labeled "Confidential information and data submitted pursuant to OAC 165:56-5-5.1."

[Source: Added at 15 Ok Reg 3075, eff 7-15-98]

165:56-5-5.2. Competitive services [REVOKED]

[Source: Added at 16 Ok Reg 2290, eff 7-1-99; Amended at 19 Ok Reg 2000, eff 7-1-02; Revoked at 21 Ok Reg 2123, eff 7-1-04]

165:56-5-5.3. Name changes and/or trade name additions

Tariff revisions to reflect a change to the name and/or change, deletion or addition of a trade name under which the reseller will be doing business in the State of Oklahoma shall become effective, without Commission order, the date of filing such tariffs, provided the filing contains the attestation required by paragraph (5) of this Section. The request for name change or request for change, addition, or deletion of a trade name shall be accompanied by the following, as applicable:

- (1) An amended Certificate of Incorporation effecting a change of name pursuant to 18 O.S. § 1076, 1077 or 1031;
- (2) A Trade Name Report filed with the Secretary of State as provided in 18 O.S. § 1140;
- (3) A Withdrawal of Trade Name Report filed with the Secretary of State as provided in 18 O.S. § 1140.1;
- (4) A Transfer of Trade Name Report filed with the Secretary of State as provided in 18 O.S. § 1140.2; and,
- (5) An attestation that the tariffs are identical to the existing tariffs of the reseller except for the name change or change, addition or deletion of a trade name.

[Source: Added at 16 Ok Reg 2290, eff 7-1-99]

165:56-5-6. Suspension

(a) Any tariff filed with the Commission pursuant to OAC 165:56-5-5 may be suspended by Commission order, with or without notice or hearing, upon recommendation by the Commission Staff. The Commission may also order suspension of proposed revisions on motion by an aggrieved party, after notice and hearing.

(b) To lift the suspension of any filing made by a reseller pursuant to this Chapter, whether the application has been subsequently amended after the suspension or not:

(1) The applicant shall file a motion pursuant to OAC 165:5-9-2(b), which requests that the suspension be lifted, giving notice to the Attorney General of the State of Oklahoma and to all parties of record; or,

(2) The application may be set for hearing on the merits at a time to be agreed upon by the Public Utility Division and the applicant.

(c) If the application is scheduled for hearing pursuant to paragraph (b)(2) of this Section and the time for filing an objection to the amended filing has not elapsed, the Notice of Hearing shall be sent to the Attorney General of the State of Oklahoma and to any party(ies) of record.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 15 Ok Reg 3075, eff 7-15-98]

165:56-5-7. Objections

Any entity wishing to object to the proposed tariff change, new service offering or revision filed pursuant to this Chapter may file objections with the Commission's Court Clerk's office within fifteen (15) days after the proposed tariff is filed. Any such objection shall comply with the requirements of the Commission's Rules of Practice and this Chapter, and must contain a specific description of the basis for the objection and all information necessary to allow evaluation of the objection. The objecting entity shall promptly serve its objection on the reseller which filed the proposed tariff changes or new service offering, the Director of the Public Utility Division and the State Attorney General.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-5-8. Conflict with filed tariffs

All tariffs heretofore filed by a reseller and approved by the Commission are not revoked, altered or amended by this Chapter, except to the extent they are in direct conflict with any provision of this Chapter, in which event such tariffs are superseded by this Chapter to the extent of conflict only.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-5-9. Promotional offerings

(a) Resellers may offer Promotional rates and/or terms and conditions of services for any purpose. Promotional offerings are not intended to replace any obligation of a reseller to submit tariffs or to post the Terms of Service.

(b) Resellers must maintain a log of all current promotional offerings and shall provide the log to the Commission upon request.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97; Amended at 16 Ok Reg 2290, eff 7-1-99; Amended at 19 Ok Reg 2000, eff 7-1-02; Amended at 26 Ok Reg 1137, eff 7-1-09; Amended at 35 Ok Reg 1050, eff 9-14-18]

165:56-5-12. Type of notices

End-user notice of rate increase. Prior to or concurrent with the effective date of any increased rate to a residential customer, for a service determined to be competitive, each reseller, shall provide notice to the affected end-users of the rate increase. The notice shall be provided by any of the following:

(1) Prominent display on the end-user's bill;

(2) Direct mailing;

(3) Prominent display on an insert in the end-user's bill; or,

(4) Any other method approved by the Director of the Public Utility Division.

[Source: Added at 16 Ok Reg 2290, eff 7-1-99; Amended at 17 Ok Reg 20, eff 9-27-99 (emergency); Amended at 17 Ok Reg 2333, eff 7-1-00; Amended at 35 Ok Reg 1050, eff 9-14-18]

165:56-5-13. Flow through of net reductions in access charges

(a) All net reductions to billings to resellers directly resulting from flow through of access charge rate reductions received by IXCs, which are ordered by State statute and/or the Commission, shall be flowed through to customers by resellers in a manner approved by the Commission.

(b) The application/notice to flow through net reductions in billings from IXCs to resellers, directly resulting from flow through of access charge rate reductions by IXCs pursuant to OAC 165:55-5-12.1, shall be filed thirty (30) days after the effective date of the IXC's tariff. Such reduction shall be effective the same date as the IXCs tariffs reflecting the reduction was effective. Upon request, the Director of the Public Utility Division may extend the filing period an additional thirty (30) days.

[Source: Added at 16 Ok Reg 2290, eff 7-1-99]

SUBCHAPTER 7. RECORD REQUIREMENTS

165:56-7-1. Who shall file

The record keeping, reporting, and filing requirements listed in this Chapter shall apply to all resellers operating in the State of Oklahoma.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-7-2. Location of records

All records required by this Chapter shall be kept at a location which has been identified to the Commission's Director of the Public Utility Division. The records required by this Chapter shall be made available to the Commission or its authorized representative at any reasonable time upon request.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-7-3. Retention of records

All records required by this Chapter shall be preserved for two (2) years.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

165:56-7-4. Records to be provided to the Commission

(a) **Annual report.** Not later than April 1 of the year following the reporting year, each reseller shall provide to the Director of the Public Utility Division an annual report, in the format developed by the Director of the Public Utility Division and approved by the Commission after notice and hearing. The Oklahoma annual report will contain only Oklahoma operations.

(b) **Other information.** Each reseller shall promptly furnish such other information as the Commission Staff may request, unless otherwise ordered by the Commission.

(c) **Contact names.** Each reseller shall notify, in writing, the Director of the Public Utility Division and the Director of the Consumer Services Division within thirty (30) days of a change in the company-designated contacts for Public Utility Division and Consumer Services Division issues. If the below information is

unavailable, the reseller may seek a waiver from the PUD Director by making a request in writing.

- (1) The update shall include the name(s), address(es) and/or telephone number(s) of the designated individual(s).
- (2) The contact name(s) provided pursuant to this subsection shall be the individual(s) primarily responsible for:
 - (A) Providing customer service;
 - (B) Repair and maintenance;
 - (C) Answering complaints;
 - (D) Authorizing and/or furnishing refunds to customers;
 - (E) Tariff issues;
 - (F) Billing inquiries;
 - (G) Regulatory matters;
 - (H) Oklahoma Universal Service Fund (and Monthly Payout, Fee Assessment, Requests for Funding, if different);
 - (I) PUD Fee Assessment (and Fee Assessment Payments, if different);
 - (J) Primary emergency;
 - (K) Afterhours emergency;
 - (L) Annual reporting;
 - (M) Attorney for regulatory matters; and
 - (N) Community Liaison.

(d) **Other information.** Each reseller shall promptly furnish such other information as PUD or the Commission may request, unless otherwise ordered by the Commission.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97; Amended at 16 Ok Reg 2290, eff 7-1-99; Amended at 36 Ok Reg 711, eff 7-25-19]

165:56-7-5. Record of customer complaints

- (a) Each reseller shall maintain a record of customer complaints that compiles complaints that have been received by the company and includes, at a minimum:
- (1) The customer name;
 - (2) The account number;
 - (3) The applicable complaint code;
 - (4) The date the complaint was filed; and,
 - (5) The resolution of the complaint, to include the amount of refund, if any, given.
- (b) If the account number only is utilized, a cross reference with the end-user's name must also be readily available.
- (c) The categories of complaints to be used shall be negotiated between the individual reseller and the Director of the Consumer Services Division, subject to the approval of the Commission. A list of the suggested customer complaint codes is attached as Appendix H to this Chapter.
- (d) Each complaint shall count as a separate report regardless of whether subsequent reports relate to the same physical defect, difficulty, or dissatisfaction with the provision of the reseller's regulated services.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97; Amended at 15 Ok Reg 3075, eff 7-15-98]

165:56-7-6. Report attestation

All reports required by this Chapter to be submitted to the Commission shall be attested to by an officer or manager of the reseller under whose direction the report is prepared, or if under trust or receivership, by the receiver or a duly authorized person, or if not incorporated, by the proprietor, manager, superintendent, or other official in charge of the reseller's operation.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95]

SUBCHAPTER 9. SUSPENSION AND DISCONNECTION

165:56-9-1. Billing disputes [REVOKED]

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97; Revoked at 15 Ok Reg 3075, eff 7-15-98]

165:56-9-2. Deposits and interest [REVOKED]

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Revoked at 15 Ok Reg 3075, eff 7-15-98]

165:56-9-3. Denial or termination of service after notice [REVOKED]

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 14 Ok Reg 2855, eff 7-15-97; Revoked at 15 Ok Reg 3075, eff 7-15-98]

165:56-9-4. Notice of Disconnection and Notice of Suspension

(a) When service to an end-user is to be disconnected for nonpayment of a bill for telephone service after service has been suspended or failure to make a security deposit after a reasonable time, the Reseller shall give at least ten (10) days notice of the Reseller's intent to discontinue service. Said notice shall be given by the Reseller as follows:

- (1) mailed or delivered to the end-user's billing address;
- (2) electronically via the internet to the email address provided by the end-user; or
- (3) telephonically to the end-user's assigned telephone number or other number provided by the end-user;

(b) If the mailed notice is returned from that address as undeliverable, the notice may be delivered to the premises at which the service was rendered. Mailed notice will be deemed given to the end-user three (3) business days after mailing by the Reseller.

(c) If electronic notice is returned from the email address as undeliverable, the Reseller shall give notice to the end-user using an alternative method as listed above. If the electronic notice is not returned, notice shall be deemed given to the end-user on the date the email was sent.

(d) If telephonic notice is not confirmed to have reached the end-user's telephone number, the Reseller shall give notice to the end-user using an alternative method as listed above. If confirmation of telephonic notice is obtained by the Reseller, notice shall be deemed given to the end-user on the date the telephonic notice as confirmed as given.

(e) Unless a dangerous condition exists or the end-user requests disconnection, a Reseller may suspend or disconnect service only on the date specified in the notice or within thirty (30) days thereafter, during regular business hours, so long as the suspension or disconnection does not occur within the last two (2) hours of the business day, nor shall service be disconnected on a holiday, nor after noon (12:00 p.m.) on Fridays until Monday morning.

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Amended at 18 Ok Reg 2437, eff 7-1-01; Amended at 26 Ok Reg 1137, eff 7-1-09]

165:56-9-4.1. Suspension or disconnection for reasons other than nonpayment

- (a) Unless otherwise provided in this Chapter, service to an end-user may be suspended or disconnected only upon order of the Commission after notice and hearing. Prior to the merit hearing, the Commission may order suspension or disconnection of service for good cause with or without notice to the end-user.
- (b) End-users that communicate with the Reseller's employee(s) in any manner that is reasonably expected to frighten, abuse, torment, or harass such employee(s) or engage in actions reasonably construed as threat(s) against the Reseller's physical assets are subject to immediate disconnection, without notice. A Reseller that disconnects an end-user's service under this section will:
- (1) provide written or verbal notice to the Consumer Services Division of the disconnect action prior to the actual disconnect;
 - (2) within three (3) business days of the actual disconnect, provide a written description of the circumstances leading to the disconnect action; and
 - (3) give the customer written notice, which will include an address and telephone number, for the Consumer Services Division.
- (c) The Consumer Services Division may, after an informal inquiry and review of the written description of the circumstances leading to the disconnect action, direct the Reseller to restore services to the affected end-user and / or file an application with the Commission requesting a finding of contempt and the imposition of a fine or other penalty against a Reseller that unreasonably suspends or disconnects an end-user pursuant to subsection (b) of this section.

[Source: Added at 26 Ok Reg 1137, eff 7-1-09]

165:56-9-4.2. Notice of Disconnection or Notice of Suspension requirements

- (a) A notice of disconnection or notice of suspension shall contain the following information:
- (1) The words "NOTICE OF DISCONNECTION" or "NOTICE OF SUSPENSION" or words with the same meaning, in print type larger than the print type of the notice text.
 - (2) Name, address, and telephone number of customer.
 - (3) Statement of reason for the proposed disconnection or suspension of service.
 - (4) The date on or after which service will be disconnected or suspended unless appropriate action is taken.
 - (5) The telephone number of the Reseller where the customer may make an inquiry.
 - (6) Charges and procedures for reconnection or approved charges and procedures to avoid suspension.
 - (7) The address and telephone number of the Commission's Consumer Services Division in print size which is smaller than the print size used for the Reseller's telephone number.
 - (8) A statement that the end-user must contact the Reseller regarding the disconnection or suspension, prior to contacting the Commission's Consumer Services Division.
 - (9) Notice of suspension of service relating to past-due amounts shall inform the end-user that the total amount due may include charges for non-deniable and/or not regulated services which would not cause interruption

of local service. The notice must indicate a toll-free telephone number of a service center where questions can be referred and payment arrangements made.

(b) The Reseller shall not be required to give the written notice provided for in this Section in situations where the Reseller has evidence of fraudulent or illegal use of the Reseller's services, which if allowed to continue, would present a high risk of financial loss to the Reseller.

(c) The following additional information shall be in the notice unless said information can be obtained in the telephone directory and the notice refers the end-user to the location in the directory where the information can be obtained:

(1) A statement of how an end-user may avoid the disconnection of service or suspension of service, including a statement that the end-user must notify the reseller on the day of payment as to the place and method of such payment when the bill is paid at a place other than the office of the reseller.

(2) A statement that informs the end-user where payments may be made or how to obtain a listing of authorized payment agencies.

(d) Notice of disconnection and/or notice of suspension shall be received via the United States mail, unless the end-user agrees with the Reseller to receive a bill through different means.

165:56-9-5. Notification when reseller withdraws from business [REVOKED]

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Revoked at 15 Ok Reg 3075, eff 7-15-98]

165:56-9-6. Notification of merger or acquisition [REVOKED]

[Source: Added at 12 Ok Reg 2147, eff 7-1-95; Revoked at 15 Ok Reg 3075, eff 7-15-98]

SUBCHAPTER 10. CUSTOMER BILLING AND DEPOSITS

PART 1. BILLING AND PAYMENT REQUIREMENTS

165:56-10-1. Billing period

Bills to end-users shall be issued monthly, unless the reseller's approved terms and conditions of service prescribe a different interval. Bills may be issued on a billing cycle. All end-users shall receive their bills via the United States mail, unless the end-user agrees with the reseller to receive a bill through different means, such as electronically via the Internet. Whatever the method of delivery, bills shall comply with 165:56-10-2.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98; Amended at 18 Ok Reg 2437, eff 7-1-01]

165:56-10-1.1. Request for payments other than normal billings

The reseller shall issue a bill for any additional charges other than those charges normally billed on the regular billing cycle. The reseller shall not issue a notice of disconnection prior to five days after the mailing of a bill for additional charges. Additional billings could include but are not limited to:

- (1) New or additional deposits.
- (2) High toll charges.
- (3) Other advance payments.

[Source: Added at 16 Ok Reg 2290, eff 7-1-99]

165:56-10-2. Content of bills

(a) **Bill organization.** Telephone bills shall be clearly organized, and must comply with the following requirements:

- (1) The name of the service provider associated with each charge must be clearly and conspicuously identified on the telephone bill.
- (2) Where charges for two or more service providers appear on the same telephone bill, the charges must be separated by service provider.
- (3) The telephone bill must clearly and conspicuously identify any change in the service provider, including identification of charges from any new service provider.
- (4) The telephone bill shall clearly and conspicuously label all fees, surcharges, taxes, and usage rates, associated with the customer's use of the provider's service, including but not limited to, calling plans, universal service fees, access fees, and other separated charges.

(b) **Descriptions of billed charges.** Charges contained on telephone bills must be accompanied by a brief, clear, non-misleading, plain language description of the service or services rendered. The description must be sufficiently clear in presentation and specific enough in content so that end-users can accurately assess that the services for which they are billed correspond to those that they have requested and received, and that the costs assessed for those services conform to their understanding of the price charged.

(c) **Quantification of billed charges.** All bills shall also contain the following:

- (1) Balance in each billed account at the beginning of the current billing cycle, using a term such as "previous balance";
- (2) Amount of the charges debited to each billed account during the current billing cycle, using a term such as "current service";
- (3) Amount of payments made to each billed account from the previous billing cycle, using a term such as "payments";
- (4) Amount of the charges debited to each billed account during the current billing cycle for untimely payment of past charges, using a term such as "late charge";
- (5) A listing of the closing dates of the current billing cycle and the outstanding balance in each billed account on that date, specifying the "current amount due" and the "past due";
- (6) A listing of the statement, or payment, due date.

(d) **Deniable and non-deniable charges.** Where a bill contains charges for basic local service, in addition to other charges, the bill must distinguish between charges for which nonpayment will result in disconnection of basic local service, and charges for which nonpayment will not result in such disconnection. The carrier must explain this distinction to the end-user and must clearly and conspicuously identify on the bill those charges for which nonpayment will not result in disconnection of basic local service. Carriers may also elect to devise other methods of informing end-users on the bill that they may contest charges prior to payment.

(e) **Disclosure of inquiry contacts.**

- (1) Billing agents shall prominently display, a toll-free number or numbers by which end-users may inquire or dispute any charges on each bill. Where the end-user does not receive a paper copy of his or her telephone bill, but instead accesses that bill only by e-mail or internet, the carrier may comply with this requirement by providing an e-mail or web site address on each

bill. Each carrier must make a business address available upon request from an end-user.

(2) A reseller may list a toll-free number for itself, a clearinghouse, or other third party, provided such party possesses sufficient information to answer questions concerning the end-user's account and is fully authorized to resolve the end-user's complaints on the service provider's behalf.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98; Amended at 18 Ok Reg 2437, eff 7-1-01]

165:56-10-3. Bills rendered by a billing agent

(a) A reseller shall not act as a billing agent for an OSP, IXC, telecommunications service provider or another reseller, unless the reseller fully discloses on the bill the toll-free number of the certificated entity for whom the bill is being rendered or, if the billing agent has been given authority to make adjustments to the customer's bill, its toll-free number.

(b) A reseller shall not utilize the services of a billing agent unless the reseller requires that the billing agent follow the procedures set forth in OAC 165:56-10-1 through OAC 165:56-10-7 and OAC 165:56-10-11.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98]

165:56-10-4. Due date and penalty

Unless otherwise authorized by the Commission, bills shall be payable immediately upon receipt and past due twelve (12) days after the date of the reseller mailing, or after any deferred payment date previously established either by oral or written agreement between an end-user and the reseller. The date after which the bill is past due shall be stated on the bill. If the bill is not paid when past due, the reseller may apply late payment charges on any unpaid balance for regulated telecommunications services as provided in its filed, approved tariffs. Payment shall not be considered late if it is received by the due date at an authorized office.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98; Amended at 18 Ok Reg 2437, eff 7-1-01]

165:56-10-5. [RESERVED]

[Source: Reserved at 15 Ok Reg 3075, eff 7-15-98]

165:56-10-6. Billing disputes

(a) In the event of a dispute between a customer and a reseller regarding charges billed by the reseller, the reseller shall investigate the particular case and report the results thereof to the customer. During the period that the disputed amount is under investigation, the reseller shall not pursue any collection procedures or assess late fees with regard to the disputed amount. The customer shall be required to pay the undisputed part of the bill, and if not paid, the reseller may discontinue service.

(b) In the event the dispute is not resolved, the reseller shall inform the customer that the customer may utilize the complaint procedures of the Commission's Consumer Services Division. The information to be provided to consumers shall be:

(1) The street address of the Consumer Services Division, which is Oklahoma Corporation Commission, Consumer Services Division, 2101 N. Lincoln Blvd. Suite 460, Oklahoma City, OK 73105.

(2) The mailing address of the Consumer Services Division, which is P. O. Box 52000, Oklahoma City, OK 73152-2000.

(3) The telephone numbers of the Consumer Services Division, which are (405) 521-2331 and (800) 522-8154.

(4) The hours of operation of the Consumer Services Division, which are 8:00 a.m. to 4:30 p.m. Monday through Friday.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98; Amended at 19 Ok Reg 2000, eff 7-1-02]

165:56-10-7. Refunds for service interruptions

Whenever service to any customer is inoperative, other than by reason of negligence, or willful act of the customer, or causes beyond the control of the reseller, and the service remains inoperative for more than twenty-four (24) consecutive hours after being reported by the customer or having been found to be interrupted by the reseller, the reseller shall refund, upon request of the customer, the prorated part of that month's monthly charge(s) for the period of days during which the telephone service was not provided. Credit shall be identified on the bill. The maximum credit during a single billing period shall not exceed the amount of toll charges and monthly recurring charges. The refund may be accomplished by a credit on the next bill. The reseller shall have no other liability for service interruptions.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98]

PART 3. DEPOSITS AND INTEREST

165:56-10-11. Deposits and interest

(a) Each reseller shall prepare and submit a plan containing criteria for deposits to the Commission for approval. The plan shall include criteria for residential and nonresidential consumers with residential being defined in each reseller's tariffs.

(1) The residential plan shall conform to all subsections of this Section.

(2) The nonresidential plan shall conform to all subsections of this Section except for (b), (c), (d), and (k).

(b) No reseller shall require a deposit of a residential customer who has received the same or similar type of classification of service for twelve (12) consecutive months and to whom service was not terminated for nonpayment nor was payment late more than twice nor was a check for payment dishonored. The twelve (12) months service period shall have been within eighteen (18) months prior to the application for new service. The reseller plan may establish other relevant criteria which will qualify the customer for nonpayment of a deposit.

(c) The amount of the deposit shall not exceed an amount equal to two (2) months toll charges determined by actual or anticipated usage. The reseller plan may allow customers to pay deposits in installments.

(1) Upon written request by the customer, after a period of four (4) consecutive months during which time the average amount of toll charges is shown to have decreased by fifty percent (50%) or more, the reseller shall re-evaluate the amount of the deposit in order to determine if the original deposit amount continues to be consistent with the guidelines set forth in this Section.

(2) The amount of the deposit shall be reduced to an amount which is consistent with the deposit guidelines set forth in this Section.

(3) Any excess amount of the deposit resulting from the reduction required in paragraph (2) of this subsection shall be refunded to the customer.

(d) A present customer may be required to post a deposit as a condition of continued service if undisputed charges have become delinquent, with delinquent meaning a payment not received on or before the due date as posted on the bill, in two (2) out of the last twelve (12) billing periods or if the customer has had service disconnected during the last twelve (12) months pursuant to 165:56-12-2 or has presented a check subsequently dishonored.

(e) Interest on cash deposits shall be paid by each reseller at no less than the rate calculated as follows:

(1) For all consumer deposits returned more than thirty (30) days after receipt of the deposit, the interest rate shall be established the first day of January on each year to equal the average of the weekly percent annual yields on one (1) year U.S. Treasury Securities for September, October, and November of the preceding year. The interest rate shall be rounded to the nearest basis point.

(2) Provided, however, that after the interest rate is initially established pursuant to this subsection, the interest rate(s) shall not change unless the application of the formula in (e)(1) results in a change in interest rate(s) that is/are greater than fifty (50) basis points.

(3) The Director of the Public Utility Division shall calculate the interest rate(s) pursuant to (e)(1) of this Section, and shall provide notice to the resellers via mail, e-mail or posting on the Commission's website by December 15th of each year, pursuant to subsection (e); otherwise the current interest rate(s) will remain in effect.

(f) If refund of a deposit is made within thirty (30) days of receipt of deposit, no interest payment is required. If the reseller retains the deposit more than thirty (30) days, payment of interest shall be made retroactive to the date of deposit. No interest shall accrue on a deposit after discontinuance of service.

(g) The reseller shall provide payment of accrued interest for all customers annually by negotiable instrument or by credit against current billing.

(h) The deposit shall cease to draw interest on the date it is returned or credited to the customer's account.

(i) The amount of the deposit, with accrued interest, shall be applied to any unpaid charges at the time of a discontinuance of services. The balance, if any, shall be returned to the customer within thirty (30) days after settlement of the customer's account, either in person or by mailing it to the customer's last known address.

(j) If service is not connected, or after disconnection of service, the reseller shall promptly and automatically refund the customer's deposit plus accrued interest on the balance, if any, in excess of the unpaid bills for service furnished. A transfer of service from one (1) premise to another within the reseller's service area shall not be deemed a disconnection within the meaning of this Chapter, and no additional deposit may be required unless otherwise permitted by this Subchapter.

(k) The reseller shall automatically refund the deposit for residential service, with accrued interest, after twelve (12) months' satisfactory payment of undisputed charges and where payment was not late more than twice; provided, however, that service has not been disconnected within the twelve (12) month period. Payment of a charge shall be deemed satisfactory if received on or prior to the date the bill is due. Payment of a charge shall be deemed not satisfactory if made by a check subsequently dishonored. If the customer does not meet these refund criteria, the deposit and interest may be retained in accordance with subsection (d) of this Section.

- (l) The reseller may withhold refund or return of the deposit, pending the resolution of a dispute with respect to charges secured by the deposit.
- (m) The reseller shall keep records to show:
- (1) The name, account number, and address of each depositor.
 - (2) The amount and date of the deposit.
 - (3) Each transaction concerning the deposit.
- (n) The reseller shall issue a receipt of deposit to each applicant from whom a deposit is received and shall provide means whereby a depositor may establish claim if the receipt is lost.
- (o) Such records shall be retained for two (2) years after deposit and/or interest is refunded or applied.
- (p) Upon the sale or transfer of any reseller or operating units thereof, the seller shall file, with the application of transfer, a verified list of the information in subsection (m) of this Section, and the unpaid interest thereon. The information provided shall be treated as confidential and shall not be available for public inspection unless ordered by the Commission after notice and hearing.
- (q) The deposit made by the customer with the reseller at the time of application for service shall not constitute an advance payment to cover service bills, but for all purposes it is to be considered as security for the payment of monthly bills or other proper charges.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98; Amended at 16 Ok Reg 2290, eff 7-1-99; Amended at 35 Ok Reg 1050, eff 9-14-18]

SUBCHAPTER 11. UNLAWFUL PRACTICES

PART 1. SLAMMING

165:56-11-1. Slamming

Slamming is prohibited.

[Source: Added at 14 Ok Reg 2855, eff 7-15-97; Amended at 15 Ok Reg 3075, eff 7-15-98; Amended at 16 Ok Reg 2290, eff 7-1-99; Amended at 18 Ok Reg 2437, eff 7-1-01]

165:56-11-1.1. Verification of orders for telecommunications service

(a) No telecommunications carrier shall submit or execute a change on the behalf of an end-user in the end-user's selection of a provider of telecommunications service except in accordance with the procedures prescribed in Part 1 of this Subchapter.

(1) **Requirement for submission of changes of provider.** No submitting carrier shall submit a change on the behalf of an end-user in the end-user's selection of a provider of telecommunications service prior to obtaining:

(A) Authorization from the end-user, and

(B) Verification of that authorization in accordance with the procedures prescribed in this Section. The submitting carrier shall maintain and preserve records of verification of end-user authorization for a minimum period of two years after obtaining such verification.

(2) **Executing carriers shall not verify changes of provider.** An executing carrier shall not verify the submission of a change in an end-user's selection of a provider of telecommunications service received from a submitting carrier. For an executing carrier, compliance with the procedures described in Part 1 of this Chapter shall be defined as prompt execution, without any unreasonable delay, of changes that have been verified by a submitting

carrier.

(3) Exclusion of commercial mobile radio services providers.

Commercial mobile radio services (CMRS) providers shall be excluded from the verification requirements of this Section as long as they are not required to provide equal access to common carriers for the provision of telephone toll services, in accordance with 47 U.S.C. § 332(c)(8).

(b) Requirement for separate verification for each type of service. Where a telecommunications carrier is selling more than one type of telecommunications service (*e.g.*, intraLATA/intrastate toll, interLATA/interstate toll, and international toll) that carrier must obtain separate authorization from the end-user for each service sold, although the authorizations may be made within the same solicitation. Each authorization must be verified separately from any other authorizations obtained in the same solicitation. Each authorization must be verified in accordance with the verification procedures prescribed in Part 1 of this Subchapter.

(c) Requirement for confirmation of change order. No telecommunications carrier shall submit a preferred carrier change order unless and until the order has been confirmed in accordance with one of the following procedures:

(1) **Written authorization.** The telecommunications carrier has obtained the end-user's written authorization in a form that meets the requirements of 165:56-11-1.2; or

(2) **Electronic authorization.** The telecommunications carrier has obtained the end-user's electronic authorization to submit the preferred carrier change order. Such authorization must be placed from the telephone number(s) on which the preferred carrier is to be changed and must confirm the information in (c)1 of this Section. Telecommunications carriers electing to confirm sales electronically shall establish one or more toll-free telephone numbers exclusively for that purpose. Calls to the number(s) will connect an end-user to a voice response unit, or similar mechanism, that records the required information regarding the preferred carrier change, including automatically recording the originating automatic number identification; or

(3) **Third-party authorization.** An appropriately qualified independent third party has obtained the end-user's oral authorization to submit the preferred carrier change order that confirms and includes appropriate verification data (*e.g.* the end-user's date of birth or social security number). The independent third party must not be owned, managed, controlled, or directed by the carrier or the carrier's marketing agent; must not have any financial incentive to confirm preferred carrier change orders for the carrier or the carrier's marketing agent; and must operate in a location physically separate from the carrier or the carrier's marketing agent. The content of the verification must include clear and conspicuous confirmation that the end-user has authorized a preferred carrier change.

(d) Submission of carrier changes to executing carriers.

(1) Preferred carrier change orders submitted by resellers to an executing carrier other than through an electronic change order processing system must contain the customer name, telephone number to be changed, and a contact name and number for the submitting carrier. Failure of the submitting carrier to include the above information will relieve the executing carrier from complying with OAC 165:56-11-1.4(a).

(2) Preferred carrier change orders submitted by resellers to executing carriers through an electronic change order processing system must be

submitted in the industry recognized standards established by the Alliance for Telecommunications Industry Solution (ATIS) Ordering and Billing Forum (OBF).

[Source: Added at 18 Ok Reg 2437, eff 7-1-01; Amended at 19 Ok Reg 2000, eff 7-1-02]

165:56-11-1.2. Letter of agency form and content

- (a) A telecommunications carrier may use a letter of agency to obtain written authorization and/or verification of an end-user's request to change his or her preferred carrier selection. A letter of agency that does not conform with this Section is invalid for purposes of Part 1 of this Subchapter.
- (b) The letter of agency shall be a separate document (or an easily separable document) containing only the authorizing language described in (e) of this Section having the sole purpose of authorizing a telecommunications carrier to initiate a preferred carrier change. The letter of agency must be signed and dated by the end-user to the telephone line(s) requesting the preferred carrier change.
- (c) The letter of agency shall not be combined on the same document with inducements of any kind.
- (d) Notwithstanding (b) and (c) of this Section, the letter of agency may be combined with checks that contain only the required letter of agency language as prescribed in (e) of this Section and the necessary information to make the check a negotiable instrument. The letter of agency check shall not contain any promotional language or material. The letter of agency check shall contain in easily readable, bold-face type on the front of the check, a notice that the end-user is authorizing a preferred carrier change by signing the check. The letter of agency language shall be placed near the signature line on the back of the check.
- (e) At a minimum, the letter of agency must be printed with a type of sufficient size and readable type to be clearly legible and must contain clear and unambiguous language that confirms:
 - (1) The end-user's billing name and address and each telephone number to be covered by the preferred carrier change order;
 - (2) The decision to change the preferred carrier from the current telecommunications carrier to the soliciting telecommunications carrier;
 - (3) That the end-user designates [insert the name of the submitting carrier] to act as the end-user's agent for the preferred carrier change;
 - (4) That the end-user understands that only one telecommunications carrier may be designated as the end-user's interstate or interLATA preferred interexchange carrier for any one telephone number. To the extent the jurisdiction allows the selection of additional preferred carriers (e.g., intraLATA/intrastate toll, interLATA/interstate toll, or international interexchange) the letter of agency must contain separate statements regarding those choices, although a separate letter of agency for each choice is not necessary; and
 - (5) That the end-user understands that any preferred carrier selection the end-user chooses may involve a charge to the end-user for changing the end-user's preferred carrier.
- (f) Any carrier designated in a letter of agency as a preferred carrier must be the carrier directly setting the rates for the end-user.
- (g) Letters of agency shall not suggest or require that an end-user take some action in order to retain the end-user's current telecommunications carrier.
- (h) If any portion of a letter of agency is translated into another language then all portions of the letter of agency must be translated into that language. Every letter of

agency must be translated into the same language as any promotional materials, oral descriptions or instructions provided with the letter of agency.

[Source: Added at 18 Ok Reg 2437, eff 7-1-01]

165:56-11-1.3. Carrier liability for slamming

(a) **Carrier liability for charges.** Any submitting telecommunications carrier that fails to comply with the procedures prescribed in Part 1 of this Subchapter shall be liable to the end-user's properly authorized carrier in an amount equal to 150% of all charges paid to the submitting telecommunications carrier by such end-user after such violation, as well as for additional amounts as prescribed in 165:56-11-1.6. The remedies provided in Part 1 of this Subchapter are in addition to any other remedies available by law.

(b) **End-user liability for charges.** Any end-user whose selection of telecommunications services provider is changed without authorization verified in accordance with the procedures set in Part 1 of this Subchapter is liable for charges as follows:

- (1) If the end-user has not already paid charges to the unauthorized carrier, the end-user is absolved of liability for charges imposed by the unauthorized carrier for service provided during the first 30 days after the unauthorized change. Upon being informed by an end-user that an unauthorized change has occurred, the authorized carrier, the unauthorized carrier, or the executing carrier shall inform the end-user of this 30-day absolution period. Any charges imposed by the unauthorized carrier on the end-user for service provided after this 30-day period shall be paid by the end-user to the authorized carrier at the rates the end-user was paying to the authorized carrier at the time of the unauthorized change in accordance with the provisions of 165:56-11-1.5(e).
- (2) If the end-user has already paid charges to the unauthorized carrier, and the authorized carrier receives payment from the unauthorized carrier as provided for in 165:56-11-1.2(a), the authorized carrier shall refund or credit to the end-user any amounts determined in accordance with the provisions of 165:56-11-1.5(c).
- (3) If the end-user has been absolved of liability as prescribed by this Section, the unauthorized carrier shall also be liable to the end-user for any charge required to return the end-user to his or her properly authorized carrier, if applicable.

[Source: Added at 18 Ok Reg 2437, eff 7-1-01]

165:56-11-1.4. Procedures for resolution of unauthorized changes in preferred carrier

(a) **Notification of alleged unauthorized carrier change.** Executing carriers who are informed of an unauthorized carrier change by an end-user must immediately notify both the authorized and allegedly unauthorized carrier of the incident. This notification must include the identity of both carriers.

(b) **Referral of complaint.** Any carrier, executing, authorized, or allegedly unauthorized, that is informed by an end-user or an executing carrier of an unauthorized carrier change shall direct that end-user to the Commission for resolution of the complaint.

(c) **Notification of receipt of complaint.** Upon receipt of an unauthorized carrier change complaint, the Commission will notify the allegedly unauthorized carrier of the complaint and order that the carrier remove all unpaid charges for the first 30

days after the slam from the end-user's bill pending a determination of whether an unauthorized change, as defined by 165:56-1-4, has occurred, if it has not already done so.

(d) **Proof of verification.** Not more than 30 days after notification of the complaint, or such lesser time as is required by the Commission, the alleged unauthorized carrier shall provide to the Commission a copy of any valid proof of verification of the carrier change. This proof of verification must contain clear and convincing evidence of a valid authorized carrier change, as that term is defined in 165:56-11-1.4 and 165:56-11-1.5. The Commission will determine whether an unauthorized change, as defined by 165:56-1-4, has occurred using such proof and any evidence supplied by the end-user. Failure by the carrier to respond or provide proof of verification will be presumed to be clear and convincing evidence of a violation.

[Source: Added at 18 Ok Reg 2437, eff 7-1-01]

165:56-11-1.5. Absolution procedures where the end-user has not paid charges

(a) **Applicability.** This Section shall only apply after an end-user has determined that an unauthorized change, as defined by 165:56-1-4, has occurred and the end-user has not paid charges to the allegedly unauthorized carrier for service provided for 30 days, or a portion thereof, after the unauthorized change occurred.

(b) **Removal of charges for the first 30 days.** An allegedly unauthorized carrier shall remove all charges incurred for service provided during the first 30 days after the alleged unauthorized change occurred, as defined by 165:56-1-4, from an end-user's bill upon notification that such unauthorized change is alleged to have occurred.

(c) **Challenging an end-user's allegation of unauthorized charges.** An allegedly unauthorized carrier may challenge an end-user's allegation that an unauthorized change, as defined by 165:56-1-4, occurred. An allegedly unauthorized carrier choosing to challenge such allegation shall immediately notify the complaining end-user that:

(1) The complaining end-user must file a complaint with the Commission within 30 days of either:

(A) The date of removal of charges from the complaining end-user's bill in accordance with (b) of this Section or

(B) The date the allegedly unauthorized carrier notifies the complaining end-user of the requirements of this Section, whichever is later; and

(2) A failure to file such a complaint within this 30-day time period will result in the charges removed pursuant to (b) of this Section being reinstated on the end-user's bill and, consequently, the complaining end-users will only be entitled to remedies for the alleged unauthorized change other than those provided for in 165:56-11-1.3(b)(1). No allegedly unauthorized carrier shall reinstate charges to an end-user's bill pursuant to the provisions of this Section without first providing such end-user with a reasonable opportunity to demonstrate that the requisite complaint was timely filed within the 30-day period described in this Section.

(d) **Procedure if thirty (30) days or fewer of unauthorized charges were incurred.** If the Commission determines after reasonable investigation that an unauthorized change, as defined by 165:56-1-4, has occurred, the Consumer Services Division of the Commission shall issue a factual determination stating that the end-user is entitled to absolution from the charges incurred during the first 30

days after the unauthorized carrier change occurred, and neither the authorized or unauthorized carrier may pursue any collection against the end-user for those charges.

(e) Procedure if more than thirty (30) days of unauthorized charges were incurred. If the end-user has incurred charges for more than 30 days after the unauthorized carrier change, the unauthorized carrier must forward the billing information for such services to the authorized carrier, which may bill the end-user for such services using either of the following means:

(1) The amount of the charge may be determined by a re-rating of the services provided based on what the authorized carrier would have charged the end-user for the same services had an unauthorized change, as described in 165:56-1-4, not occurred; or

(2) The amount of the charge may be determined using a 50% Proxy Rate as follows: Upon receipt of billing information from the unauthorized carrier, the authorized carrier may bill the end-user for 50% of the rate the unauthorized carrier would have charged the end-user for the services provided. However, the end-user shall have the right to reject use of this 50% proxy method and require that the authorized carrier perform a re-rating of the services provided, as described in (e)(1) of this Section.

(f) End-user payments for services provided after the first thirty (30) days. If the unauthorized carrier received payment from the end-user for services provided after the first 30 days after the unauthorized change occurred, the obligations for payments and refunds provided for in 165:56-11-1.5 shall apply to those payments.

(g) Re-billing. If the Commission determines after reasonable investigation that the carrier change was authorized, the carrier may re-bill the end-user for charges incurred.

[Source: Added at 18 Ok Reg 2437, eff 7-1-01]

165:56-11-1.6. Reimbursement procedures where the end-user has paid charges

(a) Applicability. The procedures in this Section shall only apply after an end-user has determined that an unauthorized change, as defined by 165:56-1-4, has occurred and the end-user has paid charges to an allegedly unauthorized carrier.

(b) Order requirements.

(1) If the Consumer Services Division of the Commission determines after reasonable investigation that an unauthorized change, as defined by 165:56-1-4, has occurred, it shall issue a factual determination requiring the unauthorized carrier to forward to the authorized carrier the following:

(A) An amount equal to 150% of all charges paid by the end-user to the unauthorized carrier; and

(B) Copies of any telephone bills issued from the unauthorized carrier to the end-user.

(2) This factual determination shall be sent to the end-user, the unauthorized carrier, and the authorized carrier.

(c) End-user refund or credit by authorized carrier if payment is received. Within ten days of receipt of the amount provided for in this Section, the authorized carrier shall provide a refund or credit to the end-user in the amount of 50% of all charges paid by the end-user to the unauthorized carrier. The end-user has the option of asking the authorized carrier to re-rate the unauthorized carrier's charges based on the rates of the authorized carrier and, on behalf of the end-user, seek an additional refund from the unauthorized carrier, to the extent that the re-rated

amount exceeds the 50% of all charges paid by the end-user to the unauthorized carrier. The authorized carrier shall also send notice to the Commission that it has given a refund or credit to the end-user.

(d) **Billing and collection charges.** If an authorized carrier incurs billing and collection expenses in collecting charges from the unauthorized carrier, the unauthorized carrier shall reimburse the authorized carrier for reasonable expenses.

(e) **End-user refund or credit by authorized carrier if payment is not received.** If the authorized carrier has not received payment from the unauthorized carrier as required by (c) of this Section, the authorized carrier is not required to provide any refund or credit to the end-user. The authorized carrier must, within 45 days of receiving a factual determination as described in (b) of this Section, inform the end-user and the Commission if the unauthorized carrier has failed to forward to it the appropriate charges, and also inform the end-user of his or her right to pursue a claim against the unauthorized carrier for a refund of all charges paid to the unauthorized carrier.

(f) **Reinstatement into programs.** Where possible, the properly authorized carrier must reinstate the end-user in any premium program in which that end-user was enrolled prior to the unauthorized change, if the end-user's participation in that program was terminated because of the unauthorized change. If the end-user has paid charges to the unauthorized carrier, the properly authorized carrier shall also provide or restore to the end-user any premiums to which the end-user would have been entitled had the unauthorized change not occurred. The authorized carrier must comply with the requirements of this Section regardless of whether it is able to recover from the unauthorized carrier any charges that were paid by the end-user.

[Source: Added at 18 Ok Reg 2437, eff 7-1-01]

165:56-11-1.7. Preferred carrier freezes

(a) A preferred carrier freeze (or freezes) prevents a change in an end-user's preferred carrier selection unless the end-user gives the carrier from whom the freeze was requested his or her express consent. All local exchange carriers who offer preferred carrier freezes must comply with the provisions of this Section.

(b) All local exchange carriers who offer preferred carrier freezes shall offer freezes on a nondiscriminatory basis to all end-users, regardless of the end-user's carrier selections.

(c) Preferred carrier freeze procedures, including any solicitation, must clearly distinguish among telecommunications services (e.g., local exchange, intraLATA/intrastate toll, interLATA/interstate toll, and international toll) subject to a preferred carrier freeze. The carrier offering the freeze must obtain separate authorization for each service for which a preferred carrier freeze is requested.

(d) **Solicitation and imposition of preferred carrier freezes.**

(1) All carrier-provided solicitation and other materials regarding preferred carrier freezes must include:

(A) An explanation, in clear and neutral language, of what a preferred carrier freeze is and what services may be subject to a freeze;

(B) A description of the specific procedures necessary to lift a preferred carrier freeze; an explanation that these steps are in addition to the Commission's verification rules in 165:55-19-1.4 and 165:55-19-1.5 for changing an end-user's preferred carrier selections; and an explanation that the end-user will be unable to make a change in carrier selection unless he or she lifts the freeze;

and

(C) An explanation of any charges associated with the preferred carrier freeze.

(2) No local exchange carrier shall implement a preferred carrier freeze unless the end-user's request to impose a freeze has first been confirmed in accordance with one of the following procedures:

(A) The local exchange carrier has obtained the end-user's written and signed authorization in a form that meets the requirements of (d)(3) of this Section; or

(B) The local exchange carrier has obtained the end-user's electronic authorization, placed from the telephone number(s) on which the preferred carrier freeze is to be imposed, to impose a preferred carrier freeze. The electronic authorization should confirm appropriate verification data (e.g., the end-user's date of birth or social security number) and the information required in (d)(3)(B) of this Section. Telecommunications carriers electing to confirm preferred carrier freeze orders electronically shall establish one or more toll-free telephone numbers exclusively for that purpose. Calls to the number(s) will connect an end-user to a voice response unit, or similar mechanism that records the required information regarding the preferred carrier freeze request, including automatically recording the originating automatic numbering identification; or

(C) An appropriately qualified independent third party has obtained the end-user's oral authorization to submit the preferred carrier freeze and confirmed the appropriate verification data (e.g., the end-user's date of birth or social security number) and the information required in (d)(3)(B) of this Section. The independent third party must not be owned, managed, or directly controlled by the carrier or the carrier's marketing agent; must not have any financial incentive to confirm preferred carrier freeze requests for the carrier or the carrier's marketing agent; and must operate in a location physically separate from the carrier or the carrier's marketing agent. The content of the verification must include clear and conspicuous confirmation that the end-user has authorized a preferred carrier freeze.

(3) **Written authorization to impose a preferred carrier freeze.** A local exchange carrier may accept an end-user's written and signed authorization to impose a freeze on his or her preferred carrier selection. Written authorization that does not conform with this Section is invalid and may not be used to impose a preferred carrier freeze.

(A) The written authorization shall comply with 165:55-19-1.5(b), (c), and (h) concerning the form and content for letters of agency.

(B) At a minimum, the written authorization must be printed with a readable type of sufficient size to be clearly legible and must contain clear and unambiguous language that confirms:

(i) The end-user's billing name and address and the telephone number(s) to be covered by the preferred carrier freeze;

(ii) The decision to place a preferred carrier freeze on the telephone number(s) and particular service(s). To the extent

that a jurisdiction allows the imposition of preferred carrier freezes on additional preferred carrier selections (e.g., for local exchange, intraLATA/intrastate toll, interLATA/interstate toll service, and international toll), the authorization must contain separate statements regarding the particular selections to be frozen;

(iii) That the end-user understands that she or he will be unable to make a change in carrier selection unless she or he lifts the preferred carrier freeze; and

(iv) That the end-user understands that any preferred carrier freeze may involve a charge to the end-user.

(e) **Procedures for lifting preferred carrier freezes.** All local exchange carriers who offer preferred carrier freezes must, at a minimum, offer end-users the following procedures for lifting a preferred carrier freeze:

(1) A local exchange carrier administering a preferred carrier freeze must accept an end-user's written and signed authorization stating her or his intent to lift a preferred carrier freeze; and

(2) A local exchange carrier administering a preferred carrier freeze must accept an end-user's oral authorization stating her or his intent to lift a preferred carrier freeze and must offer a mechanism that allows a submitting carrier to conduct a three-way conference call with the carrier administering the freeze and the end-user in order to lift a freeze. When engaged in oral authorization to lift a preferred carrier freeze, the carrier administering the freeze shall confirm appropriate verification data (e.g., the end-user's date of birth or social security number) and the end-user's intent to lift the particular freeze.

PART 3. CRAMMING

165:56-11-2. [RESERVED]

[Source: Reserved at 15 Ok Reg 3075, eff 7-15-98]

165:56-11-3. Cramming

(a) Cramming is prohibited.

(b) Resellers, after a complaint of cramming by the customer, shall not disconnect or seek payment of the charge(s) pending resolution of the dispute.

(c) The reseller shall be subject to a fine, per day per occurrence, for any violation of this Section, on an intrastate basis. The amount of the fine shall be determined pursuant to 17 O.S. § 1 et. seq., after notice and hearing.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98; Amended at 16 Ok Reg 2290, eff 7-1-99]

SUBCHAPTER 12. SERVICE DENIAL

165:56-12-1. Denial or termination of service without notice

A reseller may refuse service or terminate existing service to an end-user without notice for tampering with the reseller's equipment, or misuse or abuse thereof in order to avoid payment of lawful charges or use thereof in such manner as to create danger to life or property of the reseller or other end-users.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98]

165:56-12-2. Denial or termination of service after notice

(a) A reseller may refuse service or terminate existing service to a customer pursuant to the disconnect procedure provided in OAC 165:56-9-4 for any of the following reasons:

- (1) Nonpayment of a bill within the period prescribed by this Chapter.
- (2) Failure to make a security deposit as set forth in this Chapter.
- (3) Violation of or noncompliance with any provision of law, or of this Chapter, or of the tariffs or terms and conditions of service of the reseller filed with and approved by the Commission.
- (4) Refusal to permit the reseller reasonable access to its telecommunications facilities for recovery, maintenance, and inspection thereof.
- (5) Interconnection of a device, line, or channel to the reseller's facilities or equipment contrary to the reseller's terms and conditions of service on file with and approved by the Commission.

(b) The reseller shall provide documentation to the customer, upon request, indicating the reason(s) that service is being withheld.

[Source: Added at 15 Ok Reg 3075, eff 7-15-98]

SUBCHAPTER 14. NOTIFICATION OF TRANSACTIONS AFFECTING CUSTOMERS OR BUSINESS OPERATIONS

165:56-14-1. Notification of certain transactions affecting the customers or operations of a reseller

(a) The parties to an agreement, the performance of which will result in the movement of some or all of the regulated telecommunications services customers of one or more certificated resellers to a different legal entity, shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and eight (8) copies of a Notification of Transaction with the Commission's Office of the Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(b) The parties to an agreement, the performance of which will result in the transfer of a certificate of convenience and necessity, with or without the transfer of a tariff, from one legal entity to another legal entity shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and eight (8) copies of a Notification of Transaction with the Commission's Office of the Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(c) The parties to an agreement, the performance of which will result in the merger of one or more legal entities with a surviving legal entity which is certificated to provide local and/or interexchange telecommunications services, shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and eight (8) copies of a Notification of Transaction with the Commission's Office of the Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(d) This Section shall not require notification to the Commission of transactions which involve only changes in the ownership of the stock of a reseller. Such transactions are not subject to regulation by the Commission.

(e) The Notification of Transaction shall include a copy of the agreement, with all exhibits and schedules, and set forth the following information, if applicable:

- (1) The name of the acquiring entity and the acquired entity.
 - (2) Identification of the acquired assets.
 - (3) The anticipated completion date and the effective date (if different) of the transaction.
 - (4) The name of the entity(ies) which will be providing telecommunications services in Oklahoma subsequent to the effective date of the transaction (the "surviving entity").
 - (5) The name, address and telephone number of a contact person for purposes of the Notification of Transaction.
 - (6) The names and qualifications of the individuals who will serve as officers and management of the surviving entity.
 - (7) The name(s), address(es) and telephone number(s) of the representatives of the surviving entity who will be the contact(s) for the Public Utility Division and the Consumer Services Division and will be primarily responsible for:
 - (A) Providing customer service;
 - (B) Repair and maintenance;
 - (C) Answering complaints;
 - (D) Authorizing and/or furnishing refunds to customers;
 - (E) Tariff issues; and,
 - (F) Receiving Notices related to causes docketed at the Commission.
 - (8) An affidavit, including a financial statement, that states that the surviving entity possesses the financial ability to provide reseller services in the State of Oklahoma.
 - (9) A copy of the notice which will be provided to affected customers informing them of the transaction and any change in the name of the entity which provides telecommunications services to them or in their rates, charges or terms and conditions of service as a result of the transaction.
 - (10) Identification of any changes in services to be offered or tariffed rates to affected customers required by the transaction.
 - (11) A narrative and/or schematic description of the relationship between or among the acquired and acquiring entities and the surviving entity.
 - (12) An acknowledgment that any tariff revisions shall only be accomplished in a separate filing.
 - (13) A statement of the approximate number of Oklahoma customers.
- (f) At the time of filing the Notification of Transaction, the acquiring entity shall provide a copy of the Notification of Transaction, with all attachments thereto, to the Office of the Attorney General of the State of Oklahoma.
- (g) The Commission Staff shall review the Notification of Transaction for the purpose of determining whether the proposed transaction should be approved and, in the case of mergers, whether the surviving entity should be allowed to provide telecommunications service in Oklahoma after the effective date of the transaction under the authority of any existing Certificate of Convenience and Necessity. The Commission shall act on a notification within thirty (30) business days of the date the notification is filed. No reportable transaction shall be consummated except by order of the Commission. Any person wishing to object to the proposed filing must file an objection with the Commission's Office of the Court Clerk no later than fifteen (15) days after the proposed filing. The Attorney General of the State of Oklahoma shall be granted intervention in such proceeding, if requested.

(h) Within thirty (30) business days of the filing of the Notification of Transaction, the Commission Staff may file a Continuance of Review in the Cause stating that the Commission Staff has not completed its review of the transaction and shall require an additional specified time, not to exceed an additional thirty (30) calendar days, in which to complete such review. The Commission Staff shall accompany such a Continuance of Review with a specification of the additional information, if any, needed to complete this review.

(i) The Commission Staff may, if it determines appropriate, file a Notice in the Cause requiring the acquiring entity and/or the surviving entity to show cause that the proposed transaction and/or merger is lawful, fair to the customers and in the public interest. The filing of such Notice by the Commission Staff will not alone suspend the authority of any entity to operate under an existing Certificate of Convenience and Necessity. Simultaneously with the filing of any such Notice, the Commission Staff shall propose a procedural schedule, including a date for hearing which shall be held within ninety (90) calendar days of the date of the filing of the Notification of Transaction, unless otherwise ordered by the Commission. If such a Notice is filed by the Commission Staff, the acquiring entity and/or surviving entity shall have the burden of establishing that the proposed transaction(s) is lawful, fair to the customers and in the public interest.

(j) After approval of notification of transaction(s), and not later than thirty (30) days after transaction consummation, an original and two (2) copies of the approved tariffs, if necessary, which conform to OAC 165:56-5-3, shall be provided to the Public Utility Division.

165:56-14-3. Cessation of business in Oklahoma

(a) At least thirty (30) days before the effective date of the cessation of the provisioning of telecommunications service(s) in the State of Oklahoma, a reseller shall file an original and eight (8) copies of an application for withdrawal of its Certificate of Convenience and Necessity and cancellation of its tariffs and provide Notice of such filing to the Attorney General of the State of Oklahoma.

(b) An application for withdrawal shall include as attachments the following information, which must be certified as true and correct by an officer of any corporate applicant, or an authorized representative of an unincorporated applicant:

- (1) The contact person who will be responsible for concluding all outstanding business with the Commission and customers;
- (2) A statement regarding the amount of any outstanding customer deposits and the date refund checks will be sent to customers; and,
- (3) The date of withdrawal;

(c) Notice of discontinuance shall be sent by regular mail to all of the reseller's customers. The notice shall be in a form approved by the Director of the Public Utility Division, and shall give the exact date that service will cease and contain information as to the procedure for any refunds due customers.

(d) Unless provided otherwise in this Chapter, no application for withdrawal and/or cancellation of an existing Certificate of Convenience and Necessity and tariff shall be granted except by Order of the Commission, after such notice and hearing, if any, as directed by the Commission.

(e) The Commission Staff may file an application to cancel an existing Certificate of Convenience and Necessity and tariff, at the company's request and at the option of the Commission Staff. The request may be in form of a letter to the Director of Public Utility. The letter shall conform with subsections (b) and (c) of this Section.

SUBCHAPTER 16. PAY-PER-CALL SERVICES

165:56-16-1. Prohibition of certain pay-per-call services or interactive programs

Each reseller is prohibited from violating 17 O.S. § 140.1 et seq.

[Source: Added at 16 Ok Reg 2290, eff 7-1-99]

SUBCHAPTER 17. SERVICE QUALITY STANDARDS

165:56-17-1. Response to customer complaint inquiries

A reseller shall respond to the Commission upon written or electronic inquiry from the Commission within the following time periods:

- (1) Inquiries regarding disconnection, suspension or termination of service - within one (1) business day of receipt of inquiry from the Commission.
- (2) Inquiries other than for disconnection, suspension or termination of service - within three (3) business days of receipt of inquiry from the Commission.

[Source: Added at 18 Ok Reg 2437, eff 7-1-01]

165:56-17-2. Customer access to reseller

Any reseller that utilizes a mechanized answering system for answering of any customer calls regarding billing or repair during regular business hours must provide access to a live customer representative during the recitation of the mechanized options. If a customer is utilizing a rotary dial phone, they should be transferred to live customer representative during the recitation of the mechanized options.

CHAPTER 57. OPERATOR SERVICE PROVIDERS TELECOMMUNICATIONS SERVICES

[Authority: OKLA. CONST. art IX, § 18; 17 O.S., §§ 131 et seq. and 139.2]

[Source: Codified 7-1-95]

SUBCHAPTER 1. GENERAL PROVISIONS

165:57-1-1. Purpose; short title

(a) This Chapter establishes the Oklahoma Corporation Commission rules and regulations governing the regulation and operation of operator service providers (OSPs) operating in Oklahoma which may be cited by the short title as the Oklahoma Operator Service Provider Rules.

(b) This Chapter is intended to protect consumers who make intrastate calls using the assistance of a live or automated operator or store and forward devices from pay telephones, hotels and hospitals, and other public locations and presubscribed customers against unreasonable charges and anti-competitive practices. This Chapter defines good business practices and adequate service standards, prevents unfair rates and charges, ensures that consumers can make an informed choice regarding OSPs and protects OSPs from unreasonable demands. This Chapter is further intended to include all OSP services provided to all subscribers in Oklahoma including operator services provided by IXC's, telecommunications service providers, payphone service providers and Resellers.

(c) This Chapter is further intended to allow Oklahoma consumers to receive timely benefits from lawful market driven price and service competition among OSPs by applying only such regulatory requirements to those companies as are necessary to assure public access to telecommunications services under tariff provisions which are not unjustly discriminatory and to preclude unjust and unreasonable rates or charges in the operator services market.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Added at 14 Ok Reg 2872, eff 7-15-97; Amended at 15 Ok Reg 3092, eff 7-15-98]

165:57-1-2. Jurisdiction

The Oklahoma Corporation Commission, by virtue of Article IX § 18 et seq. of the Constitution of the State of Oklahoma and Title 17 of the Oklahoma

Statutes Sections 131 et seq., has authority and responsibility to supervise, regulate, and control OSPs in Oklahoma and to enact rules and regulations in connection therewith.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-1-3. Application of rules

This Chapter shall apply to every OSP in Oklahoma, which provider is by law subject to the jurisdiction of the Commission, including but not limited to operator services provided by IXCs, telecommunications service providers, payphone service providers and Resellers.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 14 Ok Reg 2872, eff 7-15-97]

165:57-1-4. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Access code" means the preliminary digits that a user must dial to be connected to a particular outgoing trunk group or line.

"Aggregator" means any person or entity that, in the ordinary course of its operations, makes telephones available to the public or to transient users of its premises for intrastate telephone calls including calls using an operator services provider; i.e., customers of an OSP. Aggregators include, but are not limited to, hotels, motels, hospitals, universities, airports, gas stations, and to the extent permitted by law, payphone service providers. Aggregator does not include inmate-only coinless phones provided by correctional institutions but shall include telephones provided for use by the public in visitation areas of correctional institutions.

"Answer supervision" means a network control signal sent from the terminating location to the originating location to inform the originating location that a call has been answered and a network control signal from the originating end to the terminating end to inform the terminating end that a calling party has hung up. In the public switched network, the answer supervision signal is used to start and stop billing for a call.

"Billing agent" means an entity which provides bills to an end-user for services received from an OSP.

"Blocking" means any and/or all of the following:

"Brand" means the audible and distinct identification by the OSP to the consumer of the OSP presubscribed by the aggregator.

"Call splashing" means the transfer of a telephone call from one OSP to another such provider in such a manner that the subsequent provider is unable or unwilling to determine the location of the origination of the call and, because of such inability or unwillingness, is prevented from billing the call on the basis of the actual originating location.

"Commission" means the Oklahoma Corporation Commission.

"Complaint" means any oral or written report given to an OSP by an aggregator or consumer of an OSP's service and/or the Commission's Consumer Services Division relating to dissatisfaction with the provision of or the rate(s) charged for the OSP's service(s). Each complaint shall count as a separate report regardless of whether subsequent reports relate to the same situation giving rise to the dissatisfaction with the provision of or the rate(s) charged for the OSP's regulated services.

"Consumer" means any person initiating any intrastate telephone call using the assistance of a live or automated operator or any person receiving an intrastate telephone call handled by an OSP in which the called party will be paying for the service.

"Customer trouble report" means any oral or written report given to the OSP's repair service or contact person by an aggregator or consumer of an OSP's service and/or the Commission's Consumer Services Division relating to a defect or difficulty or dissatisfaction with the provision of the OSP's services. Each trouble report shall count as a separate report regardless of whether subsequent reports relate to the same defect, difficulty, or dissatisfaction with the provision of the OSP's regulated services.

"End-user" means the consumer.

"Equal access" means a condition where the local exchange access service offered by a telephone company is made available in equal kind, quality and price to all long distance companies. Equal access also describes a condition where customers may choose for themselves the interexchange carrier to which their long distance calls are to be routed, using the same number of dialed digits regardless of which interexchange carrier is chosen.

"Equal access code" means an access code that allows the public to obtain access to the carrier associated with that code; i.e., 101XXXX.

"FCC" means Federal Communications Commission.

"ILEC" means an Incumbent Local Exchange Company, as defined in OAC 165:55.

"Interexchange telecommunications carrier" ("IXC") means any person, firm, partnership, corporation, or other entity, except incumbent LECs, resellers or OSPs, engaged in furnishing regulated interexchange telecommunications services under the jurisdiction of the Commission.

"InterLATA call" means any call which is originated in one LATA and terminated in another LATA.

"Interstate call" means any call which is originated in one state and terminated within the boundaries of another state.

"Intrastate call" means any call which is originated and terminated within the boundaries of the State of Oklahoma, regardless of whether such call is routed across state boundaries prior to reaching its termination point.

"Joint aggregator" describes a situation where more than one party exercises control over telephone equipment, whether through ownership of the equipment, control of access to the equipment or some other means. Each party is jointly responsible as an aggregator under these rules.

"LATA" means Local Access and Transport Area as defined in the Code of Federal Regulations, Title 47 Part 53.3.

"LEC" means local exchange company, which is a telephone company authorized by the Commission to provide telephone service in a telephone exchange or exchanges.

"Operator service provider" ("OSP") means any common carrier that provides intrastate operator services or any other person or entity determined by the Commission to be providing operator services.

"Operator services" means the initiation of any intrastate telecommunications service, including, but not limited to, services from an aggregator location, or to presubscribed customers, which services include, as a component, any automated or live assistance to a consumer to arrange for billing or completion, or both, of an intrastate telephone call.

"Payphone service provider" means any person, firm, partnerships, corporation, cooperative corporation or other lawful entity providing payphone service as defined in OAC 165:58.

"Presubscribed customer" means a customer that has indicated their choice of a primary interexchange carrier for use at their location. The customer's toll calls will then be routed to their presubscribed interexchange carrier, unless the customer designates otherwise, on a per-call basis, by use of a carrier access code.

"Reseller" means any person, partnership, cooperative corporation, or lawful entity that offers telecommunications services to the public through the use of the transmission facilities of an underlying carrier or a combination of its own facilities and the transmission facilities of an underlying carrier for resale to the public for profit, as defined in OAC 165:56.

"Rules of Practice" means OAC 165:5.

"Service" means telecommunications service in its broadest and most inclusive sense, and includes any and all acts done, rendered, or performed and any and all things furnished or supplied by the OSP in the provision of regulated offerings to consumers.

"Streamlined tariff revision(s)" means revision(s) proposed by an OSP which will become effective without notice and hearing or order of the Commission, in the time frame established in OAC 165:57-7-5, unless suspended.

"Telecommunications service provider" means all authorized providers of local exchange service, whether an incumbent LEC or a competitive LEC as defined in OAC 165:55.

"Terms of Service" means rates, charges and terms and conditions for regulated services that a reseller elects to post, in a searchable format, on a publicly available website.

"Zero minus ("0-") call" means an operator-assisted call where the calling party dials zero ("0") for an operator and waits until an operator comes on the line. The caller then states the telephone number they want to reach and the nature (person-to-person, collect, etc.) of the call.

"Zero plus ("0+") call" means an operator-assisted call where the calling party dials zero ("0") followed by the number being called, including the area code. This dialing pattern is used mostly for collect, credit card, person-to-person and third-party-billed calls. The caller indicates the type of call after dialing is completed and an operator may come on line.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 14 Ok Reg 2872, eff 7-15-97; Amended at 15 Ok Reg 3092, eff 7-15-98; Amended at 16 Ok Reg 2312, eff 7-1-99; Amended at 34 Ok Reg 1057, eff 9-14-18]

165:57-1-5. Interpretation of rules

The words contained in this Chapter shall be given their ordinary and customary meaning, with technical terms and words being construed as generally understood within the telecommunications industry, except where otherwise expressly provided. Where, by its context, this Chapter establishes service standards or objectives, substantial compliance under normal operating conditions will be deemed in compliance with this Chapter. Where, by its context, this Chapter imposes an absolute obligation upon the OSP, strict compliance is required.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-1-6. Relief from rules

Whenever compliance with any requirement of this Chapter would result in unreasonable hardship upon or excessive expense to the OSP or the consumer, or

for other good cause shown, the Commission may, by order, waive or modify the requirements of this Chapter, upon application of any interested person, in accordance with the provisions of OAC 165:5. The Commission may grant temporary relief pending hearing.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Added at 14 Ok Reg 2872, eff 7-15-97]

165:57-1-7. Exceptions or variances

If an OSP seeks an exception or variance from this Chapter in its tariffs, such exception or variance shall be clearly shown on such tariff, sufficient to plainly bring to the Commission's attention the exact nature of said exception or variance. Any exception not so marked or identified in such tariff shall be superseded by this Chapter to the extent that said exception or variance is in conflict therewith. Upon approval by the Commission, the variance shall indicate the number of the pertinent Commission order.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-1-8. Supremacy

Every tariff, rule, regulation, or agreement relating to the subject matter of this Chapter is superseded by this Chapter and is deemed amended to conform with this Chapter. With regard to LECs and IXCs, this Chapter is intended to supplement OAC 165:55, the Commission's rules, and where a conflict arises, the provisions of this Chapter shall supersede OAC 165:55 with respect to LEC-provided and IXC-provided operator services only.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Added at 15 Ok Reg 3092, eff 7-15-98]

165:57-1-9. Rules conform to law

This Chapter shall be construed to conform with the Constitution and laws of the State of Oklahoma.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-1-10. Controversy over rules

Whenever a controversy exists in connection with the interpretation of this Chapter or its applicability, or any right or any duty imposed thereby, the Commission, upon application of any interested person and after notice and hearing, shall enter such order thereon as it may deem appropriate.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-1-11. Severability

This Chapter shall not relieve in any way an OSP or aggregator from any of its duties under the laws of this State or the United States. If any provision of this Chapter is held invalid, such invalidity shall not affect other provisions or applications of this Chapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Chapter are declared to be severable.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-1-12. Conflict with Commission order

This Chapter shall not alter or amend any order of the Commission directed to OSPs, except where the provisions thereof are in direct conflict with any of this

Chapter, in which case this Chapter shall supersede the provisions of such order to the extent of conflict only.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-1-13. Conflict with filed tariffs

All tariffs previously filed by an OSP and approved by the Commission are not revoked, altered or amended by this Chapter, except to the extent they are in direct conflict with any provision of this Chapter, in which event such tariffs are superseded by this Chapter to the extent of conflict only.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-1-14. Tariff conformance [REVOKED]

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Revoked at 14 Ok Reg 2872, eff 7-15-97]

165:57-1-15. Universal service

Pursuant to OAC 165:59-3-40, every entity that operates or provides telecommunications service within the State of Oklahoma shall contribute, on a nondiscriminatory basis, into the Oklahoma Universal Service Fund.

[Source: Added at 15 Ok Reg 3092, eff 7-15-98]

165:57-1-16. Operator service intended for exclusive use of inmates

Operator services provided to payphones located in a state, federal, local, or county jail or in a correctional facility, which are intended for the exclusive use of prisoners, shall not be required to meet the minimum service requirements set forth in OAC 165:57-3-1(a)(6)(A) and (B), OAC 165:57-3-2(b)(1),(2),(3),(4), and (7), OAC 165:57-3-2(c), and OAC 165:57-3-3.

[Source: Added at 16 Ok Reg 2312, eff 7-1-99]

SUBCHAPTER 3. OPERATIONS

165:57-3-1. General operations - operator service providers

(a) Every OSP shall:

(1) Brand to the end-user at the beginning of each telephone call. For third party or collect calls, similar identification shall be made to the consumer who is responsible for payment.

(2) If subscribing to a LEC's 0- Transfer or similar service, not knowingly take any action that would deny other OSPs who subscribe to said 0- Transfer or similar service an equal opportunity of being offered to and chosen by the end-user where the end-user is indifferent to the OSP who carries the call. LECs who provide a 0- Transfer or similar service shall administer said service in a manner designed to assure that OSPs who subscribe to said service have an equal opportunity of being offered to and chosen by the calling party where the calling party does not have a preference.

(3) Permit the end-user to terminate the telephone call at no charge before the call is connected.

(4) Disclose immediately to the end-user, upon request and at no charge to the end-user:

(A) A quote of its rates or charges for the call.

- (B) The methods by which such rates or charges will be collected.
 - (C) The methods by which complaints concerning such rates, charges, or collection practices will be resolved.
- (5) Ensure, by contract or tariff, that each aggregator for which such provider is the presubscribed provider of operator services is in compliance with the requirements of this Chapter.
- (6) Withhold payment (on a location by location basis) of any compensation, including commissions, to aggregators if such provider reasonably believes that the aggregator is:
- (A) Blocking access to intrastate common carriers by means of "800", "888", "950", or IOXXX access codes.
 - (B) Blocking access to the LEC operator on 0- calls.
 - (C) Blocking access to emergency services in violation of the requirements of this Chapter.
- (7) Not bill for unanswered telephone calls in areas where equal access and answer supervision is available.
- (8) Not knowingly bill for unanswered telephone calls where equal access is not available.
- (9) Not engage in call splashing, unless the end-user requests to be transferred to another provider of operator services, and the end-user consents to be transferred after it has been informed, prior to incurring any charges, that the rates for the call may not reflect the rates from the actual originating location of the call.
- (10) Except as provided in (9) of this subsection, not bill for a call that does not reflect the location of the origination of the call.
- (11) Be prohibited from billing and collecting any aggregator surcharges not specifically outlined in the tariffs required to be filed with the Commission under the provisions of this Chapter. In no case shall the tariffed aggregator surcharge exceed the amount of one dollar (\$1.00).
- (b) OSPs using automated equipment that will under certain circumstances transfer a call to another carrier will be allowed to brand after the input of billing information, to avoid end-user confusion.
- (c) OSPs shall not use the name of another party in the brand, unless that party has consented in writing to the use of its name in the brand.
- (d) OSPs shall regularly publish, to coincide with the publishing requirements of the FCC, and make available at no cost to inquiring consumers, written materials that describe any recent changes in operator services and in the choices available to consumers in that market.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 14 Ok Reg 2872, eff 7-15-97]

165:57-3-2. General operations - aggregators

- (a) An OSP and, to the extent permitted by law, a payphone service provider will have joint responsibility and liability for noncompliance as aggregators, unless otherwise agreed to in writing by the parties. This "joint aggregator" status must be determined based on the facts of each situation.
- (b) Aggregators/joint aggregators shall:
- (1) Post signage on or near telephones that are presubscribed to an OSP. The signage will state the following information:
 - (A) The name, address, and toll-free telephone number of the OSP.
 - (B) A written disclosure that the rates for all operator-assisted calls are available on request, and that consumers have a right to obtain

access to the intrastate carrier of their choice and may contact their preferred intrastate carriers for information on accessing that carrier's service using that telephone.

(C) The name, address, hours of operation (8:00 a.m. - 4:30 p.m., Monday through Friday), and toll free telephone number of the Consumer Services Division of the Commission, to which the end-user may direct complaints and questions regarding operator services.

(D) The amount of any property surcharge applicable to the aggregator's phones and billed and collected by the OSP.

(2) Ensure that each of its telephones presubscribed to an OSP allows the consumer to use "800", "888", "950" and 101XXXX access code numbers to obtain access to the OSP desired by the consumer.

(3) Ensure that no charge by the aggregator to the end-user for using an "800", "888", "950" or 101XXXX access code number, or any other access code number, is greater than the amount the aggregator charges for calls placed using the presubscribed OSP.

(4) Directly route all "0-" calls to the LEC operator without charge to the caller.

(5) In addition to the requirement of OAC 165:57-3-2(b)(1), an OSP/aggregator shall disclose, audibly and distinctly, to the end-user, at no charge and before connecting any intrastate 0+ call, how to obtain the total cost of the call, including any and all surcharges, or the maximum possible total cost of the call, including any and all surcharges, before providing further oral advice to the end-user on how to proceed to make the call.

(6) The oral disclosure required in this subsection shall instruct end-users that they may obtain applicable rate and surcharge quotations either, at the option of the provider of operator services, by dialing no more than two digits or by remaining on the line.

(7) The disclosure requirement established by paragraphs 5 and 6 of this Section shall be made on or before the date mandated by the FCC.

(c) The OSP identified in the brand must be consistent with the OSP identified on the signage posted on or near the aggregator's telephones.

165:57-3-3. Immediate routing of emergency calls

OSPs shall connect an emergency call immediately to the emergency service provider that responds to the type of reported emergency at the site of the emergency, if known, or, if not known, to the local exchange provider at the originating location of the call. In the case of automated systems, the end-user will be directed through a call sequence that allows them to speak with a live operator who will process the emergency call.

SUBCHAPTER 5. CERTIFICATES, REPORTS, AND RECORDS

PART 1. CERTIFICATES OF CONVENIENCE AND NECESSITY

165:57-5-1. Certificate of Convenience and Necessity

(a) **Requirement for Certificate of Convenience and Necessity.** No person or entity shall furnish operator services to any end-user in the State of Oklahoma without first having secured a Certificate of Convenience and Necessity from the Commission. ILECs and certificated IXCs providing operator services prior to January 1, 1996, shall not be required to obtain a Certificate of Convenience and Necessity for the operator services being provided on that date.

(b) **Application for Certificate of Convenience and Necessity.** An applicant to the Commission for a Certificate of Convenience and Necessity to provide operator service in the State of Oklahoma shall be required to demonstrate its financial, managerial and technical ability to provide the requested operator service in the State of Oklahoma. An application for Certificate of Convenience and Necessity to provide operator services shall be made pursuant to the requirements of 17 O.S. § 131 *et seq.* and shall conform to the requirements thereof and with the Commission's Rules of Practice, OAC 165:5, and any additional requirements set forth in this Chapter. An application for a Certificate of Convenience and Necessity shall be in a format approved by the Director of the Public Utility Division. An original and four (4) copies of the application for a Certificate of Convenience and Necessity shall be filed with the Commission's Court Clerk. A filing fee pursuant to the Commission's Rules of Practice, OAC 165:5, shall be required.

(c) **Application requirements for Certificate of Convenience and Necessity.** An application to the Commission for a Certificate of Convenience and Necessity to provide operator services shall include as attachments to the application the following information, which must be certified as true and correct by an officer of any corporate applicant, or an authorized representative of an unincorporated applicant, in the format set forth in Appendix G to this Chapter:

- (1) As applicable the complete name, including each and every trade name(s) under which business will be conducted, corporate or other headquarters address and names/addresses of principal corporate officers or partners of the entity proposing to provide operator services to the public in the State of Oklahoma. Also, include the telephone number and, if applicable, the toll free telephone number.
- (2) If different from those provided in paragraph (1) of this subsection, the name(s) and address(es) of all officers and corporate offices of the OSP located in the State of Oklahoma and the name(s) and address(es) of employee(s) responsible for Oklahoma operations.
- (3) A copy of the applicable certificate, issued by Oklahoma's Secretary of State to transact business in the State of Oklahoma.
- (4) A copy of the Corporate Trade Name Report, issued by Oklahoma's Secretary of State, shall be provided for each and every trade name, i.e. a d/b/a, used by the operator service provider in the State of Oklahoma.
- (5) A financial statement.
- (6) Contact name(s), address(es) and the toll free telephone number(s) of the individual(s) responsible for providing service to Aggregators and consumers, for repairs and maintenance, for answering complaints, and supplying refunds. This will be the principal contact to be utilized by the Commission's Consumer Services Division and Public Utility Division regarding questions and complaints against the company.
- (7) A description of the OSP's proposed procedures used to verify customer-ordered changes in presubscribed carriers, including, but not limited to a proposed "letter of agency" that is consistent with the requirements of 47 CFR Ch.1, Section 64.1150, proposed independent

- third-party verification script and/or proposed telephone contact script.
- (8) A complete set of proposed tariffs which shall include terms and conditions of service and all rates, tolls, charges, and service classifications in a format approved by the Director of the Public Utility Division. The proposed tariffs shall comply with OAC 165:57-7-1 through OAC 165:57-7-3.
- (9) An example of signage proposed to be utilized by the OSP which is in conformance with OAC 165:57-3-2.
- (10) A copy of the applicant's proposed complaint report form which is consistent with OAC 165:57-5-24. The complaint report form and complaint codes suggested by the Director of the Consumer Services Division are included as Appendix H and Appendix I, respectively, to this Chapter.
- (11) A written affirmation, signed before a Notary Public by someone with authority to bind the applicant, in a format approved by the Director of the Public Utility Division that:
- (A) The information contained in the application is true and correct;
 - (B) The OSP is familiar with and will comply with all applicable federal and state laws, and the rules and orders of the Commission;
 - (C) The applicant possesses the financial ability to provide operator service(s) in the State of Oklahoma;
 - (D) The OSP will contribute to the Oklahoma Universal Service Fund pursuant to OAC 165:59; and,
 - (E) The OSP understands the Commission's contempt authority.
- (12) A statement regarding whether the applicant intends to utilize the services of a billing agent to issue bills to end-users.
- (13) A brief description of its history of providing the requested telecommunications service, or other telecommunications services, in order to demonstrate its managerial experience. The history shall include a list of the geographic areas in which it previously provided service and/or is currently providing service, and such other documentation as may be requested by the Commission. Applicants for a Certificate of Convenience and Necessity without prior experience shall list the experience of each principal officer, partner, or the sole proprietor in order to demonstrate its managerial ability, and/or provide other documentation as may be requested by the Commission.
- (14) A description of the applicant's experience in providing telecommunications services in order to demonstrate its technical abilities. In the case of applicants for a Certificate of Convenience and Necessity without prior experience, the applicant shall provide documentation which supports its technical abilities, or other documentation as may be requested by the Commission.
- (15) A list of all other states, if any, where:
- (A) The applicant is authorized to operate;
 - (B) Authorization to operate is pending;
 - (C) A request for authorization has been denied, including the reason stated for denial, with a certified copy of the denial document attached; and/or,
 - (D) Authorization has been revoked, with a certified copy of the revocation document attached.

(d) Requirements for expanding authority under an existing CCN. An Applicant wishing to expand its service authority under an existing Certificate of Convenience and Necessity granted pursuant to Chapters 55, 56, and/or 58, must make application to the Commission and provide all information and notice as required in Sections 165:57-5-1(c) and 165:57-5-2. However, information submitted in support of a previous Application for certification, if such Application was approved by the Commission, may be used in support of the current Application by providing a written affirmation, signed before a Notary Public, and by someone with authority to bind the Applicant, stating that the previously submitted information is still true and correct, and circumstances have not changed. If the previously submitted information is no longer true and correct, or if circumstances have changed, Applicant shall submit updated information along with a written affirmation fully explaining all changed circumstances.

(e) Amended Application. During the Staff's review of the OSP's application, certain revisions and/or corrections to documents attached to the application may be requested. After the parties have agreed to the necessary revisions and/or corrections, such revisions and/or corrections shall be attached to an amended application. The OSP shall file an original and four (4) copies of its amended application with the Commission's Court Clerk. Requested revisions and/or corrections may include, but shall not be limited to:

- (1) Revisions to the applicant's proposed tariffs;
- (2) Provision of documents omitted from the originally filed application; and/or,
- (3) Correction of the statement, in the body of the application only, regarding the services for which authority to provide is being sought.

(f) Additional Information. The Public Utility Division Staff may issue data requests for additional relevant information as may be necessary. Data request responses should be submitted to the Staff member requesting the information, and not filed with the Commission's Court Clerk.

(g) Approval requirement. Unless provided otherwise in this Chapter, or by the laws of the State of Oklahoma, no Certificate of Convenience and Necessity shall be granted except by Order of the Commission, after such notice and hearing, if any, as directed by the Commission.

165:57-5-2. Notice of hearing for Certificate of Convenience and Necessity [REVOKED]

[Source: Added at 16 Ok Reg 2312, eff 7-1-99; Amended at 21 Ok Reg 2126, eff 7-1-04; Revoked at 34 Ok Reg 1057, eff 9-14-18]

165:57-5-2.1. Notice requirements when filing an Application for Certificate of Convenience and Necessity

Applicants seeking a Certificate of Convenience and Necessity shall meet all notice requirements set forth in this Section.

- (1) Requirements for filing an Application of a Certificate of Convenience and Necessity. An Application for a Certificate of Convenience and Necessity shall be delivered by mail, electronic mail or by personal service to the following people and/or entities:

- (A) The Oklahoma Attorney General;

- (B) The Commission's Director of the Public Utility Division;
 - (i) The Application delivered to the Director of the Public Utility Division shall be file-stamped by the Commission's Court Clerk and shall be delivered to the Director of the Public Utility Division in electronic copy form only.
 - (ii) The Director of the Public Utility Division shall update and post a report that includes reference to the Application of Certification of Convenience and Necessity on the Commission's website, within five (5) business days of receipt.
 - (C) The governing body of each Enhanced 911 Public Safety Answering Point (E911 PSAP) operating in the proposed service territory of the Applicant.
 - (D) The ILEC in the proposed service territory.
- (2) Publication of a Notice of Application of a Certificate of Convenience and Necessity. The Notice required by 17 O.S. § 132 shall be published as follows:
- (A) In newspapers of general circulation once a week for two (2) consecutive weeks with at least seven (7) days apart in each service territory affected.
 - (B) Publication shall be at the expense of the applicant.
 - (C) A "Proof of Publication" document shall be filed with the Commission's Court Clerk within fifteen (15) days of the last publication date.
- (3) Requirements for a Notice of Hearing on an Objection to a Certificate of Convenience and Necessity.
- (A) When an objection is made in a cause of an Application of a Certificate of Convenience and Necessity, the Applicant shall promptly file a Notice of Hearing at the Commission's Court Clerk requesting a date for a hearing on the merits of the application.
 - (B) Within ten (10) business days prior to the date of the hearing, the Applicant shall serve the notice by delivering a file-stamped copy by mail, electronic mail or by personal service to the following people and/or entities:
 - (i) The Oklahoma Attorney General;
 - (ii) The Commission's Director of the Public Utility Division; and
 - (iii) Any Intervenors, including the person or entity filing the objection.

[Source: Added at 35 Ok Reg 1057, eff 9-14-18]

165:57-5-3. Approval of initial tariffs

- (a) No later than twelve (12) months after being granted a Certificate of Convenience and Necessity, pursuant to OAC 165:57-5-1, an operator service provider shall file an Application requesting approval of its initial tariffs, unless filed pursuant to OAC 165:57-5-1(c)(8), which include the terms and conditions of service and all rates and charges for each service classification, in a format consistent with Subchapter 5 of this Chapter.
- (b) All entities seeking approval of an initial tariff shall serve the file-stamped Application by mail, electronic mail, or personal service to the Oklahoma Attorney General and the Director of the Public Utility Division.

(c) The initial tariffs shall not become effective except by order of the Commission after such notice and hearing, if any, as directed by the Commission.

(d) No later than thirty (30) days after approval of the initial tariffs, an original and two (2) copies of the approved tariffs, which conform to OAC 165:57-7-3, shall be provided to the Public Utility Division.

[Source: Added at 35 Ok Reg 1057, eff 9-14-18]

PART 3. GENERAL REQUIREMENTS FOR RECORDS AND REPORTS

165:57-5-20. Who shall file

The record keeping, reporting, and filing requirements listed in this Chapter shall apply to all OSPs operating in the State of Oklahoma.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-5-21. Location of records

All records required by this Chapter shall be kept at a location which has been identified to the Commission's Director of the Public Utility Division. The records required by this Chapter shall be made available to the Commission or its authorized representative at any reasonable time upon request.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-5-22. Retention of records

All records required by this Chapter shall be preserved for two (2) years.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-5-23. Records to be provided to the Commission

(a) **Annual report of operations.** Not later than April 1 of the year following the reporting year each OSP shall provide to the Director of the Public Utility Division an annual report in a format approved by the Director of the Public Utility Division. In addition, OSPs shall file a copy of any annual reporting form required by the FCC. The Oklahoma annual report will contain only Oklahoma operations.

(b) **Other information.** Each OSP shall promptly furnish such other information as the Commission Staff may request, unless otherwise ordered by the Commission.

(c) **Contact names.** Each OSP shall notify, in writing, the Director of the Public Utility Division and the Director of the Consumer Services Division within thirty (30) days of a change in the company-designated contacts for Public Utility Division and Consumer Services Division issues. If the below information is unavailable, the OSP may seek a waiver from the PUD Director by making a request in writing.

(1) The update shall include the name(s), address(es) and/or telephone number(s) of the designated individual(s).

(2) The contact name(s) provided pursuant to this subsection shall be the individual(s) primarily responsible for:

- (A) Providing customer service;
- (B) Repair and maintenance;
- (C) Answering complaints;
- (D) Authorizing and/or furnishing refunds to customers;
- (E) Tariff issues;
- (F) Billing inquiries;
- (G) Regulatory matters;

- (H) Oklahoma Universal Service Fund (and Monthly Payout, Fee Assessment, Requests for Funding, if different);
- (I) PUD Fee Assessment (and Fee Assessment Payments, if different);
- (J) Primary emergency;
- (K) Afterhours emergency;
- (L) Annual reporting;
- (M) Attorney for regulatory matters; and
- (N) Community Liaison.

(d) **Other information.** Each OSP shall promptly furnish such other information as PUD or the Commission may request, unless otherwise ordered by the Commission.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 15 Ok Reg 3092, eff 7-15-98; Amended at 16 Ok Reg 2312, eff 7-1-99; Amended at 19 Ok Reg 2005, eff 7-1-02; Amended at 36 Ok Reg 712, eff 7-25-19]

165:57-5-24. Record of customer complaints

(a) Each OSP shall maintain a record of customer complaints, in the format suggested by the Director of the Consumer Services Division and included as Appendix H to this Chapter, that compiles complaints that have been received by the company and includes, at a minimum:

- (1) The aggregators and/or end-users name;
- (2) The account number;
- (3) The applicable complaint code;
- (4) The date the complaint was filed; and,
- (5) The resolution of the complaint, to include the amount of refund, if any, given.

(b) If the account number only is utilized, a cross-reference with the aggregators and/or end-users name must also be readily available.

(c) The categories of complaints to be used shall be negotiated between the individual OSP and the Director of the Consumer Services Division. A list of the suggested customer complaint codes is attached as Appendix I to this Chapter.

(d) Each complaint shall count as a separate report regardless of whether subsequent reports relate to the same difficulty or dissatisfaction with the provision of the OSP's services.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 14 Ok Reg 2872, eff 7-15-97; Amended at 15 Ok Reg 3092, eff 7-15-98; Amended at 16 Ok Reg 2312, eff 7-1-99]

165:57-5-25. Report attestation

All reports required by this Chapter to be submitted to the Commission shall be attested to by an officer or manager of the OSP under whose direction the report is prepared, or if under trust or receivership, by the receiver or a duly authorized person, or if not incorporated, by the proprietor, manager, superintendent, or other official in charge of the OSP's operation.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

SUBCHAPTER 7. TARIFFS

165:57-7-1. Tariffs and/or Terms of Service required

(a) All OSPs must file a tariff describing the services offered, the terms and conditions under which each of the services are provided and all effective rates and charges for operator services. Only those services contained in the OSP's tariff filed

and approved by the Commission or Terms of Service may be provided to customers and only those rates and charges contained in the OSP's tariff on file with the Commission or Terms of Service may be charged to customers. The filed tariffs and/or Terms of Service are binding on the OSP and no deviation of any kind from the filed tariff or Terms of Service is permitted.

(b) Except as required in OAC 165:57-7-5, not later than thirty (30) days after the effective date of the tariff, an original and two (2) copies of the approved tariff which conforms to OAC 165:57-7-3 shall be provided to the Public Utility Division.

(c) An operator service provider which has a written tariff on file with the Commission may withdraw the tariff if the operator service provider:

- (1) provides written notice to the Director of the Public Utility Division and the Oklahoma Attorney General that it is withdrawing the tariff,
- (2) posts the Terms of Service, and
- (3) provides the Commission with the web page information where the language is posted.

(d) The Commission maintains the same authority to review the Terms of Service of an operator service provider, as permitted by OAC 165:57-7-5.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 14 Ok Reg 2872, eff 7-15-97; Amended at 16 Ok Reg 2312, eff 7-1-99; Amended at 19 Ok Reg 2005, eff 7-1-02; Amended at 35 Ok Reg 1057, eff 9-14-18]

165:57-7-2. Information to be included in an OSP's tariff

The tariff shall include the following information:

- (1) Table of contents.
- (2) Symbols for changes in tariff.
- (3) Applicability of the tariff.
- (4) Accessibility and availability of tariffs. Each OSP shall, upon request by an aggregator or end-user, provide a copy of any relevant portion of this Chapter, and/or the applicable portion of the requested tariff(s) to such aggregator or end-user, at a reasonable charge.
- (5) Detailed billing and collection information.
- (6) Detailed information regarding handling of complaints and disputed charges.
- (7) All services provided by the company and a detailed explanation of each.
- (8) All rates and charges applicable to services provided in Oklahoma.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 14 Ok Reg 2872, eff 7-15-97]

165:57-7-3. Requirements as to size, form and identification of tariffs

(a) All tariffs shall be in loose leaf form of a size eight and one-half inches by eleven inches (8-1/2' x 11') and shall be plainly printed or reproduced on only one side of paper of good quality. The tariff shall be in the format presented in Appendix B to this Chapter. The front page of the tariff shall contain the name of the OSP and location of its principal office.

(b) Tariff sheets are to be numbered consecutively. Each sheet shall show the Cause Number, wherein the tariff was approved by the Commission, and, where applicable, the Order Number for such approval. Each sheet shall show an effective date, an issue date, a revision number, section number or title, sheet number, name of the OSP along with all trade names used by the OSP, and the name of the tariff in a consistent manner. Sheets issued under new numbers are to be designated as original sheets. Sheets being revised should show the number of the revision, and

the sheet numbers shall be the same.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 14 Ok Reg 2872, eff 7-15-97; Amended at 15 Ok Reg 3092, eff 7-15-98; Amended at 19 Ok Reg 2005, eff 7-1-02]

165:57-7-4. Symbols for changes

(a) Each OSP shall include in their tariff, notations indicating each change made with the proposed application or revision. Notations (referred to as tariff symbols) to be used are:

- (1) "AT" means addition to text.
- (2) "C" means correction.
- (3) "CP" means change in practice.
- (4) "CR" means change in rate.
- (5) "CT" means change in text.
- (6) "DR" means discontinued rate.
- (7) "FC" means a change in format lettering or numbering.
- (8) "MT" means moved text.
- (9) "NR" means new rate.
- (10) "RT" means removal of text.

(b) In addition to symbols for changes, each provision or rate element changed shall contain a vertical line which clearly shows the exact number of lines being changed.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95]

165:57-7-5. Revisions to tariffs

(a) New or revised tariffs describing operator services shall have an effective date on or after the day following the day the submission is delivered to the Director of the Public Utility Division, subject to the following conditions:

- (1) The submission delivered to the Public Utility Division shall include a cover letter, a mark-up copy of the new or revised tariff pages in legislative format, and a final copy of the new or revised tariff pages.
- (2) The effective date of the new or revised tariff submitted to the Commission shall be stated on the face of the new or revised tariff pages.
- (3) A new or revised tariff submitted to the Commission shall comply with the notice requirements of this subchapter. A copy of the notice shall accompany the submission. The submission shall clearly identify the date of notice and the method used to provide notice.
- (4) The Commission may permit electronic submission of new or revised tariffs when technically feasible.

(b) After investigating, the Public Utility Division may file an application with the Commission seeking to revoke or modify any tariff. After notice and hearing, the Commission may issue an order prospectively revoking or modifying any tariff for good cause.

(c) The burden of proof to show that a proposed or revised tariff is just and reasonable shall be upon the company proposing the new or revised tariff.

(d) Notice of rate increase. Prior to or concurrent with the effective date of any increased rate, the OSP shall provide notice to the Director of the Public Utility Division, the Oklahoma Attorney General, and the affected aggregators or end-users of the increase. Said notice shall be provided by any of the following:

- (1) Prominent display on the aggregator's or end-user's bill;
- (2) Direct mailing;
- (3) Prominent display on an insert in the end-user's bill; or,

(4) Any other method of notice approved by the Director of the Public Utility Division.

(e) Failure to provide the information required by this Section at the time of submission may result in the proposed tariff revision(s) and/or new service offering(s) being suspended pursuant to OAC 165:57-7-6 and, if suspended, the tariff revision(s) and/or new service offering(s) shall not be placed into effect under any circumstances, until further order of the Commission.

(f) The burden of proof to show that a proposed or revised tariff is just and reasonable shall be upon the company proposing the new or revised tariff.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 14 Ok Reg 2872, eff 7-15-97; Amended at 15 Ok Reg 3092, eff 7-15-98; Amended at 16 Ok Reg 2312, eff 7-1-99; Amended at 21 Ok Reg 2126, eff 7-1-04; Amended at 35 Ok Reg 1057, eff 9-14-18]

165:57-7-5.1. Name changes and/or trade name additions

Tariff revisions to reflect a change to the name and/or change, deletion or addition of a trade name under which the OSP will be doing business in the State of Oklahoma shall become effective, without Commission order, the date of filing such tariffs, provided the filing contains the attestation required by subparagraph (5) of this Section. The request for name change or request for change, addition, or deletion of a trade name shall be accompanied by the following, as applicable:

- (1) An amended Certificate of Incorporation effecting a change of name pursuant to 18 O.S. § 1076, 1077 or 1031;
- (2) A Trade Name Report filed with the Secretary of State as provided in 18 O.S. § 1140;
- (3) A Withdrawal of Trade Name Report filed with the Secretary of State as provided in 18 O.S. § 1140.1;
- (4) A Transfer of Trade Name Report filed with the Secretary of State as provided in 18 O.S. § 1140.2; and,
- (5) An attestation that the tariffs are identical to the existing tariffs of the OSP except for the name change or change, addition or deletion of a trade name.

[Source: Added at 16 Ok Reg 2312, eff 7-1-99]

165:57-7-5.5. Confidential information related to tariffs

(a) With the exception of information and data related to the dollar and percentage impacts of the proposed change(s) on aggregator or end-user rates and the rationale for the proposed tariffs, all information and data required by OAC 165:57-7-5(d) to be delivered to the Public Utility Division Staff concurrent with the filing of a proposed tariff revision and any additional financial or cost data, or data which is identifiable to a specific customer, that is requested by the Public Utility Division Staff, shall be deemed confidential records or trade secrets of the IXC, telecommunications service provider, payphone service provider, reseller or OSP under the Oklahoma Open Records Act as provided for by 51 O.S. 24A.22 and shall be kept confidential by the Commission, unless successfully challenged.

(b) All confidential information and data submitted to the Public Utility Division Staff under subsection (a) of this Section shall be conspicuously labeled "Confidential information and data submitted pursuant to OAC 165:57-7-5(d)."

(c) For each tariff filing submitted by an IXC, telecommunications service provider, payphone service provider, reseller or OSP in accordance with OAC 165:57-7-5(d), the same confidential information and data provided to the Public Utility Division Staff shall also be provided to the Office of the Attorney General of the State of

Oklahoma upon the signing of a Proprietary Agreement by the Attorney General or its representative.

(d) All confidential information and data provided to the Office of the Attorney General under subsection (c) of this Section shall be conspicuously labeled "Confidential information and data submitted pursuant to OAC 165:57-7-5(d)."

[Source: Added at 14 Ok Reg 2872, eff 7-15-97; Amended at 15 Ok Reg 3092, eff 7-15-98]

165:57-7-6. Suspension

(a) Any tariff filed with the Commission or submitted to the Director of the Public Utility Division pursuant to OAC 165:57-7-5 may be suspended by Commission Order, with or without notice or hearing, on recommendation by Public Utility Division Staff. The Commission may also order suspension of proposed revisions on motion by an aggrieved party, after notice and hearing.

(b) To lift the suspension of any filing or submission made by an OSP pursuant to this Chapter, whether the application has been subsequently amended after the suspension or not:

(1) The applicant shall file a motion pursuant to OAC 165:5-9-2(b), which requests that the suspension be lifted, giving notice to the Oklahoma Attorney General and to all parties of record; or,

(2) The application may be set for hearing on the merits at a time to be agreed upon by the Public Utility Division and the applicant.

(c) If the application is scheduled for hearing pursuant to paragraph (b)(2) of this Section and the time for filing an objection to the amended filing has not elapsed, the Notice of Hearing shall be sent to the Oklahoma Attorney General and to any party(ies) of record.

[Source: Added at 12 Ok Reg 2157, eff 7-1-95; Amended at 15 Ok Reg 3092, eff 7-15-98; Amended at 35 Ok Reg 1057, eff 9-14-18]

165:57-7-7. Objections

Any entity wishing to object to an initial tariff filed pursuant to this Chapter may file objections with the Commission's Court Clerk within fifteen (15) days after the proposed tariff is filed. Any such objection shall comply with the requirements of OAC 165:5, the Commission's Rules of Practice, and this Chapter, and must contain a specific description of the basis for the objection and all information necessary to allow evaluation of the objection. The objecting entity shall promptly serve its objection on the OSP which filed the proposed initial tariff, the Director of the Public Utility Division and the Oklahoma Attorney General.

[Source: Added at 12 Ok Reg 3334, eff 8-11-95; Revoked at 15 Ok Reg 3092, eff 7-15-98]

SUBCHAPTER 10. BILLING AND BILLING PAYMENT REQUIREMENTS

165:57-10-1. Billing period

Bills to customers shall be issued monthly, unless the OSP's approved terms and conditions of service prescribe a different interval. Bills may be issued on a billing cycle. All end-users shall receive their bills via the United States mail, unless the end-user agrees with the operator service provider to receive a bill through different means, such as electronically via the Internet. Whatever the method of delivery, bills shall comply with 165:57-10-3.

[Source: Added at 15 Ok Reg 3092, eff 7-15-98; Amended at 19 Ok Reg 2005, eff 7-1-02]

165:57-10-2. Bills rendered by a billing agent

(a) An OSP shall not act as a billing agent for a reseller, telecommunications service provider, IXC or another OSP, unless the OSP fully discloses on the bill the toll-free number of the certificated entity for whom the bill is being rendered or, if the billing agent has been given authority to make adjustments to the customer's bill, its toll-free number.

(b) An OSP shall not utilize the services of a billing agent unless the OSP requires that the billing agent follow the procedures set forth in OAC 165:57-10-5 through OAC 165:57-10-11.

[Source: Added at 15 Ok Reg 3092, eff 7-15-98]

165:57-10-3. Content of bills

(a) **Bill organization.** Telephone bills shall be clearly organized, and must comply with the following requirements:

(1) The name of the service provider associated with each charge must be clearly and conspicuously identified on the telephone bill.

(2) Where charges for two or more service providers appear on the same telephone bill, the charges must be separated by service provider.

(3) The telephone bill must clearly and conspicuously identify any change in the service provider, including identification of charges from any new service provider.

(4) The telephone bill shall clearly and conspicuously label all fees, surcharges, taxes, and usage rates, associated with the customer's use of the provider's service, including but not limited to, calling plans, universal service fees, access fees, and other separated charges.

(b) **Descriptions of billed charges.** Charges contained on telephone bills must be accompanied by a brief, clear, non-misleading, plain language description of the service or services rendered. The description must be sufficiently clear in presentation and specific enough in content so that end-users can accurately assess that the services for which they are billed correspond to those that they have requested and received, and that the costs assessed for those services conform to their understanding of the price charged.

(c) **Quantification of billed charges.** All bills shall also contain the following:

(1) Balance in each billed account at the beginning of the current billing cycle, using a term such as "previous balance";

(2) Amount of the charges debited to each billed account during the current billing cycle, using a term such as "current service";

- (3) Amount of payments made to each billed account from the previous billing cycle, using a term such as "payments";
- (4) Amount of the charges debited to each billed account during the current billing cycle for untimely payment of past charges, using a term such as "late charge";
- (5) A listing of the closing dates of the current billing cycle and the outstanding balance in each billed account on that date, specifying the "current amount due" and the "past due";
- (6) A listing of the statement, or payment, due date.

(d) Disclosure of inquiry contacts.

- (1) Billing agents shall prominently display, a toll-free number or numbers by which end-users may inquire or dispute any charges on each bill. Where the end-user does not receive a paper copy of his or her telephone bill, but instead accesses that bill only by e-mail or internet, the carrier may comply with this requirement by providing an e-mail or web site address on each bill. Each carrier must make a business address available upon request from an end-user.
- (2) An operator service provider may list a toll-free number for itself, a clearinghouse, or other third party, provided such party possesses sufficient information to answer questions concerning the end-user's account and is fully authorized to resolve the end-user's complaints on the service provider's behalf.

165:57-10-4. [RESERVED]

[Source: Reserved at 15 Ok Reg 3092, eff 7-15-98]

165:57-10-5. Due date and penalty

Unless otherwise authorized by the Commission, bills shall be payable immediately upon receipt and past due twelve (12) days after the date of the OSP mailing or after any deferred payment date previously established either by oral or written agreement between an end-user and the OSP. The date after which the bill is past due shall be stated on the bill. If the bill is not paid when past due, the OSP may apply late payment charges on any unpaid balance as provided in its filed, approved tariffs. Payment shall not be considered late if it is received by the due date at an authorized office.

165:57-10-6. [RESERVED]

[Source: Reserved at 15 Ok Reg 3092, eff 7-15-98]

165:57-10-7. Request for payments other than normal billings

The OSP shall issue a bill for any additional charges other than those charges normally billed on the regular billing cycle. The OSP shall not issue a notice of disconnection prior to five (5) days after the mailing of a bill for additional charges.

[Source: Added at 15 Ok Reg 3092, eff 7-15-98]

165:57-10-8. [RESERVED]

[Source: Reserved at 15 Ok Reg 3092, eff 7-7-98]

165:57-10-9. Disputed charges

(a) In the event of a dispute between an end-user and an OSP, the OSP shall make such investigation as is required by the particular case, and report the results thereof to the end-user.

(b) In the event the dispute is not resolved, the OSP shall inform the end-user that the end-user may utilize the complaint procedures of the Commission's Consumer Services Division. The information to be provided to consumers shall be:

- (1) The street address of the Consumer Services Division, which is Oklahoma Corporation Commission, Consumer Services Division, 2101 N. Lincoln Blvd. Suite 460, Oklahoma City, OK 73105.
- (2) The mailing address of the Consumer Services Division, which is P. O. Box 52000-2000, Oklahoma City, OK 73152-2000.
- (3) The telephone numbers of the Consumer Services Division, which are (405) 521-2331 and (800) 522-8154.
- (4) The hours of operation of the Consumer Services Division, which are 8:00 a.m. to 4:30 p.m., Monday through Friday.

(c) When a complaint has been made with the Commission's Consumer Services Division, the OSP shall be required to forego disconnect procedures on account of nonpayment of any portion of accumulated disputed charges pending investigation by the Commission's Consumer Services Division. The end-user shall be required to pay the undisputed part of the bill, and if not paid, the OSP may discontinue service.

165:57-10-10. [RESERVED]

[Source: Reserved at 15 Ok Reg 3092, eff 7-15-98]

165:57-10-11. Billing for unanswered calls

OSPs shall not knowingly bill for unanswered telephone calls regardless of whether equal access is available. If a form of answer supervision is available in equal access areas, the OSP is restricted from billing for unanswered calls in those areas regardless of whether the OSP subscribes to equal access.

[Source: Added at 15 Ok Reg 3092, eff 7-15-98]

SUBCHAPTER 12. NOTIFICATION OF CHANGES TO OWNERSHIP, CONTROL OR BUSINESS OPERATION

165:57-12-1. Notification of transactions affecting the ownership or control of an OSP

(a) The parties to an agreement, the performance of which will result in the movement of some or all of the regulated telecommunications services customers of one or more certificated operator service providers to a different legal entity, shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and eight (8) copies of a Notification of Transaction with the Commission's Office of the Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(b) The parties to an agreement, the performance of which will result in the transfer of a Certificate of Convenience and Necessity, with or without the transfer of a

tariff, from one legal entity to another legal entity shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and eight (8) copies of a Notification of Transaction with the Commission's Office of the Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(c) The parties to an agreement, the performance of which will result in the merger of one or more legal entities with a surviving legal entity which is certificated to provide operator services, shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and eight (8) copies of a Notification of Transaction with the Commission's Office of the Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(d) This Section shall not require notification to the Commission of transactions which involve only changes in the ownership of the stock of an operator service provider. Such transactions are not subject to regulation by the Commission.

(e) The Notification of Transaction shall include a copy of the agreement, with all exhibits and schedules, and set forth the following information, if applicable:

- (1) The name of the acquiring entity and the acquired entity.
- (2) Identification of the acquired assets.
- (3) The anticipated completion date and the effective date (if different) of the transaction.
- (4) The name of the entity(ies) which will be providing telecommunications services in Oklahoma subsequent to the effective date of the transaction (the "surviving entity").
- (5) The name, address and telephone number of a contact person for purposes of the Notification of Transaction.
- (6) The names and qualifications of the individuals who will serve as officers and management of the surviving entity.
- (7) The name(s), address(es) and telephone number(s) of the representatives of the surviving entity who will be the contact(s) for the Public Utility Division and the Consumer Services Division and will be primarily responsible for:
 - (A) Providing customer service;
 - (B) Repair and maintenance;
 - (C) Answering complaints;
 - (D) Authorizing and/or furnishing refunds to customers;
 - (E) Tariff issues; and,
 - (F) Receiving Notices related to causes docketed at the Commission.
- (8) An affidavit, including a financial statement, that states that the surviving entity possesses the financial ability to provide operator service provider services in the State of Oklahoma.
- (9) A copy of the notice which will be provided to affected customers informing them of the transaction and any change in the name of the entity which provides telecommunications services to them or in their rates, charges or terms and conditions of service as a result of the transaction.
- (10) Identification of any changes in services to be offered or tariffed rates to affected customers required by the transaction.
- (11) A narrative and/or schematic description of the relationship between or among the acquired and acquiring entities and the surviving entity.

(12) An acknowledgment that any tariff revisions shall only be accomplished in a separate filing.

(13) A statement of the approximate number of Oklahoma customers.

(f) At the time of filing the Notification of Transaction, the acquiring entity shall provide a copy of the Notification of Transaction, with all attachments thereto, to the Office of the Attorney General of the State of Oklahoma.

(g) The Commission Staff shall review the Notification of Transaction for the purpose of determining whether the proposed transaction should be approved and, in the case of mergers, whether the surviving entity should be allowed to provide telecommunications service in Oklahoma after the effective date of the transaction under the authority of any existing Certificate of Convenience and Necessity. The Commission shall act on a notification within thirty (30) business days of the date the notification is filed. No reportable transaction shall be consummated except by order of the Commission. Any person wishing to object to the proposed filing must file an objection with the Commission's Office of the Court Clerk no later than fifteen (15) days after the proposed filing. The Attorney General of the State of Oklahoma shall be granted intervention in such proceeding, if requested.

(h) Within thirty (30) business days of the filing of the Notification of Transaction, the Commission Staff may file a Continuance of Review in the Cause stating that the Commission Staff has not completed its review of the transaction and shall require an additional specified time, not to exceed an additional thirty (30) calendar days, in which to complete such review. The Commission Staff shall accompany such a Continuance of Review with a specification of the additional information, if any, needed to complete this review.

(i) The Commission Staff may, if it determines appropriate, file a Notice in the Cause requiring the acquiring entity and/or the surviving entity to show cause that the proposed transaction and/or merger is lawful, fair to the customers and in the public interest. The filing of such Notice by the Commission Staff will not alone suspend the authority of any entity to operate under an existing Certificate of Convenience and Necessity. Simultaneously with the filing of any such Notice, the Commission Staff shall propose a procedural schedule, including a date for hearing which shall be held within ninety (90) calendar days of the date of the filing of the Notification of Transaction, unless otherwise ordered by the Commission. If such a Notice is filed by the Commission Staff, the acquiring entity and/or surviving entity shall have the burden of establishing that the proposed transaction(s) is lawful, fair to the customers and in the public interest.

(j) When applicable, after approval of notification of transaction(s), and not later than thirty (30) days after transaction consummation, an original and two (2) copies of the approved tariffs, which conform to OAC 165:57-7-3, shall be provided to the Public Utility Division.

[Source: Added at 15 Ok Reg 3092, eff 7-15-98; Amended at 16 Ok Reg 2312, eff 7-1-99; Amended at 19 Ok Reg 2005, eff 7-1-02]

165:57-12-2. [RESERVED]

[Source: Reserved at 15 Ok Reg 3092, eff 7-15-98]

165:57-12-3. Cessation of business in Oklahoma

(a) At least thirty (30) days before the effective date of the cessation of the provisioning of operator service(s) in the State of Oklahoma, an OSP shall file an original and eight (8) copies of an application for withdrawal of its Certificate of Convenience and Necessity and cancellation of its tariffs and provide Notice of

such filing to the Attorney General of the State of Oklahoma.

(b) An application for withdrawal shall include as attachments the following information, which must be certified as true and correct by an officer of any corporate applicant, or an authorized representative of an unincorporated applicant:

(1) The contact person who will be responsible for concluding all outstanding business with the Commission and customers;

(2) The date of withdrawal;

(c) Notice of discontinuance shall be sent by regular mail to all of the OSP's customers. The notice shall be in a form approved by the Director of the Public Utility Division, and shall give the exact date that service will cease and contain information as to the procedure for any refunds due customers.

(d) Unless provided otherwise in this Chapter, no withdrawal and/or cancellation of an existing Certificate of Convenience and Necessity and tariff shall be granted except by Order of the Commission, after such notice and hearing, if any, as directed by the Commission.

(e) The Commission Staff may file a motion to cancel an existing Certificate of Convenience and Necessity and tariff, at the company's request and at the option of the Commission Staff. The request may be in the form of a letter to the Director of the Public Utility Division. The letter will conform with subsections (b) and (c) of this Section.

CHAPTER 58. FACILITATION AND PROVISIONING OF PAYPHONE SERVICE

[Authority: OKLA. CONST. art IX, § 18; 17 O.S., §§ 131 et. seq. and 139.1]

[Source: Codified 5-15-97]

SUBCHAPTER 1. GENERAL PROVISIONS

165:58-1-1. Purpose; short title

- (a) This Chapter establishes the Oklahoma Corporation Commission rules governing the regulation and operations of Payphone Service Providers in Oklahoma, which may be cited by the short title as the Payphone Rules.
- (b) This Chapter is intended to define good business practices under normal conditions, to assure adequate service, to prevent collection of unfair charges from end-users, and to protect payphone service providers from unreasonable demands.
- (c) This Chapter is further intended to permit lawful market-driven price and service competition among payphone service providers by applying such regulatory requirements as are necessary to assure public access to payphone services, under tariff provisions which are not unjustly discriminatory, and to preclude unjust and unreasonable rates and charges in such market.
- (d) This Chapter is intended to establish public interest payphones for the purpose of making telecommunications services available in the interest of public convenience, health, safety and welfare, at locations where there would otherwise not be a payphone.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-2. Jurisdiction

The Oklahoma Corporation Commission, by virtue of Article IX §18 et seq. of the Constitution of the State of Oklahoma, 17 O.S. Section 131 et seq., and enactments of the Oklahoma Legislature, has authority and responsibility to supervise, regulate, and control payphone service providers seeking to or providing telecommunications service in the State of Oklahoma, and to enact rules and regulations in connection therewith.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-3. Application of rules

This Chapter shall apply to every payphone service provider seeking to or providing telecommunications service in the State of Oklahoma, including incumbent LECs and certificated IXCs providing payphone service in the State of Oklahoma as of January 1, 1996, and, where applicable, to every telecommunications service provider facilitating the provisioning of payphone service, which providers are, by law, subject to the jurisdiction of the Oklahoma Corporation Commission. (See Exclusions at OAC 165:58-1-15.)

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-4. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Aggregator" means any person or entity that, in the ordinary course of its operations, makes telephones available to the public or to transient users of its premises for intrastate telephone calls including calls using an operator services provider; i.e., customers of an OSP. Aggregators include, but are not limited to, hotels, motels, hospitals, universities, airports, gas stations and payphone service providers. The term "Aggregator" is not applicable to coinless payphones provided for use only by inmates at state, federal, local and county jails and correctional institutions, as provided for by 17 O.S. (1991) §139.1, but shall include payphones provided for public use in visitation or other areas of such jails and correctional institutions.

"Automatic Number Identification ("ANI")" means the automatic transmission by the local switching system of the originating telephone number to an interexchange telecommunications carrier or other provider of telecommunications service or the operator of a 911 system.

"Call completion" means a call that is answered by the called party.

"Certificate of Convenience and Necessity" as used in this Chapter means an order issued by the Commission authorizing a person, firm, partnership, corporation, cooperative corporation, or other lawful entity to provide telecommunications service in the State of Oklahoma, after the filing of an application and approval by the Commission.

"Commission" means the Oklahoma Corporation Commission.

"Competitive local exchange carrier ("competitive LEC")" means, with respect to an area or exchange(s), a telecommunications service provider that is certificated by the Commission to provide local exchange service in such area or exchange(s) within the State of Oklahoma after July 1, 1995.

"Customer trouble report" means any oral or written report given to the payphone service provider's repair department or contact person by an end-user relating to a defect or difficulty or dissatisfaction with the payphone service provider's instrument and/or service(s).

"End-user" means a member of the general public who uses a payphone.

"FCC" means the Federal Communications Commission.

"Incoming call screening" means a service that identifies the type of incoming calls, such as collect or third-party billed calls, for the purpose of restricting call completion.

"Incumbent local exchange company ("incumbent LEC")" means, with respect to an area or exchange(s), any telecommunications service provider furnishing local exchange service in such area or exchange(s) within the State of Oklahoma on July 1, 1995, pursuant to its Certificate of Convenience and Necessity or grandfathered authority.

"Interexchange telecommunications carrier ("IXC")" means any person, firm, partnership, corporation, or other entity, except incumbent LECs, engaged in furnishing regulated interexchange telecommunications services under the jurisdiction of the Commission.

"Operator Service Provider ("OSP")" means any common carrier, certificated by the Commission that provides intrastate operator services, or any other person or entity certificated by the Commission to provide operator services.

"Operator services" means the initiation of any intrastate telecommunications service, including but not limited to, services from an aggregator location, which services include, as a component, any automated or live

assistance to an end-user for the purpose of arranging billing or completion, or both, of an intrastate telephone call.

"Outgoing call screening" means a two-digit code passed by the local switching system with an ANI at the beginning of each call that provides information about the originating line.

"Payphone service" means the provision of telecommunications service by a payphone service provider through the means of a public or semi-public payphone, which, except for calls to public emergency telephone numbers and other numbers as may be designated by state or federal regulation, is utilized by the use of coins or alternative billing mechanisms, and is accessible by members of the general public. For purposes of this Chapter, coinless telephones provided in guest rooms by a hotel/motel are not payphones.

"Payphone service instrument" means the equipment placed by a payphone service provider to facilitate the provisioning of payphone services to the end-user at a given location.

"Payphone service provider" ("PSP") means any person, firm, partnership, corporation, cooperative corporation, or other lawful entity providing payphone service as defined in these rules.

"Person" means any individual, partnership, corporation, association, governmental subdivision, or public or private organization of any character.

"Public interest payphone" means a Commission-designated payphone instrument which is placed, at a location where there would otherwise not be a payphone, in the interest of making available telecommunications service for public welfare, health and/or safety reasons.

"Public use" means any item available to, or area accessible by the general public for their use.

"Reseller" means a common carrier offering interexchange telecommunications services to the public that does not own transmission facilities, but obtains telecommunications services from another carrier for resale to the public for profit.

"Service" means the offering of telecommunications for a fee directly to the public, or to such classes of users as to be effectively available directly to the public, regardless of the facilities used. Service shall not include the provision of nontelecommunications services, including but not limited to the printing, distribution, or sale of advertising in telephone directories, maintenance of inside wire, customer premises equipment and billing and collection, nor does it include the provision of mobile telephone service, enhanced services and other unregulated services. (Enhanced services means services that are delivered over communications transmission facilities and that use computer processing applications to: (1) change the content, format, code or protocol of transmitted information; (2) provide the customer new or restructured information; or, (3) involve end-user interaction with information stored in a computer.)

"Tariff" means all or any part of the body of rates, tolls, charges, classifications, and terms and conditions of service relating to regulated services offered, the conditions under which services are offered and the charges therefore, which have been filed with and approved by the Commission.

"Telecommunications" means the transmission, between or among points specified by the user, of voice or data information of the user's choosing, without change in the form or content of the information as sent and received.

"Telecommunications service provider ("TSP")" means all authorized providers of local exchange service, whether an incumbent LEC or a competitive

LEC.

"Terms of Service" means rates, charges and terms and conditions for regulated services that a reseller elects to post, in a searchable format, on a publicly available website.

"Zero minus ("0-") call" means an operator-assisted call where the calling party dials zero ("0") for an operator and waits until an operator comes on the line. The caller then states the telephone number they want to reach and the nature (person-to-person, collect, etc.) of the call.

"Zero plus ("0+") call" means an operator-assisted call where the calling party dials zero ("0") followed by the number being called, including the area code. This dialing pattern is used mostly for collect, credit card, person-to-person and third-party-billed calls. The caller indicates the type of call after dialing is completed and an operator may come on line.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98; Amended at 16 Ok Reg 2333, eff 7-1-99; Amended at 35 Ok Reg 1063, eff 9-14-18]

165:58-1-5. Interpretation of rules

The words contained in this Chapter shall be given their ordinary and customary meaning, with technical terms and words being construed as generally understood within the telecommunications industry, except where otherwise expressly provided. Where the rules of this Chapter establish service standards or objectives, substantial compliance will be deemed in compliance with this Chapter. Where the rules of this Chapter impose an absolute obligation upon the applicant, the payphone service provider and/or the telecommunications service provider, strict compliance is required.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-6. Relief from rules

Whenever compliance with any requirement of this Chapter would result in unreasonable hardship and/or excessive expense to the payphone service provider or the end-user, or for other good cause shown, the Commission may, by order, waive or modify the requirements of this Chapter upon application of any interested person. The Commission may grant temporary relief pending hearing.

165:58-1-7. Supremacy

Every tariff, rule, regulation, or agreement relating to the subject matter of this Chapter is superseded by this Chapter and is deemed amended to conform with this Chapter. With regard to telecommunications service providers and IXCs providing payphone service as of January 1, 1996, this Chapter is intended to supplement OAC 165:55, the Commission's Telecommunications Services rules, and where a conflict arises, the provisions of this Chapter shall supersede OAC 165:55 with respect to the provisioning of payphone service only.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98]

165:58-1-8. Exceptions or variances in tariffs

If a payphone service provider seeks an exception or variance from this Chapter in its tariffs or terms and conditions of service, such exception or variance shall be clearly shown on such proposed tariffs or terms and conditions of service,

sufficient to plainly bring to the Commission's attention the exact nature of the said exception or variance being sought. Any exception or variance not so marked or identified in such proposed tariff or terms and conditions of service shall be superseded by this Chapter to the extent that said exception or variance is in conflict therewith. Upon approval by the Commission, the variance shall indicate the number of the pertinent Commission order.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-9. Rules conform to law

This Chapter shall be construed to conform with the Oklahoma Constitution and with the laws of the State of Oklahoma.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-10. Controversy over rules

Whenever a controversy exists in connection with the interpretation of this Chapter or its applicability, or any right or duty imposed thereby, the Commission, upon application of any interested person and after notice and hearing, will enter such order thereon as it may deem appropriate.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-11. Severability

This Chapter shall not relieve, in any way, a payphone service provider from any of its duties under the laws of this State or the United States. If any provision of this Chapter is held invalid, such invalidity shall not affect other provisions or applications of this Chapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Chapter are declared to be severable. This Chapter shall not be construed so as to enlarge, diminish, modify, or alter the jurisdiction, powers, or authority of the Commission or the substantive rights of any person. The Commission may make exceptions to this Chapter for good cause shown.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-12. Conflict with Commission order

This Chapter shall not alter or amend any order of the Commission directed to a payphone service provider, except where the provisions thereof are in direct conflict with this Chapter, in which case this Chapter shall supersede the provisions of any such order to the extent of conflict only, unless otherwise ordered by the Commission.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-13. Conflict with filed tariffs

All tariffs and terms and conditions of service heretofore filed by a certificated IXC or incumbent LEC which currently provides payphones to the general public and whose tariffs have been approved by the Commission are not revoked, altered or amended by this Chapter, except to the extent they are in direct conflict with any provision of this Chapter, in which event such tariffs and terms and conditions of service are superseded by this Chapter to the extent of conflict only.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-14. Tariff conformance [REVOKED]

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Revoked at 16 Ok Reg 2333, eff 7-1-99]

165:58-1-15. Exclusions

(a) This Chapter shall not be applicable to coinless payphone service instruments provided for use only by inmates at state, federal, local and county jails and correctional institutions, as provided for by 17 O.S. (1991) §139.1. This Chapter shall be applicable to payphones located at such facilities which are available for public use.

(b) For purposes of this Chapter, coinless telephones provided in guest rooms by a hotel/motel are not deemed to be payphones.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-16. Confidential information

(a) If a payphone service provider is required by this Chapter to submit information to the Commission that the payphone service provider considers to be confidential, the payphone service provider shall file a motion for protective order concerning said confidential information.

(b) In the absence of a protective order, the Commission shall not be required to maintain confidentiality of information within its possession.

(c) Pending a determination regarding approval of any protective order by the Commission, the Staff may, at its option, review the information claimed to be confidential at a location supplied by the payphone service provider in Oklahoma City, Oklahoma.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-17. Public utility assessment fee

Each payphone service provider shall be subject to an annual assessment fee levied in accordance with Title 17 O.S. Section 180.11 and the provisions of OAC 165-5-3-20 et seq., which the payphone service provider shall be obligated to pay in a timely fashion consistent with the provisions contained in OAC 165:5-3-24.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-1-18. Universal service

Pursuant to OAC 165:59-3-40, every entity that operates or provides telecommunications service within the State of Oklahoma shall contribute, on a nondiscriminatory basis, into the Oklahoma Universal Service Fund.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98]

SUBCHAPTER 3. CERTIFICATES, REPORTS, AND RECORDS

PART 1. CERTIFICATE OF CONVENIENCE AND NECESSITY

165:58-3-1. Certificate of Convenience and Necessity

(a) **Requirement for Certificate of Convenience and Necessity.** No person or entity shall furnish payphone service under any name to any end-user in the State

of Oklahoma without first having secured from this Commission a Certificate of Convenience and Necessity to provide payphone service. Incumbent LECs and certificated IXC's providing payphone service prior to January 1, 1996, shall not be required to obtain an additional Order granting it a Certificate of Convenience and Necessity for the payphone services being provided on that date, except as provided in OAC 165:58-3-4.

(b) Application for Certificate of Convenience and Necessity. An application for a Certificate of Convenience and Necessity to provide payphone service in the State of Oklahoma shall be made pursuant to and in conformance with the requirements of Oklahoma law and any additional requirements set forth in this Chapter. An original and four (4) copies of the application for Certificate of Convenience and Necessity shall be filed at the Commission's Court Clerk accompanied by the established filing fee. An example of the format for the application for Certificate of Convenience and Necessity is available from the Public Utility Division.

(c) Application requirements for Certificate of Convenience and Necessity. An applicant to the Commission for a Certificate of Convenience and Necessity to provide payphone service in the State of Oklahoma shall be required to demonstrate its financial, managerial and technical ability to provide the requested payphone service in the State of Oklahoma. An application for a Certificate of Convenience and Necessity to provide payphone service, except as provided for in OAC 165:58-3-4, shall include information and attachments which are certified as true and correct by an officer of any corporate applicant, or an authorized representative of an unincorporated applicant in a format approved by the Director of the Public Utility Division.

(1) The application shall contain the following information:

(A) As applicable, the complete name, including any and all trade name(s) under which business will be conducted pursuant to 18 O.S. (1991) §1140, corporate or other headquarters street address and names/addresses of principal or corporate officers or partners of the entity proposing to provide payphone service to the public in the State of Oklahoma. Also, include the telephone number and, if applicable, the toll-free telephone number.

(B) If different from those provided pursuant to subparagraph (1) (A) of this subsection, the name(s) and address(es) of all officers and corporate or primary offices of the applicant for a Certificate of Convenience and Necessity located in the State of Oklahoma and the name(s) and address(es) of senior management personnel responsible for Oklahoma operations.

(2) The attachments to the application shall include the following:

(A) A copy of the applicable certificate, issued to corporations by Oklahoma's Secretary of State, to transact business in the State of Oklahoma or for noncorporations, issued by the County Clerk's Office in each county in which the applicant intends to operate payphones.

(B) A copy of the Corporate Trade Name Report, issued by Oklahoma's Secretary of State, shall be provided for each and every trade name, i.e. d/b/a, utilized by the payphone service provider.

(C) A financial statement.

(D) Contact names(s), address(es) and telephone number(s) of the individual(s) responsible for providing service to customers, for

repair and maintenance, for answering complaints, and supplying refunds. This will be the principal contact to be utilized by the Commission's Consumer Services Division and Public Utility Division regarding questions and complaints against the payphone service provider.

(E) A brief description of its history of providing payphone service or other telecommunications services, in order to demonstrate its managerial and technical experience and abilities. Applicants without prior telecommunications or payphone experience shall provide documentation which supports its managerial and technical ability or other documentation as may be requested by the Commission.

(F) A complete set of proposed tariffs which shall include terms and conditions of service and all rates and charges for each service classification in a format approved by the Director of the Public Utility Division. The proposed tariffs shall conform with OAC 165:58-7.

(G) A copy of the applicant's proposed complaint report form which should comply with OAC 165:58-3-23. The complaint report form and complaint codes suggested by the Director of the Consumer Services Division are included as Appendix J and Appendix K, respectively, to this Chapter.

(H) A copy of the applicant's established procedures it intends to utilize in the State of Oklahoma to test its service location(s) and instrument(s).

(I) A statement signed in the presence of a Notary Public by an authorized agent of the payphone service provider attesting to the following:

- (i) Compliance with all requirements of all applicable federal, state and local laws and regulations concerning the provision of payphone service to the disabled and hearing impaired;
- (ii) Compliance with the National Electrical Safety Code;
- (iii) That the payphone service provider's instruments are registered pursuant to FCC Part 68;
- (iv) That the payphone service provider will pay the Public Utility assessment fee levied annually.
- (v) That the payphone service provider will contribute to the Oklahoma Universal Service Fund pursuant to OAC 165:59;
- (vi) That the payphone service provider understands the Commission's contempt authority;
- (vii) That the applicant will comply with all the signage requirements of OAC 165:58-5-3;
- (viii) That all statements contained in the application are true and correct;
- (ix) That the applicant possesses the financial ability to provide payphone service in the State of Oklahoma; and
- (x) That the applicant is familiar with and will comply with all federal and state laws, and the rules and orders of this Commission.

(J) A listing of any other certificate(s) issued by the Commission, and identification of the service(s) being provided pursuant to such Certificate(s).

(3) Additional information as requested by the Commission.

(d) **Requirements for expanding authority under an existing CCN.** An Applicant wishing to expand its service authority under an existing Certificate of Convenience and Necessity granted pursuant to Chapters 55, 56, 57, and/or 58, must make Application to the Commission and provide all information and notice as required in Sections 165:58-3-1(c) and 165:58-3-3. However, information submitted in support of a previous Application for certification, if such Application was approved by the Commission, may be used in support of the current Application by providing a written affirmation, signed before a Notary Public, and by someone with authority to bind the Applicant, stating that the previously submitted information is still true and correct, and circumstances have not changed. If the previously submitted information is no longer true and correct, or if circumstances have changed, Applicant shall submit updated information along with a written affirmation fully explaining all changed circumstances. This section shall not apply to an Applicant wishing to expand its existing service territory granted under an existing CCN. Such an Application shall be filed pursuant to OAC 165:58-3-2.

(e) **Amended application.** During the Staff's review of the payphone service provider's application, certain revisions and/or corrections to documents attached to the application may be requested. After the parties have agreed to the necessary revisions and/or corrections, such revisions and/or corrections shall be attached to an amended application. The payphone service provider shall file an original and four (4) copies of its amended application with the Commission's Court Clerk. Requested revisions and/or corrections may include, but shall not be limited to:

- (1) Revisions to the applicant's proposed tariffs;
- (2) Provision of documents omitted from the originally filed application; and/or,
- (3) Correction of the statement, in the body of the application only, regarding the services for which authority to provide is being sought.

(f) **Adjunct and/or additional services.** Applicants seeking a Certificate of Convenience and Necessity to provide payphone services, that also intend to provide interexchange services and/or operator services as an adjunct service, solely in conjunction with and through its own public and/or semi-public payphone instruments, may file a single application seeking authority for all of the services it desires to provide. However, the application provided for under this subsection shall sufficiently address each of the relevant provisions required by the applicable Commission rules for applicants seeking authority to provide such service(s) (e.g., Reseller rules at OAC 165:56; OSP rules at OAC 165:57, etc.) for such adjunct authority to be considered by the Commission. In addition, the payphone service provider must ensure that its tariff includes the information set forth in OAC 165:58-7-2 for every adjunct service it intends to offer in the provisioning of payphone service. Any applicant or holder of a Certificate of Convenience and Necessity to provide payphone service, who seeks to provide any additional service(s) (e.g., interexchange service, operator service, etc.) to the general public, which is/are regulated by the Commission but which exceeds the offering of adjunct service(s) as contemplated by this subsection, must file a separate application seeking authority to provide such additional service(s) and must fully comply with the appropriate Commission rules and regulations governing the

application process and the provisioning of such regulated service(s).

(g) **Additional Information.** The Public Utility Division Staff may issue data requests for additional relevant information as may be necessary. Data request responses should be submitted to the Staff member requesting the information, and not filed with the Commission's Court Clerk.

(h) **Approval requirement.** Unless provided otherwise in this Chapter, or by the laws of the State of Oklahoma, no Certificate of Convenience and Necessity shall be granted except by Order of the Commission, after such notice and hearing, if any, as directed by the Commission.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98; Amended at 16 Ok Reg 2333, eff 7-1-99; Amended at 19 Ok Reg 2012, eff 7-1-02; Amended at 21 Ok Reg 2130, eff 7-1-04; Amended at 35 Ok Reg 1063, eff 9-14-18]

165:58-3-2. Expansion of service territory.

An Applicant wishing to expand its service territory must make application to the OCC and provide all information and notice as required under 165:58-3-1(c) and 165:58-3-1(e). However, information submitted in support of a previous Application for certification, if such Application was approved by the OCC, may be used in support of the current Application by providing a written affirmation, signed before a Notary Public, and by someone with authority to bind the Applicant, stating that the previously submitted information is still true and correct. If the previously submitted information is no longer true and correct, Applicant shall submit updated information along with a written affirmation.

[Source: Reserved at 14 Ok Reg 21, eff 9-30-96 (emergency); Reserved at 14 Ok Reg 1261, eff 5-15-97; Amended at 21 Ok Reg 2130, eff 7-1-04]

165:58-3-3. Notice of hearing for Certificate of Convenience and Necessity [REVOKED]

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 16 Ok Reg 2333, eff 7-1-99; Revoked at 35 Ok Reg 1063, eff 9-14-18]

165:58-3-4. Streamlined certification

(a) Each incumbent LEC and certificated IXC providing payphone service in the State of Oklahoma on January 1, 1996 shall be exempt from the requirements of OAC 165:58-3-1(c) with respect to such payphone service. In the event that any such grandfathered payphone service provider, after January 1, 1996, desires to extend its payphone service into new territory or change the type of grandfathered payphone services being provided, such provider shall file an application specifying the expanded authority desired and shall comply with the requirements contained in OAC 165:58-3-4(c), (d), (e) and (f) before engaging in the provision of such extended payphone service.

(b) Any telecommunications service provider or certificated IXC not providing payphone service on January 1, 1996 shall be exempt from the requirements of OAC 165:58-3-1(c) with respect to payphone service, but shall comply with the requirements contained in OAC 165:58-3-4(c), (d), (e) and (f) before engaging in the provision of payphone service.

(c) A streamlined application for a Certificate of Convenience and Necessity to provide payphone service must be filed with the Commission containing the following information:

- (1) A complete set of proposed tariffs which shall include terms and conditions of service and all rates and charges for each service

classification in a format approved by the Director of the Public Utility Division, unless such tariffs have previously been filed and approved. The proposed tariffs shall conform with OAC 165:58-7.

(2) An affidavit stating that the applicant will comply with all requirements of OAC 165:58-5-3.

(3) A copy of the applicant's established procedures which are used to test and maintain its payphones.

(4) A statement signed before a Notary Public by an authorized agent of the payphone service provider, in a format approved by the Director of the Public Utility Division, attesting to the following:

(A) Compliance with all requirements of all applicable federal, state and local laws and regulations concerning the provision of

payphone service to the disabled and hearing impaired;

(B) Compliance with the National Electrical Safety Code;

(C) That the payphone service provider's instruments are registered pursuant to FCC Part 68; and,

(D) That the payphone service provider will pay the Public Utility assessment fee levied annually.

(E) That the payphone service provider will contribute to the Oklahoma Universal Service Fund pursuant to OAC 165:59; and,

(F) That the payphone service provider understands the Commission's contempt authority.

(5) Additional information as requested by the Commission and/or its Staff.

(d) Applicants under this streamlined process for a Certificate of Convenience and Necessity to provide payphone service shall give Notice of the streamlined application, by mail or personal service to the Attorney General of the State of Oklahoma and to any telecommunications service provider possessing a Certificate of Convenience and Necessity applicable to the area sought to be served by the applicant. Further, such Notice shall be published pursuant to 17 O.S. Section 132. No certificate shall issue until the expiration of thirty (30) days from the date of the first publication of the Notice. Publication shall be at the expense of the applicant and shall be made in one or more newspapers which has/have met the statutory requirements for publication of legal notices and which is/are in general circulation in each territory where service will be offered. A "Proof of Publication" document shall be filed in the cause with the Commission's Office of the Court Clerk within seven (7) days of the last publication date.

(e) If no objections have been filed to a streamlined application made pursuant to this Section within (thirty) 30 days from the date of the first publication of Notice, the Commission may grant the Certificate of Convenience and Necessity to provide payphone service without hearing. If objections are filed, a hearing shall be held on the streamlined application.

(f) When a streamlined application is granted for payphone service under this Section, the applicant shall not begin offering payphone service until the Director of the Public Utility Division has approved the applicant's tariff.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98; Amended at 16 Ok Reg 2333, eff 7-1-99]

165:58-3-5. Requirement of a payphone service provider before initiation of service

(a) Copies of the payphone service provider's Certificate of Convenience and Necessity to provide payphone service, or for providers grandfathered pursuant to

OAC 165:58-3-1(a) other evidence of authority to provide payphone service (i.e. a letter from the Director of the Public Utility Division), must be provided to the telecommunications service provider providing the access line at each payphone location prior to the establishment of service. Access to the public switched network shall be prohibited until such copies or appropriate evidence have been provided.

(b) Access lines shall only be provided to the entity possessing a Certificate of Convenience and Necessity in that entity's own name.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98; Amended at 16 Ok Reg 2333, eff 7-1-99]

165:58-3-6. Notice requirements when filing an Application for Certificate of Convenience and Necessity

Applicants seeking a certificate of Convenience and Necessity shall meet all notice requirements set forth in this Section.

(1) Requirements for filing an Application for Certificate of Convenience and Necessity. An application of a Certificate of Convenience and Necessity shall be delivered by mail, electronic mail or by personal service to the following people and/or entities:

- (A) The Oklahoma Attorney General;
- (B) The Commission's Director of the Public Utility Division;
 - (i) The Application delivered to the Director of the Public Utility Division shall be file-stamped by the Commission's Court Clerk and shall be delivered to the Director of the Public Utility Division in electronic copy form only.
 - (ii) The Director of the Public Utility Division shall update and post a report that includes reference to the Application of Certificate of Convenience and Necessity on the Commission's website, within five (5) business days of receipt.
- (C) The governing body of each Enhanced 911 Public Safety Answering Point (E911 PSAP) operating in the proposed service territory of the Applicant.

(2) Publication of a Notice of Application of a Certificate of Convenience and Necessity. The Notice required by 17 O.S. § 132 shall be published as follows:

- (A) In a newspaper of general circulation once a week for two (2) consecutive weeks with at least seven (7) days apart in each service territory affected.
- (B) Publication shall be at the expense of the applicant.
- (C) A "Proof of Publication" document shall be filed with the Commission's Court Clerk within fifteen (15) days of the last publication date.

(3) Requirements for a Notice of Hearing on an Objection to a Certificate of Convenience and Necessity.

- (A) When an objection is made in a cause for an Application for a Certificate of Convenience and Necessity, the Applicant shall promptly file a Notice of Hearing with the Commission's Court Clerk requesting a date for a hearing on the merits of the application.

(B) Within ten (10) business days prior to the date of the hearing, the Applicant shall serve the notice by delivering a file-stamped copy by mail, electronic mail or by personal service to the following people and/or entities:

- (i) The Oklahoma Attorney General;
- (ii) The Commission's Director of the Public Utility Division; and
- (iii) Any Intervenors, including the person or entity filing the objection.

[Source: Added at 35 Ok Reg 1063, eff 9-14-18]

165:58-3-7. Approval of initial tariffs

(a) No later than twelve (12) months after being granted a Certificate of Convenience and Necessity, pursuant to OAC 165:58-3-1, a payphone service provider shall file an application requesting approval of its initial tariffs, unless filed pursuant to OAC 165:58-3-1(c)(2)(F), which include the terms and conditions of service and all rates and charges for each service classification, in a format consistent with Subchapter 7 of this Chapter.

(b) All entities seeking approval of an initial tariff shall serve the file-stamped Application by mail, electronic mail, or personal service to the Oklahoma Attorney General and the Director of the Public Utility Division.

(c) The initial tariffs shall not become effective except by order of the Commission after such notice and hearing, if any, as directed by the Commission.

(d) Not later than thirty (30) days after approval of the initial tariffs, an original and two (2) copies of the approved tariffs, which conform to OAC 165:58-7-3, shall be provided to the Public Utility Division.

[Source: Added at 35 Ok Reg 1063, eff 9-14-18]

PART 3. GENERAL REQUIREMENTS FOR RECORDS AND REPORTS

165:58-3-10. Who shall file

The record keeping, report, and filing requirements listed in this Chapter shall apply to all payphone service providers operating in the State of Oklahoma as defined in OAC 165:58-1-4.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

PART 5. RECORD REQUIREMENTS

165:58-3-20. Location of records

All records required by this Chapter shall be kept at the general office of each payphone service provider and shall be made available to the Commission or its authorized representative at any reasonable time upon request. Each payphone service provider governed by this Chapter shall keep all of its books and records in accordance with good business practices and as required by this Chapter and at such place as they are normally kept in the usual course of business. The payphone service provider shall keep the Commission advised as to the location of these records and shall make them available to the Commission at reasonable times for examination and inspection at a location designated by the Commission.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-3-21. Retention of records

All records required by this Chapter shall be preserved for two (2) years.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-3-22. Records to be provided to the Commission

(a) **Annual report of operations.** Not later than April 1 of the year following the reporting year, each payphone service provider shall provide to the Director of the Public Utility Division an annual report in the format provided by the Director of the Public Utility Division.

(b) **Other information.** Each payphone service provider shall promptly furnish such other information as the Commission Staff may request, unless otherwise ordered by the Commission.

(c) **Contact names.** Each payphone service provider shall notify, in writing, the Director of the Public Utility Division and the Director of the Consumer Services Division within thirty (30) days of a change in the company-designated contacts for Public Utility Division and Consumer Services Division issues. If the below information is unavailable, the payphone service provider may seek a waiver from the PUD Director by making a request in writing.

(1) The update shall include the name(s), address(es) and/or telephone number(s) of the designated individual(s).

(2) The contact name(s) provided pursuant to this subsection shall be the individual(s) primarily responsible for:

- (A) Providing customer service;
- (B) Repair and maintenance;
- (C) Answering complaints;
- (D) Authorizing and/or furnishing refunds to customers;
- (E) Tariff issues;
- (F) Billing inquiries;
- (G) Regulatory matters;
- (H) Oklahoma Universal Service Fund (and Monthly Payout, Fee Assessment, Requests for Funding, if different);
- (I) PUD Fee Assessment (and Fee Assessment Payments, if different);
- (J) Primary emergency;
- (K) Afterhours emergency;
- (L) Annual reporting;
- (M) Attorney for regulatory matters; and
- (N) Community Liaison.

(d) **Other information.** Each payphone service provider shall promptly furnish such other information as PUD or the Commission may request, unless otherwise ordered by the Commission.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98; Amended at 16 Ok Reg 2333, eff 7-1-99; Amended at 19 Ok Reg 2012, eff 7-1-02; Amended at 36 Ok Reg 713, eff 7-25-19]

165:58-3-23. Record of Customer Complaints

(a) Each payphone service provider shall maintain a record of customer complaints, in the format suggested by the Director of the Consumer Services Division and included as Appendix J to this Chapter, that compiles complaints that have been received by the company and includes, at a minimum:

- (1) The instrument location;
- (2) The telephone number;
- (3) The applicable complaint code;
- (4) The date the complaint was filed; and,
- (5) The resolution of the complaint, to include the amount of refund, if any, given.

(b) The categories of complaints to be used shall be negotiated between the payphone service provider and the Director of the Consumer Services Division, subject to the approval of the Commission. A list of the suggested customer complaint codes is attached as Appendix K to this Chapter.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98]

165:58-3-23.1. Record of trouble reports

Each PSP shall maintain a complete written record of all customer trouble reports of service-affecting defects in payphone service provided by the PSP. The records shall identify the end-user or service affected, the time and date of the report, the nature of the defect reported, the action taken to correct the trouble, the date and time of trouble clearance or other disposition. Each PSP shall make a full and prompt investigation of every trouble report made to it by its end-users, either directly or through the Commission. It shall keep a record of each trouble report received. Each record shall show the name and address of the reporting end-user, the date and character of the trouble reported, and the adjustment or disposal made thereof, which record shall be retained for two (2) years. Records shall be kept of all trouble reports as defined by this Chapter.

[Source: Added at 16 Ok Reg 2333, eff 7-1-99]

165:58-3-24. Listing of payphone locations

Each payphone service provider shall maintain an updated and current list of its payphone locations. The listing shall include the applicable street location(s) and associated telephone number(s), if any, the name of the presubscribed operator service provider and long distance toll provider providing service at that location, and an up-to-date contact number for the OSP and the long distance toll provider. Each payphone service provider shall promptly furnish such information to the Commission Staff upon request.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98]

PART 7. REPORTING REQUIREMENTS

165:58-3-30. Report attestation

All reports required by this Chapter to be submitted to the Commission shall be attested to by an officer or manager of the payphone service provider under whose direction the report is prepared, or if under trust or receivership, by the receiver or a duly authorized person, or if not incorporated, by the proprietor, manager, superintendent, or other official in charge of the payphone service provider's operation.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

165:58-3-31. Due dates of reports

All periodic reports required by this Commission must be received on or before the following due dates unless otherwise specified in this Chapter or unless otherwise agreed to by the Director of the Public Utility Division:

- (1) Annual reports - Not later than May 1 of the year following the reporting calendar year.
- (2) Special and additional reports - As may be prescribed by the Commission.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97]

SUBCHAPTER 5. GENERAL REQUIREMENTS

PART 1. SERVICE REQUIREMENTS

165:58-5-1. Minimum service requirements

- (a) Each payphone service provider is responsible for the installation, maintenance, repair and operation of its payphone service instrument(s).
- (b) All payphone service instruments must be installed in compliance with the National Electrical Code and the National Electrical Safety Code.
- (c) Each payphone service provider is responsible for ensuring that its payphone service instrument(s) is/are registered and connected to the telephone network in compliance with Part 68 of the FCC Rules and Regulations and that the FCC registration number of each instrument to be connected shall be provided to the appropriate telecommunications service provider.
- (d) All installed payphone service instruments must be connected to the public switched network pursuant to tariffs authorized by the Commission and issued by a telecommunications service provider certificated to serve the location where each instrument is located, and each payphone service provider shall ensure that its equipment is installed and maintained such that it does not hinder, interfere with or preclude achievement of the following minimum standards:
 - (1) Dial tone: Ninety-five percent (95%) within three (3) seconds;
 - (2) Completion of calls: Ninety percent (90%) without encountering an all trunks, busy condition within the central office;
 - (3) Local interoffice trunks: Ninety-five percent (95%) of calls offered to the group will not encounter an all trunks busy condition; and
 - (4) Intrastate toll connecting trunks: Ninety-seven percent (97%) will not encounter an all trunks busy condition.
- (e) Each payphone service provider may only subscribe to and obtain intrastate service from certificated providers.
- (f) Payphone service providers are precluded from offering only coinless payphones in locations where the payphone service provider has entered into an exclusive contract.
- (g) An audible bell or other sound shall be required to indicate an incoming call, when applicable.
- (h) Each payphone service provider must follow the procedures established to test their payphone service, including each instrument and location.
- (i) All payphone service locations are subject to random and periodic inspections to assure compliance with Commission requirements. An example of the initial form which will be used by the Commission during inspections is attached as Appendix G to this Chapter. Changes to the inspection form may be made periodically to incorporate changes as needed.

(j) It will be a service objective of each payphone service provider to correct ninety percent (90%) of the interruptions of service on payphones on the next working day after the interruption is reported or discovered.

(k) Each payphone service provider shall maintain a toll-free number for the purpose of receiving customer trouble reports, which shall be answered twenty-four (24) hours a day.

(l) At a minimum, all payphone service providers shall:

(1) Allow access to an end-user's carrier of choice via 101XXXX, 1-800, 1-888 and 950 carrier access code dialing, without a coin;

(2) Allow free access to emergency calling, without requiring a coin or other method of payment;

(3) Provide the end-user access to local directory assistance;

(4) Allow end-users to place local and long distance calls, using any combination of nickels, dimes and quarters or, if the payphone instrument accepts same, currency, or alternative billing mechanisms (for example, but not limited to, calling/credit card calls, collect calls, and third-party billed calls);

(5) Maintain compliance with all applicable federal, state and local laws and regulations concerning the provision of payphone service to the disabled and hearing impaired;

(6) Ensure all keypads display both alpha and numeric representations;

(7) Subscribe to incoming call screening and outgoing call screening where available;

(8) Allow completion of local and long distance calls;

(9) Allow access to an operator without charge and without the use of a coin;

(10) Return any end-user deposited amount, if the call is not completed;

(11) Permit the caller or called party to terminate the call at no charge prior to completion of the call by the payphone service provider;

(12) Not limit the duration of local calls except for good cause shown through the filing of an application, after approval by the Commission. Any payphone service provider receiving such approval must also post information on or near each such payphone instrument sufficient to adequately inform the payphone end-user of the existence and extent of this limitation;

(13) Not impose any surcharge to the end-user for access to a telecommunications service provider;

(14) Not charge any end-user or called number for incomplete or unanswered calls;

(15) Not attach extension telephones to pay telephones, unless the pay telephone displays a notice that legibly and conspicuously states in capital letters, "YOUR CONVERSATION MAY BE OVERHEARD BECAUSE AN EXTENSION TELEPHONE IS ATTACHED TO THIS PHONE LINE."; and,

(16) The payphone service provider shall select a site for the payphone that will comply with state and city safety standards.

(m) Where the technology is not available to payphone service providers from incumbent LECs to allow access to dial 101XXXX calls described in paragraph (1) of subsection (l) of this Section, the requirement will be waived until such technology is offered by the incumbent LEC, and in any event not later than July 1, 1998.

(n) In addition to the requirement of OAC 165:58-5-3, an OSP/Aggregator shall disclose audibly and distinctly to the end-user, at no charge and before connecting any intrastate 0+ call, how to obtain the total cost of the call, including any and all surcharges, or the maximum possible total cost of the call, including any and all surcharges, before providing further oral advice to the end-user on how to proceed to make the call.

(o) The oral disclosure required in this Section shall instruct end-users that they may obtain applicable rate and surcharge quotations either, at the option of the provider of operator services, by dialing no more than two digits or by remaining on the line.

[Source: Reserved at 14 Ok Reg 21, eff 9-30-96 (emergency); Reserved at 14 Ok Reg 1261, eff 5-15-97]

165:58-5-3. Signage

(a) The following information shall be posted in a visible and readable location, on or near each payphone instrument:

- (1) The name, address and toll-free telephone number of the payphone service provider;
- (2) Instructions for use of the payphone, including instructions for accessing emergency services;
- (3) The name, address and toll-free number of the certificated provider of operator services and certificated long distance toll provider;
- (4) A written disclosure that the rates for all operator-assisted calls are available upon request, and that end-users have a right to obtain access to their carrier of choice and may contact their preferred carrier for information on accessing that carrier's service using that payphone;
- (5) A method of reporting service difficulties and obtaining refunds at no cost to the end-user;
- (6) The name, address, hours of operation (8:00 a.m.-4:30 p.m., Monday through Friday), and the local and toll-free telephone numbers of the Commission's Consumer Services Division, to which the end-user may direct complaints and questions regarding the payphone service provider and/or any instrument;
- (7) The name, address, and telephone number of the Federal Communications Commission;
- (8) If a payphone service instrument does not receive incoming calls, a notice shall be prominently displayed with either the words "OUTGOING CALLS ONLY" or "THIS TELEPHONE CANNOT RECEIVE TELEPHONE CALLS" or similar language approved by the Commission;
- (9) The payphone service instrument shall display the phone number of the instrument, and for each payphone service instrument, if any, for which emergency telephone number services capable of expediently identifying the instrument's location, in order to facilitate public safety response as set forth in OAC 165:55-13-10(a)(1)(E), do not exist, the provider of such payphone service instrument shall take reasonable steps to prominently display the physical address of the instrument;
- (10) The payphone service instrument shall display instructions on how to contact both local and long distance directory assistance;

- (11) The payphone signage shall include a notice that states "CHANGE NOT PROVIDED", if applicable;
- (12) Clearly identify the charge per local call;
- (13) Clearly identify if a charge per call for directory assistance is applicable; and
- (14) If an extension has been attached, a notice that legibly and conspicuously states in capital letters, "YOUR CONVERSATION MAY BE OVERHEARD BECAUSE AN EXTENSION TELEPHONE IS ATTACHED TO THIS PHONE LINE."

(b) Signage must be protected from the elements.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98; Amended at 16 Ok Reg 2333, eff 7-1-99]

165:58-5-4. [RESERVED]

[Source: Reserved at 14 Ok Reg 21, eff 9-30-96 (emergency); Reserved at 14 Ok Reg 1261, eff 5-15-97]

165:58-5-5. Access to emergency services

End-users must be able to access, where available, 911 emergency services, and 711 telecommunications relay services. The payphone service provider must allow 911 and 711 calls to be connected to the public service answering point at no charge without requiring a coin or credit card. Where 911 emergency service and/or 711 telecommunications relay services are not available, the caller must be instructed to dial "0" and calling "0" must, at no charge and without requiring a coin or credit card, directly connect the caller either with the local exchange service provider providing the payphone access line from which the call is made or with an OSP that will complete the emergency call at no charge.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 19 Ok Reg 2012, eff 7-1-02]

PART 3. PUBLIC INTEREST PAYPHONES

165:58-5-10. Public interest payphones

The Commission may, on a case-by-case basis, designate, establish or disconnect public interest payphones, and may determine minimum service requirements for each public interest payphone, so designated or established, upon the Commission's own application or the application of any interested party, after notice as required, including notice to the Attorney General, and after a hearing on the merits.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98]

SUBCHAPTER 7. TARIFFS

165:58-7-1. Tariffs and/or Terms of Service required

(a) All payphone service providers must file a tariff which sets forth all terms and conditions of service and all regulated rates and charges for payphone services. Those services contained in the company's tariff and approved by the Commission or Terms of Service may be provided to end-users at the regulated rates and charges contained in the company's filed tariff or Terms of Service. No deviation of any kind from the filed tariff or Terms of Service is permitted, unless otherwise ordered

by the Commission.

(b) Except as required in OAC 165:58-7-5, not later than thirty (30) days after the effective date of the tariff, an original and two (2) copies of the approved tariff which conforms to OAC 165:58-7-3 shall be provided to the Public Utility Division.

(c) Failure to comply with this Section may result in the filing of a Motion to Cease and Desist and could result in revocation of the payphone service provider's Certificate of Convenience and Necessity.

(d) A payphone service provider which has a written tariff on file with the Commission may withdraw the tariff if the payphone service provider:

- (1) provides written notice to the Director of the Public Utility Division and the Oklahoma Attorney General, that it is withdrawing the tariff,
- (2) posts the Terms of Service, and
- (3) provides the Commission with the web page information where the language is posted.

(e) The Commission maintains the same authority to review the Terms of Service of a payphone service provider, as permitted by OAC 165:58-7-5.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98; Amended at 19 Ok Reg 2012, eff 7-1-02; Amended at 35 Ok Reg 1063, eff 9-14-18]

165:58-7-2. Information to be included in a payphone service provider's tariff

The tariff shall include the following information:

- (1) Table of contents.
- (2) Symbols for changes in tariff.
- (3) Applicability of the tariff.
- (4) Accessibility of tariffs.
- (5) Detailed billing and collection information.
- (6) Detailed information regarding handling of complaints and disputed charges.
- (7) All services provided by the company and a detailed explanation of each, including adjunct reseller and OSP services, if applicable.
- (8) All rates and charges applicable to regulated services provided in Oklahoma.
- (9) A price list which sets forth the charge for a local coin call.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98]

165:58-7-3. Requirements as to size, form, identification, and filing of tariffs

(a) All tariffs shall be in loose leaf form of a size eight and one-half inches by eleven inches (8-1/2" x 11") and shall be plainly printed or reproduced on paper of good quality. The tariff shall be in a format approved by the Director of the Public Utility Division. The front page of the tariff shall contain the name of the payphone service provider including all trade names and the location of its principal office(s).

(b) Tariff sheets are to be numbered consecutively. Each sheet shall show the cause number, the order number, if applicable, the issue date, the effective date, a revision number, section number or title, sheet number, primary name and all trade names of the payphone service provider, and the name of the tariff in a consistent manner. Sheets issued under new numbers are to be designated as original sheets. Sheets being revised should show the number of the revision, and the sheet numbers shall be the same.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98; Amended at 16 Ok Reg 2333, eff 7-1-99; Amended at 19 Ok Reg 2012, eff 7-1-02]

165:58-7-4. Symbols for changes

(a) Each payphone service provider shall include in their tariff, notations indicating each change made with the proposed application or revision. Notations (referred to as tariff symbols) to be used are:

- (1) (AT) means addition to text.
- (2) (C) means correction.
- (3) (CP) means change in practice.
- (4) (CR) means change in rate.
- (5) (CT) means change in text.
- (6) (DR) means discontinued rate.
- (7) (FC) means change in format lettering or numbering.
- (8) (MT) means moved text.
- (9) (NR) means new rate.
- (10) (RT) means removal of text.

(b) In addition to symbols for changes, each provision or rate element changed shall contain a vertical line which clearly shows the exact number of lines being changed.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98]

165:58-7-5. Revisions to tariffs

(a) New or revised tariffs describing Payphone Services shall have an effective date on or after the day following the day the submission is delivered to the Director of the Public Utility Division, subject to the following:

- (1) The submission delivered to the Public Utility Division shall include a cover letter, a mark-up copy of the new or revised tariff pages in legislative format, and a final copy of the new or revised tariff pages;
- (2) The effective date of the new or revised tariff submitted to the Commission shall be stated on the face of the new or revised tariff pages; and
- (3) The Commission may permit electronic submission of new or revised tariffs when technically feasible.

(b) After investigating, the Public Utility Division may file an application with the Commission seeking to revoke or modify any tariff. After notice and hearing, the Commission may issue an order prospectively revoking or modifying any tariff for good cause.

(c) Tariff revisions to reflect a change to the name and/or the addition of a trade name under which the payphone service provider will be doing business in the State of Oklahoma shall become effective, without Commission order, the date of submission of such tariffs, provided the submission contains the attestation required by subparagraph (5) of this subsection, unless the Commission orders the suspension of said tariff revisions pursuant to OAC 165:58-7-6. The request for name change or request for addition of a trade name shall be accompanied by the following, as applicable:

- (1) An amendment to the Certificate of Incorporation effecting a change of name pursuant to Section 1076, 1077 or 1031 of Title 18 of the Oklahoma Statutes;

- (2) A Trade Name Report filed with the Secretary of State as provided in Section 1140 of Title 18 of the Oklahoma Statutes;
 - (3) A Withdrawal of Trade Name Report filed with the Secretary of State as provided in Section 1140.1 of Title 18 of the Oklahoma Statutes;
 - (4) A Transfer of Trade Name Report filed with the Secretary of State as provided in Section 1140.2 of Title 18 of the Oklahoma Statutes; and,
 - (5) An attestation that the tariffs are identical, except for the name change or addition of a trade name, to the existing tariffs of the payphone service provider.
- (d) The burden of proof to show that a proposed or revised tariff is just and reasonable shall be upon the company proposing the new or revised tariff.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 15 Ok Reg 3106, eff 7-15-98; Amended at 16 Ok Reg 2333, eff 7-1-99; Amended at 35 Ok Reg 1063, eff 9-14-18]

165:58-7-5.1. Confidential information related to tariffs

- (a) With the exception of information and data related to the dollar and percentage impacts of the proposed change(s) on end-user rates and the rationale for the proposed tariffs, any additional financial or cost data, or data that is identifiable to a specific customer, requested by the Public Utility Division Staff shall be deemed confidential records or trade secrets of the payphone service provider under the Oklahoma Open Records Act as provided for by 51 O.S. § 24A.22 and shall be kept confidential by the Commission, unless successfully challenged.
- (b) All confidential information and data submitted to the Public Utility Division Staff under subsection (a) of this Section shall be conspicuously labeled "Confidential information and data submitted pursuant to OAC 165:58-7-5.1."
- (c) For each tariff filing submitted by a payphone service provider in accordance with OAC 165:58-7-5, the same confidential information and data provided to the Public Utility Division Staff shall also be provided to the Office of the Attorney General upon the signing of a Proprietary Agreement by the Attorney General or its representative.
- (d) All confidential information and data provided to the Office of the Attorney General under subsection (c) of this Section shall be conspicuously labeled "Confidential information and data submitted pursuant to OAC 165:58-7-5.1."

[Source: Added at 15 Ok Reg 3106, eff 7-15-98]

165:58-7-5.2. Name changes and/or trade name additions

Any name changes and/or trade name additions shall be approved pursuant to OAC 165-58-7-5(d).

[Source: Amended at 16 Ok Reg 2333, eff 7-1-99; Amended at 35 Ok Reg 1063, eff 9-14-18]

165:58-7-6. Suspension

- (a) Any tariff filed with the Commission or submitted to the Director of the Public Utility Division pursuant to OAC 165:58-7-5 may be suspended by Commission order, with or without notice or hearing, upon recommendation by the Public Utility Division Staff. The Commission may also order suspension of proposed revisions on motion by an aggrieved party, after notice and hearing.
- (b) To lift the suspension of any filing or submission made by a payphone service provider pursuant to this Chapter, whether the application has been subsequently amended after the suspension or not:

- (1) The applicant shall file a motion pursuant to OAC 165:5-9-2(b), which requests that the suspension be lifted, giving notice to the Oklahoma Attorney General and to all parties of record; or,
 - (2) The application may be set for hearing on the merits at a time to be agreed upon by the Public Utility Division and the applicant.
- (c) If the application is scheduled for hearing pursuant to (b)(2) of this Section and the time for filing an objection to the amended filing has not elapsed, the Notice of Hearing shall be sent to the Oklahoma Attorney General and to any party(ies) of record.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 19 Ok Reg 2012, eff 7-1-02; Amended at 35 Ok Reg 1063, eff 9-14-18]

165:58-7-7. Objections

Any entity wishing to object to an initial tariff filed pursuant to this Chapter may file objections with the Commission's Court Clerk within fifteen (15) days after the proposed tariff is filed. Any such objection shall comply with the requirements of OAC 165:5, the Commission's Rules of Practice, and this Chapter, and must contain a specific description of the basis for the objection and all information necessary to allow evaluation of the objection. The objecting entity shall promptly serve its objection on the payphone service provider which filed the proposed initial tariff, the Director of the Public Utility Division, any Intervenor, and the Oklahoma Attorney General.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 35 Ok Reg 1063, eff 9-14-18]

165:58-7-8. [RESERVED]

[Source: Reserved at 15 Ok Reg 3106, eff 7-15-98]

165:58-7-9. Changes to local coin rates

- (a) The charge for a local coin call was deregulated pursuant to the FCC's Order 96-338, issued September 20, 1996, Order 96-439, issued November 8, 1996, and Order DA97-678, issued April 4, 1997, in the FCC's Docket 91-35 and Docket 96-128 and became effective October 7, 1997.
- (b) The payphone service provider is required to provide, to the Public Utility Division, its local coin rate(s) on a separate local coin rate page or letter which will be included behind the approved regulated tariff for informational purposes only.
- (c) The payphone service provider is allowed to change the rate charged for a local coin call without Commission approval, but only after the following conditions have been met:
 - (1) Signage on all affected payphones shall be revised to reflect the revised local coin rate.
 - (2) Provide, by letter to the Director of the Public Utility Division, the requested information and an attestation that states that the signage on all affected payphones has been changed to reflect the revised local coin rate.

[Source: Added at 15 Ok Reg 3106, eff 7-15-98]

SUBCHAPTER 9. MISCELLANEOUS PROVISIONS

165:58-9-1. Notification when a payphone service provider withdraws from business [REVOKED]

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Revoked at 15 Ok Reg 3106, eff 7-15-98]

165:58-9-2. Responsibilities and penalties

(a) Each payphone service provider is responsible for abiding by all applicable Oklahoma statutes, Commission rules, regulations and orders, and telecommunications service provider's tariffs. Penalties for failure to comply with this requirement may include, but are not limited to, immediate disconnections of service and revocation of the payphone service provider's Certificate of Convenience and Necessity to provide payphone service or other type of authority to provide payphone service authorized by this Commission, after notice and hearing.

(b) Violation of OAC 165:58-3-5, by either the payphone service provider or the telecommunications service provider who is providing the access line, will subject one or both providers to fines and/or penalties including, but not limited to, denial or revocation of its Certificate of Convenience and Necessity, by the Commission, after notice and hearing.

(c) The Commission may suspend or revoke a PSP's Certificate of Convenience and Necessity for up to one year for repeat violations of Commission rules.

[Source: Added at 14 Ok Reg 21, eff 9-30-96 (emergency); Added at 14 Ok Reg 1261, eff 5-15-97; Amended at 16 Ok Reg 2333, eff 7-1-99]

SUBCHAPTER 11. OBLIGATIONS OF TELECOMMUNICATIONS SERVICE PROVIDERS

165:58-11-1. Obligations of telecommunications service providers to facilitate the provisioning of payphone service

(a) A listing, or no listing, in the local telephone white page directory will be provided to the payphone service provider on request, at no charge, for each line utilized by the payphone service provider.

(b) Access for payphone service providers must be available in all exchanges and service areas where facilities are available.

(c) Until such time as an applicable payphone access line tariff is approved, access by payphone service providers to the incumbent LEC's network will be provided by means of a special service arrangement based on the incumbent LEC's business access line tariff rate.

(d) Incoming call screening and outgoing call screening must be provided where and when it is technically feasible, and in any event not later than July 1, 1998.

(e) The telecommunications service provider shall not initiate a billable maintenance service call or take any other billable action in response to a trouble report on a payphone until such time as requested by the payphone owner or authorized agent.

(f) Directory assistance provided to a payphone service provider by a telecommunications service provider shall be on the same terms, conditions and rates that the telecommunications service provider provides such service to itself or its payphone service affiliate or subsidiary. Telecommunications service providers shall not be required to provide such service to payphones accessible to inmates of confinement facilities.

(g) The telecommunications service provider must provide to payphone service providers who use automated call completion technology to complete operator service calls the same services and information that the telecommunications service

provider provides to interexchange carriers, on the same rates, terms and conditions.

(h) Telecommunications service providers must offer direct dialed international call blocking ("011+" and "101XXXX+011+") where technically feasible.

(i) The telecommunications service provider shall only provide access lines to the payphone service provider after a copy of the Certificate of Convenience and Necessity has been provided. Additionally, the telecommunications service provider shall only provide access lines to a payphone provider in the same name as that listed on the Certificate of Convenience and Necessity and that shall be the account billing name.

SUBCHAPTER 12. NOTIFICATION OF CHANGES TO OWNERSHIP, CONTROL OR BUSINESS OPERATIONS

165:58-12-1. Notification of transactions affecting the ownership or control of a payphone service provider

(a) The parties to an agreement, the performance of which will result in the transfer of a Certificate of Convenience and Necessity, with or without the transfer of a tariff, from one legal entity to another legal entity shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and four (4) copies of a Notification of Transaction with the Commission's Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(b) The parties to an agreement, the performance of which will result in the merger of one or more legal entities with a surviving legal entity which is certificated to provide payphone services, shall, at least forty-five (45) days before the effective date of such proposed transaction, file an original and four (4) copies of a Notification of Transaction with the Commission's Court Clerk, accompanied by the applicable filing fee, in order to notify the Commission of the transaction.

(c) This Section shall not require notification to the Commission of transactions which involve only changes in the ownership of the stock of a payphone service provider. Such transactions are not subject to regulation by the Commission.

(d) The Notification of Transaction shall include a copy of the agreement, with all exhibits and schedules, and set forth the following information, if applicable:

(1) The name of the acquiring entity and the acquired entity.

(2) Identification of the acquired assets.

(3) The anticipated completion date and the effective date (if different) of the transaction.

(4) The name of the entity(ies) which will be providing payphone services in Oklahoma subsequent to the effective date of the transaction (the "surviving entity").

(5) The name, address and telephone number of a contact person for purposes of the Notification of Transaction.

(6) The names and qualifications of the individuals who will serve as officers and management of the surviving entity.

(7) The name(s), address(es) and telephone number(s) of the representatives of the surviving entity who will be the contact(s) for the Public Utility Division and the Consumer Services Division and will be primarily responsible for:

- (A) Providing customer service;
- (B) Repair and maintenance;
- (C) Answering complaints;
- (D) Authorizing and/or furnishing refunds to customers;
- (E) Tariff issues; and,
- (F) Receiving Notices related to causes docketed at the Commission.

(8) An affidavit, including a financial statement, that states that the surviving entity possesses the financial ability to provide payphone services in the State of Oklahoma.

(9) Identification of any changes in services to be offered or tariffed rates to affected customers required by the transaction.

(10) A narrative and/or schematic description of the relationship between or among the acquired and acquiring entities and the surviving entity.

(11) An acknowledgment that any tariff revisions shall only be accomplished in a separate filing.

(e) At the time of filing the Notification of Transaction, the acquiring entity shall provide a copy of the Notification of Transaction, with all attachments thereto, to Oklahoma Attorney General.

(f) The Public Utility Division Staff shall review the Notification of Transaction for the purpose of determining whether the proposed transaction should be approved and, in the case of mergers, whether the surviving entity should be allowed to provide telecommunications service in Oklahoma after the effective date of the transaction under the authority of any existing Certificate of Convenience and Necessity. The Public Utility Division shall act on a notification within thirty (30) business days of the date the notification is filed. No reportable transaction shall be consummated except by order of the Commission. Any person wishing to object to the proposed filing must file an objection with the Commission's Court Clerk no later than fifteen (15) days after the proposed filing. The Oklahoma Attorney General shall be granted intervention in such proceeding, if requested.

(g) Within thirty (30) business days of the filing of the Notification of Transaction, the Public Utility Division Staff may file a Continuance of Review in the Cause stating that the Public Utility Division Staff has not completed its review of the transaction and shall require an additional specified time, not to exceed an additional thirty (30) calendar days, in which to complete such review. The Public Utility Division Staff shall accompany such a Continuance of Review with a specification of the additional information, if any, needed to complete this review.

(h) The Public Utility Division Staff may, if it determines appropriate, file a Notice in the Cause requiring the acquiring entity and/or the surviving entity to show cause that the proposed transaction and/or merger is lawful, fair to the customers and in the public interest. The filing of such Notice by the Public Utility Division Staff will not alone suspend the authority of any entity to operate under an existing Certificate of Convenience and Necessity. Simultaneously with the filing of any such Notice, the Public Utility Division Staff shall propose a procedural schedule, including a date for hearing which shall be held within ninety (90) calendar days of the date of the filing of the Notification of Transaction, unless otherwise ordered by the Commission. If such a Notice is filed by the Public Utility Division Staff, the acquiring entity and/or surviving entity shall have the burden of establishing that the proposed transaction(s) is lawful, fair to the customers and in the public interest.

(i) After approval of notification of transaction(s), and not later than thirty (30) days after transaction consummation, an original and two (2) copies of the approved tariffs, which conform to OAC 165:58-7-3, shall be provided to the Public Utility Division.

165:58-12-3. Cessation of business in Oklahoma

(a) At least thirty (30) days before the effective date of the cessation of the provisioning of payphone services in the State of Oklahoma, a payphone service provider shall file an original and eight (8) copies of an application for withdrawal of its Certificate of Convenience and Necessity and cancellation of its tariffs and provide Notice of such filing to the Attorney General of the State of Oklahoma.

(b) An application for withdrawal shall include as attachments the following information, which must be certified as true and correct by an officer of any corporate applicant, or an authorized representative of an unincorporated applicant:

- (1) The contact person who will be responsible for concluding all outstanding business with the Commission and aggregators/location owners;
- (2) Information as to the procedure for any refunds due to customers; and
- (3) The date of withdrawal;

(c) Notice of discontinuance shall be sent by regular mail to all of the payphone service provider's aggregators/location owners. The notice shall be in a form approved by the Director of the Public Utility Division, and shall give the exact date that service will cease and contain information as to the procedure for any refunds due aggregations/location owners.

(d) Unless provided otherwise in this Chapter, no withdrawal and/or cancellation of an existing Certificate of Convenience and Necessity and tariff shall be granted except by Order of the Commission, after such notice and hearing, if any, as directed by the Commission.

(e) The Commission Staff may file an application to cancel an existing Certificate of Convenience and Necessity and tariff, at the company's request and at the option of the Commission Staff. The company's request may be in the form of a letter to the Director of Public Utility Division. The letter will conform with subsections (b) and (c) of this Section.

SUBCHAPTER 13. FRAUD

165:58-13-1. Obligations of telecommunication service providers and payphone service providers regarding fraud

(a) Where call screening is available, the telecommunications service provider will not bill any call, including, but not limited to, third number billed, collect, 0+ or 0-calls, to a number which has been clearly identified to the operator, at the time of the call attempt, as a payphone. The telecommunications service provider will not be responsible for refunds or adjustments of charges for calls placed through another operator. However, the telecommunication service provider shall be

responsible to the payphone service provider for any fraud if the telecommunication service provider's call screening, which is paid for by the payphone service provider, fails.

(b) If a payphone service provider provides payphone service in a territory where call screening is not available, the payphone service provider shall be responsible to the provider(s) of telecommunication services who are adversely affected by fraudulent traffic from or to any of the payphones placed by the payphone service provider in such a territory, except that if a telecommunications service provider fails to comply with OAC 165:58-11-1(d), the telecommunications service provider shall be responsible to the providers of telecommunication services who are adversely affected by fraudulent traffic from or to payphones located in such territory.

CHAPTER 59. OKLAHOMA UNIVERSAL SERVICE AND OKLAHOMA LIFELINE

[Authority: OKLA. CONST. art IX; §18, 17 O.S., §§ 137.3 and 139.101 et seq.]

[Source: Codified 7-1-97]

SUBCHAPTER 1. GENERAL PROVISIONS

165:59-1-1. Purpose and title

(a) This Chapter establishes the Oklahoma Corporation Commission Rules and Regulations implementing the Oklahoma Telecommunications Act of 1997 (hereinafter referred to as the "Oklahoma Telecommunications Act"). This Chapter shall be cited as the Oklahoma Universal Service and Oklahoma Lifeline Rules.

(b) The purpose of this Chapter is to establish such rules pertaining to Universal Services and the Oklahoma Lifeline Service Program as are necessary and appropriate to implement the Oklahoma Telecommunications Act.

(c) This Chapter also establishes the procedures for administration of the OUSF and the OLF.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 15 Ok Reg 1061, eff 1-6-98 (emergency); Amended at 15 Ok Reg 1901, eff 7-1-98; Amended at 16 Ok Reg 2360, eff 7-1-99; Amended at 28 Ok Reg 2255, eff 7-25-11; Amended at 32 Ok Reg 868, eff 8-27-15; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-1-2. Jurisdiction

The Oklahoma Corporation Commission has jurisdiction to enact this Chapter by virtue of Article IX § 18 of the Constitution of the State of Oklahoma, the Oklahoma Telecommunications Act, and the Federal Telecommunications Act of 1996. The Commission has the authority to assess a charge upon all telecommunications carriers and contributing providers, in conformance with federal and state law to support the objectives for Oklahoma Universal Services and Oklahoma Lifeline Service.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 15 Ok Reg 1061, eff 1-6-98 (emergency); Amended at 15 Ok Reg 1901, eff 7-1-98; Amended at 32 Ok Reg 868, eff 8-27-15; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-1-3. Application of rules

(a) This Chapter shall be read in context with any applicable:

- (1) Federal law and/or regulation;
- (2) State law and/or regulation; and,
- (3) Commission order and/or rule.

(b) This Chapter shall be applicable to all eligible local exchange telecommunications service providers, eligible providers, and contributing providers.

(c) No person or corporation not otherwise a provider of telecommunications services shall be deemed such solely because of the manufacture, distribution, installation, or maintenance of end-user premises communication equipment and accessories.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 15 Ok Reg 1061, eff 1-6-98 (emergency); Amended at 15 Ok Reg 1901, eff 7-1-98; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-1-4. Definitions

In addition to terms defined in The Oklahoma Telecommunications Act, 17 O.S. §§ 139.101, et seq., the following words and terms, when used in this Chapter shall have the following meaning, unless the context clearly indicates otherwise:

"Administrator" or **"OUSF Administrator"** or **"OLF Administrator"** means the same as Administrator, as defined in the Oklahoma Telecommunications Act.

"ALJ" means Administrative Law Judge.

"Assessed Revenues" means as that term is defined in 17 O.S. § 139.107(A).

"Bed" is a patient care bed or bassinets that is regularly maintained, staffed on a 24-hours basis, and immediately available for the care of patients.

"Carrier of Last Resort" means a telecommunications service provider as designated by the Commission pursuant to OAC 165:55.

"Commercial mobile radio service provider" means a carrier who provides wireless telecommunications services.

"Customer" or **"Subscriber"** means any person, firm, partnership, cooperative corporation, corporation or lawful entity that receives telecommunications services.

"FCC" means the Federal Communications Commission.

"High-cost area" means an area where actual costs exceed Commission- or Legislatively-authorized rates for Primary Universal Services.

"Interconnected Voice over Internet Protocol" or **"VoIP"** includes both fixed and nomadic versions of the service, with fixed Interconnected Voice over Internet Protocol service able to be used at only one location, and nomadic Interconnected Voice over Internet Protocol service able to be used at multiple locations. Interconnected Voice over Internet Protocol means a service that:

(A) enables real-time, two-way voice communications;

(B) requires a broadband connection from the user's location;

(C) requires Internet protocol-compatible customer premises equipment; and

(D) permits users generally to receive calls that originate on the public switched telephone network and to terminate calls to the public switched telephone network.

"Internet Subscriber Fee" means any fee that is paid to a telecommunications service provider for internet service that is in addition to the access connection charge.

"Lifeline Service Program" means the federal and state program designed to keep low-income subscribers on the telecommunications network.

"Network" includes a telecommunications service provider's or telecommunication carrier's facilities used to originate and terminate traffic.

"Oklahoma Universal Services" means Primary Universal Service and Special Universal Services as defined in the Oklahoma Telecommunications Act.

"OneNet" means statewide Internet and technology provider operated by the Oklahoma State Regents for Higher Education for the purpose of meeting the mission critical technology needs of Oklahoma's education, research, healthcare and public service communities.

"Reimbursement" means remuneration from the OUSF for Primary Universal Services and Special Universal Services. Reimbursement also means remuneration from the Oklahoma Lifeline Fund pursuant to OAC 165:59-9, for the Lifeline Service Program.

"Service territory" means a geographic area within which a telecommunications service provider has authority to provide telecommunications services.

"SETDA" means the State Educational Technology Directors Association.

"Special Construction Cost" is the FCC's Category One eligible charge necessary to connect public schools and public libraries to broadband networks.

"State" means the State of Oklahoma.

"Telecommunications Act of 1996" means the Federal legislation cited as 47 U.S.C. §§151 et. seq.

"USAC" means the Universal Services Administrative Company.

"U.S.C." means United States Code.

"Unregulated services" means telecommunications services not regulated by the Commission.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 15 Ok Reg 1061, eff 1-6-98 (emergency); Amended at 15 Ok Reg 1901, eff 7-1-98; Amended at 18 Ok Reg 2448, eff 7-1-01; Amended at 20 Ok Reg 2318, eff 7-15-03; Amended at 22 Ok Reg 1819, eff 7-1-05; Amended at 28 Ok Reg 2255, eff 7-25-11; Amended at 30 Ok Reg 1581, eff 7-11-13; Amended at 31 Ok Reg 1087, eff 9-12-14; Amended at 32 Ok Reg 868, eff 8-27-15; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-1-5. Interpretation of rules

The words contained in this Chapter shall be given their ordinary and customary meanings, with technical terms and words being construed as generally understood within the telecommunications industry, except where otherwise expressly provided.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97]

165:59-1-6. Relief from rules

Whenever compliance with any requirement of this Chapter would result in unreasonable hardship upon or excessive expense to a party or parties subject to the rules of this Chapter, the Commission may, upon application and for good cause shown, issue an order waiving or modifying the requirements of this Chapter. The Commission may grant temporary relief pending hearing.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97]

165:59-1-7. Supremacy

This Chapter supersedes any conflicting Commission order that may be in effect on the effective date of this Chapter. If there is any conflict between this Chapter and the Oklahoma Telecommunications Act, the provisions of said Act shall supersede this Chapter to the extent of any conflict. If there is any conflict between said Act and the Federal Telecommunications Act of 1996, the provisions of the Federal Act shall prevail to the extent of any conflict.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 15 Ok Reg 1061, eff 1-6-98 (emergency); Amended at 15 Ok Reg 1901, eff 7-1-98; Amended at 28 Ok Reg 2255, eff 7-25-11; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-1-8. Controversy over rules

Whenever a controversy exists in connection with the interpretation of the rules of this Chapter or their applicability, or any right or duty imposed thereby, the Commission, upon application of any interested person and after notice and hearing, will enter such order thereon as it may deem appropriate.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97]

165:59-1-9. Severability

(a) Nothing in this Chapter shall relieve any entity from any of its duties under the laws of the State of Oklahoma or the United States.

(b) This Chapter shall not be construed so as to enlarge, diminish, modify, or alter the jurisdiction, powers, or authority of the Commission.

(c) If any provision of this Chapter is held invalid, such invalidity shall not affect the other provisions of this Chapter or their applicability provided, such other provisions can be given effect without the invalid provision or its applicability, and to this end, the provisions of this Chapter are declared to be severable.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97]

SUBCHAPTER 3. OKLAHOMA UNIVERSAL SERVICE FUND

PART 1. OKLAHOMA UNIVERSAL SERVICES

165:59-3-1. Oklahoma Universal Services [REVOKED]

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 15 Ok Reg 1061, eff 1-6-98 (emergency); Amended at 15 Ok Reg 1901, eff 7-1-98; Amended at 32 Ok Reg 868, eff 8-27-15; Revoked at 34 Ok Reg 5, eff 8-12-16 (emergency); Revoked at 34 Ok Reg 1011, eff 9-11-17]

PART 3. OKLAHOMA UNIVERSAL SERVICE FUND

165:59-3-10. Use of the Oklahoma Universal Service Fund

The Oklahoma Universal Service Fund is a state fund for demonstrated necessity or statutory entitlement. Funds from the Oklahoma Universal Service Fund may be sought as necessary to maintain rates for primary universal services that are reasonable and affordable, for special universal services, and for E911 and Technology Training Fund contributions, consistent with the Oklahoma Telecommunications Act.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 15 Ok Reg 1061, eff 1-6-98 (emergency); Amended at 15 Ok Reg 1901, eff 7-1-98; Amended at 16 Ok Reg 2360, eff 7-1-99; Amended at 32 Ok Reg 868, eff 8-27-15]

165:59-3-11. How the Oklahoma Universal Service Fund shall be funded

The OUSF shall be funded consistent with 17 O.S. § 139.107.

[Source: Reserved at 14 Ok Reg 2562, eff 7-1-97; Added at 15 Ok Reg 1061, eff 1-6-98 (emergency); Added at 15 Ok Reg 1901, eff 7-1-98; Amended at 32 Ok Reg 868, eff 8-27-15; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-3-12. Operational requirements and processes for the OUSF [REVOKED]

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Revoked at 15 Ok Reg 1061, eff 1-6-98 (emergency); Revoked at 15 Ok Reg 1901, eff 7-1-98]

165:59-3-13. Establishment of OUSF Assessment

(a) The Administrator shall file a cause with the Commission's Court Clerk to establish or adjust the OUSF Assessment, as necessary, or on an annual basis, and assess the contributing providers required to contribute to the fund under 17 O.S. § 139.107. Notice of this filing shall be sent to all contributing providers via electronic mail to the contributing provider's contact information contained in their annual report.

(b) By posting on the Commission's website, the Administrator shall notify each contributing provider of the effective dates and rates of the ordered OUSF and OLF factors to be applied to OUSF Assessed Revenues.

(c) Contributing providers are to report revenues and make payment to the OUSF and OLF as described in OAC 165:59-3-44.

[Source: Reserved at 14 Ok Reg 2562, eff 7-1-97; Added at 15 Ok Reg 1061, eff 1-6-98 (emergency); Added at 15 Ok Reg 1901, eff 7-1-98; Amended at 28 Ok Reg 2255, eff 7-25-11; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-3-14. Eligibility to receive OUSF funding

(a) The incumbent local exchange telecommunications service provider, its successors and assigns, which owned, maintained and provided facilities for universal service within a local exchange area on January 1, 1996, shall be the eligible local exchange telecommunications service provider eligible for OUSF funding within the local exchange area, except as otherwise provided for in the Telecommunications Act, 17 O.S. §§ 139.101, et seq.

(b) Upon request, and after notice and hearing, the Commission shall consider the designation of more than one eligible local exchange telecommunications service provider in a universal service area to receive funding from the OUSF under the Oklahoma Telecommunications Act.

(c) Where the incumbent local exchange telecommunications service provider receives or is eligible to receive monies from the OUSF, except as otherwise provided in 17 O.S. § 139.106, the Commission, after notice and hearing, may designate other local exchange telecommunications service providers to be eligible for the funding, provided:

(1) The other local exchange telecommunications service provider is certificated by the Commission to provide and offer the primary universal services supported by the OUSF to all customers in the universal service area designated by the Commission, using its own facilities, or a combination of its own facilities and the resale of the services or facilities of another;

(2) The other local exchange telecommunications service provider may only receive funding for the portion of the facilities that it owns, maintains, and uses for regulated services;

(3) The other local exchange telecommunications service provider shall not receive OUSF funding at a level higher than the level of funding the incumbent local exchange telecommunications service provider is eligible to receive for the same area if the incumbent local exchange telecommunications service provider is also providing service in the same area; provided, the cost of any cost studies required to be performed shall be borne by the party requesting such studies, unless the party performing the study utilizes the study for its own benefit;

(4) The other local exchange telecommunications service provider advertises the availability and charges for services it provides through a medium of general distribution; and,

(5) It is determined by the Commission that the designation is in the public interest and the other local exchange telecommunications service provider is in compliance with all Commission rules for which a waiver has not been granted.

(d) For any area served by an incumbent local exchange telecommunications service provider which serves less than seventy-five thousand (75,000) access lines within the State, only the incumbent local exchange telecommunications service provider shall be eligible for OUSF funding except;

(1) Other eligible telecommunications service providers and eligible providers which provide Special Universal Services or Lifeline service shall be eligible to request and receive OUSF funds in the same manner as the incumbent local exchange telecommunications service provider in the same area pursuant to this Chapter;

(2) The incumbent local exchange telecommunications service provider may elect to waive the right to be the only eligible local exchange telecommunications service provider within the local exchange area by filing notice with the Commission; or

(3) When the Commission, after notice and hearing, makes a determination that it is in the public interest that another local exchange telecommunications service provider should also be deemed a carrier of last resort and be eligible to receive OUSF funding in addition to the incumbent local exchange telecommunications service provider. It shall not be in the public interest to designate another local exchange telecommunications service provider as being a carrier of last resort and eligible to receive OUSF funding if such designation would cause a significant adverse economic impact on users of telecommunications services generally or if the other carrier refuses to seek and accept carrier of last resort obligations throughout the universal service area as designated by the Commission. The other local exchange telecommunications service provider shall not receive OUSF funding at a level higher than the level of funding the incumbent local exchange telecommunications service provider is eligible to receive for the same area if the incumbent local exchange telecommunications service provider is also providing service in the same area and the other local exchange telecommunications service provider meets the requirements of subsection (c) of this Section.

(e) In order to be designated as an eligible local exchange telecommunications service provider for purposes of Federal Universal Service support, the local exchange telecommunications service provider shall meet the requirements of 47 U.S.C. § 214(e).

(f) Notwithstanding the criteria set forth in this Section for designation as an eligible local exchange telecommunications service provider, a commercial mobile radio service provider may, after notice and hearing, seek OUSF Funding for the provision of services supported by the OUSF.

(g) Notwithstanding the criteria set forth in this Chapter for designation as an eligible local exchange telecommunications service provider, any eligible provider may seek OUSF Funding for the provision of Special Universal Services consistent with 17 O.S. § 139.109.1.

(h) Any eligible provider shall receive funding for any Special Universal Services provided from the OUSF without a hearing, in a manner consistent with OAC 165:59-7-1 and the Oklahoma Telecommunication Act. The funding shall be approved only after the appropriate forms have been filed with the Commission's Court Clerk and reviewed by the OUSF Administrator or contracted agent.

(i) For an area served by an incumbent local exchange telecommunications service provider which serves less than seventy-five thousand (75,000) access lines within the State, the incumbent local exchange telecommunications service provider may elect to waive the right to be the only eligible local exchange telecommunications service provider within the local exchange area by filing notice with the Commission.

165:59-3-16. Designation of eligible telecommunications carriers for unserved areas

In no event shall any area(s) be without the capability of accessing universal services supported by the OUSF. If no eligible local exchange telecommunications service provider is currently providing the services that are supported by the OUSF to an unserved area or any portion of the area that requests such service, the Commission will:

- (1) Determine which eligible local exchange telecommunications service provider(s) are best able to provide such service to the unserved area(s), or portion of the area(s); and,
- (2) Order such eligible local exchange telecommunications service provider(s) to provide such service to that area(s), or portion of the area(s).

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

PART 5. ADMINISTRATION OF THE OUSF

165:59-3-30. Administration of the Fund

(a) The OUSF Administrator, may as necessary, take all actions necessary to fulfill the objectives of the Oklahoma Telecommunications Act, including but not limited to, contracting with a third party having no conflict of interest in the provisioning of telecommunications services for assistance with the administrative functions related to the OUSF.

(b) The OUSF Administrator is expressly authorized to bring actions before the Commission to enforce the provisions of this Chapter and the Oklahoma Telecommunications Act.

(c) The OUSF Administrator and/or contracted agent shall administer the OUSF in accordance with this Subchapter and the Oklahoma Telecommunications Act.

(d) The OUSF Administrator's and/or contracted agent's duties shall include, but not be limited to:

- (1) Receiving, distributing, and accounting for funds paid into the OUSF;

- (2) Providing reimbursement to eligible providers and eligible local exchange telecommunications service providers in accordance with the Oklahoma Telecommunications Act;
- (3) Managing the daily operations and affairs of the OUSF;
- (4) Monitoring and assuring contribution/payment compliance as well as conducting periodic audits of the contributing providers to ensure that the contributing providers are accurately reporting and making proper payments to the OUSF;
- (5) Monitoring and assuring that OUSF funds received by the eligible local exchange telecommunications service providers and eligible providers are based on one of the categories for which reimbursement is allowed under the Oklahoma Telecommunications Act.
- (6) Informally resolving disputes;
- (7) Independently evaluate and review all Requests for OUSF Funding and OUSF administrative preapproval requests within time frames identified in the Oklahoma Telecommunications Act, and make a determination of the accuracy of the requests, advise the eligible local exchange telecommunications service provider or eligible provider requesting the funds of the determination of eligibility made by the OUSF Administrator, and determine the eligibility of the OUSF Beneficiary; and,
- (8) Performing any other duties as required by law and/or this Chapter.

(e) The OUSF Administrator and/or contracted agent shall authorize payment of the approved funding to the requesting eligible local exchange telecommunications service provider or eligible provider, pursuant to the Oklahoma Telecommunications Act.

(f) The Commission finds, pursuant to Article IX, Section 18 of the Oklahoma Constitution, and 51 O.S. § 24A.22, that all information that is not otherwise publicly available, provided by an eligible local exchange telecommunications service provider, an eligible provider, an OUSF Beneficiary, or contributing provider in all matters submitted and filed pursuant to the Oklahoma Telecommunications Act is hereby classified as confidential. All documents and information considered to be confidential must be clearly marked as such. All information classified as confidential shall be used by the OUSF Administrator, ALJ, any party to a Request for OUSF Funding or party to a request for reconsideration related to such Request, and the Commission solely in connection with the review and disposition of all matters subject to the Oklahoma Telecommunications Act. The OUSF Administrator, the ALJ, the Commission and all other parties that receive or review information deemed confidential herein shall keep all such information confidential, and shall only use such data for purposes of administering the OUSF, evaluating a Request for OUSF Funding, and/or prosecuting a request for reconsideration of the Administrator's determination of OUSF Funding, and shall not disclose such data to any unauthorized person, provided, confidential information may be disclosed to parties in the cause after the party in the cause signs a nondisclosure agreement, as posted on the Commission Website, or as otherwise agreed between the party requesting the information and the party receiving the request for confidential information.

(g) Pursuant to 51 O.S. § 24A.22, the Commission hereby does classify as confidential all information that is not otherwise publicly available, provided by an eligible local exchange telecommunications service provider, an eligible provider, an OUSF Beneficiary, or contributing provider, in conjunction with an audit of said eligible local exchange telecommunications service provider, eligible provider,

OUSF Beneficiary, or contributing provider. All information classified as confidential shall be used by the OUSF Administrator, ALJ, and the Commission solely in connection with the review and disposition of all matters subject to the Oklahoma Telecommunications Act. The OUSF Administrator, the ALJ, the Commission and all other parties that gain access as provided herein to confidential information shall keep all confidential information confidential, and shall not use such data except for purposes of administering the OUSF, and shall not disclose such data to any unauthorized person, provided, confidential information may be disclosed to parties in any filed cause after the party in the cause signs a nondisclosure agreement, as posted on the Commission Website, unless otherwise agreed to by the parties.

165:59-3-32. Audits of the Fund

- (a) The OUSF shall be audited annually by a non-OUSF, independent auditor selected by a committee with input from the State Auditor's Office. The committee shall be selected by the Commission's Director of Administration.
- (b) The annual audit should be based on assessed program risk conducted in accordance with standards.
- (c) The audit may include further objectives as requested by the Commission's Director of Administration, the State Auditor's Office, the Oklahoma Attorney General, and/or as required by the contract between the OUSF and independent auditor.
- (d) The cost of audits of the OUSF shall be funded by the OUSF.
- (e) All audit reports, once finalized, shall be provided to the Oklahoma Attorney General.

165:59-3-34. Resolution of disputes regarding contributions to the OUSF and OLF

- (a) Any contributing provider operating within Oklahoma may dispute the amount of contribution assessed it by the OUSF Administrator for the OUSF and OLF, in the following manner:
 - (1) The contributing provider shall submit a written notice setting forth its dispute in detail to the OUSF Administrator, on or before the payment due date, and the OUSF Administrator shall have the responsibility for resolving the dispute.
 - (2) If satisfactory resolution is not achieved within thirty (30) days of the receipt of the written notice of dispute, the contributing provider may file an application with the Commission's Court Clerk requesting that the Commission resolve the dispute.

- (b) Pending final resolution of a dispute, the disputing contributing provider shall pay the disputed and undisputed amounts to the OUSF and OLF.
- (c) If the disputing contributing provider prevails in its dispute, the contributing provider will be entitled to a refund, with interest, at the then effective interest rate, as provided by OAC 165:55-9-14(e)(1), from the date the disputed charge was paid to the date of refund.
- (d) No acceptance of any payment shall be construed as an accord that the amount paid is in fact the correct amount, nor shall any acceptance of payments be construed as a release of any claim that the OUSF Administrator may have for further or additional sums payable.

165:59-3-36. Resolution of other disputes

- (a) Any adversely impacted party may dispute the actions of an eligible local exchange telecommunications service provider or an eligible provider related to the provisioning of Universal Services. The adversely affected party may contact the OUSF Administrator or contracted agent of the OUSF and the OUSF Administrator shall have the initial responsibility for trying to resolve the dispute.
- (b) If satisfactory resolution is not achieved, the affected party may file an application requesting the Commission resolve the dispute.

PART 7. CONTRIBUTIONS TO THE OUSF

165:59-3-40. Contributors to the OUSF

- (a) The OUSF shall be funded in a competitively neutral manner in accordance with the Oklahoma Telecommunications Act.
- (b) Each contributing provider shall annually provide contact information to the OUSF Administrator for the purpose of correspondence regarding contribution to the OUSF. The submission of an annual report to the Commission shall be deemed compliance with this paragraph.

(c) Each telecommunications carrier providing wholesale telecommunications services to VoIP providers in Oklahoma will annually provide the identity, to include address, of each such VoIP provider(s) to the OUSF Administrator as available. While the names of the VoIP providers may be made publicly available, all information with regard to the reporting telecommunications carrier will be treated as confidential.

(d) The contributing provider must certify to the truth and accuracy of data used to determine the contributing provider's contribution amounts. The OUSF Administrator may verify any information used by the contributing provider in its determination of its contributions to the OUSF. Each contributing provider shall maintain records and documentation used in its determination of its contributions to the OUSF for three (3) years, and shall provide such records and documentation to the OUSF Administrator upon request. Inaccurate or untruthful information used by the contributing provider may lead to prosecution to the full extent of the law.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97]

165:59-3-44. Amount of contributions and charges assessed for the OUSF

(a) The amount of contribution required from each contributing provider shall be determined as provided in the Oklahoma Telecommunications Act.

(b) The OUSF Administrator or contracted agent shall, based on the amount to be contributed to the OUSF, calculate the contribution required to be made to the OUSF by each contributing provider, based on the fund level established by the Commission sufficient to recover the costs of administration and payments for OUSF and OLF requests for funding, as provided by the Oklahoma Telecommunications Act and the information provided pursuant to OAC 165:59-3-42.

(c) The fiscal reporting year shall be July 1 through June 30.

(d) Each contributing provider shall pay its contribution directly to the OUSF Administrator, or contracted agent, as directed by the OUSF Administrator, on a monthly or annual basis, conditioned upon an annual revenue threshold established by the OUSF Administrator.

(e) If the contributing provider qualifies to pay its contribution annually, payment shall be made at the beginning of the fiscal year, and is past due after August 31. If

the contributing provider underestimates its annual contribution by 15% or greater, the contributing provider shall be required to make its contributions monthly for the next fiscal reporting year, and underpayments will be subject to interest.

(f) If the contributing provider qualifies to pay its contribution monthly, the contributing provider shall report the prior calendar month's revenues, and pay on those revenues, by the end of the month, each month, without skipping a month.

(g) Interest shall be charged on any payment not received by the reporting due date at the rate of 1.5% monthly.

(h) The payment shall be payable to the OUSF. All contributions and interest payments shall be deposited into the OUSF account established by the OUSF Administrator and/or contracted agent.

(i) All contributions shall be subject to audit by the OUSF Administrator, or its contracted agent.

165:59-3-46. Recovery of OUSF contributions

(a) A contributing provider may, at its option, recover the amount it pays into the OUSF from its retail customers as provided in the Oklahoma Telecommunications Act. If the contributing provider elects to recover the amount of its contributions from its retail customers, such recovery shall be made in a fair, equitable and nondiscriminatory manner.

(b) Any over-recovery of the OUSF contributions for the preceding year shall be carried forward to the ensuing year, and shall be included as a reduction in the calculation of the retail end-user recovery amount for the ensuing twelve-month period of the contributing provider's OUSF contributions. Any under-recovery of the OUSF contribution for the preceding year, may be included as an increase in the calculation of the retail end-user recovery amount for the ensuing twelve-month period of the contributing provider's OUSF recovery from its customers, provided the contributing provider made a reasonable attempt to collect the funds in the preceding year.

(c) The Commission may, as it deems appropriate, order modifications in a regulated contributing provider's method of recovery from its customers, after notice and hearing.

(d) In the event a contributing provider, excluding prepaid wireless providers, elects to recover its OUSF contributions from its customers, the amounts of the recovery shall be explicitly stated as a line item on customer's bills.

PART 9. REQUEST FOR OUSF FUNDING

165:59-3-60. Requests for funding from the OUSF

(a) Eligible local exchange telecommunications service providers and eligible providers may request funding from the OUSF as allowed by the Oklahoma Telecommunications Act.

- (b) Any eligible provider may request funding from the OUSF as necessary for the provision of Special Universal Services.
- (c) Should the OUSF at any time experience a shortfall, the costs associated with administering the fund will be paid first, followed by the payment due to the Oklahoma Attorney General, pursuant to 17 O.S. § 139.103. Thereafter, any residual funds will be distributed to eligible providers and eligible local exchange telecommunications service providers on a pro rata basis, pursuant to their approved requests. The balance of each approved request for OUSF funding will be paid at such time as additional funds become available.
- (d) Each request for OUSF funding by an eligible ILEC serving less than seventy-five thousand (75,000) access lines shall be in accordance with the Oklahoma Telecommunications Act.
- (e) The OUSF Administrator shall process any request for OUSF funding by an ILEC serving seventy-five thousand (75,000) or more access lines or a CLEC, in accordance with the Oklahoma Telecommunications Act.
- (f) Requests for OUSF funding for the provision of Special Universal Service, including OUSF administrative preapproval requests, shall contain the following caption: In the matter of the request by (name of school/library/eligible healthcare provider /consortium) of (name of city / library system or city / health care system or city / Consortium lead) for funding from the Oklahoma Universal Service Fund.
- (g) Requests for OUSF funding for primary universal service shall contain the following caption: In the matter of the request by (name of eligible telecommunications service provider) for the (insert basis of request) for funding from the Oklahoma Universal Service Fund.

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 15 Ok Reg 1061, eff 1-6-98 (emergency); Amended at 15 Ok Reg 1901, eff 7-1-98; Amended at 16 Ok Reg 2360, eff 7-1-99; Amended at 30 Ok Reg 1581, eff 7-11-13; Amended at 32 Ok Reg 868, eff 8-27-15; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-3-61. Forms for requesting funding from the OUSF

- (a) The appropriate forms necessary for making an OUSF funding request and preapproval funding request shall be available on the Commission's website, and may be obtained from the OUSF Administrator.
- (b) The OUSF Administrator shall post the forms on the Commission's website no later than August 31 annually, for requests made for funding years prior to the funding year beginning July 1 annually, and on or before June 30, preceding each subsequent funding year.
- (c) Any party objecting to the form shall file an Application in the Commission's Court Clerk within fifteen (15) calendar days of the form being posted on the Commission's website. Notice of the objection shall be given to the OUSF Administrator, the Oklahoma Attorney General, and shall be posted on the Commission's website by the OUSF Administrator within three (3) calendar days of the filing of the Application.
- (d) The caption for filing an objection shall be as follows: In the matter of the application of (name of party filing the objection) objecting to the OUSF Administrator's form.
- (e) Each objection filed shall be filed in a separate cause and shall provide details of the objection sufficient to allow the Commission to fully evaluate the objection. The Commission may, within its sole discretion, conduct a hearing to resolve the dispute. If the Commission opts to conduct a hearing, it shall provide at least five (5) calendar days notice to the parties in the cause. Any interested person may participate in the hearing by filing an entry of appearance and a statement of

position setting forth their position on the objection. The entry of appearance and statement of position shall be served on all parties to the cause.

(f) The Commission shall issue a final order on the objection to the form within thirty (30) calendar days of the objection being filed, or if no order is issued, then the objection shall be deemed approved, and the form modified accordingly.

165:59-3-64. Identifying and measuring the level of OUSF funding

(a) In identifying and measuring the costs of providing primary universal services, exclusively for the purpose of determining OUSF funding levels under 17 O.S. § 139.106, the eligible local exchange telecommunications service provider serving less than seventy-five thousand (75,000) access lines shall, at its option:

- (1) Calculate such costs by including all embedded investments and expenses incurred by the eligible local exchange telecommunications service provider in the provision of primary universal service, and may identify high-cost areas within the local exchange area it serves and perform a fully distributed allocation of embedded costs and identification of associated primary universal service revenue. The cost study shall identify any investments and associated expenses jointly used for the provision of primary universal service and any other services and provide a reasonable allocation of those investments and expenses. Such calculation may be made using fully distributed FCC Parts 32, 36, and 64 costs, if such Parts are applicable. The high-cost area shall be no smaller than a single exchange, wire center, or census block group, chosen at the option of the eligible local exchange telecommunications service provider; or,
- (2) Adopt the cost studies approved by the Commission for a local exchange telecommunications service provider that serves seventy-five thousand (75,000) or more access lines; or,
- (3) Adopt such other costing or measurement methodology as may be established for such purpose by the FCC pursuant to Section 254 of the Federal Telecommunications Act of 1996.

(b) In identifying and measuring the cost of providing primary universal services, and exclusively for the purpose of determining OUSF funding levels pursuant to 17 O.S. § 139.106, each ILEC which serves seventy-five thousand (75,000) or more access lines and each CLEC shall identify high-cost areas within the local exchange and perform a cost study using a Commission-approved methodology from those identified in subsection (a) of this Section. The high-cost area shall be no smaller than a single exchange, wire center or census block group chosen at the option of the eligible ILEC or CLEC. If the Commission fails to approve the selected methodology within one hundred twenty (120) calendar days of the filing of the

selection, the selected methodology shall be deemed approved.

(c) Primary Universal Service provided by an eligible local exchange telecommunications service provider may be provided using facilities, including the end user loop component and functionality, which allow access to the Internet, including access to combined consumer voice and broadband Internet service. The costs and revenues associated with such facilities, calculated pursuant to Parts 32, 36, and 64 of Title 47 of the Code of Federal Regulations, may be included in determining OUSF funding levels, consistent with applicable federal and state laws. Primary Universal Service does not include broadband Internet access service as defined at 47 C.F.R. § 8.1(b).

(d) For any cause filed pursuant to 17 O.S. § 139.106(G), the OUSF Administrator's Determination, or order issued by the Commission, may be the basis for reimbursement for no more than five (5) subsequent twelve (12) month periods beyond the initial request, subject to an annual variance and risk-based review by the OUSF Administrator, pursuant to OAC 165:59-3-70(o).

165:59-3-66. Procedures for OUSF administrative preapproval request

Preapproval is an optional process available to OUSF Beneficiaries who desire to have certainty regarding the amount that will be paid from the OUSF in support of Special Universal Services on behalf of the OUSF Beneficiary.

(1) The OUSF Beneficiary may submit a "Request for OUSF Preapproval" to the OUSF Administrator to determine eligible services and credit amounts for the upcoming funding year.

(2) A Request for OUSF Preapproval may be submitted at any time by sending via electronic mail a digital copy of all required documentation to the OUSF Administrator, to the email address posted on the Commission's website, until such time as the Commission implements the electronic filing system. Once the electronic filing system is in place, the OUSF Beneficiary shall file all required documentation using the electronic filing system.

(3) The Request for OUSF Preapproval shall include the following:

(A) All documents and information required by the approved form;
and

(B) All documents identified in 17 O.S. § 139.109.1(F)(2)(d).

(4) The Request for OUSF Preapproval may include any documentation that would assist the OUSF Administrator in independently evaluating the request.

(5) The OUSF Administrator and/or contracted agent shall independently evaluate and review the Request for OUSF Preapproval, including all provided documentation, and issue an OUSF preapproval funding letter, without Commission order, to the OUSF Beneficiary within ninety (90) calendar days of receipt of the Request for OUSF Preapproval. The preapproval funding letter shall be electronically delivered to the OUSF Beneficiary.

(6) A Request for OUSF Preapproval that is found by the OUSF Administrator to be incomplete (missing information required by the form

and instruction package contained on the Commission website) may be denied.

(7) After a preapproval funding letter has been issued, an OUSF Beneficiary may submit a new Request for OUSF Preapproval to provide corrections or additional information per this Chapter; however, a new Request shall be submitted for each funding year. This new Request shall be submitted by sending via electronic mail a digital copy of all required documentation to the OUSF Administrator, to the email address posted on the Commission's website, until such time as the Commission implements the electronic filing system. Once the electronic filing system is in place, the OUSF Beneficiary shall file all required documentation using the electronic filing system.

(8) Unless an OUSF Beneficiary receives preapproval of a Request for OUSF Preapproval, the Beneficiary shall not identify the OUSF as the source of secured funds for any purpose.

(9) The amount of OUSF funding preapproved under this subsection shall be subject to adjustments based on the amount of support received from other sources, if any, as well as adjustments to pricing that may occur between the time of preapproval and installation of service.

(10) Additional services that are installed beyond those contained in the Request for OUSF Preapproval shall require either a new Request for OUSF Preapproval or a Request for OUSF Funding to be filed.

(11) Variance from the terms approved in the OUSF preapproval funding letter, which could have impacted bid selection may make the previously issued OUSF preapproval funding letter null and void.

(12) A Request for OUSF Preapproval submitted by an OUSF Beneficiary shall be signed by an authorized agent of the OUSF Beneficiary, or by the attorney for the OUSF Beneficiary.

165:59-3-68. Procedures for requesting funding from the OUSF - Special Universal Services

(a) An eligible provider of Special Universal Services may seek and obtain funds from the OUSF by filing a "Request for OUSF Funding" and "Notice of Request for OUSF Funding" with the Commission's Court Clerk. On the date of filing the Request for OUSF Funding, the eligible provider shall deliver a filed copy of the Request for OUSF Funding to the OUSF Administrator for processing.

(1) If the OUSF Beneficiary filed a Request for OUSF Preapproval, and a preapproval funding letter was issued by the OUSF Administrator, then the eligible provider must file the Request for OUSF Funding in the same cause number as the Request for OUSF Preapproval.

(2) If the Request for OUSF Funding requests anything different than what is stated in the OUSF preapproval funding letter, then the eligible provider shall file the Request for OUSF Funding as a new cause number.

(b) The Request for OUSF Funding shall include, but not be limited to the following:

(1) The name and address of the eligible provider;

(2) The name and address of the OUSF Beneficiary;

- (3) A description of the provisions of the Oklahoma Telecommunications Act relied on for the request;
- (4) The amount requested for funding;
- (5) The completed Affidavit, including all required attachments;
- (6) An affidavit signed by the eligible provider, verifying the truth and accuracy of the information contained in the Request for OUSF Funding and attachments; and
- (7) A copy of the preapproval funding letter, if preapproval was sought by the OUSF Beneficiary.

(c) To facilitate the timely evaluation of requests for funding from the OUSF, a Request for OUSF Funding shall not contain a request for funding Special Universal Services to more than one Eligible Healthcare Entity, or more than one School District, or more than one Library system. An eligible provider to a consortium may request a waiver from the OUSF Administrator to allow a Request for OUSF Funding to include eligible members of the consortium within a single request for funding. (d) No amended Requests for OUSF Funding shall be accepted. Eligible providers may withdraw the originally filed Request for OUSF Funding and file a new request at any time prior to the issuance of the Determination. Upon the filing of a Withdrawal of Request for OUSF Funding, the Commission's Court Clerk shall close the file, without Commission order. If a new request is filed, it shall be filed under a new cause number.

(e) A Request for OUSF Funding found to be incomplete (missing information required by the form and instruction package contained on the Commission website) may be denied.

(f) It is the intention of the OUSF Administrator that each Request for OUSF Funding will be independently evaluated and reviewed on a case-by-case basis.

(g) Consistent with 17 O.S. § 139.109.1(B)(2), the OUSF Beneficiary shall make every reasonable and timely effort to obtain funding from alternative funding sources designated to support universal service, and shall submit all documentation of the effort to obtain funding from alternative funding sources as a part of the eligible provider's Request for OUSF Funding, or an explanation for why alternative funding is not available.

(h) If an eligible provider receives funding from alternative funding sources for an investment or expense already reimbursed by the OUSF, the eligible provider shall refund the double collection to the OUSF by either reducing a prospective funding request from the OUSF by an equivalent amount or remitting cash payment to the OUSF. Under no circumstances will double recovery be allowed.

(i) Concurrent with the filing of the Request for OUSF Funding, the eligible provider shall:

- (1) Provide copies of its Request for OUSF Funding and Notice of the Request for OUSF Funding to the OUSF Administrator, the Oklahoma Attorney General, and the OUSF Beneficiary.
- (2) Provide Notice of the Request for OUSF Funding to the contributing providers by providing an electronic copy of such Notice to the OUSF Administrator on the date the eligible provider files its Request for OUSF Funding with the Commission's Court Clerk, for posting on the Commission's website. The OUSF Administrator will then place the Notice on the Commission's website within five (5) business days.
- (3) Provide notice which identifies the dollar amount requested for the lump sum and any recurring amounts, as well as the name and address of the OUSF Beneficiary.

(j) The OUSF Administrator and/or its contracted agent shall independently evaluate, review, and determine the accuracy of the complete request and issue a Determination of the eligibility for funds, within sixty (60) calendar days if an OUSF preapproval funding letter was issued, or within ninety (90) calendar days if no preapproval funding letter was issued. Simultaneously with the OUSF Administrator or contracted agent providing a copy of the Determination to the eligible provider and parties to the cause, the OUSF Administrator or contracted agent shall file the Determination in the Commission's Court Clerk and post it to the Commission's website. The eligible provider shall provide a copy of the OUSF Administrator's Determination to the OUSF Beneficiary within five (5) calendar days after it is filed. If the OUSF Beneficiary received an OUSF preapproval funding letter and subsequently requested additional bids that were not reviewed by the OUSF Administrator during the preapproval process, then the OUSF preapproval funding letter is null and void.

(k) Any affected party, as defined in 17 O.S. § 139.106(D)(5), may file a request for reconsideration within fifteen (15) calendar days of the Determination being filed by the OUSF Administrator, by following the procedures in OAC 165:59-3-72.

(l) If no Request for Reconsideration is filed, the Determination shall be deemed final on the sixteenth (16) calendar day after the Determination is filed, and the cause with the Commission's Court Clerk shall automatically be closed upon the filing of a Notice of Disbursement by the OUSF Administrator. The OUSF Administrator or contracted agent shall issue payment within forty-five (45) days of the previously mentioned sixteenth (16) day, without an order of the Commission.

(m) Unless good cause is shown, any Request for OUSF Funding should be made within eighteen (18) months from the date the requesting eligible provider can determine the impact of occurrence of the circumstance giving rise to the request; however, if an OUSF Beneficiary has obtained an OUSF preapproval funding letter from the OUSF Administrator, the eligible provider shall make a request for funding within sixty (60) calendar days of the start of service.

(n) An eligible provider shall receive future reimbursement upon submission of properly formatted monthly payment requests, and any other required forms, to the OUSF Administrator and/or contracted agent, which shall include discount adjustments received from alternative funding sources designated to support universal service such as E-rate and the FCC's rural health care programs. Any ongoing monthly recurring charges will be adjusted as necessary based on the appropriate discount approved by USAC.

(o) An eligible provider shall notify the OUSF Administrator and/or contracted agent in writing, and in a format determined by the OUSF Administrator and/or contracted agent, of any changes to the provisioning of service, including but not limited to disconnection of service, upgrade and/or downgrade in connectivity speed, change in E-rate discount, or price. Any change to the previously approved Special Universal Services will require approval from the OUSF Administrator and/or contracted agent in order to determine if a new Request for OUSF Funding will be required, rather than the OUSF Administrator approving reimbursement through the monthly payment process. The OUSF Administrator shall advise the eligible provider of its determination within sixty (60) calendar days of receipt of the written notice from the eligible provider identifying the change(s). If the OUSF Administrator fails to advise the eligible provider of its determination concerning the requested change within the sixty (60) calendar day period, the OUSF funding being received by the eligible provider will cease until a new Request for OUSF Funding is processed in accordance with the Oklahoma Telecommunications Act

and this Chapter.

(p) When an eligible provider will no longer be providing Special Universal Services it shall notify the OUSF Administrator of the disconnection of service date fifteen (15) business days prior to disconnection, or immediately upon receipt of a request for disconnection, if the request is less than fifteen (15) business days prior to disconnection.

(q) No OUSF funds shall be disbursed to an eligible provider of Special Universal Services until the services are installed and in service.

(r) A Request for OUSF Funding, pursuant to this Section, shall be signed by an authorized agent of the eligible provider, or by the attorney for the eligible provider.

165:59-3-70. Procedures for requesting funding from the OUSF - Primary Universal Service

(a) An eligible local exchange telecommunications service provider may seek and obtain funds from the OUSF for Primary Universal Service by filing a "Request for OUSF Funding" and "Notice of Request for OUSF Funding" with the Commission's Court Clerk. On the date of filing the Request for OUSF Funding, the eligible local exchange telecommunications service provider shall deliver a filed copy of the Request for OUSF Funding to the OUSF Administrator for processing.

(b) Unless a waiver is granted by the OUSF Administrator, the following minimum filing requirements are necessary for causes filed pursuant to 17 O.S. § 139.106(G), and must be made available at the time of filing:

- (1) The name and address of the eligible local exchange telecommunications service provider;
- (2) A description of the provisions of the Oklahoma Telecommunications Act relied on for the request;
- (3) The amount requested for funding;
- (4) A chart of corporate organization listing all employees, and detailing any affiliate relationships;
- (5) A list of affiliates, a description of the service(s) or goods provided to or by the requesting eligible telecommunications service provider for each affiliate, and the total expense charged to the requesting eligible local exchange telecommunications service provider by each affiliate in sufficient detail to demonstrate that any affiliate company utilizing employees or assets of the company are allocated or reimbursed in accordance with 47 C.F.R., 32.27. This information shall be provided for the reimbursement year and the previous three (3) years (4 total), and shall include, but not be limited to, all contracts, memorandum, timesheets, calculations, and studies;
- (6) A written description and documentation showing how costs are separated for each regulated and non-regulated service that the requesting eligible local exchange telecommunications service provider provides to, or receives from, any affiliate that is associated with the Request for OUSF Funding. This description must show compliance with the cost allocation standards and procedures as set forth in 47 C.F.R. 64.901. This information

- shall be provided for the reimbursement year and the previous three (3) years (4 total), and shall include, but not be limited to, all contracts, memorandum, timesheets, calculations, and studies;
- (7) If applicable, copies of the eligible local exchange telecommunications service provider's Cost Allocation Manual (CAM), to include any changes to the CAM for the last three (3) years, including documentation supporting the cost allocation procedures and a current example of the application of the CAM's manual. If a CAM is unavailable, similar documentation must be provided;
 - (8) The most recent three (3) years preceding the request of audited financial statements, or if not subject to an audit, then reviewed financial statements, (including balance sheet, income statement, statement of cash flows accompanying notes, and any associated management letter);
 - (9) A description of network facilities, identifying all facilities included in the Request for OUSF Funding, with actual documentation available upon request by the OUSF Administrator;
 - (10) A description of the cost and accounting methodologies used to support the Request for OUSF Funding;
 - (11) A trial balance and general ledger in Excel format, or other format as agreed to by the Administrator;
 - (12) If applicable, a fully distributed cost study based on the FCC's Part 32, 36 and 64; provide plant reserve, rate base, income (revenue, expenses, and taxes), and other schedules included in the filing made with NECA or the FCC; a schedule of separations cost study for the reimbursement year. Underlying work-papers to be available onsite;
 - (13) Copies of the company's annual Federal Universal Service Fund (USF) High Cost Loop Data Collection forms for the reimbursement year and the previous three (3) years (4 total);
 - (14) The total number of full-time and part-time employees, officers, and/or contractors to include a listing of each of the above positions that includes title, duties, responsibilities, wages and/or salaries and benefits for the reimbursement year and the previous three (3) years (4 total);
 - (15) A list of expenses sought, including prior period adjustments and/or contingent liabilities that were reported on the eligible local exchange telecommunications service provider's books and records and are part of this request, including but not limited to any:
 - (A) reimbursed employee business expense, including travel, mileage, car rental, lodging, meals, etc.;
 - (B) lobbying;
 - (C) listing of all legal services and fees by law firm;
 - (D) advertising expenses;
 - (E) external relation costs;
 - (F) community outreach;
 - (G) entertainment;
 - (H) food, including travel, normal business, and company events;
 - (I) political contributions;
 - (J) charitable donations;
 - (K) penalties for fines or violations;
 - (L) membership fees and dues;
 - (M) gifts.

(16) The Federal tax classification (C-Corp, Sub-Chapter S, Partnership, etc.) of the eligible local exchange telecommunications service provider, and copies of the eligible local exchange telecommunications service provider's Federal and State tax returns for the reimbursement year and the previous three (3) years (4 total);

(17) A Description of the time tracking and reporting methods used by the eligible local exchange telecommunications service provider to distribute payroll dollars between regulated and non-regulated affiliates. Provide all supporting documentation for the reimbursement year and the previous three (3) years (4 total);

(18) A list of plant in-service retirements for the reimbursement year and the three (3) years prior to the reimbursement year (4 total);

(19) A plant in-service schedule by account that provides existing plant and additions for the reimbursement year and the three (3) years prior to the reimbursement year (4 total);

(20) Listing by account of all revenues, including aggregate customer revenues by category (residential, business, wholesale, etc.), that were used to off-set the eligible local exchange telecommunications service provider's OUSF funding request. This should include any amount received from the Federal USF, OUSF, and any other federal or state funding sources;

(21) The total number of customers by category (residential, business, wholesale, etc.) for the reimbursement year and the three (3) years prior to the reimbursement year (4 total);

(22) A copy of the eligible local exchange telecommunications service provider's regulated Continuing Property Records (CPR). If the CPRs do not tie to the general ledger, provide a reconciliation of the differences; and

(23) A list and copies of any audits or reviews to include letters, reports, memorandum, etc. conducted by the National Exchange Carriers Association (NECA), USAC, or FCC conducted during the reimbursement year and three (3) years prior to the reimbursement year (4 total).

(c) Unless a waiver is granted by the OUSF Administrator, the following minimum filing requirements are necessary for causes filed pursuant to 17 O.S. § 139.106(K), and must be made available at the time of filing:

(1) The name and address of the eligible local exchange telecommunications service provider;

(2) A description of the provisions of the Oklahoma Telecommunications Act relied on for the request;

(3) The amount requested for funding;

(4) Documentation necessary to substantiate the requested funding; and

(5) The most recently filed jurisdictional cost study;

(6) For highway relocation causes, the additional following minimum filing requirements are necessary:

(A) Copies of all bids;

(B) The request for proposal;

(C) Copies of all invoices and work orders;

(D) Documentation showing internal material accounting;

(E) Documentation showing internal labor accounting, including time sheets, and separate documentation showing accounting of overtime work;

(F) A certificate of completion of the relocation.

(d) No amended Requests for OUSF Funding shall be accepted. Eligible local exchange telecommunications service providers may withdraw the originally filed Request for OUSF Funding and file a new request at any time prior to the issuance of the Determination. Upon the filing of a Withdrawal of Request for OUSF Funding, the Commission's Court Clerk shall close the file, without Commission order. If a new request is filed, it shall be filed under a new cause number.

(e) Requests for OUSF Funding found to be incomplete (missing information required by the form and instruction package contained on the Commission website) may be denied.

(f) It is the intention of the OUSF Administrator that each funding request will be independently evaluated and reviewed on a case-by-case basis.

(g) The eligible local exchange telecommunications service provider requesting OUSF funding for primary universal service shall make every reasonable and timely effort to obtain funding from alternative funding sources designated to support universal service, and shall submit all documentation of the effort to obtain funding from alternative funding sources designated to support universal service as a part of its Request for OUSF Funding, or an explanation for why alternative funding is not available. Upon the eligible local exchange telecommunications service provider producing the documentation that it has sought alternative funding sources or an explanation for why alternative funding is not available, the eligible local exchange telecommunications service provider shall not be precluded from having its Request for OUSF Funding processed.

(h) If an eligible local exchange telecommunications service provider receives funding from alternative funding sources for an investment or expense already reimbursed by the OUSF, the eligible local exchange telecommunications service provider shall refund the double collection to the OUSF by either reducing a prospective funding request from the OUSF by an equivalent amount or remitting cash payment to the OUSF. Under no circumstances will double recovery be allowed.

(i) Concurrent with the filing of the Request for OUSF Funding, the eligible local exchange telecommunications service provider shall:

(1) Provide copies of its Request for OUSF Funding and Notice of the Request for OUSF Funding to the OUSF Administrator and the Oklahoma Attorney General.

(2) Provide Notice of the Request for OUSF Funding, which shall include the dollar amount of the request for lump sum and any recurring amounts, to the contributing providers by providing an electronic copy of such Notice to the OUSF Administrator on the date the eligible local exchange telecommunications service provider files its Request for OUSF Funding with the Commission's Court Clerk, for posting on the Commission website. The OUSF Administrator will then place the Notice on the Commission website within five (5) business days.

(j) The OUSF Administrator and/or contracted agent shall independently evaluate, review, and determine the accuracy of the complete request and issue a determination of the eligibility for funds, which details the amount of funding recoverable from the OUSF, within ninety (90) calendar days. Simultaneously with the OUSF Administrator or contracted agent advising the provider and parties to the cause, the OUSF Administrator or contracted agent shall file the written Determination in the Commission's Court Clerk and post it to the Commission's website. The eligible local exchange telecommunications service provider shall provide a copy of the OUSF Administrator's Determination to all parties of record

within five (5) calendar days after it is filed.

(k) Any affected party, as defined in 17 O.S. § 139.106(D)(5), may file a Request for Reconsideration within fifteen (15) calendar days of the Determination being filed by the OUSF Administrator, by following the procedures in OAC 165:59-3-72.

(l) If no Request for Reconsideration is filed, the Determination shall be deemed final on the sixteenth (16) calendar day after the Determination is filed, and the cause with the Commission's Court Clerk shall automatically be closed upon the filing of a Notice of Disbursement by the OUSF Administrator. The OUSF Administrator or contracted agent shall issue payment within forty-five (45) calendar days of the previously mentioned sixteenth (16) day, without an order of the Commission.

(m) Unless good cause is shown, any Request for OUSF Funding pursuant to this Section should be made within a reasonable time from the date the requesting local exchange telecommunications service provider can determine the impact of occurrence of the circumstance giving rise to the request, including receipt or notification of alternative funding designed to support universal service. However, this shall neither preclude a local exchange telecommunications service provider from filing a Request for OUSF Funding, nor shall it preclude such a Request from being processed, prior to the time a final decision is made regarding alternative funding from a program designed to support universal service.

(n) A Request for OUSF Funding, pursuant to this Section, shall be signed by an attorney for the eligible local exchange telecommunications service provider.

(o) For causes filed pursuant to 17 O.S. § 139.106(G), consistent with OAC 165:59-3-64(d), and when the OUSF Administrator has previously issued an initial Determination or a Commission final order has been issued, an eligible local exchange telecommunications service provider may file an OUSF request pursuant to 17 O.S. § 139.106(G) and request a variance and risk-based review, provided that:

- (1) Requests for OUSF Funding made pursuant to the variance and risk-based review shall be filed with the Commission's Court Clerk and provided on the date of filing to the OUSF Administrator for processing.
- (2) The above provisions in OAC 165:59-3-70(d)-(f) and (i)-(l) are applicable to causes processed using the variance and risk-based review.
- (3) The OUSF Administrator shall develop an annual variance and risk-based review procedure and reporting format that specifies the information to be made available for purposes of such variance and risk-based review.
- (4) The annual variance and risk-based review process shall include the submission of all information requested, in a format to be developed by the OUSF Administrator.
- (5) Such annual variance and risk-based review shall be based on comparisons between and among the documentation provided with the initial Request for OUSF Funding, and the information subsequently provided in conjunction with an annual variance and risk-based review.
- (6) In no case shall an increase in OUSF funding based on an annual variance and risk-based review exceed five (5) percent of the initial amount granted by the Administrator's Determination or a final order issued by the Commission.

165:59-3-71. [RESERVED]

[Source: Reserved at 34 Ok Reg 5, eff 8-12-16 (emergency); Reserved at 34 Ok Reg 1011, eff 9-11-17]

165:59-3-72. Request for reconsideration procedures

(a) The Request for Reconsideration and a Notice of Prehearing Conference shall be filed with the Commission's Court Clerk and provided to all parties of record on the same day it is filed. Any party filing a Request for Reconsideration must be represented by an attorney, as defined in OAC 165:5-1-3.

(b) Notice of the Request for Reconsideration shall be given to the OUSF Administrator, the Oklahoma Attorney General, and all parties to the cause, and shall be posted on the Commission's website by the OUSF Administrator.

(c) Upon filing the Request for Reconsideration and the Notice of Prehearing Conference, the Request for Reconsideration shall, without Commission order, be assigned to an ALJ, and set for hearing on the next regularly scheduled prehearing conference date, which is at least five (5) business days after the date of filing, unless the parties agree or the Commission directs otherwise.

(d) At the time a Request for Reconsideration is filed, all documentation not contained in the public record and not filed in the cause with the Commission's Court Clerk, relied upon by the OUSF Administrator in making the Determination, shall be made available to the party filing the Request for Reconsideration. No confidential information and/or highly sensitive confidential information shall be provided until the nondisclosure agreement, as approved pursuant to OAC 165:59:3-30(f) is signed by the affected party. Additionally, all data requests issued with respect to a Request for Reconsideration shall be answered within ten (10) business days, unless otherwise agreed by the parties. Any prefiled testimony, statement of position, or legal brief in support of the Request for Reconsideration shall be filed with the Commission's Court Clerk within fifteen (15) calendar days of the Request for Reconsideration, and provided to all parties of record on the same day it is filed.

(e) Any responsive prefiled testimony or responsive legal brief shall be filed with the Court Clerk within ten (10) business days of the filing of the prefiled testimony or legal brief, as referenced in subsection (d), and provided to all parties of record on the same day it is filed.

(f) During the prehearing conference, the ALJ shall identify any additional requirements for a procedural schedule, including scheduling a hearing on the Request for Reconsideration, if deemed necessary by the ALJ. The parties shall identify all witnesses or potential witnesses who will provide testimony, and all witnesses or potential witnesses shall submit prefiled testimony. The ALJ may determine that a hearing on the Request for Reconsideration is not needed for causes without material disputes of fact or if all parties waive cross-examination. The hearing on the Request for Reconsideration shall be set within forty-five (45) calendar days of filing of the Request for Reconsideration, unless the Commission orders otherwise. The parties shall adhere to the procedural schedule set by the ALJ, without a Commission order.

(g) The ALJ shall issue an ALJ report containing the findings of fact, conclusions of law, and recommendation within fifteen (15) business days of the hearing on the Request for Reconsideration. If the ALJ determines no hearing on the Request for Reconsideration is necessary, the ALJ shall issue an ALJ report as set forth herein, no later than sixty (60) calendar days after the date the Request for Reconsideration was filed.

(h) Recommendations on motions, objections, and all filings made prior to the issuance of an ALJ report shall be addressed by the ALJ in the ALJ report, containing the recommendation on the merits of the Request for Reconsideration, unless the Commission orders otherwise.

(i) Oral or written exceptions regarding motions, objections, and all filings made prior to the issuance of an ALJ report will not be allowed, unless the Commission orders otherwise. Exceptions to the ALJ report, shall be governed under OAC 165:5-13-5(a)(2), (b) and (c).

(j) A Request for Reconsideration may be withdrawn at any time prior to opening of the record in the Hearing on the Request for Reconsideration by filing a Withdrawal of Request for Reconsideration with the Commission's Court Clerk. Upon filing a Withdrawal of Request for Reconsideration, the Cause shall be closed by the Commission's Court Clerk, without a Commission order, and payment shall be made within forty-five (45) calendar days after filing the Withdrawal of Request for Reconsideration.

(k) If the Commission does not issue a final order within thirty (30) calendar days from the date the Request for Reconsideration is filed, the Request shall be deemed approved on an interim basis subject to refund with interest. To obtain interim funding, the eligible local exchange telecommunications service provider or the eligible provider must file notice with the Commission's Court Clerk of its intention to seek interim funding. The OUSF Administrator shall pay the interim funding within forty-five (45) calendar days upon receipt of notice.

SUBCHAPTER 7. SPECIAL UNIVERSAL SERVICES

165:59-7-1. Reimbursement from the OUSF for Special Universal Service

(a) An OUSF Beneficiary may be eligible to receive funding from both the OUSF and other state or federal funds; however, in no instance will there be a double recovery. If the OUSF Beneficiary receives funding from another state or federal

fund for an investment or expense already reimbursed by the OUSF, the OUSF Beneficiary shall notify the eligible provider, and thereafter the eligible provider shall reduce the amount of its credit to the OUSF Beneficiary and its prospective funding request from the OUSF by an equivalent amount. The OUSF Beneficiary shall make every reasonable effort to obtain funding from another state and/or federal fund designated to support special universal service. The OUSF Beneficiary shall provide the OUSF Administrator with information regarding the OUSF Beneficiary's request for funding from government sources designed to support the provisioning of the Special Universal Service, i.e. the federal schools and libraries program or federal rural health care program, or an explanation of why such funding is not available, or why the OUSF Beneficiary did not request such funding. Failure to provide such documentation may result in the OUSF Administrator denying the request for Special Universal Service funding from the OUSF. The OUSF Beneficiary shall provide evidence of any exemption it has to obtain funding from another state or federal fund designated to support Special Universal Services.

(b) Completing alternative funding requests in a manner that results in reduced alternative funding, for which the OUSF Beneficiary would have otherwise been eligible, may reduce OUSF funding.

(c) The OUSF Administrator will utilize the following procedures when evaluating a request for OUSF funding for Internet access to a public school or public library:

(1) A fair and open competitive bidding process shall be used to select the services and eligible provider for which OUSF funding will be sought, including costs for Internet access to schools and libraries for the balance not paid by E-rate.

(2) An affidavit will be required from the public school or public library that the bid information submitted to the OUSF Administrator for review contains all the bids received by the school or library. All evaluation tools utilized by the OUSF Beneficiary while reviewing the bids, including all received bids, must be provided to the OUSF Administrator at the Commission offices or in a manner approved by the OUSF Administrator.

(3) The OUSF will not reimburse charges for redundant service(s); however, if the eligible provider is unable to provision the eligible bandwidth using a single access line, the OUSF Beneficiary may choose to employ multiple access lines to provision the eligible bandwidth level established by the SETDA standard, as long as all lines are provisioned by the same eligible provider. The OUSF Administrator may waive this requirement for good cause shown.

(4) The OUSF shall not fund more than one eligible provider for the same service at the same location for the same time period, except during a transition period from one eligible provider to another. Such funding during a transition period shall not exceed thirty (30) calendar days.

(5) The OUSF will fund either the lowest cost reasonable qualifying bid, or a bid that is no more than 25% above the lowest cost reasonable qualifying bid, inclusive of all non-recurring eligible charges, for the eligible bandwidth range of the OUSF Beneficiary. If the selected bid is more than 25% above the lowest cost reasonable qualifying bid, the OUSF will fund the lowest cost reasonable qualifying bid plus the 25%.

(6) The OUSF Beneficiary's request for bids shall clearly identify the minimum and a maximum bandwidth at standard available levels as suggested in guidelines promulgated by the FCC or Commission rules.

(7) Once OUSF funding has been approved pursuant to the Oklahoma Telecommunications Act, the eligible provider should submit monthly payment reports to the OUSF Administrator or the contracted agent on a monthly basis. The initial payment will be as necessary to pay all amounts approved but not yet received by the eligible provider. After the initial monthly payment request is submitted, a monthly payment request should be submitted by the eligible provider to collect the amount of credit provided to the OUSF Beneficiary. The monthly payment requests shall be paid on the next regularly scheduled payment date. A new Request for OUSF Funding must be filed to recover any monthly payment amount that exceeds ninety (90) days of service, unless otherwise agreed to by the OUSF Administrator.

(8) Monthly payment reports must be received in the form and content prescribed by the OUSF Administrator.

(9) The OUSF Administrator will post to the Commission website a copy of the monthly payment report within five (5) business days of the payment report being approved by the OUSF Administrator.

(10) Monthly recurring amounts or other funding related changes (e.g. level of bandwidth, or changes in E-rate discount amount) will not be increased from the approved amount without supporting documentation being made available to the OUSF Administrator.

(11) Funding for eligible services, including federal funding, shall not exceed actual eligible expenses.

(d) The OUSF Administrator will utilize the following procedures when evaluating a request for OUSF funding for a telemedicine line:

(1) A fair and open competitive bidding process shall be used to select the services and eligible provider for which OUSF funding will be sought, including costs for Internet access to eligible healthcare entities.

(2) An affidavit will be required from the eligible healthcare entity that the bid information submitted to the OUSF Administrator for review contains all the bids received by the eligible healthcare entity. All evaluation tools utilized by the OUSF Beneficiary while reviewing the bids, including all received bids, must be provided to the OUSF Administrator.

(3) The OUSF will not reimburse charges for redundant service(s); however, the eligible healthcare entity may choose to employ multiple access lines to provision the eligible bandwidth level established by the FCC, and as stated in OAC 165:59-7-6(c), as long as all lines are provisioned by the same eligible provider.

(4) The OUSF shall not fund more than one eligible provider for the same service at the same location for the same time period, except during a transition period from one eligible provider to another. Such funding during a transition period shall not exceed thirty (30) calendar days.

(5) The OUSF will fund reasonable installation and/or reasonable construction charges. These charges shall be evaluated as part of the OUSF Administrator's analysis of lowest cost reasonable qualifying bid selection by the OUSF Beneficiary. Installation charges, construction charges, early termination fees, and charges assessed upon the expiration of a contract will be amortized over the initial term of the contract when determining the lowest cost reasonable qualifying bid.

(6) The OUSF will fund either the lowest cost reasonable qualifying bid, or a bid that is no more than 25% above the lowest cost reasonable qualifying

bid, inclusive of all non-recurring eligible charges, for the eligible bandwidth range provided in OAC 165:59-7-6(c) of the OUSF Beneficiary. If the selected bid is more than 25% above the lowest cost reasonable qualifying bid, the OUSF will fund the lowest cost reasonable qualifying bid plus the 25%.

(7) Once OUSF funding has been approved pursuant to the Oklahoma Telecommunications Act, the eligible provider should submit monthly payment reports to the OUSF Administrator or the contracted agent on a monthly basis. The initial payment will be as necessary to pay all amounts approved but not yet received by the eligible provider. After the initial monthly payment request is submitted, a monthly payment request should be submitted by the eligible provider to collect the amount of credit provided to the eligible healthcare entity. The monthly payment requests shall be paid on the next regularly scheduled payment date. A new Request for OUSF Funding must be filed to recover any monthly payment amount that exceeds ninety (90) days of service, unless otherwise agreed to by the OUSF Administrator.

(8) Monthly payment reports must be received in the form and content prescribed by the OUSF Administrator.

(9) The OUSF Administrator will post to the Commission website a copy of the monthly payment report within five (5) business days of the payment report being approved by the OUSF Administrator.

(10) Monthly recurring amounts or other funding related changes (i.e. level of bandwidth) will not be increased from the approved amount without supporting documentation being made available to the OUSF Administrator.

(11) Funding for eligible services, including federal funding, shall not exceed actual eligible expenses.

(12) Increases in cost caused by the expiration of a contract will not be permitted via the monthly payment process when the new cost is higher than 10% of the expired contract and when there is no new contract in place. A new Request for OUSF Funding will need to be filed in the Commission's Court Clerk to recover any difference in prices caused by an expired contract.

(13) Reimbursement of the cost for any additional service above and beyond the telemedicine bandwidth on contracts and invoices will be denied, unless the costs are in compliance with the Oklahoma Telecommunications Act. Invoices provided to request OUSF Funding must contain a breakdown of non-eligible expenses, such as firewall (unless provided as a standard component of Internet access by the eligible provider to all customers with the same type of service and not priced separately), email packages, and domain registration, etc.

(e) If a Request for Reconsideration is filed and subsequently withdrawn, the OUSF Administrator will pay the determined amount no later than forty-five (45) calendar days after the date the Request for Reconsideration is withdrawn.

165:59-7-6. Telemedicine access for eligible healthcare entities

(a) It is the intention of the Commission that this Chapter be interpreted to assist in the development of telemedicine service programs which in turn have the following effects on eligible healthcare entities:

- (1) Empowering eligible healthcare entities, especially those in rural areas, to provide a higher level of medical service;
- (2) Expanding the range of medical services available, especially those in rural areas;
- (3) Providing greater access to more choices in medical care by patients in rural areas;
- (4) Reducing the number of rural patient transfers to urban areas;
- (5) Enhancing rural economic development; and
- (6) Reducing the costs of medical care at eligible healthcare entities.

(b) Upon compliance with the competitive bidding process, and other requirements set forth in the Oklahoma Telecommunications Act, and upon receipt of a written request by an authorized representative of an eligible healthcare entity, as defined by this Chapter, the eligible provider shall, by itself or in conjunction with another provider of telecommunications services, provide Special Universal Services to the eligible healthcare entity.

(c) Special Universal Services to an eligible healthcare entity include the provision of bandwidth per standards as recommended by the FCC sufficient for providing telemedicine services including the telemedicine line, reasonable installation, and network termination equipment owned and operated by the eligible provider that is necessary to provide the eligible telemedicine service. Bandwidth may be rounded up to the next available standard service increment to avoid increased costs to the fund.

(1) The OUSF Administrator shall approve funding for bandwidth requests, up to and including the amount listed below, for an eligible healthcare entity as follows:

(A) Department of Corrections shall be eligible for funding up to 100 Mbps;

(B) Federally Qualified Health Centers shall be eligible for funding as follows:

- (i) Urban locations up to 500 Mbps;
- (ii) Rural locations up to 100 Mbps.

(C) County Health Department shall be eligible for funding as follows:

- (i) Urban locations up to 500 Mbps;
- (ii) Rural locations up to 100 Mbps.

(D) City-County Health Department shall be eligible for funding as follows:

- (i) Urban locations up to 500 Mbps;
- (ii) Rural locations up to 100 Mbps.

(E) Not for Profit Mental Health and Substance Abuse Facilities (certified facilities pursuant to OAC 450, Chapters 17 and 24) that are not staffed 24-hours each day shall be eligible for funding up to 100 Mbps;

(F) Eligible healthcare entities that are staffed 24-hours each day, including those which are academic facilities, large medical centers, hospitals, and mental health and substance abuse facilities (certified facilities pursuant to OAC 450 Chapter 23) shall be eligible to receive bandwidth, based on licensed or certified beds, as follows:

- (i) 1 to 50 beds shall be eligible for funding up to 500 Mbps;
- (ii) 51 to 100 beds shall be eligible for funding up to 1 Gbps;
- (iii) 101 to 200 beds shall be eligible for funding up to 3 Gbps;
- (iv) 201 or greater beds shall be eligible for funding up to 10 Gbps.

(G) The eligible healthcare entities, identified above in (A) through (F), which support other eligible healthcare entities as a central location or host, may request additional bandwidth per supported location of up to twenty five percent (25%) of the supported eligible healthcare entity's eligible bandwidth.

(2) When determining whether funding for additional bandwidth is appropriate, when an eligible healthcare entity requests funding for a bandwidth that exceeds the amounts listed in section (1), the OUSF Administrator may consider, but not be limited to considering, the following factors:

- (A) Number of health care providers and staff at the eligible healthcare entity;
- (B) Number of beds at the eligible healthcare entity;
- (C) The telemedicine services provided at the eligible healthcare entity;
- (D) Support for other telemedicine facilities that require broadband access with consideration for any payments received by the supporting facility; and
- (E) Prior bandwidth usage, not including public network usage.

(d) In no case, however, shall reimbursement from the OUSF be made for an Internet subscriber fee or charges incurred as a result of services accessed via the Internet.

(e) The eligible provider shall be entitled to reimbursement from the OUSF for a one-time reasonable charge for the establishment of service of a new telecommunications line or wireless connection. Under this subsection (e), reimbursement is intended to allow for reasonable changes in 1) the

telecommunications services and technologies purchased by an eligible healthcare entity, 2) the physical location of an eligible healthcare entity by permitting establishment of new service at a new location, and/or 3) the eligible provider providing service to an eligible healthcare entity.

(f) The written request by an authorized representative of an eligible healthcare entity to an eligible provider shall be in the form and content approved by the OUSF Administrator.

(g) The OUSF Administrator and/or its contracted agent may periodically seek verification of continued eligibility from an eligible healthcare entity, and the eligible healthcare entity shall maintain sufficient documentation to be able to provide verification of eligibility within fifteen (15) calendar days after request of the OUSF Administrator and/or its contracted agent. Failure to supply the requested eligibility verification within the stated timeframe will result in immediate discontinuance of OUSF support until information is received and deemed complete, unless the Commission directs otherwise.

(h) Eligible healthcare entities that are eligible for funding from a program designed to support universal service, including but not limited to the FCC Rural Health Care Program, are expected to not only request funding, but to follow through and complete the process for Rural Health Care Program funding.

(i) Completing alternative funding requests in a manner that results in reduced alternative funding, for which the OUSF Beneficiary would have otherwise been eligible, may reduce OUSF funding.

(j) If the eligible healthcare entity is eligible for Rural Health Care Program funding, the following documents shall be provided to the OUSF Administrator within thirty (30) calendar days after the eligible healthcare entity has either submitted the form to USAC, or received the form from USAC, whichever is applicable.

(1) If eligible under the Telecommunications program, the eligible healthcare entity must provide the OUSF Administrator the FCC Form 466, Funding Commitment Letter, FCC Form 467, and Health Care Provider Support Schedule.

(2) If eligible under the Healthcare Connect Fund, the eligible healthcare entity must provide the OUSF Administrator the FCC Form 462 and associated network cost worksheet, and Funding Commitment Letter.

165:59-7-7. Toll-free calling to public schools and public libraries [REVOKED]

[Source: Added at 14 Ok Reg 2562, eff 7-1-97; Amended at 15 Ok Reg 1199, eff 1-6-98 (emergency); Amended at 15 Ok Reg 1919, eff 7-1-98; Revoked at 34 Ok Reg 5, eff 8-12-16 (emergency); Revoked at 34 Ok Reg 1011, eff 9-11-17]

165:59-7-8. Internet access to public schools and libraries

(a) It is the intention of the Commission that this Chapter be interpreted to maximize the availability of Internet access to all public schools and public libraries within Oklahoma, so that children within Oklahoma will be able to utilize the Internet to enhance their learning opportunities, thereby better preparing them for the future.

(b) Special Universal Services for schools shall include the E-rate Eligible Services List (ESL) for Category One services as determined by the FCC for the applicable funding year or, in the absence of such a list, as published by USAC. In the event

no ESL is available from the FCC or USAC for the applicable funding year, eligible services will be those on the ESL for the last funding year for which an ESL was available.

(c) Special Universal Services shall include the provision of bandwidth sufficient for providing educational services not to exceed, without good cause shown, the standards established for the relevant funding year by SETDA or successor educational broadband standard including Internet access lines, WAN connections, reasonable installation, and network termination equipment owned and operated by the eligible provider as defined by the ESL that is necessary to provide the eligible service. Student counts as reported to the State Department of Education in October of the year prior to the relevant funding year shall be utilized for the purpose of determining bandwidth recommendations established by SETDA for purposes of this paragraph. In the absence of standards prescribed for the applicable funding year, the standards for the next prescribed funding year shall be used. Bandwidth may be rounded up to the next available standard service increment to avoid increased costs to the fund.

(d) Special Universal Services for libraries shall include the E-rate Eligible Services List (ESL) for Category One services as determined by the FCC for the applicable funding year or, in the absence of such a list, as published by USAC. In the event no ESL is available from the FCC or USAC for the applicable funding year, eligible services will be those on the ESL for the last funding year for which an ESL was available.

(e) Special Universal Services shall include the provision of bandwidth sufficient for providing library services per standards as recommended by the FCC including Internet access lines, reasonable installation, and network termination equipment owned and operated by the eligible provider that is necessary to provide the eligible service. Bandwidth may be rounded up to the next available standard service increment to avoid increased costs to the fund.

(f) Special Universal Services shall not include voice services that use separate lines or have allocated bandwidth.

(g) In no case will the OUSF reimburse an entity for an Internet subscriber fee or charges incurred as a result of services accessed via the Internet.

(h) The eligible provider shall update the OUSF Administrator through the monthly payment process if E-rate funding is discontinued, for any reason, within thirty (30) calendar days of receiving notification from USAC.

(i) The Commission encourages public schools to request sufficient bandwidth to achieve the school's educational goals.

165:59-7-10. Other sources of funds

(a) OUSF Beneficiaries should make every reasonable effort to seek other sources of funding from State or federal funds, to minimize the impact on the OUSF. This includes completing the application process and requesting disbursement of funds from the federal fund administrator when funding is approved.

(b) Completing alternative funding requests in a manner that results in reduced alternative funding, for which the OUSF Beneficiary would have otherwise been eligible, may reduce OUSF funding.

(c) In the event that federal universal service funding programs offer to match state funds for special construction cost, OUSF Beneficiaries will post bid requests with sufficient lead time for the OUSF Administrator to timely provide preapproval of the selected bid.

165:59-7-15. Provision of Special Universal Services

(a) After compliance with the Oklahoma Telecommunications Act, and upon receipt of a written request by an OUSF Beneficiary, the eligible provider receiving the request shall make a good faith effort to provide the requested Special Universal Service not later than ten (10) business days after receiving the request.

(b) If the requested Special Universal Service cannot be provided within the time limit established by subsection (a) of this Section, the eligible provider shall immediately notify the OUSF Beneficiary requesting the service of the estimated delay and any interim service that might be available. Service requests shall be filled as quickly as practicable, but no longer than thirty (30) days after the request for service has been received by the eligible provider unless unavoidable delays beyond the eligible provider's control are experienced. If the service will be delayed longer than thirty (30) days, the eligible provider shall promptly notify the OUSF Administrator of the reason for the delay upon becoming aware of the delay, and the anticipated completion date of the request for service.

165:59-7-17. Disclosure on bill regarding provided Special Universal Services

(a) Each eligible provider shall render a bill to the OUSF Beneficiary regarding said Special Universal Services. The bill shall reflect the provider's itemized charges for the provisioning of Special Universal Services.

(b) Prior to signing a contract with an OUSF Beneficiary, the eligible provider shall provide the OUSF Beneficiary, written information regarding the limitations on funding from the OUSF. The content of the written information to be provided shall be posted on the Commission's website.

[Source: Added at 15 Ok Reg 1199, eff 1-6-98 (emergency); Added at 15 Ok Reg 1919, eff 7-1-98; Amended at 16 Ok Reg 2360, eff 7-1-99; Amended at 28 Ok Reg 2255, eff 7-25-11; Amended at 30 Ok Reg 1581, eff 7-11-13; Amended at 32 Ok Reg 868, eff 8-27-15; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-7-19. Competitive bidding

(a) In the interest of fostering a fair and open bidding process from all qualified bidders eligible to receive OUSF funding under the Oklahoma Telecommunications Act, the following are requirements for requests for bids:

(1) The bidder must be an eligible provider, as defined in 17 O.S. § 139.102.

(2) Bidding shall not be structured in a manner to exclude carriers eligible to receive OUSF funding where the OUSF Beneficiary is located.

(A) The bid request must require ineligible services be priced separately from OUSF eligible services.

(B) The bid request shall not require that the Internet and WAN be provided by the same eligible provider.

(C) To avoid bid structuring, the bid request shall clearly identify the requested bandwidth range, inclusive of the eligible bandwidth limit, of the OUSF Beneficiary, and shall include a minimum and a maximum bandwidth at standard available levels as suggested in guidelines promulgated by the FCC or Commission rules.

(b) Bids must contain all costs to provide the Special Universal Services. Any bid containing estimated costs, other than fees and taxes to be paid to a third party, will be disregarded as not meeting the bid requirements.

(c) Bidders are presumed to know statutory requirements for contracts for public entities; bids that do not conform to requirements for public entities may be disregarded.

(d) An existing contract, selected by the OUSF Beneficiary for comparison to received bids, shall be considered as being submitted during the same bidding period as the awarded bid.

[Source: Added at 34 Ok Reg 5, eff 8-12-16 (emergency); Added at 34 Ok Reg 1011, eff 9-11-17]

165:59-7-20. [RESERVED]

165:59-7-21. Installation, construction, and special construction

(a) The OUSF will fund reasonable installation and special construction charges. These charges shall be evaluated for purposes of the OUSF Administrator's analysis of lowest cost reasonable qualifying bid selection by the OUSF Beneficiary as part

of the overall bid pricing and funding evaluation, and will be amortized as follows:

- (1) For schools and libraries, over a one (1) year period, unless the bid allocates the construction over multiple years and is approved pursuant to state or federal law.
- (2) For telemedicine, over the lifetime of the contract, not to exceed five (5) years.

(b) Upon request by the OUSF Beneficiary, during the preapproval process, the OUSF Administrator's analysis of lowest cost reasonable qualifying bid may allocate special construction charges over the period selected in the special construction cost analysis in (c) in order to consider long term cost effectiveness to the OUSF.

(c) Special Construction Cost:

- (1) Prior to posting the request for bids, the OUSF Beneficiary is required to seek OUSF Administrator review of any bid evaluation criteria for any projects involving special construction cost. Review of the request for bids and bid evaluation criteria does not guarantee approval of funding.
- (2) Cost effectiveness evaluation for projects with special construction cost may extend up to five (5) years.
- (3) If special construction is funded, special construction will not be available again to the location(s) specified for the period used in the analysis.
- (4) Special construction costs will not be included in monthly recurring costs.
- (5) Eligible providers that receive special construction cost funding for installation shall maintain or reduce monthly recurring costs.

SUBCHAPTER 9. OKLAHOMA LIFELINE FUND

PART 1. LIFELINE SERVICE PROGRAM

165:59-9-1. Purpose of Oklahoma Lifeline Fund

- (a) This Subchapter establishes guidelines for the administration of the Oklahoma Lifeline Fund, that are consistent with 17 O.S. §§ 139.105 and 139.107.
- (b) The Oklahoma Lifeline Fund is designed to advance the goals of universal service, and ensure that low-income residential customers within the State of Oklahoma, who meet the criteria of 17 O.S. § 139.105, and 47 CFR §§ 54.400 through 54.415, are provided financial assistance, pursuant to the Oklahoma Telecommunications Act.

[Source: Added at 15 Ok Reg 1195, eff 1-6-98 (emergency); Added at 15 Ok Reg 1915, eff 7-1-98; Amended at 19 Ok Reg 2017, eff 7-1-02; Amended at 30 Ok Reg 1581, eff 7-11-13; Amended at 32 Ok Reg 868, eff 8-27-15; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-9-2. [RESERVED]

[Source: Reserved at 15 Ok Reg 1195, eff 1-6-98 (emergency); Reserved at 15 Ok Reg 1915, eff 7-1-98]

165:59-9-3. Oklahoma Lifeline Service Program

- (a) The Oklahoma Lifeline Service Program is a program designed to operate in conjunction with the Federal Lifeline program, to provide a monthly credit to the monthly bill of qualifying residential subscribers for basic local exchange service, in an amount equal to such amount as may be established by 17 O.S. § 139.105.

- (b) In order to qualify for the Oklahoma Lifeline Service Program, a customer must meet all applicable requirements of 47 CFR §§ 54.400 through 54.422 and/or 17 O.S. § 139.105.
- (c) Each eligible local exchange telecommunications service provider shall file tariffs implementing a Lifeline Service Program that is consistent with this Subchapter.
- (d) Lifeline Assistance shall not be available on a retroactive basis to the customers.
- (e) Upon notification to the eligible local exchange telecommunications service provider, the credit will be discontinued for customers who no longer qualify for Lifeline Assistance.
- (f) Lifeline Service benefits are applicable only to the primary line at the customer's principal residence. An applicant for Lifeline Service may report only one address in the state as the principal place of residence.
- (g) As a participant in Lifeline Assistance, customers will be eligible to receive Toll Restriction Service at no charge.
- (h) Each eligible local exchange telecommunications service provider with approved Lifeline Service tariffs shall advertise the availability of the Lifeline Service Program within its exchange(s) or service territory on, at a minimum, an annual basis.
- (i) The wireless eligible local exchange telecommunications service provider must provide access to its own customer service department by dialing 611 from the wireless handset or have a toll free number for contacting the eligible local exchange telecommunications service provider programmed in the phone and clearly identified.
- (j) All enrollment in any Lifeline Services from any outdoor mobile location shall be governed by OAC 165:55-23-16.
- (k) Any wireless handset provided in conjunction with the Lifeline Service must clearly and permanently identify the provider of the service.
- (l) An eligible local exchange telecommunications service provider may not provide Lifeline Service purely by resale without a Commission order.
- (m) An approved Lifeline tariff may not be modified without submitting the modification to the OLF Administrator at least fifteen (15) calendar days prior to the effective date of the proposed change for the purpose of receiving a determination whether the modification is in the public interest. Unless the eligible local exchange telecommunications service provider receives written notification that its modification is NOT IN THE PUBLIC INTEREST within fifteen (15) calendar days after its submission, the submission is deemed to be in the public interest and may be implemented.
- (n) The eligible local exchange telecommunications service provider shall utilize a third party verification system that has been approved by the OLF Administrator to verify the customer's identity and address, or obtain a waiver from the OLF Administrator from this requirement.
- (o) The eligible local exchange telecommunications service provider must retain a copy of the signed application for Lifeline Service, and any recertification information for five (5) years.
- (p) The eligible local exchange telecommunications service provider shall maintain a database sufficient to identify any duplicates among all companies associated with the eligible local exchange telecommunications service provider.
- (q) Unless otherwise approved by Commission Order, any Lifeline plan on Tribal Land must include a minimum of one thousand (1,000) minutes of local voice use or unlimited domestic calling, to be considered in the public interest. Any Lifeline

plan on non-Tribal Land must include a minimum of five-hundred (500) minutes of local voice use to be considered in the public interest.

(r) All marketing efforts must clearly identify the eligible local exchange telecommunications service provider actually providing the Lifeline Service.

(s) In addition to other remedies available to the Commission, violations of the marketing rules may result in a minimum of a thirty (30) days suspension of an eligible local exchange telecommunications service provider's ability to sign up new customers and/or a fine as authorized by 17 O.S. § 139.105 after notice and hearing.

(t) The eligible local exchange telecommunications service provider seeking reimbursement from the OLF for the provisioning of Lifeline services shall also note on the certified written statement obtained from the customer the name of the employee or representative who verified the customer's eligibility for Lifeline service and the type of documentation reviewed.

(u) Prior to obtaining money from the OLF, an eligible local exchange telecommunications service provider must show compliance with 17 O.S. § 139.105(E).

165:59-9-5. Recertification of Lifeline eligibility

Each eligible local exchange telecommunications service provider, eligible to receive Lifeline support from the Oklahoma Lifeline Fund and/or the federal Lifeline Fund shall, annually, require each end-user subscriber to recertify confirming their continued eligibility for the State or Federal Lifeline program. The eligible local exchange telecommunications service provider shall retain a copy of the signed recertification form for three (3) years.

[Source: Added at 15 Ok Reg 1195, eff 1-6-98 (emergency); Added at 15 Ok Reg 1915, eff 7-1-98; Amended at 32 Ok Reg 868, eff 8-27-15; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-9-6. Retention of Lifeline eligibility records

All records, including the signup form showing proof of eligibility and a report from the third party verification system that shows the identity and address of the Lifeline customer was verified (unless the eligible local exchange telecommunications service provider obtained a waiver from the requirement to utilize a third party verification system) shall be retained by the eligible local exchange telecommunications service provider for a minimum of three (3) years.

PART 3. ADMINISTRATION OF THE OKLAHOMA LIFELINE FUND

165:59-9-11. Administration of the Fund

(a) The Public Utility Division of the Commission shall be the Administrator of the OLF. The administrative function shall be headed by the OLF Administrator, as defined in 17 O.S. § 139.102.

(b) The OLF Administrator may, as necessary, take all actions necessary to fulfill the objectives of the Oklahoma Telecommunications Act, including but not limited to, contracting with a third-party who has no conflict of interest in the provisioning of telecommunications services for assistance with the administrative functions related to the OLF.

(c) The OLF Administrator is expressly authorized to bring actions before the Commission to enforce the provisions of this Subchapter and the Oklahoma Telecommunications Act.

(d) The OLF Administrator and/or contracted agent shall administer the OLF in accordance with this Subchapter and the Oklahoma Telecommunications Act.

(e) The OLF Administrator's or contacted agent's duties shall include, but not be limited to:

- (1) Receiving, distributing, and accounting for funds paid into the OLF;
- (2) Providing funding to eligible telecommunications providers from the OLF;
- (3) Managing the daily operations and affairs of the OLF;
- (4) Monitoring and assuring contribution/payment compliance, as well as conducting periodic audits of the contributing providers to ensure that the contributors are accurately reporting and making proper payments to the OLF;
- (5) Performing any periodic audits of the OLF deemed necessary by the Administrator, provided however, that the Staff of the Public Utility Division shall not conduct an annual audit for any year during which it also acted as the OLF Administrator;
- (6) Informally resolving disputes;
- (7) Independently evaluate and review all Requests for OLF Funding within the time frames identified in the Oklahoma Telecommunications Act, make a Determination of the accuracy of the requests, and advise the eligible local exchange telecommunications service provider requesting the funds of the determination of eligibility made by the OLF Administrator; and,
- (8) Performing any other duties as required by law, and/or this Chapter.

165:59-9-13. Audits

(a) The OLF shall be audited annually by a non-OLF independent auditor selected by a committee with input from the State Auditor's Office. The committee shall be selected by the Commission's Director of Administration.

(b) The annual audit should be based on assessed program risk conducted in accordance with standards. It may also include a review of the documentation on file with the eligible local exchange telecommunications service provider regarding eligibility of the end-user to participate in the Lifeline Service Program, whether received during the initial enrollment or during the annual recertification process, and the amounts received by the eligible local exchange telecommunications service provider for reimbursement from the OLF.

(c) The audit may include further objectives as requested by the Commission's Director of Administration, and/or as required by the contract between the OLF and independent auditor.

- (d) The cost of audits of the OLF shall be funded by the OLF.
- (e) All audit reports, once finalized, shall be provided to the Oklahoma Attorney General.

165:59-9-15. Violations

If a contributing provider to the OLF fails or refuses to make a contribution to the OLF as required by the Oklahoma Telecommunications Act and this Chapter, such violation will be resolved consistent with the provisions of OAC 165:59-3-38.

[Source: Added at 15 Ok Reg 1195, eff 1-6-98 (emergency); Added at 15 Ok Reg 1915, eff 7-1-98; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

[Source: Reserved at 15 Ok Reg 1195, eff 1-6-98 (emergency); Reserved at 15 Ok Reg 1915, eff 7-1-98]

165:59-9-17. Reporting requirements

Each contributing provider to the OLF shall, within thirty (30) calendar days from the date of a request made for information or a report by the OLF Administrator or contracted agent, submit to the OLF Administrator or contracted agent a completed report form based on a 12-month period identified by the OLF Administrator or contracted agent, containing such information as designated by the OLF Administrator.

[Source: Added at 15 Ok Reg 1195, eff 1-6-98 (emergency); Added at 15 Ok Reg 1915, eff 7-1-98; Amended at 32 Ok Reg 868, eff 8-27-15; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

PART 5. CONTRIBUTIONS AND REIMBURSEMENTS

165:59-9-21. Contributions to the Oklahoma Lifeline Fund

- (a) The OLF shall be funded in a competitively neutral manner in accordance with the Oklahoma Telecommunications Act.
- (b) Each contributing provider, whether they are subject to the jurisdiction of the Commission or not, shall annually provide contact information to the OLF Administrator for the purpose of correspondence regarding contribution to the OLF. The submission of an annual report to the Commission shall be deemed sufficient for compliance with this paragraph.
- (c) Each telecommunications carrier providing wholesale telecommunications services to VoIP providers in Oklahoma will annually provide the identity, to include address, of each such VoIP provider(s) to the OLF Administrator as available. While the names of the VoIP providers may be made publicly available, all information with regard to the reporting telecommunications carrier will be treated as confidential.
- (d) The contributing provider must certify to the truth and accuracy of data used to determine the contributing provider's contribution amounts. The OLF Administrator may verify any information used by the contributing provider in its determination of its contributions to the OLF. Contributing providers shall maintain records and documentation to justify information used in its determination of its contributions

to the OLF for three (3) years, and shall provide such records and documentation to the OLF Administrator upon request. Inaccurate or untruthful information used by the contributing provider may lead to prosecution to the full extent of the law.

[Source: Added at 15 Ok Reg 1195, eff 1-6-98 (emergency); Added at 15 Ok Reg 1915, eff 7-1-98; Amended at 34 Ok Reg 5, eff 8-12-16 (emergency); Amended at 34 Ok Reg 1011, eff 9-11-17]

165:59-9-22. [RESERVED]

[Source: Reserved at 15 Ok Reg 1195, eff 1-6-98 (emergency); Reserved at 15 Ok Reg 1915, eff 7-1-98]

165:59-9-23. Amount of contribution

(a) The OLF Administrator or contracted agent shall, consistent with 165:59-3-40, and based on the adjusted amount to be contributed to the OLF, independently evaluate and calculate the contribution required to be made to the OLF by each contributor, based on the fund level established by the Commission sufficient to recover the costs of administration and payments for Requests for OLF Funding as provided by the Oklahoma Telecommunications Act.

(b) The funding from each contributing provider shall be based on the total intrastate retail Oklahoma Interconnected Voice over Internet Protocol revenues and intrastate telecommunications revenues, from both regulated and unregulated services, of the contributing provider, herein after referred to as assessed revenues, as a percentage of all revenues of the contributing providers, or such other assessment methodology not inconsistent with federal law. Interconnected VoIP services shall be assessed only as provided for in the decision of the Federal Communications Commission, FCC 10-185, released November 5, 2010, or such other assessment methodology that is not inconsistent with federal law.

(c) For Interconnected VoIP services, contributing providers shall, consistent with the methodology of the FCC, identify intrastate retail revenue subject to the OUSF/OLF assessment through 1) direct assignment; 2) a company-specific traffic study; or 3) the inverse of the FCC safe harbor calculation, currently 35.1%. A contributing provider must file an application with the Commission and receive approval to utilize any methodology other than the safe harbor calculation.

(d) The fiscal reporting year shall be July 1 through June 30.

(e) Each contributing provider shall pay its contribution directly to the OLF Administrator, or contracted agent, as directed by the OLF Administrator, on a monthly or annual basis, conditioned upon an annual revenue threshold established by the OLF Administrator.

(f) If the contributing provider qualifies to pay its contribution annually, payment shall be made at the beginning of the fiscal year, and is past due after August 31. If the contributing provider underestimates its annual contribution by 15% or greater, the contributing provider shall be required to make its contributions monthly for the next fiscal reporting year, and underpayments will be subject to interest.

(g) If the contributing provider qualifies to pay its contribution monthly, the contributing provider shall report the prior calendar month's revenues, and pay on those revenues, by the end of the month, each month, without skipping a month.

(h) Interest shall be charged on any payment not received by the reporting due date at the rate of 1.5% monthly.

(i) The payment shall be payable to the OLF. All contributions and interest payments shall be deposited into the OLF account established by the OLF Administrator and/or contracted agent.

(j) All contributions shall be subject to audit by the OLF Administrator, or its contracted agent.

165:59-9-25. Procedures for requesting reimbursement from the OLF

(a) Any eligible local exchange telecommunications service provider required to file Lifeline Service tariffs may apply to the OLF Administrator or contracted agent of the OLF for reimbursement of the Lifeline Service Program credits provided for residential basic local service.

(b) Upon receipt of a "Request for OLF Funding", the OLF Administrator or contracted agent shall independently evaluate and review the Request and supporting documentation and, as appropriate, pay the applicable amount to the eligible local exchange telecommunications service provider, as provided in the Oklahoma Telecommunications Act.

(c) An eligible local exchange telecommunications service provider seeking reimbursement of eligible Lifeline Service Program credits from the OLF shall:

(1) File a "Request for OLF Funding" with the Commission's Court Clerk.

(2) Concurrent with filing the Request for OLF Funding, the eligible local exchange telecommunications service provider who is requesting funding from the OLF shall provide notice, which shall include the dollar amount of the request for lump sum and any recurring amounts, of the Request for OLF Funding to the OLF Administrator, the Oklahoma Attorney General, and to each contributing provider by providing an electronic copy of such notification to the OLF Administrator on the date the eligible local exchange telecommunications service provider files its Request for OLF Funding with the Commission's Court Clerk, for posting on the Commission's website. The OLF Administrator will then place the notification on the Commission's website within five (5) business days.

(d) An eligible local exchange telecommunications service provider may not receive reimbursements from the OLF unless it demonstrates that its rates have been reduced by an amount equal to the amount of the Lifeline payments that were previously included in the rate structure of the eligible local exchange telecommunications service provider. An eligible local exchange telecommunications service provider shall be eligible for support from the OLF for any amount which is greater than the amount which has been previously included in the rate structure of the eligible local exchange telecommunications service provider.

(e) The OLF Administrator and/or contracted agent shall independently evaluate, review, and determine the accuracy of the complete request and issue a Determination of the eligibility for funds, which details the amount of funding recoverable from the OLF, within ninety (90) calendar days. Simultaneously with the OLF Administrator or contracted agent advising the eligible local exchange telecommunications service provider and parties to the cause, the OLF Administrator or contracted agent shall file the written Determination with the Commission's Court Clerk and post it to the Commission's website.

(f) Any affected party may file a Request for Reconsideration within fifteen (15) calendar days of the Determination being filed by the OLF Administrator, by following the procedures in OAC 165:59-3-72.

(g) Any Request for Reconsideration will be processed using the provisions set forth in OAC 165:59-3-72.

(h) The OLF Administrator or contracted agent shall ensure that all OLF funds have been received and are on deposit in a sufficient manner so as to pay requests for OLF Funding in accordance with the Oklahoma Telecommunications Act and this Chapter. The OLF Administrator or contracted agent shall provide the approved funding to the requesting eligible local exchange telecommunications service provider, consistent with the procedures in O.A.C 165:59-3-68.

(i) Any request for funds from the OLF will be returned to the requesting party and deemed denied if the appropriate forms are not used or said forms are not completed in a satisfactory manner.

165:59-9-27. Recovery of contribution

Each contributing provider to the OLF may recover its contributions to the OLF consistent with 17 O.S. § 139.105. The OLF recovery received by each eligible local exchange telecommunications service provider shall be subject to an annual true-up. Any over- or under-recovery of the Lifeline Service Program contributions for the preceding year shall be carried forward for inclusion in the calculation for recovery in the ensuing year.

CHAPTER 65. WATER SERVICE UTILITIES

[Authority: OKLA. CONST. art IX, § 18; 17 O.S., §§ 151 et seq. and 159.11 et. seq.]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:65-1-1. Purpose

The rules in this Chapter are intended to define good business practice under normal conditions to ensure safe, adequate and reliable service, as well as fairness to the public and to the utility.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 31 Ok Reg 1091, eff 9-12-14]

165:65-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Affiliate" means any person, entity, or business section, or division that directly or through one or more intermediaries controls, is controlled by, or is under common control with the entity in question. Control includes but is not limited to,

the possession, directly or indirectly and whether acting alone or in conjunction with others, of the authority to direct a direction of the management or policies of a person or entity. Control may be exercised through management, ownership of voting securities or other right to vote, by contract or otherwise. A voting interest or ownership of five percent (5%) or more creates a presumption of control.

"Attorney General" means the Oklahoma Attorney General.

"Business day" means Monday through Friday, excluding all legal holidays which have been declared legal holidays by law or proclamation of the Governor of Oklahoma, or those days on which mail is not delivered.

"Commission" means the Oklahoma Corporation Commission.

"Complaint" means an oral, electronic or written communication by an interested party requesting an investigation or corrective action regarding the provision of water services.

"CSD" means the Consumer Services Division of the Oklahoma Corporation Commission.

"Consumer" means any person, firm, corporation, municipality, or agency, other political subdivision of the United States or the State of Oklahoma receiving any type of water service. Any reference to a "customer" or "end-user" contained in a tariff, or in this Chapter, shall be deemed to mean a "consumer," unless the context clearly indicates otherwise.

"DEQ" means the Oklahoma Department of Environmental Quality.

"Distribution" or **"Distribution service"** means the transportation of water services through a utility's distribution facilities bundled with any one or more of the services of billing, metering, customer service and similar services.

"Distribution main" means a distribution line that serves as a common source of supply to service lines.

"Distribution system" means any pipeline, meter, metering station, valve, regulator, regulating station and/or delivery station which receives water from any water supply source for service to one or more consumers.

"Electronic notification" means any automated communication received by e-mail, phone, text message or fax.

"Gallon" means one U.S. Standard gallon, containing 231 cubic inches and weighing 8.333 pounds.

"Interested party" means any individual or entity with appropriate authority to act on behalf of a particular consumer or group of consumers or any other party involved in, or affected by, the provision of water services.

"Legal holiday" means only those days declared legal holidays by law or proclamation of the Governor of Oklahoma, or those days on which mail is not delivered or banks are closed, such as Columbus Day.

"Local forecast" means a statement of what the weather is predicted to be, that is issued by the National Weather Service for a specific county, city, and/or zip-code area.

"Meter" means any device that measures the quantity of water transferred from one party to another.

"NWS" means the National Weather Service.

"Pipe" means any tubing used in the gathering, transmission or distribution of water which meets the specifications of the DEQ.

"Premises" means any piece of land or real estate, or any building or other structure or portion thereof, or any facility where water service is furnished to a consumer.

"Prudency review" means, for purposes of this Chapter, a comprehensive review that examines as fair, just and reasonable, a utility's practices and policies and judgment regarding an investment or expense at the time the investment was made or expense was incurred; including direct or indirect maximization of its positive impacts and mitigation of adverse impact upon its ratepayers, without consideration of its ultimate used and useful nature.

"P.s.i.g." means pounds per square inch gauge.

"PUD" means the Public Utility Division of the Oklahoma Corporation Commission.

"Regulator" means a device used to reduce the water pressure.

"Residence" means any dwelling unit containing kitchen appliances, permanent sewer or septic facilities and water service. A weekend cabin and a mobile home are residences when used as such. An individual room in a hotel or motel is not a residence.

"Service line" means a line that branches off a distribution main or distribution line in order to transport water from the common source of supply to utility meters or to a consumer's piping, whichever is farther downstream, or the connection to a consumer's piping if there is no utility meter.

"Subdivision" means any land, wherever located, whether improved or unimproved, contiguous or not, which is divided into lots or proposed to be divided, for the purpose of disposition pursuant to a common promotional scheme or plan of advertising.

"Tariff" means every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing water service filed with the Commission and approved by the Director of the Public Utility Division.

"Temporary service" means every rate schedule, or provision thereof, and all terms, conditions, rules and regulations for furnishing water service filed with the Commission and approved by the Director of the Public Utility Division.

"Uniform System of Accounts (USOA)" applicable to water utilities published by the National Association of Regulatory Utility Commissioners (NARUC) or other uniform system acceptable to the Commission may be adopted by a utility.

"Utility" means and includes any corporation, association, company, individual, and the trustees, lessees, or receivers, successors or assigns of any of them, (but shall not include a city, town or other body politic) that now or hereafter may own, operate, or manage any plant or equipment, or any part thereof, directly or indirectly, for public use, for the transmission and distribution of water by pipeline.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-1-3. Commission authority

The Commission has the authority to promulgate rules concerning the provision of water service to all consumers within the State of Oklahoma pursuant to Okla. Const. Art. IX §§18 and 34 and 17 O.S. § 151 et. seq.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99]

165:65-1-4. Scope of rules

(a) Every tariff filed by a water utility after the effective date hereof shall conform to this Chapter. The filing or acceptance of a tariff which is in conflict herewith shall not be deemed a waiver of this Chapter. Any tariff provision filed or approved

by the Commission prior to the adoption of this Chapter which is in conflict herewith is superseded by and shall be deemed to be amended to conform to this Chapter.

(b) The adoption of this Chapter shall in no way preclude the Commission from altering or amending this Chapter in whole or in part after notice and hearing or from allowing or requiring additional or different service, equipment, facility, or standards than prescribed in this Chapter, either upon complaint or application or upon its own motion. Nothing provided in this Chapter shall relieve any utility from any duty prescribed by the laws of the state of Oklahoma.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99]

165:65-1-5. Relief from rules of this Chapter and rules by utilities

(a) Whenever compliance with any of the rules requirement in this Chapter would result in unreasonable hardship or excessive expense to the utility or the consumer, the Commission may waive or modify the requirements of this Chapter, consistent with federal and/or state law, upon application of any interested party and after notice and hearing. Such application shall set forth the specific rule or rules sought to be waived and the reasons for requesting such waiver.

(b) A utility may decline to serve a consumer or prospective consumer until such person has complied with all applicable state and municipal regulations governing water service and this Chapter.

(c) A utility may prescribe rules and regulations for furnishing service not inconsistent with this Chapter. No such rules shall be valid until filed with and approved by the Commission. A utility may refuse or discontinue service for noncompliance with its service rules only in cases where its rules as approved specifically so provide. Service shall not be refused to a consumer where a balance is owed by a previous consumer at the same location.

(d) For good cause shown, the Commission may grant temporary relief from the requirements of this Chapter pending hearing.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 31 Ok Reg 1091, eff 9-12-14]

165:65-1-6. Controversy over rules of this Chapter

Whenever a controversy exists in connection with the interpretation of this Chapter, and the applicability of the requirements set forth herein, or any right or duty imposed thereby, either the utility or any interested parties may file a written application with the Commission or complaint with CSD of the Commission. The Commission, after notice and hearing, will make such order thereon as it may deem proper. Proceedings upon such an application or complaint will be governed by the provisions of the Commission's Rules of Practice [OAC 165:5].

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99]

165:65-1-7. Severability

If any provision of this Chapter is held invalid, such invalidity shall not affect other provisions or applications of this Chapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Chapter are declared to be severable.

[Source: Added at 16 Ok Reg 2380, eff 7-1-99]

165:65-1-8. Violations

A violation of a Commission order, rule or requirement directing compliance with this Chapter shall constitute contempt of the Commission pursuant to 17 O.S. § 1 et. seq., after notice and hearing.

[Source: Added at 16 Ok Reg 2380, eff 7-1-99]

SUBCHAPTER 3. PLANT, EQUIPMENT, AND FACILITIES

165:65-3-1. Construction and maintenance of plant, equipment, and facilities

(a) **Water plant and system construction and maintenance.** Each utility shall construct and maintain its entire water plant and system in such condition as will enable it to furnish safe, adequate and reliable service subject only to emergency conditions beyond its control.

(b) **Construction, installation, and maintenance of systems.** Transmission and distribution systems, including transmission mains and pipe lines, distribution mains, pumps, valves, storage tanks, meters, equipment, etc., shall be constructed, installed, and maintained in accordance with all applicable rules and orders of the Commission and DEQ. Utilities must be able to locate water lines consistent with the requirements of 63 O.S. §§ 142.1 *et seq.*

(c) **Statement regarding plant, equipment, and facilities.** Each utility shall submit to the Commission annually a statement regarding its plant, equipment, and facilities in such form as the Commission may require. Utilities other than those that purchase water shall provide appropriate authority for their use of water (U.S. Corps of Engineers, Oklahoma Water Resources Board, and/or other appropriate authority). All water service utilities that withdraw groundwater or divert stream water must hold a water right from the Oklahoma Water Resources Board before placing water to use.

(d) **Plans, surveys, and permits.** Each utility shall submit to the Commission a certified copy of all plans and surveys of its waterworks which have been filed with the DEQ. A description of the source from which the water supply is derived shall be filed with the Commission, and no new or different source of supply shall be used until a certified copy of the certificate of the DEQ approving the use of the new or different supply has been filed with the Commission. No utility shall sell water or extend water service to a consumer until certified copies of all permits required to be issued by the DEQ to the utility are filed with the Commission.

(e) **Depth of mains.** Water mains, except mains used exclusively for temporary or seasonal service, shall be installed below the normal frost line or otherwise protected to prevent freezing in accordance with DEQ.

(f) **Dead ends.** Insofar as practicable the utility shall design its distribution system so as to avoid dead ends on its mains. Where dead ends exist, under circumstances that adequate water circulation does not exist, the utility shall provide hydrants or valves for the purpose of flushing the mains. Mains without adequate circulation shall be flushed every ninety (90) calendar days, or more often if necessary, to maintain the proper quality of the water. Records shall be kept of the date, place and duration of flushing mains; and such records shall be used as a guide to determine the necessary frequency of flushing of the same mains thereafter.

(g) **Segmentation of systems.** The design of water mains or systems hereafter constructed shall contain valves at intervals throughout the system to facilitate repairs and minimize interruptions of service to consumers.

(h) **Grid systems.** Whenever feasible, the distribution system shall be laid out in a properly segmented grid so that in case of breaks or repairs the interruption of service to the consumers can be kept at a minimum.

(i) **Fire protection service.** Specifications, location, installation, and the responsibility for the maintenance of fire hydrants, public and private fire protection facilities and connecting mains, and the ownership of such facilities shall be subject to negotiation between the utility and the municipality served. Fire hydrants and public and private fire protection facilities shall conform to the requirements of the city where installed or in the absence of city requirements, to the rules and orders of the Commission.

(j) **Valves.** Each utility shall inspect the principal mainline valves on its distribution system at least once every two (2) years. A record of each valve shall be kept showing the size, type, location, date of inspection and the results thereof.

(k) If PUD informs the utility of any safety issues concerning the utility's plant, equipment, or facilities by identifying the relevant Commission rule, or other applicable Federal or State laws implicated by the safety issue, the utility shall electronically provide photographic evidence to PUD showing completion of work and that the issue has been resolved. If the utility has the necessary equipment it shall provide such evidence via electronic photographs or such other method that will reasonably show the issue has been resolved.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-3-2. Extent of system in which utility shall maintain service

(a) With the exception of emergency conditions beyond its control, each utility shall operate and maintain in safe, efficient, and proper condition all the facilities and instrumentalities used in connection with the transmission, distribution, regulation, measurement, and delivery of water to any consumer up to and including the point of delivery into the piping owned by the consumer.

(b) A water utility may operate and maintain any privately owned lines utilized by the utility for transmission and distribution of water, if granted such permission by the owner of the private line.

(c) No residential meter shall be installed inside a residence.

(d) The meter shall be set at the nearest feasible point to the property or curb line of the consumer.

(e) All mains, water lines, pipes, and equipment owned by the consumer from the outflow side of the meter shall be maintained in a safe, efficient, and proper condition by and at the expense of the consumer. The utility shall have the right to inspect a new installation prior to furnishing service and the right to inspect an existing installation under reasonable conditions. Service may be refused or discontinued until the provisions of this Chapter are complied with.

(f) Each water utility, for each locality that it serves, shall provide contact information for an office or agent where the consumer may pay bills and conduct any other necessary business with a representative of the utility. Such office or agent shall be available to the consumer during reasonable business hours at least five (5) days per week.

(g) The utility shall provide in the telephone directory for each area it serves a telephone listing by which the utility personnel can be notified at any time during a twenty-four (24) hour day period of any utility service deficiency or emergency. If utility personnel are not available to accept the call and the call is recorded, the utility shall contact the consumer to confirm receipt of the call within two (2) hours.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-3-3. Service pipes and meter sets

- (a) Upon application by any bona fide applicant for water service, the utility shall provide a tap and a corporation cock at the main, furnish and install a service pipe of suitable material and capacity, furnish and install a shut-off cock, a meter box, and all other fittings necessary to set a meter on the applicant's property abutting upon any public way in which the utility has an adjacent water distribution main.
- (b) Where additional meters are furnished by the utility for the convenience of the consumer, a charge for such meters may be made in accordance with a schedule approved by and on file with the Commission.
- (c) The utility may charge the residential applicant a tap-on charge specified in its tariff or rules of service on file with and approved by the Commission for furnishing and installing the necessary material and coupling devices, providing the meter setting and connecting the meter to the consumer's house service line. The charge shall be a non-recurring charge for the premises, notwithstanding later change in ownership or consumers there served. Subsequent consumers may be charged a service initiation fee, provided such fee is listed in the utility's approved tariff. The meter box, meter, and all other fittings used in connecting service and serving the meter shall remain the property of the utility. When it is necessary to make a tap-on of a size larger than required for a residential consumer, the tap-on and meter setting cost shall be charged the consumer as specified in the tariff or Rules of Service, or if no such charge is there stated, at the actual cost to the utility.
- (d) Where the utility and the consumer cannot agree upon the location, dimensions and type of installation to be made, the utility shall advise the consumer of the CSD and provide the telephone number to the consumer to address the problem and seek resolution. If the problem remains unsolved, either the consumer or the utility may file an application with the Commission for hearing and final determination.
- (e) Where circumstances require the meter to be set at a point other than the property or curb line, the proper service pipes shall be installed by the utility from the main to the meter. If the meter is located inside the property line at the consumer's request, the consumer shall pay the cost of the service pipe from the property or curb line to the meter and for installation thereof, under uniform rates to be adopted by the utility and approved by and on file with the Commission. The utility shall own and maintain all service lines and equipment up to the outflow side of the meter wherever installed.
- (f) The utility shall provide each service connection with an individual shut-off cock. No tandem service shall be allowed.
- (g) The size, design, material, and installation of the consumer's service pipe shall conform to any code, ordinances or requirements of the city or town where installed, or where no such requirements exist, to the rules and orders of the Commission and the Service Rules of the utility filed with and approved by the Commission. No service pipe shall be less than three-fourths inch (3/4") nominal size. All service pipes shall be laid underground at a depth sufficient to prevent freezing, except where service is not intended to be used during freezing weather and the pipes are actually drained during such periods.
- (h) In the installation of a service pipe the consumer shall not install any tee or branch connection without consent of the utility. The consumer shall leave the trench open and pipe uncovered until it has been inspected by the utility or inspection waived. The service pipe shall be provided with a suitable shut-off cock by the consumer. The consumer is responsible for maintenance of all service pipes from the outflow side of the meter.

- (i) When the installation of a service pipe requires a trench to remain open on the consumer's property for an inspection or waiver of inspection, the utility shall perform the inspection, or request that the inspection be performed if done by a third party, within fourteen (14) calendar days of the installation.
- (j) All open trenches shall be clearly marked for the safety of the public using, at a minimum, caution tape or flags.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-3-4. Extension of mains

- (a) **General.** A utility shall extend its distribution mains to serve the consumers within the corporate limits of a municipality served by the utility, or any recorded addition thereof, or within a reasonable distance from the utility's existing distribution system in accordance with the provisions of this Chapter.
- (b) **Free extension.** A utility shall extend its distribution system, as needed, up to one hundred feet (100') per residence without cost to the one requesting service. In arriving at the length of such main extension necessary to render service to the consumer, the distance shall be measured along lines of proper construction from the nearest distribution main with adequate capacity.
- (c) **Extension above free limit-advance.** If the extension necessary to furnish service is greater than allowed as a free extension under subsection (b) of this Section, a utility may require an advance of the cost of the main extension over the free limit. However, the utility shall not arbitrarily or with disparity impose the obligation of requiring an advance, but rather shall determine whether to require an advance and the amount thereof on a case-by-case basis. Whenever such advance is made, the utility shall be required to refund to the consumer who made the advance an amount equal to the cost of one hundred feet (100') of free extension for each additional consumer whose service line is connected to such main within a period of ten (10) years from the making of the extension. No refunds shall be made for consumers connected to future extensions tied into such an extension. This refund will cease after ten (10) years from the making of the extension but the total of all refunds shall not exceed the original advance. The advance shall not draw interest.
- (d) **Extensions above free limit-revenue basis.** The Commission may authorize a utility to make extensions above the free limit upon receipt of a lesser advance, or no advance, when the gross anticipated annual revenue from an extension will provide the utility with an adequate return on its investment pursuant to a formula or other method approved by the Commission. After such authorization, the utility shall make extensions when requested by the consumer pursuant to such approved formula or method.
- (e) **Extension above free limit-special contract.** In lieu of making an extension pursuant to subsections (c) or (d) of this Section, a utility may make an extension above the free limit with a lesser advance or no advance, when the utility has entered into an agreement whereby the one proposing to provide the advance guarantees a minimum annual revenue from the extension to the utility. Such an agreement shall be deemed a special contract governed by OAC 165:65-9-7.
- (f) **Determining cost of extension.** In determining the amount of advance, if any, which shall be made for an extension pursuant to this Section, the total construction cost of the extension shall first be determined in accordance with the approved system of accounts for water utilities and from such total construction cost there shall be deducted:
 - (1) Costs incident to any increase in size of the main in excess of that required to adequately and satisfactorily provide service, costs incident to

future expansion or to continue a construction plan of the utility, and costs necessary to correct inadequate capacity.

(2) The total construction cost of that portion of the extension constituting a free extension, which includes meters, service regulators, stopcocks, and service connections.

(g) **Extensions applicable in prospective real estate subdivisions.** In lieu of an extension pursuant to other provisions of this Section, a utility may require a developer desiring an extension to a prospective real estate subdivision to make an advance equal to the estimated cost of the extension before construction is started, and such advance shall not draw interest. At least annually for a period not to exceed ten (10) years, the utility shall refund to the developer a sum equivalent to the cost of the free extension under subsection (b) of this Section for each consumer connected to the extension during the calendar year. In no case will the total amount refunded exceed the amount advanced to the utility. Consumers locating on an extension made pursuant to this Section will not be required to make an advance for an extension.

(h) **Extension above free limit.** If the extension above the free limit is of such length and the future anticipated revenues therefrom so small that it is doubtful that the extension would ever make a fair return on the investment, the utility or any interested person or entity may apply to the Commission for an appropriate order after notice and hearing.

(i) **Property of extension.** Every extension shall at all times be the property of the utility regardless of whether an advance or contribution is made for its construction. Any unrefunded portion of an advance shall become the property of the utility.

(j) **Filing an extension policy.** In lieu of the extension provisions described in subsections (b) through (i) of this Section, a water utility may file with the Commission an Extension of Facilities Policy governing reasonable extensions of facilities to consumers. This plan must be approved by the Commission.

(k) **Other extensions of facilities.** A utility may implement a policy whereby consumers who request water service requiring the installation of new distribution mains may apply to the utility for service in compliance with Commission-approved tariffs, and may negotiate with the utility to perform some of the work necessary to install the new mains. If a mutually acceptable agreement is reached, the utility and the consumer shall enter a written agreement which conforms with the requirements provided in the utility's Commission-approved tariff. The utility shall own any distribution main installed pursuant to this subsection, and shall be responsible for proper maintenance and operation of the line.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99]

165:65-3-5. Sale or disposal of facilities by utility

(a) The parties to a transaction, the performance of which will result in the transfer of any portion of a water utility's jurisdictional plant or operating system or the transfer of some or all of a water utility's customers to a person or entity that is not an affiliate of such utility, shall, at least ninety (90) calendar days before the effective date of such sale or transfer, request the approval of the Commission of the transaction by filing an original and four (4) copies of a joint application, consistent with OAC 165:5-7-1, with the Commission's Court Clerk, accompanied by the applicable filing fee. At the time the joint application is filed, the parties to the transaction shall serve a copy of the joint application, with all attachments thereto, upon the Attorney General and the Department of Environmental Quality. Additionally, the person or entity receiving the facilities or customers shall, at the

time of the filing, be providing water service to Oklahoma customers or be seeking approval, in the joint application or in a separate cause, to provide such service to Oklahoma customers.

(b) The joint application referred to in (a) of this Section shall include the following information:

- (1) The names of the parties to the transaction and the addresses of their respective principal places of business;
- (2) A narrative description of the transaction, including, without limitation, a description of the transferring party's jurisdictional plant or operating system to be transferred to the acquiring party, the number and types of customers to be transferred to the acquiring party as a result of the transfer of those jurisdictional assets, the contemplated effective date of the transfer, and the consideration to be given for consummating the transfer;
- (3) A statement as to whether the consideration to be given for consummating the transfer is below or above the net book value of the transferred assets;
- (4) A narrative description of how the transferred customers will continue to receive safe and reliable water service after the effective date of the transaction, any proposed changes to the rates charged for that service after the effective date of the transaction, including a summary of the effect that the proposed changes to rates would have on an average customer's bill, and any other proposed changes in the terms and conditions of that service after such effective date subject to the terms of (g) of this Section;
- (5) A narrative description of the principal occupation or business of the acquiring party and all affiliates thereof during the previous five (5) years, and the names and relevant biographical information of all principals, officers, and directors of the acquiring party;
- (6) A narrative description of the operational and managerial experience of the acquiring party's personnel to be responsible for the operation and management of the facilities to be used to provide water service to the transferred customers after the effective date of the transaction;
- (7) The names, addresses, email addresses, and telephone numbers of representatives of the acquiring party who will be the contacts for PUD and CSD and who will be primarily responsible for:
 - (A) Customer service issues;
 - (B) Repair and maintenance issues;
 - (C) Customer complaint issues;
 - (D) Authorizing and furnishing refunds to customers;
 - (E) Tariff issues; and
 - (F) Receiving notices related to causes docketed at the Commission;
- (8) Audited financial statements of the acquiring party, to include but not be limited to balance sheets and income statements, covering the previous three (3) years;
- (9) An unaudited financial statement of the acquiring party, covering the most recent quarter closed immediately preceding the filing of the application;
- (10) An affidavit by the acquiring party stating that the acquiring party possesses the financial and managerial ability to provide safe and reliable water utility service to the transferred customers and that the acquiring party is aware of and will abide by all Commission rules applicable to the

provision of such service;

(11) The information required by OAC 165:65-11-3(o) and (q) and an affirmation that the records and reports required by OAC 165:65-9 exist and may be subject to review by the Commission during the application process.

(12) A copy of the agreement governing the terms of the transaction;

(13) If the acquiring party is also a public utility subject to the jurisdiction of the Commission, a statement to that effect. The information listed in (5) through (9) of this subsection is not required if the acquiring party is a public utility currently engaged in the furnishing of public utility services under the jurisdiction of the Commission at the time that the application is filed; and

(14) The name and address of the acquiring party's service agent registered with the Oklahoma Secretary of State.

(c) Upon Commission approval of the joint application referred to in (a) of this Section, the transferring party shall also transfer to the acquiring party the records required by the Commission to be maintained pursuant to OAC 165:65-9 and OAC 165:65-11-3(o) and (q), to the extent they pertain to the transferred customers.

(d) After notice and hearing, the Commission shall issue an order approving the application if it finds that the transaction is, fair, just, and reasonable and in the public interest. The acquiring party shall have the burden of establishing that the proposed transaction is fair, just and reasonable, as well as in the public interest.

(e) Unless otherwise ordered by the Commission, the hearing referred to in (d) of this Section shall be commenced within sixty (60) calendar days after the joint application referred to in (a) of this Section is filed. Upon motion by any interested party in the proceeding, or *sua sponte*, the Commission shall establish a procedural schedule setting forth dates for the filing of written testimony, discovery, and the hearing on the merits and such other dates, as the Commission deems appropriate.

(f) Notice of the hearing referred to in (d) of this Section shall be mailed to the Attorney General and to each customer of record of the transferring party who will be transferred to the acquiring party, and to any other person directed by the Commission to receive notice, at least twenty (20) calendar days prior to the date of the hearing. The form of the notice must be approved by the Commission prior to such mailing.

(g) If the application is approved, the rates for water service in effect for the transferred customers prior to the effective date of the transfer shall continue to be charged by the acquiring party with respect to those customers, unless and until different rates are reviewed and approved by the Commission in the current cause or in a subsequent cause. If different rates are reviewed and approved and/or changes in the terms and conditions of service are approved by the Commission in the current cause or in a subsequent cause, the acquiring party shall have thirty (30) calendar days after the final order has been issued to submit an original and two (2) copies of the proposed tariffs, which conform to OAC 165:65-9-7, reflecting the changes or additions to rates and/or terms of service to PUD for review and approval.

(h) Upon motion, a party may request a waiver from or modification to any of the requirements of this section pursuant to OAC 165:65-1-5.

(i) This section does not apply to transactions that involve discontinuance of service pursuant to OAC 165:65-11-10 or 165:65-11-11 or routine retirement or replacement of facilities.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 25 Ok Reg 2218, eff 7-11-08; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-3-5.1. Acquisition, control, or merger of domestic public water utilities [REVOKED]

[Source: Added at 25 Ok Reg 2218, eff 7-11-08; Amended at 31 Ok Reg 1091, eff 9-12-14; Revoked at 36 Ok Reg 718, eff 7-25-19]

165:65-3-6. Tampering with measuring or regulating equipment

No shut-off valve, meter, meter box or other property or equipment owned by a utility wherever situated, whether upon consumer's premises or elsewhere, shall be tampered with or interfered with either for the purpose of adjustment or otherwise except by representatives of the utility owning the same; and official responsibility under a municipal government shall not constitute an exception to this Section.

SUBCHAPTER 5. WATER QUALITY, TESTING, AND PRESSURE

165:65-5-1. Purity of water supply

All water furnished by any utility for human consumption or household purposes shall comply with all requirements and water quality standards of the DEQ.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99]

165:65-5-2. Water analyses and records

- (a) The result of all tests made by the DEQ and tests made by the utility shall be kept on file in the office of the utility and made available for public inspection for a period of at least three (3) years. These records shall show when, where, and by whom the test was made. The standard methods of testing specified by the DEQ shall govern the collection and examination of the water tested.
- (b) Whenever tests disclose the presence of bacillus coli, or any bacterial count, the utility must immediately take all steps necessary to make its water supply comply with the water quality standards prescribed by the DEQ.
- (c) The water supply system, including wells, pumping equipment, treatment works, mains, and service pipes shall be maintained at all times in a sanitary condition.
- (d) No physical connection between the water distribution system of a utility and that of any other water supply or system shall be permitted, unless each water supply and the inter-connection thereof is approved by the DEQ.
- (e) The growth of algae in the water at the source of supply in reservoirs or other basins, and in the water mains shall be controlled by proper treatment.
- (f) Any driven or drilled well furnishing water for domestic purposes shall be equipped with suitable casing and well head equipment, and the utility shall maintain the tightness of the well at the surface of the ground sufficient to prevent the infiltration of any water other than that produced from the water bearing strata tapped by the well in accordance with the rules of the DEQ.
- (g) The utility shall follow all DEQ rules, except where the Commission rules provide a higher standard.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 31 Ok Reg 1091, eff 9-12-14]

165:65-5-3. Pressure

(a) A water utility shall maintain a pressure throughout its distribution system which will comply with the requirements of the National Board of Fire Underwriters and which shall not at any time fall below a minimum of thirty (30) pounds per square inch gauge (p.s.i.g.) or rise above a maximum of one hundred twenty-five (125) pounds per square inch gauge (p.s.i.g.) at the consumer's service connection except for temporary fluctuation in pressure over which the utility has no control.

(b) In order for the water utility to insure that water pressure is maintained within the Commission's specifications in (a), the utility shall be required to do one of the following things:

- (1) Place a pressure gauge on the outflow side of each meter that can easily be read by the utility, customer and/or Commission staff; or
- (2) Place a faucet at the outflow side of each meter in order to attach a water pressure gauge with a $\frac{3}{4}$ inch fitting to read the pressure; or
- (3) Test the water pressure by utilizing the outside faucet at a customer's service point.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99]

165:65-5-4. Station meters and pressure gauges

(a) **Station meters.** The utility shall install station meters and instruments necessary to keep a daily and monthly record of the total amounts of water delivered into the mains.

(b) **Pressure gauges.** Each utility shall provide itself with one (1) or more pressure gauges for making pressure surveys as required by this Chapter. These gauges shall be suitable to record the pressure experienced on the utility's system and shall be able to record at least a twenty-four (24) hour continuous test. One recording pressure gauge shall be maintained in continuous service at some representative point on the utility's mains.

(c) **Pressure surveys.** Each utility required to have recording pressure gauges shall make frequent records during periods of maximum use, each covering intervals of at least twenty-four (24) hours duration of the water pressure at various points on the system. All records or charge made by these meters shall be identified, dated, and kept on file and available for inspection for at least two (2) years.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 36 Ok Reg 718, eff 7-25-19]

SUBCHAPTER 7. METER REQUIREMENTS AND TESTING

PART 1. GENERAL PROVISIONS

165:65-7-1. Meter requirements and testing

(a) No service water meter shall be allowed in service which has an incorrect gear ratio or dial train, or is in any way mechanically defective, or shows an average error in measurement in excess of two percent (2%), plus or minus, when registering water at stream flow equivalent to approximately one-tenth (1/10), one-half (1/2), and full normal rating under average service pressure. When adjustment is necessary, such adjustment shall be made as accurately as practicable for average rate of flow under actual conditions of installation.

(b) For purposes of application, the average error of a water meter is defined as one-third (1/3) of the algebraic sum of the errors when tested in accordance with (a) of this Section.

[Source: Amended at 31 Ok Reg 1091, eff 9-12-14]

165:65-7-2. Adjustment of bills

(a) **Allowable error in adjustment of charges.** Whenever any water meter is tested by PUD or the utility at the request of the consumer to determine the accuracy with which it has been registering in service, it may be considered correct if found to have an average error of no more than two percent (2%) and no adjustment of charges shall be required unless the error is greater than two percent (2%).

(b) **Fast meters.** Whenever any water meter tested by PUD or the utility is found to have an average error of more than two percent (2%) fast, (or in favor of the utility), the utility shall refund to the consumer the overcharge based upon the corrected meter reading for a period equal to one-half (1/2) the time elapsed since the last test, but not to exceed six (6) months, unless it can be established that the error was due to some cause, the date of which can be fixed with reasonable certainty, or the error was due to meter tampering or theft, in which case the overcharge shall be computed from that date.

(c) **Slow meters.** Whenever any water meter tested by PUD or the utility is found to have an average error of more than two percent (2%) slow, (or in favor of the consumer), the utility may charge for the water consumed, but not included in bills previously rendered, based upon the corrected meter reading for a period equal to one-half (1/2) of the time elapsed since the last previous test, but not to exceed six (6) months, unless it can be established that the error was due to meter tampering or theft. The utility shall allow the consumer to pay the corrected amount, in installment payments, over the same period of time in which the incorrect billing took place, but not to exceed six (6) months, unless otherwise agreed to by the utility and consumer.

(d) **Non-registering meter.** If a meter is found not to register or to register intermittently for any period, the utility may charge for an estimated amount of water used, by averaging the amounts registered over corresponding periods in previous years, or in the absence of such information, over similar periods preceding or subsequent thereto. The estimated billing shall not exceed six (6) months, unless it can be established that the error was due to meter tampering or theft. The utility shall allow the consumer to pay the estimated billing amount, in installment payments, over six (6) months, unless otherwise agreed to by the utility and consumer.

(e) **Incorrect register on meter.** If a meter is found to have an incorrect register, the error shall be corrected. Where the error is adverse to the consumer the utility shall refund to the consumer the excess charged for the water incorrectly metered for the period of time the meter was used in billing the consumer. Where the error is adverse to the company, the utility may charge the consumer the undercharge for the water incorrectly metered for the period of time the meter was used in billing the consumer, unless it can be established that the error was due to meter tampering or theft. The utility shall allow the consumer to pay any unbilled amount over the same period of time in which the undercharge took place, but not to exceed six (6) months, unless otherwise agreed to by the utility and consumer.

(f) **Inaccurate usage amount.** Bills rendered to the consumer by the utility with inaccurate usage shall be adjusted with the next succeeding bill. The utility shall

advise the consumer of the error prior to the next bill being rendered. However, the utility may make a special reading without charge to the consumer and render a corrected bill to the consumer. The utility shall allow the consumer to pay any unbilled amount over the same period of time in which the undercharge took place, unless otherwise agreed to by the utility and consumer.

(g) **Exception.** This Section shall not apply to routine testing and replacement of meters pursuant to OAC 165:65-7-11.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-7-3. Prepayment meters

No utility shall use prepayment meters geared or set as to cause a rate or amount higher than would be paid if a standard type meter were used, except under a special tariff for this class of service filed with and approved by the Commission.

165:65-7-4. Information as to reading of meters

(a) **Meter reading records.** The meter reading records shall show:

- (1) Consumer's name, address, and rate schedule symbol.
- (2) Identifying number or description of the meter.
- (3) Meter readings and dates thereof.
- (4) If the reading has been estimated.
- (5) Any applicable multiplier or constant.

(b) **Information to customers.** Each utility supplying metered service shall adopt a means of informing its consumers as to the method of reading meters, either by printing on its bills a description of the method of reading meters, by distributing booklets or folders describing the method, or by notice to the effect that the method will be explained by contacting the utility. Meter reading information shall be sent at least annually to each consumer.

(c) **Meter reading information.** Each service meter shall be read by the utility.

(1) **Information required.** Each service meter shall indicate clearly the number of gallons of water registered by the meter. Where water is measured in cubic feet or where the quantity is determined by calculation from recording devices, the utility upon request shall supply the consumer with sufficient information to make clear the method by which the quantity is determined.

(2) **Meter reading.** Each service meter shall be read by the utility at approximate monthly intervals at least ten (10) times a year on approximately the same day of each meter-reading period. If for reasons beyond the control of the utility it is impossible to read a meter for two (2) successive monthly billing periods, it will be permissible for the utility to submit an estimated bill based upon past service records the amount of such estimated bill to be adjusted as necessary when access to the meter is obtained.

(3) **Access to meters and other property.** The utility shall at all reasonable times have access to meters, service connections, and other property owned by it on the consumer's premises for purpose of meter reading and maintenance. Refusal on the part of the consumer to provide reasonable access for the purpose of meter reading shall be deemed sufficient cause for discontinuance of service on the part of the utility, after notice as provided in this Chapter for discontinuance of service for nonpayment of bills. The utility shall provide its employees with a means of identification in order to

claim the right of access.

(4) **Alternative reading periods.** Upon application of the utility and after notice and hearing, the Commission may authorize the reading of meters less frequently than monthly and prescribe conditions and procedures therefore.

(5) **Special meter reading request.** Whenever a special meter reading is required following a request by a consumer, the utility shall not make a charge for the special meter reading, whether or not its applicable tariff authorizes a charge for a special meter reading, unless the consumer has requested and received special meter reading within the previous twelve (12) month period.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

PART 3. TESTING

165:65-7-10. Meter testing facilities and equipment

(a) **Test facilities.** Each utility furnishing metered water service shall provide the necessary standard facilities, instruments, and other equipment for testing its meters in compliance with this Chapter. Any utility may be excused from this requirement by the Commission provided that arrangements satisfactory to the Commission are made for the test of its meters by another utility or agency equipped to test meters in compliance with this Chapter.

(b) **Shop equipment.** The utility's meter test shop shall insofar as practicable simulate the actual service conditions of temperature, inlet pressure, and outlet pressure. It shall be provided with all necessary fittings, including a quick acting valve for controlling the starting and stopping of the test and a device for regulating the flow of water through the meter under test within the requirements of this Chapter, and shall include the minimum test equipment as specified in the notes section of the appropriate AWWA Standard in effect for the type of meters to be tested. The overall accuracy of the test equipment and test procedures shall be sufficient to enable the test of service meters within the requirements of this Chapter. In any event, the inherent overall accuracy of the equipment shall permit tests with an overall accuracy of the equipment shall permit tests with an overall error of not greater than three tenths of one percent (.003).

(c) **Test measurement standards.**

(1) **Basic standards.** A measuring device for test of meters may consist of a calibrated tank for volumetric measurement or a tank mounted upon scales for weight measurement. If a volumetric standard is used, it shall be accompanied by a certificate of accuracy from any standard laboratory approved by the Commission. If a weight standard is used, the scales shall be tested and calibrated periodically by an approved laboratory and a record maintained of the results thereof.

(2) **Size of basic standards.** When basic standards are used for meter tests, they shall be of a capacity sufficient to insure adequate determination of accuracy and shall be subject to the approval of the Commission.

(3) **Standard meters.** A standard meter may be provided and used by any utility for the purpose of testing meters in place. A standard meter shall be tested and calibrated periodically to insure its accuracy within the limits required by this Chapter. In any event, such test shall be made at least once each week while the standard meter is in use and a record of all tests shall

be kept by the utility.

165:65-7-11. Periodic and routine tests

(a) Each utility shall adopt the following periodic and routine test and repair schedule of its meters:

- (1) 1 inch and smaller meters: 10-year interval between test years
- (2) 1 ½ inch and 2 inch meters: 6-year interval between test years
- (3) 3 inch meters: 4-year interval between test years
- (4) 4 inch and larger meters: 2-year interval between test years

(b) If the meters of a utility are maintained in compliance with the provisions of the schedule in (a) of this Section, and if at least ninety percent (90%) of the meters tested register an accuracy of not less than ninety-eight percent (98%) nor more than one hundred two percent (102%) during a three (3) year period, the utility, upon application and after notice and hearing, may be granted an extension in the time interval between test years.

(c) If the water meter testing program of a utility does not meet the standards prescribed in subsection (b) of this Section over a three (3) year period, the time interval between test years may be reduced by the Commission after notice and hearing. Change in ownership or assets of the water utility shall not change the requirements for periodic testing of active meters being utilized by the utility.

(d) All meters and/or associated metering devices, when tested, shall be adjusted as closely as practicable to the condition of zero (0) error.

(e) All tolerances of this Chapter are to be interpreted as maximum permissible variations from the condition of zero (0) error. In making adjustments no advantage shall be taken of the prescribed tolerance limits.

(f) The utility shall maintain a record of the most recent test of each meter.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03]

165:65-7-12. Meter testing on request of consumer

(a) Upon receipt of written request of a consumer, the utility shall within twenty (20) calendar days thereafter test the accuracy of the meter or replace the meter.

(b) No deposit or payment shall be required, whether or not there is an applicable charge in the utility's tariff, from the consumer for such meter test as requested by the consumer, unless the consumer has requested such meter test within the previous twelve (12) months. If the meter meets the accuracy standards of the Commission, and the consumer has not requested such a test in the previous twelve (12) month period, and the consumer was notified before such test of the tariff charge that might be applicable to such meter test, then the consumer should bear the expense of the test provided an approved charge is in the utility's tariff.

(c) Any charge made pursuant to subsection (b) of this Section shall be refunded to the consumer if the meter is found when tested to have an average error of more than two percent (2%).

(d) A consumer may make written request to be present when the utility conducts the test on his meter and may have an expert or other representative present at the time, in which case the utility shall conduct the test only in the presence of the persons requested.

(e) A written report stating the name of the consumer requesting the test, the date of the request, the location of the premises where the meter has been installed, the type, make, size and serial number of the meter, the date of removal, the date tested, and the result of the test shall be supplied to such consumer within ten (10) business days after the completion of the test.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-7-13. Referee meter tests by Commission

(a) Upon written request to the Commission by a consumer, a test will be made of the consumer's meter by a representative of the Commission. The test shall be made as soon as reasonably possible after the request.

(b) The consumer may make written request to be present or have a representative present to witness the testing of the meter by a representative of the Commission. Upon receipt of such request, the Commission shall notify the utility to remove and seal the meter in the presence of the consumer and to keep the meter in the same condition with the seal unbroken until the test can be made in the presence of the consumer or his representative.

(c) Cost of the referee meter test shall be borne by the utility if the accuracy of the meter falls outside of the standards of the Commission. Cost of the test shall be borne by the consumer if the accuracy of the meter meets the standards of the Commission.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99]

165:65-7-14. Replacement meters

(a) A request from a consumer for replacement of the service meter on his premises shall be deemed a request for the test of the meter pursuant to OAC 165:65-7-12.

(b) The utility shall make no charge for initial connection of water service for a consumer except the charges specified in the approved tariffs and rules of service of the utility; except that for each disconnection and reconnection of service for the same consumer at the same location within twelve (12) months after a previous connection of service, the utility may make a charge prescribed in its approved tariffs or Rules of Service.

[Source: Amended at 31 Ok Reg 1091, eff 9-12-14]

SUBCHAPTER 9. RECORDS, REPORTS, AND FILING REQUIREMENTS

165:65-9-1. Retention, location and availability of records; contact persons

(a) **Record retention.** Unless otherwise specified herein, all records required by the rules in this Chapter shall be preserved by the utility in the form and for a period of time not less than two (2) years and shall be available for examination by the Commission or its representatives.

(b) **Record location.** All records required by this Chapter shall be kept within Oklahoma at the office or offices of the utility and shall be open for examination by the Commission or its representatives; provided that if the general office of the utility is located outside of Oklahoma, the records may be kept at the general office. Each utility shall maintain records in such detail that the cost of property located and business done in the State of Oklahoma can be accurately and readily ascertained, and the utility shall make available any such records for examination by the Commission or its authorized representative. Each utility shall notify the Commission as to the location of the office or offices at which the various classes of records are kept and shall file with the Commission such reports as the Commission may from time to time require.

(c) **Submetering records.** In the event of the use of submetering, all submetering records shall be retained for a period of two (2) years and shall be available for inspection by the Commission, the affected consumer and/or duly interested person

or entity at a location accessible to the consumer affected by submeters.

(d) **Contact persons.** Each utility shall notify in writing, the PUD Director within thirty (30) days of a change in the company-designated contacts for PUD and CSD issues.

(1) The update shall include the name(s), physical street address(es), electronic mail addresses and telephone number(s) of the designated individual(s), and shall be furnished applicable to each operating district, town or any segment of the utility so that PUD will be able to reach the responsible person at any time. If this information is unavailable, the utility may seek a waiver from the PUD Director by making the request in writing.

(2) The contact name(s) provided pursuant to this subsection shall be the individual(s) primarily responsible for:

- (A) Providing customer service;
- (B) Repair and maintenance;
- (C) Answering complaints;
- (D) Authorizing and/or furnishing refunds to customers;
- (E) Tariff issues;
- (F) Regulatory matters;
- (G) PUD Fee Assessment (and Fee Assessment Payments, if different);
- (H) Primary emergency;
- (I) After hours emergency;
- (J) Annual reporting;
- (K) Attorney for regulatory matters;
- (L) Community liaison; and
- (M) Engineering operations, meter tests and repairs.

(e) **Other information.** Each utility shall promptly furnish such other information as PUD or the Commission may request, unless otherwise ordered by the Commission.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-9-2. Interruptions of service

Each utility shall make reasonable efforts to avoid interruption of service. When an interruption occurs service shall be re-established as soon as possible.

(1) Each utility shall keep a record of interruptions of service on its primary distribution system, including a statement of the time, duration and cause of each such interruption. The record shall be available to the Commission or its representative on request.

(2) The log for each unattended substation shall show interruptions that require attention to restore service with the estimated time and duration of interruption.

(3) Any planned interruption shall be made at a time that will not cause unreasonable inconvenience to consumers and shall be preceded by at least a two (2) day notice to consumers affected.

(4) The utility is required to report cybersecurity or infrastructure security events that affect customers immediately to the PUD Director or designee.

[Source: Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-9-2.1. Restoration of service

This Section establishes general parameters to ensure timely communication to the Commission, of the utility's implementation of its restoration of service plan, following an unplanned service interruption. Each water utility shall have a written restoration of service policy/plan, which shall include a communication plan to be followed during unplanned or emergency interruptions, with a current copy on file with the Commission's CSD Director and the Commission's Emergency Liaison. No later than September 30 of each year, this policy shall be reviewed by the utility at least annually and updated as deemed necessary and appropriate. A statement detailing all changes from the previous edition shall be filed with the Commission and included at the front of the policy on file. Each water utility shall provide and keep current, the phone number of any 24 hour emergency operations center or a list with a minimum of two individuals with 24-hour contact numbers to the Commission's CSD Director and the Commission's Emergency Liaison. The following items are guidelines to be addressed in the policy:

- (1) Assessment of the extent of the service interruption and what resources (equipment, materials, and labor) will be required to restore service. The utility should also attempt to determine the number of customers affected and the geographic extent of the service interruption.
- (2) Determination as to whether or not the service restoration can be accomplished by use of in-house personnel only, or if contractors (personnel obtained from other utilities or third-party entities) will be required. The objective is to have service restored as soon as possible.
- (3) Identification of priorities for service restoration, based upon emergency needs and upon ease of restoration for the greatest number of consumers for the least expenditure of money, time and effort. Priority shall be given to any life-threatening situations known or discovered during restoration of service.
- (4) Once water to installations affected with the interest of public health and safety has been restored (such as hospitals, fire and police departments, and 911 centers), service shall be restored to schools as quickly as feasible, during such time of the year that school is in session.
- (5) Attempted notification of high-priority customers or major water consuming facilities who are affected by the service outage, when possible. Radio and/or television should be utilized to notify larger numbers of customers as to the type of service outage, extent of the service outage, and the expected time to restore service. Other means of notification may also be utilized, so long as the result is mass notification on an efficient, effective, and timely basis.
- (6) Commission notification through the CSD Director and the Commission's Emergency Liaison to implement the process outlined in paragraphs A through C below. The Commission notification process to the designated CSD individual(s) and the Commission's Emergency Liaison may be accomplished by one or more of the following methods: business telephone and/or e-mail address during the business hours of 8:00 a.m. through 4:30 p.m. Monday through Friday, or emergency cellular telephone number after normal business hours, weekends and holidays. The notification shall consist of the following:
 - (A) An initial contact to notify Staff of outages which involve a major utility substation or facility, may cause a high degree of public interest or concern, or which have a duration of four (4)

hours or more and involve one percent (1%) or fifty (50) customers or more, whichever is greater, of the utility's meter count.

(B) Intermediate contact to provide status reports, as deemed necessary by the utility, or as may be requested by Commission Staff.

(C) A conclusory contact detailing the results and completion of the restoration of service plan implementation.

[Source: Added at 23 Ok Reg 1681, eff 7-1-06; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-9-3. Plant records

Each utility shall keep a record of the input and output of its plant in gallons of water per month.

165:65-9-4. Records of service complaints; investigation

(a) Each utility shall make a full and prompt investigation of every complaint made to it by a consumer, either directly or through the Commission. It shall keep a record of all such complaints received, which record shall show the name and address of the complainant, the date and character of the complaint, and the adjustment or disposal made thereof. This record shall be open at all times for inspection by the Commission or its representatives.

(b) In the event of a dispute between the consumer and the utility respecting the accuracy of a metering device, the utility shall make such investigation as shall be required by the particular case, and report the result thereof to the consumer. In the event that the complaint is not reconciled, the utility or the consumer may make application to the Commission for review of the complaint.

(c) When a utility has been notified that a complaint regarding meter accuracy has been referred to the Commission, the questioned meter set assembly shall not be changed in any manner without prior authorization of the Commission. Violation of this provision will be considered as substantiation of the complainant's contentions.

(d) Whenever a special meter reading is required following a complaint by a consumer the utility shall not make a charge for the special meter reading whether or not its tariff authorizes a charge for a special meter reading.

(e) The utility shall provide each consumer a local telephone number and mailing address where either oral or written complaints may be received by the utility. If the utility utilizes electronic notification any such address(es) shall also be provided to all consumers of the utility.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 31 Ok Reg 1091, eff 9-12-14]

165:65-9-5. Record of meter and meter test

(a) Whenever any service meter is tested, the original tests records shall be preserved, including the information necessary for identifying the meter, the reason for making the test, the reading of the meter, the reason for making test, the reading of the meter before and after the test, together with all data taken at the time of the test in sufficiently complete form as to permit the convenient checking of the method employed and the calculations. On removal from service, only the record of the latest test need be preserved.

(b) A record shall be made for each meter owned or used by any utility, showing the date of acquisition, a record of the use, repairs, and the most recent test to which it has been subjected, and its present location. The record shall be retained until six (6) months after the meter is permanently retired from service.

165:65-9-6. Record of accidents [REVOKED]

[Source: Revoked at 16 Ok Reg 2380, eff 7-1-99]

165:65-9-7. Filing of rate schedules, contracts, agreements, and rules

(a) It shall be unlawful for a utility to furnish, charge for, or receive payment for water service except strictly in accordance with a tariff or rate schedule on file with and approved by the Commission.

(b) No tariff or rate schedule shall be added, deleted, changed, closed or discontinued after the effective date of the rules in this Chapter except pursuant to order of the Commission upon application of the utility and after notice and hearing.

(c) A utility shall not demand or accept payment for service of any kind of a sum greater or less than specified in an approved tariff.

(d) A special contract or agreement other than a filed tariff under which water service is furnished to one or more consumers shall be deemed a tariff for purposes of this Section. From and after the effective date of the rules in this Chapter, no service shall be furnished pursuant to such a contract that has not been filed with and approved by the Commission. Any special contract for water service made after the effective date of the rules in this Chapter shall not become effective except after approval by order of the Commission.

(e) The utility shall maintain and furnish to a member of the public on request:

(1) A copy of every tariff and rate schedule under which water service is being furnished to consumers within the area serviced by that local office or agent.

(2) A copy of the approved Water Service Utilities rules.

(3) A copy of this Chapter, and all amendments thereto.

(f) A certified copy of every franchise, agreement or permit granted a utility by any municipality shall be filed with the Commission.

(g) A utility shall not sell water to any consumer for resale, except pursuant to a tariff on file with and approved by the Commission which authorizes resale and the consumer has on file with and approved by the Commission tariffs, rate schedules rules and regulations covering such resale or is exempt by law from such requirement.

[Source: Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-9-8. Filing of maps

Each utility shall provide upon request within ten (10) business days to the Commission suitable, detailed maps, a size and media as agreed by the utility and the PUD Director, of its general system and shall maintain suitable, detailed maps of its entire system, which shall be made available to the Commission on request. The general system maps may be provided by sections or counties where necessary to meet size requirements. Such maps shall be brought up to date annually, not later than ninety (90) calendar days after the end of the utility's fiscal year.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-9-9. Cost of services, material, or facilities for other types of business or subsidiaries

(a) When a utility is engaged in any type of non-utility business or operations, through subsidiaries or otherwise, or in any business not considered in the

ratemaking process, and personnel, material, equipment, or any facility of the utility is supplied for the operation of such other type of business or subsidiary, the utility shall keep an accurate account or allocation of all of the cost of personnel, services, material, equipment, or any facility between utility and non-utility operations. There shall be a written accounting thereof between utility and non-utility operations on a monthly basis. This accounting will clearly delineate company's utility and non-utility expenses and revenues for the purposes of accurate ratemaking.

(b) The cost of keeping the records and any other expense caused by furnishing such services, materials, or facilities shall be charged to the recipient thereof. "All of the cost" in this Section shall mean actual cost plus any direct or indirect charges related to the cost of services, materials, or facilities calculated on the same basis used in allocating direct and indirect charges to the utility operations.

(c) Records of and reports on services, materials, or facilities to other types of business or subsidiaries referred to in this Section shall be available to PUD or its representatives.

[Source: Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-9-10. Accounting

(a) The "Uniform System of Accounts" applicable to water utilities published by the National Association of Regulatory Utility Commissioners (NARUC) or other uniform system acceptable to the PUD shall be adopted by a utility.

(b) All water utilities that have multi-state operations shall maintain records in such detail that the costs of property located and business done in the State of Oklahoma in accordance with geographic boundaries can be accurately and readily ascertained.

(c) No change in or departure from the system used by the utility will be permitted except upon order of the Commission after notice and hearing.

(d) Every water utility shall file with the PUD an annual report on a form furnished by the PUD, the amount of property, revenues, expenses, taxes, depreciation, etc., utilized in or incurred from the furnishing of utility service in the State of Oklahoma. Any cost allocations necessary in developing results of operations for the State of Oklahoma separately shall be accomplished on a basis acceptable to the PUD. The annual report form may be changed by the PUD Director or designee upon notice being given by posting on the Commission's website the proposed changes, provided such changes must be posted no later than December 31 of the year for which the proposed changes are to be effective.

(e) The results of operations reported by each water utility in its annual report to the PUD shall be reconciled with the results of operations shown on its books, records, and in its other reports to the Commission.

(f) Each utility shall report to the PUD at the end of the utility's fiscal year, on summary sheets furnished or approved by the PUD, the book value of its utility plant. These reports and annual reports required by (d) of this Section shall be delivered to the PUD not later than one-hundred twenty (120) calendar days after the end of the fiscal year, provided that the PUD may grant an extension for good cause shown.

(g) Each utility shall make special reports at such time and in such form as the PUD may from time to time require.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-9-11. Relief from rate increase requirements

(a) Water utilities, having less than \$400,000 in annual gross revenue within the state, shall not be subject to the requirements of OAC 165:70-7-4 rate regulation as prescribed in Chapter 70, the general rate regulation requirements, unless a water utility proposes an increase in rates and charges which exceeds a fifteen percent (15%) annual increase in revenue, based on the previous twelve (12) months gross revenue generated by the existing water usage rates.

(b) A water utility may not submit more than two (2) consecutive annual submissions using the provisions of this Subchapter, nor may a water utility submit more than three (3) submissions within the most recent five (5) year period using the procedures set forth in this Subchapter.

(c) Each water utility desiring to increase its water rates pursuant to this section shall provide notice to its water customers in no less than two (2) billing cycles with the second notice being given at least sixty (60) calendar days before the effective date of the proposed rate increase. Notice shall be made by regular mail or personal service and be included with each customer's regular bill. Notice to the water utility's customers shall include the following:

- (1) Existing rate and proposed rate;
- (2) Average dollar increase per customer per rate class;
- (3) Percentage of total company regulated revenues increase; and
- (4) The procedure necessary for a customer to petition the Commission to examine and determine the reasonableness of the proposed rate increase, pursuant to Section (h) of this Subchapter.

(d) Each water utility desiring to increase its water rates pursuant to this section shall notify the Commission at least seventy-five (75) calendar days before the effective date of the proposed rate increase. Notice to the Commission shall include the following:

- (1) A copy of the notice to be provided to its customers;
- (2) Verified statement showing the total number of customers of the water utility as of the date of the most recent billing;
- (3) Verified statement showing the water utility's total gross revenue for the previous twelve (12) months;
- (4) The date of the water utility's last rate increase, the cause number and the final order number, if applicable;
- (5) Any anticipated growth or decline in the water utility's customers which is expected to occur during the first twelve (12) months following the proposed rate increase;
- (6) The types of customers the water utility serves;
- (7) A copy of the water utility's approved tariff sheet showing the existing rates and proposed new rates;
- (8) The date of the most recent annual report in accordance with OAC 165:65-9-10(d)-(g).

(e) If, thirty (30) calendar days prior to the effective date of this proposed increase in rates and charges, the Commission has received petitions from fewer than fifteen percent (15%) of the affected customers, requesting that the Commission examine the proposed increase in rates and charges, the Commission shall notify the water utility that the rate increase may be implemented on the proposed effective date and shall apply to all bills normally rendered on and after the effective date.

(f) If, thirty (30) calendar days prior to the effective date of the proposed increase in rates and charges, the Commission has received petitions from fifteen percent

(15%) or more of the affected customers, then the Commission shall notify the water utility that it will examine and determine the reasonableness of the proposed increase in rates and charges and the rate increase may not be initiated until the Commission has completed its determination.

(g) A water utility shall not increase its rates and charges under this Section more than once in any twelve (12) month period. If a water utility is eligible to increase its rates and/or charges pursuant to this Section and desires to increase its rates and/or charges above that which is allowed under this Section, it shall file an application pursuant to the Commission's applicable rules, unless otherwise allowed by law.

(h) A petition submitted to the PUD Director requesting the Commission to examine and determine the reasonableness of a water utility's proposed increase in rates and charges shall be in substantially the following form:

(1) Form: The petition shall be headed by a caption, which shall contain:

(A) The name of the utility seeking an increase in rates and charges;
and

(B) The relief sought.

(2) Body: The body of the petition shall contain the following:

(A) All allegations of facts, without unnecessary detail, explaining why the customers oppose the increase in rates;

(B) A reference that the petition is submitted pursuant to OAC 165:65-9-11;

(C) The name, address, telephone number, and signature of each petitioning customer;

(D) A copy of the notice provided by the water utility and received by one of the customers signing the petition shall be attached to the petition.

(i) Petitions may be signed only by the affected customers of the water utility. Only one signature per meter shall be counted to determine if the fifteen percent (15%) threshold has been met.

[Source: Added at 27 Ok Reg 914, eff 7-1-10; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-9-12. Utility acknowledgement of customer complaint inquiries

If PUD contacts a utility concerning a customer complaint, the utility shall respond to PUD within the following time periods:

(1) Inquiries regarding disconnection, suspension, or termination of service shall be acknowledged by the utility within one (1) business day of receipt of inquiry from PUD.

(2) Inquiries other than for disconnection, suspension, or termination of service shall be acknowledged by the utility within three (3) business days of receipt of inquiry from PUD.

[Source: Added at 36 Ok Reg 718, eff 7-25-19]

SUBCHAPTER 11. CUSTOMER SERVICE

PART 1. DEPOSITS AND BILLING

165:65-11-1. Information on bills

The utility shall bill each consumer as promptly as possible following the reading of his meter. The consumers shall receive their bills by mail, or by

electronic notification to consumers who make an affirmative election to receive electronic notification of such information. In no event shall there be a charge for providing a bill through the United States Mail or through different means. The bill shall show:

- (1) The reading of the meter at the end of the period for which the bill is rendered.
- (2) The date on which the meter was read.
- (3) The number and kind of units metered.
- (4) The applicable rate schedule or identification of the applicable rate schedule. If the actual rates are not shown, the bill shall carry a statement to the effect that the applicable rate schedule will be furnished on request.
- (5) The total amount due for water used. In the case of prepayment meters, the amount of money collected shall be shown.
- (6) The date by which the consumer must pay the bill in order to avoid addition of a penalty.
- (7) The total amount due after addition of any penalty for nonpayment within a designated period. The terms "gross bill" and "net bill" or other similar terms implying the granting of a discount for prompt payment shall not be used where a penalty is added for nonpayment within a designated period.
- (8) A distinct marking to identify an estimated bill.
- (9) Any conversions from meter reading units to billing units, or any calculations to determine billing units from recording or other devices, or any other factors used in determining the bill.
- (10) The name and toll-free telephone number of the Commission's CSD, to which the end-user may direct complaints and questions regarding utility services.

[Source: Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-11-2. Penalty or charge for late payment of bills

(a) A utility may make a penalty charge in an amount not to exceed one and one-half (1 1/2%) for delay in receipt of payment by the utility past the due date of the bill, unless otherwise ordered by the Commission. The due date shall be stated on the face of the bill and shall not be earlier than ten (10) days after the bill was mailed, except that for residential consumers, it shall not be earlier than twenty (20) days after the bill is mailed or hand delivered.

(b) A utility shall clearly state upon the face of its bills the amount of late payment penalty, and the date on or before which payment must be received in order to avoid paying the late payment penalty. In its billing, the utility shall not use the term "prompt payment discount" or other words of similar import that suggest the consumer will receive a discount or reduction of charges for water service for payment prior to a certain date. The late payment penalty may be applied to any unpaid balance due at each monthly billing period.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-11-3. Deposits and interest

(a) Each utility shall prepare and submit a plan containing criteria for deposits to the Commission for approval. The plan shall include criteria for residential and nonresidential consumers with residential being defined in each utility's tariff.

- (1) The residential plan shall conform to all subsections of this Section.

(2) The nonresidential plan shall conform to all subsections of this Section except (b), (c), (d), and (j).

(b) No utility shall require a deposit of a residential consumer who has received the same or similar type and classification of service for twelve (12) consecutive months and service was not terminated for nonpayment nor was payment late more than twice nor was a check for payment dishonored. The twelve (12) month service period shall have been within eighteen (18) months prior to the application for new service. The utility plan may establish other relevant criteria that will qualify the consumer for nonpayment of a deposit.

(c) No utility shall require a deposit more than one-sixth (1/6) of the estimated annual bill. The utility may allow smaller deposits to be made, in conformance with relevant, objective criteria written in the utility's plan. The utility plan may allow consumers to pay deposits in installments.

(d) Any utility that fails to maintain an accurate record of any customer's deposit history, pursuant to this section, and in accordance with 165:65-11-3(q), may not require a new deposit from that same customer should the customer request new service.

(e) A utility may require an advance deposit as a condition of service for consumers other than those consumers addressed in (b).

(f) A present consumer may be required to post a deposit as a condition of continued service if undisputed charges have become delinquent, with delinquent meaning a payment not received on or before the due date as posted on the bill, in two (2) of the last twelve (12) billing periods or if the consumer has had service disconnected during the last twelve (12) months or has presented a check that has been subsequently dishonored.

(g) Interest on cash deposits shall be paid by the utility at no less than the rate calculated as follows:

(1) For all consumer deposits returned within one (1) year or less, the interest rate shall be established on the 1st day of January of each year to equal the average of the weekly percent annual yields of one (1) year U.S. Treasury Securities for September, October, and November of the preceding year. The interest rate shall be rounded to the nearest basis point.

(2) For all consumer deposits held by the utility for more than one (1) year, the interest rate shall be established the 1st day of January for each year to equal the average of the weekly percent annual yields of 10 year U.S. Treasury Securities for September, October, and November of the preceding year. The interest rate shall be rounded to the nearest basis point. The utility may pay the average of one (1) year Treasury Security, as referenced in (f) (1) of this Section, for the first year the deposit is held.

(3) Provided, however, that after the interest rate is initially established pursuant to this subsection, the interest rate(s) shall not change unless the application of the formula in (f)(1) and/or (2) results in a change in interest rate(s) that is/are greater than fifty (50) basis points.

(4) The PUD Director shall calculate the interest rate(s) as pursuant to (f)(1) and (2) of this Section, and shall provide notice to the utility company via mail, email, or posting on the Commission's website by December 15th of each year, pursuant to subsection (f), otherwise the current interest rate(s) will remain in effect.

(h) If refund of deposits is made within thirty (30) days of receipt of deposit, no interest payment is required. If the utility retains the deposit more than thirty (30) days, payment of interest shall be made retroactive to the date of deposit. No

interest shall accrue on a deposit after discontinuance of service.

(i) The deposit shall cease to draw interest on the date it is returned or credited to the consumer's account.

(j) The utility plan shall provide the date of payment of interest and whether the interest shall be paid by negotiable instrument or by credit against current billing.

(k) Each consumer posting a cash deposit shall receive a non-assignable receipt in writing at the time of making the deposit or within the ten (10) days thereafter.

When a consumer pays a deposit as a portion of a water service bill, payment of the bill shall serve as a receipt of the deposit. If the deposit is not paid by the due date, the amount of the deposit will become a part of the past due amount owed and monies paid shall be applied to the oldest past due amount. The utility plan shall provide reasonable means whereby a depositor who applies for the return of his/her deposit, or any deposit to which he/she is entitled, but who is unable to produce the original receipt may not be deprived of his/her deposit or balance.

(l) The utility shall automatically refund the deposit for residential service, with accrued interest, after twelve (12) months' satisfactory payment of undisputed charges and where payment was not late more than twice; provided, however, that service has not been disconnected within the twelve (12) month period. Payment of a charge shall be deemed satisfactory if received on or prior to the date the bill is due. Payment of a charge shall be deemed not satisfactory if made by a check subsequently dishonored. The utility plan shall provide for the review of all deposits at least annually and shall provide whether refunds will be paid by negotiable instrument, upon request of the consumer, provided, the consumer's bill is not delinquent, or by credit against current billing.

(m) The amount of the deposit, with accrued interest, shall be applied to any unpaid charges at the time of the discontinuance of service. The balance, if any, shall be returned to the consumer within thirty (30) days following the settlement of the consumer's account, either in person or by mailing it to the consumer's last known address.

(n) The utility shall provide payment of accrued interest for all consumers annually by negotiable instrument or by credit against current billing.

(o) The utility may withhold refund of return of the deposit, pending the resolution of a dispute with respect to charges secured by such deposit.

(p) The utility company shall keep records to show:

(1) The name, account number and address of each depositor.

(2) The amount of the deposit and date received.

(3) Each transaction concerning the deposit.

(q) Such records shall be retained for two (2) years after deposit and/or interest is refunded or applied.

(r) Upon the sale or transfer of any public utility or operating units thereof, the seller shall file with the application for transfer a verified list of all consumers from whom a deposit is being held, the date such deposit was made, the amount thereof, and the unpaid interest thereon. The information provided shall be treated as confidential and shall not be available for public inspection unless ordered by the Commission after notice and hearing.

(s) Deposits shall not include membership fees in cooperatives.

(t) The deposit made by the consumer with the utility at the time of application for water service shall not constitute an advance payment to cover service bills, but for all purposes it is to be considered as security for the payment of monthly bills or other proper charges.

PART 3. DISCONNECTION OF SERVICE

165:65-11-10. Disconnection of service by a consumer

A consumer may be required to give up to five (5) business days written notice, excluding legal holidays, Saturdays and Sundays, of intention to have service disconnected or to have the account closed and shall be responsible for all charges for service until the expiration thereof. This 5-day written notice provision may be waived by the utility. Such disconnection or closing of the account does not relieve the consumer of obligations incurred prior to disconnection. At the time the consumer requests disconnection or closing of the account, the utility will advise the consumer of any reconnection and service fees, if any reconnection and or service fee applies pursuant to the utility's approved tariffs.

[Source: Amended at 12 Ok Reg 2167, eff 7-1-95; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-11-11. Disconnection of service by a utility

(a) **Sufficient reasons for disconnection of service.** A utility may disconnect service to a consumer for any of the following reasons:

- (1) Nonpayment of all or any portion of undisputed utility bills or a utility bill which is no longer disputed or for which the Commission's dispute process has been completed.
- (2) Failure to comply with the terms and conditions of a settlement agreement or any type of deferred payment agreement or a Commission order.
- (3) Failure to post a deposit as prescribed in OAC 165:65-11-3.
- (4) Failure to make application for service.
- (5) Misrepresentation of identity or facts for the purpose of obtaining service or use of an alias, trade name, business name, relative's name or another person's name as a device to escape payment of an unpaid obligation for utility service provided to the consumer.
- (6) Violation of any rule or regulation of the Commission or Commission-approved rule of the utility.
- (7) Refusal to grant access at reasonable times for the purpose of installation, inspection, maintenance, replacement, or reading of utility equipment installed upon the premises of the consumer, or maintaining any obstruction that would deny access for these purposes.
- (8) Potential adverse effect of the service required by the consumer on the service of other consumers of the utility, provided the consumer has been notified and given a reasonable opportunity to correct the adverse effect.
- (9) A consumer provides false or misleading information to the utility in order to avail the consumer of the provisions applicable to the financial assistance delay, deferred payment agreement or Commission notification procedure for elderly and/or handicapped consumers.
- (10) Where negligent or wasteful use of water exists on a consumer's premises, which adversely affects the general service, the utility may discontinue the service if the conditions are not corrected. Where such waste threatens the supply to a substantial number of other consumers, service may be discontinued immediately after notice.

- (11) Abandonment of the premises served.
- (12) Upon request of the consumer pursuant to OAC 165:65-11-10.
- (13) Causing injury or threatening to cause injury to an employee of the utility or the family of an employee of the utility or the property of the utility for the purpose of preventing a utility employee from engaging in activities authorized by law or in retaliation for such activities.
- (14) Whenever the utility has reason to believe that continued service will create a condition on the consumer's premises that is dangerous to persons or property.
- (15) Violation of the utility's rules regarding the operation of nonstandard equipment or unauthorized attachments, if the consumer was notified first and given a reasonable opportunity to comply with the rules.
- (16) Violation of federal, state, or local laws or regulations through use of the service.
- (17) Causing damage to utility property.
- (18) A condition exists which poses a health or safety hazard.
- (19) Unauthorized use of water service accomplished through bypassing of the utility's measuring equipment or tampering with pipes, meters, or other utility equipment.
- (20) The utility may disconnect service twenty-four (24) hours after providing notice for violations of (3) through (9) of this subsection.

(b) **Insufficient reasons for disconnection of service.** A utility shall not disconnect service to a consumer for any of the following reasons:

- (1) Failure to pay for a different kind or classification of service from that requested.
- (2) Failure to pay a bill correcting a previous under billing, due to misapplication of rates, unless the utility offers the consumer a deferred payment agreement as provided elsewhere in this Chapter.
- (3) Failure of a previous owner or occupant at the premises or user of the service to pay an unpaid or delinquent account, except where the previous occupant remains an occupant or user of the utility service.
- (4) Failure of a consumer to pay any portion of an estimated billing which the consumer disputes, except where the consumer fails to allow a utility representative access to the meter.
- (5) If a current consumer in good standing who accepts an additional household member owing a previous bill to the utility unless that additional household member is listed on the lease arrangements or another utility service as a responsible party, or unless the household member shared service with the subscriber at a different or same location.
- (6) If a consumer or potential consumer for a previously unpaid account from a different utility beyond the boundaries of the utility's service territory.
- (7) Pending verification, service cannot be withheld or disconnected from a consumer whose name was used to obtain service at another location without the consumer's permission or knowledge.
- (8) Nonpayment of an amount past due for more than three (3) years if the utility cannot substantiate the charges with a copy of the consumer's complete billing history reflecting usage, consumption and relevant charges.
- (9) Failure to pay a past due amount to another utility.

(c) **Effective period of notice.** A utility may disconnect service on the date specified in the notice or within thirty (30) calendar days thereafter, during regular business hours, so long as the disconnection does not occur within the last two (2) hours of the business day; nor shall service be disconnected on a holiday, nor after noon (12:00 p.m.) on Fridays until Monday morning.

(d) **Documentation of reason(s).** The utility shall provide documentation to the consumer indicating the reason(s) that service is being withheld or disconnected.

165:65-11-12. Insufficient reasons for disconnection of service [REVOKED]

[Source: Added at 12 Ok Reg 2167, eff 7-1-95; Amended at 16 Ok Reg 2380, eff 7-1-99; Revoked at 20 Ok Reg 2322, eff 7-15-03]

165:65-11-13. Notice of disconnection of service

(a) **Twenty-four hour notice.** Except as otherwise specifically provided for in this Subchapter (OAC 165:65-11-11), service shall be disconnected only after at least twenty-four (24) hours written notice has been given to the consumer by leaving a copy of such notice with the consumer or by leaving a copy of such notice in a conspicuous place at the premises where service is provided. This notice shall be in writing, in bolded lettering, and state the reason for the disconnection, the amount due, if applicable, and the utility company's name, telephone number, and contact information. After the utility company's contact information, the notice shall include the telephone number of CSD in a printed size smaller than the print size used for the utility company's contact information, not bolded, and shall include the following statement: "For clarification of statutes and rules governing services, or escalations of disputes, you may contact the Oklahoma Corporation Commission's Consumer Services Division." The utility shall submit a copy of the notice to PUD for approval prior to usage.

(b) **Residential notice.** When service to a residential consumer is to be disconnected for nonpayment of a bill for utility service or failure to make a security deposit after a reasonable time, the utility company shall give at least ten (10) days written notice from the date of mailing to the consumer. Said written notice shall be mailed by the utility company to the consumer's billing address, unless the mail is returned from that address as undeliverable, in which case the notice may be delivered to the premises at which the service was rendered.

(1) Notice will be deemed delivered to the consumer three (3) business days after mailing by the utility company, which shall not extend the ten (10) days written notice from the date of mailing to the consumer written notice requirement above.

(2) A notice of disconnection shall contain the following information:

(A) The words "DISCONNECTION NOTICE" OR "CUT OFF NOTICE" in bold print no smaller than one-fourth inch (1/4") tall.

(B) The name and address of the consumer.

(C) A statement of the reason for the proposed disconnection of service.

(D) The date on or after which service will be disconnected unless appropriate action is taken.

(E) The telephone number in bold print of the utility company where the consumer may make an inquiry.

(F) The approved charges for reconnection.

(G) A statement that the consumer must contact the utility company regarding the disconnection, prior to contacting the Commission's CSD, and should contact CSD if they cannot reach a resolution with the utility.

(H) The address and telephone number of the Commission's CSD, in print size which is smaller than the print size used for the utility company's telephone number.

(I) A statement that advises the consumer of the availability of a deferred payment agreement.

(J) A statement that advises the consumer of the elderly/handicapped notification.

(K) A statement that advises the consumer of the availability of the 20-day financial aid assistance delay.

(L) A statement that advises the consumer there are agencies providing assistance to consumers for their utility bills as well as provide the location of pay agents upon the consumer's request.

(3) The utility company shall notify the consumers in writing, at least annually, of the name and address of the authorized payment agencies, if other than the utility company's offices, where consumers may make payments.

(c) **Commission as intermediary.** Unless otherwise directed by the CSD, the utility company shall not contact the consumer regarding the consumer's account after the Commission has notified the utility company of a complaint or inquiry from the consumer. The Commission shall be the intermediary between the utility and the consumer until the resolution of the problem has been completed.

(d) **Third party notice.** A utility shall permit residential consumers to designate a consenting individual or agency to receive the applicable notice of disconnection.

(e) **Tenant notice.** Where a master metered apartment complex, building, or trailer court is subject to disconnection, the written notice to the consumer shall also be posted in a common area of the premises at least ten (10) days prior to disconnection of service. The utility may contract with tenants for residential service.

(f) **Commercial or business notice.** Service of nonresidential customers or other water systems shall be disconnected for nonpayment of all or any portion of an undisputed utility bill or failure to comply with the provisions of a deferred payment agreement only after at least five (5) business days written notice has been mailed to the consumer by the utility or after the notice is left in a conspicuous place at the premises where service is provided.

[Source: Added at 12 Ok Reg 2167, eff 7-1-95; Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-11-14. Commission notification procedure for elderly and/or consumers with disabilities

(a) At any time prior to disconnection of service, the notification procedure shall be available to those elderly and/or consumers with disabilities who have notified the utility in writing that they wish to be included in the following notification procedure:

(1) For those who have registered with the utility as elderly and/or consumer with disabilities, the utility shall delay disconnection of service to the elderly and/or consumers with disabilities for five (5) additional business days upon request of the Commission's CSD.

(2) Elderly and/or consumers with disabilities are those consumers who have notified the utility in writing that they:

- (A) Have a permanent impairment which substantially limits the disabled consumer's ability to pay for utility service; or
- (B) Are sixty-five (65) years of age or older.

(b) The utility shall notify the consumer or other person responsible for the bill, during the initial application for service, annually thereafter, and at any time disconnection is imminent, of this additional notification procedure.

(c) The utility may require verification of the consumer's qualifications.

[Source: Added at 12 Ok Reg 2167, eff 7-1-95; Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-11-15. Delays to disconnection of residential service

(a) **Limitations on disconnection.** After notice and hearing, the Commission may issue an order that may include limitations on disconnection of residential utility service.

(b) **Temporary ban on disconnections.** The Commission shall have the authority to order a temporary ban on any or all disconnections during periods of extremely severe weather or when circumstances exist such that disconnection could create a situation dangerous to the life or health of consumers or to property.

(c) **Severe weather.**

(1) If the NWS issues a local forecast predicting the temperature will drop below 32 degrees Fahrenheit for any time period during the following twenty-four (24) hours, the utility shall suspend its disconnection of service if the water service is used for heating purposes. The utility must obtain the most recent local forecast for the customer's location from the NWS reports between the hours of 6:00 a.m. and 8:00 a.m. on the morning of the day that the customer's shut-off is scheduled. If the NWS issues an updated forecast on the day of disconnection, then such updated forecast shall be used in place of the earlier obtained forecast.

(2) If the NWS issues a local forecast predicting the temperature will be 101 degrees Fahrenheit heat index or higher on the day of disconnection, or if the actual heat index is 101 degrees Fahrenheit or higher, the utility shall suspend its disconnection of service activity if the service is used for cooling purposes. The utility must obtain the most recent local forecast for the customer's location from the NWS reports between the hours of 6:00 a.m. and 8:00 a.m. on the morning of the day that the customer's shut-off is scheduled. If the NWS issues an updated forecast on the day of disconnection, then such updated forecast shall be used in place of the earlier obtained forecast.

(3) Nothing in this Section shall prohibit a utility from establishing a higher temperature threshold for residential heating purposes below which it will not discontinue utility service or from establishing a lower temperature threshold for residential cooling purposes above which it will not discontinue utility service. The utility may continue to disconnect utility service for unauthorized use of the utility's measuring equipment or tampering with pipes, meters, or any other utility equipment or obtaining service without contract.

(d) **Financial assistance delay.** When a residential consumer has applied for and is awaiting financial assistance, including social security income, from a federal, state, or local social service agency, and the utility has initiated written notice of

disconnection, it shall delay disconnection of service for a period of at least twenty (20) calendar days from the date when such notice was either delivered or mailed to the premises where service is rendered, provided:

- (1) The reason for disconnection is for nonpayment of the utility bill.
- (2) The consumer has notified the utility that the consumer has applied for and is awaiting financial assistance.
- (3) Verification from the involved agency must be provided in a form as prescribed by the utility upon its request.
- (4) If the expected financial assistance is less than the amount owed for services, the utility may require the consumer to enter into a deferred payment agreement as prescribed in (e) of this Section.
- (5) Under no condition is the utility required to furnish service to the consumer unless there is reasonable expectation of payment for such service except where other rules of this Commission apply.

(e) Deferred payment agreement. The utility shall be required to offer a deferred payment agreement before disconnecting service for any bill or account balance in excess of fifty dollars (\$50.00) when a residential consumer is unable to pay an account in full. The utility shall not disconnect service for nonpayment of a bill if the consumer enters into a deferred payment agreement with the utility. If the terms of the deferred payment agreement are agreed to orally, the utility may send confirmation of such agreement by mail or by electronic notification to consumers who make an affirmative election to receive electronic notification of such information. A deferred payment agreement may be entered into by the consumer up to, but not including, the day of disconnection. Except where payment assistance for the total amount of the bill is pending, the utility may require a reasonable partial payment in accordance with paragraph one (1) of this subsection, at the time the deferred payment agreement is made.

(1) Deferred payment agreement means a just and reasonable agreement offered by the utility and agreed to by the consumer which provides for the payment of all future bills during the period of agreement by the due date and the payment of the balance of any outstanding bills in reasonable installments based upon:

- (A) Consideration of the consumer's gross income less employer deductions.
- (B) Size of the delinquent account.
- (C) Consumer's ability to pay.
- (D) Consumer's payment history with the utility.
- (E) Length of time and reasons why the debt has not been paid.
- (F) Other extraordinary expenses of the consumer.
- (G) Loss of income through unemployment or illness.
- (H) Any other relevant factors concerning the circumstances of the consumer.

- (2) The payments under such an agreement need not be equal in amount.
- (3) The consumer shall initiate a renegotiation prior to breach of the deferred payment agreement. The deferred payment agreement shall be renegotiated if financial circumstances, such as loss of income through unemployment or illness, or any other relevant factors concerning the circumstances of the consumer, change during the payment period.
- (4) If a consumer fails to comply with the terms of the deferred payment agreement, the consumer will be subject to disconnection without further notice, so long as the disconnection date on the first and second notice has

not been passed. If the disconnection date has passed, the utility shall provide at least twenty-four (24) hours notice of disconnection to the consumer.

(5) Under no condition is the utility required to furnish service to the consumer unless there is a reasonable expectation of payment for such service except where other rules of this Commission apply.

(f) **False information.** If a consumer provides false or misleading information to the utility in order to avail the consumer of the provisions applicable to the financial assistance delay, deferred payment agreement, life threatening situation, or Commission notification procedure for elderly and/or consumers with disabilities, the false information shall be grounds for disconnection of service by the utility. The utility may disconnect service upon the utility providing notice to the customer in accordance with OAC 165:65-11-13(a).

(g) **Consumer liability.** Reconnection or continuance of service under this Section shall not in any way relieve the consumer of the consumer's liability incurred for utility service.

[Source: Added at 12 Ok Reg 2167, eff 7-1-95; Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03; Amended at 31 Ok Reg 1091, eff 9-12-14; Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-11-16. Reconnection of service

(a) A utility shall reconnect service upon the consumer's request as soon as the reason for disconnection of service has been eliminated. The utility shall give precedence to reconnection of service when disconnection was the fault of the utility; the utility shall reconnect service in the normal course of its reconnection workload, as soon as possible but no later than twenty-four (24) hours, after the consumer eliminates the reason for disconnection and requests reconnection, when disconnection of service was the fault of the consumer. If the reason for disconnection is unauthorized use of water accomplished through bypassing the utility's measuring equipment or tampering with the pipes, meters, or other utility equipment, the utility may, prior to reconnecting service, require a reasonable payment for estimated service rendered or may refuse to reconnect service until ordered by the Commission. A utility may require payment of a reconnection charge when disconnection of service was the fault of the consumer, if such a charge is provided in the utility's tariffs.

(b) When the disconnection of service was for nonpayment of service, and disconnection took place on a Friday morning, service shall be restored as soon as possible, but no later than twenty-four (24) hours from when the consumer eliminates the reason for disconnection and requests reconnection, subject to an intervening Act of God.

(c) Once the customer has remedied the disconnection problem, the company shall provide a written statement to the customer of the recommended procedures the customer should undertake to insure the customer has safe and reliable water.

(d) Reconnection or continuance of service under this Section shall not in any way relieve the consumer of the consumer's liability incurred for utility service.

[Source: Added at 12 Ok Reg 2167, eff 7-1-95; Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03]

165:65-11-17. Mediation

(a) Whenever there is a dispute between the utility and the consumer as to the following, the matter may be brought by either party to the Commission's CSD:

(1) The existence of elderly or handicapped status.

- (2) The question of financial assistance or guarantee of payment by a federal, state or local social service agency.
 - (3) The provisions of a deferred payment agreement.
 - (4) The terms and conditions of payment of any part of a bill as rendered.
 - (5) The proper interpretation of this Chapter.
- (b) The CSD shall review the matter and issue an informal review decision in writing setting forth the terms and conditions for continued service, disconnection of service, or deferred payment plan agreement. If it is the desire of the consumer, they may be represented by a third party, if the consumer is available for verification. If the dispute can be resolved by telephone with the party seeking review, the review decision need not be in writing unless requested by either party. During any period of time when a disconnection dispute is before the Commission or in mediation, the utility shall suspend disconnection procedures.
- (c) If the CSD is unable to resolve the dispute to the mutual satisfaction of the parties, either party may file a complaint with the Commission for final determination.
- (d) Whenever the consumer informs the utility that the consumer disputes a charge for service, the utility shall investigate the dispute promptly and thoroughly, and make a diligent effort to reach a mutually satisfactory settlement. If the consumer is dissatisfied with the decision of the utility, the consumer may report the dispute to the CSD. Upon written complaint by the consumer to the Commission, disconnection of service shall be held in abeyance provided the consumer pays the portion of the bill which is not in dispute.

[Source: Added at 12 Ok Reg 2167, eff 7-1-95; Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 20 Ok Reg 2322, eff 7-15-03]

165:65-11-18. Commission review

The utility's disconnect notice, service violation disconnection notice, and any notice or form used by the utility to comply with the requirements of this Subchapter shall be submitted to the Commission for approval. Upon approval, the forms or notice shall become a part of the utility's approved tariff.

[Source: Added at 12 Ok Reg 2167, eff 7-1-95; Amended at 20 Ok Reg 2322, eff 7-15-03]

165:65-11-19. Utilities encouraged to keep current lists of utility assistance programs

(a) **Compilation.** The utilities are strongly encouraged to compile a list with the names, addresses, and phone numbers of known payment assistance programs, including information regarding any bilingual services offered, that are applicable to each service area within the utility's areas of operation. The list should include but is not limited to: local, state, federal, and tribal water assistance programs. The list should also include public/private charitable organizations offering or known to offer water payment assistance, which have given prior consent to their inclusion on this list. The utilities are encouraged to use due diligence in compiling and updating this information, with updates to occur on an annual basis. However, the Commission encourages the addition of new assistance programs to the list, as the information becomes available.

(b) **Availability.** The utility shall give a copy of this list to any consumer who asks for such assistance.

(c) **Liability.** The offer of any such list under this Section is meant as an informative resource only, in order for the utility to better assist its consumers. Failure of the consumer to gain funding in full or in part, from any of the proffered

resources under this Section shall not result in any liability to the utility.

[Source: Added at 20 Ok Reg 2322, eff 7-15-03]

PART 5. CHARACTER OF SERVICE

165:65-11-20. Temporary service

A consumer requiring temporary service shall pay the regular rates applicable to the class or classes of service rendered for all. In addition, the consumer shall pay the installation and removal cost, less salvage value, of facilities installed by the utility to furnish temporary service to the consumer. The utility may require a deposit of such cost in advance.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99]

165:65-11-21. Service to mobile or modular homes and parks

(a) No utility shall be required to furnish water service to a mobile home park until the utility has been furnished, at no cost to the utility, the necessary easements. Such easements may terminate when the property ceases to be used as a mobile home park if the utility no longer needs the easement to maintain service to other consumers adjacent to or beyond the park.

(b) A mobile home shall be served by an individual meter under the same terms as a single residence. Service to mobile home parks existing on or before the effective date of this Chapter may continue to be provided with a single or multiple meter.

(c) Mobile home parks shall be served under the same terms and conditions as residential subdivisions.

(d) Where mobile or modular homes or parks are being served in any manner other than provided in this Section upon the effective date of the rules in this Chapter, the utility shall immediately take whatever steps are necessary to comply with this Chapter.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99]

165:65-11-22. Change in character of service

(a) Each utility shall, upon request, give its consumers such information and assistance as is reasonable in order that consumers may secure safe and efficient service.

(b) No change in the characteristics of the water service that may impair the safe and efficient utilization of the water shall be made.

(c) In order to protect itself against serious and unnecessary waste or misuse of water, the utility may meter any flat rate service connection and apply the regularly established meter rates where the consumer continues to waste or misuse water two (2) business days after the utility has notified him in writing to discontinue such practice.

(d) The utility may require water saving devices to be installed on air conditioning and refrigeration devices of over three (3) tons.

(e) If a change in service to a consumer is required for the convenience or benefit of the utility, the utility shall pay such part of the cost of changing the consumer's equipment as determined by mutual agreement, or by the Commission in the absence of such an agreement, including the cost of making the necessary change in consumer piping.

[Source: Amended at 16 Ok Reg 2380, eff 7-1-99; Amended at 36 Ok Reg 718, eff 7-25-19]

SUBCHAPTER 13. PROMOTIONAL POLICIES AND PRACTICES

165:65-13-1. Provisions governing promotional policies and practices [REVOKED]

[Source: Revoked at 16 Ok Reg 2380, eff 7-1-99]

165:65-13-2. Promotional practices prohibited

The following practices, whether or not commonly considered promotional practices, are specifically prohibited:

- (1) The furnishing of utility service, or the furnishing or installation of wiring, piping, appliances or equipment to any person at no cost, or at less than cost; or the furnishing of repair, modification, or maintenance of appliances, equipment, wiring, or piping to any person at no cost or at less than cost; except in accordance with the terms and conditions of service on file with an approved by the Commission and this Chapter governing the furnishing of utility service.
- (2) The guarantee of a maximum cost of utility service to any person or for any premises or installation.

165:65-13-3. Promotional practices permitted

The following practices, whether or not commonly considered as promotional practices, are specifically permitted:

- (1) Providing emergency service, inspection and adjustment of appliances, and repair and maintenance or similar benefits or services all in accordance with the terms and conditions of service on file with and approved by the Commission and in accordance with the Chapters of the Commission governing such services.
- (2) The installation of all pipes, lines, service, and equipment appropriate to provide adequate utility service to the consumer at the point of delivery.
- (3) Providing exhibitions, demonstrations, instruction, tests or experiments to schools, fairs, communities, religious, and charitable functions.
- (4) Normal sales and consumer relations activities, including:
 - (A) Contacting customers and potential customers.
 - (B) Advice and consultation with customers.
 - (C) Investigation and correction of complaints, and efforts to improve service.
 - (D) Collection of accounts.
 - (E) Securing compliance with terms and conditions of service.
 - (F) Technical, informational, and educational assistance (not otherwise prohibited by this Chapter) to customers on the use of energy, the planning or design of utility service to be offered, or the use of maintenance of appliances or equipment.

165:65-13-4. Advertising expenditures prohibited

- (a) Expenditures for advertising in support of or in opposition to governmental action of any kind; or in support of or in opposition to the selection or appointment of any person to a position in government is specifically prohibited.
- (b) For the purposes of this Subchapter, advertising shall include display, classified, and any other advertising in printed publications, broadcast advertising by radio or television, outdoor advertising, direct mail advertising, bill inserts, and personal

contact or solicitation of conversion from one form of energy to another.

165:65-13-5. Advertising expenditures permitted

The following expenditures for advertising shall be permitted without limitation as to amount:

- (1) Consumer advertising, which is advertising designed primarily to inform the consumer of available rates for utility service, benefits for prompt payment, deposit and billing practices, safety inspection and meter reading practices, and similar terms and conditions of service to consumers; procedures to be followed in emergencies, proper use of equipment and appliances, safety precautions, and similar matters of benefit to customers; and other services and benefits available to the consumer in connection with utility service; provided that advertising designed to attract new customers, or to encourage greater consumption, or to encourage the use of one form of energy in preference to another, which advertising is prohibited by OAC 165:65-13-4 shall not be permitted by this Section.
- (2) Conservation advertising, which is advertising designed primarily to inform the consumer of means whereby energy may be conserved and energy consumption reduced, and urging the adoption of those means by consumers.

[Source: Amended at 31 Ok Reg 1091, eff 9-12-14]

165:65-13-6. Contributions

(a) All gifts, donations, and contributions made by the regulated utility shall be treated as "below the line" expenses and excluded from operating expenses allowable for rate making purposes; including, but not limited to the following:

- (1) Contributions to charitable, religious, or educational institutions or associations.
- (2) Contributions to civic, community, social, or public welfare organizations or associations.
- (3) Payments to cities or towns in excess of franchise taxes or charges that the regulated utility is obligated to pay pursuant to an enforceable written contract or franchise.

(b) Dues and fees paid to industry, scientific, and professional organizations which in amount bear a reasonable relationship to benefits received from membership therein shall not be restricted in this Section, and may be eligible for recovery.

[Source: Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-13-7. Submission of promotional practices

The utility shall submit an annual submission of current promotional practices by May 1, and as programs are updated, to PUD. The report shall include a list and description of all promotional practices and activities. Although submission by the utility shall not assume approval by PUD, it will allow PUD and the utility to review and dialogue as to the appropriateness of the promotional practices, whether or not the expenses should be recovered through rates, and ensure that the promotional practices are provided on a nondiscriminatory basis.

[Source: Amended at 36 Ok Reg 718, eff 7-25-19]

165:65-13-8. Exceptions; prior conditions and rules

(a) This Subchapter shall not apply to affiliated or subsidiary corporations except where a regulated utility, for its own purposes and benefit, undertakes to perform any act through an affiliated or subsidiary which would violate the provisions of this Subchapter if performed by the utility itself, the act will be deemed the act of the regulated utility.

(b) This subchapter shall supersede all previous orders and Chapters by the Commission to the extent in conflict herewith and shall supersede all promotional practices on file with and approved by the Commission to the extent in conflict herewith; except that this Subchapter shall not amend or supersede the terms and conditions of service of any utility on file with and approved by the Commission or prior rules of the Commission relating to terms and conditions of service except as to provisions thereof relating to promotional practices.

(c) For good cause shown, the Commission may grant an exception to this Subchapter upon application of the utility or an interested party and after notice and hearing.

CHAPTER 70. MINIMUM STANDARD FILING REQUIREMENTS IN SUPPORT OF A REQUEST BY A PUBLIC UTILITY DOING BUSINESS IN OKLAHOMA FOR A PROPOSED GENERAL RATE CHANGE

[Authority: OKLA, CONST. art IX, § 18; 17 O.S., §§ 151 et seq.]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:70-1-1. Purpose

The purpose of this Chapter is to define the specific financial and statistical information required to be filed and made available with a request by a utility as defined herein (See "Utilities", 165:70-1-2) with regard to an application for a general rate change. This Chapter is not intended to establish any new ratemaking principles or to modify any provision of the existing laws of the State of Oklahoma. It is intended to define the information required to be filed and made available in connection with a proposed general rate change in order to facilitate an investigation of and hearing on such rates. This Chapter does not preclude the filing or provision of any additional data, information, or calculations not herein specified. This Chapter is not applicable to proceedings relative to the establishment or continuation of the fuel adjustment clause.

[Source: Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Accounting method" means the accounting method prescribed by the applicable uniform system of accounts for Class A and B utilities or as published by the National Association of Regulatory Utility Commissioners for Class C and D utilities or other accounting methods approved by the Commission.

"Annual operating revenues" means those revenues which are recorded as revenue in the accounts of the utility, resulting from all sales of commodities or services or from other uses of the utility property.

"Application package" means the required schedules and testimony filed by a Class A or B utility to initiate a general rate change. See 165:70-3-1 and

165:70-5-4.

"Attorney General" means the Attorney General of the State of Oklahoma.

"Combination utility" means a utility which provides more than one commodity or service (e.g. electric and water, gas and water, etc.). For combination utilities, departmental operating revenues shall be used for classification purposes.

"Commission" means the Oklahoma Corporation Commission.

"Confidentiality agreement" means the formal agreement executed by the utility, the Staff, and other parties when necessary to protect information provided pursuant to this Chapter.

"Cost of service" means the cost of providing service to a defined segment of customers, class of service or service category.

"DSC" means the commonly-used acronym for debt service coverage which is a financial ratio computed as: (Net Margins + Interest on Long-term Debt + Depreciation) divided by (Interest on Long-term Debt + Principal payments on Long-term Debt).

"Days" mean calendar days unless specifically defined otherwise; this applies to #-day periods (e.g. 45-day period) as well.

"Deficient filing" means a filing which does not substantially comply with the formal or procedural requirements of this Chapter.

"Department" means a responsibility center within a combination utility where revenues and costs are accumulated by a commodity or service rendered.

"Depreciated original cost" means the cost of property when first devoted to public service, less the depreciation reserve, which shall include accrued depreciation and amortization. Depreciated original cost shall not include any goodwill, going concern value or payments in excess of the actual cost of the property.

"Director" means the Director of the Public Utilities Division of the Oklahoma Corporation Commission.

"Exhibit" means one or more schedules and/or testimony which supports a rate filing in a rate proceeding.

"Filing" means the required appropriate application package filed by a utility to initiate a general rate change. See 165:70-1-1, 165:70-3-1, 165:70-5-1 and 165:70-7-1.

"General rate change" means a change in rates and charges which exceeds three percent (3%) based on the previous twelve (12) months revenue generated by the existing rates for an association or electric cooperative subject to the Commission's jurisdiction pursuant to 17 O.S. Section 158.27 et seq; or a change in rates resulting in more than a one percent (1%) increase in a utility's jurisdictional annual gross operating revenues unless otherwise allowed by law. A change mandated by regulation or legislation, a change in the terms and conditions of service, a request for a special contract, or a request for a new and/or optional service does not constitute a general rate change.

"Last test year(-end)" means the test period used in the utility's last general rate change before the Commission.

"NARUC" means the National Association of Regulatory Utility Commissioners.

"Notes payable" means an interest-bearing certificate of debt containing a formal written promise to pay a specified sum at a fixed future date and to pay interest periodically with a maturity exceeding one year.

"Notice of intent" means the formal notification provided by a utility of its intent to make an application for a general rate change. See 165:70-3-7.

"OCC" means the Oklahoma Corporation Commission.

"Original cost" means the actual cost of the property at the time when it was first dedicated to public service whether by the utility or by its predecessors in title.

"Outstanding obligation" means any delinquent payment due for a utility's fee assessment in Oklahoma or unpaid OCC fines.

"Preceding or prior year" means the normal reporting period, fiscal, or calendar year, or a twelve-month period preceding the test year utilized in the filing.

"Pro forma adjustments" means adjustments made to test year results and balances for known and measurable changes to obtain a normal or representative relationship between revenues, expenses, and rate base.

"Pro forma income statement" means a utility income statement after pro forma adjustments that reflects the results of adjusted and normalized revenues and expenses, for the test year and the annualized income effect of the proposed rate adjustment(s).

"Pro forma rate base" means rate base after pro forma adjustments.

"REC" means rural electric cooperative.

"Rate class" means a service or group of customers as defined in the utility's tariffs.

"Rate schedule" means a schedule of rates, charges, and conditions for a specific classification of customer or for other specific services.

"Staff" means the Staff of the Commission or its designated representatives.

"Staff response" means the formal declaration by the Commission Staff that a utility's application either satisfies the Commission requirements or is deficient. See 165:70-3-1.

"Subsequent event" means any occurrence transpiring after the end of the test year utilized in a utility's application.

"Supplemental package" means the set of schedules, exhibits or other documentation which supports the application package. See 165:70-5-20 and following.

"TIER" means the commonly-used acronym for times interest earned ratio which is a financial ratio computed as: $(\text{Margins} + \text{Interest on Long-term Debt})$ divided by Interest on Long-term Debt.

"Tariff symbols" means the following tariff symbols to be used for all proposed rate schedules:

- (A) "AT" - Addition to text
- (B) "C" - Correction
- (C) "CP" - Change in practice
- (D) "CR" - Change in rate
- (E) "CT" - Change in text
- (F) "DR" - Discontinued rate
- (G) "FC" - Change in format lettering or numbering
- (H) "MT" - Moved text
- (I) "NR" - New rate
- (J) "RT" - Removal of text

"Test year" means the twelve (12) month period used in determining rate base, operating income and rate of return.

"13-month balances" means the end of the month balance in an account for each of the twelve (12) months of the test year plus the month immediately preceding the beginning of the test year.

"Uniform System Of Accounts (USOA)" means the system of accounts as currently prescribed by the Federal Energy Regulatory Commission (FERC), the Federal Communications Commission (FCC), the Rural Electrification Administration (REA), those systems as published by the National Association of Regulatory Utility Commissioners (NARUC) or other accounting methods approved by the Commission.

"Utilities" means companies which are subject to OCC regulation under the following statutes: Title 17, Sections 131 et seq, 151, 152, 158.27 et seq, 160.1 et seq, and 181, Oklahoma Statutes, as amended, and shall, for purposes of this Chapter, include public service and transmission companies, rural telephone cooperatives, and all other entities which now or in the future are placed within the jurisdiction of the Commission for the purpose of regulation of their rates and charges for public service.

"Working capital" means the average investment required to fund daily operating expenditures and a variety of nonplant assets that are necessary to sustain ongoing operations of the utility.

[Source: Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-1-3. Applicability of rules

(a) This Chapter shall apply to all electric, gas, telephone, and water utilities and rural electric cooperatives under the jurisdiction of the Commission. This Chapter is applicable to all filings made after the effective date of this Chapter, except as otherwise provided in this Chapter. This Chapter is not intended to prohibit a utility from providing additional schedules, exhibits and other documents which may be material to the rate proceeding nor is it intended to prohibit the Commission from considering such additional schedules, exhibits, or other materials relevant in making its determination. A waiver of compliance regarding any requirements of this Chapter must be obtained as outlined in 165:70-3-6.

(b) Applications by utilities to reduce rates shall be exempt from the requirements of this Chapter, provided that a utility seeking to reduce rates shall provide adequate documentation to justify the reduction requested.

[Source: Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-1-4. Classifications of utilities

(a) **Class divisions.** All utilities shall be divided into classes as prescribed in this Section. These classes conform to the Federal Energy Regulatory Commission (FERC), National Association of Regulatory Utility Commissioners (NARUC), and Federal Communication Commission (FCC) classifications, except for rural electric distribution cooperative classifications, which are provided by Title 17, Section 158.27:

(1) Gas and Electric Companies:

- (A) Class A - \$2,500,000 or more annual gross operating revenue
- (B) Class B - \$1,000,000 or more but less than \$2,500,000 annual gross operating revenue
- (C) Class C - \$150,000 or more but less than \$1,000,000 annual gross operating revenue
- (D) Class D - Less than \$150,000 annual gross operating revenue

(2) Telephone Companies:

(A) Class A - \$100,000,000 or more annual revenues from regulated telecommunications operations

(B) Class B - Less than \$100,000,000 annual revenues from regulated telecommunications operations

(3) Water Companies:

(A) Class A - \$500,000 or more annual gross operating revenue

(B) Class B - \$250,000 or more but less than \$500,000 annual gross operating revenue

(C) Class C - \$50,000 or more but less than \$250,000 annual gross operating revenue

(D) Class D - Less than \$50,000 annual gross operating revenue

(4) Rural Electric Cooperatives: Class A - All

(b) **Determination of class.** For utilities whose classification is based upon annual gross operating revenues, the class to which any utility belongs shall be determined by the annual gross operating revenues for each of the three (3) immediately preceding years. For any utility whose classification is based on revenues from regulated telecommunications operations, the class to which it belongs shall be determined by the revenues from regulated telecommunications operations for each of the three (3) immediately preceding years.

(c) **Declaration of class.** The utility shall declare its classification in the notice of intent to file.

(d) **Exception.** Rate changes by interexchange carriers are covered by the codified telephone rules of the Commission and are therefore exempt from the rules of this Chapter. Additionally, RECs which have complied with Title 17, Section 158.27 and whose member-consumers have voted to exempt themselves from the jurisdiction of the Commission regarding their rates, are not required to comply with the rules of this Chapter.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-1-5. 180-day review requirement

(a) When any utility as defined in this Chapter shall file with the Commission a request for a review of its rates and charges, such request shall be given immediate attention.

(b) Unless otherwise allowed by law, the following requirements shall apply:

(1) The Commission shall complete any examination of such application within one hundred twenty (120) days from the date such application is filed.

(2) Public hearings on such application shall commence within thirty (30) days of the end of the Commission's examination of such application and in no event shall the conclusion of the Commission's examination of the application and the hearing conducted by the Commission exceed one hundred eighty (180) days from the date the application was filed.

(3) If the Commission's review of the application has not been completed and an order issued within one hundred eighty (180) days from the date of filing of the application, some or all of the request for change in the rates, charges and regulations made in such application shall be immediately placed into effect and collected through new tariffs on an interim basis at the discretion of the applicant utility.

(4) Should the Commission determine upon the completion of its examination and public hearings that a refund regarding the amount of interim relief is appropriate and necessary, the Commission shall order such

refund, including reasonable interest at the one-year U.S. Treasury bill rate accruing on that portion of the rate increase to be refunded, for a period not to exceed ninety (90) days from the effective date of the rate increase which is being refunded.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-1-6. Controversy over the rules of this Chapter

Whenever a controversy exists in connection with the interpretation of this Chapter and the applicability of the requirements set forth herein, or any right or duty imposed thereby, the Commission, upon application of any interested party and after notice and hearing, will enter such order thereon as it may deem appropriate.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-1-7. Severability

If any provision of this Chapter is held invalid, such invalidity shall not affect other provisions or applications of this Chapter which can be given effect without the invalid provision or application, and to this end, the provisions of this Chapter are declared to be severable.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

SUBCHAPTER 3. APPLICATIONS

165:70-3-1. Application; Staff response; and Waiver

(a) Each utility shall file with the OCC Court Clerk its request for a general rate change, with a complete application package. The utility shall also submit the filing fee with the application, which is set forth in the Commission Rules of Practice. In addition, Class A and B utilities shall submit, at a minimum, fifteen (15) copies of the application package and Class C and D utilities shall submit, at a minimum, six (6) copies of the application package.

(b) On the date of filing, a copy of the application package and the supplemental package, if required, shall be made available to the Public Utility Division. The Director and/or Staff shall review the package(s) for compliance with the rules as set forth in this Chapter.

(c) Within fifteen (15) business days of the receipt of the package(s), the Director shall file with the Commission and provide to the utility a copy of the Staff Response regarding the compliance or deficiency of the application and supplemental packages. The response shall serve as official notification of the acceptance or rejection of the package(s).

(d) If the Director finds the package(s) are not in substantial compliance with the requirements of this Chapter, the Staff Response shall state that the filing is a deficient filing. The deficiencies and the requirement(s) necessary to cure the deficiencies shall be stated in the Staff Response. See 165:70-5-2.

(e) The utility may seek a waiver for any portion of the exhibits, schedules, workpapers or other documentation required by this Chapter, in accordance with 165:70-3-6.

[Source: Amended at 11 Ok Reg 285, eff 10-19-93 (emergency); Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-3-2. Up-to-date requirements

At the time of filing a request for a general rate change, the filing utility shall have all monthly and annual reports required by Commission order or rule up-to-date and on file, and shall not have any outstanding obligation as defined in this Chapter.

[Source: Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-3-3. Test period

(a) As a minimum, the utility shall file as the test year a recent historical twelve-month test period which shall be no more than six (6) months old at the time the application package is filed with the OCC Court Clerk. Any waiver of this requirement shall be obtained in accordance with 165:70-3-6.

(b) The pro forma test year shall reflect normalized operations, including pro forma adjustments.

[Source: Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-3-4. Supporting workpapers [REVOKED]

[Source: Revoked at 11 Ok Reg 3753, eff 7-11-94]

165:70-3-5. Reconciliation of data

If the accounting and statistical data submitted differs from the books of the utility, then the utility shall provide a reconciliation schedule with an explanation describing and reconciling the differences.

[Source: Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-3-6. Waiver of requirements

(a) At the time the utility files a Notice of Intent, as required by 165:70-3-7, or any time until the application is filed, the utility may request a waiver of compliance with any or all of the requirements of this Chapter, by submitting a written request for waiver to the Director. The Director shall advise the utility that the waiver is granted or denied, within ten (10) days of the request for waiver. If the Director fails to act within ten (10) days, the requested waiver shall be deemed granted. If the Director determines that the request is not reasonable, the request for waiver shall be denied by the Director. The utility may appeal the denial of a waiver to the Commission en banc. If the Commission en banc has not ruled upon the waiver within fifteen (15) days from the date the appeal is filed, the requested waiver shall be deemed granted.

(b) The utility requesting the waiver or appealing the Director's denial of a waiver shall identify the requirements sought to be waived and state the reasonable cause for the waiver.

(c) If the utility appeals a denial of a waiver to the Commission en banc, which is subsequently denied by the Commission, the Commission en banc shall establish the time frame for providing the required information, after considering the arguments of the utility and Staff.

(d) The granting of a waiver pursuant to this Section shall not preclude any party from seeking the information which was the subject of the waiver, by data request.

[Source: Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-3-7. Notice of intent

(a) A Class A or B utility shall provide forty-five (45) days notice of its intent to file an application for a general rate change. The notification shall be in writing, filed

with the OCC Court Clerk and contain the following information:

- (1) That an application for a general rate change is planned.
- (2) The anticipated date of filing.
- (3) The proposed effective date of the general rate change.
- (4) Identification of the utility's classification as prescribed at 165:70-1-4.
- (5) Any major issues which the utility, at the time of filing the notice of intent, expects to raise in conjunction with its application package, including the expectation that a future test year is to be used.
- (6) The reason a supplemental package will not be included if one is not expected to be provided.

(b) A Class C or D utility shall provide thirty (30) days advance notice of its intent to file an application for a general rate change. The requirements for the notice of intent shall be the same as those described in (a) of this Section.

(c) All notices of intent shall be provided to the Director and the Attorney General contemporaneously with the filing of the notice.

(d) The information provided in the notice of intent shall not be considered in the determination of whether the filing is deficient.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-3-8. Amending an application

(a) A utility may not significantly amend a general rate change filing after it has been docketed by the OCC Court Clerk. An amendment may be accommodated by withdrawing the initial filing and substituting a new, amended filing in place of the original cause, which will establish a new filing date. An amended filing must conform to the requirements of 165:70-3-1 and will be subject to the sanctions in 165:70-5-2.

(b) For purposes of this Section, an amendment shall be deemed "significant" if it updates the test year. For Class A and B utilities, an amendment shall also be deemed "significant" if it requests more than a five percent (5%) change in the previously requested increase in revenue or, for Class C and D utilities, if it requests more than a five percent (5%) change in the previously requested revenue requirement, unless such changes are mandated by law.

(c) A utility may incorporate a significant change without refiling an entirely new case by agreeing to restart the 180-day period. The new period would begin when the amended application is filed.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94; Amended at 15 Ok Reg 3143, eff 7-15-98]

SUBCHAPTER 5. FILING REQUIREMENTS - CLASS A OR B UTILITIES

PART 1. GENERAL PROVISIONS

165:70-5-1. General filing instructions - Class A or B utilities

In preparing the information specified in 165:70-5-4 and following, to the extent required, the following instructions are applicable to Class A or B utilities:

- (1) All schedules shall be mathematically correct and properly cross-referenced.
- (2) All schedules for Class A and B utilities shall be designated as provided in 165:70-5-4 through 165:70-5-37.
- (3) Headings on all schedules shall clearly indicate the utility name, the nature and content of the schedule and the test period covered.

(4) All schedules shall be typed and/or clearly legible.

[Source: Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-2. Deficiency procedure

(a) If the Director finds the application package and/or supplemental package of a Class A or B utility are not in substantial compliance with the requirements of this Chapter, the Staff Response shall state the filing is a deficient filing. The deficiencies and the requirement(s) necessary to cure the deficiencies shall be stated in the Staff Response.

(b) Unless the utility and the Staff resolve a dispute regarding whether the filing is a deficient filing within seven (7) business days of the Staff Response, such dispute may be submitted to the Commission en banc for resolution.

[Source: Amended at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-3. Classification of utilities [REVOKED]

[Source: Revoked at 11 Ok Reg 3753, eff 7-11-94]

PART 3. COMPOSITION OF APPLICATION PACKAGE

165:70-5-4. Application package

(a) An application package shall be comprised of exhibits, schedules, testimony and evidence as set out in this Part. These exhibits, schedules, testimony and evidence shall be assembled under sections with index tabs for referencing convenience.

(b) All exhibits and schedules required in this Part 3, unless otherwise noted, shall contain the following:

(1) Columns in one of the following formats, unless otherwise negotiated with Staff before the application package is filed:

(A) Columns entitled:

- (i) Total Company Per Books
- (ii) Pro Forma Adjustment
- (iii) Total Company Pro Forma
- (iv) Separation/Allocation Factor
- (v) Oklahoma Jurisdiction

(B) Columns entitled:

- (i) Total Company Per books
- (ii) Separation Factor
- (iii) Oklahoma Jurisdiction
- (iv) Pro Forma Adjustment
- (v) Oklahoma Pro Forma Jurisdiction

(C) Columns entitled:

- (i) Total Company Per Books Oklahoma Jurisdiction
- (ii) Pro Forma Adjustment
- (iii) Total Company Pro Forma Oklahoma Jurisdiction

(D) Formats other than s

(2) References by schedule number and title.

(3) A reference to subsequent schedules which are the source of amounts presented.

(4) A reference to the applicable testimony for each adjustment presented.

(c) Any multijurisdictional company shall not be required to provide total company information on any schedule where the utility provides Oklahoma-jurisdictional

information.

(d) All sections shall reflect the form, order, and titles as follows:

- (1) Index of sections: This is to contain a listing of the application and all exhibits, schedules and testimony contained in the application package.
- (2) Section A - Application and testimony: This section shall contain a copy of the application and testimony of witnesses supporting all exhibits, schedules and other documents contained in the application package.
- (3) Section B - Rate base and revenue requirement: This section shall contain schedules which present the elements of rate base for the test year and revenue requirement.

(A) Schedule B-1 - Revenue Requirement: This schedule shall have lines reflecting pro forma rate base, rate of return, revenue requirement, pro forma operating income, return deficiency, the applicable income tax gross-up factor, other applicable gross-up factors and change in revenue. The lines shall contain a reference from the succeeding schedules which are the source of the amounts presented.

(B) Schedule B-2 - Oklahoma Jurisdictional Pro Forma Rate Base/Rate of Return: This schedule shall present the following applicable components of rate base as described in (i) through (iii) of this subparagraph. This schedule shall have columns as defined in 165:70-5-4(b)(1) which reflect the pro forma Oklahoma jurisdictional rate base. (The amounts on this schedule shall correspond to the amounts on succeeding schedules. This schedule shall also reflect the rate of return under present rates, the rate of return after pro forma adjustments and the rate of return after pro forma adjustments utilizing proposed rates.

(i) Plant in service.

- (I) Plant in service.
- (II) Construction work in progress.
- (III) Accumulated depreciation.
- (IV) Plant held for future use.
- (V) Net plant.

(ii) Working capital.

- (I) Cash working capital.
- (II) Prepayments.
- (III) Materials, supplies and fuel inventories.
- (IV) Gas in storage.
- (V) Other.

(iii) Additions and deductions.

- (I) Accumulated deferred income taxes.
- (II) Regulatory assets.
- (III) Regulatory liabilities.
- (IV) Other.

(C) Schedule B-3 - Adjustments to Rate Base: This schedule shall reflect the classifications of the components of rate base as presented in the preceding schedule (Schedule B-2, Adjustment Column) and contain columns as defined in 165:70-5-4 (b)(1). Each proposed adjustment will be numbered and a total of all adjustments included.

(D) Schedule B-4 - Explanation of Adjustments to Rate Base: This schedule shall detail each adjustment by number and provide a brief explanation of the adjustment, the affected classifications as used in the preceding schedules, the workpaper and testimony reference which sponsors or supports the adjustment. (When using format option B or option C in Section 165:70-5-4(b)(1) the explanation shall also present the total adjustment multiplied by the applicable jurisdictional factor and the resulting jurisdictional adjustment.)

(4) Section C - Plant investment: This section shall contain schedules which present the items and amounts of plant investment by the classification appropriate to the utility's industry and by primary account for the test year end.

(A) Schedule C-1 - Plant in Service: This schedule shall contain columns presenting the balances of the utility's plant investment accounts by the industry-applicable primary accounts or by sub-accounts, with functional account or subaccount subtotals, at the test year end, total adjustments and adjusted total amounts.

(B) Schedule C-2 - Adjustments to Plant in Service: This schedule shall reflect the plant investment account classifications as presented in the preceding schedule and contain a column for the adjustment number, a brief description of the adjustment, total of all plant in service adjustments and a reference to the testimony and schedules(s) which support the adjustment. The adjustment totals shall correspond to the applicable plant classifications on Schedule C-1.

(5) Section D - Accumulated provision for depreciation, amortization and depletion: This section shall contain schedules which present the balances in reserve accounts representing provisions for depreciation, amortization and depletion corresponding with the dates of plant investment data submitted under (d)(4) of this Section.

(A) Schedule D-1 - Accumulated Provision for Depreciation, Amortization and Depletion: This schedule shall provide the test year end reserve for plant in service listed on Schedule C-1, the total adjustments by plant in service classification and the total adjusted balances.

(B) Schedule D-2 - Adjustments to Accumulated Depreciation: This schedule shall reflect the plant in service classifications as presented in the preceding schedule and contain a column for the adjustment by number, a brief description of the adjustment, the total of all accumulated depreciation adjustments and a reference to the testimony and schedule(s) which support the adjustment. The total of all adjustments shall correspond to the applicable adjustments on Schedule D-1.

(6) Section E - Cash working capital: This section shall contain Schedule E-1 - Cash Working Capital Calculation. Schedule E-1 shall present the calculation of the allowance for cash working capital being requested.

(7) Section F - Capital and cost of money: This section shall contain Schedule F-1 - Components of Capital. This schedule shall show the components of the capital of the utility outstanding as of the end of the test year. Such schedule shall show the ratios of the various components to the total capital and the effective cost of each component under present and

proposed rates. The utility shall provide testimony and all calculations detailing the utility's determination of a fair return on stockholders' equity and support for the capital structure and debt cost claimed.

(8) Section G - Financial and general data: No schedules are required to be included in the application package under this section. However, supplemental data is requested in the supplemental package under Section G. See 165:70-5-27.

(9) Section H - Test year and pro forma income statements: This section shall contain schedules setting forth test year revenues, expenses and net operating income.

(A) Schedule H-1 - Test Year Actual and Pro Forma Operating Income Statement: This schedule shall contain industry-specific functional classifications of operating revenues and expenses consistent with the format option chosen in 165:70-5-4(b)(1) with additional columns for proposed revenue change and proposed Oklahoma jurisdictional results incorporating the revenue change.

(B) Schedule H-2 - Adjustments to Operating Income Statement: This schedule shall reflect the revenue and expense classifications as presented in the preceding schedule and contain a column for the adjustment number and a descriptive title of the adjustment along with the total of all adjustments.

(C) Schedule H-3 - Explanation of Adjustments to Operating Income Statement: This schedule shall detail each adjustment contained in Schedule H-2 by number, provide a brief explanation of the adjustment, the affected revenue and expense classifications as used in the preceding schedules and workpaper reference, and reference to the testimony which sponsors or supports the adjustment. (When using format option B or option C in 165:70-5-4(b)(1) the explanation shall also present the total adjustment multiplied by the applicable jurisdictional factor and the resulting jurisdictional adjustment.)

(10) Section I - Depreciation and amortization: This section shall contain a schedule showing depreciation rates by the applicable industry-specific classes of plant, depreciation accruals for the test year showing amount charged to operations, clearing accounts, construction, etc. When amortizations appear in the income statements, the source of such amortizations shall also be included in this section. The schedule contained in this section shall be Schedule I-1 - Depreciation Expense. This schedule shall contain the same plant in service classifications as presented in Schedule D-1 and by subaccount where appropriate to allow for depreciation calculation, by jurisdictional amount if applicable, any nondepreciable items if applicable, depreciable plant, rates by classes of plant and total depreciation expense.

(11) Section J - Taxes: This section shall contain the following information:

(A) Schedule J-1 - Calculation of Federal and State Income Taxes: This schedule shall provide the calculations of federal and state income taxes for the test year and the pro forma income based on taxable income determined in Schedule J-2. The calculation shall include itemization of adjustments to tax expense such as investment tax credit amortization and amortization of tax rate changes.

(B) Schedule J-2 - This schedule shall show the determination of state and federal taxable pro forma income itemizing permanent differences. Taxable income determined in this schedule shall be used for the tax expense calculation in Schedule J-1.

(C) Schedule J-3 - This schedule shall provide the current tax component for the cash working capital calculation in Section E, if a lead lag study is performed.

(12) Section K - Jurisdictional separations and allocations/cost of service: This section shall include a summary explanation of the methodologies used to allocate rate base, revenues, expenses and other allocable items among jurisdictions, areas of operation, utility departments, states or other recipients of such allocations.

(A) For telephone companies:

(i) Schedule K-1 - Basis of Allocations: This schedule shall reflect the basis for the jurisdictional separation of rate base, revenue and expense items from total company to the Oklahoma jurisdiction.

(ii) Schedule K-2 - Basis of Allocations: This document shall apply to utilities with allocations other than inter/intrastate separations, i.e. allocations from holding company to utility. For each level of allocations, this document shall include the basis for allocating items of rate base, revenue and expense to the Oklahoma jurisdiction.

(B) For all other regulated utilities:

(i) Schedule K-1 - Total Company Cost of Service: This schedule is required of utilities with Oklahoma jurisdictional operations and shall contain columns presenting the total company pro forma cost of service and the total Oklahoma jurisdictional pro forma cost of service.

(ii) Schedule K-2 - Basis of Allocations: This schedule shall reflect the basis for the jurisdictional separation of rate base, revenue and expense items from pro forma total company to pro forma Oklahoma jurisdiction.

(iii) Schedule K-3 - Basis of Allocations: This document shall apply to utilities with allocations other than inter/intrastate separations, i.e. allocations from holding company to utility. For each level of allocations, this document shall include the basis for allocating items of rate base, revenue and expense to the Oklahoma jurisdiction.

(13) Section L - Rate design cost of service information: This section shall include the summaries and methodologies of the cost of service studies to support rates and charges.

(A) For telephone companies: This section shall include summaries and methodologies of cost studies, as indicated below, which shall be valid for consideration in the process of establishing prices. For tariff services other than those listed below, the most recent available cost studies, if any, shall be provided to the Commission upon request. This section shall include cost studies for the following list of services in addition to any services for which the utility requests a change in rates and such studies shall be no older than thirty-six (36) months from the date of the Notice of Intent:

- (i) Local exchange service.
 - (ii) IntraLATA toll (DDD).
 - (iii) Switched access for local switching and transport.
 - (iv) Digital special access service.
 - (v) Service connection charges.
 - (vi) Directory assistance.
 - (vii) All other tariff services that generate one percent (1%) or more of total annual jurisdictional revenues.
- (B) For gas and electric utilities and RECs: Cost of service studies may utilize accounting and load research data other than the test year provided such studies were completed within twenty-four (24) months of the end of the test year.
- (C) For all utilities and telephone companies: Unless requested by the Director, miscellaneous charges (e.g., returned check charges, meter tampering charges, etc.) do not require cost of service studies pursuant to this Section.
- (14) Section M - Proof of revenue/rate design: This section shall provide supporting data to show that the proposed rates will produce the revenues that the utility states in previous sections by presenting a usage analysis or other analyses.
- (A) Schedule M-1 - Oklahoma Jurisdictional Pro Forma Revenue Summary (for gas and electric utilities and RECs): This schedule shall provide revenue information for the system for the test year in the following tabular form by rate class or service category:
 - (B) Schedule M-1 - Revenue Summary (**for telephone companies**):
 - (i) This schedule shall provide revenue information for the system for the test year in the following tabular form:
 - (ii) This schedule shall have lines for each category of revenue clearly labeled.
- (15) Section N - Proposed rate schedules: This section shall contain the proposed rate and/or charges schedules.
- (16) Section O - Notice: The utility shall provide the exact text of the notice to be published in compliance with the Commission's Rules of Practice OAC 165:5-7-51(a) and a copy of the notice to be provided to customers by mail in compliance with OAC 165:5-7-51(a).
- (17) Section P - Affiliate information: This section shall contain information relating to a utility's affiliates and/or subsidiaries to the extent that such affiliates and/or subsidiaries provide a service for which the utility seeks cost recovery in its rate application.
- (18) Section Q - Additional evidence (and Subsequent Sections): These subsequent sections shall be lettered sequentially from Q and referenced to data deemed pertinent to the application which may not be properly included under the preceding sections. Such additional evidence may be submitted at the option of the applicant or upon the request or order of the Commission.

PART 5. SUPPLEMENTAL PACKAGE

165:70-5-20. General requirements

(a) Class A or B utilities shall, concurrently with filing the application package, provide to the Public Utility Division a supplemental package comprised of workpapers, documents and other evidence which support the schedules in the application package. By prior arrangement between the Director and the utility, voluminous material or material which by its nature is impractical to produce may be provided at locations designated by the utility. Confidential information shall be provided at locations designated by the utility as specified in the Confidentiality Agreement. If the Attorney General has intervened and has requested such in writing, the supplemental package if required by this Chapter, shall be made available to the Attorney General after the execution of a Confidentiality Agreement.

(b) The workpapers, documents, and other evidence in the supplemental package shall be assembled under topical sections with index tabs for convenience of references and, unless otherwise noted, shall conform with the sections of the application package prescribed at 165:70-5-4.

(c) The following instructions are applicable to all workpapers, documents and other evidence required in this Part 5:

(1) Each workpaper shall be referenced by workpaper number and name, unless otherwise noted.

(2) If a schedule in the application package does not require supporting information or the supporting information is being provided in another workpaper, no workpaper is necessary for those schedules and those schedule numbers will be skipped in the supplemental package.

(3) The numbering for additional schedules and/or documents which are required but which do not specifically correspond to and/or complement a schedule in the application package shall begin with the first available number after the last one used in the application package, unless otherwise specified in this Part.

(4) Additional schedules which are provided by the utility shall conform to the format as used in this Part.

(5) All items shall be self-explanatory or additional information, cross-references or explanatory footnotes shall be presented on the workpapers.

(6) Careful attention shall be given that copied material is legible.

(d) All amounts which are from the utility's books shall have the applicable USOA general ledger account number references included. The account number references shall reflect the appropriate USOA designations. If an amount presented is the total of several accounts or subaccounts, a workpaper shall be provided which indicates all amounts with the appropriate USOA account or subaccount numbers included in the total.

(e) If the utility omits any statement, schedule or document required by this Part in the belief that it is not applicable, a written explanation for the omission shall be submitted in lieu of the required statement, schedule or document. If any information required cannot be furnished in the format required, the utility shall contact the Director or the Director's designee to discuss an alternate format for furnishing the information rather than responding only that the information is not available.

(f) Diskettes of any workpapers, documents or other evidence which was prepared on computer shall be made available to the Staff upon request. If the electronic data to be provided is not compatible with software used by the Staff, the utility and the Director or the Director's designee shall discuss an alternate method for furnishing the information.

(g) Workpapers shall be in the form, order and titles as prescribed in this Part 5. An index shall be prepared and contain a listing by number and name of all workpapers and other supporting documentation submitted in the supplemental package.

(h) A Class A or B utility shall not be required to provide or make available a supplemental package if the utility meets all of the following conditions:

- (1) The utility's application for a general rate change requests a rate increase of less than \$3 million annually; and
- (2) Either the utility serves less than 20,000 meters in Oklahoma or the original cost of the utility's facilities located in Oklahoma constitutes less than one percent (1%) of the total original cost of all of the utility's facilities located everywhere it provides utility service; and
- (3) The utility is subject to the jurisdiction, regulation, supervision and control of a regulatory agency existing under the laws of any state bordering upon Oklahoma; and
- (4) The utility certifies to the Commission that a regulatory commission of a bordering state has asserted jurisdiction, regulation, supervision and control over its utility operations.

(i) Class A or B utilities to which subsection (h) of this Section is applicable are still subject to responding to data requests following the filing of an application package.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-21. Section A

No workpapers or other supporting documentation is required in Section A of the supplemental package.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-22. Section B - Rate base

Section B - Rate Base of the supplemental package shall contain workpapers and documentation as follows:

- (1) W/P B-1 and W/P B-2: Separate workpaper support for Schedule B-1 and B-2 in the application package is not generally required, due to the summary nature of Schedules B-1 and B-2.
- (2) W/P B-3 - Adjustments to Rate Base: Workpapers which provide the underlying computation(s) of each adjustment presented on Schedule B-3 in the application package. The workpapers shall be referenced beginning with W/P B-3-1 for adjustment number 1 and proceeding through all adjustments, i.e., W/P B-3-2 for adjustment number 2, W/P B-3-3 for adjustment number 3, etc.

- (3) W/P B-4: Separate workpaper support labeled W/P B-4 is not generally required, because workpapers for Schedule B-4 in the application package are itemized into the components of Schedule B-3 or set out in W/P B-5 through W/P B-9.
- (4) W/P B-5 - Materials, Supplies, Fuel Inventories and Prepayments Balances: A schedule of the 13-month balances of materials, supplies, fuel inventories and prepayments for the test year by category.
- (5) W/P B-6 - Customer Deposits and Advances For Construction Balances: A schedule of the 13-month balances, for customer deposits and customer advances for construction.
- (A) W/P B-6-1 - Policy on Refunding Customer Deposits: A copy of the utility's policy on refunding of customer deposits.
- (B) W/P B-6-2 - Analysis of Customer Deposits: A schedule presenting the calculation of test year interest on customer deposits.
- (6) W/P B-7 - Tax Collections Payable and Deferred Credits Balances: A thirteen-month analysis, by account or sub-account, of the industry-applicable account(s) for tax collections payable and other deferred credits.
- (7) W/P B-8 - Miscellaneous Deferred Debits Balances: A schedule of the 13-month balances, by account or sub-account, of the industry-applicable account(s) for miscellaneous deferred debits. All miscellaneous deferred debits, the balance or amortization of which is the subject of a Commission order, shall be identified by cause and order number, and described.
- (8) W/P B-9 - Operating Reserves and Accrued Liabilities: A schedule of operating reserves and accrued liabilities for the thirteen (13) months of the test year, including, but not limited to, any reserve for self-insurance, the reserve for uncollectible accounts and the accrued balances for compensated absences.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-23. Section C - Plant in service

Section C - Plant in service of the supplemental package shall contain workpapers and documentation as follows:

- (1) W/P C-1 - Test Year End Plant in Service: A schedule which provides the balances by industry-applicable major account or functional account for the test year and the first preceding year.
- (A) W/P C-1-1 - Changes to Plant in Service: A schedule of major additions, reclassifications or adjustments to plant during the test year and the first preceding year, by functional classification and including a brief description of the item.
- (B) W/P C-1-2 - Reconciliation: A schedule which contains an annual reconciliation, with additions and retirements presented separately, for the plant in service balances from the accounts reflected in the test year in the last rate case to the amounts included by the utility in the current application.
- (2) W/P C-2 - Adjustments to Plant in Service: Workpapers which provide the underlying computation(s) of each adjustment presented on Schedule C-2 in the application package. The workpapers shall be referenced beginning with W/P C-2-1 for adjustment number 1 and proceeding through all adjustments, i.e., W/P C-2-2 for adjustment number 2, W/P C-2-3 for adjustment number 3, etc.
- (3) W/P C-3 - No workpaper is required for this label.

(4) W/P C-4 - Construction Work in Progress (CWIP) Analysis: An analysis of the test year end balances that indicates, by project, the amounts spent at test year end, the actual amounts for completed projects, and the actual or estimated completion date. Also provide the functional account classification and distribution for the CWIP project, if available. To the extent rate base treatment of CWIP is requested in the current application, the quantifiable impact, if any, the project is anticipated to have on operating income (excluding rate base and depreciation expense) shall also be provided. (For telephone companies, the workpapers for this section shall be entitled "Telephone Plant Under Construction (TPUC)".)

(A) W/P C-4-1 - Canceled/Delayed/Abandoned Projects: An analysis of all projects that have been canceled, delayed and/or abandoned since the end of the test year.

(B) W/P C-4-2 - Preliminary Survey and Investigation Charges: A description of the accounting procedures relating to preliminary survey and investigation charges and the procedures followed when such projects or surveys are abandoned or discontinued. If applicable, identify where these projects are included in rate base.

(C) W/P C-4-3 - Reimbursable Projects: A listing of all reimbursable projects, both billed and unbilled, at test year end.

(5) W/P C-5 - Sale of Utility Plant: A schedule identifying and listing any major sales of land or other utility plant during the test year and the first preceding year. Include the date of the transaction, a brief description, the amount of the sale, the net book value of the property, and a copy of the journal entry recording the sale.

(6) W/P C-6 - Utility Property Sold: A schedule identifying and listing any major utility property sold, or committed to sell, subsequent to test year end. Include, if available, the date of the transaction, a brief description, the amount of the sale, the net book value of the property, and a copy of the journal entry recording the sale.

(7) W/P C-7 - Property Devoted to Utility Use: A listing of all major purchases of property which was previously devoted to utility use since the last test year end. To the extent the information is available, include the name of the seller, the purchase price, the original cost of the property at the time the property was first devoted to public service, the accumulated depreciation recorded by the previous owner, a complete description of the facilities, any securities assumed, the transaction date, and the accounts charged.

(8) W/P C-8 - Calculation of Allowance for Funds Used During Construction (AFUDC) or Interest During Construction (IDC): This schedule shall include a complete statement of the methods and procedures followed and the calculations used in capitalizing the allowance for funds used during construction (or interest during construction). The information provided shall include a listing of the capitalization rates for each year since the last test year end.

(9) W/P C-9 - Reimbursements of Cost: A schedule of reimbursements and their amortization, if applicable, for any highway relocations and/or other construction cost reimbursements.

(10) W/P C-10 - Plant Leased to Others: A listing of all major plant leased to others. The listing shall include a description of each item, the lessee, the account in which the property is recorded and the revenues and expenses,

by lessee, for the test year.

(11) W/P C-11 - Plant Leased from Others: A listing of all major utility plant leased from others. The listing shall include a description of the property, the transaction date, the lease expense for the test year and the lease term. In addition, for capitalized leases, include the accounting entries which initially record the asset value and the related liability for the lease obligation and the amortization of the leasehold rights and obligations.

(12) W/P C-12 - Vehicle Policy: A statement of the utility's policy regarding personal use of utility vehicles, whether the vehicles are utility-owned or leased.

(13) W/P C-13 - Property Held for Future Use: A schedule of all property held for future use if included in rate base. The schedule shall include, for each item, a description, the amount and account in which the property is recorded, the date of acquisition/completion, the date the property is expected to be placed in service and the specific plans for use.

(14) W/P C-14 - Physical Inventory: A workpaper providing the dates, results and accounting entries for the latest physical inventory, if applicable.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-24. Section D - Accumulated provision for depreciation, amortization and depletion

Section D - Accumulated provision for depreciation, amortization and depletion of the supplemental package shall contain workpapers and documentation as follows:

(1) W/P D-1 - Reconciliation of Accumulated Depreciation Accounts: A schedule which contains an annual reconciliation of the accumulated depreciation balances from the accounts reflected in the test year in the last rate case to the amounts included by the utility in the current application. The reconciliation shall include each year's reserve accrual and any adjustments and retirements.

(2) W/P D-2 - Adjustments to Accumulated Depreciation: Workpapers which provide the underlying computation(s) of each adjustment presented on Schedule D-2 in the application package. The workpapers shall be referenced beginning with W/P D-2-1 for adjustment number 1 and proceeding through all adjustments, i.e., W/P D-2-2 for adjustment number 2, W/P D-2-3 for adjustment number 3, etc.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-25. Section E - Cash working capital

Section E—Cash working capital of the supplemental package shall contain all calculations of cash working capital, including the results derived from the methodology utilized by the utility. The reasonableness and applicability of the utility's cash working capital calculation methodology must be explained and supported.

[Source: Amended at 15 Ok Reg 3143, eff 7-15-98]

165:70-5-26. Section F - Capital and cost of money

Section F - Capital and cost of money of the supplemental package shall contain workpapers and documentation as follows (to the extent such information is contained in the application package, these workpapers shall only contain a cross-

reference to such information):

(1) For investor-owned utilities (including Class A telephone companies):

(A) W/P F-1 - Weighted Average Cost of Capital: A schedule providing the utility's claimed overall rate of return as a weighted average of each class of capital based upon the utility's capitalization at the end of the test year along with any pro forma adjustments. The cost of debt capital, preferred stock capital, the claimed return on stockholders' equity, and the component amounts of each class of capital shall be presented.

(B) W/P F-2 - Weighted Average Cost of Preferred Stock: A schedule providing the weighted average cost of preferred stock capital. List each stock issue for each class and series of preferred stock outstanding according to the balance sheet as of the end of the test year. Preferred stock issued since the end of the test year, but prior to filing, shall be included in the schedule and footnoted. The cost of money calculated will be the dividend rate divided by the net proceeds as a percent of par value or stated value for issues not subject to mandatory redemptions and issues with variable dividend rates. For fixed-rate preferred stock issues with mandatory redemption, the cost of money shall reflect the yield to maturity method (YTM) for each issue. The YTM shall be calculated based on the issuance date, redemption date, sinking fund requirements, dividend rate, the par value or stated value, and net proceeds at issuance.

(i) W/P F-2-1 - Sinking Funds: A schedule for each issue of preferred stock requiring mandatory redemptions specifying the date and amount of each redemption.

(ii) W/P F-2-2 - Accounting Method: A workpaper providing a description of the accounting method used to record issuance expenses, premiums or discounts at issuance, gains or losses on stock redemption and annual amortization of such amounts for ratemaking purposes as well as financial reporting purposes.

(C) W/P F-3 - Weighted Average Cost of Debt: A schedule of the weighted average cost of long-term debt capital. List each debt issue for each class and series of long-term debt outstanding as of the end of the test year. Debt issued since the end of the test year, but prior to filing, shall be included in the schedule and footnoted. Capital lease obligations shall only be included if the recovery of lease payments is not being requested through operating expense. The balance of any capital leases removed from the debt structure shall be footnoted. For variable-rate debt issues, the cost of debt is the interest rate divided by net proceeds as a percent of par value. For capital lease obligations, the cost of debt shall be the effective annual rate as determined in accordance with generally accepted accounting principles. This schedule shall not include notes payable to affiliated entities, unless claimed in the utility's revenue requirement.

(i) W/P F-3-1 - Sinking Funds: A schedule for each debt issue requiring mandatory redemptions specifying the date and amount of each redemption.

(ii) W/P F-3-2 - Gains or Losses on Reacquired Debt: A listing of gains or losses on reacquired debt that are not associated with a particular refunding issue, with an appropriate adjustment to the unamortized balance of the gain or loss.

(D) W/P F-4 - Notes Payable: A schedule providing information pertaining to the utility's notes payable, even if notes payable are not included in the capital structure provided in W/P F-1. The schedule shall contain a listing of notes outstanding at the end of the test year, including each note's maturity date, face amount, and interest rate. The calculation of the cost of notes payable shall reflect the yield to maturity (YTM) for all fixed-rate issues. The YTM shall be calculated based on the issuance date, maturity date, interest rate, principal amount, and net proceeds at issuance. For variable-rate notes payable, the cost of the note shall be the effective annual interest rate divided by net proceeds as a percent of the principal amount of the issue. This schedule shall not include notes payable to affiliated entities, unless claimed in the utility's revenue requirement.

(i) W/P F-4-1 - Weighted Average Cost of Notes

Outstanding: A workpaper providing the calculation of the weighted average cost of notes outstanding at test year end.

(ii) W/P F-4-2 - Notes Payable Outstanding by Quarter: A schedule of the amount of notes payable outstanding at the end of each quarter for the past two years.

(E) W/P F-5 - Security Issuance Restrictions: A schedule providing a description and calculation of the most restrictive financial tests as of the end of the test year pertaining to the issuance of securities or the maintenance of banking lines of credit. For each class of securities (first mortgage bonds, unsecured debentures, commercial paper, preferred stock, etc.) or line of credit, provide a description of these financial tests (interest coverage, fixed charge coverage, maintenance of shareholders' equity, etc.) and copies of the relevant language contained in the governing documents (mortgage agreements, articles of incorporation, credit agreements, etc.). For each financial test, provide a calculation of the relevant financial ratio as of the end of the test year and the most recent fiscal year, including all supporting data.

(F) W/P F-6 - Rating Agency Reports: A copy of all credit rating analyses or investment reports on the utility and its parent company, if applicable, published during the most recent twelve-month period and in the possession of the utility. If unable to provide a copy due to copyright law restrictions, provide the date and source of the report. This shall include, but is not limited to, reports by Moody's, Standard & Poor's, Fitch Investor's Service, and Duff and Phelps.

(G) W/P F-7 - Quarterly Dividends: A schedule of quarterly dividends paid during the test year, and the first preceding year, by per share amount, total amount and date. Any borrowings which were made to maintain the level or growth of dividends shall also be noted.

(2) For rural electric cooperatives and Class B telephone companies:

(A) W/P F-1 - Times Interest Earned Ratio (TIER): A schedule which provides the calculation of the actual test year TIER on a net and an operating basis. Separate pro forma net and operating TIERS shall be calculated based upon inclusion of the requested rate change.

(B) W/P F-1-1 - Supporting Documentation: Workpapers which support the basis and provide an explanation for the requested pro forma TIER levels.

(C) W/P F-2 - Capital Credit Allocation from Generation and Transmission Cooperatives: A schedule which identifies the level of capital credit allocation received from generation and transmission cooperative(s) of which the utility is a member for the test year and the first preceding year.

(D) W/P F-3 - Capital Credit Rotation Requirements: A schedule which identifies the capital credit rotation requirements for the test year, for the first preceding year and the projections for the next subsequent year.

(E) W/P F-4 - Capital Credit Rotation Policy: A statement of the current capital credit rotation policy.

(F) W/P F-5 - Debt Service Coverage (DSC) Ratio: A schedule which provides the calculation of the actual test year DSC on a net and an operating basis. Separate pro forma net and operating DSCs shall be calculated based upon inclusion of the requested rate increase.

(G) W/P F-6 - DSC Supporting Documentation: Workpapers which support the basis and provide an explanation for the requested pro forma DSC ratios.

(H) W/P F-7 - Long-term Debt: A schedule which provides the balance at test year end for each loan. Include the lender, the dates of origination and maturity and the interest rate for each loan.

(i) W/P F-7-1 - Principal and Interest Payments: A schedule, by lender and by loan, which provides all principal and interest payments made during the test year. Include copies of the quarterly statements from each lender for all loans.

(ii) W/P F-7-2 - Long-term Debt Principal Payment Requirements: A schedule which provides the long-term debt principal payments made during the test year, and the requirements for the next subsequent year, for each loan in effect during the test year.

(I) W/P F-8 - Pending Loan Applications: A schedule of the details of any loan application pending before the REA or any other lending organization.

(J) W/P F-9 - Drawdowns During Test Year: A schedule of loan drawdowns occurring during the test year. Each loan advance shall be identified by the date and amount of each draw, the interest rate associated with each draw and the lender.

(K) W/P F-10 - Drawdowns Projection: A schedule showing the estimated drawdowns in the current period since the test year end and for the next year.

165:70-5-27. Section G - Financial and general data

Section G - Financial and general data of the supplemental package shall contain information applicable to the test year as follows:

- (1) W/P G-1 - Organizational Chart: A copy of the utility's organizational chart.
- (2) W/P G-2 - Chart of Accounts: A copy of the utility's chart of accounts.
- (3) W/P G-3 - General Ledger: A copy of, or access to, the general ledger and sub-ledgers.
- (4) W/P G-4 - Annual Report: Two copies of the annual stockholders' reports or audited financial statements for the most recent year and the first preceding year.
- (5) W/P G-5 - Independent Auditor's Adjustments: Copies of the audit adjustments made as a result of the audit completed by the independent auditor for the most recent year end and the first preceding year.
- (6) W/P G-6 - Comparative Trial Balances: A schedule of, or access to, comparative trial balances detailed by account for the test year and the first preceding year.
- (7) W/P G-7 - Monthly Financial Reports: Copies of the monthly financial reports for the 14-month period beginning one month prior to the test year and ending one month after the test year end.
- (8) W/P G-8 - Regulatory Financial Report: Copies of the applicable federal and/or state regulatory agency's required annual report for the most recent year and the first preceding year.
- (9) W/P G-9 - Audit Report: A copy of the latest applicable federal regulatory agency's audit report.
- (10) W/P G-10 - Tax Return: A copy of the utility's latest federal tax return.
- (11) W/P G-11 - IRS Revenue Agent Reports: Copies of all Internal Revenue Service Revenue Agent Reports for the most recent year.
- (12) W/P G-12 - SEC 10-K Report: Two copies of the Form 10-K reports for the most recent year and the first preceding year and the Form 10-Q reports for the test year.
- (13) W/P G-13 - Minutes: The approved minutes of the meetings of the Board of Directors since the last rate review through the latest meeting.
- (14) W/P G-14 - Internal Auditors' Reports: A list of topics addressed in the internal auditors' reports for the test year and the first preceding year.
- (15) W/P G-15 - Monthly Summary of Customers: A summary of the number of customers, by month, for the 14-month period beginning one month prior to the test year and ending one month after the test year end.
- (16) W/P G-16 - Recurring Journal Entries: A listing of recurring journal entries shall include the entry number and a description. The list shall specifically include the amortization of deferred debits and deferred credits (including regulatory assets and regulatory liabilities).
- (17) W/P G-17 - Overhead Capitalization: A schedule detailing the overheads capitalized for the test period and the first preceding year.
- (18) W/P G-18 - Clearing Accounts: Workpapers which provide the following:
 - (A) A narrative which explains the utility's clearing account utilization policy. The explanation shall set forth the basis used for clearing account distribution to capital and expense accounts.

(B) A schedule of monthly activity that includes the beginning balances, the charges to and distributions from the accounts and the ending balances for the test year and the first preceding year.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-28. Section H - Test year actual and pro forma operating income statements

To the extent not provided elsewhere in the supplemental package, the workpapers and other supporting documentation submitted in Section H - Test year actual and pro forma operating income statements shall, unless otherwise specified, be entitled in a manner which will reasonably reflect their content and shall be numbered in accordance with 165:70-5-20.

(1) W/P H-1 - Summary of Operating Revenues: A schedule of monthly revenues and sales volumes for the test year. This schedule shall depict all types of revenue and sales volume by rate code or service category.

(A) W/P H-1-1 - Monthly Terms & Conditions Revenues: A detailed schedule of terms and conditions revenues by industry-specific type of revenue and other utility revenue by month for the test year.

(B) W/P H-1-2 - Free Service Summary: A list of any free service recipients including volume and type of consumer. (If customers were billed, provide the rate code or service category.)

(2) W/P H-2 - Adjustments to Operating Income Statement: Workpapers which provide the underlying computation(s) of each adjustment presented on Schedule H-2 in the application package. The workpapers shall be referenced beginning with W/P H-2-1 for adjustment 1 and proceeding through all adjustments, i.e., W/P H-2-2 for adjustment 2, W/P H-2-3 for adjustment 3, etc.

(3) W/P H-3 - Summary of Operating Expenses: A schedule of expenses detailed, by account number and title and by month, for the twelve (12) months of the test year and the corresponding annual totals for the two (2) preceding years. The schedule shall depict the amounts expensed during each month, not year-to-date balances. Also, provide the percentage change between the years.

(4) W/P H-4 - Payroll Expenses: A schedule, by pay period or month, which details the number of full-time employees, the regular pay, the overtime pay and regular hours and paid overtime hours.

(A) W/P H-4-1 - Payroll Description: A narrative on the payroll system, identifying the pay periods and related paydays. Also, describe the payroll accounting system and identify how labor is accrued at the end of the period.

(B) W/P H-4-2 - General Salary Adjustments: A schedule which identifies the annualized effects of salary adjustments granted during the test year. The schedule shall include when pay raises were granted during the test year, the effective date(s), and the level of the raises.

(C) W/P H-4-3 - Part-time Employees: A schedule detailing the number of part-time employees and the amount paid per month during the test year, to the extent not included and specifically identified in W/P H-4, and part-time employee charges for the two (2) preceding years.

(D) W/P H-4-4 - Payroll Distribution: A schedule which provides the test year payroll distribution to each major expense category, to clearing accounts and to capital accounts. Also, explain the labor cost capitalization rate and provide the study or other documentation on which the distribution is based, if applicable.

(E) W/P H-4-5 - Work Force Level Change: An analysis which identifies and explains any change in the work force level during, or after, the test year. A change in the work force constitutes any variance of five percent (5%) of the work force or ten (10) employees, whichever is greater. If any employee reduction program has been implemented or is planned, provide a complete description of the program, including the relevant dates and the dollar impact.

(F) W/P H-4-6 - Wage and Salary Surveys: Copies of all wage and salary surveys considered by the utility during the test year and the two (2) preceding years.

(5) W/P H-5 - Payroll Taxes: Copies of all employment tax returns for the test year which include costs assigned to the Oklahoma jurisdiction. Show the distribution of the payroll taxes by major expense category, clearing accounts, and capital accounts.

(6) W/P H-6 - Accrued Compensated Absences: A schedule which provides the balances of accrued compensated absences for the thirteen (13) months of the test year.

(7) W/P H-7 - Employee Benefits: A schedule, by type, of the amount of all employee benefits for the test year. Identify the information for all active employees and retirees.

(8) W/P H-8 - Monthly Pension Cost Payable: A schedule of the monthly ending balances of pension cost payable for the test year and the first preceding year.

(A) W/P H-8-1 - Pension Cost Accrual Procedure: An explanation of the utility's procedure for accruing and paying pension costs to the plan administrator.

(B) W/P H-8-2 - Actuarial Reports: A copy of the actuarial report which shows the pension funding requirement and accrual accounting for the test year.

(9) W/P H-9 - Directors' Fees & Executive Salaries: A schedule of the fees and salaries paid to directors and the top twenty (20) executives during the test year. Include all benefits including, but not limited to, dues and/or memberships paid, automobiles, insurance premiums and stock options.

(A) W/P H-9-1 - Directors/Executives Expense Vouchers: A schedule of expense vouchers for the directors and the top twenty (20) executives for the test year.

(B) W/P H-9-2 - Executive Salary Surveys: Copies of all executive salary surveys considered by the utility during the test year and the two (2) preceding years, if they are in addition to those provided at W/P H-4-6.

(10) W/P H-10 - Summary of Insurance Expenses: A summary of insurance expenses by type (liability, property, workers compensation, etc.). Provide an analysis, by month, of any prepaid insurance balances which details the beginning balances, payments to vendors, expense accruals, adjustments and the ending balance by month for the test year.

(A) W/P H-10-1 - Insurance Policies: A schedule of major insurance policies in effect during the test year reflecting amount paid, level of coverage and duration.

(B) W/P H-10-2 - Self-Insurance Expense: An analysis of any self-insurance program. The analysis shall provide a monthly summary of self-insurance which shows the beginning balance, debits, credits and the ending balance for the test year and the two (2) preceding years.

(11) W/P H-11 - Legal Contract Settlements: A statement of total amounts of legal settlements for the test year and two (2) preceding years.

(12) W/P H-12 - Outside Services: A schedule of the major expenses for outside services for the test year. The schedule shall include payees, amounts, services performed, and accounts charged. Also provide the annual amounts for the first preceding year.

(13) W/P H-13 - Regulatory Expenses: A schedule of Oklahoma jurisdictional regulatory expenses for the test year and the first preceding year. The regulatory expenses shall identify legal and consulting fees separately and include payee, amounts, accounts charged and the cause number. Also, estimate the additional cost expected for the present cause, excluding labor and labor-related costs, identifying the amounts for legal, consulting and any itemized additional costs.

(14) W/P H-14 - Legislative Advocacy: A schedule which provides a summarization of all payments to individuals registered to lobby in Oklahoma on behalf of the utility (including employees of the utility) during the test year. For each lobbyist, include the following information: identification, account charged, total payments during the test year and the amounts included in the cost of service. Copies of expense reports for the test year shall be provided for all individuals reported in the summarization. This schedule is required only to the extent that the utility has included these expenses in its rate application.

(15) W/P H-15 - Administrative Expenses: Provide supporting documentation showing the transfer of administrative or general office expenses to nonutility functions.

(16) W/P H-16 - Summary of Dues, Donations, Contributions and Memberships: A summary by account of dues and membership fees paid to civic and social organizations and donations and contributions during the test year. This schedule is required only to the extent that the utility has included these expenses in its rate application.

(17) W/P H-17 - Advertising: A schedule of advertising expenses by the account charged. Also provide scripts, proofs, etc. upon request. This schedule is required only to the extent that the utility has included these expenses in its rate application.

(18) W/P H-18 - Taxes Other Than Income Tax: A summary schedule of taxes by type and account numbers.

(19) W/P H-19 - Ad valorem Taxes Paid: A schedule showing the total ad valorem taxes paid and/or owed which relate to the test year and the first preceding year. Provide the balances at the beginning of each of these years for plant in service, material and supplies and, if applicable, gas in storage. Identify any ad valorem taxes which were capitalized in either of these years and identify the related property. Also, identify any payments or refunds applicable to a period other than the test year which were reflected

in the accounts during the test year.

(20) W/P H-20 - Analysis of Bad Debt Expenses: A schedule detailing bad debt write-offs, net of collections, for the test year and the two (2) preceding years, for Oklahoma jurisdiction, if applicable. Also show the applicable gross revenues and provide a copy of the bad debt charge-off policy.

(21) W/P H-21 - Informational/Instructional/Miscellaneous/ Sales Expense: A schedule detailing the expenses charged, labor shown separately, for the following accounts, if applicable or not otherwise provided:

- (A) Informational/Instructional
- (B) Sales expense
- (C) Miscellaneous customer service

(22) W/P H-22 - Large Invoices Excluding Cost of Gas, Fuel and Purchased Power and Taxes: Electric, gas and Class A telephone utilities shall provide a listing of all invoices over \$250,000 for the test year. Rural electric cooperatives and Class B telephone companies shall provide a listing of all invoices over \$75,000 for the test year.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-29. Section I - Depreciation and amortization

Section I - Depreciation and Amortization of the supplemental package shall include the schedules reflecting depreciation rates by classes of plant and depreciation accruals for the test year showing amounts charged to operations, clearing accounts, construction, etc. When items of amortization appear in the income statements, information showing the basis of such items shall also be included in this section. Telephone utilities participating in the three way meeting process are exempt from paragraphs (1), (2) and (4) of this Section.

(1) W/P I-1 - Detail Schedule of Depreciation: A schedule of depreciable items formatted in accordance with Appendix A to this Chapter.

(2) The items set forth in paragraph (1) of this section shall be subtalled by functional group or, in the case of a multi-company utility, by functional group for each company. If available, the account codes, account descriptions, and test year end plant balances shall conform to those provided in the schedules required in Section C of the application package. The test year end balances shall conform to those provided in the schedules required in Section D of the application package. The current and utility-proposed depreciation rates shall conform to those provided in Section I of the application package.

(3) W/P I-2 - General Depreciation Information: A workpaper which provides the following information:

- (A) The date of the last depreciation study performed.
- (B) The Cause and Order numbers approving the depreciation rates currently in effect.
- (C) The procedure and technique used to develop the current depreciation rates.
- (D) The procedure and technique used to develop the proposed depreciation rates.

(4) W/P I-3 - Study of Proposed Depreciation Rates: A copy of the study performed to support the utility-proposed depreciation rates. If no such study was performed, provide a discussion of how the utility plans to support changes in depreciation rates and provide justification on an

account by account basis as necessary.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-30. Section J - Income taxes

Section J - Income Taxes of the supplemental package shall contain workpapers as follows:

- (1) W/P J-1 - Test Year Calculation of Taxes: An analysis showing the separate calculation of current income tax expense and deferred income tax expense.
- (2) W/P J-2 - Reconciliation of Taxes: A reconciliation of per book income and taxable income for the test year.
- (3) W/P J-3 - Deferred Income Taxes: A reconciliation of deferred income taxes recognized for ratemaking purposes and used as a rate base deduction with the recorded deferred income taxes. Identify all differences.
- (4) W/P J-4 - Deferred Income Taxes-Timing Differences Other Than Depreciation: A schedule of deferred income taxes showing the timing differences applicable to differences other than those related to depreciation. Also include a calculation of overstated or understated deferred income taxes related to the above which resulted from changes in income tax rates and the amounts which have been amortized and included in the cost of service or which resulted in refunds to the utility's ratepayers.
- (5) W/P J-5 - Deferred Income Taxes-Depreciation: An analysis of deferred income tax liabilities related to depreciation to the extent they apply as follows:

Plus Net depreciable book basis
Minus Equity allowance for funds used during construction
Minus Investment tax credit basis adjustment
Minus Other identified permanent differences
Equals Net book basis less major permanent differences
Minus Net depreciable tax basis
Equals Difference
Times Current tax rate
Equals Deferred tax liability
Minus Depreciation related to deferred income taxes per books
Equals Difference from recorded deferred income tax liability

- (6) W/P J-6 - Deferred Income Taxes Unrecorded: A list, with explanations, for the unrecorded deferred income tax liabilities identified in W/P J-5 in (5) of this Section. Identify the amount of the unrecorded deferred income taxes that shall be collected from the ratepayers, and provide all documentation and explanations to support that position. Identify the amount of any adjustment that shall be made to deferred income taxes for unrecorded amounts.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-31. Section K - Jurisdictional separations and allocations/Cost of service

Section K - Jurisdictional Separations and Allocations/Cost of Service of the supplemental package shall contain data and workpapers to support a utility's separations and allocation factors.

(1) For gas and electric utilities and rural electric cooperatives:

(A) W/P K-1 - Rate of Return: A summary of each jurisdictional class data which shall include, but not necessarily be limited to, the following information by account code:

- (i) Revenues from sales of electricity or natural gas.
- (ii) Other revenues.
- (iii) Fuel, purchased power or natural gas revenues.
- (iv) Operating & maintenance expenses.
- (v) Depreciation and amortization expenses.
- (vi) Taxes other than income taxes.
- (vii) Provision for income taxes.
- (viii) Gross plant.
- (ix) Reserve for depreciation.
- (x) Construction work in progress (CWIP).
- (xi) Plant held for future use.
- (xii) Materials, supplies and fuel inventories.
- (xiii) Gas in storage.
- (xiv) Cash working capital.
- (xv) Prepayments.
- (xvi) Customer deposits.
- (xvii) Accumulated deferred income taxes (if applicable).
- (xviii) Customer advances.
- (xix) Property insurance (if applicable).
- (xx) Other items as needed.

(B) W/P K-2 - Allocation of Revenue Deductions to Jurisdictions: A schedule which provides all revenue deductions and shall include all deductions from income used to develop return. Additionally, all allocations shall be labeled in such a manner as to identify the basis for each cost allocation, and all allocators shall be thoroughly defined. The schedule shall provide the following as allocated to the jurisdictions:

- (i) Operating and maintenance expense by the applicable regulatory primary account.
- (ii) Depreciation expenses, consistent with the plant presentation contained in 165:70-5-23 and 165:70-5-24.
- (iii) Any other revenue deductions.

(C) W/P K-3 - Allocation of Rate Base to Jurisdictions: A schedule which contains the same information as required in subparagraph (B) of this paragraph as that information pertains to rate base. The schedule shall provide the following as allocated to the jurisdictions:

- (i) Gross plant or net plant by the applicable regulatory primary account.
- (ii) If gross plant was provided in (i) of this subparagraph, accumulated depreciation and amortization by:
 - (I) Industry-specific major function; and,
 - (II) If available, the applicable regulatory primary account.

- (iii) CWP.
- (iv) Materials, supplies and fuel inventories.
- (v) Gas in storage.
- (vi) Cash working capital.
- (vii) Any other rate base items.
- (viii) Prepayments.

(D) W/P K-4 - Classification of Expenses: If the utility classifies expenses (e.g., energy, demand, customer, etc.), it must provide a schedule or other designation by account which provides the separation of expenses by classification. Identify revenue-related and directly-assigned expenses as such. Care shall be taken to ensure that the assignment of all expenses from accounts to classification is identified. This workpaper is not applicable to cost allocations covered by paragraph (3) of this Section.

(E) W/P K-5 - Classification of Rate Base: If the utility classifies rate base (e.g., energy, demand, customer, etc.), it must provide a schedule or other designation by account which provides the separation of expenses by classification. Identify revenue-related and directly-assigned items as such. Care shall be taken to ensure that the assignment of all expenses from accounts to classification is identified. This workpaper is not applicable to cost allocations covered by paragraph (3) of this Section.

(F) W/P K-6 - Allocation Factors: Workpapers which provide the following data:

(i) Allocation factors and associated data which shall include the following information for every factor used to assign costs to each jurisdiction:

(I) The designation of the allocation factor used in Schedules K-1 through K-5 required in (A) through (E) of this paragraph.

(II) A description of the allocation factor if a code designation is used.

(III) The relative (decimal representation of percentages) amounts constituting the allocation factors.

(IV) The absolute amounts constituting the factors. That is, the Kw, kWh, Loss Of Load Probability, Mcfs, MMBtu, contract demand MMBtu, number of customers, or dollars, etc., that are used as the numerators and divisors in calculating the allocation factors in (III) of this unit.

(ii) Workpapers and explanations which support the calculation of each allocation factor listed in (i) of this subparagraph. To the extent that key operating statistics provided in Section M are employed in directly developing the allocation factors, workpapers shall be referenced directly to that data.

(iii) A description of the direct assignment(s) of costs which provide the justification for such assignment.

(G) W/P K-7 - Demand and Energy Factors: A listing which provides the demand and energy loss factors used in the cost of

service study, by jurisdiction and:

(i) The information required in this workpaper shall be detailed by voltage level for electric companies.

(ii) The information required in this workpaper shall be detailed by distribution or transmission service for gas companies.

(H) W/P K-8 - Support for Production Allocation Methodology or Demand Allocation Factors: A workpaper which provides the rationale for the selection of each allocation methodology used in the jurisdictional cost of service or a cross-reference to where such information is otherwise provided. The rationale may consist of a cost justification, a special study, and/or a narrative explanation with supporting workpapers.

(I) W/P K-9 - Summary of Changes in Allocation Factors: A schedule which details the allocation factors which differ from those filed by the utility in the utility's last general rate review.

(J) W/P K-10 - Payroll Expense Distribution: A schedule of the test year adjusted payroll expense by industry-specific functional group and by applicable regulatory primary account, if such information was relied upon by the utility for allocations.

(K) W/P K-11 - Financial Data for Noninvestor-owned Utilities: A schedule which provides total operating margins, times interest earned ratios (TIER) and debt service coverage (DSC) by rate jurisdiction.

(2) For telephone companies: Telephone companies should utilize FCC jurisdictional cost separation procedures to develop and present data requested by subparagraphs A and B below:

(A) W/P K-1 - Separation of Expense and Rate Base - Workpapers which provide expense and rate base columns for total Oklahoma operations, adjustments required to calculate the amount subject to Oklahoma jurisdictional separations, intrastate factors and intrastate jurisdictional amounts. The columnar data should be presented in at least major account level of detail. The test period total of jurisdictional amounts should correspond to amounts presented in Schedules B and H of Section 165:70-5-4.

(B) W/P K-2 - Allocation of Expense and Rate Base: A schedule for each set of factors described in Section 165:70-5-4 Schedule K-2, including a brief description (name or identifier) of the factor, the factor, categories to which it is applied, total amount by category being allocated, and the amount allocated to Oklahoma. If necessary, additional columns should be added to indicate intrastate Oklahoma amounts.

(3) Holding company cost allocations to OCC jurisdictional utilities or allocations from OCC jurisdictional utilities to their nonjurisdictional affiliates: To the extent not otherwise provided, the utility shall provide all cost studies, workpapers, internal policies, procedures and details depicting the amounts allocated, allocation factors, and a description of each allocation methodology.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-32. Section L - Rate design cost of service

Section L - Rate Design Cost of Service of the supplemental package shall contain cost of service studies, workpapers and data necessary to support the studies used to support proposed rates or rate structures.

(1) For gas and electric utilities and rural electric cooperatives:

(A) W/P L-1-Rate of Return: A summary of data for each Oklahoma jurisdictional class which shall include, but not necessarily be limited to, the following information:

- (i) Revenues from sales of electricity or natural gas.
- (ii) Other revenues.
- (iii) Fuel, purchased power or natural gas revenues.
- (iv) Operating & maintenance expenses.
- (v) Depreciation and amortization expenses.
- (vi) Taxes other than income taxes.
- (vii) Provision for income taxes.
- (viii) Gross plant.
- (ix) Reserve for depreciation.
- (x) Construction work in progress (CWIP).
- (xi) Plant held for future use.
- (xii) Materials, supplies and fuel inventories.
- (xiii) Gas in storage.
- (xiv) Cash working capital.
- (xv) Prepayments.
- (xvi) Customer deposits.
- (xvii) Accumulated deferred income taxes (if applicable).
- (xviii) Customer advances.
- (xix) Property insurance (if applicable).
- (xx) Other items as needed.
- (xxi) W/P L-1-1 - Existing Rate Schedules/Existing Rate Classes: Summaries of the rate of return and relative rate of return under existing rate schedules using existing rate classes.
- (xxii) W/P L-1-2 - Proposed Rate Schedules/Existing Rate Classes: Summaries of the rate of return and relative rate of return utilizing the proposed rate schedules and existing rate classes.

(B) W/P L-2 - Allocation of Revenue Deductions to Rate Classes: A schedule which shall provide all revenue deductions and includes all deductions from income used to develop rate of return. Additionally, all allocations shall be labeled in such a manner as to identify the basis for each cost allocation, and all allocators shall be thoroughly defined. The schedule shall provide the following, by allocation to the rate classes:

- (i) Operating and maintenance expense identified by the applicable regulatory primary account.
- (ii) Depreciation expenses, consistent with the plant presentation at Sections C and D.
- (iii) Any other revenue deductions.

(C) W/P L-3 - Allocation of Rate Base to Rate Classes: A schedule which shall provide all rate base allocations. The schedule shall provide the following, by allocation to the rate classes:

- (i) Gross plant or net plant identified by the applicable regulatory primary account.
- (ii) If gross plant was provided in (i) of this subparagraph, accumulated depreciation and amortization shall be provided by industry-specific major function, if applicable, and, if available, by the applicable regulatory primary account.
- (iii) CWIP by the industry-specific major function, if applicable.
- (iv) Materials, supplies and fuel inventories identified utilizing the industry-specific major function type of material and supplies, if applicable.
- (v) Gas in storage.
- (vi) Cash working capital identified by the industry-specific major function, if applicable.
- (vii) Any other rate base items.
- (viii) Prepayments identified by the industry-specific major function, if applicable.

(D) W/P L-4 - Classification of Expenses: If the utility utilizes a specific rate design (e.g., demand, energy, customer, etc.) requiring classification of costs into that particular category, the utility shall provide a schedule which illustrates separation of expenses into such categories. Care shall be taken to ensure that the assignment of all expenses from accounts to classification is identified.

(E) W/P L-5 - Classification of Rate Base: If the utility utilizes a specific rate design (e.g., demand, energy, customer, etc.) requiring classification of costs into that particular category, the utility shall provide a schedule which illustrates separation of rate base into such categories. Care shall be taken to ensure that the assignment of all rate base from accounts to classification is identified.

(F) W/P L-6 - Allocation Factors: Workpapers which provide the following data:

- (i) Allocation factors and associated data which shall include the following information for every factor used to assign costs to each customer class:
 - (I) The designation of the allocation factor used in Schedules L-1 through L-5 required in (A) through (E) of this paragraph.
 - (II) A description of the allocation factor if a code designation is used.
 - (III) The relative (decimal representation of percentages) amounts constituting the allocation factors.
 - (IV) The absolute amounts constituting the factors. That is, the kW, kwh, Loss of load probability, Mcfs, MMBtu, contract demand MMBtu, number of customers, or dollars, etc., that are used as the numerators and divisors in calculating the allocation factors in (III) of this unit.
- (ii) Workpapers and explanations which support the calculation of each allocation factor listed in (i) of this

subparagraph. To the extent that key operating statistics provided in Section M are employed in directly developing the allocation factors, workpapers shall be referenced directly to that data.

(iii) A description of the direct assignment(s) of costs which provide the justification for such assignment.

(G) W/P L-7 - Demand and Energy Factors: A listing which provides the demand and energy loss factors used in the cost of service study, by Oklahoma jurisdictional customer class and:

(i) The information required in this workpaper shall be detailed by voltage level for electric companies.

(ii) The information required in this workpaper shall be detailed by distribution or transmission service for gas companies.

(H) W/P L-8 - Unit Cost Analysis: Schedules which provide the following unit component costs under present rate classes. Component costs refer to classified revenue requirement by rate class. For example, dollars of demand, energy, and customer revenue requirement associated with each rate class. Unit component costs refer to average component costs which are expressed as follows:

(i) Electric companies shall provide costs in dollars per billing kilowatt, costs per kilowatt-hour, and costs per customer.

(ii) Gas companies shall provide costs per Mcf or MMBtu and costs per customer.

(I) W/P L-9 - Support for Production Allocation Methodology or Demand Allocation Factors: A workpaper which provides the rationale for the selection of each allocation methodology used in the class cost of service or a cross-reference to where such information is otherwise provided. The rationale may consist of a cost justification, a special study, and/or an explanation with supporting workpapers.

(J) W/P L-10 - Summary of Changes in Allocation Factors: A schedule which details the allocation factors which differ from those filed in by the utility in the utility's last general rate review.

(K) W/P L-11 - Payroll Expense Distribution: A schedule of the test year adjusted payroll expense by industry-specific functional group and by applicable regulatory primary account, if such information was relied upon by the utility for allocations.

(L) Load Research Data (**for electric utilities, RECs and, to the extent available, for gas companies**):

(i) W/P L-13 - Demand Data by Strata: Schedules which indicate, for any rate class for which hourly demand data (or demand data for intervals other than one hour) is available for each customer in the class, and for each month of the test year, the sum of customer noncoincident maximum demand and rate class peak demand. Distribution utilities which cannot obtain system coincident demand data shall provide estimated contribution to system billing demand.

(ii) W/P L-14 - Demand Estimates Methodology: A description, for the rate classes for which information has not been provided in W/P L-13, of the methodology used to develop demand estimates. Sources of any data used to develop these estimates shall be included.

(iii) The demand data requested in W/P L-13 and W/P L-14 are defined as follows:

(I) Rate Class Noncoincident Peak Demand (NCP) - For each rate class, this shall be the sum of the customers' maximum demand, regardless of the time of occurrence.

(II) Rate Class Peak Demand or Maximum Diversified Demand (MDD) - This shall be the sum of the customers' diversified demands coincident with the time of the rate class peak.

(III) Contribution to System Peak Demand or Coincident Peak (CP) - For each rate class, this shall be the sum of the customers' diversified demands coincident with the time of the system peak.

(M) W/P L-15 - Financial Data for Noninvestor-owned Utilities: A schedule which provides total operating margins, times interest earned ratios (TIER) and debt service coverage (DSC) by rate class.

(2) For telephone companies: W/P L-1 - All workpapers for cost studies which support rates and charges for existing and proposed services in accordance with the provisions of 165:70-5-4(d)(13).

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-33. Section M - Proof of Revenue/Rate Design

Section M - Proof of Revenue/Rate Design of the supplemental package shall provide supporting data to show that the proposed rates will produce the revenues that the utility states in Schedule H-1 of the application package.

(1) For gas and electric utilities and RECs:

(A) W/P M-1 - Fuel or Purchased Energy Factor: A schedule which provides the calculation of the current fuel or purchased energy factor and any proposed factor, if different than currently approved.

(B) W/P M-2 - Proposed Changes in Miscellaneous Charges: A schedule which provides, for each new miscellaneous charge or change in existing miscellaneous charge, a brief description of the charge, the present charge, the proposed charge and the justification for the proposed change.

(C) Rate Class Definition:

(i) W/P M-3 - Present and Proposed Rate Classes: A schedule which provides the present and proposed rate classes and designations. Present rate classes corresponding to proposed rate classes shall be indicated.

(ii) W/P M-3-1 - Justification of Proposed Changes: A workpaper which provides the rationale for any changes in the class structure and/or rate design or a cross reference to where such information is otherwise provided.

(D) Rate Design Analysis Data:

(i) W/P M-4 - Proof of Revenue Statement: A proof of revenue statement (or a pro forma revenue statement) which provides the expected or estimated adjusted billing units, proposed prices, and the resulting base rate revenue and fuel revenue for the proposed rate classes. The statement shall also list other revenue. The result shall set forth total expected revenue by rate class and shall be equal, within rate design limits, to the revenue requested by the utility from each rate class. The sum of the revenue requested from each rate classes, plus other listed system revenue, shall equal the total requested revenue of the total utility, within rate design limits. The total adjusted sales volume used in this proof of revenue shall correspond to the total adjusted sales volume in Schedule H-2.

(ii) W/P M-4-1 - Proof of Revenue/Present Rates: A proof of revenue statement similar to the one required at W/P M-4, using present rates in the revenue calculations.

(iii) W/P M-5 - Bill Comparisons: A bill comparison between present and proposed rates by service category or other classification (e.g. residential, small commercial).

(iv) W/P M-6 - Test Year Data by Rate Class: Schedule(s) which provide the following, by month, for the test year:

(I) Average number of customers.

(II) Year end number of customers.

(III) Test year adjusted number of customers.

(IV) Test year unadjusted sales and nonsales volumes.

(V) Increase or decrease in sales and nonsales volumes adjusted for abnormal weather where applicable.

(VI) Increase or decrease in sales and nonsales volumes adjustment for changes in the number of customers.

(VII) Increase or decrease in sales and nonsales volumes due to other factors.

(VIII) Total adjusted sales and nonsales volumes.

(E) W/P M-7 - Weather Normalization: Statements and/or workpapers which provide the relevant statistical measures along with the statistical modeling method utilized to derive weather normalization adjustment to actual test year data.

(F) W/P M-8 - Historical Sales Data: Schedule(s) which provide 60-month history of customer/sales data, ending with the test year end, for weather-sensitive usage classes only.

(G) W/P M-8-1 - 60-Month Sales & Consumption: A schedule of the sales and consumption by rate class, by month for sixty (60) months ending with the last month of the test year. The data shall be provided by billing cycle, if used by the utility in its weather normalization study.

(H) W/P M-9 - Weather Data: Schedules which provide the actual heating and cooling degree days (gas utilities to provide heating days only) by month corresponding with the 60-month sales by

customer class. The data shall be provided by billing cycle, if used by the utility in its weather normalization study.

(I) W/P M-10 - Normal Degree Days: A schedule which provides the 30-year normal degree days. The data shall be provided by billing cycle, if used by the utility in its weather normalization process.

(2) For telephone companies:

(A) W/P M-1 - Revenue Calculations - Local Exchange: This schedule shall contain details of revenue calculations for local exchange services.

(i) Revenue data of all recurring and nonrecurring services and equipment provided by the company shall be grouped by tariff category using the following format:

(I) Column A - Item of service.

(II) Column B - Annualized number of working units at year end.

(III) Column C - The present rate.

(IV) Column D - Test year revenues using present rates (Columns B times C).

(V) Column E - The proposed rate.

(VI) Column F - Test year revenues using proposed rates (Columns B times E).

(VII) Column G - The total revenue change (Column D plus or minus Column F).

(VIII) Column H - The percent change represented by Column G.

(ii) If other than actual test year units have been used in the calculation of revenue from nonrecurring charges or if other than the end-of-year units have been used in the calculation of revenue from monthly rates, an explanation shall be provided stating what units were used, the derivation of the units used, and the reasoning and support for the use of such units. For any adjustment to test year units based on regression analysis, the following shall be provided:

(I) The functional form including estimated coefficients and their t-statistics.

(II) The corrected R squared and Durbin-Watson statistics.

(III) The number of observations used in the analysis.

(IV) The estimation period.

(V) The sum of squared residual.

(VI) A listing of variables tried but deleted from the final specification.

(iii) Column A shall list service and equipment groups which exist pursuant to OCC tariff. There shall be revenue summaries for each group and a total for all services.

(B) Revenue Calculations - MTS.

(i) W/P M-2: This schedule shall contain details of the revenue calculation for Message Telecommunications Service (MTS) as follows:

(I) A schedule by dollar amount of the company's total intrastate MTS revenue for the test year, whether received through toll settlements or not.

(II) An explanation of the MTS pool agreement with other telephone companies which produces all or a portion of the applicant's intrastate test year MTS revenues. Copies of the agreement presently in use for this purpose shall be attached. The nature of the toll cost studies which were used and the time periods for which studies were made shall be stated and summary sheets from the appropriate studies shall be furnished.

(III) An explanation, with copies of appropriate supporting material, shall be provided for the calculations of the separations procedures used to arrive at the applicant's test year intrastate portions of revenues, investment, expenses, taxes, reserves, and any other items applicable to the case.

(IV) An explanation shall be provided for any adjustments made to separations factors from the cost study.

(ii) The telephone company, unless it concurs in a toll tariff previously approved by the OCC, shall maintain a statistically valid data base and model for the purpose of testing price changes and, upon request of the Staff, will provide the revenue effects of proposed rate scenarios.

(C) Revenue Calculations - WATS:

(i) W/P M-3: This schedule shall contain details of the revenue calculations for Wide Area Telecommunications Service (WATS). The calculations shall show recurring and nonrecurring revenues separately, if available. The schedule shall have the general format described in W/P M-1.

(ii) The telephone company, unless it concurs in another company's previously-approved jurisdictional WATS tariff, shall maintain a statistically valid data base and model for the purpose of testing price changes and, upon request of the Staff, will provide the revenue effects of proposed rate scenarios.

(D) Revenue Calculations - Private Line: W/P M-4 shall be a schedule which contains details of revenue calculations for intrastate Private Line services which are not contained in the Special Access tariff. The calculations shall show recurring and nonrecurring revenues separately, if available. The closed end of foreign exchange service shall be included in this schedule where applicable. The schedule shall have the general format described in W/P M-1.

(E) Revenue Calculations - Access Charges: W/P M-5 shall be a schedule which contains details of recurring and nonrecurring revenue calculations for services contained in the access tariffs. All access revenues must be included, whether received through a pooling process or billed directly. The open and closed ends of

foreign exchange service shall be included in this schedule where applicable. This schedule shall have the same general format described in W/P M-1. Revenue calculations shall list service and equipment groups which exist pursuant to OCC tariff. There shall be revenue summaries for each group and a total for all services.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-34. Section N - Proposed rate schedules

Section N - Proposed Rate Schedules of the supplemental package shall reflect the existing rate schedules clearly marked with the proposed changes to these schedules. Each existing rate schedule shall also contain tariff symbols indicating each change made to the rate schedule. The tariff symbols shall be clearly marked in the margin of the existing rate schedule. A vertical line which clearly identifies the exact number of lines being changed shall also be contained in the left margin between the tariff symbols. The tariff symbols to be used are shown in 165:70-1-2.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-35. Section O - Notice

No workpapers shall be required in Section O - Notice of the supplemental package.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-36. Section P - Affiliate information

Section P - Affiliate Information of the supplemental package shall contain workpapers which provide the following information relating to a utility's affiliates and/or subsidiaries, to the extent that such affiliates/subsidiaries provide a service for which the utility seeks cost recovery in its rate application:

- (1) W/P P-1 - Consolidated Companies and Subsidiaries Balance Sheet.
- (2) W/P P-2 - Income Statements for test year and first preceding year.
- (3) W/P P-3 - Cost Allocation Basis, if applicable.
- (4) W/P P-4 - Affiliate/Subsidiary General Data: Narrative(s) providing:
 - (A) The date of establishment of each affiliate and/or subsidiary;
 - (B) A statement of each affiliate and/or subsidiary's corporate purpose;
 - (C) The utility company resources used in establishment of each affiliate and/or subsidiary;
 - (D) The utility company resources currently being used by each affiliate and/or subsidiary, either directly or indirectly.
- (5) W/P P-5 - Affiliate/Subsidiary Contracts: Copies of any and all contracts with affiliates and/or subsidiaries.
- (6) W/P P-6 - Assets Sold/Transferred to Affiliates/Subsidiaries: A listing, by asset category and net book value, of assets sold or transferred to any affiliate and/or subsidiary since the utility's last rate case.
- (7) W/P P-7 - Services/Products from Affiliates/Subsidiaries: A listing and description of the services and/or products (and related costs) provided by each affiliated and or subsidiary company to the utility for the test period.
- (8) W/P P-8 - Services/Products to Affiliates/Subsidiaries: A listing of any significant utility company facilities and/or resources, whether plant, other assets or personnel, that were used during the test year, by each affiliate

and/or subsidiary. The cost of the resources shall be indicated.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-37. Section Q - Fuels and/or purchased power

Section Q - Fuels and/or Purchased Power of the supplemental package shall contain workpapers and documentation, as appropriate, relating to fuels for electric generation, heat rate, purchased power and/or natural gas for resale, unless an annual fuel audit has been, or is being, performed coinciding with the utility's test year or for any portion of the test year not covered by such annual fuel audit, as follows:

(1) Fuels for electric generation:

(A) Natural gas for electric generation fuel:

(i) W/P Q-G1 - Gas Used: A schedule which provides, by month, the gas used to fire boilers for the test year. The schedule shall include the source (direct purchase, storage on a LIFO basis, withdrawals or exchange) and cost per MMBtu weighted average cost of gas.

(ii) W/P Q-G2 - Journal Entries/Inventory Transfer: Copies of the supporting documentation to record gas usage to the proper fuel expense account(s).

(B) Coal for electric generation fuel:

(i) W/P Q-C1- Coal burned: A schedule which provides, by month, the coal burned to fire boilers for the test year. The schedule shall include the source (direct purchase or inventory LIFO layer usage) and cost per ton and MMBtu.

(ii) W/P Q-C2 - Heat Content: A schedule which provides the determination of heat content (MMBtu/ton ratio).

(iii) W/P Q-C3 - Journal Entries/Inventory Transfer: Copies of the supporting documentation to record coal burned to the proper fuel expense account(s).

(iv) W/P Q-C4 - Test Year Coal Inventory: A schedule which provides, by plant and month, an analysis of the test year coal inventory. The schedule shall include burn, purchase and inventory level maintenance.

(C) Fuel oil for electric generation fuel:

(i) W/P Q-01 - Fuel Oil Used: A schedule which provides, by month, the oil used for the test year. The schedule shall include the cost per gallon and MMBtu.

(ii) W/P Q-02 - Journal Entries: Copies of the journal entries to record fuel oil usage to the proper account(s).

(D) Fuel contracts - Contracts negotiated: A list of all contracts which were negotiated or renegotiated during the test year and all years subsequent to the last completed fuel audit.

(2) W/P Q-HR1 - Heat Rate Calculations (**for electric generation**): A schedule which provides the monthly calculations of heat rate regarding each generation plant during the test year.

(3) Purchased power (**for electric utilities**):

(A) Investor-owned utilities: W/P Q-PP2 - Monthly Purchased Power: A schedule which provides the monthly cost and quantity of purchased power, by source (cogenerator, independent power producer, federal or state power agency, or generation and

transmission company), for the test year.

(B) Rural Electric Cooperatives:

(i) W/P Q-PP1 - Purchased Power Resold: A schedule which provides, by month and total, the cost and quantity of all purchased power for the test year.

(ii) W/P Q-PP2 - Other Purchased Power Information: A schedule which provides, by month and consumer, all special sales and kw credit flow-through from any supplier for the test year.

(4) Natural gas for resale: W/P Q-R2 - Gas Purchases: A schedule which provides gas purchases which correspond to the billing months on W/P H-1. The schedule shall include storage withdrawals on a LIFO basis and exchange balances at the beginning and the end of the test year.

(5) W/P Q-R2 - Sales Programs: A schedule which provides an annualization of fuel, purchased power or gas purchases as appropriate for any special sales programs.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

PART 7. ADDITIONAL REQUIREMENTS

165:70-5-45. Confidentiality agreement

At the time of filing its Notice of Intent, the utility shall submit a proposed Confidentiality Agreement. If the utility and Staff cannot reach an agreement regarding the terms of the Confidentiality Agreement, the dispute will be submitted to the Commission en banc for resolution.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

PART 9. ACCOUNTING PROVISIONS

165:70-5-60. Accounting treatments specifically approved by the Commission

(a) The utility shall identify, by PUD Cause No. and OCC Order No., each instance where the utility has received specific approval from the Commission to adopt a particular accounting treatment related to the deferral and/or recovery of expenses or revenues.

(b) The utility shall identify, by PUD Cause No. and OCC Order No., each instance where the utility has received approval from the Commission to defer, for future recovery consideration, any portion of its plant investment, or where the recovery of a plant investment is subject to a regulatory phase-in plan.

(c) The utility shall identify how the accounting treatment identified in (a) or (b) of this Section is reflected in its current filing.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-5-61. Recent accounting pronouncements

(a) The utility shall identify and explain any new accounting pronouncements that have been adopted by the Financial Accounting Standards Board (FASB) within two (2) years prior to the test year and incorporated in the utility's rate application, which have a material effect thereon.

(b) The financial implication(s) of each new accounting pronouncement identified in response to (a) of this section shall be specifically explained and the financial implication(s) quantified.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

SUBCHAPTER 7. FILING REQUIREMENTS - CLASS C OR D UTILITIES

165:70-7-1. General filing instructions - Class C or D utilities

(a) An application for general rate change by a Class C or D utility shall include all information, forms and schedules described in this Subchapter and conform to the formats depicted in Appendices C through N to this Chapter. In preparing the information specified in 165:70-7-3 and 165:70-7-4, the following instructions are applicable:

- (1) All schedules shall be mathematically correct and properly cross-referenced.
- (2) All schedules shall be designated and in the format as provided in Appendices C through N.
- (3) Schedules submitted shall clearly indicate the utility name, the nature and content of the schedule and the test period covered.
- (4) Dollar amounts shall be rounded to the nearest dollar. No entry shall be left blank. If an amount is zero, enter a zero.
- (5) Careful attention shall be given that all material submitted is clearly legible.

(b) Additional information which the Class C or D utility considers important to the evaluation of the general rate change may be submitted with the application. The additional information shall comply with the requirements of (a) of this Section and be referenced in such a manner as to systematically follow the schedules described in 165:70-7-3 and 165:70-7-4.

(c) The original and six (6) copies of the completed application and required schedules shall be submitted to the Director for review.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-7-2. Deficiency procedure

(a) If the Director finds the application package and/or supplemental package of a Class C or D utility are not in substantial compliance with the requirements of this Chapter, the Staff Response shall state the filing is a deficient filing. The deficiencies and the requirement(s) necessary to cure the deficiencies shall be stated in the Staff Response.

(b) Unless the utility and the Staff resolve a dispute regarding whether the filing is a deficient filing within seven (7) business days of the Staff Response, such dispute may be submitted to the Commission en banc for resolution.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-7-3. Specific required schedules for Class C or D gas companies

(a) Unless otherwise authorized in writing from this Commission, Class C or D gas utilities shall, when filing an application for approval of a general rate change, prepare and submit with its application the following exhibits, schedules and evidence:

- (1) Application: The application shall be in the format depicted at Appendix B to this Chapter or in a comparable format which contains the identical information. The application shall contain a detailed schedule of the rates and charges currently in effect and a detailed schedule of the proposed rates and charges.

(2) Narrative: Provide a typewritten narrative of the purpose for a permanent rate change. The narrative shall include:

- (A) A description of changes in current operations compared to past operations that necessitate the general rate change;
- (B) Descriptions and/or calculations of adjustments which have been made to the utility's books/ledgers to derive the amounts included in the application;
- (C) Significant factors which have had, or will have, an influence on the utility's revenues, expenses and/or rate base (balance sheet);
- (D) Any anticipated growth or decline in customers which is expected to occur in the next two (2) years;
- (E) The amount of anticipated construction necessary to serve additional customers and the plans for financing that construction;
- (F) The types of customers served by the utility, e.g. residential (include what type), small retail business, large commercial, etc.;
- (G) The effort(s) the utility has made to encourage conservation of gas through the proposed rate design or through other means;
- (H) The effort(s) made by the utility to control costs/expenses and/or mitigate the amount of the requested rate change; and,
- (I) Any other factors which are relevant to the request for a general rate change.

(3) Schedule G-1 - Balance Sheet: Provide a balance sheet statement in the format of Appendix C to this Chapter, which has a column for both the beginning and ending of the test year balances per the utility's books.

(4) Schedule G-2 - Utility Plant in Service. Provide a schedule of utility plant in service in the format of Appendix D to this Chapter. The schedule shall have columns for the original cost, the accumulated depreciation and the original cost less accumulated depreciation for each category of plant in service.

(A) Schedule G-2-1 - Plant Additions or (Retirements) by Year: Provide a schedule of plant additions and/or retirements in the format of Appendix E to this Chapter. The schedule shall have lines which correspond to those on Schedule G-2 required at paragraph (a)(4) of this Section and columns for the original cost per the last Commission Order, each year since the last Commission Order and the current test year.

(B) Schedule G-2-2 - Debt: Provide a schedule which details, by each loan, all short-term and long-term debt. Utilize the format of Appendix F to this Chapter.

(5) Schedule G-3 - Comparative Statement of Income and Expense: Provide a schedule of operating revenue, operating expenses, other income and expense and net income before and after income taxes. The schedule shall be in the format of Appendix G to this Chapter and have columns for the prior year and test year per the utility's books and percent of change for the two (2) years.

(6) Schedule G-4 - Gas Sold, Connect & Disconnect Data Sheet: Provide a schedule with columns for monthly Mcfs (or ccfs, as applicable) sold, the number of monthly connections and the number of monthly disconnects for the test year. The schedule shall be in the format of Appendix H to this Chapter.

(7) Schedule G-5 - Bill Count: Provide a schedule of the total number of bills for each level of Mcf (or ccf, as applicable) consumption for the twelve (12) months of the test year. Any individual bill over 1,000 Mcf (or ccf, as applicable) shall be shown separately. The schedule shall be in the format of Appendix I to this Chapter.

(b) A sample package of the schedules in (a)(3) through (7) of this Section shall be available from the Public Utility Division to aid in the preparation of the application and supporting documentation in the prescribed formats.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

165:70-7-4. Specific required schedules for Class C or D water companies

(a) Unless otherwise authorized in writing from this Commission, Class C or D water utilities shall, when filing an application for approval of a general rate change, prepare and submit with its application the following exhibits, schedules and evidence as hereinafter set out.

(1) Application: The application shall be in the format depicted at Appendix B to this Chapter or in a comparable format which contains the identical information. The application shall contain a detailed schedule of the rates and charges currently in effect and a detailed schedule of the proposed rates and charges.

(2) Narrative: Provide a typewritten narrative of the purpose for a permanent rate increase. The narrative shall include:

(A) A description of changes in current operations compared to past operations that necessitate the general rate change;

(B) Descriptions and/or calculations of adjustments which have been made to the utility's books/ledgers to derive the amounts included in the application;

(C) Significant factors which have had, or will have, an influence on the utility's revenues, expenses and/or rate base (balance sheet);

(D) Any anticipated growth or decline in customers which is expected to occur in the next two (2) years;

(E) The amount of anticipated construction necessary to serve additional customers and the plans for financing that construction.

(F) The types of customers served by the utility, e.g. residential (include what type), small retail business, large commercial, etc.

(G) The effort(s) the utility has made to encourage conservation of water through the proposed rate design or through other means;

(H) The effort(s) made by the utility to control costs/expenses and/or mitigate the amount of the requested rate change; and,

(I) Any other factors which are considered relevant to the request for general rate change.

(3) Schedule G-1- Balance Sheet: Provide a balance sheet statement in the format of Appendix C to this Chapter which has a column for both the beginning and ending of the test year balances per the utility's books.

(4) Schedule G-2 - Utility Plant in Service. Provide a schedule of utility plant in service in the format of Appendix J to this Chapter. The schedule shall have columns for the original cost, the accumulated depreciation and the original cost less accumulated depreciation for each category of plant in service.

(A) Schedule G-2-1 - Plant Additions or (Retirements) by Year: Provide a schedule of plant additions and/or retirements in the

format of Appendix K to this Chapter. The schedule shall have lines which correspond to those on Schedule G-2 required at paragraph (a)(4) of this Section and columns for the original cost per the last Commission Order, each year since the last Commission Order and the current test year.

(B) Schedule G-2-2 - Debt: Provide a schedule which details, by each loan, all short-term and long-term debt. Utilize the format of Appendix F to this Chapter.

(5) Schedule G-3 - Comparative Statement of Income and Expense: Provide a schedule of operating revenue, operating expenses, other income and expense and net income before and after income taxes. The schedule shall be in the format of Appendix L to this Chapter and have columns for the prior year and test year per the utility's books and percent of change for the two (2) years.

(6) Schedule G-4 - Water Sold, Connect & Disconnect Data Sheet: Provide a schedule with columns for monthly gallonage sold, the number of monthly connections and the number of monthly disconnects for the test year. The schedule shall be in the format of Appendix M to this Chapter.

(7) Schedule G-5 - Bill Count: Provide a schedule of the total number of bills for each level of gallonage consumption for the twelve (12) months of the test year. Any individual bill over 100,000 gallons shall be shown separately. The schedule shall be in the format of Appendix N to this Chapter.

(b) A sample package of the schedules in (a)(3) through (7) of this Section shall be available from the Public Utility Division to aid in the preparation of the application and supporting documentation in the prescribed formats.

[Source: Added at 11 Ok Reg 3753, eff 7-11-94]

SUBCHAPTER 9. STREAMLINED GENERAL RATE CHANGE APPLICATIONS

165:70-9-1. Purpose and applicability of rules

The purpose of this Subchapter is to define the specific terms and conditions under which Class C and D gas utilities and Class B, C and D water utilities, as defined herein (See "Classifications of utilities", 165:70-1-4), may file an application under the Commission's streamlined procedures are intended to make the general rate change procedures. These streamlined procedures are intended to make the general rate change process easier and less costly to the utility. Streamlined general rate change procedures should result in savings to the utility and, ultimately, to its ratepayers. This Subchapter is not intended to establish any new rate making principles or to modify any provision of the existing laws of the State of Oklahoma. It is intended to define the information required to be filed and made available in connection with a proposed streamlined general rate change in order to facilitate an investigation of, and public hearing on, such rates. This Subchapter does not preclude the filing or provision of any additional data, information, or calculations not herein specified. This Subchapter is not applicable to proceedings relative to the establishment or continuation of the fuel adjustment clause. The intent of the streamlined process is to complete the review of uncontested general rate changes within ninety days, however, in no event shall the streamlined general rate change review exceed one hundred-eighty (180) days.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-2. Notice of intent to change rates

(a) The applicant utility shall provide thirty (30) days advance notice of its intent to file an application for a general rate change under the Commission's streamlined rate processing procedure. The notification shall be in writing, filed with the OCC Court Clerk, and contain the following information:

- (1) That an application for a general rate change is planned.
- (2) The anticipated date of filing.
- (3) The proposed effective date of the general rate change.
- (4) Identification of the utility's classification as prescribed at 165:70-1-4.

(b) All notices of intent shall be provided to the Director of the Public Utility Division and the Attorney General contemporaneously with the filing of the notice.

(c) A qualifying applicant utility shall give notice of its proposed rate change by mail, or hand delivery, to all affected utility customers prior to filing its application. Notice shall be provided using the notice form included in the Commission's rate application package and shall contain the following information:

- (1) The utility name and address, current rates, the proposed rates, the proposed effective date of the proposed rate change, and the increase requested over test year revenues as annualized for customer growth during the test year. The increase requested is to be stated as a dollar amount, as an overall percentage increase, and in terms of the impact on the classes of utility customers affected.
- (2) Information on procedures to protest the rate change, the address of the Commission, and the time frame for protests.

(d) Notices may be mailed separately, or may accompany customer billings. Notice of a proposed rate change by a utility must be mailed, or hand delivered, to the customers prior to the filing date of the application.

(e) Proof of notice in the form of an affidavit stating that proper notice was mailed or hand delivered to customers, and stating the dates of such mailing or delivery, shall be filed with the Commission by the applicant utility as part of the rate change application package. Notice to customers is sufficient if properly stamped and addressed to the customer, at the current billing address, and deposited in the U.S. Mail.

(f) Between the date of the filing of the notice of intent and the actual filing date, the applicant shall conduct one or more public meetings in a location central to the utility's service area. The purpose of the public meeting is to inform ratepayers of the impacts and details of the utility's filing, and the procedures for protesting the proposed filing. Notice of the time and place of each public meeting shall be provided to the ratepayers, the Director of the Public Utility Division and the Attorney General no less than five (5) business days prior to each meeting.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-3. Time between filings

A utility may not file a notice of intent to increase rates using the streamlined general rate filing procedures more than once in a twelve (12) month period. A utility may not file more than two (2) consecutive annual filings utilizing the provisions of this Subchapter, nor may a utility file more than three (3) filings within the most recent five (5) year period utilizing the procedures set forth in this Subchapter.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-4. Revenue increase limits and allocation of requested increase

(a) Revenue increases utilizing the streamlined procedures in this Subchapter are limited to the sum of Paragraphs (1) and (2) herein:

(1) General rate changes requested under the streamlined general rate change filing procedures are limited to a ten percent (10%) increase over existing pro forma test year revenues.

(2) An allowance of one-half (1/2) of one percent (1%) of test year pro forma revenues, but not to exceed five-thousand dollars (\$5,000) annualized expense, will be recognized to cover the total presumed cost of processing a filing made under OAC 165:70-9.

(b) All rate increases requested under the streamlined general rate change procedures must be spread on a uniform basis to all customer classes. However, Staff may recommend modification to this allocation basis.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-5. Affiliated interests

The requirements related to affiliated interests as set forth in 165:70-5-36 are applicable to this Subchapter.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-6. Streamlined general rate change filing; and Staff response

(a) Each qualifying utility choosing to utilize the streamlined general rate change filing procedures shall file its application with the OCC Court Clerk, along with a complete application package, [Appendix SG (gas) or SW (water)] and a copy of the notice the applicant has provided to customers and other affected parties. In addition to the original, the utility shall submit six (6) copies of its complete application package.

(b) The utility shall also submit the required filing fee with its application, as set forth in the Commission's Rules of Practice.

(c) On the date of filing, a copy of the docketed application package shall be delivered to the Director of the Public Utility Division. The Director and/or Staff shall review the package for completeness, required information, and format compliance with the requirements set forth in this Subchapter.

(d) Within fifteen (15) days of the receipt of the package, the Director of the Public Utility Division shall file with the Commission and provide to the utility a copy of the Staff response regarding the compliance or deficiency of the application. The response shall serve as official notification of the acceptance or non-acceptance of the application. If the Director finds that the package is not in substantial compliance with the requirements of this Subchapter, the Staff response shall state that the filing is a deficient filing. The deficiencies and the requirement(s) to cure the deficiencies shall be stated in the Staff response.

(e) The utility has fifteen (15) days from the date of the Director's response in which to cure the deficiencies in its filing. If the filing is still deficient, the application shall be rejected and returned with a formal letter of rejection from the Director.

(f) A utility may appeal the rejection of its streamlined general rate change application within five (5) days of receipt of the formal letter from the Director of the Public Utility Division. Such appeal shall be set for hearing before the Corporation Commission sitting *en banc* as soon as practical unless the parties

agree to another date or the Commission directs otherwise. An order shall issue on the utility's appeal within seven (7) calendar days from the date of hearing. An order affirming the Director's determination renders the utility's application ineligible for streamlined approval. The utility may, however, seek to file a new application for general rate change pursuant to OAC 165:70-1-5. This paragraph shall supersede the Commission's Rules of Practice, OAC 165:5, to the extent that it may be inconsistent therewith.

(g) A finding by the Public Utility Division that the filing is complete and in the required format does not preclude the Public Utility Division from ultimately recommending that the filing be rejected, modified, or processed under the 180-day case processing provisions of OAC 165:70-1-5 as set forth in OAC 165:70-9-9(e).

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-7. Narrative discussion regarding need for streamlined general rate change and exhibits

(a) A utility filing shall present the utility's full and complete position with regard to its current financial situation and needs, expressed on a pro forma basis.

(b) The filing utility shall provide an original and six (6) copies of a clearly written narrative discussing the specific reasons for the requested streamlined general rate change.

(c) The per book data included in the exhibits, schedules and information prepared and submitted as part of the filing shall be reported in the format reflected in the streamlined application package. All such data shall be complete and accurate and mathematically correct. All such data shall be supportable by evidentiary documentation by the utility. All adjustments to per book amounts shall also be shown so that per book amounts, adjustments thereto, and adjusted amounts will be clearly disclosed. Any cost separation and cost allocation between the utility's regulated operations and unregulated operations, if any, shall be fully disclosed and clearly explained. If the accounting and statistical data submitted differs from the books of the utility, then the utility shall provide a reconciliation schedule with an explanation describing and reconciling the differences.

(d) All intervenors or protestants shall file an original and six (6) copies of their prepared testimony and exhibits within the time period specified by the Administrative Law Judge assigned to the cause.

(e) The Public Utility Division shall prefile its recommendation a minimum of seven (7) days prior to the hearing date. This time frame may be modified for good cause shown, by agreement of the parties or after notice and hearing.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-8. Action on notice of rate change

(a) The Commission shall conduct a public hearing on all streamlined general rate change filings.

(b) If, within 45 days after the notice date of the rate change, the Commission receives protests from ratepayers constituting greater than 15% of the notices mailed by the utility, the Commission shall consider the content of said protest in deciding if the matter should be processed under the 180-day case processing provisions of OAC 165:70-1-5.

(c) Notice of hearing of an application for approval of any schedule, rate, charge, classification, rule or regulation which will directly or indirectly alter charges made for service performed, shall be published pursuant to OAC 165:5-7-51, unless the Commission directs otherwise.

(d) If the Commission does not receive the level of customer protests identified in subsection (b), the utility's filing will be reviewed and a public hearing set so as to assure that an Order can issue within a period not to exceed 90 days from the date the cause was filed.

(e) Staff may request additional information from the utility in the course of evaluating the rate/tariff change request, and the utility is required to provide that information within ten (10) business days of receipt of the request. If, at any time, the utility fails to provide the necessary documentation or other evidence that supports the costs and expenses shown in the application, within the designated response time, the PUD may recommend rejection of the filing.

(f) The PUD Staff must make one of the following recommendations with regard to the filing:

(1) Recommend that the requested rate increase be approved.

(2) Recommend that the requested rate increase be approved, but with modification. Such modification shall not exceed a 50% reduction or increase from the proposed level of the rate change requested by the utility, and may be based upon corrections required or omissions discovered.

(3) Recommend that the requested rate increase be rejected.

(4) Recommend that the filing be processed, but under the 180-day processing provisions of OAC 165:70-1-5.

(g) Upon oral recommendation of the Administrative Law Judge, any party may, within three (3) calendar days, advise the Administrative Law Judge, other parties of record, and the Office of General Counsel of its intent to appeal. Any appeals shall be heard by the Commission *en banc* as soon as practical unless the parties agree to another date or the Commission specifies otherwise. An order shall issue on the utility's appeal within seven (7) calendar days from the date of the appeal hearing. This Subsection shall supersede the Commission's Rules of Practice, OAC 165:5, to the extent that it may be inconsistent therewith.

(h) The utility must submit tariffs reflecting the final decisions of the Commission. Such tariffs must be reviewed and approved by the Director of PUD before bills can be issued reflecting the new rates.

(i) If the Commission sets a rate different from that proposed by the utility in its notice to its customers, the utility shall include in its first billing at the new rate a notice to the customers of the rate set by the Commission, including the following statement: "The Oklahoma Corporation Commission, after public hearing, has established the following rates for utility service."

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-9. Up-to-date requirements

At the time of filing a request for a streamlined general rate change, the filing utility shall have all monthly and annual reports required by Commission order or rule up-to-date and on file, and shall not have any outstanding obligation as defined at OAC 165:5-3-20 et seq.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-10. Test period

The utility shall file as the test year a recent historical twelve-month test period which shall be no more than six (6) months old at the time the application package is filed with the OCC Court Clerk. Any waiver of this requirement shall be obtained in accordance with OAC 165:70-9-12.

[Source: Added at 15 Ok Reg 3143, eff 7-15-98]

165:70-9-11. Waivers

The utility may seek a waiver for any portion of the documentation required by this Subchapter under the provisions of OAC 165:70-3-6.

CHAPTER 75. COTTON GIN UTILITIES

[Authority: 17 O.S., §§ 41 et seq.]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:75-1-1. Purpose

The Cotton Gin Utilities rules and regulations of this Chapter were promulgated in furtherance of 17 O.S. Section 41 et seq. and adopted by the Oklahoma Corporation Commission through Cause No. 26977, Order No. 175459 (revised General Order No. 13770 in Cause No. 17759) effective October 29, 1980.

165:75-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Applicant" means any person, persons, corporation or entity in the State of Oklahoma applying for a cotton gin license or any authority from the Commission under the terms of the Cotton Gin Utilities rules and regulations as set for in this Chapter and pursuant to law.

"Burr extractor" means a machine or device for extracting cotton burrs and other foreign material from seed cotton prior to its being fed into the distributor.

"Commission" means the Oklahoma Corporation Commission.

"Cotton gin utility" means a cotton gin maintained and operated for the purpose of separating lint from seed cotton for the public.

"Emergency" means the result of any unforeseen occurrence or condition such as fire, flood, tornado, or any other act beyond control of the gin operator which would disable the utility and render it incapable of performing proper services.

"Extractor cleaner" means a machine or device which serves as an extractor of foreign material from seed cotton such as an incline cleaner, stick machine, green leaf machine, airline cleaner, etc.

"Extractor feeder" means a machine or device which serves as an extractor of the burr and other foreign material from seed cotton and at the same time feeds the seed cotton into the gin stands.

"Gin battery" means one or more cotton gin stands served by one cotton press.

"License" means authority or permission given by the Oklahoma Corporation Commission to maintain and operate a cotton gin utility in the State of Oklahoma, as well as the evidence of such authority which may be issued by this Commission.

"Lint cleaner" means a machine or device which extracts foreign material from lint cotton.

"Rebate" means any method employed by an owner or operator of a cotton gin utility to evade rates fixed by this Commission as the fair and just charges for the ginning of cotton such as charging less than the rates fixed, the gift of meals, lodging, gasoline for cars or trucks, the use of trucks, trailers, or seed cotton transporters supplied, leased or rented by the gin owners or operators, the improper weighing of seed cotton, lint cotton or cottonseed; the selling of merchandise below cost, and any other similar practice engaged as part of any ginning transaction in any effort to evade rates fixed by this Commission.

"Seed cotton transporter" means any device utilized to transport bulk seed cotton.

"State" means the State of Oklahoma.

SUBCHAPTER 3. APPLICATIONS

165:75-3-1. Filing of application for cotton gin license

A cotton gin license for maintenance and operation of a cotton gin utility and written authority required to be obtained from this Commission by the terms of this Chapter shall be granted or denied only after an application has been filed with the Commission and a hearing held. An applicant shall show in his application and at the hearing the applicable requirements of this Chapter.

[Source: Amended at 20 Ok Reg 2332, eff 7-15-03]

165:75-3-2. Notice

(a) **Notice required upon application for license.** An applicant shall give notice of the filing of an application for a license for maintenance and operation of a cotton gin utility by publication once a week for two consecutive weeks in a newspaper of general circulation in the county in which the cotton gin is to be located. An applicant shall also mail notice to all other cotton gin operators within a thirty (30) mile radius of the applicant's proposed operating location. The notice shall be in a form approved by the Director of the Public Utility Division and shall include the name of the entity seeking a license, the cause number, the relief requested in the application, the area to be served, the phone number of the individual to contact for additional information, and the date, time and place of the hearing on the merits.

(b) **Notice required upon application or letter request of a cotton gin utility to dismantle or go dormant.** An applicant filing an application or submitting a letter request to dismantle or go dormant shall give notice of the request by posting notice in three conspicuous places within the county in which the cotton gin is located. The notice shall be in a form approved by the Director of the Public Utility Division, and shall include the name of the applicant, the relief requested, the date the notice is posted, the name of the individual to contact for additional

information, and the statement that protests or objections must be submitted in writing to the Director of the Public Utility Division of the Oklahoma Corporation Commission, P. O. Box 52000, Oklahoma City, OK 73152-2000, on or before an identified date. The applicant must allow no less than a thirty (30) day time period for the submission of written objections or protests.

[Source: Amended at 18 Ok Reg 2455, eff 7-1-01; Amended at 20 Ok Reg 2332, eff 7-15-03]

165:75-3-3. Hearings

Hearings held on any applications shall be open to the public and shall be held in the Commission Courtroom, Jim Thorpe Office Building, Oklahoma City, Oklahoma, or at any other place designated by this Commission. Any party desiring to present material, competent and relevant testimony for or against the granting of any application shall be afforded an opportunity to do so at such public hearings.

165:75-3-4. New gins

(a) No corporation, company, firm, or individual shall be permitted to operate and maintain a cotton gin utility without first having secured a license from this Commission after notice and hearing. Separate license shall be obtained for each gin battery.

(b) Applicant seeking a cotton gin license shall satisfactorily show the following primary factors:

- (1) Name of individual, partnership, or corporation and if a corporation, information concerning its organization;
- (2) A complete description of the proposed plant and its facilities, including number of gin stands, number of saws per stand, power, etc., and a statement in full of the cleaning equipment to be used;
- (3) Convenience and necessity for a gin at the proposed location;
- (4) Names and addresses of all corporations, companies, firms, or individuals operating cotton gin utilities within a thirty (30) mile radius of the proposed gin site which are or will be in direct competition therewith;
- (5) Responsibility, reliability, qualifications, and capacity of applicant to perform ginning services and to afford all reasonable facilities, conveniences, and services to the public; and
- (6) Willingness to be governed by this Chapter.

[Source: Amended at 20 Ok Reg 2332, eff 7-15-03]

165:75-3-5. Dormant gins

(a) No corporation, company, firm, or individual in this State shall allow a cotton gin utility to remain dormant during any ginning season without first obtaining written permission and authority from this Commission. Written permission and authority may be granted by the Director of the Public Utility Division, without notice and hearing, if there have been no objections or protests submitted. In the event that a written protest or objection is received by the Director of the Public Utility Division, a hearing before an Administrative Law Judge will be scheduled, and notice of the hearing will be issued by the Public Utility Division. A new request must be made each year.

(b) Any individual or entity seeking authority to allow a gin to remain dormant must show the following primary factors:

- (1) Name of gin, location, and license number;
- (2) Owner of gin;

- (3) Each cotton gin together with name and address of owner within a thirty (30) mile radius;
- (4) A statement of reasons for making application to remain dormant;
- (5) Name and address of ten (10) cotton farmers now patronizing gin; and
- (6) Convenience and necessity does not require operation of gin during coming season.

(c) Such request shall be made by certified mail on or before August 1 each year and shall be accompanied by an affidavit attesting to the six (6) primary factors listed above.

[Source: Amended at 18 Ok Reg 2455, eff 7-1-01; Amended at 20 Ok Reg 2332, eff 7-15-03]

165:75-3-6. Dismantled gins

(a) No corporation, company, firm, or individual in this State shall be permitted to dismantle a cotton gin now licensed to operate without permission and authority from this Commission. Written permission and authority may be granted by the Director of the Public Utility Division, without notice and hearing, if there have been no written objections or protests submitted. In the event that a written protest or objection is received by the Director of the Public Utility Division, a hearing before an Administrative Law Judge will be scheduled, and notice of the hearing will be issued by the Public Utility Division.

(b) Any individual or entity seeking authority to dismantle a gin shall show the following primary factors:

- (1) Name and location of gin;
- (2) Owner of gin;
- (3) Name and address of owner of each cotton gin within thirty (30) mile radius of applicant's gin;
- (4) Name and address of 10 cotton farmers now patronizing gin; and
- (5) Convenience and necessity no longer requires the gin at its present location.

(c) Such request shall be made by certified mail and shall be accompanied by an affidavit attesting to the five (5) primary factors listed above.

[Source: Amended at 18 Ok Reg 2455, eff 7-1-01; Amended at 20 Ok Reg 2332, eff 7-15-03]

165:75-3-7. Change of ownership-lease

(a) No corporation, company, firm, or individual in this State shall sell, or lease nor shall any corporation, company, firm, or individual buy or lease, or otherwise change ownership or control of a cotton gin utility without first securing written permission and authority from this Commission.

(b) Applicant seeking authority for change of ownership or control shall show the following primary factors:

- (1) Name of gin and location;
- (2) Name and address of seller or lessor;
- (3) Name and address of purchaser or lessee;
- (4) Name under which gin will operate;
- (5) Financial responsibility of purchaser or lessee; and
- (6) Willingness of purchaser or lessee to abide by the Cotton Gin Utilities rules and regulations as set forth in this Chapter.

165:75-3-8. Relocating/moving a gin

- (a) No corporation, company, firm, or individual shall be permitted to dismantle a cotton gin now licensed to operate and remove to and operate same at a new location without first obtaining written permission and authority from this Commission.
- (b) Applicant seeking authority to dismantle and move to a new location shall comply with the Cotton Gin Utilities rules and regulations as set forth in this Chapter pertaining to the dismantling of gins as required by 165:75-3-6 and Cotton Gin Utilities rules and regulations as set forth in this Chapter pertaining to building new gins as defined in 165:75-3-4.

165:75-3-9. Forms

- (a) Proper forms for application to meet requirements made in this subchapter may be had on request address to: Oklahoma Corporation Commission Public Utility Division Jim Thorpe Office Building Oklahoma City, Oklahoma 73105
- (b) Proper procedure and detail requirements will be outlined by the Director.

SUBCHAPTER 5. MAINTENANCE AND OPERATION

PART 1. SERVICE REQUIREMENTS

165:75-5-1. General service

- (a) All persons, individuals, or corporations engaged in the business of ginning cotton within the State shall properly equip their gins and hold themselves in readiness to perform such duties, unless for good cause shown, any such person or persons, individuals, copartnerships, or corporations shall be excused therefrom in writing by the Commission as provided in this Order.
- (b) All gins must be equipped with cleaners to properly clean seed cotton. In trade territories where 25% or more of the total cotton ginned over the latest consecutive three (3) year period is bolly, snapped, or machine harvested cotton, the gin shall be equipped with burr extractors, extractor cleaners, and extractor feeder machinery.
- (c) All persons, firms, or corporations operating cotton gins in the State shall perform such ginning service in a proper and workmanlike manner using due care and diligence in producing a clean product and saving for the owner of the cotton the full and fair weight of seed and lint to which he may be fully entitled.

165:75-5-2. Equal service

All owners and operators of cotton gin utilities are hereby required to render similar service to all customers alike. All owners and operators of cotton gin facilities are hereby prohibited from entering into any agreements and practices, or adopting rules tending to monopolize the purchase of cottonseed or seed cotton and are hereby prohibited from entering into any combination with others tending to stifle or limit competition therein, or tending to discriminate against any buyer of seed cotton, cottonseed or bale cotton, and all such owners and operators are hereby required to maintain standard scales.

165:75-5-3. Abandonment of service

All property once devoted to the public service of ginning cotton shall not be abandoned or service discontinued temporarily or otherwise, except in case of emergency, until after permission of authority in writing has been secured from the Commission.

165:75-5-4. Replacements/additions

(a) The Commission shall be notified of destruction, material damage by fire, or tornado, or other causes of all gin utilities provided that nothing herein shall prevent the owner or operator of a gin so damaged or destroyed to replace said ginning facilities prior to the beginning of the next cotton ginning season. If the gin cannot be repaired or rebuilt within the above designated period, the owner or operator shall seek relief under 165:75-3-5.

(b) Additions, replacements, betterments, and repairs in respect to cotton gin plants shall be so defined and classified as follows:

(1) Additions are structures, facilities, equipment, and other property added to those in service at any given time and not taking the place of any property of like kind previously held by the owner or operator and taken into the property accounts. Such additions to the cotton gin utility shall be taken into the property account and shown in the next annual report in the details and particulars and on blanks authorized by the Commission.

(2) Replacements are those installations of plant and equipment which have for their purpose the substitution of one (1) building, structure, piece of equipment, machine or mechanical part for another, which it has become necessary to retire; the substitute, having substantially no greater capacity than the building, structure, piece of equipment, machine or mechanical part retired, shall be credited to the accounts in which it is carried and the cost of the substitute so installed shall be charged to the appropriate accounts.

(3) If such replaced substitute shall be greater capacity or efficiency than the building, structure, piece of equipment, machine, or mechanical part replaced at the time of the latter's previously installation, the excess of cost of such substitute, if any, over the first cost of that removed shall be carried as cost of betterment, and such increase of capacity or efficiency shall be regarded as betterment and the residue of such cost as replacement cost, and all such shall be shown in the annual report of such cotton gin utility in such detail and particulars and upon such blanks as may be authorized by the Commission.

(4) For the purpose of determining what shall constitute repairs, the major parts of all cotton gin utilities, such as gin stands, et cetera, shall be regarded as equipment and each part of such equipment known in the cotton gin trade as a "unit" shall be regarded as divided into a class having determine function in such unit, such as gin frame, gin breast, saw cylinder, brush cylinder, et cetera; and a class having merely contributory such as saws, et cetera; and the substitution of any unit of a mechanical part of a unit having a determinative function shall be regarded as a replacement and not as a repair, and shall be carried, with the determined betterment, if any, under the paragraph (3); but the replacement or correction of any of the merely contributory parts shall be regarded as a repair and be charged to the appropriate operating expense account. Mechanical parts for such substitutes shall be regarded as replacement line and center shafting, line shaft and pulleys, idlers, fan jacks, fans, complete airlines, droppers, separators, vacuum boxes, cleaners, extractor machine distributors, feeders, gin breast, complete saw cylinder, complete brush, gin frames, complete lint flues, condensers, packers, lint cleaners, complete press boxes, ram cylinder, rams, press screws, pumps, scales, complete conveyor elevators,

main drive belting, bull extractors, unloaders, generators, motors, boilers, heaters, engines, engine flywheels, engine cylinders, crank shafts, engine frames or bases. The substitution or repair of any of the minor parts of the foregoing shall be regarded as repair and other mechanical parts not enumerated shall be regarded according the same rule or principle. In the matter of buildings, complete roofs, partitions, complete floors, complete walls, foundations, platforms, and decks and other outside annexes and wells, tanks and complete water lines, etc.; shall be regarded as replacements and that minor corrections or repairs of any one of these and painting shall be regarded as repairs.

[Source: Amended at 10 Ok Reg 2661, eff 6-25-93]

165:75-5-5.¹ Rebate

Rates and charges for service to the owner or operator of any cotton gin utility shall be the rates fixed by Order of this Commission. No cotton gin utility owner or operator shall directly or indirectly offer or give any rebates as that term is defined in 165:75-1-2.

EDITOR'S NOTE: ¹In the initial codification of this agency's rules on 12-31-91, two Sections were numbered as 165:75-5-5, although one of the rules was located in Chapter 70 instead of Chapter 75. Upon discovery of this error, the number of the rule which appeared in Chapter 70 was changed to 165:70-5-5.

165:75-5-6. Pure seed gins

In any community or district where pure cotton of any variety is grown, the ginner may designate particular ginning days upon which such cotton will be ginned exclusively and notice of such days shall be posted at the gin.

PART 3. GINNING REQUIREMENTS

165:75-5-10. Seed cotton transporter

Any device used to transport bulk seed cotton to a cotton gin and/or gin yard shall not be supplied, leased, rented, or furnished to a producer by a cotton gin utility.

165:75-5-11. Out-of-condition seed cotton

Ginners are authorized to delay or refuse to gin seed cotton that is contaminated with any type of foreign material or is out of condition from any cause that would impede or prevent the normal ginning process.

165:75-5-12. Wrapping

All bale cotton shall be wrapped in only specification material that has currently been approved by the Cotton Industry Bale Packaging Committee of the National Cotton Council and Commodity Credit Corporation of the U.S. Department of Agriculture as recorded in the Federal Register.

165:75-5-13. Wet or damaged wrapping

Wet or damaged wrapping shall not be placed on custom ginned cotton.

165:75-5-14. Use of ginning aids

Gin owners or operators shall not, while ginning, use any ginning aids or other substances or devices that will be injurious to the cotton fiber or cottonseed.

165:75-5-15. False plating and packing

Owners or operators of cotton gin utilities shall not false plate or false pack any cotton baled at their respective gins.

165:75-5-16. Tags

It shall be the duty of all owners or operators of cotton gins in this State to brand a number by means of a metal tag and/or paper tag approved by the U.S. Department of Agriculture upon each bale of cotton ginned and baled at their respective gins which brand and number shall correspond with the records as provided in 165:75-5-22.

PART 5. REPORTING AND RECORD REQUIREMENTS

165:75-5-20. Annual reports and accounting practices

Annual cotton gin utility reports for the preceding year shall be filed no later than ninety (90) days following the expiration of the cotton gins utility's fiscal year and shall be made to the Commission in such detail and on such forms as are prescribed and furnished by the Commission. The statements of facts pertaining to the inquiries called for shall be duly signed and certified under oath of the officers or owners of the gin utilities.

[Source: Amended at 10 Ok Reg 2661, eff 6-25-93]

165:75-5-21. Exhibits and petitions

(a) An applicant seeking to establish convenience and necessity as required in any of the Cotton Gin Utilities rules and regulations as set forth in this Chapter shall attach to his application a map embracing an area not less than a thirty (30) mile radius from the applicant's proposed gin. The exact location of applicant's proposed gin shall be shown on said map together with the location of each competitive gin plant within a thirty (30) mile radius thereof. The applicant shall prepare an exhibit from the records of the Commission or from any reliable source showing the exact amount of cotton ginned by each of the competitive gins for the three (3) years next preceding the filing of the application. This exhibit shall show the name and address of the owner of each of such gins, the number of saws, the type of equipment as to gins stands, cleaners, power, and any other such information that may be pertinent. The exhibit shall show the average number of bales ginned by said competitive gins for the past year and shall show the percentage of capacity of existing approved cotton gin facilities to the amount of cotton available for the average of three (3) years and for the past year. In the event the applicant or any party desires to present a petition from the cotton growers of the territory affected, the same shall show the names of the cotton growers, the number of acres devoted to cotton in each of the past three (3) years, the number of bales raised by said petitioner during each of the last three (3) years, and the proposed number of acres to be planted in cotton for the current year. No person or firm not directly growing cotton shall be eligible to sign a petition of this nature. No one growing cotton outside of the thirty (30) mile radius of the gin in question shall be eligible to sign such petition unless there is no gin closer to his land.

(b) A full copy of the information as listed shall be mailed under registered cover to the record owner of each gin within a radius of thirty (30) miles of the proposed gin site and be so stated in the application of the Commission.

165:75-5-22. Gin records

All owners or operators of cotton gin utilities shall cause to be kept at their place of business a book which shall be open for inspection by the public at all reasonable hours in which shall be registered at the time of receiving any cotton, each bale (modified gin flat or Universal Density) of cotton, or load of unginned cotton, giving dates of ginning, the name of persons for whom it is ginned, pounds of seed cotton ginned, bale number, gross weight of bale, and price paid for ginning.

165:75-5-23. Inspector's report

A copy of each gin inspectors inspection report shall be posted near the license (or facsimile) of the gin in the office after each visit.

165:75-5-24. Separate records

If the owner or operator of any cotton gin utility is engaged in carrying on any other business in connection with the operation of said cotton gin he shall keep records that will show distinctly and separately the cost of the operation and gross revenue for each gin.

PART 7. LICENSE REQUIREMENTS**165:75-5-30. License fee**

The fee for a license issued by the Commission for any gin battery shall be five dollars (\$5.00) per gin stand.

165:75-5-31. License posting

The Gin License Certificate or a reasonable facsimile must be posted in the office of the gin for which such license is issued.

165:75-5-32. Expiration of license

If any holder of a license to operate a cotton gin utility allows his gin to remain dormant for five (5) consecutive years, regardless of express authority from the Commission to allow his gin to remain dormant for each of said years, his license to operate, in absence of good cause shown to the contrary, shall be subject to cancellation after reasonable notice and hearing before the Commission.

PART 9. INSURANCE REQUIREMENTS**165:75-5-40. Insurance coverage**

Each licensed cotton gin utility owner or operator shall insure, and at all times, keep insured in his name all seed cotton, baled cotton, and cotton transporting vehicles owned by the cotton producer for the full market value thereof against loss from fire, windstorm, tornado, explosion, collision, and theft while in the custody of the cotton gin utility. Each cotton gin utility owner or operator shall, at his own expense, take the necessary steps to collect any monies which may be due as indemnity for any loss or damage. For the purpose of this Section, full market value shall mean the value used by underwriters in paying losses. The insurance carrier issuing the policy must be licensed in the State of Oklahoma.

165:75-5-41. Fire equipment

Each cotton gin owner or operator shall follow all guidelines established by their insurance carrier with regard to fire fighting equipment and fire prevention policies.

PART 11. VIOLATIONS

165:75-5-50. Violations by managers

The Commission shall have the right after notice and hearing to refuse to allow any owner or operator to continue the operation of a cotton gin who has violated the laws or the Cotton Gin Utilities rules and regulations as set forth in this Chapter.

165:75-5-51. Penalty

Any person, firm, or Corporation that violates any of the rules set forth in this Chapter shall be guilty of contempt and shall be fined not exceeding one hundred dollars (\$100.00) for each violation and in the discretion of the Commission be subject to cancellation of its permit.

CHAPTER 80. WIDE AREA CALLING PLAN (WACP)

[Authority: OKLA. CONST. art IX, §§ 18; 17 O.S., §§ 131 et seq.; 75 O.S., § 302(A)(2)]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:80-1-1. Purpose; short title

(a) This Chapter establishes the Oklahoma Corporation Commission Wide Area Calling Plan (WACP) rules and procedures for applications which may be cited by the short title as Oklahoma WACP Rules, adopted by the Commission in Cause No. RM 000049, Order No. 355459, on March 20, 1991, with final adoption on May 23, 1991, pursuant to 75 O.S., Section 308.1(A) with an effective date of June 27, 1991.

(b) This Chapter and procedures herein are intended to provide an orderly, reasonable, fair, and definitive process for the presentation of requests for wide area calling.

165:80-1-2. Jurisdiction

The Oklahoma Corporation Commission (Commission), by virtue of Article IX, Section 18 et seq., of the Constitution of the State of Oklahoma, Title 17, Section 131 et seq., of the Oklahoma Statutes and sundry other enactments of the Oklahoma legislature, has authority and responsibility to supervise, regulate, and control the public service business of telephone companies in Oklahoma, and to enact rules and regulations in connection therewith.

165:80-1-3. Application of rules

This Chapter and procedures herein apply to any application filed by the Commission staff, or any proceeding initiated by the Commission on its own motion, seeking to develop a comprehensive WACP within any major metropolitan area or to any comprehensive WACP between several small communities linked by

virtue of a geographical closeness (geographical region).

165:80-1-4. Scope of rules

Unless otherwise specifically provided in this Chapter, OAC 165:5 shall govern causes brought for WACPs.

165:80-1-5. Interpretation of rules

Where by their context the rules of this Chapter establish standards or objectives, substantial compliance therewith will be deemed compliance with this Chapter. Where by their context the rules of this Chapter imposes an absolute obligation, strict compliance is required.

165:80-1-6. Relief from rules

Whenever compliance with any requirement of this Chapter would result in unreasonable hardship, excessive expense, or for other good cause shown, the Commission may, by order, waive or modify the requirements of this Chapter, upon application of any interested party.

165:80-1-7. Rules conform to law

This Chapter shall be construed to conform with the Constitution and laws of the State of Oklahoma.

165:80-1-8. Controversy over rules

Whenever a controversy exists in connection with the interpretation of this Chapter, or its applicability, or any right or duty imposed thereby, the Commission, upon application of any interested party and after notice and hearing, will enter such order thereon as it may deem appropriate.

165:80-1-9. Severability

(a) This Chapter will not relieve in any way a telephone company or customer from any of its duties under the laws of this State or the United States. If any provision of this Chapter is held invalid, such invalidity shall not affect other provisions or applications of this Chapter which can be given effect without the invalid provision or application, and to this end the provisions of this Chapter are declared to be severable.

(b) This Chapter shall not be construed so as to enlarge, diminish, modify, or alter the jurisdiction, powers, or authority of the Commission or the substantive rights of any person.

(c) The Commission may make exceptions to this Chapter for good cause.

SUBCHAPTER 3. APPLICATION AND GENERAL PROCEDURAL REQUIREMENTS

165:80-3-1. Commencement of proceeding

Commencement of the proceeding may be initiated by the Commission on its own motion.

165:80-3-2. Application for WACP

(a) The applicant shall be the Commission staff.

- (b) The application shall state the general metropolitan area or geographic region for which wide area calling is being requested.
- (c) The metropolitan area or geographic region must be in the same LATA.

165:80-3-3. Filing of application

(a) The original and eight (8) legible copies of the application shall be filed with the Commission's Court Clerk. In addition, a complete copy of the application shall be mailed, postage prepaid, to:

- (1) The local telephone company/companies serving the metropolitan area or geographic region.
- (2) The Office of the Attorney General.
- (3) As directed by the Commission, the County Clerk of the county/counties located within the area to be impacted by the WACP or to the Chief Executive Officers of the towns and cities located within the area to be impacted by the WACP.

SUBCHAPTER 5. CRITERIA FOR WACP ARRANGEMENT

165:80-5-1. Determination of cost, engineering, and rate design

(a) The Commission will order cost, engineering, and rate design studies to be made by the telephone company/companies within a reasonable time. Any interested party may have their own cost, engineering, and rate design studies made for use in the cause, but such studies will be at the expense of that party.

Summaries of the cost, engineering, and rate design studies will be filed with the Commission's Court Clerk within the time ordered by the Commission and a copy sent to all interested parties.

(b) Upon receipt of the cost, engineering, and rate design studies summaries and after appropriate review, the attorney for the Public Utility Division staff will arrange and conduct a technical conference for the purposes of discussing the cost, engineering, and rate design studies and summaries, and considering appropriate rate design and cost recovery methods to be recommended to the Commissioners or their designee. If it appears that the rate design and cost recovery methods for the WACP are cost prohibitive, any interested party may propose alternatives to WACP in writing. At the technical conference, the scheduling of prefiled testimony and responsive testimony dates shall also be determined.

(c) Recovery of the revenue requirement caused by the WACP will be borne by the subscribers benefiting from the plan or as the Commission may so direct.

165:80-5-2. Public input

(a) The Commission may request that the subscribers indicate their interest or support for the proposed WACP. The Commission may choose from options including, but not limited to:

- (1) Polling by telephone or mail.
- (2) Statistically valid sampling methods.
- (3) Resolutions from County Commissioners and/or City Council members in the affected areas.
- (4) Other methods dependent upon the circumstances in the cause.

(b) The results of the request for public input will be advisory and not binding upon the Commission.

165:80-5-3. Hearing process

(a) A hearing will be set before the Commission en banc, unless the Commission directs otherwise. Notice shall be given to all subscribers whose basic local service rates would be increased by the proposed rate design and cost recovery methods in the manner provided in OAC 165:5 or as the Commission may otherwise direct in its Notice of Hearing.

(b) Prefiled testimony and responsive testimony shall be filed prior to the hearing as set forth at the technical conference as provided in 165:80-5-1(b). Prefiled testimony shall include, among other things, the proposed rate design for the calling plan.

(c) The Commission will make its determination following the hearing and issue its order.

165:80-5-4. Intervenor status

(a) Commission Rules of Practice, OAC 165:5, pertaining to intervention will be strictly applied in WACPs in order to focus upon the specific subject matter of each cause. Persons applying for intervenor status will have the burden of showing their interest in the subject matter, and their participation will be limited to the matter set out in the application.

(b) The Attorney General will be granted intervenor status upon request since it is presumed the Attorney General has an interest in any cause involving telephone service and rates.

165:80-5-5. Amendment of application

The right to amend a WACP application to change the metropolitan area or geographic region may be requested by any interested party.
