

TITLE 165. CORPORATION COMMISSION

CHAPTER 5. RULES OF PRACTICE

[**Authority:** OKLA. CONST. art IX, § 18, 18a, 19; 17 O. S., §§ 1, 2, 6.1, 39.2, 40.1, 52, 83, 92, 131 et seq., 139.101 et seq., 140.4, 152, 160.11 et seq., 166.1, 166.1a, 180.11, 281, 301 et seq., and 503; 20 O.S., § 106.4; 27A O.S., § 1-3-101; 47 O. S., §§ 162, 170.1, 170.2, 1013, 230.24, and 966 et seq.; 51 O. S., § 24 A.5(3); 52 O. S., §§ 1 through 67, 24, 24.4, 24.5, 86.1 through 320.2, 101, 471 through 477, 524 through 528, and 570.1 through 614]
[**Source:** Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

PART 1. GENERAL

165:5-1-1. Purpose

The purpose of this Chapter is to provide procedural rules to govern all proceedings coming before the Corporation Commission for disposition and to address the implementation of an electronic case filing system.

[**Source:** Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-2. Scope

- (a) The rules of this Chapter shall be known as the Oklahoma Corporation Commission Rules of Practice, and may be cited as OAC 165:5.
- (b) The rules of this Chapter shall govern all proceedings before the Commission, any Oil and Gas Appellate Referee, any Administrative Law Judge, attorney, or other officer or employee of the Commission.
- (c) The rules of this Chapter shall not be construed as limiting the Commission's authority to grant an exception, for good cause shown, to any rule contained herein unless otherwise precluded by law.

[**Source:** Amended at 13 Ok Reg 1159, eff 11-15-95 (emergency); Amended at 13 Ok Reg 2361, eff 7-1-96]

165:5-1-3. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise.

"Administrative Law Judge" means an Oil and Gas Appellate Referee, Referee, Administrative Law Judge, Hearing Officer, an officer, attorney, or any other employee of the Commission to whom the Commissioners delegate by order or otherwise, the authority to conduct a hearing.

"Applicant" means any person commencing a proceeding.

"Application" means any written request by an applicant commencing a proceeding for Commission action or relief.

"Attorney" means a licensed attorney currently admitted to practice before the Supreme Court of Oklahoma, or an attorney currently licensed to practice in another state who is granted under principles of reciprocity permission to appear in proceedings of the Commission.

"Business day" means a day that is not a Saturday, Sunday, or legal holiday.

"Case" or **"cause"** means a proceeding filed with the Court Clerk, for Commission action or relief. The terms "case" and "cause" are used interchangeably herein.

"Commission" means the Oklahoma Corporation Commission, the public entity created under the provisions of Article IX, Section 15, Oklahoma Constitution.

"Commissioner" means a member of the Commission.

"Complaint" means the written document that opens a case and seeks enforcement of an order, rule, or regulation of the Commission or relief against a named respondent based upon an alleged violation of law or of a rule, regulation, or order of the Commission.

"Confirmation of electronic filing" means the electronic confirmation generated by the Electronic Case Filing System.

"Document" means any written matter filed in a case. A "document" includes any attached appendices.

"Electronic" means technology having electrical, digital, magnetic, wireless, optical, electromagnetic or similar capabilities.

"Electronic Case Filing System" or **"ECF System"** means the Commission's online filing system used to file documents with the Court Clerk in Commission proceedings.

"Electronic Case Filing System filer" or **"ECF filer"** means an Electronic Case Filing user whose electronic mail address and password can be used to file documents electronically in the Electronic Case Filing System.

"Electronic Case Filing System user" or **"ECF user"** means a person who has registered and been approved to access the Electronic Case Filing System.

"Electronic filing" means the tender of documents in Commission proceedings to, and acceptance by, the Court Clerk through the Electronic Case Filing System.

"Electronic mail address" is the primary electronic mail address provided by the registered Electronic Case Filing user or Electronic Case Filing filer. An electronic mail address must have the functionality required by the Electronic Case Filing System.

"Electronic signature" means a symbol or process attached to or logically associated with a document and executed or adopted by a person with the intent to sign the document.

"File(d)" or **"filing"** means tender of documents in Commission proceedings to, and acceptance by, the Court Clerk.

"Filer" means a person tendering documents to the Commission's Court Clerk for filing in a Commission proceeding, whether submitting those documents in paper or electronically.

"Intervenor" means any party of record who is not an applicant or named respondent.

"Legal holiday" means only those days declared legal holidays by law or proclamation of the Governor of Oklahoma, or those days on which United States mail is not delivered.

"Official ECF service list" means the list, for each case, of designated recipients of electronically mailed notice of filing of pleadings subsequent to the original Application or Complaint. This list does not include pro se persons or other persons entitled to notice who have not elected to accept electronic service, and must receive notice by other means.

"Oil and Gas Appellate Referee" means a duly licensed attorney in the State of Oklahoma who is familiar with statutes and rules governing oil and gas operations in Oklahoma who shall provide central support to the Commission en banc in the hearing of oil and gas matters before the Commission en banc.

"Order" means that which is required or commanded to be done, or not to be done, and shall be generally reserved for the requirement or directive portion of an official order or decision of a proceeding; or the promulgation of rules, regulations, and requirements in matters in which the Commission acts.

"Party of record" means a person who makes formal appearance either in person or by an attorney at any stage of a case whether or not seeking affirmative relief.

"Person" means an individual, partnership, corporation, association, trust, and every other type of legal entity, including an officer or employee of the Commission.

"Pro se" means self-representation in a Commission proceeding without representation by an attorney.

"Protestant" means a person who, upon grounds of private or public interest, resists an application or any relief sought thereby. A protest is governed by the rules applicable to a response.

"Record" of any proceeding shall consist of the following:

- (A) Preliminary exhibits, including pleadings, motions, notices, and proof of publication;
- (B) Transcript of proceedings at all hearings or the electronic recording of hearings or proceedings as provided by OAC 165:5-13-1(d);
- (C) Depositions, stipulations, interrogatories and answers, written testimony, offers of proof, and similar matters;
- (D) Exhibits, together with attachments, appendices, and amendments thereto;
- (E) Initial Report of the Administrative Law Judge and Report of the Oil and Gas Appellate Referee, if any;
- (F) Exceptions and motions subsequent to the hearing;
- (G) Orders or rules of the Commission; and
- (H) Any other document or matter relevant to the issues ordered to be included by the Commission.

"Referee" means a duly licensed attorney in the State of Oklahoma who is familiar with statutes and rules governing Commission regulated entities in Oklahoma who shall provide central support to the Commission en banc in the hearing of matters before the Commission en banc.

"Register" or **"registration"** means the process for a person to request authority from the Commission to access the Electronic Case Filing System.

"Regular mail" means first class United States Mail, postage prepaid, and includes hand delivery. Wherever in OAC 165:5 a person is directed to mail by regular mail, such directive shall not preclude mailing by restricted mail.

"Respondent" means a named person against whom relief is sought in a proceeding, or a person who is entitled to receive a notice of hearing as set forth in 165:5-7-1(f), or who appears in opposition to relief sought by the applicant, and includes the term "defendant".

"Respondent list" means a list of named persons against whom relief is sought in a proceeding, or persons who are entitled to receive the application and notice of hearing as set forth in 165:5-7-1(f), or who appears in opposition to relief sought by the applicant, and includes the term "defendant". The "Respondent list" is distinguished from the Official ECF service list as defined herein.

"Restricted mail" means mailing by certified mail, return receipt requested, within the United States and its territories and mailing by registered mail

outside the United States and its territories. For purposes of service outside the United States, "registered mail" includes any means provided by Federal Rule of Civil Procedure 4(f).

"Secretary" means the duly appointed and qualified Secretary, Assistant Secretary or Acting Secretary of the Commission, or any person appointed by the Commission to act as such Secretary during the absence, inability, or disqualification of the Secretary to act.

"Staff counsel" means an attorney with the Commission's Judicial and Legislative Services, or the Commission's Agency Counsel.

"Technical failure" means a malfunction of Electronic Case Filing System hardware, software, and/or telecommunications facility which results in the inability of a registered Electronic Case Filing filer to file a document. It does not include the failure of a registered Electronic Case Filing filer's equipment, software, and/or telecommunications facility.

"User manual" means the instructions for the Commission's Electronic Case Filing System.

"Website" means the Commission website.

165:5-1-4. Office location; office hours; records

(a) **Principal office.** The principal office of the Oklahoma Corporation Commission is in the Jim Thorpe Building, 2101 North Lincoln Boulevard, Oklahoma City, Oklahoma 73105. The mailing address is P. O. Box 52000, Oklahoma City, Oklahoma, 73152-2000.

(b) **Regional service areas.** The Commission has two regional service areas described as the Eastern Regional Service Area and the Western Regional Service Area. The Eastern Regional Service Area shall consist of the land east of Oklahoma State Highway 99. The Western Regional Service Area shall consist of the land west of that highway. The establishment of these regional service areas shall not limit the services available from either regional service office.

(c) **Eastern regional service office.** In the Eastern Regional Service Area, the Commission maintains a regional service office in Tulsa, Oklahoma, at an address listed on the Commission's website.

(d) **Western regional service office.** In the western regional service area, the Commission's principal office serves as the regional service office.

(e) **Telephonic communication service.** The Judicial and Legislative Services Division shall develop and maintain a system for providing telephone and/or videoconference communication service for all hearings.

(f) **Office hours.** For each regional service office or other office described in (a) through (d) of this Section, office hours shall be from 8:00 a.m. to 4:30 p.m., each day except Saturday, Sunday, and any legal holiday proclaimed by the Governor or official agency closing. Public records that are not available in the ECF System, when implemented, or on the Commission's website may be viewed during regular office hours. Copies of public records retained in the Court Clerk's Office may be obtained from 8:00 a.m. to 4:00 p.m.

(g) **Exercise of Commission authority.** The Commission, or any person exercising its authority, may meet and exercise its official powers and functions at any location in the State of Oklahoma.

(h) **Oil and gas filings.** Applications for oil and gas development, administrative applications, and any other related oil and gas matters may be filed in any regional service office. Either regional service office may be selected as the venue when an application is filed.

(i) **Central records.** The central record of all filings with all regional service offices shall be maintained in the regional service office of the Corporation Commission located in Oklahoma City.

(j) **Court Clerk.** Until the Commission implements the ECF System, every oil-and-gas-related document or order tendered to the Court Clerk shall be filed, deposited with, or mailed to the Court Clerk at a regional service office unless the Director of Judicial and Legislative Services, or his or her designee directs otherwise. All documents related to other matters shall be filed, deposited with, or mailed to the Court Clerk at the Commission's principal office unless the Director of Judicial and Legislative Services, or his or her designee, directs otherwise. No document will be mailed to anyone who obtains an immediate file-stamped copy, unless a self-addressed postage paid envelope large enough for the return of a file-stamped or processed copy is included. All documents shall be deemed received upon the date file stamped by the Court Clerk, subject to the provisions of OAC 165:5-1-5(g). Filing of any document shall not be complete except upon payment of all applicable fees required by law or by the rules of this Chapter. Filing of any document with the Court Clerk shall be deemed filing with the Secretary.

165:5-1-4.1. Open records requests

(a) Records available to the public pursuant to the Oklahoma Open Records Act, 51 O.S. § 24A.1 et seq., may be obtained by directing written requests for records to the respective division directors or their designated appointees. This Section does not apply to records specifically required by the Commission to be kept confidential, including records subject to proprietary agreements, confidentiality orders and sealed exhibits. Charges for copies and research of such records shall be in accordance with OAC 165:5-3-1 and the Open Records Act, 51 O.S. § 24A.5(3).

(b) Any records, reports or information obtained pursuant to the Oklahoma Petroleum Storage Tank Consolidation Act and/or OAC 165:15, 165:16, 165:25, 165:26, 165:27 and 165:29 shall be available to the public unless a showing satisfactory to the Commission by any person that the records, reports or information, or a particular part thereof, if made public would divulge production of sales figures, methods, processes or production unique to such person or would otherwise tend to affect adversely the competitive position of such record, report or information or particular portion thereof.

[Source: Added at 12 Ok Reg 2005, eff 7-1-95; Amended at 16 Ok Reg 829, eff 1-25-99 (emergency); Amended at 16 Ok Reg 2807, eff 7-15-99; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 36 Ok Reg 517, eff 8-1-19]

165:5-1-5. Filing of documents

(a) **Document form.** Upon implementation of the ECF System, all persons filing documents with the Court Clerk shall file through the ECF System, unless otherwise directed by the Court Clerk, or these rules. Documents presented in paper to the Court Clerk will only be accepted and filed if such documents are submitted by a pro se filer or contain confidential information as set forth in subsection (h).

(b) Document Format. Documents filed with the Court Clerk by electronic mail or through the ECF System shall be in portable document format ("PDF"), or another format stated in the User Manual. Documents filed in paper format may be printed, typewritten or reproduced by any legible method. All documents filed in paper format must be single-sided on 8 1/2" x 11" paper and ready for digital processing and uploading to the ECF System by the Court Clerk. Exceptions to the required document size may be allowed by the Court Clerk for good cause shown. Quotations shall be indented. Subsequent to the filing of the original application, every page of documents filed with the Court Clerk shall contain a page number, the applicable subject matter docket listed in OAC 165:5-5-1(a), the case number assigned by the Court Clerk, and document type, e.g., application, motion, response, or brief. All filed documents must have a continuous pagination for the entire document, including exhibits and attachments. The original application shall include all this information, except the docket number, on each page. No document may be altered after filing; pages may not be otherwise inserted and no interlineations, additions or deletions may be made. If a filing error is made, the correct document or information, as appropriate, shall be submitted as a separate filing to the Court Clerk as soon as possible.

(c) Filing stricken by motion. Upon the motion of the Commission or Administrative Law Judge, or the filing of a motion pursuant to OAC 165:5-9-2(b), the Administrative Law Judge is authorized to recommend to the Commission an order to strike the filing of any document containing defamatory, scurrilous or improper language, or otherwise in violation of any of the rules of this Chapter. In case of such recommendation to grant a motion to strike a filed document, the subject document shall be presented to the Commission for ruling on acceptability for filing.

(d) Required information. The requirements of this subsection shall not be jurisdictional. All documents shall include the party's or attorney's actual or electronic signature, typed name, business mailing address, telephone number, and electronic mail address. All documents signed by an attorney shall contain the name of the State Bar Association to which the attorney belongs and his/her State Bar Association number. Anyone who disputes the authenticity of any electronic signature may file an objection to the document within five (5) business days of service.

(e) Requirement conflicts. Wherever any provision of the Constitution or laws of Oklahoma makes a requirement as to notice or procedure which exceeds or conflicts with any provision of the rules of this Chapter, the former shall govern.

(f) Informal communications. Nothing in the rules of this Chapter shall prohibit informal inquiry or complaint to the Commission by mail, electronic mail, or in person, which matters shall be handled administratively by the staff in an effort to secure amicable adjustment or agreement among affected persons. No official order shall be issued as a result of any informal proceedings.

(g) Electronic Mail transfers.

(1) Until the Commission implements the ECF System, the Court Clerk shall accept pleadings submitted by electronic mail, at an address posted to the Commission's website, pending payment of the appropriate filing fees. A new case filing must be sent to the Court Clerk by electronic mail before 3:30 p.m. of each business day, otherwise it will have a file stamp reflecting the next regular business day.

(2) Unless otherwise delivered the same day, if an application for emergency relief in a spacing, location exception, increased density or

multiunit horizontal well proceeding is submitted by electronic mail, a copy of such emergency application shall be sent by electronic mail to the Technical Services Department of the Commission at an electronic mail address to be designated by the Director of the Conservation Division, on the date of the filing.

(3) Until the Commission implements the ECF System, a CD case number may be requested by sending an electronic mail to the Court Clerk with the entire caption of the proposed application, a statement that only a case number is being requested, and contact information for the party requesting the case number. This will not be considered an electronic mail filing of the application and the date of filing the application will be the date the complete application is received in the Court Clerk's office. In order to minimize gaps in the numbering of cases, the case number requested by electronic mail must be followed by filing original documents containing the exact same caption in the Court Clerk's office or filed by electronic mail, within three (3) business days of the request, or the case number will be cancelled and may not be reused for any purpose.

(h) Confidential documents. All documents and information considered to be confidential must be clearly marked as such on a cover page of the document. Until such time as the ECF System provides for the electronic filing of documents subject to a protective order or otherwise considered confidential, unredacted documents which contain materials subject to a protective order, or otherwise considered confidential, shall not be filed electronically, but rather submitted in person or by mail to the Court Clerk within one (1) business day of the electronic filing of the cover page. All documents deemed and marked as confidential shall be docketed and retained by the Court Clerk. Until the Commission determines otherwise, the cover page only of such filings will be viewable by the public for identification purposes. The responsibility for following these rules concerning confidential documents and information rests solely with counsel, the parties, or any other filer. The Court Clerk does not have any duty to review documents for compliance with this rule. Paper copies of confidential documents may be returned to the party, or destroyed by agreement of the party, following the issuance of a final order and the expiration of the appeal period.

(i) Personal Identifier Information. If a filer includes personal identifier information such as Social Security numbers, tax identification numbers, financial account numbers, driver's license numbers, dates of birth, addresses or other sensitive information, in any document filed with the Court Clerk, electronically or otherwise, the document becomes a public record as filed, unless otherwise ordered by the Commission. Further, unless otherwise ordered or as otherwise provided by law, every filer, whether filing electronically or otherwise, shall redact the following information, except the last four digits, in documents prior to filing with the Court Clerk, including but not limited to:

- (1) Social Security numbers;
- (2) Taxpayer identification numbers;
- (3) Financial account numbers; and/or
- (4) Driver's license numbers.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 14 Ok Reg 2474, eff 7-1-97; Amended at 16 Ok Reg 2807, eff 7-15-99; Amended at 20 Ok Reg 2293, eff 7-15-03; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 29 Ok Reg 938, eff 7-1-12; Amended at 32 Ok Reg 752, eff 8-27-15; Amended at 34 Ok Reg 905, eff 9-11-17; Amended at 35 Ok Reg 946, eff 10-1-18; Amended at 36 Ok Reg 517, eff 8-1-19; Amended at 37 Ok Reg 1082, eff 10-1-20; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-6. Time computations and extensions; effective date

- (a) **Computation of time.** In computing any period of time prescribed by statute, by the rules of this Chapter, or by order of the Commission, the day of the act, event, or default from which the designated period of time begins to run shall be omitted and the last day of the designated period shall be included, unless the last day falls on a Saturday, Sunday, or legal holiday or official agency closing, in which case the period is extended to include the next day which is not a Saturday, Sunday, or legal holiday or official agency closing. Additionally, in computing any such period of time of five (5) calendar days or less, any period of time that would otherwise begin to run on a Saturday, Sunday, or legal holiday or official agency closing will begin to run on the next business day after the day of the act, event, or default from which the designated period of time begins to run. This computation of five (5) calendar days or less shall not be applicable to OAC 165:5-13-5.
- (b) **Extension of time.** Whenever an act is by the rules of this Chapter or by order of the Commission required or allowed to be done at or within a specified time, the Commission may, in its discretion upon its own motion or upon motion of any person, after notice and hearing, order the period extended if the order therefore is made prior to expiration of the period originally prescribed or as extended by previous order. Statutory time limits cannot be extended by the Commission.
- (c) **Effective date of orders.** Every order of the Commission issues and is effective, unless an effective date is otherwise stated in the order, the date such order is signed by the Commissioners or by the Secretary upon approval of the Commissioners.

[Source: Amended at 17 Ok Reg 2299, eff 7-1-00; Amended at 33 Ok Reg 588, eff 8-25-16; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-7. Procedure for adoption of rules

- (a) The Commission shall comply with all applicable provisions of the Administrative Procedures Act ("APA"), 75 O.S. §250 et seq., and Article IX of the Oklahoma Constitution.
- (b) In addition to the statutory requirements of the APA, notice of proposed rulemaking action shall be published one time at least thirty (30) days prior to public hearing in a newspaper of general circulation published in Oklahoma County. If, however, the Commission finds that a rule is necessary as an emergency measure, the Commission may promulgate, pursuant to applicable provisions of the APA, any such rule without notice and hearing.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 11 Ok Reg 3675, eff 7-11-94; Amended at 16 Ok Reg 829, eff 1-25-99 (emergency); Amended at 16 Ok Reg 2807, eff 7-15-99; Amended at 21 Ok Reg 2015, eff 7-1-04; Amended at 23 Ok Reg 2225, eff 7-1-06; Amended at 31 Ok Reg 959, eff 9-12-14]

165:5-1-8. Place of hearing

- (a) **General.**
- (1) The Commission may set a case for hearing anywhere in the State.
 - (2) Unless otherwise ordered, all hearings in a case shall be held at the regional service office venue where the case is set for hearing on the merits.
- (b) **For non-oil and gas dockets.** Unless otherwise ordered by the Commission, all cases except matters on the CD, PD, GG, and oil and gas related EN dockets shall be set for hearing in Oklahoma City.
- (c) **For CD, PD, GG, and oil and gas related EN dockets.**

- (1) All hearings on any oil and gas application including but not limited to appellate hearings shall be held in the regional service office where the application is filed or at the regional service office venue selected for any such application filed through the ECF System. In the case of a protested application where a protestant objects to venue on the basis that the holding of the hearing in a certain regional service office would not be at the convenience of any respondent having standing to protest by statute or rule of the Commission, the Commission shall permit such protesting respondent to present testimony by telephone in the other regional service office or any other approved location.
- (2) Requests to change the place of a hearing may be made by motion, notice of protest or written response filed with the Court Clerk not less than five (5) business days before the scheduled hearing. Applicant's reply to a request to change venue shall be governed by OAC 165:5-9-2. Disposition of requests to change the hearing location may be decided upon documents submitted unless oral arguments are ordered by the Commission.
- (3) Failure to timely object to the location of a hearing may be deemed a waiver of the objection. However, the Commission may grant leave to file or otherwise make the objection out of time. Excusable neglect, inexperience with the Commission rules, or other good cause shown shall be grounds for granting such leave.

[Source: Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-9. Telephone or videoconference participation

- (a) In an unprotested hearing, testimony by witnesses, appearances by parties of record, and arguments made by parties of record may be offered by telephone or videoconference, unless the Commission or Administrative Law Judge determines that the presence of the witnesses or parties of record in the courtroom is necessary for the effective and efficient presentation of evidence or argument.
- (b) In a protested hearing, testimony by witnesses, appearances by parties of record, and arguments made by parties of record may be offered by telephone or videoconference with the consent of all parties of record and the Commission or Administrative Law Judge. With the agreement of all parties, the Administrative Law Judge may conduct a hearing remotely by videoconference. It shall be the responsibility of the proponent of telephone or videoconference testimony or argument to obtain the required consent before the hearing. No continuance shall be granted for failure to obtain the required consent.
- (c) The cost of telephone or videoconference service shall be paid by the party requesting its use. If participation through a telephone or videoconference service in a proceeding is sought, the proponent must indicate the capability to establish the participation using its own digital device or other means of access.
- (d) A proceeding conducted by telephone or videoconference shall be conducted in the same manner as if the parties had appeared in person, and the Commission or Administrative Law Judge presiding over the matter may exercise all powers consistent with the proceeding.
- (e) In any proceeding conducted by telephone or videoconference, the remote location(s) shall be considered an extension of the courtroom and held before the Commission or Administrative Law Judge who is presiding. The Commission or Administrative Law Judge's pronouncements, instructions, recommendations and/or rulings shall have the same force and effect as if all participants had been physically present in the courtroom. The Commission or Administrative Law Judge

shall consider and rule on any objections of a party of record prior to beginning the proceeding.

(f) An oath administered by the Commission or Administrative Law Judge in a proceeding conducted by telephone or videoconference shall have the same force and binding effect as if the oath had been administered to a person physically present in the courtroom.

(g) In any proceeding conducted by telephone or videoconference, a court reporter, who can see (if videoconference) and hear the witness and other participants, may record notes and transcribe the proceeding without being physically present in the same location as either the Commission or Administrative Law Judge or the remote participants.

(h) In any proceeding conducted by telephone or videoconference, an interpreter, who can see (if videoconference) and hear the witness and other participants, may provide interpreter services without being physically present in the same location as either the judge or the remote participants.

(i) Any system used for conducting a proceeding by telephone or videoconference shall conform to the following minimum requirements:

(1) Participants shall be able to see (if videoconference), hear, and communicate with each other simultaneously;

(2) Participants shall be able to see (if videoconference), hear, and otherwise observe any physical evidence or exhibit presented;

(3) Video and sound quality shall be adequate to allow participants to observe demeanor and nonverbal communications and to clearly see (if videoconference) and hear what is taking place to the same extent as if they were present in the courtroom;

(4) When feasible, a party and the party's attorney should be allowed to communicate privately off the record by use of a private communication facility (cellphone, landline, facsimile, Skype, etc.) during the proceeding, or during a break. The Commission or Administrative Law Judge is not required to provide a private communication facility if none is available.

(j) Any pleading, other document, or exhibit used in a proceeding conducted by telephone or videoconference may be transmitted between the Commission's location and any remote site by electronic means, including, but not limited to, facsimile, scan, or electronic mail address. Signatures on any document transmitted by electronic means shall have the same force and effect as an original signature.

(k) Unless otherwise ordered by the Commission or Administrative Law Judge, any original exhibit offered and/or admitted into evidence from a remote site shall be transferred by the moving party to the court reporter within three (3) business days of the close of the proceeding. If no court reporter was utilized during the proceeding, the Commission or Administrative Law Judge shall instruct the moving party regarding the transmission and custody of the exhibit.

(l) Any stipulation/waiver of any right to be present in the courtroom shall be obtained at the commencement of the proceeding, either on the record or in writing. A written stipulation/waiver shall be filed in the cause and made a part of the record.

(m) Within three (3) business days following the hearing, each witness testifying by telephone or videoconference shall be required to sign an affidavit verifying the witness's identity, affirming that the witness was provided copies of all documents presented or relied upon, and exhibits offered and/or admitted into evidence, to which the witness testified during the hearing, and affirming that the testimony was unassisted and not prompted or directed by any person. Said affidavit shall be filed

in the cause prior to the issuance of an order. A copy of the filed affidavit shall be submitted to the Commission or Administrative Law Judge. Appendix "K" to this Chapter contains a sample affidavit.

165:5-1-10. Out of State Attorneys

An attorney who is not a member of the Oklahoma Bar Association shall comply with the requirements of Chapter 1, Appendix 1, Article II, Section 5 of Title 5 of the Oklahoma Statutes, prior to appearing before the Oklahoma Corporation Commission.

[Source: Added at 22 Ok Reg 488, eff 1-10-04 (emergency); Added at 22 Ok Reg 1730, eff 7-1-05; Amended at 27 Ok Reg 2098, eff 7-11-10]

PART 2. ELECTRONIC FILING OF DOCUMENTS

165:5-1-11. Scope

(a) All documents submitted electronically to the Court Clerk for filing in a proceeding shall conform to the rules and User Manual. Any filing not conforming to the rules and User Manual may be rejected by the Court Clerk.

(b) ECF Users and filers shall comply with applicable Commission rules and the instructions for ECF System registration and use set forth in the User Manual.

(c) The Director of Administration is authorized to establish, maintain, and update the User Manual.

(d) The User Manual shall be available on the Commission's website, and may be obtained from the Court Clerk.

[Source: Added at 32 Ok Reg 752, eff 8-27-15; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-11.1. ECF System registration

(a) Only those persons registered as filers with the ECF System shall be authorized to file documents through the ECF System with the Commission.

(b) Instructions for registering as filers and/or users of the ECF System will be stated in the User Manual.

[Source: Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-12. Time of filing

Documents can be filed through the ECF System with the Court Clerk 24 hours a day, seven days a week. Filing a document electronically does not, however, alter the filing deadline for that document. If the Commission or Administrative Law Judge has ordered a document to be filed with the Court Clerk by a time certain, it must be filed by that time. Otherwise, a filing must be completed before midnight Central time on the date it is due to be considered timely filed. The official filing time is the filing time indicated on the confirmation of electronic filing which will be generated by the ECF System at the time of filing.

[Source: Added at 32 Ok Reg 752, eff 8-27-15; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-12.1. Acceptance of filing

(a) A document shall not be considered to be electronically filed until submitted to the Court Clerk via the ECF System and a confirmation of electronic filing is

generated by the ECF System.

(b) Risk of loss of transmission, of non-receipt, or of illegibility is borne by the person transmitting and filing documents electronically.

(c) Unless otherwise directed by the Court Clerk, payment of any applicable filing fees in the ECF System shall be made by electronic payment prior to the completion of filing.

[Source: Added at 32 Ok Reg 752, eff 8-27-15; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-13. Technical failures

(a) An ECF filer whose filing is made untimely as the result of a technical failure of the ECF System may seek relief from the Commission by filing a motion with the Court Clerk. If an ECF filer is unable to access the ECF System, the filer should check the Commission's website or contact the Court Clerk's Office to see if a technical failure has been declared.

(b) During a technical failure of the ECF System, documents may be filed in paper or by electronic mail at the discretion and direction of the Director of Judicial and Legislative Services, or his or her designee. During a technical failure, the filer will be responsible for sending any documents to all parties of record and payment of any applicable filing fees.

(c) Failures not originating with the ECF System, such as phone line problems, problems with the filer's Internet service provider, power outages, or hardware or software problems, will not constitute a technical failure under (a) above. Upon the filing of a motion, the Commission may grant appropriate relief regarding an untimely filed document.

[Source: Added at 32 Ok Reg 752, eff 8-27-15; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-13.1. Correction of electronic filings

A filer cannot make changes to a document after the document has been electronically filed. If a filing error is made, the filer shall electronically file the correct document or filing information, as appropriate.

[Source: Added at 32 Ok Reg 752, eff 8-27-15; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-14. Signatures on electronically filed documents

(a) Electronic signatures are required on all documents filed electronically. By use of an electronic signature, the person represents that all requirements of the applicable authority requiring the person's signature have been satisfied and all duties and obligations imposed by law have been fulfilled.

(b) An electronic signature placed on a document is deemed to constitute a signature on the document for purposes of all signature requirements imposed and or/any other applicable law. An electronic signature placed on a document shall have the same force and effect as a handwritten signature.

[Source: Added at 32 Ok Reg 752, eff 8-27-15]

165:5-1-14.1. Official ECF service list and certificate of service

(a) Upon the filing of a case, the ECF System will generate the Official ECF Service List. A person will be added to the Official ECF Service List upon the filing of an entry of appearance, in accordance with OAC 165:5-9-4.

(b) After a document is filed in a specific case, the ECF System will automatically send notice of the filing to all persons on the Official ECF Service List.

(c) For any parties, or other persons entitled to notice, who are not included on the Official ECF Service List, the certificate of service shall list the name and address of each such person and state the manner of service.

(d) Service through the ECF System is not effective if the person making service receives notice from the ECF System that the attempted service was not electronically delivered to the person to be served. To be considered effective service, the person making service will need to provide notice by other means available under these rules or by statute, and file a certificate of service reflecting the subsequent service.

[Source: Added at 32 Ok Reg 752, eff 8-27-15; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-1-14.2. Documents subject to protective order and other confidential documents

Unredacted documents which contain materials subject to a protective order, or otherwise considered confidential, shall be filed in accordance with OAC 165:5-1-5(h).

PART 3. REVIEW OF ENVIRONMENTAL PERMIT APPLICATIONS

165:5-1-15. Definitions

As used in this Part, the following words or terms shall have the following meanings, unless the context clearly indicates otherwise:

"Administratively complete" means an application that contains the information specified in the application form and rules in sufficient detail to allow the Division to begin technical review.

"Application" means a document prepared in accordance with the rules and the forms and instructions provided by the respective Division and submitted with the expectation of providing that information necessary for review and determination of the permit. The application consists of the initial submittal and all supplements.

"Division" means any operating Division of the Commission that issues environmental permits if such permits are not issued through an individual proceeding.

"Environmental permit" means any permit issued by the Oil and Gas Division, Petroleum Storage Tank Division, and Transportation Division, or their successors, that directly regulates the potential introduction of pollutants into the environment. Permits requiring an individual proceeding are not included in this definition.

"Supplement" means a response to a request for additional information following completeness and technical reviews, and information submitted voluntarily by the applicant.

[Source: Added at 10 Ok Reg 51, eff 10-13-92 (emergency); Added at 10 Ok Reg 4241, eff 8-12-93; Amended at 16 Ok Reg 829, eff 1-25-99 (emergency); Amended at 16 Ok Reg 2807, eff 7-15-99]

165:5-1-16. Review period

Applications for environmental permits shall be either granted or denied within sixty (60) days of receipt of an administratively complete application by the Division responsible for such issuance.

[Source: Added at 10 Ok Reg 51, eff 10-13-92 (emergency); Added at 10 Ok Reg 4241, eff 8-12-93]

165:5-1-17. Application submittal

Each Division shall make available to the public, for each type of environmental permit required, permit application forms and instructions that clearly delineate the information necessary for a permit application to be deemed administratively complete. Upon determining that an application is not administratively complete, the Division shall immediately notify the applicant by mail, facsimile or electronic mail and shall indicate with reasonable specificity the inadequacies and measures necessary to complete the application. Upon such notification, and until receipt of the supplemental information requested, the sixty (60) day environmental permit review period shall be suspended.

[Source: Added at 10 Ok Reg 51, eff 10-13-92 (emergency); Added at 10 Ok Reg 4241, eff 8-12-93; Amended at 34 Ok Reg 905, eff 9-11-17]

165:5-1-18. Extension of review period

The 60-day administrative review period set forth in 165:5-1-16 may be extended:

- (1) By written agreement with the applicant pending submission of Division requested supplemental information deemed necessary for adequate Division review.
- (2) If circumstances beyond the Division's control prevents it from reaching a determination within sixty (60) days. The applicant shall be notified in writing by mail, facsimile, or electronic mail of the reasons for delay and of the anticipated date of review completion.

[Source: Added at 10 Ok Reg 51, eff 10-13-92 (emergency); Added at 10 Ok Reg 4241, eff 8-12-93; Amended at 34 Ok Reg 905, eff 9-11-17]

165:5-1-19. Withdrawal of application

If the applicant fails to provide the Division requested supplemental information within six (6) months of the request, the application shall be considered withdrawn unless the time is extended by written request for good cause shown.

[Source: Added at 10 Ok Reg 51, eff 10-13-92 (emergency); Added at 10 Ok Reg 4241, eff 8-12-93]

PART 5. RESPONSE TO CITIZEN ENVIRONMENTAL COMPLAINTS

165:5-1-25. Definitions

The following words or terms, as used in this Part, shall have the following meaning unless the context clearly indicates otherwise:

"Pollution complaint" means any communication, whether verbal or written, from any person not acting within the scope of employment of an environmental regulatory agency, which alleges that any site specific pollution has occurred or is imminent, or that a site specific pollution control law or rule has been violated, and for which the complainant expects action to be taken by an environmental regulatory agency. The term "pollution complaint" as used in this Part shall include anonymous pollution complaints, although the requirements of this Part regarding written or telephonic reply to the complainant shall not apply.

"Site specific" means limited in geographical extent to a specific well site, service yard, section of pipe, disposal or other pit, petroleum storage tank, or other such site or facility and its immediate surroundings; or originating from an identifiable and definite source at a specific well site, service yard, section of pipe, disposal or other pit, petroleum storage tank, or other such site or facility.

[Source: Added at 10 Ok Reg 1271, eff 3-17-93 (emergency); Added at 10 Ok Reg 4243, eff 8-12-93; Amended at 16 Ok Reg 829, eff 1-25-99 (emergency); Amended at 16 Ok Reg 2807, eff 7-15-99; Amended at 33 Ok Reg 588, eff 8-25-16]

165:5-1-26. Receipt of pollution complaints

(a) Any pollution complaint received by the Commission or any of its Divisions, including any regional or district offices, shall be recorded immediately upon receipt in such format as the Commission may designate.

(b) A written acknowledgement of pollution complaint receipt will be sent by mail, facsimile, or electronic mail to the complainant, alleged violator, and other relevant parties, if known, within two (2) business days following receipt of the pollution complaint and shall provide the status of the pollution complaint at that time.

[Source: Added at 10 Ok Reg 1271, eff 3-17-93 (emergency); Added at 10 Ok Reg 4243, eff 8-12-93; Amended at 29 Ok Reg 938, eff 7-1-12; Amended at 31 Ok Reg 959, eff 9-12-14; Amended at 34 Ok Reg 905, eff 9-11-17]

165:5-1-27. Review of pollution complaints

(a) The appropriate Divisions of the Commission shall immediately review each pollution complaint and immediately, in writing, by mail, facsimile, or electronic mail, refer any pollution complaint concerning a site or facility permitted by or clearly within the jurisdiction of another state or federal environmental agency, to that agency or agencies for resolution.

(b) Pollution complaints that are not referred shall be reasonably and sufficiently investigated, which may include on site inspection, to determine whether or not a response action or actions should be initiated by the Commission.

[Source: Added at 10 Ok Reg 1271, eff 3-17-93 (emergency); Added at 10 Ok Reg 4243, eff 8-12-93; Amended at 34 Ok Reg 905, eff 9-11-17]

165:5-1-28. Closure

Pollution complaints referred to other agencies, pollution complaints that involve issues not within the Commission's jurisdiction, and pollution complaints that involve issues for which an adequate remedy has already been implemented to the extent possible shall be closed in writing and a copy of the referral or other closure document shall be sent by mail, facsimile, or electronic mail to the complainant, alleged violator, and other relevant parties, if known, within seven (7) days of closure.

[Source: Added at 10 Ok Reg 1271, eff 3-17-93 (emergency); Added at 10 Ok Reg 4243, eff 8-12-93; Amended at 34 Ok Reg 905, eff 9-11-17]

165:5-1-29. Pollution complaint resolution

(a) All pollution complaints received by the Commission that are not closed pursuant to 165:5-1-28, and that involve issues over which the Commission has jurisdiction, shall be handled in such manner as to ensure that pollution complaint resolution shall be achieved within 180 days of receipt of the pollution complaint.

(b) Pollution complaint resolution is not achieved until a written determination is made by the Commission, or any duly authorized representative of the Commission, that:

- (1) the facts and circumstances of a pollution complaint do not constitute a violation of law or rule within the Commission's jurisdiction; or
- (2) the facts and circumstances of a pollution complaint constitute a violation of law or rule within the Commission's jurisdiction but for which an adequate remedy including abatement and mitigation of pollution or appropriate punishment has been implemented to the extent possible; or

(3) the facts and circumstances of a pollution complaint constitute a violation of law or rule within the Commission's jurisdiction and for which an individual proceeding has been initiated before the Commission, an Administrative Law Judge of the Commission, or before a court of competent authority; or

(4) a long term site remediation has been initiated that is expected to take longer than 180 days from receipt of the pollution complaint to complete, and such remediation is being performed pursuant to an administrative or judicial order.

(c) A copy of the written determination shall be sent, by mail, facsimile, or electronic mail, within seven (7) days of its preparation, to the complainant, alleged violator, and other relevant parties, if known.

[Source: Added at 10 Ok Reg 1271, eff 3-17-93 (emergency); Added at 10 Ok Reg 4243, eff 8-12-93; Amended at 34 Ok Reg 905, eff 9-11-17]

165:5-1-30. Reporting

(a) All pollution complaints as defined in this Part shall be summarized monthly and the previous month's summary reported to the Conservation Commission as required by 27A O.S. § 3-2-107. When a pollution complaint has been resolved as provided in this Part, it shall be reported to the Conservation Commission as resolved and removed from all subsequent monthly reports.

(b) All final judicial decisions regarding pollution complaints will be conveyed by mail, facsimile, or electronic mail to the complainant, alleged violator, and other relevant parties, if known, within seven (7) days of Commission knowledge of the decision and shall also be reported to the Oklahoma Conservation Commission.

(c) All remediations completed in accordance with an administrative or judicial order shall be summarized in writing, including a description of the final outcome and the results of any required final environmental analyses performed on site, and a copy of the summary conveyed to the complainant, alleged violator, and other relevant parties, if known. The completion of the remediation shall also be reported to the Conservation Commission.

[Source: Added at 10 Ok Reg 1271, eff 3-17-93 (emergency); Added at 10 Ok Reg 4243, eff 8-12-93; Amended at 19 Ok Reg 1939, eff 7-1-02; Amended at 34 Ok Reg 905, eff 9-11-17]

SUBCHAPTER 3. FEES

PART 1. GENERAL PROVISIONS

165:5-3-1. Fees, fines and bonds

(a) General.

(1) **Exceptions to filing fees.** For each initial application in each category listed in (b) of this Section, a filing fee shall be paid by the person seeking to file or submit the document, unless the document is filed under authorization of and in the name of an instrumentality of the State of Oklahoma.

(A) Filing fees shall not apply to any subsequent pleading or amended application except a Form 1000 required in OAC 165:10-3-1(b)(1)(A) through (E) and OAC 165:10-3-1(c).

(B) No filing fee shall be required for any application filed pursuant to OAC 165:10-3-31, Use of vacuum at the well head.

(C) No filing fee applicable to the conservation docket shall be required for any Notice of Intent to Mediate filed with the Judicial and Legislative Services pursuant to OAC 165:5-23-1 et seq. A per participant fee provided in OAC 165:5-3-1(b)(1)(L) shall be charged for any informal dispute resolution procedure that commences.

(D) No filing fee shall be paid by a party filing a protest to an adverse action of the Commission pursuant to the International Fuel Tax Agreement ("IFTA") or the International Registration Plan ("IRP").

(E) No filing fee shall be paid by a customer filing a Consumer Services docket application against a public utility.

(F) No filing fee shall be required for any application filed on the Oklahoma Universal Service Fund ("OSF") docket.

(G) No filing fee shall be paid by a party filing a protest to a nonconsensual towing Violation Notification issued by the Transportation Division.

(2) **Filing fees.** Any filing fee assessed by this Section shall be due and paid at the time of filing of the document. Neither the Court Clerk's Office nor any division of the Commission shall accept an application subject to a filing fee until the required fee is paid. No filing fee shall be refundable. For documents that are being filed in paper form, all associated filing fees must be paid and the documents submitted to the Court Clerk's Office for filing prior to 3:30 p.m. to allow for document processing within established hours of operation.

(3) **Other fees.** Any other fee assessed by this Section shall be due and payable at the time the service is requested. No service shall be rendered before payment of the prescribed fee. No such other fee shall be refundable.

(4) **Negotiable instruments.** Fees paid by negotiable instruments shall be made payable to the "Oklahoma Corporation Commission." Negotiable instruments include personal checks, cashier checks, certified checks, and money orders. Foreign checks must be payable through a United States bank in United States funds.

(5) **Returned payments.** A service fee of \$20.00 shall be assessed on each check returned to the Commission as a result of the refusal of the bank upon which the check was drawn to honor the same. Upon the return of any check by reason of the refusal of the bank to honor it, the Commission may file a bogus check complaint with the appropriate district attorney. In the event that a payment transaction for any fee, fine or bond fails, the Commission reserves the right to require payment of that fee, fine or bond, and any future fee, fine or bond owed to the Commission by the same individual or entity, to be made by cash, cashier check, certified check, money order or another secured form of payment.

(6) **Petroleum Storage Tank Division fees.** All fees pertaining to the Petroleum Storage Tank Division are listed in OAC 165:5-3-2.

(b) **Schedule of filing fees.**

(1) **Oil and gas fees.**

(A) Commercial disposal well application - \$1,500.00

(B) Commercial earthen pit application - \$1,250.00

(C) Commercial soil farming site application - \$1,250.00

(D) Commercial recycling facility application - \$1,000.00

- (E) Noncommercial injection or disposal well application - Form 1015 - \$250.00
- (F) Commercial facilities annual fee due on October 1 of each year:
 - (i) Commercial earthen pit facility - \$750.00
 - (ii) Commercial soil farming facility - \$750.00
 - (iii) Commercial recycling facility - \$750.00
- (G) Conservation docket, pollution docket, and gas gathering base applications - \$200.00
- (H) Emergency application on the conservation or pollution docket - \$250.00
- (I) Permit to drill - Form 1000:
 - (i) Directional well - \$350.00
 - (ii) Horizontal well - \$400.00
 - (iii) Multiunit well - \$600.00
 - (iv) Vertical well - \$350.00
- (J) Expedited permit to drill - Form 1000:
 - (i) Directional well - \$600.00
 - (ii) Horizontal well - \$600.00
 - (iii) Multiunit well - \$800.00
 - (iv) Vertical well - \$600.00
- (K) Temporary permit to drill - Form 1000:
 - (i) Directional well - \$350.00
 - (ii) Horizontal well - \$350.00
 - (iii) Multiunit well - \$350.00
 - (iv) Vertical well - \$350.00
- (L) Notice of Intent to Mediate pursuant to Chapter 23 of this Chapter - \$5.00 per participant
- (M) Permit for one-time land application of materials - Form 1014S - \$150.00
- (N) Expedited permit for one-time land application of materials - Form 1014S - \$250.00
- (O) Tax exemption application filed pursuant to OAC 165:10-21 - \$100.00
- (P) Transfers of well operatorship - Forms 1073 and 1073I - single well - \$25.00
- (Q) Transfers of well operatorship - Forms 1073IMW and 1073MW - multiple wells - \$250.00
- (R) Notification of intent to plug - Form 1001 - \$100.00
- (S) Operator agreement-annual fee-Form 1006B-based on the number of unplugged wells for which the operator is responsible according to Commission records:
 - (i) No wells being operated - \$100.00
 - (ii) From 1-25 wells - \$250.00
 - (iii) From 26-100 wells - \$500.00
 - (iv) From 101-500 wells - \$750.00
 - (v) Over 500 wells - \$1,000.00
- (T) Fluid disposal/injection reports:
 - (i) Commercial disposal well fluid disposal report-Form 1012C-semiannual per well-\$500.00
 - (ii) Noncommercial disposal and injection well and LPG storage well report-Form 1012-annual per well-\$25.00

- (iii) Noncommercial disposal and injection well and LPG storage well report-Form 1012-more than 100 wells-annual fee-\$2,500.00
- (U) Permit to use earthen pit, noncommercial disposal or enhanced recovery well pit for temporary storage of saltwater, and pit associated with commercial disposal well surface facility-Form 1014:
 - (i) Capacity of pit less than or equal to 10,000 barrels-\$250.00
 - (ii) Capacity of pit greater than 10,000 barrels-\$1,000.00
- (V) Permit for seismic operations-Form 1000S-\$100.00
- (W) Application for temporary exemption from well plugging-Form 1003A-\$100.00
- (X) Permit to vent or flare gas from well-Form 1022-\$50.00
- (Y) Application for multiple zone well completion, production of well through a multiple choke assembly, and commingling of well production-Form 1023-\$50.00
- (2) Transportation fees.**
 - (A) Transportation docket application - \$500.00
 - (B) Other transportation fees:
 - (i) Intrastate license.
 - (I) Original application filing fee - \$100.00
 - (II) Sub application filing fee - \$100.00
 - (III) Renewal application filing fee - \$50.00
 - (IV) Reinstatement application filing fee - \$100.00
 - (V) Name change application filing fee - \$50.00
 - (VI) Identification device or per vehicle fee - \$7.00
 - (ii) Deleterious Substance License Permit application filing fee - \$350.00
 - (iii) International Fuel Tax Agreement (IFTA) fees.
 - (I) IFTA decal - \$2.00 per vehicle per decal set
 - (II) IFTA reinstatement fee - \$100.00
 - (iv) Trailer registration processing fee per trailer registered through the IRP System - \$2.00
 - (v) Temporary registration and fuel permit fees (a \$10.00 services fee is added to each permit in this unit):
 - (I) Temporary registration (72 hour trip permit) - \$12.00
 - (II) Temporary fuel permit (120 hours) - \$25.00
 - (III) Unladen or hunters permit (45 days) - \$25.00
 - (vi) Harvest permit fees (power units only).
 - (I) Thirty day permit - \$20.00 per axle
 - (II) Sixty day permit - \$35.00 per axle
 - (III) 15 day extension - \$8.75 per axle
 - (vii) Transportation Network Company annual permit fee - \$5,000.00
 - (viii) Household goods certificate fees:
 - (I) Original application filing fee - \$350.00
 - (II) Sub application filing fee - \$300.00
 - (III) Renewal application filing fee - \$300.00
 - (IV) Reinstatement application filing fee - \$250.00

- (V) Name change application filing fee - \$50.00
- (VI) Identification device or per vehicle fee - \$7.00
- (ix) Apportioned commercial motor vehicle registration services fee - \$100.00 per vehicle (apportioned)
- (x) Apportioned commercial motor vehicle registration application reprocessing fee - \$100.00 per application
- (xi) Application for lawful fence - \$500.00. If the Transportation Division determines a lawful fence is required to be constructed by the railroad, the railroad shall have sixty (60) days from the date of notice to refund the application filing fee to the landowner
- (3) **Utility fee.** Public utility docket application - \$100.00
- (4) **Enforcement fee.** Enforcement docket application - \$100.00
- (c) **Certified copies.** A fee of \$1.00 per copied page is charged for each copy of an order or other document on file with the Commission certified by the Secretary, in addition to the fees specified in (d) of this Section.
- (d) **Other fees.** The following fees shall be charged and collected at the time of request for same; none of which shall ever be refundable:
 - (1) Certificate of non-development (maximum of one quarter section) - \$10.00
 - (2) Copies of any file or order -
 - (A) Non-certified copies - \$0.25 per page; certified copies \$1.00 per page
 - (B) Postage - actual cost
 - (3) Microfilmed images from coin-operated microfilm reader (coin box) - \$0.25
 - (4) Batch reproduction on continuing basis (per page) - \$0.25
 - (5) Copy of any document prepared in OCC offices (per page) - \$0.25
 - (6) Copy of any Chapter of Commission rules and regulations - \$10.00
 - (7) Copy of Oil and Gas Conservation rules - \$20.00
 - (8) Current ownership/lienholder information - \$1.00 per vehicle record page
 - (9) Computer generated title history - \$5.00 per vehicle
 - (10) Manual title history - \$7.50 per vehicle
 - (11) Copy of lien release - \$7.50 per vehicle
 - (12) Certified copy of lien release - \$10.00 per vehicle
 - (13) Certified copy of title history - \$10.00 per vehicle
 - (14) Preparation of the record on appeal to the Oklahoma Supreme Court - \$200.00
- (e) **Computer data processing documents.** Reproduction of documents or informational searches involving computer data processing services will be in accordance with 51 O.S. § 24A.5.
- (f) **Document search fee.** Except where provided otherwise by law, where the request for document copying and/or mechanical reproduction is solely for commercial purpose or clearly would cause excessive disruption of the Commission's essential functions, then a fee of \$10.00 per hour (minimum of one hour) shall be charged to recover the direct cost of document search.
- (g) **Fax.** A service charge of \$5.00 plus \$1.00 per page will be assessed for all outgoing faxes. All incoming faxes for persons not associated with the Commission shall be assessed a copy fee of \$0.25 per page including the cover page.
- (h) **Payments by Credit Card and other means of electronic funds transfer.**

(1) "Nationally recognized" credit card means any instrument or device, whether known as a credit card, credit plate, charge plate, debit card, or by any other name, issued with or without fee by an issuer for the use of the cardholder in lieu of a check, as defined by 12A Oklahoma Statute § 3-104(f), in obtaining goods, services or anything else of value or for the use of the cardholder in obtaining such goods, services, or anything else of value on credit and which, in either case, is accepted by over one thousand merchants in this state. The Oklahoma Corporation Commission shall determine which nationally recognized credit card will be accepted for any payments due and owing to the Oklahoma Corporation Commission.

(2) Implementation of payment by nationally recognized credit card and other means of electronic funds transfer will be phased in over a period of time as determined by the Commission.

(3) The Oklahoma Corporation Commission will verify that sufficient credit is available before acceptance of credit card to insure that no loss of state revenue will occur by the use of such card.

(A) If a person is at a designated receiving point and credit is not available, the person then has the opportunity to pay by other methods accepted by the Commission.

(B) If a person mails in the credit card information and credit is not available, the transaction will be handled as one with no remittance and a bill will be forthcoming.

(4) The Oklahoma Corporation Commission may add an amount equal to the amount of the service charge incurred, not to exceed four percent (4%) of the amount of such payment as a service charge for the acceptance of such nationally recognized card.

(5) Persons wishing to pay by credit card must be willing to submit normally required credit card information to the Commission. This includes, but is not limited to: card type (VISA, etc.), card number, card expiration date, card holder name as shown, and three digit security personal identification number (PIN). The Commission assumes no liability for unauthorized use of this information.

(6) "Electronic funds transfer" means any transfer of funds, other than a transaction originated by check, draft, or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument, or computer or magnetic tape so as to order, instruct or authorize a financial institution to debit or credit an account.

(7) "Electronic terminal" means an electronic device, other than a telephone operated by a person, through which a person may initiate an electronic funds transfer.

(8) "Financial institution" means a State or National bank, a State or Federal savings and loan association, a mutual savings bank, a State or Federal credit union, or any other person who, directly or indirectly, holds an account belonging to another person.

(9) "State" means any State, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any political subdivision of any of the foregoing.

EDITOR'S NOTE: ¹The agency promulgated two permanent amended versions of this Section (165:5-3-1) with the same effective date in 1996. Both versions were published in the 1996 Edition of the OAC. The agency later reconciled the two versions through permanent rulemaking on 7-1-97.

165:5-3-2. Fees for the Petroleum Storage Tank Division

(a) General.

(1) For each initial application filed on the Petroleum Storage Tank docket, a filing fee shall be paid by the person seeking to file or submit the document, unless the document is filed under authorization of and in the name of an instrumentality of the State of Oklahoma. Filing fees shall not apply to any emergency application, subsequent pleading or amended application.

(2) Any fee assessed by this Section is either due and payable at the time of filing or due and payable at the time the service is requested. Neither service shall be rendered before payment of the prescribed fee nor shall the Court Clerk's Office or any division of the Commission accept any application subject to a filing fee until the required fee is paid. All fees are nonrefundable.

(3) The fees listed in this section may be paid by check, personal checks, cashier checks, certified checks, money orders, credit cards and other means of electronic funds transfer. Foreign checks must be payable through a United States bank in United States funds. The check or money order should be made payable to the "Oklahoma Corporation Commission - Petroleum Storage Tank Division" and will be deposited to the Oklahoma Petroleum Storage Tank Revolving Fund.

(4) Payments by credit card and other means of electronic funds transfers.

(A) "Nationally recognized" credit card means any instrument or device, whether known as a credit card, credit plate, charge plate, debit card, or by any other name, issued with or without fee by an issuer for the use of the cardholder in lieu of a check, as defined by 12A Oklahoma Statute § 3-104(f), in obtaining goods, services or anything else of value or for the use of the cardholder in obtaining such goods, services, or anything else of value on credit and which, in either case, is accepted by over one thousand merchants in this state. The Oklahoma Corporation Commission shall determine which nationally recognized credit card will be accepted for any payments due and owing to the Oklahoma Corporation Commission.

(B) Implementation of payment by nationally recognized credit card and other means of electronic funds transfer will be phased in over a period of time as determined by the Commission.

(C) The Oklahoma Corporation Commission will verify that sufficient credit is available before acceptance of credit card to insure that no loss of state revenue will occur by the use of such card.

(i) If a person is at a designated receiving point and credit is not available, the person then has the opportunity to pay by other methods accepted by the Commission.

(ii) If a person mails in the credit card information and credit is not available, the transaction will be handled as one with no remittance and a bill will be forthcoming.

(D) The Oklahoma Corporation Commission may add an amount equal to the amount of the service charge incurred, not to exceed four percent (4%) of the amount of such payment as a service charge for the acceptance of such nationally recognized card.

(E) Persons wishing to pay by credit card must be willing to submit normally required credit card information to the Commission. This includes, but is not limited to: card type (VISA, etc.), card number, card expiration date, card holder name as shown, and three digit security personal identification number (PIN). The Commission assumes no liability for unauthorized use of this information.

(F) "Electronic funds transfer" means any transfer of funds, other than a transaction originated by check, draft, or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument, or computer or magnetic tape so as to order, instruct or authorize a financial institution to debit or credit an account.

(G) "Electronic terminal" means an electronic device, other than a telephone operated by a person, through which a person may initiate an electronic funds transfer.

(H) "Financial institution" means a State or National bank, a State or Federal savings and loan association, a mutual savings bank, a State or Federal credit union, or any other person who, directly or indirectly, holds an account belonging to another person.

(I) "State" means any State, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any political subdivision of any of the foregoing.

(b) Fees.

(1) **Application fee.** The fee to file an application on the Petroleum Storage Tank/Indemnity Fund docket is \$100.00.

(2) **Variance review fee.** The fee for administrative review of a Petroleum Storage Tank Division variance application is \$250.00.

(3) **Annual storage tank permit fee.** Owners of regulated petroleum storage tanks, whether in use or not, are required to pay an annual permit fee as follows:

(A) For petroleum storage tanks - \$25.00 per tank or tank compartment.

(B) For noncommercial agricultural underground storage tanks containing petroleum products - \$10.00 per tank.

(C) For any tank installed or permanently closed during a calendar year, the full yearly fee shall be assessed.

(D) Invoices will be mailed out approximately 60 days in advance of the due date as noted on the invoice.

(4) **UST Installer License.** The fees for an Underground Storage Tank Installer License are:

(A) Application fee - \$50.00

(B) License fee - \$100.00

(C) Annual License renewal fee - \$100.00

(5) **Environmental Consultant License.** The fees for an Environmental Consultant License are:

- (A) Application fee - \$50.00
- (B) License fee - \$100.00
- (C) Annual License renewal fee - \$100.00

(6) **UST Remover License.** The fees for an Underground Storage Tank Remover License are:

- (A) Application fee - \$50.00
- (B) License fee - \$100.00
- (C) Annual License renewal fee - \$100.00

(7) **AST Licensee.** The fees for an Aboveground Storage Tank Licensee are:

- (A) Application fee - \$50.00
- (B) License fee - \$100.00
- (C) Annual License renewal fee - \$100.00

(8) **Vapor Monitor Well Technician License.** The fees for a Vapor Monitor Well Technician License are:

- (A) Application fee - \$50.00
- (B) Examination fee - \$25.00
- (C) License fee - \$100.00
- (D) Annual License renewal fee - \$100.00

(9) **Groundwater Monitor Well Technician License.** The fees for a Groundwater Monitor Well Technician License are:

- (A) Application fee - \$50.00
- (B) License fee - \$100.00
- (C) Annual License renewal fee - \$100.00

(10) **Antifreeze Permit.** The manufacturer of any antifreeze displayed, distributed, manufactured, marketed, produced, sold, used and/or offered for sale or resale, held with intent to sell, or transported within the State of Oklahoma is required to pay the following fees:

- (A) Application fee - \$100.00 per brand per type
- (B) Annual permit renewal fee - \$100.00 per brand per type

(11) **Miscellaneous fees.**

(A) **Certified copies.** A fee of \$1.00 per copied page is charged for each copy of an order or other document on file with the Commission certified by the Secretary, in addition to the fees specified in this Section.

(B) **Other fees.** The following fees shall be charged and collected at the time of request for same; none of which shall be refundable:

- (i) Batch reproduction on continuing basis (per page) - \$0.25
- (ii) Copy of any document prepared in OCC offices (per page) - \$0.25
- (iii) Copies of any file or order -
 - (I) Non-certified copies - \$0.25 per page; certified copies \$1.00 per page
 - (II) Postage - actual cost

(C) **Computer data processing documents.** Reproduction of documents or informational searches involving computer data processing services will be in accordance with 51 O.S. § 24A.5.

(D) **Document search fee.** Except where provided otherwise by law, where the request for document copying and/or mechanical reproduction is solely for commercial purpose or clearly would cause excessive disruption of the Commission's essential functions, then a fee of \$10.00 per hour (minimum of one hour) shall be charged to recover the direct cost of document search.

(E) **Fax.** A service charge of \$5.00 plus \$1.00 per page will be assessed for all outgoing faxes. All incoming faxes for persons not associated with the Commission shall be assessed a copy fee of \$0.25 per page including the cover page when not submitted for filing with the Court Clerk's office.

(12) **Failure to pay fee.** Failure to pay by the designated due date, insufficient payments or returned payment of any fee within this subsection will result in the Corporation Commission being authorized to assess payment of any outstanding fee, plus for storage tank permits: a penalty of 50% of the computed total fee and/or suspend tank operation until payment of any fee or penalty assessed under this subsection is received.

PART 3. PUBLIC UTILITY ASSESSMENT FEES

165:5-3-20. Purpose

The purpose of this Part is to assess, pursuant to 17 Okl.St. Ann. §180.11, a fee upon each public utility to provide the level of funding established by the legislature for the Corporation Commission Public Utility Division for the regulation of Oklahoma public utilities.

[Source: Added at 10 Ok Reg 4517, eff 9-1-93 (emergency); Added at 11 Ok Reg 3681, eff 7-11-94]

165:5-3-21. Definitions

The following words and terms, when used in this Part, shall have the following meaning, unless the context clearly indicates otherwise:

"Director" means the Director of the Public Utility Division of the Oklahoma Corporation Commission.

"Filing tariffs with the Commission" means submission of the tariffs to the Director.

"Fiscal year" means the period beginning July 1 and ending June 30 of each year.

"Public utility" means:

(A) Those companies as defined by 17 O.S. §151, excluding those companies encompassed by paragraph (d) of Section 151.

(B) Any telephone or telecommunications company subject to 17 O.S. §131 et seq., including interexchange telecommunications companies as defined by 165:55-1-4, resellers as defined by 165:56, operator service providers as defined by 165:57, and pay phone service providers as defined by 165:58.

(C) Any association or cooperative corporation doing business under the Rural Electric Cooperative Act except for generation and transmission associations or cooperative corporations, or

transmission associations or cooperative corporations.

"Regulated Oklahoma jurisdictional gross operating revenues" means those revenues which are recorded in the accounts of the public utility, resulting from sales of commodities or services provided to Regulated Oklahoma Jurisdictional Customers. For telecommunications companies this shall include, but should not be limited to, revenues received for intrastate services from all Oklahoma and Federal universal service and low income funds for regulated and non-regulated services, revenues received from the Oklahoma Universal Service Fund for Special Universal Services, revenues received from the Oklahoma Universal Service Fund for Primary Universal Services, and revenues received from the Oklahoma Lifeline Fund and Federal Lifeline support received pursuant to 47 CFR Subpart E. The inclusion of revenues described in the previous sentence as Regulated Oklahoma jurisdictional gross operating revenues shall be for the limited purpose of the calculation of allocations for payment into the Public Utility Assessment Fee according to this Part 3 of Subchapter 3 of OAC 165:5 and shall not be construed as affecting the jurisdictional nature of the funds as determined by the telecommunications companies in accordance with 47 CFR Parts 32 and 36 for separations purposes or other purposes such as determining jurisdictional tax liability.

"Regulated Oklahoma Jurisdictional Customers" means any person, member of a cooperative, firm, corporation, municipality or agency, other political subdivision, or the United States or the State of Oklahoma, receiving utility service from a public utility pursuant to rates and charges established by, or filed with the Commission and recipients of Special Universal Services as defined in 17 O.S. §139.102.

"Special Universal Services" means the same as is defined in 17 O.S. §139.102.

[Source: Added at 10 Ok Reg 4517, eff 9-1-93 (emergency); Added at 11 Ok Reg 3681, eff 7-11-94; Amended at 14 Ok Reg 2474, eff 7-1-97; Amended at 19 Ok Reg 1939, eff 7-1-02; Amended at 30 Ok Reg 1033, eff 7-1-13; Amended at 31 Ok Reg 959, eff 9-12-14]

165:5-3-22. Fee allocation

(a) Pursuant to 17 O.S. §180.11, an annual fee shall be assessed as follows:

(1) The assessment shall, after excluding the amount allocated to the interexchange telecommunications companies, resellers, pay phone service providers and operator service providers in paragraph (2) of this subsection, be borne by the affected public utilities as follows:

(A) One-half shall be allocated based on that proportion which the total Regulated Oklahoma jurisdictional gross operating revenues of each public utility bears to the total Regulated Oklahoma jurisdictional gross operating revenues of all public utilities; and

(B) One-half shall be allocated based on that proportion which the total number of Regulated Oklahoma Jurisdictional Customers of each public utility bears to the total number of Regulated Oklahoma Jurisdictional Customers of all public utilities.

(2) For interexchange telecommunications companies, resellers, pay phone service providers and operator service providers, the allocation shall be based on the proportion that each interexchange telecommunications company's, reseller's, pay phone service provider's, and operator service provider's total Regulated Oklahoma jurisdictional gross operating revenues bears to the total Regulated Oklahoma jurisdictional gross operating

revenues of all public utilities.

(b) The fees assessed pursuant to this Section shall be on a fiscal year basis and shall equal the amount of the budgetary limit for the Public Utility Division established by the legislature for said fiscal year.

(c) After final legislative and gubernatorial approval of the budgetary limit for the Public Utility Division, notice of the annual assessed amount pursuant to (a)(1) and (2) of this Section shall be sent by electronic mail or certified mail, return receipt requested, to each public utility.

[Source: Added at 10 Ok Reg 4517, eff 9-1-93 (emergency); Added at 11 Ok Reg 3681, eff 7-11-94; Amended at 14 Ok Reg 2474, eff 7-1-97; Amended at 18 Ok Reg 2369, eff 7-1-01; Amended at 30 Ok Reg 1033, eff 7-1-13; Amended at 31 Ok Reg 959, eff 9-12-14]

[Source: Reserved at 10 Ok Reg 4517, eff 9-1-93 (emergency); Reserved at 11 Ok Reg 3681, eff 7-11-94]

165:5-3-24. Payment of assessments

(a) Each public utility shall pay an assessment in equal amounts on a quarterly basis. For each fiscal year, the first quarterly payment shall be due no later than thirty (30) days from the mailing date of the notice provided by 165:5-3-22(c). Subsequent payments will be due as follows:

- (1) Second quarterly payment due no later than October 1.
- (2) Third quarterly payment due no later than January 1.
- (3) Fourth quarterly payment due no later than April 1.

(b) A public utility may, at its discretion, pay its annual assessment prior to the due date of the quarterly payments.

[Source: Added at 10 Ok Reg 4517, eff 9-1-93 (emergency); Added at 11 Ok Reg 3681, eff 7-11-94; Amended at 27 Ok Reg 2098, eff 7-11-10]

165:5-3-25. Reporting requirement

(a) On or before April 1 of each year, each affected public utility shall submit to the Director a report based on the preceding calendar year containing the following data:

- (1) Prior calendar year end Regulated Oklahoma Jurisdictional Customers.
- (2) Total prior calendar year Regulated Oklahoma jurisdictional gross operating revenues.

(b) The reporting requirement set forth in (a)(1) of this Section does not apply to interexchange telecommunication companies.

[Source: Added at 10 Ok Reg 4517, eff 9-1-93 (emergency); Added at 11 Ok Reg 3681, eff 7-11-94; Amended at 30 Ok Reg 1033, eff 7-1-13; Amended at 31 Ok Reg 959, eff 9-12-14]

165:5-3-26. Failure to comply

Any public utility which fails or refuses to file the report required by 165:5-3-25 or pay the required assessment within the time and in the manner prescribed by 165:5-3-24 shall be deemed delinquent and may be assessed such fines and penalties as are permitted by Article 9, Section 19 of the Oklahoma Constitution.

[Source: Added at 10 Ok Reg 4517, eff 9-1-93 (emergency); Added at 11 Ok Reg 3681, eff 7-11-94]

165:5-3-27. Fee recovery

(a) Each public utility may recover amounts assessed pursuant to 165:5-3-22(a) by filing tariffs with the Commission and after approval of said tariffs by the Director. Tariffs recovering amounts assessed must meet the following conditions:

- (1) Distribute the recovery equally per customer bill rendered or access line.
- (2) Distribute recovery over the fiscal year for which the assessment is levied.
- (3) Include a provision to true-up any over or under recovery by the public utility of assessed amounts by no later than the end of the following fiscal year.

(b) No public utility may recover any portion of the penalty assessed pursuant to 165:5-3-26, above the amount of fees actually due for the assessed period.

[Source: Added at 10 Ok Reg 4517, eff 9-1-93 (emergency); Added at 11 Ok Reg 3681, eff 7-11-94]

PART 4. ASSESSMENTS ON UNREGULATED ENTITIES

165:5-3-30. Purpose

The purpose of this Part is to assess, pursuant to Section 45 of Senate Bill 575 (1993), a fee in public utility docket causes filed by Unregulated entities, to assist in providing funding to the Public Utility Regulation Revolving Fund.

[Source: Added at 11 Ok Reg 3683, eff 7-11-94; Amended at 32 Ok Reg 752, eff 8-27-15]

165:5-3-31. Definitions

The following words and terms, when used in this Part, shall have the following meaning unless the context clearly indicates otherwise:

"Unregulated entity" means any person, firm or corporation which is not a public utility as defined in Title 17 O.S. §180.11.

[Source: Added at 11 Ok Reg 3683, eff 7-11-94; Amended at 32 Ok Reg 752, eff 8-27-15]

165:5-3-32. Commission determination of assessment

(a) In causes on the Public Utility Docket where the cause was filed by an Unregulated entity, fees may be assessed to the Unregulated entity upon a motion of the Staff of the Public Utility Division made within ninety (90) days after the cause is filed. Notice of the hearing on the motion shall be given to all parties of record in the cause pursuant to Commission rules; provided, however, the final amount of assessment on the Unregulated entity shall be made within sixty (60) days following the issuance of the final order in the cause, or if a final order is not issued then upon conclusion of the cause whether it be by dismissal or otherwise. If an Unregulated entity makes a material change in its application or adds a separate cause after 90 days, the Commission may make an additional assessment.

(b) In considering whether or not to assess fees to the Unregulated entity, the Commission shall consider, although not be limited to, the following factors:

- (1) The benefit(s) to the Unregulated entity if the relief requested by the Unregulated entity is granted.
- (2) The benefit(s) to the State of Oklahoma if the relief requested by the Unregulated entity is granted.
- (3) The public interest.
- (4) Compliance with any other state or federal law under which this Commission has jurisdiction.
- (5) Whether the Unregulated entity is a consumer group filing a case on behalf of themselves as consumer/members and the composition of the consumer group.

- (c) The Commission shall make a determination of the estimated costs which will be incurred by the Commission for Commission resources and/or consulting services that are required to process an application.
- (d) In the event the actual costs of the Commission are less than the assessed amount, the difference will be refunded to the Unregulated entity.
- (e) The Commission shall issue an order which shall include the following:
- (1) Whether or not the Unregulated entity will be assessed a fee.
 - (2) The amount of the fee to be assessed, which shall be no greater than the estimated amount, and which shall not be subject to modification, regardless of the cause being delayed or to which exceptions are filed, except as provided in 165:5-3-32(a).
 - (3) The date the payment shall be paid.
- (f) All Unregulated entities who in their capacity as customers of a regulated utility file a complaint with the Commission seeking compliance with existing Commission rules and regulations and/or Commission approved tariffs shall not be assessed fees beyond the filing fee set forth in 165:5-3-1.

[Source: Added at 11 Ok Reg 3683, eff 7-11-94; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 32 Ok Reg 752, eff 8-27-15]

165:5-3-33. Option to withdraw application

If the Commission orders that a fee be assessed, the Unregulated entity shall have the option of proceeding with the cause or withdrawing its application. If the Unregulated entity withdraws its application, no assessment beyond the filing fees set forth in 165:5-3-1 shall be required.

[Source: Added at 11 Ok Reg 3683, eff 7-11-94; Amended at 32 Ok Reg 752, eff 8-27-15]

165:5-3-34. Payment of assessment

Failure by an Unregulated entity to pay an assessed fee by or on the date ordered by the Commission shall either result in denial of the relief requested by the Unregulated entity without prejudice, after notice and hearing, or postponement of the procedural schedule as directed by the Commission.

[Source: Added at 11 Ok Reg 3683, eff 7-11-94; Amended at 32 Ok Reg 752, eff 8-27-15]

PART 5. WIND ENERGY FACILITY FEES

165:5-3-40. Purpose

The purpose of this Part is to assess, pursuant to 17 O.S. § 160.22, a fee upon each wind energy facility to provide funding to the Public Utility Division in the execution of duties and responsibilities required by the Oklahoma Wind Energy Development Act.

[Source: Added at 36 Ok Reg 517, eff 8-1-19]

165:5-3-41. Definitions

The following words and terms, when used in this Part, shall have the following meaning unless the context clearly indicates otherwise:

"PUD" means the Public Utility Division of the Oklahoma Corporation Commission.

"Decommissioned" means the retirement of a wind energy facility, including decontamination and/or dismantlement, and as defined in 17 O.S. § 160.14.

"Wind energy facility" means wind energy facility as defined in 17 O.S. § 160.13(9).

[Source: Added at 36 Ok Reg 517, eff 8-1-19]

165:5-3-42. Wind energy facility fee

- (a) Pursuant to 17 O.S. § 160.22, an annual fee of \$2,000.00 shall be assessed on each wind energy facility located in the State of Oklahoma.
- (b) Pursuant to 17 O.S. § 160.22, a submission fee of \$5,000.00 shall be paid to the Commission for processing of each initial Notification of Intent to Build a wind energy facility in Oklahoma.
- (c) For the first year of commercial generation, the annual fee shall be paid to PUD concurrently with the submission of the annual report, pursuant to OAC 165:35-45-3.
- (d) The wind energy facility fee shall be paid to PUD annually on or before March 1 of each year, concurrently with the submission of the annual report, pursuant to OAC 165:35-45-3.
- (e) The wind energy facility fee shall not be paid after PUD is notified that the wind energy facility is decommissioned.
- (f) A public utility, as defined in OAC 165:5-3-21, that pays into the PUD Assessment pursuant to 17 O.S. §180.11, shall not be required to pay the wind energy facility fee on each wind energy facility owned by the public utility.

[Source: Added at 36 Ok Reg 517, eff 8-1-19]

165:5-3-43. Failure to comply

A wind energy facility that fails or refuses to pay the required fee may be assessed fines and penalties as provided by law.

[Source: Added at 36 Ok Reg 517, eff 8-1-19]

SUBCHAPTER 5. DOCKETS

165:5-5-1. Dockets; identifying initials

- (a) **Subject matter dockets.** Subject matter dockets shall be maintained by the Court Clerk, with identifying initials preceding the docket number as follows:
 - (1) General Docket (GD), which shall consist of causes not coming within the purview of any other docket listed below, and which shall include notices of inquiry.
 - (2) Conservation Docket (CD), which shall consist of causes to prevent waste and protect or adjust the correlative rights of parties owning interests in the common source of supply or unitized management of a common source of supply including, but not limited to, spacing, increased density, location exception, pooling and unitization.
 - (3) Consumer Services Docket (CS), which shall consist of causes initiated by either the Director of the Consumer Services Division against a regulated utility provider or a customer against the customer's regulated utility provider seeking to require the regulated utility provider to abide by approved tariffs, state statutes, Commission rules, or Commission orders. Regulated utility provider includes public utilities and telecommunications carriers as defined by 17 O.S. §§ 41, 139.102 and 151.
 - (4) Enforcement Docket (EN), which shall consist of causes initiated by the Commission or any of its directors, the Attorney General of Oklahoma, or

other affected parties to find parties in contempt of Commission rules or to require compliance of parties with applicable statutes, rules, and Commission orders.

(5) Gas Gathering Docket (GG), which shall consist of causes initiated for determination of reasonable fees and terms or conditions of service related to open access to natural gas gathering systems.

(6) Motor Carrier Citation Docket (MCC), which shall consist of causes initiated by issuance of citations by Commission motor carrier/vehicle officers at roadside, weigh stations or on-site, for alleged violation of state statutes, Commission rules or federal regulations regarding the registration, licensing, certification, or operation of motor carriers or commercial motor vehicles.

(7) Oklahoma Universal Service Fund Docket (OSF), which for causes filed on or after January 1, 2018, shall consist of causes relating to funding from the Oklahoma Universal Service Fund (OUSF) or the Oklahoma Lifeline Fund (OLF), including, but not limited to, requests for OUSF or OLF funding, submissions relating to OUSF administrative preapproval requests and the OUSF fee assessment.

(8) Petroleum Storage Tank Docket (PSD), which shall consist of causes initiated by the Director of the Petroleum Storage Tank Division or other party seeking relief from Commission rules, disputing PSD decisions regarding jurisdiction, corrective action, licensing, system shutdown, Petroleum Storage Tank Indemnity Fund eligibility or reimbursement.

(9) Petroleum Storage Tank Division Citation Docket (PSC), which shall consist of causes initiated by issuance of citations by Commission fuel inspectors for alleged violation of state statutes or Commission rules regarding operation of petroleum storage tank systems.

(10) Pollution Docket (PD), which shall consist of causes initiated and related to the protection of the environment regarding oil and gas production or the disposal, injection, remediation or storage of deleterious substances produced from oil and gas related activities including, but not limited to, applications for injection wells, commercial disposal wells, disposal pits and recycling.

(11) Public Utility Docket (PUD), which shall consist of causes initiated by the Director of the Public Utility Division, a public utility, or other party with standing concerning any matter relating to public utilities, except rulemaking and, effective January 1, 2018, the Oklahoma Universal Service Fund.

(12) Rulemaking Docket (RM), which shall consist of causes initiated by the Commission or any of its directors for the promulgation, amendment, or repeal of a Commission statement or group of related statements of general applicability and future effect that implements, interprets or prescribes law or policy, or describes the procedure or practice requirements of the Commission. [75 Okla. Stat. § 250.3(17)] Formal petitions by the public for rulemaking shall be part of the General Docket. If the Commission orders a rulemaking proceeding as a result of such petition, the rulemaking proceeding shall be part of the Rulemaking Docket.

(13) State Fund Plugging Docket (SF), which shall consist of causes initiated by the Director of the Oil and Gas Conservation Division seeking authorization to use monies from the Commission's Plugging Fund to plug or replug abandoned wells in the State of Oklahoma.

- (14) Transportation Docket (TD), which shall consist of causes initiated by:
- (A) an applicant protesting a Transportation Division determination denying a motor carrier's application seeking a license, certificate, or permit from the Transportation Division to lawfully operate as a for-hire or private motor carrier or for a special permit or registration;
 - (B) an applicant protesting a Transportation Division determination denying its registration or fuel tax application or proposed audit assessment;
 - (C) an application by the Transportation Division modifying, suspending, canceling or revoking an existing certificate, permit, registration, or license;
 - (D) an application by the Transportation Division modifying a previously issued order;
 - (E) an application by the Transportation Division to effect an operational change in a transportation regulated entity;
 - (F) an interested party protesting a license, certificate, permit or registration being issued or renewed;
 - (G) an interested party seeking to modify, suspend, cancel, or revoke an existing certificate, permit, registration or license or to assess penalties to a motor carrier, registrant or licensee;
 - (H) a pipeline operator seeking a pipeline acceptance;
 - (I) any individual, entity or railroad seeking approval to update, open or close a railroad crossing; or
 - (J) any interested party seeking relief from the Commission in transportation matters relating to its jurisdiction.

(15) "Oil and gas dockets" as used in these Rules includes the following dockets: CD, PD, GG, SF and oil and gas related EN docket.

(b) **Docket assignment.** Every cause shall be assigned a docket number by the Court Clerk, and all documents filed in the cause shall bear the docket number, including the year prefix. The Court Clerk shall:

- (1) File-stamp each document received with the date of receipt.
- (2) Record every document filed in the cause.
- (3) Maintain a complete file of all original documents filed in every cause.

(c) **Improper docketing.** If the Commission or an Administrative Law Judge, after consultation with the Court Clerk, determines that an application has been filed on an improper docket as set forth in (a) of this Section, the Commission shall enter an order transferring the application to the proper docket. The Judicial and Legislative Services shall send the order transferring the application to the proper docket to the applicant by mail, facsimile, or electronic mail, who shall be responsible for sending the order to all parties of record.

(d) **Procedural dockets.** In addition to the subject matter dockets described in (a) of this Section, the Commission may, from time to time, designate procedural dockets.

(e) For the purposes of documentation produced by the case management feature of the Electronic Filing System, individual applications or causes may be denoted as dockets and daily and weekly court calendars may be denoted as agendas.

SUBCHAPTER 7. COMMENCEMENT OF A CASE

PART 1. GENERAL

165:5-7-1. General application and notice requirements

(a) **Scope.** Except where otherwise specifically provided in this Subchapter, including the Petroleum Storage Tank Division at OAC 165:5-21-3, the provisions of this Section shall govern the commencement of a case filed with the Commission and over which the Commission may exercise jurisdiction, including applications for declaratory rulings as to the applicability of any rule or order of the Commission.

(b) **Form.** Every case shall be commenced by:

- (1) An application.
- (2) A complaint.
- (3) An order of the Commission commencing a case.

(c) **Caption.** The application or complaint shall be headed by a caption, which shall contain:

- (1) The heading, "Before the Corporation Commission of the State of Oklahoma".
- (2) The applicant.
- (3) The relief sought. In the case of a conservation docket or pollution docket case, the statement shall contain the legal description of the lands involved in the case.
- (4) The docket identifying initials, year prefix, and case number, pursuant to OAC 165:5-5-1.
- (5) The title of the document.
- (6) In the case of an enforcement docket case, the caption shall contain the name(s) of the respondent(s).

(d) **Body.** The body of the application or complaint shall consist of five numbered paragraphs, if applicable, as follows:

- (1) **Applicants and respondents identified.** The applicant shall be identified, including name, address, electronic mail address, and telephone number of his attorney or designated representative and the nature of the applicant's interest in the subject matter of the case; and the name and address of each person (if any) named as respondent.
- (2) **Allegation of facts.** The allegation of fact stated in the form of ultimate facts, without unnecessary detail, upon which the right to relief is based. The allegations will be stated in numbered subparagraphs as necessary for clarity.
- (3) **Legal authority.** Citations of statutes, rules, orders, and decided cases authorizing the relief sought; including, in the case of a complaint, the laws, rules, regulations, or orders alleged to have been violated. Statutes shall be cited by title and section. Rules and orders of the Commission shall be cited by number. Decided cases shall be cited by citation to official reports. Quotations from legal authorities shall not be required.
- (4) **Relief sought.** A brief statement of the provisions of the order, authority, or other relief sought. An application relating to oil and gas conservation shall seek only one type of relief. Formal prayer for relief shall not be required.

(5) **Specify order to be affected.** An application to vacate, alter, modify, or amend an order shall state the specific order in the body which is sought to be vacated, altered, modified, or amended.

(e) **Certification.** The application shall be signed by the applicant, or an authorized agent of the applicant, or by the attorney for the applicant, and shall set out the mailing address, telephone number, electronic mail address and bar identification number of the person so signing it, as applicable. The person signing the application shall be deemed, on signing same, to be certifying that:

(1) He has read the application.

(2) To the best of his knowledge, information, and belief formed after reasonable inquiry the facts and allegations contained in the application are true and correct.

(3) The application is not filed to harass or to cause unnecessary delay or needless expense.

(f) **Service of an application.** Except as hereinafter provided in this Subchapter, every application and notice of hearing stating the date on which the case is set for hearing, if required, in which a person is named a respondent shall be served by regular mail on each respondent named therein and Commission staff counsel by the person filing the application.

(g) **Manner of service.** All documents subsequent to the application in a case shall be served on a party of record through the ECF System, or by regular mail, electronic mail, or in person, except where the rules of this Chapter or a statute requires a specific mode of service which shall be followed. Service on a corporation may be by delivery to the registered corporate agent, or by delivery to the principal place of business of the corporation. Service outside the United States and its territories shall be by any means provided by Federal Rule of Civil Procedure 4(f). For purposes of this Section, a corporation may designate its principal place of business by filing a notice thereof with the Court Clerk. When an attorney has appeared of record for a person, all subsequent service shall be on the attorney. Service through the ECF System, or by mail, or electronic mail shall be complete on the date and time of transmittal except where otherwise provided in this Chapter or by statute; provided, that a person may be granted appropriate relief upon showing that a document so served was not received, or delivery thereof was delayed.

(h) **Certificate of service.** Except where an affidavit of mailing is required by law or by this Subchapter, a certificate of service shall be filed following or with the filing of every document. The certificate of service shall contain a list of the persons served and the certification that on the date stated a copy of the document was mailed, postage prepaid, mailed electronically or delivered to each person listed.

(i) **Service not jurisdictional.** Service prescribed by the rules of this Subchapter shall not be jurisdictional except where so provided by the Constitution or by statute. Failure to comply with the provisions of this Section as to mailing and service of notice shall not deprive the Commission of jurisdiction of the application or complaint, but shall be grounds for such appropriate relief as the Commission may order.

(j) **Publication of notice.** Every application, except as provided in this Chapter for motor carrier and public utility applications, shall be accompanied by a notice of hearing, which date shall be set by the Commission. The notice of hearing shall be published as provided in the rules of this Subchapter.

(k) **Signatures.** The notice of hearing shall contain the typewritten name of each current Commissioner at the bottom of the notice, which shall serve as the Commissioner's electronic signature, followed by the signature of the person filing the application.

(l) **Content of notice.** The notice shall contain:

- (1) The caption from the application.
- (2) The time, date, and place of hearing.
- (3) Briefly the general nature of the order, rule, regulation or other relief sought.
- (4) In oil and gas cases, where applicable, the names or description of all common sources of supply affected by the order sought; or that the entire state would be affected.
- (5) Who to contact for additional information.

(m) **Form of notice.** The notice shall conform substantially to the form shown in Appendix A to this Chapter.

(n) **Notice by publication.**

- (1) When a case other than an oil and gas or Petroleum Storage Tank Division case is commenced, the applicant shall cause the notice of hearing prescribed in (j) through (l) of this Section to be published in one or more newspapers of general circulation, on dates and for periods as required by law, or this Subchapter, or as the Commission shall order.
- (2) In oil and gas cases, unless otherwise provided in this Subchapter, the notice of hearing shall be published one time at least fifteen (15) days prior to the hearing in a newspaper of general circulation published in Oklahoma County, Oklahoma and in a newspaper of general circulation published in each county in which the lands embraced in the application are located.
- (3) Publication shall be at the expense of the applicant, and shall be made in a newspaper which has met the statutory requirements for publication of legal notices. Written proof of publication shall be filed in the case.
- (4) Proof of publication shall be established by an original proof of publication.

(o) **Effective date prior to date of issuance of order.** No order may be made effective prior to its date of issuance without evidence placed into the record that the approval of such effective date is necessary. An effective date prior to the date of issuance of the order shall be requested in the application and placed in the special relief paragraph of the notice of hearing.

(p) **Notice of motor carrier motions and applications.** Notice of all motor carrier motions and applications shall be printed on the Commission docket as prescribed by law for circulation to the public.

PART 3. OIL AND GAS

165:5-7-6. Drilling and spacing unit establishment or modification

(a) Notice of hearing relating to drilling and spacing units shall be published one time at least fifteen (15) days prior to the hearing in a newspaper of general circulation published in Oklahoma County, Oklahoma, and in a newspaper of general circulation published in each county in which lands embraced in the

application are located.

(b) When an applicant proposes to establish, vacate, alter, modify, amend, or extend a drilling and spacing unit, the application and notice shall be served by the applicant no less than fifteen (15) days prior to the date of the hearing, by regular mail, upon each person or governmental entity having the right to participate in production from the proposed drilling and spacing unit or the existing drilling and spacing unit.

(c) A plat or plats shall be attached to each application for an order to establish a drilling and spacing unit or units or to extend existing spacing within a common source or sources of supply, which plat shall show the spacing units requested together with any spacing units abutting or overlapping the area to be spaced, and any abutting spacing units in all spaced formations. An amended plat shall be provided at the time of the hearing in the event drilling and spacing units have been established after the application was filed and prior to the hearing to reflect the status of the spacing at the time of the hearing.

(d) An application to extend spacing from an adjacent drilling and spacing unit shall state in the body of the application the order number that created the spacing in the adjacent unit that applies to the common sources of supply which are sought to be extended by the application. Such request to extend spacing and citation to such order number shall be placed in the special relief paragraph of the notice of hearing.

(e) Where a well has not been commenced to or completed in the common source of supply sought to be spaced, notice of hearing for an order to vacate, alter, amend, extend, or change a prior spacing order shall be served and published as required in (a) of this Section. Such request to vacate, alter, amend, extend, or change a prior spacing order shall be placed in the special relief paragraph of the notice of hearing.

(f) Where two or more orders have issued spacing a common source of supply and such spacing orders have resulted in there being a conflict either as to the size of the unit or as to a common source of supply or a conflict as to the nomenclature of the common source of supply, then the applicant seeking to vacate, alter, amend, or change one of the prior spacing orders shall either file an application to construe and modify the conflicting orders or may amend a relevant application to accomplish the same result. Notice of hearing shall be served and published as required upon the commencement of a proceeding.

(g) The Commission may issue an order establishing horizontal well units for a common source of supply. A horizontal well unit may be established for a common source of supply for which there are already established non-horizontal drilling and spacing units, and said horizontal well unit may include within the boundaries thereof more than one existing non-horizontal drilling and spacing unit for the common source of supply. Upon the formation of a horizontal well unit that includes within the boundaries thereof one or more non-horizontal drilling and spacing units, the Commission shall provide that such horizontal well unit exists concurrently with one or more of such non-horizontal drilling and spacing units, and each such unit may be concurrently developed. Notwithstanding the foregoing, the Commission may vacate any non-horizontal drilling and spacing unit upon a proper showing of a change of conditions or change in knowledge of conditions to justify such vacation or deletion, and any such request to vacate or delete any such non-horizontal drilling and spacing unit may be included in and made a part of any application to form one or more horizontal well units.

(1) In any spacing proceeding to establish or form a horizontal well unit, the application filed in such proceeding shall set forth and describe any non-horizontal drilling and spacing unit that exists concurrently with such horizontal well unit, including the API numbers of the well or wells located in any such non-horizontal drilling and spacing unit.

(2) The order entered in such proceeding shall describe any non-horizontal drilling and spacing unit that exists concurrently with the horizontal well unit, including the API numbers of the well or wells located in such non-horizontal drilling and spacing unit. The order establishing or forming a horizontal well unit that exists concurrently with any non-horizontal drilling and spacing unit shall state, based on the evidence presented, that the consent in writing required by subsection (h) of this Section has been obtained and filed or that a waiver of such consent requirement as authorized by subsection (i) of this Section has been granted by the Commission.

(h) No order of the Commission authorizing a horizontal well unit that overlies any existing well, or portion of any existing drilling and spacing unit with any existing well, producing from the same common source of supply shall be entered until:

(1) at least fifty percent (50%) of the ownership having a right to drill in each such well and drilling and spacing unit consents in writing to the formation of such horizontal well unit and such written consent or consents are filed with the Court Clerk of the Commission in the applicable spacing proceeding or otherwise entered into the record in such proceeding; or

(2) such consent is waived by the Commission. Provided, however, in the event any such order is entered by the Commission without the written consent required above or a waiver of such consent, any horizontal well unit purported to be formed by such order for which such consent is required shall not be effective until such consent is filed with the Court Clerk of the Commission in such spacing proceeding or is otherwise entered into the record of such proceeding or such consent is waived by the Commission. Requests for such consent must be sent by restricted mail to the owners having the right to drill in any existing well and/or drilling and spacing unit producing from the same common source of supply as the proposed horizontal well unit. In addition, if the boundaries of the horizontal well unit do not encompass such existing drilling and spacing unit in its entirety, then the application and notice for the horizontal well unit shall be served by the applicant no less than fifteen (15) days prior to the date of the hearing, by regular mail, upon each person or governmental entity having the right to participate in production from the existing drilling and spacing unit.

(i) Any written consent to the order required under subsection (h) of this Section shall not be a waiver of, nor commitment of, any rights of such owners in either the existing production or the proposed horizontal well unit. If the required percentage of consent cannot be obtained, the applicant may make application to the Commission for a waiver of the consent requirement, and upon a showing of good cause by the applicant, the Commission may waive the consent requirement. For purposes of this subsection, a showing of good cause means applicant must present sufficient testimony and evidence, and the Commission must find in the order, that applicant has established the following:

(1) Due diligence was exercised to locate each owner having a right to drill in any existing well and/or any existing drilling and spacing unit producing

from the same common source of supply as the proposed horizontal well unit;

(2) A bona fide effort was made to obtain the required percentage of consent;

(3) Alternate methods of development are inadequate to prevent waste and to protect correlative rights unless the consent requirement is waived and the proposed horizontal well unit created; and

(4) Any correlative rights or vested rights, or both, of owners in the existing well(s) and/or drilling and spacing unit(s), and in the proposed horizontal well unit, will be adequately protected if the consent requirement is waived and the proposed horizontal well unit created.

(j) If a horizontal well unit formed under subsection (g) of this Section is determined to exist concurrently with any previously formed non-horizontal drilling and spacing unit, or any portion thereof, the order forming such horizontal well unit shall provide that each concurrently existing unit may be separately developed in that a well may be drilled into, completed in, and produce hydrocarbons from the same common source(s) of supply in each such concurrently existing unit, with production from such well to be governed by and allocated pursuant to the applicable unit. If a unit is determined to exist concurrently with another unit and is subject to a prior pooling order, which is in full force and effect, the rights relinquished by a non-participating owner which became vested under such prior pooling order in the same common source(s) of supply shall be treated and recognized as vested rights in any subsequent pooling proceeding covering such other unit. An owner, who participated as a working interest owner under an existing pooling order covering a unit that exists concurrently with another unit, need not participate or continue to participate as a working interest owner under any other pooling order covering such other unit in order to continue to participate as a working interest owner under such existing pooling order; provided, however, if such owner does not participate as a working interest owner under such other pooling order, such owner shall relinquish its rights to participate in any well drilled under or otherwise covered by such other pooling order.

(k) Any spacing order entered by the Commission pursuant to 52 O.S. §87.1(f) which forms a horizontal well unit or units that exceed six hundred forty (640) acres plus tolerances and variances as allowed by statute shall provide that the contemplated lateral length of the initial horizontal well drilled in any such horizontal well unit formed by such order shall be at least seven thousand five hundred (7,500) feet. Such spacing order shall further provide that upon the initial horizontal well drilled under such spacing order reaching its total depth, an affidavit shall be filed in the spacing proceeding in which such order is entered setting forth the lateral length of such initial horizontal well in any horizontal well unit formed by such order.

(l) At the hearing, except for good cause shown, a production plat, type log, and any other exhibits necessary to support the requested relief (e.g. isopach map or structure of the target zone(s)) shall be provided.

(m) The Commission may request that the record be reopened to receive additional information from the applicant prior to issuance of an order.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 14 Ok Reg 2474, eff 7-1-97; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 30 Ok Reg 1033, eff 7-1-13; Amended at 31 Ok Reg 959, eff 9-12-14; Amended at 32 Ok Reg 752, eff 8-27-15; Amended at 35 Ok Reg 67, eff 9-8-17 through 9-14-18 (emergency)¹; Amended at 35 Ok Reg 946, eff 10-1-18; Amended at 37 Ok Reg 1082, eff 10-1-20]

EDITOR'S NOTE: ¹This emergency action expired before being superseded by a permanent action. Upon expiration of an emergency amendatory action, the last prior permanent text is reinstated. Therefore, on 9-15-18 (after the 9-14-18 expiration of the emergency action), the text of section 165:5-7-6 reverted back to the permanent text that became effective 8-27-15, as was last published in the 2016 Edition of the OAC, and remained as such until amended by permanent action on 10-1-18.

165:5-7-6.1. Horizontal well unitization for targeted reservoirs

(a) The application, and the notice of hearing on the application, for an order creating a horizontal well unitization for a targeted reservoir pursuant to 52 O.S. §87.9 shall be served no less than fifteen (15) days prior to the date of the hearing, by regular mail, upon:

- (1) Each person or governmental entity having the right to share in production from the proposed unitization covered by the application; and
- (2) The operator, as shown by the records of the Commission, of each well that is commencing to or currently producing from the targeted reservoir in any unit or any separate tract of land for which no unit has been formed for such targeted reservoir adjoining, cornering or adjacent to the proposed unitization.

(b) If the applicant is the operator of a well commencing to or currently producing from the targeted reservoir in a unit or a separate tract of land for which no unit has been formed for such targeted reservoir adjoining, cornering or adjacent to the proposed unitization, notice of hearing shall be served by the applicant no less than fifteen (15) days prior to the date of the hearing, by regular mail, upon each owner, as shown by the records of the operator, with a working interest in such well in the targeted reservoir.

(c) Notice of hearing regarding an application for an order creating a horizontal well unitization for a targeted reservoir pursuant to 52 O.S. §87.9 shall be published as provided in OAC 165:5-7-1(n)(2).

(d) The application for an order creating a horizontal well unitization for a targeted reservoir shall contain the following:

- (1) The legal description of the lands covered.
- (2) The names and addresses of the applicant and proposed operator or operators of the proposed unitization.
- (3) Allegations concerning the existence of facts relating to the proposed unitization as provided in 52 O.S. §87.9(B).
- (4) A map or plat showing the governmental sections included within the proposed unitization and the location of proposed horizontal well(s) to be drilled for the recovery of oil and gas from the targeted reservoir. If applicable, the map or plat should show the location of all other wells, including abandoned and drilling wells and dry holes, within the targeted reservoir.
- (5) The name and depth of each targeted reservoir to be affected, including any potential adjacent common source of supply.
- (6) A log of a representative well completed in the targeted reservoir which is the subject of the application.
- (7) A plan of development of the area included within the proposed unitization as provided in 52 O.S. §87.6(B)(11) and 52 O.S. §87.9(E). The plan of development must also address the conditions upon which the unit shall terminate.
- (8) Reference to any companion application, identified by the type of requested relief, such as any application for location exception, for pooling, or for any other relief that may be appropriate under the specific facts of a

cause, if such companion application is filed in conjunction with or is pending at the time of the filing of the application for horizontal well unitization.

(e) Each application for an order creating a horizontal well unitization for a targeted reservoir shall be limited to two (2) governmental sections, although the size of the unitization may be expanded by including additional governmental sections up to a maximum unit size of four (4) governmental sections for good cause shown pursuant to 52 O.S. §87.9(C).

(f) An order approving an application for a horizontal well unitization for a targeted reservoir shall include the elements identified in 52 O.S. §87.9(F) and other applicable portions of 52 O.S. §87.9.

(g) Any pooling application filed pursuant to 52 O.S. §87.9(I) regarding a horizontal well unitization for a targeted reservoir shall be filed pursuant to OAC 165:5-7-7.

[Source: Added at 28 Ok Reg 1893, eff 5-19-11 (emergency); Added at 29 Ok Reg 938, eff 7-1-12; Amended at 35 Ok Reg 67, eff 9-8-17 through 9-14-18 (emergency)¹; Amended at 35 Ok Reg 946, eff 10-1-18]

EDITOR'S NOTE: ¹This emergency action expired before being superseded by a permanent action. Upon expiration of an emergency amendatory action, the last prior permanent text is reinstated. Therefore, on 9-15-18 (after the 9-14-18 expiration of the emergency action), the text of section 165:5-7-6.1 reverted back to the permanent text that became effective 7-1-12, as was last published in the 2016 Edition of the OAC, and remained as such until amended by permanent action on 10-1-18.

165:5-7-6.2. Multiunit horizontal wells in targeted reservoirs

(a) The application, which shall be limited to a single well, and the notice of hearing on the application, for an order approving a multiunit horizontal well in a targeted reservoir pursuant to 52 O.S. §87.8 shall be served no less than fifteen (15) days prior to the date of the hearing, by regular mail, upon each person or governmental entity having the right to share in production from each of the affected units covered by the application.

(b) Notice of hearing regarding an application for an order approving a multiunit horizontal well in a targeted reservoir pursuant to 52 O.S. §87.8 shall be published as provided in OAC 165:5-7-1(n)(2).

(c) The application for an order approving a multiunit horizontal well in a targeted reservoir shall contain the following:

- (1) The legal description of the affected units.
- (2) The name and address of the applicant and proposed operator of the proposed well.
- (3) The name and depth of each targeted reservoir to be affected, including any potential adjacent common source of supply.
- (4) The information required by 52 O.S. §87.8(B)(4).
- (5) Allegations concerning the existence of facts relating to the proposed well as provided in 52 O.S. §87.8(B)(6).
- (6) Reference to any companion application, identified by the type of requested relief, such as any application for spacing, for location exception, for increased density, for pooling, for modification of any previous pooling order, or for any other relief that may be appropriate under the specific facts of a cause, if such companion application is filed in conjunction with or is pending at the time of the filing of the application for multiunit horizontal well(s).

(d) An order approving an application for a multiunit horizontal well in a targeted reservoir shall require the allocation of the reasonable drilling, completion and production costs and of the commingled production and proceeds in accordance

with 52 O.S. §87.8(B) and the map(s) addressed in 52 O.S. §87.8(B)(4)(b) must be attached to the order.

(e) Any pooling application filed pursuant to 52 O.S. §87.8(B)(3) involving a multiunit horizontal well for a targeted reservoir shall be filed pursuant to OAC 165:5-7-7.

(f) In the event a multiunit horizontal well covered by 52 O.S. §87.8 is intended to be the initial unit well in any horizontal well unit that exceeds six hundred forty (640) acres plus tolerances and variances allowed by statute, the contemplated completion interval of such well shall exceed ten thousand five hundred sixty (10,560) feet, absent a showing of reasonable cause.

(g) The units that are covered by any multiunit well application filed under this Section, in which the subject multiunit horizontal well is proposed to be drilled and completed, shall not constitute "an adjoining or cornering tract of land or drilling and spacing unit, currently producing from the same common source of supply, toward which tract or unit the well location has been or is proposed to be moved" under OAC 165:5-7-9.

[Source: Added at 28 Ok Reg 1893, eff 5-19-11 (emergency); Added at 29 Ok Reg 938, eff 7-1-12; Amended at 32 Ok Reg 752, eff 8-27-15; Amended at 35 Ok Reg 67, eff 9-8-17 through 9-14-18 (emergency)¹; Amended at 35 Ok Reg 946, eff 10-1-18; Amended at 36 Ok Reg 517, eff 8-1-19]

***EDITOR'S NOTE:** ¹This emergency action expired before being superseded by a permanent action. Upon expiration of an emergency amendatory action, the last prior permanent text is reinstated. Therefore, on 9-15-18 (after the 9-14-18 expiration of the emergency action), the text of section 165:5-7-6.2 reverted back to the permanent text that became effective 8-27-15, as was last published in the 2016 Edition of the OAC, and remained as such until amended by permanent action on 10-1-18.*

165:5-7-7. Pooling

(a) Each pooling application shall include a statement by the applicant that the applicant exercised due diligence to locate each respondent and that a bona fide effort was made to reach an agreement with each such respondent as to how the unit would be developed. The applicant shall present evidence to this effect at the time of hearing.

(b) Notice of hearing for a pooling order, together with the application, shall be served by the applicant no less than fifteen (15) days prior to the date of the hearing, by restricted mail, upon each respondent.

(c) Notice of hearing for a pooling order shall be published pursuant to 165:5-7-1(n)(2).

(d) An Authorization for Expenditure (AFE) which was prepared or revised within forty-five (45) days of the date of the hearing at which it is offered into evidence shall be submitted at the hearing. An AFE for a horizontal well drilled pursuant to 52 O.S. §§87.1(f), 87.8, or 87.9 shall provide well cost estimates for the total footage of the proposed well. If the well is a multiunit horizontal well drilled pursuant to 52 O.S. §87.8, the costs listed in the AFE should be allocated in the pooling order according to the allocation factor assigned to each of the subject drilling and spacing units in the applicable multiunit horizontal well order.

(e) If the applicant anticipates that some other owner of the right to drill may be designated as the operator of the unit well, the body of the application and notice shall so state. In the notice, the request that the applicant or some other owner may be designated operator shall be placed in the special relief paragraph.

(f) No pooling order shall be extended in time except upon the same notice as provided for in the initial application. Such request shall be in the form of a motion filed under the original CD number of the pooling.

(g) Notice of hearing for a redetermination of well costs shall be as provided in the initial application. Such request shall be in the form of a motion filed under the original CD number of the pooling.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 35 Ok Reg 67, eff 9-8-17 through 9-14-18 (emergency)¹; Amended at 35 Ok Reg 946, eff 10-1-18]

EDITOR'S NOTE: ¹This emergency action expired before being superseded by a permanent action. Upon expiration of an emergency amendatory action, the last prior permanent text is reinstated. Therefore, on 9-15-18 (after the 9-14-18 expiration of the emergency action), the text of section 165:5-7-7 reverted back to the permanent text that became effective 6-25-93, as was last published in the 2016 Edition of the OAC, and remained as such until amended by permanent action on 10-1-18.

165:5-7-8. Exception to escrowing monies for unknown or unlocated owners

(a) Notice of hearing for an order granting an exception for the escrowing of monies in a financial institution for unknown or unlocated owners and permitting the escrowing of such monies in an in-house account shall be published one time at least fifteen (15) days prior to the hearing in a newspaper of general circulation in Oklahoma County, Oklahoma, and in a newspaper of general circulation published in the county where the holder's principal office in the state is located.

(b) Notice of hearing shall be served on the Commission's Manager of the Mineral Owners Escrow Account by mail at least ten (10) days prior to the hearing.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 11 Ok Reg 3675, eff 7-11-94]

165:5-7-9. Well location exception

(a) The application, which shall be limited to a single well, and notice of hearing for an order granting a well location exception for a well drilled or to be drilled for oil or gas into any common source of supply at a location other than that authorized by a rule or order of the Commission shall be served by the applicant no less than fifteen (15) days prior to the date of the hearing, by regular mail, upon the operator of each well located in an adjoining or cornering tract of land or drilling and spacing unit, currently producing from the same common source of supply, toward which tract or unit the well location has been or is proposed to be moved. The application and notice of hearing shall specify the name(s) of the well(s) and operator(s) of the well(s) towards which the location exception well is moving. The application and notice of hearing also shall be served, in the manner required above, upon the operator of any well located in an adjoining or cornering tract of land or drilling and spacing unit currently producing from the same common source of supply, if the requested well location is closer to the offsetting well than would be permitted under the applicable well location tolerances or requirements. Provided, however, if the applicant, or any other entity to be authorized to drill or otherwise operate the subject well, is the operator of any of the wells identified above, then the application and notice of hearing shall be served, in the manner required above, upon each working interest owner in any such well.

(b) An application and notice of hearing for an order granting a well location exception pursuant to this Section may also include a request for an exception to OAC 165:10-3-28(c)(2). The application and notice of hearing shall be served in the manner required in subsection (a) of this Section, and shall contain the information required in such subsection. Where an application includes requested relief for both a location exception and exception to OAC 165:10-3-28(c)(2), such application shall separately identify respondents for the location exception and respondents for the exception to OAC 165:10-3-28(c)(2).

(c) For any well other than a directionally drilled well or a horizontal well, the application and notice of hearing for a location exception shall specify the proposed or actual surface location of the well expressed in feet from the two nearest boundaries of the drilling and spacing unit, or, if no drilling and spacing unit has been established, from the two nearest boundaries of the mineral estate(s) upon which the well will be or has been drilled.

(d) For a directionally drilled well, the application and notice of hearing for a location exception shall specify the proposed or actual subsurface location of the well's entry into and the proposed or actual subsurface location of the well's exit from the common source of supply for which the location exception is requested, expressed in feet from the two nearest boundaries of the drilling and spacing unit or, if no drilling and spacing unit has been established, from the two nearest boundaries of the mineral estate(s) upon which the well will be or has been drilled. For purposes of this section, a directionally drilled well does not include a horizontal well.

(e) For a horizontal well, the application and notice of hearing for a location exception shall specify the proposed or actual subsurface location of the completion interval, as defined by OAC 165:10-3-28, within the common source of supply for which the location exception is requested, expressed as the distance in feet from the nearest boundaries of the drilling and spacing unit or, if no drilling and spacing unit has been established, from the nearest boundaries of the mineral estate(s) upon which the well will be or has been drilled.

(f) The proposed subsurface location for a directionally drilled well or a horizontal well may be described in the application and notice of hearing as no closer than specified footages from the nearest boundaries of the drilling and spacing unit or, if no drilling and spacing unit has been established, from the nearest boundaries of the mineral estate(s) upon which the well will be drilled.

(g) At the time of hearing, a well's location, as set out in the application and notice of hearing, may be changed to another location that is not closer to the boundaries of the drilling and spacing unit or mineral estate(s) described in the application and notice of hearing, that is not closer to any offsetting well the operator of which, or any working interest owner in which, was required to be notified under this section, and that does not require notice to additional operators or working interest owners under this section.

(h) If at the time of the hearing on an application for a directionally drilled well or a horizontal well, the applicant does not have the results of the well survey required by OAC 165:10-3-27, then the Administrative Law Judge may recommend the issuance of an interim order granting the application and, if so, shall consider whether to adjust the allowable based on the potential locations of the well in each common source of supply for which the order is sought. All potential locations shall be considered in the interim order. If the directionally drilled well or the horizontal well is drilled and completed in compliance with the interim order, the well shall be assigned the allowable as set out in the interim order.

(i) If a directionally drilled or horizontal well is drilled and completed in compliance with an interim order approving a location exception, and no party of record has requested a hearing, the Commission may issue a final order approving the location exception, without further hearing, based on an administrative review by the Commission's Technical Services Department of the following documents, which the applicant must file with the Court Clerk for the record: the directional survey, a final plat showing the actual location of the lateral, and the well completion report. The applicant must also submit a proposed final order to the

Commission's Technical Services Department in any cause handled through the administrative review process. In the event the directional survey shows that a directionally drilled or horizontal well was not drilled and completed in compliance with the interim location exception order, the applicant shall notify the Commission and all of the parties entitled to notice in the original hearing establishing the interim order by filing an amended application in the cause setting forth the actual subsurface locations of the well and by giving proper notice thereof. The actual subsurface locations of the well will be considered at a hearing conducted on the date specified in the interim location exception order, or on such date to which the hearing is continued.

(j) Notice of hearing on an application for an order granting a well location exception for a well drilled or to be drilled for oil or gas at a location other than that authorized by a rule or order of the Commission shall be published pursuant to OAC 165:5-7-1(n)(2).

(k) An application for an exception to the minimum distance requirements specified by OAC 165:10-3-28 (c)(2) and (c)(3) for the completion interval of a horizontal well, the notice of hearing for such exception proceeding and any resulting order in such proceeding shall include the API numbers of the existing well or wells being encroached upon by such horizontal well requiring such exception. Such application shall set forth the proposed subsurface location tolerance area or if available, the actual subsurface locations of the completion interval of such horizontal well requiring such exception. The proposed or actual subsurface locations, as applicable, of the completion interval of the horizontal well requiring such exception may be amended at the hearing on any such application. If the results of the well survey required by OAC 165:10-3-28(c)(1) are not available at the time of the hearing on such an application, the Administrative Law Judge may recommend the issuance of an order granting the application on an interim basis. Any final order issuing in such a proceeding shall specify the distance in feet between the completion interval of the subject horizontal well and the well or wells being encroached upon by such horizontal well requiring such exception.

(l) At the hearing, except for good cause shown, a production plat and any other exhibits necessary to support the requested relief (e.g. isopach map or structure of the target zone(s), and cross section) shall be provided.

(m) The Commission may request that the record be reopened to receive additional information from the applicant prior to issuance of an order.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 14 Ok Reg 2474, eff 7-1-97; Amended at 24 Ok Reg 1781, eff 7-1-07; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 29 Ok Reg 938, eff 7-1-12; Amended at 32 Ok Reg 752, eff 8-27-15; Amended at 36 Ok Reg 517, eff 8-1-19; Amended at 37 Ok Reg 1082, eff 10-1-20]

165:5-7-10. Increased well density

(a) Notice of hearing.

(1) For increased well density applications, notice of hearing shall be served by the applicant no less than fifteen (15) days prior to the date of the hearing by regular mail upon:

(A) Each person or governmental entity entitled to oil or gas or the proceeds of oil or gas produced from the common source of supply in the drilling and spacing unit for which the application for an increased density well has been filed; and

(B) The operator, as shown by the records of the Commission, of each well which is commencing or currently producing from the same common source of supply in the drilling and spacing unit or

any separate tract of land for which no drilling and spacing unit has been formed for such common source of supply adjoining, cornering or adjacent to the drilling and spacing unit for such an increased density well.

(2) If the applicant is the operator of a well commencing or currently producing from the same common source of supply applicable to the increased density well in a drilling and spacing unit or a separate tract of land for which no drilling and spacing unit has been formed for such common source of supply adjoining, cornering or adjacent to the drilling and spacing unit for such increased density well, notice of hearing shall be served by the applicant no less than fifteen (15) days prior to the date of hearing by regular mail upon each owner, as shown by the records of the operator, with a working interest in such well in such common source of supply.

(3) If the applicant is seeking approval of an increased density well to be completed in a common source of supply for which the Commission has established field rules, and for which no application for an increased density well in such common source of supply has been approved by the Commission subsequent to January 1, 1998, and prior to June 21, 1999, notice of hearing shall be served by the applicant no less than fifteen (15) days prior to the date of hearing by regular mail upon the operator, as shown by the records of the Commission, of each well commencing or currently producing from that same common source of supply governed by the field rules.

(4) Where some person other than the applicant may be authorized to drill an increased density well, the notice shall so state.

(5) No person except for those persons provided for in this subsection shall be entitled to notice of the hearing on an application for approval of an increased density well in any drilling and spacing unit.

(b) **Publication of notice.** Notice of hearing for an increased density well shall be published pursuant to 165:5-7-1(n)(2). If the increased density well is to be completed in a common source of supply for which the Commission has established field rules and for which no application for an increased density well in such common source of supply has been approved by the Commission subsequent to January 1, 1998, and prior to June 21, 1999, notice of the hearing shall also be published one time at least fifteen (15) days prior to the hearing in a newspaper of general circulation published in each county in which the lands subject to the field rules are located.

(c) **Commingled production.** Where production from an original unit well has been commingled and the operator has failed to obtain a commingling order for that well, an increased density well shall not be produced from the commingled common sources of supply until such time that proof of a commingling order is entered at the hearing for increased density.

(d) **Exhibits.** At the hearing, except for good cause shown, a production plat, isopach map, and any other exhibits necessary to support the requested relief shall be provided.

(e) **Additional Information.** The Commission may request that the record be reopened to receive additional information from the applicant prior to issuance of an order.

165:5-7-11. Change of operator

(a) **Scope.** This Section addresses designation of operators under forced pooling orders, location exception orders, and increased density orders.

(b) **Designation of operator under a forced pooling order.** Each order forced pooling the rights and equities in a drilling and spacing unit shall designate at least one operator to operate the well or unit. In addition, the Commission may designate one or more alternate operators in the order.

(c) **Procedure for obtaining a change of operator under a forced pooling order.** Application, notice and hearing shall be prerequisites to the issuance of an order changing or deleting a designation of operator in any forced pooling order. Notice shall be given by certified mail at least fifteen (15) days prior to the hearing to the respondents to the pooling order or to their successors in interest and shall be published as required in OAC 165:5-7-1. Provided, however, this procedure shall not be the exclusive method of obtaining a change of operator under a forced pooling order as the use of the optional procedure set forth in OAC 165:5-7-11(g) below is still available. If such optional Form 1073A application is used, Applicant must still provide personal notice by certified mail to the respondents to the pooling order or their successors in interest as well as notice by publication.

(d) **Optional designation of operator for location exception and increased density orders.** A designation of operator shall not be necessary for an order for either a well location exception or increased well density. In any situation where a location exception or increased density order designates an operator, the Commission may issue an order either appointing a successor operator or removing the designation of operator provision.

(e) **Procedure for obtaining a change in operator designation regarding increased density and location exception orders.** Application, notice and hearing shall be prerequisites to issuance of an order changing or deleting a designation of operator; provided, that no application, notice, or hearing shall be required to change or delete the designation of operator in increased density or location exception orders when:

- (1) The interest of the currently designated operator is transferred to its subsidiary or parent company, or a subsidiary of a parent company;
- (2) The interest of the currently designated operator is transferred to a surviving or resulting corporation or business entity due to, respectively, a merger, consolidation or reorganization involving the transferor and transferee. As used in this paragraph, "business entity" means a domestic or foreign partnership, whether general or limited; limited liability company; business trust; common law trust, or other unincorporated business; or
- (3) The currently designated operator undergoes a name change. The relief afforded by this paragraph is not applicable to situations where the name change involves the following conditions:
 - (A) The assignment of a new Federal Employer Identification number by the Internal Revenue Service to the new company;
 - (B) The name change is accompanied by a change in the majority of partners in a partnership;
 - (C) The name change is associated with a divorce between a husband and wife when the husband and wife comprise a partnership;
 - (D) The name change is associated with the death of one spouse in a partnership comprised of a husband and wife;

- (E) The name change involves a sole proprietorship; or
- (F) The name change is associated with such other circumstances where the Commission determines upon application, notice and hearing that the relief provided in this paragraph is not applicable, or that an exception to any exclusion should be granted.
- (G) As used in this subsection, the term "partnership" means a domestic or foreign partnership, whether general or limited.

(4) In such events, the parent, subsidiary, surviving or resulting corporation or business entity or currently designated operator who has undergone a name change shall be substituted as designated operator upon filing and approval of Form 1073, required by OAC 165:10-1-15.

(f) **Amendment of multiple orders.** The applicant may use one application to amend two or more orders, even though the orders grant different types of relief. For purposes of this Chapter, such an application shall be considered as an application for a single form of relief.

(g) **Use of Optional Form 1073A application.**

(1) An applicant shall have the option to use Commission Form 1073A for the application and Form 1073B for notice of application or Form 1073C for notice of hearing.

(2) The Form 1073A shall include the following information:

- (A) The order number and type of order.
- (B) The name and legal description of the applicable well or drilling and spacing unit.
- (C) The OTC operator numbers of the current operator and the proposed operator.
- (D) The OTC lease number and API number.
- (E) The classification of the well.

(3) If the space provided on the form is insufficient to include the necessary information related to amendment of multiple orders, then the applicant shall attach to the form an exhibit with the necessary information.

(h) **Personal notice requirements for location exception and increased density orders.** With respect to a location exception or increased density order, the applicant shall mail or deliver a copy of the application and notice of hearing to each current working interest owner in the well.

(i) **Special notice provisions applicable to notices of hearing.** For purposes of this Section, the notice of hearing shall contain a special provision apprising the respondent of the requirements for protests under (j) of this Section.

(j) **Requirements for protests.** Any person desiring to protest an application shall have fifteen (15) days after receipt of notice in which to file a written protest to the application. Failure to submit a written protest within the fifteen (15) day period shall be deemed consent to the granting of the application. If the application is protested within the fifteen (15) days allowed, the applicant shall have the notice of hearing published pursuant to 165:5-7-1(n)(2).

(k) **Summary disposition of unopposed applications.** Applications not contested may be disposed of by announcement, without necessity of counsel appearing.

(l) **Compliance with Form 1073 requirement.** The applicant is required to file a Form 1073 transfer of operator with the Oil and Gas Conservation Division pursuant to OAC 165:10-1-15.

165:5-7-12. Applications; determination of allowables

(a) **Scope.** Any applicant seeking relief under 165:10-13-5, 165:10-13-8, 165:10-15-1(g), 165:10-15-1(h), 165:10-15-16, and 165:10-15-18 shall have the option to proceed under either (b) through (i) of this Section or 165:5-7-1 and other applicable rules of practice.

(b) **Application.** The application shall be submitted on Form 1030 to the Technical Department of the Oil and Gas Conservation Division of the Oklahoma Corporation Commission, 2101 North Lincoln Boulevard, Oklahoma City, Oklahoma, 73105-4993 for filing with the Commission.

(c) **Exhibits.** The applicants shall submit at the time of filing of the application all exhibits and data.

(d) **Notice of application.**

(1) **Contents.** The notice of the application shall contain the following information:

(A) A brief description of the relief sought.

(B) The terms of the protest period.

(C) The name, address, and telephone number of the applicant or its representative, whom anyone may contact for additional information concerning the application.

(2) **Form.** The applicant shall prepare the notice of application to substantially comply with the example shown in Appendix H to this Chapter.

(3) **Persons to whom notice shall be given.** The applicant shall serve a copy of the application and notice of the application upon:

(A) The operator of the well subject to the application if the applicant is not the operator of the subject well.

(B) All operators of wells offsetting the well for which the relief is requested.

(C) All working interest owners of all offset wells operated by the applicant, if the applicant is the operator of the subject well.

(4) **Publication of notice.** The applicant shall have the notice of application published pursuant to 165:5-7-1(n)(2).

(5) **Proof of notice.** The applicant shall submit a certificate of mailing and an affidavit of publication to show compliance with the requirements of this Section.

(e) **Protests.**

(1) **Timely protests.** Any person objecting to the granting of the application shall file a written protest within the appropriate protest period. If a protest is filed after filing of the application but before commencement of the protest period, said protest shall be deemed to have been timely filed.

(2) **Late protests.**

(A) Failure to file a protest within the prescribed time period shall be deemed a waiver of protest.

(B) The Commission may reinstate a late filed protest upon motion for good cause shown.

(3) **Form of protest.** The protestant shall file with the Court Clerk of the Commission its protest which shall be entitled "Protest" and which shall contain the following information:

(A) Caption from application.

(B) Title - Protest.

(C) Name, address, and telephone number of protesting parties.

(D) Reasons for protest.

(4) **Notice to applicant of protest.** The Protestant shall serve the applicant with a copy of his protest within five (5) days after filing of the protest.

(f) Protest periods.

(1) **Initial protest period.** Any person objecting to the granting of the application shall file a written protest during the protest period, which shall run for fifteen (15) days from the date of the latest of the following events:

(A) Filing of the application.

(B) Filing of all required exhibits.

(C) The date on which the last publication was made.

(D) The date of completion of service of process on all respondents in the cause.

(2) **Additional protest period.** After expiration of the protest period, an additional fifteen (15) day protest shall run if:

(A) The applicant amends the application to change the location or nature of the requested relief; or

(B) The applicant files amended applications in order to re-notice original parties, or initially notice new parties to the application.

(C) The additional protest period shall run from the date of completion of service of the amendment on the respondents in the cause.

(g) Unprotested applications.

(1) **Administrative review.** If the application is unprotested, the Oil and Gas Conservation Division shall review the application without a hearing, and it shall report its finding to the Commission concerning what relief, if any, should be granted.

(2) **Remedies after denial or modification.** If the Oil and Gas Conservation Division recommends denial or modification of the relief requested by the application, the applicant may move for a hearing de novo or file exceptions to the report pursuant to 165:5-13-5.

(h) **Withdrawal of protest.** If all protests are withdrawn, the application shall be remanded for administrative review under (g) of this Section.

(i) Protested applications.

(1) **Hearing required.**

(A) A hearing shall be required on each timely protested application except as provided in (h) of this Section.

(B) A hearing may also be requested by the subject operator upon denial of the administrative application by the Technical Department of the Oil and Gas Conservation Division of the Commission.

(2) **Notice of hearing.** The applicant shall obtain a hearing date from the Judicial and Legislative Services. The applicant shall send a copy of the notice of hearing to each party of record not later than fifteen (15) days before the hearing date.

(3) **Contents of notice.** The notice of hearing shall contain the date, time, and place of hearing.

(4) **Form.** The applicant shall prepare the notice of hearing to comply substantially with the form shown in Appendix I to this Chapter.

165:5-7-13. Applications filed under the Production Revenue Standards Act, 52 O.S. Section 570.1, et seq.

(a) Each application for relief under 165:10-27-8 and 165:10-27-9 shall be filed in the Office of the Court Clerk and assigned a number on the Conservation Docket (CD).

(b) The applicant shall serve a copy of the application and notice of hearing, by regular mail, upon each named respondent and the operator of the well. If the applicant is the operator of said well, then notice shall be served on each working interest owner in the well.

(c) Notice of hearing filed pursuant to this Section shall be published Pursuant to 165:5-7-1(n).

165:5-7-16. Priority schedule for supply demand imbalance

(a) Notice of hearing for an order relating to the priority schedule for supply demand imbalance in relation to a single well shall be published pursuant to 165:5-7-1(n)(2).

(b) Notice of hearing for an order relating to the priority schedule for supply demand imbalance, where an exception for a single well is sought or where it is sought to classify a well in a different priority, together with the application, shall be served by the applicant not less than fifteen (15) days prior to the hearing, by regular mail, upon any purchaser or purchasers from the well and to all operators of offsetting wells in sections adjoining the section where the well is located which are producing from the same common source of supply. In addition, the operator of any well producing from the same common source of supply located in the same section as the well which is the subject of the application shall be given the same notice as required in this Section. Where the applicant is also the operator of an offsetting well, then the applicant shall mail the application and notice to all working interest owners in the offsetting well as required in this Section.

(c) Notice of hearing for a system-wide deviation from the priority schedule shall be published pursuant to 165:5-7-1(n)(2).

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93]

165:5-7-17. Ratable sharing of revenues; order of enforcement

(a) Notice of hearing for an order of enforcement relating to ratable sharing of revenues shall be published pursuant to 165:5-7-1(n)(2).

(b) Notice of hearing for an order of enforcement relating to ratable sharing of revenues shall be served by the applicant not less than fifteen (15) days prior to the

hearing, by regular mail, upon each interest owner in the well.

165:5-7-20. Unitized management of a common source of supply

(a) Notice of hearing for an order creating a unit pursuant to 52 O.S. §287.1, et seq., shall be served by the applicant no less than fifteen (15) days prior to the date of the hearing, by regular mail upon each person who would be entitled to share in the production from the proposed unit.

(b) Notice of hearing for an order creating a unit pursuant to 52 O.S. §287.1, et seq., shall be published pursuant to 165:5-7-1(n)(2).

(c) Provision for amending or terminating the unit shall be in the Plan of Unitization. To amend the Plan of Unitization, the order creating the unit shall be amended and notice shall be as provided for an application seeking an order creating a unit pursuant to 52 O.S. §§287.1, et seq. When a unit is terminated in accordance with the terms of the Plan of Unitization, a copy of the certificate of dissolution filed in the county in which the lands are located shall also be filed with the Commission's Well Records Department. In such causes, no Commission action shall be required to terminate a unit if terminated in accordance with the Plan of Unitization. Where the Plan of Unitization does not provide for amendment or termination of a unit, an application may be filed seeking relief from the order creating the unit and notice shall be given as provided for the filing of an application in the original cause.

(d) The application for an order creating a unit pursuant to 52 O.S. §287.1, et seq., shall contain the following:

- (1) The names and addresses of the operator or operators of the unit.
- (2) A plat showing the lease, group of leases or unit(s) included within the proposed unit; the location of the proposed injection well or wells and the location of all oil and gas wells, including abandoned and drilling wells and dry holes; and the names of all operators offsetting the area encompassed within the unit.
- (3) The common source of supply in which all wells are currently completed.
- (4) The name, description, and depth of each common source of supply to be affected.
- (5) A log of a representative well completed in the common source of supply.
- (6) A description of the existing or proposed casing program for injection wells, and the proposed method of testing casing.
- (7) A description of the injection medium to be used, its source and the estimated amounts to be injected daily.
- (8) For a unit with an allocated pool, a tabulation showing recent gas-oil ratio and oil and water production tests for each of the producing oil and gas wells.
- (9) The proposed plan of development of the area included within the unit.

(e) A copy of the application, without the attachments provided in (d)(1) through (9) of this Section, and notice of hearing shall be mailed to the owner or owners of the surface of the land upon which the unit is located. A copy of the application, with attachments and notice of hearing shall be mailed to each operator offsetting the unit as shown on the application.

165:5-7-21. Unitized management of a common source of supply; brine and associated gas

(a) Notice of hearing for an order creating a unit pursuant to

(b) Notice of hearing for an order creating a unit pursuant to 165:10-3-40 shall be published pursuant to 165:5-7-1(n)(2).

(c) Provision for amending or terminating the unit shall be in the Plan of Unitization. To amend the Plan of Unitization, the order creating the unit shall be amended and notice shall be as provided for an application seeking an order creating a unit pursuant to 165:10-3-40. When a unit is terminated in accordance with the terms of the Plan of Unitization, a copy of certificate of dissolution filed in the county in which the lands are located shall also be filed with the Commission. In such causes, no Commission action shall be required to terminate a unit if terminated in accordance with the Plan of Unitization. Where the Plan of Unitization does not provide for amendment or termination of a unit, an application may be filed seeking relief from the order creating the unit and notice shall be given as provided for the filing of an application in the original cause.

(d) The application for an order creating a unit pursuant to 165:10-3-40 shall contain the following:

(1) The names and addresses of the operator or operators of the unit.

(2) A plat showing the lease, group of leases or unit(s) included within the proposed unit, the location of the known proposed injection well or wells, and the location of all existing brine wells including abandoned, drilling and dry holes, and the names of all operators offsetting the area encompassed within the unit producing from or injecting into the common source of supply affected by the unit.

(3) The common source of supply in which all wells are currently completed.

(4) The name, description, and depth of each common source of brine supply to be affected.

(5) A log of a representative well completed in the common source of supply.

(6) The proposed plan of development of the area included within the unit.

(7) The approval of fifty-five percent (55%) of the ownership named in the unit application has been obtained, or will be obtained prior to the unit becoming effective.

(e) A copy of the application, with attachments, and notice of hearing shall be served by regular mail to each person who would be entitled to share in production from the proposed unit, and to each operator offsetting the unit as shown on the application.

(f) Category B surety shall be a requirement of a person, company, corporation, partnership, etc., filing an application to produce brine for the extraction of minerals and the reinjection of minerals and the reinjection or disposal of the effluent. The amount of surety shall be twenty-five thousand (\$25,000) dollars per well or a maximum of one hundred thousand (\$100,000) dollars for each authorized

operator.

165:5-7-28. Procedure for aquifer exemption

(a) Each application for an order designating a USDW as an exempted aquifer shall comply with the requirements of OAC 165:5-7-1.

(b) Within two (2) days after filing an application, the applicant shall file with the Court Clerk and submit to the Director of Underground Injection Control (UIC) for the Conservation Division the following:

(1) Plat of the governmental section(s) underlain by the aquifer with the production for the area designated thereon.

(2) Copies of completions records (1002A) for the oil and gas disposal and injection well(s) in the aquifer or a tabulation of the wells indicating the following information, if available, from public records:

(A) Dates the wells were drilled.

(B) The present status of the wells.

(3) Analysis of total dissolved solids for the waters produced from the aquifer to be exempted.

(4) An affidavit stating that the aquifer does not currently serve as a source of drinking water.

(5) Prefiled testimony, as provided in 165:5-13-3(j), by sworn statement, that the aquifer cannot now or has no reasonable future prospect of serving as a source of drinking water because:

(A) It is mineral, hydrocarbon or geothermal energy producing.

(B) It is situated at a depth or location which makes recovery of water for drinking water purposes economically or technologically

impractical.

(C) It is so contaminated that it would be economically or technologically impractical to render that water fit for human consumption.

(6) Prefiled testimony, as provided in 165:5-13-3(j), by sworn statement, as to the hydrological connection of the aquifer to any other aquifer or portion thereof with a TDS content of 5,000 ppm or less.

(7) The requirements of (4) and (5) of this subsection may be waived by the Director of UIC (Underground Injection Control) if the applicant intends to present the information by testimony at the time of hearing.

(8) Any order issued pursuant to this Section granting an application shall set forth the legal description of the lands underlain by the exempted aquifer and describing the exempted aquifer by approximate depth.

(c) Notice of public hearing shall be made by publication in the county(ies) where the aquifer is located and in Oklahoma County not less than thirty (30) days prior to the hearing date. The notice shall substantially conform to Appendix A to this Chapter. In addition, the notice shall contain a statement that supporting exhibits are available from the Court Clerk for review or copying, under the cause number.

(d) Notice of Hearing, together with a copy of the application, shall be served by the applicant by regular mail, no less than thirty (30) days prior to the hearing, upon the chief executive officer of each incorporated town or municipality, chairman of any rural water district in the area covered by the application, the Oklahoma Water Resources Board, and the Oklahoma State Department of Health, Water Supply Branch.

(e) Objection to granting the application or notice of interest in the cause must be filed no less than five (5) days prior to hearing.

(f) The Commission upon the filing of an application under this Section, shall designate a panel to serve as Administrative Law Judges in the matter, with a designated chairman, pursuant to the rules of the Commission. The panel shall be composed of three (3) members, one with each of the following qualifications:

(1) An attorney experienced in oil and gas matters.

(2) A geologist.

(3) An engineer.

(g) The panel shall make its recommendation to the Commission based upon the record in the cause.

(h) All exceptions to the recommendation of the panel shall be directly to the Commission en banc.

[Source: Amended at 27 Ok Reg 2098, eff 7-11-10]

165:5-7-29. Request for exception to certain underground injection well requirements

(a) Each application for an exception to 165:10-5-1 through 165:10-5-10 shall comply with the requirements of OAC 165:5-7-1(a) through (g).

(b) Each application shall be filed at the UIC Department and shall be verified by a duly authorized representative of the operator. The application and one complete set of attachments, with additional copies as may be required by the Court Clerk, shall be furnished to the Court Clerk.

(c) The application shall be accompanied by the information required in OAC 165:10-5-5(b). The Manager of UIC may waive any particular information depending on the nature of the exception.

(d) Notice of the application shall be published pursuant to 165:5-7-1(n)(2).

(e) If a written objection to the application is filed within fifteen (15) days after the application is published or if hearing is required by the Commission, the application shall be set for hearing and notice thereof shall be given in the same manner as required for the filing of the application. If no objection is filed and if the Commission does not require a hearing, the matter shall be presented administratively to the Manager of Underground Injection Control who shall file the Manager's report and make the Manager's recommendations.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 36 Ok Reg 517, eff 8-1-19; Amended at 37 Ok Reg 1082, eff 10-1-20]

165:5-7-30. Amending existing orders or permits authorizing injection for injection, disposal, or LPG storage wells

(a) Each application for an amendment to an existing order or permit shall be filed on Form 1015 and comply with the requirements of OAC 165:10-5-5(a) and (b).

(b) The application shall also include a statement of facts explaining in detail the nature of and the reason for the amendment, and shall be signed by a duly authorized agent of the operator.

(c) Notice of the application relating to the nature of the amendment shall be published pursuant to OAC 165:5-7-1(n)(2). The notice shall include:

- (1) UIC tracking number.
- (2) Name and address of applicant.
- (3) Location of proposed well to nearest 10-acre tract.
- (4) Well name.
- (5) The geological name of the injection formation.
- (6) The top and bottom of the injection interval.
- (7) Maximum injection pressures.
- (8) Maximum B/D or MCF/D injection rate.
- (9) The type of well (injection, disposal, commercial, LPG storage).

(d) If a written objection to the application is filed with the Commission within fifteen (15) days after notice of the application is published or if hearing is required by the Commission, the application shall be set for hearing and notice thereof shall be given in the same manner as required in OAC 165:5-7-1. If no objection is filed and if the Commission does not require a hearing, the application may be approved administratively by the Manager of Underground Injection Control.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 34 Ok Reg 905, eff 9-11-17; Amended at 37 Ok Reg 1082, eff 10-1-20]

165:5-7-31. Injection of reserve pit fluids

(a) Each application for the approval of the onsite injection of reserve pit fluids (i.e., drilling mud fluids or fracture fluids) used in drilling or well completion shall be filed by the well operator on Form 1015-T and shall be verified by a duly authorized representative of the operator. The application and one complete set of attachments, with additional copies as may be required by the Court Clerk, shall be furnished to the Court Clerk, who shall mail one copy to the Department of Pollution Control.

(b) The application for approval of reserve pit fluid injection shall include:

- (1) Driller's log.
- (2) Electric or radioactivity log (if run).
- (3) Cement bond log (if run).
- (4) Schematic diagram of well showing:
 - (A) Total depth of well.

- (B) Depths of tops and bottoms of casing and cement.
- (C) Size of casing.
- (5) Certificate of service to surface owner.
- (6) Proof of publication.
- (7) Operating data:
 - (A) Maximum pressure.
 - (B) Volume of fluids to be injected.
- (8) Additional information, as the Commission may require.
- (c) Notice shall be provided by mailing or delivering a copy of the application to the owner(s) of the surface of the land on which the injection or disposal well is located and to each operator of a producing leasehold within one-half (1/2) mile of the well location.
- (d) If a written objection to the application is filed within fifteen (15) days after the application is published or if a hearing is required by the Commission, the application shall be set for hearing and notice thereof shall be given in the same manner as required for the filing of the application. If no objection is filed and the Commission does not require a hearing, the matter shall be presented administratively to the Manager of Underground Injection Control who shall file his report and make his recommendations.
- (e) Any operator applying for temporary emergency authority to inject fluids into the annular space shall give written notice to:
 - (1) The Underground Injection Control Department.
 - (2) The surface owner.
 - (3) Each operator of a producing leasehold within one-half (1/2) mile of the well location at least five (5) days prior to the emergency hearing or submit a signed letter of consent from said parties.

[Source: Amended at 9 Ok Reg 2327, eff 6-25-92]

165:5-7-32. [RESERVED]

165:5-7-33. Extension of time for closure of a noncommercial pit

- (a) **Section applicability.** The provisions of this Section shall apply to each application under 165:10-7-16 to extend time for closure of a pit.
- (b) **Application form.** The applicant shall prepare the application in a form which complies with OAC 165:5-7-1.
- (c) **Affidavit.** The applicant shall attach to the application an affidavit explaining the applicant's reasons for the extension.
- (d) **Site inspection.** The applicant shall be responsible for obtaining a site inspection by representative of the Conservation Division.
- (e) **Exhibits.** The applicant shall submit at the time of filing of the application all exhibits and data required by 165:10-7-16.
- (f) **Dismissal for noncompliance.** Failure to complete the application, submit the affidavit and perform the site inspection within sixty (60) days after the date of filing of the application shall be grounds for dismissal of the application.
- (g) **Notice of the Application.**
 - (1) **Contents.** The notice of the application shall contain the following information:
 - (A) A brief description of the relief sought.
 - (B) The terms of the protest period.
 - (C) The data and time for a site inspection to be made by the applicant, a Commission representative, and any interested person.

(D) The name, address, and telephone number of the applicant or its representative, whom anyone may contact for additional information concerning the application.

(2) **Form.** The applicant shall prepare the notice of the application to substantially comply with the form shown in Appendix B to this Chapter.

(3) **Persons to whom notice shall be given.** The applicant shall serve a copy of the application and notice of the application to:

(A) The Soil Conservation District.

(B) Each surface owner and surface lessee of the tract on which the pit is located.

(4) **Publication.** Publication of the notice of the application is required.

(5) **Proof of notice.** The applicant shall submit a certificate of service.

(h) **Protests.**

(1) **Timely protests.** Any person objecting to the granting of the application shall file a written protest within the appropriate protest period. If a protest is filed after filing of the application but before commencement of the protest period, said protest shall be deemed to have been timely filed.

(2) **Late protests.**

(A) Failure to file a protest within the prescribed time period shall be deemed a waiver of protest.

(B) The Commission may reinstate a late filed protest upon motion for good cause shown.

(3) **Form of protest.** The Protester shall file with the Court Clerk its protest which shall contain the following information:

(A) Caption from application.

(B) Title: protest.

(C) Name, address, and telephone number of protesting parties.

(D) Reasons for protest.

(4) **Notice to applicant of protest.** The protestant shall serve the applicant with a copy of his protest within five (5) days after filing of the protest.

(i) **Protest period.**

(1) **Initial protest period.** Any person objecting to the granting of the application shall file a written protest during the protest period which shall run for fifteen (15) days from the last of the following events to occur:

(A) Filing of the application.

(B) Filing of all required exhibits.

(C) The date of completion of service of process on all respondents in the cause.

(D) Site inspection of the facility.

(j) **Unprotested applications.**

(1) **Administrative review.** If the application is unprotested, the Oil and Gas Conservation Division shall review the application without a hearing, and it shall report its finding to the Commission concerning what relief, if any, should be granted.

(2) **Remedies after denial or modification.** If the Oil and Gas Conservation Division recommends denial or modification of the relief requested by the application, the applicants may move for a hearing de novo or file exceptions to the report as under 165:5-13-5.

(k) **Withdrawal of protest.** If all protests are withdrawn, the application shall be remanded for administrative review under (g) of this Section.

(l) **Protested applications.**

- (1) **Hearing required.** A hearing shall be required on each timely protested application except as provided in (k) of this Section.
- (2) **Notice of hearing.** The applicants shall obtain a hearing date from the Judicial and Legislative Services subject to approval by the Manager of Field Operations. The applicants shall send a copy of the notice of hearing to each party of record not later than fifteen (15) days before the hearing date.
- (3) **Contents of the notice.** The notice of hearing shall contain the date, time, and place of hearing.
- (4) **Form.** The applicant shall prepare the notice of hearing to comply substantially with the form shown in Appendix C to this Chapter.

[Source: Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 35 Ok Reg 946, eff 10-1-18]

165:5-7-34. Waiver of pit closure requirements

- (a) **Section applicability.** The provisions of this Section shall apply to each application under 165:10-7-16(e)(9) to exempt an operator from responsibility for closure of a pit and transfer to the surface owner responsibility for maintenance and closure of the pit.
- (b) **Names required.** Each application under this Section shall be filed in the name of the well operator and the surface owner of the land on which the pit is located.
- (c) **Surface owner signature.** The application shall not be approved without the signature of the surface owner on the application.
- (d) **Application form.** The applicants shall prepare the application with a caption in a format which complies with Appendix D to this Chapter.
- (e) **Exhibits.** The applicant shall submit at the time of filing of the application all exhibits and data required by 165:10-7-16.
- (f) **Dismissal for noncompliance.** Failure to complete the application, submit the exhibits, serve the notice and perform the site inspection within sixty (60) days after the date of filing of the application shall be grounds for dismissal of the application.
- (g) **Notice of the application.**
 - (1) **Contents.** The notice of the application shall contain the following information:
 - (A) A brief description of the relief sought.
 - (B) The terms of the protest period.
 - (C) The data and time for a site inspection to be made by the applicant, a Commission representative, and any interested person.
 - (D) The name, address, and telephone number of the applicant or its representative, whom anyone may contact for additional information concerning the application.
 - (2) **Form.** The applicant shall prepare the notice of the application to substantially comply with the form shown in Appendix D to this Chapter.
 - (3) **Persons to whom notice shall be given.** The applicant shall serve a copy of the application and notice of the application to:
 - (A) The Soil Conservation District.
 - (B) Each adjacent surface owner and surface lessee.
 - (4) **Proof of notice.** The applicant shall submit a certificate of service.
- (h) **Protests.**
 - (1) **Timely protests.** Any person objecting to the granting of the application shall file a written protest within the appropriate protest period. If a protest is filed after filing of the application but before commencement of the

protest period, said protest shall be deemed to have been timely filed.

(2) Late protests.

(A) Failure to file a protest within the prescribed time period shall be deemed a waiver of protest.

(B) The Commission may reinstate a late filed protest upon motion for good cause shown.

(3) Form of protest. The protestant shall file with the Court Clerk its protest which shall contain the following information:

(A) Caption from application.

(B) Title: Protest.

(C) Name, address, and telephone number of protesting parties.

(D) Reasons for protest.

(4) Notice to applicant of protest. The protestant shall serve the applicant with a copy of his protest within five (5) days after filing of the protest.

(i) Protest period. Any person objecting to the granting of the application shall file a written protest during the protest period which shall run for fifteen (15) days from the last of the following events to occur:

(1) Filing of the application.

(2) Filing of all required exhibits.

(3) The date of completion of service of process on all respondents in the cause.

(4) Site inspection of the facility.

(j) Unprotested applications.

(1) **Administrative review.** If the application is unprotested, the Oil and Gas Conservation Division shall review the application without a hearing, and it shall report its finding to the Commission concerning what relief, if any, should be granted.

(2) **Remedies after denial or modification.** If the Oil and Gas Conservation Division recommends denial or modification of the relief requested by the application, the applicants may move for a hearing de novo or file exceptions to the report as under 165:5-13-5.

(k) Withdrawal of protest. If all protests are withdrawn, the application shall be remanded for administrative review under (j)(1) of this Section.

(l) Protested applications.

(1) **Hearing required.** A hearing shall be required on each timely protested application except as provided in (k) of this Section.

(2) **Notice of hearing.** The applicants shall obtain a hearing date from the Judicial and Legislative Services subject to approval by the Manager of Field Operations. The applicants shall send a copy of the notice of hearing to each party of record not later than fifteen (15) days before the hearing date.

(3) **Contents of the notice.** The notice of hearing shall contain the date, time, and place of hearing.

(4) **Form.** The applicant shall prepare the notice of hearing to comply substantially with the form shown in Appendix E to this Chapter.

[Source: Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 31 Ok Reg 959, eff 9-12-14; Amended at 35 Ok Reg 946, eff 10-1-18]

165:5-7-35. Operation of commercial pit, commercial soil farming site and/or commercial recycling facility

(a) **Application.** Each application for authority to operate a commercial pit under 165:10-9-1, a commercial soil farming site under 165:10-9-2 and/or a commercial recycling facility under 165:10-9-4 shall comply with the application requirements of OAC 165:5-7-1(a) through (e). The Commission will not accept an application for an emergency order approving a commercial facility that requires a permit under OAC 165:10-9-1, OAC 165:10-9-2 or OAC 165:10-9-4.

(b) **Exhibits.** At the time of the filing of the application, the applicant shall submit all exhibits and data.

(c) **Dismissal for noncompliance.** Failure to complete the application, submit the exhibits, serve the notice, and perform the site inspection within sixty (60) days after the date of filing of the application may be grounds for dismissal of the application.

(d) **Notice of the application.**

(1) **Contents.** The notice of the application shall contain the following information:

(A) A brief description of the relief sought.

(B) The terms of the protest period.

(C) The date and time for a site inspection to be made by the applicant, a Commission representative and any interested person.

(D) The name, address, and telephone number of the applicant or its representative, whom anyone may contact for additional information concerning the application.

(2) **Form.** The applicant shall prepare the notice of the application to substantially comply with the form shown in Appendix F to this Chapter.

(3) **Persons to whom notice shall be given.** The applicant shall serve a copy of the application and notice of the application to:

(A) The Oklahoma Conservation Commission, 2800 North Lincoln, Suite 160, Oklahoma City, Oklahoma 73105.

(B) Each surface owner and surface lessee on each tract of land adjacent and contiguous to the site of the proposed facility.

(4) **Newspaper publications.** The applicant shall publish the notice of the application:

(A) Two times in a newspaper of general circulation in Oklahoma County, Oklahoma.

(B) Two times in a newspaper of general circulation in each county where the proposed facility will be located.

(5) **Proof of notice.** The applicant shall submit a certificate of service and affidavits of publication.

(e) **Protests.**

(1) **Timely protests.** Any person objecting to the granting of the application shall file a written protest within the appropriate protest period. If a protest is filed after filing of the application but before commencement of the protest period, said protest shall be deemed to have been timely filed.

(2) **Late protests.**

(A) Failure to file a protest within the prescribed time period shall be deemed a waiver of protest.

(B) The Commission may reinstate a late filed protest upon motion for good cause shown.

(3) **Form of protest.** The protestant shall file with the Court Clerk its protest which shall be entitled protest and which shall contain the following information:

- (A) Caption from application.
- (B) Title: Protest.
- (C) Name, address, and telephone number of protesting parties.
- (D) Reasons for protest.

(4) **Notice to applicant of protest.** The protestant shall serve the applicant with a copy of his protest within five (5) days after filing of the protest.

(f) **Protest periods.**

(1) **Initial protest period.** Any person objecting to the granting of the application shall file a written protest during the protest period which shall run for thirty (30) days from the last of the following events to occur:

- (A) Filing of the application.
- (B) Filing of all required exhibits.
- (C) The date on which the last publication was made.
- (D) The date of completion of service of process on all respondents in the cause.
- (E) Site inspection of the proposed facility.

(2) **Additional protest period.**

(A) After expiration of the protest period, an additional ten (10) day protest shall run:

- (i) If the applicant amends the application to change the location of the facility or increase its size; or
- (ii) If the applicant files amended exhibits changing the design of the facility.

(B) The additional protest period shall run from the date of completion of service of the amendment on the respondents in the cause.

(g) **Unprotested Applications.**

(1) **Administrative review.** If the application is unprotested, the Oil and Gas Conservation Division shall review the application without a hearing, and it shall report its finding to the Commission concerning what relief, if any, should be granted.

(2) **Remedies after denial or modification.** If the Oil and Gas Conservation Division recommends denial or modification of the relief requested by the application, the applicant may move for a hearing de novo or file exceptions to the report as under 165:5-13-5.

(h) **Withdrawal of protest.** If all protests are withdrawn, the application shall be remanded for administrative review under (g) of this Section.

(i) **Protested applications.**

(1) **Hearing required.** A hearing shall be required on each timely protested application except as provided in (h) of this Section.

(2) **Notice of hearing.** The applicant shall obtain a hearing date from the Judicial and Legislative Services subject to approval by the Manager of Pollution Abatement. The applicant shall send a copy of the notice of hearing to each party of record not later than fifteen (15) days before the hearing date.

(3) **Contents of the notice.** The notice of hearing shall contain the date, time, and place of hearing.

(4) **Form.** The applicant shall prepare the notice of hearing to comply substantially with the form shown in Appendix G to this Chapter.

165:5-7-35.1. Change of operator regarding commercial pit, commercial soil farming site and/or commercial recycling facility

(a) **Application.** Each application requesting the issuance of an order changing a designation of operator in an order authorizing a commercial pit under 165:10-9-1, a commercial soil farming site under 165:10-9-2 and/or a commercial recycling facility under 165:10-9-4 (collectively "commercial facility") shall comply with the application requirements of OAC 165:5-7-1(a) through (e).

(b) **Notice of application.** Notice of the application for a change of operator regarding a commercial facility shall be published one time in a newspaper of general circulation in Oklahoma County, Oklahoma, and in a newspaper of general circulation published in each county in which the subject lands are located. The notice shall include the following information:

- (1) The legal description of the commercial facility.
- (2) The name and physical mailing address of the current operator of the commercial facility and the name and physical mailing address of any entity to whom transfer of operation of such facility is sought.
- (3) The name, physical mailing address, telephone number, electronic mail address and facsimile number of the applicant or its representative, whom anyone may contact for additional information concerning the application.
- (4) The notice must also include the following language:
 - (A) Written protests to the relief sought must be filed with the Court Clerk's Office, Oklahoma Corporation Commission, P.O. Box 52000, Oklahoma City, OK, 73152-2000, submitted to the applicant or its representative and to the Manager of the Pollution Abatement Department, Oklahoma Corporation Commission, P.O. Box 52000, Oklahoma City, OK, 73152-2000, within fifteen (15) days of the later of the date of publication of the notice of application and service of the application and notice of application on all respondents in the cause. Written protests must specify the name of the applicant, cause number, reasons for protest, and the name(s), physical mailing address(es), telephone number(s), electronic mail address(es) and facsimile number(s) of the protestant(s).
 - (B) If there are no written protests to the application and the Commission does not require a hearing, the application shall be presented to the Manager of the Pollution Abatement Department for administrative review without a hearing, and if the application is protested, then any protestants shall receive notice of hearing.

(c) Procedure.

- (1) If a written protest to the application is filed with the Commission's Court Clerk's Office, submitted to the applicant or its representative and to the Manager of the Pollution Abatement Department within fifteen (15) days of the later of the date the notice of application is published and service of the application and notice of application on all respondents in the cause, or if hearing is required by the Commission, the application shall be set for hearing and notice thereof given in the same manner required in the filing of an application on the Pollution Docket.
- (2) If no written protest is filed with the Commission's Court Clerk's Office, submitted to the applicant or its representative and to the Manager of the Pollution Abatement Department and the Commission does not require a hearing, the application shall be presented to the Manager of the Pollution

Abatement Department for administrative review.

(d) **Persons to whom notice shall be given.** The applicant shall serve a copy of the application and notice of the application on:

- (1) The Manager of the Pollution Abatement Department, Oklahoma Corporation Commission, P. O. Box 52000, Oklahoma City, Oklahoma 73152-2000,
- (2) The Oklahoma Conservation Commission, 2800 North Lincoln Boulevard, Suite 160, Oklahoma City, Oklahoma 73105.
- (3) Each surface owner and surface lessee on each tract of land adjacent and contiguous to the facility.

(e) **Proof of notice.** The applicant shall file a certificate of service and affidavit(s) of publication with the Commission's Court Clerk's Office.

[Source: Revoked at 25 Ok Reg 2179, eff 7-11-08]

165:5-7-37. [RESERVED]

165:5-7-38. License for pulling pipe and plugging wells

(a) The application for a license for pulling pipe and plugging wells shall state:

- (1) The name of the applicant.
- (2) The names and addresses of all partners, chief officers, and directors.
- (3) The experience of applicant.
- (4) Evidence of financial responsibility of the applicant.
- (5) The counties in which the applicant will operate.

(b) Notice that an application has been filed shall be published by the applicant in a newspaper of general circulation in Oklahoma County, Oklahoma, and in a newspaper of general circulation published in the county where the applicant's principal place of business is located. The notice shall include:

- (1) The name of the applicant.
- (2) Generally what operations the applicant intends to conduct.
- (3) That applicant is financially responsible.
- (4) The counties in which applicant will operate.

(c) If a written objection to the application is filed within fifteen (15) days after the application is published or if a hearing is required by the Commission, the application shall be set for hearing and notice thereof shall be given in the same manner as required for the filing of the application. If no objection is filed and the Commission does not require a hearing, the matter shall be presented administratively to the Manager of Field Operations who shall file a report and make recommendations to the Commission.

(d) A license may be suspended or revoked for good cause upon application, after notice and hearing.

165:5-7-39. Staff applications for state funds to conduct remedial action

(a) **Scope.** This Section establishes the procedure for applications by Commission staff to plug wells and repair or close commercial pits.

(b) **Forms.**

- (1) The applicant shall have the option to use the following forms:
 - (A) Form SFP2000 (Application).
 - (B) Form SFP2001 (Notice of Hearing).
 - (C) Form SFP2002 (Emergency Application).
 - (D) Form SFP2003 (Emergency Order).
 - (E) Form SFP2004 (Final Order).
- (2) Use of said forms shall be deemed compliance with all procedural rules of the Commission.

(c) **Referral of cause to the Oil and Gas Conservation Division.** Upon filing of the application, the cause shall be assigned to a geologist or engineer in the Oil and Gas Conservation Division. It shall be the responsibility of the designee to:

- (1) Give proper notice of the application.
- (2) Acquire affidavits and any other exhibits showing the status of the facility operator and the condition of the facility.
- (3) Prepare specifications and estimate of costs for remedial action.
- (4) Report his findings to the Commission.

(d) **Emergency application.** In an emergency, the applicant may file an emergency application for funds to conduct necessary remedial action. The Commission shall hear such applications with or without notice. At the time of hearing, the Commission shall receive the exhibits and recommendation required in (c) of this Section. The Commission shall rule on the request as to deems appropriate.

(e) **Hearing on the merits.**

- (1) The matter shall be set before the Commission en banc or such Administrative Law Judge as the Commission shall assign.
- (2) At the hearing, the Commission shall:
 - (A) Receive any exhibits not previously entered into evidence.
 - (B) Inquire of the designee as it deems necessary.
 - (C) Rule on the application as it deems appropriate.
- (3) Where the Commission has issued an emergency order in the cause, the applicant may move that the emergency order be made a final order. The Commission may grant such a request if further funds are not needed to accomplish the remedy.

165:5-7-40. Oil and gas conservation and pollution rulemakings

Notice of an application to make or prescribe or to alter, amend, or modify a permanent rule or regulation relating to oil and gas conservation or to pollution matters shall be published one time at least fifteen (15) days prior to the hearing or prior to the commencement of the comment period, whichever is applicable, in a newspaper of general circulation published in Oklahoma County, Oklahoma, and in a newspaper of general circulation published in Tulsa, Oklahoma.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 34 Ok Reg 905, eff 9-11-17]

165:5-7-41. Orders relating to oil and gas pollution

- (a) An application for an order relating to oil and gas operations, see OAC 165:10, and notice of hearing thereof shall be served by the applicant by restricted mail upon the named respondent.
- (b) Notice of hearing for an order relating to oil and gas operations under the provisions of OAC 165:10 shall be published pursuant to 165:5-7-1(n)(2).

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93]

165:5-7-41.1. Complaint under 52 O.S., Sections 24.4 and 24.5, against a natural gas gatherer

- (a) Any action by the Commission under 52 O.S. §§ 24.4 and 24.5, shall be initiated by the filing of a Formal Complaint by the aggrieved party, following which the Commission shall conduct a hearing and take such evidence as is necessary to determine the merits of the Complaint; provided no hearing shall be conducted during such time as there is in effect an agreement of the parties for submission of the subject of the Complaint to the informal dispute resolution procedure under Subchapter 23 of this Chapter, if such agreement also expressly extends the one hundred twenty (120) day period of (c) of this Section. "Complaint" or "Formal Complaint" for these purposes does not include a Notice of Intent to Mediate or other pleading or papers filed under the informal dispute resolution procedure.
- (b) The Complainant shall send notice of hearing of the Complaint and a copy of the Formal Complaint to the gatherer by registered or certified mail with return receipt requested at least twenty (20) days prior to such hearing, but in no event shall the hearing be less than thirty (30) days from the filing of the Complaint.
- (c) Proceedings instituted under this Section shall be completed and a final, appealable order entered by the Commission within one hundred twenty (120) days of the filing of the Formal Complaint with the Commission's Court Clerk, unless such date is extended by the agreement of the parties. All matters to be determined by the Commission relative to a complaint filed under this Section shall be heard on an expedited basis.
- (d) When a Formal Complaint has been filed and the Complainant seeks to continue its existing gathering service, the Commission, upon motion of the Complainant, subject to the provisions of 52 O.S. § 24.5 (E), may enter an interim order requiring continuation of gathering service under the fees and terms and conditions of service of the last expired contract, if any, during the pendency of the complaint or set an interim fee and terms and conditions of continued service. Notice and hearing of such motion shall be in accordance with OAC 165:5-9-2(b), and any interim order entered by the Commission shall be temporary and subject to a final determination of the merits of the Complaint.
- (e) When a Formal Complaint has been filed, the Commission, upon motion of either party, may enter an order requiring the other party to produce designated documents or data, not privileged, which are in such party's care, custody and control, and which are relevant to the subject matter of the Complaint, for inspection and copying at a location stated in the order. Notice and hearing of such motion shall be in accordance with OAC 165:5-9-2(b), and any order entered shall direct production of the designated documents within ten (10) days of the date of such order. A copy of the order must be served by regular mail on the party required to produce the designated documents at least five (5) days prior to the date upon which production is required. This provision shall be in addition to any prehearing procedures provided under Subchapter 11 of this Chapter.

165:5-7-42. Oil and gas conservation and pollution causes other than specifically provided

Notice of hearing for an order relating to oil and gas conservation or pollution, that is otherwise not specifically provided for in this Chapter, shall be

published pursuant to 165:5- 7-1(n)(2).

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93]

PART 5. PUBLIC UTILITIES

165:5-7-50. Interim public utility rate relief

- (a) In order to obtain interim public utility rate relief, the applicant shall show:
- (1) That a proceeding before the Commission for an increase in rates will consume a considerable length of time.
 - (2) That the rates in effect do not yield a reasonable rate of return or yield sufficient coverage ratios.
- (b) Notice of hearing of an application for interim rate relief shall be published once each week for two (2) consecutive weeks at least fifteen (15) days prior to hearing in a newspaper of general circulation published in each county in which are located utility customers affected thereby, unless the Commission directs otherwise.

165:5-7-51. Applications affecting public utility rates

- (a) In utility rate cases where a general rate increase is sought, the applicant shall make a good faith effort to serve notice of the proposed rate change by mailing notice to all affected utility customers, unless the Commission directs otherwise. The notice shall:
- (1) Contain information concerning the nature of the proposed changes and the effect of the changes on customer billing.
 - (2) Give the date and location of the hearing to be held. This notice may be included in regular customer billings but in any case shall be served at least fifteen (15) days prior to the date of hearing. A customer entitled to such a notice shall not be a respondent within the definition of 165:5-1-3 unless such customer enters an appearance in the cause pursuant to 165:5-13-3(c).
- (b) Notice of hearing of an application for approval of any schedule, rate, charge, classification, rule or regulation which will directly or indirectly alter charges made for service performed, shall be published once each week for two (2) consecutive weeks at least fifteen (15) days prior to hearing in a newspaper of general circulation published in each county in which are located utility customers affected thereby, unless the Commission directs otherwise.

165:5-7-52. Public utility certificate of authority for issuance of securities

- (a) Any public utility, as defined in 17 O.S. §181, desiring to issue securities or to create liens to secure evidences of indebtedness pursuant to the above statute, shall file an application setting forth:
- (1) The amount and character of the proposed securities or liens.
 - (2) The general purposes for which they are to be issued or created, including a description and statement of the value of any property or services that are to be received in full or partial payment for the securities or in a proper case the evidence of indebtedness to be secured by the lien or liens.
 - (3) Any property or services already received by the public utility, the cost of which is to be reimbursed to the public utility by the proceeds of such securities or evidences of indebtedness.
 - (4) The most recent balance sheet of the public utility certified by their independent auditor.

(b) The application shall be verified by the public utility's president or vice president or by the signers of its articles of organization if it has not yet elected officers.

165:5-7-53. Certificate of convenience and necessity and service territory expansions for providing telecommunications services

(a) Pursuant to 17 O.S. §§131, et seq., notice that an application has been filed for a certificate of convenience and necessity to construct, build, equip or operate public telephone toll or long distance line or lines or any public telephone exchange or exchanges in any territory shall be published once a week for two (2) consecutive weeks in some newspaper of general circulation in each territory affected.

(b) No certificate shall issue until the expiration of thirty (30) days from the date of the first publication of notice. If no protest is filed, the Commission may issue the certificate without a hearing. If a written objection to the application is filed within the thirty day period, the application shall be set for hearing and notice thereof shall be given by the Applicant filing notice of the hearing in the Office of the Commission's Court Clerk and providing said notice to all parties of record and the Attorney General, at least 10 days prior to the hearing.

(c) This Section shall not be construed to require any telephone company to secure such a certificate for any extension within or to any territory already served by it or for any extension into a territory contiguous to a territory already served by it on which it has heretofore filed with the Commission an exchange map showing the territory professed to be served by such telephone company.

[Source: Amended at 14 Ok Reg 2474, eff 7-1-97; Amended at 32 Ok Reg 752, eff 8-27-15; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-7-54. Certificate of convenience and necessity for water transportation lines

(a) Notice that an application has been filed for a certificate of convenience and necessity for water transportation lines shall be given by restricted mail or personal service to:

(1) The chief executive officer of the municipality or municipalities affected, if any.

(2) The board of county commissioners in any county the line enters or traverses.

(3) Any water transportation company having a water transportation line in any county in which the proposed line is to be built or having a transportation line in any county or counties having a common boundary at any point to any county in which the proposed line is to be built.

(b) Notice of an application for a certificate of convenience and necessity for water transportation lines shall be published once a week for two (2) consecutive weeks in a newspaper of general circulation in each county affected.

(c) No certificate shall issue until the expiration of forty-five (45) days from the date of the first publication of notice. If a written objection to the application is filed within the forty-five (45) day period, the application shall be set for hearing and notice thereof shall be given in the same manner as required for the filing of the application. If no protest is filed, the Commission may issue the certificate.

(d) Except as otherwise specifically provided in this Section, applications filed hereunder shall be governed by the provisions of the Administrative Procedures Act.

165:5-7-55. Assignment of certificate of convenience and necessity; water transportation line

- (a) The holder of a certificate of convenience and necessity to construct, build or equip a water transportation line or amendments thereto may file its application seeking the consent of the Commission to assign, lease or alienate such certificate. Such certificate may be assigned, leased or alienated only when the physical assets of the water transportation company or that part thereof covered by the certificate are assigned, leased or alienated to the same assignee to assign a certificate of convenience and necessity.
- (b) The application shall be set for hearing and notice shall be given in writing at least ten (10) days prior to the date of the hearing to all persons who are served by the facilities covered by the certificate which is sought to be transferred.
- (c) The notice shall be published once a week for two (2) consecutive weeks in a newspaper of general circulation in each county in which the line is located.
- (d) Except as otherwise specifically provided in this Section, applications filed hereunder shall be governed by the provisions of the Administrative Procedures Act.

165:5-7-56. Extension of water transportation service

- (a) Notice of hearing for extension of water transportation service shall be given by mail at least ten (10) days prior to the date of hearing to all persons holding certificates nearest to those requesting service and to the municipal officers of all municipalities served or to be served by such water transportation companies.
- (b) Notice of hearing for extension of water transportation service shall be published once a week for two (2) consecutive weeks in a newspaper or newspapers of general circulation in the county or counties in which the line is proposed to be constructed.
- (c) Except as otherwise specifically provided in this Section, applications filed hereunder shall be governed by the provisions of the Administrative Procedures Act.

165:5-7-57. Acquisition, control, or merger of domestic public utilities.

(a) An application for approval of the acquisition, control or merger of a domestic public utility, pursuant to 17 O.S. §§191.1 et seq., excluding gas utilities, and an electric cooperative, pursuant to 17 O.S. §158.50, shall include the following additional information, made under oath or affirmation:

(1) The name and address of each acquiring party and all affiliates thereof; and

(A) If such acquiring party is an individual, his principal occupation and all offices and positions held during the past five (5) years, and any conviction of crimes other than minor traffic violations during the past ten (10) years, or

(B) If such acquiring party is not an individual, a report of the nature of its business and its affiliates' operations during the past five (5) years or for such lesser period as such acquiring party and any predecessors thereof shall have been in existence; an informative description of the business intended to be done by such acquiring party and its subsidiaries; and a list of all individuals who are or who have been selected to become directors or officers of such acquiring party, or who perform or will perform functions

appropriate or similar to such positions. Such list shall include for each such individual the information required by (a)(1) of this Section.

- (2) The source, nature and amount of the consideration used or to be used in effecting the merger or other acquisition of control, a detailed description of any transaction wherein funds were or are to be obtained for any such purpose, and the identity of persons furnishing such consideration; provided, however, that where a source of such consideration is a loan made in the lender's ordinary course of business, the identity of the lender shall remain confidential if the person filing such statement so requests.
- (3) Audited financial information in a form acceptable to the Commission as to the financial condition of an acquiring party of the preceding three (3) fiscal years of each such acquiring party, or for such lesser period as such acquiring party and any predecessors thereof shall have been in existence, and similar information as of a date not earlier than one hundred thirty-five (135) days prior to the filing of the application.
- (4) Any plans or proposals which an acquiring party may have to liquidate such public utility, to sell its assets or a substantial part thereof, or merge or consolidate it with any person, or to make any other material change in its investment policy, business or corporate structure, or management. If any change is contemplated in the investment policy, or business or corporate structure, such contemplated changes and the rationale therefor shall be explained in detail. If any changes in the management of the domestic public utility or person controlling the domestic public utility are contemplated, the acquiring party shall provide a resume of the qualifications and the names and addresses of the individuals who have been selected or are being considered to replace the then current management personnel of the domestic public utility or the person controlling the domestic public utility.
- (5) The number of shares of any voting security which each acquiring party proposes to acquire, and the terms of the offer, request, invitation, agreement, or acquisition.
- (6) The amount of each class of any voting security which is beneficially owned or concerning which there is a right to acquire beneficial ownership by each acquiring party.
- (7) A full description of any contracts, arrangements, or understanding with respect to any voting security in which any acquiring party is involved, including but not limited to transfer of any securities, joint ventures, loan or option arrangements, puts or calls, guarantees of loans, guarantees against loss or guarantees of profits, division of losses or profits, or the giving or withholding of proxies. Such description shall identify the persons with whom such contracts, arrangements, or understandings have been entered into.
- (8) A description of the purchase of any voting security during the twelve (12) calendar months preceding the filing of the application, by any acquiring party, including the dates of purchase, names of the purchasers, and consideration paid or agreed to be paid therefor.
- (9) Copies of all tender offers for, requests for, advertisements for, invitations for tenders of, exchange offers for, and agreements to acquire or exchange any voting securities and, if distributed, of additional soliciting material relating thereto.

(10) Such additional information as the Commission may prescribe as necessary or appropriate for the protection of ratepayers of the domestic public utility or in the public interest.

(b) If a person required to file the application is a partnership, limited partnership, syndicate or other group, the Commission may require that the information called for in (a) of this Section shall be given with respect to each partner of such partnership or limited partnership, each member of such syndicate or group and each person who controls such partner or member. If any such partner, member, person or acquiring party is a corporation or if a person required to file the application is a corporation, the Commission may require that the information called for by (a) of this Section be given with respect to such corporation, each officer and director of such corporation, and each person who is directly or indirectly the beneficial owner of more than ten percent (10%) of the outstanding voting securities of such corporation and each affiliate of such corporation.

(c) If any material change occurs in the facts set forth in the application filed with the Commission and sent to such domestic public utility, an amendment setting forth such change, together with copies of all documents and other material relevant to such change, shall be filed with the Commission and sent by the person filing the application to the domestic public utility within two (2) business days after such person learns of such change. Hearing shall be commenced within thirty (30) days after the application is filed and shall be concluded within thirty (30) days after its commencement. Notice of hearing shall be mailed to the domestic gas utility and to each of its customers at least twenty (20) days prior to the date of the hearing.

(d) Any merger or other acquisition of control shall be deemed approved unless the Commission has, within thirty (30) days after the conclusion of such hearing, entered an order disapproving the merger or other acquisition of control.

165:5-7-58. Utility or transportation rulemaking and other general orders [REVOKED]

[Source: Revoked at 11 Ok Reg 3675, eff 7-11-94]

165:5-7-59. Reciprocity of final orders between states - telephone

(a) **Southwestern Bell Telephone Company.** When any exchange is served by a central office or offices located in an adjacent state and the lesser of ten percent (10%) or five hundred (500) of the customers served by such exchange are located in Oklahoma, except when the exchange has fewer than five hundred (500) customers the ten percent (10%) limitation shall not apply, the basic local exchange services within the Oklahoma portion of such exchange shall be furnished at the rates and charges prescribed for the adjacent state within which such central office or offices are located; provided that:

(1) The Company shall file all pleadings with this Commission within ten (10) days subsequent to filing the pleadings with the adjacent state within which such central office or offices are located, or within ten (10) days of the effective date of this Section.

(2) The Company shall include with the notice an impact statement as directed by this Commission.

(3) The rates and charges prescribed by an order of the Regulatory Agency of such adjacent state, after a hearing on the merits has been held in such adjacent state, shall be filed with the Corporation Commission of the State

of Oklahoma.

(4) Unless this Commission, within thirty (30) days after filing of the rates and charges approved by the adjacent state, determines that additional hearings are required to either accept or reject such rates and charges, then such rates and charges shall become lawfully effective for the Oklahoma customers served by such exchange upon the same date when such rates and charges are effective in the adjacent state.

(b) Other Telephone Companies with multi-state exchanges. When any exchange is served by a central office or offices located in an adjacent state and the lesser of ten percent (10%) or five hundred (500) of the customers served by such exchange are located in Oklahoma, except when the exchange has fewer than five hundred (500) customers the ten percent (10%) limitation shall not apply, the rates, charges and terms and conditions of service within the Oklahoma portion of such exchange shall be those prescribed by the Regulatory Agency of the adjacent state within which such central office or offices are located; provided that:

(1) The Company shall file all pleadings with this Commission within ten (10) days subsequent to filing the pleadings with the adjacent state within which such central office or offices are located, or within ten (10) days of the effective date of this Section.

(2) The Company shall mail notice to the customers located within Oklahoma stating that the customer may contact the Oklahoma Corporation Commission regarding any objections to the proposed rate increase.

(3) The Company shall include with the notice an impact statement as directed by this Commission.

(4) Unless this Commission, within thirty (30) days after filing of the rates and charges approved by the adjacent state, determines that additional hearings are required to either accept or reject such rates and charges, then such rates and charges shall become lawfully effective for the Oklahoma customers served by such exchange upon the same date when such rates and charges are effective in the adjacent state.

165:5-7-60. Reciprocity of final orders between states - electric companies

To facilitate the efficient use of resources for the benefit of ratepayers, when any electric company serves less than ten percent (10%) of its total customers or five hundred (500) of its members for rural electric cooperatives within the State of Oklahoma, the electric company may elect to allow all or a portion of the rates, charges, and terms and conditions of service within the Oklahoma portion of such service territory be those prescribed by the regulatory agency of the adjacent state within which the central office of the electric company is located; provided that, to demonstrate this election:

(1) The electric company shall file before the Commission an application to adopt the rates, charges, and terms and conditions of service prevailing in an adjacent state within ten (10) business days after the initiation of a ratemaking proceeding before the regulatory agency of the adjacent state. The electric company shall also file all pleadings and exhibits with this Commission and provide to the Office of the Attorney General of Oklahoma within ten (10) days subsequent to filing the pleadings and exhibits with the adjacent state where such central office or offices are located.

(2) The electric company shall provide notice to the individual customers located within Oklahoma, by direct mail and/or bill insert, concerning any

hearing set before the Commission to adopt the rates, charges, and terms and conditions of service pursuant to this Section, including notice that a protest may be filed with the Director of the Public Utility Division, Oklahoma Corporation Commission, Jim Thorpe Office Building, 2101 North Lincoln Boulevard, Oklahoma City, Oklahoma 73105.

(3) Such rates, charges, and terms and conditions prescribed by an order of the regulatory agency of such adjacent state, after hearing on the merits have been held in such adjacent state, shall be filed with the Corporation Commission of the State of Oklahoma, along with the final order and recommendation of the administrative law judge, if any, of the regulatory agency of the adjacent state.

(4) To ensure that rates and terms and conditions of service resulting from this Section are just and reasonable and consistent with Oklahoma law and prevailing Corporation Commission policy, the electric company shall also file the following:

(A) A statement or testimony clearly describing the methods and standards relied upon in the ratemaking proceeding in the adjacent state, specifying any distinctions between the methods and standards prevailing in Oklahoma and in that adjacent state;

(B) A statement or testimony clearly describing how costs were allocated between Oklahoma customers and customers in other jurisdictions during the proceedings in the adjacent state; and

(C) A statement or testimony clearly describing any deviation from the Electric Utility Rules, OAC 165:35, or other applicable rules prescribed by the Commission, that would result from the use of the rates, charges, and terms and conditions of service in the adjacent state.

(5) Upon the submission of all filings identified in paragraphs 3 and 4 above, the Commission shall hold a hearing to receive testimony and/or statements from interested parties concerning if adjustments should be made to the rates, charges, and terms and conditions of service set in the adjacent state to set just and reasonable rates, charges, and terms and conditions of service consistent with Oklahoma law and prevailing Corporation Commission policy.

(6) If the Commission fails to enter a final order determining the rates, charges, and terms and conditions of service of an electric company pursuant to this Section within one hundred twenty (120) days after the submission of all filings identified in paragraphs 3 and 4 above, the electric company may impose interim rates not to exceed the rates listed on the filed rates and charges approved by the final order of the regulatory agency of the adjacent state, subject to being refunded by order of the Commission once a final order has been entered.

(7) The rates, charges, and terms and conditions of service prescribed by a final order of the regulatory agency of an adjacent state shall not be adopted by the Commission if:

(A) The electric company has not filed before the Commission, within the last four (4) years, an application under this Section or an application under the Commission's Minimum Standard Filing Requirements In Support of a Request by a Public Utility Doing Business in Oklahoma for a Proposed General Rate Change, OAC 165:70; or

(B) The rates resulting from the order would result in an average increase of more than ten percent (10%) above the currently applicable rates for the electric company's customers in Oklahoma.

[Source: Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 32 Ok Reg 752, eff 8-27-15; Amended at 34 Ok Reg 905, eff 9-11-17]

165:5-7-61. Procedures for causes filed pursuant to OAC 165:70

(a) **Purpose.** The purpose of this Section is to establish procedures regarding rate change causes filed on the Public Utility Docket pursuant to OAC 165:70 which will allow the Oklahoma Corporation Commission to fulfill its responsibility to process rate changes within the time prescribed by Title 17 O.S. (Supp. 1993) § 152 et seq.

(1) This Section shall apply to all parties to the proceeding, including the utility, the Commission Staff, the Attorney General and any intervening party of record.

(2) To the extent this Section conflicts with other Sections of the Commission's Rules of Practice, OAC 165:5, the procedures established in this Section shall control.

(b) **Definitions.** The definitions set forth in OAC 165:70-1-2 shall be deemed applicable to this Section.

(c) **Intervening party requirement.**

(1) The Commission Staff, the Attorney General and any intervening party of record shall conform their testimony and exhibits to the format set forth in OAC 165:70-5-4. A waiver of any requirements of Chapter 70 shall be obtained as outlined in OAC 165:70-3-6.

(2) Any interested person seeking to intervene pursuant to OAC 165:5-9-4 shall request permission to intervene no later than ninety (90) days following the filing date of the application for a general rate change. The filing or granting of any Motion to Intervene shall not be grounds to delay, continue or extend any hearing date, deadline or time limit set or to be set in a proceeding.

(3) If the Commission does not rule on a motion to intervene within twenty (20) days from the date the motion to intervene is filed, the motion to intervene shall be deemed to have been granted.

(d) **Data requests/responses.** Any party, including but not limited to the utility, the Commission Staff, the Attorney General and any other intervening party of record, shall answer, within ten (10) business days from the date of receipt, all data requests issued, unless an objection is filed or the parties agree in writing to a different response time. Any data requests received after 3:00 p.m. shall be deemed received the next regular business day.

(1) Data requests submitted by any party prior to the date of filing the application package shall be deemed received the date the application package is filed pursuant to OAC 165:70-3-1.

(2) A copy of all data requests and/or answers to data requests shall be submitted to all counsel of record by regular mail, facsimile, electronic mail or in person at the same time they are issued or answered.

(3) The party served with the data request shall notify the issuing party within five (5) business days of receipt of the requests that the ten (10) business day requirement or otherwise agreed-upon response time cannot be met and provide an explanation for the delay. The party served with the data request shall commit, at the time of such notification, to a response

date.

(4) Any objection(s) relating to a data request or the date a response is to be provided shall be presented by the objecting party within five (5) business days of receipt of the data request. If the parties are unable to reach a resolution regarding the dispute within three (3) business days of the date of the objection, the objecting party shall file a written objection and a hearing on all such objections shall be set on the next Public Utility Motion Docket. It shall be the responsibility of the objecting party to notify the Commission or the Administrative Law Judge that the matter will appear on the Docket.

(e) General instructions regarding testimony and exhibits. The following instructions are applicable to all classes of utilities, the Commission Staff, the Attorney General and any intervening party of record who filed testimony and exhibits regarding a general rate change filed pursuant to OAC 165:70:

(1) All schedules and exhibits shall be mathematically correct and properly cross-referenced.

(2) All schedules and exhibits shall be designated as provided in 165:70-5-4.

(3) Headings on all schedules and exhibits shall clearly indicate the party's name, the nature and content of the schedule, the test period covered and the cause number.

(4) All schedules and exhibits shall be typed and/or clearly legible.

(f) Filing of responsive and rebuttal testimony, notice of major issues to be raised and oral surrebuttal.

(1) The Commission Staff, the Attorney General and any intervening party of record seeking to present evidence shall file responsive testimony and exhibits no later than the one hundred twentieth (120th) day subsequent to the filing date of the application for a general rate change. Any party seeking only to cross-examine witnesses shall file a statement of position no later than the one hundred twentieth (120th) day subsequent to the filing date of the application for a general rate change. At the time of filing testimony the Commission Staff, the Attorney General and any intervening party of record shall, upon request, provide a copy of the workpapers which support the recommendations contained in their testimony to the requesting party of record. The workpapers shall be organized and presented in the same format as required of the utility by Part 5 of OAC 165:70-5.

(2) If the utility elects to present rebuttal testimony, the rebuttal testimony shall be filed by the one hundred fortieth (140) day subsequent to the filing date of the application for a general rate change.

(3) A hearing on the merits shall commence no later than the one hundred fiftieth (150th) day subsequent to the date the application for a general rate change was filed pursuant to OAC 165:70-3-1.

(4) Parties filing direct testimony pursuant to this subsection (f) may present oral rebuttal testimony to any issue raised for the first time during the hearing. Parties filing responsive testimony pursuant to this subsection (f) may present oral surrebuttal.

(5) Nothing in this Section shall preclude the trier of fact from permitting parties who filed testimony to present oral surrebuttal regarding issues raised for the first time in oral testimony presented during the hearing, if deemed appropriate.

(g) Hearings regarding intervention, waiver of requirements, deficiencies, the confidentiality agreement and/or protective order. Any hearings regarding

motions to intervene, disputes related to the Waiver of Requirements contained in OAC 165:70, Deficiencies, the Confidentiality Agreement and/or the need for a protective order shall be set before an Administrative Law Judge.

(h) Amending an application.

(1) A utility may not significantly amend an application for a general rate change filed pursuant to OAC 165:70 after it has been docketed by the OCC Court Clerk, except as provided in this subsection.

(2) An amendment may be accommodated by withdrawing the initial filing and substituting a new, amended filing in place of the original cause, which will establish a new filing date. An amended filing must conform to the requirements of OAC 165:70-5-1 and will be subject to the sanctions in OAC 165:70-5-2.

(3) For purposes of this Section, an amendment shall be deemed "significant" if it changes the test year, or if it requests more than a five percent (5%) increase in the previously requested revenue requirement, unless such changes are the result of arithmetical error or are mandated by law.

(4) A utility may incorporate a significant change without refile an entirely new case by agreeing to restart the 180-day period. The new period would begin when the amended application is filed.

(i) Limitations on active applications for a general rate change.

(1) A utility may not have more than one active general rate change application pending before the Commission at any one time, unless the Commission has failed to issue a final order upon the first application within two hundred seventy (270) days of that application's filing date. This shall not prohibit the utility from filing a new application for a general rate change if the utility can show its financial integrity or service reliability is materially impacted during the period from the closing of the record to the time in which the Commission makes a final determination on an active rate application.

(2) A cause which has been remanded to the Commission by the Oklahoma Supreme Court after appellate review shall not be deemed an active general rate change application pursuant to this Section.

PART 7. MOTOR CARRIERS

165:5-7-65. Applications relating to intrastate motor carrier authority and intrastate licenses

Applications for an intrastate for-hire motor carrier license or intrastate private carrier license, renewal of an intrastate for-hire motor carrier license or renewal of an intrastate private motor carrier license and a household goods certificate or a renewal of a household goods certificate shall be processed administratively unless a protest is filed with the Court Clerk's office or the staff of the Transportation Division requests the application be set for hearing.

SUBCHAPTER 9. SUBSEQUENT PLEADINGS

165:5-9-1. Response to initial pleading

(a) **Scope.** Except where otherwise specifically provided in this Chapter, including the Petroleum Storage Tank Division at OAC 165:5-21-5 and OAC 165:5-21-6, the provisions of this Section govern pleadings filed after a cause has been commenced by an application.

(b) **Form.** Every document in opposition to an application shall be styled a "Response" and shall contain:

(1) **Caption.** The response shall contain the same caption as in the application.

(2) **Body.** The response shall contain four numbered paragraphs, as follows:

(A) **Parties.** The respondent shall be identified, including:

(i) Name, address, and telephone number of his attorney or designated representative.

(ii) Nature of his interest in the subject matter of the cause.

(B) **Allegations of fact.** Response to the allegations of fact shall include:

(i) Admissions of all allegations of fact admitted by the respondent.

(ii) Specific denial of any allegations of fact respondent alleges and expects to prove to be untrue.

(iii) Allegations of all other facts necessary or appropriate to support respondent's position. Failure to deny specifically any allegation of fact will not relieve the person making the allegation of the burden of proving it.

(C) **Legal authority.** Citations of statutes, rules, orders, and decided cases in support of the response or in opposition to the granting of the relief sought in the application.

(D) **Relief sought.** A brief statement of the relief sought by respondent, including any affirmative relief sought which is not set out in the application.

(c) **Subscription.** The response shall be signed by the respondent, or an authorized agent of the respondent, or by the attorney for the respondent, and shall set out the mailing address, telephone number, facsimile number, electronic mail address and bar identification number, of the person so signing it, as applicable.

(d) **Time for filing.** Response to an application may be filed at or before the date of the hearing. Any person appearing at the hearing, as the Commission or Administrative Law Judge may deem appropriate, may be heard and permitted to offer evidence whether or not he has filed a written response or other pleading, except as provided in OAC 165:5-19-1.

(e) **Default.** Any named respondent who fails to file response within the time specified shall be deemed in default, and the Commission or Administrative Law Judge may proceed to hear the cause without further notice to a person in default. Except as provided in OAC 165:5-19-1, no applicant will by default of an adverse respondent be relieved from the burden of proving the material allegations of fact upon which his claim for relief is based.

[Source: Amended at 12 Ok Reg 2005, eff 7-1-95; Amended at 16 Ok Reg 829, eff 1-25-99 (emergency); Amended at 16 Ok Reg 2807, eff 7-15-99; Amended at 19 Ok Reg 1939, eff 7-1-02; Amended at 27 Ok Reg 2098, eff 7-11-10]

165:5-9-2. Subsequent pleadings

(a) **Reply.** No documents shall be required other than the application and responses thereto. Reply to a response shall be permitted but shall not be required.

(b) **Motions.** All other objections to or requests for action or relief shall be by motion, with service to all persons entitled to notice. Service of the motion shall be made through the ECF System to those on the Official ECF service list, by regular mail, electronic mail, or in person as provided in this subsection, unless otherwise provided by statute. The motion shall state in concise language the action or relief sought and the facts and circumstances upon which the right thereto is based.

(1) All motions shall be set on a regularly scheduled motion docket by a Notice of Hearing to be heard by an Administrative Law Judge unless determined otherwise by a prehearing/scheduling agreement or a prehearing/scheduling order. All motions filed after a case has been set before the Commission or assigned to an Administrative Law Judge on the merits shall be set as directed by the Commission or the assigned Administrative Law Judge. The filing of a motion may not automatically delay the hearing on the merits.

(A) Prior to the record being opened on the merits or a prehearing/scheduling agreement filed or a prehearing/scheduling order issued, notice shall be given to all persons entitled to notice by the movant by serving at least five (5) business days prior to the date set for hearing. Service of the notice shall be made through the ECF System to those on the Official ECF service list, by regular mail, electronic mail, or in person, unless otherwise provided by statute. A copy of the motion and notice of hearing shall be provided to each respondent.

(B) After the record in the case has been opened on the merits or a prehearing/scheduling agreement has been filed or a prehearing/scheduling order has been issued, notice shall be given to all persons entitled to notice by the movant by serving, at least five (5) business days prior to the date set for hearing. Service of the notice shall be made through the ECF System to those on the Official ECF service list, by regular mail, electronic mail, or in person, unless otherwise provided by statute. A copy of the motion and notice of hearing shall be provided to all parties of record.

(2) Exceptions to such motions may be lodged in accordance with the provisions of OAC 165:5-13-5(a)(1) except as provided in (A) and (B) of this paragraph.

(A) In oil and gas related matters, all decisions on motions filed after the case has been assigned to an Administrative Law Judge shall be considered in the Report of the Administrative Law Judge unless the Administrative Law Judge directs otherwise.

(B) In all other matters, the decisions on motions filed after a scheduling agreement has been filed or a scheduling order has been issued in a case shall be considered in the Report of the Administrative Law Judge unless the Commission or Administrative Law Judge directs otherwise.

(c) **Response/objection to motions.** Any person may file and serve a response or objection to any motion at any time before the motion is heard. The title of the response or objection shall refer to the motion being considered. Responses or objections filed to motions which already have been set for hearing shall not require a Notice of Hearing.

(d) **Amendment.** Amendment of a document may be permitted at any time upon such terms as are just. An amendment may take the form of a substitute document, an amendment or supplement, deletion of language, or correction by interlineation. Response may be made to an amended document, but shall not be required. An amended application is acceptable where notice is given according to the statutes or rules under which the original application was filed. Provided, however, no amended application shall be filed which changes the applicant's name, the type of relief requested, the legal description of the lands involved or the caption in the original application; instead, any such changes from the original application shall require the filing of a new application in accordance with Subchapter 5 of this Chapter.

(e) **Dismissal.** The applicant may dismiss the application with or without prejudice at any time prior to the record being opened at the hearing on the merits in said case by submitting a proposed order dismissing the case to the Judicial and Legislative Services, and all parties of record. Such dismissal shall not dismiss the case as to specifically stated affirmative relief sought by any respondent and, upon the appearance at the time of hearing of any respondent who has not received notice of the dismissal or who has requested specific affirmative relief, such respondent may enter any evidence into the record and may be granted any relief which the Commission or Administrative Law Judge deems appropriate.

(1) At any time prior to the record being opened at the hearing on the merits in a case, a respondent may file a motion to dismiss in the same manner as provided in (b) of this Section.

(2) After the record has been opened at the hearing on the merits in a case, the case may be dismissed by agreement of all parties of record or recommended for dismissal with or without prejudice by the Commission or Administrative Law Judge upon the Commission's or Administrative Law Judge's own motion or upon motion of any party of record. A motion to dismiss filed hereunder shall comply with the provisions of (b) of this Section; provided that, in a case where a motion to dismiss has been filed, notice shall be served on each respondent in the case.

(3) Upon five (5) business days notice to parties of record, the Commission may entertain motions to dismiss for any of the following reasons:

- (A) Failure to prosecute.
- (B) Unnecessary duplication of proceedings or res judicata.
- (C) Withdrawal.
- (D) Moot question or obsolete applications.
- (E) Lack of jurisdiction.
- (F) Failure to submit a proposed order in a timely manner.
- (G) For other good cause shown.

(4) Upon posting by the Judicial and Legislative Services fifteen (15) business days notice on a disposition docket, and emailing notice to all parties of record to a case, the Commission may dismiss cases for any of the following reasons:

(A) Failure to submit a proposed order to the Administrative Law Judge or the Commission within thirty (30) days after the recommendation date or as directed by the Administrative Law Judge or the Commission.

(B) Failure to set a case on a day certain.

[Source: Amended at 12 Ok Reg 2005, eff 7-1-95; Amended at 19 Ok Reg 1939, eff 7-1-02; Amended at 20 Ok Reg 2293, eff 7-15-03; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 29 Ok Reg 938, eff 7-1-12; Amended at 35 Ok Reg 946, eff 10-1-18; Amended at 36 Ok Reg 517, eff 8-1-19; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-9-3. Emergency applications

(a) **Filing.** After an application for emergency relief is filed with the Court Clerk, it may be placed on the Commission's Emergency Docket. The requisite number of file-stamped copies of the application shall be submitted to the Commission on or before 2:00 P.M. of the day preceding the hearing. No application for emergency relief shall be accepted for filing by the Court Clerk without a base application being previously filed. No base application shall be dismissed without hearing subsequent to the issuance of an emergency order in the same cause. A motion to dismiss shall be filed. Emergency applications for motor carrier causes shall be set for hearing in accordance with the provisions of the Commission rules and regulations governing motor carriers, OAC 165:20. The Commission will not accept an application for an emergency order approving a commercial facility that requires a permit under OAC 165:10-5-5, OAC 165:10-9-1, OAC 165:10-9-2 or OAC 165:10-9-4.

(b) **Notice.** Notice of hearing on an emergency application shall be served on all parties otherwise entitled to notice under the base application not less than five (5) business days prior to the date of the emergency hearing; provided that, if the applicant has received written approval from all parties of record and respondents, the provisions of this Section shall not apply. Notice of hearing on motor carrier emergency applications shall be set on the Commission docket as prescribed by law.

(c) **Exception.** In order to protect the public health and safety, the Commission may issue an emergency order without notice and hearing and without the filing of a base application.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 25 Ok Reg 2179, eff 7-11-08; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 29 Ok Reg 938, eff 7-1-12]

165:5-9-4. Intervention and parties of record

(a) Any person, not subject to subsection d of this Section, interested in the subject matter of a cause may become a party of record by filing a motion for intervention, which shall be accompanied by a notice of hearing and set for hearing on the next motion docket or as agreed to by the parties of record and the Commission or Administrative Law Judge. The Commission or an Administrative Law Judge shall prescribe terms and conditions upon which intervention shall be allowed.

(b) An intervention shall follow the form provided elsewhere in this Chapter for an application or a response. An intervention may seek affirmative relief.

(c) Each motion to intervene, accompanied by the notice of hearing, shall be served to all parties of record.

(d) The following persons shall become a party of record by filing an entry of appearance or orally stating an entry of appearance at any proceeding regarding the cause:

- (1) A person named as a respondent,
- (2) A person entitled to individual notice in a cause,
- (3) A person seeking to intervene with the agreement of the applicant, all parties of record, and the Commission or Administrative Law Judge,
- (4) The Attorney General, or
- (5) The U.S. Department of Defense and/or the Federal Executive Agencies, but only for causes filed on the PUD docket.

(e) Nothing herein shall waive the requirement that attorneys comply with OAC 165:5-1-10.

[Source: Amended at 14 Ok Reg 2474, eff 7-1-97; Amended at 19 Ok Reg 1939, eff 7-1-02; Amended at 37 Ok Reg 1082, eff 10-1-20]

165:5-9-5. Joinder and consolidation of parties and proceedings

(a) An application may join two or more separate requests for relief or Commission action, or may request two or more types of action or relief in the alternative. An application relating to oil and gas conservation or pollution shall seek only one type of relief.

(b) A complaint may join two or more grounds of complaint, whether or not arising out of the same transaction, but each separate action complained of shall be separately stated and numbered.

(c) Two or more complainants may join in one complaint if their respective complaints are against the same person or persons and involve substantially the same subject matter and grounds.

(d) The Commission or Administrative Law Judge may consolidate two or more causes for hearing where such action would be just.

(e) Upon motion of a person, or upon its own motion, with or without notice, the Commission may order a person to be joined as a party of record and to appear in a proceeding. The movant shall cause a copy of such order to be served by regular mail, facsimile, electronic mail or in person upon such party of record.

(f) Upon motion of a person, or upon its own motion with or without notice, the Commission may order a proceeding dismissed as to one or more parties of record.

[Source: Amended at 27 Ok Reg 2098, eff 7-11-10]

165:5-9-6. Continuances

(a) **General.** The Commission or Administrative Law Judge before whom a case is set may continue or adjourn a hearing at any time for any period, with or without notice or motion. Continuances may be granted for good cause shown, or by agreement of all parties of record at the hearing. A stipulation of a continuance among all parties of record ordinarily will be approved, unless the Commission determines that the public interest requires otherwise. A continuance in a case may be granted in advance of the date for hearing of the case in the following ways:

- (1) As provided in OAC 165:5-9-2(b)(1); or
- (2) The applicant in a case may request a continuance at least five (5) business days in advance of a hearing date from the Docket Clerk or, if the case has been assigned for hearing, the Commission or assigned Administrative Law Judge. Upon approval of a continuance date, the applicant shall send a notice of continuance stating the continuance date to the Docket Clerk and if the case has been assigned for hearing, the

Commission or assigned Administrative Law Judge. Notice of the continuance date shall be served on all respondents or, if a prehearing/scheduling agreement has been filed or a prehearing/scheduling order has been issued in the case, notice of the continuance date shall be served on all parties of record. The notice of continuance must be sent to all persons entitled to notice at least five (5) business days prior to the date of the hearing. Service of the notice of continuance shall be made through the ECF System to those on the Official ECF service list, by regular mail, electronic mail, or in person, unless otherwise provided by statute. Such case shall be continued on the docket without the necessity of the appearance of the applicant at the time of hearing.

(b) **Contested motion for continuance.** A contested motion for continuance on the day set for hearing of the case shall be heard by the Commission or Administrative Law Judge. Such decision may be noted as part of the order of the Commission or Initial Report of the Administrative Law Judge if requested by a party of record.

(c) **More than two continuances.** In those cases where two (2) continuances have previously been granted, upon the granting of each additional continuance, notice of such continuance shall be provided to all respondents. Service shall be made through the ECF System to those on the Official ECF service list, by regular mail, electronic mail, or in person by the person requesting such continuance or, if a prehearing/scheduling agreement has been filed or a prehearing/scheduling order has been issued in the case, notice of the continuance date shall be served on all parties of record at least five (5) business days prior to the date the continued case is set for hearing. The movant shall provide proof of service of such notice at the time of hearing. This subsection shall not apply to matters assigned to before the Commission or an Administrative Law Judge unless the Commission or Administrative Law Judge deems or orders otherwise.

(d) **Day certain.** Every continuance shall be to a day certain. If an applicant has failed to set a continued case on a day certain for a period more than thirty (30) days after last recorded hearing date as shown from the Commission's docket records, the Director of the Judicial and Legislative Services or an Administrative Law Judge may recommend dismissal of the case to the Commission, pursuant to OAC 165:5-9-2(e)(4); and the Commission may dismiss the case without prejudice by an Order Dismissing Case.

(e) **Continuances of the Motor Carrier Citation Docket when the Commission is closed.** In the event the Commission is closed due to inclement weather or other administrative reason on the date and/or time of the Motor Carrier Citation Docket, all citations scheduled to be heard on the Motor Carrier Citation Docket shall be automatically continued to the following month's docket as posted on the Commission's website.

SUBCHAPTER 11. PREHEARING PROCEDURES

165:5-11-1. Deposition and discovery

(a) Depositions.

(1) Deposition of a witness for use at a hearing may be taken only when ordered upon motion by the Commission or of a person. The order may direct that the deposition of a witness be taken inside or outside the State of

Oklahoma.

(2) The order shall state the time and place the deposition shall be taken, and the person taking the deposition shall serve a copy of the order by regular mail on each party of record at least five (5) days prior to the date scheduled for taking the deposition.

(3) The manner of taking depositions shall otherwise be governed by the laws relating to taking of depositions for use in the District Courts of Oklahoma. Attendance of a witness for taking of his deposition shall be governed by OAC 165:5-11-3, except that the attendance of a witness for deposition shall be required only in the county of his residence.

(4) A deposition may be offered in evidence at the hearing by any person.

(b) Production of documents.

(1) Upon motion, the Commission may make an order requiring a person to produce designated documents or tangible objects for inspection by respondents or parties of record to the case, or for copying at the expense of the applicant, or to be offered into evidence. The order shall direct production thereof at the hearing or at a prehearing conference, and production shall be at the principal office of the Commission unless some other place is stated in the order. An order hereunder may be directed to a person not yet a party of record, conditioned that if such person appears at the hearing, the order thereupon will be complied with.

(2) The person applying therefore shall serve a copy of the order by regular mail on each party of record at least five (5) days prior to the date upon which production is required. In proceedings on the PUD docket, service of an order shall be made at least ten (10) business days prior to the date upon which production is required unless otherwise agreed by the applicant, respondent and intervenors.

(3) An order pursuant to this subsection may require production of any document not privileged which constitutes or contains evidence relevant to the subject matter of the case, or may reasonably lead to such evidence. Business records shall not be deemed privileged as such; but confidential business records and information will be protected from disclosure except where directly relevant to the issues in the case.

(4) The order shall identify the documents or object to be produced individually or by categories, with sufficient particularity to permit easy identification thereof by the person ordered to make production.

(5) An exact photographic copy of a document may be substituted for the original, at the expense of the person producing the instrument.

(c) Interrogatories.

(1) Upon motion of the Commission or of a person, an order may be entered requiring a person to answer in writing under oath certain written interrogatories attached to the order. The answers shall be submitted at the hearing or at a prehearing conference.

(2) The person applying for the order shall serve a copy thereof, with interrogatories attached, by regular mail, upon each respondent at least ten (10) days prior to the date upon which answer is required. In proceedings on the PUD docket, service of an order shall be made at least ten (10) business days prior to the date upon which answer is required unless otherwise agreed by the applicant, respondent and intervenors.

(d) Protective orders.

(1) The Commission, upon motion, may make such orders relating to discovery as may be necessary or appropriate for the protection of and to prevent hardship to and excessive burden upon a person. Such orders may, among other subjects, limit the scope of depositions, prohibit questions or subjects of inquiry, require or excuse answers to questions on deposition, limit or excuse, in whole or in part, production of documents or answers to interrogatories, and shorten or extend the time within which any act shall be performed.

(2) The Commission may make appropriate orders, including dismissal of a proceeding or denial of relief, as may be warranted for failure or refusal to comply with an order issued pursuant to this subsection.

(e) Discovery in proceedings on the PUD docket.

(1) Except as otherwise directed by the Commission, in proceedings on the PUD docket the parties of record may also obtain discovery by document request, data request or interrogatory without filing a motion for an order of the Commission. When discovery is sought without a prior order, the provisions of (b) (3), (4) and (5) of this Section shall apply, and the references to orders therein shall be deemed to mean requests for discovery.

(2) In a proceeding filed pursuant to 17 O.S. § 152(B), 17 O.S. § 137, or 18 O.S. § 438.31 et seq., discovery by document request, data request or interrogatory shall be governed by the provisions of OAC 165:5-7-61.

(3) In all other proceedings on the PUD docket, responses to any document request, data request or interrogatory shall be due twenty (20) calendar days after receipt of the same, unless:

(A) An objection is filed within ten (10) business days and a ruling is made establishing a different response time. The attorney filing such objection must attest that the objection is not frivolous or for the purpose of delay. The objecting party is not required to respond until an objection is ruled upon. The ruling shall state the time in which to respond; or,

(B) The party requesting discovery and the producing/responding party agree in writing to a different response time.

(4) The Commission may allow a shorter or longer time for response for good cause shown, but in no event may the Commission order a response to be served in less than ten (10) business days, except as otherwise agreed by the person ordered to respond.

(5) Any document request, data request, or interrogatory received after 3:00 p.m. shall be deemed received the next regular business day.

(6) A copy of all data requests and/or answers to data requests shall be submitted to all counsel of record by regular mail, electronic mail or in person at the same time they are issued or answered.

(7) Objections to a document request, data request, interrogatory, or the time in which to respond may be presented to the Administrative Law Judge unless otherwise ordered by the Commission en banc. Any ruling by the Administrative Law Judge on an objection may be orally referred to the Commission en banc in accordance with the provisions of OAC 165:5-13-5(a)(1).

(8) Any objection(s) relating to a discovery request or the time in which to respond shall be set on the next PUD motion docket unless the Administrative Law Judge and the requesting and responding parties of record agree to a different date and time.

(9) The responding party shall promptly supplement any prior discovery response or deposition answer by disclosing to the requesting party any known information the existence of which materially affects the accuracy or completeness of the response previously provided. The duty of disclosure extends beyond any discovery deadline unless otherwise ordered.

(f) Discovery in proceedings on the OSF docket.

(1) At any time prior to a determination being filed in an OUSF funding request filed pursuant to 17 O.S. §§ 139.101 *et seq.*, discovery by document request, data request or interrogatory by the OUSF Administrator shall be answered within five (5) business days. The responding party will be provided up to an additional five (5) business days to respond, if requested. The filing of an objection in response to a discovery request is not be required; however, the responding party may inform the OUSF Administrator that an answer or any supplemental answer will not be provided.

(2) If a request for reconsideration is filed in connection with an OUSF funding request, the Administrative Law Judge or Commission shall establish a discovery response time and allow for objections to discovery requests in a procedural schedule.

(3) For all other cases filed pursuant to the Oklahoma Telecommunications Act of 1997, discovery by document request, data request or interrogatory by a party of record shall be answered within ten (10) business days, unless a different response time and objection period is established by the Administrative Law Judge or the Commission.

(4) Objections to discovery requests shall be filed within five (5) business days, and may be presented to the Administrative Law Judge, unless otherwise ordered by the Commission. The objection shall be set on the next available motion docket unless the Administrative Law Judge and the requesting and responding parties of record agree to a different date and time. Any ruling by the Administrative Law Judge on an objection may be orally referred to the Commission en banc in accordance with the provisions of OAC 165:5-13-5(a)(1). The filing of an objection pursuant to this subsection shall toll the time to respond pending the ruling on the objection.

(5) Any document request, data request, or interrogatory received after 3:00 p.m. shall be deemed received the next business day.

(6) A copy of all data requests and/or answers to data requests shall be submitted to all counsel of record by regular mail, electronic mail, or in person at the same time they are issued or answered.

(7) The responding party shall promptly supplement any prior discovery response or deposition answer by disclosing to the requesting party any known information the existence of which materially affects the accuracy or completeness of the response previously provided. The duty of disclosure extends beyond any discovery deadline unless otherwise ordered.

(g) This Section shall not be interpreted to limit the Commission's authority pursuant to Article IX, Sections 18, 19, and 28 of the Oklahoma Constitution.

(h) Pursuant to 17 O.S. § 330, discovery for proceedings on the Petroleum Storage Tank docket shall be conducted under the provisions of the Oklahoma Discovery Code, 12 O.S. §§ 3224 through 3237. See also OAC 165:5-21-7.

165:5-11-2. Prehearing conference

(a) **Objective.** The Commission, with or without request of any party of record, may order the parties of record or their attorneys to appear at a designated time for a prehearing conference. The conference shall be attended by the parties of record or their attorneys who have full knowledge of the cause and who have authority to bind their clients by stipulations. The conference shall meet to consider:

- (1) Simplification of the issues and amendments to documents.
- (2) Presentation of issues of law, adjudication of which may simplify or eliminate issues of fact.
- (3) Admissions and stipulations of fact which will avoid unnecessary evidence and testimony. No stipulation, settlement or agreement between the parties of record, their attorneys, or representatives, with regard to any matter involved in any cause shall be enforced unless it shall have been reduced to writing and signed by the parties of record or the representatives authorized by these rules to appear for them, and thereafter made a part of the record or unless it shall have been dictated into the record by them during the course of a hearing, or incorporated into an order bearing their written approval. This Section shall not limit a party of record's ability to waive, modify or stipulate any right or privilege afforded by the rules of this Chapter, unless precluded by law.
- (4) Identification of documents to be offered at the hearing.
- (5) Identification of and numerical limit upon experts and other witnesses.
- (6) Discovery and production of documents, records, data and other information.
- (7) Audit, investigation and visitation by the Commission or its representatives.
- (8) Other matters as may aid in trial of the cause.

(b) **Notice.** Notice of the time and place of a prehearing conference shall be as prescribed by order of the Commission and shall be served by regular mail, facsimile, electronic mail or in person upon all parties of record by the person requesting the prehearing conference or by the Commission.

(c) **Preliminary order.** Actions taken at the prehearing conference may be embodied in a preliminary order, which order shall control subsequent proceedings in the cause and shall be binding on all parties of record, whether or not present, unless modified to prevent manifest injustice.

[Source: Amended at 27 Ok Reg 2098, eff 7-11-10]

165:5-11-2.1. Initial Screening Conference ("ISC")

(a) The following public utility causes may be set before the Commission for screening to determine if the Commission will retain that cause or refer the cause to an Administrative Law Judge for hearing. The Initial Screening Conference may apply to the following public utility causes:

- (1) Applications for general rate change.
- (2) Applications involving utility restructuring and/or competitive issues.
- (3) Other causes as may be decided by the Commission.

(b) The conference will be conducted as an on-the-record proceeding, open to the public and will convene to consider:

- (1) Whether the cause is judicial or legislative in nature.
 - (2) Identification of preliminary issues of law and fact including any policy issues.
 - (3) Discussion of the Public Utility Division Staff's participation in the cause and designation of advisory/deliberating counsel and counsel assigned to represent the Public Utility Staff.
 - (4) Whether the cause will be heard by the Commission, the Commission with a Public Utility Referee, or referred to an Administrative Law Judge for hearing.
 - (5) Any procedural matters including notice requirements.
 - (6) Any other matters that may assist in the disposition of the cause.
- (c) Deliberating counsel shall give notice of the time and place of the Initial Screening Conference to the Public Utility Division Director, the Attorney General, all parties of record, and any respondents named in the application not less than five (5) days prior to the Initial Screening Conference.
- (d) Actions taken at the Initial Screening Conference may be embodied in a preliminary procedural order, which order shall control subsequent proceedings in the cause and shall be binding on all parties of record unless otherwise ordered by the Commission.

[Source: Added at 20 Ok Reg 2293, eff 7-15-03; Amended at 27 Ok Reg 2098, eff 7-11-10]

165:5-11-3. Commission subpoena

- (a) **Subpoena.** The Commission, upon motion of a person or upon motion of the Commission, may order the Secretary to issue a subpoena in the name of the Commission in any pending cause requiring attendance of a witness from any place in the State to the place of hearing. Praecipe for subpoena shall be filed with the Court Clerk and the order of the Commission endorsed thereon.
- (b) **Subpoena Duces Tecum.** A subpoena may require the witness to produce at the hearing books, records, accounts, papers and other documents and tangible objects, which shall be described with reasonable particularity in the subpoena. A subpoena duces tecum directed to a person not an individual may direct that the records be produced by an officer or employee responsible therefor.
- (c) **Service of subpoena.** A subpoena may be served by a law enforcement officer, by an attorney, or by any other person competent to make an oath; and the person serving the same shall attach his affidavit of the person served, and the time and manner of service. Service also may be made in any other manner provided by law. A person may be served by leaving a copy thereof at the principal place of business of the person, with the person or an employee who customarily serves as the secretary or receptionist of the person. A subpoena shall be served on a witness not less than five (5) days prior to hearing.
- (d) **Return.** The original subpoena, with affidavit of service thereon, shall be filed with the Court Clerk. The attendance of a witness shall not be enforced unless the original subpoena is on file at the time of the hearing.
- (e) **Fees.** The attendance of a witness will not be enforced unless the person causing subpoena to be issued tenders the witness fee provided by law for a witness subpoenaed to testify in the district courts of Oklahoma. Attendance of a witness shall not be enforced at the second or subsequent day of hearing unless the person causing the subpoena to be issued tenders additional mileage to and from the place of hearing. The payment of fees shall not be required when a subpoena is issued on behalf of the Commission.

(f) **Testimony.** A witness present at a hearing pursuant to subpoena may be called to testify by the Commission or Administrative Law Judge or by any party of record.

(g) **Protective orders and orders quashing subpoenas.** The Commission may make any orders with respect to subpoena and attendance of a witness as may be appropriate for the protection of persons, including an order quashing subpoena, excusing attendance of witnesses, or limiting documents to be produced.

(h) **Subpoenas regarding the Petroleum Storage Tank docket.** Pursuant to 17 O.S. § 330, subpoenas may be issued in proceedings on the Petroleum Storage Tank docket pursuant to the provisions of 12 O.S. § 2004.1. See also OAC 165:5-21-8.

[Source: Amended at 16 Ok Reg 829, eff 1-25-99 (emergency); Amended at 16 Ok Reg 2807, eff 7-15-99; Amended at 19 Ok Reg 1939, eff 7-1-02; Amended at 27 Ok Reg 2098, eff 7-11-10]

SUBCHAPTER 13. INITIAL AND SUBSEQUENT PROCEEDINGS

165:5-13-1. Sessions and hearings

(a) **Open to public.** All official sessions and public hearings of the Commission or any Administrative Law Judge will be open to the public and will be held in its official courtrooms at the principal office in Oklahoma City, Oklahoma, the regional service office in Tulsa, Oklahoma, or at such other place as provided by law or designated by the Commission.

(b) **Time.** All hearings shall commence at the time designated in the notice of hearing or by order of the Commission.

(c) **Courtroom conduct.** Conduct of attorneys before the Commission shall be governed by the applicable rules of the Supreme Court of Oklahoma. All parties, witnesses, and observers will at all times maintain decorum, and will conduct themselves in such manner as to reflect respect for the authority and dignity of the Commission and its Administrative Law Judges. Upon violation of this provision, any person, witness, attorney, or other representative may be subject to punishment for contempt.

(d) **Record of hearing.** A stenographic or electronic record will be made of all proceedings before the Commission or an Administrative Law Judge pursuant to 20 O.S. §106.4(A). Audio and video recordings of all proceedings are official electronic records to be kept by the Commission of which a copy may be kept by the court reporter present during the proceeding. A transcript of proceedings will be made by a court reporter at the request and expense of the person ordering it; or at the request of the Commission, in which case a copy will be made for any person requesting it, at that person's expense.

[Source: Amended at 12 Ok Reg 2005, eff 7-1-95; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 34 Ok Reg 905, eff 9-11-17]

165:5-13-2. Setting of causes

(a) **General.** All hearings on the merits shall be set before an Administrative Law Judge, unless otherwise ordered by the Commission.

(b) **Specially set.** By a motion, the applicant or any party of record or respondent may, at any time up to commencement of a hearing, request of the Commission that a cause be specially set before the Commission for hearing. The Commission may advance any cause by sua sponte order at any time.

(c) **Exceptions.** For purposes of OAC 165:5-13-5, all exceptions to reports on hearings on the merits in matters on the GG, CD, PD, EN, SF, PSD and US dockets shall be heard by the Commission en banc unless referred to an Oil and Gas

Appellate Referee. Hearing dates for exceptions are to be secured from a docket clerk at the time of filing. The exceptions will be heard on that date or as soon thereafter as may meet the convenience of the Commission. Exceptions in all other matters shall be set before the Commission en banc.

(d) **Authority of Administrative Law Judge.** An Administrative Law Judge shall exercise all of the powers of the Commission in the conduct of a cause. An Administrative Law Judge shall rule upon admission of evidence, and objections thereto, and upon any other motion or objection arising during the pendency of the cause until the issuance of the report of the Administrative Law Judge. Review of a ruling of an Administrative Law Judge shall be by exceptions pursuant to OAC 165:5-13-5, and any objection to a ruling or other action of such Administrative Law Judge not included in such exceptions and amendments thereto, shall be deemed to have been waived.

(e) **Hearings on the PUD docket.** All hearings in causes filed pursuant to OAC 165:70 or 18 O.S. §438.31 et seq. shall be given priority status on the PUD docket in order to comply with 17 O.S. §152, 17 O.S. §137 (I) and 18 O.S. §438.31 et seq.

(f) **Hearings on the Petroleum Storage Tank docket.** All hearings regarding the exercise of the Commission's adjudicative authority pursuant to the Oklahoma Petroleum Storage Tank Consolidation Act, 17 O.S. §§301 et seq. shall be given priority status on the Petroleum Storage Tank docket ("PSD") in order to comply with 17 O.S. §-330 for the Commission to hear each case within one hundred eighty (180) days from the date of filing. See also OAC 165:5-21-9.

[Source: Amended at 12 Ok Reg 2015, eff 7-1-95; Amended at 13 Ok Reg 1159, eff 11-15-95 (emergency); Amended at 13 Ok Reg 2361, eff 7-1-96; Amended at 16 Ok Reg 829, eff 1-25-99 (emergency); Amended at 16 Ok Reg 2807, eff 7-15-99; Amended at 19 Ok Reg 1939, eff 7-1-02; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 35 Ok Reg 946, eff 10-1-18; Amended at 36 Ok Reg 517, eff 8-1-19]

165:5-13-2.1. Appointment of Public Utility Referee

(a) In Public Utility cases, the Commission may determine that a cause is of such public interest that the Commission may sua sponte appoint a Public Utility Referee to serve as the Administrative Law Judge with and/or for the Commission conducting the hearing process in the cause.

(b) The Public Utility Referee shall confer with and assist the Commissioners on all matters regarding the pending cause.

(c) The Public Utility Referee may assist the Commission in conducting the hearing of the cause in accordance with all other provisions of this Chapter; except that all provisions of this Chapter providing for exceptions of any nature are not applicable.

(d) Upon conclusion of the hearing of the cause, the Commissioners may seek the assistance of the Public Utility Referee in reaching a determination in the cause.

[Source: Added at 20 Ok Reg 2293, eff 7-15-03; Amended at 27 Ok Reg 2098, eff 7-11-10]

165:5-13-3. Hearings

(a) **Conduct of hearing.** Every hearing shall be conducted by the Commission, by an Administrative Law Judge or as provided at OAC 165:5-13-2.1. The Commission or Administrative Law Judge shall call the cause for hearing, after which proceedings shall be had as provided in this Section.

(b) **Scope of hearings.** The Commission, Administrative Law Judge or Public Utility Referee may state the purpose and scope of the hearing, or the issues upon which evidence will be heard.

(c) **Appearances.** Every person appearing shall enter his appearance by stating his name and address. Thereafter, such person shall be deemed a party of record, unless

specified otherwise. An individual may appear on his own behalf. A corporation may appear only by its attorney; provided, that a representative other than an attorney may appear on behalf of a corporation for the sole purpose of making a statement or indicating corporate policy. Such a representative may not assume an advocate's role or introduce evidence or examine witnesses in the proceeding.

(d) Protests.

(1) Except as otherwise permitted by this Chapter, any person desiring to protest the relief requested by the application shall file a notice of protest with the Court Clerk's office.

(2) Before the protest is filed or within a reasonable time thereafter, the protestant shall give notice to the applicant in a manner designed to advise the applicant of the protest prior to the scheduled hearing. Once filed, the written protest shall be provided to the applicant by regular mail, facsimile, electronic mail or in person.

(3) A protesting party initially may announce a protest to a case at the time of hearing, but shall subsequently file a written protest within a reasonable amount of time after the announcement of such protest.

(4) A protest form will be available on the Commission's website; however, such form is not required as long as the filed protest document contains the required information.

(5) A filed protest must contain the caption of the application and contact information of the protestant or the protestant's attorney.

(6) The provisions of this subsection shall not apply to causes filed on the PUD or OSF dockets.

(e) Preliminary matters. The following shall be addressed prior to receiving evidence:

(1) The applicant, or staff counsel, may offer preliminary exhibits, including documents necessary to present the issues to be heard, notices, proof of publication and orders previously entered in the cause.

(2) Ruling may be made on any pending motions, including requests pertaining to discovery.

(3) Stipulations of fact and stipulated exhibits shall be received. No stipulation, settlement, or agreement between the parties of record, their attorneys, or representatives with regard to any matter involved in any cause shall be enforced unless it shall have been reduced to writing and signed by the parties of record or the representatives authorized by the rules of this Chapter to appear for them and thereafter made a part of the record, or unless it shall have been dictated into the record by them during the course of a hearing or incorporated into an order bearing their written approval. This Section does not limit a party of record's ability to waive, modify, or stipulate any right or privilege afforded by the rules of this Chapter, unless precluded by law.

(4) Parties of record may, in the discretion of the Commission or Administrative Law Judge, make opening statements where appropriate.

(5) Any other preliminary matters appropriate for disposition prior to presentation of evidence.

(f) Rules of evidence. The Commission and Administrative Law Judges shall follow the rules of evidence applied in the district courts of Oklahoma, except that such rules may be relaxed where the Commission or the Administrative Law Judge deems it in the public interest to do so. The Commission or Administrative Law Judge may exclude evidence upon objection made thereto, or the evidence may be

received subject to final ruling by the Commission. An exception will be deemed to be preserved by a party of record objecting to evidence upon an adverse ruling thereon. The Commission or Administrative Law Judge may exclude inadmissible evidence on his own motion and may direct cumulative evidence be discontinued.

(g) **Order of proof.** The applicant or complainant who institutes a cause may open and close the proof. Staff counsel may open and close a cause instituted by the Commission or a staff member. Intervenors may be heard immediately following parties of record with whom allied in interest. In all cases, the Commission or Administrative Law Judge shall designate the order of proof.

(h) **Examination of witnesses.** Every witness shall be examined and cross-examined orally and under oath by not more than one attorney for each party of record. The Commission or Administrative Law Judge shall designate the order of examination and may limit the scope of examination and cross-examination.

(i) **Adverse party.** A party of record may call an adverse person or an officer or employee of an adverse person, in which case the witness may be impeached and otherwise cross-examined.

(j) **Record.** All testimony shall be taken on the record.

(k) **Prepared testimony.** Written testimony of a witness in form of questions and answers, or a narrative statement may be received in lieu of direct examination upon authentication by the witness under oath. In order to be received and relied upon at the hearing, such testimony and exhibits shall be filed and served upon all parties of record not less than five (5) days prior to the hearing, unless otherwise ordered by the Commission for good cause shown. The witness shall be subject to cross-examination. A written or oral statement by or a communication from any person, or a statement or resolution of a political subdivision, trade association, civic organization, or other organization may be received without cross-examination, but will be considered only as argument and not as proof of any recitation of facts contained therein.

(l) **Documents.**

(1) A photographic copy of a document which is on file as part of the official records of the Commission will be received without further authentication.

(2) A photographic copy of a public record certified by the official custodian thereof will be received without further authentication. A written statement by such custodian of records that no record or entry of described character is found in his records shall be received as proof of absence of such record.

(3) A photographic copy of a document may be substituted for the original at the time the original is offered in evidence.

(4) A document may not be incorporated in the record by reference except by permission of the Commission or Administrative Law Judge. Any document so received must be precisely identified.

(5) The Commission or Administrative Law Judge may require that documents such as rate compilations, statistical or technical data, and tabulated material be filed at a designated time prior to the hearing.

(6) The Commission or Administrative Law Judge may require that additional copies of exhibits be furnished for use by the Commission, staff counsel, and other parties of record.

(7) When evidence is offered which is contained in a book or document containing material not offered, the person offering the same shall extract or clearly identify the portion offered.

(8) The Commission or Administrative Law Judge may permit a party of record to offer a document as part of the record within a designated time after conclusion of the hearing.

(m) **Exhibits.** All exhibits shall be identified by docket type and cause number on the first page of each exhibit prior to submitting to the Commission. All pages of each exhibit shall have continuous pagination. Each exhibit shall conform to the following requirements:

- (1) all exhibits must be legible;
- (2) the font must be no smaller than a size 10 font;
- (3) if multiple colors are used, the colors shall be sufficiently distinguishable; and
- (4) data shall be included on each exhibit to support the relief requested.

(n) **Summary exhibits.** An exhibit consisting of a compilation or summary of evidence, records, data, statistics, or other similar information may be received in evidence in addition to or in lieu of the evidence summarized, provided:

- (1) The evidence summarized has been admitted in evidence, or is admissible; and
- (2) If the evidence summarized has not been admitted, the person offering the summary exhibit has made the evidence summarized available for inspection by all other parties of record, or the information is published in a generally recognized publication which is available to all parties of record. It shall be the responsibility of a person offering a summary exhibit to comply with this subsection in advance of the hearing, and failure to make the evidence summarized available for inspection shall be grounds for refusal to admit the exhibit.

(o) **Closing the record.** The record shall be closed when all parties of record have had an opportunity to be heard and to present evidence, and the Commission or Administrative Law Judge announces that the record of testimony and exhibits is closed. Unless a decision is then announced, the matter will be taken under advisement for later decision.

(p) **Briefs.** The Commission or Administrative Law Judge may require or allow the filing of briefs by the parties of record, and may designate the order and time for filing briefs and reply briefs.

(q) **Reopening the record.** Any person may file and serve, by regular mail, facsimile or electronic mail on all parties of record a motion to reopen the record for further hearing or to offer additional evidence. The Commission, at any time prior to final order in the cause, may, upon such motion or upon the motion of the Commission, order the record to be reopened for the purpose of taking testimony and receiving evidence which was not or could not have been available at the time of the hearing on the merits or for the purpose of examining its jurisdiction. A motion to reopen shall be filed and served in the same manner as provided in OAC 165:5-9-2(b). The motion and notice shall include a statement that if the Administrative Law Judge grants the motion, the record may be reopened the same day or on some other day as the Commission may determine.

(r) **Corrections to transcript.** Except as provided in OAC 165:5-13-1(d), an official reporter shall make a stenographic and electronic record of the hearing. Errors claimed to be in a transcription of either a contested or uncontested hearing shall be noted in writing and suggested corrections may be offered to the Commission or Administrative Law Judge who presided at such hearing within ten (10) days after the transcript is filed, unless the Commission or Administrative Law Judge shall permit suggested corrections to be offered thereafter. Suggested

corrections shall be served in writing upon each party of record and the Commission or Administrative Law Judge. If not objected to within twelve (12) days after being offered, the Commission or Administrative Law Judge shall direct that such suggested corrections be made and the manner of making them. In the event that parties disagree on suggested corrections, the Commission or Administrative Law Judge, with the aid of argument and testimony from the parties of record, shall then determine the manner in which the record shall be changed, if at all.

(s) **Preparation of report or order.** The Commission or Administrative Law Judge may permit or direct any party or parties of record to prepare a proposed report or order in any protested cause. In unprotested causes, the applicant shall prepare and submit a proposed Commission order.

(1) Orders regarding non-emergency applications shall be submitted to the Administrative Law Judge within thirty (30) calendar days of the date the Administrative Law Judge announced the recommendation unless the Administrative Law Judge directs otherwise.

(2) Proposed orders regarding emergency applications shall be submitted to the Administrative Law Judge within ten (10) business days of the date the Administrative Law Judge announced the recommendation unless the Administrative Law Judge directs otherwise.

(3) Failure to submit a proposed order to the Administrative Law Judge within the time frame required by this subsection may result in the Administrative Law Judge reopening the record, with five (5) business days' notice to the party or parties of record, and the application being recommended for dismissal unless good cause is shown for the failure to supply the proposed order as required. Notice to the party or parties of record may be provided via electronic mail.

[Source: Amended at 17 Ok Reg 2299, eff 7-1-00; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 31 Ok Reg 959, eff 9-12-14; Amended at 34 Ok Reg 905, eff 9-11-17; Amended at 36 Ok Reg 517, eff 8-1-19; Amended at 37 Ok Reg 1082, eff 10-1-20]

165:5-13-3.1. Optional procedure for spacing related applications

(a) If no protest to a spacing related application is filed prior to the docket call or is announced at docket call, an applicant for spacing, despadding, increased well density, or location exception may elect for consideration of the merits of the cause without a full evidentiary hearing. Such review of the cause shall be referred to as the optional procedure.

(b) After electing the optional procedure, the applicant shall provide the Administrative Law Judge with a proposed order and documentation supporting the application. With respect to documentation, any written testimony shall be presented in the form of a sworn, notarized affidavit which shall be marked as exhibits and entered into the record.

(c) The Administrative Law Judge shall prescribe the time period for completing the record and may request additional evidence as deemed appropriate.

(d) After closing the record, the Administrative Law Judge shall have seven (7) business days in which to make a recommendation to the Commission concerning disposition of the application.

(e) If the Administrative Law Judge's recommendation is unfavorable, the matter will be automatically set for a full evidentiary hearing before the same Administrative Law Judge. Any exceptions from the report issued after the full evidentiary hearing will proceed pursuant to OAC 165:5-13-5.

[Source: Added at 10 Ok Reg 2591, eff 6-25-93; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 34 Ok Reg 905, eff 9-11-17; Amended at 36 Ok Reg 517, eff 8-1-19]

165:5-13-4. Report of Administrative Law Judge

(a) At the conclusion of a hearing before an Administrative Law Judge, such officer shall, at the earliest practicable date, file a written report in the proceeding. The report shall contain the following:

- (1) Names of parties of record and their attorneys.
- (2) Brief statement of facts establishing jurisdiction of the cause.
- (3) Brief summary of the evidence of each party of record who offered evidence.
- (4) The pertinent facts as found by the officer upon consideration of all evidence offered.
- (5) Recommended conclusions of law and recommendations as to action to be taken or relief to be granted or denied.
- (6) In oil and gas conservation causes and pollution causes, such report shall be prepared only when a party of record in the hearing before the Administrative Law Judge has formally, in writing, protested the granting of the application, or, in the judgment of the Administrative Law Judge, the issuance of a report is required.

(b) The Administrative Law Judge shall send a copy of the report by regular mail, facsimile, electronic mail or in person to each party of record.

(c) At the expiration of ten (10) business days after the report is filed, if no exceptions are filed, the Commission shall enter such order as shall be deemed appropriate upon consideration of the report.

(d) In any conservation or pollution cause in which the Administrative Law Judge has recommended that an order issue, but the approval of staff counsel or technical staff is withheld after all efforts have been exhausted to resolve technical or legal problems with the applicant and Administrative Law Judge, the Administrative Law Judge shall issue a report in accordance with this Section, allowing any person time to file exceptions.

(e) Upon request by a Commissioner, an Administrative Law Judge shall appear at any scheduled signing agenda, Commission hearing or public deliberation to respond to questions from the Commissioners concerning the proposed order or report of the Administrative Law Judge.

(f) When a recommendation is made by an Administrative Law Judge on the Motor Carrier Citation Docket, a report for individual citations shall only be required once a request has been received conforming with OAC 165:5-13-5(a)(3).

[Source: Amended at 20 Ok Reg 2293, eff 7-15-03; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 34 Ok Reg 905, eff 9-11-17; Amended at 36 Ok Reg 517, eff 8-1-19; Amended at 37 Ok Reg 1082, eff 10-1-20]

165:5-13-5. Exceptions to Report of Administrative Law Judge

(a) **Reviewability.** Except as provided in OAC 165:5-9-6(c) for rulings on continuances, any report from Administrative Law Judges shall be subject to review in the manner prescribed in this Section. Oral argument before the Commission en banc in an oil and gas related matter is not a matter of right. The Commission en banc may deny a motion to entertain oral argument on any oil and gas related exceptions without a response being filed or hearing oral presentation on said motion.

- (1) **Oral exceptions regarding motions and emergency matters.** Any person adversely affected by a decision of an Administrative Law Judge on

the motion/emergency docket shall have no more than five (5) days in which to advise the Administrative Law Judge, other parties of record, and the Judicial and Legislative Services of his or her intent to lodge exceptions and any request for oral arguments on the exceptions before the Commission en banc. Written exceptions shall not be required. Oral exceptions shall be set for hearing before the Corporation Commission sitting en banc unless referred to an Oil and Gas Appellate Referee or an Administrative Law Judge regarding matters involving issues addressed in Chapters 10, 15, 16, 25, 26, 27, 28, and/or 29. Oral exceptions in all other matters shall be set for hearing before the Commission sitting en banc. Oral exceptions will be set on the next regularly scheduled day for such matters unless:

- (A) The parties agree to another date; or
- (B) The Commission specifies otherwise.

(2) **Exceptions to the report from the hearing on the merits.** Any person adversely affected by a report of an Administrative Law Judge from the hearing on the merits shall have ten (10) business days in which to file exceptions to the report before the Commission en banc. To perfect exceptions, written exceptions must be filed within ten (10) business days after filing of the Report of the Administrative Law Judge. The person filing exceptions shall serve copies of the exceptions and notice of hearing for the exceptions on all parties of record and the Administrative Law Judge below. Such service shall be made not later than five (5) days after the expiration of the ten (10) business day period for filing the exceptions. In exceptions before the Commission en banc arising from the Petroleum Storage Tank and/or Indemnity Fund, an additional ten (10) business days shall be allowed for the filing of cross exceptions. OAC 165:5-13-2 shall govern the setting of the exceptions. If a party desires the Commission en banc to hear oral arguments on any exceptions, a motion for oral argument of exceptions before the Commission en banc must be filed with the exceptions.

(3) **Exceptions to Report from the Motor Carrier Citation Docket.** Any party of record adversely affected by a recommendation of an Administrative Law Judge on the Motor Carrier Citation Docket shall have five (5) business days from the date the oral recommendation is made to request a report of the Administrative Law Judge for the purpose of filing written exceptions. The request shall be sent jointly to the Administrative Law Judge who issued the recommendation and all other parties of record. Written exceptions shall be filed within ten (10) business days of issuance of the written report. The hearing on the written exceptions shall be heard by an Administrative Law Judge on the next available Motor Carrier Citation Docket or at the Commission en banc's discretion.

(b) **Contents of the exceptions.** For purposes of (a)(2) of this Section, the written exceptions shall specifically state the findings or portions of the report to which the person takes exception, and in what respect the person alleges the findings and report to be in error. A person may be permitted to amend his exceptions, or to present at the initial hearing on exceptions thereon additional grounds for exceptions from the report. A person taking exception from any part of the summary of the evidence stated in the report of the Administrative Law Judge, shall attach to his exceptions a transcript or what he deems a correct summary of the pertinent evidence, provided that if the transcript is unavailable at the time of filing

of the exceptions, then any person filing exceptions desiring to use a transcript instead of a summary of evidence shall, at the discretion of the Commission en banc, or the Oil and Gas Appellate Referee or Administrative Law Judge to whom the exceptions have been referred, submit the transcript as soon as it is available. In the absence of such a transcript or summary of the evidence, the exceptions shall be considered based on the summary of evidence in the appealed report.

(c) Responses to written exceptions. For purposes of exceptions under (a)(2) of this Section, any other person may file written response to the exceptions within five (5) business days after service thereof, and may attach thereto a transcript or his own summary of the pertinent evidence, provided that if a transcript is unavailable at the time of the filing of the exceptions, the party desiring to use the transcript instead of a summary of evidence shall, at the discretion of the Commission en banc, or the Oil and Gas Appellate Referee or Administrative Law Judge to whom the exceptions have been referred, submit the transcript as soon as it is available. In the absence of a transcript or written summary of evidence submitted by a party of record, the exceptions shall be considered upon the summary of the evidence in the exceptions to the report.

(d) Contents of the Oil and Gas Appellate Referee or Administrative Law Judge Reports. In a case where exceptions are referred to an Oil and Gas Appellate Referee or Administrative Law Judge, such Referee or Administrative Law Judge shall file a written report, stating a recommendation to the Commission to affirm, reverse, or modify the findings of fact or conclusions of law of the Administrative Law Judge below or to remand the cause for further hearing. The Commission, as the final arbiter, shall enter the order it deems appropriate.

(e) Scope of review by the Commissioners. With respect to any report, the Commission sitting en banc may affirm, reverse, or modify the findings of fact or conclusions of law of the Administrative Law Judge, or may remand the cause for further hearing. The Commission shall enter the order in its discretion as it deems appropriate.

SUBCHAPTER 15. ORDERS

165:5-15-1. General form and procedure

(a) Contents of orders. The Commission may prescribe a standardized format for all orders. Every order of the Commission shall contain the following where appropriate or except where the Commission determines otherwise:

- (1) Caption, cause number on the appropriate docket and order number. Every page of the order shall also contain a page number, the applicable subject matter docket listed in OAC 165:5-5-1(a), the docket number assigned to the cause by the Court Clerk, and order type, e.g., emergency order, final order, etc.
- (2) Appearances.
- (3) Date and place of all hearings.
- (4) Summary of allegations of applicant, and of all other parties of record.
- (5) Summary of evidence of applicant, and of all other parties of record.
- (6) Findings of fact, containing all ultimate facts found to have been established.
- (7) Conclusions of law, containing:

- (A) All legal conclusions found to be applicable to the facts; and
- (B) The directive of the order stated in concise and mandatory language.

(8) Signature of the Secretary certifying as to all Commissioners participating in making the order. The signatures of the Secretary and Commissioners participating in the making of the order may be electronic signatures as provided in OAC 165:5-1-14.

(9) Seal of the Commission.

(10) Date of filing, and effective date where appropriate.

(b) **Duty to send orders.** The Commission shall immediately provide a copy of the order to the applicant. Upon the implementation of electronic filing, delivery shall only be made by electronic mail, unless there are exigent or extraordinary circumstances. Except where otherwise specifically provided in this Chapter, the applicant shall thereafter mail or otherwise deliver a copy of the order within five (5) days of the receipt of the order to all parties of record and to each respondent in the cause. Where an attorney has appeared of record for a person, service shall be on the attorney.

(c) **Effectiveness of order.** The issuance of or effectiveness of an order or its enforcement will not be stayed or postponed by the filing of any motion for rehearing or for other relief therefrom. The Commission may by order stay any order pending further hearing, and may stay or postpone the effective date thereof, or enforcement thereof for such time and on such terms as may be just.

(d) **Order titles and numbers.** An order of the Commission, descriptively titled, shall be issued for all motions and other matters set for hearing, except for continuances, and all such orders shall be given an order number; provided that when a motion is withdrawn, no order shall be required to document the withdrawal.

[Source: Amended at 10 Ok Reg 2591, eff 6-25-93; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 34 Ok Reg 905, eff 9-11-17; Amended at 36 Ok Reg 517, eff 8-1-19; Amended at 37 Ok Reg 1082, eff 10-1-20]

165:5-15-2. Unitization orders

In addition to the requirements of 52 O.S. §§287.1-287.15, to each order authorizing and providing for the unitized management, operation, and further development of oil and gas properties pursuant to the Unitized Management of Common Sources of Supply Act (52 O.S. §§287.1- 287.15) shall be attached a plat showing the outside boundaries of the surface area included in such order.

165:5-15-3. Pooling orders

(a) **Termination of order.** A pooling order shall contain language to the effect that if operations for the drilling of the well are not commenced within the time designated, the order shall terminate except as to the payment of cash bonuses.

(b) **Affidavit of mailing.** The applicant or other responsible person shall file with the Court Clerk, within ten (10) days from the date of the pooling order, an affidavit stating that a copy of said order was mailed within three (3) days from the date of the order, unless the Commission directs otherwise, to all parties of record and respondents whose addresses are known. The name and address, if known, of each respondent in the proceeding who has not previously been dismissed shall be set out in the affidavit.

(c) **List dismissed person.** The pooling order shall list all persons dismissed in the cause.

(d) **Elections.** A pooling order shall contain language to the effect that the respondents shall have at least twenty (20) days from the date of the order in which to communicate an election to the applicant or other responsible person as to the option selected under the order, unless the Commission directs otherwise. A respondent in a pooling order shall be deemed to have made a timely election if, as provided in the pooling order, the respondent has delivered his election by timely mailing as indicated by postmark of the U.S. Postal Service on or before the last day allowed in the order, or timely delivery as otherwise provided in the pooling order. The election shall be directed to the person designated in the pooling order to receive elections.

(e) **Escrow accounts.** A pooling order which pools interests of unknown or unlocated owners shall contain language to the effect that if any payment of bonus, royalty payments, or other payments due and owing under the order cannot be made because the person entitled to it cannot be located or is unknown, then the bonus, royalty payments, or other payments shall be paid into an escrow account in a financial institution within ninety (90) days after the order and shall not be commingled with any funds of the applicant or operator; that the Commission shall retain jurisdiction to grant to financially solid and stable holders an exception to the requirement that funds be paid into an escrow account with a financial institution and permit such holder to escrow such funds within such holder's organization; that responsibility for filing reports with the Commission as required by law and Commission rule as to bonus, royalty, or other payments deposited into escrow accounts shall be with the applicable holder; that such funds deposited in said escrow accounts shall be held for the exclusive use of, and sole benefit of, the person entitled to it; and that it shall be the responsibility of the operator to notify all other holders of this provision and of Commission rules regarding unclaimed monies under pooling orders.

(f) **Exhibit list of respondents.** A pooling order shall contain an attached exhibit listing all respondents or interests in the following manner:

(1) **Known respondents.** List all known respondents by name and address.

(2) **Unknown and/or unlocatable respondents.** List all respondents, with last known address if available, or if there are none so state under this section of the exhibit.

(3) **Respondents listed for curative reasons only.** List all respondents or if none so state under this section of the exhibit.

(g) **Horizontal wells: election.** A pooling order for a horizontal well unit which overlies existing production from the same common source of supply as the horizontal well unit shall provide that if any owner should elect not to participate in the development of the horizontal spacing unit, said owner's interest in the production from the well or drilling and spacing unit which existed prior to the formation of the horizontal well unit shall not be affected.

(h) **Horizontal wells: conversion.** A pooling order for a horizontal well unit which overlies existing production from the same common source of supply as the horizontal well unit may not provide for the conversion of an existing producing oil or gas well into the permitted well for the horizontal well unit unless all working interest owners in such existing well consent to such conversion. A pooling application for such conversion shall include a statement that all working interest owners in such well have agreed in writing to such conversion.

165:5-15-4. Location exception orders for increased density wells

(a) **Required language; allowable restrictions.** A location exception order for an increased density well where allowable restrictions have been imposed shall contain language obligating the applicant to:

- (1) Maintain a monthly allocation schedule for the well which schedule shall show the method used in calculating the allowable, production and the status as to overage or underage.
- (2) Furnish a copy of the schedule to each offsetting operator who entered an appearance in the cause.
- (3) File with the Gas Department of the Oil and Gas Conservation Division, no later than February 15 each year, a summary of the schedule showing the allowable and production for the calendar year and the status as to overage and underage as of December 31.

(b) **Termination of order.** A location exception order for an increased density well shall terminate if the relief granted is not undertaken within one (1) year from the order's date of issuance, unless otherwise provided in the order.

165:5-15-5. Increased density orders

(a) **Required language; allowable restrictions.** An increased density order where allowable restrictions have been imposed shall contain language obligating the applicant to:

- (1) Maintain a monthly allocation schedule for the well which schedule shall show the method used in calculating the allowable, production and the status as to overage or underage.
- (2) Furnish a copy of the schedule to each offsetting operator who entered an appearance in the cause.
- (3) File with the Gas Department of the Oil and Gas Conservation Division, no later than February 15 each year, a summary of the schedule showing the allowable and production for the calendar year and the status as to overage and underage as of December 31.

(b) **Termination of order.** An increased density order shall terminate if the relief granted is not undertaken within one (1) year from the order's date of issuance, unless otherwise provided in the order.

165:5-15-6. Location exception orders

A location exception order shall terminate if the relief granted is not undertaken within one (1) year from the order's date of issuance, unless otherwise provided in the order. For directionally drilled wells, the location of the entry into and exit from the common source of supply must be specified.

[Source: Amended at 24 Ok Reg 1781, eff 7-1-07; Amended at 26 Ok Reg 2493, eff 7-11-09]

165:5-15-7. Emergency orders

An emergency order shall state, in addition to applicable provisions of OAC 165:5-15-1, the following:

- (1) The emergency or circumstances necessitating the order.
- (2) Any notice given or hearing held prior to entry of the order.
- (3) That the order is temporary, and subject to final determination of the cause.
- (4) The time limitations of the order, which shall be the date set for hearing or another day certain.

- (5) Continuance of the hearing shall not serve to extend an emergency order.
- (6) Any person affected by an emergency order may file written application for a hearing thereon, stating the precise grounds for objection to the order, which hearing may be held upon such notice to other persons as the Commission shall direct.
- (7) An order shall be issued determining the merits of any application for emergency relief relating to a Conservation Docket proceeding within thirty (30) days from the filing of the application.
- (8) An order granting emergency relief relating to a Conservation Docket proceeding shall be effective for a period not to exceed ninety (90) days.

165:5-15-9. Termination of horizontal well unit [REVOKED]

[Source: Revoked at 27 Ok Reg 2098, eff 7-11-10]

SUBCHAPTER 17. POST ORDER RELIEF

165:5-17-1. Within 10 days; motion

(a) Within ten (10) days after an order of the Commission is entered, any person may file a motion for rehearing, or a motion to set aside or to modify the order, or for any other form of relief from the order. However, a motion to reopen the record after an order has been entered shall not be considered a proper motion to seek relief from the order. The motion shall specifically state:

- (1) The parts or provisions of the order sought to be set aside or modified or from which relief is sought.
- (2) The specific modifications or other relief sought by the motion.
- (3) The specific grounds relied upon for relief.

(b) Such motion shall be set for hearing before the Commission, unless referred. The movant is required to serve copies of the motion and notice of hearing on all respondents and parties of record at least five (5) business days prior to the hearing date. The motion and notice of hearing shall be served through the ECF System to those on the Official ECF service list, by regular mail, electronic mail, or in person.

[Source: Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 33 Ok Reg 588, eff 8-25-16; Amended at 38 Ok Reg 1726, eff 10-1-21]

165:5-17-2. After 10 days; application

(a) At any time subsequent to ten (10) days after entry of an order of the Commission, an application to vacate or modify the order, or for any other form of relief from the order, filed by any person, whether or not a party of record in the original cause, shall be treated as a separate cause, and shall be governed by rules applicable to the commencement of a cause. The application shall:

- (1) Identify the order sought to be modified or vacated.
- (2) State specifically the parts or provisions sought to be modified or vacated.
- (3) State specifically the modifications or vacations sought.

(4) State specifically the grounds upon which such relief is sought.

(b) Notice of hearing of the application shall be served and published as required upon the commencement of the cause. The application shall be set for hearing before the Commission or Administrative Law Judge or Public Utility Referee, as provided in this Chapter as to the commencement of a cause.

[Source: Amended at 27 Ok Reg 2098, eff 7-11-10]

165:5-17-3. Motions related to public utility orders

An order of the Commission, granted to a public utility pursuant to 17 O.S. §§181 through 189, approving the issuance of securities or the creation of liens on property in this state to secure the payment of evidences of indebtedness shall not be vacated or modified pursuant to motion or application to vacate or modify filed by any person other than the public utility.

165:5-17-4. Nunc Pro Tunc

With or without notice or hearing, the Commission may make or cause to be made an order nunc pro tunc to correct any clerical errors, mistakes, or omissions in an order, or as to timely mailing of the order by the Commission or otherwise to cause the order to correctly reflect the judgment or action of such Commission.

165:5-17-5. Appeals

All causes on appeal shall be as prescribed by the applicable rules of the Supreme Court of Oklahoma. All appellate petitions, motions, briefs and other filings shall be served on the Commission by mail addressed to the Commission's Agency Counsel.

[Source: Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 35 Ok Reg 946, eff 10-1-18]

SUBCHAPTER 19. CONTEMPT

165:5-19-1. Contempt procedure

(a) **Commencement.** A contempt proceeding is commenced with the filing of a verified Complaint. Prior to the filing of a contempt proceeding by the Commission, or a division thereof, the self-reporting of an apparent violation and corrective actions taken by the Respondent, along with plans to prevent future violations, and/or other mitigating factors should be considered.

(b) **Complaint.** The complaint shall state:

- (1) The name of the person, firm, trust, corporation, or association against whom the complaint is made.
- (2) Each law, order, rule, regulation of which violation is charged.
- (3) In general terms, the acts or omissions constituting the violation of which complaint is made. If complaint is made of more than one violation, each violation shall be separately stated.

(c) **Citation.** When a complaint is filed, the Secretary shall issue in the name of the state a citation directed to the person against whom complaint is made, which citation shall be accompanied by a copy of the complaint. The citation shall state:

- (1) The name of the complainant and the date the complaint was filed.
- (2) A brief description of the nature of the complaint.
- (3) Reference to the accompanying copy of the complaint.

(4) The date upon which the complaint is set for hearing, which shall not be earlier than ten (10) days from the date the citation is served.

(5) A statement that, unless the person complained against shall on or before the date for hearing file a response to the complaint, the allegations and charges therein will be taken as confessed.

(d) **Service of citation.** Service of the citation for contempt may be made by a person directed to do so by order of the Commission. Such service shall be made in accordance with the rules of the Commission. Service shall be made by mailing the citation for contempt by certified mail to the respondent's last known address as listed in Commission records, and, if applicable, to the respondent's registered agent as listed with the Oklahoma Secretary of State. The respondent is responsible for notifying the Commission of any change of address.

(e) **Return of service.** The person making the service shall make his return thereof, and file the same with the Court Clerk. The return shall show the time when the citation was received by him, and the time and manner the same was served by him, and such return shall be verified by the person making the service. Service of the citation for contempt on the respondent by certified mail shall be considered effective on the date of receipt, or if refused, on the date of refusal of the complaint by the respondent. If the certified mailing is returned as undeliverable, the Commission or Administrative Law Judge shall determine sufficiency of service and may recommend additional service requirements. The Commission or Administrative Law Judge may use the service of process requirements in 12 O.S. § 2004 as guidance to ensure effective service.

(f) **Default.** If no response to the complaint is filed on or before the date set for hearing, or if a respondent fails to appear at the time set for hearing, as specified in the citation, the Commission may immediately proceed to hear the complaint. After hearing the evidence, the Commission shall impose such fine, cancellation, suspension, or other order or punishment as the facts and circumstances warrant, or dismiss the complaint.

(g) **Response.** A respondent who desires a hearing shall, on or before the time specified in the citation for hearing, file a response to the merits of the cause and shall appear at the time set for hearing. The response shall include all objections and defenses of any nature to the complaint and may include a motion to dismiss the complaint for reason of insufficiency thereof or lack of jurisdiction.

(h) **Hearing procedures.** At the hearing, the Commission shall first determine whether jurisdiction and service are proper, then hear all objections and defenses other than to the merits of the complaint and shall enter appropriate order thereon. Amendments may be permitted upon terms that are just, with or without grant of a continuance. After all preliminary questions are heard, the Commission shall hear the merits of the complaint, and at the conclusion thereof, shall impose such fine, suspension, cancellation, or other order or punishment as the facts and circumstances warrant, or dismiss the complaint.

(i) **Hearing date.** Every cause instituted hereunder shall be tried on its merits on the date specified in the citation, or at such other time to which such cause shall be continued for hearing by the Commission.

[Source: Amended at 11 Ok Reg 3675, eff 7-11-94; Amended at 35 Ok Reg 946, eff 10-1-18; Amended at 37 Ok Reg 1082, eff 10-1-20]

165:5-19-2. Waiver or reduction of fines and penalties upon small business

(a) **Fines and penalties may be waived against small business.** Pursuant to 75 O.S. § 506, any fine or penalty levied against a small business pursuant to the

contempt procedure provided in this Subchapter may be waived or reduced by the Commission if:

- (1) The small business corrects the violation within thirty (30) days of receiving a complaint, summons and notice of citation for contempt, or other form of citation; or
- (2) The violation was the result of an excusable misunderstanding of the Commission's interpretation of a rule.

(b) **Circumstances when no waiver or reduction may occur.** A waiver or reduction of a fine or penalty may not occur under any of the following circumstances:

- (1) A small business has been notified of the violation of a statute or Commission rule by the Commission pursuant to proper procedure and has been given a prior opportunity to correct the violation on a prior occasion;
- (2) A small business fails to exercise good faith in complying with the statute or Commission rule;
- (3) A violation involves willful or criminal conduct;
- (4) A violation results in serious health, safety, or environmental impact; or
- (5) The penalty or fine is assessed pursuant to a federal law or regulation and for which no waiver or reduction is authorized by the federal law or regulation.

(c) **Small business defined.** For the purposes of the waiver or reduction of a fine or penalty pursuant to 75 O.S. § 506, the term "small business" means a for-profit enterprise consisting of fifty (50) or fewer full-time or part-time employees.

[Source: Amended at 20 Ok Reg 2293, eff 7-15-03]

SUBCHAPTER 21. PROCEDURE FOR THE PETROLEUM STORAGE TANK DOCKET

165:5-21-1. Purpose

The purpose of this Subchapter is to provide rules to govern proceedings filed before the Commission concerning the Oklahoma Petroleum Storage Tank Consolidation Act. Accordingly, all procedural rules necessary to initiate, regulate and litigate the above stated programs have been centralized in this Subchapter for user friendliness, with the exception of the rules contained in Chapter 5 which are "general" rules of procedure. To avoid repetitive rule language, the following rules apply to all proceedings subject to this Subchapter:

- (1) OAC 165:5-1-3 (Definitions)
- (2) OAC 165:5-1-4 (Office location; office hours; records)
- (3) OAC 165:5-1-5 (Filing of documents)
- (4) OAC 165:5-1-6 (Time computations and extensions; effective date)
- (5) OAC 165:5-1-8 (Place of hearing)
- (6) OAC 165:5-1-9 (Telephonic testimony)
- (7) OAC 165:5-5-1 (Dockets; identifying initials)
- (8) OAC 165:5-9-3 (Emergency applications)
- (9) OAC 165:5-11-2 (Prehearing conference)
- (10) OAC 165:5-13-1 (Sessions and hearings)
- (11) OAC 165:5-13-2 (Setting of causes)
- (12) OAC 165:5-13-3 (Hearings)
- (13) OAC 165:5-13-4 (Report of Administrative Law Judge)
- (14) OAC 165:5-13-5 (Exceptions to Report of the Administrative Law Judge)

- (15) OAC 165:5-15-1 (General form and procedure [orders])
- (16) OAC 165:5-15-7 (Emergency orders)
- (17) OAC 165:5-17-1 ([Post order relief] Within 10 days)
- (18) OAC 165:5-17-2 (After 10 days; applicants)
- (19) OAC 165:5-17-4 (Nunc Pro Tunc)
- (20) OAC 165:5-17-5 (Appeals)
- (21) OAC 165:5-19-1 (Contempt procedure)

[Source: Added at 16 Ok Reg 829, eff 1-25-99 (emergency); Added at 16 Ok Reg 2807, eff 7-15-99; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 36 Ok Reg 517, eff 8-1-19]

165:5-21-2. Scope

- (a) The rules of this Subchapter shall be known as the Oklahoma Corporation Commission Rules of Practice for the Petroleum Storage Tank Division, and may be cited as OAC 165:5-21-1 et seq.
- (b) The rules of this Subchapter shall govern all proceedings concerning the Petroleum Storage Tank Division before the Commission, any Administrative Law Judge, attorney, or other officer or employee of the Commission.
- (c) The rules of this Subchapter shall not be construed as limiting the Commission's authority to grant an exception, for good cause shown, to any rule contained herein unless otherwise precluded by law.

[Source: Added at 16 Ok Reg 829, eff 1-25-99 (emergency); Added at 16 Ok Reg 2807, eff 7-15-99]

165:5-21-3. Application and notice requirements for Petroleum Storage Tank cases

- (a) Every case will start with the filing of an application in the Court Clerk's Office. The following must be on the application:
 - (1) A caption with the heading of "Before the Corporation Commission of the State of Oklahoma."
 - (2) The name of the applicant(s).
 - (3) The relief sought (what the applicant wants done).
 - (4) The docket and case number.
- (b) The application must have four numbered parts as follows:
 - (1) The first part must have (i) the applicant's name, address, and telephone number of his attorney or designated representative; (ii) the nature of the applicant's interest in the subject matter of the case; and (iii) the name and address of each person (if any) named as respondent(s).
 - (2) The second part must have the allegation of facts which are important to the case. The allegations must be stated simply in numbered subparagraphs as necessary for clarity.
 - (3) The third part must have the citations of statutes, rules, orders, and decided cases authorizing the relief sought.
 - (4) The fourth part must have a short and concise statement of what the applicant(s) wants the Commission to do.
- (c) The application must be signed by the applicant or, an authorized agent of the applicant or by the attorney for the applicant. The address and telephone number of the person signing must be under the signature. The person signing the application shall be deemed to certify that:
 - (1) He has read the application; and
 - (2) To the best of his knowledge, formed after reasonable inquiry, the facts contained in the application are true; and

- (3) That the application is not filed to harass or to cause unnecessary delay or needless expense.
- (d) A document may be served on a party of record by regular mail or in person. When an attorney has appeared of record for a person, all subsequent service shall be on the attorney.
- (e) Every application and notice of hearing shall be served on the respondent and the Judicial and Legislative Services staff counsel by certified mail by the person filing the application; publication is not required. Thereafter, every document shall be served by regular mail upon all parties.
- (f) A certificate of service will be included on every document. The certificate shall contain a list of the persons to whom a copy of the document was mailed, postage prepaid, or to whom it was hand delivered.

[Source: Added at 16 Ok Reg 829, eff 1-25-99 (emergency); Added at 16 Ok Reg 2807, eff 7-15-99; Amended at 35 Ok Reg 946, eff 10-1-18]

165:5-21-3.1. Applications for a variance

- (a) **Administrative review.** Any variance sought from rules in Chapters 15, 16, 25, 26, 27, or 29 must be made by application. At the time the application is filed, applicant must provide the Petroleum Storage Tank Division all documents or evidence supporting the proposed variance. The Petroleum Storage Tank Division shall review the application administratively without the necessity of a hearing. If the Petroleum Storage Tank Division approves the relief requested by the application, it shall submit a proposed order to the Commissioners to determine whether the variance and/or other relief, if any, should be granted.
- (b) **Remedies after denial or modification.** If the Petroleum Storage Tank Division denies the relief requested by the application as reflected in the notice of denial provided to applicant, or the Petroleum Storage Tank Division cannot agree to a modification, the applicant will have ten (10) business days from receipt of the denial letter to withdraw its application or file a notice of hearing before an Administrative Law Judge and present its application for a recommendation on the merits of the variance sought. If the application for the variance is denied by the Administrative Law Judge, the applicant may file exceptions as more fully defined under OAC 165:5-13-5. If a notice of hearing is not timely filed, the Petroleum Storage Tank Division shall submit a proposed order to the Commissioners to deny the variance.

[Source: Added at 34 Ok Reg 53, eff 9-30-16; Added at 34 Ok Reg 905, eff 9-11-17; Amended at 35 Ok Reg 946, eff 10-1-18; Amended at 36 Ok Reg 517, eff 8-1-19]

165:5-21-4. Response to application

- (a) The response to an application shall contain the same caption as in the application and shall contain four numbered parts as follows:
- (1) The first part will give the name of the respondent, address and telephone number of his attorney or designated representative and the nature of his interest in the subject matter of the case.
 - (2) The second part will be a response to the allegations of fact. It will include (i) admissions of specific allegations of fact; (ii) specific denial of any allegations of fact and (iii) a statement of all other facts necessary or appropriate to support respondent's position. Failure to deny specifically any allegation of fact will not relieve the person making the allegation of the burden of proving it.

- (3) The third part states the citations of all statutes, rules, orders, and decided cases in support of the response or in opposition to the granting of the relief sought in the application.
- (4) The fourth part must give a short and concise statement of what the respondent wants the Commission to do.
- (b) The response shall be signed by the respondent or by the attorney for the respondent, and will include the address and telephone number of the person signing.
- (c) The Petroleum Storage Tank Division must file a response to an application within twenty (20) days of the receipt of the application.
- (d) Amendment of a document may be permitted at any time. An amendment may take the form of a substitute document, an amendment or supplement, or any correction(s) by addition or deletion of language. A response may be made to an amended document, but it is not required.

[Source: Added at 16 Ok Reg 829, eff 1-25-99 (emergency); Added at 16 Ok Reg 2807, eff 7-15-99]

165:5-21-5. Motions

(a) Pleadings other than the application or response shall be made by motion.

- (1) Each motion shall state in plain language the action or relief sought and the facts and circumstances upon which the motion is based.
- (2) All motions, including motions to dismiss and motions for summary judgment, will be set on a regularly scheduled motion docket to be heard by an Administrative Law Judge unless otherwise directed by the assigned Administrative Law Judge.
- (3) The filing of a motion will not automatically delay the hearing on the merits.
- (4) The Court Clerk will advise the person filing the motion when it will be heard and what Administrative Law Judge will hear it. A notice of the time of hearing must be included on the motion document, below the certificate of mailing.
- (5) The notice of hearing shall be sent to other parties of record by regular mail at least five (5) days prior to the date set for hearing.
- (6) All motions will be decided by the Administrative Law Judge.

(b) Reply to motions. Any person may file and serve a reply to any motion at any time before the motion is heard.

(c) Specific motions.

- (1) **Motion to Intervene.** Any person with a substantive interest in the subject matter of a case may become a party by filing a motion for intervention.
 - (A) The Administrative Law Judge shall prescribe terms and conditions upon which intervention shall be allowed.
 - (B) The Administrative Law Judge will not grant intervention if the motion is filed less than 20 days before the date of the hearing on the merits.
 - (C) The filing or granting of any motion to intervene shall not be grounds to delay any hearing date or time limit set in a proceeding.
 - (D) An intervention may seek affirmative relief.
- (2) **Motion to Dismiss or Motion for Summary Judgment.**
 - (A) The applicant may dismiss his application with or without prejudice at any time. The dismissal shall not dismiss the cause as to affirmative relief sought by any respondent.

(B) At any time prior to the hearing on the merits a respondent may file a motion to dismiss or a motion for summary judgment.

(C) A case may be dismissed by agreement of all parties or recommended for dismissal with or without prejudice by the Administrative Law Judge upon a motion by the Administrative Law Judge or any party of record.

(D) Upon five (5) days notice to parties of record, the Administrative Law Judge may entertain motions to dismiss or summary judgement for any of the following reasons:

(i) Failure to state facts which would justify any Commission action

(ii) A showing that facts set out by the parties, including materials in attached affidavits, answers to interrogatories, documents produced or testimony elicited in deposition show that it is possible for only one party to win.

(iii) Failure to prosecute.

(iv) The case has already been decided.

(v) The question is moot.

(vi) Lack of jurisdiction.

(vii) Failure to submit a proposed order in a timely manner.

(viii) For other good cause shown.

(3) **Motion for Joinder and/or Consolidation.** Upon motion, a case may:

(A) Have two or more complainants joined in one complaint if their respective complaints are against the same person(s) and involve substantially the same subject matter and grounds;

(B) Have a person ordered joined as a party of record and to appear in a proceeding; and

(C) Have consolidation of two or more cases for hearing.

(4) **Motion for Continuance.** Pursuant to 17 O.S. § 330, no more than two (2) continuances shall be granted by the Commission in any case unless further continuance is agreed to by all of the parties actively participating in the case.

(A) The Commission may grant additional continuances upon the showing of exigent or extraordinary circumstances.

(B) Notice of the continuance date shall be served on all respondents and parties of record and shall be sent by regular mail at least five (5) days prior to the date of the hearing.

(C) Every continuance shall be to a specific day.

165:5-21-6. Discovery

Pursuant to 17 O.S. §330, discovery for proceedings on the Petroleum Storage Tank docket shall be conducted pursuant to the provisions of the Oklahoma Discovery Code, 12 O.S. §§ 3224 through 3237. No motion to permit discovery is required. Parties or their attorneys may issue notices for deposition or requests for production as provided in the discovery code. Discovery must start early in the case and be done promptly, as the hearing on the merits must be heard within one hundred eighty (180) days. A party who has been slow or neglectful in pursuing discovery shall not delay the hearing to finish such discovery.

[Source: Added at 16 Ok Reg 829, eff 1-25-99 (emergency); Added at 16 Ok Reg 2807, eff 7-15-99]

165:5-21-7. [RESERVED]

[Source: Reserved at 16 Ok Reg 829, eff 1-25-99 (emergency); Reserved at 16 Ok Reg 2807, eff 7-15-99]

165:5-21-8. Subpoenas

Pursuant to 17 O.S. §330, all cases filed on the Petroleum Storage Tank docket may have subpoenas issued pursuant to the provisions of 12 O.S. § 2004.1. No motion to allow subpoenas is required.

(1) References in the statute to "clerk" refer to the Court Clerk of the Commission.

(2) References in the statute to "court" refer to the Commission.

[Source: Added at 16 Ok Reg 829, eff 1-25-99 (emergency); Added at 16 Ok Reg 2807, eff 7-15-99]

165:5-21-9. 180 days

Hearings on merits shall be within one hundred eighty (180) days from the date the application was filed. The Administrative Law Judge may extend this date, if requested by person(s) other than Commission employees or representatives, upon a showing by such person(s) of exigent or extraordinary circumstances.

[Source: Added at 16 Ok Reg 829, eff 1-25-99 (emergency); Added at 16 Ok Reg 2807, eff 7-15-99]

165:5-21-10. Advancement

A case may be advanced and heard directly by the Commissioners upon a showing that there is a matter of general applicability at issue in the case and that an early resolution of the dispute by the Commissioners will help resolve other conflicts, thereby avoiding costly litigation of other cases. The Commissioners may take and resolve the entire case or they may resolve only the issue of general applicability and return the rest of the case to the Administrative Law Judge for an evidentiary hearing on the other issues in the case.

SUBCHAPTER 23. INFORMAL RESOLUTION OF NATURAL GAS GATHERING DISPUTES

165:5-23-1. Scope

The Commission encourages the resolution and early settlement of all disputes about natural gas gathering services in the most effective manner possible. Commission employees are charged with the responsibility to promote resolution and settlements of such disputes, consistent with the public interest. This Subchapter establishes a voluntary, non-binding informal procedure to be available either before or after the filing of a Formal Complaint to encourage the resolution of disputes regarding gas gathering. In this voluntary procedure, Participants are not required to be represented by an attorney. The provisions of OAC 165:5-1-2(b) are not applicable to this Subchapter.

[Source: Added at 17 Ok Reg 596, eff 12-16-99 (emergency); Added at 17 Ok Reg 1853, eff 7-1-00]

165:5-23-2. Definitions

The following words and phrases, when used in this Subchapter, shall have the following meanings, unless the context clearly indicates otherwise:

"Complainant" means an aggrieved party, pursuant to 52 O.S. §§ 24.4 and 24.5, who seeks to have a dispute regarding natural gas gathering services resolved by the Commission. Any informal dispute resolution procedure initiated by said Complainant shall be a neutral process as it affects the Participants, and shall only occur as a result of the agreement of the Participants.

"Conservation Division" means the Oil and Gas Conservation Division.

"Formal Complaint" means a complaint filed under 52 O.S. §§ 24.4 and 24.5 and OAC 165:5-7-41.1.

"Mediator" means an individual, mutually agreeable to the Participants, selected from a list of mediators maintained by the Commission who are certified under the Oklahoma Dispute Resolution Act, 12 O.S. § 1801 et seq. The list of certified mediators shall include, but not be limited to, members of the Oil and Gas Conservation Division staff. Any mediator selected by the Participants shall remain neutral and shall not advocate the position of any Participant in an informal dispute resolution procedure.

"Informal dispute resolution procedure" means a non-judicial, voluntary, non-binding and informally conducted mediation procedure for resolution of disputes regarding gas gathering. Such mediations will be conducted under the provisions of the Oklahoma Dispute Resolution Act, 12 O.S. § 1801 et seq.

"Participant(s)" means the Complainant or Respondent, or both, in the informal dispute resolution procedure.

"Respondent" means the gatherer whose conduct is the subject of a Notice of Intent to Mediate.

[Source: Added at 17 Ok Reg 596, eff 12-16-99 (emergency); Added at 17 Ok Reg 1853, eff 7-1-00; Amended at 27 Ok Reg 2098, eff 7-11-10]

165:5-23-3. Form and service of a Notice of Intent to Mediate; reply by Respondent

(a) Prior to or after the filing of a Formal Complaint under 52 O.S. §§ 24.4 and 24.5, a Complainant seeking redress under this Subchapter may commence the informal dispute resolution procedure by filing a Notice of Intent to Mediate. The Notice of Intent to Mediate shall be made in the form prescribed by the Commission and shall contain the following information:

- (1) The Complainant's name;
- (2) The Complainant's company name;
- (3) The Complainant's address;
- (4) The Complainant's company phone number, e-mail address, and facsimile number;
- (5) The date and time of the complaint including the name and address, and the telephone number and fax number, if known, of the Respondent with whom the Complainant has a dispute;
- (6) A description of the dispute;
- (7) The time period of the problem described in the dispute;
- (8) The current status of the negotiations between the parties;
- (9) Description of the actions taken by the Complainant to resolve the problem;
- (10) The relief sought by the Complainant;
- (11) The legal description, county name and name of the well(s) involved in the dispute; and

- (12) The names of representatives of the Respondent with whom the Complainant has talked regarding the dispute.
- (b) No filing fee shall be charged by the Judicial and Legislative Services to the Complainant for filing the Notice of Intent to Mediate, however, it shall charge a \$5.00 fee to each Participant to an informal dispute resolution procedure.
- (c) If the Notice of Intent to Mediate is filed after the filing of a Formal Complaint, the Notice of Intent to Mediate shall contain a statement of the Complainant's desire to commence the informal dispute resolution procedure, the information contained in OAC 165:5-23-3 (a)(8) and (a)(9), and shall reference the claims pled and relief sought in the Formal Complaint.
- (d) Attached to the Notice of Intent to Mediate may be any documentary evidence the Complainant wishes to submit.
- (e) The Complainant shall send by registered mail, facsimile, or deliver a copy of the Notice of Intent to Mediate and all attached documents to the Respondent at the same time that the Notice of Intent to Mediate and any attached documents are filed with the Commission.
- (f) Within ten (10) days of receiving the Notice of Intent to Mediate, the Respondent shall file in writing either a notice that it does not agree to participate in the informal dispute resolution procedure or a reply that it agrees to participate in the informal dispute resolution procedure, in which event Respondent shall respond to the Notice of Intent to Mediate and Respondent may attach to its reply any documentary evidence which it wishes to submit. The Respondent shall file its notice or reply and any attached documentary evidence with the Commission's Court Clerk and shall send by registered mail, facsimile, or deliver a copy of the notice or reply, and all attached documents, to the Complainant at the same time the notice or reply is filed with the Court Clerk.
- (g) Either the Complainant or the Respondent may withdraw its agreement to participate in the informal dispute resolution procedure at any time.

[Source: Added at 17 Ok Reg 596, eff 12-16-99 (emergency); Added at 17 Ok Reg 1853, eff 7-1-00; Amended at 35 Ok Reg 946, eff 10-1-18]

165:5-23-4. Administration of the informal dispute resolution procedure

- (a) Upon the filing of a Notice of Intent to Mediate, the dispute shall be assigned an informal dispute case number by the Commission's Court Clerk, which shall maintain files pertaining to the matter. The parties to the dispute will select a mutually agreeable mediator from the list of certified mediators maintained by the Commission. The Notice of Intent to Mediate shall be forwarded to the selected mediator, and the dispute will be submitted to the informal dispute resolution procedure unless the Complainant or Respondent notifies the Commission's Court Clerk that one, or both, of said parties does not wish to participate.
- (b) Upon the parties agreeing to mediate, the Mediator shall arrange for a mediation conference between the Respondent and the Complainant within fifteen (15) days of the filing of the Notice of Intent to Mediate. At the mediation conference, the parties shall:
- (1) Inform the Mediator that the dispute has been resolved and the Notice of Intent to Mediate is withdrawn; or
 - (2) Inform the Mediator that the Complainant and/or Respondent no longer wish to participate in the informal dispute resolution procedure; or
 - (3) If the Participants have agreed to the informal dispute resolution procedure, the Mediator shall proceed with the mediation conference between the Participants. At such conference, or any subsequent conference

agreed to by the Participants, the purpose of the Mediator is to assist in the resolution of the dispute by facilitating the development of facts, determination of Participants' positions, and resolution of issues underlying the dispute.

(c) Any informal dispute resolution procedure instituted under this Subchapter shall be completed within sixty (60) days of the filing of the Notice of Intent to Mediate, unless extended by the mutual request of the Respondent and Complainant.

(d) The Commission shall not act upon any anonymous Notice of Intent to Mediate under this Subchapter.

[Source: Added at 17 Ok Reg 596, eff 12-16-99 (emergency); Added at 17 Ok Reg 1853, eff 7-1-00]

165:5-23-5. Confidentiality of communications in the informal dispute resolution procedure

(a) All Notices of Intent to Mediate, Replies and all attached documentary evidence filed with the Commission's Court Clerk, as well as all communications, notes, records, and statements, whether oral or written, made, given or furnished by any Participant or Mediator in the course of an informal dispute resolution procedure are privileged and confidential, and are not discoverable or admissible as evidence in any administrative or judicial proceeding unless such communications, notes, records or statements are otherwise discoverable or admissible independent of the informal dispute resolution procedure.

(b) No Participant or Mediator shall be required to testify about any aspect of the informal dispute resolution proceeding relating to or arising out of the informal dispute resolution procedure or be required to disclose any information considered to be privileged and confidential under subsection (a) of this Section.

(c) A Mediator shall not communicate with a Commission administrative law judge or any Commissioner concerning any material or substantive aspect of an informal dispute made confidential by this Section.

(d) No administrative law judge shall be assigned to a formal hearing or other formal investigation of a complaint if that person has directly or indirectly obtained information relating to or concerning such complaint which is confidential under this Subchapter.

(e) Administrative law judge(s) assigned as Mediator(s) under this Subchapter shall not serve as an administrative law judge in any Formal Complaint based upon or arising out of the same dispute or facts described in the Notice of Intent to Mediate which was forwarded to the assigned Mediator. Any Conservation Division staff member(s) assigned as Mediator(s) under this Subchapter shall not serve as a technical advisor on any Formal Complaint based upon or arising out of the same dispute or facts described in the Notice of Intent to Mediate which was forwarded to the assigned Mediator. However, service as a Mediator shall not be deemed a conflict in other matters assigned to the Conservation Division docket.

[Source: Added at 17 Ok Reg 596, eff 12-16-99 (emergency); Added at 17 Ok Reg 1853, eff 7-1-00]

165:5-23-6. Helpline

Prior to filing a Formal Complaint, parties complaining about natural gas gathering services may register such complaints with the Conservation Division using the Commission Gas Gathering Helpline. Conservation Division staff shall answer calls to the Helpline from 8:00 a.m. to 4:30 p.m. on all regular Commission business days. The Helpline shall record the information sought in OAC 165:5-23-3(a) of this Subchapter, shall instruct the caller that a Notice of Intent to Mediate containing the same information must be filed to commence the informal dispute

resolution procedure and that the Notice of Intent to Mediate and any attachments must be served by registered mail, facsimile or personal delivery on the Respondent, and shall inform the caller that there is no filing fee charged for a Notice of Intent to Mediate, but a \$5.00 fee per participant will be charged for any informal dispute resolution procedure that is commenced. Any Complainant calling the Helpline will be referred to appropriate Conservation Division staff for further information. The Helpline shall neither record nor act upon any anonymous complaints under this subsection.

[Source: Added at 17 Ok Reg 596, eff 12-16-99 (emergency); Added at 17 Ok Reg 1853, eff 7-1-00; Amended at 30 Ok Reg 1033, eff 7-1-13]

SUBCHAPTER 25. MOTOR CARRIER TAX AND REGISTRATION PROTESTS

165:5-25-1. Purpose and general overview of motor carrier taxpayer/registrant protest procedure

- (a) The purpose of this Subchapter is to give the International Fuel Tax ("IFTA") taxpayer ("taxpayer") or International Registration Plan ("IRP") registrant ("registrant"), or the taxpayer's/registrant's representative an opportunity to resolve "IFTA" or "IRP" disagreements with the Commission.
- (b) Taxpayers/Registrants who wish to challenge a liability assessed or other adverse actions by the Transportation Division, or to seek a refund of taxes or fees, shall file a written protest with the Transportation Division within thirty (30) days from the date of notification of the adverse action. Notification is deemed to be the date of the notice of the adverse action. A protest by the taxpayer/registrant should include the reason(s) for the protest.
- (c) The Transportation Division shall respond to the protest within thirty (30) days of receipt of the protest. The response shall advise the taxpayer/registrant the status of the review of the protest and advise of any additional documentation needed.
- (d) The taxpayer/registrant may contest the Transportation Division's final decision within thirty (30) days from the date of the mailing of the notice. The taxpayer/registrant must file an application with the Commission's Court Clerk's office in accordance with OAC 165:5-25-2 to contest the final decision.

[Source: Added at 23 Ok Reg 506, eff 12-19-05 (emergency); Added at 23 Ok Reg 2225, eff 7-1-06]

165:5-25-2. Filing confidential applications for hearing

- (a) Taxpayer or registrant applications for hearing shall be filed with the Commission's Court Clerk's Office. Applications shall be in writing, marked "CONFIDENTIAL" pursuant to OAC 165:5-1-5(g), signed by the taxpayer or registrant or an authorized representative thereof, and shall set out therein:
 - (1) The name, mailing address, physical address, telephone number, and e-mail address of the taxpayer or registrant;
 - (2) A statement of the amount of the deficiency as determined by the Transportation Division in the proposed assessment, the nature of the tax or fee and the amount thereof in controversy, or the denial of base state registration;
 - (3) A clear and concise statement of each item in dispute;
 - (4) The argument and any legal authority upon which each item in dispute is made; provided, that the taxpayer or registrant shall not be bound or restricted in such hearing, except on exceptions, to the arguments and legal authorities contained and cited in said applications or presented in the

initial hearing;

- (5) A statement of the relief sought by the taxpayer or registrant;
- (6) A verification by the taxpayer or registrant or his duly authorized agent that the statements and facts contained therein are true; and
- (7) In a refund claim, a statement as to whether the basis for the claim request is due to a mistake of law or a mistake of fact with a brief explanation of the mistake.

(b) Pursuant to 47 O.S. § 1170 and 51 O.S. § 24A.29, the Commission hereby determines that all reports and files of the Commission concerning the administration of the IFTA/IRP are confidential. All information classified as confidential shall remain confidential unless otherwise provided by law.

(c) The taxpayer or registrant may authorize the disclosure of information to any person pursuant to a written waiver of confidentiality.

[Source: Added at 23 Ok Reg 506, eff 12-19-05 (emergency); Added at 23 Ok Reg 2225, eff 7-1-06; Amended at 27 Ok Reg 2098, eff 7-11-10; Amended at 37 Ok Reg 1082, eff 10-1-20]

165:5-25-3. Representation and participation in administrative proceedings

(a) Representation. In an administrative proceeding the taxpayer/registrant may represent himself/herself at any stage of the proceeding or may be represented by:

- (1) A corporation;
- (2) An attorney;
- (3) An accountant, but only in a tax protest matter; or,
- (4) A representative who has been pre-approved by the Commission to represent the taxpayer/registrant.

(b) Proper showing may be required. If a taxpayer/registrant wants to be represented by someone other than himself, an attorney, or an accountant, the Administrative Law Judge may require that such other person, before being recognized as a representative of the taxpayer/registrant, make a proper showing of necessary qualifications to enable the representative to render such services to the taxpayer. Upon such showing by the representative, the Administrative Law Judge may certify the representative.

[Source: Added at 23 Ok Reg 506, eff 12-19-05 (emergency); Added at 23 Ok Reg 2225, eff 7-1-06]

165:5-25-4. Burden of proof

In all administrative proceedings, unless otherwise provided by law, the burden of proof shall be upon the taxpayer/registrant to show in what respect the action or proposed action of the Commission is incorrect. If, upon hearing, the taxpayer/registrant fails to make a prima facie case, the Administrative Law Judge may recommend that the Commission deny the application solely upon the grounds of failure to prove sufficient facts which would entitle the taxpayer/registrant to the requested relief.

[Source: Added at 23 Ok Reg 506, eff 12-19-05 (emergency); Added at 23 Ok Reg 2225, eff 7-1-06]

165:5-25-5. Effective date of the Subchapter

The provisions of this Subchapter shall govern all proceedings and cases commenced after this Subchapter becomes effective, and all subsequent proceedings in cases then pending, except to the extent that in the opinion of the Commission or the Administrative Law Judge, the application of this Subchapter in a pending case would not be feasible or would create an injustice.

[Source: Added at 23 Ok Reg 506, eff 12-19-05 (emergency); Added at 23 Ok Reg 2225, eff 7-1-06]

**SUBCHAPTER 27. PROCEDURES FOR PIPELINE SAFETY
DEPARTMENT ENFORCEMENT ACTIONS**

PART 1. GENERAL

165:5-27-1. Purpose

The purpose of this Subchapter is to provide procedural rules to govern proceedings before the Commission to enforce the provisions of the Oklahoma Underground Facilities Damage Prevention Act, 63 O.S. §§ 142.1 et seq. regarding excavation or demolition on or near or directly over the location of, and notice of damage to, oil and natural gas physical facilities which are described by the currently effective definition of "pipeline" in 49 C.F.R. § 192.3 and "pipeline" and "pipeline system" in 49 C.F.R. § 195.2, pursuant to 63 O.S. § 142.13. The following rules apply to all enforcement actions subject to this Subchapter:

- (1) OAC 165:5-1-3 (Definitions)
- (2) OAC 165:5-1-4 (Office location; office hours; records)
- (3) OAC 165:5-1-4.1 (Open records requests)
- (4) OAC 165:5-1-5 (Filing of documents)
- (5) OAC 165:5-1-6 (Time computations and extensions; effective date)
- (6) OAC 165:5-1-8 (Place of hearing)
- (7) OAC 165:5-1-9 (Telephonic testimony)
- (8) OAC 165:5-1-11 through OAC 165:5-1-14.2 (Electronic Filing of Documents)
- (9) OAC 165:5-5-1 (Dockets; identifying initials)
- (10) OAC 165:5-9-2 (Subsequent pleadings)
- (11) OAC 165:5-9-3 (Emergency applications)
- (12) OAC 165:5-9-4 (Intervention and parties of record)
- (13) OAC 165:5-9-5 (Joinder and consolidation of parties and proceedings)
- (14) OAC 165:5-9-6 (Continuances)
- (15) OAC 165:5-11-2 (Prehearing conference)
- (16) OAC 165:5-13-1 (Sessions and hearings)
- (17) OAC 165:5-13-2 (Setting of causes)
- (18) OAC 165:5-13-3 (Hearings)
- (19) OAC 165:5-13-4 (Report of Administrative Law Judge)
- (20) OAC 165:5-13-5 (Exceptions to Report of Administrative Law Judge)
- (21) OAC 165:5-15-1 (General form and procedure [orders])
- (22) OAC 165:5-15-7 (Emergency orders)
- (23) OAC 165:5-17-1 ([Post order relief] Within 10 days; motion)
- (24) OAC 165:5-17-2 (After 10 days; application)
- (25) OAC 165:5-17-4 (Nunc Pro Tunc)
- (26) OAC 165:5-17-5 (Appeals)
- (27) OAC 165:5-19-2 (Waiver or reduction of fines and penalties upon small business)

165:5-27-2. Scope

(a) This Subchapter shall be known as the Oklahoma Corporation Commission Rules of Practice for Pipeline Safety Department enforcement actions and may be cited as OAC 165:5-27-1 et seq.

(b) This Subchapter shall govern all proceedings concerning Pipeline Safety Department enforcement actions arising under the Act and the implementing rules of the Commission.

(c) This Subchapter shall not be construed as limiting the Commission's authority to grant an exception, for good cause shown, to any rule contained herein unless otherwise precluded by law.

(d) Nothing in this Subchapter shall be construed to modify or limit any private right of action arising under the Oklahoma Underground Facilities Damage Prevention Act and enforceable in the district courts of this State.

[Source: Added at 32 Ok Reg 752, eff 8-27-15]

165:5-27-3. Definitions

In addition to terms defined in 63 O.S. § 142.2, the following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Act" means the Oklahoma Underground Facilities Damage Prevention Act, 63 O.S. §§ 142.1 et seq.

"Pipeline" means pipeline as defined in 49 C.F.R. § 192.3 and 49 C.F.R. § 195.2.

"Pipeline system" means "pipeline system" as defined in 49 C.F.R. § 195.2.

[Source: Added at 32 Ok Reg 752, eff 8-27-15]

165:5-27-4. Statutory citation

Citations to the Act, 49 C.F.R. § 192.3 and 49 C.F.R. § 195.2 in this Subchapter refer to the most recent codifications of the Act and such sections of the Code of Federal Regulations.

[Source: Added at 32 Ok Reg 752, eff 8-27-15]

PART 3. ENFORCEMENT

165:5-27-10. Enforcement actions

(a) **Commencement.** A cause filed under this Subchapter by the Pipeline Safety Department to enforce the Act as provided in 63 O.S. § 142.13 and for contempt for disobedience to or violation of an order or judgment of the Commission shall be commenced by the filing of a verified complaint.

(b) **Complaint.** The complaint shall state:

(1) The name of the person, firm, trust, corporation, or association against whom the complaint is made.

(2) Each law, order, rule, regulation of which violation is charged.

(3) A description of the acts or omissions constituting the violation of which complaint is made. If complaint is made of more than one violation, each violation shall be separately stated.

(c) **Citation.** When a complaint is filed, the Secretary shall issue in the name of the state a citation directed to the person against whom complaint is made, which citation shall be accompanied by a copy of the complaint. The citation shall state:

(1) The name of the Director of the Transportation Division and the date the complaint was filed.

(2) A brief description of the nature of the complaint.

(3) Reference to the accompanying copy of the complaint.

(4) The date upon which the complaint is set for hearing, which shall not be earlier than ten (10) days from the date the citation is served.

(5) A statement that, unless the person complained against shall on or before the date for hearing file a response to the complaint, the allegations and charges therein will be taken as confessed.

(d) **Service of citation.** Service of the citation may be made by a person directed to do so by order of the Commission. Such service shall be made in accordance with the rules of the Commission. Service shall be made by personal service or by mailing the citation by certified mail to the respondent's last known address.

(e) **Return of service.** The person making the service shall make his return thereof, and file the same with the Court Clerk. The return shall show the time when the citation was received by him, and the time and manner the same was served by him, and such return shall be verified by the person making the service. Service of the citation for contempt on the respondent by certified mail shall be considered effective if returned from the last known address as listed in Commission records for the following reasons, including, but not limited to:

(1) Signed for by any person at the address listed.

(2) Undeliverable - no forwarding address, forwarding address expired, unclaimed and/or refused.

(f) **Default.** If no response to the complaint is filed on or before the date set for hearing, or if a respondent fails to appear at the time set for hearing, as specified in the citation, the Commission may immediately proceed to hear the complaint. After hearing the evidence, the Commission shall impose such fine, cancellation, suspension, or other order or punishment as the facts and circumstances warrant, or dismiss the complaint.

(g) **Response.** A respondent who desires a hearing shall, on or before the time specified in the citation for hearing, file a response to the merits of the cause and shall appear at the time set for hearing. The response shall include all objections and defenses of any nature to the complaint and may include a motion to dismiss the complaint for reason of insufficiency thereof or lack of jurisdiction.

(h) **Hearing procedures.** At the hearing, the Commission shall first hear all objections and defenses other than to the merits of the complaint and shall enter an appropriate order thereon. Amendments may be permitted upon terms that are just, with or without grant of a continuance. After all preliminary questions are heard, the Commission shall hear the merits of the complaint, and at the conclusion thereof, shall impose such fine, suspension, cancellation, or other order or punishment as the facts and circumstances warrant, or dismiss the complaint.

(i) **Hearing date.** Every cause instituted hereunder shall be tried on its merits on the date specified in the citation, or at such other time to which such cause shall be continued for hearing by the Commission.

(j) Nothing in this Subchapter shall prevent the Commission's Pipeline Safety Department from attempting pre-contempt remediation of alleged violations through the Notice of Probable Violation procedure found in Subchapter 13 of OAC 165:20.

[Source: Added at 32 Ok Reg 752, eff 8-27-15]

165:5-27-11. Penalties

(a) If the Commission concludes that the Respondent has committed a violation of the Act, it may enter an order requiring the Respondent to take action to correct the violation, to submit to damage prevention training, imposing penalties not to exceed maximums provided by law, or to fashion other remedies as the interests of

justice may require.

(b) Penalties imposed under subsection (a) shall not exceed maximum amounts provided by 17 O.S. § 6.1.

[Source: Added at 32 Ok Reg 752, eff 8-27-15]

165:5-27-12. Discovery

Discovery for Pipeline Safety Department enforcement actions shall be conducted pursuant to the provisions of the Oklahoma Discovery Code, 12 O.S. §§ 3224-3237. No motion to permit discovery is required. Parties or their attorneys may issue notices for deposition or requests for production or interrogatories as provided in the Oklahoma Discovery Code.

[Source: Added at 32 Ok Reg 752, eff 8-27-15]

165:5-27-13. Subpoenas

In all Pipeline Safety Department enforcement actions, subpoenas may be issued and served in the manner provided in district courts according to 12 O.S. § 2004.1. No motion to allow subpoenas is required.

(1) References in the statute to "clerk" refer to the Court Clerk of the Commission.

(2) References in the statute to "court" refer to the Commission.

[Source: Added at 32 Ok Reg 752, eff 8-27-15]

165:5-27-14. Aggrieved persons

Any person aggrieved by a violation of the Act may submit to the Manager of the Pipeline Safety Department of the Commission written information on a form available on the Commission's website relating to an alleged violation or violations and requesting an investigation by the Pipeline Safety Department.

[Source: Added at 32 Ok Reg 752, eff 8-27-15]

SUBCHAPTER 29. CONSUMER SERVICES COMPLAINTS

165:5-29-1. Consumer services complaints against regulated utility providers

(a) **Mediation.** Prior to filing a complaint pursuant to this section, the consumer and the utility are encouraged to follow the mediation provisions in OAC 165:35-21-40, OAC 165:45-11-20, and OAC 165:65-11-17. The consumer and utility are encouraged to continue mediation following the filing of a complaint.

(b) **Commencement.** A cause filed on the Consumer Services Docket shall be commenced by the filing of a complaint.

(c) **Applicant.** A complaint may be filed by either the Director of the Consumer Services Division against a regulated utility provider or customer against the customer's regulated utility provider.

(d) **Respondent.** The Respondent to a complaint is limited to a regulated utility provider, which includes public utilities and telecommunications carriers as defined by 17 O.S. §§ 41, 139.102 and 151.

(e) **Complaint.** The complaint shall state:

(1) The applicant or attorney's actual or electronic signature, typed or handwritten name, mailing address, telephone number, facsimile number (if applicable), and electronic mail address;

(2) The name of the person, firm, trust, corporation, or association against whom the complaint is made;

- (3) In general terms, the issues, acts, or omissions constituting the nature of the complaint;
- (4) Each alleged violation of a tariff, state statute, Commission rule, or Commission order shall be stated separately; and
- (5) The relief requested by the applicant.

(f) **Notice of hearing.** When a complaint is filed pursuant to this section, a notice of hearing scheduling the prehearing conference shall be prepared by the applicant pursuant to OAC 165:5-7-1(l). Appendix "J" to this Chapter contains a sample notice of hearing.

(g) **Service of complaint.** The applicant shall serve the respondent by sending, by certified mail, the complaint and the notice of hearing to the respondent's last known address as listed in the Commission records, and, if applicable, to the respondent's registered agent as listed with the Oklahoma Secretary of State.

(h) **Return of service.** The applicant shall prepare the return of service and file it with the Court Clerk. The return shall be verified by the person making the service, and shall show the manner, date, and time when the complaint was received by the Respondent. Service of the complaint and notice of hearing on the respondent by certified mail shall be considered effective on the date of receipt, or if refused, on the date of refusal of the complaint by the respondent. If the certified mailing is returned as undeliverable, the Commission or Administrative Law Judge shall determine sufficiency of service and may recommend additional service requirements. The Commission or Administrative Law Judge may use the service of process requirements in 12 O.S. § 2004 as guidance to ensure effective service.

(i) **Subsequent service.** The applicant and respondent shall provide changes of contact information to all parties of record and will accept service related to the complaint at the provided address.

(j) **Hearing procedures.** The complaint shall be set for prehearing conference before an Administrative Law Judge within thirty (30) calendar days after the complaint is filed. At the prehearing conference, the Administrative Law Judge shall determine whether service and jurisdiction are proper, and whether the issues, acts, or omissions constituting the nature of the complaint have been resolved. If the Administrative Law Judge determines that jurisdiction is not proper, the Administrative Law Judge shall recommend dismissal of the complaint.

(1) The Administrative Law Judge may continue the prehearing conference to a date certain to allow for resolution of the complaint by the parties, or to allow for proper service.

(2) If the Administrative Law Judge finds that the matter cannot be resolved without a hearing, then a hearing on the merits shall be set within the next sixty (60) calendar days.

(3) The Administrative Law Judge may recommend that the parties complete specific actions to complete the record, which may include but not be limited to requiring the applicant to submit additional information, require the respondent file a response to the complaint, and an allowance for discovery.

(4) If the respondent fails to appear at the time set for prehearing conference, as specified in the notice of hearing, or subsequent hearings as directed by the Administrative Law Judge, the Administrative Law Judge may schedule the complaint for a hearing on the merits or immediately proceed to hear the complaint if already scheduled for a hearing on the merits.

- (5) If the applicant fails to appear at the prehearing conference or subsequent hearings, the Administrative Law Judge may recommend that the complaint be dismissed without prejudice.
- (6) The Administrative Law Judge shall hear the merits of the complaint, and at the conclusion thereof, shall issue a report of the Administrative Law Judge that may impose such resolution as the facts and circumstances warrant, or dismiss the complaint.
- (7) Exceptions to the report of the Administrative Law Judge may be filed and heard pursuant to OAC 165:5-13-5.

[Source: Added at 37 Ok Reg 1082, eff 10-1-20]

SUBCHAPTER 31. PROCEDURES FOR THE MOTOR CARRIER CITATION DOCKET

165:5-31-1. General provisions

- (a) The rules of this Subchapter shall govern the administration of the Motor Carrier Citation ("MCC") docket. In every MCC hearing conducted under the authority of this Subchapter, all other relevant rules within OAC 165:5 shall remain in effect unless the rule conflicts with a provision herein.
- (b) The rules of this Subchapter shall not be construed as limiting the Commission's authority to grant an exception, for good cause shown, to any rule contained herein unless otherwise precluded by law.

[Source: Added at 38 Ok Reg 1726, eff 10-1-21]

165:5-31-3. Requesting a hearing

- (a) An administrative hearing on the regularly scheduled MCC docket will be provided after a hearing is requested pursuant to the rules of this Subchapter. The instructions for requesting a hearing will be provided upon the issuance of a citation.
- (b) Hearing requests shall be submitted to the Transportation Division by electronic mail or by using an electronic form authorized by the Transportation Division. A pro se person requesting the hearing may mail a paper copy of the form to the Transportation Division.
- (c) Unless otherwise ordered by the Commission, for any case in which the motor carrier fails to submit a valid hearing request, the allegations contained in the citation will be presumed to be true, and the citation will constitute the prima facie evidence of the related violation of state statute, Commission order, or rule.
- (d) All hearing requests must be received by the Transportation Division within ten (10) calendar days after the citation is issued.
- (e) The hearing request form shall include the following information:
 - (1) The name of the person requesting the hearing;
 - (2) The citation number;
 - (3) The party's contact information, including the mailing address, telephone number, and email address (if any) that is to be used to contact the party for the hearing;
 - (4) The name, mailing and electronic mail address, and telephone number of the party's attorney, if any;
 - (5) The name(s) of any witness(es) appearing on behalf of the party requesting the hearing, along with a brief statement of the testimony to be offered by the witness and the telephone number and electronic mail

address that is to be used to contact that witness; and

(6) A written statement describing the basis for contesting the citation.

(f) The party requesting a hearing is responsible for ensuring the Transportation Division receives the required information when submitting the form requesting a hearing. Any supplemental material must be submitted no later than three (3) business days prior to the scheduled hearing date. The Transportation Division will work with the person requesting the hearing to ensure that each requirement for requesting a hearing was completed.

(g) Prior to the hearing date, the Transportation Division will present each incomplete hearing request form to the Administrative Law Judge for a preliminary review. If the Administrative Law Judge determines that the hearing request form is incomplete, the request may be rejected and a hearing will not be granted, subject to the regular right of post order relief pursuant to OAC 165:5-17-1.

[Source: Added at 38 Ok Reg 1726, eff 10-1-21]

165:5-31-5. Hearing procedures

(a) The primary method of conducting MCC hearings shall be by telephone and/or videoconference. Testimony may be offered only by telephone or videoconference, unless the Commission or an Administrative Law Judge determines that the presence of the witnesses in the courtroom is necessary for the effective and efficient presentation of evidence or argument.

(b) MCC hearings shall be conducted in accordance with OAC 165:5-1-9(d)-(l); however, the witness affidavit identified in OAC 165:5-1-9(m) shall not be required.

(c) During the hearing, the Administrative Law Judge shall call both the Transportation Division's attorney and the party or the party's attorney, if any, at the telephone number provided by the party. If the party requesting the hearing, or the party's attorney, fails to answer or participate in the hearing after two (2) attempts by the Administrative Law Judge to contact the party by telephone, the Administrative Law Judge may continue the hearing to a date certain, conduct the hearing without the party present, or find the party "guilty" by default.

(d) The Administrative Law Judge shall call the witnesses, if any, at the telephone number provided by the party requesting the hearing. If the witness fails to answer or participate in the hearing after two (2) attempts by the Administrative Law Judge to contact the witness by telephone, the Administrative Law Judge may exclude the witness and continue with the hearing.

(e) A hearing may be continued at the discretion of the Administrative Law Judge pursuant to OAC 165:5-9-6, without a Commission order. Emergencies may be considered by the Administrative Law Judge on a case-by-case basis. If the Commission is closed, continuances shall be resolved in accordance with OAC 165:5-9-6(e).

(f) At the conclusion of the hearing, the Administrative Law Judge will issue a recommendation in accordance with OAC 165:5-13-4(f). Exceptions to the recommendation may be taken in accordance with OAC 165:5-13-5(a)(3).

[Source: Codified 12-31-91]

SUBCHAPTER 1. ADMINISTRATION

PART 1. GENERAL PROVISIONS

165:10-1-1. Purpose

The rules of this Chapter were promulgated in furtherance of the public policy and statutory laws of the State of Oklahoma to prevent the waste of oil and gas, to assure the greatest ultimate recovery from the State's reservoirs, to protect the correlative rights of all interest owners, and to prevent pollution.

165:10-1-2. Definitions

The following words and terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Agent" means any person authorized by another person to act for him.

"Aquifer" means a geological formation, group of formations, or part of a formation that is capable of yielding a significant amount of water to a well or spring.

"Area of exposure" means an area within a circle constructed with the point of escape of poisonous gas (hydrogen sulfide) as its center and the radius of exposure as its radius.

"Associated gas" means any gas produced from a Commission ordered combination oil and gas reservoir in which allowed rates of production are based upon volumetric withdrawals.

"BS&W" means basic sediment and water which is that portion of fluids and/or solids that settle in the bottom of storage tanks and/or treating vessels and is unsaleable to the first purchaser in its present form. BS&W usually consists of water, paraffin, sand, scale, rust, and other sediments.

"Barrel" means 42 (U.S.) gallons at 60 F at atmospheric pressure.

"Basic sediment pit" means a pit used in conjunction with a tank battery for storage of basic sediment removed from a production vessel or from the bottom of an oil storage tank.

"Blowout" means the uncontrolled escape of oil or gas, or both, from any formation.

"Blowout preventer" means a heavy casinghead control fitted with special gates and/or rams which can be closed around the drill pipe or which completely closes the top of the casing.

"Blowout preventer stack" means the assembly of well control equipment including preventers, spools, valves, and nipples connected to the top of the casinghead.

"Business day" means a day that is not a Saturday, Sunday, or legal holiday.

"Carrier", or **"transporter"**, or **"taker"** means any person moving or transporting oil or gas away from a lease or from any common source of supply.

"Casing pressure" means the pressure within the casing or between the casing and tubing at the wellhead.

"Choke manifold" means an assembly of valves, chokes, gauges, and lines used to control the rate of flow from the well when the blowout preventers are closed.

"Class II fluids" means substances which are brought to the surface during oil and gas drilling, completion, production and plugging, enhanced recovery, or natural gas storage operations.

"Closure" means the practice of dewatering, trenching, filling, leveling, terracing, and/or vegetating a pit site after its useful life is reached in order to restore or reclaim the site to near its original condition.

"Commercial disposal well" means a well where the operator receives and disposes of Class II fluids from multiple well owners/operators and receives compensation for these services and where the operator's primary business objective is to provide these services.

"Commercial pit" is a disposal facility which is authorized by Commission order and used for the disposal, storage, and handling substances or soils contaminated by deleterious substances produced, obtained, or used in connection with drilling and/or production operations. This does not include a disposal well pit.

"Commercial recycling facility" means a facility that is authorized by Commission order to recycle materials defined as deleterious substances in OAC 165:10-1-2. Such substances must undergo at least one treatment process and must be recycled into a marketable product for resale and/or have some beneficial use. This definition does not include the reuse of drilling mud that was previously utilized in drilling or plugging operations.

"Commercial soil farming" means the practice of soil farming or land applying drilling fluids and/or other deleterious substances produced, obtained, or used in connection with the drilling of a well or wells at an off-site location. Multiple applications to the same land are likely.

"Commission" means the Corporation Commission of the State of Oklahoma.

"Common source of supply" or **"pool"** means "that area which is underlaid or which, from geological or other scientific data, or from drilling operations, or other evidence, appears to be underlaid by a common accumulation of oil and/or gas; provided that, if any such area is underlaid, or appears from geological or other scientific data or from drilling operations, or other evidence, to be underlaid by more than one common accumulation of oil or gas or both, separated from each other by strata of earth and not connected with each other, then such area shall, as to each said common accumulation of oil or gas or both, shall be deemed a separate common source of supply." [52. O.S.A. §86.1(c)].

"Completion/fracture/workover pit" means a pit used for temporary storage of spent completion fluids, frac fluids, workover fluids, drilling fluids, silt, debris, water, brine, oil scum, paraffin, or other deleterious substances which have been cleaned out of the wellbore of a well being completed, fractured, recompleted, or worked over.

"Condensate" means a liquid hydrocarbon which:

- (A) Was produced as a liquid at the surface,
- (B) Existed as gas in the reservoir, and

(C) Has an API gravity greater than or equal to fifty degrees, unless otherwise proven.

"Conductor casing" means a casing string which is often set and cemented at a shallow depth to support and protect the top of the borehole from erosion while circulating and drilling the surface casing hole.

"Conservation Division" means the Division of the Commission charged with the administration and enforcement of the rules of this Chapter.

"Contingency plan" is a written document which provides for an organized plan of action for alerting and protecting the public within an area of exposure following the accidental release of a potentially hazardous volume of poisonous gas such as hydrogen sulfide.

"Contractor" means any person who contracts with another person for the performance of prescribed work.

"Cubic foot of gas" means the volume of gas contained in one cubic foot of space at an absolute pressure of 14.65 pounds per square inch and at a temperature of 60°F. Conversion of volumes to conform to standard conditions shall be made in accordance with Ideal Gas Laws corrected for deviation from Boyle's Law when the pressure at point of measurement is in excess of 200 pounds per square inch gauge.

"Date of completion" means:

(A) For an oil well, the date that the well first produces oil into the lease tanks through permanent wellhead equipment.

(B) For a gas well, the date of completion of a gas well is the date that gas is capable of being delivered to a pipeline purchaser.

(C) For a well, which does not produce either oil or gas, is the date on which attempts to obtain production from the well cease.

"Day" means a period of 24 consecutive hours. For reporting purposes, it shall be from 7:00 a.m. to 7:00 a.m. the following day.

"Deleterious substances" means any chemical, salt water, oil field brine, waste oil, waste emulsified oil, basic sediment or mud produced or used in the drilling, development, production, transportation, refining, and processing of oil, gas and/or brine mining.

"Design mud weight" means the planned drilling mud weight to be used. This mud weight is used in the design of the casing strings.

"Design wellhead pressure" means the maximum anticipated wellhead pressure which is expected to be experienced on the inside of the casing string and on wellhead equipment. This pressure is used to design the casing string and to select wellhead equipment with sufficient working pressure rating.

"Development" means any work which actively looks toward bringing in production, such as erecting rigs, building tankage, drilling wells, etc.

"Directional drilling" means intentional changing of the direction of the well from the vertical.

"Director of Conservation" means the person in official charge of the Conservation Division.

"Discharge" means the release or setting free by any spilling, leaking, pumping, pouring, emitting, emptying, or dumping of substances.

"Distressed well" means a well authorized by Commission order to produce at an unrestricted rate in the interest of public safety due to technical difficulties which temporarily cannot be controlled.

"Diverter" means a device attached to the wellhead to close the vertical access and direct any flow into a line away from the rig. Diverters differ from

blowout preventers in that flow is not stopped but rather the flow path is redirected away from the rig.

"Duly authorized representative" means, for the purpose of underground injection well applications, that person or position having a responsibility for the underground injection well.

"Emergency pit" means a pit used for the storage of excessive or unanticipated amounts of fluids during an immediate emergency situation in the drilling or operation of a well, such as a well blowout or a pipeline rupture. This does not include a spill prevention structure required by local, state, or federal regulations.

"Enhanced recovery operation" means the introduction of fluid or energy into a common source of supply for the purpose of increasing the recovery of oil therefrom according to a plan which has been approved by the Commission after notice and hearing.

"Enhanced recovery well" means a well producing in an enhanced recovery operation in accordance with Commission order.

"Exchangeable Sodium Percentage (ESP)" is the relative amount of the sodium ion present on the soil surface, expressed as a percentage of the total Cation Exchange Capacity (CEC). Since the determination of CEC is time consuming and expensive, a practical and satisfactory correlation between the Sodium Adsorption Ratio (SAR) and ESP was established. The SAR is defined elsewhere in this Section. ESP can be estimated by the following empirical formula: $ESP = 100 \frac{(-0.0126 + 0.01475 \times SAR)}{1 + (-0.0126 + 0.01475 \times SAR)}$.

"Exempted aquifer" means an aquifer or its portion that meets the criteria in the definition of "underground source of drinking water" or in the definition of "treatable water", but which has been exempted according to the procedures in 165:5-7-28 and 165:10-5-14.

"Excess water" means water that occurs when storm water, meltwater, water derived from incoming product or other surface water sources accumulates on a facility and combines, blends or mixes with a deleterious substance.

"Facility" means, for the purposes of 165:10-21-15, any building(s), parts of a building, equipment, property, or vehicles that are actively engaged in the reuse, recycling, or ultimate destruction of deleterious substances pursuant to 68 O.S. Supp. 1986, §2357.14-§2357.20.

"Field" means the general area underlaid by one or more common sources of supply.

"Flare pit" means a pit which contains flare equipment and which is used for temporary storage of liquid hydrocarbons which are sent to the flare but are not burned due to equipment malfunction. Flare pits may be used in conjunction with tank batteries or wells.

"Flowing well" means any well from which oil or gas is produced naturally and without artificial lifting equipment.

"Fresh water strata" means a strata from which fresh water may be produced in economical quantities.

"Gas" means any petroleum hydrocarbon existing in the gaseous phase.

(A) Casinghead gas means any gas or vapor, or both, indigenous to an oil stratum and produced from such stratum with oil.

(B) Dry gas or dry natural gas means any gas produced in which there are no appreciable hydrocarbon liquids recoverable by separation at the wellhead.

(C) Condensate gas means any gas which is produced with condensate as defined as "condensate".

"Gas allowable" or **"allowable gas"** means the amount of natural gas authorized to be produced from any well by order of the Commission or as provided by statute.

"Gas lift" means any method of lifting liquid to the surface by injecting gas into the well bore from which production is obtained.

"Gas repressuring" means the injection of gas into a common source of supply to restore or increase the gas energy of a reservoir.

"GOR (Gas/Oil Ratio)" means the ratio of the gas produced in standard cubic feet to one barrel of oil produced during any stated period. Condensate and load oil excepted under 165:10-13-6 shall not be considered as oil for purposes of determining GOR.

"Hardship well" means a well authorized by Commission order to produce at a specified rate because reasonable cause exists to expect that production below said rate would damage the well and cause waste.

"Hydraulic fracturing operations" means operations on a well wherein fluid is applied for the express purpose of initiating or propagating fractures in a target geologic formation.

"Hydrogen sulfide gas (H₂S)" means a toxic poisonous gas with a chemical composition of H₂S which is sometimes found mixed with and produced with fluids from oil and gas wells.

"Hydrologically sensitive area" means a principal bedrock aquifer, the recharge or potential recharge area of a principal bedrock aquifer, or an unconsolidated alluvium or terrace deposit, according to the Oklahoma Geological Survey "Maps Showing Principal Groundwater Resources and Recharge Areas in Oklahoma" or other maps approved by the Commission.

"Hydrostatic head" or **"hydrostatic pressure"** means the pressure which exists at any point in the wellbore due to the weight of the column of fluid or gas above that point.

"Illegal gas" means gas which has been produced within the State from any well or wells in violation of any rule, regulation, or order of the Commission, as distinguished from gas produced within the State not in violation of any such rule, regulation, or order which is "legal gas".

"Illegal oil" means oil which has been produced within the State from any well or wells in violation of any rule, regulation or order of the Commission, as distinguished from oil produced within the State not in violation of any such rule, regulation, or order which is "legal oil".

"Intermediate casing" means the casing string or strings run after setting the surface casing and prior to setting the production string or liner.

"Kick" means the intrusion of formation liquids or gas that results in an increase in circulation pit volume. Without corrective measures, this condition can result in a blowout.

"Land application" is the application of deleterious substances and/or soils contaminated by deleterious substances to the land for the purpose of disposal or land treatment; also known as soil farming.

"Lease allowable" means the total of the allowables of the individual wells on the lease.

"Liner" means a length of casing used downhole as an extension to a previously installed casing string to case the hole for further drilling operations and/or for producing operations.

"Meter" means an instrument for measuring and indicating or recording the volumes of gases or liquids.

"Mud" means any mixture of water and clay or other material as the term is commonly used in the industry.

"Multi-well system" means two or more wells that have intersecting wellbores or laterals.

"Multiple zone completion" means the completion of any well so as to permit the production from more than one common source of supply, with such common sources of supply completely segregated.

"Noncommercial pit" means an earthen pit which is located either on-site or off-site and is used for the handling, storage, or disposal of deleterious substances or soils contaminated by deleterious substances produced, obtained, or used in connection with the drilling and/or operation of a well or wells, and is operated by the generator of the waste. This does not include a disposal well pit.

"Normal pressure" means a formation pore pressure, proportional to depth, which is roughly equal to the hydrostatic pressure gradient of a column of salt water (.465 psi/ft).

"Off-site reserve pit" means a pit located off-site which is used for the handling, storage, or disposal of drilling fluids and/or cuttings.

"Oil" or **"crude oil"**, means, for purposes of these regulations, any petroleum hydrocarbon, except condensate, produced from a well in liquid form by ordinary production methods.

"Oil allowable" or **"allowable oil"** means the amount of oil authorized to be produced from any well by order of the Commission.

"Operator" means the person who is duly authorized and in charge of the development of a lease or the operation of a producing property.

"Overage" means the oil or gas delivered to a carrier, transporter, or taker in excess of the allowable set by the Commission for any given period.

"Owner" means the person or persons who have the right to drill into and to produce from any common source of supply, and to appropriate the production either for himself, or for himself and others.

"Person" means any natural person, corporation, association, partnership, receiver, trustee, guardian, executor, administrator, fiduciary, or representative of any kind, and shall include the plural.

"Plug" means the closing off, in a manner prescribed by the Commission, of all oil, gas, and waterbearing formations in any producing or nonproducing wellbore before such well is abandoned.

"Pollution" means the contamination of fresh water or soil, either surface or subsurface, by salt water, mineral brines, waste oil, oil, gas, and/or other deleterious substances produced from or obtained or used in connection with the drilling, development, producing, refining, transporting, or processing of oil or gas within the State of Oklahoma.

"Pool" See "common source of supply".

"Potential" means the properly determined capacity of a well to produce oil or gas, or both, under conditions prescribed by the Commission.

"Primary well" means a wellbore that, as part of a multi-well system, serves as the conduit through which oil and gas is produced to the surface.

"Producer" See "Operator" or "Owner".

"Production casing" means the casing string set above or through the producing zone of a well which serves the purpose of confining and/or producing the well production fluids.

"Productivity index" means the daily production of oil in barrels per unit pressure differential between the static reservoir pressure and the stabilized flowing pressure during flow at a stated rate.

"Proration period" means:

(A) The proration period for any well, other than an unallocated gas well, shall be one calendar month which shall begin at 7 a.m. on the first day of such month and end at 7 a.m. on the first day of the next succeeding month unless otherwise specified by order of the Commission.

(B) The proration period for any unallocated gas well shall be one calendar year which shall begin at 7:00 a.m. the first day of such year and end at 7:00 a.m. on the first day of the next succeeding year unless otherwise specified by order of the Commission.

"Public area" means a dwelling place, a business, church, school, hospital, school bus stop, government building, a public road, all or any portion of a park, city, town, village, or other similar area that can reasonably be expected to be populated by humans.

"Public street" or **"road"** means any federal, state, county, or municipal street or road owned or maintained for public access or use.

"Public water supply well(s)" or **"public water well(s)"** means wells in a system for the provision to the public of water for human consumption through pipes or other constructed conveyances, and which wells are identified in a database maintained by the Oklahoma Department of Environmental Quality.

"Purchaser" or **"transporter"** means any person who acting alone or jointly with any person or persons, via his own, affiliated or designated carrier, transporter, or taker, shall directly or indirectly purchase, take, or transport by any means whatsoever or otherwise remove from any lease, oil or gas, and/or other hydrocarbons produced from any common source of supply in this State, excepting royalty portions from leases owned by that person.

"Radius of exposure" means that radius constructed with the point of escape of poisonous (hydrogen sulfide) gas as its starting point and its length calculated by use of the Pasquill-Gifford equations.

"Reclaimed water" means wastewater from municipal wastewater treatment and/or public water supply treatment plants that has gone through various treatment processes to meet specific water quality criteria with the intent of being used in a beneficial manner.

"Reclaimer" or **"reclamation plant"** includes any person licensed by the Oklahoma Tax Commission pursuant to 68 O.S. §1015.1 who reclaims or salvages or in any way removes or extracts oil from waste products associated with the production, storage, or transportation of oil including, but not limited to BS&W, tank bottoms, pit and waste oil, and/or waste oil residue.

"Recomplete" or **"recompletion"** means any operation to:

(A) Convert an existing well from an injection well or disposal well, to a producing well, or

(B) Add or change common sources of supply in an existing well.

"Recycling" is the reuse, processing, reclaiming, treating, neutralizing, or refining of materials and by-products into a product of beneficial use which, if discarded, would be deleterious substances.

"Recycling/reuse pit" means a pit which is used for the storage and recycling or reuse of deleterious substances, is located off-site, and is operated by the generator of the waste.

"Re-enter" or **"re-entry"** is the act of entering a plugged well for the purpose of utilizing said well for the production of oil or gas, for the disposal of fluids therein, for a service well, or for the salvaging of tubing or casing therefrom.

"Regular mail" means first class United States Mail, postage prepaid, and includes hand delivery. Wherever in OAC 165:10 a person is directed to mail by regular mail, such directive shall not preclude mailing by restricted mail.

"Remediation pit" means a pit which is used for the handling, storage, or disposal of deleterious substances and/or soils contaminated by deleterious substances which are relocated to the pit for the purpose of remediating a site which is known to be or suspected to be causing pollution.

"Reserve pit" or **"circulation pit"** means a pit located either on-site or off-site which is used in conjunction with a drilling rig for the handling, storage, or disposal of drilling fluids and/or cuttings.

"Reservoir" See "common source of supply".

"Reservoir pressure" means the static or stabilized pressure in pounds per square inch existing at the face of the formation of an oil or gas well.

"Reuse" is the introduction (or reintroduction) into an industrial, manufacturing, or disposal process of a material which would otherwise be classified as a deleterious substance. A material will be considered "used or reused" if it is either:

(A) Employed as an ingredient (including use as an intermediate) in an industrial, manufacturing, or disposal process to make or recover a product.

(B) Employed in a particular function or application as an effective substitute for a commercial product or non-deleterious substance.

"Rotating head" means a rotating, pressure sealing device used in drilling operations utilizing air, gas, foam, or any other drilling fluid whose hydrostatic pressure is less than the formation pressure.

"Secretary" means the duly appointed and qualified Secretary, Assistant Secretary or Acting Secretary of the Commission, or any person appointed by the Commission to act as such Secretary during the absence, inability, or disqualification of the Secretary to act.

"Separator" means any apparatus for separating oil, gas, and water as they are produced from a well at the surface.

"Service well" means a well that, as part of a multi-well system, is used for drilling laterals, stimulation, or maintenance, or functions in any capacity other than as a conduit to the surface for the production of oil and gas.

"Slick spot" means a small area of soil having a puddled, crusted, or smooth surface and an excess of exchangeable sodium. The soil is generally silty or clayey, is slippery when wet, and is low in productivity.

"Slit trench" means a pit or bermed area at the drilling site used for the temporary storage of drilling fluids and/or cuttings to provide access for equipment to remove the contents off site.

"Sodium Adsorption Ratio (SAR)" means the index which indicates the relative abundance of sodium ions in solution as compared to the combined concentration of calcium and magnesium ions. It is calculated as follows: $SAR = (Na \text{ ppm}/23.0) / \text{sq. root of } [\{ (Ca \text{ ppm}/20.02) + (Mg \text{ ppm}/12.16) \} / 2]$ where Na=Sodium, Ca=Calcium, and Mg=Magnesium.

"Soil farming" means the application of oilfield drilling or produced wastes to the soil for the purpose of disposing of the waste without being a detriment to water or land; also known as land application.

"Spill containment pit" mean a permanent pit which is used for the emergency storage of oil and/or saltwater spilled as a result of any equipment malfunction.

"Subnormal pressure" means the formation pore pressure, proportional to depth, which is less than a hydrostatic pressure gradient of .465 psi/ft.

"Sulfide stress cracking" means the cracking phenomenon which is the result of corrosive action of hydrogen sulfide on susceptible metals under stress.

"Surface casing" means the first casing string designed and run to protect the treatable water formations and/or control fluid or gas flow from the well.

"Tank bottoms" means the liquids and/or solids in that portion of a storage facility below the sales line or connection that are unsaleable to the crude oil first purchaser in its present form. Tank bottoms may consist of a combination of several elements including, but not limited to, oil, BS&W, and treating fluids.

"Treatable water" means, for purposes of setting surface casing and other casing strings, subsurface water in its natural state, useful or potentially useful for drinking water for human consumption, domestic livestock, irrigation, industrial, municipal, and recreational purposes, and which will support aquatic life, and contains less than 10,000 mg/liter total dissolved solids or less than 5,000 ppm chlorides. Treatable water includes, but is not limited to, fresh water.

"Trenching" means the practice of constructing trenches in or adjacent to a pit for the purpose of relocating all or a portion of the solids so as to facilitate closure.

"Truck wash pit" means a pit used for the temporary storage of fluids generated from the washing or cleaning of a motor vehicle, trailer or container used to transport or store deleterious substances.

"Ultimate destruction" means the treatment of a deleterious substance such that both its weight and volume remaining for disposal have been substantially reduced, and there is no demonstrated process or technology commercially available to further reduce its weight and volume and remove or reduce its harmful properties, if any. For the purposes of demonstrating a substantial reduction in weight and volume, any aqueous portion separated from the balance of a waste that meets drinking water standards or is evaporated into the ambient air shall count toward the weight and volume reduction.

"Underage" means the volume of allowable oil or gas not actually delivered to a carrier, transporter, or taker during any given proration period.

"Underground Source of Drinking Water (USDW)" means an aquifer or its portion which:

- (A) Supplies any public water system; or
- (B) Contains a sufficient quantity of ground water to supply a public water system; and
 - (i) Currently supplies drinking water for human consumption; or
 - (ii) Contains fewer than 10,000 mg/l total dissolved solids; and
- (C) Is not an exempted aquifer.

"Unit operations" means a unit consisting of a portion of a lease, a lease, or more than one lease or portions thereof which covers contiguous lands containing one or more common sources of supply which has been approved by Commission order as a unit for the purpose of unitized management, after notice and hearing.

"Vacuum" means pressure below the prevailing pressure of the atmosphere.

"Waste" means:

(A) As applied to the production of oil, in addition to its ordinary meaning, "shall include economic waste, underground waste, including water encroachment in the oil or gas bearing strata; the use of reservoir energy for oil producing purposes by means or methods that unreasonably interfere with obtaining from the common source of supply the largest ultimate recovery of oil; surface waste and waste incident to the production of oil in excess of transportation or marketing facilities or reasonable market demands." [52 O.S.A., 86.2]

(B) As applied to gas, in addition to its ordinary meaning, shall include economic waste; "the inefficient or wasteful utilization of gas in the operation of oil wells drilled to and producing from a common source of supply; the inefficient or wasteful utilization of gas in the operation of gas wells drilled to and producing from a common source of supply; the production of gas in such quantities or in such manner as unreasonably to reduce reservoir pressure or unreasonably to diminish the quantity of oil or gas that might be recovered from a common source of supply; the escape, directly or indirectly, of gas from oil wells producing from a common source of supply into the open air in excess of the amount necessary in the efficient drilling, completion or operation thereof; waste incident to the production of natural gas in excess of transportation and marketing facilities or reasonable market demand; the escape, blowing, or releasing, directly or indirectly, into the open air, of gas from well productive of gas only, drilled into any common source of supply, save only such as is necessary in the efficient drilling and completion thereof; and the unnecessary depletion or inefficient utilization of gas energy contained in a common source of supply." [52 O.S.A. §86.3]

(C) The use of gas for the manufacture of carbon black or similar products predominately carbon, except as specifically authorized by the Commission, shall constitute waste.

(D) The flaring of tail gas at gasoline, pressure maintenance, or recycling plants where a market is available.

"Waste oil" shall include, but not be limited to, crude oil or other hydrocarbons used or produced in the process of drilling for, developing, producing, or processing oil or gas from wells, oil retained on cuttings as a result of the use of oil-based drilling muds, or any residue from any oil storage facility on a producing lease or on a commercial disposal operation or pit. The term "waste oil" shall not include any refined hydrocarbons to which lead has been added.

"Waste oil residue" means that portion of waste oil remaining after treatment and after the saleable liquids and water have been extracted. Waste oil residue is a type of waste oil.

"Well log" or **"well record"** means a systematic, detailed and correct record of formations encountered in the drilling of a well.

165:10-1-3. Scope of rules

All rules of general application in this Chapter promulgated to prevent waste, assure the greatest ultimate recovery from the reservoirs of this state, protect the correlative rights of all interests, and to prevent pollution shall be effective throughout the State of Oklahoma and be in force in all pools except as amended, modified, altered, or enlarged in specific individual pools by orders now in effect or hereafter issued by the Commission.

165:10-1-4. Citation effective date

(a) These rules shall be cited as OAC Title 165 Chapter 10 (OAC 165:10).

(b) The effective date of the rules of this Chapter is as set out below:

- (1) Order No. 937 - Effective 06/16/15
- (2) Order No. 1299 - Effective 08/20/17
- (3) Order No. 1986 - Effective 01/05/22
- (4) Order No. 6251 - Effective 04/12/33
- (5) Order No. 6252 - Effective 04/15/33
- (6) Order No. 6393 - Effective 07/19/33
- (7) Order No. 6394 - Effective 07/20/33
- (8) Order No. 7263 - Effective 04/10/34
- (9) Order No. 8229 - Effective 10/31/33
- (10) Order No. 17528 - Effective 01/24/45
- (11) Order No. 19334 - Effective 10/24/46
- (12) Order No. 29232 - Effective 10/06/54
- (13) Order No. 30712 - Effective 09/09/55
- (14) Order No. 44297 - Effective 04/01/61
- (15) Order No. 47397 - Effective 12/01/61
- (16) Order No. 53568 - Effective 12/08/63
- (17) Order No. 53749 - Effective 01/03/64
- (18) Order No. 62481 - Effective 05/11/66
- (19) Order No. 62631 - Effective 06/01/66
- (20) Order No. 63817 - Effective 10/04/66
- (21) Order No. 64203 - Effective 11/10/66
- (22) Order No. 64207 - Effective 12/01/66
- (23) Order No. 65747 - Effective 05/05/67
- (24) Order No. 66006 - Effective 06/08/67
- (25) Order No. 66778 - Effective 09/05/67
- (26) Order No. 67113 - Effective 10/09/67
- (27) Order No. 67379 - Effective 11/06/67
- (28) Order No. 69103 - Effective 06/01/68
- (29) Order No. 69104 - Effective 06/01/68

165:10-1-5. Conservation Division [RESERVED]

165:10-1-6. Duties and authority of the Conservation Division

(a) It shall be the duty of the Conservation Division to administer and enforce the statutes of this State and the rules, regulations, and orders of the Commission relating to the conservation of oil and gas and the prevention of pollution in connection with the exploration, drilling, producing, transporting, purchasing, processing, and storage of oil and gas. A schedule of fines listed in this Chapter is in Appendix E.

(b) The Conservation Division shall have the right at all times to go upon and inspect any oil and gas properties, pipelines, tank farms, refineries, and other processing plants and pump stations for the purpose of making any investigations or tests to ascertain whether the rules, regulations, and orders of the Commission are being complied with, and shall report to the Commission any violation thereof.

(c) The Conservation Division may require the testing or retesting of any oil, gas, injection, or disposal well upon 48-hour notice. Until the test is completed or

excused, no allowable will be assigned the well and the purchaser or taker of oil or gas from such well shall not run oil or gas until authorized by the Conservation Division.

(d) The Director of the Conservation Division may administratively reclassify a well according to the gas-oil ratio as specified in 165:10-13-2 if the retesting of a well pursuant to this Section indicates a change in the original gas-oil ratio. This administrative reclassification shall only be used for allowable or priority purposes pursuant to 165:10-17-12. The operator shall be notified in writing by the Conservation Division within 15 days of the effective date of any change in classification.

(e) If the operator of the well which has been reclassified objects to said reclassification, he may file a written objection with the Conservation Division within 15 days of receiving notice of the reclassification. At the same time that the objection is filed, the operator shall file an application and notice setting cause for hearing with the Court Clerk Commission. The notice shall be published one time at least 15 days prior to the hearing in a newspaper of general circulation published in Oklahoma County and in a newspaper of general circulation published in each county in which lands embraced in the application are located.

(f) The Conservation Division shall have access to all well records, wherever located. All companies, operators, drilling contractors, drillers, service companies, or other persons shall permit any authorized employee of the Commission to come upon any lease or property operated or controlled by them, and to inspect the records of wells; provided, that information so obtained shall be confidential. Any person who attempts, by means of any threat or violence, to deter or prevent any authorized employee of the Commission from performing any duty hereunder shall be prosecuted to the fullest extent of the law.

(g) Upon request of the Conservation Division, service companies or other persons shall furnish and file reports and records showing gun perforating, hydraulic fracturing, cementing, shooting, chemical treatment, and all other service operations on any well.

[Source: Amended at 9 Ok Reg 2337, eff 6-25-92; Amended at 26 Ok Reg 2498, eff 7-11-09; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-1-7. Prescribed forms

(a) Required Conservation Division forms may be submitted to the Commission on forms supplied by the Commission or on xerographic copies of Commission forms or by operator computer generated forms. Operator computer generated forms will be printed from Commission designed files made available to operators via the electronic Bulletin Board Service (BBS), Internet (World Wide Web) or magnetic disk. Operator computer generated forms must contain the exact language and wording of Commission forms. Any alteration of Commission forms language and wording may subject the signature party and/or operator to perjury charges.

(b) The following Conservation Division forms are prescribed for filing purposes:

(1) **Form 1000 - Notice of Intention to Drill application:** Operator shall file Form 1000 before any oil, gas, injection, disposal, service well or stratigraphic test hole is drilled, recompleted, re-entered or deepened. Such notice shall include the name(s) and address(es) of the surface owner(s) of the land upon which the well is to be located. The Commission shall process the application and mail a copy of the permit to drill or re-enter to the surface owner(s). Upon approval, the operator will have eighteen months to commence the permitted operations. A six month extension may

be granted without fee providing the Conservation Division staff determines that no material change of condition has occurred, if written request for such extension is received from the operator prior to the expiration of the original permit. Only one extension may be granted. A copy of the approved permit shall be posted at the well site. [Reference 165:10-3-1 and 165:10-1-25 and OAC 165:10-7-31]

(2) **Form 1000B - Application to Drill Deep Anode Groundbeds:** Form 1000B is required to be filed for wells drilled for deep anode groundbeds as required by OAC 165:10-7-14. The purpose of Commission Form 1000B is to ensure groundwater is being protected in construction of the deep anode groundbed. [Reference 165:10-7-14]

(3) **Form 1000S - Application for seismic operations:** A permit for seismic operations must be obtained. The applicant must post a \$50,000 bond with the Surety Department in the Oil and Gas Conservation Division. The application must also be accompanied with a pre-plat of the project area. [Reference 165:10-7-31]

(4) **Form 1001 - Notification of Intention to Plug:** Operator shall file notice on Form 1001 five days prior to plugging operations and shall notify the appropriate Conservation Division District Office before work is started. If the well is an exhausted producer, list OTC assigned county and lease number. If the Intent to Plug is cancelled, the operator shall notify the Commission by letter. [Reference 165:10-11-4 and 165:10-11-6]

(5) **Form 1001A - Notification of Spudding of New Well:** Operator shall file a Form 1001A with the Conservation Division within 14 days of spudding a new well or reentering a previously plugged well. [Reference 165:10-3-2]

(6) **Form 1002A - Well completion report:** Operator shall furnish a complete well record on Form 1002A within 60 days after completion of operations to drill, recomplete, re-enter, or convert to injection or disposal well. Effective for both dry hole and/or producer. If well is an oil or gas producer, list OTC assigned county and lease number. Gas-oil ratio must be shown when Form 1002A is filed. List on a 24-hour basis both oil and gas. [Reference 165:10-3-25]

(A) **Oil well:** GOR less than 15,000:1

(B) **Gas well:** GOR 15,000:1 or more

(7) **Form 1002B - Confidential Filing of Electric Logs:** Operator shall file Form 1002B within 60 days from the earlier of the date of completion of the well or the date of the running of the last formation evaluation type wire line log to hold logs confidential for one year period. Optional extension for six months may be requested by operator in writing to the Technical Services Department of the Conservation Division. [Reference 165:10-3-26]

(8) **Form 1002C - Cementing Report to accompany Well Completion Report:** Operator shall file Form 1002C with the Well Completion Report (Form 1002A) describing all cementing operations on surface, intermediate, and production casing strings, including multistage cementing jobs. The form shall be completed and signed by employees of both the operator and the cementing company. [Reference 165:10-3-4(i)]

(9) **Form 1003 - Plugging Record:** Operator will file Form 1003 within 30 days after plugging operations are completed. The Form 1003 is to be mailed or e-mailed to the appropriate Conservation Division District Office.

Form 1003 shall be completed and signed by employees of both the operator and the cementer. If a depleted producer, list OTC assigned county and lease number. [Reference 165:10-11-6 and 165:10-11-7]

(10) Form 1003A - Notice of Temporary Exemption from Well

Plugging: Form 1003A shall be filed with the appropriate Conservation Division District Office. [Reference 165:10-11-3 and 165:10-11-9]

(11) Form 1004 - Monthly Report of Unallocated Natural Gas Wells

Production: Each operator of the required meter under 165:10-17-5 shall file a monthly well report on Form 1004 with the Commission of all natural gas volumes transferred through the meter for the preceding month, by the last day of the month following such transfer. List formation name plus OTC assigned county and lease number. If more than one meter, the operator of each shall file this form. [Reference 165:10-1-47]

(12) Form 1004B - Notice of Gas Purchase Curtailments: In any month wherein a first purchaser or first taker has a market demand/supply imbalance and must curtail purchases or takes in compliance with 165:10-17-12, Form 1004B shall be filed by said first purchaser or first taker with the Conservation Division. [Reference 165:10-17-12]

(13) Form 1005 - Monthly Report of Purchasers (Gas: subject to field rules): [Reference 165:10-1-47 and 165:10-15-1]

(A) **GAS:** Each operator of the required meter or meters under 165:10-17-5 shall complete computer-generated Form 1005, and return a copy to the Conservation Division indicating the gas amounts transferred through the meter for the preceding month on allocated and special allocated gas wells.

(B) **OIL:** Each first purchaser, or first taker of oil from wells and projects which are capable of producing in excess of their maximum assigned allowables, must complete computer-generated Form 1005 and return a copy to the Conservation Division indicating the amount of oil taken from each well or unit for the preceding month.

(14) Form 1006 - Surety bond for oil, gas, injection, or disposal wells:

Prior to drilling and/or operating a well, the operator shall furnish the Conservation Division a surety bond (\$25,000.00) or other present alternate surety, Form 1006A or 1006C. Operator must file the original copy only with a copy of the power of attorney from the bonding company. The name and address of the Oklahoma resident service agent shall be endorsed on the bond form. [Reference 165:10-1-10 and 165:10-1-12]

(15) Form 1006A - Financial Statement for oil, gas, injection or disposal wells:

Prior to drilling and/or operating a well, the operator shall furnish the Conservation Division a verifiable financial statement (minimum net worth \$50,000.00 within the State of Oklahoma) or other present alternate surety, Form 1006 or 1006C. Operator must file an original copy on Form 1006A, which must be updated annually from the last filing date. [Reference 165:10-1-10 and 165:10-1-11]

(16) Form 1006B - Operator Agreement to plug oil, gas, and service wells within the State of Oklahoma:

Operator shall agree to plug well(s) in compliance with the Commission rules. This agreement must accompany the operator's elective choice of surety (Form 1006, 1006A, or 1006C). The operator is required to file a Form 1006B with the Conservation Division once every twelve (12) months. [Reference 165:10-1-10, 165:10-1-11,

165:10-1-12, 165:10-1-13, and 165:10-1-14]

(17) **Form 1006BR - Recycling, Reclaiming Operator's Agreement to Close the Reclaiming Facility:** Prior to operating a recycling or reclaiming facility the operator shall file an agreement to close the facility in compliance with OCC rules. This agreement must accompany the application for certification (Form 1020A). [Reference 165:10-8-5]

(18) **Form 1006BR-A - Operator agreement to close hydrocarbon recycling/reclaiming facility:** Operators of hydrocarbon recycling/reclaiming facilities are required to file agreements with the Commission concerning closure of such facilities. [Reference 165:10-8-5]

(19) **Form 1006BR-B - Surety for closure of hydrocarbon recycling/reclaiming facility:** Operators of hydrocarbon recycling/reclaiming facilities are required to file surety with the Commission for closure and reclamation of such facilities. [Reference 165:10-8-5]

(20) **Form 1006BT-A - Operator's agreement to close, reclaim and remediate truck wash pit:** Operators of truck wash pits are required to file agreements with the Commission regarding closure of such pits. [Reference 165:10-7-33]

(21) **Form 1006BT-B - Surety for closure of truck wash pits:** Operators of truck wash pits are required to file surety with the Commission for closure, reclamation and remediation of such pits. [Reference 165:10-7-33]

(22) **Form 1006C - Irrevocable commercial letter of credit:** Prior to drilling and/or operating a well, the operator shall furnish the Conservation Division an irrevocable commercial letter of credit (\$25,000.00) or other present alternate surety, Form 1006A or 1006. Operator must file the original copy with the bank seal affixed. A letter of credit must be valid for at least a one year period. [Reference 165:10-1-10 and 165:10-1-13]

(23) **Form 1006D - Affidavit of well plugging costs:** An operator may submit an affidavit on Form 1006D to the Conservation Division concerning the operator's statewide plugging liability. The Commission may approve Category B surety in an amount less than \$25,000.00 for an operator whose statewide plugging liability is less than \$25,000.00. The Form 1006D must be properly executed by a duly licensed pipe pulling and well plugging company and such Form must be acceptable to the Conservation Division. [Reference 165:10-1-10, 165:10-1-12, 165:10-1-13 and 165:10-1-14]

(24) **Form 1006S - Operator's agreement to plug seismic shot holes within the State of Oklahoma:** Prior to commencing seismic operations the operator shall file an agreement to plug shot holes in accordance with Commission rules. This agreement must accompany the financial surety guarantee. [Reference 165:10-7-31]

(25) **Form 1006SB - Surety bond for seismic shot hole plugging within the State of Oklahoma:** Before commencing any seismic operation that requires the drilling of shot holes, those companies actually doing the work in the field must secure a bond in the amount of \$50,000.00. Seismic companies must file the original Form 1006SB only with a copy of the power of attorney from the bonding company. The name and address of the Oklahoma resident service agent shall be endorsed on the bond form. Form 1000S shall be filed with the bond. [Reference 165:10-11-6 and 165:10-7-31]

(26) **Form 1010 - Application for Cancelled Underage:** Operator shall file, within 30 days for oil, and six months for special allocated and allocated gas from the date of cancellation, to reinstate cancelled underage; stating reason for this request and notifying all offset operators. List OTC assigned county and lease number. [Reference 165:10-13-10 and 165:10-17-9]

(27) **Form 1011 - Multi-Zone lease runs report:** If there are two or more common sources of supply that are produced through a well or wells on the same lease or drilling and spacing unit and that are not commingled, production from each common source of supply shall be separately produced, measured and/or accounted for to the Commission. If one or more of the zones produced are classified as oil for allowable purposes, the operator is required to submit to the Conservation Division a multi-zone report on Form 1011 showing the production from each oil-bearing common source of supply on or before the last day of the succeeding proration period. [Reference 165:10-13-7]

(28) **Form 1012 - Fluid Injection Report:** Operators shall file Form 1012 with the Conservation Division by January 31 of each year covering the previous calendar year (January 1 through December 31) on all enhanced recovery projects, pressure maintenance projects, noncommercial disposal wells, LPG storage wells, authorized waterfloods and gas repressuring projects for each UIC well. The completed form will list well identification including API number, the Commission order or permit number, injection volume and pressure, etc., as required on the form. No UIC well is to be operated for injection or disposal unless the Form 1012 is filed by the above date. [Reference 165:10-5-7].

(29) **Form 1012C - Commercial disposal well fluid disposal report:** Operators of commercial disposal wells shall file Form 1012C with the Conservation Division by January 31 and July 31 of each year for the previous six-month period. The completed form will list well identification including API number, the Commission order or permit number, disposal volume and pressure, etc. as required on the form. No commercial disposal well is to be operated unless the Form 1012C is filed by the above dates. [Reference 165:10-5-7].

(30) **Form 1012D - Daily volume and pressure report for disposal wells within areas of interest:** Operators of wells authorized for disposal within areas of interest designated by the Oil and Gas Conservation Division shall submit Form 1012D containing daily volumes and pressures to the Manager of the Pollution Abatement Department at a minimum on a weekly basis or as designated by such Manager. [Reference 165:10-5-7]

(31) **Form 1013 - Application for adjusting an allowable for an Excessive Water Exemption or Reservoir Dewatering Oil Spacing unit:** An operator in an unallocated oil pool may be permitted to produce at a full capacity allowable rate, provided that the water- oil ratio at the well is greater than or equal to 3:1 as an excessive water exemption. To qualify for the reservoir dewatering oil spacing unit allowable shown on Appendix J, the operator must provide data to show that the water - oil ratio is greater than 1:1. The operator shall submit a production test on Form 1013 to the Conservation Division. [Reference 165:10-15-1, 165:10-15-16, 165:10-15-17 and 165:10-15-18].

(32) Form 1014 - Application for Permit to Use Earthen Pit, noncommercial disposal or enhanced recovery well pit used for temporary storage of saltwater, or pit associated with commercial disposal well surface facility: The operator of a proposed off-site reserve pit, recycling/reuse pit, spill containment pit, remediation pit, noncommercial disposal or enhanced recovery well pit used for temporary storage of saltwater, or pit associated with a commercial disposal well surface facility must submit Form 1014 to the appropriate Conservation Division District Office for approval before constructing or using the pit. [Reference 165:10-7-16, 165:10-7-20 and 165:10-9-3]

(33) Form 1014A - Commercial facility report: A report that operators of hydrocarbon recycling/reclaiming facilities, commercial pits, commercial soil farming sites and commercial recycling facilities are required to submit to the Manager of Pollution Abatement. [Reference 165:10-8-8, 165:10-9-1, 165:10-9-2 and 165:10-9-4]

(34) Form 1014C - Chain of custody record/analysis request: Form 1014C is available for use by Commission personnel when samples are collected for submission to and analysis by a laboratory certified by the Oklahoma Water Resources Board or operated by the State of Oklahoma.

(35) Form 1014CA - Compliance agreement for land application: Any person responsible for supervision of land application must submit a compliance agreement to the Commission. [Reference 165:10-7-19 and 165:10-7-26]

(36) Form 1014CR - Application for commercial recycling facility construction: After a Commission order is obtained, Form 1014CR must be submitted for approval to the Manager of Pollution Abatement prior to the construction of the commercial recycling facility authorized by the order. [Reference OAC 165:10-9-4]

(37) Form 1014CS - Application for Commercial Soil Farming: For a commercial soil farming site that has an order to operate, the operator shall submit a Form 1014CS to the Pollution Abatement Department for approval prior to commencing soil farming. [Reference 165:10-9-2]

(38) Form 1014D - Application for Surface Discharge or for reclaiming and/or recycling of produced water: Each application for surface discharge of produced water or for reclaiming and/or recycling of produced water must be submitted to the appropriate Conservation Division District Office on Form 1014D in quadruplicate. Applications will be processed within five business days. [Reference 165:10-7-17 or 165:10-7-32]

(39) Form 1014F - Application for permit to use noncommercial pit with capacity in excess of 50,000 barrels to contain deleterious substances: The operator of a proposed noncommercial pit with a capacity in excess of 50,000 barrels must submit the Form 1014F to and obtain the approval of the Manager of the Pollution Abatement Department or obtain the issuance of a Commission order before constructing or using the pit. [Reference 165:10-7-16]

(40) Form 1014HD - Notice for Disposal of Hydrostatic Test Water: Companies wishing to discharge water as required by OAC 165:10-7-17, used to test a pipeline, tank, etc. must submit a Form 1014HD to the appropriate Conservation Division District Office and the Pollution Abatement Department for prior approval. [Reference 165:10-7-17]

(41) **Form 1014L - Surface Owner Permission for Land Application:** Each application for land application must include an original Form 1014L, whereby the applicable surface owner gives permission for the applicant to land apply certain deleterious substances to a specific property. [Reference 165:10-7-19 and 165:10-7-26]

(42) **Form 1014LA - Designation of land application agent:** A notarized affidavit designating any agent of an operator for land application must be submitted to the Commission. [Reference 165:10-7-17, 165:10-7-19 and 165:10-7-26]

(43) **Form 1014LC - Letter of credit for land application:** Persons who contract to land apply materials are required to file surety with the Commission. [Reference 165:10-7-10]

(44) **Form 1014N - Application for Commercial Pit Construction:** After a Commission order is obtained, Form 1014N must be submitted for approval by the Manager of Pollution Abatement prior to the construction of each commercial pit authorized by the order. [Reference 165:10-9-1]

(45) **Form 1014P - Annual report for surface discharge:** An annual report is required to be submitted to the Commission by April 1 of each year on Form 1014P concerning surface discharges of produced water. Current (within three month) analyses of the produced water and soil from the discharge plot must be attached to the annual report. [Reference 165:10-7-17]

(46) **Form 1014R - Post land application report:** A post land application report shall be submitted by the operator or the operator's agent to the Manager of Pollution Abatement within ninety (90) days of the completion of land application. [Reference 165:10-7-19 and 165:10-7-26]

(47) **Form 1014RW - Application for permit to use reclaimed water in oil and gas operations:** Each application for a permit to use reclaimed water in oil and gas operations must be submitted to the Manager of Field Operations on Form 1014RW. [Reference OAC 165:10-7-34]

(48) **Form 1014S - Application for Land Application:** Each application for land application of materials must be submitted to the Pollution Abatement Department on Form 1014S. The applicant must be the operator of the well or other operator responsible for generating the waste to be land applied, except that a commercial pit operator may also apply in case of emergency or for the purpose of facilitating repair or closure, and the Oklahoma Energy Resources Board or its contractor may apply in cases where there is no responsible party. The Form 1014S shall be processed within five business days of submission of all required or requested information. [Reference 165:10-7-19 and 165:10-7-26]

(49) **Form 1014SB - Surety bond for land application:** Persons who contract to land apply materials are required to file surety with the Commission. [Reference 165:10-7-10]

(50) **Form 1014T - Application for permit to use truck wash pit:** The operator of a proposed truck wash pit must submit Form 1014T to the Manager of Pollution Abatement for the Conservation Division and obtain a permit before constructing or using the pit. [Reference 165:10-7-33]

(51) **Form 1014W - Application for waste oil or drill cuttings use by County Commissioners:** Application to apply waste oil, waste oil residue, crude oil contaminated soil or freshwater drill cuttings must be made by any Board of County Commissioners on Form 1014W. The Form 1014W is

required to be submitted by electronic mail to the appropriate District Manager. [Reference 165:10-7-22 and 165:10-7-28]

(52) Form 1014X - Application for waste oil or drill cuttings use by operators: Application to apply waste oil, waste oil residue, crude oil contaminated soil or freshwater drill cuttings must be made by any operator on Form 1014X. The Form 1014X is required to be submitted by electronic mail or mailed to the appropriate District Manager. [Reference 165:10-7-27 and 165:10-7-29]

(53) Form 1015 - Application for Administrative Approval to Dispose of or Inject Class II fluids into Well(s) or to amend existing orders authorizing injection for injection, disposal or LPG storage well(s): Applicant shall file an original of the application and one complete set of attachments with the Commission on Form 1015. When requesting approval to dispose of or inject Class II fluids into wells, applicant will also furnish copies of the application on Form 1015 as specified, and, where noted, required attachments to Form 1015. Applicant will submit an affidavit of delivery or mailing to the Commission not later than five business days after the application is filed. Applicant shall file with the Commission proof of publication regarding the notice of application in an Oklahoma County newspaper and a county newspaper in which the well is located. [Reference 165:10-5-2, 165:10-5-5, and 165:5-7-30]

(54) Form 1015SI - Application for Permit for Simultaneous Injection Well: Operator shall file original with the Underground Injection Control Department on Form 1015SI. A copy of the form will also be supplied to the operator of any producing lease within one-half (1/2) mile of the proposed injection well. [Reference 165:10-5-15]

(55) Form 1015T - Application for Injection of Reserve Pit Fluids: Each application for the on-site injection of reserve pit fluids (i.e., drilling mud fluids or fracture fluids) used in drilling or well completion shall be filed with the Underground Injection Control Department by the well operator on Form 1015T. The original of the application and one complete set of attachments shall be furnished to the Underground Injection Control Department. A copy of the application will also be supplied to the land owner and the operator of any producing lease within one-half (1/2) mile of the proposed well. [Reference 165:10-5-13]

(56) Form 1016 - Back Pressure Test for Natural Gas Wells: Operators and/or purchasers, on the Form 1016, will report all single-point and four-point potential tests as required by pool rule orders or general rules. List OTC assigned county and lease numbers and special allocated pool numbers, first date of sales, and complete flow data. [Reference 165:10-17-6 and 165:10-17-7]

(57) Form 1017 - Guymon-Hugoton Field Gas Well Deliverability Tests: Operators and/or purchasers of gas in this field shall take deliverability tests between January 1 and August 31 of each year, and on the test sheet Form 1017 file the results with the Commission. List OTC assigned lease number for each well. [Reference Orders No. 17867 and 87291 and 165:10-17-9]

(58) Form 1019 - Guymon-Hugoton Field Acreage Statement for Gas Wells: A fact statement as to acreage attributable to each well shall be filed with the Commission on Form 1019 within 30 days of the well completion with a plat or map showing location of the well. List OTC assigned county and lease number. [Reference Order No. 17867 and 165:10-17-9]

- (59) **Form 1020A - Application for Certification for the Recycling, Reuse of Deleterious Substances:** Applicant shall file an original Form 1020A with necessary attachments with the Pollution Abatement Department. Form 1020A is filed prior to construction of facility or change of operator. [Reference 165:10-8-1 through 165:10-8-11]
- (60) **Form 1021 - Application for Priority Hardship Classification:** The applicant shall file Form 1021 and the necessary attachments with the Technical Services Department for review prior to any hearing for priority one hardship classification. In addition, a formal application for hearing must be filed with the Court Clerk's Office of the Commission. [Reference 165:10-17-12]
- (61) **Form 1021A - Application for limited deviation from the priority gas rules:** The applicant shall file Form 1021A and the necessary attachments with the Technical Services Department for review prior to any hearing for deviation from the priority gas rules. In addition, a formal application for hearing must be filed with the Court Clerk's Office of the Commission. [Reference 165:10-17-12]
- (62) **Form 1022 - Application to flare or vent gas:** Operator shall file one copy of Form 1022 with the Technical Services Department of the Conservation Division listing OTC assigned county lease number. [Reference 165:10-3-15]
- (63) **Form 1022A - Application to operate vacuum pump:** Operator shall file one copy of Form 1022A with the required attachments with the Technical Services Department of the Conservation Division. [Reference 165:10-3-31]
- (64) **Form 1023 - Application for multiple completion, multichoke assembly or commingle completion:** Operator will file the original of Form 1023 with the required attachments. List OTC assigned county and lease number. [Reference 165:10-3-35; 165:10-3-39; 165:10-3-37]
- (65) **Form 1024 - Packer setting affidavit:** Operator will submit Form 1024 as required. [Reference 165:10-3-35 and pertinent field rules]
- (66) **Form 1025 - Packer leakage test:** Operator will submit Form 1025 as required. [Reference 165:10-3-35 and pertinent field rules]
- (67) **Form 1027 - Bottom hole pressure test:** Operator, on the pink sheet of Form 1027, shall take BHP tests in the manner and during periods prescribed by special field rules. List OTC assigned county and lease numbers. [Reference Special Field Rules and 165:10-13-3]
- (68) **Form 1028 - Application for discovery oil allowable:** Operator shall file Form 1028 with the required exhibits and tests within 30 days of completion of each new well in a discovery oil pool. [Reference 165:10-15-7]
- (69) **Form 1029A - Production or potential test - oil only:** Operator of each newly completed discovery oil well shall file a potential test Form 1029A not later than 30 days after completion of the well. All tests, if requested, shall be witnessed by another operator. [Reference 165:10-15-7].
- (70) **Form 1030 - Application for allowable adjustment:** Each operator or other interested parties desiring to adjust the allowable for a well or wells shall file Form 1030 for administrative review and approval. The allowable may be increased, decreased, or transferred as the evidence may indicate for the most efficient rate of production from the well or wells. [Reference 165:10-13-5, 165:10-13-8, 165:10-15-18 and 165:5-7-12]

(71) **Form 1034 - Nominations and purchasers report:** [Reference 165:10-1-36, 165:10-1-37 and 165:10-1-46] **Oil:** Purchasers will furnish nomination data, actual runs from leases, stocks, and other information on Form 1034 to the Conservation Division not later than noon Friday of the week preceding each scheduled market demand hearing. On months in which no market demand hearing is held, Form 1034 shall be filed by the 20th of the month listing crude oil runs for the previous month on line 5 only. Any change in nominations from the previous hearing shall be so indicated on this monthly report.

(72) **Form 1034-G - Gas nominations:** Operators of natural gas wells in special allocated gas pools where well allowable calculations according to special allocated field rules are in effect shall file their pool nominations on Form 1034-G no later than one week prior to the market demand hearing. [Reference 165:10-1-36, 165:10-1-37, 165:10-1-49 and 165:10-17-9].

(73) **Form 1040 - Monthly allocation schedule (gas):** Monthly gas schedule Form 1040 will be forwarded to operators by the Conservation Division indicating the status of special allocated gas wells and their current allowables. Operators will inform the Conservation Division of errors, if any, found in Form 1040 as promptly as possible. Additionally, purchasers will receive the monthly schedule and shall return the production from each well as requested. [Reference 165:10-1-47]

(74) **Form 1055 - Application for Pipe Pulling and Well Plugging License:** No person shall contract to pull casing or plug oil, gas, injection, disposal, or other service wells, or contract to salvage casing therefrom, or purchase wells for the purpose of salvaging casing therefrom until a license has been secured from the Commission. [Reference 165:10-11-1]

(75) **Form 1070 - Inventory of authorized existing enhanced recovery wells:** Operators shall file reporting Form 1070 before injecting into any enhanced recovery well. [Reference 165:10-5-3]

(76) **Form 1071 - Inventory of authorized existing disposal wells:** Operators shall file the reporting Form 1071 before disposing into any disposal well. [Reference 165:10-5-3]

(77) **Form 1072 - Notice of termination of injection:** Within 30 days of the termination of injection Form 1072 must be filed. [Reference 165:10-5-7]

(78) **Form 1073 - Notice of transfer of oil or gas well operatorship:** The new operator shall file Form 1073 to notify the Conservation Division of any change of operation of any oil or gas well within 30 days of transfer of the well. [Reference 165:10-1-15]

(79) **Form 1073I - Notice of transfer of underground injection well operatorship:** The new operator shall file Form 1073I to notify the Underground Injection Control Department of any change of operation of any injection, disposal, or hydrocarbon storage well within 30 days of transfer of the well. [Reference 165:10-5-10]

(80) **Form 1073IMW - Notice of transfer of multiple underground injection well operatorship:** For transfers involving more than 10 underground injection wells, a transferor and transferee may file a single Form 1073IMW with the Conservation Division indicating the transfer of multiple wells. If the Form 1073IMW is used, such Form must be filed with the Conservation Division regarding any change of operations of such wells within 30 days of transfer of the wells. [Reference 165:10-5-10]

(81) **Form 1073MW - Notice of transfer of multiple oil or gas well operatorship:** For transfers involving more than 10 oil or gas wells, a transferor and transferee may file a single Form 1073MW with the Conservation Division indicating the transfer of multiple wells. If the Form 1073MW is used, such Form must be filed with the Conservation Division regarding any change of operations of such wells within 30 days of transfer of the wells. [Reference 165:10-1-15]

(82) **Form 1075 - Mechanical integrity pressure test:** A pressure or monitoring test must be performed on new and existing injection wells and disposal wells. Information must be submitted on Form 1075 and witnessed by a Field Inspector. Forms shall be submitted to the Conservation Division's Underground Injection Control Department. [Reference 165:10-5-6]

(83) **Form 1081 - Mineral owners escrow account:** Operator shall file, in quadruplicate, Form 1081 annually on anniversary date of first pooling order issued after effective date of Senate Bill 299 (7-1-84) and shall include all applicable orders issued during the twelve-month reporting period. [Reference 165:10-25-1 through 165:10-25-10]

(84) **Form 1085 - Complaint report:** Form 1085 is used by Commission personnel to report violations of General Rules of the Commission and to report progress on ongoing remedial actions. Copies are sent to all parties concerned with investigation. Form 1085 combines and replaces old Forms 1034 and 1062. [Reference 165:10-7-7]

(85) **Form 1139 - Application for gross production tax exemption:** Operators shall file one copy of Form 1139 with the required attachments with the Technical Services Department of the Conservation Division. [Reference 165:10-21-75 through 165:10-21-80]

(86) **Form 1535 - Application for classification of reservoir dewatering project for exemption of sales tax on electricity used for such operations and application for state sales tax exemption for electricity sold for operations involving enhanced recovery methods on a spacing unit or lease:** Operators shall file one original of Form 1535 with the required attachments with the Technical Services Department of the Conservation Division. To obtain the exemption of sales tax on the sale of electricity and associated delivery and transmission used for reservoir dewatering operations, or for a state sales tax exemption for electricity sold for operations involving enhanced recovery methods on a spacing unit or lease, the operator shall contact the Director's Office, Taxpayer Assistance Division, Oklahoma Tax Commission, 2501 N. Lincoln Blvd., Oklahoma City, Ok. 73194. [Reference 165:10-21-90 through 165:10-21-92 and 165:10-21-95 through 165:10-21-97]

(87) **Form 2000BF - AAI Oversight Qualification:** The Applicant shall file one (1) Form 2000BF with the Brownfield Program of the Conservation Division listing the qualifications as per AAI of each Environmental Professional who will work on the site. [Reference 165:10-10-1 through 165:10-10-14]

(88) **Form 2001BF - Brownfield Applicant Eligibility:** The applicant shall file one (1) Form 2001BF with the Brownfield Program of the Conservation Division. This Form is filed to demonstrate applicant's eligibility to be in the Brownfield program. [Reference 165:10-10-1 through 165:10-10-14]

(89) **Form 2002BF - Consent to Entry:** The applicant shall file one (1) Form 2002BF with the Brownfield Program of the Conservation Division. This Form is the landowner's permission for applicant and their contractors to enter the property for assessment and cleanup work. Copies will be sent to all parties concerned with the assessment and/or cleanup. [Reference 165:10-10-1 through 165:10-10-14]

(90) **Form 2003BF - Application for Brownfield Site Eligibility and Assessment:** The applicant shall file one (1) Form 2003BF with the Brownfield Program of the Conservation Division for all sites applicant is entering into the program. This Form provides necessary information on the site. This Form can be used by public, quasi-public, and non-profit entities to request a free Targeted Brownfield Assessment of a site that has been approved as eligible for the Brownfield program. [Reference 165:10-10-1 through 165:10-10-14]

(91) **Form 2005BF - Brownfield Certificate of No Action Necessary:** The Form 2005BF will be issued by the Commission to the Brownfield Applicant, after the Brownfield staff has made a no action necessary decision. The applicant must file the Certificate of No Action Necessary in the office of the county clerk where the site is located, provide a copy to the landowner if the landowner is not the applicant, and submit a file-stamped copy to the Oklahoma Corporation Commission within 30 days. [Reference 165:10-10-1 through 165:10-10-14]

(92) **Form 2006BF - Brownfield Certificate of Completion:** The Form 2006BF will be issued by the Commission to the Brownfield Applicant, after the Brownfield staff has made a final inspection of the site and review of the project following a remedial action. The applicant must file the Certificate of Completion and any land use restrictions in the office of the county clerk where the site is located, provide a copy to the landowner if the landowner is not the applicant, and submit a file-stamped copy to the Oklahoma Corporation Commission within 30 days. [Reference 165:10-10-1 through 165:10-10-14]

(93) **Form 3000NGS - Application for Investigation and/or Abatement of Seeping Natural Gas:** An owner of property which has seeping natural gas shall file an application with the Commission regarding the Commission's investigation and/or abatement of the seeping natural gas. [Reference 165:10-12-9]

(94) **Form 4000WIP - Well impact report:** If an operator has evidence that its well(s) have been impacted by hydraulic fracturing operations, the operator may report the occurrence by electronic mail to the appropriate Conservation Division District Office within 24 hours of discovery. The operator must use Form 4000WIP to report the occurrence. [Reference 165:10-3-10]

(95) **Form 5000NTL - Notice of temporary lines which may be used to transport produced water:** Operators are required to notify the Conservation Division, the appropriate County Commissioners and the surface owners of the land that is subject to the rights-of-way sought to be utilized by the operator, at least 48 hours prior to placing in public road rights-of-way temporary lines that may at any time be used to transport produced water for well drilling, completion, or remedial workover operations. Operators must use Form 5000NTL to provide the notice. [Reference 165:10-3-10.1]

(96) Form 6000NHF - Notice to Conservation Division of hydraulic fracturing operations: Operators are required to notify the Conservation Division using Form 6000NHF at least 48 hours prior to commencement of hydraulic fracturing operations on a well. [Reference 165:10-3-10]

(97) Form 6000NOO - Notice to operators of producing wells of hydraulic fracturing operations: Operators are required to notify operators of producing wells within one mile of the completion interval of the subject well at least 5 business days prior to commencement of hydraulic fracturing operations on such well. The notice to be provided such operators shall contain the information in Form 6000NOO. [Reference 165:10-3-10]

PART 3. SURETY

165:10-1-10. Operator's agreement; Category A and Category B surety

(a) "Any person who drills or operates any well for the exploration, development or production of oil or gas, or as an injection or disposal well, within this State, shall furnish in writing, on forms approved by the Corporation Commission, his agreement to drill, operate and plug wells in compliance with the rules and regulations of the Commission and the laws of this state, together with evidence of financial ability to comply with the requirements for plugging, closure of surface impoundments, removal of trash and equipment as established by the rules of the Commission and by law." [52 O.S. § 318.1] Any operator violating this Section may be fined up to \$500.00. To establish evidence of financial ability, the Commission shall require:

- (1) Category A surety which shall include a financial statement listing assets and liabilities and including a general release that the information may be verified with banks and other financial institutions. The statement shall prove a net worth of not less than \$50,000.00 in U.S. dollars; or
- (2) Category B surety shall include an irrevocable commercial letter of credit, cash, a cashier's check, a certificate of deposit, bank joint custody receipt, other approved negotiable instrument, or a blanket surety bond. Except as provided in (3) of this subsection, the amount of such Category B surety shall be in the amount of \$25,000.00 in U.S. dollars but may be set higher at the discretion of the Director of the Conservation Division. The Commission is authorized to establish Category B surety in an amount greater than \$25,000.00 in U.S. dollars based upon the past performance of the operator and its insiders and affiliates regarding compliance with the laws of this state, and compliance with any rules promulgated thereto including but not limited to the drilling, operation and plugging of wells, closure of surface impoundments, or removal of trash and equipment. Any such Category B surety shall constitute an unconditional promise to pay and be in a form negotiable by the Commission.

(3) The Commission may grant Category B surety in an amount less than \$25,000.00 in U.S. dollars to an operator whose statewide well plugging liability is less than \$25,000.00 in U.S. dollars. Said Category B surety shall be in an amount that is sufficient to cover the total estimated cost of properly plugging and abandoning each and every well, the operations for which, an operator is responsible. Statewide well plugging liability shall be documented by an affidavit filed on Form 1006D and shall be properly executed by a duly licensed pipe pulling and well plugging company and shall be approved by the Conservation Division. Said affidavit shall state, among other things, an estimated cost of plugging, closure, and removal operations for each well in accordance with 165:10-11-3 through 165:10-11-8 inclusively and shall be accompanied by a Form 1000 (Intent to Drill) if the estimate involves a proposed well or by a Form 1002A (Completion Report) if the estimate involves a well that is a producing, injection, or disposal well. The estimated cost shall not include any salvage value as to recoverable casing, tubing, or well head equipment. The total statewide well plugging liability of an operator utilizing this Category B surety shall be kept current and shall be increased as additional wells are added to the responsibility of the operator and may be decreased as included wells are plugged and abandoned, but in no event shall exceed \$25,000.00 in U.S. dollars unless otherwise ordered by the Commission.

(b) Operators of record as of June 7, 1989, who do not have any outstanding contempt citations or fines and whose insiders or affiliates have no outstanding contempt citations or fines may post Category A surety.

(1) New operators, operators who have outstanding fines or contempt citations and operators whose insiders or affiliates have outstanding contempt citations or fines as of June 7, 1989, shall be required to post Category B surety. Operators who have posted Category B surety and have operated under this type surety and have no outstanding fines at the end of three years may post Category A surety.

(2) Operators using Category A surety who are assessed a fine of \$2,000.00 or more and who do not pay the fine within the specified time shall be required to post a Category B surety within 30 days of notification by the Commission.

(c) If a bond is required, the bond shall be executed by a corporate surety authorized to do business in this State and shall be renewed and continued in effect until the conditions have been met or release of the bond is authorized by the Commission.

(d) Irrespective of (a), (b), and (c) of this Section, for good cause shown concerning pollution or improper plugging of wells by an operator posting either Category A or Category B surety or by an insider or affiliate of such operator, the Commission, upon application of the Director of the Conservation Division after notice and hearing, may require the filing of additional Category B surety in an amount greater than \$25,000.00 in U.S. dollars but not to exceed \$100,000.00 in U.S. dollars. If the Commission has evidence that any person applying to the Commission for authority to operate may not possess a satisfactory compliance history with Commission rules, the Director of the Conservation Division may seek an order of the Commission, issued after application, notice, and hearing, determining whether the person should be authorized to operate.

(e) The agreement (Form 1006B-Operator's Agreement to Plug Oil, Gas and Service Wells Within the State of Oklahoma) provided for in (a) of this Section

shall provide that if the Commission determines, after notice and hearing, that the person furnishing the agreement has neglected, failed, or refused to plug and abandon, or cause to be plugged and abandoned, or replug any well or has neglected, failed or refused to close any surface impoundment or remove or cause to be removed trash and equipment in compliance with the rules of this Chapter, then the person shall forfeit from his bond, letter of credit, or negotiable instrument or shall pay to this State, through the Commission for deposit in the State Treasury, a sum equal to the cost of plugging the well, closure of any surface impoundment, or removal of trash and equipment. The Commission may cause the remedial work to be done, issuing a warrant in payment of the cost thereof drawn against the monies accruing in the State Treasury from the forfeiture or payment. Any monies accruing in the State Treasury by reason of a determination that there has been a noncompliance with the provisions of the agreement (Form 1006B) or the rules and regulations of the Commission, in excess of the cost of remedial action ordered by the Commission, shall be credited to the Conservation Fund. The Commission shall also recover any costs arising from litigation to enforce this provision if the Commission prevails. Provided, before a person is required to forfeit or pay any monies to the State pursuant to this Section, the Commission shall notify the person at his last-known address of the determination of neglect, failure, or refusal to plug or replug any well, or close any surface impoundment, or remove trash and equipment, and said person shall have ten days from the date of notification within which to commence remedial operations. Failure to commence remedial operations shall result in forfeiture or payment as provided in this subsection. If the operator is a corporation, association, partnership, limited liability company or any entity other than an individual, the operator shall file as part of its Form 1006B a complete list, in tabular form, of the names, addresses, telephone numbers, email addresses, driver license numbers, and percentages of ownership of all officers, directors, partners or principals of the operator and the insiders and affiliates of the operator. The operator shall also file as part of its Form 1006B the current names and addresses of all service agents of the operator and the operator's insiders and affiliates. The operator is required to file a Form 1006B with the Conservation Division every twelve (12) months.

(f) No person shall drill or operate any well, or receive an allowable, without complying with the provisions of this Section.

(g) The Commission shall shut in, without notice, hearing or order of the Commission, the wells of any such person violating the provisions of this Section and such wells shall remain shut in for noncompliance until the required evidence of Category B surety is obtained and verified by the Commission. No taker, transporter, or purchaser of oil or gas shall take, transport, or purchase oil or gas from the wells of any such drillers or operators after receiving a copy of the shut-in order or notice by certified mail of the issuance of such an order.

(h) If title to property or a well is transferred, the transferee shall furnish the evidence of financial ability to plug the well and close surface impoundments required by the provisions of this section, prior to the transfer.

(i) The following words, when used in this Section, shall have the following meaning:

(1) "Affiliate" means an entity which owns twenty percent (20%) or more of the operator, or an entity of which twenty percent (20%) or more is owned by the operator.

(2) "Insider" means officer, director, or person in control of the operator; general partners of or in the operator; general or limited partnership in

which the operator is a general partner; spouse of an officer, director, or person in control of the operator; spouse of a general partner of or in the operator; corporation of which the operator is a director, officer, or person in control; affiliate, or insider of an affiliate as if such affiliate were the operator; or managing agent of the operator.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 13 Ok Reg 2373, eff 7-1-96; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 28 Ok Reg 433, eff 12-27-10 (emergency); Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-1-11. Financial statement as surety

- (a) A plugging agreement shall be accompanied by surety. The surety requirement may be met by furnishing the operator's current financial statement (Form 1006A) to the Conservation Division, which shall be a full statement of the operator's assets and liabilities and shall reflect the operator's total net worth of not less than \$50,000.00 in U.S. dollars located in this State.
- (b) The value of producing oil and gas leaseholds for which the financial statement stands as surety will be deducted from total net worth unless the financial statement is accompanied by the written appraisal of a recognized independent appraiser of oil and gas properties showing the fair market value of the leasehold interest owned by the operator.
- (c) The Director of Conservation may require proof in the form of an appraisal or other proof of the fair market value of any asset listed in the financial statement, and the Director of Conservation may also require proof that the financial statement truly shows the net fair market value of all assets over and above all debts and encumbrances.
- (d) A current financial statement shall be filed every twelve (12) months on Form 1006A.
- (e) Only one operator's name shall appear on each Form 1006A.
- (f) Along with the Form 1006A, an operator is required to file a Form 1006B (Operator's Agreement to Plug Oil, Gas and Service Wells Within the State of Oklahoma) with the Conservation Division.
- (g) The Commission shall reject the operator's Form 1006A if the operator fails to file the documentation required by this Section with the Conservation Division.

[Source: Amended at 13 Ok Reg 2373, eff 7-1-96]

165:10-1-12. Corporate surety bond

- (a) An operator may file a blanket surety bond in the principal amount of \$25,000.00 in U.S. dollars on Form 1006 as surety. In the alternative, the operator may file a surety bond of a lesser amount but that is sufficient to cover the total estimated cost of properly plugging and abandoning each and every well, the operations for which, the operator is responsible. Said estimated cost shall be documented on Form 1006D (Affidavit of Well Plugging Cost) for each and every well. Said alternative surety bond shall be increased upward, but not to exceed \$25,000.00 in U.S. dollars, as additional wells are added to the operator's responsibilities, unless otherwise ordered by the Commission.
- (b) For purposes of (a) of this Section, an operator may file a surety bond issued by a corporation authorized to issue such bonds in the State of Oklahoma.
- (c) The Conservation Division shall not accept a bond unless the surety agrees to give the Conservation Division six months written notice before cancellation of a bond prior to expiration of the bond and evidence furnished of acceptable alternate surety if required.

- (d) Only one operator's name shall appear on each Form 1006.
- (e) Along with the Form 1006, an operator is required to file a Form 1006B (Operator's Agreement to Plug Oil, Gas and Service Wells Within the State of Oklahoma) with the Conservation Division.
- (f) The Commission shall reject the operator's Form 1006 if the operator fails to file the documentation required by this Section with the Conservation Division.

[Source: Amended at 13 Ok Reg 2373, eff 7-1-96]

165:10-1-13. Irrevocable commercial letter of credit

- (a) At his option, an operator may file an irrevocable commercial letter of credit of a bank in the sum of \$25,000.00 in U.S. dollars on Form 1006C as surety. In the alternative, the operator may file an irrevocable commercial letter of credit of a lesser amount but that is sufficient to cover the total estimated cost of properly plugging and abandoning each and every well, the operations for which, the operator is responsible. Said estimated cost shall be documented on Form 1006D (Affidavit of Well Plugging Cost) for each and every well. Said alternative irrevocable commercial letter of credit shall be increased upward, but not to exceed \$25,000.00 in U.S. dollars, as additional wells are added to the operator's responsibilities, unless otherwise ordered by the Commission.
- (b) The letter of credit shall be for a term of not less than one year.
- (c) The bank issuing the letter of credit shall endorse thereon that the letter of credit shall remain in effect until canceled or revoked by the bank or principal/operator upon six months notice in writing to the Conservation Division and evidence furnished of acceptable alternate surety if required.
- (d) Only one operator's name shall appear on each Form 1006C.
- (e) Along with the Form 1006C, an operator is required to file a Form 1006B (Operator's Agreement to Plug Oil, Gas and Service Wells Within the State of Oklahoma) with the Conservation Division.
- (f) The Commission shall reject the operator's Form 1006C if the operator fails to file the documentation required by this Section with the Conservation Division.

[Source: Amended at 13 Ok Reg 2373, eff 7-1-96]

165:10-1-14. Cashier's check, certificate of deposit, or other negotiable instrument

- (a) An operator may deposit cash, a cashier's check, a certificate of deposit, bank joint custody receipt, or other negotiable instrument in the amount of \$25,000.00 in U.S. dollars as surety. In the alternative, the operator may deposit cash, a cashier's check, a certificate of deposit, bank joint custody receipt, or other negotiable instrument of a lesser amount but that is sufficient to cover the total estimated cost of properly plugging and abandoning each and every well, the operations for which, the operator is responsible. Said estimated cost shall be documented on Form 1006D (Affidavit of Well Plugging Cost) for each and every well. Said alternate amount shall be increased upward, but not to exceed \$25,000.00 in U.S. dollars, as additional wells are added to the operator's responsibilities, unless otherwise ordered by the Commission. However, any instrument must constitute an unconditional promise to pay and be in the form negotiable by the Commission.
- (b) A certificate of deposit shall be for a term of no less than three hundred sixty-five (365) days.
- (c) Financial institutions issuing certificates of deposit pursuant to this Section shall do so in the following manner: "**Oklahoma Corporation Commission or Oklahoma Corporation Commission and (Name of the Operator).**" Financial

institutions issuing the certificates of deposit shall retain the original documents and copies of the certificates of deposit shall be furnished to the Commission.

(d) Along with the negotiable instruments described in (a) of this Section, an operator is required to file a Form 1006B (Operator's Agreement to Plug Oil, Gas and Service Wells Within the State of Oklahoma) with the Conservation Division.

(e) The Commission shall reject the negotiable instruments described in (a) of this Section if the operator fails to file the documentation required by this Section with the Conservation Division.

[Source: Amended at 13 Ok Reg 2373, eff 7-1-96]

165:10-1-15. Transfer of operatorship of wells

(a) Before the operations of a well can be transferred to a new operator, the following must be submitted:

(1) The new operator, or transferee, must comply with 165:10-1-10 before a change in operator is approved.

(2) Change of operator Form 1073 or Form 1073MW must be signed by both the transferor and transferee, with both stipulating that the facts presented are true and correct as to the area covered and the wells being transferred. The new operator shall file Form 1073 or Form 1073MW to notify the Conservation Division of any change of operation of any oil or gas well within thirty (30) days of transfer of the well. Unless otherwise stated, the new operator assumes all responsibility for the wells specified within the boundaries of the outlined area. For transfers involving more than ten (10) wells, a transferor and transferee may file a single Form 1073MW with the Conservation Division indicating the transfer of multiple wells, provided that such multiple well transfer shall be accompanied by a well list containing the following information regarding each well being transferred:

(A) API number of the well;

(B) Well name and number;

(C) Legal location of the well, described by section, township and range.

(3) The well list may be provided in spreadsheet form, if possible, and may be filed in digital format specified by the Conservation Division. In lieu of the spreadsheet, the transferor and transferee, at their option, may file one Form 1073MW indicating the transfer of multiple wells with an OCC Form 1002A Completion Report attached for each well transferred. Upon review by the Conservation Division, it may require additional information from the transferor and/or the transferee to assist in identifying the specific well(s) being transferred. The additional information may include, but not be limited to, the quarter, quarter, quarter section calls, footages from the south and west quarter section lines, and the drilling and completion dates.

(4) The Conservation Division shall notify both the transferor and transferee in writing within thirty (30) days of the Conservation Division's approval or disapproval of the transfer of operatorship for the subject well(s).

(5) Compliance with 165:5-7-11 when and if operatorship was designated by orders of the Commission in pooling, increased density, and location exception applications.

(b) Before the operatorship of a well can be transferred to a new operator when the current or former operator is unavailable for signature, one of the following may be

submitted as proof of operatorship:

(1) A certified copy of a recorded lease or assignment transferring all rights, title, and interest to the wells described on Form 1073 or Form 1073MW to the new operator.

(2) A certified copy of a journal entry of judgment rendered by a district court of Oklahoma having jurisdiction over the wells described on Form 1073 or Form 1073MW vesting legal title to the new operator.

(3) A certified copy of a bankruptcy proceeding by the bankruptcy court having jurisdiction over the wells described on Form 1073 or Form 1073MW.

(c) If an operator is not in compliance with an enforceable order of the Commission, the Conservation Division shall not approve any Form 1073 or Form 1073MW transferring well(s) to said operator until the operator complies with the order. The transferor of the well(s) listed on the Form 1073 or Form 1073MW remains responsible for the well(s) until any transfer is approved by the Commission.

[Source: Amended at 13 Ok Reg 2373, eff 7-1-96; Amended at 17 Ok Reg 802, eff 12-28-99 (emergency); Amended at 17 Ok Reg 1860, eff 7-1-00; Amended at 33 Ok Reg 593, eff 8-25-16; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-1-16. Change of address

Each operator of a well or other facility subject to a permit shall give written notice of his change of address. Such notice shall be sent to the Director of the Conservation Division. It shall be due within 30 days after changing address.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 13 Ok Reg 2373, eff 7-1-96]

PART 5. SPACING

165:10-1-20. Spacing [RESERVED]

165:10-1-21. General well spacing requirements

Any well drilled for oil or gas to an unspaced common source of supply the top of which is 2,500 feet or more in depth shall be located not less than 330 feet from any property line or lease line, and shall be located not less than 600 feet from any other producible or drilling oil or gas well when drilling to the same common source of supply; provided and except that in drilling to an unspaced common source of supply the top of which is less than 2,500 feet in depth, the well shall be located not less than 165 feet from any property line or lease line and not less than 300 feet from any other producible or drilling oil or gas well in the same common source of supply; provided, however, that the depth to the top of the common source of supply in the original or discovery well shall be recognized as the depth to the top of the common source of supply for the purpose of this Section; provided further, when an exception to this Section is granted, the Commission may adjust the allowable or take such other action as it deems necessary for the prevention of waste and protection of correlative rights.

[Source: Amended at 28 Ok Reg 1949, eff 7-11-11]

165:10-1-22. Drilling and spacing units

(a) The commission may establish drilling and spacing units in any common source of supply as provided by law, and the special orders creating drilling and spacing units shall supersede the provisions of 165:10-1-21. It shall be the responsibility of

any operator who proposes to drill a well to ascertain the existence and provisions of special spacing orders.

(b) The drilling of a well or wells into a common source of supply in an area covered by an application pending before the commission seeking the establishment of drilling and spacing units is prohibited except by special order of the commission. However, if an Intent to Drill (Form 1000) has been approved by the commission and operations commenced prior to the filing of a spacing application, the operator shall be permitted to drill and complete the well without a special order of the Commission.

(c) Standard drilling and spacing units shall be either approximately square or rectangular; if rectangular, the drilling and spacing unit shall consist of two approximately square tracts.

(d) Standard square drilling and spacing units shall be those containing approximately 10, 40, 160, or 640 acres; standard rectangular units shall contain approximately 20, 80, or 320 acres.

(e) The drilling and spacing units within any common source of supply of oil or gas shall be of approximately uniform size and shape. In a combination reservoir, the drilling and spacing units within the oil portion of the reservoir shall be of approximately uniform size and shape, and the drilling and spacing units within the gas portion of the reservoir shall be of approximately uniform size and shape; provided, however, the drilling and spacing units within the gas portion of a combination reservoir along the gas-oil contact line or transition zone may be of nonuniform size and shape.

[Source: Amended at 9 Ok Reg 2337, eff 6-25-92]

165:10-1-23. Extension of pool rules

(a) Any application to establish pool rules for a common source of supply shall include the entire common source of supply.

(b) To extend pool rules to a drilling and spacing unit, an application shall be filed and notice provided in the same manner as required to establish pool rules. In the event that more than one set of pool rules are in effect within a field, the Commission shall extend the appropriate pool rules consistent with available geological and engineering reservoir information.

165:10-1-24. Permitted well locations within standard drilling and spacing units

(a) The permitted well location within any standard square drilling and spacing unit shall be the center of the unit. The permitted well locations within standard rectangular drilling and spacing units shall be the centers of alternate square tracts constituting the units (alternate halves of the units); provided, however, a well will be deemed drilled at the permitted location if drilled within the following tolerance areas:

(1) Not less than 165 feet from the boundary of any standard 10-acre drilling and spacing unit or the proper square 10-acre tract within any standard 20-acre drilling and spacing unit.

(2) Not less than 330 feet from the boundary of any standard 40-acre drilling and spacing unit or the proper square 40-acre tract within any standard 80-acre drilling and spacing unit.

(3) Not less than 660-feet from the boundary of any standard 160-acre drilling and spacing unit or the proper square 160-acre tract within any standard 320-acre drilling and spacing unit.

(4) Not less than 1320 feet from the boundary of any standard 640-acre drilling and spacing unit.

(b) The proper square tract of a rectangular drilling and spacing unit established prior to January 1, 1971, for which a slot drilling pattern was prescribed, shall be the northeast quarter and the southwest quarter of the governmental section, quarter section, or quarter quarter section containing two abutting rectangular drilling and spacing units; provided, slot patterns may be established or re-established upon application, notice, and hearing where consistent with available geological and engineering information when necessary to prevent waste or protect correlative rights.

(c) The permitted well location tolerance areas set out in (a) of this Section shall apply to each standard drilling and spacing unit heretofore or hereafter established, notwithstanding the provisions of any special order of the Commission prescribing a different permitted well location tolerance area; provided, however, this Section shall not affect any adjusted allowable or penalty applied to any well by special order of the Commission prior to the effective date of this Section, nor shall any well heretofore drilled within a then permitted tolerance area be deemed outside the permitted tolerance area by reason of this Section.

(d) Wells drilled offpattern without first obtaining an exception after notice and hearing by the Commission are hereby prohibited from producing either oil or gas.

(e) Whenever permission is granted to drill a well at a location other than specified in this Chapter, the allowable or production therefrom, or both, may be adjusted for the protection of the correlative rights of all persons entitled to share in the common source of supply.

(f) Unless the order granting a well location exception provides otherwise, the permission to drill the well at the excepted location shall expire twelve (12) months after the date of the order, unless a well was commenced at the excepted location on or before the expiration date. The order granting the well location exception will thereafter expire when the well is plugged, abandoned, or converted.

(g) An application for an emergency order granting a well location exception may be granted if the applicant has obtained the written consent of the operator of each adjoining or cornering tract of land or drilling and spacing unit, currently producing from the same formation, toward which the well location is proposed to be moved. Provided, however, if the applicant is the operator of the well in an adjoining or cornering tract of land or drilling and spacing unit, currently producing from the same formation, toward which the well location is proposed to be moved, the applicant shall obtain the written consent of each working interest owner in such well.

(1) Letters evidencing the written consent of off-set operators and working interest parties as described in this subsection shall be introduced and received into evidence at the time of the emergency hearing and reviewed. Copies of said letters shall be filed with the Court Clerk of the Commission.

(2) If the written consent described in this subsection cannot be obtained, the applicant may send written notice to said non-consenting party giving that party at least five business days notice of the emergency hearing. If said non-consenting party fails to appear, then the emergency application shall be considered and may be granted without the non-consenting party's written consent. The applicant shall file an affidavit of mailing with the Court Clerk to prove the mailing of the five day notice.

(h) If a spacing application is currently pending and the applicant or any party who owns the right to drill needs to commence a well prior to issuance of the spacing

order, the applicant or party shall obtain an emergency order to commence such well and an emergency location exception order if:

- (1) The proposed well is offpattern according to the existing spacing for any formation involved, or
- (2) The well is offpattern according to 165:10-1-21 governing well patterns for unspaced areas.

(i) Whenever an order permits an offpattern well with a percentage penalty, the order permitting said well may provide, at the request of a party entitled to notice in the cause, for said party to have the right, at his sole cost and risk, to attend and monitor the initial potential testing and all subsequent annual testing of the proposed offpattern well to ensure proper testing. If the order permits witnessing of tests as prescribed above, then the order shall further provide that at least five days prior to the initial potential testing and each subsequent annual testing of the proposed well, the operator of the well shall notify, in writing, all parties entitled to notice in the cause who requested to attend and monitor these tests of the date and time upon which said testing shall commence.

[Source: Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 32 Ok Reg 768, eff 8-27-15]

165:10-1-25. Replacement well

(a) Approval by the Conservation Division of a Notice of Intent to Drill (Form 1000) for a second well to be drilled in a common source of supply in a single drilling and spacing unit as a replacement well may be permitted when:

- (1) The replacement well is to be drilled at a location permitted for the common source of supply by either an order or rule of the Commission; and
- (2) The operator of the replacement well is either the operator or a working interest owner in the original unit well; and
- (3) The Notice of Intent to Drill for the replacement well is accompanied by an affidavit from the operator, stating that on completion of the second well as a commercial producer, the common source of supply in the first well shall be plugged off immediately. The affidavit shall be attached to Notice of Intent to Drill.

(b) A replacement well shall not receive an allowable to produce oil or gas from the same common source of supply as the first well until:

- (1) Said common source of supply in the original well in the drilling and spacing unit is plugged off; or
- (2) The Commission issues an order authorizing the replacement well as an increased density well for said common source of supply; or
- (3) The Commission issues an order reforming the drilling and spacing units in said common source of supply thereby placing the original well and the replacement well in different drilling and spacing units for the common source of supply.

165:10-1-26. Permitted producing well location within an enhanced recovery project

Any well drilled for or used for the production of oil or gas within any enhanced recovery project shall be located not less than 165 feet from the lease or project line, whichever is the outside boundary.

165:10-1-27. Increased density well

Upon application after notice and hearing, the Commission may issue an order permitting one or more additional wells within a drilling and spacing unit, if

each additional well will prevent or assist in preventing the various types of waste prohibited by statute or if each additional well will protect or assist in protecting the correlative rights of interest owners in said common source of supply.

165:10-1-28. Geological correlation chart

The chart initially prepared by Phillips Petroleum and maintained by the Oklahoma City Geologic Society entitled "Geologic Section of Oklahoma and Northern Arkansas", along with ensuing revisions, shall be used as a guideline for stratigraphic nomenclature in all oil and gas conservation applications which are submitted to the Commission.

PART 7. MARKET DEMAND

165:10-1-35. Market demand [RESERVED]

165:10-1-36. Regulation, classification, and naming of pools

(a) When the Commission finds, upon notice and hearing, that oil or gas production from any source of supply exceeds the current market demand there for or finds that the operation of the reservoir should be regulated in order to prevent waste, increase ultimate recovery, or protect correlative rights, the Commission shall thereupon promulgate appropriate pool rules to accomplish such objectives. Where any of the above findings are made by the Commission, the total production from the pool may be restricted and equitable allocation made to the various wells located therein, or the operation of the reservoir may be otherwise regulated and controlled to insure proper and adequate conservation.

(b) Any pool may be classified or reclassified by the Commission, upon hearing, as an oil pool, gas pool, combination pool, or condensate pool. All pool rules so promulgated shall be based on operating and technical data and shall be consistent with the characteristics attributable to each classification.

(c) All oil and gas pools in the State shall be named by the Commission.

165:10-1-37. Determination of market demand

(a) The Commission shall instruct the Director of Conservation to determine the reasonable market demand for oil, gas, and other hydrocarbon products produced in Oklahoma for consumption in and outside the State for the ensuing proration period(s) that can be produced from each common source of supply on a statewide basis without avoidable waste and with equitable participation in production and markets by all operators and other interested parties.

(b) Waste, in addition to its statutory and ordinary meaning, shall include but not be restricted to economic waste, underground waste, surface waste, and waste incident to the production of oil and gas in excess of the transportation or marketing facilities or reasonable market demand.

(c) Reasonable market demand shall include, but not be restricted to, the demand for oil, gas, and other hydrocarbons for reasonable current requirements for current consumption and use within and outside the State, with such adjustment as may be necessary upward or downward to maintain adequate aboveground stocks of crude oil and its products and underground stocks of natural gas, so as to provide a continuous supply of petroleum products to the consumer and essential strategic supplies for national defense.

(d) In determining the reasonable market demand, the Commission may consider:

- (1) Any statement communicated to the Commission by any purchaser or taker of oil and gas, stating the amount of oil or gas produced from common sources of supply that such purchaser or taker contemplates or intends to purchase during the period of time involved; or in lieu thereof, the capacity of the purchaser's transportation or marketing facilities which will be, during the time involved, available for transporting and/or marketing the oil or gas that may be produced from common sources of supply.
 - (2) Official records, reports, and statistical information compiled and kept by the Conservation Division that can be utilized in determining reasonable market demand.
 - (3) Reports, facts, and materials by the Bureau of Mines or any other recognized authority that impartially reflects reasonable market demand.
 - (4) Sworn or unsworn statements of interested parties and any other evidence which the Commission may deem relevant to the determination of reasonable market demand.
- (e) For purposes of periodic market demand hearings, the Manager of Production and Proration for the Conservation Division shall prepare exhibits summarizing the nominations from the various interested parties specified in (d) in this Section. Said exhibits shall be available for public inspection not less than five days before the hearing. At the time of hearing, if no one announces any objection to the introduction of said exhibits, then the exhibits shall be admitted into evidence without need for sponsoring testimony.
- (f) After the Commission has determined the amount of oil or gas to be produced from all oil and/or gas pools during the following proration period, the amount so determined will be allocated ratably and without discrimination among the various pools within the State.

PART 9. PURCHASERS AND TRANSPORTERS

165:10-1-45. Purchasers and transporters [RESERVED]

165:10-1-46. Reports of purchasers and/or transporters

Purchasers and/or transporters of oil, waste oil, or waste oil residue, including truckers, shall file reports with the Commission as follows:

- (1) On or before the last day of the succeeding month, transporters shall file a report showing monthly takings by barrels from leases in all pools in the State, other than wells or leases as specified in (2), (3), (4), and (5) of this Section; a copy of the Gross Production Tax Report made to the Oklahoma Tax Commission will satisfy this requirement.
- (2) A report on computer generated Form 1005 showing monthly takings by barrels from leases or wells with capacities greater than the maximum allowable determined by the appropriate rule governing the classification of the oil pool or order of the Commission. The report shall be filed on or before the last day of the succeeding month.
- (3) Upon request, storage and nomination information shall be filed on Form 1034.
- (4) All truck transporters hauling crude oil shall file a report showing the amount of all crude oil taken by them during the preceding proration period, and showing the source and the disposition of the crude oil, waste oil, or waste oil residue. The report shall be filed on or before the last day

of the succeeding month.

(5) All truck transporters hauling crude shall provide their drivers with copies of standard run tickets which must be in the possession of the drivers at all times and which run tickets shall show the source and the disposition of crude oil, including but not limited to waste oil or waste oil residue.

165:10-1-47. Gas volume reports to Conservation Division

(a) On or before the last day of the succeeding month, the person responsible for operating the required meter under 165:10-17-5 for each well classified as an unallocated gas well for allowable purposes shall report to the Conservation Division on Form 1004 the amount of gas in MCF which passed through the meter on a monthly basis.

(b) If a well classified as a gas well for allowable purposes is subject to special pool rules other than the Guymon-Hugoton or South Guymon Fields, the Conservation Division shall mail Form 1005 (Monthly Allocated Schedule) to the operator of record for each such well(s) on or before the 15th day of each month. The operator of record shall, in turn, complete said form by listing the gas volume sold on a monthly basis in MCF by well and return a copy to the Conservation Division on or before the last day of the month succeeding the sales.

(c) If a well classified as a gas well for allowable purposes is subject to the special pool rules for the Guymon-Hugoton or South Guymon Fields, the Conservation Division shall mail Form 1005 (Monthly Allocated Schedule) to the operator of record for each such well(s) on or before the tenth day of each month. The operator of record shall, in turn, complete said form by listing the gas volume sold, including gas bought by the landowner, on a monthly basis in MCF by well and return a copy to the Conservation Division on or before the 15th day of the month succeeding the sales.

(d) If there is a split connection at the well site, then the operator of record measuring gas volumes shall be responsible for reporting the total volume sold for each well.

(e) If a well classified as a gas well for allowable purposes is subject to special pool rules (including the Guymon-Hugoton Field), the Conservation Division shall mail Form 1040 to each operator on or before the tenth day of the second succeeding month following the custody transfer indicating the reported volume of gas taken from each well.

(f) If a well classified as a gas well for allowable purposes is subject to multiple gas purchase contracts or interest owners taking their gas in kind, the producing owner shall report and account to the well operator all volumes sold and the identity of all purchasers on or before the last day of the following month after sale of such gas. The operator(s) of the required meter(s) under 165:10-17-5 shall report and account to the well operator all volumes of gas measured by such meter(s) on or before the last day of the following month after measurement. Failure to comply with this subsection will result in such gas production being ordered shut-in.

(g) Failure of an operator to timely file sales volumes on Form 1005 shall result in a zero allowable being assigned to the operator's wells for the month in which the sales volumes would have been used in calculating the field allowable. Allocation factors for a pool shall not be recalculated as a result of the filing of a late Form 1005.

[Source: Amended at 12 Ok Reg 2017, eff 7-1-95]

165:10-1-48. Common purchaser and carrier rules

- (a) 52 O.S., 1961, Sections 54, 55, 56, and 240 are hereby adopted as common purchaser and common carrier rules as fully as if set out verbatim herein.
- (b) No person shall purchase, take, or transport any oil or gas in excess of the allowable fixed by the Commission, or, when notified by the Conservation Division, such oil or gas being produced in violation of any rule, regulation, or order of the Commission; provided, this Section shall not require splitting a tank.

165:10-1-49. Filing of nominations

All operators of natural gas wells in special allocated gas pools where well allowable calculations according to special allocated field rules are in effect shall file their pool nominations on Form 1034-G not later than one week prior to the date of the market demand hearing.

(1) Nominations shall be restricted to the volume not to exceed the wellhead absolute open flow (WHAOF) times calendar days for each well in a pool. For wells in pools where the WHAOF is not utilized, the equivalent well deliverability or calculated rate of flow applicable to that particular pool may be used in lieu of the WHAOF. For wells exempt from testing, nominations shall be restricted to a volume not to exceed the well's minimum, double minimum, or special allowable time calendar days.

(2) Operators shall attach to Form 1034-G a listing of each of their special allocated wells by pool, OTC Lease Number, API Number, well name and number, and location as recorded on Form 1040, plus the applicable WHAOF, deliverability, or rate of flow value as determined by the appropriate well test for that time period. Wells exempt from testing shall be indicated as test-exempt on the list.

(3) Failure of an operator to properly file nominations on Form 1034-G shall result in a zero allowable being assigned to the operator's wells for the month in which the nominations would have been used in calculating the field allowable. Allocation factors for a pool shall not be recalculated as a result of the filing of a late Form 1034-G.

[Source: Amended at 12 Ok Reg 2017, eff 7-1-95; Amended at 26 Ok Reg 2498, eff 7-11-09]

SUBCHAPTER 3. DRILLING, DEVELOPING, AND PRODUCING

PART 1. DRILLING

165:10-3-1. Required approval of notice of intent to drill, deepen, re-enter, or recomplete; Permit to Drill

(a) Permit to Drill.

(1) Except as provided in (1) of this Section, on emergency authorization to commence, the operator shall obtain for the well a Permit to Drill approved by the Conservation Division before:

(A) Spudding a well for the exploration for and production of oil or gas.

(B) Spudding a well for use as an injection, disposal, or service well.

(C) Re-entry into a plugged well.

(D) Recompletion of a well.

(E) Deepening an existing well.

(2) A Permit to Drill shall be valid only for each common source of supply listed on the permit.

(3) Any operator who drills, deepens, reenters or recompletes a well without a permit to drill may be fined up to \$1,000.00.

(4) An operator requesting a Permit to Drill for a well shall submit a plat utilizing Commission records showing the location and total depth of each abandoned, plugged, producing or drilling well, and dryhole within one quarter (1/4) mile of the completion interval of the proposed well.

(b) Amended or additional Form 1000 requirements.

(1) **When required.** If the Conservation Division has issued a Permit to Drill for a well, the operator of the well shall submit an amended Form 1000 for the well and obtain an amended Permit to Drill before:

(A) Completing the well in a common source of supply which is not listed on the current unexpired Permit to Drill for the well.

(B) Recompleting the well in a common source of supply which is not listed on the current unexpired Permit to Drill for the well.

(C) Installing less surface casing than the amount approved on the unexpired Permit to Drill for the well.

(D) Deviating from an alternative casing and cementing procedure which the Conservation Division approved on the unexpired Permit to Drill for the well.

(E) Completing a well in a common source of supply at a subsurface location which does not correspond with the surface location on the most recently issued Permit to Drill for the well.

(2) **Effect of amended or additional Permit to Drill on prior Permit to Drill.** Each approved, amended, or additional Permit to Drill for a well cancels any previously issued Permit to Drill for the well.

(c) **Expired or revoked Permit to Drill.** If a Permit to Drill for a well expires or is revoked, the operator shall be subject to the requirements of (a) of this Section.

(d) **Casing and cementing requirements.** Each Permit to Drill shall list the minimum amount of surface casing to be used or an approved alternative casing and cementing program under 165:10-3-4.

(e) **Spud report and well spacing requirements.** In addition to complying with the requirement of obtaining a Permit to Drill, the operator shall comply with the following:

(1) The spud report requirement of 165:10-3-2.

(2) Any well spacing requirements applicable by order or rule of the Commission. Well spacing requirements do not apply to injection or disposal wells.

(f) Disposal of drilling fluids.

(1) The operator shall indicate on Form 1000 the proposed method(s) for disposal of drilling fluids. These methods shall include, but not be limited to:

(A) Evaporation/dewatering and leveling of the reserve pit.

(B) Soil farming.

(C) Recycling.

(D) Commercial off-site earthen pit disposal.

(E) Annular injection.

(F) Hauling to a facility or location other than a commercial earthen pit.

(2) If the method in (1)(F) in this subsection is used, the operator shall provide the location to which the drilling fluids are to be hauled.

(3) Issuance of the Permit to Drill shall not be construed as constituting approval of the disposal method(s) indicated. An operator who desires to dispose of drilling fluids through either evaporation/dewatering and leveling of the reserve pit, soil farming, commercial earthen pit disposal, or annular injection must comply with 165:10-7-16, 165:10-7-19 or 165:10-9-2, 165:10-9-1, or 165:10-5-13 respectively.

(4) If the proposed method for drilling fluid disposal is changed, the operator shall notify the appropriate Conservation Division District Office, either by telephone, facsimile or electronic mail, within twenty-four (24) hours after the change. An amended Form 1000 for the well shall not be required for a change in disposal method.

(g) Notice to surface owners.

(1) The operator shall include on each Form 1000 submitted to the Conservation Division, the name and address of each surface owner of record for the wellsite.

(2) For each Permit to Drill other than a Permit to Drill for a recompletion, the Conservation Division shall mail by regular U.S. mail a copy of the Permit to Drill to each surface owner listed on the Form 1000.

(h) Disapproval for noncompliance with Commission order. If an operator is not in compliance with an enforceable order of the Commission, the Conservation Division shall not issue any Permit to Drill for the operator, until the operator complies with the order.

(i) Erroneous approval. Erroneous issuance of a Permit to Drill shall not excuse noncompliance with any order or rule of the Commission.

(j) Expiration.

(1) **Eighteen-month period.** Except as provided in (3) of this subsection for expiration after submission of a completion report, a permit to drill shall expire eighteen months from the date of issuance, unless drilling operations are commenced and thereafter continued with due diligence to completion.

(2) **Six-month extension.** A six month extension may be granted without fee providing the Conservation Division staff determines that no material change of condition has occurred, if written request for such extension is received from the operator prior to the expiration of the original permit. Only one extension may be granted.

(3) **If Form 1002A is filed.** If the operator of the well submits to the Conservation Division a Completion Report (Form 1002A) for the well, the Permit to Drill for the well shall expire on the date the Completion Report is approved by the Conservation Division.

(k) Posting of Permit to Drill at the wellsite. During any activity subject to this Section, the operator shall maintain at the wellsite an original or legible copy of the Permit to Drill for inspection by Commission personnel.

(l) Emergency authorization without approval of a Permit to Drill. In an emergency, the Manager of the Technical Services Department of the Conservation Division may temporarily authorize commencement of activities without a Permit to Drill for a period up to five business days.

(m) Limits of authority. A Permit to Drill does not grant the operator authority to produce, inject or dispose without the required permits or allowable assignment.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 16 Ok Reg 2206, eff 7-1-99; Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 593, eff 8-25-16; Amended at 35 Ok Reg 973, eff 9-14-18; Amended at 36 Ok Reg 534, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-3-2. Notification of spudding of new well

(a) Except as provided in (c) of this Section, the operator of a new well shall file with the Conservation Division a Notice of Spudding of New Well on Form 1001A within 14 days after spudding of the well. The operator shall also notify the appropriate Conservation Division District Office by electronic mail or by telephone at least 48 hours prior to spudding the well.

(b) For the purposes of (a) of this Section, spudding of a new well refers to:

(1) The first boring of the portion of the hole intended to penetrate the base of treatable water or a common source of supply, whichever is shallower, in the drilling of a well for the production of oil and gas or for use as an injection, disposal or service well.

(2) Reentry into a previously plugged well for purposes of producing oil and gas or for use as an injection, disposal or service well.

(c) Filing of a Notice of Spudding of a New Well on Form 1001A shall not apply to:

(1) Any workover operation to deepen, plug-back, or recomplete.

(2) An unplugged hole spudded before January 9, 1986.

(3) Recompletion attempts in an unplugged hole for which a Notice of Spudding of New Well has been filed.

[Source: Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 26 Ok Reg 2498, eff 7-11-09; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-3-3. Well casing strings

(a) Owners, operators, and drilling contractors shall comply with 165:10-3-4 and 165:10-5-2.

(b) In the event a rupture, break, or opening occurs in any casing string, the owner or operator shall cease well drilling, completion, or production operations and take immediate action to repair it and shall report the occurrence either by telephone or by electronic mail to the appropriate Conservation Division District Office within twenty-four (24) hours of discovery. The owner or operator shall also notify the appropriate Conservation Division District Office of the occurrence by electronic mail or by telephone within forty-eight (48) hours and supply the following information:

(1) Name of party reporting, firm name, mailing address, telephone number and electronic mail address.

(2) Well name and legal description.

(3) Name of operator.

(4) Date of discovery of rupture, break or opening in the casing string.

(5) Description of circumstances associated with the discovery of a rupture, break or opening in the casing string.

(c) Any owner or operator who fails to timely report the discovery of a rupture, break, or opening in any casing string may be fined up to \$5,000.00, and the well shall be shut down until it is repaired or plugged.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 30 Ok Reg 1041, eff 7-1-13; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-3-4. Casing, cementing, wellhead equipment, and cementing reports

(a) **Scope.**

(1) This Section governs the following:

(A) Surface casing and cementing requirements.

- (B) Alternate casing and cementing procedure used instead of adequate surface casing and cement.
- (C) Minimum cementing and testing requirements for intermediate and production casing.
- (D) Minimum valve and blowout preventer requirements.
- (E) Cementing reports.

(2) This Section shall apply to the following:

- (A) Wells drilled or reentered for the production of oil, gas or brine.
- (B) Wells drilled or reentered for disposal of oilfield wastes.
- (C) Wells drilled for injection.
- (D) Wells drilled in subsurface gas storage units created by order of the Commission.
- (E) Other oilfield related service wells.

(b) Effect on area rules.

(1) If any area rules promulgated by order of the Commission require less casing and cement than required by this Section, then this Section shall supersede the area rules.

(2) If an applicable area rule promulgated by order of the Commission has more stringent casing and cementing requirements than what are required by this Section, the Conservation Division shall enforce the area rules.

(c) Surface casing and cementing requirements for wells listed in (a)(2) of this Section:

(1) **Minimum surface casing requirements.** Unless an alternate casing program is authorized by the Conservation Division or by an order of the Commission, suitable and sufficient surface casing shall be run and cemented from bottom to top with a minimum setting depth which is the greater of:

- (A) Ninety feet below the surface, or
- (B) Fifty feet below the base of treatable water.

(2) **Penalty for noncompliance.** An operator setting less than the required amount of surface casing or failing to remediate uncirculated cement before resuming operations may be fined up to \$5,000.00.

(3) **Exceptions to (c)(1).** Operators having wells producing hydrocarbons which were in compliance with the surface casing requirements at the time of completion shall not be required to comply with (1) of this subsection.

(4) **Well to be used for annular injection under 165:10-5-13.** If the operator intends to dispose of drilling or stimulation fluids by annular injection, then the operator shall comply with 165:10-5-13 which requires a surface casing string to be set not less than 200 feet below the base of treatable water, unless a Commission order provides otherwise.

(5) **Depth limitation on setting surface casing.** The well operator shall run and cement the surface casing string required by this subsection before drilling the well more than 250 feet below the base of treatable water, unless otherwise approved on the Permit to Drill.

(6) **Penalties.** Operators failing to obtain permission to drill a well more than 250 feet below the treatable water, or to obtain permission for an alternate casing and cementing procedure may be fined up to \$2,500.00.

(7) Cementing procedures.

- (A) **Approved methods.** Except as provided in (B) of this paragraph for bradenhead cementing, cement shall be run by either the tubing and pump method, the pump and plug method, or the

displacement method.

(B) Bradenhead cementing prohibited. Bradenhead cementing is prohibited without written permission from the appropriate Conservation Division District Office.

(C) Restrictions on stage cementing.

(i) Running cement through small tubulars is permitted above 200 feet in depth without special permission.

(ii) Below 200 feet in depth, the operator shall obtain permission from the appropriate Conservation Division District Office before using small tubulars to run cement.

(D) Steel casing required. For purposes of the surface casing requirements of this Section, surface casing shall be oil field grade steel casing.

(E) Minimum cement setup time. The cement behind the surface casing shall set at least eight hours before further drilling. The cement behind the surface casing in wells drilled in an underground storage facility pursuant to OAC 165:10-3-5 shall set at least twenty-four hours before further drilling.

(F) Down-hole testing of surface casing and cement. Before drilling the shoe of the surface casing, the operator shall test the surface casing using the procedure prescribed by (g) of this Section.

(G) Failure to circulate cement or fall back of cement behind surface casing.

(i) If no conductor string is set and the cement did not circulate to the surface or falls back more than five feet, the operator shall determine the top of the cement using a method approved by the District Manager or Field Inspector Supervisor.

(ii) If the top of the cement is found less than 200 feet from the surface, the operator may circulate cement to surface using small tubulars.

(iii) If the top of the cement is greater than 200 feet from the surface, the operator shall perform a corrective cementing operation by circulating cement to the surface from the determined top of the cement. The District Manager or Field Inspector Supervisor may grant permission to circulate cement through small tubulars.

(H) Insufficient surface casing or mechanical failure. Within 24 hours after discovery of a problem with the surface casing or cement, the operator shall notify the appropriate Conservation Division District Office by telephone, facsimile or electronic mail of:

(i) Any mechanical failure of the surface casing or cement.

(ii) Discovery of a treatable water formation below the shoe of the surface casing.

(I) Penalty. An operator, failing to report a rupture, break, or opening in the surface casing, may be fined up to \$1,000.00 and the well shut down.

(J) Notice. The District Manager or Field Inspector shall be given at least 24 hours notice by telephone, facsimile or electronic mail prior to any cementing operation in order that they may have the

opportunity to witness.

(d) Alternate casing and cementing procedures.

(1) **Requirement of approval on the Permit to Drill.** Use of an alternative casing and cementing procedure instead of surface casing and cement required by (c) of this Section is prohibited without authorization on the Permit to Drill for the well.

(2) **Disapproval.** The Manager of Technical Department may not issue a permit for an alternate casing string and cementing procedure if one or more of the following conditions exist:

(A) The well will penetrate a known lost circulation zone.

(B) The treatable water bearing formation(s) will be endangered.

(C) The projected depth of the well is less than 100 feet from the top of any authorized secondary project or gas storage facility.

(3) **Applicability of other casing and cementing standards.** Alternate casing and cementing procedures under this subsection are subject to the provisions of (c)(7) of this Section.

(4) Alternate casing and cementing procedure.

(A) An operator having permission to run an alternate casing string may, for protection of the treatable water, drill the well to casing point and circulate cement to the surface, or circulate cement from a depth of 100 feet below the base of treatable water to the surface after following the procedures set out in (f) of this Section.

(B) Oil based drilling mud shall be prohibited.

(C) If a well is completed using an alternate casing and cementing procedure, a bond log covering the interval from 100 feet below the base of the treatable water to the surface shall be required. The District Manager may waive this requirement. A completion attempt, in cases where the protection of treatable water is questionable, is strictly prohibited.

(D) Unless extended by the District Manager, the operator shall have 72 hours after drilling and testing is completed to run production casing or plug the well. A minimum of 24 hours prior notice by telephone, facsimile or electronic mail must be given to the appropriate Conservation Division District Office prior to cementing operations so that a Field Inspector may have the opportunity to witness the cementing or plugging procedures. If the well is plugged and abandoned, procedures set out in (e) of this Section shall be followed.

(E) In the event that casing is run and cement does not circulate to the surface, or falls back, the operator shall determine the top of the cement using a method approved by the District Manager.

(5) Remedial actions.

(A) If the top of the cement is less than 200 feet from the surface, the operator may circulate cement from that point to the surface using small tubulars or by perforating the casing at that point and circulating cement to the surface.

(B) If the top of the cement is greater in depth than 200 feet, the operator shall perforate the casing at the top of the cement and circulate cement to the surface, or with the written permission of the District Manager or Field Inspector Supervisor, use small tubulars.

(C) In the event that a conductor string had been set and the top of the cement is at least ten feet above the base of the conductor casing no remedial action is needed.

(D) Unless waived by the appropriate Conservation Division District Office, all corrective cementing operations shall be approved and witnessed by the Field Inspector.

(E) In wells where corrective actions were needed for casing or cementing problems, a completion attempt shall not be made without approval by the District Manager.

(e) **Permanent well marker.** In the event that the well is a dry hole and no casing has been run, then during the plugging of the well the operator shall run and cement from bottom to top at least one joint of casing at the surface not less than 25 feet in length for use as a permanent well marker. The casing used as a well marker shall be oil field grade steel casing with an outside diameter of at least seven inches. The top of the marker shall be three feet below the surface and be capped with a steel plate inscribed or embedded with the well number and date of plugging on the steel plate. An operator failing to run and cement the well marker as required may be fined up to \$1,000.00 and shall, under the supervision of the Commission, replug the well.

(f) **Minimum cement for additional casing strings.** If additional casing other than surface casing is run, except for temporary purposes, it shall be run, set, and cemented with a calculated volume of cement sufficient to fill the annular space behind the casing string from the base of the casing string to a minimum height which is the greater of five percent of the depth to which the casing string is set, or a height of 200 feet. Any well approved for horizontal completion shall be cemented with a calculated volume of cement sufficient to fill the annular space behind the production casing string to isolate the producing formation. The Conservation Division may grant a variance to this requirement for a horizontal well upon request.

(g) **Pressure testing of casing strings.**

(1) Before drilling the cement plug in a casing string, the operator shall pressure test the installed casing for 30 minutes at a minimum pressure which is the lesser of the surface gauge pressure equal in pounds per square inch to 0.2 of the length of the casing in feet or 1500 psig.

(2) During the 30 minute test, if the surface pressure drops ten percent or more, the operator shall:

(A) Repair and retest the casing until the requirements of this subsection are met; or

(B) Plug the well according to the rules of this Chapter.

(h) **Minimum wellhead equipment for drilling wells.** All reasonable and prudent precautions shall be taken for keeping the well under control during drilling operations, including but not limited to the use of blowout preventers or other similar equipment with appropriate pressure fittings attached to properly cemented casing strings and the maintenance of mud-laden fluid of sufficient weight to provide proper well control. A blowout preventer or other equipment necessary to maintain control of the well shall be installed prior to drilling out of the surface casing. Blowout preventers and associated equipment shall be maintained in good working order. Blowout preventers shall be pressure tested at regular intervals, not to exceed twenty-one days, to ensure proper operation. A function test shall be conducted on a routine basis during drilling operations to ensure that annular preventers and rams will operate properly. Alternate testing procedures may be

approved by the District Manager. The rig personnel shall be trained in the use of blowout prevention equipment and well control procedures on the rig.

(i) Cementing reports.

(1) The operator of the well shall submit, attached to Form 1002A Completion Report, a Form 1002C Cementing Report describing all cementing operations on surface, intermediate, and production casing strings, including multistage cementing jobs.

(2) If additional cementing operations occur after submission of the Cementing Report, the operator shall submit an amended Form 1002C for the well.

(j) Surface casing requirements for re-entry wells. For a re-entry as defined by 165:10-1-2, casing and cementing requirements at the time of re-entry shall apply.

(k) Surface casing requirement for recompletions. For a recompletion as defined by 165:10-1-2, casing and cementing requirements applicable to wells commenced on the latter of the spud date or re-entry date for the well shall apply.

(l) Casing and cementing requirements for wells converted for injection or disposal. If a well is converted for use as an injection or disposal well, it shall be subject to the casing and cementing requirements of this Section effective at the time of conversion of the well.

(m) Casing and cementing requirements for wells penetrating unitized common sources of supply. Each newly drilled or re-entered well which penetrates a common source of supply in which enhanced recovery operations are being conducted shall be properly cased and cemented from not less than 100 feet below to not less than 100 feet above each unitized common source of supply to prevent migration of formation fluids and contain formation pressure. In the event the well is to be plugged without being cased, the well shall be properly cemented over the aforementioned interval(s) during plugging procedures.

(n) Insufficient surface casing and cement. When it has been determined that a treatable water-bearing formation has not been properly cased and cemented, the operator shall take such measures designated by the Director of Conservation or ordered by the Commission to protect any treatable water-bearing formation.

[Source: Amended at 9 Ok Reg 2337, eff 6-25-92; Amended at 26 Ok Reg 2498, eff 7-11-09; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 29 Ok Reg 950, eff 7-1-12; Amended at 30 Ok Reg 1041, eff 7-1-13; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 36 Ok Reg 534, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-3-5. Underground storage

(a) Scope. This Section shall apply to all operations pertaining to the drilling, completion, recompletion, or remedial operations on wells located within the boundaries of an underground storage facility as defined in (b)(4) of this Section or wells whose completion intervals will, at any point, be located within 600 feet of the underground storage facility.

(b) Definitions.

(1) "Underground storage" shall mean storage of natural gas in a subsurface stratum or formation of the earth.

(2) "Natural gas" shall mean gas either while in its natural state or after the same has been processed by removal therefrom of component parts not essential to its use for lights and fuel.

(3) "Storage operator" shall mean any person, firm, or corporation which operates an underground storage facility.

(4) "Underground storage facility" shall mean any subsurface stratum or formation of the earth used for underground storage. Provided that, in the

case of a natural gas bearing subsurface stratum or formation, the commercially producible native gas shall have been substantially depleted and the gas therein shall not be used primarily for the secondary recovery of oil in paying quantities from the subsurface stratum or formation.

(5) "Well" means a vertical, directional or horizontal well drilled or bored or to be drilled or bored within the certified boundary of an underground storage facility, or whose completion interval will, at any point, be located within 600 feet of the underground storage facility.

(6) "Well operator" shall be the person, firm, or corporation that is the operator of a well.

(7) "Major remedial operations" shall mean any workover operations requiring a workover rig, wire line or pump truck services.

(8) "Good quality cement" means cement that would obtain a compressive strength to prevent oil, gas, or water migration within a twenty four (24) hour period.

(9) "Certified boundary" means the perimeter of the legal description of an underground storage facility established by certificate and order of the Commission.

(10) "Completion interval" means for open hole completion or recompletions, the interval from the point of entry to the terminus and, for cased and cemented completions or recompletions, the interval from the first perforations to the last perforations.

(c) **Notice to storage operator.** Upon receipt of Form 1000 from a well operator, the Conservation Division shall determine whether the proposed well falls within one (1) mile of the certified boundary of an underground storage facility. Following a positive determination, the Conservation Division shall instruct the well operator to provide notice of the application for a Permit to Drill the well to the storage operator and the Director of the Public Utility Division as part of the application for Permit to Drill process. The well operator is required to supply written confirmation to the Conservation Division that notice of the application for a Permit to Drill the well has been provided to the storage operator and the Director of the Public Utility Division.

(d) **Operational procedures.**

(1) All storage operators and well operators are required to maintain on file with the Commission's Surety Department current mailing addresses, email addresses, and 24 hour telephone numbers. In addition, storage operators are required to maintain on file with the Commission's Surety Department the Commission order number pertaining to the underground storage facility.

(2) Before spudding a well within the certified boundary of a gas underground storage facility, the well operator shall mail a copy of the Permit to Drill to the storage operator at the address listed at the Commission and also supply a copy of the Permit to Drill to the Director of the Public Utility Division. The storage operator will inform the well operator of the estimated depth, thickness, and pressure of the underground storage facility at that location. Failure of the storage operator to provide the data to the well operator shall not be a cause to delay drilling, but the well operator is required to notify the storage operator, by phone a minimum of 24 hours prior to commencing drilling operations at a 24 hour telephone number furnished to the Commission by the storage operator.

- (3) A well operator shall comply with the provisions of 165:10-3-4(c). Alternate casing programs shall not be permitted.
- (4) Drilling rigs shall be equipped with a blowout preventer. The preventer shall be installed and tested at least 500 psig above the anticipated underground storage facility pressure before drilling below the base of the surface casing.
- (5) The storage operator shall receive drilling reports daily from the well operator and the storage operator shall be provided 48 hours notice by the well operator at a 24 hour telephone number furnished to the Commission by the storage operator to afford the storage operator an opportunity to witness any tests or logging operations from the surface to 600 feet below the base of the underground storage facility. Any abnormal conditions occurring during the drilling operation, such as abnormal pressures and/or lost circulation, shall be reported immediately by the well operator to the storage operator at the 24 hour telephone number supplied by the storage operator to the Commission.
- (6) The well operator shall drill the well in such a manner as to prevent invasion of drilling fluids into, or the escape of natural gas from, the underground storage facility. The well operator shall be required to mud up at least 100 feet above the anticipated depth of the top of the underground storage facility.
- (7) If run, a copy of either an open hole porosity or resistivity well log run from the base of surface casing to total depth shall be promptly forwarded to the storage operator. The logs submitted to the storage operator may be terminated 600 feet below the base of the underground storage facility. At least 48 hours prior to commencing logging operations the well operator shall notify the storage operator at the 24 hour telephone number furnished by the storage operator to the Commission, and the storage operator shall have the option of witnessing the open hole logging operation.
- (8) In the event that the well is noncommercial and is to be plugged and abandoned, the well operator shall place a cement plug using a good quality cement, covering from not less than 300 feet below the base to not less than 300 feet above the top of the underground storage facility. At least 48 hours prior to commencing the plugging operation, the well operator shall notify the storage operator at the 24 hour telephone number furnished by the storage operator to the Commission, and the storage operator shall have the option of witnessing the plugging operation. The field inspector may invoke the provisions of 165:10-11-6(m), (n) and (o).
- (9) In the event that casing is run, the well operator will cause the underground storage facility interval to be covered with steel casing and be cemented from not less than 100 feet below the base to not less than 100 feet above the top of the underground storage facility using a good quality cement. At least 48 hours prior to commencing the casing operation, the well operator shall notify the appropriate Conservation Division District Office and the storage operator at the 24 hour telephone number furnished by the storage operator to the Commission. The Commission field inspector for the area and storage operator shall have the option of witnessing the operation.
- (10) For the purpose of ensuring the integrity of the underground storage facility, the well operator shall be required to run a cement bond log through the underground storage facility formation before any completion

attempts are made. At least 48 hours prior to commencing the logging operation, the well operator shall notify the storage operator at the 24 hour telephone number furnished by the storage operator to the Commission, and the storage operator shall have the option of witnessing the logging operation and be furnished with a copy of the bond log from the top of cement to total depth or, at the option of the well operator, to 600 feet below the base of the underground storage facility. If the integrity of either the bond log or cement across the underground storage facility interval is questioned by the storage operator, the storage operator may, at its sole risk and expense, run additional logs. No completion, recompletion or major remedial operations shall be permitted until the fact has been established, by the well operator, storage operator and the Managers of the Technical Services and Field Operations Departments, that the integrity of the cement is sound and that the underground storage facility is isolated from the remainder of the bore hole. The remedial work, if needed to protect the storage reservoir, shall be at the risk and expense of the well operator.

(11) The storage operator, the Managers of the Technical Services and Field Operations Departments and the Director of the Public Utility Division shall be notified at least 48 hours prior to commencement of completion, recompletion, or major remedial operations so as to afford opportunities to witness such operations. The well site shall be made accessible at all times to the storage operator and all information pertaining to the completion shall be forwarded daily to the storage operator. If the completion, recompletion, or major remedial operations attempt is to be made in any formation within 600 feet of the underground storage facility, the proposed plan of completion shall be forwarded to the storage operator ten business days prior to commencement of operations. The storage operator shall have five business days after receipt of the proposed plan to forward any objection to the well operator. Completion operations, recompletion, or major remedial operations shall not be permitted until the matter is resolved.

(12) At any time that the storage operator shall reasonably believe that damage may be occurring to the underground storage facility or that natural gas may be escaping into any other formations or otherwise believe that a well may compromise the integrity of the underground storage facility, the storage operator may then request that the operator of the well conduct specific tests solely at the storage operator's risk and expense. If an agreement cannot be obtained between the parties concerned, the storage operator or well operator may bring the matter before the Corporation Commission for determination by application, notice, and hearing following the procedure set out in OAC 165:5-7.

(13) If tests establish that damage is occurring and/or that natural gas is escaping by the continued operation of the well, the well shall be shut down immediately and the remedial operation to rectify the condition shall be commenced within ten days, at the sole risk and expense of the well operator.

(14) All information furnished to the storage operator shall be kept confidential until released in writing by the well operator.

[Source: Amended at 36 Ok Reg 534, eff 8-1-19]

PART 3. COMPLETIONS

165:10-3-10. Well completion operations

(a) **Hydraulic fracturing and acidizing.** In the completion of an oil, gas, injection, disposal, or service well, where acidizing or fracture processes are used, no oil, gas, or deleterious substances shall be permitted to pollute any surface or subsurface fresh water. Unless an operator confers with and obtains the approval of the Conservation Division, the use of diesel fuel as the base fluid for hydraulic fracturing operations is prohibited. Approval of the Conservation Division shall be reflected in writing. Within 5 days of obtaining written authorization, the operator is required to send the authorization by facsimile, electronic mail or regular mail to the following:

- (1) The owner of the surface location where the proposed well is to be drilled; and
- (2) Each operator of a producing spacing unit or well within 1 mile of the perforated interval of the proposed well.

(b) **Notice of hydraulic fracturing operations.**

- (1) Notice shall be given by facsimile, electronic mail or regular mail at least 5 business days prior to the commencement of hydraulic fracturing operations on a horizontal well to operators of producing wells within 1 mile of the completion interval of the subject well. The notice to be provided to such operators shall contain the information in Form 6000NOO. If the hydraulic fracturing operations schedule changes after notice has been provided, resulting in a delay of operations of more than 5 days from the initial notice, new notice is required to be given.
- (2) Notice shall be sent to the Conservation Division electronically using Form 6000NHF as provided on the Commission's website at least 48 hours prior to commencement of hydraulic fracturing operations on a well. The time period for sending such notice to the Conservation Division may be waived by the Manager of the Induced Seismicity Department.
- (3) Separate stages of a planned multi-stage hydraulic fracturing operation shall not constitute separate hydraulic fracturing operations for notification purposes.
- (4) If an operator has evidence that hydraulic fracturing operations have impacted its well(s), the operator may report the occurrence by electronic mail to the appropriate Conservation Division District Office within 24 hours of discovery. The operator shall use Form 4000WIP to report the occurrence.

(c) **Chemical disclosure.** Within 60 days after the conclusion of hydraulic fracturing operations on an oil, gas, injection, disposal, or service well that is hydraulically fractured, the operator must submit information on the chemicals used in the hydraulic fracturing operation to the FracFocus Chemical Disclosure Registry.

- (1) The submission required by this subsection must include the following information:
 - (A) the name of the operator;
 - (B) the API number of the well;
 - (C) the longitude and latitude of the surface location of the well;
 - (D) the dates on which the hydraulic fracturing operation began and ended;
 - (E) the total volume of base fluid used in the hydraulic fracturing operation;

(F) the type of base fluid used;
(G) the trade name, supplier, and general purpose of each chemical additive or other substance intentionally added to the base fluid; and
(H) for each ingredient in any chemical additive or other substance intentionally added to the base fluid, the identity, Chemical Abstract Service (CAS) number, and maximum concentration. The maximum concentration for any ingredient must be presented as the percent by mass in the hydraulic fracturing fluid as a whole, and is not required to be presented as the percent by mass in any particular additive.

(2) For purposes of this subsection, the phrase "chemical additive or other substance intentionally added to the base fluid" refers to a substance knowingly and purposefully added to the base fluid and does not include trace amounts of impurities, incidental products of chemical reactions or processes, or constituents of natural materials.

(3) The operator is not responsible for inaccurate information provided to the operator by a vendor or service provider, but the operator is responsible for ensuring such information is corrected when any inaccuracy is discovered.

(4) If certain chemical information, such as the chemical identity, CAS number, and/or maximum concentration of an ingredient, is claimed in good faith to be entitled to protection as a trade secret under the Uniform Trade Secrets Act, 78 O.S. §§85-94, the submission to the FracFocus Chemical Disclosure Registry may note the proprietary nature of that chemical information instead of disclosing the protected information to the registry. The submission must include the name of the supplier, service company, operator, or other person asserting the claim that the chemical information is entitled to protection as a trade secret and provide the chemical family name or similar descriptor for the chemical if the chemical identity and CAS number are not disclosed. The Commission or the Director of the Oil and Gas Conservation Division may require the claimant to file with the Commission a written explanation in support of the claim.

(5) Nothing in this subsection restricts the Commission's ability to obtain chemical information under the provisions of OAC 165:10-1-6 or other applicable Commission rules.

(6) This subsection applies to:

(A) horizontal wells that are hydraulically fractured on or after January 1, 2013; and

(B) other wells that are hydraulically fractured on or after January 1, 2014.

(d) **Rule reference guide.** References to Commission rules regarding management of hydraulic fracturing operations are as follows:

(1) Duties and authority of the Conservation Division (OAC 165:10-1-6).

(2) Required approval of notice of intent to drill, deepen, re-enter or recomplete; Permit to Drill (OAC 165:10-3-1).

(3) Surface and production casing (OAC 165:10-3-3).

(4) Casing, cementing, wellhead equipment and cementing reports (OAC 165:10-3-4).

(5) Swabbing and bailing (OAC 165:10-3-11).

(6) Leakage prevention in tanks; protection of migratory birds (OAC 165:10-3-13).

- (7) Well site and surface facilities (OAC 165:10-3-17).
- (8) Completion reports (OAC 165:10-3-25).
- (9) Administration and enforcement of rules (OAC 165:10-7-2).
- (10) Cooperation with other agencies (OAC 165:10-7-3).
- (11) Water quality standards (OAC 165:10-7-4).
- (12) Prohibition of pollution (OAC 165:10-7-5).
- (13) Protection of public water supplies (OAC 165:10-7-6).
- (14) Informal complaints, citations, red tags and shut down of operations (OAC 165:10-7-7).
- (15) Use of noncommercial pits (OAC 165:10-7-16).
- (16) Surface discharge of fluids (OAC 165:10-7-17).
- (17) Discharge to surface waters (OAC 165:10-7-18).
- (18) One-time land application of water-based fluids from earthen pits and tanks (OAC 165:10-7-19).
- (19) Noncommercial disposal or enhanced recovery well pits used for temporary storage of saltwater (OAC 165:10-7-20).
- (20) Waste management practices reference chart (OAC 165:10-7-24).
- (21) One-time land application of contaminated soils and petroleum hydrocarbon based drill cuttings (OAC 165:10-7-26).
- (22) Application of fresh water drill cuttings by County Commissioners (OAC 165:10-7-28).
- (23) Application of freshwater drill cuttings by oil and gas operators (OAC 165:10-7-29).
- (24) Application to reclaim and/or recycle produced water for surface activities related to drilling, completion, workover, and production operations from oil and gas wells (OAC 165:10-7-32).
- (25) Use of commercial pits (OAC 165:10-9-1).
- (26) Commercial soil farming (OAC 165:10-9-2).
- (27) Commercial recycling facilities (OAC 165:10-9-4).
- (28) Duty to plug and abandon (OAC 165:10-11-3).
- (29) Notification and witnessing of plugging (OAC 165:10-11-4).
- (30) Plugging and plugging back procedures (OAC 165:10-11-6).
- (31) Plugging record (OAC 165:10-11-7).
- (32) Review of environmental permit applications (OAC 165:5-1-15 through OAC 165:5-1-19)
- (33) Response to citizen environmental complaints (OAC 165:5-1-25 through OAC 165: 5-1-30).
- (34) Contempt (OAC 165:5-19-1 through OAC 165:5-19-2).

[Source: Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 29 Ok Reg 950, eff 7-1-12; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 34 Ok Reg 921, eff 9-11-17; Amended at 35 Ok Reg 973, eff 9-14-18; Amended at 36 Ok Reg 534, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-3-10.1. Notice of temporary lines which may be used to transport produced water

(a) Operators are required to send notice to the Conservation Division electronically as provided on the Commission's website for Form 5000NTL, to the appropriate County Commissioners, and to the surface owners of the land that is subject to the rights-of-way sought to be utilized by the operator, at least 48 hours prior to placing in public road rights-of-way temporary lines that may at any time be used to transport produced water for well drilling, completion, or remedial workover operations.

(b) Form 5000NTL shall be used to provide the notice required in subsection (a).

[Source: Added at 36 Ok Reg 534, eff 8-1-19]

165:10-3-11. Swabbing and bailing

In swabbing, bailing, or purging a well, all deleterious substances removed from the borehole shall be placed in adequate pits or tanks, and no such substances shall be permitted to pollute any surface and subsurface fresh water.

165:10-3-12. Leakage prevention in producing oil and gas wells

All wellhead connections, surface equipment, and tank batteries shall be maintained at all times so as to prevent leakage of oil, gas, saltwater, or other deleterious substances.

165:10-3-13. Water pollution prevention in tanks; protection of migratory birds

(a) Tanks for drilling mud or deleterious substances used in the drilling, completion, or recompletion of wells shall be constructed and maintained so as to prevent pollution of surface and subsurface fresh water.

(b) The protection of migratory birds shall be the responsibility of the operator. Therefore, the Conservation Division recommends that to prevent the loss of birds due to oil, all open top tanks containing oil on the surface be protected from access to birds. [See Advisory Notice 165:10-7-3(c)]

165:10-3-14. Waste of oil or gas

Except as provided in 165:10-3-15, waste of oil, condensate, or gas as defined in 165:10-1-2, is hereby prohibited.

165:10-3-15. Venting and flaring

(a) **Conditioning a producing well without a permit.** An operator may blow down a producing well without a permit for a period not to exceed 72 hours if:

- (1) Blowing down the well is necessary for efficient operation of the well or unexpected circumstances are encountered;
- (2) Blowing down the well will not damage any producing formation in the well; and
- (3) The operator complies with the H₂S requirements of 165:10-3-16.

(b) **Gas volumes less than or equal to 50 mcf/d.** An operator may vent or flare up to 50 mcf/d without a permit if:

- (1) It is not economically feasible to market the gas;
- (2) A suitable stand, line, or stack is used to prevent a hazard to people, and such stand, line or stack has a properly installed and operating stack arrestor;
- (3) H₂S content of gas exceeds 100 ppm, then the gas must be flared; and
- (4) The operator shall notify the appropriate Conservation Division District Office or Field Inspector within 24 hours of initiating the flaring of gas with an H₂S content exceeding 100 ppm.

(c) **Permit to vent or flare gas volumes in excess of 50 mcf/d.**

- (1) The Conservation Division may administratively grant a permit to vent or flare on a daily basis gas volumes in excess of 50 mcf/d, if:
 - (A) The operator applies for the permit on Form 1022;

- (B) The application lists the location of the well and the maximum daily volume of gas to be vented or flared;
- (C) It is not economically feasible to market the gas; and
- (D) A suitable stack, stand, or line will be used to prevent a hazard to people or property, and such stand, line or stack has a properly installed and operating stack arrestor.

(2) The operator shall file an amended application in the event that the amount of gas to be vented or flared exceeds the permitted volume.

(d) Temporary permit exemption for gas vented or flared during initial flowback from a newly completed or recompleted well. Gas vented or flared during initial flowback from a newly completed or recompleted well shall be exempt from the permit requirements of subsection (c) for a period not to exceed 21 days, commencing with the first date gas flow is in excess of 50 mcf/d, if:

- (1) Combustible gas flow greater than 50 mcf/d is flared;
- (2) Gas with H₂S content in excess of 100 ppm is flared;
- (3) The operator gives at least 48 hours notice by electronic mail or facsimile to the appropriate Conservation Division District Office or Field Inspector regarding the time when the venting or flaring of gas pursuant to this subsection will begin;
- (4) It is not economically feasible to market the gas; and
- (5) A suitable stack, stand, or line will be used to prevent a hazard to people or property, and such stand, line or stack has a properly installed and operating stack arrestor.

(e) Gas flared after initial flowback from a newly completed or recompleted well. Subsequent to the 21 day initial flowback period addressed in subsection (d), gas flared during flowback from a newly completed or recompleted well shall be exempt from the permit requirements in subsection (c) for an additional period not to exceed 45 days if:

- (1) Gas volumes flared from the well are less than or equal to an average rate of 300 mcf/d over the 45 day period, and one or more of the following conditions applies:
 - (A) No appropriate takeaway structure exists;
 - (B) The well is an exploration well; or
 - (C) The quality of the gas to be flared is not pipeline acceptable.
- (2) Gas with H₂S content in excess of 100 ppm must be flared.
- (3) A suitable stack, stand, or line must be used to prevent a hazard to people or property, and such stand, line or stack has a properly installed and operating stack arrestor.
- (4) The well operator is required to maintain a daily log of gas volumes flared from the well during the 45 day period. The daily log must be preserved for 3 years subsequent to the conclusion of the 45 day period. The log shall be produced upon request by an authorized representative of the Commission.
- (5) If gas volumes greater than 300 mcf/d are to be flared during flowback from a newly completed or recompleted well subsequent to the initial 21 day period addressed in subsection (d), then the operator is required to obtain a permit as provided in subsection (c).

(f) Application for an order permitting venting or flaring.

- (1) If the Conservation Division denies a Form 1022 application for a well, the operator of a well may apply for an order permitting venting or flaring of gas.

- (2) The application and notice shall be in accordance with OAC 165:5-7.
- (3) Upon application, notice, and hearing, the Commission may grant or deny an application made pursuant to OAC 165:5-7.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99; Amended at 31 Ok Reg 977, eff 9-12-14; Amended at 33 Ok Reg 593, eff 8-25-16; Amended at 36 Ok Reg 534, eff 8-1-19]

165:10-3-16. Operation in hydrogen sulfide areas

(a) **Applicability.** Each operator who conducts operations as described in this subsection shall be subject to this Section and shall provide sufficient safeguards to protect the general public from the occupational exposure limit of gas with a hydrogen sulfide content of 20 or more ppm and the immediate danger to life and health from a release of gas with a hydrogen sulfide content of 100 or more ppm:

(1) Operations including drilling, working over, producing, injecting, gathering, processing, transporting, and storage of hydrocarbon fluids that are part of, or directly related to, field production, transportation, and handling of hydrocarbon fluids that contain gas in the system which has hydrogen sulfide as a constituent of the gas to the extent as specified in (b) of this Section. The Commission may fine an operator up to \$5,000.00 for any violation of this Section.

(2) This Section shall not apply to:

(A) Operations involving processing oil, gas, or hydrocarbon fluids which are either an industrial modification or products from industrial modifications, such as refining, petrochemical plants, or chemical plants.

(B) Operations involving gathering, storing, and transporting stabilized liquid hydrocarbons.

(C) Operations where the concentration of hydrogen sulfide in the system is 20 ppm or less.

(b) General provisions.

(1) Each operator shall determine the hydrogen sulfide concentration in the gaseous mixture in the operation or system. Tests shall be made in accordance with industry standards or other methods approved by the Commission.

(2) For all operations subject to this Section, the radius of exposure shall be determined by the following Pasquill-Gifford equations or by other methods approved by the Commission such as air dispersion models accepted or approved by the U.S. Environmental Protection Agency:

(A) For determining the location of the 100 ppm radius of exposure:
 $x = [(1.589)(\text{mole fraction } H_2S)(Q)]$ to the power of (.6258).

(B) For determining the location of the 300 ppm radius of exposure:
 $x = [(0.6743) (\text{mole fraction } H_2S) (Q)]$ to the power of (.6258).

(C) For determining the location of the 500 ppm radius of exposure:
 $x = [(0.4546)(\text{mole fraction } H_2S)(Q)]$ to the power of (.6258);

Where: **x** = radius of exposure in feet; **Q**= maximum volume determined to be available for escape in cubic feet per day; **H₂S** = mole fraction of hydrogen sulfide in the gaseous mixture available for escape.

(3) The volume used as the escape rate in determining the radius of exposure shall be that specified below as is applicable:

(A) The maximum daily volume rate of gas containing hydrogen sulfide handled by that system for which the radius of exposure is calculated.

(B) For existing gas wells, the current adjusted open flow rate or the operator's estimate of the well's capacity to flow against zero back-pressure at the well head shall be used.

(C) For new wells drilled in developed areas, the escape rate shall be determined by using the current adjusted open-flow rate of offset wells or the field average current adjusted open-flow rate, whichever is larger.

(D) The escape rate used in determining the radius of exposure shall be corrected to standard conditions of 14.65 psia and 60° Fahrenheit.

(4) For drilling of a well in an area where insufficient data exists to calculate a radius of exposure but where hydrogen sulfide may be expected, then a 100 ppm radius of exposure equal to 3,000 feet shall be assumed. A lesser-assumed radius may be considered upon written request to the appropriate Conservation Division District Office setting out the justification for same.

(5) As used in this Section, a public area is defined as a dwelling place, business, church, school, hospital, school bus stop, government building, a public road, all or any portion of a park, city, town, village, or other similar area that can reasonably be expected to be populated by humans.

(6) As used in this Section, a public street or road is defined as any federal, state, county or municipal street or road owned or maintained for public access or use.

(7) As used in this Section, a rural residential subdivision is defined as an assemblage of 5 or more residential housing units per 10-acre tract.

(8) As used in this Section, a flare system is defined as a gas recovery process of well control for the flaring of gas through means of a closed system comprised of, but not limited to, a separator, compressor, flare lines, knock-out drum, sealed scrubber drum, back-pressure check valves, flare stack assembly and automatic ignitor.

(9) Facilities where the 100 ppm radius of exposure extends into a public area shall use materials for new construction, or modification of or repairs to existing facilities, subsequent to the effective date of this paragraph, selected and manufactured so as to be resistant to hydrogen sulfide stress cracking under operating conditions for which their use is intended.

(A) Other materials which are non-susceptible to hydrogen sulfide stress cracking, such as fiberglass and plastics, may be used in hydrogen sulfide service provided such materials have been manufactured and inspected in a manner which will satisfy applicable industry standards, specifications or recommended practices.

(B) Existing facilities which are in operation prior to the effective date of paragraph (b)(9), above, and where there has been no failure of existing equipment attributed to hydrogen sulfide stress cracking, shall satisfy the requirements of paragraph (b)(9) until such time as the facility experiences a failure.

(10) The handling and installation of materials and equipment used in hydrogen sulfide service are to be performed in such a manner so as to

prevent hydrogen sulfide stress cracking.

(c) **Storage tank provision.** Storage tanks which are utilized as a part of a production operation, and which are operated at or near atmospheric pressure and where the vapor accumulation has a hydrogen sulfide concentration that when measured one (1) foot above the open tank thief hatch exceeds 100 ppm, shall be subject to the following:

(1) It shall not be necessary to determine a radius of exposure for storage tanks as described in this Section.

(2) A warning sign shall be posted at the facility which shall meet the following requirements:

(A) A sign shall be located within 50 feet of the facility and be of sufficient size to be readable from the road or at the entrance to the facility.

(B) The warning sign shall state at a minimum that hydrogen sulfide has been found and could be present.

(C) Signs constructed to satisfy paragraph (c)(1) shall use the language "**Caution, Poisonous Gas May Be Present**" using black and yellow colors, or "**Danger Poison Gas (Hydrogen Sulfide)**" using red and white colors or equivalent language. Colors shall satisfy Table 1 of American National Standards Institute Standard Z390.1-2017. Signs installed to satisfy paragraph (c)(1) must be compatible with Federal Occupational Safety and Health regulations.

(3) A wind indicator is to be located at the highest point of the tank battery site so that it may be seen from the entrance to the site.

(4) Fencing as a security measure is required when storage tanks are located inside the populated limits of a townsite or city or a rural residential subdivision, where conditions cause the storage tanks to be exposed to the public. In other areas where storage tanks may be considered to be a danger the Commission may require additional security measures.

(5) **Vapor safety.** A flare system, vapor recovery system or H₂S stripping system shall be installed.

(d) **Drilling, completion, workover and production operations.** All operators whose operations are subject to this Section, and where the 100 ppm radius of exposure is in excess of 50 feet, shall be subject to the following:

(1) **Warning and marker provision.**

(A) For aboveground and fixed surface facilities, the operator shall post, where permitted by law, clearly visible warning signs on access roads or public streets, or roads which provide direct access to facilities located within the area of exposure.

(B) In populated areas such as townsites, cities or rural residential subdivisions where the use of signs is not considered to be appropriate, an alternative warning plan may be approved upon written request to the appropriate Conservation Division District Office.

(C) For buried lines subject to this Section, the operator shall comply with the following:

(i) A marker sign shall be installed at public road crossings on both sides of the road as close to the pipeline as possible.

(ii) Marker signs shall be installed along the line, when it is located within a public area or along a public road, at

intervals frequent enough in the judgment of the operator so as to provide warning to avoid the accidental rupturing of line by excavation.

(iii) The marker sign shall contain the name of the operator and a 24-hour phone number (including area code), and shall indicate by the use of the words "Warning", "Caution", or "Danger" and "Poison Gas" that a potential danger exists. Markers installed in compliance with the regulations of the Federal Department of Transportation shall satisfy the requirements of this provision. Marker signs installed prior to June 12, 1987 shall be acceptable provided they are in good condition and indicate the existence of a potential hazard.

(D) In satisfying the sign requirement of this subsection, the following will be acceptable:

(i) Sign of sufficient size to be readable from the road or at the entrance to the facility.

(ii) New signs constructed to satisfy this subsection shall refer to (c)(2) of this Section.

(2) Security provision.

(A) Unattended fixed surface facilities shall be protected from public access when located within one-fourth (1/4) mile of a public area. This protection shall be provided by fencing the facility and locking the gate, the plugging of valve openings and removing the handles, or by other similar means approved by the appropriate Conservation Division District Office. For the purpose of this paragraph, any surface pipeline shall not be considered as a fixed surface facility.

(B) For well sites, fencing as a security measure is required when a well is located inside populated limits of a townsite, city or rural residential subdivision, where conditions cause the well to be exposed to the public.

(C) In other areas the Commission considers to be a danger, the Commission may establish additional security requirements.

(D) The fencing provision will be considered satisfied where the fencing structure is a deterrent to public access.

(e) Control and equipment safety; contingency plan.

(1) **Applicability; radius of exposure.** All operations subject to (a) of this Section shall be subject to (2) and (3) of this subsection, if any of the following conditions apply:

(A) The 100 ppm radius of exposure is in excess of 50 feet and includes any part of a "public area" or a "public road".

(B) The 100 ppm radius of exposure is greater than 3,000 feet.

(2) **Control and equipment safety provision.** Operators subject to this subsection shall install safety devices and maintain them in an operable condition, and/or shall establish written safety procedures designed to prevent the undetected continuing escape of hydrogen sulfide. Safety devices shall be tested annually and a record kept of such tests. All pressure relief safety valves located within the facility shall discharge into a flare system.

(3) **Contingency plan provision.** A contingency plan provision shall be developed for each drilling, producing, well servicing, and plant operation that could reasonably result in accidental exposure of the public to a concentration of hydrogen sulfide in excess of 100 ppm. The operator should make appropriate contacts with any public agency listed in the contingency plan. The contingency plan shall provide an organized plan of action for alerting and protecting the public. The details of a contingency plan are determined largely by the time required for a potentially hazardous concentration of hydrogen sulfide to reach a public area and by the population density in the public area. A copy of the contingency plan should be maintained at the location which lends itself best to activation of the plan. A copy shall be submitted to the appropriate Conservation Division District Office.

(A) The plan shall include instructions and procedures for alerting the general public and public safety personnel of the existence of an emergency.

(B) The plan shall include procedures for requesting assistance and for follow-up action to remove the public from an area of exposure.

(C) The plan shall include a call list which shall include the following as they may be applicable:

(i) Local supervisory personnel.

(ii) County Sheriff.

(iii) Department of Public Safety.

(iv) City Police.

(v) Ambulance Service.

(vi) Hospital.

(vii) Fire Department

(viii) Contractors for supplemental equipment.

(ix) District Commission Office.

(x) Local Department of Environmental Quality Office.

(xi) Other public agencies.

(D) The plan shall include a plat detailing the area of exposure. The plat shall include the locations of private dwellings or residential areas, public facilities, such as schools, business locations, public roads, or other similar areas where the public might reasonably be expected within the area of exposure.

(E) The plan shall include provisions for advance briefing of occupied dwellings within the 100 ppm radius of exposure. The following provisions apply:

(i) The hazards and characteristics of hydrogen sulfide.

(ii) The necessity for an emergency action plan.

(iii) Possible sources of hydrogen sulfide within the area of exposure.

(iv) Instructions for reporting a gas leak.

(v) The method by which the public will be notified of an emergency.

(vi) Procedures and/or processes to be implemented in case of an emergency.

(F) In a high density population area, or where the population density fluctuates or is difficult to ascertain, a reaction type of plan, in lieu of advance briefing for public notification, will be

acceptable. The reaction plan option must be approved by the appropriate Conservation Division District Office.

(G) The plan shall include names and telephone numbers of residents within the area of exposure, except in cases where the reaction plan option has been approved by the appropriate Conservation Division District Office.

(H) The plan shall include a list of the names and telephone numbers of the responsible parties for each of the possibly occupied public areas, such as schools, churches, businesses, or other public areas or facilities within the area of exposure.

(f) **Training and requirement provision.** Each operator shall provide H₂S training in accordance with American National Standards Institute Standard Z390.1-2017 for all of its employees who will be onsite. This training should include:

- (1) Hazards and characteristics of hydrogen sulfide.
- (2) Effect on metal components of the system.
- (3) Operations of safety equipment and life support systems.
- (4) First aid in event of an employee exposure.
- (5) Use and operation of H₂S monitoring and personal detector equipment.
- (6) Emergency response procedures to include corrective actions, shut-down procedures, evacuation routes, and rescue methods.

(g) **Injection of fluids.** Injection of fluids containing hydrogen sulfide shall not be allowed under the conditions specified in this Section unless the operator has received prior approval from the Underground Injection Control Department.

(h) **Venting and flaring.**

- (1) Venting and flaring of gas shall be conducted in accordance with OAC 165:10-3-15. Vent/flare lines or stacks must have properly installed and operating stack arrestors.
- (2) Flaring equipment in public areas shall be designed and installed so as to resist hydrogen sulfide stress cracking. Existing equipment which is in operation prior to the effective date of this paragraph, and where there has been no failure attributable to hydrogen sulfide stress cracking, shall satisfy the requirements of this paragraph until such time as the equipment experiences a failure. Materials used in any new construction, or modification of or repair to existing equipment subsequent to the effective date of this paragraph shall be selected and manufactured so as to be resistant to hydrogen sulfide stress cracking under the conditions for which the use of such materials is intended.
- (3) Flare systems shall be designed so as to eliminate restrictions and low points creating differential pressure drops in lines which could cause overpressuring of tank hatches.
- (4) Flare systems with insufficient pilot fuel gas supply are required to have an alternate fuel gas supply or automated ignition source.
- (5) The flare tip shall be required to extend a safe distance from the tank as determined in accordance with API Standard 2017 or similar industry practice.

(i) **Other requirements.** In addition to any other requirements of this Section, drilling, production workover operations and processing plant sites where the 100 ppm radius of exposure is 50 feet or greater shall be subject to the following:

- (1) Protective breathing equipment shall be maintained in a safe operating condition at two or more locations at the site where the occupational exposure limit of gas with a hydrogen sulfide content of 10 ppm or more

has been exceeded.

(2) Wind direction indicators shall be installed at strategic locations at or near the site and shall be readily visible from all areas of the site and from the entrance to the site.

(3) Automatic hydrogen sulfide detection and alarm equipment, including the required detection equipment for each person on the site that will warn of the presence of hydrogen sulfide gas in concentrations of 10 ppm or more shall be utilized at the site.

(4) The appropriate Conservation Division District Office shall be notified of the intention to conduct a drill stem test of a formation containing hydrogen sulfide in concentrations of 10 ppm or more to meet the requirements of this Section.

(j) **Incident and accident notification.** Operators shall immediately notify the appropriate Conservation Division District Office or field inspector of any incident involving a release of hydrogen sulfide gas of 100 ppm or more and shall report all hydrogen sulfide related accidents resulting in death or hospitalization of personnel.

(k) **Exception provision.** Any application for exception to the provisions of this Section should specify the provisions to which exception is requested, and set out in written detail the basis on which the exception is to be requested. Written requests for exceptions are to be submitted to the appropriate Conservation Division District Office.

(l) **Referenced organizations and publications.** The following organizations and publications are referenced in this Section:

(1) ANSI - American National Standards Institute 1899 L Street, NW, 11th Floor, Washington, DC 20036; Table I, Standard Z390.1-2017.

(2) API - American Petroleum Institute 1220 L Street, NW, Washington, DC 20005; API Standard 2017.

(3) EPA - U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards, Technical Support Division, Mail Drop C404-03, U.S. EPA, Research Triangle Park, North Carolina 27711.

165:10-3-17. Well site and surface facilities

(a) **Scope.** This Section shall be applicable to all operators and owners of oil and gas wells, leases, secondary recovery units, converted or newly drilled disposal or injection wells, and re-entries or reworkings of the above; however, this Section does not cover pits used in connection with oil and gas operations (see 165:10-7-16).

(b) **Removal of fire hazards.** Any material that might constitute a fire hazard shall be removed a safe distance from the well location, tanks, and separator. All waste oil shall be burned or disposed of in a manner to avoid creating a fire hazard.

(c) **Removal of surface trash.**

(1) All surface trash, debris, and junk associated with the operations of the property shall be removed from the premises. Equipment and material that may be useable and related to the operations of the property are not considered trash, debris and junk. With written permission from the surface owner, the operator may, without applying for an exception to 165:10-3-17(b), bury all nonhazardous material at a minimum depth of three feet; cement bases are included.

(2) If the operator fails to remove trash, debris, and junk after written notice, the Commission may fine the operator up to \$1,000.

(d) **Required lease signs.** Within 30 days after the completion of any producing oil or gas well subsequent to the effective date of this Section, a sign shall be posted and maintained at the location indicating no trespassing, no unauthorized personnel or similar language, showing the operator of the well and the operator's twenty-four hour emergency telephone number, name of the well, number of the well, legal description of the well and API number; provided, however, where more than one well is producing on a lease, the operator may post and maintain a sign at the principal lease entrance indicating no trespassing, no unauthorized personnel or similar language, the lease name, operator, the operator's twenty-four hour emergency telephone number, legal description, and number of wells, and on each well designate the number of the well and API number. Within 30 days after completion or recompletion of an injection well or a disposal well subsequent to the effective date of this Section, a sign shall be posted and maintained at the well location indicating no trespassing, no unauthorized personnel or similar language, showing the operator of the well, the operator's twenty-four hour emergency telephone number, well name, well number, legal description of the well, API number and the Commission order number by which it was authorized. The legal description of each well completed on or after March 1, 1976, shall be posted at the well and shall describe the location of the well to the nearest quarter quarter quarter section and shall show the section, township, and range. On a 160-acre or larger drilling and spacing unit, a sign shall also be posted at the entrance to the well site. Upon the Commission's approval, after the effective date of this Section, of transfer to a new operator of a well completed or recompleted prior to the effective date of this Section, the operator must comply with all requirements in this Section. If an operator fails to post a sign as directed, the Commission may fine the operator \$50.00 per violation; provided that total fines per incident shall not exceed \$500.00 per lease.

(e) **Notice of fire or blowout.** In case of a fire or blowout, the well operator shall notify by telephone or electronic mail, as soon as possible, either the Conservation Division or the appropriate Conservation Division District Office.

(f) **OTC numbers on stock tanks for oil and condensate.**

(1) On all oil and gas producing leases, the first purchaser of crude oil or condensate shall print its name or affix the company logo and print or affix the OTC Gross Production Division Purchaser Reporting Number on the lease sign or at least one of the storage tanks from which marketable liquids are being delivered.

(2) On all oil and gas producing leases, the well operator shall print or affix the OTC Gross Production Division assigned Production Unit Number and the OTC Gross Production Division Operator Reporting Number on the lease sign or at least one of the tanks from which marketable liquids are being stored. In the case of an enhanced recovery or unitization operation where several OTC Gross Production Division assigned Production Unit Numbers exist for the wells in the unit, the word "unitized" shall be printed or affixed to the lease sign or one of the storage tanks from which marketable liquids are being delivered to the purchaser.

(3) The identification numbers required in this subsection shall always be clearly legible. All letters and numbers shall be a minimum of two inches in height. Any operator failing to post required information may be fined up to \$50.00 per violation; provided that total fines per incident shall not exceed

\$500.00 per well.

(g) OTC numbers on gas meter or meter house.

(1) On all gas producing leases, the operator of the well site gas meter required under 165:10-17-5 shall print or affix its name and OTC reporting number on the outside of the meter house or on the outside of the meter itself if no meter house exists.

(2) The operator of the lease shall print its OTC lease number and operator reporting number on the meter house or on outside of the meter if no meter house exists.

(3) The identification required in this subsection shall always be clearly legible.

(h) Valve and seals on stock tanks. The operator shall install tank valves such that metal identification seals can be properly utilized. These seals shall be used on all delivery tank valves to lessen unauthorized movement of marketable products.

(i) Man-ways on frac tanks. Each frac tank used at the wellsite shall have protective man-ways to prevent persons from accidentally falling into the frac tank.

(j) Guy line anchors. All guy line anchors left buried for use in future operations of the well shall be properly marked by a marker of bright color not less than four feet in height and not greater than one foot east of the guy line anchor.

(k) Well site cleared. Within 90 days after a well is plugged and abandoned, the well site shall be cleared of all equipment, trash, and debris. Any foreign surface material is to be removed and the location site restored to as near to its natural state as reasonably possible, except by written agreement with the surface owner to leave the surface in some other condition. If the location site is restored but the vegetative cover is destroyed or significantly damaged, a bona fide effort shall be made to restore or re-establish the vegetative cover within 180 days after abandonment of the well.

(l) Restored surface. Within 90 days after a lease has been abandoned, surface equipment such as stock tanks, heater, separators, and other related items shall be removed from the premises. The surface shall be restored to as near to its natural state as reasonably possible, except by written agreement with the surface owner to leave the surface in some other condition. If the surface is restored but the vegetative cover is destroyed or significantly damaged, a bona fide effort shall be made to restore or re-establish the vegetative cover within 180 days after abandonment of the lease.

(m) Leasehold roads. All leasehold roads shall be kept in a passable condition and shall be made accessible at all times for representatives and field inspectors of the Commission. At the time of abandonment of the property, the area of the road shall be restored to as near to its natural state as reasonably possible, except by written agreement with the surface owner to leave the surface in some other condition. If the road area is restored but the vegetative cover is destroyed or significantly damaged, a bona fide effort shall be made to restore or re-establish the vegetative cover within 180 days after abandonment of the property.

(n) Extension of time.

(1) An operator may request an extension of time required in (k), (l), and (m) of this Section for not more than six months by applying to the appropriate Conservation Division District Office and showing that there is no imminent danger to the environment and that one of the following conditions exists:

(A) That an agreement with the surface owners is not possible.

(B) That adverse weather conditions exist or existed.

(C) That the equipment needed to conform to (k), (l), and (m) of this Section was not or is not available.

(2) If approved by the District Manager, the extension shall be granted and the surface owner shall be notified by the operator. Any extension beyond six months shall require application, notice and hearing pursuant to OAC 165:5-7-41.

PART 5. OPERATIONS

165:10-3-25. Completion Reports

(a) **Initial Completion Report.** A Completion Report shall be filed with the Commission on Form 1002A within 60 days after completion of operations regardless of whether or not the well was completed as a dry hole, producer, injection, disposal, or service well. An operator who fails to file a complete and correct Form 1002A Completion Report within the allotted time limit may be fined up to \$250.00.

(b) **Amended Completion Report.** An amended Completion Report shall be filed with the Commission on Form 1002A within 60 days after completion of operations to reenter, re-complete and/or convert to injection or disposal well regardless of whether or not the well was completed as a dry hole, producer, injection, disposal, or service well.

(c) **No allowable without Completion Report.** The Conservation Division shall not assign an allowable to a well without an up-to-date Completion Report on file with the Conservation Division.

(d) A completion report for any well in a multi-well system shall reference the primary well. An amended completion report for the primary well in a multi-well system shall reference all other wells in the system.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 34 Ok Reg 921, eff 9-11-17]

165:10-3-26. Well logs

(a) **60 days to submit well log(s).** All well logs required by this Section shall be submitted to the Conservation Division within 60 days from the earlier of the date of completion of the well or the date that the last formation evaluation type well log was run. An operator who fails to properly submit formation evaluation type well logs, if run, may be fined up to \$250.00.

(b) **Formation evaluation type well logs.** This Section does not require an operator to run a formation evaluation type well log. However, if an operator does run formation evaluation type well logs, the operator shall only be required under this Section to submit a resistivity log and a porosity log, if available. Resistivity and porosity logs include but are not limited to spontaneous potential, induction, laterolog, density, gamma ray, neutron and sonic logs.

(c) **Other logs to be available upon request.** Any other well logs, if available, shall be submitted to the Technical Services Department upon Commission order or special request of the Conservation Division.

(d) **Requirements for submitting a copy of a log.** A copy of a log submitted under this Section shall be in digital image with the well's legal description noted on it. If there are separate runs for multiple casing strings, the operator shall submit the

separate runs.

(e) Obtaining confidential treatment of well log(s).

(1) Unless the operator requests confidential treatment of a well log(s), any well log(s) submitted to the Conservation Division shall be available for public inspection.

(2) To obtain confidential treatment of a well log, the operator of the well shall:

(A) Place the well log(s) in a sealed envelope with a completed Form 1002B attached to the envelope.

(B) Submit to the Technical Services Department of the Conservation Division the envelope with the log(s) and Form 1002B within 60 days from the earlier of:

(i) The completion date of the well, or

(ii) The date that the last formation evaluation log was run.

(3) A confidential well log under (2)(B) of this Section, shall remain confidential for one year from the date the last log was run on the well.

Upon written request, the Conservation Division may administratively extend the period of confidentiality for six months. Under no circumstances shall confidentiality be granted for a period in excess of 18 months from the date the last log was run on the well.

(f) No allowable before submission of well logs. The Conservation Division shall not assign an allowable to a well before the operator of the well submits to the Conservation Division any well log required to be submitted under (b) of this Section.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 31 Ok Reg 977, eff 9-12-14; Amended at 35 Ok Reg 973, eff 9-14-18]

165:10-3-27. Deviation from the vertical

(a) Well location for purposes of well spacing. For purposes of the well spacing requirements of 165:10-1-21 and 165:10-1-24, the location of a well in a common source of supply is the closest point to the unit boundary where the wellbore intersects the common source of supply.

(b) Presumed bottom hole location. For purposes of review of Form 1000 applications, the Conservation Division may presume that the location in a common source of supply of a well without a horizontal drainhole is the same as the surface location for the well unless:

(1) The operator submits a bottom hole survey, if the well has been drilled;
or

(2) The operator complies with (c)(1) of this Section.

(c) Permitted and prohibited locations.

(1) Offpattern surface location; permitted subsurface location.

(A) The Conservation Division may approve a Form 1000 for a well to be commenced without a location exception at an offpattern surface location for a common source of supply when:

(i) The Form 1000 lists a subsurface location which is a permitted location for the common source of supply.

(ii) Issuance of a Permit to Drill is conditioned on the operator running a bottom hole survey within 30 days after reaching total depth and on the operator submitting the survey to the Conservation Division within 45 days after the well reaches total depth.

(B) The well shall not receive an allowable for the common source of supply until a bottom hole survey shows that the well is at a permitted location or until the operator obtains a location exception order for the subsurface location.

(2) **Offpattern subsurface location.**

(A) The Conservation Division shall not approve a Form 1000 without a location exception order for an offpattern subsurface location.

(B) Issuance of a Permit to Drill under (1) of this subsection does not permit an operator to have, without a location exception order, an offpattern subsurface location for a common source of supply.

(d) **Required directional and bottom hole surveys.** For good cause, the Commission may order an operator to run directional and/or bottom-hole surveys for a common source of supply in a well:

(1) Upon application, notice, and hearing; or

(2) In any case involving the location of a well, upon motion of an affected party or upon the Commission's own motion.

[Source: Amended at 24 Ok Reg 1784, eff 7-1-07]

165:10-3-28. Horizontal drilling

(a) **Scope.** This Section affects a horizontal well with one or more laterals.

(b) **Definitions.** The following words and terms, when used in this Section, shall have the following meaning, unless the context clearly indicates otherwise:

(1) **"Adjacent common source of supply"** shall mean a common source of supply which is immediately adjacent to and adjoining the targeted reservoir(s) in a multiunit horizontal well being drilled or a well being drilled in a horizontal well unitization pursuant to 52 O.S. § 87.6 et seq. and which is inadvertently encountered in the drilling of the lateral of a multiunit horizontal well or a well pursuant to a horizontal well unitization when such well is drilled out of or exits, whether on one or multiple occasions, the targeted reservoir(s), and which is not the primary target of the subject well and shall not be included in the relinquished rights pursuant to 52 O.S. § 87.1(h). In the event that an adjacent common source of supply may be inadvertently encountered in the drilling of the lateral of a multiunit horizontal well or a well pursuant to a horizontal well unitization when such well is drilled out of or exits, whether on one or multiple occasions, the targeted reservoir(s), then said inadvertently entered adjacent common source of supply shall be included as part of the targeted reservoir only for the purpose of the inadvertent penetrations, and any subsequent completion, commingling and production of said adjacent common source of supply with the targeted reservoir(s), but not for future development of said adjacent common source of supply [52 O.S. § 87.6(B)(1)].

(2) **"Completion interval"** shall mean, for open hole completions, the interval from the point of entry to the terminus and, for cased and cemented completions, the interval from the first perforations to the last perforations [52 O.S. § 87.6(B)(5)].

(3) **"Conventional reservoir"** shall mean a common source of supply that is not an unconventional reservoir.

(4) **"Date of first production"** shall mean the date hydrocarbons are first produced from the horizontal well, whether or not production occurs during drilling, completion, or through permanent surface equipment.

- (5) "**Directional survey**" shall mean that survey or report showing the location of any point of the wellbore as it relates to the surveyed surface location from the surface to the terminus of each lateral.
- (6) "**Horizontal component**" shall mean the calculated horizontal distance from the point of entry to the terminus [52 O.S. § 87.6(B)(8)].
- (7) "**Horizontal well**" shall mean a well drilled, completed, or recompleted with one or more laterals which, for at least one lateral, the horizontal component of the completion interval exceeds the vertical component of the completion interval and the horizontal component extends a minimum of 150 feet in the formation [52 O.S. § 87.6(B)(6)].
- (8) "**Horizontal well unit**" shall mean a drilling and spacing unit established by the Commission, after application, notice, and hearing, for a common source of supply into which a horizontal well has been or will be drilled.
- (9) "**Horizontal well unitization**" shall mean a unitization for a targeted reservoir created pursuant to 52 O.S. § 87.6 et seq. [52 O.S. § 87.6(B)(7)].
- (10) "**Lateral**" shall mean the portion of the wellbore of a horizontal well from the point of entry to the terminus [52 O.S. § 87.6(B)(9)].
- (11) "**Multiunit horizontal well**" shall mean a horizontal well in a targeted reservoir or targeted reservoirs wherein the completion interval of the well is located in more than one unit formed for the same targeted reservoir, with the well being completed in and producing from such targeted reservoir in two or more of such units [52 O.S. § 87.6(B)(10)].
- (12) "**Non-standard horizontal well unit**" shall mean a horizontal well unit that is not a standard horizontal well unit.
- (13) "**Point of entry**" shall mean the point at which the borehole of a horizontal well first intersects the top of the common source of supply [52 O.S. § 87.6(B)(12)].
- (14) "**Standard horizontal well unit**" shall mean a horizontal well unit that is a square 10-, 40-, 160-, or 640-acre tract or a rectangular 20-, 80-, 320- or 1,280-acre tract in accordance with OAC 165:10-1-22.
- (15) "**Targeted reservoir**" shall mean one or more common sources of supply which will be encountered by the horizontal lateral portion of a horizontal well, and which has been designated by the Commission as part of an order, rule or emergency rule as potentially suited for development for the applied for multiunit horizontal well or horizontal well unitization pursuant to 52 O.S. § 87.6 et seq. Provided, however, that more than one common source of supply may only be granted by the Commission and included in the targeted reservoir upon a showing of reasonable cause by the applicant requesting the multiunit well in the application requesting authority for the multiunit well prior to the drilling of said multiunit well that the inclusion of the additional common source(s) of supply shall prevent waste and protect the correlative rights of all of the owners of the oil and gas rights [52 O.S. § 87.6(B)(14)].
- (16) "**Terminus**" shall mean the end point of the borehole of a horizontal well in the targeted reservoir [52 O.S. § 87.6(B)(15)].
- (17) "**True vertical depth**" shall mean that depth at the point of entry perpendicular to the surface as measured from the elevation of the kelly bushing on the drilling rig.
- (18) "**Unconventional reservoir**" shall mean a common source of supply that is a shale or a coal bed. "Unconventional reservoir" shall also mean any

other common source of supply designated as such by Commission order or rule.

(19) **"Vertical component"** shall mean the calculated vertical distance from the point of entry to the terminus of the lateral [52 O.S. § 87.6(B) (20)].

(c) **General horizontal well requirements.**

(1) Within 60 days after completion of a horizontal well, the operator shall show that the location of the completion interval complies with the applicable general rule, location exception order, or other order of the Commission by submitting the following to the Technical Services Department:

(A) A directional survey run in the horizontal well. The survey shall be submitted electronically using a program provided by the Commission.

(B) A plat constructed from the results of the directional survey showing the completion interval.

(2) The completion interval of an oil and or gas horizontal well shall be located not closer than the minimum distance as set out below from any other oil or gas well completed in the same common source of supply except as authorized by a special order of the Commission:

(A) Three hundred feet from any other oil or gas well completed in the same common source of supply, the top of which is less than 2,500 feet in true vertical depth.

(B) Six hundred feet from any other oil or gas well completed in the same common source of supply, the top of which is 2,500 feet or more in true vertical depth.

(C) This paragraph does not apply to horizontal wells drilled in a unit created for secondary or enhanced recovery operations pursuant to 52 O.S. § 287.1 et seq. or to horizontal wells drilled in a horizontal well unitization created pursuant to 52 O.S. § 87.6 et seq. or to any wells operated by the same operator in the unit.

Notification to working interest owners must be indicated on Form 1000.

(3) The perforated interval of an oil or gas non-horizontal well shall be located not closer than the minimum distance as set out below from the completion interval of any oil or gas horizontal well completed in the same common source of supply, except as authorized by a special order of the Commission:

(A) Three hundred feet from any completion interval of any oil or gas horizontal well completed in the same common source of supply, the top of which is less than 2,500 feet in true vertical depth.

(B) Six hundred feet from any completion interval of any oil or gas horizontal well completed in the same common source of supply, the top of which is 2,500 feet or more in true vertical depth.

(C) This paragraph does not apply to non-horizontal wells drilled in a unit created for secondary or enhanced recovery operations pursuant to 52 O.S. § 287.1 et seq.

(d) **Horizontal well requirements in an unspaced common source of supply.** In a horizontal well drilled in a common source of supply in which the Commission has not established any drilling and spacing units or horizontal well units, the completion interval of a horizontal well may not be located closer to the boundaries

of the applicable mineral estate, oil and gas leasehold estate, or voluntary unit than the minimum distance set out below except as authorized by a special order of the Commission:

(1) Not less than 165 feet when the top of the common source of supply is less than 2,500 feet in true vertical depth.

(2) Not less than 330 feet when the top of the common source of supply is 2,500 feet or more in true vertical depth.

(e) Drilling and spacing units.

(1) A horizontal well may be drilled on any drilling and spacing unit.

(2) A horizontal well unit may be created in accordance with 165:10-1-22 and 165:5-7-6. Such units shall be created as new units after notice and hearing as provided for by the Rules of Practice, OAC 165:5.

(3) The Commission may create a non-standard horizontal well unit covering contiguous lands in any configuration or shape deemed by the Commission to be necessary for the development of a conventional reservoir or an unconventional reservoir by the drilling of one or more horizontal wells. A non-standard horizontal well unit may not exceed 1,280 acres plus the tolerances and variances allowed pursuant to 52 O.S. § 87.1.

(4) A horizontal well unit may be established for a common source of supply for which there are already established non-horizontal drilling and spacing units, and said horizontal well unit may include within the boundaries thereof more than one existing non-horizontal drilling and spacing unit for the common source of supply. Upon the formation of a horizontal well unit that includes within the boundaries thereof one or more non-horizontal drilling and spacing units, the Commission shall provide that such horizontal well unit exists concurrently with one or more of such non-horizontal drilling and spacing units, and each such unit may be concurrently developed.

(f) Horizontal well location requirements for horizontal well units and horizontal well unitizations.

(1) **Conventional reservoirs.** In a conventional reservoir, the completion interval of a horizontal well in a horizontal well unit shall be located not less than the minimum distance from the unit boundary as follows:

(A) Not less than 165 feet from the boundary of any 10-, 20-, or 40-acre horizontal well unit.

(B) Not less than 330 feet from the boundary of any 80- or 160-acre horizontal well unit.

(C) Not less than 660 feet from the boundary of any 320-, 640- or 1,280-acre horizontal well unit.

(2) **Unconventional reservoirs.** In an unconventional reservoir, the completion interval of a horizontal well in a horizontal well unit shall be located not less than the minimum distance from the unit boundary as follows:

(A) Not less than 165 feet from the boundary of any 10-, 20-, or 40-acre horizontal well unit.

(B) Not less than 330 feet from the boundary of any 80-, 160-, 320-, 640- or 1,280-acre horizontal well unit.

(3) **Horizontal well unitizations.** The completion interval of a horizontal well in a horizontal well unitization shall not be located less than 330 feet from the unit boundary.

(g) **Alternative well location requirements.** The Commission may establish well location requirements different from those provided in subsection (f) of this Section when necessary to prevent waste and protect correlative rights. These requirements may be established in the order creating a standard or non-standard horizontal well unit or through a special rule of the Commission covering a conventional or unconventional reservoir in a designated geographic area. (see OAC 165:10, Subchapter 29, Special Area Rules).

(h) **Allowable.**

(1) Horizontal oil well allowables may be established administratively using the standard allowables provided in Appendix A (Allocated Well Allowable Table) supplemented by the additional allowables provided in Appendix C (Table HD) to this Chapter.

(2) The allowable for a horizontal gas well shall be computed in the manner prescribed for a non-horizontal gas well in the same common source of supply. The allowable for a horizontal well in a horizontal well unit 640-acres in size or less shall be the minimum well allowable as established in the current proration order determining the allowable formula issued pursuant to OAC 165:10-17-11, unless a higher allowable is established by conducting a flow potential test. The allowable for a horizontal well in a horizontal well unit in excess of 640-acres in size shall be calculated by multiplying the minimum well allowable by the quotient of the number of acres in the unit divided by 640. If an allowable higher than the minimum well allowable is established by way of a flow potential test, then the higher allowable will be utilized in calculating the appropriate allowable for a horizontal well in a horizontal well unit in excess of 640-acres in size.

(3) The allowable for a horizontal well unit or horizontal well unitization with multiple horizontal gas wells shall be the sum of the allowables for the separate horizontal gas wells. For this summation, the allowable for each horizontal gas well will be calculated as if it were the only well in the unit.

(4) The allowable for a multiunit horizontal well shall be allocated to each affected unit using the allocation factors determined in accordance with 52 O.S. § 87.8(B)(1).

(5) A non-horizontal well in a non-horizontal drilling and spacing unit which exists concurrently with a horizontal well unit shall be assigned the same allowable as a horizontal well in the horizontal well unit producing from the same common source of supply, except as otherwise specified by Order of the Commission.

(i) **Pooling.** Horizontal well units, horizontal well unitizations and multiunit horizontal wells may be pooled as provided in 52 O.S. § 87.1, 52 O.S. § 87.6 et seq. and Commission Rules of Practice, OAC 165:5.

165:10-3-29. Oil storage

Oil storage tanks shall be constructed so as to prevent leakage. Dikes or retaining walls, where necessary, shall be constructed, based on tank capacity and throughput, so as to prevent oil or deleterious substances from causing pollution and to ensure public safety.

[Source: Amended at 26 Ok Reg 2498, eff 7-11-09]

165:10-3-30. Use of gas for artificial lifting

- (a) **Use of gas for artificial lifting of oil.** Gas may be used for the artificial lifting of oil; provided, all gas returned to the surface with the oil is not vented or otherwise wasted.
- (b) **The use of production.** The use of production from one common source of supply to assist in lifting the production from another common source of supply by commingling the production from both common sources of supply in the tubing string shall be permitted when the operator has authority to commingle the production in the tubing.
- (c) **Use of artificial lift.** Artificial lift, initial or subsequent, in conjunction with the separate orifice or choke assembly shall be governed by OAC 165:10-3-37.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99]

165:10-3-31. Use of vacuum at the well head.

- (a) **Prohibited without a permit.** Imposing a vacuum on an oil or gas bearing formation is prohibited without a permit from the Commission.
- (b) **Requirement.** A vacuum shall not be approved unless it can be shown that use of a vacuum as permitted will prevent waste and protect correlative rights.
- (c) **Application for a permit.** Each application for a permit requesting use of a vacuum on a common source of supply shall be filed with the Technical Services Department on Form 1022A. The following information shall accompany the application:
- (1) A plat, color coded as to producing zone, showing the locations of all producing wells within one-half (1/2) mile of the well location.
 - (2) An electric well log of the subject well, if available; otherwise a drillers log concerning the subject well shall be provided.
- (d) A copy of the application shall be served, by regular mail, or delivered to each operator of a producing leasehold within one-half (1/2) mile of the well location. An affidavit reflecting that the required notice was provided shall be filed within five (5) days of filing of the application.
- (e) Notice is not required to be published if no written objection to the application is filed or if no hearing is required by the Commission pursuant to subsection (f), below.
- (f) If a written objection to the application is filed within fifteen (15) days after the application is filed or if hearing is required by the Commission, then the application shall be set for hearing, and notice thereof shall be given in the same manner specified in OAC 165:5-7-1. If no objection is filed and the Commission does not require a hearing, the matter shall be reviewed administratively by the Director of the Oil and Gas Conservation Division or the Director's designee. If the Oil and Gas Conservation Division denies an application, the applicant may request a hearing on said application.
- (g) **Records required to be kept by the operator.**
- (1) If an operator obtains a permit authorizing use of a vacuum, the operator shall make a record on a monthly basis of:
 - (A) The vacuum imposed in pounds per square inch or inches of mercury.
 - (B) The amount of gas, oil and water production per day from the well.
 - (2) Any record required to be kept under this Section shall be made available to the Oil and Gas Conservation Division upon request.

[Source: Amended at 27 Ok Reg 2128, eff 7-11-10]

PART 7. PRODUCTION

165:10-3-35. Multiple zone production

- (a) Production from more than one common source of supply from a single well is hereby prohibited except as authorized by the Conservation Division.
- (b) For the purpose of this Section, completion of a well so as to separately produce or account for the production from two or more common sources of supply shall be a multiple completion, and the production from more than one common source of supply without segregation of the production shall be commingling.
- (c) Any operator violating this Section shall be subject to a fine of \$500.00. The Conservation Division may shut down a multiply completed well pending compliance with this Section.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 16 Ok Reg 2206, eff 7-1-99]

165:10-3-36. Multiple zone completions

- (a) Each application for the approval of the multiple completion of a well shall be filed with the Technical Services Department on Form 1023.
- (b) A copy of the application shall be mailed or delivered to each operator of a producing leasehold within one-half (1/2) mile of the well location. The applicant shall file an affidavit of delivery or mailing not later than five (5) days after the application is filed.
- (c) If a written objection to the application is filed within fifteen (15) days after the application is filed, or if hearing is required by the Commission, the application shall be set for hearing and notice thereof shall be given as the Commission shall direct. If no objection is filed and the Commission does not require a hearing, the matter shall be reviewed administratively by the Director of Conservation or his designee. If the Conservation Division denies an application, the applicant may request a hearing on said application.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99; Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:10-3-37. Control of multiply completed wells

- (a) Every multiply completed well shall be equipped, operated, produced, and maintained so that there will be no commingling of the production from separate common sources of supply in the well, except as hereinafter provided. The production from each common source of supply shall be separately accounted for or separately stored and measured on the lease. The production shall be measured by either:
 - (1) A positive displacement dump-type device;
 - (2) A continuous-flow measuring device; or
 - (3) A measuring device of any other type authorized by the Commission.
- (b) Each application for the approval of production through a multiple choke assembly in a well shall be filed with the Technical Services Department on Form 1023. The multiple choke assembly must be so designed and located in the wellbore as to prevent commingling within the common sources of supply, but to permit commingling in the tubing string through individual choke orifices. The commingled production shall be measured at the surface and allocated to each common source of supply.

(c) A copy of the application shall be mailed or delivered to each operator of a producing leasehold within one-half (1/2) mile of the well location. The applicant shall file an affidavit of delivery or mailing not later than five days after the application is filed.

(d) If a written objection to the application is filed within 15 days after the application is filed, or if hearing is required by the Commission, the application shall be set for hearing and notice thereof shall be given as the Commission shall direct. If no objection is filed and the Commission does not require a hearing, the matter shall be reviewed administratively by the Director of Conservation or his designee. If the Conservation Division denies an application, the applicant may request a hearing on said application.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99; Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:10-3-38. Testing of multiply completed wells

The Conservation Division may at any time require a multiply completed well to be tested to determine the effectiveness of the separation of common sources of supply. The tests may be witnessed by representatives of the Conservation Division and may be witnessed by any offset operator. Testing procedures must be acceptable to a representative of the Conservation Division.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99]

165:10-3-39. Commingling of production

(a) Commingling permit required.

(1) Commingling of production from a well from separate common sources of supply is prohibited without an approved Form 1023 permit. A permit shall be required when production is from more than one source of supply, without segregation of the production in the wellbore, or is produced separately in the wellbore and then combined together downstream of the wellhead prior to measurement. A permit shall be required for horizontal wells with more than one lateral where production in the individual lateral is from separate common sources of supply. A permit shall also be required for horizontal wells where production in uphole zones is from separate common sources of supply. A permit is not required for a multiunit horizontal well or horizontal well involving production from only one lateral. Commingling downstream of the wellhead shall require Form 1024 (Packer Setting Affidavit) and Form 1025 (Packer Leakage Test) to be filed and approved. The Commission may assess a fine up to \$500.00 for non-permitted commingling either down hole or downstream prior to measurement.

(2) Each application for the approval of the commingling of a well shall be filed with the Technical Services Department on Form 1023. The following shall be filed with the application:

(A) A well log section with top and bottom of open intervals marked.

(B) A schematic of the proposed completion configuration of the well.

(C) A plat showing the locations of all wells producing from the same common sources of supply within one-half (1/2) mile radius of the subject well.

(3) A copy of the application shall be served, by regular mail, or delivered to each operator of a producing leasehold within one-half (1/2) mile of the well location. An affidavit of mailing shall be filed within five (5) days of filing of the application. No notice is required to be published.

(4) If a written objection to the application for a commingling permit is filed within 15 days after the application is filed, or if hearing is required by the Commission, the application shall be set for hearing, and notice thereof shall be given as the Commission shall direct. If no objection is filed and the Commission does not require a hearing, the matter shall be reviewed administratively by the Director of Conservation or his designee. If the Conservation Division denies an application, the applicant may request a hearing on said application.

(b) Restrictions.

(1) Commingling shall only be authorized when it would prevent waste and protect correlative rights.

(2) Commingling shall be prohibited where one producing zone is predominately gas and a second zone is predominately oil, unless the operator can verify in writing, submitted with the application, that no cross flow will occur resulting in reservoir damage.

(c) Commingled allowables.

(1) **Single allowable for commingled production.** Common sources of supply commingled under this Section receive a single allowable as if they constituted a single common source of supply in the wellbore.

(2) **Gross daily allowable for commingled production.** The gross daily allowable shall be based on the classification of the well as an oil or gas well for allowable purposes under OAC 165:10-13-2.

(A) **Unallocated oil well (GOR < 15,000:1).** The gross daily allowable shall be based on what would be the allowable if commingled production comes from the deepest commingled common source of supply.

(B) **Unallocated gas well (GOR > 15,000:1).** The gross daily allowable shall be a single unallocated gas allowable, as determined by OAC 165:10-17-11(c). Upon request in a commingling application or in any other appropriate application and upon proper notice thereof, the Commission may designate in a commingling permit or other appropriate order the specific gas formation, completed and producing in the applicable well, to which the allowable for such well is to be attributed when the Commission determines that such designation is necessary to prevent waste and to protect correlative rights.

(C) **Special allocated gas pool.** The gross daily allowable shall be based on what would be the allowable if the commingled production came from the special allocated gas pool in the well.

(3) **Operator option if multiple pool rules exist.** If more than one common source of supply under a commingling permit or appropriate order for a gas well is subject to gas pool rules, the order shall designate which set of pool rules is applicable for allowable purposes.

(4) **Net daily allowable.** The net daily allowable is the gross daily allowable under (3) of this subsection:

(A) Reduced accordingly by any penalty against any of the commingled common sources of supply under the permit or

appropriate order.

(B) Reduced accordingly by any overage carried forward against a commingled common source of supply.

(C) Increased by any underage carried forward for the well under applicable allocated or special allocated pool rules.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 16 Ok Reg 2206, eff 7-1-99; Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 35 Ok Reg 973, eff 9-14-18]

165:10-3-40. Production of brine

(a) All wells in excess of 300 feet in depth and producing brine for the extracting of minerals shall be under the full jurisdiction of the Conservation Division.

(b) The establishment of a unitized area for the purpose of efficient operations, prevention of waste, and the protection of correlative rights may be formed by following the procedures set out in 165:5-7-21

(c) Category B surety shall be a requirement for all brine producing wells or units.
[See 165:5-7-21(f)]

SUBCHAPTER 5. UNDERGROUND INJECTION CONTROL

165:10-5-1. Classification of underground injection wells

Underground injection wells shall be classified as follows:

(1) **Enhanced recovery injection well.** An enhanced recovery injection well is a well which injects fluids to increase the recovery of hydrocarbons.

(2) **Disposal well.** A disposal well is a well which injects, for purposes other than enhanced recovery, those fluids brought to the surface in connection with oil or natural gas production.

(3) **Storage well.** A storage well is a well used to inject, for storage purposes, hydrocarbons which are liquid at standard temperature and pressure.

(4) **Simultaneous injection well.** A well that injects or disposes of salt water at the same time it is producing oil and/or gas to the surface.

[Source: Amended at 13 Ok Reg 2381, eff 7-1-96]

165:10-5-2. Approval of injection wells or disposal wells

(a) The subsurface injection or disposal of any substance for any purpose is prohibited except upon approval of the Commission pursuant to 165:10-5-5 or 165:10-5-12 and 165:10-5-13. This authorization may be conditioned upon the applicant taking corrective action to protect treatable water as specified by the Commission. The Commission may fine an operator up to \$5,000.00 for any violation of this subsection.

(b) Except as provided in (c) and (d) in this Section, every well used for injection or disposal shall be cased and tested in accordance with 165:10-3-4 and 165:10-5-6.

(c) The testing requirements of 165:10-5-6 shall not apply to wells permitted by Commission order for subsurface injection of onsite reserve pit fluids.

(d) The Conservation Division may approve a Form 1015 application to convert an existing well for injection or disposal if the well does not otherwise comply with 165:10-3-4 if:

(1) The operator attaches to the Form 1015 application a description of an alternate method of protecting treatable water.

(2) The Conservation Division approves the proposed alternate method.

(3) The application is filed in accordance with OAC 165:5-7 if a hearing is required.

(4) The application is not protested.

(e) Any proposed injection or disposal well which is within one-half (1/2) mile of any public water supply well shall not be approved without notice and hearing, and the Commission shall not issue an order authorizing injection or disposal into said well until the applicant proves at the hearing that said well shall not pollute said water supply well. A commercial disposal well shall not be approved within a designated wellhead protection area.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 9 Ok Reg 2337, eff 6-25-92; Amended at 26 Ok Reg 2498, eff 7-11-09; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-5-3. Authorization for existing enhanced recovery injection wells and existing disposal wells

(a) Each enhanced recovery injection well authorized under order of the Commission on the effective date of this Section is an existing enhanced recovery injection well. Injection is prohibited in any existing enhanced recovery injection well unless the operator has included that well on a completed Form 1070 submitted to the Commission within one year following the effective date of this Section. Form 1070 (Inventory of Authorized Existing Enhanced Recovery Injection Wells) shall include each well name, location, authorizing Commission order number (including all orders authorizing exceptions), date of order, maximum authorized injection rate, and maximum authorized injection pressure.

(b) Each disposal well being operated under order of the Commission on the effective date of this Section is an existing disposal well. Injection is prohibited in any existing disposal well unless the operator has included that well on a completed Form 1071 submitted to the Commission within one year following the effective date of this Section. Form 1071 (Inventory of Authorized Existing Disposal Wells) shall include each well name, location, authorizing Commission order number (including all orders authorizing exceptions), date of order, maximum authorized injection rate, and maximum authorized injection pressure.

165:10-5-4. Application for approval of enhanced recovery projects

(a) An enhanced recovery project shall be permitted only by order of the Commission after notice and hearing.

(b) The application for an order authorizing an enhanced recovery project shall contain the following:

(1) The names and addresses of the operator or operators of the project.

(2) A plat showing the lease, group of leases, or unit included within the proposed project; the location of the proposed injection well or wells, and the location of all oil and gas wells including abandoned and drilling wells and dry holes; and the names of all operators offsetting the area encompassed within the project.

(3) The common source of supply in which all wells are currently completed.

(4) The name, description, and depth of each common source of supply to be affected.

(5) A log of a representative well completed in the common source of supply.

(6) A description of the existing or proposed casing program for injection wells and the proposed method of testing casing.

(7) A description of the injection medium to be used, its source, and the estimated amounts to be injected daily.

(8) For a project with an allocated pool, a tabulation showing recent gas-oil ratio and oil and water production tests for each of the producing oil and gas wells.

(9) The proposed plan of development of the area included within the Project.

(c) A copy of the application and notice of hearing shall be mailed to the owner or owners of the surface of the land upon which the project is located and to each operator offsetting the project as shown on the application within five days after the application is filed. An affidavit of compliance with this Section shall be filed on or before the hearing.

165:10-5-5. Application for approval of injection and disposal operations

(a) **Application.** Each application for the approval of a proposed injection well, disposal well, or commercial disposal well shall be filed with the UIC Department on Form 1015 and shall be verified by a duly authorized representative of the operator.

(b) **Application.** The application for the approval of an injection or disposal well(s) shall be accompanied by:

(1) **Plat.**

(A) **Noncommercial disposal well.** A plat showing the location and total depth of the well(s) and each abandoned, producing or drilling well, and dry hole within one-quarter (1/4) mile of the proposed injection well or disposal well for volumes less than 20,000 barrels per day and within one-half (1/2) mile of the proposed disposal well for volumes equal to or greater than 20,000 barrels per day, and identifying the surface owner of the land on which the injection or disposal well is to be located, and each operator of a producing spacing unit or well within one-half (1/2) mile of each injection or disposal well with a requested injection rate of less than five thousand barrels per day, and each operator of a producing spacing unit or well within one (1) mile of each injection or disposal well with a requested injection rate of five thousand barrels per day or more.

(B) **Commercial disposal well.** A plat showing the location and total depth of the well(s) and each abandoned, producing or drilling well and dry hole within one-half (1/2) mile of the disposal well, and identifying the surface owner of the land on which the disposal well is to be located, and each operator of a producing spacing unit or well within one (1) mile of each disposal well.

(C) **Additional required information.** The following information must be submitted in a separate document regarding wells listed on such plats:

(i) Well name and number;

(ii) Current operator of well;

(iii) Well status;

(iv) Total depth of well;

(v) Geologic name of any producing interval in the well and/or any interval used for injection or disposal purposes;

- (vi) The diameter of and setting depth for the surface casing, intermediate casing (if set), production casing (if set) and liner (if used) in the well;
- (vii) Top of cement obtained from Forms 1002A or 1002C, if specified, or a cement bond log, temperature log or cased hole log, if available, in the outermost string of casing in the well perforating the injection interval to be used by the proposed noncommercial or commercial disposal well or injection well. If such logs are not available, a calculated top of cement will be acceptable; and
- (viii) The size and amount of casing pulled, if any, and the depths of any plugs set, if any, in any plugged well.

(2) **Completion Report.** If the well has been drilled, a copy of the Completion Report (Form 1002A) and any available electric or radioactivity log of the well.

(3) **Schematic diagram.** A schematic diagram of the well showing:

- (A) The total depth or plugback depth of the well.
- (B) The depth of the injection or disposal interval indicating both the top and bottom.
- (C) The geological name (geological group) of the injection or disposal zone.
- (D) The depths of the tops and bottoms of the casing and cement to be used in the well.
- (E) The size of the casing and tubing, and the depth of the packer.

(4) **Proposed zone information.** Information showing that injection into the proposed zone will not initiate fractures through the overlying strata which could enable the injection fluid or formation fluid to enter fresh water strata.

- (A) When the fluid injection rate is 1,000 barrels per day or less, or equivalent rate for any fraction of twenty-four (24) hours, an overlying strata of at least 200 feet in thickness between the lowest base of fresh water and the top of the proposed interval of injection is considered sufficient evidence of fresh water protection.
- (B) When the fluid injection rate is greater than 1,000 barrels per day or equivalent rate for any fraction of twenty-four (24) hours, an overlying strata of at least 500 feet in thickness between the lowest base of fresh water and the top of the proposed interval of injection is considered sufficient evidence of fresh water protection.
- (C) When the fluid injection rate is greater than 10,000 barrels per day or equivalent rate for any fraction of twenty-four (24) hours, an overlying strata of at least 3,000 feet in thickness between the lowest base of fresh water and the top of the proposed interval of injection is considered sufficient evidence of fresh water protection.
- (D) If the overlying strata is less than required in (A), (B), or (C) of this paragraph, the Commission may administratively approve injection provided a finding is made that such injection will not initiate fractures through the overlying strata into the fresh water strata. Applicant is required to furnish to the Commission, sworn evidence and data in support of such findings. The Commission, when issuing an order approving fluid injection, shall consider the following:

- (i) Maximum injection rate.
- (ii) Maximum surface injection pressure.
- (iii) Injection fluid.
- (iv) The lithology and rock characteristics of the injection zones and overlying strata.

(5) Proposed operating data:

(A) Daily injection rates and pressures. The maximum permitted surface injection pressure may be the pressure requested in the application or 1/2 psi per foot of depth to the top of the injection/disposal interval, whichever is less, unless the results of a fracture pressure step-rate test support a higher pressure. The Conservation Division may designate areas of interest in which pressures and volumes may be more restrictive. The UIC Department may request that the applicant perform a fracture pressure step-rate test.

(B) Geologic name, depth, and location of injection fluid source.

(C) Qualitative and quantitative analysis of fresh water from two (2) or more fresh water wells within one (1) mile of the proposed injection or disposal well showing location of wells and dates samples were taken, or statement why samples were not submitted. The analysis shall include at a minimum chloride, sodium, and total dissolved solids. Sample collection date(s) must be no more than 12 months prior to the date the application is filed.

(D) Qualitative and quantitative analysis of representative sample of Class II fluids to be injected. The analysis shall include at a minimum chloride, sodium, and total dissolved solids.

(c) Application for approval. A copy of the Form 1015 application for approval of injection or disposal of Class II fluids in a well and, where noted, required attachments to Form 1015, except for proofs of publication, fresh water analyses, analyses of representative samples of Class II fluids to be injected, and electric or radioactivity logs, shall be served by the applicant within five (5) business days of the date the application is filed by regular mail or delivered to the following, and applicant must submit an affidavit of mailing or delivery to the UIC Department not later than five (5) business days after the date the application is filed:

- (1) The owner of the surface of the land on which the proposed injection or disposal well is to be located;
- (2) For a proposed commercial disposal well, to each surface owner and surface lessee of record on each tract of land adjacent and contiguous to the site of the proposed well;
- (3) For a proposed injection or noncommercial disposal well with a requested injection rate of less than five thousand (5,000) barrels per day, to each operator of a producing spacing unit or well within one-half (1/2) mile of such proposed well along with required Form 1015 attachments;
- (4) For a proposed noncommercial disposal well with a requested injection rate of five thousand (5,000) barrels per day or more, or a commercial disposal well, to each operator of a producing spacing unit or well within two (2) miles of such proposed well along with required Form 1015 attachments;
- (5) For a proposed horizontal injection or noncommercial disposal well with a requested injection rate of less than five thousand (5,000) barrels per day, to each operator of a producing spacing unit or well within one-half

(1/2) mile of the lateral of such proposed well along with required Form 1015 attachments;

(6) For a proposed noncommercial horizontal disposal well with a requested injection rate of five thousand (5,000) barrels per day or more, or a horizontal commercial disposal well, to each operator of a producing spacing unit or well within two (2) miles of the lateral of such proposed well along with required Form 1015 attachments;

(7) For a proposed injection well with a requested injection rate of five thousand (5,000) barrels per day or more, to each operator of a producing spacing unit or well within one (1) mile of such proposed well along with required Form 1015 attachments; and

(8) For a proposed horizontal injection well with a requested injection rate of five thousand (5,000) barrels per day or more, to each operator of a producing spacing unit or well within one (1) mile of the lateral of such proposed well along with required Form 1015 attachments.

(d) **Notice of application.** Notice of an application relating to injection, disposal or commercial wells shall be published one time for injection and noncommercial disposal wells and two times for a commercial disposal well in a newspaper of general circulation published in Oklahoma County, Oklahoma, and in a newspaper of general circulation published in each county in which land embraced in the application are located. Applicant shall file with the UIC Department proof of publication regarding the notice of application. The notice shall include:

- (1) UIC tracking number.
- (2) Name and address of applicant.
- (3) Location of proposed well to nearest 10 acre tract.
- (4) Well name.
- (5) The geological name of the injection formation.
- (6) The top and bottom of the injection interval.
- (7) Maximum injection pressures.
- (8) Maximum BID or MCFID injection rate.
- (9) The type of well (injection, disposal, commercial).

(e) **Written objection.** If a written objection to the application is filed within fifteen (15) days after the application is published for injection and noncommercial disposal wells or thirty (30) days after the last publication date for commercial disposal wells, or if hearing is required by the Commission, the application shall be set for hearing and notice thereof shall be given in the same manner as required for the filing of the application on the pollution docket. If no objection is filed and the Commission does not require a hearing, the matter shall be presented administratively to the Manager of Underground Injection Control who may sign the permit.

(f) **Surety requirements for commercial disposal well facilities.**

(1) Any operator of a commercial disposal well facility shall file with the Surety Department for the Conservation Division an agreement to properly plug the well and reclaim the site upon termination of operations. The agreement shall be on forms available from the Conservation Division and shall be accompanied by surety. The agreement shall provide that if the Commission finds that the operator has failed or refused to comply with Commission rules or take remedial action as required by law and Commission rules, the surety shall pay to the Commission the full amount of the operator's obligation up to the limit of the surety.

(2) The Commission shall establish the amount of surety in the order or permit for the authority to operate a commercial disposal well facility. The amount of surety shall be based on factors such as the depth of the well, dimensions of the facility, and costs of plugging the well, reclamation, monitoring, plugging of monitor wells, any pit closure, trucking of any deleterious substances, remediation and earth work. The amount may be subject to change for good cause. The surety shall be maintained for as long as monitoring is required. The type of surety shall be a corporate surety bond, certificate of deposit, irrevocable commercial letter of credit, or other type of surety approved by order or permit of the Commission. Any type of surety that expires shall be renewed prior to 30 days before the expiration date.

(3) Operators of commercial disposal well facilities authorized prior to the effective date of this subsection must either comply with this subsection or close such facilities within one (1) year of the effective date of this subsection.

(g) In addition to the requirements listed above, the Manager of Underground Injection Control may request the applicant to submit the following information as a prerequisite to approval of the application:

(1) For those wells included in OAC 165:10-5-5(b)(1) which penetrate the top of the injection interval, a tabulation of the wells indicating the following information, if available, from public records:

(A) Dates the wells were drilled.

(B) The present status of the wells.

(C) The identity of any abandoned well which was improperly plugged or remains unplugged.

(2) A list of the following information, if available, to the applicant:

(A) The shut-in bottom hole formation pressure in psi; or the stabilized shut-in surface pressure and fluid level in the proposed injection well.

(B) The permeability of the proposed injection zone expressed in millidarcies.

(C) The porosity of the proposed injection zone expressed as a percentage of pore volume.

(D) Documentation of the methods used to arrive at the data requested above.

(h) Authorization of an injection well or a disposal well or a commercial disposal well will expire and become null and void if no well completion report (Form 1002A) is filed or if no mechanical integrity test is performed pursuant to OAC 165:10-5-6 within sixty (60) days from the date of completion or conversion of the well.

(i) In addition to the well construction requirements as set out in 165:10-3-1, commercial disposal wells shall comply with the following requirements:

(1) At a minimum, the well shall be constructed with a wellhead, surface casing, production casing, tubing, and packer.

(2) The surface casing shall be set and cemented at least fifty (50) feet below the base of the treatable water bearing zone. The production casing will not be allowed to also serve as the surface casing.

(3) The production casing must be set and cemented through the injection zone with the cement circulated behind the casing to a height at least two hundred fifty (250) feet above the disposal zone. A cement bond log

showing quality and placement of the cement must be furnished to and approved by the Commission before the well may be used for injection or disposal. The Manager of Underground Injection Control may approve the Arbuckle Formation for open hole completion.

(4) The annulus between the tubing and the casing must be open from the surface to the packer to allow for pressure testing and monitoring of the injection tubing and packer and the annulus filled with a packer fluid that protects against corrosion.

(5) The packer must be set at least within seventy-five (75) feet of the top of the perforations.

(6) Adequate gauges shall be installed on each annulus to allow proper monitoring of the disposal operation.

(7) Tubing must be internally coated or lined to prevent corrosion from injected fluids. PVC, Plastic Coated, Stainless Steel or Fiberglass will qualify.

(8) The packer must be either internally coated or stainless steel.

(9) Commercial disposal wells authorized with a positive injection pressure must be equipped with a down hole shut-off device with a seal divider installed between the packer and the tubing. A Stainless Steel Profile Nipple and an "ON-OFF" Tool will qualify under this Section.

(j) No Commercial disposal well will be permitted whose injection pressure approaches or exceeds the demonstrated frac gradient of the injection zones(s).

(k) The geologic injection intervals authorized by the order or permit which are not perforated during the initial or subsequent completion of the disposal well will not expire until the disposal well is plugged, or the authority to inject is terminated or vacated.

(l) In the event the Commission has evidence that an applicant for a commercial disposal well may not possess a satisfactory compliance history with Commission rules, the Director of the Conservation Division may seek an order of the Commission, issued after application, notice, and hearing, determining whether the applicant should be authorized to operate such commercial disposal well.

165:10-5-6. Testing and monitoring requirements for injection wells and disposal wells

(a) **Mechanical integrity during injection.** The operator of an injection, disposal or commercial disposal well must maintain mechanical integrity in order to continue operation of the well.

(b) **Initial pressure test requirements for wells permitted on or after December 2, 1981.**

(1) **Mandatory initial mechanical test.** Before commencement of operation, each well authorized for injection or disposal by a Commission order issued on or after December 2, 1981, must pass an initial pressure test of the casing tubing annulus according to the minimum testing standards of (2) of this subsection, unless a Commission order or permit authorizes other test procedures of the mechanical integrity of the well. Any operator failing to comply with initial mechanical integrity testing and reporting requirements may be fined up to \$500.00.

(2) **Minimum testing standards for initial tests.** For each initial test required by (1) of this subsection, the minimum testing standards are:

(A) **Witnessing of the test.** The test shall be witnessed by an authorized representative of the Conservation Division. It shall be the responsibility of the well operator to secure the presence of the Commission representative.

(B) **Down-hole equipment.** Injection and disposal shall be through adequate tubing and packer.

(C) **Aboveground extensions and fittings.** Adequate aboveground extensions shall be installed in each annulus in the well. In addition, the operator shall install an adequate working pressure gauge with a cutoff valve to the tubing, so that the amount of injection pressure may be measured by the Commission representative. An operator is required to keep adequate working gauges on the tubing and annulus of the well.

(D) **Packer setting depth under the order.** The mechanical packer shall be set within 40 feet of the packer setting depth prescribed by the order permitting the well for injection or within 75 feet of the perforations of the injection zone(s) opened.

(E) **Verification of packer setting depth.** The Commission District Manager may require the operator of the well to verify the packer setting depth by running a wireline or other method approved by the Manager of the Underground Injection Control Department.

(F) **Minimum testing pressure for noncommercial disposal and injection wells.** Noncommercial disposal and injection wells shall be tested as follows:

(i) If the maximum authorized injection pressure for the well is less than 300 psig under the order or permit authorizing the well for injection, the minimum testing pressure shall be 300 psig.

(ii) If the maximum authorized injection pressure is greater than 300 psig under the order or permit authorizing the well for injection, the minimum testing pressure shall be the lesser of 1000 psig or the maximum authorized injection pressure under the order permitting the well.

(G) **Minimum testing pressure for commercial disposal wells.** Commercial disposal wells shall be tested at the maximum injection pressure authorized in the order or permit authorizing the well for injection, but not less than 300 psig.

(H) **Thirty minute minimum testing period.** The minimum testing period shall be 30 minutes at the testing pressure.

(I) **Ten percent maximum permitted bleed-off.** The maximum permitted change in pressure during the testing period shall be ten percent of the maximum testing pressure used.

(J) **Test report on Form 1075.** The Field Inspector shall submit the results of the mechanical integrity test on Form 1075 within 30 days from the date the test is performed.

(K) **Cement circulated above injection zone.** The annulus between the casing and the borehole must be cemented through the injection or disposal zone to a height at least two hundred fifty (250) feet above the injection or disposal zone. If a cement squeeze

is necessary to raise annular cement to the minimum height of 250 feet, a cement bond log showing quality and placement of the cement must be furnished to be approved by the Commission before the well may be used for injection or disposal.

(L) **Packer setting depth.** The packer must be set at a depth which is at least 50 feet below the depth of the top of cement behind the production casing.

(3) **Alternative testing procedures.** Operators can test at a maximum of 500 psi if there is in place an automatic and continuous pressure monitor on the tubing-casing annulus that will shut-in the well if there is a pressure increase of 250 psi on the annulus. Application for this alternative test procedure shall be made in writing to the Manager of the UIC Department. The Manager of the UIC Department may allow the alternative test procedure to be used as the initial mechanical integrity test, which permission shall be reflected in the order or permit regarding the well.

(4) **Use of fluid seal without a mechanical packer.** Use of a fluid seal without a mechanical packer is prohibited.

(c) Initial pressure test requirements for wells permitted prior to December 2, 1981.

(1) Mandatory initial pressure test or monitoring test.

(A) Each well authorized for injection or disposal by Commission order issued prior to December 2, 1981, must pass an initial mechanical integrity test according to the minimum testing standards of (2) of this subsection.

(B) In lieu of casing test required in (A) of this paragraph, the operator shall monitor and record during actual injection the pressure in the casing-tubing annulus monthly and report the pressure annually on Form 1075. A measurable positive pressure must be maintained at the casing valve and be continuously measured to qualify.

(2) Minimum testing standards for initial mechanical integrity tests.

(A) **Wells with casing-tubing annulus.** The minimum testing standards of (b)(2) of this Section for an initial test of a well with a casing tubing annulus shall apply with the following modifications:

(i) The District Manager shall have the option to waive witnessing of the test.

(ii) If the test is not witnessed, the well operator shall submit documentation of the test to the Conservation Division within 30 days after the test on Form 1075.

(iii) The minimum testing pressure shall be 200 psig.

(B) **Wells without a casing-tubing annulus or wells with perforations above the packer.** The minimum testing standards for an initial test of a well without a casing-tubing annulus or wells with perforations above the packer are:

(i) The test shall be witnessed by an authorized representative of the Conservation Division unless the District Manager for the Conservation Division waives the requirement of witnessing the initial test. It shall be the responsibility of the well operator to secure the presence of the commission representative for witnessing the test.

- (ii) If the test is not witnessed, then the operator shall submit on Form 1075 documentation of the test to the Conservation Division within 30 days after the test.
- (iii) The operator shall install a one-fourth (1/4) inch female fitting, with cutoff valve to the tubing, so that the amount of injection pressure may be measured by the Commission representative using a gauge having a one-fourth (1/4) inch male fitting.
- (iv) For purposes of the test, a mechanical packer, retrievable bridge plug, or seating nipple plug shall be placed in the injection string not more than 75 feet above the top of the injection interval.
- (v) The well operator shall pressure test the tubing string for at least 30 minutes. The minimum testing pressure shall be the greater of 300 psig, or the maximum authorized injection pressure provided that the actual working injection pressure for the well may be used instead of the maximum authorized injection pressure when necessary to prevent damage to the casing or packer.
- (vi) The maximum permitted bleedoff during the testing period shall be ten percent of the maximum testing pressure used.
- (vii) A radioactive tracer survey shall be run demonstrating that the injected fluid is going into the authorized zone when there is no cement bond log or cementing reports to demonstrate sufficient cement behind pipe to isolate the injection zone or to insure the packer is properly set.
- (viii) In lieu of a pressure test using a liquid testing media, the UIC Department may approve a mechanical integrity test using a gas media if it conforms to a method previously approved by the EPA.
- (ix) The Field Inspector shall submit the results of the mechanical integrity test on Form 1075 to the Conservation Division within 30 days after the test.

(d) Subsequent mechanical integrity test requirements for noncommercial disposal wells and injection wells.

(1) Pressure tests.

(A) Noncommercial disposal wells permitted for injection at volumes equal to or greater than 20,000 barrels per day. Unless a well has been approved by an order or permit of the Commission for other testing procedures or monitoring, each noncommercial disposal well permitted for injection at volumes equal to or greater than 20,000 barrels per day shall demonstrate mechanical integrity by using one of the following methods:

- (i) Conduct a pressure test of the casing tubing annulus at least once every year according to the minimum testing standards of (3) of this subsection, or
- (ii) If a continuous pressure monitor is installed on the casing tubing annulus that will automatically notify the operator of a mechanical failure, then the well shall demonstrate mechanical integrity at least once every five

years according to the minimum testing standards of (3) of this subsection.

(B) Noncommercial disposal wells permitted for injection at volumes less than 20,000 barrels per day and injection wells.

Unless a well has been approved by an order or permit of the Commission for other testing procedures or monitoring, each noncommercial disposal well permitted for injection at volumes less than 20,000 barrels per day, and each injection well permitted for injection shall demonstrate mechanical integrity at least once every five years according to the minimum testing standards of (3) of this subsection.

(C) Penalty for noncompliance. Any operator failing to comply with periodic mechanical integrity testing and reporting requirements may be fined up to \$500.00.

(2) Required retest if down-hole equipment is moved or replaced. After a well passes a pressure test required by this Section, if the operator moves the packer or replaces either the packer or the tubing, then the operator shall notify the Commission and retest the well according to the minimum testing standards of (3) of this subsection.

(3) Minimum testing standards.

(A) Wells with casing-tubing annulus. For a five year test or retest required by this subsection, the minimum testing standards of (b)(2) of this Section shall apply to wells with casing-tubing annulus with the following modifications:

(i) The District Manager shall have the option to waive witnessing of the test.

(ii) If the test is not witnessed due to waiver, the well operator shall submit documentation of the test to the Conservation Division within 30 days after the test.

(iii) The minimum testing pressure shall be 200 psig for a noncommercial disposal or injection well.

(B) Wells without a casing-tubing annulus or wells with perforations above the packer. For a five year test or retest required by this subsection, the minimum testing reporting standards of (c)(2)(B) of this Section, shall apply to wells without a casing-tubing annulus or wells with perforations above the packer.

(e) Subsequent mechanical integrity test requirements for commercial disposal wells.

(1) Pressure tests.

(A) The well shall be tested a minimum of every twelve (12) months according to the minimum testing standards of (b)(2) of this Section.

(B) After a well passes a pressure test required by this Section, if the operator moves the packer or replaces the packer or tubing, then the operator shall notify the Commission and retest the well according to the minimum testing standards of (b)(2) of this Section.

(C) Any operator failing to comply with periodic mechanical integrity testing and reporting requirements may be fined up to \$500.00.

(2) **Alternative testing procedures.** Operators can test at a maximum of 500 psi if there is in place an automatic and continuous pressure monitor on the tubing-casing annulus that will shut-in the well if there is a pressure increase of 250 psig on the annulus. Application for this alternative test procedure shall be made in writing to the Manager of the UIC Department. The Manager of the UIC Department may allow the alternative test procedure to be used as the initial mechanical integrity test, which permission shall be reflected in the order or permit regarding the well.

(f) **Fluid level monitoring required by UIC orders or permits to address wells ascertained during the permitting process that may require remediation.**

(1) **Fluid level monitoring.** The operator must perform on an annual basis fluid level monitoring tests if required by a UIC order or permit.

(2) **Fluid level test procedures.**

(A) Unless otherwise stated in UIC orders or permits for fluid level monitoring, the well must be shut in for a minimum of 48 hours before a fluid level test is performed. A variance to the 48-hour shut-in period may be granted by the Manager of the UIC Department if it can be demonstrated that reservoir pressure will stabilize prior to the expiration of the 48-hour time period.

(B) Fluid level test procedures shall be designed to determine reservoir pressure and such tests must be approved by the Conservation Division.

(C) The appropriate Field Inspector shall be notified at least 48 hours in advance of a fluid level test to allow a Commission representative an opportunity to witness the test.

(D) The operator is required to perform the fluid level monitoring test annually during the two month time period in May and June and submit the annual monitoring test results by June 30 of each year to the Manager of the Underground Injection Control Department.

(3) **Fluid level monitoring test failure.** If the fluid level in a well is determined to be within 150 feet or less below the base of treatable water, the test shall be deemed a failure, and the following actions must be performed:

(A) The operator shall immediately cease injection or disposal operations.

(B) The operator shall notify the Manager of the Underground Injection Control Department of the results within 24 hours of the performance of the fluid level test, and shall submit the results of the test and a corrective action plan in writing to such Manager within 7 days of the test.

(4) **Failure to perform fluid level test.** Any operator who fails to perform annual fluid level tests as required by a UIC order or permit pursuant to this subsection is subject to the following:

(A) Injection or disposal into the UIC well is prohibited until the operator performs the test and submits the results to the Manager of the Underground Injection Control Department.

(B) The operator may be fined up to \$1,000.00, and

(C) The UIC order or permit is subject to termination after notice and hearing.

165:10-5-7. Monitoring and reporting requirements for wells covered by 165:10-5-1

(a) **Scope.** This Section applies to:

- (1) Notice of Initial Commencement of Disposal Operations.
- (2) Report of Injection Projects, disposal wells and LPG storage wells on Form 1012 or Form 1012C.
- (3) Notice of Voluntary Termination of Operations on Form 1072.
- (4) Notice of mechanical failure or down-hole problems on Form 1075.

(b) **Notice of initial commencement of disposal operations.** The operator of a well permitted as a disposal well in the Arbuckle formation shall give at least 48 hours notice by electronic mail or facsimile to the Manager of Underground Injection Control regarding the time when initial disposal operations will begin.

(c) **Report of injection projects, disposal wells and LPG storage wells.**

(1) **Submit Form 1012.** Each operator of a disposal well, LPG storage well or an authorized waterflood, pressure maintenance project, gas repressuring project, or other enhanced recovery project shall submit Form 1012 for every well to the Conservation Division by January 31 for the previous calendar year for all noncommercial wells.

(2) **Submit Form 1012C.** Each operator of a commercial disposal well shall submit Form 1012C for every well to the Conservation Division by January 31 and July 31 for the previous six-month period.

(3) **Failure to submit Form 1012 or Form 1012C.** Any operator who fails to submit the report on Form 1012 or Form 1012C as required by (c)(1) and (c)(2) of this Section may be fined up to \$500.00 and:

(A) Injection into the project is prohibited until the operator submits Form 1012 or Form 1012C for each injection or disposal well.

(B) The order or permit is subject to termination.

(4) **Required monitoring.**

(A) On a monthly basis, the operator of each injection well and disposal well and LPG storage well shall monitor and record the injection rate and surface injection pressure for the well.

(B) On a daily basis, the operator of each well authorized for disposal into the Arbuckle formation shall monitor and record the volumes, the casing tubing annulus pressure and the surface injection pressure for the well. The operator must maintain the information required by this subparagraph for a minimum of three years. This information shall be produced upon request by an authorized representative of the Commission.

(5) **Requested monitoring and reporting within areas of interest regarding seismicity or potentially critical environmental or public safety impacts.** Upon request by the Manager of the Induced Seismicity Department, the following actions must be performed and the information provided to the Manager of the Induced Seismicity Department:

(A) Operators shall monitor on a daily basis volumes and pressures for wells authorized for disposal within areas of interest designated by the Oil and Gas Conservation Division regarding seismicity or

potentially critical environmental or public safety impacts. The information shall be submitted on Form 1012D at a minimum on a weekly basis or as designated by the Manager of the Induced Seismicity Department.

(B) Operators of wells authorized for disposal within areas of interest designated by the Oil and Gas Conservation Division regarding seismicity or potentially critical environmental or public safety impacts shall supply bottom hole pressure data using a method approved by the Manager of the Induced Seismicity Department.

(6) **All UIC wells.** Information regarding disposal wells, injection wells and storage wells shall be reported on Form 1012 or Form 1012C individually according to the order or permit authorizing disposal.

(d) Monitoring requirements for commercial disposal well.

(1) The operator of a commercial disposal well shall monitor and record the casing tubing annulus pressure and the injection pressure on a daily basis.

(2) The operator of a commercial disposal well shall make available upon request of the Commission a log of all loads of Class II fluids disposed at the well. The log shall be kept on file for a period of at least five (5) years. The log of record shall include at a minimum, the date and time the load was received, the volume, the legal description of the well and/or source, and the operator and/or owner of the source of the Class II fluids.

(e) Notice of voluntary termination.

(1) If an operator permanently terminates injection into a well, the operator shall submit to the Conservation Division Form 1072 within 30 days after termination of injection. Form 1072 shall state:

(A) The legal description of the well.

(B) The reason for termination.

(2) The operator is also required to file, along with the Form 1072, or a Form 1003 Plugging Record, a Form 1012 or Form 1012C for that portion of the calendar year the operator has operated the well prior to submitting the Form 1072 or Form 1003 to the Commission.

(3) Submission of Form 1072 to permanently terminate injection or a Form 1003 Plugging Record shall terminate the authority under the order.

(f) Notice of mechanical integrity problem.

(1) **Notice of mechanical failure or down-hole problem.** When a mechanical problem occurs, then:

(A) The well operator shall notify the Field Inspector for Conservation within 24 hours after discovery of the problem.

(B) Within five days after discovery of the problem, the well operator shall submit to the Manager of Underground Injection Control written notice of the failure and a plan to repair and/or retest the well.

(C) The well must be brought into compliance within ninety days after discovery of the problem.

(D) Repair shall be reported on the Form 1012 or Form 1012C for the well.

(E) Any operator failing to timely notify the Commission or bring the well into compliance may be fined up to \$1,500.00.

(2) **Notice of unreported repairs.** Any prior unreported repair of the well shall be reported on the next Form 1012 or Form 1012C to be submitted to

the Manager of the UIC Department.

(g) Shutdown or other action.

(1) **Administrative shutdown or other action regarding a well.** The Conservation Division may shut down or take other action, including the issuance or execution of administrative agreements, regarding a well pursuant to 17 O.S. § 52, 52 O.S. §139(D)(1) and other applicable authority, to address matters including, but not limited to, seismic activity, or if a mechanical failure or down-hole problem indicates that injected substances are not or may not be entering the injection interval authorized by order or permit of the Commission.

(2) **Request for technical conference.** If an operator objects to the shutdown or other action regarding its well by the Conservation Division, the operator shall submit a written request for a technical conference to the Director of the Conservation Division or designee within five business days of the date of the shut down notice or other Conservation Division action regarding the well. If a resolution of the shutdown or other action regarding the well is not reached by the operator and the Conservation Division after a technical conference occurs, then the provisions of paragraph (5) below are applicable.

(3) **Failure to request a technical conference.** Except for good cause shown, if an operator fails to timely submit a written request for a technical conference pursuant to paragraph (2) above, such failure shall be deemed to constitute an agreement by the operator to the shutdown or other Conservation Division action regarding the well.

(4) **Administrative authority to recommence injection.** After receiving a written request for a technical conference from an operator pursuant to paragraph (2) above, the Conservation Division may consider, but not be limited to, the following in determining whether the operator will be authorized to recommence injection into the well:

- (A) the mechanical integrity of the well for injection; and
- (B) if construction of the well demonstrates the injected substances are going into and are confined to the permitted injection interval.

(5) **Resolution of disputes by order of the Commission.** In the event of a dispute between the Conservation Division and the operator as to the suitability of a well for injection, the operator or the Conservation Division may seek relief by order of the Commission. Upon application, notice, and hearing pursuant to OAC 165:5-7-1 and other applicable Commission rules, the Commission may issue an order determining whether or not the well should be used for further injection.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 11 Ok Reg 3691, eff 7-11-94; Amended at 13 Ok Reg 2381, eff 7-1-96; Amended at 26 Ok Reg 2498, eff 7-11-09; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 30 Ok Reg 1041, eff 7-1-13; Amended at 31 Ok Reg 977, eff 9-12-14; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 593, eff 8-25-16; Amended at 34 Ok Reg 921, eff 9-11-17; Amended at 35 Ok Reg 973, eff 9-14-18; Amended at 36 Ok Reg 534, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-5-8. Liquid hydrocarbon storage wells

Authorization for storage wells will be granted by order of the Commission after notice and hearing, provided there is a finding that the proposed operation will not endanger fresh water strata.

165:10-5-9. Duration of underground injection well orders or permits

- (a) Subject to 165:10-5-10, 17 O.S. § 52, 52 O.S. §139(D)(1) and other applicable authority, authorization of injection into injection wells and disposal wells shall remain valid for the life of the well, unless revoked by the Commission for just cause or lapses and becomes null and void under the provisions of 165:10-5-5(h).
- (b) An order or permit granting underground injection may be suspended, modified, vacated, amended, or terminated during its term for cause. This may be at the Commission's initiative or at the request of any interested person through the prescribed complaint procedure of the Conservation Division. All requests shall be in writing and shall contain facts or reasons supporting the request.
- (c) An order or permit may be suspended or temporarily modified by the Commission pursuant to 17 O.S. § 52, 52 O.S. §139(D)(1), 165:10-5-7(g) and other applicable authority.
- (d) An order or permit may be permanently modified, vacated, amended, or terminated after notice and hearing if:
- (1) There is a substantial change of conditions in the injection well or the disposal well operation, or there are substantial changes in the information originally furnished.
 - (2) Information as to the permitted operation indicates that the cumulative effects on the environment are unacceptable.
- (e) If an operator fails to perform the initial mechanical integrity test on a well within eighteen (18) months after the effective date of the order or permit authorizing injection into the well, then the order or permit authorizing injection into the well shall expire.

[Source: Amended at 11 Ok Reg 3691, eff 7-17-94; Amended at 26 Ok Reg 2498, eff 7-11-09; Amended at 33 Ok Reg 593, eff 8-25-16; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-5-10. Transfer of authority to inject

- (a) An order or permit authorizing an injection well(s), disposal well, commercial disposal well, or hydrocarbon storage well(s) shall not be transferred from one operator to another without the following:
- (1) The new operator, or transferee, must comply with 165:10-1-10 before a change in operator is approved.
 - (2) Change of operator Form 1073I or Form 1073IMW must be signed by both the transferor and transferee, with both stipulating that the facts presented are true and correct as to the area covered and the wells being transferred. The new operator shall file Form 1073I or Form 1073IMW to notify the Conservation Division of any change of operation of any underground injection well within thirty (30) days of transfer of the well.
 - (3) Notice in writing to the Commission on Form 1073IMW. For transfers involving more than ten (10) wells, a transferor and transferee may file a single Form 1073IMW with the Conservation Division indicating the transfer of multiple wells, provided that such multiple well transfer shall be accompanied by a well list containing the following information for each well transferred:
 - (A) API number of the well;
 - (B) Well name and number;
 - (C) Legal location of the well, described by section, township and range; and
 - (D) The Commission Order or permit number(s) authorizing the injection, disposal, or hydrocarbon storage activity.

(4) The well list may be provided in spreadsheet form, if possible, and may be filed in digital format specified by the Conservation Division. In lieu of the information listed in subparagraphs (a)(3)(A) through (D), the transferor and transferee, at their option, may file one Form 1073IMW indicating the transfer of multiple wells with an OCC Form 1002A Completion Report attached for each well transferred. Upon review by the Conservation Division, it may require additional information from the transferor and/or the transferee to assist in identifying the specific well(s) being transferred. The additional information may include, but not be limited to, the quarter, quarter, quarter section calls, footages from the south and west quarter section lines, and the drilling and completion dates, and initial injection, disposal or storage dates.

(5) Notice in writing to the Commission on Form 1075 demonstrating that a mechanical integrity test was performed within one year prior to the date of transfer. For commercial disposal wells, the Mechanical Integrity Test shall be conducted within 30 days prior to the date of transfer.

(6) The performance of the mechanical integrity test required in (a)(5) of this subsection shall not apply to any operator transfer when the following conditions are present:

(A) The interest of the currently designated operator is transferred to its subsidiary or parent company, or a subsidiary of a parent company;

(B) The interest of the currently designated operator is transferred to a surviving or resulting corporation or business entity due to, respectively, a merger, consolidation or reorganization involving the transferor and transferee. As used in this subparagraph, "business entity" means a domestic or foreign partnership, whether general or limited; limited liability company; business trust; common law trust, or other unincorporated business; or

(C) The currently designated operator undergoes a name change. The relief afforded by this subparagraph is not applicable to situations where the name change involves the following conditions:

(i) The assignment of a new Federal Employer Identification number by the Internal Revenue Service to the new company;

(ii) The name change is accompanied by a change in the majority of partners in a partnership;

(iii) The name change is associated with a divorce between a husband and wife when the husband and wife comprise a partnership;

(iv) The name change is associated with the death of one spouse in a partnership comprised of a husband and wife;

(v) The name change involves a sole proprietorship; or

(vi) The name change is associated with such other circumstances where the Commission determines upon application, notice and hearing that the relief provided in this subparagraph is not applicable, or that an exception to any exclusion should be granted.

(vii) As used in this subparagraph, the term "partnership" means a domestic or foreign partnership, whether general or

limited.

(7) A Form 1012, Form 1012C or Form 1012D for that portion of the calendar year the transferor has operated the well prior to submitting the Form 1073I to the Commission.

(b) The Conservation Division shall notify both the transferor and transferee in writing within thirty (30) days of the Conservation Division's approval or disapproval of the transfer of authority to inject for the subject well(s).

(c) If an operator is not in compliance with an enforceable order or permit of the Commission, the Conservation Division shall not approve any Form 1073I or Form 1073IMW transferring well(s) to said operator until the operator complies with the order or permit. The transferor of the well(s) listed on the Form 1073I or Form 1073IMW remains responsible for the well(s) until any transfer is approved by the Commission.

(d) Before the operatorship of a well can be transferred to a new operator when the current or former operator is unavailable for signature, one of the following may be submitted as proof of operatorship:

(1) A certified copy of a recorded lease or assignment transferring all rights, title, and interest to the wells described on Form 1073I or Form 1073IMW to the new operator.

(2) A certified copy of a journal entry of judgment rendered by a district court of Oklahoma having jurisdiction over the wells described on Form 1073I or Form 1073IMW vesting legal title to the new operator.

(3) A certified copy of a bankruptcy proceeding by the bankruptcy court having jurisdiction over the wells described on Form 1073I or Form 1073IMW.

[Source: Amended at 13 Ok Reg 2381, eff 7-1-96; Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 17 Ok Reg 802, eff 12-28-99 (emergency); Amended at 17 Ok Reg 1860, eff 7-1-00; Amended at 33 Ok Reg 593, eff 8-25-16; Amended at 34 Ok Reg 921, eff 9-11-17; Amended at 36 Ok Reg 534, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-5-11. Notarized reports

In lieu of notarization, all Conservation Division reports shall contain the following statement signed and dated by the responsible party representing the entity which is submitting the report:

"I declare that I have knowledge of the contents of this report, which was prepared by me or under my supervision and direction, with the data and facts stated herein to be true, correct, and complete to the best of my knowledge and belief".

165:10-5-12. Application for administrative approval for the subsurface injection of onsite reserve pit fluids

Except upon a case-by-case approval of the Commission pursuant to 165:10-5-13, the subsurface injection of reserve pit fluids is prohibited into:

(1) A newly drilled well which is to be plugged and abandoned, or

(2) The casing annulus of:

(A) A well being drilled.

(B) A recently completed well.

(C) A well which has been worked over.

165:10-5-13. Application for permit for one time injection of reserve pit fluids

(a) **General.**

- (1) Injection of reserve pit fluids shall be limited to injection of only those fluids generated in the drilling, deepening, or workover of the specific well for which authorization is requested.
- (2) An annular injection site shall be inspected by a duly authorized representative of the Commission prior to injection.
- (3) The applicant shall file with the Underground Injection Control an affidavit of delivery or mailing not later than five days after the application is filed.
- (4) An operator who disposes of drilling fluid into the surface casing or annulus without approval from the Manager of Pollution Abatement may be fined up to \$2,500.00.

(b) Criteria for approval.

- (1) Intermediate casing injection may be authorized if injection will not endanger treatable water and provided that intermediate casing is set at least 200 feet below the base of treatable water, except as otherwise provided by the Commission.
- (2) Injection pressure shall be limited so that vertical fractures will not extend to the base of treatable water.
- (3) **Required form and attachments.** Each application for annular injection shall be submitted to the UIC Department on Form 1015T. The form must be properly completed and signed. Attached to the form shall be the following:
 - (A) Affidavit of mailing a copy of the Form 1015T or Form 1000 to the landowner and to each operator of a producing lease within 1/2 mile of the subject well.
 - (B) Cement Bond Log of subject well (if run).
- (4) **Expiration of the permit.** The permit shall expire on its own terms three months after the date of issuance of the permit.

(c) Emergency authority to inject into the annulus. The Manager of the UIC Department may grant emergency authority to inject pit fluids into the annulus provided an imminent environmental endangerment exists.

(d) Protest period. If no protest is received within 15 days of the mailing of Form 1015T, the application shall be submitted for administrative approval. If a protest is received within the protest period, the operator shall, within 30 days, set and give proper notice of a date for hearing on the Pollution Docket before an Administrative Law Judge.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 13 Ok Reg 2381, eff 7-1-96; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-5-14. Exempt aquifers

(a) Upon application after notice and hearing, the Commission may issue an order designating an underground source of drinking water (USDW) as an exempted aquifer if the USDW:

- (1) Does not currently serve as a source of drinking water.
- (2) Cannot now and has no reasonable future prospect of serving as a source of drinking water because:
 - (A) It is mineral, hydrocarbon or geothermal energy producing source; or
 - (B) It is situated at a depth or location which makes recovery of water for drinking water purposes economically or technologically impractical; or

- (C) It is so contaminated that it would be economically or technologically impractical to render that water fit for human consumption.
- (b) For purposes of 165:10-3-4 and 165:10-5-2 through 165:10-5-13, an exempted aquifer shall not be considered as productive of treatable water.
- (c) Each application under subsection (a) of this Section shall comply with 165:5-7-28.
- (d) Each order designating a USDW as an exempted aquifer shall be subject to approval by the U.S. Environmental Protection Agency.

165:10-5-15. Application for permit for simultaneous injection well

(a) General.

- (1) Simultaneous injection of salt water without a valid permit from the Underground Injection Control Department may result in the assessment of a fine up to \$5,000 per day of operation.
- (2) A simultaneous injection facility shall be inspected by a representative of the commission prior to operation.

(b) Criteria for approval.

- (1) Simultaneous injection may be permitted if the following conditions are met and injection will not adversely affect offsetting production nor endanger treatable water.

- (A) Injection zone is located below the producing zone in the borehole.

- (B) Injection pressure is limited to less than the local fracture gradient.

- (C) If injection is by gravity flow, no Area of Review will be required.

- (D) If injection is by positive pump pressure, a 1/4 mile Area of Review will be required. If unplugged or mud-plugged boreholes are located within the 1/4 mile radius, the operator of the proposed simultaneous injection well will be required to reconcile these boreholes prior to a permit being issued.

- (E) Simultaneous injectors must meet the requirements of 165:10-3-4 as they apply to producing wells.

- (F) Simultaneous injectors may be authorized to accept produced water from other wells. The UIC Department will determine on a case-by-case basis whether such a well warrants designation as a simultaneous injector, or whether the well requires a Commission order.

- (2) **Required form and attachments.** Each application for simultaneous injection shall be submitted to the UIC Department on Form 1015SI in quadruplicate. The forms must be properly completed and signed. Attached to one copy of the application form shall be the following:

- (A) Affidavit of mailing a copy of the completed Form 1015SI to each operator of a producing lease within 1/2 mile of the subject well.

- (B) Schematic diagram of the well showing all casing and tubing strings, packers, perforations and pumps.

- (3) **Monitoring, testing and reporting requirements for simultaneous injection wells.**

(A) Upon receiving a permit, operator shall file an amended Completion Report Form 1002A within 30 days of recompletion.

(B) Mechanical integrity will be demonstrated by filing annual reports of surface casing pressure, production casing pressure and fluid level.

(C) Annual Report Form 1012 shall be submitted by January 31 of each year for the previous calendar year and semi-annual report Form 1012C shall be submitted by January 31 and July 31 of each year for the previous six-month period.

(4) If no protest is received within 15 days of the mailing of Form 1015SI, the application shall be submitted for administrative approval. If a protest is received within the protest period, the operator shall, within 30 days, set and give proper notice of a date for hearing on the Pollution Docket before an Administrative Law Judge.

(c) **Expiration of the permit.** The permit shall expire on its own terms if the subject well is not recompleted or if a revised Form 1002A is not submitted within 180 days from the date on the permit.

[Source: Added at 13 Ok Reg 2381, eff 7-1-96; Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 34 Ok Reg 921, eff 9-11-17; Amended at 35 Ok Reg 973, eff 9-14-18]

SUBCHAPTER 7. POLLUTION ABATEMENT

PART 1. GENERAL PROVISIONS

165:10-7-1. Pollution abatement [RESERVED]

165:10-7-2. Administration and enforcement of rules

(a) The Manager of Pollution Abatement and/or the Manager of the Underground Injection Control Department shall supervise and coordinate the administration and enforcement of the rules of this Subchapter under the direction of the Director of Conservation and the Commission.

(b) Site assessments and remediation projects for petroleum and produced water pollution should adhere to the general practices appearing in the Oil and Gas Conservation Division's Guardian Guidance document including the Guidelines and Numerical Criteria for New or Historic Produced Water/Brine Spills Appendix. Any alternative plan shall be approved by the Manager of Pollution Abatement prior to implementation.

(c) **Specific areas of Conservation Division jurisdiction to which Pollution Abatement and/or Underground Injection Control rules apply:**

(1) Field operations for geologic and geophysical exploration for oil, gas and/or brine, including seismic shot holes, stratigraphic test holes or other test wells.

(2) Exploration, drilling, development, production or processing of oil, gas and/or mineral brine at the lease site.

(3) The exploration, drilling development and operation of wells used in connection with the recovery, injection, or disposal of mineral brines including construction, operation, maintenance, closure and abandonment of the facilities and activities.

(4) Reclaiming and/or recycling facilities associated with the exploration, drilling, development, production or transportation of oil and/or gas (including the processing of saltwater, crude oil, natural gas condensate,

tank bottoms or basic sediment from crude oil tanks, pipelines, pits and equipment).

(5) Underground injection control pursuant to the federal Safe Drinking Water Act and 40 CFR parts 144 through 148 for Class II injection wells, Class V wells used for the recovery, injection or disposal of mineral brines as defined in the Oklahoma Brine Development Act.

(6) Tank farms for storage of crude oil and petroleum products located outside the boundaries of refineries, petrochemical manufacturing plants, natural gas liquid extraction plants, or other facilities that are not subject to the jurisdiction of the Oklahoma Department of Environmental Quality.

(7) Construction and operation of pipelines and associated rights-of-way, equipment, facilities or buildings used in the transportation of oil, gas, petroleum, petroleum projects, anhydrous ammonia or mineral brine, or in the treatment of oil, gas or mineral brine during the course of transportation [not including pipelines in natural gas liquids extraction plants, refineries, or reclaiming facilities other than those specified in OAC 165:10-7-2(c)(6).

(8) The handling, transportation, storage and disposition of saltwater, drilling fluids, mineral brines, waste oil and other deleterious substances produced from or obtained or used in connection with the drilling, development, production, and operation of oil and gas wells at any facility or activity specifically subject to Commission jurisdiction or other oil and gas extraction facilities and activities.

(9) Spills of deleterious substances associated with facilities and activities specified in OAC 165:10-7-2(c)(8) or otherwise associated with oil and gas extraction and transportation activities.

(10) Groundwater protection for activities subject to the jurisdictional areas of environmental responsibility of the Commission.

(d) Monitoring of sites. Before consideration for closure by the Conservation Division or the Commission, the responsible party shall monitor a remediation project subject to implementation of the water quality standards for a period of one (1) year, unless:

- (1) Otherwise provided by Commission order, or
- (2) As directed by the Manager of Pollution Abatement or designated Conservation Division staff.

(e) Public participation; Resolution of complaint or disagreement with Conservation Division staff.

(1) In any case where the Conservation Division determines the need for public participation in the resolution of a pollution complaint involving the implementation of the water quality standards or other issues relating to pollution, the Conservation Division may file an application and notice of hearing to request resolution of the complaint by adjudicative hearing and Commission order.

(2) In any case where a pollution complaint involving the implementation of the water quality standards or other issues relating to pollution cannot be resolved administratively between the responsible party and the complainant or because of a disagreement with the Conservation Division's Manager of Pollution Abatement, Manager of Field Operations, or other Conservation Division staff, regarding the complaint, the responsible party or the complainant may file an application and notice of hearing to request resolution of the complaint by adjudicative hearing and Commission order.

[Source: Amended at 26 Ok Reg 2498, eff 7-11-09; Amended at 35 Ok Reg 973, eff 9-14-18; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:10-7-3. Cooperation with other agencies

(a) The rules of this Subchapter shall not be construed as modifying the rights, obligations, or duties of any person under any law of this State or under any order, rule, or regulation of the Oklahoma Water Resources Board, State Department of Health, Oklahoma Wildlife Conservation Commission, State Board of Agriculture, Department of Environmental Quality, or any other agency of this State with respect to the pollution of fresh water.

(b) Whenever a written complaint against any person is filed with the Commission alleging pollution as prohibited by 165:10-7-5, the Manager of Pollution Abatement shall immediately initiate such action as may be necessary or appropriate to abate the pollution.

(c) OPERATORS TAKE NOTE: Federal statutes, such as the Bald Eagle Protection Act (16 U.S.C. Sections 668-668d), the Migratory Bird Treaty Act (16 U.S.C. Sections 703-711), the Endangered Species Act (16 U.S.C. Sections 1531-1542), and the Lacey Act Amendments of 1981 (16 U.S.C. Sections 3371-3378), dictate substantial fines and penalties for persons who allow birds of certain species to become fatally injured due to incidental contact with oil or oil by-products. These fines may be levied upon persons allowing such fatalities to occur, whether accidental or not. Misdemeanor and felony convictions may include imprisonment. Information on affected bird species, regulations under these Acts, and measures which can be taken to prevent such occurrences, such as the netting or covering of open-topped tanks and pits which contain oil or oil by-products, can be obtained from the U.S. Fish and Wildlife Service Office in Oklahoma City or the nearest Oklahoma Department of Wildlife Office.

(d) **Operators drilling in the Arbuckle-Simpson Aquifer.** The Arbuckle-Simpson Aquifer located in Pontotoc, Murray, and Johnston Counties has unique and unusual hydrogeologic conditions. Any operator intending to drill in this area should contact the Technical Services Department of the Oil and Gas Conservation Division prior to filing an intent-to-drill. The Technical Services Department may request a technical meeting prior to approval of an intent-to-drill to determine if additional protection of this aquifer is necessary.

[Source: Amended at 23 Ok Reg 2229, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:10-7-4. Water quality standards

(a) **Scope.** The Commission hereby adopts the State water quality standards established and promulgated by the Oklahoma Water Resources Board (OWRB) or its successors effective October 7, 1987, and additions and revisions as lawfully published in the Oklahoma Register effective as provided by statute. The Commission's Oil and Gas Conservation Division (Conservation Division) shall implement the water quality standards with regard to its particular jurisdictional areas as referred to in 165:10-7-2(c).

(b) General considerations.

(1) The primary goal of the implementation of the water quality standards in the context of a remediation project subject to Commission jurisdiction shall be the protection and/or restoration of the beneficial use of the land, the soil and any surface or subsurface waters of the State adversely impacted or impaired by pollution from a Commission regulated site or facility.

(2) A remediation project utilizing the water quality standards shall adhere to the general practices appearing in the Conservation Division's *Oklahoma Water Quality Standards Implementation Plan (WQSIP)*.

(3) Where appropriate, a remediation project utilizing the water quality standards shall follow the use support assessment protocols (OWRB-OAC 785:46-7) as specified in *Oklahoma Water Quality Standards Implementation Plan*.

[Source: Amended at 18 Ok Reg 2370, eff 7-1-01; Amended at 26 Ok Reg 2498, eff 7-11-09]

165:10-7-5. Prohibition of pollution

(a) **General.** Pollution is prohibited. All operators, contractors, drillers, service companies, pit operators, transporters, pipeline companies, or other persons shall at all times conduct their operations in a manner that will not cause pollution.

(b) **Workable coal seams.** Sections 305, 306, 307, and 308 of Title 52, Oklahoma Statutes Annotated, governing the drilling, operations, and plugging of oil and gas wells in workable coal beds are hereby adopted as rules of the Commission as fully as if set out verbatim herein.

(c) **Reporting nonpermitted discharges (spills, etc.).**

(1) All operators, contractors, drillers, service companies, pit operators, transporters, pipeline companies, or other persons conducting operations regulated by the Commission shall:

(A) Report by telephone, or by electronic mail, with respect to their operations, to the Commission District Office or Field Inspector within 24 hours of discovery:

(i) Any non-permitted discharge of deleterious substances of ten bbls. or more (single event) to the surface.

(ii) Any discharge of a deleterious substance, regardless of quantity, to the waters of the State.

(iii) Name of party reporting, firm name, telephone number, and electronic mail address.

(iv) Legal location.

(v) Lease or facility name.

(vi) Operator.

(vii) Circumstances surrounding discharge of deleterious substance(s) and whether discharge was to water or soil.

(viii) Date of occurrence.

(ix) Volumes of deleterious substance(s) discharged.

(x) Type of materials discharged.

(xi) Method of cleanup (if any) undertaken and completed.

(xii) Volumes of deleterious substance(s) recovered.

(xiii) Estimated time period for reclamation.

(xiv) Plan for continued remedial undertaking (upon request by the Pollution Abatement Department).

(B) Maintain adequate records of each non-permitted discharge reflecting the information, time, and manner of reporting pursuant to this Section for a minimum of three (3) years. Such documents shall be produced upon demand by an authorized representative of the Commission.

(C) Report hazardous substances that meet reportable quantities under Comprehensive Environmental Response Compensation and Liability Act (CERCLA) (40 C.F.R. Part 302) in the format as

required under this subsection.

(2) Any operator, contractor, driller, service company, pit operator, transporter, or pipeline company who fails to comply with provisions of this rule may be fined \$500.00 per incident.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 9 Ok Reg 2337, eff 6-25-92; Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 29 Ok Reg 950, eff 7-1-12; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 36 Ok Reg 534, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 1-1-20]

165:10-7-6. Protection of public water supplies

The Commission, upon application of any municipality or other governmental subdivision, may enter an order establishing special field rules within a defined area to protect and preserve fresh water and fresh water supplies.

[Source: Amended at 32 Ok Reg 768, eff 8-27-15]

165:10-7-7. Informal complaints, red tags, and shut down of operations

(a) This Section applies only to Field Operations Department of the Oil and Gas Conservation Division.

(b) For an alleged violation of an order or provision of this Chapter, a district manager or field inspector may attempt to contact the alleged violator or his agent, in person, by telephone or by sending a Form 1085. The Form 1085 may be mailed or emailed to the last known address of the alleged violator according to Commission records.

(c) Where surface or subsurface pollution is apparent, a district manager or field inspector may direct an alleged violator to take steps necessary to stop and/or clean up pollution. Said steps may include a temporary shut down of the lease or facility. If an alleged violator cannot be located, the district manager or field inspector may take emergency action necessary to abate pollution.

(d) If the inspection shows that the alleged violator failed to comply as directed, the district manager or field inspector may:

(1) Refer the matter to the Office of General Counsel for prosecution, and/or

(2) Temporarily shut down the lease or facility until further notice from the Commission.

(e) In shutting down a lease or facility, the district manager or field inspector shall affix at the site a red tag (directive to shut down). If the alleged violator removes or ignores a red tag, the district manager or field inspector shall refer the matter to the Office of General Counsel for prosecution, and the Commission may levy a fine up to \$5,000.00.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 12 Ok Reg 2017, eff 7-1-95; Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 35 Ok Reg 973, eff 9-14-18; Amended at 36 Ok Reg 534, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 1-1-20]

165:10-7-8. Inspection and enforcement [RESERVED]

165:10-7-9. Scheduled monetary fines [REVOKED]

[Source: Added at 9 Ok Reg 2295, eff 6-25-92; Revoked at 37 Ok Reg 1121, eff 1-1-20]

165:10-7-10. Registration for land application of deleterious substances

(a) All persons who contract to land apply fluids pursuant to OAC 165:10-7-17, OAC 165:10-7-19, OAC 165:10-7-26 or OAC 165:10-9-2 shall:

(1) Comply with OAC 165:30-3-11, OAC 165:30-3-13, all applicable laws and all applicable Commission rules regarding Deleterious Substance Transport Permits; and

(2) Submit to the Conservation Division a performance bond in the amount of \$50,000.00, or other form of surety in an amount as approved by the Manager of the Pollution Abatement Department. The form of surety shall include an irrevocable commercial letter of credit, cash, a cashier's check, a certificate of deposit, a blanket surety bond, or other approved negotiable instrument. Financial statements are not an acceptable form of surety. The surety may be released upon request made no sooner than thirty (30) days subsequent to the completion of operation(s) that have been permitted under such surety, if Conservation Division personnel determine, after inspection or review, that the release of surety is appropriate.

(b) Any person violating this Section may be fined in an amount up to \$2,500.00. Any operation in violation of this Section may be shut down pending compliance with this Section.

PART 2. ANODE GROUNDBEDS

165:10-7-14. Anode groundbeds

(a) **Definitions.** The following words or terms, when used in this Section, shall have the following meaning, unless the context clearly indicates otherwise:

(1) "**Anode**" means the electrode of an electrochemical cell at which oxidation occurs.

(2) "**Cathodic protection**" means a technique used to reduce the corrosion of a metal surface by making that surface the cathode of an electrochemical cell.

(3) "**Deep anode groundbed**" means one or more anodes installed vertically at a depth of fifty (50) feet or more below the earth's surface in a drilled hole for the purpose of providing cathodic protection.

(4) "**Shallow anode groundbed**" means one or more anodes installed either vertically or horizontally at a nominal depth of less than fifty (50) feet.

(5) "**Annular space**" means the space between the surface casing and the borewall or the space between two or more strings of casing placed in the borehole.

(6) "**Operator**" means the person who is duly authorized and in charge of the development of the operation of the pipeline or the development of a lease for the production of hydrocarbons.

(b) **Permit to drill.**

(1) The operator shall make application on Form 1000B and obtain a permit to drill a deep anode groundbed.

(2) A permit to drill shall be valid only for one or more deep anode groundbeds within a designated 10 acre tract.

(3) The Commission shall approve or deny the application within 30 days of date of receipt.

(4) Any contractor drilling a deep anode groundbed shall be licensed within the State of Oklahoma.

(5) Any operator who drills a deep anode groundbed without a permit may be fined up to one thousand dollars (\$1,000.00).

- (c) **Expiration.** A permit to drill shall expire six (6) months from the date of issuance, unless drilling operations are commenced.
- (d) **Posting of permit to drill at the site.** During any activity subject to this Section the operator shall maintain at the site a legible copy of the permit to drill for inspection.
- (e) **Notice.** The Commission's District Manager or Field Inspector shall be given at least twenty-four (24) hours notice prior to commencing drilling operations.
- (f) **Notice of failure to comply with permit conditions.** The operator shall notify the district office or the field inspector within twenty-four (24) hours of any failure to comply with the construction requirements approved on the permit.
- (g) **Deep anode groundbed abandonment.**
- (1) In the event the hole is lost during drilling, the hole will be plugged as soon as possible.
 - (2) Upon abandonment of a deep anode groundbed, the hole shall be plugged within thirty (30) days of abandonment.
- (h) **Construction standards.**
- (1) **Shallow anode groundbeds.**
 - (A) Shallow anode groundbeds shall be constructed in order to prevent runoff water from entering the anode system or the commingling of water from separate groundwater bearing formations.
 - (B) Vertical shallow groundbeds shall be sealed by backfilling the hole with native cuttings or an approved sealing material.
 - (2) **Deep anode groundbeds.**
 - (A) Deep anode groundbeds shall be constructed in order to prevent runoff water from entering the anode system or the commingling of groundwater formations with different water quality.
 - (B) Surface casing shall be set a minimum of twenty (20) feet below ground level, or at a depth previously approved by the Oil and Gas Division's Technical Department.
 - (C) If surface casing is not placed in the hole, the hole shall be filled with bentonite or cement from the top of the Coke Breeze Column to three (3) feet below surface. Native cuttings or soil shall be used to fill the remaining portion of the hole.
 - (D) The annular space between the casing and drilled hole shall be a minimum of two (2) inches to allow for a proper seal.
 - (E) The sealing material for the annular space for surface casing shall be bentonite, cement or a material previously approved by the Oil and Gas Division's Technical Department.
 - (F) Centralizers shall be used at a minimum of one (1) for every twenty-five (25) feet of surface casing run in the hole unless previously approved by the Oil and Gas Division's Technical Department on form 1000B.
 - (G) The groundbed shall be capped to prevent the entry of foreign material. Allowances for a vent pipe will be approved.
- (i) **Groundbed materials.** Groundbed materials that do not contaminate groundwater shall be required at all times.
- (j) **Plugging requirements.**
- (1) All wires and vent pipe must be cut off at the top of the ten (10) foot surface plug, and the vent pipe must be securely capped and plugged.

- (2) Cased holes shall be filled to at least ten (10) feet from the surface with native cuttings, anode materials, cement or with a material approved by the Pollution Abatement Department.
- (3) Cement or bentonite shall be placed in the hole at a minimum of ten (10) feet below the surface to within three (3) feet of the surface. The remainder of the hole shall be filled with native cuttings, soil or a material approved by the Pollution Abatement Department.
- (4) If the standard method is inadequate to stop artesian flow, alternate remedies must be employed to do so.
- (5) All holes shall be properly completed or plugged to protect groundwater.

[Source: Added at 14 Ok Reg 2198, eff 7-1-97; Amended at 28 Ok Reg 1949, eff 7-11-11]

PART 3. STORAGE AND DISPOSAL OF FLUIDS

165:10-7-15. Drilling or seismic activity near superfund sites or hazardous waste facilities

Any drilling or seismic activity related to oil or gas exploration or production shall be prohibited within 500 feet of the boundary of any superfund site pursuant to the Comprehensive Environmental Response Compensation and Liability Act (CERCLA), 42 U.S.C. Sections 9601, et. seq., or active hazardous waste treatment, storage, or disposal facility. A current listing of all superfund sites and active hazardous waste facilities is available from the Manager of Pollution Abatement. Seismic work, monitoring wells, or recovery wells necessary for identification, monitoring, or remediation of the superfund site or hazardous waste facility shall be exempt from this Section. Any request for exception to this Section shall comport with the requirements generally for filing of applications under the Commission's Rules of Practice (see 165:5-7-1); in addition, notice shall be given to the Oklahoma State Department of Health, 1000 Northeast Tenth Street, Oklahoma City, Oklahoma 73152.

165:10-7-16. Use of noncommercial pits

(a) **Scope.** This Section shall cover the permitting, construction, operation, and closure requirements for any noncommercial pit. A noncommercial pit is an earthen pit which is located either on-site or off-site and is used for the handling, storage, or disposal of drilling fluids and/or other deleterious substances produced, obtained, or used in connection with the drilling and/or operation of a well or wells, and is operated by the generator of the waste. This does not cover disposal well pits. (See 165:10-7-20 and 165:10-9-3.)

(b) Liner requirements.

(1) Reserve/circulation and/or completion/fracture/workover pits.

(A) To assist in determining the construction requirements for a particular proposed reserve/circulation pit, either on-site or off-site, the operator of the pit shall indicate on Form 1000 the type of mud system(s) to be used, the maximum and average anticipated chloride concentration of the mud (based on drilling records in the area), whether or not pit fluids will be segregated, and shall furnish other information required by this Section or requested by the Commission's Technical Services Department.

(B) The Commission's Technical Services Department shall evaluate the site based upon Oklahoma Geological Survey maps

and other pertinent information and shall assign one of the following categories to any proposed reserve/circulation pit, designating same on Form 1000 and indicating whether or not a liner is required:

(i)

(I) Any pit used to contain water-based drilling fluids, cuttings and/or completion/fracture/workover fluids located in alluvial deposit area or an area where the static water table is within 10 feet of the surface shall utilize a geomembrane liner for all drilling fluids and cuttings and/or completion/fracture/workover fluids.

(II) Any pit used to contain water-based drilling fluids, cuttings and/or completion/fracture/workover fluids located within a wellhead protection area (WPA) as identified by the Wellhead Protection Program (42 U.S.C. Section 300h-7, Safe Drinking Water Act), or within one mile of public water well for which the WPA has not been delineated, shall be required to have a geomembrane liner.

(ii)

(I) Any pit used to contain water-based drilling fluids, cuttings and/or completion/fracture/workover fluids located over a terrace deposit shall be required to have either a soil liner or a geomembrane liner.

(II) Any pit used to contain water-based drilling fluids, cuttings and/or completion/fracture/workover fluids located over any bedrock aquifer or HSA and is used to contain water-based drilling fluids and/or cuttings and/or completion/ fracture/workover fluids with chlorides in excess 5,000 mg/l shall be required to have a soil liner or a geomembrane liner. A separate unlined pit may be used to contain fluids and/or cuttings with a chloride content of less than of 5,000 mg/l.

(iii) Any pit which is used to contain water-based drilling fluids, cuttings and/or completion/fracture/ workover fluids with a set of conditions different from Categories 1A and 1B shall not be required to be lined.

(iv) Any pit used to contain oil-based drilling fluids, cuttings and/or completion/ fracture/workover fluids shall be required to have a geomembrane liner.

(v) Any pit used to contain the cuttings from an air-based system shall not be required to be lined. The discharge of produced water into a category 4 pit is prohibited.

(2) Other type pits.

(A) Any basic sediment pit shall be required to have a geomembrane liner.

(B) Any emergency pit shall not be required to be lined.

(C) Any flare pit shall not be required to be lined.

(D) Any recycling/reuse pit, spill containment pit, slit trench, or remediation pit shall conform to the same criteria for determining liner requirements for reserve/circulation and/or completion/fracture/workover pits, pursuant to (b)(1) of this Section.

(3) **Converted pits.** Any pit that is to be converted from one use to another, e.g., reserve pit to completion or fracture pit, shall have the more stringent liner requirements, pursuant to (c)(6) and (c)(7) of this Section.

(4) **Offsite pits.** Any offsite pit shall conform to the liner requirements in this Section and will require a permit. The operator of the proposed pit shall submit Form 1014 to the appropriate Conservation Division District Office for review and approval. No offsite reserve pit may be permitted or constructed at a spacing closer than one pit per governmental quarter quarter section and a distance less than 600 feet from any other pit. Any offsite reserve pit may be reclassified or considered as a commercial pit, pursuant to 165:10-9-1, if it is constructed or used at a spacing closer than one reserve pit per governmental quarter quarter section. Closure of any offsite reserve pit shall not warrant the permitting of another offsite reserve pit within the same governmental quarter quarter section. For use of a pit without a permit, the pit operator may be fined up to \$1,000.00.

(5) **Variations.** Any variance from the liner requirements of this Section may be granted by the Manager of the Technical Services Department after receipt of a written request and supporting documentation required by the Department.

(c) Construction requirements.

(1) **Field or area rules.** Any noncommercial pit which is to be constructed or used in an area covered by a field or area rule shall be subject to the more stringent requirements of either this Section or the field or area rule.

(2) **Stockpiling of topsoil.** Prior to constructing any noncommercial pit, except an emergency pit, all top soil within the top twelve inches shall be stripped and stockpiled for use as the final cover of fill at the time of closure. The top soil may be stockpiled in the berms, provided it is not mixed with other materials and can be readily distinguishable from other materials at the time of closure.

(3) **Exclusion of runoff water.** Any noncommercial pit shall be constructed and maintained so that runoff water from outside the location is not allowed to enter it.

(4) **Flood protection.** Any noncommercial pit which is constructed in any area subject to frequent flooding according to the Soil Conservation Service County Soil Survey shall have berms substantial enough to prevent overtopping or washing out.

(5) **Constructing on fill.** Any noncommercial pit which requires a liner and is constructed on fill shall be constructed so that the maximum level of the solid contents will be maintained at least three feet below the natural ground level.

(6) Soil liners.

(A) Soil materials used or to be used in a soil liner shall undergo permeability testing either before or after construction, unless exempt pursuant to (B) of this paragraph.

(i) Pre-construction permeability testing shall consist of laboratory permeability tests on at least two specimens of

representative soil liner materials compacted in the laboratory to approximately 90 percent of the material's Standard Proctor Density (ASTM D-698).

(ii) Post-construction permeability testing shall consist of at least two laboratory permeability tests on undisturbed samples of the completed soil liner or one field permeability test on the completed soil liner. Particular emphasis shall be placed on selecting the location(s) for permeability tests or test samples where nonuniformity in soil texture or color can be observed.

(iii) Laboratory permeability test procedures must conform to one of the methods described for fine-grained soils in the Corps of Engineers Manual EM-1110-2-1906 Appendix VII. In no case shall the pressure differential across the specimen exceed five feet of water per inch of specimen length. Field permeability tests shall be conducted only by the double ring infiltrometer method as described in ASTM D-3385. Permeability tests may be discontinued prior to flow stabilization upon satisfactory evidence that the permeability rate is less than 1.0×10^{-6} cm/sec.

(iv) If permeability testing shows that addition of bentonite or other approved material is needed to assist the native soils in meeting the permeability standard, it shall be applied at a minimum rate specified by the testing or engineering firm. Any bentonite used for liner material shall not have been previously used in drilling muds.

(B) Permeability testing requirements for soil materials may be exempt if laboratory testing of a minimum of two representative samples of the soil materials found throughout the entire depth of the proposed excavation indicates that the plasticity index is greater than 16 (ASTM D-4318) and that the amount passing the No. 200 U.S. standards sieve is greater than 60 percent (ASTM D-1140).

(C) Any soil liner shall be constructed by disturbing the soil to the depth of the bottom of the liner, applying fresh water as necessary to the soil materials to achieve a moisture content wet of optimum, then recompacting it with heavy construction equipment, such as a footed roller, until the required density is achieved, pursuant to (H) of this paragraph.

(D) Any soil liner shall cover the bottom and interior sides of the pit entirely.

(E) Any soil liner shall be installed on a slope no steeper than 3:1 (horizontal to vertical).

(F) Any soil liner shall have a minimum thickness of six inches (after compaction), and shall have a maximum coefficient of permeability of 1.0×10^{-6} cm/sec, unless it conforms to (G) of this paragraph.

(G) A soil liner may have a coefficient of permeability greater than 1.0×10^{-6} cm/sec if it is greater in thickness and constructed in accordance with the following:

(i) A minimum twelve inch compacted soil liner shall have a maximum coefficient of permeability of 2.0×10^{-6} cm/sec.

(ii) A minimum 18 inch compacted soil liner shall have a maximum coefficient of permeability of 3.0×10^{-6} cm/sec.

(iii) A compacted soil liner may not be constructed thicker than 18 inches for the purpose of meeting a coefficient of permeability greater than 3.0×10^{-6} cm/sec.

(iv) Any soil liner with a minimum twelve inch or 18 inch thickness shall be constructed in maximum lifts of six inches (after compaction). Each lift shall be scarified before placement of the next lift and shall conform to (H) of this paragraph.

(H) Any soil liner shall be field tested for compaction, unless a post-construction permeability test is performed, pursuant to (A)(ii) of this paragraph.

(i) The pit operator shall notify the appropriate Conservation Division District Office at least two (2) business days prior to field testing a soil liner for compaction to afford a Commission representative an opportunity to witness the field testing.

(ii) A minimum of six compaction tests shall be performed on any soil liner; a minimum of four widely spaced tests in the bottom of the pit and two tests on different slopes of the pit are required, unless otherwise directed by a Field Operations representative. Particular emphasis shall be placed on selecting locations for compaction tests where nonuniformity in soil texture or color can be observed.

(iii) Compaction tests shall be conducted in accordance with ASTM methods D-2922 or D-1556.

(iv) The soil materials of any liner shall be compacted to at least 90 percent of the Standard Proctor Density (ASTM D-698).

(7) Geomembrane liners.

(A) Any geomembrane liner that is installed in a reserve/circulation pit, spill prevention pit, or remediation pit, completion/fracture/workover pit, basic sediment pit, or recycling/reuse pit shall have a minimum thickness of 20-mil.

(B) Any geomembrane liner used in a noncommercial pit shall be chemically compatible with the type of substances to be contained and shall have ultraviolet light protection.

(C) Any geomembrane liner shall be placed over a specially prepared, smooth, compacted surface void of sharp changes in elevation, rocks, clods, organic debris, or other objects.

(D) Any geomembrane liner shall be continuous, although it may include seams, and shall cover the bottom and interior sides of the pit entirely. The edges shall be securely placed in a minimum twelve inch deep anchor trench around the perimeter of the pit or anchored in an equivalent manner approved by the appropriate Conservation Division District Office.

(8) Certification of liner. The operator of any noncommercial pit that is constructed with a soil or geomembrane liner shall secure an affidavit signed by the installer, certifying that the liner meets minimum requirements and was installed in accordance with Commission rules. It

shall be the operator's responsibility to maintain the affidavit and all supporting documentation pertaining to the liner (e.g., permeability and compaction test results, bentonite receipts, and geomembrane liner specifications from the manufacturer), and shall make them available at all times for review by any representative of the Conservation Division.

(d) Operation and maintenance requirements.

(1) **Freeboard.** The fluid level of any noncommercial pit shall be maintained at all times at least 24 inches below the lowest elevation on the top of the berm.

(2) **Reserve/circulation pits.** The operator of any reserve/ circulation pit shall limit its contents to the fluids and cuttings from a single well unless authorized by the District Manager.

(3) **Off-site reserve pits.** A waterproof sign shall be posted within 25 feet of any off-site reserve pit and shall bear the name of the operator, legal description to the quarter quarter quarter section, permit number, and emergency telephone number.

(4) **Recycling/reuse pits.**

(A) Any pit permitted for drilling mud recycling or reuse may contain the fluids and cuttings from multiple wells, provided that those wells are operated by the pit operator.

(B) A waterproof sign shall be posted within 25 feet of any recycling/reuse pit and shall bear the name of the operator, legal description to the quarter quarter quarter section, permit number, and emergency telephone number.

(5) **Prevention of pollution.**

(A) All noncommercial pits shall be constructed, used, operated, and maintained at all times so as to prevent pollution. In the event of a nonpermitted discharge from a noncommercial pit, sufficient measures shall be taken by the operator to stop or control the loss of contents, and reporting procedures pursuant to 165:10-7-5(c) shall be followed. Any materials lost from a pit shall be cleaned up as directed by any Field Operations representative. For a willful non-permitted discharge from a noncommercial pit, the operator may be fined up to \$2,000.00.

(B) The protection of migratory birds shall be the responsibility of the operator. Therefore, the Conservation Division recommends that to prevent the loss of birds, oil be removed or the surface area covered by the oil be protected from access to birds. [See Advisory Notice 165:10-7-3(c)].

(e) Closure requirements.

(1) **Designation of disposal method.** The operator of any reserve/ circulation pit shall indicate the proposed method of disposal of drilling fluids and/or cuttings on Form 1000 as required by 165:10-3-1(f). Options shall be limited to the following, unless written approval is granted by a District Manager or Field Inspector Supervisor:

(A) Evaporation/dewatering and backfilling.

(B) Chemical solidification of pit contents.

(C) Annular injection (requires permit).

(D) Land application (requires permit).

(E) Disposal in permitted commercial pit.

(F) Disposal at permitted commercial soil farming facility.

(G) Disposal at permitted recycling/reuse facility.

(2) **Trenching.**

(A) Before trenching, stirring or otherwise disturbing the bottom of any noncommercial pit, the pit shall be completely dewatered.

(B) Trenching, stirring, or other similar practice shall be prohibited for any lined pit.

(3) **Lined pits.**

(A) When closing any noncommercial pit with a soil or geomembrane liner, extreme care shall be taken to preserve the integrity of the liner.

(B) For any lined reserve/circulation pit, completion/fracture/workover pit, recycling/reuse pit, or basic sediment pit, all free liquids shall be removed or chemically solidified with nonhazardous material.

(C) For any lined oil-based reserve/circulation pit, all cuttings or other materials remaining in the pit shall be chemically solidified with nonhazardous material.

(D) Soil cover, pursuant to (5) of this subsection, shall follow.

(4) **Soil cover.** Closure procedures for any noncommercial pit shall include a minimum of three feet of soil cover over any remaining pit contents, with all stockpiled topsoil being applied last. The materials shall be mounded or sloped to encourage runoff. A variance from this provision may be granted by the appropriate Conservation Division District Office for justifiable cause. A written request and supporting documentation is required. The appropriate Conservation Division District Office shall respond in writing within five business days either approving or disapproving the request.

(5) **Erosion control.** Any noncommercial pit shall be closed in such a manner that any future erosion will not cause the discharge of the pit contents. This may require vegetative cover and/or a diversion terrace(s).

(6) **Notification to appropriate Conservation Division District Office.** The operator of any noncommercial pit shall notify the appropriate Field Inspector or appropriate Conservation Division District Office at least 48 hours prior to commencing closure, and for reserve/circulation pits shall advise if the disposal method is different from that indicated on Form 1000. The operator shall also notify the Field Inspector or appropriate Conservation Division District Office within 48 hours after reclamation of the site has been completed.

(7) **Time limits.** Any noncommercial pit shall be closed within the time limits set forth in this paragraph. Any extension of time for pit closure must be requested by the operator, who shall file an application pursuant to OAC 165:5-7-33. A legal change of operator of any noncommercial pit shall not extend the time limit for closure. If a noncommercial pit is converted from one type of use to another, the last use shall determine the time limit for closure.

(A) Any Category 1A, 1B or 2 reserve/circulation pit, either on-site or off-site, shall be closed within twelve months after drilling operations cease.

(B) Any Category 3 reserve/circulation pit, either on-site or off-site, shall be closed within six months after drilling operations cease.

(C) Any Category 4 pit shall have closure procedures commenced within 30 days and completed within 90 days after drilling

operations cease.

(D) Completion/fracture/workover pits.

(i) Any reserve/circulation pit converted to a completion/fracture/ workover pit shall be closed within six (6) months after drilling operations cease. Upon request by the operator, a six (6) month extension shall be granted by the Conservation Division, after review by a field inspector to confirm the pit is in compliance with 165:10-7-16 (c) and (d) requirements.

(ii) Any completion/fracture/workover pit not converted from a reserve/circulation pit shall be closed within 60 days after completion, fracture, or workover operations cease.

(E) Any emergency pit shall be emptied of its contents as soon as possible and closed within 60 days after the emergency situation ceases to exist.

(F) Any flare pit shall be closed within 30 days of abandonment of a lease.

(G) Any spill containment pit shall be closed within 30 days of abandonment of a lease.

(H) Any basic sediment pit shall be closed within 60 days after use of the pit ceases.

(I) Any recycling/reuse pit shall be closed within twelve months after operations cease.

(J) Any remediation pit shall be closed immediately after receipt of all contaminated materials.

(8) For failure to comply with any closure requirement, the operator may be fined up to \$1,000.00.

(9) **Waiver of closure requirements.** Exemption from closure and transfer of responsibility for any noncommercial pit to the surface owner or other party shall be requested by filing an application pursuant to OAC 165:5-7-34. No approval shall be granted unless the analyses of the fluids show that the following ranges or concentrations are not exceeded:

(A) pH - 6.0-9.5 s.u.

(B) Chlorides - 3500 mg/l

(C) Total Dissolved Solids (TDS) or Total Soluble Salts (TSS)- 7000 mg mg/l

(D) Chromium (Total) - 10 mg/l

(E) Arsenic - 20 mg/l

(f) Noncommercial pits with capacity in excess of 50,000 barrels.

(1) **Scope:** This subsection shall cover the permitting, construction, operation, and closure requirements for any noncommercial pit with a capacity in excess of 50,000 barrels used to contain deleterious substances. Such pits may be located either onsite or offsite of a well drilling location. The permitting, construction, operation, and closure requirements for any noncommercial pit with a capacity of 50,000 barrels or less are addressed in OAC 165:10-7-16(a)-(e).

(2) **Application.** Prior to constructing any pit, the pit operator shall obtain a permit from the Manager of the Pollution Abatement Department or a Commission order authorizing the pit. For use of a pit without a permit or Commission order, the pit operator may be fined up to \$5,000.00.

Application for a pit permit shall be submitted to the Pollution Abatement

Department on Form 1014F.

(3) **Application requirements.** The pit operator shall attach to the Form 1014F two complete sets of documents in support of the application, which documents shall include, but not be limited to, the following:

(A) Written permission from the surface owner allowing a pit to be constructed and used on the subject tract.

(B) A lithologic log of test borings, identifying the subsurface materials encountered and the depth at which groundwater was encountered pursuant to (5)(A)(v) of this subsection.

(C) A topographic map of the pit site.

(D) The appropriate Soil Conservation Service (SCS) soil survey aerial photo and legend.

(E) A detailed drawing of the site, with complete construction plans drawn to scale by or under the supervision of a registered professional engineer.

(F) A plan for closure of the pit which shall provide for a minimum three feet of soil cover and shall specifically state how all aspects of closure shall be accomplished, including volume and fate of liquids, earthwork to close the pit (including placement of stockpiled topsoil), and revegetation of the site.

(G) An itemization of projected hauling, closure, reclamation, maintenance, and monitoring costs.

(H) A plan for post-closure maintenance and monitoring which shall address maintenance of the site as well as monitoring and plugging of wells. Exemption from the plugging of monitor wells may be obtained upon written request and approval of the Manager of Pollution Abatement.

(I) A plan for operation which shall address the method(s) by which excess water will be disposed.

(4) **Notice.**

(A) **Notice of application.** Notice of the application for a permit for a pit with a capacity in excess of 100,000 barrels shall be published one time in a newspaper of general circulation in Oklahoma County, Oklahoma, and in a newspaper of general circulation published in each county in which the subject lands are located. The notice shall include the following information:

(i) The name, physical mailing address, telephone number, electronic mail address and facsimile number of the applicant or its representative, whom anyone may contact for additional information concerning the application.

(ii) The location of the proposed pit to the nearest 40 acre tract.

(iii) The capacity of the proposed pit.

(iv) The type of fluids to be stored in the proposed pit.

(v) The notice must also include the following language:

(I) Written protests to the relief sought must be submitted to the applicant or its representative and to the Manager of the Pollution Abatement Department, Oklahoma Corporation Commission, P.O. Box 52000, Oklahoma City, OK, 73152-2000, within fifteen (15) days after publication of the

notice. Written protests must specify the name of the applicant, location of the proposed pit, reasons for protest, and the name(s), physical mailing address(es), telephone number(s), electronic mail address(es) and facsimile number(s) of the protestant(s).

(II) If there are no written protests to the application and the Commission does not require a hearing, the application shall be presented to the Manager of the Pollution Abatement Department for administrative review without a hearing, and if the application is protested, then any protestants shall receive notice of hearing.

(B) Proof of notice. The applicant shall submit affidavit(s) of publication to the Pollution Abatement Department to show compliance with the requirements of subparagraph (4)(A) above.

(C) Procedure.

(i) If a written protest to the application is submitted to the Pollution Abatement Department within fifteen (15) days after the date the notice of application is published, or if hearing is required by the Commission, the application shall be set for hearing and notice thereof given in the same manner required in the filing of an application on the Pollution Docket.

(ii) If no written protest is submitted to the Pollution Abatement Department and the Commission does not require a hearing, the application shall be presented to the Manager of the Pollution Abatement Department for administrative review.

(5) Construction requirements.

(A) Site limitations.

(i) Any pit that is to be constructed or operated in an area covered by a field or area rule shall be subject to the more stringent requirements of either this subsection or the field or area rule.

(ii) No pit shall be constructed or used unless an investigation of the soils, topography, geology, and hydrology conclusively shows that storage of fluids at the site will not be harmful to groundwater, surface water, soils, plants, or animals in the surrounding area. No pit shall be constructed or used on or in an abandoned mine, strip pit, quarry, canyon, or streambed.

(iii) No pit shall be constructed or used on any site that is located within a 100-year flood plain.

(iv) No pit shall be constructed or used within a wellhead protection area (WPA) as identified by the Wellhead Protection Program (42 USC Section 300h-7, Safe Drinking Water Act), or within one mile of a public water well for which the WPA has not been delineated.

(v) No pit shall be constructed unless it can be shown that there will be a minimum of 25 feet between the bottom of

the pit and the groundwater level. To ascertain this and to demonstrate the subsurface profile of the site, a minimum of three test borings (the exact number of locations to be determined by the Pollution Abatement Department) shall be drilled to a minimum depth of 25 feet below the proposed bottom of the pit and into the first free water encountered. Perched water tables are not considered for the purposes of this unit. Test borings need not extend deeper than 50 feet below the bottom of the pit if free water has not been encountered before that depth. All boreholes converted to monitor wells shall conform to (6)(A) of this subsection. All boreholes not converted to monitor wells shall be plugged from top to bottom with bentonite, cement, and/or other method approved by the Pollution Abatement Department within 30 days of drilling completion.

(B) Runoff water prohibited. No runoff water from surrounding land surfaces shall be allowed to enter a pit.

(C) Stockpiling of topsoil. Prior to constructing a pit, all topsoil within the top twelve inches of soil at the site shall be stockpiled for use as the final cover at the time of closure. The topsoil may be stockpiled in the outside slopes of the berms, provided it is not used for structural purposes and is readily distinguishable from other soil materials at the time of closure.

(D) Maximum fluid depth. Any pit shall be constructed to contain a maximum fluid depth as authorized by the Manager of the Pollution Abatement Department on the Form 1014F, or in the Commission order authorizing the pit. A minimum freeboard of three feet shall be maintained.

(E) Maximum authorized volume. The maximum authorized volume allowed to be stored in a pit shall be calculated from three (3) feet below the point of the lowest elevation of the top of the berm wall.

(F) Width of the crown. The crown (top) of any berm shall be a minimum eight feet in width.

(G) Slopes. The inside slope of any exterior berm of the pit shall not be steeper than 3:1 (horizontal to vertical) and the outside slope of the pit shall not be steeper than 2.5:1.

(H) Earthwork compaction. All earthwork shall be compacted to achieve a minimum 90% Standard Proctor Density and shall be applied in lifts where some method of bonding is achieved between lifts, with each lift not to exceed eight inches prior to compaction.

(I) Unique design requirements. For pits that may require special construction considerations, variances may be granted by the Manager of the Pollution Abatement Department or by Commission order if the proposed design meets or exceeds the requirements appearing in this subsection.

(J) Geomembrane liners.

(i) Pits permitted under this subsection must contain a geomembrane liner. The geomembrane liner must have a minimum thickness of 40 mil.

(ii) The geomembrane liner shall be chemically compatible with the type of substances to be contained in the pit and shall have ultraviolet light protection sufficient to withstand the time the pit is to remain open.

(iii) The geomembrane liner shall be placed over a specially prepared, smooth, compacted surface void of sharp changes in elevation, rocks, clods, organic debris, or other objects. The pit operator shall notify the appropriate Conservation Division District Office at least two (2) business days prior to installation of the liner in the pit to afford a Commission representative an opportunity to inspect the site prior to the liner being installed. If a Commission representative has not inspected the pit site within two (2) business days following notification, the pit operator may proceed to install the liner in the pit.

(iv) The geomembrane liner shall be continuous, although it may include welded or extruded seams, and it must cover the bottom and interior sides of the pit entirely. Sewing of seams is prohibited. The edges shall be securely placed in a minimum twelve inch deep anchor trench around the perimeter of the pit.

(K) Fluid level marker. A minimum of one stationary fluid level marker shall be erected in each pit. The marker shall be erected in a location within the pit where it can be easily observed. The marker shall be of such design that the maximum fluid level at any time may be clearly identified. Details of the proposed marker installation shall be approved by the Manager of the Pollution Abatement Department prior to installation.

(L) Hydrologically sensitive areas. If the proposed pit is to be located over a hydrologically sensitive area, in addition to the foregoing construction requirements, the following additional requirements shall apply:

(i) A minimum 40-mil geomembrane liner, double-lined, with a leachate collection system between the liners shall be required.

(ii) The Manager of Pollution Abatement shall determine the minimum depth of all monitor wells.

(6) Monitor wells and leachate collection systems.

(A) A minimum of three monitor wells-one (1) upgradient and two (2) downgradient from the pit-shall be installed. The exact number and location of the monitor wells shall be approved by the Manager of Pollution Abatement prior to installation. Additional monitor wells may be required for pits constructed in the general vicinity of public water supply wells, well head protection areas and hydrologically sensitive areas. No monitor well shall be installed more than 250 feet from the toe of the outside berm of the pit, nor shall any existing water well be used as a monitor well unless approved by the Manager of Pollution Abatement. All new monitor wells shall be drilled to a depth of at least ten feet below the top of the first free water encountered, and all monitor wells shall be drilled to a depth of at least ten feet below the base of the pit. All

new monitor wells shall be drilled and completed by a licensed monitor well driller. If documentation is submitted to the Manager of Pollution Abatement prior to drilling the monitor wells to show that no free water will be encountered within 50 feet below the bottom of the pit, the Manager of Pollution Abatement may give approval for the wells to be drilled to a lesser depth. All new monitor wells shall meet the requirements set out in rules established by the Oklahoma Water Resources Board, in addition to the following requirements:

(i) A removable and lockable cap shall be placed on top of the casing. The cap shall remain locked at all times, except when the well is being sampled.

(ii) Within 30 days of installation, specific completion information, a diagram of the locations and numerical labeling for all monitor wells shall be submitted to the Manager of Pollution Abatement.

(B) Leachate collection system: The pit operator may elect to install a leachate collection system in lieu of monitor wells, if such system will adequately detect any leak from the pit. The plan for the leachate collection system must accompany the Form 1014 and such plan must be approved by the Manager of Pollution Abatement prior to installation of the leachate collection system.

(7) Monitor well and leachate collection system sampling. The pit operator shall sample the monitor wells or leachate collection system prior to placing any fluids other than fresh water in the pit. The following procedures shall be used:

(A) The appropriate Field Inspector shall be notified at least 24 hours prior to sampling to allow a Commission representative an opportunity to witness the sampling.

(B) Samples shall be collected and handled by the pit operator according to EPA-approved standards. (RCRA Groundwater Monitoring Technical Enforcement Guidance Document, EPA, OSWER-9950.1, September 1986, pp. 99-107.)

(C) If requested by a representative of the Conservation Division, a sufficient portion of each sample (approximately one (1) pint) shall be properly labeled and delivered or otherwise provided to the appropriate Conservation Division District Office or Field Inspector.

(D) All samples delivered to the laboratory shall be accompanied by a chain of custody form. The chain of custody form and sample analyses must be submitted to the Conservation Division.

(E) All samples must be analyzed for pH, chlorides and TDS by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma. The Manager of the Pollution Abatement Department may require samples to be analyzed for additional constituents.

(F) A copy of each analysis and a statement as to the depth to groundwater encountered in each well or leachate collection system, or a written statement that no water was encountered, shall be forwarded to the appropriate Conservation Division District Office within 30 days of sampling.

(G) The pit operator is required to conduct sampling every six months after the date pit operations commence and for a minimum of one year after closure is completed. The Manager of the Pollution Abatement Department may require sampling on a more frequent basis.

(8) **Liner certification.** An affidavit signed by the person who was responsible for installing the pit liner, certifying that the liner meets minimum requirements and was installed in accordance with Commission rules, shall be submitted to the Manager of the Pollution Abatement Department before operation of the pit commences. Supporting documentation shall also be submitted, such as geomembrane liner specifications from the manufacturer, if requested by the Manager of the Pollution Abatement Department.

(9) **Pit approval.** The pit operator shall notify the appropriate Conservation Division District Office at least two (2) business days prior to commencing pit operations to afford a Commission representative an opportunity to inspect the site. If a Commission representative has not inspected the pit site within two (2) business days following notification, the operator may commence pit operations, provided the affidavit and any supporting documentation referred to above has been submitted to the District Manager.

(10) **Operation and maintenance requirements.**

(A) **Vegetative cover.** Vegetative cover shall be established on all areas of earthfill on the outside slope of the pit immediately after pit construction or during the first planting season following the construction of the pit if the pit construction is completed out of season. The cover shall be sufficient to protect those areas from soil erosion and shall be maintained. The Manager of the Pollution Abatement Department may approve alternative erosion control measures if the alternative method meets or exceeds the vegetative cover requirement.

(B) **Fencing.** The pit shall be completely enclosed by a fence at least four feet in height. No livestock shall be allowed inside the fence.

(C) **Sign.** A waterproof sign bearing the name of the pit operator, legal description, and emergency telephone number shall be posted within 25 feet of the pit and shall be readily visible.

(D) **Site security.** All sites shall be secured by a locked gate. Fluids shall be placed in a pit only when representative(s) designated by the operator are present at the site if trucks are to be used in the operation. A key or combination to the lock shall be provided to the appropriate Field Inspector for the purpose of carrying out inspections.

(E) **Acceptable materials.** No operator of a pit shall place any substances in the pit other than deleterious substances or fresh water if required for hydraulic fracturing operations. The pit may receive fluids from additional wells as long as the company authorized on the Form 1014F or in a Commission order operates or is a working interest owner in the additional wells. Another operator may use the pit on a temporary basis if the pit operator submits to and obtains the Commission's approval of an amended Form 1014F permitting

such temporary use. If the pit is in compliance with this Section, the Manager of the Pollution Abatement Department may approve the amended Form 1014F administratively without additional notice and hearing. If the Manager of the Pollution Abatement Department determines conditions have changed since the issuance of the permit, then the Manager of the Pollution Abatement Department may request that the operator seeking approval to use the pit on a temporary basis obtain the issuance of a Commission order authorizing the operator's use of the pit after application, notice and hearing.

(F) Oil film.

(i) The pit shall not contain an oil film.

(ii) The protection of migratory birds shall be the responsibility of the pit operator. Therefore, the Conservation Division recommends that to prevent the loss of birds, oil films be removed as soon as possible from the pit or that the surface of the pit be protected from access to birds. [See Advisory Notice in OAC 165:10-7-3(c)].

(G) Aesthetics. All pit sites shall be maintained so that there is no junk iron or cable, oil or chemical drums, paint cans, domestic trash, or debris on the premises.

(H) Structural integrity. All pits shall be used, operated, and maintained at all times so as to prevent the escape of their contents. All erosion, cracking, sloughing, settling, animal burrows, or other condition that threatens the structural stability of any earthfill shall be repaired immediately upon discovery.

(I) Time period for operation. The period of time during which the pit is to remain in operation shall be specified on the approved Form 1014F or Commission order.

(11) Prevention of pollution. All pits shall be used, operated, and maintained at all times so as to prevent pollution. In the event of a non-permitted discharge, sufficient measures shall be taken to stop or control the loss of materials, and reporting procedures in OAC 165:10-7-5(c) shall be followed. Any materials lost due to such discharge shall be cleaned up as directed by a representative of the Conservation Division. For a willful non-permitted discharge, the pit operator may be fined up to \$5,000.00.

(12) Closure requirements.

(A) Notification. The Manager of the Pollution Abatement Department shall be notified in writing whenever the pit becomes inactive, or operation of the pit ceases for any reason.

(B) Time limit. Closure shall be commenced within 60 days and completed within one year of when the pit becomes inactive or cessation of operations. In cases where extenuating circumstances exist, one extension of six (6) months may be administratively approved in writing by the Manager of the Pollution Abatement Department. The pit operator must file an application and notice of hearing pursuant to OAC 165:5-7-1 et seq. and obtain the issuance of a Commission order concerning any additional request for an extension of time for pit closure.

(C) Trenching. Trenching, stirring or other similar practice shall be prohibited with respect to the pit.

(D) **Preserving integrity of liner.** Extreme care shall be taken to preserve the integrity of the liner when closing the pit. All fluids shall be removed from the pit when closing the pit. Once fluids have been removed from the pit, the liner may be folded and closed in place.

(E) **Soil cover.** A minimum of three feet of soil cover shall be placed over the pit, with all stockpiled topsoil being applied last. The soil cover shall be mounded or sloped to encourage runoff and so as to prevent erosion. The Manager of the Pollution Abatement Department may require the pit operator to establish a vegetative cover over the pit. The pit operator can request a variance to these requirements by submitting a written request and supporting documentation to the Manager of the Pollution Abatement Department. The Manager of the Pollution Abatement Department shall respond in writing within five (5) business days after receipt of a request for a variance to the requirements in this subsection from the pit operator.

(F) **Notification to appropriate Conservation Division District Office.** The pit operator shall notify the appropriate Field Inspector or appropriate Conservation Division District Office at least 48 hours prior to commencing closure. The pit operator shall also notify the Field Inspector or appropriate Conservation Division District Office within 48 hours after reclamation of the site has been completed.

(G) **Penalty for failure to comply with closure requirements.** A pit operator failing to comply with the closure requirements set out in this subsection may be fined up to \$1,000.00.

(H) **Post closure monitoring.** The pit operator is required to sample the monitor wells or leachate collection system at the site for a minimum of one year after closure of the pit is completed, and the pit operator must comply with the sampling and reporting requirements appearing in OAC 165:10-7-16(f)(7), above. Variances to the post closure monitoring and reporting requirements may be granted in writing by the Manager of the Pollution Abatement Department if an approved leachate collection system has been employed at the site and if additional hydrogeologic data which demonstrates the pit has not leaked is submitted to and accepted by the Manager of the Pollution Abatement Department.

(13) **Surety requirements.**

(A) **Agreement with Commission.** The operator of a pit shall file with the Surety Department for the Conservation Division an agreement to properly close and reclaim the site in accordance with approved closure and reclamation procedures upon termination of operations. The agreement shall be on forms available from the Conservation Division and shall be accompanied by surety. The agreement shall provide that if the Commission finds that the operator has failed or refused to close the pit or take remedial action as required by law and the rules of the Commission, the surety shall pay to the Commission the full amount of the operator's obligation up to the limit of the surety.

(B) Surety amount and type. The Manager of the Pollution Abatement Department shall establish the amount of surety for the authority to construct and/or operate the pit. The amount of surety shall be based on factors such as dimensions of the pit and costs of hauling, closure, reclamation, and monitoring. The amount may be subject to change for good cause. Upon approved closure of a pit, the Manager of the Pollution Abatement Department may reduce the surety requirement to an amount which would cover the cost of monitoring the site and plugging the monitor wells. Surety shall be maintained for as long as monitoring is required. The type of surety shall be a corporate surety bond, certificate of deposit, or irrevocable letter of credit. Any type of surety that expires shall be renewed prior to 30 days before the expiration date.

(14) Application to existing pits. Operators of pits permitted prior to the effective date of this subsection must either comply with parts (f)(6) (monitor wells and leachate collection systems), (f)(7)(monitor well and leachate collection system sampling) and (f)(13)(surety requirements) or close such pits within one (1) year of the effective date of this subsection. Operators of pits permitted prior to the effective date of this subsection must also comply with parts (f)(5)(K) (fluid level marker), (f)(10)(operation and maintenance requirements), (f)(11) (prevention of pollution) and (f)(12) (closure requirements). All pits permitted but not yet constructed as of the effective date of this subsection shall also be subject to the construction requirements in part (f)(5).

(15) Variances. Except as otherwise provided in this subsection, variances from provisions of this subsection may be granted for good cause by order after application, notice, and hearing.

165:10-7-17. Surface discharge of fluids

(a) Scope. This Section shall cover the surface discharge of hydrostatic test water, storm water from diked areas, and produced water from tanks or other containment vessels.

(b) Discharge of hydrostatic test water.

(1) Hydrostatic test water used in the testing of new pipeline segments, new casing, new tubing, new tanks and new vessels, may be discharged as necessary without a permit, notification to the Commission, or adherence to any other provisions of this Section, provided the following conditions are met:

(A) Low chlorides. Chloride concentration does not exceed 1000 mg/l.

(B) Sheen. There shall be no visible sheen or discoloration as a result of testing; however, certain dyes used to establish mechanical integrity may be approved.

(C) Notice to appropriate Conservation Division District Office. Any discharges exceeding 1,000 barrels shall require notification to the appropriate Conservation Division District Office.

(2) Hydrostatic test water used in the testing of existing tanks, vessel lines and transmission pipelines may be discharged upon notification to the Oklahoma Corporation Commission appropriate Conservation Division District Office on Form 1014HD provided that the following conditions are met:

- (A) **Oil and grease.** The oil and grease content of the discharge water shall not exceed 15 mg/l.
- (B) **Sheen.** There shall be no visible sheen or discoloration as a result of testing; however, certain dyes used to establish mechanical integrity may be approved.
- (C) **Total Suspended Solids.** The Total Suspended Solids shall not exceed 45 mg/l.
- (D) **pH.** The pH shall not be less than 6.5 nor exceed 9 s.u.
- (E) **Foreign material.** The discharge must be free from foreign material such as welding scrap tank sediments or sand blasting waste material.
- (F) **Soil erosion.** Standard soil erosion prevention procedures shall be required.

(3) Hydrostatic test water that meets the requirements listed in (b) (2) of this Section may be discharged in volumes less than 15 bbls without filing Form 1014HD.

(4) Hydrostatic test water that will be discharged to land and not directly into waters of the state and which may exceed the discharge parameters specified in (b)(2), shall be discharged only upon submission and approval by the Pollution Abatement Department of a plan for one-time discharge.

(5) Hydrostatic test water not covered under (b)(1) from transmission lines and tanks that contain waste products that are listed as hazardous waste under the Resource Conservation and Recovery Act and have not been cleaned or pigged must meet the following discharge requirements in addition to (b)(2) of this Section:

- (A) The following parameters may not be exceeded: Benzene, .028 MG/L; toluene, .3 MG/L; phenol, .250 MG/L.
- (B) EPA analytical method 8020 shall be used unless approved by the Manager of Pollution Abatement.

(c) **Discharge of storm water.** Storm water accumulations in any diked area built for the containment of tank battery spills may be discharged as necessary without a permit, notification to the Commission, or adherence to any other provisions of this Section, provided the following conditions are met:

- (1) **No hydrocarbons.** A visual inspection of the storm water is made and there is no sheen or other visible evidence of hydrocarbons being present.
- (2) **Low chlorides.** Chloride concentration does not exceed 1000 mg/l.
- (3) **Conditions recorded.** The operator records the conditions required by (1) and (2) in this subsection for each discharge, maintains those records for a period of three (3) years, and makes them available upon request to any representative of the Field Operations Department.

(d) **Discharge of produced water.**

(1) **Site restrictions.** Discharge of produced water shall only occur on land having an Exchangeable Sodium Percentage (ESP) no greater than 15, pursuant to (f)(3) of this Section, and all of the following characteristics as determined by the appropriate Soil Conservation District or by a qualified soils expert:

- (A) A maximum slope of five percent.
- (B) Depth to bedrock at least 20 inches.
- (C) Slight salinity (defined as electrical conductivity less than 4,000 micromhos/cm) in the topsoil or upper six inches of the soil.
- (D) A water table deeper than six feet from the soil surface, except a perched water table.
- (E) A minimum distance of 100 feet from any stream designated by Oklahoma Water Quality Standards (available for viewing at the Commission's Oklahoma City Office and appropriate Conservation Division District Offices) or any fresh water pond, lake, or wetland (designated by the National Wetlands Inventory Map Series, prepared by the U.S. Fish and Wildlife Service and available for viewing at the Commission's Oklahoma City Office).

(2) **Water quality limitations.** A surface discharge permit shall not be issued if the produced water to be discharged exceeds either of the following concentrations:

- (A) Total Dissolved Solids (TDS) or Total Soluble Salts (TSS) - 5000 mg/l.
- (B) Oil and Grease - 1000 mg/l.

(e) **Sampling requirements.**

(1) **Contact with appropriate Conservation Division District Office.** The appropriate Conservation Division District Office shall be contacted at least two business days prior to sampling to allow a Commission representative an opportunity to witness the sampling of the receiving soil and produced water to be discharged. A variance from this provision may be granted by the appropriate Conservation Division District Office for justifiable cause. A written request and supporting documentation shall be required. The appropriate Conservation Division District Office shall respond in writing within five working days after receipt, either approving or disapproving the request.

(2) **Produced water.** Produced water to be discharged shall be sampled using the following procedure, unless exempt pursuant to (f)(4) of this Section.

- (A) Prior to sampling, fresh water shall not be added to any tank or other containment vessel for dilution or any other purpose.
- (B) A sample of the produced water to be discharged shall be taken from the bottom of the tank or other containment vessel. A minimum two quart sample shall be placed into a foil or teflon covered, glass container. The container shall be filled completely to exclude air and delivered to the laboratory within seven days. No samples shall be altered in any way.
- (C) Another sample of the produced water to be discharged (approximately one pint) shall be properly labeled and delivered or otherwise provided to the appropriate Conservation Division District Office or Field Inspector, unless exempt by the District Manager.

(3) **Receiving soil.** Soil samples shall be taken from the proposed discharge area and analyzed, unless exempt pursuant to (f)(4) of this Section. A minimum of 20 representative surface core samples (0-6 inches) must be taken from each sample area, combined and thoroughly mixed, then a minimum one pint composite sample taken and placed in a clean container

for delivery to the lab. No sample area shall exceed 40 acres.

(f) Analysis requirements.

(1) **Certified laboratory.** The samples of soil and produced water shall be analyzed by a laboratory operated by the State of Oklahoma or certified by the Department of Environmental Quality or in the North American Proficiency Testing System, unless exempt pursuant to (4) of this subsection.

(2) **Parameters for produced water.** Parameters for analysis of the produced water shall include, but not be limited to, Total Dissolved Solids (TDS) or Total Soluble Salts (TSS) and Oil and Grease.

(3) **Parameters for soil.** Parameters for analysis of the receiving soil shall include, but not be limited to, Electrical Conductivity or Total Soluble Salts (TSS) and Exchangeable Sodium Percentage (ESP).

(4) **Exemptions.** The appropriate Conservation Division District Office may exempt the analysis of produced water if an analysis of the produced water from a well located within one mile and producing from the same formation has been previously submitted. Analysis of the receiving soil may be exempt if an analysis of the same soil type(s) within one mile of the proposed discharge site has been previously submitted.

(g) Application for permit.

(1) **Permit required.** No person shall discharge produced water from a tank or other containment vessel without applying for and obtaining a permit issued under this subsection. An operator discharging produced water without a permit may be fined up to \$1,000.00.

(2) **Who may apply.** Only the operator of the well associated with the tank or other containment vessel, the contents of which are sought to be discharged, may apply for a surface discharge permit.

(3) **Required form and attachments.** Each application for surface discharge of produced water shall be submitted to the appropriate Conservation Division District Office on Form 1014D in quadruplicate. The forms shall be properly completed and signed. Attached to at least one of the forms shall be the following:

(A) A copy of written notice to the surface owner that the applicant intends to discharge produced water as per 165:10-7-17 to a specific portion of real property as designated by legal description.

(B) If the operator has an agent, a contractual agreement between the parties or an affidavit designating the contractor or agent (Form 1014LA).

(C) A well prepared map or diagram, drawn to scale, showing the proposed and potential discharge areas.

(D) Site suitability report, pursuant to (d)(1) of this Section, provided by a qualified soils expert (include qualifications).

(E) Analysis of produced water, unless exempt pursuant to (f)(4) of this Section.

(F) Soil analysis, unless exempt pursuant to (f)(4) of this Section.

(G) Other information as required by this Section or requested by the appropriate Conservation Division District Office.

(4) **Review period.** The appropriate Conservation Division District Office shall review the application, either approve or disapprove it, and return a copy of Form 1014D within five business days of submission of all required or requested information. If approved, a permit number shall be

assigned to Form 1014D; if disapproved, the reason(s) shall be given. The applicant may make application for a hearing if it is not approved.

(h) Maximum application rate.

(1) Soil loading standards. The maximum application rate shall be calculated by the appropriate Conservation Division District Office using the following soil loading standards. (Soil loading standards are based upon standards set forth in "Diagnosis and Improvement of Saline and Alkaline Soils," U.S. Agriculture Handbook 60. Pub. U.S. Salinity Laboratory, Riverdale, California, 1954. "Critical Concentrations for Irrigation Water Supplies," Water Quality Criteria, 1972 Ecological Research Series, EPA R2-73033, March, 1973).

(A) Total Soluble Salts - 6,000 lbs/acre (less TSS in soil).

(B) Oil and Grease - 500 lbs/acre.

(2) Determination of most limiting parameter. The maximum application rate shall be restricted by the most limiting parameter. It may require more than one application to achieve the maximum application rate while avoiding runoff. The appropriate Conservation Division District Office shall indicate on the permit what the maximum application rate shall be after making the following calculations:

**PROCEDURE FOR
CALCULATING APPLICATION
RATE OF TOTAL SOLUBLE
SALTS (TSS)**

$$\frac{\text{_____ ppm TSS in soil}^1 \times 2}{\text{TSS in soil}} = \text{_____ lbs/ac}$$

$$6000 \text{ lbs/ac TSS} - \text{_____ lbs/ac TSS in soil}$$

$$= \text{Maximum TSS (lbs/ac) to applied}$$

$$\text{Maximum TSS (lbs/ac) } \div (\text{_____ ppm TSS in water}^1 \times .000001) = \text{Maximum lbs/ac of water to be applied _____}$$

$$\text{Maximum lbs/ac } \div \text{_____ lbs/bbl}^2 = \text{Maximum bbls/ac _____}$$

**PROCEDURE FOR
CALCULATING APPLICATION
RATE OF OIL AND GREASE**

$$500 \text{ lbs/ac} \div (\text{_____ ppm in water} \times .000001) = \text{Maximum lbs/ac of water to be applied _____}$$

$$\text{Maximum lbs/ac } \div \text{_____ lbs/bbl}^2 = \text{Maximum bbls/ac _____}$$

¹ Electrical Conductivity (EC expressed in micromhos/cm) may be used to estimate TSS: EC × 0.64 - ppm TSS.

² Based on documented weight of composite sample.

(i) **Conditions of permit.** Any discharge of produced water that is done under this Section shall be subject to the following conditions or stipulations of the permit.

(1) **Presence of representative.** A representative of the operator shall be on the discharge site at all times that water is being applied. A variance from this provision may be granted by the appropriate Conservation Division District Office for justifiable cause. A written request and supporting documentation shall be required. The appropriate Conservation Division District Office shall respond in writing within five business days after receipt, either approving or disapproving the request.

(2) **Weather restrictions.** Surface discharge shall not be done:

(A) During precipitation events or when precipitation is imminent.

(B) When the soil moisture content is at a level such that the soil would not readily take the addition of water.

(C) When the ground is frozen.

(D) By spray irrigation when the wind velocity is such that even distribution of water cannot be accomplished or the buffer zones, pursuant to (3) of this subsection, cannot be maintained.

(3) **Buffer zones.** Surface discharge shall not be done within the following buffer zones:

(A) Fifty feet of a property line boundary.

(B) Fifty feet of any stream not designated by Oklahoma Water Quality Standards.

(C) Three hundred feet of any actively-producing water well used for domestic or irrigation purposes.

(D) Eight hundred feet of any public water well.

(4) **Application rate.** The maximum application rate of produced water stipulated by the permit shall not be exceeded. Application of produced water outside the approved plot shall be prohibited. Accurate records shall be kept as to the quantities discharged and the dates of each discharge.

(5) **Discharge method.** Discharge of produced water shall be uniform over the approved discharge plot and shall be made by spray irrigation or other method approved by the Commission prior to use. The flood irrigation method shall be limited to those fields that normally are irrigated in that manner.

(6) **Runoff or ponding prohibited.** No runoff or ponding of discharged water shall be allowed during application.

(7) **Annual report.** An annual report shall be submitted by April 1 of each year and shall be made on Form 1014P. Attached to the annual report shall be current (within three months) analyses of the produced water and soil from the discharge plot, pursuant to (8) of this subsection.

(8) **Additional testing.** The produced water shall be analyzed annually and the receiving soils shall be sampled and analyzed a minimum of every five (5) years, pursuant to (e)(1) through (e)(3) and (f)(1) through (f)(3) of this Section. When 75 percent of the maximum permitted application volume of TSS or Oil and Grease [(h) of this Section] has been applied or when the ESP exceeds 11, water and soil sampling shall be done quarterly or semiannually as determined by the appropriate Conservation Division District Office.

(9) **Expiration of permit.** The permit shall expire by its own terms when testing, pursuant to (8) of this subsection, indicates that the concentration of TSS or Oil and Grease in the water exceeds the limitations of (d)(2) of this

Section, or more than 98 percent of the maximum application rate of TSS or Oil and Grease [(h) of this Section] has been applied or the ESP exceeds 15.

(10) **Violations.** If the applicant violates the conditions of the permit or this Section, the surface discharge shall be discontinued and the appropriate Conservation Division District Office shall be contacted immediately. The appropriate Conservation Division District Office may revoke the permit and/or require the operator to do remedial work. If the permit is not revoked, surface discharge may resume with Field Operations' approval. If the permit is revoked, the operator may make application for a hearing to reinstate it.

(j) **Discharge from reserve pits.** Water accumulation in any reserve pit used for the containment of air drilling cuttings or water-based drilling fluids may be discharged to land provided a permit is obtained from the Commission. Any operator discharging without a permit may be fined \$5,000.00.

(1) **Who may apply.** Only the operator of the well or the operator's designated agent may apply for the permit.

(2) **Required form and attachments.** Application for discharge of water to land shall be submitted to the appropriate Conservation Division District Office on Form 1014X. Attached to the application shall be the following:

(A) Written permission of the surface owner.

(B) A topographic map(s) with the location of the discharge area.

(C) Analysis of the water.

(D) Copies of all chain of custody forms.

(E) If there is an agent, a notarized affidavit designating the agent, signed by the operator (Form 1014LA).

(3) **Conditions of permit.**

(A) **Notice to field inspector.** The applicant shall notify the appropriate Conservation Division District Office at least 24 hours prior to discharge to allow a Commission representative an opportunity to be present.

(B) **Presence of representative.** A representative of the operator shall be on the discharge site at all times during discharge.

(C) **Condition of water.**

(i) Chloride content must not exceed 1,000 mg/l and TDS must not exceed 1,500 mg/l.

(ii) There must be no visible sheen or discoloration as a result of drilling operations.

(iii) The pH shall not be less than 6.5 nor exceed 9 standard units.

(D) **Foreign material.** The discharge shall be free of foreign material such as debris, sediments, and drilling mud solids.

(E) **Maximum slope.** A maximum slope of 5% if vehicles with a diffusion system are to be used; a maximum slope of 8% if a spray irrigation system is used.

(F) All discharge must be a minimum of 100 feet from any perennial stream, pond, lake or wetland and 50 feet from any intermittent stream. All land applications shall be a minimum of 50 feet from any property line.

(G) **Land application method.** The land application equipment must be approved by the Commission prior to use. The application

method must not allow soil erosion to occur. If the irrigation method is to be used, the area must be terraced or appropriate erosion control methods shall be used. The integrity of the pit wall shall be maintained at all times to avoid the discharge of drilling mud solids.

(H) Runoff prohibited. No runoff shall be allowed. Ponding may be allowed as long as practices are in place that will not allow the water to run into creeks or drainage ways.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 13 Ok Reg 2381, eff 7-1-96; Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 23 Ok Reg 2229, eff 7-1-06; Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 30 Ok Reg 1041, eff 7-1-13; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 35 Ok Reg 973, eff 9-14-18]

165:10-7-18. Discharge to surface waters

Discharge of deleterious substances to streams or other surface waters is prohibited except by order of the Commission; unless permitted by a valid National Pollutant Discharge Elimination System (NPDES) Permit issued by U.S. EPA.

165:10-7-19. Land application of water-based fluids from earthen pits, tanks and pipeline construction

(a) Authority for land application. No person shall land apply fluids except as provided by 165:10-9-2, 165:10-7-17, or this Section. Any operator failing to obtain a permit may be fined up to \$2,000. The land application permit shall be posted at the well site, pad or pipeline construction location.

(b) Scope. This Section shall cover the land application of water-based drilling fluids and cuttings from earthen pits, tanks, or other containment structures; however, this Section shall not be exclusive of other authorities for land application listed in (a) of this Section. Any land application made under this Section shall be done from a single well, single pad (containing multiple wells), or pipeline construction location. Permits shall not be granted for lands that have been previously permitted and used for these practices or similar practices such as soil remediation within the last three (3) years.

(c) Site suitability restrictions. Land application shall only occur on land having all of the following characteristics below, as field verified by a soil scientist or other qualified person pre-approved by the Commission. Any variance from site suitability restrictions must be approved by the Oil and Gas Conservation Division (see (f)(2)(C) of this Section).

(1) **Maximum slope.** A maximum slope of eight percent for all application methods.

(2) **Depth to bedrock.** Depth to bedrock must be at least 20 inches.

(3) **Soil texture.** A soil profile (as defined by USDA soil surveys) containing at least twelve inches (may be cumulative) of one of the following soil textures between the surface and the water table, unless a documented impeding layer of shale is present: loam, silt loam, silt, sandy clay loam, silty clay loam, clay loam, sandy loam, fine sandy loam, sandy clay, silty clay, or clay.

(4) **Salinity.** Slight salinity [defined as Electrical Conductivity (EC) less than 4,000 micromhos/cm] in the topsoil, or upper six inches of the soil, and a calculated Exchangeable Sodium Percentage (ESP) less than 10.0.

(5) **Depth to water table.** No evidence of a seasonal water table within six (6) feet of the soil surface as verified by field observation and published data.

(6) **Distance from water bodies.** A minimum distance of 100 feet from the land application site boundary to any perennial stream and 50 feet to any intermittent stream shown on the appropriate United States Geological Survey (U.S.G.S.) topographic map (available for viewing at the Commission's Oklahoma City Office and appropriate Conservation Division District Offices) and a minimum of 100 feet to any freshwater pond, lake, or wetland. [Designated by the National Wetlands Inventory Map Series, prepared by the U.S. Fish and Wildlife Service, available for viewing at the Commission's Oklahoma City Office (also, see (h)(6) of this Section)].

(7) **Site specific concerns.** Void of slick spots within or adjacent to the land application area, where subsurface lateral movement of water is unlikely, or areas void of concentrated surface flow such as gullies or waterways.

(8) **Stockpiling of cuttings.** Stockpiling of cuttings may be used during the handling and transportation of the cuttings both at the well and pipeline construction location and the receiving site. At the well site or pad generating the waste or pipeline construction location the cuttings must be placed in a steel pit or the areas used for this practice must be lined and bermed. A stockpile of cuttings at the receiving site must be located within the permitted area and the areas used for this practice must be lined and bermed. The stockpile of cuttings, whether at the well or pipeline construction location or the receiving site, must be closed within 30 days of cessation of drilling operations.

(d) **Sampling requirements.**

(1) **Notice to Field Inspector.** The appropriate Field Inspector shall be contacted at least two business days prior to sampling of the receiving soil and sampling of the drilling fluids and/or cuttings to be land applied from an earthen pit. This is to allow a Commission representative an opportunity to be present.

(2) **Receiving soil.** Sampling of the receiving soil shall be performed by, or under the supervision of, a soil scientist or other qualified person pre-approved by the Commission. Soil samples shall be taken from the proposed application area and analyzed. A minimum of four representative core samples from the surface (0-6 inches) must be taken from each ten acres, or part thereof. Each group of surface core samples representative of a ten-acre area (or less) shall be combined and thoroughly mixed. A minimum one-pint composite sample shall be taken and placed in a clean container for delivery to the laboratory. Alternatively, soil samples may be composited by the laboratory.

(3) **Drilling fluids and/or cuttings.**

(A) **Earthen pits.** Drilling fluids and/or cuttings to be land applied shall be sampled using the following procedure:

(i) Prior to sampling, fresh water (except natural precipitation) shall not be added to any pit for dilution or any other purpose.

(ii) A minimum of four samples, each from different quadrants of the pit and representative of the materials to be land applied, must be taken if the volume to be land applied is 25,000 bbls. or less. If more than 25,000 bbls. are to be land applied, a minimum of four quadrant samples plus one sample for each 5,000 bbls. over 25,000 bbls. will be

required. The samples shall be combined and thoroughly mixed, then a minimum two quart composite sample placed into a foil or teflon covered glass container. The container shall be filled completely to exclude air and delivered to the laboratory within seven days. No samples shall be altered in any way.

(iii) After samples have been taken for analysis from a pit, the operator shall not allow the addition of fluids or other materials, except natural precipitation or fresh water to decrease the viscosity of the fluid.

(B) **Tanks.** Sampling of the drilling fluids and/or cuttings shall occur after the application has been approved. A minimum of one representative sample must be taken from each tank, the contents of which are to be land applied.

(e) **Analysis requirements.**

(1) **Testing.**

(A) The composite sample(s) of soil shall be tested by a laboratory operated by the State of Oklahoma or certified by the Oklahoma Department of Environmental Quality or in the North American Proficiency Testing System. Either a 1:1 extract or saturated paste extract shall be used for sample preparation.

(B) **Methods of analysis.**

(i) The composite sample(s) of drilling fluids and/or cuttings shall be analyzed by a laboratory operated by the State of Oklahoma or certified by the Oklahoma Department of Environmental Quality or in the North American Proficiency Testing System.

(ii) Samples of the drilling fluids and/or cuttings may be tested on-site. A filter press shall be used for preparation of samples. Tests must be performed by a person who is knowledgeable and experienced in the chemical testing of fluids. Acceptable on-site testing protocol may be obtained from the appropriate Conservation Division District Office.

(2) **Parameters for receiving soil.** Parameters for analysis of the receiving soil shall include at a minimum EC and ESP.

(3) **Parameters for drilling fluids and/or cuttings.**

(A) **Earthen pits.** Parameters for analysis of the drilling fluids and/or cuttings shall include at a minimum EC and Oil and Grease (O&G). Dry Weight shall also be determined if a significant amount of solids will be land applied.

(B) **Tanks.** EC shall be a required parameter for analysis of drilling fluids and/or cuttings. Dry weight shall also be determined if a significant amount of solids will be land applied.

(f) **Application for permit.**

(1) **Who may apply.** Only the operator of a well or pipeline or the operator's designated agent may apply for a land application permit under this Section, except that a commercial pit operator may also apply in case of emergency or for the purpose of facilitating repair or closure.

(2) **Required form and attachments.** Each application for land application of drilling fluids and/or cuttings shall be submitted to the Pollution Abatement Department on Form 1014S. A legible application shall be

required. The following shall be attached to the application:

- (A) Written permission from the surface owner to allow the applicant to land apply drilling fluids and/or cuttings. For purposes of obtaining such consent, the applicant shall use Form 1014L.
- (B) A topographic map and the most recent aerial photograph (minimum scale 1:660) with the proposed and potential land application areas delineated as well as the location of cultural features such as buildings, water wells, etc. Both the topographic map and aerial photograph must show all areas within 1,320 feet of the boundary of the land application area.
- (C) A site suitability report, pursuant to subsections (c) and (h)(6) of this Section, based on an on-site investigation and signed by a soil scientist or other qualified person. The report shall include detailed information concerning the site and shall discuss how all site characteristics were determined. Any requests for a variance to site suitability restrictions must be accompanied by a written justification that has been developed or approved by a soil scientist or other qualified person. The justification shall provide explanation as to safeguards which will assure that conditions of the permit will be met and there will be no adverse impacts from the land application.
- (D) Analysis of drilling fluids and/or cuttings (for earthen pits only).
- (E) Analyses of soil samples.
- (F) Loading calculations.
- (G) Copies of all chains-of-custody related to sampling.
- (H) Manufacturer, model number, and specifications of testing equipment to be used (for tanks only).
- (I) If there is an agent, a notarized affidavit designating same, signed by the operator within the last twelve months (Form 1014LA).
- (J) Identification of any soil farming permit that has been issued in the same quarter section within the last three years. This information is available in the OCC Soil Farming Database on the web at www.occeweb.com.
- (K) Other information as required by this Section or requested by the Pollution Abatement Department.

(3) **Review period.** The Pollution Abatement Department shall review the application, either approve or disapprove it, and return a copy of Form 1014S within five business days of submission of all required or requested information. If approved, a permit number shall be assigned to Form 1014S; if disapproved, the reason(s) shall be given. The applicant may make application for a hearing if it is not approved.

(g) **Calculating maximum application rate.**

(1) **Earthen pits.**

(A) The maximum application rate shall be calculated by the applicant or the applicant's designated agent based on the analyses of the pit materials and the soil of the application area. The averaging of TDS or TSS values of soil sampling areas shall not be permitted. If the entire application area is larger than ten acres, requiring separate soil sampling areas, the applicant or the

applicant's designated agent shall use the highest soil TDS or TSS value of any sampling area in calculating the maximum application rate for the entire application area, and shall also calculate the maximum application rate of each ten acre (or less) application area using the respective TDS or TSS values of each soil sampling area. The applicant or the applicant's designated agent shall decide which of the two loading rates to use and notify the appropriate Conservation Division District Office when notification of commencement of land application is given, pursuant to (h)(1) of this Section.

(B) Soil loading formulas contained in Appendix I shall be used.

(C) The maximum application rate shall be restricted by the most limiting parameter. The Pollution Abatement Department shall indicate on the permit the maximum application rate and the minimum acreage that must be used.

(2) Tanks.

(A) The applicant shall calculate the maximum application rate based on the analysis of each tank or other containment vessel to be land applied and the soil of the application area. The averaging of TDS or TSS values of soil sampling areas shall not be permitted. If the entire application area is larger than ten acres, requiring separate soil sampling areas, the applicant shall have the option of using the highest soil TDS or TSS value of any sampling area in calculating the maximum application rate for the entire application area, or calculating the maximum application rate of each ten-acre (or less) application area using the respective TDS or TSS value of each soil sampling area.

(B) Soil loading formulas contained in Appendix I shall be used.

(C) Based on the maximum application rate, the applicant or its designated agent shall determine where the fluids will be applied and supervise the land application process.

(h) Conditions of permit. Any land application which is performed under this Section shall be subject to the following conditions or stipulations of the permit:

(1) **Notice to Field Inspector.** The applicant shall notify the appropriate Field Inspector at least 24 hours prior to the commencement of land application to allow a Commission representative an opportunity to be present.

(2) **Compliance agreement.** Any person responsible for supervision of land application shall have signed a compliance agreement with the Commission (Form 1014CA).

(3) **Presence of representative.** A representative of the applicant shall be on the land application site at all times during which fluids and/or cuttings are being applied. The representative shall be an employee of the applicant, designated agent, contractor, or other person pre-approved by the Commission.

(4) **Materials to be land applied.** Land application shall be limited to water-based drilling fluids and/or cuttings.

(5) **Weather restrictions.** Land application, including incorporation, shall not be done:

(A) During precipitation events.

(B) When the soil moisture content is at a level such that the soil cannot readily take the addition of drilling fluids.

(C) When the ground is frozen to a degree that the soil cannot readily take the addition of fluids.

(D) By spray irrigation when the wind velocity is such that even distribution of materials cannot be accomplished or the buffer zones, pursuant to (6) of this subsection, cannot be maintained.

(6) **Buffer zones.** Land application shall not be done within the following buffer zones, as identified in the site suitability report:

(A) Fifty feet of a property line boundary.

(B) Three hundred feet of any water well or water supply lake used for domestic or irrigation purposes.

(C) One-quarter (1/4) mile of any public water well or public water supply lake.

(7) **Land application rate.** The maximum calculated application rate of drilling fluids and/or cuttings shall not be exceeded. It may require more than one pass to achieve the maximum application rate while avoiding runoff or ponding, pursuant to (9) of this subsection. Application of drilling fluids and/or cuttings outside the approved plot shall be prohibited.

(8) **Land application method.**

(A) Application of drilling fluids and/or cuttings shall be uniform over the approved land application plot, shall not be applied at a rate to cause permanent vegetation damage, and shall be made by a method approved by the Commission prior to use. The flood irrigation method shall be limited to those fields that normally are irrigated in that manner.

(B) For earthen pits, if more than 500 lbs/acre of Oil and Grease or 50,000 lbs/acre of Dry Weight materials are applied, the materials shall be incorporated into the soil by use of the injection method, or by disking or some other method approved by the Commission.

(C) All land application vehicles shall be either a single or double axle vehicle with a permanently attached tank that shall not exceed 100 barrels, and the vehicle shall be equipped so as to minimize pooling and ruts caused by tire tracks. It shall have a diffuser mechanism to spread the mud/fluids in a fan pattern. Spreader bars shall not be used. The mud/fluids shall be forced from the tank with air pressure or a mechanical pump. Gravity applications are prohibited. Transport/tanker trucks (18 wheel vehicles) shall not be used for land application at any time. Use of an unauthorized vehicle or equipment may result in the revocation of the land application permit. A fine of up to \$2,000.00 may be assessed for each violation of this paragraph.

(D) Drill cuttings shall be spread with an industrial mechanical spreader capable of broadcasting and/or fanning out the cuttings. Dozers, backhoes, motor blades or scrapers shall not be used to spread drill cuttings or drill solids during land application at any time.

(9) **Runoff or ponding prohibited.** No runoff of land applied materials shall be allowed during application. Ponding is prohibited, except where the flood irrigation method is approved. In order to comply with this rule, some applications will require the use of more than the minimum calculated

acreage and/or a drying period between applications.

(10) **Vegetative cover.** If the vegetative cover is destroyed or significantly damaged by disking, injection, or other practice associated with land application, a bona fide effort shall be made to restore or reestablish the vegetative cover within 180 days after the land application is completed. Additional efforts shall be made until the vegetative cover is fully restored or reestablished.

(11) **Time period.**

(A) **Earthen pits.** Land application shall be completed within 90 days from the date of the permit. At the end of the 90-day period, the permit shall expire by its own terms.

(B) **Tanks.** Land application shall be completed within 90 days after drilling ceases. At the end of the 90-day period, the permit shall expire by its own terms.

(12) **Post-application report.** A post-application report (Form 1014R) shall be submitted by the operator or the operator's agent to the Manager of the Pollution Abatement Department within 90 days of the completion of land application. One extension may be granted for a period of up to 90 days by the Manager of the Pollution Abatement Department. If approval is obtained to amend the permit to authorize land application of contaminated soils and petroleum hydrocarbon based cuttings, any extension of time for submission of the post-application report granted by the Manager of the Pollution Abatement Department shall begin on the date the amended permit is approved. The report shall give specific details of the land application, including test results of materials applied and loading rate calculations (for tanks only), volumes of materials applied, and an aerial photograph (minimum scale 1:660) delineating the actual area where materials were applied. All applicable loading calculations from Appendix I of this Chapter shall be included in the Form 1014R. The report shall contain a statement certifying that the land application was done in accordance with the approved permit. Failure to timely submit a Form 1014R may result in the assessment of a fine of up to \$500.00.

(13) **Violations.** If the applicant violates the conditions of the permit or this Section, the land application shall be discontinued and the Pollution Abatement Department shall be contacted immediately. The Pollution Abatement Department may revoke the permit and/or require the operator to do remedial work. If the permit is not revoked, land application may resume with the Pollution Abatement Department's approval. If the permit is revoked, the operator may make application for a hearing to reinstate it.

(14) **Requirements to close pit.** Neither filing an application nor receiving a permit under this Section shall extend the time limit for closing a reserve pit pursuant to 165:10-7-16, or a commercial pit pursuant to 165:10-9-1.

(i) **Variances.** A variance from the time provisions of (d)(1), (h)(1), or (h)(10) of this Section may be granted by the appropriate Conservation Division District Office for justifiable cause. A written request and supporting documentation shall be required. The appropriate Conservation Division District Office shall respond in writing within five business days after receipt, either approving or disapproving the request.

165:10-7-20. Noncommercial disposal or enhanced recovery well pits used for temporary storage of saltwater

(a) **Scope.** This Section shall apply to any production operation where a pit is used for temporary storage of saltwater, except (c)(7) of this Section, which shall apply to any noncommercial well, regardless of whether or not a pit is used. Any pit sought to be approved pursuant to this Section will require a permit. The operator of the proposed pit shall submit Form 1014 to the appropriate Conservation Division District Office for review and approval.

(b) **Construction requirements.**

(1) **Splash pad/apron.** A splash pad/apron shall be constructed at the unloading area of any noncommercial disposal well or enhanced recovery pit to the design and dimensions necessary to contain and direct all materials unloaded into the pit, unless the pit is of such design that discharge directly into it presents no spill potential.

(2) **Pit specifications.** Except as provided by (4)(A) of this subsection, any noncommercial disposal or enhanced recovery well pit shall be constructed of concrete or steel or be lined with a geomembrane liner according to the following:

(A) Concrete pits must be steel reinforced and have a minimum wall thickness of six inches. A leachate collection system approved by the Manager of the Pollution Abatement Department must be installed underneath the concrete pits.

(B) Steel pits must have a minimum wall thickness of three-sixteenths (3/16) inch. A previously used steel pit may be installed, provided it is free of corrosion or other damage. A leachate collection system approved by the Manager of the Pollution Abatement Department must be installed underneath the steel pits.

(C) Geomembrane liners must:

(i) Have a minimum thickness of 30 mils, be chemically compatible with the type of wastes to be contained, and have ultraviolet light protection.

(ii) Be placed over a specially prepared, smooth, compacted surface void of sharp changes in elevation, rocks, clods, organic debris, or other objects.

(iii) Be continuous (may include seams) and cover the bottom and interior sides of the pit entirely. The edges must be securely placed in a minimum twelve inch deep anchor trench around the perimeter of the pit.

(iv) A leachate collection system approved by the Manager of the Pollution Abatement Department must be installed underneath the geomembrane lined pit.

(3) **Certification of liner.** The operator of any saltwater storage pit that is constructed with a geomembrane liner shall secure an affidavit signed by the installer, certifying that the liner meets minimum requirements and was installed in accordance with Commission rules. It shall be the operator's responsibility to maintain the affidavit and all supporting documentation pertaining to the liner, such as geomembrane liner specifications from the manufacturer, etc., and shall make them available to a representative of the Conservation Division upon request.

(4) **Monitoring of site.**

(A) If not constructed according to one of the three methods in (2) of this subsection, any noncommercial disposal or enhanced recovery well pit shall be required to have a leachate collection system or at least one monitor well, unless it can be shown that the pit is not located over a hydrologically sensitive area. The District Manager may require more than one monitor well if he has reason to believe one would not be sufficient to adequately monitor the site.

(B) Any monitor well shall be installed within 100 feet of the pit. An existing nearby water well may be used as a monitor well upon written approval by the District Manager or Manager of Field Operations.

(C) Any new monitor well shall be drilled to a depth of at least ten feet below the top of the first free water encountered and shall be drilled and completed by a licensed monitor well driller. If documentation is submitted to the District Manager prior to drilling the monitor well to show that no free water will be encountered within a depth of 50 feet from the surface, the District Manager may allow the monitor well(s) to be drilled to a lesser depth or eliminated.

(D) Any new monitor well shall meet the requirements as set out in rules established by the Oklahoma Water Resources Board, in addition to the following requirements:

(i) A removable and lockable cap placed on top of the casing. The cap must remain locked at all times, except when a well is being sampled.

(ii) Within 30 days of installation, construction details for any leachate collection system or specific completion information for any monitor well and a diagram of the location of any monitor well in relation to the pit shall be submitted to the Manager of Field Operations.

(c)

(1) **Fencing.** All noncommercial disposal or enhanced recovery well surface facilities that have a pit shall be completely enclosed by a fence at least four feet in height. Said fence shall be constructed in such a manner as to prevent livestock from entering the pit area.

(2) **Site maintenance.** The normal access surface of any well site that has a pit, including the access road(s), shall be maintained in a condition that will safely and easily allow access.

(3) **Exclusion of runoff water.** No pit shall be allowed to receive runoff water.

(4) **Freeboard.** The fluid level in any concrete or steel noncommercial disposal or enhanced recovery well pit shall be maintained at all times at least six inches below the top of the pit wall. Any geomembrane lined pit shall have a minimum of 18 inches of freeboard at all times.

(5) **Temporary storage only.** No pit shall be used as permanent storage for salt water.

(6) **Sampling of monitor wells or leachate collection systems.**

(A) Sampling of monitor wells and leachate collection systems shall occur once every six months, during the months of January and July.

(B) The appropriate District Manager shall be notified at least 24 hours in advance of sampling to allow a Commission representative an opportunity to witness the sampling.

(C) Samples shall be collected, preserved, and handled by the operator according to EPA approved standards (RCRA Groundwater Monitoring Technical Enforcement Guidance Document, EPA, OSWER-9950.1, September, 1986, pp. 99-107) and analyzed for pH, chlorides (Cl) and total dissolved solids (TDS) by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma. Analysis of additional parameters may be required as determined by the District Manager or Manager of Field Operations. A copy of each analysis and a statement as to the depth to groundwater encountered in each well, or a written statement that no water was encountered, shall be forwarded to the Manager of Field Operations, within 30 days of sampling.

(D) All samples delivered to the laboratory shall be accompanied by a chain of custody form. The chain of custody form and sample analyses must be submitted to the Conservation Division.

(7) **Prevention of pollution.** All noncommercial disposal or enhanced recovery wells shall be maintained at all times so as to prevent pollution. In the event of a nonpermitted discharge from surface facilities, sufficient measures shall be taken immediately to stop, contain, and control the loss of materials. Reporting of said discharge shall be in compliance with 165:10-7-5(c). Any materials lost due to such discharge shall be cleaned up as directed by a representative of the Conservation Division of the Commission.

(8) **Oil film.** The operator of a saltwater pit shall be responsible for the protection of migratory birds. Therefore, the Conservation Division recommends that to prevent the loss of birds due to oil films, all open top tanks and pits containing fluid be kept free of oil films or sludge or be protected from access to birds. [See Advisory Notice 165:10-7-3(c)]

(d) Closure requirements.

(1) **Time limit.** Within 180 days of the cessation of operations, all associated pits shall be emptied of all contents, and either removed or filled with soil. All monitor wells shall be plugged with bentonite or cement, unless exempt in writing by the District Manager or Manager of Field Operations. The site shall be revegetated within one (1) year.

(2) **Burial.** If any concrete, steel, geomembrane, or other materials associated with the site are to be left on-site, they shall be buried under a minimum soil cover of three feet, pursuant to 165:10-3-17.

(e) **Prospective application to existing facilities.** All provisions of this Section, except those in (b)(2) and (b)(3), shall apply to all existing pits within the scope of this Section which are, or have been, in operation prior to the effective date of this Section. Operators shall have one (1) year from the effective date of this Section in which to bring their facilities into compliance with the applicable provisions of this Section. Failure to comply with any applicable provision may result in revocation of the authority to operate.

(f) Variances.

(1) A variance from the time requirements of (c)(6), (d)(1), or (e) of this Section may be granted by the District Manager or Manager of Field

Operations for justifiable cause. A written request and justifiable explanation is required. The District Manager or Manager of Field Operations shall respond in writing within five business days, either approving or disapproving the request.

(2) Any variance from the liner requirements as required under (b)(2) of this Section may be granted by the Manager of Field Operations after receipt of a written request and supporting documentation required by the department.

[Source: Amended at 16 Ok Reg 2190, eff 7-1-99; Amended at 23 Ok Reg 2229, eff 7-1-06; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 29 Ok Reg 950, eff 7-1-12; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 593, eff 8-25-16; Amended at 36 Ok Reg 534, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 1-1-20]

165:10-7-21. Refining and processing of oil and gas

(a) All deleterious substances obtained or used in the processing and refining of oil and gas shall be disposed of in a manner that will prevent the pollution of fresh water.

(b) Chemicals, gasolines, oil, and other deleterious substances shall be stored, where necessary, in tanks or containers of a material and of a construction and in a manner that will prevent the escaping, seepage, or draining of such liquids into any fresh water.

165:10-7-22. Permits for County Commissioners to apply waste oil, waste oil residue, or crude oil contaminated soil to roads

(a) **Prohibition against application of waste oil, waste oil residue, or crude oil contaminated soil without permit.** This Section prohibits any Board of County Commissioners from applying waste oil, waste oil residue, or crude oil contaminated soil to a street or road without a permit.

(b) **Permit by appropriate Conservation Division District Office.** A District Manager for the Conservation Division may issue to a Board of County Commissioners for a county within the district a permit to apply waste oil, waste oil residue, or crude oil contaminated soil to a street or road within the county.

(c) Permit requirements.

(1) **Use of Form 1014W.** The application and permit to apply waste oil, waste oil residue, or crude oil contaminated soil shall be made on Form 1014W, which shall be submitted by electronic mail to the Manager of the appropriate Conservation Division District Office.

(2) **Telephone permits.** In case of emergency, a District Manager may issue a permit by telephone. If an applicant obtains a permit by telephone, then the applicant shall file Form 1014W and attachment within five business days after receipt of the permit by telephone.

(3) Conditions for permit.

(A) Waste oil, waste oil residue, and contaminated soils applied under this Section shall consist of crude oil and materials produced with crude oil only and shall not contain any refined oils such as motor oils, lubricants, compressor oils or hydraulic fluids.

(B) If required by the District Manager, a hydrocarbon analysis shall be submitted with Form 1014W. The analysis shall be performed by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma in accordance with OCC-approved methods.

(C) Waste oil, waste oil residue, and crude oil contaminated soil shall be applied in such a manner that pollution of surface or subsurface waters will not likely occur and public and private property adjoining the street or road will be protected.

(D) During operations for road oiling, all necessary signs, lights, and other safety and warning devices shall be used to alert road users to conditions. A sign shall be posted with the contractor or authority's name and phone number to contact in case of emergency.

(E) Following completion of the project there shall be a uniform soil/oil base (all liquid worked in), with no visible free-standing oil.

(F) Proper care shall be taken to avoid runoff of oil or water into borrow ditches or adjacent areas.

(G) No road oiling shall be conducted:

(i) When the temperature is less than 45° F.

(ii) In any area where water collects and stands.

(iii) Where soil moisture content or road conditions such as soil type, tight soil conditions, packed soil conditions, or grade limits prevent rapid absorption of the oil.

(d) **Notice to appropriate Conservation Division District Office.** The Board of County Commissioners receiving the permit shall notify the appropriate Conservation Division District Office at least two days prior to commencement of road oiling under a permit.

(e) **Site inspection.** At his discretion, a District Manager may request a Field Inspector of the Conservation Division or an Enforcement Officer of the Transportation Division to inspect the site at any time during the road oiling operation to ensure compliance with this Section.

(f) **Duration of permit.** The permit shall state the duration of the permit, and it shall also state that if the application fails to comply with either the terms of the permit or the terms of this Section, then the permit shall terminate automatically.

(g) **Disapproval or cancellation of permits.**

(1) If a District Manager receives a complaint about a road oiling permit, he shall cause an investigation of the complaint to be made as soon as practicable. During the investigation, the District Manager may direct the applicant to cease road oiling under a permit. If necessary, the District Manager may verbally revoke the permit.

(2) If a District Manager disapproves an application or cancels a permit, the applicant may apply to the Commission for an order under OAC 165:5-7-41.

[Source: Amended at 12 Ok Reg 2017, eff 7-1-95; Amended at 23 Ok Reg 2229, eff 7-1-06; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 35 Ok Reg 973, eff 9-14-18]

165:10-7-23. Disposal of waste oil

(a) All waste oil and waste oil residue shall be disposed of in one of the following ways:

(1) Transfer or sale to a reclaimer or transporter.

(2) Transfer or sale to County Commissioners.

(3) Administrative approval from the Conservation Division.

(b) All operators or owners of pits, tanks, commercial disposal operations, or reclaimers shall maintain books and records describing the disposition of all waste oil or waste oil residue. A copy of the run or load ticket will satisfy this requirement

if the information required in (c) of this Section is contained therein.

(c) The following information shall be contained in said books and records and subject to audit and inspection by representatives of the Commission for a minimum period of three years:

- (1) The amount of waste oil or waste oil residue removed.
- (2) The location of the waste oil or waste oil residue prior to disposal.
- (3) The destination of waste oil or waste oil residue as reported by transporter.
- (4) The name of the transporter of waste oil or waste oil residue.

165:10-7-24. Waste management practices reference chart

(a) **Scope.** This Section provides reference guidelines for the disposal of wastes under the jurisdiction of the Commission which are generated by oil and gas operators and pipeline companies. Hazardous waste as defined at 40 CFR 261.3 is regulated by the Oklahoma Department of Environmental Quality.

(b) **Waste materials and disposal options.** Consistent with EPA's policy on source reduction, recycling, treatment and proper disposal, operators shall use waste management practices as listed in (c) of this Section which describes the various management practices for the following waste materials. For any of the following waste materials where option (16) of subsection (c) is listed, option (16) shall be considered before any other option.

- (1) Produced water: Options 1, 7 & 9
- (2) Weighted water: Options 1 & 7
- (3) Used treatment fluids, frac sand, and other flowback wastes: Options 1, 2, 5 & 7 and, for frac sand only, options 3 & 20
- (4) Water based mud: Options 1, 2, 5, 6, 7, 8 & 19
- (5) Water based mud cuttings: Options 1, 2, 3, 4, 5, 6, 7, 8, 12 & 19
- (6) Oil based mud: Options 1, 2, 3, 4, 5, 7, 12 & 22
- (7) Oil based mud cuttings: Options 1, 2, 3, 4, 5, 7, 8, 12 & 14
- (8) Crude oil: Options 1, 4, 12, 13 & 14
- (9) Used motor, gear, lube, compressor and hydraulic oils: Options 1, 15 & 16
- (10) Used solvents: Options 1, 15 & 16
- (11) Oily debris: Options 1, 3, 13 & 20
- (12) Filter media and backwash: Options 1, 3, 7, 15, 16 & 20
- (13) Glycol, amine, and caustic wash: Options 1 & 7
- (14) Iron sponge: Options 3 & 20
- (15) Molecular sieve: Options 3 & 20
- (16) Produced sand/sediment: Options 3, 7, 8, 17 & 20
- (17) Tight emulsions: Options 1, 4, 8, 12, 14 & 17
- (18) Unused treatment chemicals: Options 1, 15 & 16
- (19) Tank bottoms from E&P: Options 1, 3, 4, 7, 8, 10, 12, 14 & 17
- (20) Paraffin: Options 1, 3, 4, 12, 14, 15, 16 & 20
- (21) Asbestos insulation: Options 3 & 15
- (22) Non-asbestos insulation: Options 3, 15 & 20
- (23) Used batteries: Options 1, 3, 15 & 16
- (24) Oils containing PCBs: Option 11
- (25) Oils not containing PCBs: Options 1, 15 & 16
- (26) Empty oil and chemical drums: Options 1, 3 & 15
- (27) Salt contaminated soils: Options 3, 6, 8 & 17
- (28) Crude oil contaminated soils: Options 1, 3, 4, 8, 10, 12, 14, 17 & 22

- (29) Pit sludges from wellsites, disposal well pits and gathering systems: Options 1, 3, 4, 7, 8, 12, 17 & 20
- (30) Gathering line pigging wastes: Options 1, 3, 7 & 20
- (31) Gas plant sweetening wastes: Options 1, 3, 7 & 20
- (32) Gas plant dehydration wastes: Options 1, 3 & 7
- (33) Cooling tower blowdown from gas plants: Options 7 & 15
- (34) Wastes from subsurface natural gas storage: Options 1, 3, 7 & 20
- (35) Wastes other than refined product removed from produced water and other well fluids prior to injection or disposal: Options 1, 7, 8, 17 & 20
- (36) Gases removed from the production stream: Options 1, 7, 13 & 18
- (37) Waste crude oil and light hydrocarbons (gas condensate) in reserve pits, other impoundments or tankage at wellsites: Options 1, 7, 8, 13 & 17
- (38) Contaminated ground water (except refined products): Options 1, 7, 21 & 22
- (39) Pipeline sludge and other deposits removed from pipe or equipment on E&P gathering systems: Options 1, 3, 7, 8, 10, 17 & 20
- (40) Residues and truckwash from inside the tank of trucks used to transport saltwater, drilling mud or spent completion fluids: Options 1, 3, 7 & 20
- (41) Sewage and wastes from portable toilets: Option 15
- (42) Crude pipeline pigging wastes, contaminated soil and residue from transmission and trunk lines: Options 1, 3, 4, 8, 12, 15, 16, 17 & 22
- (43) Water or soil contaminated by refined product from E&P operations: Options 1, 16, 21 & 22
- (44) Rigwash and supply water: Options 1, 5, 7 & 8
- (45) Storm water and hydrostatic test water from E&P operations: Options 1, 7, 9 & 22
- (46) Spent filters: Options 1 & 3
- (47) Trash and debris: Options 15 & 20
- (48) Refined petroleum product releases: Options 1, 3, 8, 13, 16, 17 & 22
- (49) Refined petroleum product pigging wastes: Options 1, 3, 8, 15, 16, 17 & 22
- (50) Water or soil contaminated by refined products from pipelines: Options 1, 16, 21 & 22
- (51) Hydrostatic test water from pipelines: Options 1, 9, 16 & 22
- (52) Tank bottoms from crude pipeline facilities: Options 1, 3, 4, 8, 10, 12, 14, 16, 17 & 22
- (53) Tank bottoms from refined product pipeline facilities: Options 1, 3, 14, 15, 16, 17 & 22
- (54) Water based mud and cuttings associated with pipeline construction: Options 6 and 8 (165:10-7-19 only)

(c) Disposal options and rule reference guide. The following waste disposal options are referenced in (b) of this Section:

- (1) Reclaim and/or recycle.
- (2) Burial (in accordance with 165:10-7-16).
- (3) Landfills regulated by the Oklahoma Department of Environmental Quality.
- (4) Road applications by County Commissioners (in accordance with 165:10-7-22 and 165:10-7-28).
- (5) Noncommercial pits (in accordance with 165:10-7-16).
- (6) Commercial mud disposal pits (in accordance with 165:10-9-1).

- (7) Underground injection (in accordance with 165:10-5-1 through 165:10-5-14).
- (8) Land application (in accordance with 165:10-7-19 and 165:10-7-26).
- (9) Discharge (in accordance with 165:10-7-17).
- (10) Reclaim and/or recycle (in accordance with 165:10-7-23).
- (11) In accordance with EPA; Code of Federal Regulations (CFR), Title 40, Part 761.60 through 761.79.
- (12) Application to lease roads, well locations, and production sites (in accordance with 165:10-7-27 and 165:10-7-29).
- (13) Open burning in accordance with Oklahoma Department of Environmental Quality regulations.
- (14) Disposal of waste oil as specified in 165:10-7-23.
- (15) Disposal in accordance with Oklahoma Department of Environmental Quality regulations.
- (16) If the waste is determined to be a hazardous waste under the Federal Resource Conservation and Recovery Act (RCRA), disposal will be determined by the Oklahoma Department of Environmental Quality; if a non-hazardous waste, Option 17 may be used or other disposal option as approved by the Commission.
- (17) On-site or in-situ bioremediation/remediation.
- (18) Flaring or venting (in accordance with 165:10-3-15).
- (19) Commercial soil farming (in accordance with 165:10-9-2).
- (20) Burial as approved by the Commission.
- (21) Surface discharge as approved by the Commission.
- (22) Land application as approved by the Commission.

165:10-7-25. One-time land application of water-based fluids from tanks or other containment vessels [REVOKED]

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Revoked at 14 Ok Reg 2198, eff 7-1-97]

165:10-7-26. Land application of contaminated soils and petroleum hydrocarbon based drill cuttings

(a) **Authority for land application.** No person shall land apply soils or drill cuttings contaminated by salt or petroleum hydrocarbons except as provided by this Section. Any operator failing to obtain a permit may be fined up to \$2,000.00. The land application permit shall be posted at the well site, pad or pipeline construction location.

(b) **Scope.** This Section shall cover the land application of soils and drill cuttings contaminated by salt and/or petroleum hydrocarbons. Petroleum hydrocarbon-contaminated soils land applied under this Section shall meet the RCRA criteria for exempt or non-exempt/nonhazardous waste. [Reference 40 CFR Subtitle C and EPA publication EPA530-K-95-003 "Crude Oil and Natural Gas Exploration and Production Wastes: Exemption from RCRA Subtitle C Regulation"]. Hazardous waste as defined at 40 CFR 261.3 is regulated by the Oklahoma Department of Environmental Quality. Any land application made under this Section shall be done from a single well or a single pad (containing multiple wells). Permits shall not be granted for lands that have been previously permitted and used for this practice or similar practices such as soil remediation within the last three (3) years.

(c) **Receiving site suitability restrictions.** Land application shall only occur on land having all of the characteristics below, as field verified by a soil scientist or other qualified person pre-approved by the Commission. Any variance from site suitability restrictions must be approved by the Oil and Gas Conservation Division (see (g)(2)(C) of this Section).

(1) **Maximum slope.** A maximum slope of eight percent for all application methods.

(2) **Depth to bedrock.** Depth to bedrock will be at least 20 inches if crude oil contaminated soils or petroleum hydrocarbon-based drill cuttings are to be applied; 20 inches if salt contaminated soils are to be applied.

(3) **Soil texture.** A soil profile (as defined by USDA soil surveys) containing at least twelve inches (may be cumulative) of one of the following soil textures between the surface and the water table, unless a documented impeding layer of shale is present: loam, silt loam, silt, sandy clay loam, silty clay loam, clay loam, sandy loam, fine sandy loam, sandy clay, silty clay, or clay.

(4) **Salinity.** Slight salinity [defined as Electrical Conductivity (EC) less than 4,000 micromhos/cm] in the topsoil, or upper six inches of the soil, and a calculated Exchangeable Sodium Percentage (ESP) less than 10.0.

(5) **Depth to water table.** No evidence of a seasonal water table within six (6) feet of the soil surface as verified by field observation and published data.

(6) **Distance from water bodies.** A minimum distance of 100 feet from the land application site boundary to any perennial stream and 50 feet to any intermittent stream found on the appropriate United States Geological Survey (U.S.G.S.) topographic map (available for viewing at the Commission's Oklahoma City Office and appropriate Conservation Division District Offices); and a minimum of 100 feet to any freshwater pond, lake, or wetland designated by the National Wetlands Inventory Map Series, prepared by the U.S. Fish and Wildlife Service (available for viewing at the Commission's Oklahoma City Office). Also, see (h)(6) of this Section.

(7) **Site specific concerns.** Void of slick spots within or adjacent to the land application area, where subsurface lateral movement of water is unlikely, or areas void of concentrated surface flow such as gullies or waterways.

(8) **Stockpiling of cuttings.** Stockpiling of cuttings may be used during the handling and transportation of the cuttings both at the well location and the receiving site. At the well site or pad generating the waste, the cuttings must be placed in a steel pit or the areas used for this practice must be lined and bermed. A stockpile of cuttings at the receiving site must be located on the permitted area. The stockpile of cuttings, whether at the well location or the receiving site, must be closed within 30 days of cessation of drilling operations.

(d) **Sampling requirements.**

(1) **Notice to Field Inspector.** The appropriate Field Inspectors shall be contacted at least two business days prior to sampling of the receiving soil and materials to be land applied. This is to allow a Commission representative an opportunity to be present.

(2) **Receiving soil.** Sampling of the receiving soil shall be performed by, or under the supervision of, a soil scientist or other qualified person pre-approved by the Commission. Soil samples shall be taken from the

proposed application area and analyzed. A minimum of four representative surface core samples from the surface (0-6 inches) must be taken from each ten acres, or part thereof. Each group of surface core samples representative of a ten-acre area (or less) shall be combined and thoroughly mixed. A minimum one pint composite sample shall be taken and placed in a clean container for delivery to the laboratory. Alternatively, soil samples may be composited by the laboratory.

(3) **Materials to be land applied.** Representative samples of the materials to be land applied shall be taken, composited into a minimum one-pint sample, and placed in a clean container for delivery to the laboratory. Alternatively, materials to be land applied may be composited by the laboratory.

(e) **Analysis requirements.**

(1) **Salt contaminated soils or drill cuttings.** Analysis requirements will be dependent upon the loading method that is chosen. For most applications, loading based on Total Dissolved Solids (TDS) or Total Soluble Salts (TSS) will be most appropriate. However, applicants proposing to land apply on a site in western Oklahoma, where the soils commonly contain moderate to high levels of gypsum, may benefit from using the loading formula based on Chlorides (Cl).

(A) Samples of soil and materials to be land applied shall be tested by a laboratory proficient in testing soils. Either a 1:1 extract or saturated paste extract shall be used for sample preparation for TDS or TSS or Cl loading. A saturated paste moisture equivalent is necessary where the saturated paste sample preparation method is used.

(B) Parameters for analysis of the receiving soil shall include at a minimum EC, TDS or TSS, and ESP for TDS/TSS loading. For Chloride loading, parameters shall include Chlorides (dry weight basis) and ESP.

(C) Parameters for analysis of soils or drill cuttings contaminated by salt shall include at a minimum EC for TDS/TSS loading and both EC and Cl for Chloride loading.

(2) **Soils and drill cuttings contaminated by petroleum hydrocarbons.**

(A) Samples of soil and materials to be land applied shall be tested by a laboratory proficient in testing soils.

(B) Parameters for analysis of the receiving soil shall include at a minimum EC and ESP.

(C) Parameters for analysis of soils or drill cuttings contaminated by petroleum hydrocarbons shall include at a minimum a test of the appropriate carbon range(s), which is determined by the nature of the waste material. These include Gasoline Range Organics (GRO) - C6 to C10 (EPA test method 8015/8020 M) and TPH (Oklahoma method 1005 extended C35).

(f) **Application rates.**

(1) **Calculations.** The maximum application rate for TDS or TSS, Cl, and GRO, or TPH shall be calculated by the applicant based upon the analyses of the materials to be land applied and the soil of the application area. For salt contaminated soils or drill cuttings, if the application area encompasses more than one soil sampling area, the rate shall be calculated in one of two ways, depending on how the application will be made. The applicant may

either calculate the maximum application rate for the entire application area based upon the highest soil TDS or TSS or Cl value of any sampling area (averaging not allowed), or calculate it for each ten acre (or less) application area using the respective soil TDS or TSS or Cl values of each sampling area.

(2) **Soil loading formulas.** The maximum application rate for any application area shall be restricted by the most limiting parameter. To determine this, the soil loading formulas in Appendix I of this Chapter shall be used as applicable.

(3) **Variations.** In special situations, a request for a variance relating to soil loading of petroleum hydrocarbons may be administratively approved by the Manager of the Pollution Abatement Department. The applicant shall submit a written request explaining the circumstances or conditions which warrant a variance and shall also submit a management plan for reducing the petroleum hydrocarbon content in the soil to two percent or less.

(g) **Application for permit.**

(1) **Who may apply.** Only the operator responsible for generating the waste to be land applied or the operator's designated agent may apply for a land application permit, except that the Oklahoma Energy Resources Board or its designated contractor may make application to land apply materials for which there is no responsible party.

(2) **Required form and attachments.** Each application for land application of soils contaminated by salt and/or crude oil or petroleum hydrocarbon-containing deleterious substances shall be submitted to the Pollution Abatement Department on Form 1014S. A legible application shall be required. The following shall be attached to the application:

(A) Written permission from the surface owner to allow the applicant to land apply, incorporate, and fertilize materials. For purposes of obtaining such consent, the applicant shall use Form 1014L.

(B) A topographic map and the most recent aerial photograph (minimum scale 1:660) with the proposed and potential land application areas delineated as well as the location of cultural features such as buildings, water wells, etc. Both the topographic map and aerial photograph must show all areas within 1320 feet of the boundary of the land application area.

(C) Receiving site suitability report, pursuant to subsections (c) and (h)(6) of this Section, based on an on-site investigation and signed by a soil scientist or other qualified person. The report shall include detailed information concerning the site and shall discuss how all site characteristics were determined. Any requests for a variance to site suitability restrictions must be accompanied by a written justification that has been developed or approved by a soil scientist or other qualified person. The justification shall provide explanation as to safeguards which will assure that conditions of the permit will be met and there will be no adverse impacts from the land application.

(D) Analyses of receiving soil samples.

(E) Analyses of contaminated soil or petroleum hydrocarbon-based drill cuttings.

(F) For contaminated soils, an investigation report and diagram, drawn to scale, detailing the aerial extent and depth of the contamination; and sampling procedures which were used to assure that representative samples were taken.

(G) Loading calculations.

(H) Copies of all chains-of-custody related to sampling.

(I) If there is an agent, a notarized affidavit designating same, signed by the operator within the last 12 months (Form 1014LA).

(J) Identification of any soil farming permit that has been issued in the same quarter section within the last three (3) years. This information is available in the OCC Soil Farming Database on the web at www.occeweb.com.

(K) Other information as required by this Section or requested by the Pollution Abatement Department.

(3) **Review period.** The Pollution Abatement Department shall review the application, either approve or disapprove it, and return a copy of Form 1014S within five business days of submission of all required or requested information. If approved, a permit number shall be assigned to Form 1014S; if disapproved, the reason(s) shall be given. The applicant may make application for a hearing if it is not approved.

(h) **Conditions of permit.** Any land application which is performed under this Section shall be subject to the following conditions or stipulations of the permit:

(1) **Notice to Field Inspector.** The applicant shall notify the appropriate Field Inspector at least 24 hours prior to the commencement of land application to allow a Commission representative an opportunity to be present.

(2) **Compliance agreement.** Any person responsible for supervision of land application shall have signed a compliance agreement with the Commission (Form 1014CA).

(3) **Presence of representative.** A representative of the applicant shall be on the land application site at all times during which materials are being applied. The representative shall be an employee of the applicant, designated agent, contractor, or other person pre-approved by the Commission.

(4) **Materials to be land applied.** Land application under this Section shall be limited to soils and drill cuttings contaminated by salt and/or petroleum hydrocarbons. Petroleum hydrocarbon-contaminated soils or drill cuttings land applied under this Section shall meet the RCRA criteria for exempt or non-exempt/nonhazardous waste. Hazardous waste as defined at 40 CFR 261.3 is regulated by the Oklahoma Department of Environmental Quality.

(5) **Weather restrictions.** Land application, including incorporation, shall not be done:

(A) During precipitation events.

(B) When the soil moisture content is at a level such that the soil cannot readily take the addition of materials.

(C) When the ground is frozen to a degree that the soil cannot readily take the addition of fluids.

(6) **Buffer zones.** Land application shall not be done within the following buffer zones, as identified in the site suitability report:

(A) Fifty feet of a property line boundary.

(B) Three hundred feet of any water well or water supply lake used for domestic or irrigation purposes.

(C) One-quarter (1/4) mile of any public water well or public water supply lake.

(7) **Land application rate.** The maximum calculated application rate of materials shall not be exceeded. Under no circumstances shall land applied materials exceed a two inch depth. Furthermore, no runoff or ponding of land applied materials shall be allowed. It may require more than one pass or lift to achieve the maximum application rate while avoiding runoff or ponding. For land applications involving petroleum hydrocarbons all free oil shall be removed.

(8) **Land application method.**

(A) Application of materials shall be uniform over the approved land application area, and shall be made by a method approved by the Commission prior to use. Land applied materials shall be incorporated into the soil by disking or chiseling during or immediately after application to a minimum depth of two times the depth of applied materials; however, if any contaminated sandy soil is applied to any clayey soil, incorporation shall be to a minimum depth of four times the depth of the applied materials. Tillage of grassland may not be necessary. If materials are land applied on grassland a reduced application rate may be necessary.

(B) All land application vehicles shall be either a single or double axle vehicle with a permanently attached tank that shall not exceed 100 barrels, and the vehicle shall be equipped so as to minimize pooling and ruts caused by tire tracks. It shall have a diffuser mechanism to spread the materials in a fan pattern. Spreader bars shall not be used. The materials shall be forced from the tank with air pressure or a mechanical pump. Gravity applications are prohibited. Transport/tanker trucks (18 wheel vehicles) shall not be used for land application at any time. Use of an unauthorized vehicle or equipment may result in the revocation of the land application permit. A fine of up to \$2,000.00 may be assessed for each violation of this paragraph.

(C) The materials shall be spread with an industrial mechanical spreader capable of broadcasting and/or fanning out the cuttings. Dozers, backhoes, motor blades or scrapers shall not be used to spread materials during land application at any time.

(9) **Fertilizer.** For any land application involving petroleum hydrocarbon-contaminated soils and/or drill cuttings, if it is determined that revegetation is needed, fertilizer shall be applied at an appropriate rate as indicated by soil testing for available N-P-K to adjust the average carbon-nitrogen ratio in order to enhance biodegradation of the petroleum hydrocarbons and assist in reestablishing vegetation. Soil tests shall also include at a minimum EC, ESP, N-P-K, C:N ratio and TPH. Soil samples shall be collected from the affected area at a depth of six (6) inches. Background samples shall be collected from an adjacent unaffected area. In the absence of soil testing, Nitrogen, Phosphorus, and Potassium shall be applied at a rate of 160-40-40 lbs. per acre (actual N-P-K). Application of fertilizers shall be done in a manner that minimizes runoff potential (split applications) and so as to increase availability of nutrients to

microorganisms for degradation of petroleum hydrocarbons.

(10) **Vegetative cover.** A bona fide effort shall be made to restore or reestablish the vegetative cover within 180 days after the land application is completed. Additional efforts shall be made until the vegetative cover is fully restored or reestablished.

(11) **Time period.**

(A) Land application shall be completed within 90 days of the anticipated completion date shown on the approved application form; or

(B) Land application shall be completed within 90 days after drilling ceases. At the end of the 90-day period the permit shall expire by its own terms.

(12) **Post-application report.** A post-application report (Form 1014R) shall be submitted by the operator or the operator's agent to the Manager of the Pollution Abatement Department within 90 days of the completion of land application. One extension may be granted for a period of up to 90 days by the Manager of the Pollution Abatement Department. If approval is obtained to amend a permit to land apply water-based fluids so as to authorize land application of contaminated soils and petroleum hydrocarbon based cuttings, any extension of time for submission of the post-application report granted by the Manager of the Pollution Abatement Department shall begin on the date the amended permit is approved. The report shall give specific details of the land application, including volumes of materials applied and an aerial photograph (minimum scale 1:660) delineating the actual area where materials were applied. All applicable loading calculations from Appendix I of this Chapter shall be included in the Form 1014R. The report shall contain a statement certifying that the land application was done in accordance with the approved permit. Failure to timely submit a Form 1014R may result in the assessment of a fine of up to \$500.00.

(13) **Violations.** If the applicant violates the conditions of the permit or this Section, the land application shall be discontinued and the Pollution Abatement Department shall be contacted immediately. The Pollution Abatement Department may revoke the permit and/or require the operator to do remedial work. If the permit is not revoked, land application may resume with approval of the Pollution Abatement Department. If the permit is revoked, the operator may make application for a hearing to reinstate it.

(i) **Variiances.** A variance from the time provisions of (d)(1), (h)(1), or (h)(10) of this Section may be granted by the appropriate Conservation Division District Office for justifiable cause. A written request and supporting documentation shall be required. The appropriate Conservation Division District Office shall respond in writing within five business days after receipt, either approving or disapproving the request.

165:10-7-27. Application of waste oil, waste oil residue, or crude oil contaminated soil by oil and gas operators and pipeline companies

(a) **Scope.** This Section shall cover the application of waste oil, waste oil residue, or crude oil contaminated soil by oil and gas operators and pipeline companies to lease roads, pipeline service and tank farm roads, well locations, and production sites. Hazardous waste as defined at 40 CFR 261.3 is regulated by the Oklahoma Department of Environmental Quality.

(b) **Permit by appropriate Conservation Division District Office.** A District Manager for the Conservation Division may issue to an oil or gas operator or pipeline company within the District a permit for road application of waste oil, waste oil residue, or crude oil contaminated soil to lease roads, pipeline service and tank farm roads, well locations, and production sites within the District. This subsection prohibits any operator from applying waste oil, waste oil residue, or crude oil contaminated soil without a permit. Any operator or pipeline company violating this subsection may be fined up to \$2,000.00.

(c) **Permit requirements.**

(1) **Use of Form 1014X.** The application to apply waste oil, waste oil residue, or crude oil contaminated soil shall be made on Form 1014X, which shall be submitted by electronic mail to the Manager of the appropriate Conservation Division District Office.

(2) **Landowner permission.** Attached to the application shall be written permission by the surface owner to allow the operator or pipeline company to apply waste oil, waste oil residue, or crude oil contaminated soil as per this Section to a specific portion of real property as designated by legal description.

(3) **Telephone permits.** In case of an emergency, a District Manager may issue a permit by telephone. If an operator or pipeline company obtains a permit by telephone, the operator or pipeline company shall file Form 1014X and attachments within five business days after receipt of the permit by telephone.

(4) **Conditions for permits.**

(A) Waste oil, waste oil residue, and contaminated soils applied under this Section shall consist of crude oil and materials produced with crude oil only. Hazardous waste as defined at 40 CFR 261.3 is regulated by the Oklahoma Department of Environmental Quality.

(B) If required by the District Manager, a hydrocarbon analysis shall be submitted with Form 1014X. The analysis shall be performed by a laboratory that is operated by the State of Oklahoma or certified by the Oklahoma Department of Environmental Quality in accordance with OCC-approved methods.

(C) Waste oil, waste oil residue, and crude oil contaminated soil shall be applied in such a manner that pollution of surface or subsurface waters will not likely occur and public and private property adjoining the application area will be protected.

(D) During application, any necessary signs, lights and other safety and warning devices shall be used as traffic requires to alert users to conditions. A sign shall be posted with the contractor's or operator's name and phone number to contact in case of an emergency.

(E) No application shall be conducted:

(i) When the temperature is less than 45°F.

(ii) In any area where water collects and stands.

(iii) Where conditions such as grade, soil moisture content, soil type, tight soil conditions, or packed soil conditions

cause runoff or prevent rapid absorption of the oil.

(F) Following completion of the project, there shall be a uniform soil/oil base (all liquids worked in), with no visible free-standing oil.

(G) Proper care shall be taken to avoid runoff of oil into borrow ditches or adjacent areas.

(d) **Notice to Field Inspector.** The operator or pipeline company receiving the permit shall notify the appropriate Field Inspector at least two days prior to commencement of application.

(e) **Site inspection.** At his discretion, a District Manager may request a Field Inspector of the Conservation Division or an Enforcement Officer of the Transportation Division to inspect the site at any time during the application operation to ensure compliance with this Section.

(f) **Duration of permit.** The permit shall state the duration of the permit, not to exceed 60 days. If a complaint is received or the operator or pipeline company fails to comply with either the terms of the permit or this Section, the District Manager may direct the operator or pipeline company to cease application until the problem is resolved. If necessary, the District Manager may verbally revoke the permit and/or require the operator or pipeline company to perform remedial work. If a District Manager disapproves an application or cancels a permit, then the applicant may apply to the Commission for an order under 165:5-7-41.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 12 Ok Reg 2017, eff 7-1-95; Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 23 Ok Reg 2229, eff 7-1-06; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 35 Ok Reg 973, eff 9-14-18]

165:10-7-28. Application of freshwater drill cuttings by County Commissioners

(a) **Scope.** This Section shall cover the one-time application of freshwater drill cuttings by a Board of County Commissioners to a street or road.

(b) **Permits by District Office.** A District Manager for the Conservation Division may issue to any Board of County Commissioners within the District a permit for road application of freshwater drill cuttings to a street or road within the county. This Section prohibits any Board of County Commissioners from applying freshwater drill cuttings without a permit.

(c) **Site restrictions.** Application of freshwater drill cuttings shall only occur on sites having an:

- (1) Electrical Conductivity (EC) no greater than 6,000 micromhos/cm; and
- (2) Exchangeable Sodium Percentage (ESP) less than 15.0.

(d) **Sampling requirements.**

(1) The appropriate Field Inspector shall be contacted at least two business days prior to sampling to allow a Commission representative an opportunity to witness the sampling of the receiving soil and freshwater drill cuttings to be applied.

- (2) The receiving soil shall be sampled using the following procedure:
- (A) A minimum of five samples shall be taken for each one-half (1/2) mile section of road (or borrow ditch) and composited into one sample for analysis.
 - (B) Sampling shall be to a minimum depth of six inches.

(3) The freshwater cuttings shall be sampled by taking a minimum of one representative sample for every five cubic yards of freshwater cuttings to be applied and composited into one quart sample for analysis.

(e) **Analysis requirements.**

- (1) The composite samples of soil and drill cuttings shall be analyzed by a laboratory which tests soils.
- (2) The parameters for the receiving soil shall include ESP and either EC or Total Dissolved Solids (TDS) or Total Soluble Salts (TSS).
- (3) The parameters for the drill cuttings shall include TDS or Total Soluble Salts (TSS).

(f) **Maximum application rate.**

- (1) The maximum application rate shall be calculated by the Board of County Commissioners using the following formula:

_____ ppm TDS or TSS in receiving soil \times 2 = _____ lbs/as TDS or TSS in receiving soil.

10,000 lbs/ac TDS or TSS- _____ lbs/ac TDS or TSS in receiving soil = Maximum TDS or TSS(lbs/ac) to be applied _____.

Maximum TDS or TSS (lbs/ac) to be applied _____ \div (_____ ppm TDS or TSS in cuttings \times .000001) = Maximum lbs/ac of cuttings to be applied _____.

Actual weight of drill cuttings _____ lbs/cu ft \times 27 = _____ lbs/cu yd.

Maximum lbs/ac to be applied _____ \div _____ lbs/cu yd = _____ cu yds/ac to be applied.

Total volume _____ cu yds \div _____ cu yds/ac = Minimum acres required _____.

- (2) Calculations shall be submitted with the application.

(g) **Permit requirements.**

- (1) **Use of Form 1014W.** The application to apply freshwater drill cuttings shall be made on Form 1014W, which shall be submitted by electronic mail to the Manager of the appropriate Conservation Division District Office.
- (2) **Telephone permits.** In case of an emergency, a District Manager may issue a permit by telephone. If any Board of County Commissioners obtains a permit by telephone, the applicant shall file Form 1014W within five business days after receipt of the permit by telephone.
- (3) **Conditions for permits.**

- (A) The method to be used for application of freshwater drill cuttings shall not pollute surface or subsurface waters and shall protect public and private property adjoining the application area.
- (B) During application, any necessary signs, lights and other safety and warning devices shall be used to alert users to conditions. A sign shall be posted with the contractor's or authority's name to contact in case of an emergency.
- (C) All free liquids shall be removed before cuttings are applied.
- (D) Following completion of the project, there shall be a uniform soil/cuttings base.

(h) **Notice to Field Inspector.** The Board of County Commissioners receiving the permit shall notify the appropriate Field Inspector at least two days prior to commencement of the application.

(i) **Site inspection.** At his discretion, a District Manager may request a Field Inspector of the Conservation Division or an Enforcement Officer of the Transportation Division to inspect the site at any time during the application

operation to ensure compliance with this Section.

(j) **Duration of permit.** The permit shall state the duration of the permit, not to exceed 60 days. If a complaint is received or the Board of County Commissioners fails to comply with either the terms of the permit or this Section, the District Manager may direct the Board of County Commissioners to cease application until the problem is resolved. If necessary, the District Manager may verbally revoke the permit and/or require the Board of County Commissioners to perform remedial work. If a District Manager disapproves an application or cancels a permit, then the applicant may apply to the Commission for an order under 165:5-7-41.

[Source: Amended at 23 Ok Reg 2229, eff 7-1-06; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 35 Ok Reg 973, eff 9-14-18]

165:10-7-29. Application of freshwater drill cuttings by oil and gas operators

(a) **Scope.** This Section shall cover the one-time application of freshwater drill cuttings by oil and gas operators to private access areas, well locations, and production sites.

(b) **Permits by appropriate Conservation Division District Office.** A District Manager for the Conservation Division may issue to an operator within the District a permit for application of freshwater drill cuttings to private access areas, well locations, and production sites within the District. This Section prohibits any operator from applying freshwater drill cuttings without a permit. Any operator violating this subsection may be fined up to \$2,000.00.

(c) **Site restrictions.** Application of freshwater drill cuttings shall only occur on sites having an:

- (1) Electrical Conductivity (EC) no greater than 6,000 micromhos/cm; and
- (2) Exchangeable Sodium Percentage (ESP) less than 15.0.

(d) **Sampling requirements.**

- (1) The appropriate Field Inspector shall be contacted at least two business days prior to sampling to allow a Commission representative an opportunity to witness the sampling of the receiving soil and freshwater drill cuttings to be applied.
- (2) The receiving soil shall be sampled using the following procedure:
 - (A) A minimum of five samples shall be taken for each one-half (1/2) mile section of road (or borrow ditch), well location, or production facility and composited into one sample for analysis.
 - (B) Sampling shall be to a minimum depth of six inches.
- (3) The freshwater cuttings shall be sampled by taking a minimum of one representative sample for every five cubic yards of freshwater cuttings to be applied and composited into one quart sample for analysis.

(e) **Analysis requirements.**

- (1) The composite samples of soil and drill cuttings shall be analyzed by a laboratory which tests soils.
- (2) The parameters for the receiving soil shall include ESP and either EC or Total Dissolved Solids (TDS) or Total Soluble Salts (TSS).
- (3) The parameters for the drill cuttings shall include TDS or Total Soluble Salts (TSS).

(f) **Maximum application rate.**

- (1) The maximum application rate shall be calculated by the operator using the following formula:

$$\underline{\hspace{2cm}} \text{ ppm TDS or TSS in receiving soil} \times 2 = \underline{\hspace{2cm}} \text{ lbs/as TDS or TSS in}$$

receiving soil.

10,000 lbs/ac TDS or TSS - _____ lbs/ac TDS or TSS in receiving soil =
Maximum TDS or TSS (lbs/ac) to be applied _____.

Maximum TDS or TSS (lbs/ac) to be applied _____ ÷ (_____ ppm TDS or TSS in
cuttings x .000001) = Maximum lbs/ac of cuttings to be applied _____.

Actual weight of drill cuttings _____ lbs/cu ft × 27 = _____ lbs/cu yd.

Maximum lbs/ac to be applied _____ ÷ _____ lbs/cu yd = _____ cu yds/ac to be
applied.

Total volume _____ cu yds ÷ _____ cu yds/ac = Minimum acres required
_____.

(2) Calculations shall be submitted with the application.

(g) Permit requirements.

(1) **Use of Form 1014X.** The application to apply freshwater drill cuttings shall be made on Form 1014X, which shall be submitted by electronic mail to the Manager of the appropriate Conservation Division District Office.

(2) **Landowner permission.** Attached to the application shall be written permission by the surface owner to allow the operator to apply freshwater drill cuttings as per this Section to a specific portion of real property as designated by legal description.

(3) **Telephone permits.** In case of an emergency, a District Manager may issue a permit by telephone. If an operator obtains a permit by telephone, the applicant shall file Form 1014X within five business days after receipt of the permit by telephone.

(4) Conditions for permits.

(A) The method to be used for application of freshwater drill cuttings shall not pollute surface or subsurface waters and shall protect public and private property adjoining the application area.

(B) During application, any necessary signs, lights, and other safety and warning devices shall be used as traffic requires to alert users to conditions. A sign shall be posted with the contractor's or operator's name to contact in case of an emergency.

(C) All free liquids shall be removed before cuttings are applied.

(D) Following completion of the project, there shall be a uniform soil/cuttings base.

(h) Notice to Field Inspector. The operator receiving the permit shall notify the appropriate Field Inspector at least two days prior to commencement of the application.

(i) Site inspection. At his discretion, a District Manager may request a Field Inspector of the Conservation Division or an Enforcement Officer of the Transportation Division to inspect the site at any time during the application operation to ensure compliance with this Section.

(j) Duration of permit. The permit shall state the duration of the permit, not to exceed 60 days. If a complaint is received or the operator fails to comply with either the terms of the permit or this Section, the District Manager may direct the operator to cease application until the problem is resolved. If necessary, the District Manager may verbally revoke the permit and/or require the operator to perform remedial work. If a District Manager disapproves an application or cancels a permit, then the applicant may apply to the Commission for an order under 165:5-

7-41.

165:10-7-30. Enhanced recovery project surface facilities [REVOKED]

[Source: Added at 9 Ok Reg 2337, eff 6-25-95; Revoked at 16 Ok Reg 2190, eff 7-1-99]

165:10-7-31. Seismic and stratigraphic operations

(a) **Scope.** This Section shall cover the permitting, bonding, and plugging requirements for seismic exploration activities and stratigraphic test holes. Check-shots and vertical seismic profiles or other downhole wellbore seismic operations are excluded from this Section. Claims for damages sustained as a result of seismic operations, court proceeding costs and other matters concerning personal injury or property damage associated with seismic operations shall be brought in the district courts, pursuant to the Seismic Exploration Regulation Act (Okla. Stat. Tit. 52 §§ 318.21 through 318.23).

(b) **Definitions.** The following words and terms, when used in this Section, shall have the following meaning:

(1) **"Seismic exploration"** and **"seismic operation"** shall mean the drilling of seismic shot holes and use of surface energy sources such as weight drop equipment, thumpers, hydro pulses and vibrators and any of the activities associated therewith. This definition does not include surveying of the seismic area or the activity of conducting private negotiations between parties.

(2) **"Stratigraphic test holes"** shall mean holes drilled for the sole purpose of obtaining subsurface geological information through direct analysis of cores or cuttings or through the use of geophysical measurements that do not require the use of artificial sources of seismic energy.

(3) **"Operator"** or **"applicant"** shall mean the person or entity who is either the owner of the right to conduct seismic exploration or who acts on behalf of the owner.

(4) **"Surface estate"** shall mean the fee simple or absolute fee ownership of a tract of real property as defined by Okla. Stat. Tit. 60 §§5 and 23, less and excluding the mineral estate.

(5) **"Surface owner"** shall mean the owner or owners of record of the surface estate of the property upon which the seismic exploration is to occur, based upon the records of the county clerk of the county within which the surface estate is actually located.

(6) **"Technical information and data"** shall be defined as pre-plats as referenced in (c)(2)(B) and post-plats as referenced in subsection (c)(5).

(c) Seismic permitting.

(1) Before commencing any seismic operations in the State of Oklahoma, the applicant shall:

(A) Be duly registered with the Commission, including provision of a permanent address.

(B) Post a financial surety guarantee with the Commission.

(C) Provide to the Commission the name and business or field address of the contractor responsible for the operations being conducted.

(D) Obtain a permit from the Conservation Division for each seismic operation.

(E) Attempt to notify all owners of the surface estate where seismic operations will occur at least fifteen (15) days prior to commencement of operations on such surface estate. It shall be sufficient notice pursuant to this Section when notice is given to the current surface owner(s) at the last address shown of record for the surface owner in the records of the county clerk in the county where the surface estate is located, or an address that is known by applicant to be more accurate than the foregoing address of record. If the applicant has the right to conduct seismic operations and has attempted to give actual notice of intent to conduct seismic operations to the surface owner any time before fifteen (15) days prior to conducting seismic operations, such action shall be considered sufficient notification for the purposes of this Section. For the purposes of this Section, an attempt to notify shall be considered sufficient when the notification is sent by U.S. mail, the notice is postmarked at least fifteen (15) days prior to commencement of any seismic operations, and has been given at the last address shown of record for the surface owner in the records of the county clerk in the county where the surface estate is located, or an address which is known by applicant to be more accurate than the foregoing address of record.

(F) File an affidavit, within ninety (90) days of the last mailing of the notice, with the Commission and the county clerk in the county where the property is located, setting out that mailing of the notice has occurred in compliance with this Section and the Seismic Exploration Regulation Act (Okla. Stat. Tit. 52 §§ 318.21 through 318.23).

(G) The notice shall include a copy of the oil or gas lease or seismic permit or other legal instrument of similar nature authorizing the use of the surface for seismic operations and shall contain the information that is required for notices by Okla. Stat. Tit. 52 § 318.22.

(2) The applicant shall make application on the Commission's Form 1000S.

(A) The permit shall be valid for only one operation as approved on Form 1000S.

(B) A pre-plat of the operation area shall be attached to the application showing the location of the operation area delineated to the nearest section

(C) Post a performance bond in the amount of \$50,000, or other form of surety in an amount as approved by the Conservation Division. The performance bond may be filed for each operation, or may be filed on an annual basis to cover all operations that may be undertaken during the year. If the performance bond is filed for a single operation, the amount may be approved by the Conservation Division for less than \$50,000 or in another form of financial surety guarantee, depending on the nature of the seismic operation involved, the number of shot holes or surface energy source points, the cost of the operation and the size of the applicant's business. The form of surety shall not include letters of credit or financial statements. Such bond(s) or other surety may be released upon request made no sooner than thirty (30) days subsequent to the

completion of the applicant's operation(s), which have been permitted under such bond(s) or other surety, upon satisfactory inspection or review by Conservation Division personnel.

(D) The permit shall expire twelve (12) months from the issue date, unless operations are commenced.

(E) The Conservation Division shall approve or deny the application within thirty (30) days of receipt of the application. The Conservation Division may act upon an application or amended application on an expedited basis.

(F) During any activity subject to this subsection, the applicant shall maintain at the site a copy of the approved permit, Form 1000S, for inspection.

(G) All technical information, excluding the Form 1000S, but including any plats, relative to the permitted operation shall remain confidential or the Conservation Division shall destroy the records. The plats and any other technical data submitted, shall be filed in the Technical Services Department of the Conservation Division. Upon request of the Manager of Field Operations, the technical data may be reviewed by Field Operations to ensure compliance with Commission rules.

(3) The operator shall file with the Conservation Division a written notice of commencement of seismic operations within 14 days after commencement of such operations.

(4) No seismic shot hole blasting shall be conducted within 200 feet of any habitable dwelling, building, or water well without written permission from the owner of the property or within 500 feet of any superfund site or hazardous waste facility.

(5) **Plugging and post-plat.** Within 30 days after completing a seismic operation, the applicant receiving the permit shall submit a copy of: the approved Form 1000S certifying the plugging of all seismic shot holes in compliance with this Section; and a post-plat or acceptable form of survey showing the actual location of all seismic shot holes. Unless the applicant can demonstrate to the Conservation Division's District Office that another method will provide sufficient protection to groundwater supplies and long term land stability, the following guidelines shall be observed:

(A) Standard plugging method. All holes shall be filled to within four feet from the surface with bentonite, native cuttings, or an appropriate substitute. The remainder of the shot hole shall be filled and tamped with native cuttings or soil.

(B) Special methods. In areas where the standard plugging method has been shown to be inadequate for the prevention of groundwater contamination, the Conservation Division may designate the area as a special problem area. In such event, the Conservation Division will provide to the best of its ability, a clear geographical description of such area and the recommended, or required, hole plugging methods. Should the applicant encounter conditions such that the standard method appears inadequate for the prevention of groundwater contamination, the applicant shall inform the Conservation Division.

(i) Artesian flow. If the standard method is inadequate to stop artesian flow, alternate remedies must be employed to

do so.

(ii) Water well conversion. Applicants are prohibited from allowing the conversion of seismic shot holes to water wells.

(iii) Groundwater protection. Alternative plugging procedures and materials may be utilized when the applicant has demonstrated to the Conservation Division's satisfaction that the alternatives will protect usable quality water.

(iv) Timeliness. All seismic shot holes shall be plugged as soon as possible and shall not remain unplugged for a period of more than 30 days after the drilling of the hole.

(d) Stratigraphic test permitting.

(1) Before commencing any stratigraphic test hole operations, those companies hereinafter referred to as the applicant shall:

(A) Be duly registered with the Commission, including provision of a permanent address.

(B) Post a financial surety guarantee with the Commission in compliance with 165:10-1-10.

(C) Obtain a permit from the Conservation Division for each stratigraphic test operation.

(2) The applicant shall make application on the Commission's Form 1000.

(A) The permit shall be valid for only one operation as approved on Form 1000.

(B) The permit shall expire twelve (12) months from the issue date, unless operations are commenced.

(C) The Conservation Division shall approve or deny the application within 30 days of receipt of the application.

(D) Notice to surface owners shall be given according to OAC 165:10-3-1(g).

(E) During any activity subject to this subsection, the applicant shall maintain at the site a copy of the approved permit, Form 1000, for inspection.

(F) Any technical data submitted shall be filed in the Technical Services Department of the Conservation Division. Upon request of the Manager of Field Operations, the technical data may be reviewed by Field Operations to ensure compliance with Commission rules.

(G) The operator shall file with the Conservation Division a written notice of spudding of stratigraphic well within 14 days after spudding of the well.

(3) Unless the applicant can demonstrate to the Conservation Division's District Office that another method will provide sufficient protection to groundwater supplies and long term land stability, the following guidelines shall be observed:

(A) Surface casing requirements shall be met according to OAC 165:10-3-4.

(B) Storage and disposal of fluids associated with the drilling of stratigraphic test holes shall meet the requirements of OAC 165:10-7-16.

(C) Duty to plug and abandon shall be according to OAC 165:10-11-3.

(D) The Conservation Division shall be notified prior to commencement of plugging according to OAC 165:10-11-4.

(E) **Plugging.** Stratigraphic test holes shall be plugged according to OAC 165:10-11-6 and certification submitted on Form 1003 in compliance with OAC 165:10-11-7.

(e) Any person, firm, corporation or entity which conducts any seismic or stratigraphic test hole operations without a permit as provided in this Section, or in any other manner violates the rules of the Commission governing such operation shall be subject to a penalty up to One Thousand Dollars (\$1,000.00) per violation per day after completion of the informal complaints procedure provided in OAC 165:10-7-7 and notice and hearing pursuant to the Commission's contempt proceedings.

(f) **Complaints.** A complaint alleging violations of this Section may be filed with the Commission against any person, firm or corporation conducting seismic and stratigraphic operation(s). The Commission may determine if and when a complaint has been adequately resolved, pursuant to the informal complaints process of OAC 165:10-7-7, and, if an environmental complaint, pursuant to the citizen complaint procedure of OAC 165:5-1-25.

[Source: Added at 16 Ok Reg 842, eff 1-5-99 (emergency); Added at 16 Ok Reg 2190, eff 7-1-99; Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 30 Ok Reg 1041, eff 7-1-13; Amended at 35 Ok Reg 973, eff 9-14-18]

165:10-7-32. Application to reclaim and/or recycle produced water for surface activities related to drilling, completion, workover, and production operations from oil and gas wells

(a) **Authority to reclaim and/or recycle produced water.** No person shall use produced water for any other purpose except as provided by this section. Any operator failing to obtain a permit may be fined up to \$500.00.

(b) **Scope.** This Section shall cover the reclaiming and/or recycling of produced water from oil and gas wells for a single well location for the purpose of water supply for surface activities used for a specific permitted use. This does not include the use of produced water for down-hole operations referred to as weighted water under OAC 165:10-7-24(b)(2).

(c) **Quality of produced water.** For the purposes of this rule shall be limited to Total Dissolved Solids (TDS) or Total Soluble Salts (TSS) content not to exceed 5,000 mg/l and oil and grease content not to exceed 1,000 mg/l.

(d) **Storage of produced water.** If the produced water is stored in tanks, the tanks shall be legibly marked "recycle" water.

(e) **Log of load tickets.** The operator shall maintain copies of the load tickets from wells that the produced water was obtained. Such copies shall be made available to the OCC Inspector upon request.

(f) **Notification to OCC District Office.** The Operator shall orally notify the District Office when produced water is to be initially hauled to the permitted facility.

(g) **Application for permit.**

(1) The operator of the well must apply for the permit for the reclamation of produced water.

(2) Required Application. Each application for the reclaiming and/or recycling of produced water shall be submitted to the Field Operations District office on Form 1014D.

(3) A copy of written notice to the surface owner that the applicant intends to use produced water as per 165:10-7-32 to a specific portion of their real property as designated by legal description. For purposes of notice, a written waiver from the surface owner may also be submitted.

[Source: Added at 20 Ok Reg 1479, eff 4-24-03 (emergency); Added at 20 Ok Reg 1543, eff 7-1-03; Amended at 23 Ok Reg 2229, eff 7-1-06]

165:10-7-33. Use of truck wash pits

(a) **Scope.** This Section shall apply to truck wash pits. A truck wash pit is a pit used for the temporary storage of fluids generated from the washing or cleaning of a motor vehicle, trailer or container used to transport or store deleterious substances. Truck wash pit operators shall comply with all applicable Commission rules in OAC 165:30 Motor Carriers.

(b) **Permit required.** Any truck wash pit sought to be approved after the effective date of this Section will require a permit issued by the Conservation Division. For use of a truck wash pit without a permit, the operator may be fined up to \$2,000.00. The operator of the proposed pit shall submit Form 1014T to the Manager of the Pollution Abatement Department for the Conservation Division for review and approval. Documents required to be submitted with the Form 1014T include, but are not limited to, the following:

(1) A detailed drawing of the site, with complete construction plans drawn to scale for the proposed truck wash pit, any leachate collection system, and specific completion information for all monitor wells.

(2) A plat map with section, township, range and county showing the location of the proposed truck wash pit and the location of the monitor wells in relation to the pit they monitor.

(3) If the site on which the truck wash pit is to be located is not owned by the operator of the proposed pit, the operator must submit a copy of the written agreement between the operator and the surface owner authorizing use of the site for the pit. The agreement shall address the disposition of the pit (whether pit is to be buried on site, removed, etc.) at the termination or expiration of the agreement.

(c) **Surety requirements.**

(1) Any operator of a truck wash pit shall file with the Manager of the Pollution Abatement Department for the Conservation Division an agreement to properly close the pit upon termination of operations. The agreement shall be on forms available from the Conservation Division and shall be accompanied by surety. The agreement shall provide that if the Commission finds that the operator has failed or refused to comply with Commission rules or take remedial action as required by law and Commission rules, the surety shall pay to the Commission the full amount of the operator's obligation up to the limit of the surety.

(2) The Commission shall establish the amount of surety in the permit for the authority to operate a truck wash pit. The amount of surety shall be based on factors such as the dimensions of the pit, and costs of reclamation, monitoring, plugging of monitor wells, pit closure, trucking of any deleterious substances, remediation and earth work. The amount may be subject to change for good cause. The surety shall be maintained for as long as monitoring is required. The type of surety shall be a corporate surety bond, certificate of deposit, irrevocable commercial letter of credit, or other type of surety approved by the permit. Any type of surety that expires shall

be renewed prior to 30 days before the expiration date.

(d) **Site restriction.** No truck wash pit shall be constructed in any area that floods according to the Soil Conservation Service County Soil Survey (available for viewing at the Commission's Oklahoma City Office or appropriate Conservation Division District Offices).

(e) **Construction requirements.**

(1) **Splash pad/apron.** A splash pad/apron shall be constructed at the unloading area of any truck wash pit to the design and dimensions necessary to contain and direct all materials unloaded into the pit.

(2) **Pit specifications.** Any truck wash pit shall be constructed of concrete or steel or shall be lined with a geomembrane liner. The following specifications shall be met:

(A) Any concrete pit shall be steel-reinforced and have a minimum wall thickness of six inches.

(B) Any steel pit shall have a minimum wall thickness of three-sixteenths (3/16) inch. If a previously used steel pit is installed, it shall be free of corrosion or other damage.

(C) Any geomembrane liner shall meet these requirements:

(i) The geomembrane liner shall have a minimum thickness of 60-mils, shall be chemically compatible with the type of wastes to be contained, and shall have ultraviolet light protection.

(ii) The geomembrane liner shall be placed over a specially prepared, smooth, compacted surface void of sharp changes in elevation, rocks, clods, organic debris, or other objects.

(iii) The geomembrane liner shall be continuous (may include welded or extruded seams) and shall cover the bottom and interior sides of the pit entirely. Sewing of seams is prohibited. The edges shall be securely placed in a minimum twelve inch deep anchor trench around the perimeter of the pit.

(3) **Certification of liner.** The operator of any truck wash pit that is constructed with a geomembrane liner shall secure an affidavit signed by the installer, certifying that the liner meets minimum requirements and was installed in accordance with Commission rules. It shall be the operator's responsibility to maintain the affidavit and all supporting documentation pertaining to the liner, such as geomembrane liner specifications from the manufacturer, etc., and shall make them available to a representative of the Conservation Division upon request.

(4) **Monitor wells or leachate collection system.**

(A) Any truck wash pit shall be required to have a leachate collection system or a minimum of three monitor wells, one upgradient and two downgradient from the pit.

(B) No monitor well shall be installed more than 100 feet from a truck wash pit, nor shall any existing water well be used as a monitor well, unless written approval is given by the Manager of the Pollution Abatement Department.

(C) All new monitor wells shall be drilled to a depth of at least ten feet below the top of the first free water encountered and shall be drilled and completed by a licensed monitor well driller. If documentation is submitted prior to drilling the monitor well to

show that no free water will be encountered within a depth of 50 feet from the surface, the District Manager may require that monitor wells be drilled to a lesser depth.

(D) All new monitor wells shall meet the requirements as set out in rules established by the Oklahoma Water Resources Board, a removable and lockable cap shall be placed on top of the casing. The cap shall remain locked at all times, except when a well is being sampled. A key to each well shall be made available to the appropriate District Manager or Field Inspector upon request. Within 30 days of installation, specific completion information, a diagram of the locations and numerical labeling for all monitor wells shall be submitted to the appropriate District Manager.

(f) Operation and maintenance requirements.

(1) **Exclusion of runoff water.** No truck wash pit shall be allowed to receive runoff water.

(2) **Freeboard.** The fluid level in any concrete or steel truck wash pit shall be maintained at all times at least 6 inches below the top of the pit wall, unless otherwise specified on Form 1014T. Any geomembrane lined pit shall have a minimum of 24 inches freeboard at all times.

(3) **Sampling of monitor wells or leachate collection systems.**

(A) Sampling of monitor wells or leachate collection systems shall occur once every six months, during the months of January and July.

(B) The appropriate District Manager shall be notified at least 24 hours in advance of sampling to allow a Commission representative an opportunity to witness the sampling.

(C) Samples shall be collected, preserved, and handled by the operator according to EPA-approved standards (RCRA Groundwater Monitoring Technical Enforcement Guidance Document, EPA, OSWER-9950.1, September, 1986, pp. 99-107) and analyzed for pH, chlorides, Total Dissolved Solids (TDS) and Total Petroleum Hydrocarbons (TPH) by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma. Analysis of additional parameters may be required, as determined by the Manager of the Pollution Abatement Department.

(D) If requested by the District Manager, each sample shall be split and an adequate portion (approximately one pint) properly labeled and delivered upon request or otherwise provided to the appropriate Conservation Division District Office or Field Inspector. A copy of each analysis and a statement as to the depth to groundwater encountered in each well or leachate collection system, or a written statement that no water was encountered, shall be forwarded to the appropriate Conservation Division District Office within 30 days of sampling.

(E) All samples delivered to the laboratory shall be accompanied by a chain of custody form. The chain of custody form and sample analyses must be submitted to the Conservation Division.

(4) **Prevention of pollution.** All truck wash pits shall be constructed, used, operated, and maintained at all times so as to prevent pollution. In the event of a nonpermitted discharge from a truck wash pit, sufficient measures shall

be taken to stop or control the loss of materials and reporting procedures in 165:10-7-5(c) shall be followed. Any materials lost due to such discharge shall be cleaned up as directed by a representative of the Conservation Division.

(5) **Oil film.** The operator of a truck wash pit shall be responsible for the protection of migratory birds. Therefore, the Conservation Division recommends that to prevent the loss of birds due to oil films, all pits containing fluid be kept free of hydrocarbons, or be protected from access to birds. [See Advisory Notice in 165:10-7-3(c).]

(g) **Closure requirements.**

(1) **Time limit.** Within 90 days of the cessation of operation of any truck wash pit, such pit shall be emptied of all contents and filled with soil, except as otherwise provided in the written agreement between the operator and surface owner regarding the disposition of the pit at the termination or expiration of the agreement. All monitor wells shall be plugged with bentonite or cement, unless exempt in writing by the Manager of the Pollution Abatement Department. The site shall be revegetated within 180 days.

(2) **Burial.** If any concrete, steel, geomembrane, or other materials associated with a truck wash pit are to be left on-site, they shall be buried under a minimum soil cover of three feet, pursuant to 165:10-3-17.

(3) **Penalty for failure to meet closure requirements.** An operator who fails to meet the closure requirements set out in this subsection may be fined up to \$2,000.00.

(h) **Additional requirements.** The requirements set forth in this Section are minimum requirements. Additional requirements may be imposed if the site has certain limitations or other conditions of risk exist.

(i) **Application to existing truck wash pits.** Operators of truck wash pits permitted prior to the effective date of this Section must either comply with subsections and paragraphs (c), (e)(1), (e)(4), (f), (g) and (h) of this Section or close such pits within one (1) year of the effective date of this Section. All truck wash pits permitted, but yet to be constructed as of the effective date of this Section, shall also be subject to the construction requirements in paragraphs (e)(2) and (e)(3) of this Section.

(j) **Variiances.** A variance from the time requirements of paragraph (g)(1) of this Section may be granted by the Manager of the Pollution Abatement Department for justifiable cause. A written request and supporting documentation is required.

165:10-7-34. Use of reclaimed water in oil and gas operations

(a) **Scope.** This Section shall cover the permitting and use of reclaimed water from Department of Environmental Quality authorized facilities in oil and gas operations. Reclaimed water is wastewater from municipal wastewater treatment and/or public water supply treatment plants that has gone through various treatment processes to meet specific water quality criteria with the intent of being used in a beneficial manner.

(b) **Permit required.** No person shall use reclaimed water in oil and gas operations without applying for and obtaining a permit issued under this Section. An operator using reclaimed water without a permit may be fined up to \$2,000.00.

(c) **Who may apply.** Only operators authorized to operate wells pursuant to OAC 165:10-1-10 may apply for this permit.

(d) **Required form and attachments.** Each application to use reclaimed water in oil and gas operations shall be submitted to the Manager of Field Operations on Form 1014RW. The form shall be properly completed and signed. Attached to the form shall be the following:

(1) Analysis of reclaimed water proposed to be used in oil and gas operations. Samples of reclaimed water shall be analyzed by a laboratory operated by the State of Oklahoma or accredited by the Department of Environmental Quality or in the North American Proficiency Testing System. Parameters for analysis of the reclaimed water shall include, but not be limited to, Total Dissolved Solids or Total Soluble Salts.

(2) Copies of all chain of custody forms related to sampling.

(3) A topographic map and the most recent aerial photograph (minimum scale 1:660) of the site where the reclaimed water is proposed to be used.

(4) Other information as required by this Section or requested by the Manager of Field Operations.

(e) **Review period.** The Manager of Field Operations shall review the application, either approve or disapprove it, and return a copy of Form 1014RW within five business days of submission of all required or requested information. If approved, a permit number shall be assigned to the Form 1014RW; if disapproved, the reason(s) shall be given. The applicant can apply for a hearing if the permit is not approved.

(f) **Violations.** If the operator violates the conditions of the permit or this Section, the use of reclaimed water in oil and gas operations shall be discontinued and the Field Operations Department shall be contacted immediately. The Field Operations Department may revoke the permit and/or require the operator to do remedial work. If the permit is not revoked, use of reclaimed water in oil and gas operations may resume with the Field Operations Department's approval. If the permit is revoked, the operator may file an application for a hearing to reinstate the permit.

[Source: Added at 32 Ok Reg 768, eff 8-27-15]

SUBCHAPTER 8. COMMERCIAL RECYCLING

PART 1. HYDROCARBON RECYCLING/RECLAIMING FACILITIES

165:10-8-1. Scope

This Part shall cover the permitting, construction, operation, and closure requirements for any recycling/reclaiming facility.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94]

165:10-8-2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Hydrocarbon recycling/reclaiming facility at a saltwater disposal site" means a recycling/reclaiming operation at a Class II saltwater disposal site which is authorized by the Commission to recycle and/or reclaim marketable crude oil or condensate produced or used in the exploration or production of oil and gas. The facility shall comply with OAC 710:45-15-3.

"Tank bottom hydrocarbon recycling/reclaiming facility" means a recycling/reclaiming operation at a tank bottom reclaiming facility which is

authorized by the Commission to recycle and/or reclaim marketable crude oil or condensate produced or used in the exploration or production of oil and gas. The facility shall comply with OAC 710:45-15-3.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94; Amended at 17 Ok Reg 1860, eff 7-1-00]

165:10-8-3. Permit required

- (a) **Who may apply.** The applicant for a recycling/reclaiming facility shall be the owner and/or lease holder of the site.
- (b) **Compliance with Part.** Before issuance of a permit, the applicant shall comply with this Part and if pits are to be used for storage, the applicant shall comply with 165:10-9-1, except at Class II saltwater disposals.
- (c) **OCC Form 1020A.** Application shall be filed on OCC Form 1020A.
- (d) **An Oklahoma Tax Commission Reclaimer License.** The applicant shall have obtained a reclaimer license number under OAC 710:45-15-2. This number will be used by the Corporation Commission for its permit number.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94; Amended at 17 Ok Reg 1860, eff 7-1-00]

165:10-8-4. Application requirements

- (a) **Permit required.** No recycling/reclaiming facility shall be constructed, enlarged, or used without approval on Form 1020A.
- (b) **Site limitations.** Recycling/reclaiming facilities shall not be restricted by site limitations unless pits are to be used.
 - (1) Tank bottom hydrocarbon recycling/reclaiming facilities with pits that are to be used for storage in the operation shall comply with OAC 165:10-9-1.
 - (2) Hydrocarbon recycling/reclaiming facilities at a saltwater disposal site with pits that are used for unloading saltwater shall comply with OAC 165:10-9-3.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94; Amended at 17 Ok Reg 1860, eff 7-1-00]

165:10-8-5. Surety requirements for reclaimers

- (a) **Agreement to close.** Any operator of a recycling/reclaiming facility shall file with the Surety Department for the Oil and Gas Conservation Division an agreement to properly close and reclaim the site in accordance with approved closure and reclamation procedures upon termination of recycling/reclaiming operations. The agreement shall be on forms available from the Conservation Division and shall be accompanied by surety. The agreement shall provide that if the Commission finds that the operator has failed or refused to close the facility or take remedial action as required by law and the rules of the Commission, the surety shall pay to the Commission the full amount of the operator's obligation up to the limit of the surety.
- (b) **New facilities.** Category A (165:10-1-11) or Category B (165:10-1-13) surety shall be required for coverage of the closure costs, including well pluggings and general site restoration. These costs shall be calculated upon the projected costs of closure for the facility, based on estimated costs of earth work, remediation, revegetation, plugging, etc. Such information shall be provided by the applicant and reviewed, adjusted and ordered by the Commission.
- (c) **Existing facilities.** For facilities in operation prior to the effective date of this Part, the Commission can require, by order, the establishment of an escrow account to cover the costs of closure, by using a per barrel fee to be deposited into the

account. Any interest the account earns until the total amount is collected shall be reinvested in the account. Any interest accrued after the account balance is full shall be returned to the operator.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 37 Ok Reg 1121, eff 1-1-20]

165:10-8-6. Design and construction requirements

(a) **Spill prevention.** Each facility shall be designed and constructed utilizing good engineering practices. Design and construction standards shall be determined on a case-by-case basis by the Commission. Each such facility shall be designed and constructed to prevent escape of deleterious substances.

(b) **Unloading pits or sumps.** All unloading areas at tank bottom hydrocarbon recycling/reclaiming facilities that use a pit to receive fluids and skimming pits shall be approved on OCC Form 1014.

(c) **Required exhibits.** Complete construction plans, drawings, and written specifications for the proposed facility shall be submitted to the Manager of Pollution Abatement for review and approval. Design and construction standards shall be determined on a case-by-case basis by the Commission. Applicants shall consult with the Commission prior to the construction of the proposed facility. The Commission may apply existing technological standards and/or establish new standards, as it deems appropriate to the proposed site and activities. All plans, drawings, and specifications shall be prepared by or under the supervision of a qualified expert.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94; Amended at 17 Ok Reg 1860, eff 7-1-00]

165:10-8-7. Operation and maintenance requirements

(a) **Fencing.** All recycling/reclaiming facilities shall be completely enclosed by a fence at least four feet in height. No livestock shall be allowed inside the fence. Final construction is subject to approval by the Manager of Pollution Abatement.

(b) **Sign.** A waterproof sign bearing the name of the operator, legal description, permit number, and emergency phone number shall be posted within 25 feet of the entrance gate to the facility and shall be readily visible.

(c) **Site security.** Receiving of any recycling/reclaiming material shall occur only when there is an attendant on duty. All sites shall be secured by a locked gate when an attendant is not on duty. A key or combination to the lock shall be provided to the appropriate Field Inspector for the purpose of carrying out inspections.

(d) **Acceptable materials.** Operators of a recycling/reclaiming facility shall only receive substances as defined in 165:10-1-2 "Deleterious substances."

(e) **Oil film.** OPERATORS TAKE NOTE: Federal statutes, such as the Bald Eagle Protection Act (16 U.S.C. Sections 668-668d), the Migratory Bird Treaty Act (16 U.S.C. Sections 703-711), the Endangered Species Act (16 U.S.C. Sections 1531-1542), and the Lacey Act Amendments of 1981 (16 U.S.C. Sections 3371-3378), dictate substantial fines and penalties for persons who allow birds of certain species to become fatally injured due to incidental contact with oil or oil by-products. These fines may be levied upon persons allowing such fatalities to occur, whether accidental or not. Misdemeanor and felony convictions may include imprisonment. Information on affected bird species, regulations under these Acts, and measures which can be taken to prevent such occurrences, such as the netting or covering of open-topped tanks and pits which contain oil or oil by-products, can be obtained from the U.S. Fish and Wildlife Service Office in Oklahoma City or the nearest Oklahoma Department of Wildlife Office.

(f) Aesthetics.

(1) All surface trash, debris, junk and scrap or discarded material connected with the operations of the facility shall be removed from the premises. With written permission from the surface owner, the operator may, without applying for an exception to 165:10-3-17(b), bury all nonhazardous material at a minimum depth of three feet; cement bases are included.

(2) The appropriate Conservation Division District Office or field inspector may issue a Form 1085 for any alleged violation of this subsection. If the operator fails to conduct cleanup as directed, the Commission may fine the operator \$500.00 for a first offense. For a subsequent offense, the fine may be up to \$1,000.00, and the facility shall be shut down until completion for cleanup operations.

(g) Structural integrity. All recycling/reclaiming facilities shall be used, operated, and maintained at all times so as to prevent the escape of their contents. Any condition that threatens the structural stability of any diked portion or the storage facility shall be repaired in a timely manner.

(h) Prevention of pollution. All recycling/reclaiming facilities shall be used, operated, and maintained at all times so as to prevent pollution. In the event any non permitted discharge occurs, sufficient measures shall be taken to stop or control the loss of materials, and reporting procedures in accordance with 165:10-7-5(c) shall be followed. Any materials lost due to such discharge shall be cleaned up as directed by a representative of the Conservation Division.

(i) Fines. For a willful non-permitted discharge from the facility, the operator may be fined up to \$5,000.00.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94; Amended at 17 Ok Reg 1860, eff 7-1-00; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 28 Ok Reg 1949, eff 7-11-11]

165:10-8-8. Reporting

(a) Annual report on Form 1014A. The operator of any recycling/reclaiming facility shall submit an annual report on Form 1014A to the Manager of Pollution Abatement, by February 1 of each year. In lieu of Commission Form 1014A, operators may submit Oklahoma Tax Commission Form 323A for the twelve calendar months of the previous year by February 1st.

(b) Daily log for tank bottom at a hydrocarbon recycling/reclaiming facility. The operator shall maintain a daily log and at a minimum shall include the date, volume, source (generator) and type of material. In addition, copies of any chemical analysis of materials or material safety data sheets shall be maintained.

(c) Daily load tickets for hydrocarbon recycling/reclaiming facilities at salt water disposal facilities. The operator shall keep the load tickets for saltwater and other deleterious substances received at the saltwater disposal facilities for a minimum of three years at the operator's office.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94; Amended at 17 Ok Reg 1860, eff 7-1-00]

165:10-8-9. Closure requirements

(a) Notification. The Manager of Pollution Abatement Department shall be notified in writing whenever a recycling/reclaiming facility shall be closed, or portions thereof, or becomes inactive unless it is shut down by the Commission.

(b) Closed facility. A recycling/reclaiming facility may be considered closed or inactive if the operator closes the facility, the operator is unable to furnish documentation to show that there has been receipt of deleterious substances during the last twelve months, the facility has been shut down by the Commission, or

authority to operate has lapsed or is vacated by Commission order.

(c) **Closure plan.** An approved closure plan shall be submitted to the Pollution Abatement Department. Estimate of cost of closure shall be made part of the plan.

(d) **Monitor wells.** Monitor wells, if required, shall be plugged with bentonite or cement, upon approval in writing by the Manager of Pollution Abatement.

(e) **Pits.** When closing any pit with a geomembrane liner, extreme care shall be taken to preserve the integrity of the liner. All free liquids and sediments shall be removed.

(f) **Burial.** If any concrete, steel, geomembrane, or other materials associated with the site are to be left on-site, they shall be buried under a minimum soil cover of three (3) feet, pursuant to 165:10-3-7.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94]

165:10-8-10. Additional requirements

The requirements set forth in this Part are minimum requirements. Additional requirements may be made upon a showing of good cause.

[Source: Added at 11 Ok Reg 3691, eff 7-11-94]

165:10-8-11. Variances

Except as otherwise provided in this Subchapter, variances from provisions of this Part may be granted by the Manager of Pollution Abatement or by order after application, notice, and hearing.

SUBCHAPTER 9. COMMERCIAL DISPOSAL FACILITIES

165:10-9-1. Use of commercial pits

(a) **Scope.** This Section shall cover the permitting, construction, operation, and closure requirements for any commercial pit. A commercial pit is a disposal facility which is authorized by Commission order and used for the disposal, storage, and handling of deleterious substances or soils contaminated by deleterious substances produced, obtained, or used in connection with drilling, production and/or pipeline construction operations. This does not cover disposal well pits. (See 165:10-9-3 and 165:10-7-20.)

(b) Application requirements.

(1) **Who may apply.** The applicant for a commercial pit shall be the owner of the land (or person having a written firm option to purchase the land at the time the application is filed) on which the proposed pit is to be located: if leased, both the owner and lessee shall be joint applicants.

(2) **Compliance with rules.** Before issuance of an order, the applicant shall comply with Commission Rules of Practice 165:5-7-1, 165:5-7-35, 165:5-3-1, and this Section. Subsequent to issuance of an order authorizing commercial pit(s) and prior to commencing construction of such pit(s), the applicant is required to submit a recorded copy of a deed to the Conservation Division reflecting that the applicant owns the land which is to be used for the commercial pit facility.

(3) **Exhibits.** Two complete sets of all exhibits which shall be relied upon by the applicant shall be submitted to the Pollution Abatement Department of the Commission, pursuant to 165:5-7-35. Those exhibits shall include, but are not limited, to the following:

(A) A lithologic log of test borings, identifying the subsurface materials encountered and the depth at which groundwater was encountered pursuant to (c)(2)(D) of this Section.

(B) Results of permeability tests of the proposed liner materials, pursuant to (e)(7) of this Section.

(C) A topographic map of the commercial pit site.

(D) The appropriate Soil Conservation Service (SCS) soil survey aerial photo and legend.

(E) A detailed drawing of the site, with complete construction plans drawn to scale by or under the supervision of a registered professional engineer.

(F) A plan for closure of the pit(s) which shall provide for a minimum three feet of soil cover and shall specifically state how all aspects of closure shall be accomplished, including volume and fate of liquids and solids, earthwork to close the pit(s) (including placement of stockpiled topsoil), and revegetation of the site.

(G) An itemization of projected hauling, closure, reclamation, maintenance, and monitoring costs.

(H) A plan for post-closure maintenance and monitoring which shall address maintenance of the site as well as monitoring and plugging of wells. Exemption from the plugging of monitor wells may be obtained upon written request and approval of the Manager of Pollution Abatement.

(I) A plan for operation which shall address the method(s) by which excess water will be disposed.

(c)

(1) **Order required.** No commercial earthen pit shall be constructed, enlarged, reconstructed, or used without a Commission order.

(2) **Site limitations.**

(A) No commercial earthen pit shall be constructed or used unless an investigation of the soils, topography, geology, and hydrology conclusively shows that storage of water-based drilling fluids and/or cuttings at the site will not be harmful to groundwater, surface water, soils, plants, or animals in the surrounding area. No abandoned mine, strip pit, quarry, canyon, or streambed shall be used for disposal of oilfield wastes, nor shall a pit be constructed or used in such a setting.

(B) No commercial pit shall be constructed or used on any site that is located within a 100-year flood plain.

(C) No commercial pit shall be constructed or used within a wellhead protection area (WPA) as identified by the Wellhead Protection Program (42 USC Section 300h-7, Safe Drinking Water Act), or within one mile of a public water well for which the WPA has not been delineated.

(D) No commercial pit shall be constructed unless it can be shown that there will be a minimum of 25 feet between the bottom of the pit and the groundwater level. To ascertain this and to demonstrate the subsurface profile of the site, a minimum of three test borings (the exact number of locations to be determined by the Pollution Abatement Department) shall be drilled to a minimum depth of 25 feet below the proposed bottom of the pit and into the first free water encountered. Perched water tables are not considered for the purposes of this subparagraph. Test borings need not extend deeper than 50 feet below the bottom of the pit if free water has not been encountered before that depth. All boreholes converted to monitor wells shall conform to (e)(15) of this Section. All boreholes not converted to monitor wells shall be plugged from top to bottom with bentonite, cement, and/or other method approved by the Pollution Abatement Department within 30 days of drilling completion.

(E) No commercial pit shall be constructed or used within the following distances from the city limits of an incorporated

municipality unless previously authorized by Commission order:

(i) Three miles if population is 20,000 or less.

(ii) Five miles if population is greater than 20,000.

(F) The construction, enlargement, reconstruction or operation of any commercial pit in any area listed in OAC 165:10-29-3 is prohibited.

(3) **Means of water disposal.** No commercial pit shall be constructed or used unless the operator can show that there will be an ongoing means of disposal of excess water pursuant to (b)(3)(I) of this Section.

(d) **Surety requirements.**

(1) **Agreement with Commission.** Any operator of a commercial pit shall file with the Surety Department for the Conservation Division an agreement to properly close and reclaim the site in accordance with approved closure and reclamation procedures upon termination of disposal operations due to abandonment, shutdown, full pits, or other reason. The agreement shall be on forms available from the Conservation Division and shall be accompanied by surety. The agreement shall provide that if the Commission finds that the operator has failed or refused to close the pits or take remedial action as required by law and the rules of the Commission, the surety shall pay to the Commission the full amount of the operator's obligation up to the limit of the surety.

(2) **Surety amount and type.** The Commission shall establish the amount of surety in the order for the authority to construct, enlarge, or operate a commercial pit. The amount of surety shall be based on factors such as dimensions of the pit and costs of hauling, closure, reclamation, and monitoring. The amount may be subject to change for good cause. Upon approved closure of a pit, the Manager of Pollution Abatement may administratively reduce the surety requirement to an amount which would cover the cost of monitoring the site and plugging the monitor wells. Surety shall be maintained for as long as monitoring is required. The type of surety shall be a corporate surety bond, certificate of deposit, irrevocable letter of credit, or other type of surety approved for the pit by order of the Commission. Any type of surety that expires shall be renewed prior to 30 days before the expiration date.

(3) **Posting surety before permit is issued.** An operator shall post surety with the Commission before a construction permit is issued, pursuant to (e)(1) of this Section.

(e) **Construction requirements.**

(1) **Permit required.** Prior to constructing any pit, a commercial pit operator shall obtain a permit from the Manager of Pollution Abatement. Application shall be made on Form 1014N. For use of a commercial pit without a permit, the pit operator may be fined up to \$5,000.00.

(2) **Runoff water prohibited.** No runoff water from surrounding land surfaces shall be allowed to enter a pit.

(3) **Stockpiling of topsoil.** Prior to constructing a pit, all topsoil within the top twelve inches of soil on the site shall be stockpiled for use as the final cover at the time of closure. The topsoil may be stockpiled in the outside slopes of the berms, provided it is not used for structural purposes and can be readily distinguishable from other soil materials at the time of closure. In cases where topsoil is stockpiled in the berms, it shall be shown in the as-built drawings pursuant to (e)(16) of this Section.

(4) **Monitoring by engineer.** A registered professional engineer or an engineer-in-training working under the supervision of a registered professional engineer (RPE) shall monitor the construction of any commercial pit to assure that approved design specifications and Commission rules are adhered to. A minimum of six on-site visits to the site shall be made; two pre-construction, two during construction, and two post-construction. At least the post-construction on-site visit shall be made by the RPE.

(5) **Maximum fluid depth.** Any pit shall be constructed to contain a maximum fluid or sediment depth of seven feet, with a minimum freeboard of three feet.

(6) **Maximum dimensions.** Any pit shall not be constructed to dimensions greater than that approved in the order. Furthermore, the maximum width of a pit or pit cell shall not exceed 175 feet if closure must be accomplished from one side or two adjacent sides; 350 feet if closure can be accomplished from at least two opposite sides or three adjacent sides. Pit dimensions shall be measured at the maximum allowable fluid level.

(7) **Soil liners.**

(A) Soil materials to be used in a soil liner shall undergo permeability testing before construction. Pre-construction permeability testing shall consist of laboratory permeability tests on at least two specimens of representative soil liner materials compacted in the laboratory to approximately 95 percent of the material's Standard Proctor Density (ASTM D-698).

(B) Laboratory permeability test procedures must conform to one of the methods described for fine-grained soils in the Corps of Engineers Manual EM-1110-2-1906 Appendix VII. In no case shall the pressure differential across the specimen exceed five feet of water per inch of specimen length.

(C) If permeability testing shows that addition of bentonite or other approved material is needed to assist the native soils in meeting the permeability standard, it shall be applied at a minimum rate specified by the testing or engineering firm. Any bentonite used for liner material shall not have been previously used in drilling muds.

(D) Any soil liner shall be constructed by disturbing the soil to the depth of the bottom of the liner, applying fresh water as necessary to the soil materials to achieve a moisture content wet of optimum, then recompacting it with heavy construction equipment, such as a footed roller, until the required density is achieved, pursuant to (H) of this paragraph. The liner shall be constructed in maximum six inch lifts (after compaction), with each lift being scarified before placement of the next lift.

(E) Any soil liner shall cover the bottom and interior sides of the pit entirely.

(F) Any soil liner shall be installed on a slope no steeper than 3:1 (horizontal to vertical).

(G) Any soil liner shall have a minimum thickness of 18 inches (after compaction) and shall have a maximum coefficient of permeability of 1.0×10^{-7} cm/sec.

(H) Any soil liner shall be field tested for compaction, unless a post-construction permeability test is performed pursuant to (I) of

this paragraph.

(i) A minimum of six compaction tests shall be performed on any soil liner; a minimum of four widely spaced tests in the bottom of the pit and two tests on different slopes of the pit are required, unless otherwise directed by a Conservation Division representative. Particular emphasis shall be placed on selecting locations for compaction tests where nonuniformity in soil texture or color can be observed.

(ii) Compaction tests shall be conducted in accordance with ASTM methods D-2922 or D-1556.

(iii) The soil materials of any liner shall be compacted to at least 95 percent of the Standard Proctor Density.

(I) Post-construction permeability testing shall consist of at least two laboratory permeability tests on undisturbed samples of the completed soil liner.

(i) Particular emphasis shall be placed on selecting the location(s) for permeability tests or test samples where nonuniformity in soil texture or color can be observed.

(ii) Field permeability tests shall be conducted only by the double ring infiltrometer method as described in ASTM D-3385. Permeability tests may be discontinued prior to flow stabilization upon satisfactory evidence that the permeability rate is less than 1.0×10^{-7} cm/sec.

(8) Geomembrane liners.

(A) Any geomembrane liner that is installed in a commercial pit shall have a minimum thickness of 40 mil.

(B) Any geomembrane liner used in a commercial pit shall be chemically compatible with the type of substances to be contained and shall have ultraviolet light protection.

(C) Any geomembrane liner shall be placed over a specially prepared, smooth, compacted surface void of sharp changes in elevation, rocks, clods, organic debris, or other objects.

(D) Any geomembrane liner shall be continuous, although it may include welded or extruded seams, and shall cover the bottom and interior sides of the pit entirely. Sewing of seams is prohibited. The edges shall be securely placed in a minimum twelve inch deep anchor trench around the perimeter of the pit.

(9) Width of the crown. The crown (top) of any berm shall be a minimum of eight feet in width.

(10) Slopes. The inside slope of any exterior berm (having fluid on one side) shall not be steeper than 3:1 (horizontal to vertical) and the outside slope 2.5:1. The slopes of any interior berm (having fluid on both sides) shall not be steeper than 3:1.

(11) Earthwork compaction. All earthwork, except as noted in (7)(H)(iii) of this subsection, shall be compacted to achieve a minimum 90% Standard Proctor Density and shall be applied in lifts where some method of bonding is achieved between lifts, with each lift not to exceed eight inches prior to compaction.

(12) Pipe installation. Any pipe, tinhorn, culvert, or conduit in the berm between two adjoining pits shall be placed so that there is a minimum of 36

inches between the top of the pipe, tinfoil, culvert, or conduit and the lowest point in the top of the berm separating the pits.

(13) **Splash pad.** All pits which receive fluids directly from a vacuum truck shall have a splash pad at the point where fluids are received unless a waiver is obtained from the Manager of Pollution Abatement by showing that erosion of the liner will not occur. The pad must be constructed of materials and to the dimensions necessary to effectively prevent the liner from eroding.

(14) **Fluid level marker.** A minimum of one stationary fluid level marker shall be erected in each pit or cell. The marker shall be erected in a location within the pit or cell where it can be easily observed. The marker shall be of such design that the maximum fluid level at any time may be clearly identified. Details of the proposed marker installation shall be approved by the Manager of Pollution Abatement prior to installation. Markers shall be installed under the supervision of a registered professional engineer, licensed land surveyor, or other person approved by the Manager of Pollution Abatement prior to installation.

(15) **Monitor wells.** All commercial pits shall have a minimum of three monitor wells installed- one upgradient and two downgradient from the pit. The exact number and location of wells shall be approved by the Pollution Abatement Department prior to installation. No monitor well shall be installed more than 250 feet from the toe of the outside berm of a commercial pit, nor shall any existing water well be used as a monitor well unless approved by the Manager of Pollution Abatement. Monitor wells installed prior to the effective date of this Section may be accepted by the Manager of Pollution Abatement if it can be shown that they adequately monitor a site. All new monitor wells shall be drilled to a depth of at least ten feet below the top of the first free water encountered, and all monitor wells shall be drilled to a depth of at least ten feet below the base of the pit. All new monitor wells shall be drilled and completed by a licensed monitor well driller. If documentation is submitted to the Manager of Pollution Abatement prior to drilling the monitor wells to show that no free water will be encountered within 50 feet below the bottom of the pit, the Manager of Pollution Abatement may require that monitor wells be drilled to a lesser depth. All new monitor wells shall meet the requirements as set out in rules established by the Oklahoma Water Resources Board, in addition to the following requirements:

(A) A removable and lockable cap shall be placed on top of the casing. The cap shall remain locked at all times, except when the well is being sampled.

(B) Within 30 days of installation, specific completion information, a diagram of the locations and numerical labeling for all monitor wells shall be submitted to the Manager of Pollution Abatement.

(16) **As-built drawing.** A detailed, as-built drawing of the pit(s) and monitor wells by or under the supervision of a registered professional engineer shall be submitted to the Manager of Pollution Abatement before operation of the pit(s) commences.

(17) **Liner certification.** An affidavit signed by the person who was responsible for installing the pit liner, certifying that the liner meets minimum requirements and was installed in accordance with Commission rules, shall be submitted to the Manager of Pollution Abatement before

operation of the pit commences. Supporting documentation shall also be submitted, such as post-construction permeability or compaction test results, bentonite receipts, and geomembrane liner specifications from the manufacturer.

(18) **Pit approval.** Acceptance of fluids into a pit shall not commence until a representative of the Conservation Division has inspected and approved the pit.

(19) **Hydrologically sensitive areas.** If the proposed site is known to be located over a hydrologically sensitive area, in addition to the foregoing construction requirements, the additional requirements shall apply:

(A) The total depth of a pit shall not exceed eight feet, and the total designed fluid or sediment depth shall not exceed five feet.

(B) A soil liner having a minimum thickness of three feet and a coefficient of permeability no greater than 1.0×10^{-8} cm/sec or a minimum 60-mil geomembrane liner shall be required.

(C) The Manager of Pollution Abatement shall determine the minimum depth of all monitor wells.

(f) Operation and maintenance requirements.

(1) **Vegetative cover.** Vegetative cover shall be established on all areas of earthfill immediately after pit construction or during the first planting season if pit construction is completed out of season. The cover shall be sufficient to protect those areas from soil erosion and shall be maintained.

(2) **Fencing.** All commercial facilities shall be completely enclosed by a fence at least four feet in height. No livestock shall be allowed inside the fence.

(3) **Sign.** A waterproof sign bearing the name of the operator, legal description, most current order number, and emergency phone number shall be posted within 25 feet of the entrance gate to any commercial pit and shall be readily visible.

(4) **Site security.** Dumping into a commercial pit shall occur only when there is an attendant on duty. All sites shall be secured by a locked gate when an attendant is not on duty. A key or combination to the lock shall be provided to the appropriate Field Inspector for the purpose of carrying out inspections.

(5) **Fluid level.** Drilling fluids and/or cuttings shall not be accepted into a commercial pit unless the fluid level can be maintained at an elevation no higher than the maximum level of the fluid level marker.

(6) Acceptable materials.

(A) No operator of a commercial pit shall receive any substances other than water-based drilling fluids and/or cuttings or salt contaminated soils.

(B) No operator of a pit permitted prior to July 9, 1987, shall receive fluids and/or cuttings with a chloride content greater than 3500 mg/l. No operator of a pit permitted after July 9, 1987, shall receive fluids and/or cuttings with a chloride content greater than 5000 mg/l.

(C) A sample from each incoming load shall be collected, filtered using a standard API filter press, and tested for chlorides.

(D) The date, volume, source, and chloride level of each load received shall be entered into a log book. The log book shall be available for inspection by a representative of the Conservation

Division of the Commission at all times. Log books shall be kept for a minimum of five years after closure is completed.

(7) **Pit contents.** No pit permitted prior to July 9, 1987, shall contain fluids and/or cuttings with a chloride content greater than 5,000 mg/l. No pit permitted after July 9, 1987, shall contain fluids and/or cuttings with a chloride content greater than 10,000 mg/l. The contents of each pit or pit cell shall be sampled and analyzed by the operator at least once every six months (during January and July) after operations commence. More frequent sampling may be required by the Manager of Pollution Abatement. The following procedures shall be used:

(A) The appropriate Field Inspector shall be notified at least 24 hours in advance of sampling to allow a Commission representative an opportunity to witness the sampling.

(B) Samples shall be collected and handled by the operator according to EPA-approved standards. (RCRA Groundwater Monitoring Technical Enforcement Guidance Document, EPA, OSWER-9950.1, September 1986, pp. 99-107.)

(C) A minimum of five samples per 50,000 bbls., or part thereof, is required for each pit or pit cell. Samples must be taken from different horizontally and vertically distributed locations in each pit or pit cell.

(D) The samples shall be combined and thoroughly mixed, then a minimum two pint composite sample taken for analysis.

(E) If requested by a representative of the Conservation Division, each composite sample shall be split and an adequate portion (approximately one pint) shall be properly labeled and delivered or otherwise provided to the appropriate Conservation Division District Office or Field Inspector.

(F) All samples delivered to the laboratory shall be accompanied by a chain of custody form. The chain of custody form and sample analyses must be submitted to the Conservation Division.

(G) All composite samples must be analyzed for chlorides, pH and TDS by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma. Analysis of additional parameters may be required, as determined by the Manager of Pollution Abatement.

(H) A copy of each analysis shall be forwarded to the Pollution Abatement Department within 30 days of sampling.

(8) **Oil film.**

(A) No commercial pit shall contain an oil film covering more than one percent of the surface area of the pit.

(B) The protection of migratory birds shall be the responsibility of the operator. Therefore, the Conservation Division recommends that to prevent the loss of birds, oil films be removed, or the surface area covered by the film be protected from access to birds. (See Advisory Notice in 165:10-7-3(c).)

(9) **Aesthetics.** All commercial pit sites shall be maintained so that there is no junk iron or cable, oil or chemical drums, paint cans, domestic trash, or debris on the premises.

(10) **Structural integrity.** All commercial pits shall be used, operated, and maintained at all times so as to prevent the escape of their contents. All

erosion, cracking, sloughing, settling, animal burrows, or other condition that threatens the structural stability of any earthfill shall be repaired immediately upon discovery.

(11) **Monitor wells.** Sampling of monitor wells shall begin prior to accepting any drilling fluids and/or cuttings into a new facility and within 30 days of drilling completion on existing facilities, and shall be done at least once every six months (during January and July) after operations commence until three years after closure is completed. Sampling of greater frequency of duration may be required by the Manager of Pollution Abatement. The following procedures shall be used:

(A) The appropriate Field Inspector shall be notified at least 24 hours in advance of sampling to allow a Commission representative an opportunity to witness the sampling.

(B) Samples shall be collected and handled by the operator according to EPA-approved standards. (RCRA Groundwater Monitoring Technical Enforcement Guidance Document, EPA, OSWER-9950.1, September 1986, pp. 99-107.)

(C) If requested by a representative of the Conservation Division, an adequate portion of each sample (approximately one pint) shall be properly labeled and delivered or otherwise provided to the appropriate Conservation Division District Office or Field Inspector.

(D) All samples delivered to the laboratory shall be accompanied by a chain of custody form. The chain of custody form and sample analyses must be submitted to the Conservation Division.

(E) All samples must be analyzed for pH, chlorides and TDS by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma. Analysis of additional parameters may be required based on the operation of the facility as determined by the Manager of Pollution Abatement.

(F) A copy of each analysis and a statement as to the depth to groundwater encountered in each well, or a written statement that no water was encountered, shall be forwarded to the Pollution Abatement Department within 30 days of sampling.

(12) **Prevention of pollution.** All commercial pits shall be used, operated, and maintained at all times so as to prevent pollution. In the event of a nonpermitted discharge from a commercial pit, sufficient measures shall be taken to stop or control the loss of materials, and reporting procedures in 165:10-7-5(c) shall be followed. Any materials lost due to such discharge shall be cleaned up as directed by a representative of the Conservation Division. For a willful non-permitted discharge, the pit operator may be fined up to \$5,000.00.

(g) **Semiannual report.** The operator of any commercial pit shall submit a semiannual report on Form 1014A to the Manager of Pollution Abatement by February 1 and August 1 of each year.

(h) **Closure requirements.**

(1) **Notification.** The Manager of Pollution Abatement shall be notified in writing whenever a commercial pit becomes inactive, is abandoned, full of sediment, or operation of the pit ceases for any reason. A commercial pit may be considered to be inactive by the Commission if:

(A) The pit has been shut down by the Commission because of a violation which results in the filing of an application for an order to vacate the operator's authority.

(B) The authority to operate has been terminated by failure to comply with (j) of this Section.

(C) The operator is unable to furnish documentation to show that there has been receipt of drilling fluids and/or cuttings into the pit during the previous twelve months.

(2) **Time limit.** Closure of all commercial pits shall be commenced within 60 days and completed within one year of cessation of pit operations, pursuant to (1) of this subsection. In cases where extenuating circumstances arise, one extension of six months may be administratively approved in writing by the Manager of Pollution Abatement. Closure shall be in accordance with an approved closure plan. A progress report shall be submitted to the Manager of Pollution Abatement, every three months (during January, April, July, and October) after cessation of pit operations until closure is completed.

(3) **Restrictive covenant.** A restrictive covenant shall be filed with the County Clerk of the county in which a commercial pit is located. The document shall accurately describe the pit location and shall specifically restrict the current or future landowners of the pit site from puncturing the final cover of the pit or otherwise disturbing the site to the extent that pollution could occur.

(4) **Penalty for failure to meet closure requirements.** An operator failing to meet the closure requirements set out in this subsection may be fined up to \$1,000.00.

(i) **Additional requirements.** The requirements set forth in this Section are minimum requirements. Additional requirements may be made upon a showing of good cause that an operator has a history of complaints for failure to comply with Commission rules and regulations, the site has certain limitations, or other conditions of risk exist.

(j) **Application to existing pits.** Subsections (a), (c)(1), (d), (e), (f), (g), (h), and (i) of this Section shall apply to all commercial pits permitted or ordered prior to the adoption of this Section. All pits permitted, but yet to be constructed as of the effective date of this Section, shall be subject to all of the construction requirements under (e) of this Section.

(k) **Variances.** Except as otherwise provided in this Section, variances from provisions of this Section may be granted for good cause by order after application, notice, and hearing.

(l) **Compliance history.** In the event the Commission has evidence that an applicant for a commercial disposal pit may not possess a satisfactory compliance history with Commission rules, the Director of the Conservation Division may seek an order of the Commission, issued after application, notice, and hearing, determining whether the applicant should be authorized to operate such a facility.

165:10-9-2. Commercial soil farming

(a) **Order required.** No person shall conduct commercial soil farming without an order of the Commission.

(b) **Site suitability restrictions.** Commercial soil farming shall only occur on a tract of land having all of the following characteristics [paragraphs (1) through (5) shall be determined by the appropriate Soil Conservation District or a qualified soils expert]:

(1) A maximum slope of five percent.

(2) Depth to bedrock no less than 20 inches.

(3) A soil profile containing at least twelve inches of one of the following U.S.D.A. soil textures:

(A) loam

(B) silt loam

(C) silt

(D) sandy clay loam

(E) clay loam

(F) silty clay loam

(G) sandy clay

(H) silty clay or clay

(4) No commercial soil farming operations shall be conducted on any site that is located within a 100-year flood plain.

(5) Slight salinity (defined as electrical conductivity less than 4,000 micromhos/cm) in the topsoil or upper six inches of the soil.

(6) An Exchangeable Sodium Percentage (ESP) less than 15.

(7) A water table deeper than 25 feet from the soil surface, excluding perched water tables (submit basis for this determination).

(8) A minimum distance of 100 feet from any stream designated by Oklahoma Water Quality Standards or any fresh water pond, lake, or wetland (available for viewing at the Commission's Oklahoma City or appropriate Conservation Division District Offices).

(9) The site shall not be located within three (3) miles upstream within the watershed for any lake used for public water supply.

(10) No commercial soil farming operations shall be conducted within a wellhead protection area (WPA) as identified by the Wellhead Protection Program (42 USC Section 300h-7, Safe Drinking Water Act), or within one mile of a public water well for which the WPA has not been delineated.

(11) No commercial soil farming operations shall be conducted within the following distances from the city limits of an incorporated municipality unless previously authorized by Commission order:

(A) Three miles if population is 20,000 or less.

(B) Five miles if population is greater than 20,000.

(c) **Application requirements.**

(1) **Who may apply.** The applicant or joint applicant for commercial soil farming shall be the owner of the land (or person having a firm option, in writing, to purchase the land) which is to be used for soil farming.

(2) **Order required.** The Commission may issue an order upon compliance with Commission Rules of Practice 165:5-7-1, 165:5-7-35, 165:5-3-1, and this Section. Subsequent to issuance of an order authorizing commercial soil farming and prior to commencing soil farming operations, the applicant is required to submit to the Conservation Division a recorded copy of a deed reflecting that the applicant owns the land which is to be used for commercial soil farming.

(3) **Required exhibits.** All exhibits intended to support an application shall be filed pursuant to 165:5-7-35. The exhibits shall include the following:

(A) A site suitability report, pursuant to (b) of this Section, provided by the appropriate Soil Conservation District or a qualified soils expert (include qualifications). The report must contain a U.S.D.A. Soil Survey map, or when Soil Survey map does not have adequate detail, a map prepared by a qualified soils expert. A legend and soil type description shall be attached.

(B) Plan of conservation management practices covering needs of storm water disposal and erosion control.

(C) A well-prepared map or diagram, drawn to scale, showing the size and configuration of the individual soil farming plots. Latitude and longitude coordinates designating the corners of the individual soil farming plots must be supplied. The map or diagram must also include filter strips, receiving pit(s), and staging area(s).

(D) A topographic map of the subject area.

(E) Initial soil analysis with a map indicating the location of soil samples.

(F) A detailed discussion of the method of application and use of filter strips and provisions for preventing runoff from the application area.

(G) A detailed description of how the receiving pit(s) and staging area(s) are to be constructed, including, but not limited to, designation of the materials to be used for construction of the receiving pit(s) and staging area(s).

(d) **Sampling requirements.**

(1) **Contact with appropriate Conservation Division District Office.** The appropriate Conservation Division District Office shall be contacted at least two business days prior to sampling to allow a Commission representative an opportunity to witness the sampling of the receiving soil.

(2) **Receiving soil.** Subsequent to the preparation of a conservation plan or site suitability report, soil samples shall be taken from the proposed soil farming plot and analyzed. Analysis shall be submitted pursuant to (c)(3) (E) of this Section. Soil sampling shall follow this procedure:

(A) If the site contains soil types from different parent material, separate areas shall be established for soil sampling and loading calculations.

(B) A sample area shall not exceed 40 acres.

(C) A minimum of 20 representative surface core samples (0-6 inches) and 20 representative subsurface core samples (18-30 inches) must be taken from each sample area. The samples shall be composited for analysis of a single surface core sample and a single subsurface core sample.

(3) **Sampling incoming loads of mud and/or cuttings.** A sample from each incoming load of mud and/or cuttings shall be collected, filtered using a standard API filter press, and tested for Total Dissolved Solids (TDS). The date, volume, source, and TDS level of each incoming load of mud and/or cuttings received shall be entered into a log book. The log book shall be available for inspection by a representative of the Conservation Division. Log books shall be kept for a minimum of five years.

(4) **Sampling of mud and/or cuttings to be soil farmed.** The mud and/or cuttings to be soil farmed shall be sampled using the following procedures:

(A) A minimum of five samples per 50,000 bbls., or part thereof, each representative of the materials to be soil farmed, is required for each pit or pit cell. Samples must be taken from different horizontally and vertically distributed locations in each pit or pit cell.

(B) The samples shall be combined and thoroughly mixed, then a minimum two pint composite sample shall be taken for TDS and percent of solids analysis, a minimum three pint composite sample taken for oil and grease analysis, and a minimum two pint composite sample taken for arsenic and chrome analysis.

(C) If requested by a representative of the Conservation Division, each composite sample for TDS and percent of solids analysis shall be split and an adequate portion (approximately one pint) properly labeled and delivered or otherwise provided to the appropriate Conservation Division District Office or Field Inspector.

(D) After samples have been taken for analysis from a pit or pit cell, the operator shall not allow the addition of fluids or other materials, except natural precipitation or fresh water, to decrease the viscosity of the fluid.

(e) **Analysis requirements.**

(1) **Approved laboratory.** Soil and mud and/or cuttings samples shall be analyzed by a laboratory operated by the State of Oklahoma or certified by the Oklahoma Department of Environmental Quality.

(2) **Soil.** Parameters for analysis of soil shall include, but are not limited to pH, Total Soluble Salts (TSS) or Electrical Conductivity, and Exchangeable Sodium Percentage (ESP).

(3) **Mud and/or cuttings contents.** Parameters for analysis of mud and/or cuttings contents shall include, but are not limited to, the following: pH, TDS, Electrical Conductivity, Arsenic, Chromium and Oil and Grease. Arsenic and Chromium may be analyzed by either Nitric Acid Extraction or Acetic Acid Extraction ("Test Methods for Evaluating Solid Waste," SW846, second edition, U.S. EPA). The analysis shall specify which method of extraction was used.

(f) **Maximum application rate.**

(1) **Loading limits.**

(A) The maximum application rate (loading limit) shall be calculated by the operator using the calculations in (g) of this Section and the following soil loading standards:

(i) Total Soluble Salts: 6,000 lbs/acre (less TSS in soil).

(ii) Arsenic: 80 lbs/acre.

(iii) Chromium: 80 lbs/acre.

(iv) Oil and Grease: 40,000 lbs/acre.

(v) Total Dry Weight: 200,000 lbs/acre.

(B) Limitations in (A) of this paragraph are based upon standards set forth in the following publications:

(i) "Diagnosis and Improvement of Saline and Alkaline Soils," U.S. Agriculture Handbook, No. 60, U.S. Salinity Laboratory, Riverdale, California, 1954

(ii) "Critical Concentrations for Irrigation Water Supplies,"
Water Quality Criteria, 1972 Ecological Research Series,
EPA-R2-73-033, March, 1973

(iii) H.R. Moseley, "Summary and Analysis of API Onshore
Drilling Mud and Produced Water Environmental Studies,"
American Petroleum Institute Bulletin, No. D-19, 1983

(2) **Determination of most limiting parameter.** The maximum application rate shall be restricted by the most limiting parameter. It may require more than one application to achieve the maximum application rate while avoiding runoff. Determination of the most limiting parameter is based upon concentrations found in the 0"-6" soil profile at the soil farming site.

(3) **Records required.** Accurate records shall be kept as to when, where (which application area), and how much is applied. The operator shall make such records available at all times for inspection by a representative of the Conservation Division. Additionally, a semiannual report shall be submitted to the Manager of Pollution Abatement, pursuant to (k) of this Section.

(4) **Additional soil sampling required when sixty percent of the maximum application rate is obtained.** Additional soil sampling and analysis of a plot shall be done prior to each soil farming application when records show that 60 percent of the maximum application rate in (1) of this subsection of any parameter except total weight is reached. Requirements of (d) and (e) of this Section shall be met. Soil farming shall not be permitted on a plot if the analysis indicates that more than 95 percent of the maximum application rate of any parameter has been reached or if the ESP is greater than 15.

(g) **Calculations.** The procedures described in Appendix H of this Chapter shall be used in calculating the maximum application rate.

(h) **Operation requirements.**

(1) **Surety required.**

(A) Any operator of a commercial soil farming site shall file with the Surety Department for the Conservation Division an agreement to clean up pollution, restore the site, and/or plug monitor wells upon termination of operations. The agreement shall be on forms available from the Conservation Division and shall be accompanied by surety. The agreement shall provide that if the Commission finds that the operator has failed or refused to comply with the rules or take remedial action as required by law and this Section, the surety shall pay to the Commission the full amount of the operator's obligation up to the limit of the surety.

(B) The Commission shall establish the amount of surety in the order for the authority to operate a commercial soil farming site. The amount may be subject to change for good cause. The surety shall be maintained for as long as monitoring is required. The type of surety shall be a corporate surety bond, certificate of deposit, irrevocable letter of credit, or other type of surety approved by order of the Commission. Any type of surety that expires shall be renewed prior to 30 days before the expiration date.

(2) **Sign required.** A waterproof sign bearing the name of the operator, legal description, order number, and emergency phone number shall be posted within 25 feet of the entrance to any commercial soil farming site and shall be readily visible.

(3) Monitor wells.

(A) Any commercial soil farming operation shall be required to have a minimum of three (3) monitor wells installed- one upgradient and two (2) downgradient. The exact number and location of wells shall be established by the Pollution Abatement Department.

(B) No monitor well shall be installed more than 250 feet from a commercial soil farming operation, nor shall any existing water well be used as a monitor well, unless approved by the Manager of Pollution Abatement. Monitor wells installed prior to the effective date of this Section may be accepted by the Manager of Pollution Abatement if it can be shown that they adequately monitor a site.

(C) All new monitor wells shall be drilled to a depth of at least ten feet below the top of the first free water encountered, and shall be drilled and completed by a licensed monitor well driller. If documentation is submitted to the Manager of Pollution Abatement prior to drilling the monitor wells to show that no free water will be encountered within a depth of 50 feet from the surface, then the Manager of Pollution Abatement may require that monitor wells be drilled to a lesser depth.

(D) All new monitor wells shall meet the requirements as set out in rules established by the Oklahoma Water Resources Board, in addition to the following requirements:

(i) A removable and lockable cap shall be placed on top of the casing. The cap shall remain locked at all times, except when the well is being sampled.

(ii) Within 30 days after installation, specific completion information, a diagram of the locations of all monitor wells in relation to the soil farming site, and numerical labeling of such monitor wells shall be submitted to the Manager of Pollution Abatement.

(4) Sampling of monitor wells. Sampling of monitor wells shall begin prior to the first soil farming application and shall be done once every six months (during January and July) after operations commence until one year after the last application is made, then once every year for three years according to the following:

(A) The appropriate District Manager shall be notified at least 24 hours in advance of sampling to allow a Commission representative an opportunity to witness the sampling.

(B) Samples shall be collected and handled by the operator according to EPA-approved standards ("RCRA Groundwater Monitoring Technical Enforcement Guidance Document," EPA, OSWER-9950.1, September, 1986, pp.99-107.)

(C) If requested by a representative of the Conservation Division, an adequate portion of each sample (approximately one pint) shall be properly labeled and delivered or otherwise provided to the appropriate Conservation Division District Office or Field Inspector.

(D) All samples must be analyzed for pH, chlorides and TDS by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma. Analysis of

additional parameters may be required based on the operations as determined by the Manager of Pollution Abatement.

(E) A copy of each analysis and a statement as to the depth to groundwater encountered in each well, or a written statement that no water was encountered, shall be forwarded to the Pollution Abatement Department within 30 days of sampling.

(F) All samples delivered to the laboratory shall be accompanied by a chain of custody form. The chain of custody form and sample analyses must be submitted to the Conservation Division.

(5) **Representative soil analysis.** A representative soil analysis of the active soil farming plot (or plots) shall be submitted to the Manager of Pollution Abatement with the semiannual report on Form 1014A. The analysis shall include TSS, oil and grease, ESP, arsenic and chrome.

(6) **Site Security.** Soil farming shall only occur when there is an attendant on duty. All sites shall be secured by a locked gate when an attendant is not on duty. A key or combination to the lock shall be provided to the appropriate Field Inspector for the purpose of carrying out inspections.

(i) **Conditions of operation.**

(1) **Required form.** A completed Form 1014CS shall be submitted to the Manager of Pollution Abatement for approval prior to commencement of soil farming.

(2) **Notice to Commission.** The applicant, by agreement with the Conservation Division, shall schedule the commencement of soil farming no less than 24 hours prior thereto, to allow a Commission representative to be present to witness the work.

(3) **Presence of representative.** A representative of the applicant shall be on the soil farming site at all times during application of the pit materials to the land.

(4) **Type muds to be soil farmed.** Commercial soil farming is limited to water-based type muds and/or cuttings. At the time of land application, soil farming of water-based type muds and/or cuttings with a chloride content greater than 5,000 mg/l shall be prohibited. Soil farming of mud containing asphalt based oil, or oil-based muds and/or cuttings shall be prohibited.

(5) **Weather restrictions.** Commercial soil farming shall not be done:

(A) During precipitation events.

(B) When the soil moisture content is at a level such that the soil would not readily take the addition of drilling fluids.

(C) When the ground is frozen.

(D) By spray irrigation when the wind velocity is such that even distribution of materials cannot be accomplished or the buffer zones, pursuant to (6) of this subsection, or filter strips, pursuant to (7) of this subsection, cannot be maintained.

(6) **Buffer zones:** No commercial soil farming shall be done within the following buffer zones:

(A) One hundred feet of a property line boundary.

(B) Fifty feet of any stream not designated by Oklahoma Water Quality Standards.

(C) Three hundred feet of any actively-producing water well used for domestic, irrigation or industrial purposes.

(D) One thousand three hundred feet of any public water well.

(7) **Filter strips.** No commercial soil farming shall be done on filter strips. Filter strips must have a minimum width of 100 feet, and vegetation must be maintained on filter strips.

(8) **Application rate.** The maximum application rate of drilling fluids and/or cuttings stipulated by the permit shall not be exceeded. Furthermore, the minimum required acreage within the approved soil farming plot, as designated by the permit, shall be fully utilized. Application of drilling fluids and/or cuttings outside the approved plot shall be prohibited.

(9) **Soil farming method.**

(A) Application of mud and/or cuttings shall be uniform over the soil farming plot and shall be made by injection, spray irrigation, or other method approved by the Commission prior to use. The flood irrigation method shall be limited to those fields that normally are irrigated in that manner.

(B) An application of more than 50,000 lbs/acre of dry weight materials or more than 500 lbs/acre of oil and grease shall be incorporated into the soil by injection, disking, or other method approved by the Commission. If the injection method is not used, incorporation must be made within a reasonable time period after completion of application, not to exceed 14 days unless extended by the Pollution Abatement Department pursuant to a written request.

(C) When the spray irrigation method is used and solids eventually accumulate on the soil surface to a one-eighth (1/8) inch depth, then the materials shall be incorporated prior to subsequent soil farming.

(D) All soil farming vehicles shall be either a single or double axle vehicle with a permanently attached tank that shall not exceed 100 barrels, and the vehicle shall be equipped so as to minimize pooling and ruts caused by tire tracks. It shall have a diffuser mechanism to spread the mud/fluids in a fan pattern. Spreader bars shall not be used. The mud/fluids shall be forced from the tank with air pressure or a mechanical pump. Gravity application is prohibited.

Transport/tanker trucks (18 wheel vehicles) shall not be used for soil farming at any time. Use of an unauthorized vehicle or equipment may result in the revocation of authority to soil farm. A fine of up to \$2,000.00 may be assessed for each violation of this paragraph.

(E) Drill cuttings shall be spread with an industrial mechanical spreader capable of broadcasting and/or fanning out the cuttings. Dozers, backhoes, motor blades or scrapers shall not be used to spread drill cuttings or drill solids during soil farming at any time. Any other equipment must be approved by the Manager of Pollution Abatement prior to commencement of operations.

(10) **Runoff or ponding prohibited.** No runoff or ponding of soil farmed materials shall be allowed during application.

(11) **Suspension of soil farming authority.** If the applicant violates the order authorizing soil farming, or this Section, soil farming shall be discontinued and the Pollution Abatement Department shall be contacted immediately. The Pollution Abatement Department may shut down the facility until the operator completes any remedial work. Soil farming may resume with the approval of the Pollution Abatement Department.

(12) **Prevention of pollution.** All commercial soil farming facilities shall be operated and maintained at all times so as to prevent pollution. In the event of a nonpermitted discharge from a commercial soil farming facility, sufficient measures shall be taken to stop or control the loss of materials and reporting procedures in 165:10-7-5 (c) shall be followed. Any materials lost due to such discharge shall be cleaned up as directed by a representative of the Conservation Division.

(13) **Vegetative cover.** If the vegetative cover of the area which has been soil farmed is destroyed or significantly damaged by disking, injection, or other practice associated with soil farming, the vegetative cover shall be reestablished within one year after the last soil farming application.

(14) **Fencing.** All commercial soil farming sites shall be completely enclosed by a fence at least four feet in height. No livestock shall be allowed inside the fence.

(j) **Additional requirements.** The requirements set forth in this Section are minimum requirements. Additional requirements may be made upon a showing of good cause that an operator has a history of complaints for failure to comply with Commission rules, or the site has certain limitations, or other conditions of risk exist.

(k) **Semiannual report.** The operator of any commercial soil farming facility shall submit a semiannual report on Form 1014A to the Manager of Pollution Abatement by February 1 and August 1 of each year.

(l) **Prospective application to existing operations.** Subsections (d), (e), (f), (g), (h), (i), (j), (k) and (m) of this Section shall apply to all commercial soil farming operations for which an order or permit was obtained prior to the adoption of this Section. All affected operators shall have their facility in compliance with all of the noted subsections by December 31, 1988. Failure to be in compliance by that date shall result in termination of the authority to operate.

(m) **Variations.** Except as provided in this Section, variations from provisions of this Section may be granted for good cause by order after application, notice, and hearing.

(n) **Compliance history.** In the event the Commission has evidence that an applicant for a commercial soil farming operation may not possess a satisfactory compliance history with Commission rules, the Director of the Conservation Division may seek an order of the Commission, issued after application, notice, and hearing, determining whether the applicant should be authorized to conduct such commercial soil farming operation.

165:10-9-3. Commercial disposal well surface facilities

(a) **Scope.** This Section shall apply to the surface facilities of any commercial disposal well. Any pit sought to be approved pursuant to this Section will require a permit. The operator of the proposed pit shall submit Form 1014 to the appropriate Conservation Division District Office for review and approval.

(b) **Notice.**

(1) **Notice of application.** Notice of the application for a permit for a pit with a capacity in excess of 50,000 barrels shall be published one time in a newspaper of general circulation in Oklahoma County, Oklahoma, and in a newspaper of general circulation published in each county in which the

subject lands are located. The notice shall include the following information:

(A) The name, physical mailing address, telephone number, electronic mail address and facsimile number of the applicant or its representative, whom anyone may contact for additional information concerning the application.

(B) The location of the proposed pit to the nearest 40 acre tract.

(C) The capacity of the proposed pit.

(D) The type of fluids to be stored in the proposed pit.

(E) The notice must also include the following language:

(i) Written protests to the relief sought must be submitted to the applicant or its representative and to the Manager of the Field Operations Department, Oklahoma Corporation Commission, P.O. Box 52000, Oklahoma City, OK, 73152-2000, within fifteen (15) days after publication of the notice. Written protests must specify the name of the applicant, location of the proposed pit, reasons for protest, and the name(s), physical mailing address(es), telephone number(s), electronic mail address(es) and facsimile number(s) of the protestant(s).

(ii) If there are no written protests to the application and the Commission does not require a hearing, the application shall be presented to the Manager of the Field Operations Department for administrative review without a hearing, and if the application is protested, then any protestants shall receive notice of hearing.

(2) **Proof of notice.** The applicant shall submit affidavit(s) of publication to the Field Operations Department to show compliance with the requirements of paragraph (b)(1) above.

(3) **Procedure.**

(A) If a written protest to the application is submitted to the Field Operations Department within fifteen (15) days after the date the notice of application is published, or if hearing is required by the Commission, the application shall be set for hearing and notice thereof given in the same manner required in the filing of an application on the Pollution Docket.

(B) If no written protest is submitted to the Field Operations Department and the Commission does not require a hearing, the application shall be presented to the Manager of the Field Operations Department for administrative review.

(c) No commercial disposal well pit shall be constructed in any area that floods according to the Soil Conservation Service County Soil Survey (available for viewing at the Commission's Oklahoma City Office or appropriate Conservation Division District Offices).

(d) **Construction requirements.**

(1) **Dikes.** A dike shall be constructed and maintained around any storage tank or group of tanks. The diked area shall be capable of totally containing at least one and one-half (1 1/2) times the volume held by the largest storage tank.

(2) **Leak containment.** A means for containing leaks shall be provided at all pumps and connections.

(3) **Splash pad/apron.** A splash pad/apron shall be constructed at the unloading area of any pit to the design and dimensions necessary to contain and direct all materials unloaded into the pit. If a pit is not used, an apron shall be constructed at the unloading area to the design and dimensions necessary to direct any spills into containment.

(4) **Pit specifications.** Any commercial disposal well pit shall be constructed of concrete or steel or shall be lined with a geomembrane liner. The following specifications shall be met:

(A) Any concrete pit shall be steel-reinforced and have a minimum wall thickness of six inches. A leachate collection system approved by the Manager of the Pollution Abatement Department must be installed underneath the concrete pit.

(B) Any steel pit shall have a minimum wall thickness of three-sixteenths (3/16) inch. If a previously used steel pit is installed, it shall be free of corrosion or other damage. A leachate collection system approved by the Manager of the Pollution Abatement Department must be installed underneath the steel pit.

(C) Any geomembrane liner shall meet these requirements:

(i) The geomembrane liner shall have a minimum thickness of 40 mils, shall be chemically compatible with the type of wastes to be contained, and shall have ultraviolet light protection.

(ii) The geomembrane liner shall be placed over a specially prepared, smooth, compacted surface void of sharp changes in elevation, rocks, clods, organic debris, or other objects.

(iii) The geomembrane liner shall be continuous (may include seams) and shall cover the bottom and interior sides of the pit entirely. The edges shall be securely placed in a minimum twelve inch deep anchor trench around the perimeter of the pit.

(iv) A leachate collection system approved by the Manager of the Pollution Abatement Department must be installed underneath the geomembrane lined pit.

(5) **Certification of liner.** The operator of any commercial disposal well pit that is constructed with a geomembrane liner shall secure an affidavit signed by the installer, certifying that the liner meets minimum requirements and was installed in accordance with Commission rules. It shall be the operator's responsibility to maintain the affidavit and all supporting documentation pertaining to the liner, such as geomembrane liner specifications from the manufacturer, etc., and shall make them available to a representative of the Conservation Division upon request.

(6) **Monitor wells or leachate collection system.**

(A) Any commercial disposal well pit permitted, but yet to be constructed after the effective date of this Section, shall be required to have a leachate collection system and a minimum of three monitor wells, one upgradient and two downgradient from the pit.

(B) No monitor well shall be installed more than 100 feet from a commercial disposal well pit, nor shall any existing water well be used as a monitor well, unless written approval is given by the

Manager of Pollution Abatement.

(C) All new monitor wells shall be drilled to a depth of at least ten feet below the top of the first free water encountered and shall be drilled and completed by a licensed monitor well driller. If documentation is submitted prior to drilling the monitor well to show that no free water will be encountered within a depth of 50 feet from the surface, the Manager of Pollution Abatement may require that monitor wells be drilled to a lesser depth.

(D) All new monitor wells shall meet the requirements as set out in rules established by the Oklahoma Water Resources Board, in addition to the following requirements:

(i) A removable and lockable cap shall be placed on top of the casing. The cap shall remain locked at all times, except when a well is being sampled. A key to each well shall be made available to the appropriate District Manager or Field Inspector upon request.

(ii) Within 30 days of installation, construction details for any leachate collection system or specific completion information for all monitor wells, a diagram of their locations in relation to the pit they monitor, and the numerical labeling of such monitor wells shall be submitted to the Manager of the Underground Injection Control Department.

(e) Operation and maintenance requirements.

(1) **Sign.** A waterproof sign shall be erected and maintained within 25 feet of the entrance road to any commercial disposal well, shall be readily visible, and shall contain the name of the operator, order or permit number, legal description, and emergency phone number.

(2) **Fencing.** All commercial disposal well surface facilities that have a pit shall be completely enclosed by a fence at least four feet in height. No livestock shall be allowed inside the fence.

(3) **Site maintenance.** The normal access surface of any commercial disposal well site, including the access road(s), shall be maintained in a condition that will safely and easily accommodate a passenger car during all weather conditions.

(4) **Exclusion of runoff water.** No commercial disposal well pit shall be allowed to receive runoff water.

(5) **Freeboard.** The fluid level in any concrete or steel commercial disposal well pit shall be maintained at all times at least 6 inches below the top of the pit wall, unless otherwise specified on Form 1014. Any geomembrane lined pit shall have a minimum of 24 inches freeboard at all times.

(6) **Temporary storage only.** No pit shall be used as permanent storage for salt water.

(7) Sampling of monitor wells and leachate collection systems.

(A) Sampling of monitor wells and leachate collection systems shall occur once every six months, during the months of January and July.

(B) The appropriate District Manager or field inspector for the area shall be notified at least 24 hours in advance of sampling to allow a Commission representative an opportunity to witness the sampling.

(C) Samples shall be collected, preserved, and handled by the operator according to EPA-approved standards (RCRA Groundwater Monitoring Technical Enforcement Guidance Document, EPA, OSWER-9950.1, September, 1986, pp. 99-107) and analyzed for pH, chlorides and Total Dissolved Solids (TDS) by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma. Analysis of additional parameters may be required, as determined by the Manager of Field Operations or Manager of Pollution Abatement.

(D) If requested by the District Manager, each sample shall be split and an adequate portion (approximately one pint) properly labeled and delivered upon request or otherwise provided to the appropriate Conservation Division District Office or Field Inspector. A copy of each analysis and a statement as to the depth to groundwater encountered in each well or leachate collection system, or a written statement that no water was encountered, shall be forwarded to the Manager of the Underground Injection Control Department, within 30 days of sampling.

(E) All samples delivered to the laboratory shall be accompanied by a chain of custody form. The chain of custody form and sample analyses must be submitted to the Conservation Division.

(8) **Prevention of pollution.** All commercial disposal well pits shall be used, operated, and maintained at all times so as to prevent pollution. In the event of a nonpermitted discharge from surface facilities of a commercial disposal well, sufficient measures shall be taken to stop or control the loss of materials and reporting procedures in 165:10-7-5(c) shall be followed. Any materials lost due to such discharge shall be cleaned up as directed by a representative of the Conservation Division.

(9) **Oil film.** The operator of a saltwater disposal system shall be responsible for the protection of migratory birds. Therefore, the Conservation Division recommends that to prevent the loss of birds due to oil films, all open top tanks and pits containing fluid be kept free of hydrocarbons, or be protected from access to birds. [See Advisory Notice 165:10-7-3(c).]

(10) **Site security.** Commercial disposal well facilities must be secured at all times so as to prevent unauthorized access. If an electronic system is used to secure the facility or if fluids to be disposed in the well are transported to the facility by pipe, an automatic shut-off or alarm system must be installed to ensure that disposal operations cease if a well mechanical failure or downhole problem occurs. If an electronic system is not used to secure the facility, fluids shall be received for placement in a commercial disposal well only when there is an attendant on duty if fluids are hauled in by truck. All sites not protected by an electronic system shall be secured by a locked gate when an attendant is not on duty. A key or combination to the lock or electronic security system access code shall be provided to the appropriate Field Inspector for the purpose of carrying out inspections.

(f) **Closure requirements.**

(1) **Time limit.** Within 90 days of the cessation of operation of any commercial disposal well, all associated pits shall be emptied of all

contents and filled with soil. All monitor wells shall be plugged with bentonite or cement, unless exempt in writing by the District Manager or Manager of Field Operations. The site shall be revegetated within 180 days.

(2) **Geomembrane-lined pits.** When closing any commercial disposal well pit with a geomembrane liner, extreme care shall be taken to preserve the integrity of the liner. All free liquids shall be removed or chemically solidified. A geomembrane cap shall be placed over the top of any remaining contents to completely encapsulate them. Any geomembrane cap shall have a minimum thickness of twelve mils and shall be chemically compatible with the type of substances to be encapsulated. Burial, pursuant to (3) of this subsection, shall follow.

(3) **Burial.** If any concrete, steel, geomembrane, or other materials associated with a commercial disposal well site are to be left on-site, they shall be buried under a minimum soil cover of three feet, pursuant to 165:10-3-17.

(g) **Prospective application to existing facilities.** All provisions of this Section except (4) and (5) of subsection (d) shall apply to all existing commercial disposal well pits which are, or have been, in operation prior to the effective date of this Section. Operators shall have 180 days from the effective date of this Section in which to bring their facilities into compliance with the applicable provisions of this Section. Failure to comply with any applicable provision may result in revocation of the authority to operate.

(h) **Variiances.** A variance from the time requirements of (e)(7) or (f)(1) of this Section may be granted by the District Manager or Manager of Field Operations for justifiable cause. A written request and supporting documentation is required. The District Manager or Manager of Field Operations shall respond in writing within five business days, either approving or disapproving the request.

165:10-9-4. Commercial recycling facilities

(a) **Scope.** This Section shall cover the permitting, construction, operation, and closure requirements for commercial recycling activities that come within this Section. Commercial recycling operations are authorized by approval of a permit application and issuance of a Commission order granting authority to operate, and a construction permit. Stationary commercial recycling facilities and temporary commercial recycling operations recycle materials defined as "deleterious substances" in OAC 165:10-1-2. Such substances must undergo at least one treatment process and must be recycled into a marketable product for resale or possess some beneficial properties and uses. This does not include the reuse of drilling mud (plug mud) which was previously utilized in drilling or plugging operations. This Section does not cover hydrocarbon recycling/reclaiming facilities (see OAC 165:10-8-1 through 165:10-8-11). This Section applies to stationary commercial recycling facilities and temporary commercial recycling operations. Applicants shall comply with OAC 165:5-7-1, OAC 165:5-7-35, OAC 165:5-3-1, and this Section.

(b) **Definitions.** The following words and terms, when used in this Section, shall have the following meaning:

(1) **"Partially treated waste"** means a deleterious substance that has been treated or processed with the intent of being recycled, but which has not

been determined to meet the environmental and engineering standards for a recyclable product established in the approved permit or order issued pursuant to this Section.

(2) "**Recyclable product**" means a reusable material that has been created from the treatment and/or processing of deleterious substances from recycling operations as authorized by the approved permit and Commission order, and that meets the environmental and engineering standards established in the permit and order for the intended use. A recyclable product is not a deleterious substance(s), but may become a deleterious substance(s) if it is abandoned or disposed of rather than recycled as authorized by the permit or order.

(3) "**Stationary commercial recycling facility**" means a facility whose operator receives compensation from others for recycling deleterious substances, with the primary business purpose of the facility being to provide such services for compensation in a fixed location that recycles solid or liquid deleterious substances.

(4) "**Temporary commercial recycling operation**" means an operation whose operator receives compensation from others for the recycling of deleterious substances that occurs at a permitted well site, drilling pad, production pad, tank battery pad, access road, or other approved location so long as the recycling operator has surface owner permission for the recycling operation. Temporary commercial recycling operations at such locations shall not exceed a time period of 120 days, and such operations utilize equipment that is transported from one location to another, at which locations all materials are stored in authorized pits, storage cells, containments, and/or tanks.

(c) **Stationary commercial recycling facilities.** This subsection addresses the approval, surety, construction, operation, and closure of stationary commercial recycling facilities.

(1) **Permit application.**

(A) **Who may apply.** The applicant for a permit for a facility shall be the owner of the land or person having a written firm option to purchase the land at the time the permit application is filed with the Pollution Abatement Department on which the proposed facility is to be located.

(B) **Permit application approval.** Prior to any construction or use of a facility, applicants must have approval for their permit. Approval may be granted in the form of a letter from the Pollution Abatement Department after review of the permit application. Permits for facilities shall be issued for a term of not more than five years.

(C) **Administrative review.** Applications shall contain required information and any additional information requested for review by the Pollution Abatement Department. The Pollution Abatement Department shall not administratively approve a permit application unless the Department has determined that the application is administratively complete. If the Pollution Abatement Department determines that an application is incomplete, the Department shall notify the applicant in writing and shall describe the specific information required to complete the application. Subsequent to issuance of a permit and order granting authority to operate a

facility and prior to commencing construction of such facility, the applicant is required to submit to the Department a recorded copy of a deed reflecting that the applicant owns the land which is to be used for the facility.

(2) **Required information.** Applicants are required to submit information to the Pollution Abatement Department which shall include, but not be limited to, the following:

- (A) Applicant's name.
- (B) Physical office address and, if different, mailing address.
- (C) Legal description of proposed facility.
- (D) Name, telephone number and email address of contact person.
- (E) A lithologic log of test borings identifying the subsurface materials encountered and the depth at which groundwater was encountered. No facility shall be constructed unless it can be shown that there will be a minimum of 25 feet between the base of the facility and the groundwater level. To ascertain this and to demonstrate the subsurface profile of the site, a minimum of three test borings (the exact number of locations to be determined by the Pollution Abatement Department) shall be drilled to a minimum depth of 25 feet below the proposed base of the facility and into the first free water encountered. Perched water tables are not considered for the purposes of this subparagraph. Test borings need not extend deeper than 50 feet below the base of the facility if free water has not been encountered before that depth. All boreholes converted to monitor wells shall conform to (6) of this subsection. All boreholes not converted to monitor wells shall be plugged from top to bottom with bentonite, cement, and/or other method approved by the Pollution Abatement Department within 30 days of drilling completion.
- (F) A topographic map of the proposed facility site.
- (G) The appropriate Soil Conservation Service (SCS) soil survey aerial photo and legend.
- (H) A detailed drawing of the proposed facility, with complete construction plans, which shall include, but not be limited to, mixing areas, staging areas and storm water retention structures.
- (I) For areas where deleterious substances are to be placed outside of pits or other unlined areas, credible engineering and/or geologic information demonstrating that tanks or liners are not necessary for the protection of surface and subsurface water.
- (J) A detailed drawing of all pits to be constructed, showing the bottom, sides, and dikes, reflecting the dimensions of each pit.
- (K) A plan to control and manage storm water runoff and to retain incoming deleterious substances during and after precipitation events, including the locations and dimensions of all berms, dikes and/or storage basins that will collect storm water from the facility.
- (L) A plan for the installation and location of monitoring wells at the facility.
- (M) A brief description of the recycling process, which shall also include the following:
 - (i) Description of the types of deleterious substances that will be recycled.

- (ii) Estimated maximum potential daily volume capable of being recycled.
 - (iii) Description of any chemicals and/or processes where harmful byproducts could potentially be yielded.
 - (iv) Description of any material to be used as aggregates in the recycling process, and the source of aggregates.
- (N) A brief description of the planned end use of a recyclable product, which shall also include the following:
- (i) Description of the end use of the product.
 - (ii) Plan for any chemical and engineering testing protocol to insure a quality recycled product.
 - (iii) Description of any chemicals and/or processes used in the recycling process where harmful byproducts could potentially be yielded.
- (O) A plan for closure of the facility which shall specifically state how all aspects of closure shall be accomplished, including volume and fate of all deleterious solids and liquids, earthwork to close the facility (including placement of stockpiled topsoil), and revegetation of the site. The plan shall include, but not be limited to, the following:
- (i) An itemization of projected hauling, closure, reclamation, maintenance, and monitoring costs, and
 - (ii) A plan for post-closure maintenance and monitoring which shall address maintenance of the site as well as monitoring and plugging of wells. Exemption from the plugging of monitor wells may be obtained upon written request and approval of the Manager of the Pollution Abatement Department.
- (P) A plan for operation which shall address the method(s) by which excess water will be disposed.
- (Q) The Pollution Abatement Department may require the applicant for a permit to provide the Commission with engineering, geological, or other information which the Department deems necessary to show that the approval of the permit application and resulting commercial recycling operations will not result in the waste of oil, gas, or water resources, the pollution of surface or subsurface water, or a threat to the public health or safety.

(3) Site limitations.

- (A) No facility shall be constructed or used unless an investigation of the soils, topography, geology, and hydrology conclusively shows that storage of deleterious substances and the recycling of such substances at the site will not be harmful to groundwater, surface water, soils, plants, or animals in the surrounding area.
- (B) No facility shall be constructed or used on or in an abandoned mine, strip pit, quarry, canyon, or streambed.
- (C) No facility shall be constructed or used on any site that is located within a 100-year flood plain.
- (D) No facility shall be constructed or used within a wellhead protection area (WPA) as identified by the Wellhead Protection Program (42 USC Section 300h-7, Safe Drinking Water Act), or within one mile of a public water well for which the WPA has not

been delineated.

(E) Pits shall not be constructed or used at facilities unless it can be shown that there will be a minimum of 25 feet between the base of the pit(s) and the groundwater level. To ascertain this and to demonstrate the subsurface profile of the site, a minimum of three test borings (the exact number of locations to be determined by the Pollution Abatement Department) shall be drilled to a minimum depth of 25 feet below the proposed base(s) of the pit(s) and into the first free water encountered. Perched water tables are not considered for the purposes of this subparagraph. Test borings need not extend deeper than 50 feet below the base(s) of the pit(s) if free water has not been encountered before that depth. All boreholes converted to monitor wells shall conform to (6) of this subsection. All boreholes not converted to monitor wells shall be plugged from top to bottom with bentonite, cement, and/or other method approved by the Pollution Abatement Department within 30 days of drilling completion.

(F) No facility shall be constructed or used within the following distances from the city limits of an incorporated municipality unless previously authorized by Commission order:

(i) Three miles if population is 20,000 or less.

(ii) Five miles if population is greater than 20,000.

(4) Surety requirements.

(A) **Agreement with Commission.** Any operator of a facility shall file with the Surety Department for the Conservation Division an agreement to properly close and reclaim the site in accordance with approved closure and reclamation procedures upon termination of recycling operations due to abandonment, shutdown, full pits, or other reason. The agreement shall be on forms available from the Conservation Division and shall be accompanied by surety. The agreement shall provide that if the Commission finds that the operator has failed or refused to close the facility or take remedial action as required by law and the rules of the Commission, the surety shall pay to the Commission the full amount of the operator's obligation up to the limit of the surety.

(B) **Surety amount and type.** The Commission shall establish the amount of surety in the permit approval letter and Commission order for the facility. The amount of surety shall be based on factors such as dimensions of the facility and costs of closure, reclamation, monitoring, plugging of monitor wells, any pit closure, volume of deleterious substances stored on site, final disposal of deleterious substances, remediation, earth work, revegetation, etc. The amount may be subject to change for good cause. Upon approved closure of a facility, the Manager of Pollution Abatement may administratively reduce the surety requirement to an amount which would cover the cost of monitoring the site and plugging the monitor wells. Surety shall be maintained for as long as monitoring is required. The type of surety shall be a cashier's check, corporate surety bond, certificate of deposit, or irrevocable letter of credit. Any type of surety that expires shall be renewed prior to 90 days before the expiration date.

(C) **Posting surety before permit issues.** An operator shall post surety with the Commission on forms provided by the Surety Department before a construction permit (Form 1014CR) is issued, pursuant to (c)(5) of this Section.

(5) **Construction requirements.**

(A) **Construction permit required.** Prior to constructing any facility, the facility operator shall obtain a permit from the Pollution Abatement Department. Application shall be made on Form 1014CR.

(B) **Runoff water prohibited.** No runoff water from surrounding land surfaces shall be allowed to enter a facility.

(C) **Pit construction.** All pits located within the facility shall adhere to construction requirements in OAC 165:10-7-16(c), OAC 165:10-7-16(f)(5), or OAC 165:10-7-33(e), in addition to the following:

(i) All pits utilized in a facility shall have a minimum freeboard of three feet.

(ii) Any pit utilized in a facility shall not be constructed to dimensions greater than that approved in the permit and order and in the application for a permit to use an earthen pit (Form 1014). Pit dimensions shall be measured at the maximum allowable fluid level.

(iii) Any pit utilized in a facility must be constructed of concrete or contain a geomembrane liner.

(I) If a pit is constructed of concrete, a leachate collection system shall be installed under each pit.

(II) Concrete pits must be steel reinforced and have a minimum wall and base thickness of six inches.

(III) If a geomembrane liner is used, the minimum thickness shall be 40 mil.

(IV) Any geomembrane liner used in such pits shall be chemically compatible with the type of substances to be contained in the pit and shall have ultraviolet light protection.

(V) Any geomembrane liner shall be placed over a specially prepared, smooth, compacted surface void of sharp changes in elevation, rocks, clods, organic debris, or other objects.

(VI) Any geomembrane liner shall be continuous, although it may include welded or extruded seams, and the liner must cover the bottom and interior sides of the pit entirely. Sewing of seams is prohibited. The edges shall be securely placed in a minimum twelve inch deep anchor trench around the perimeter of the pit.

(VII) Any pipe, tinhorn, culvert, or conduit in the berm between two adjoining pits shall be placed so that there is a minimum of 36 inches between the top of the pipe, tinhorn, culvert, or conduit and the lowest point in the top of the berm separating the pits.

(VIII) All pits utilized within facilities which receive deleterious substances directly from a truck shall have a splash pad at the point where fluids and semi solids are received. The pad must be constructed of materials and to the dimensions necessary to effectively prevent the liner from eroding and to not cause runoff of deleterious substances.

(6) Monitor wells.

(A) Monitor wells must be installed in conjunction with every facility as required by the Pollution Abatement Department.

(B) All new monitor wells shall be drilled to a depth of at least ten feet below the top of the first free water encountered and shall be drilled and completed by a licensed monitor well driller. If documentation is submitted prior to drilling the monitor well to show that no free water will be encountered within a depth of 50 feet from the surface, the Manager of Pollution Abatement may require that monitor wells be drilled to a lesser depth.

(C) When pits are utilized in a facility the exact number and location of monitor wells shall be approved by the Pollution Abatement Department prior to installation. No monitor well shall be installed more than 250 feet from the toe of the outside berm of a pit, nor shall any existing water well be used as a monitor well unless approved by the Pollution Abatement Department. Monitor wells installed prior to the effective date of this Section may be accepted by the Manager of the Pollution Abatement Department if it can be shown that they adequately monitor a site. All new monitor wells shall be drilled to a depth of at least ten feet below the top of the first free water encountered, and all monitor wells shall be drilled to a depth of at least ten feet below the base of any pit. All new monitor wells shall be drilled and completed by a licensed monitor well driller. If documentation is submitted to the Manager of the Pollution Abatement Department prior to drilling the monitor wells to show that no free water will be encountered within 50 feet below the base of any pit, the Manager of the Pollution Abatement Department may require that monitor wells be drilled to a lesser depth.

(D) All new monitor wells shall meet the requirements as set out in rules established by the Oklahoma Water Resources Board, in addition to the following requirements:

(i) A removable and lockable cap shall be placed on top of the casing. The cap shall remain locked at all times, except when the well is being sampled.

(ii) Within 30 days of installation, specific completion information, a diagram of the locations and numerical labeling for all monitor wells shall be submitted to the Pollution Abatement Department.

(7) Leachate collection system. A facility operator may elect to install a leachate collection system in lieu of monitor wells if such system will adequately detect any leak from a pit. The plan for the leachate collection system must be approved by the Pollution Abatement Department prior to

installation of the leachate collection system.

(8) **Hydrologically sensitive areas.** If the proposed facility is known to be located over a hydrologically sensitive area, in addition to the foregoing construction requirements, the following additional requirements shall apply:

(A) For all pits utilized within a facility, in addition to monitoring wells, a leachate collection system shall be installed for each pit.

(B) A minimum 60-mil geomembrane liner shall be required for each pit.

(C) The Manager of the Pollution Abatement Department shall determine the minimum depth of all monitor wells.

(9) **Facility approval.** Acceptance of materials by a facility shall not commence until a representative of the Conservation Division has inspected and approved the facility.

(10) **Operation and maintenance requirements.**

(A) **Vegetative cover.** Vegetative cover shall be established on all areas of earthfill immediately after any pit construction or during the first planting season if pit construction is completed out of season. The cover shall be sufficient to protect those areas from soil erosion and shall be maintained.

(B) **Fencing.** All facilities shall be completely enclosed by a fence at least four feet in height. No livestock shall be allowed inside the fence.

(C) **Sign.** A waterproof sign bearing the name of the facility operator, legal description, most current permit and order number, and emergency phone number shall be posted within 25 feet of the entrance gate to any facility and the sign shall be readily visible.

(D) **Site security.** Only acceptable materials shall be received by a facility. All facilities shall be secured by a locked gate when an attendant is not on duty. A key or combination to the lock shall be provided to the Pollution Abatement Department for the purpose of carrying out inspections.

(E) **Fluid level.** Deleterious substances shall not be accepted into any pit unless the fluid level can be maintained at an elevation no higher than the maximum level of the fluid level marker.

(F) **Sampling.** The contents of each pit, cell or surface storage area at a facility shall be sampled and analyzed by the operator at least once every six months (during January and July) after operations commence. More frequent sampling may be required by the Pollution Abatement Department. The following procedures shall be used:

(i) The Pollution Abatement Department shall be notified at least 48 hours in advance of sampling to allow a representative an opportunity to witness the sampling.

(ii) Samples shall be collected and handled by the operator according to procedures and protocol detailed in the submitted permit application and approved by the Pollution Abatement Department.

(iii) If requested by a representative of the Pollution Abatement Department, each composite sample shall be split and a sufficient portion (approximately one pint) shall

be properly labeled and delivered or otherwise provided to the Pollution Abatement Department.

(iv) All samples delivered to the laboratory shall be accompanied by a chain of custody form.

(v) All samples must be analyzed by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma. Analysis of additional parameters may be required, as determined by the Pollution Abatement Department.

(vi) A copy of each analysis and the chain of custody form shall be forwarded to the Pollution Abatement Department within 30 days of sampling.

(G) Oil film.

(i) No pit utilized in a facility shall contain an oil film covering more than one percent of the surface area of the pit.

(ii) The protection of migratory birds shall be the responsibility of the operator. Therefore, the Conservation Division recommends that to prevent the loss of birds, oil films be removed, or the surface area of any pit be protected from access to birds. [See Advisory Notice in OAC 165:10-7-3(c)].

(H) Aesthetics. All facilities shall be maintained so that there is no junk iron or cable, oil or chemical drums, paint cans, domestic trash, or debris on the premises.

(I) Structural integrity. All pits utilized in facilities shall be used, operated, and maintained at all times so as to prevent the escape of their contents. All erosion, cracking, sloughing, settling, animal burrows, or other condition that threatens the structural stability of any earth fill shall be repaired immediately upon discovery.

(11) Monitor well and leachate collection system sampling. Sampling of monitor wells or leachate collection systems shall begin prior to accepting any deleterious substances into a new facility and within 30 days of completing the drilling of monitor wells or installation of leachate collection systems on existing facilities, and sampling shall be done at least once every six months (during January and July) after operations commence until three years after closure is completed. Sampling of greater frequency or duration may be required by the Pollution Abatement Department. The following procedures shall be used:

(A) The Pollution Abatement Department shall be notified at least 48 hours in advance of sampling to allow a Commission representative an opportunity to witness the sampling.

(B) Samples shall be collected and handled by the operator according to EPA-approved standards. (RCRA Groundwater Monitoring Technical Enforcement Guidance Document, EPA, OSWER-9950.1, September 1986, pp. 99-107.)

(C) If requested by a representative of the Pollution Abatement Department, a sufficient portion of each sample (approximately one pint) shall be properly labeled and delivered or otherwise provided to the appropriate Conservation Division District Office.

(D) All samples delivered to the laboratory shall be accompanied by a chain of custody form.

(E) All samples must be analyzed for pH, TDS, TPH and chlorides by a laboratory certified by the Oklahoma Department of Environmental Quality or operated by the State of Oklahoma. Analysis of additional parameters may be required based on the operation of the facility as determined by the Pollution Abatement Department.

(F) A copy of each analysis and a statement as to the depth to groundwater encountered in each well, or a written statement that no water was encountered in a monitoring well or leachate collection system, shall be forwarded to the Pollution Abatement Department within 30 days of sampling.

(12) **Record keeping requirements.** The date, volume, source (generator, well name, API number, and legal description), and type of material shall be entered into a log book. The log book and supporting documentation shall be available for inspection by a representative of the Conservation Division of the Commission at all times. Log books and supporting documentation shall be kept for a minimum of five years after treatment is completed.

(13) **Prevention of pollution.** All facilities shall be used, operated, and maintained at all times so as to prevent pollution. In the event of a nonpermitted discharge at or from a facility, the facility can be shut down until completion of cleanup operations. Sufficient measures shall be taken to stop or control the loss of materials, and reporting procedures in 165:10-7-5(c) shall be followed.

(14) **Semiannual report.** The operator of any facility shall submit a report on Form 1014A to the Pollution Abatement Department by February 1 and August 1 of each year.

(15) **Closure requirements.**

(A) **Notification.** The Manager of the Pollution Abatement Department shall be notified in writing whenever a facility becomes inactive, is abandoned, or operations cease for any reason. A facility may be considered inactive if:

- (i) The facility has been shut down by the Commission because of a violation.
- (ii) The operator is unable to furnish documentation to show that there has been receipt of deleterious substances to be recycled at the facility during the previous twelve months.
- (iii) The authority to operate the facility has been terminated by failure to comply with (c)(17) of this Section.

(B) **Plugging of monitor wells.** Monitor wells shall be plugged in accordance with Oklahoma Water Resources Board rules.

(C) **Time limit.** Closure of all facilities shall be commenced within 60 days and completed within one year of cessation of operations, pursuant to (A) of this paragraph. In cases where extenuating circumstances arise, one extension of six months may be administratively approved in writing by the Pollution Abatement Department. Closure shall be in accordance with an approved closure plan. A progress report shall be submitted to the Pollution Abatement Department at the end of each calendar month after

cessation of operations until closure is completed.

(D) **Restrictive covenant.** The Pollution Abatement Department may require a restrictive covenant to be filed with the County Clerk of the county in which a facility is located. The document shall accurately describe the facility location and shall specifically restrict the current or future landowners of the site from puncturing the final cover of any pit utilized in a facility or otherwise disturbing the site to the extent that pollution could occur.

(16) **Additional requirements.** The requirements set forth in this subsection are minimum requirements. Additional requirements may be made upon a showing of good cause that an operator has a history of complaints for failure to comply with Commission rules and regulations, the site has certain limitations, or other conditions of risk exist.

(17) **Application to existing facilities.** Operators of all types of commercial recycling facilities permitted or ordered prior to the effective date of this Section must either comply with subsections (a), (c)(4), (c)(5)(B), (c)(5)(C)(iii)(VII), (c)(5)(C)(iii)(VIII), (c)(6), (c)(7), (c)(10), (c)(14), (c)(15), (c)(16) and (c)(19) of this Section or close such facilities within one (1) year of the effective date of this Section. All facilities permitted, but yet to be constructed as of the effective date of this Section, shall also be subject to all of the construction requirements in (c)(5) of this Section.

(18) **Variances.** Except as otherwise provided in this subsection, variances from provisions of this subsection may be granted for good cause by order after application, notice, and hearing.

(19) **Compliance history.** In the event the Commission has evidence that an applicant for a facility may not possess a satisfactory compliance history with Commission rules, the Director of the Conservation Division may seek an order of the Commission, issued after application, notice, and hearing to vacate the authority to operate.

(d) **Temporary commercial recycling operations.** This subsection addresses the approval, construction, operation and closure for temporary commercial recycling operations.

(1) **Permit application.**

(A) **Who may apply.** The applicant for a permit for an operation shall be the owner of the recycling process.

(B) **Permit application approval.** Prior to any operations, applicants must have approval for their permit. Approval may be granted by Commission order or in the form of a letter from the Pollution Abatement Department after review of the permit application. Orders and permits for operations shall be issued for terms of not more than five years.

(C) **Administrative review.** Applications shall contain required information and any additional information requested for review by the Pollution Abatement Department. The Pollution Abatement Department shall not administratively approve a permit unless the Department has determined that the application is administratively complete. If the Pollution Abatement Department determines that an application is incomplete, the Manager of the Department shall notify the applicant in writing and shall describe the specific information required to complete the application.

(2) **Required information.** Applicants are required to submit information to the Pollution Abatement Department which shall include, but not be limited, to the following:

- (A) Applicant's name.
- (B) Physical office address and, if different, mailing address.
- (C) Legal description of the proposed area of operation.
- (D) Name, telephone number and email address of contact person.
- (E) A drawing of a proposed site, which shall include, but not be limited to, mixing areas, location of any pits, staging areas and storm water retention structures.
- (F) A brief description of the recycling process, which shall also include the following:
 - (i) Description of the types of deleterious substances that will be recycled.
 - (ii) Estimated maximum potential daily volume capable of being recycled.
 - (iii) Description of any chemicals and/or processes where harmful byproducts could potentially be yielded.
 - (iv) Description of any material to be used as aggregates in the recycling process, and the source of aggregates.
- (G) A brief description of the planned end use of a recyclable product, which shall also include the following:
 - (i) Description of the end use of the product.
 - (ii) Plan for any chemical and engineering testing protocol to insure a quality recycled product.
 - (iii) Description of any chemicals and/or processes used in the recycling process where harmful byproducts could potentially be yielded.
- (H) A plan which shall address the method(s) by which excess water will be disposed.
- (I) A plan for closure of a site which shall address the following:
 - (i) Removal and/or disposal of aggregate, waste, partially treated waste and/or unused recycled product.
 - (ii) Closure and removal of all storage areas, cells, pits, tanks, equipment and other debris used in the recycling process.
- (J) The Pollution Abatement Department may require the applicant for a permit or order to provide the Commission with engineering, geological, environmental or other information which the Department deems necessary to show that the approval of the permit application or order and resulting commercial recycling operations will not result in the waste of oil, gas, or water resources, the pollution of surface or subsurface water, or a threat to the public health or safety.

(3) **Site limitations.**

- (A) No operations shall be conducted or used unless an investigation of the soils, topography, geology, and hydrology conclusively shows that storage of deleterious substances and the recycling of such substances at the site will not be harmful to groundwater, surface water, soils, plants, or animals in the surrounding area.

(B) No operations can be conducted on or in an abandoned mine, strip pit, quarry, canyon, or streambed.

(C) No operations can be conducted on any site that is located within a 100-year flood plain.

(D) No operations shall be conducted within a wellhead protection area (WPA) as identified by the Wellhead Protection Program (42 USC Section 300h-7, Safe Drinking Water Act), or within one mile of a public water well for which the WPA has not been delineated.

(4) Surety requirements.

(A) **Agreement with Commission.** An operator shall file with the Surety Department for the Conservation Division an agreement to properly close and reclaim the site in accordance with approved closure and reclamation procedures upon termination of recycling operations due to abandonment, shutdown, full pits, or other reason. The agreement shall be on forms available from the Conservation Division and shall be accompanied by surety. The agreement shall provide that if the Commission finds that the operator has failed or refused to close a site or take remedial action as required by law and the rules of the Commission, the surety shall pay to the Commission the full amount of the operator's obligation up to the limit of the surety.

(B) **Surety amount and type.** The Commission shall establish the amount of surety in the permit approval letter or order for the site. The amount of surety shall be based on factors such as dimensions of the site and costs of closure, reclamation, monitoring, plugging of monitor wells, any pit closure, volume of deleterious substances stored on site, final disposal of deleterious substances, remediation, earth work, revegetation, etc. The amount may be subject to change for good cause. Upon approved closure of a site, the Manager of the Pollution Abatement Department may administratively reduce the surety requirement to an amount which would cover the cost of monitoring the site and plugging the monitor wells. Surety shall be maintained for as long as monitoring is required. The type of surety shall be a cashier's check, corporate surety bond, certificate of deposit, or irrevocable letter of credit. Any type of surety that expires shall be renewed prior to 90 days before the expiration date.

(C) **Posting surety before construction permit is issued.** An operator shall post surety with the Commission on forms provided by the Surety Department before a construction permit (Form 1014CR) is issued, pursuant to (d)(5) of this subsection.

(5) Construction requirements.

(A) **Permit required.** Prior to construction of any site, the operator shall obtain a construction permit from the Pollution Abatement Department. Application shall be made on Form 1014CR.

(B) **Runoff water prohibited.** No runoff water from surrounding land surfaces shall be allowed to enter the site during operations.

(6) Operation and maintenance requirements.

(A) **Fencing.** All operations shall be completely enclosed by a fence at least four feet in height. No livestock shall be allowed inside the fence while operations are occurring.

(B) **Sign.** A waterproof sign bearing the name of the operator, legal description, most current permit or order number, and emergency phone number shall be posted within 25 feet of the entrance gate while any aspect of operations are being conducted and the sign shall be readily visible.

(C) **Site security.** Only acceptable materials shall be received by an operation. All sites shall be secured by a locked gate when an attendant is not on duty. A key or combination to the lock shall be provided to the Pollution Abatement Department for the purpose of carrying out inspections.

(D) **Fluid level.** Deleterious substances shall not be accepted into any pit unless the appropriate freeboard can be maintained.

(E) **Oil film.**

(i) No pit utilized in operations shall contain an oil film covering more than one percent of the surface area of the pit.

(ii) The protection of migratory birds shall be the responsibility of the operator. Therefore, the Conservation Division recommends that to prevent the loss of birds, oil films be removed, or the surface area of any pit be protected from access to birds. [See Advisory Notice in OAC 165:10-7-3(c)].

(F) **Aesthetics.** All operation sites shall be maintained so that there is no junk iron or cable, oil or chemical drums, paint cans, domestic trash, or debris on the premises.

(G) **Structural integrity.** All pits, storage areas, and tanks utilized during operations shall be used, operated, and maintained at all times so as to prevent the escape of their contents. All erosion, cracking, sloughing, settling, animal burrows, or other condition that threatens the structural stability of any earth fill shall be repaired immediately upon discovery.

(7) **Record keeping requirements.** The date, volume, source (generator, well name, API number, and legal description), and type of material shall be entered into a log book. The log book and supporting documentation shall be available for inspection by a representative of the Conservation Division of the Commission at all times. Log books and supporting documentation shall be kept for a minimum of three years after treatment is completed.

(8) **Prevention of pollution.** All sites shall be used, operated, and maintained at all times so as to prevent pollution. In the event of a nonpermitted discharge at or from a site, the site can be shut down until completion of cleanup operations. Sufficient measures shall be taken to stop or control the loss of materials, and reporting procedures in 165:10-7-5(c) shall be followed.

(9) **Semiannual report.** The operator of any site shall submit a report on Form 1014A to the Pollution Abatement Department by February 1 and August 1 of each year.

(10) **Closure requirements.** The Manager of the Pollution Abatement Department shall be notified in writing whenever a site becomes inactive, is abandoned, or operations cease for any reason. A site may be considered to be inactive if:

(A) The operation has been shut down by the Commission because of a violation.

(B) The operator is unable to furnish documentation to show that there has been receipt of deleterious substances to be recycled at any site during the previous twelve months.

(C) The authority to operate the site has been terminated by failure to comply with (d)(12) of this Section.

(11) **Additional requirements.** The requirements set forth in this subsection are minimum requirements. Additional requirements may be made upon a showing of good cause that an operator has a history of complaints for failure to comply with Commission rules and regulations, the site has certain limitations, or other conditions of risk exist.

(12) **Application to existing operations.** Operators of facilities permitted or ordered prior to the effective date of this Section must either comply with (a), (d)(4), (d)(6), (d)(9), (d)(10), (d)(11), and (d)(14), of this Section or close such facilities within one (1) year of the effective date of this Section. All sites permitted, but yet to be constructed as of the effective date of this Section, shall also be subject to all of the construction requirements in (d)(5) of this subsection.

(13) **Variances.** Except as otherwise provided in this subsection, variances from provisions of this subsection may be granted for good cause by order after application, notice, and hearing.

(14) **Compliance history.** In the event the Commission has evidence that an applicant for operations may not possess a satisfactory compliance history with Commission rules, the Director of the Conservation Division may seek an order of the Commission, issued after application, notice, and hearing to vacate the authority to operate.

SUBCHAPTER 10. BROWNFIELD PROGRAM

165:10-10-1. Purpose, authority and applicability

(a) **Purpose.** The purpose of the Brownfield program is to provide for the safe reuse of Brownfield properties and provide a mechanism for landowners to resolve or manage their environmental liability to the government.

(b) **Authority.** The Brownfield Program implemented under Okla. Stat. Tit. 27A §§1-3-101(E)(1)(j), 1-3-101 (E)(2) and 1-3-101 (E)(5); Okla. Stat. Tit. 17 §§52(A)(1)(j), 52(A)(2) and 52(A)(5) and Okla. Stat. Tit. 52 §§139(B)(1)(j), 139(B)(2) and 139(B)(5), as authorized and funded by the federal Environmental Protection Agency (EPA).

(c) **Applicability.** Any person who qualifies under OAC 165:10-10-2 and 165:10-10-4 may participate in the Brownfield program and receive a Certificate of Completion or a Certificate of No Action Necessary upon successful completion of the Brownfield process.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-10-2. Brownfield defined

(a) A "Brownfield" is a real property (site) where expansion, redevelopment, normal use or reuse may be complicated by the presence or potential presence of a

deleterious substance, pollutant, or contaminant. This includes land that is contaminated by petroleum, petroleum products, and related wastes, including crude, condensate, gasoline and diesel fuel, produced water/brine, glycol and/or drilling mud. A proposed Brownfield site is a defined area; it does not need to be the entire property or lease.

(b) Sites excluded from program participation are:

- (1) Sites controlled by responsible parties (RPs);
- (2) Sites listed on the National Priorities List (NPL) maintained by EPA;
- (3) Sites subject to order or consent decree under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), commonly known as Superfund;
- (4) Sites permitted under certain federal programs including the Resource Conservation and Recovery Act (RCRA), CERCLA, the Toxic Substances Control Act (TSCA), or the Safe Drinking Water Act (SDWA);
- (5) Lands where closure of the remediation process has been approved by or where a closure plan concerning remediation has already been submitted to the Commission;
- (6) Sites owned or under the control of the federal government;
- (7) Portions of sites with PCB (polychlorinated biphenyls) pollution subject to remediation under TSCA;
- (8) Portions of facilities with an approved or ongoing federal Leaking Underground Storage Tank (LUST) Fund remediation; however the Oklahoma LUST fund and the Oklahoma Petroleum Storage Tank (PST) Indemnity fund are potentially available for assessing and cleaning up newly listed PST Brownfield sites in Oklahoma.

(c) Responsible party (RP) and other ineligible parties defined. A person, corporation, company, non-profit organization, or any other entity that:

- (1) Caused the pollution at the proposed Brownfield site or knew about the pollution and allowed it to occur; or
- (2) Contributed to already existing pollution at the site; or
- (3) Hindered or otherwise knowingly attempted to obstruct efforts to perform environmental assessments of or to remediate pollution caused by an RP at the site; or
- (4) Is not in compliance with a final agency order or any final order or judgment of a court of record secured by any state or federal agency for any of the responsible party's actions at the site which could have led to a leak, spill, and/or other cause of the pollution in violation of agency rules, or
- (5) Has demonstrated a pattern of uncorrected noncompliance with state or federal environmental laws or rules; or
- (6) Has past operations at the site and/or at other sites that indicate a reckless disregard for the protection of human health and safety or the environment.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-10-3. Administration and enforcement of rules

(a) The Manager of Pollution Abatement and the Brownfield program staff shall supervise and coordinate the administration and enforcement of the rules of this Subchapter under the direction of the Director of Oil and Gas Conservation and the Commission.

(b) The primary goal of the implementation of Brownfield site assessments and remediation projects shall be the protection and/or restoration of the beneficial use

of the land, the soil and any surface or subsurface waters of the State adversely impacted or impaired by pollution from a Commission regulated Brownfield site.

(c) Site assessments and remediation projects conducted under the supervision and coordination of the Manager of Pollution Abatement and/or Pollution Abatement/UIC/Brownfield staff shall adhere to the general practices appearing in the Oil and Gas Conservation Division's Guardian Guidance document for petroleum and produced water site assessment and remediation oversight, enforcement, approval and verification including the Guidelines and Numerical Criteria for New or Historic Produced Water/Brine Spills.

(d) Applicant may request in writing, and the Manager of Pollution Abatement may grant, an administrative exception to a Commission Brownfield rule if applicant can demonstrate that:

- (1) Requirements in pertinent state laws and federal Brownfield rules and laws are still met, and
- (2) The exception will protect human health, safety and the environment and the beneficial use of the land at least as well as strict adherence to the Commission Brownfield rule.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-10-4. Determination of Brownfield eligibility

(a) **Applicant eligibility.** An applicant may be any non-responsible party (non-RP) including:

- (1) The legal owner in fee simple, the tenant or lessee of the property, or a person who has a written firm option to purchase or operate the property at the time the application is filed and who has the ability to implement a redevelopment proposal, if needed, once site assessment and/or remediation is complete;
- (2) Any person who acquired the ownership, operation, management, or control of the site through foreclosure or under the terms of a bona fide security interest in a mortgage or lien on, or an extension of credit for the property, or foreclosed on the property, or received an assignment or deed instead of foreclosure or some other indicia of ownership and thereby becomes the owner of the property;
- (3) An agency, non-profit organization or other entity who chooses to clean up or otherwise rehabilitate a property for the owner or tenant in order for it to be returned to productive use or become green space;
- (4) The Oklahoma Energy Resources Board (OERB), regarding sites in its surface restoration program which meet the definition of a Brownfield property appearing in OAC 165:10-10-2. There is no requirement that OERB sites be designated as Brownfield sites, or
- (5) A non-RP who wishes to restore property for a potential or known RP. If an entity that is not the RP wants to apply to the Brownfield program and is accepted and completes the process, such a site would be granted limited liability protection.

(b) **Eligibility of site.** The following conditions must be met and information provided to be considered for eligibility as a Brownfield site:

- (1) Any facility or real property where normal use, reuse, expansion or redevelopment is hindered by pollution or suspected pollution of a substance or substances caused by releases from activities regulated by the Commission may qualify as a Brownfield site.

(2) The applicant will need to provide an Applicant Eligibility form with the following information included on the form:

- (A) A physical address for the land or property;
- (B) A legal description of the land or property;
- (C) Driving directions from nearest major intersection.

(3) A site survey by a surveyor, or a site plan containing global positioning system (GPS) coordinates made under the supervision of a qualified environmental professional defining the area to be addressed must be submitted for each Brownfield site once it is accepted into the program.

(c) **Determination of eligibility.** The Commission's Brownfield staff will determine the initial eligibility for any allegedly contaminated portion of a Brownfield project. Brownfield staff will determine to the extent possible:

- (1) If any funds have already been spent on the site, and the source of any such funds;
- (2) If there are any viable responsible parties. Commission records will be checked by Commission staff for all Brownfield sites; and
- (3) Whether the current or immediate past owner and/or operator of the site caused or made the pollution worse and whether such parties took reasonable corrective steps with regard to any pollution.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16; Amended at 36 Ok Reg 534, eff 8-1-19]

165:10-10-5. The Commission's Brownfield program process

(a) **Pre-application informational exchange.** The applicant may want to consider a pre-application conference by telephone, e-mail, mail, or in person with Brownfield staff. During the pre-application conference the applicant will be advised about what information is necessary in order for Brownfield staff to determine whether the applicant and the applicant's site are eligible for the Brownfield program.

(b) **Brownfield eligibility determination.** All applicants and properties must meet federal and state Brownfield eligibility requirements. Commission standards and practices in effect at the time the application is filed will also be considered in determining whether eligibility requirements have been satisfied.

(c) **Brownfield program application.**

(1) Applicants for the Brownfield program, except for sites submitted by Commission field inspectors, will be required to submit an Application for Brownfield Program Eligibility form, an Application for Brownfield Site Eligibility and Assessment form and any required documentation to show they are eligible.

(2) The OERB Voluntary Environmental Program has sole discretion in determining whether it is to apply to the Commission's Brownfield program regarding abandoned exploration and production (E & P) sites which have been submitted to the OERB for consideration under its program which is limited to surface restoration. The site must meet the definition of a Brownfield property in OAC 165:10-10-2.

(3) When a non-RP wants to apply to remediate a property under the Brownfield program, the applicant must certify by affidavit that it owns the property or has a current lease or easement which is given to accomplish the remediation, or if it does not, has provided legal notice to the property owner of applicant's desire to remediate the site.

(4) Applicant must notify the Brownfield staff in writing of any litigation the Applicant has knowledge of concerning the site which has concluded or is pending, and any information concerning outstanding judgments, liens, tax levies, etc. filed of record at the time the application is filed or which is filed after applicant submits its application to the Commission and prior to final Commission action regarding the site.

(5) Completed applications must be sent to the following address:
Oklahoma Corporation Commission, Oil and Gas Conservation Division,
Brownfield Program, P.O. Box 52000, Oklahoma City, OK 73152-2000.

(d) **Notification of application status.** Subsequent to acceptance of an application, Brownfield staff will issue a letter to the applicant adding the site to the Brownfield site list (requirements for this list are in 165:10-10-7). If an application is denied by Brownfield staff, staff will promptly provide applicant with a written statement of the reasons for such denial.

(e) **Site assessments and/or remediation.** Refer to 165:10-10-9.

(f) **Public participation.** Refer to 165:10-10-10 through 165:10-10-11.

(g) **Brownfield site closure.** Refer to 165:10-10-12 and 165:10-10-14.

(h) **Brownfield Certificates.** Refer to 165:10-10-13.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-10-6. Eligibility of site [REVOKED]

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Revoked at 33 Ok Reg 593, eff 8-25-16]

165:10-10-7. The Commission's Brownfield site list

(a) The Commission is required by federal statutes to maintain a current list of every site which has qualified as a Brownfield site, including those sites on which work has been completed. The list shall be made available to the public upon request.

(b) Each site on the Brownfield sites list will include:

- (1) Site name;
- (2) Address or legal description of the site;
- (3) Town, city, and county of the site.

(c) Brownfield staff will be responsible for maintaining and updating the list of sites that have qualified for the Commission's Brownfield Program.

(d) Brownfield staff will also be responsible for maintaining and updating a separate public record that shall include only those sites that are enrolled in and/or completed the Commission's Brownfield Program. This public record shall be made available to the public on the Commission's website. Each site on this public record will include:

- (1) Site name;
- (2) Address or legal description of the site;
- (3) Town, city, and county of the site;
- (4) Site level of progress;
- (5) Allowable use of revitalized land.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16; Amended at 36 Ok Reg 534, eff 8-1-19]

165:10-10-8. Processing of Brownfields application [REVOKED]

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Revoked at 33 Ok Reg 593, eff 8-25-16]

165:10-10-9. Assessment and remediation of site

(a) **Qualifications.** All Brownfield assessment and remediation projects will be overseen by a qualified environmental professional, defined by EPA as someone who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases of deleterious substances on, at, in, or to a property, sufficient to meet the objectives and performance factors of the EPA's All Appropriate Inquiries rule (40 CFR Part 312) and ASTM E1527-05.

Qualified environmental professionals must have one of the following:

- (1) A state or tribal issued certification or license (including Professional Engineer, Professional Geologist, and PST Division of the Corporation Commission licensed Remediation Consultant) and three years of relevant full-time work experience; or
- (2) A Baccalaureate or higher degree in science or engineering, including geologists as defined in 25 O.S. § 35 and engineers as defined in 59 O.S. § 475.1 et seq., and five years of relevant full-time work experience; or
- (3) Ten years of relevant full-time work experience.
- (4) Individuals who do not meet the above requirements must work under the supervision or responsible charge of an individual who meets the requirements for an environmental professional.

(b) Assessments.

- (1) The appropriate Commission staff may conduct initial site inspections to evaluate and recommend those sites that qualify for the Brownfield program; Brownfield staff will approve inspections and assessments and list each approved site in the database.
- (2) Qualified environmental professionals will perform an assessment (Phase I and/or Phase II) of each property.
- (3) Governmental entities, quasi-governmental entities, and non-profit organizations may be eligible for a Targeted Brownfield Assessment (TBA) conducted by either the Commission or EPA.
- (4) OERB's qualified staff or contractor may perform assessments on abandoned exploration and production (E&P) sites.
- (5) Assessments of former retail petroleum storage tank sites will be overseen by and coordinated with the Commission's PST Division staff.
- (6) EPA's All Appropriate Inquiry (AAI) Rule appearing in 40 CFR Part 312 shall be complied with as per the Commission's guidance.
- (7) If during an initial investigation or Phase I or Phase II assessment pollution is discovered and immediately removed from the site, as confirmed with sample analytical results, the site may qualify for No Further Action (NFA) status.

(c) **Phase I.** Basic site and assessment information is necessary for exploration, production, and/or pipeline sites known or suspected to be contaminated by substances defined in OAC 165:10-10-2(a), and for PST sites. Initial site assessment information includes, but is not limited to:

- (1) Analyses from one or more soil and water background samples;
- (2) A certified survey or the results of a GPS survey defining the area of pollution,
- (3) The present and proposed uses of the site;
- (4) The operational history of the site and current use of areas contiguous to the site; and

(5) Detailed historical and records reviews as per AAI, which may be waived by Brownfield staff until after the basic physical environmental/pollution assessment is completed and Commission staff concludes its review of sample data pertaining to the site.

(6) A Category Index Table must be submitted for all oil and gas and pipeline sites likely or definitely polluted above action levels. The Category Index Table appears in the Commission's Guardian Guidance document, which is available on the Commission's website or by request.

(7) Sites that are determined by the Brownfield staff to need no remediation following an acceptable Phase I assessment can be issued no action necessary certification once the Brownfield staff receives appropriate documentation.

(d) **Phase II.** Phase II sites are those sites where the Phase I assessment demonstrates the need for additional assessment, action level determination, and (often) remediation guidance.

(1) Phase II oil and gas sites and pipeline (crude and refined product and produced water) sites will be overseen by the Oil and Gas Conservation Division's Brownfield staff;

(2) Phase II retail petroleum storage tank sites will be referred to the Commission's PST Division and will adhere to the Oklahoma Risk-Based Corrective Action guidelines for assessment and remediation;

(3) Necessary information generally includes but is not limited to concentrations of pollutants in the soils, surface water or groundwater at the site; the vertical and horizontal extent of pollution in the soils, surface water or groundwater at the site; a determination that risk based criteria to protect human health and the environment at and around the site are or are not being met; and recommendations on how to meet risk based criteria, including remediation as needed;

(4) Sites that are determined by the Brownfield staff to need no remediation following appropriate environmental and risk assessment can be issued no action necessary certificates once the Brownfield staff receives appropriate documentation.

(e) **Status of site when no action is necessary.**

(1) A no action necessary determination is appropriate for a site if at the conclusion of the initial inspection, TBA, Phase I or Phase II investigation, or subsequent to the immediate removal of pollution from a site, the Brownfield staff or other appropriate Commission staff finds or concurs that the site poses no significant risk to human health or safety or the environment according to the proposed use of the site.

(2) Brownfield staff will issue a no action necessary certificate when the site is restored for beneficial use and other required program elements, if any, are completed.

(f) **When pollution is likely present or is present above action levels.** If pollution is likely present or is present above action levels at a site, further assessment and remediation will adhere to one of the following regimens:

(1) The Oil and Gas Conservation Division's Guardian Guidance document and rules for petroleum and produced water site assessment and remediation oversight, enforcement, approval and verification; or

(2) The PST Division's guidance document and rules for site assessment and cleanup oversight, enforcement, approvals and verification; or

(3) For E&P sites where there is no RP, the OERB Voluntary Environmental Program may, in its sole discretion, submit to the Commission's Brownfield program those abandoned E & P sites which have qualified for the OERB's program, which is limited to surface restoration in order that such sites may be assessed and remediated by OERB in accordance with the Commission's Brownfield rules; and

(4) The Commission's Brownfield staff will act as the regulator for the Brownfield program and ensure that applicable Brownfield laws and rules are followed.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-10-10. Notice

(a) **Public notice.** Public notice is necessary for remediation sites (Phase II sites requiring remediation or cleanup). The applicant must provide public notice that its proposal regarding the site is ready for public review. The notice must be published one time in newspapers of general circulation published in Oklahoma County, Oklahoma, and in a newspaper of general circulation published in each county where the lands that are the subject of the application are located. The applicant shall also submit the notice to the Brownfield staff for posting on the Commission's website. The notice must contain the:

- (1) Name and address of the location where the application and related documentation, including any proposed remediation plan, may be reviewed, in addition to the days of the week and hours during which such information may be reviewed;
- (2) Applicant's name, mailing address, telephone number, email address and contact person, as well as the Commission's mailing address and a telephone number and email address of a contact person at the Commission;
- (3) Name, address and legal description of the Brownfield site;
- (4) Purpose of the notice;
- (5) Description of the proposed cleanup, monitored natural attenuation, institutional control, and/or other remedial action being sought;
- (6) Other pertinent information required by Brownfield staff and rules;
- (7) Other information the applicant may deem relevant; and
- (8) Time period of at least thirty (30) days after the notice is published for the submission of written public comments and written requests for a public meeting regarding the site, in addition to the mailing address and e-mail address to which public comments and requests for public meetings can be sent, the name of a contact person and any facsimile numbers, if available. The notice must also provide that any written public comments and requests for a public meeting are to be sent to the Oklahoma Corporation Commission, Oil and Gas Conservation Division, Brownfield Program, P.O. Box 52000, Oklahoma City, Oklahoma, 73152-2000.

(b) **Public meeting.**

- (1) If the Commission receives a timely written request for a public meeting, if the Commission determines there is a significant degree of public interest in the site remediation proposal and the action being sought, or if the applicant chooses to have a public meeting, then the applicant must publish notice of the date, time and address of a public meeting at least thirty (30) days prior to the meeting in the manner described in paragraph (a), above, and include in the notice the information appearing in

paragraphs (a)(1) through (a) (8), above.

(2) The notice must provide for a time period of at least thirty (30) days after the notice is published for the submission of written public comments, and that verbal comments may be made at the meeting. The mailing address and e-mail address to which public comments can be sent, the name of a contact person and any facsimile numbers, if available, must also be included in the notice. The notice must also provide that any written public comments are to be sent to the Oklahoma Corporation Commission, Oil and Gas Conservation Division, Brownfield Program, P.O. Box 52000, Oklahoma City, Oklahoma, 73152-2000.

(3) The public meeting will be held in a convenient location near the proposed Brownfield site.

(c) **Publisher's affidavits.** The applicant is required to provide to the Brownfield staff the publisher's affidavits regarding the public notice for comments and/or a public meeting within twenty (20) days after the date(s) of publication;

(d) **When public notice is not required.** Applicant is not required to publish a notice regarding those sites Brownfield staff or other appropriate Commission staff find or concurs need no further action after staff's review of applicant's site assessment information or which are remediated for the applicant by a responsible party.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-10-11. Public meetings and public comments

(a) The format for each public meeting will be established by the Commission's Brownfield staff or its Public Information Staff, and the Commission's Brownfield staff or its Public Information Staff will moderate each public meeting;

(b) The moderator may set reasonable time limits for speakers, and the moderator may extend the time for public comment at the conclusion of the public meeting;

(c) Anyone may provide public comments or submit a written statement and data regarding the remediation proposal at any public meeting;

(d) The applicant or its representative must be available at each public meeting in order to answer questions;

(e) If the Commission receives no request for a public meeting, and the Commission deems no public meeting necessary, and no public comments are received, then the Commission will proceed with the applicable determination; and

(f) If the Commission receives public comments, the appropriate Brownfield staff will prepare a written response to such comments within sixty (60) days after the close of the comment period.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-10-12. Closures of Brownfield sites

(a) **Final surface remediation confirmation.**

(1) A qualified environmental professional for the applicant and/or the Brownfield, other Oil & Gas, or PST staff of the Commission, or the OERB, if such entity is involved with the site, will perform a closure survey, which may include but is not limited to visual observations and sampling the soil, surface water and/or groundwater at the site to confirm the project is completed and the property is ready for its proposed use; and

(2) The results of the closure survey, including any soil, surface water and/or groundwater sample results, must be submitted to appropriate Commission and Brownfield staff, and the appropriate regulatory program

will confirm if cleanup standards have been met.

(b) Final documentation.

(1) The applicant is required to submit all necessary documentation regarding the site to Brownfield staff.

(2) The Brownfield staff will review, as required by applicable laws and rules, the work performed on the site as reflected in the documentation filed by Applicant.

(3) The applicant shall submit to Brownfield staff recorded copies of documents confirming that any deed restrictions or other institutional controls have been filed with the appropriate authorities.

(c) Request for closure. The applicant shall request closure of the site after all reviews have been completed by applicable Commission staff members and the site is found by Commission staff to be in compliance with all the Brownfield and regulatory laws and rules.

(d) Records of sites. The Brownfield staff will maintain a public record of each site that has qualified for the Brownfield program for a period of three (3) years. After the three (3) year period has expired the records will be archived.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-10-13. Commission Brownfield certificates issued

(a) A "No Action Necessary" Certificate shall be issued to applicant by the Commission when the Commission has made such determination.

(b) A "Certificate of Completion" will be issued by the Commission for remediated sites after the closure survey of the site and review of the project has been approved by the Commission.

(c) The Certificates will state whether or not any continuing care of structural institutional controls, or any long term monitoring of the site, is to occur after issuance of any Certificate.

(d) All Brownfield Certificates issued by the Commission must be filed by the applicant in the office of the county clerk in the county where the Brownfield site is located. The Applicant is required to provide a copy of the Certificate reflecting that it has been recorded with the county clerk's office both to the landowner of the subject site and to the Brownfield staff within thirty (30) days after the Certificate has been filed.

(e) Applicant's submission of any false or materially misleading information to the Commission in conjunction with its application shall render voidable any of the Certificates discussed above.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-10-14. Responsible party closures (for remedial actions)

An RP that is legally responsible for the remediation of the pollution at a site is not eligible for the Commission's Brownfield Program, but can request that a standard case closed letter be issued by the appropriate Commission Department reflecting that the necessary work at the site has been completed and that the case has been closed by such Department.

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 593, eff 8-25-16]

SUBCHAPTER 11. PLUGGING AND ABANDONMENT

165:10-11-1. License for pulling pipe and plugging wells

(a) No person shall contract to pull casing or plug oil, gas, injection, disposal, or other service wells, or contract to salvage casing therefrom, or purchase wells for the purpose of salvaging casing therefrom until a license has been secured from the Commission.

(1) The application for such license shall state:

(A) The name of the applicant.

(B) The names and addresses of all partners, chief officers, and directors.

(C) The experience of applicant.

(D) Evidence of financial responsibility of the applicant.

(E) The counties in which the applicant will operate.

(2) Notice that an application has been filed shall be published by the applicant in a newspaper of general circulation in Oklahoma County and in the county where the applicant's principal place of business is located. The applicant shall file proof of publication prior to the hearing or administrative approval. The notice shall include:

(A) The name of the applicant.

(B) Generally what operations the applicant intends to conduct for which applicant is financially responsible.

(C) The counties in which applicant will operate.

(3) If a written objection to the application is filed within 15 days after the application is published or if a hearing is required by the Commission, the application shall be set for hearing and notice thereof shall be given as the Commission shall direct. If no objection is filed and the Commission does not require a hearing, the matter shall be presented administratively to the Manager of Field Operations who shall file a report and make recommendations to the Commission.

(b) The license shall not be transferable and may at any time be revoked by the Commission upon complaint, notice, and hearing.

(c) Any person violating this Section may be fined up to \$2,500.00. Any operation in violation of this Section shall be shut down pending compliance with this Section.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Amended at 14 Ok Reg 2198, eff 7-1-97]

165:10-11-2. Operating requirements for licensees

(a) This Section shall apply to each licensee under 165:10-11-1.

(b) If a licensee prepares the Notice of Intent to Plug (Form 1001 and/or the Plugging Report (Form 1003), then the licensee shall:

(1) Include the following on any submitted form:

(A) The name and address of the well operator if the licensee is serving as a contractor for the operator of the well.

(B) The name and address of the person or entity hiring the licensee if the licensee is serving as the contractor for any person who is not an operator of the well.

(C) That he is acting independently if the licensee either purchased the well for salvage or contracted with the landowner to plug the well in exchange for casing and/or other well equipment.

(2) Mail a copy of Form 1001 to the last known operator of the well to be plugged, as shown by the records of the Conservation Division.

(c) For purposes of this subsection, the term "plugged well" shall refer to a well for which the Conservation Division has a plugging record. A licensee shall comply

with the requirements of 165:10-1-10 and 165:10-3-1 before entering a plugged well if:

- (1) The licensee is not hired by the operator of the well to conduct the re-entry operation.
 - (2) The owner of the well is either the licensee or the surface owner of the tract on which the well was drilled.
 - (3) The Commission has not contracted with the licensee to replug the well.
- (d) A licensee shall be responsible for the plugging of a well if:
- (1) The licensee is the owner of the well or the licensee is the operator of the well.
 - (2) The licensee enters a well without having contracted with the operator or with a party other than the operator who has authority to authorize the licensee to enter the well on behalf of such party.
- (e) Any violation of this Section will subject licensee to a fine, to suspension or revocation of licensee's license issued pursuant to 165:10-11-1, and to proceedings as authorized by statute in the district court.

[Source: Amended at 14 Ok Reg 2198, eff 7-1-97]

165:10-11-3. Duty to plug and abandon

(a) **Scope.** This Section applies to:

- (1) Liability of the well owners and operator or other responsible person(s) to plug a well.
- (2) Time periods for plugging wells:
 - (A) Without casing.
 - (B) With only surface casing and cement.
 - (C) With production casing.
- (3) Wells exempted from plugging.
- (4) Notice of Temporary Exemption from Plugging granting permission to postpone plugging of a well.

(b) **Liability of owners and operators or other responsible persons(s).** Any working interest owner and operator of any oil, gas, disposal, injection, or other service well or any seismic, core, or other exploratory hole, whether cased or uncased, shall be jointly and severally liable and responsible for the plugging thereof in accordance with this Subchapter unless other responsible person(s) become liable for such plugging. "Other responsible person(s)" means person(s) exercising dominion and control over any oil, gas, disposal, injection, or other service well or any seismic, core, or other exploratory hole, whether cased or uncased, without the authority or permission of the working interest owners or operator thereof. In such instances the other responsible person(s) shall be jointly and severally liable with the owners and operator for the plugging of the well. The owner of the surface estate shall not be considered an "other responsible person" solely as a result of:

- (1) the reversion of the ownership of an abandoned wellbore and associated equipment to the surface owner, as a matter of law, unless the surface owner engages in activities that potentially compromise the integrity of the wellbore; or
- (2) the removal of abandoned surface equipment, trash and debris from the surface estate, or remediation activities regarding the surface estate.

(c) **Time period for plugging well without casing.** Each well in which neither production casing nor surface casing has been run shall be properly plugged within 72 hours after drilling or testing is completed. However, should the lack of

production and surface casing create a fire hazard or a risk of contaminating the environment or formations containing oil, gas, or known treatable water, said well shall be properly plugged within 24 hours after drilling and testing is completed. The well marker requirement described in 165:10-3-4 (e) shall be followed.

(d) **Time period for plugging well with only surface casing and cement.** Each well in which only surface casing has been run and cemented in conformance with 165:10-3-4 shall be properly plugged within 90 days after drilling or testing is completed unless the lack of production or intermediate casing creates a fire hazard or risk of contaminating the environment or formations containing oil, gas, or known treatable water, in which case or cases the well shall be plugged within 24 hours.

(e) **Time period for plugging well with production casing.** Unless exempted under provisions contained elsewhere in this Section, any well which has production casing in place shall be plugged within one year after the latter of:

- (1) Cessation of drilling if the well was not completed or tested; or
- (2) Cessation of the latter of completion or testing if the well has not produced; or
- (3) Cessation of production.

(f) **Operators failing to commence timely plugging operations.** An operator who fails to commence plugging operations as required in (c), (d), and (e) of this Section after due notice from the District Office or the appropriate field inspector may be fined up to \$1,000.00.

(g) **Wells exempted from plugging.** The following wells which have production casing in place shall be exempt from (e) of this Section:

- (1) Shut-in gas wells, for the purpose of this Section, shall be considered producing wells in operation.
- (2) Any well for which a written order of the Commission granting a specific exception to plugging is in full force and effect.
- (3) Supply wells or wells authorized by order of the Commission for injection or disposal purposes and are in compliance with the rules of the Commission.
- (4) Any well for which a temporary exemption from the plugging rules has been approved.
- (5) Any oil or gas well which is exempt from plugging pursuant to 17 O.S. § 53.

165:10-11-4. Notification and witnessing of plugging

(a) **Wells without production casing.** The appropriate Conservation Division District Office shall be notified at least 12 hours prior to commencement of plugging operations and a plugging procedure agreed upon for any well without production casing. Each plugging operation may be witnessed by an authorized representative of the Conservation Division.

(b) **Wells with production casing.** A separate Notification of Intention to Plug (Form 1001) for each well with production casing shall be filed with the appropriate Conservation Division District Office at least five days prior to the commencement of plugging operations. The five day notice requirement may be reduced or waived:

- (1) If a qualified representative of the Conservation Division is available to witness the plugging operation.
- (2) At the discretion of the District Manager of the District in which the well is located or his supervisor.

(c) Expiration.

(1) **Ninety-day period.** The Notification of Intention to Plug (Form 1001) shall expire ninety days after it is filed with the appropriate Conservation Division District Office, unless plugging operations are commenced and thereafter continued with due diligence to completion.

(2) **Thirty-day extension.** A thirty day extension of the Notification of Intention to Plug may be granted providing the Conservation Division staff determines that no material change of condition has occurred, if written request for the extension is received prior to the expiration date of the original Notification of Intention to Plug. Only one extension may be granted.

(d) **Penalty.** An operator or licensed plugger plugging a well without notifying and agreeing on a plugging procedure with the District Office may be fined up to \$1,000.00 and may be required by the appropriate District Manager to reenter and replug the well.

165:10-11-5. Supervision and witnessing [REVOKED]

[Source: Amended at 9 Ok Reg 2295, eff 6-25-92; Revoked at 14 Ok Reg 2198, eff 7-1-97]

165:10-11-6. Plugging and plugging back procedures

(a) **Scope.** This Section establishes minimum standards for plugging and plugging back wells. The standards apply to:

- (1) Wells drilled for the production of oil or gas.
- (2) Wells drilled or used for disposal or enhanced recovery injection.
- (3) Wells used in subsurface gas storage units.
- (4) Monitoring wells in enhanced recovery projects or subsurface gas storage units.
- (5) Wells plugged back for:
 - (A) Oil or gas production.
 - (B) Disposal or injection.
 - (C) Conversion to a water well.
- (6) "Rat hole" or "mouse holes" used in rotary drilling of wells.
- (7) Wells used for geophysical or geological exploration.
- (8) Wells used for other service operations.

(b) Alternate plugging materials and procedures.

(1) The Manager of Field Operations, or other designated Conservation Division staff member, may approve the use of an alternate material other than cement or in combination with cement for wells listed in subsection (a), provided alternate plugging materials shall not be used to plug or plug back wells listed in subsection (a)(2), wells drilled or used for disposal or enhanced recovery injection, subsection (a)(3), wells used in subsurface gas storage units, subsection (a)(5)(B), wells plugged back for disposal or injection, and underground injection wells authorized under the Oklahoma Brine Development Act, 17 O.S. Section 500 *et seq.*

(2) The Director of Oil and Gas Conservation, in consultation with the Conservation Division's Field Operations staff and the public, shall develop specific plugging criteria for any type of alternate plugging material authorized for use instead of cement or in combination with cement. The plugging criteria for approved alternate material shall be available to the public for review and copying at the Conservation Division's offices and on the Commission's Internet website.

(3) A District Manager may approve alternate plugging procedures for the use of alternate plugging materials.

(4) A detailed description of the alternate plugging operation shall be included with the Plugging Report (Form 1003).

(5) The District Manager shall note his approval of the alternate plugging procedure on the well's Plugging Report (Form 1003).

(6) Any alternate plugging material or procedure shall conform to the minimum plugging standards relating to formations or depths set forth in the Sections below. Provided, based upon the type of alternate plugging material being utilized, the District Manager approving the alternate procedure may authorize variances to the plugging standards delineated in this Section otherwise applicable to the use of cement, where such variances are necessary to ensure an effective well plugging.

(c) Application and cross references:

(1) Subsection (o) of this Section provides for administrative approval of alternative plugging procedures if downhole problems in a wellbore prevent an operator from complying with the minimum standards established by this Section.

(2) Subsection (p) of this Section applies to plugging of "rat holes" and "mouse holes" used at the surface during rotary drilling.

(3) OAC 165:10-11-8 establishes additional procedures for identification and control of wellbores in which certain logging tools have been abandoned.

(4) OAC 165:10-7-31 establishes the minimum standards for plugging wellbores used in seismic exploration.

(5) Subsections (d) through (q) of this Section establish plugging and plug back standards for all other wellbores subject to this Section.

(d) Formations to be plugged.

(1) Except as provided in (2) of this subsection, for cased formations, if the operator plugs or plugs back a well, the operator shall plug any formation or formations in communication with a formation that:

(A) Bears H₂S;

(B) Bears oil or gas;

(C) Bears treatable water;

(D) Was used in the wellbore for injection as part of a saltwater disposal well or enhanced recovery injection well; or

(E) Is open in the wellbore below either the shoe of the casing or the base of the liner to be left in the well after plugging.

(2) Paragraph (1) of this subsection shall not apply to any formation behind the pipe left in the hole, unless a formation endangers a treatable water formation or any oil and gas bearing formation.

(e) Mud requirements. Before or after running a plug, the operator shall remove or displace all oil and saltwater in the wellbore, and the operator shall fill the wellbore and/or casing with drilling (plug) mud. The minimum mud weight shall be

nine pounds per gallon. The minimum viscosity for the drilling mud shall be 36 (API Full Funnel Method). If the operator removes casing from the wellbore, the operator shall keep the wellbore filled with drilling mud meeting or exceeding the weight and viscosity requirements of this subsection.

(f) Cement requirements.

(1) **Quality of cement.** All cement and/or alternative materials used in plugging wells shall meet or exceed the following specifications:

(A) Minimum compressive strength: 500 psi;

(B) Maximum Young's modulus: $< 1.2 \times 10^6$ psi;

(C) Permeability: < 0.1 mD; and

(D) Minimum concentration of Portland cement: approximately 20%.

(2) **Required information.**

(A) The plugger shall provide quality control data sheets regarding the cement to the appropriate Conservation Division District Office, which data shall include, but not be limited to, the most recent laboratory test results for the cement. Laboratory test results for the cement must be no more than 12 months old.

(B) If requested by a representative of the Conservation Division, a sample of the cement shall be split and an adequate portion (approximately one gallon) shall be properly labeled and delivered or otherwise provided to the appropriate Conservation Division District Office or Field Inspector.

(g) Approved cementing methods.

(1) **Cement plugs.**

(A) To plug or plug back a well, either the tubing and pump method or the pump and plug method shall be used and a continuous flow of cement shall be pumped for each stage.

(B) Surface pumping and shut in pressures shall be of sufficient pressure to:

(i) Squeeze off perforations in the casing.

(ii) Prevent the plug from floating upward in the wellbore.

(2) **Bridge plugs.** The operator may run by the bailer method cement required in the casing above a bridge plug as provided by (g) of this Section.

(h) Use of bridge plugs.

(1) **Permitted use.** Except as provided in (2) of this subsection for top plugs, a bridge plug may be used to permanently plug off a formation if:

(A) The only openings from the formation into the wellbore are perforations in the casing.

(B) The annulus between the casing and the formation is filled with cement from a depth 50 feet below the base of the formation to a depth 50 feet above the top of the formation.

(C) The bridge plug is set above the top of the perforations in the cemented interval described in (B) of this paragraph.

(D) Sufficient cement is placed on top of the bridge plug to fill the casing from the top of the bridge plug to a depth ten feet above the top of the bridge plug.

(2) **Prohibited use for top plug.** A bridge plug may not be used for a top plug described in (k) of this Section.

(i) **Cement plug for uncased hole below the casing or liner.** If any production casing or liner is to be left in the wellbore, then any uncased hole below the casing or liner shall:

(1) Be filled with cement:

(A) **From** a depth which is the lesser of total depth of the well or 50 feet below the lower of shoe of the casing or base of the liner.

(B) **To** a depth of 50 feet above the lower of the casing shoe or the base of the liner; or

(2) Have a cast iron bridge plug set above the top of the liner with cement.

(j) **Intermediate cement plugs.** If a bridge plug and cement are not used, a cement plug shall be run over any other formation required to be plugged off by this Section. To plug off a formation, the wellbore shall be filled with cement from a depth at least 50 feet below the base of the formation to a depth at least 50 feet above the top of the formation.

(k) **Cement top plug.**

(1) **No treatable water exists.** If no treatable water exists, the wellbore shall be filled with cement from a depth of at least 30 feet to a depth of three feet from the surface.

(2) **Treatable water exists.** Except as provided in (q) of this Section for converting a well to a water well, the wellbore shall be filled with cement as follows:

(A) If there is no surface casing or the base of the surface casing is 25 feet or further above the base of the treatable water, the wellbore shall be filled with cement from a depth of at least 50 feet below the base of the treatable water to a depth the lesser of:

(i) Fifty feet above the base of treatable water; or

(ii) Three feet below surface.

(B) If the surface casing is set at or below the base of the treatable water, when requested in the plugging plan by the District Manager, the production casing shall be cut off a minimum of 50 feet below the base of the surface casing, the production casing must be removed from the wellbore and the wellbore shall be filled with cement from a depth of at least 50 feet below the base of the surface casing to a depth the lesser of:

(i) Fifty feet above the base of the surface casing; or

(ii) Three feet below surface.

(C) If the cement plug prescribed by (2) of this subsection is not sufficient to bring the level of cement to within three feet from the surface, then the wellbore shall be filled with cement from a depth of at least 30 feet to a depth of three feet from the surface.

(l) **Cutting off surface pipe and identification of the abandoned wellbore.**

(1) This subsection applies to a wellbore plugged for abandonment. It does not apply to a wellbore plugged back for conversion to a water well under (q) of this Section.

(2) After setting the top plugs in a well, the operator shall cut off the casing left in the wellbore three feet below surface, and the operator shall cap the casing in the wellbore with a steel plate.

(3) The operator shall inscribe or embed the well number and date of plugging on the steel plate.

(m) **Tagging the top of the plug.** The Field Inspector for the Conservation Division may require the operator to determine the depth of the top of a plug by

running a wireline or tubing string.

(n) **Fall back of cement.** If the cement for a plug falls back during setting below the top depth required by this Section, the operator shall run additional cement until the plug meets the minimum requirements of this Section.

(o) **Alternative plugging procedure for down-hole problems.**

(1) In plugging a well, if the operator encounters a downhole problem which prevents the operator from complying with the standards of this Section, the District Manager may prescribe an alternative plugging procedure provided that the alternative plugging procedure prevents the vertical migration in the wellbore of oil, gas, saltwater, H₂S, and other deleterious substances into a formation bearing oil, gas, or treatable water.

(2) The District Manager shall note his approval of the alternative plugging procedure on the well's Plugging Report (Form 1003).

(p) **Plugging of rat holes and mouse holes.** If a rat hole or mouse hole was used at the surface for drilling the well, it shall be plugged within 90 days after drilling operations are complete as follows:

(1) The hole shall be filled with drilling mud from bottom to a depth eight feet below the surface.

(2) The operator shall fill the hole with cement from a depth of eight feet to a depth of three feet below the surface.

(3) The operator shall fill the hole with dirt from a depth of three feet to surface.

(q) **Plug back for conversion to a water well.** The District Manager may permit a well operator to plug back a well for permanent use as a water well by:

(1) Setting any bottom hole and intermediate plugs required by this Section.

(2) Setting a top cement plug from the base of treatable water to 50 feet below the base of treatable water.

(3) Obtaining written permission from the owner of the ground water rights for conversion of the well to a water well.

(4) Submitting under 165:10-11-7, a Plugging Report (Form 1003) noting the conversion of the well with a copy of the written permission from the owner of the ground water rights for conversion of the well to a water well.

(5) A determination must be made by the Oklahoma Water Resources Board as to whether the well is to be permitted as a water well.

[Source: Amended at 13 Ok Reg 2395, eff 7-1-96; Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 15 Ok Reg 2989, eff 7-15-98; Amended at 16 Ok Reg 842, eff 1-5-99 (emergency); Amended at 16 Ok Reg 2190, eff 7-1-99; Amended at 19 Ok Reg 1947, eff 7-1-02; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 28 Ok Reg 1949, eff 7-11-11; Amended at 34 Ok Reg 921, eff 9-11-17; Amended at 35 Ok Reg 973, eff 9-14-18; Amended at 36 Ok Reg 534, eff 8-1-19]

165:10-11-7. Plugging record

(a) Within 30 days after plugging a well, the owner or operator of the well shall submit for the well to the appropriate Conservation Division District Office:

(1) Plugging Record (Form 1003).

(2) Form 1003 shall be completed and signed by employees of both the operator and the cementer.

(3) If a Completion Report (Form 1002A) has not been submitted for the well, Form 1002A shall be attached to the Form 1003.

(b) Any operator failing to comply with this Section may be fined up to \$500.00.

[Source: Amended at 9 Ok Reg 2295, eff 6-25-95; Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-11-8. Procedures for identification and control of wellbores in which radioactive sources have been abandoned

(a) Notice and permission to abandon.

(1) When a radioactive source has been lost and abandoned in a well bore, the operator shall immediately notify the appropriate District Office and request permission to plug or plug-back and/or bypass to conform to the conditions set out in this Section. The District Manager or his designee may exercise the option of witnessing the procedure.

(2) A radioactive source shall not be considered abandoned until all reasonable efforts have been expended to retrieve the source.

(b) Method of plugging.

(1) Wells in which radioactive sources have been abandoned shall be mechanically equipped and plugged in such a manner so as to prevent either accidental or intentional mechanical disintegration of the radioactive source.

(2) When a radioactive source has been lost in a well bore and cannot be recovered, the tool shall be covered with a 100 foot plug consisting of standard oil field cement with an approved deflection tool cemented in place at the top of the plug. An additional 100 foot plug colored by red iron oxide shall be run on top of the deflection tool.

(c) Approval for alternate plugging method. When an operator, after expending all reasonable efforts, finds that it is not possible to abandon the source as prescribed in (d) of this Section, an alternate plugging procedure must be approved by the Commission prior to use.

(d) Markers for wells in which a radioactive source has been abandoned. Upon abandonment of a well in which a radioactive source has been abandoned, and the abandonment procedure has been approved by the Commission, the operator shall cause a permanent plaque to be attached to casing remaining in the well within thirty (30) days of such abandonment. The plaque shall be attached in such a manner that reentry could not be accomplished without disturbing it. The plaque shall be constructed of a long lasting material and shall contain the following information:

(1) Well name and well number.

(2) Name of operator.

(3) The source material abandoned.

(4) Total depth of the well.

(5) The latitude and longitude and the true vertical depth of the location of the abandoned radioactive source in the well bore. For purposes of this Section, true vertical depth is measured at the surface location of the well bore in which the radioactive source has been abandoned.

(6) The date of abandonment.

(7) The activity of the source.

(8) Trefoil radiation symbol with a radioactive warning.

(e) Completion reports and plugging records of wells with lost radioactive sources. When a radioactive source has been lost and abandoned in a well bore, both the Form 1002A Completion Report and Form 1003 Plugging Record submitted by the well operator to the Commission pursuant to OAC 165:10-3-25 and OAC 165:10-11-7, respectively, shall contain all of the information required in (d) of this Section. The well operator shall also forward copies of the Form 1002A Completion Report and Form 1003 Plugging Record to the Radiation Management

Section of the Oklahoma Department of Environmental Quality.

(f) **Record of abandoned radioactive sources.** The Commission will maintain a current listing of all wells in which radioactive sources have been abandoned.

[Source: Amended at 9 Ok Reg 2337, eff 6-25-92; Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 28 Ok Reg 1949, eff 7-11-11]

165:10-11-9. Temporary exemption from plugging requirements

(a) **Scope.** The Commission may permit any well which is required to be properly abandoned pursuant to OAC 165:10-11-3, at the request of an operator, to be temporarily abandoned.

(b) **Application.** An application for a permit to temporarily exempt a well from the plugging requirement shall be made on Form 1003A completed in its entirety, and submitted to the address indicated on the Form 1003A.

(c) **Permit.**

(1) Any operator seeking approval for temporary abandonment shall submit a notice of intent to temporarily abandon the well, Form 1003A, to the address indicated on the Form 1003A describing the temporary abandonment procedure used.

(2) The permit will be valid for a period of five (5) years if the well passes a pressure test. The permit will be valid for a period of one (1) year if the well passes a fluid level test. At least 30 days prior to the expiration of any approved temporary abandonment permit, the operator shall return the well to beneficial use in accordance with Commission rules, permanently plug and abandon said well, or apply for a new permit to temporarily abandon the well.

(3) No temporary abandonment will be approved that does not prevent the contamination of treatable water and/or other natural resources and the leakage of any substance at the surface.

(4) If the well fails the tests required herein the problem shall be found, corrected and a new test successfully conducted within 30 days or the well shall be plugged and abandoned in accordance with Commission rules.

(5) Upon successful completion of the work on the well, the operator will submit a new request for temporary abandonment to the address indicated on the Form 1003A.

(d) **Protection of treatable water.** The treatable water shall be protected by one or more of the following:

(1) A drillable, retrievable or temporary bridging plug set above the producing interval and below the top of the cement. The surface shall be capped with a valve in operational condition. A pressure test will be required by the appropriate District Office.

(2) A packer run on tubing and set above the producing interval and below the top of the cement. The well shall be equipped with suitable wellhead packoff equipment and be closed to the atmosphere. A pressure test will be required by the appropriate Conservation Division District Office.

(3) A fluid level test determined by use of equipment approved by the Conservation Division's Field Operations Department. The fluid level must be no higher than 150 feet below the base of the treatable water. The Field Inspector shall be notified at least 48 hours beforehand to be afforded the opportunity of witnessing the procedure. Additional tests may be required at any time at the request of the Conservation Division's Field Operations Department. The wellhead shall be closed to the atmosphere.

- (4) A casing inspection log confirming the mechanical integrity of the production casing submitted to the appropriate Conservation Division's District Office.
- (5) Alternate methods of testing may be approved by the Conservation Division's Field Operations Department by written application and upon showing that such a test will provide information sufficient to determine that the well does not pose a threat to natural resources.
- (e) **Surface facilities.** The well site of a well with temporary exemption from the plugging requirements shall be kept in a neat and orderly manner, including lease roads, with a legible sign showing the name of the operator, operator telephone number, well name, number, and the legal location.
- (f) **Termination of permit.** The permit for a temporary exemption from plugging shall terminate and plugging operations shall commence within 30 days after:
- (1) The time interval set has lapsed and a renewal has not been granted.
 - (2) The lease or unit on which the exempted well was located has become nonproductive.
 - (3) The fluid level has risen to a point less than 150 feet below the base of the treatable water.
 - (4) The Conservation Division's Field Operations Department has determined that the surface area or wellhead equipment requirement does not meet the standards required by the Commission.
- (g) **Exception to termination of permit.** An exception to the termination of an exemption from the plugging requirements shall be allowed if:
- (1) An application to convert the well to a disposal, injection, or supply well has been filed with the Commission, and proper notice, according to OAC 165:5, has been met.
 - (2) An application requesting an exception to the plugging rules has been filed with the Commission and an exception has been granted by an order of the Commission.

[Source: Added at 9 Ok Reg 2337, eff 6-25-92; Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 26 Ok Reg 2498, eff 7-11-09; Amended at 37 Ok Reg 1121, eff 1-1-20]

SUBCHAPTER 12. PROCEDURES FOR THE SEEPING NATURAL GAS PROGRAM

165:10-12-1. Purpose

The purpose of this Subchapter is to provide the Oklahoma Corporation Commission ("Commission") rules to govern responses to occurrences concerning the Seeping Natural Gas Program. All procedural rules necessary to initiate, regulate and administer the Seeping Natural Gas Program are contained in this Subchapter.

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07]

165:10-12-2. Coordination of Seeping Natural Gas Program

The Commission shall coordinate response efforts when notified of an occurrence of seeping natural gas. The Commission shall enlist private industry, state, county, municipal, and local government official entities as needed. These entities will aid the Commission with investigating, identifying and abating the hazard. If the Commission has determined that the applicable utility may be responsible for the problem, even though the utility initially advised the Commission it was not, the Commission can require the utility to run further tests

to re-evaluate the occurrence as to the utility's lines and equipment. These rules do not supersede OAC 165:45-11-11 (a)(9).

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07]

165:10-12-3. Jurisdiction and scope

Pursuant to 52 O.S. Section 317.1, the Commission is directed to promulgate and enforce rules, and issue and enforce orders relating to seeping natural gas. The rules of this Subchapter shall be known as the Commission Procedures for the Seeping Natural Gas Program, and shall be cited as OAC 165:10-12-1 *et seq.*

- (1) The rules of this Subchapter shall govern all proceedings concerning the Seeping Natural Gas Program.
- (2) The Commission retains the authority to grant an exception, for good cause shown, to any rule contained herein unless otherwise precluded by law.
- (3) The rules of this Subchapter establish procedures for the investigation of seeping natural gas and the administration of the Seeping Natural Gas Fund for the purpose of providing funding to eligible property owners for the mitigation of seeping natural gas on their property, in those cases in which the Commission is unable to abate the hazard of a seeping natural gas occurrence by issuing an order to a responsible person or by plugging a well.

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-12-4. Administration of the fund

- (a) The Commission will appoint the Director of Administration of the Commission as the Seeping Natural Gas Fund Administrator.
- (b) The Administrator is expressly authorized to bring actions before the Commission to enforce provisions of this Subchapter.
- (c) The Administrator shall act under the supervision of the Commission, to administer the Seeping Natural Gas Fund in accordance with the rules and procedures approved by the Commission and consistent with this Subchapter. The Administrator is authorized to enforce, implement, and administer applicable rules and orders of the Commission.
- (d) The Administrator's general duties shall include but not be limited to:
 - (1) Providing disbursements from the Fund;
 - (2) Managing the daily operations and affairs of the Fund;
 - (3) Engaging annual audits of the expenditures of the Fund and of the distribution from the Fund to property owners who receive payment from the Fund;
 - (4) Resolving disputes related to issues addressed in this Subchapter;
 - (5) Reviewing all applications for assistance from property owners;
 - (6) Performing any other duties as directed by the Commission.

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07]

165:10-12-5. Definitions

The following words or terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Hazardous gas concentration" means a concentration that presents or causes a risk of accident or fire.

"Natural gas" means a highly compressible, highly expansible mixture of hydrocarbons having a low specific gravity and occurring naturally in gaseous form. Besides hydrocarbon gases, natural gas may contain appreciable quantities of nitrogen, helium, carbon dioxide, hydrogen sulfide, and water vapor.

"Person" means any individual, business association or corporation, partnership, governmental or political subdivision, public corporation, body politic and corporate public authority, trust or any other legal entity.

"Responsible party" means any person or persons responsible for a facility which is found to be causing a seeping natural gas occurrence.

"Seeping natural gas" means natural gas which has migrated into, under or around a structure at hazardous concentrations.

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07]

165:10-12-6. Notice requirements for seeping natural gas occurrences

(a) Upon identification of a possible occurrence of seeping natural gas, a utility shall notify the Pipeline Safety Department of the Commission. If the Pipeline Safety Department determines that the seeping gas occurrence is not caused by a pipeline under its jurisdiction, Pipeline Safety will contact the Public Utility Division and the Oil and Gas Conservation Division.

(b) Upon a utility's initial determination that hazardous gas seepage is not from its system, the utility shall provide the property owner with a brochure explaining the situation and providing the impacted property owner with information about available assistance, including pertinent Commission telephone numbers. For assistance, the property owner or an authorized representative of the property owner shall contact the Commission.

(c) The appropriate District office of the Oil and Gas Conservation Division will contact the local Fire Marshall/Fire Chief and the utility to inform them that the Rapid Action Assessment Team has been activated.

(d) The Field Operations Department of the Oil and Gas Conservation Division will assess and evaluate the situation and act accordingly.

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-12-7. Commission Rapid Action Assessment Team

(a) The Oil and Gas Conservation Division shall form a Rapid Action Assessment Team to handle any seeping natural gas occurrence that occurs within the State after determining that it is not caused by a pipeline regulated by the Pipeline Safety Act or a utility.

(b) The Rapid Action Assessment Team will be equipped with qualified personnel and the proper and necessary equipment to handle investigations of seeping natural gas occurrences.

(c) Each Commission District Office will have access to designated trained personnel and equipment prepared for investigating a seeping natural gas occurrence.

(d) No person entering upon the land to investigate or abate the hazards pursuant to the authority of the Commission will be held responsible for future abatement work on the land or be liable for damages or otherwise for conditions subsequently arising or in connection with the land.

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07]

165:10-12-8. Standard procedure for the Rapid Action Assessment Team

As soon as the Oil and Gas Conservation Division is notified of an unknown gas surface seep in or around a structure that the utility has determined is not leaking from its lines, except in situations where the Oklahoma Emergency Management Plan is activated, appropriate Commission personnel will respond as follows:

- (1) The Field Inspector from the Oil and Gas Conservation Division will respond with gas detection equipment and notify the Field Supervisor and District Manager.
- (2) The District Manager will activate the local Rapid Action Assessment Team and notify local officials and the following Commission offices in Oklahoma City: Public Utility Division, Field Operations and Public Information.
- (3) The District Office will research well data, aerial photos and maps on file with the Oil and Gas Conservation Division.
- (4) The Oil and Gas Field Supervisor and Field Inspector will coordinate with any responsible party in the locality and will research any available maps and records.
- (5) If no known oil or gas wells are present, the Rapid Action Assessment Team will number and set soil gas monitoring probes at strategic locations in the area and initiate a gas monitoring program to measure the concentration and sample the composition of gas and log results at monitored locations.
- (6) If the source of gas can be identified and there is a responsible party, the Rapid Action Assessment Team will request a Commission order directing the responsible party to abate the hazard.
- (7) If no known responsible party is located, the Rapid Action Assessment Team will position the monitoring system to allow for measurement of concentration and dissipation of the gas.
- (8) Upon the completion of the mitigation process, the Commission shall notify the utilities in writing.
- (9) Upon notification by the Commission that the mitigation process has been completed, the utility shall verify that the hazard has been abated prior to establishing or resuming gas service.
- (10) If the utility believes it should not establish or resume service, it shall file an emergency application with the Commission to show cause why service should not be established or resumed. The Commission shall hear such application with or without notice. At the time of the hearing, the Commission shall receive exhibits and recommendations as required by OAC 165:5-9-3. The Commission shall rule on the request as it deems appropriate.

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-12-9. Assistance to owners of property

(a) An owner of property which has a seeping natural gas occurrence as defined by 165:10-12-5 shall file an application (Form 3000NGS) with the Commission for the investigation and/or abatement of seeping natural gas, to receive assistance with installing a system to divert seeping natural gas away from the structure or to otherwise abate the hazard.

(b) After the Oil and Gas Conservation Division and the Public Utility Division have completed their review of the property owner's application, they will forward it to the Director of Administration of the Commission, and the Director of Administration will consider the application for Commission action.

(c) The Commission shall determine the eligibility of the owner of a structure for assistance based on the nature and extent of the hazard, whether the owner is unable to inhabit the structure, the financial need of the owner of the structure and other relevant factors dependent upon the Oklahoma Legislature's current and future approval of and appropriation for the Natural Gas Seep Program.

(d) If the property owner's application is approved, the Commission may expend funds, pursuant to 17 O.S. Section 180.10, to engage the services of a contractor to install a system to divert natural gas away from a structure or to otherwise abate the hazard.

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-12-10. Reimbursement of expenditures

(a) The Commission may seek reimbursement of expenditures made by the Commission from a responsible party. Any monies received as reimbursement shall be deposited to the credit of the Commission Gas Seep Fund.

(b) The Rule shall not relieve any person or persons otherwise legally responsible from any obligation to properly abate hazards associated with seeping natural gas.

[Source: Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Added at 24 Ok Reg 1784, eff 7-1-07]

SUBCHAPTER 13. DETERMINATION OF ALLOWABLES - OIL AND GAS WELLS

165:10-13-1. Oil and gas production [RESERVED]

165:10-13-2. Classification of wells for allowable purposes

(a) For purposes of this Subchapter the terms gas, oil, and gas-oil ratio are defined in 165:10-1-2.

(b) Any well having a gas-oil ratio of 15,000 to one or more shall be classified as a gas well for allowable purposes.

(c) Any well having a gas-oil ratio of less than 15,000 to one shall be classified as an oil well for allowable purposes.

(d) If a well is a multiply completed well under 165:10-3-35, then each zone of the completion shall be classified separately for allowable purposes.

(e) If a well is commingled under 165:10-3-39, the classification of the well for allowable purposes shall be determined by the gas-oil ratio of the commingled production.

165:10-13-3. Production tests on new, re-entered, and recompleted wells

(a) On all new wells, re-entered wells, and recompleted wells classified as oil wells for allowable purposes, in any regular spacing unit(s) and reservoir dewatering oil spacing unit(s), initial production tests shall be performed and reported to the Commission on Form 1029A for discovery oil wells, Form 1002A for other oil wells, unless otherwise specified by order of the Commission. The test shall not commence until after recovery of a volume of oil equivalent to or greater than the amount of load oil or other liquids introduced into the well.

(b) On all new wells, re-entered wells, and recompleted wells classified as gas wells for allowable purposes, initial production tests shall be performed and reported to the Commission on Form 1016 unless otherwise specified by order of the Commission or by OAC 165:10-17-7(b)(1)..

(c) If special pool rules prescribe, by order of the Commission, the manner in which production tests are to be performed in any separate common source of supply, the production or gas-oil ratio test shall be performed and reported to the Commission in accordance with such special pool rules.

[Source: Amended at 19 Ok Reg 639, eff 1-14-02 (emergency); Amended at 19 Ok Reg 966, eff 7-1-02; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 26 Ok Reg 2498, eff 7-11-09]

165:10-13-4. Reservoir performance tests

The Commission may require, from time to time, the presentation of such data and facts as may be necessary to indicate reservoir performance and conditions in any oil or gas pool. The Commission may witness or supervise the taking of such reservoir performance tests and keep such records as it deems necessary to properly regulate the operation of any oil or gas pool. Any test requested by the Commission may be witnessed by any operator in the pool. When special pool rules require bottom hole pressure tests, the tests shall be reported to the Conservation Division on Form 1027.

165:10-13-5. Most efficient rate

Subject to the procedural requirements of 165:5-7-12, the Commission may issue an order increasing or decreasing the rate of oil and gas production in an oil pool to correspond to the most efficient rate of production which is consistent with sound engineering and conservation practices as may be justified by the circumstances and evidence submitted.

165:10-13-6. Load oil

Load oil used in well completions which is not produced from the same lease or spacing unit shall not be charged against the well, lease, or unit. The well shall be allowed to produce such load oil in addition to the current monthly allowable. Operators claiming credit for load oil for allowable purposes may file Oklahoma Tax Commission Form 317 not more than 6 months after treating the well.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99]

165:10-13-7. Production from different pools

(a) In the event there are two or more common sources of supply produced through a well or wells on the same lease or drilling and spacing unit and which are not commingled under 165:10-3-39, the production from each common source of supply shall be separately produced, measured, and/or accounted for to the Commission.

(b) If one or more of the zones produced are classified as oil for allowable purposes, the operator of the well shall submit to the Conservation Division a multi-zone report on Form 1011 showing the production from each oil-bearing common source of supply on or before the last day of the succeeding proration period.

165:10-13-8. Transfer of allowables

Subject to the procedural requirement of 165:5-7-12, the Commission may issue an order transferring, after proper adjustment, all or part of an allowable from a well with a high gas-oil ratio or high water-oil ratio to a well having a lower gas-oil ratio or water-oil ratio, if:

- (1) The wells produce from the same common source of supply.
- (2) The wells are located on the same lease or in the same drilling and spacing unit.

165:10-13-9. Allowable for increased density well

(a) **Allowable production.** Except as otherwise provided by rule or order of the Commission, the allowable production for permitted wells within a drilling and spacing unit producing from the same common source(s) of supply shall be determined as follows:

- (1) Each individual well shall be classified for allowable purposes by gas-oil ratio under 165:10-13-2.
- (2) Permitted wells of the same classification for allowable purposes shall share a single well allowable.
- (3) Permitted wells of different classifications for allowable purposes shall receive allowables as provided by the order of the Commission authorizing the additional well(s).

(b) **Shared single allowable.** If two or more wells in a single drilling and spacing unit are classified as gas wells for allowable purposes, the shared single allowable for the unit shall be determined by the greater of:

- (1) A minimum allowable; or
- (2) A normal allowable based on the wellhead absolute open flow potential of the best well in the drilling and spacing unit producing from the same common source of supply.

(c) **Additional well.** If an additional well is not of the same classification as any prior permitted well, it shall receive an allowable as provided by the order permitting the well.

(d) **Effect of penalties.** If the allowable for a well in a drilling and spacing unit is subject to a percentage penalty or lid on production, the penalty or lid on production shall apply to the ratable share of production of the shared single allowable for the penalized well as opposed to the entire shared single allowable for the unit.

- (1) The ratable share of production of the shared single allowable for an unallocated gas well is that volume of gas which bears the same ratio to the shared single allowable as the wellhead absolute open flow potential for the well bears to the sum of the wellhead absolute open flow potentials for all wells in the drilling and spacing unit of the same classification for allowable purposes.
- (2) The ratable share of production of the shared single allowable for a special allocated gas well is that volume of gas which bears the same ratio to the shared single allowable as the unpenalized monthly allowable the well would receive if it were the only well in the unit bears to the sum of such allowables for all the wells in the drilling and spacing unit of the same classification for allowable purposes.
- (3) No special allocated well shall receive an allowable less than the defined minimum unit allowable divided by the number of wells in the drilling and spacing unit of the same classification for allowable purposes.

(4) The ratable share of production of the shared single allowable for an oil well is that volume of oil which bears the same ratio to the shared single allowable as the potential for the well bears to the sum of the potentials for all wells in the drilling and spacing unit of the same classification for allowable purposes. If the oil well was assigned a separate allowable under (c) of this Section, the penalty shall apply to the allowable assigned to the well.

(5) The portion of the shared single allowable representing the reduction in the allowable for the penalized well is not allocable to other wells in the drilling and spacing unit.

(e) **Which operator shall file required tests.** If the operators of the wells in a drilling and spacing unit cannot agree as to which operator shall file the required tests and production reports for the unit or as to what proportion of a shared single allowable shall be attributable to each well of the same classification for allowable purposes, the Commission may, after application, notice, and hearing, issue an order determining which operator shall file the tests and reports or what the proportional share of the shared single allowable is attributable to each well or the maximum rate of allowable production for each well.

(f) **Wellhead absolute open flow potential.** For the purpose of this Section, the wellhead absolute open flow potential for a test exempt gas well shall be presumed to equal:

(1) The average daily production for the previous calendar year (or that portion of the previous calendar year if the first sales date was after January 1 of that year), or the minimum allowable that would otherwise be assigned to an unallocated gas well under applicable rules of the Commission as if such well were the only well in the unit, whichever is less, for an unallocated well; or

(2) The product of two multiplied by the monthly allowable for the well under 165:10-17-9 for a special allocated well.

(g) **Testing or reporting requirements.** This Section shall not exempt any well from any testing or reporting requirement imposed by rule or order of the Commission.

[Source: Amended at 9 Ok Reg 2337, eff 6-25-92; Amended at 16 Ok Reg 2206, eff 7-1-99]

165:10-13-10. Applications for reinstatement of cancelled underage for oil wells and for unallocated gas wells

(a) Oil well.

(1) With respect to an oil well, all underage for the proration period in excess of 15 percent of the allowable shall be automatically cancelled at the end of the proration period, except underage accrued under (4) of this subsection because of the failure to split a tank.

(2) A producer may apply to reinstate cancelled underage if the well is capable of producing in excess of its allowable. The procedure for applying for reinstatement of cancelled underage is described in (c) of this Section.

(3) Except in situations where the operator has failed to comply with applicable well testing and reporting requirements of the Commission, failure or refusal of the purchaser to take the allowable shall be grounds for reinstatement of any underage accumulated because of such failure or refusal. Underage of this nature may be accumulated until balanced by future runs.

(4) The operator shall not be required to sell less than a full stock tank of oil by the end of the proration period to avoid cancellation of underage. Instead, such underage may be accrued until the operator accumulates and sells a volume of oil from the tank amounting to a full tank, and the sale of oil representing such underage shall not be considered as overage.

(b) Unallocated gas well.

(1) With respect to any unallocated gas well, of the total underage for the well or unit existing at the end of the proration period, 75% shall be automatically cancelled and 25% shall be automatically carried forward to the next prorationing period.

(2) Said underage carried forward to the next balancing period must be utilized in said balancing period, with that amount of underage carried forward but not used, to be cancelled at the end of the prorationing period.

(c) Procedure for reinstatement of cancelled underage.

(1) The operator of an oil well may apply for reinstatement of cancelled underage by application for administrative approval on Form 1010 within 90 days after cancellation of the underage.

(2) If the Conservation Division declines to approve the Form 1010 application, the applicant shall be notified in writing that application, notice, and hearing under 165:5-7-1 are necessary to obtain reinstatement of cancelled underage.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99]

SUBCHAPTER 15. OIL WELL PRODUCTION AND ALLOWABLES

165:10-15-1. Classification of oil pools and projects

(a) Types of oil pools. Each producing oil pool shall be classified by the Commission into one of the following categories:

- (1) Discovery oil pool (165:10-15-5).
- (2) Allocated oil pool (165:10-15-9).
- (3) Unallocated oil pool (165:10-15-12).
- (4) Enhanced oil recovery project (165:10-15-14).
- (5) Excessive water exempt oil project (165:10-15-16).
- (6) Reservoir dewatering oil spacing unit (165:10-15-18).

(b) Treatment of an oil well located in a gas pool. An oil well located in a gas pool shall be treated as an unallocated oil well, unless the oil well is subject to one of the following:

- (1) Pool rules controlled by volumetric withdrawal.
- (2) Discovery oil pool rules.
- (3) Allocated oil pool rules.
- (4) Some other order of the Commission.

(c) Discovery oil pools.

(1) A new oil pool which has complied with the provision of 165:10-15-5 may be granted discovery allowable production rates, administratively, subject to either:

- (A) Spacing requirements.
- (B) Order of the Commission.

(2) Each permitted discovery oil well shall be subject to discovery oil pool rules until either:

- (A) Expiration of the discovery allowable period.
- (B) Reclassification of the well or pool.

(d) Allocated oil pool.

- (1) The Commission shall classify an oil pool as an allocated oil pool when:
 - (A) At any market demand hearing the total production from an oil pool or from any well within the pool needs to be regulated; or
 - (B) For good cause shown, upon application, notice, and hearing.
- (2) A gas well located in an allocated oil pool that is reclassified as an oil well for allowable purposes shall be subject to allocated oil pool rules.
- (3) Each allocated oil well shall be subject to the allocated oil pool rules until the Commission reclassifies the well or pool.

(e) Unallocated oil pools.

- (1) Classification of unallocated oil pool:
 - (A) Any pool or area which does not require specific regulation and control by the Commission to restrict production to the market demand, aid in the prevention of waste, assure the maximum ultimate recovery of oil and gas from the pool, or protect correlative rights shall be classified as an unallocated pool.
 - (B) The Commission shall determine which discovery and allocated pools will be placed in the unallocated classification at each market demand hearing.
- (2) Each unallocated oil well shall be subject to unallocated oil pool rules until the Commission reclassifies the well or pool.

(f) Enhanced oil recovery projects.

- (1) **Authorized pressure maintenance.** The Commission may, upon application, notice, and hearing, authorize the pressure maintenance of a pool or the production of oil by the injection of fluid, fluids, gas, gases, or other material into a common source of supply or a portion thereof, whether unitized or not, where substantial quantities of additional oil may be recovered which could not be recovered under ordinary primary depletion methods. When so authorized, the project will be classified as an Enhanced Oil Recovery Project with one of the following classifications:
 - (A) Pressure Maintenance Project
 - (B) Gas Repressuring Project
 - (C) Waterflood Project
 - (D) Other Enhanced Recovery Projects
- (2) **Status of a gas well reclassified as an oil well.** If a well classified as a gas well in an enhanced oil recovery project is reclassified as an oil well for allowable purposes, the well shall be subject to the appropriate enhanced oil recovery project rules.
- (3) **Termination of enhanced oil recovery status.** Each enhanced oil recovery well shall be subject to enhanced oil recovery project rules until one of the following occurs:
 - (A) Termination of the enhanced oil recovery project.
 - (B) The well is reclassified as a gas well for allowable purposes.
 - (C) The Commission issues an order reclassifying the well or project.
 - (D) The well is abandoned.

(g) Excessive water exempt oil projects.

- (1) **Oil production rates.** The Director of Conservation may administratively authorize the production of oil at rates greater than the normal allowable provided the water-oil ratio of the well and/or pool is greater than or equal to 3:1. All applications shall comply with 165:5-7-12.

(2) **Status of a gas well reclassified as an oil well.** If a well classified as a gas well in an excessive water exempt oil project is reclassified as an oil well for allowable purposes, the well shall be subject to excessive water exempt oil project rules.

(3) **Termination of excessive water exempt status.** Each excessive water exempt well shall be subject to excessive water exempt oil project rules until at least one of the following occurs:

(A) The water-oil ratio declines below 3:1.

(B) Termination of the excessive water exempt oil project.

(C) The well is reclassified as a gas well.

(D) The Commission issues an order reclassifying the well or project.

(h) **Allowable for reservoir dewatering oil spacing unit.**

(1) **Oil production rates.** To set an allowable for a well in a reservoir dewatering oil spacing unit, the operator shall refer to Appendix J and submit the appropriate forms and/or application as provided in OAC 165:10-15-18.

(2) **Reclassification of oil well as gas well.** If a well in a reservoir dewatering oil spacing unit is later subject to reclassification as a gas well for allowable purposes, such reclassification will be determined according to general classification procedures based on its gas/oil ratio pursuant to OAC 165:10-1-6(d) and (e) and 165:10-13-2. If the subject well is designated an excessive water exempt oil project pursuant to OAC 165:10-15-1(g) and 165:10-15-16, reclassification shall be determined by OAC 165:10-15-1(g)(2). If the subject well is assigned an allowable based upon its most efficient rate pursuant to OAC 165:10-13-5, such allowable shall remain in effect under the order establishing the production rate, so that the well will not be reclassified, until its status is modified or terminated by the terms of the instant or a subsequent Commission order.

(3) **Termination of reservoir dewatering oil spacing unit allowable.** The oil allowable assigned a reservoir dewatering oil spacing unit shall remain in effect until one of the following occurs:

(A) The subject well is reclassified as a gas well pursuant to OAC 165:10-1-6 and 165:10-13-2.

(B) The subject well's status as an excessive water exempt oil project is terminated pursuant to OAC 165:10-15-1(g)(3).

(C) The subject well's status under a most efficient rate order is modified or terminated by the terms of the instant or a subsequent Commission order.

[Source: Amended at 19 Ok Reg 639, eff 1-14-02 (emergency); Amended at 19 Ok Reg 966, eff 7-1-02]

165:10-15-2. Overage adjustments for oil wells

No well, lease, unit, or project shall be overproduced in excess of 15 percent of the allowable for the proration period. All overage accrued at the end of the proration period shall be deducted from the allowable for the second succeeding proration period.

165:10-15-3. Effect of percentage penalty on oil wells

If a percentage penalty has been assigned to an oil well, the penalty shall, depending on the status of the well, be subtracted from:

(1) **Discovery status.** The applicable allowable from the Discovery Allowable Table (Appendix B to this Chapter) or the capacity of the well to produce as reported, whichever is less.

(2) **If allocated or unallocated per-well status.** The applicable allowable from the Allocated Well Allowable Table (Appendix A to this Chapter) multiplied by the current market demand factor or the capacity of the well to produce as reported, whichever is less.

(3) **If unallocated per-lease status.** The shallowest ten acre or less allowable from the Allocated Well Allowable Table (Appendix A to this Chapter) multiplied by the current market demand factor for the penalized well only. The penalty shall be subtracted from the lease allowable.

[Source: Amended at 26 Ok Reg 2498, eff 7-11-09]

165:10-15-4. Discovery oil pools [RESERVED]

165:10-15-5. Discovery oil allowables

(a) **Number of barrels of oil per day and duration of the discovery allowable period.** The maximum number of barrels of oil per day and the duration of the discovery allowable period shall be determined from the Discovery Allowable Table (Appendix B to this Chapter) or the Allocated Well Allowable (Appendix A to this Chapter), whichever is greater, provided that the well is in compliance with the other provisions of this Section and other rules pertaining to allowables. If the well is not capable of producing at the discovery rate without causing preventable waste, the temporary discovery allowable shall be the capacity of the well to produce as reported, unless otherwise limited by the Commission.

(b) **Effective date of discovery allowable.**

(1) The discovery allowable period for the pool shall begin with the date of first completion of the discovery well of the pool and extend as provided in the Discovery Well Allowable Table (Appendix B to this Chapter).

(2) The discovery allowable period for each well in the pool shall run from the date specified under 165:10-15-7 for each well to the date of termination of the pool, if granted administratively.

(3) If application, notice, and hearing are required, the effective date of the discovery allowable period shall be specified by an order of the Commission, provided that such date shall not precede the date of filing of the application. The date of expiration of the discovery allowable shall still be determined as set forth in (1) of this subsection.

(c) **Gross allowable production.** The gross allowable production for any proration period from a well in a discovery pool may, at the option of the operator, be produced at any time during the proration period; however, in no event shall the production exceed the maximum efficient rate of flow.

[Source: Amended at 26 Ok Reg 2498, eff 7-11-09]

165:10-15-6. Production tests and reports for discovery oil pools

(a) **Initial test requirements.** The operator of each well in each discovery pool shall perform an initial potential test and furnish the Conservation Division the results of such test not later than 30 days after completion of each well. Each individual well shall be tested for not less than six hours and not more than 24 hours with the production calculated and reported at a daily rate (24 hours).

(b) **Witnessing of tests.**

(1) With respect to initial test, the operator shall give twenty-four (24) hour notice of the opportunity to witness said test to the Conservation Division and the offset operator(s) producing from the same pool, but no waiver or signature of Conservation Division personnel is required.

(2) Any operator in the pool may witness any official test for any well in the pool. However, any person other than a Commission employee witnesses a test at their sole risk and expense.

[Source: Amended at 9 Ok Reg 2337, eff 6-25-92; Amended at 16 Ok Reg 2206, eff 7-1-99; Amended at 26 Ok Reg 2498, eff 7-11-09]

165:10-15-7. Procedure for obtaining discovery allowable

(a) Any operator desiring a discovery allowable shall file Form 1028 with the material and information specified below:

(1) A resistivity and a porosity type wireline survey of the well in question, if run.

(2) A Completion Report (Form 1002A) and Cementing Report (Form 1002C), completed in detail.

(3) A Potential Test (Form 1029A), completed in detail.

(4) A plat of the area showing all of the following information for each well within one and one-half (1 1/2) miles of the subject well:

(A) Operator.

(B) Well name and number.

(C) Total depth.

(D) Current status of the well (dry, oil, gas, injection, disposal, temporarily abandoned).

(E) Name of interval open, if any.

(F) Perforations, top and bottom, if any.

(G) Average daily production.

(5) An isopach contour map of the productive interval and/or a structural contour map of a nearby marker bed or formation, not separated from the producing interval by an unconformity, which is commonly used in the area. The Conservation Division may require either or both types of maps to determine the discovery status. The commission may also require additional geological and/or engineering data, such as: stratigraphic cross-sections, structural cross-sections, production, and pressure information.

(b) The Conservation Division may administratively designate a discovery allowable for a well when the operator furnishes the Technical Department with the information specified in (a) of this Section. If the information is provided within 30 days of the date of first production and the application is approved, the effective date of the discovery allowable shall be the date of first production. If the information is provided more than 30 days after the date of first production and the application is approved, the discovery allowable shall be effective the date of filing.

(c) If a gas well in a discovery oil pool is reclassified as an oil well for allowable purposes, the operator must file the appropriate form, information and material specified in (a) of this Section within 30 days of reclassifying the well to obtain a discovery allowable. The allowable shall be effective the date the well was reclassified as an oil well as indicated on Form 1002A. If the application is not received within the specified time period, the application will be processed in accordance with (b) of this Section.

165:10-15-8. Allocated oil pools [RESERVED]

165:10-15-9. Allocated oil allowables.

(a) **Effective date of allowables.** The allowable for an allocated well completed or recompleted on or after the first day of the proration period shall become effective the date of completion of the well, provided the operator has complied with the provisions of this Section and other rules governing allowables. In situations where the operator fails to comply, the allowable shall become effective the date the operator complies with this Section and other rules governing allowables.

(b) **Allowables in allocated pools.** Allowables in allocated pools shall be granted on an individual well basis, subject to appropriate spacing requirements, unless otherwise specified by order of the Commission. The allowable for each allocated well shall be determined as if the well was an unallocated well operating under 165:10-15-12(b) or 165:10-15-12(c)(1), whichever is appropriate, unless adjusted by order of the Commission. The operator shall produce the allowable on each well from that well and no part thereof from any other well.

(c) **Application.** Upon application by the Director of Conservation or any interested party, and after notice and hearing, the Commission may order the wells in a common source of supply to be produced under allowables established by special pool rules in lieu of the provisions of this Section. All requirements as to production tests and allowables shall be set forth by the order of the Commission establishing such special pool rules.

165:10-15-10. Production tests and reports for allocated oil wells

All production tests and reports shall be filed as if the allocated well were an unallocated well operating on a per-well basis allowable under 165:10-15-13(a).

165:10-15-11. Unallocated oil pools [RESERVED]

165:10-15-12. Unallocated oil allowables

(a) **Effective date of allowable.** The allowable for a well completed or recompleted on or after the first day of a proration period shall become effective the date of completion of the well, provided the operator has complied with the provisions of this Section and other rules governing allowables. In situations where the operator fails to comply, the allowable shall become effective the date the operator complies with this Section and other rules governing allowables.

(b) **Well in an unallocated pool.** Each well in an unallocated pool in which drilling and spacing units have been established shall be assigned the applicable allowable on a per-well basis from the Allocated Well Allowable Table (Appendix A to this Chapter) multiplied by the current market demand factor unless adjusted by order of the Commission. The production from each well shall be separately accounted for to the Commission.

(c) **Lease in an unallocated pool.** Each individual lease in an unallocated pool in which drilling and spacing units have not been established shall be assigned allowables, at the option of the operator, on either of the following basis:

(1) **A per-well basis.** If the operator elects to accept the per-well basis allowable, each well on the lease shall be assigned an allowable applicable to a ten-acre or less allowable at the appropriate depth from the Allocated Well Allowable Table (Appendix A to this Chapter) multiplied by the current market demand factor unless adjusted by order of the Commission. The production from each well shall be separately accounted for to the Commission.

(2) **A per-lease basis.** If the operator elects to accept the per-lease basis allowable, the allowable for the lease shall be the shallowest ten-acre or less allowable from the Allocated Well Allowable Table (Appendix A to this Chapter) multiplied by the current market demand factor multiplied by the number of wells on the lease unless adjusted by order of the Commission. The production from each lease shall be separately measured and accounted for to the Commission.

165:10-15-13. Production tests and reports for unallocated oil wells

(a) Per-well basis allowable.

(1) If the well is an allocated well, or an unallocated well located on lands in which drilling and spacing units have not been established and the operator elected to accept allowables on a per-well basis, or an unallocated well located on lands in which drilling and spacing units have been established, the operator shall file a production test no later than 30 days after the earlier of:

- (A) Making the election,
- (B) Completion of the well, or
- (C) Recompletion of the well.

(2) Each new well shall be given an allowable equal to the allowable for an unallocated per-well basis well until the production test has been performed with the results reported to the Conservation Division. The allowable shall be effective for a period not longer than 30 days from completion of the well. A Form 1002A Completion Report may be used in lieu of a Form 1029A to establish an oil allowable if oil and gas production rates reported on Form 1002A establish the well's classification as an oil well. No further allowable shall be assigned to the well until compliance with this subsection.

(4) All initial tests shall be conducted in the manner set forth in (1) of this subsection.

(5) Annual testing shall not be required.

(b) Per-lease basis allowables.

(1) If the well is an unallocated well located on lands in which drilling and spacing units have not been established and the operator elects to accept allowables on a per-lease basis, the operator shall file a production test with the Conservation Division not later than 30 days after:

- (A) Making the election,
- (B) Completion of the initial well on the lease,
- (C) Completion of a subsequent well on the lease,
- (D) Recompletion of any well on the lease, or
- (E) Retesting of any well on the lease.

(2) Each lease shall be given an additional allowable equivalent to the shallowest ten-acre or less allowable from the Allocated Well Allowable Table (Appendix A to this Chapter) multiplied by the current market demand factor for each new producing well added to the lease until the production test has been performed with the results reported to the Conservation Division. The additional allowable shall be effective for a period not longer than 30 days from completion of the well. No further additional allowable shall be assigned to the lease until compliance with this subsection.

- (3) If an operator fails to submit the required test results for any lease with allowables calculated on a per-lease basis, no allowable shall be assigned to the lease. The operator may submit the results of the test to the Conservation Division to reinstate the allowable. A Form 1002A Completion Report may be used in lieu of a Form 1029A to establish an oil allowable if oil and gas production rates reported on Form 1002A establish the well's classification as an oil well. The allowable shall be effective the first day of the following month after the Conservation Division accepts the test.
- (4) No lease shall be granted underage resulting from failure to perform a required test in compliance with this Section.
- (5) All initial tests, annual tests and retests shall be conducted in the manner set forth in (1) of this subsection.

[Source: Amended at 9 Ok Reg 2337, eff 6-25-92; Amended at 16 Ok Reg 2206, eff 7-1-99; Amended at 26 Ok Reg 2498, eff 7-11-09]

165:10-15-14. Enhanced oil recovery project allowables

- (a) **Effective date of allowable.** The allowable for an enhanced oil recovery project shall be effective on the date operations commenced or the date specified by order of the Commission authorizing the project, whichever is later, provided the operator has complied with the provisions of this Section and other rules governing allowables. In situations where the operator fails to comply, the allowable shall become effective the date the operator complies with this Section and other rules governing allowables.
- (b) **Qualification for enhanced oil recovery allowable.** For any project to qualify for an enhanced oil recovery allowable, an order of the Commission authorizing the project must be obtained.
- (c) **Allowable for enhanced oil recovery project.** The allowable for an enhanced oil recovery project shall be on a project basis and shall be the capacity of the project to produce.
- (d) **Wells on a project producing from another reservoir.** Oil wells within the boundaries of a project which do not produce from the project shall not be permitted to produce any portion of the allowable of such enhanced oil recovery project. The oil produced by non-project wells shall be separately produced, measured, and reported.

165:10-15-15. Production tests and reports for enhanced oil recovery projects

- (a) Within 30 days of commencement of any enhanced oil recovery project, the operator shall file with the Conservation Division an inventory of all the wells located within the boundaries of the project completed in the approved common source of supply showing the name of the project and the new OTC Production Unit Number (including merge number) and the following for each well:
 - (1) Previous OTC Production Unit Number.
 - (2) API Number.
 - (3) Well Name and Number.
 - (4) Legal location, including quarter quarter quarter quarter section.
 - (5) Current status (producer, injector, observation, or temporarily abandoned).
- (b) The operator shall notify the Conservation Division in writing within 30 days of the completion of any new well or the change in status of any existing well in the project.

- (c) Until the operator submits the required test results for any enhanced oil recovery project as provided in subsection (a), no allowable shall be assigned to the project. If said test results are filed late, then the allowable shall be effective the first day of the following month after the Conservation Division accepts the tests.
- (d) All initial tests shall be conducted as set forth in subsection (a).
- (e) Annual testing shall not be required except as provided in OAC 165:10-1-6.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99]

165:10-15-16. Excessive water exempt oil project allowables

- (a) **Effective date of allowables.** The allowable for an excessive water exempt oil project shall be on a well or a project basis and shall be effective when the Conservation Division receives and accepts the production test of, Form 1013, unless otherwise specified by order of the Commission.
- (b) **Qualification for excessive water exempt oil project.** For any project or well to qualify for excessive water exempt allowable, an order of the Commission authorizing the well or project must be obtained.
- (c) **Allowable for excessive water exempt oil project.** The allowable for a well or Project which has received a special excessive water exempt allowable shall be the capacity of the well or project to Produce without causing preventable waste unless otherwise adjusted by the Director of Conservation. The production from a well which has received a special excessive water exempt allowable under this Section shall be separately produced, measured, and accounted for to the Commission from the oil produced from the remainder of the lease.

165:10-15-17. Production tests and reports for excessive water exempt oil projects

- (a) The operator of each individual well with an excessive water exempt allowable shall file an initial production test on Form 1013 with the Conservation Division. Each individual well shall be tested for seven consecutive days, and the amount of oil and the amount of water produced each day shall be reported on Form 1013. With respect to the initial test, the operator shall give twenty-four (24) hour notice of the opportunity to witness said test to the Conservation Division and the offset operator(s) producing from the same formation, but no waiver or signature of Conservation Division personnel is required on Form 1013.
- (b) Each individual well shall be given an initial allowable equal to the unallocated per-well basis allowable until the production test has been performed with the results reported to the Conservation Division on Form 1013. The allowable shall be effective for a period not longer than 30 days from completion of the well. No further allowable shall be assigned to the well until compliance with this subsection.
- (c) Until the operator submits the required test results for any excessive water exempt well or project, as provided in subsection (a), no allowable shall be assigned to the well or project. If said test results are filed late, the allowable shall be effective the first day of the following month after the Conservation Division accepts the test.
- (d) All initial tests shall be conducted as set forth in (a) of this Subsection.
- (e) Annual testing shall not be required except as provided in OAC 165:10-1-6.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99; Amended at 33 Ok Reg 593, eff 8-25-16]

165:10-15-18. Production tests and reports for reservoir dewatering oil spacing units

(a) **Effective date for oil allowable.** To establish the commencement date of an allowable for an oil well in a reservoir dewatering oil spacing unit, the operator shall file Forms 1002A and 1013, in lieu of the Form 1029A, with the Commission according to OAC 165:10-13-3 within thirty (30) days after the completion date of the well. The allowable will commence on the date of first production.

(b) **Qualification for reservoir dewatering unit.** Proof of fifty percent (50%) water saturation presented at the time of a hearing to establish dewatering oil spacing may entail calculations from logs or core data from wells within the common source of supply covered by the application or an analogous common source of supply, or an actual production test from a well in the common source of supply covered by the application. To qualify for the reservoir dewatering spacing unit allowable provided on Appendix J, the Form 1013 must provide data that verifies that the water-oil ratio is greater than 1:1. If the water-oil ratio is less than 1:1, then the oil allowable shall be the appropriate allowable for the depth of the top of the formation and the maximum acreage provided in Appendix A.

(c) **Allowable rate not provided for in Appendix J.** To establish an allowable other than that specified in Appendix J, the operator shall file a Form 1030 with the Commission to adjust the allowable.

(d) **Record of annual production rates.** The operator shall maintain production records on an annual basis. Operators shall make these records available to the Conservation Division staff upon the request of the Manager of the Technical Department. Annual testing shall not be required except as provided in OAC 165:10-1-6.

[Source: Added at 19 Ok Reg 639, eff 1-14-02 (emergency); Added at 19 Ok Reg 966, eff 7-1-02]

SUBCHAPTER 17. GAS WELL OPERATIONS AND PERMITTED PRODUCTION

165:10-17-1. Gas production from gas pools [RESERVED]

165:10-17-2. Classification of gas pools

(a) **Types of gas pools.** Each gas pool shall be classified by the Commission into one of the following categories:

- (1) Allocated Gas Pool.
- (2) Special Allocated Gas Pool.
- (3) Unallocated Gas Pool.

(b) **Treatment of gas well in an oil pool.** If a well in an oil pool is classified as a gas well for allowable purposes, the well shall be treated as if it were in an unallocated gas pool, unless the well is subject to pool rules which establish allowables by volumetric withdrawal.

(c) **Allocated gas wells.**

- (1) **Classification of pool by order.** Upon application, notice, and hearing, the Commission may issue an order establishing allowables for gas wells in a pool by the allocated gas pool rules in 165:10-17-8.
- (2) **Status of an oil well reclassified as a gas well.** If a well classified as an oil well in an allocated gas pool is reclassified as a gas well for allowable purposes, the well shall be subject to allocated gas pool rules.

(3) **Termination of allocated status.** Each allocated gas well shall be subject to allocated gas pool rules until:

- (A) The Commission establishes special allocated gas pool rules for the common source of supply.
- (B) The well is reclassified as an oil well for allowable purposes.
- (C) The Commission issues an order reclassifying the well as an unallocated gas well.
- (D) The well becomes the only gas well in the pool.
- (E) The well is abandoned.

(d) **Special allocated gas pools.** Each gas pool for which special pool allocation rules (field rules) are or have been established by the Commission shall be classified as a special allocated gas pool. Each gas well in a special allocated gas pool shall be referred to as a special allocated gas well for allowable purposes.

(e) **Unallocated gas pools.** Each gas pool not classified as an allocated gas pool or as a special allocated gas pool shall be classified as an unallocated gas pool. Each gas well in an unallocated gas pool shall be referred to as an unallocated gas well for allowable purposes.

165:10-17-3. Effective date of allowables

A gas well shall be assigned an allowable as of the date it is connected into a pipeline and the first delivery is made if the Notice of Intention to Drill (Form 1000) is valid, the Completion Report (Form 1002A) is filed with attachments, if required, and all required tests are run within 30 days from the date of first sales and are filed within 45 days of the date of first sales, and special reports have been filed with the Conservation Division.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99]

165:10-17-4. Standard gas measurement law

Sections 471 through 477, inclusive, of Title 52, Oklahoma Statutes Annotated, cited as the "Standard Gas Measurement Law", are hereby adopted as rules of the Commission as fully as if set out verbatim herein.

165:10-17-5. Meters and recorders

(a) Requirement of a gas meter and recorder.

(1) For allowable, allocation or custody transfer purposes, each well producing natural gas other than a shut-in gas well shall have a gas meter and recorder for the gathering line; provided, if two or more wells share a single allowable, a single meter and recorder may be used to measure gas production, unless a special order of the Commission or either 165:10-13-9 or 165:10-3-39 require allocation of gas production on a per well basis.

(2) For purposes of (1) of this subsection, the term "recorder" refers to a circular gas chart recorder or other type of recording device which has been mutually agreed upon by the gas seller and the gas purchaser.

(3) For purposes of (1) of this subsection, an offsite recorder shall be permitted provided:

- (A) There is compliance with the requirements of (2) of this subsection.
- (B) The recording device is made available for inspection by the Conservation Division to determine that the recorder is functioning properly.

(4) Offsite recordation under (1) and (3) of this subsection shall be treated as wellsite metering for purposes of the reporting requirements of 165:10-1-47.

(5) Use of electronic gas measurement and recording devices that meet industry standards of (b)(2) of this Section are permitted for allowable, allocation, custody transfer, and well testing.

(b) Standards for meters and recorders.

(1) Each meter and recorder shall be properly constructed, maintained, repaired, and operated to continually and accurately register the quantity of gas produced from the well into a gathering line.

(2) The meter and recorder shall be installed, used, and operated according to the natural gas industry standards and guidelines promulgated by the American Gas Association, the American Petroleum Institute, and the Gas Processors Association, in effect at the time of installation of the meter and recorder. If there are conflicting standards, then the most current American Petroleum Institute standard shall apply.

(c) Prohibited meter bypasses For each meter measuring production at the wellsite, use of piping to bypass the meter is prohibited. Gas meters with internal bypasses are permitted.

(d) Reporting of estimated volume if the meter or recorder fails.

(1) **Seventy-two hours to repair equipment** If a meter or recorder at the wellsite malfunctions, then the malfunctioning equipment shall be repaired within 72 hours after discovery of the malfunction.

(2) **Reporting of estimated volumes while the meter or recorder is down** If the well continues to produce gas while the meter or recorder is malfunctioning or being repaired, estimated gas volumes shall be reported to the Conservation Division for purposes of 165:10-1-47.

[Source: Amended at 12 Ok Reg 2017, eff 7-1-95]

165:10-17-6. General well testing requirements

(a) All single-point and multi-point potential tests shall be calculated for all non-exempt gas wells in a uniform manner with respect to the following:

(1) The potential shall be the calculated wellhead absolute open flow potential of the well determined by obtaining a static column wellhead flowing pressure and shall indicate the capacity of the well to produce against zero psia at the wellhead.

(2) All pressures used in test calculations shall be corrected to pounds per square inch absolute, using 14.4 psia as the average barometric pressure.

(3) The static column wellhead pressure, either measured or calculated as reported in the potential test, shall be no more than 90 percent of the wellhead shut-in pressure. If data cannot be obtained in accordance with the foregoing provisions, an assumed static column wellhead pressure of 90 percent of the wellhead shut-in pressure shall be used to calculate the results of the test. This paragraph supersedes any contrary provision in special pool rules.

(b) The operator of a well shall be responsible for testing the well and submitting the test results to the Conservation Division. The results of a potential test shall be filed with the Conservation Division on Form 1016. If the operator wishes to obtain a copy of the approved Form 1016, he shall enclose with the original form a self-addressed stamped envelope and one additional copy of the test and/or form. The Conservation Division shall acknowledge such requests within 15 days, stating

either the date of acceptance of the test results or rerunning the original test if it has been rejected. If any order or rule of the Conservation Division requires witnessing of a test, the operator of the well shall be responsible for securing the presence of an authorized Conservation Division representative to witness the test and sign the Form 1016 for the test.

(c) Unless otherwise prescribed by special pool rules, field testing procedure shall be performed in accordance with the procedures set out in Oklahoma Corporation Commission Manual of Back-Pressure Testing of Gas Wells, Parts I and II, utilizing the specified tables in the Interstate Oil and Gas Compact Commission Manual of Back-Pressure Testing. A gas turbine meter may be used in lieu of an orifice meter for flow measurements in gas well testing.

(d) The initial test for all gas wells shall be run into the pipeline within 30 days and test results filed within 60 days after the date of first sales of gas. Any test filed after the 60 day limit will not be made effective until the first of the month following the date of acceptance of the test. With regard to initial tests for special allocated gas wells, the operator of the well shall provide twenty-four (24) hours notice to the Conservation Division of its intent to run an initial test in order to give the Conservation Division the opportunity to witness said test, but in no case shall the operator be precluded from performing said test and filing the results as provided for in subsection (b). Initial tests for special allocated gas wells need not be witnessed, nor signatures obtained, if witnessed, in order for the Conservation Division to assign an allowable to said well. Initial tests for unallocated gas wells with calculated open flow of less than two million cubic feet per day are exempt from witnessing by Conservation Division personnel under 165:10-17-7(b)(1).

(e) Tests for all non-exempt gas wells shall be run into a pipeline in accordance with this Section or applicable pool rules. Any annual test for a well in a special allocated pool, filed late shall not be made effective until the first of the month following the date of acceptance of the test.

(f) Wells in allocated pools shall be tested in accordance with the requirements for wells in unallocated pools, unless superseded by specific field rules. Form 1016 shall be used to report shut-in pressure tests on wells in allocated and special allocated pools, except for the Guymon-Hugoton Pool #182 which shall use a form 1017 Deliverability Gas Test.

[Source: Amended at 16 Ok Reg 2206, eff 7-1-99; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 38 Ok Reg 1739, eff 10-1-21]

165:10-17-7. Well tests

(a) Wells in special allocated pools.

(1) An initial test shall be filed for each newly completed gas well in each special allocated pool. The well shall be tested into a pipeline no later than 30 days after the date of the first sale of gas. Test procedures shall be those specified in the applicable pool rules subject to the uniform requirements of 165:10-17-6.

(2) An annual test shall be filed in accordance with the requirements of the applicable pool rules, subject to the following provisions specific to the Guymon-Hugoton special allocated pool.

(3) Wells in the Guymon-Hugoton special allocated pool.

(A) The Conservation Division staff will not be required to witness any well test on any well in the Guymon-Hugoton special allocated gas pool unless requested to do so by an offset operator. Operators have a right to witness any well test on any well offsetting said

operator's well in the pool. Operators of offsetting wells will be given sufficient prior notice of testing to allow for a representative to be present to witness testing, and will be provided access to the designated witness throughout testing.

(B) Wells in the Guymon-Hugoton special allocated gas pool which are not capable of producing 450 Mcf/day will be exempt from biannual deliverability tests. Operators shall have the right to elect to receive the minimum allowable by deciding not to conduct well deliverability tests on any such wells in the pool. No well shall be exempt from the annual wellhead shut-in pressure test requirements. For the purpose of the annual wellhead shut-in pressure test, the shut-in pressure shall be measured after the well has been shut-in for approximately 48 hours. In no case shall the well have been shut-in for less than 44 hours at the time the shut-in pressure is taken.

(b) Wells in unallocated pools.

(1) Testing of newly completed or newly recompleted wells.

(A) An initial test shall be submitted to the Conservation Division for each newly completed gas well or recompleted gas well involving a new formation in an unallocated gas pool under 165:10-17-2. The well shall be tested into a pipeline no later than 30 days after the date of first sale of gas into a pipeline. The flow period for the initial test shall be 24 hours.

(B) It shall not be necessary for the operator to submit the initial flow potential test for an unallocated well with a maximum flow rate of less than the minimum allowable. Only a current 24-hour wellhead shut-in pressure is required, unless otherwise requested by the Commission. A copy of the Form 1002A Completion Report may be submitted in lieu of Form 1016 to establish the minimum allowable, provided the section on the Form 1002A Completion Report requesting a minimum gas allowable is explicitly marked, and the following items are reported:

- (i) current 24 hour shut-in pressure;
- (ii) date of first sales and date of recompletion, if applicable;
- (iii) Oklahoma Tax Commission production unit number; and
- (iv) name of reporting entity of monthly gas volumes for the well (either the purchaser/measurer, or self-reporting operator). If the required information is not provided on the Form 1002A Completion Report submitted to the Commission, an initial test on Form 1016 containing the information must be filed with the Commission to establish an initial allowable for the well.

(C) An initial potential test is required to receive an allowable greater than a minimum allowable. The established allowable shall be from the date of first sales of gas, provided that a complete and correct Form 1002A Completion Report for the well is filed with the Commission within 60 days after the date of first sales. If the Form 1002A Completion Report is filed with the Commission after the 60 day period, the allowable will become effective on the first

day of the month in which the Form 1002A Completion Report is approved by the Commission. A request to extend the time to test may be granted by the Conservation Division in order to recover fluids introduced into the well. The request shall be submitted in writing to the Conservation Division with the expected test date.

(2) **Testing or retesting of established gas wells.** A potential test to assign a new allowable for an initially tested well may be submitted on Form 1016 at any time after three months from the date of the initial test. To establish or maintain an allowable greater than the minimum allowable after the initial potential test, a potential test shall be run at least once every 12 months for the first two years, and every two years thereafter. The established allowable from any potential test shall be valid for 12 months from the date of first sales of gas. The Director of the Conservation Division may require additional tests at any time. Tests become effective the first day of the month following acceptance of the test by the Conservation Division.

(A) Unless specifically requested by the Director of the Conservation Division, it shall not be necessary to run a potential test or retest for an established well having a flow rate of less than the minimum allowable.

(B) Upon expiration of a potential test, the well will revert to a minimum allowable status, unless superseded by a later potential test.

(C) If two or more potential tests are submitted for a well, and the effective periods of the tests overlap or conflict, the test having the greatest calculated open flow potential shall be utilized to determine the well's allowable for the overlapping period.

(3) **One-point tests.** The potential test required for each gas well in each unallocated pool shall use the one-point back pressure method and an assumed flow characteristic of 0.85 shall be used in establishing the wellhead absolute open flow. The test shall be governed by the requirements of OAC 165:10-17-6.

(4) **Durability of minimum allowable.** Once an initial allowable is established for a well, that well shall be assigned at least a minimum allowable until such time the well is plugged, reclassified, recompleted or commingled into an additional formation, or is found to be in violation of a rule or order of the Commission. If a potential test is submitted for the well, that test will supersede the minimum allowable for the effective period of the test set out herein.

(5) **Test exemptions for certain minimum wells.**

(A) The following types of gas wells shall be exempt from initial and annual potential and shut-in tests:

(i) Minimum gas wells producing exclusively from coal bed methane formations.

(ii) Minimum gas wells producing from shale formations or including shale formations, if commingled.

(iii) Minimum gas wells using down hole pumps for artificial lift of produced liquids.

(iv) Minimum gas wells producing less than 100 mcf/day.

(B) For these exempt wells operators shall report the initial stabilized rate of production on Form 1002A "Completion Report"

in lieu of reporting an initial test on Form 1016 "Backpressure test for Natural Gas Wells".

(6) **Alternate shut-in pressure.** The Conservation Division may allow the equivalent of the 24-hour shut-in pressure required in this Section and in OAC 165:10-17-6 to be derived from accepted industry methodologies if the operator sufficiently demonstrates to the Division that such calculations will result in an appropriate representation of the actual 24-hour shut-in pressure.

(7) **Minimum compliance.** Each operator shall be responsible for conducting and submitting the required potential tests on the applicable form. All submitted tests must contain complete and accurate information. Permitted production rates will be granted only to those wells which meet this requirement and all other rules or orders of the Commission.

[Source: Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 15 Ok Reg 2165, eff 7-1-98; Amended at 16 Ok Reg 2206, eff 7-1-99; Added at 24 Ok Reg 183, eff 10-4-06 (emergency); Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 30 Ok Reg 1041, eff 7-1-13; Amended at 37 Ok Reg 1121, eff 1-1-20; Amended at 38 Ok Reg 1739, eff 10-1-21]

165:10-17-8. Allocated pools

(a) The current monthly allowable for each allocated pool shall be equal to the total production from the pool during the current month.

(b) The current allowable for each capable drilling and spacing unit within the pool shall be that proportion of the pool allowable that the acreage of the drilling and spacing unit bears to the total developed acreage in the pool, adjusted in accordance with any order of the Commission imposing an allowable adjustment. The current allowable for each limited drilling and spacing unit shall be equal to the current production from the unit. A unit shall be deemed limited when its underage is cancelled under this Section until it thereafter produces a current allowable for any one month.

(c) Accrued underage shall be carried forward as a cumulative credit by adding it to the unit's current allowable until the underage has been produced. If the unit's cumulative underage exceeds six times the allowable assigned to it for the preceding January, all of the underage will be cancelled, the unit shall be classified as "limited", and the unit shall not thereafter accumulate underage until such time as the unit produces a current allowable for any one month. All cancelled underage shall be distributed to the capable drilling and spacing units within the pool in the proportion that the acreage of each unit bears to the total capable acreage in the Pool, adjusted in accordance with any order of the Commission imposing an allowable adjustment. A capable unit shall be any non-limited unit. Cancelled underage may be reinstated administratively by the Director of Conservation to any capable unit in an overproduced status within six months after cancellation by application on Form 1010.

(d) Accrued overage shall be carried forward as a cumulative charge against the unit by subtracting it from the unit's current allowable until the overage has been made up. If the cumulative overage exceeds six times the current allowable assigned for the preceding January, the Director of Conservation shall notify the operator in writing, and the unit shall thereafter be permitted to produce not more than 25 percent of its current allowable until all of the overage in excess of six times the well's current allowable for the preceding January has been made up. In the event the operator fails to limit production as herein provided, the well shall be ordered shut-in by the Commission upon application of the Director of Conservation and after notice and hearing.

(e) If a unit did not have a current allowable assigned to it on a full month's basis for the preceding January, the first current allowable assigned to the unit on a full month's basis shall be used as reference for the purpose of limiting underage and overage.

165:10-17-9. Special allocated gas pools

(a) **Scope.** This Section applies to special allocated gas pools except any special allocated gas pool with allowables based upon volumetric withdrawals.

(b) **Minimum unit allowable of 150 mcf/d.** For all special allocated gas pools except the West Cheyenne Upper Morrow, Purvis Chert, Guymon-Hugoton, Custer City N. Hunton, Sharon W. Morrow, Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro, the minimum allowable for a drilling and spacing unit in the pool shall be 150 MCF/D regardless of the amount of any location exception penalty charged against a unit well. For purposes of this Section, the net minimum allowable shall be the gross minimum allowable adjusted for overage or underage according to this Section.

(c) **Minimum unit allowable of 450 mcf/d for the Guymon-Hugoton pool.**

(1) For the Guymon-Hugoton Special Allocated Gas Pool, minimum allowables shall be determined as follows: The minimum allowable shall be the lesser of 450 mcf/d or the drilling and spacing unit's capability.

Capability shall be defined as the average of the highest three (3) of the last twelve (12) months of production. A drilling and spacing unit receiving a minimum allowable shall not accrue underage. The minimum allowables under this Section shall not affect the calculation of capable well allowables. The field monthly allowable shall be equal to total nominations and not adjusted for underage or overage.

(2) The deliverability standard pressure (DSP) to be used in the application of special allocated rules (field rules) shall be defined as 25 pounds less than the average shut-in wellhead pressure of the pool.

(3) The Corporation Commission shall calculate and publish reports of allowable and production quarterly.

(d) **Minimum unit allowable of 2,000 mcf/d for the Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro Pools.** For the Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro Pools (Pool Nos. 456, 457 and 458) located in Latimer and LeFlore Counties, Oklahoma, the minimum allowable for a drilling and spacing unit in each pool shall be 2,000 mcf/d. For purposes of this Section, the net minimum allowable shall be the gross minimum allowable adjusted for overage or underage according to this Section.

(e) **Double minimum allowable of 300 mcf/d.**

(1) **Compressor and application required.** For all special allocated gas pools except the West Cheyenne Upper Morrow, Purvis Chert, Guymon-Hugoton, Custer City N. Hunton, Sharon W. Morrow, Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro, if a drilling and spacing unit has a minimum allowable under (b) of this Section, the operator of a well in the drilling and spacing unit may obtain for the unit a double minimum allowable regardless of any location penalty against a well by installing a compressor on a unit well and applying for a double minimum allowable under (2) of this subsection.

(2) **Request for administrative approval.** To apply for a double minimum allowable, the operator shall submit to the Manager of Production Allowables for the Conservation Division a letter requesting a double

minimum allowable and stating the factual basis for the request and the legal description of the well with the compressor.

(f) **Basic allowable.**

(1) **Use of basic allowable for determining overage and underage.** For purposes of determining the amount of overage or underage accrued by a well or drilling and spacing unit, the Conservation Division shall establish on a yearly basis a status factor known as the basic allowable.

(2) **Apportionment of basic allowable.**

(A) **Increased density unit without apportionment of the allowable.** If neither OAC 165:10-13-9 nor an order of the Commission require specific allocation of the unit allowable to each unit well, overage and underage shall be carried on a unit basis.

(B) **Increased density unit with ratable allowables.** If either OAC 165:10-13-9 or an order of the Commission require specific allocation of the unit allowable to each unit well, overage and underage shall be carried on a per well basis. For purposes of computing overage and underage, the basic allowable shall be apportioned to each unit well using the formula for determining each well's ratable allowables for the applicable month under (3) of this subsection. The term "ratable allowables" refers to a well's share of the unit allowable under the formula apportioning the allowable amongst the unit wells.

(3) **Computation of the basic allowable.** Except as provided in (C) of this paragraph for basic allowable changes, the basic allowable for the calendar year shall be computed as follows:

(A) **For all pools except the Red Oak Pools.** For all pools except the Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro, the basic allowable shall equal the drilling and spacing unit's January allowable for the calendar year.

(B) **For the Red Oak Pools.** For the Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro, the basic allowable shall equal the drilling and spacing unit's March allowable for the calendar year.

(C) **Changes in the basic allowable.**

(i) If a drilling and spacing unit receives test exempt minimum allowable status as provided in this Section, then the basic allowable shall be a minimum allowable.

(ii) If a drilling and spacing unit receives a test exempt double minimum allowable as provided in this Section, then the basic allowable for the unit shall be a double minimum allowable.

(iii) If the well operator submits to the Conservation Division a retest which is approved by the Conservation Division, then the Conservation Division shall recompute the basic allowable using the retest. Retests are permitted at any time and become effective the first day of the month after acceptance by the Conservation Division.

(g) **Determination of overage and underage.**

(1) **Overage.**

(A) **Drilling and spacing unit without ratable allowables.** If no well in a drilling and spacing unit is subject to a ratable allowable, the current monthly allowable shall be compared with the second

prior month's unit production. Production in excess of the current monthly allowable is overage. Aside from any adjustment to the pool allowable required by pool rules, overage shall not reduce any subsequent monthly allowable until accumulated overage exceeds the applicable overage limit under (h) of this Section.

(B) Drilling and spacing unit subject to ratable allowables. If any well in a drilling and spacing unit is subject to a ratable allowable, the current monthly ratable allowable for the well shall be compared with the second prior month's production from the well. Production in excess of the ratable allowable is overage. Aside from any adjustment to the pool allowable required by pool rules, the well's overage shall not reduce any subsequent monthly ratable allowable until accumulated overage exceeds the well's overage limit under (h) of this Section.

(2) Underage.

(A) Drilling and spacing unit without ratable allowable. If no well in a drilling and spacing unit is subject to a ratable allowable under OAC 165:10-13-9, the current monthly allowable for the unit shall be compared with the second prior month's unit production. If production is less than the allowable, the difference between the production and the unit allowable is underage. Aside from any adjustment to the pool allowable required by pool rules, only reinstated cancelled underage under (k) of this Section shall increase any subsequent monthly allowable.

(B) Drilling and spacing unit with ratable allowables. In a drilling and spacing unit with ratable allowables, the current monthly ratable allowable for a well shall be compared with the second prior month's production from the well. If production was less than the current monthly ratable allowable, the difference between the production and the ratable allowable is underage. Aside from any adjustment to the pool allowable required by pool rules, only reinstated cancelled underage under (k) of this Section shall increase any subsequent monthly ratable allowable for the well.

(h) Overage limits.

(1) For all pools Except the Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro. For all pools except the Red Oak Fanshawe, Red Oak Red Oak, and the Red Oak Spiro, the overage limit is six times:

(A) The basic allowable for the drilling and spacing unit, if the overage carried on a unit basis; or

(B) The well's share of the basic allowable for the drilling and spacing unit, if the well receives a ratable allowable.

(2) For the Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro Pools. For the Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro Pools, the overage limit is 168 times:

(A) The basic allowable for the drilling and spacing unit, if the overage is carried on a unit basis; or

(B) The well's share of the basic allowable for the drilling and spacing unit, if the well receives a ratable allowable.

(3) Mandatory curtailment for excessive overage.

(A) Single well drilling and spacing unit. If accumulated overage from a single well drilling and spacing unit exceeds the applicable

overage limit, production from the unit shall be curtailed to 25 percent of the monthly allowable until accumulated overage is reduced below the overage limit.

(B) Multiple well unit without ratable allowables. In a multiple well drilling and spacing unit without ratable allowables, if accumulated overage for the unit exceeds the applicable overage limit, the unit production shall be curtailed to 25 percent of its monthly allowable until the accumulated overage is reduced below the overage limit.

(C) Multiple well unit with a ratable allowable. In a multiple well drilling and spacing unit with one or more wells subject to a ratable allowable, if the accumulated overage for a well exceeds its overage limit, production from the well shall be curtailed to 25 percent of its monthly ratable allowable until the well's accumulated overage is reduced below its overage limit.

(i) Underage limits.

(1) For the Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro Pools. For the Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro Pools (Pool Nos. 456, 457 and 458) located in Latimer and LeFlore Counties, Oklahoma, the underage limit is three times the status factor for:

(A) The drilling and spacing unit,

(i) If the unit has only one well, or

(ii) If the unit has multiple wells but no unit well has a ratable allowable; or

(B) The well, if a well has a ratable allowable.

(2) For all other special allocated gas pools subject to this Section. For all other special allocated gas pools subject to the Section, the underage limit is six times the status factor for:

(A) The drilling and spacing unit, if the status factor is determined on a unit basis; or

(B) The well, if the well is subject to a ratable allowable.

(j) Cancellation of underage.

(1) Underage in excess of the underage limit. If accumulated underage exceeds the applicable underage limit, the accumulated underage shall be cancelled.

(2) Subsequent underage. After cancellation, underage shall not accrue until after:

(A) The drilling and spacing unit produces a current monthly allowable, if the unit wells share a unit allowable; or

(B) A well with a ratable allowable produces a current monthly ratable allowable.

(k) Reinstatement of cancelled underage.

(1) The operator may apply for reinstatement of cancelled underage by:

(A) An application for administrative approval on Form 1010, if filed within six months after cancellation of underage; or

(B) Application, notice, and hearing under OAC 165:5-7-1.

(2) Reinstated cancelled underage shall be available to increase the monthly allowable or ratable allowable for up to one year without cancellation. If reinstated underage is cancelled, the operator may reapply under (1) of this subsection.

(3) For the Guymon-Hugoton special allocated gas pool, the operator of any drilling and spacing unit in such pool which unit has accumulated cancelled underage credited thereto on the records of the Commission prior to July 1, 1998 shall have until January 1, 2000 to file an application with the Commission pursuant to OAC 165:5-7-1 for the reinstatement of such accumulated cancelled underage as credited to such unit prior to July 1, 1998. Upon the filing of such an application, the cause seeking reinstatement of such accumulated cancelled underage shall be diligently prosecuted. In such proceeding for the reinstatement of such accumulated cancelled underage credited to such drilling and spacing unit prior to July 1, 1998, the Commission shall determine the portion of such accumulated cancelled underage which is proper and valid under the special pool allocation rules (field rules) applicable to the Guymon-Hugoton special allocated gas pool and shall reinstate only such portion that is determined to be proper and valid under such special pool allocation rules (field rules). If an application for reinstatement of any such accumulated cancelled underage credited to a drilling and spacing unit on the records of the Commission prior to July 1, 1998 is not filed with the Commission on or before January 1, 2000, such accumulated cancelled underage shall be permanently deleted from the records of the Commission and shall not thereafter be able to be reinstated or used for any other purpose under the special pool allocation rules (field rules) applicable to the Guymon-Hugoton special allocated gas pool.

(l) **Effect of reinstatement of underage on pool allowables.** If cancelled underage has been distributed among the capable wells in the pool, reinstated underage shall not be deducted for the allowables of the capable wells which received distributed cancelled underage.

(m) **Test exempt status.**

(1) **No allowable without test.** For all pools except West Cheyenne Upper Morrow and Purvis Chert, no allowable shall be assigned unless:

(A) **Single well drilling and spacing unit.** The operator submits the required test or the unit has test exempt status under this Section.

(B) **Multiple well drilling and spacing unit.** In a multiple well drilling and spacing unit, the operator of at least one well in the unit submits the required test in accordance with applicable pool rules or the unit is granted test exempt status under this Section.

(2) **Automatic test exempt status.**

(A) **For the West Cheyenne Upper Morrow and Purvis Chert Pool.** For the West Cheyenne Upper Morrow and Purvis Chert, a drilling and spacing unit shall have test exempt status as follows:

(i) In a single well drilling and spacing, the well operator does not submit either an initial or an annual test.

(ii) In a multiple well drilling and spacing unit, none of the well operators in the unit submit either an initial or annual test. A test exempt drilling and spacing unit on the West Cheyenne Upper Morrow and Purvis Chert Pools shall have a minimum allowable under the applicable orders establishing and modifying pool rules as opposed to (b) of this Section.

(3) **Test exempt status upon requests for all other pools.** For all other pools except Guymon-Hugoton a drilling and spacing unit shall be test exempt upon written request to the Conservation Division if the potential for the unit does not exceed:

(A) The applicable minimum allowable under this Section.

(B) A double minimum allowable, if the Conservation Division has granted a double minimum to the unit.

(4) **Termination of requested test exempt status.**

(A) **Automatic termination.** Requested test exempt status shall terminate upon:

(i) Submission of a retest showing that the well has a potential in excess of a test exempt allowable, or;

(ii)

(I) If gas production from a single well drilling and spacing unit exceeds a test exempt allowable during any month while the well has test exempt status, the unit shall lose test exempt status beginning with next month following the month with overproduction.

(II) If total gas production from a multiple well drilling and spacing unit exceeds the minimum allowable during any month while the unit has test exempt status, the unit shall lose test exempt status beginning with the next month following the month with overproduction.

(B) **Reinstatement of test exempt status after automatic termination.** After termination of test exempt status for overproduction, the Conservation Division shall not reinstate test exempt status until:

(i) The operator requests test exempt status; and

(ii) The allowable year during which overproduction occurred expires.

(n) **Suspension of well allowable calculations under field rules when market demand exceeds supply for Red Oak Fanshawe, Red Oak Red Oak, and Red Oak Spiro pools.** The Commission, upon finding in the market demand hearing that the supply of natural gas from the various separate common sources of supply included in and covered by the Red Oak Fanshawe Pool 456, the Red Oak Red Oak Pool 457, and the Red Oak Spiro Pool 458 is less than such market demand, shall suspend the special field rules calculations for determining allowables for wells in such pools and such suspension shall be effective until such time that the supply of natural gas from these pools exceeds the market demand for such natural gas, and during such suspension the gas allowables for wells in such pools shall be determined under this rule. See Order No. 571714 which issued in Cause CD No. 200902831.

(1) **For existing wells, granting separate allowables and establishing overage status as of the effective date of this rule.** Each well in existence as of the effective date of this rule which is then completed in one or more of the Red Oak Fanshawe Pool 456, Red Oak Red Oak Pool 457, and the Red Oak Spiro Pool 458 shall be deemed an Existing Well for purposes of this rule. Each Existing Well shall receive a full separate allowable. Any total net overage including cancelled underage, accumulated by and

assigned to any such drilling and spacing unit, shall be distributed and assigned in equal proportions to the Existing Wells in such drilling and spacing unit. Any such net overage so assigned to an Existing Well shall hereinafter be made up from the separate allowable for such well under the provisions of the Commission's rules applicable to a well in an unallocated gas pool.

(2) **Test requirements and determination of unit allowables for new and existing wells.** Any new well drilled and completed or any Existing Well re-completed into one or more of the Red Oak Fanshawe Pool 456, Red Oak Red Oak Pool 457, and Red Oak Spiro Pool 458 after the effective date of this rule, shall be deemed a New Well for purposes of this rule. The allowable for any New Well or Existing Well as to the applicable pool covered hereby shall be determined using the same allowable formula used by the Commission for the determination of a gas allowable for a capable well or a minimum well in an unallocated gas pool. **EXCEPTION:** Any Existing Well which is a minimum well shall be exempt from the annual test requirement. If any drilling and spacing unit formed for any common source of supply in any pool covered by this rule contains more than one New Well completed in such common source of supply and such New Wells are classified as gas wells, such New Wells shall share a single unit gas allowable in the same manner as any other gas wells in the same drilling and spacing unit in an unallocated gas pool, unless the Commission grants a separate gas allowable as to production from such pool after proper notice and hearing.

(o) **Suspension of well allowable calculations using field rules when market demand exceeds supply for the Guymon-Hugoton Pool 182.** The Commission, upon finding that the supply of natural gas from Guymon-Hugoton Pool 182 common source of supply is less than the market demand and that the expectations for supply to continue to be less than the market demand as determined in the market demand hearing, will suspend special field rule calculations for determining allowables until such time that the supply of natural gas from this pool exceeds the market demand. See Order No. 571714 which issued in Cause CD No. 200902831.

(1) For allowable purposes, wells which produce less than 450 mcfg per day must conduct a 48 hour shut-in pressure test according to pool rules.

For reporting purposes, an operator may submit these data for several wells as an attachment to Form 1017 providing operator name, date of test, well name, location and api number for each well.

(2) For allowable purposes, wells which produce more than 450 mcfg per day must conduct a deliverability test according to pool rules and submitted on Form 1017.

(3) Upon submission of the proper test, the allowable shall be the well's capability to produce.

(p) **Suspension of well allowable calculations using field rules when all wells in the West Cheyenne Upper Morrow gas pool produce less than the pool minimum allowable and the market demand exceeds supply.** The Commission, upon finding that the supply of natural gas from West Cheyenne Upper Morrow Pool 136 common source of supply is less than the market demand and that the expectations for supply to continue to be less than the market demand as determined in the market demand hearing, will suspend special field rule calculations for determining allowables and well allowables will be the wells' capacity to produce up to 2000 mcf per day. See Order No. 571714 which issued in

Cause CD No. 200902831. Each well will be exempt from the annual test requirement.

165:10-17-10. Unallocated pools [RESERVED]

165:10-17-11. Maximum permitted rates of production for unallocated gas wells

(a) Scope.

(1) This Section shall apply to each gas well in unallocated status except as otherwise provided by Commission order. The Commission may establish different production rates by:

(A) Location exception order.

(B) Establishment of pool rules for the common source of supply.

(C) Other order adjusting gas production from the well.

(2) For purposes of this Section, the term "well" shall include any drilling and spacing unit with multiple unallocated gas wells, which do not receive separate maximum permitted rates of production by Commission order.

(3) For the purposes of this Section, the term "allowable formula" shall mean the formula used by the Commission for the determination of the daily rates for capable and minimum wells.

(4) For purposes of this Section, the term "capable well" shall refer to those unallocated gas wells with a production rate of 3000 mcf/d or greater. All other wells are minimum wells.

(5) For purposes of this Section, the term "daily natural flow" means the wellhead absolute open flow potential determined in the manner described in OAC 165:10-17-6 and OAC 165:10-17-7.

(b) **Commission authority and responsibility.** Production shall be governed by the provisions of 52 O.S. Section 29. Pursuant to said statute, the Commission has the power and authority to adjust allowables to meet reasonable market demand. The Commission, upon its own application, after notice and hearing, shall establish allowables which may be greater or lesser than those set forth in 52 O.S. Section 29.

(c) Procedure.

(1) Allowables for wells other than those provided in subsections (a), (e), (f), and (g) of this Section shall be determined pursuant to a proration hearing held at least annually. The Commission may hold additional proration hearings at shorter intervals if necessary. At least 15 days prior to scheduled annual hearings, the Commission shall publish in a newspaper of general circulation in Oklahoma County, the proposed allowable formula for the next proration period. The annual proration hearings shall be held at least 30 days prior to the proration period for which the allowable is being determined. Such hearing shall be for the purpose of gathering comments and hearing testimony from all interested parties concerning the determination of reasonable market demand for the next proration period. As a guideline, but not to the exclusion of any other information that the Commission deems pertinent, the following may be considered by the Commission in determining reasonable market demand and corresponding allowables:

- (A) Production from prior years.
- (B) Production from the most recent proration period.
- (C) Wellhead open flow potentials.
- (D) New wells, recompletions, temporarily abandoned wells and plugged wells.
- (E) Gas which is available but is not being produced at the present time.
- (F) Changes in existing gas markets, forecasts, and new markets for Oklahoma gas.
- (G) State-wide gas production and the portion thereof attributable to unallocated gas wells.
- (H) Overproduction and underproduction from the preceding proration period.

(2) After a proration hearing, the Commission shall publish in a newspaper of general circulation in Oklahoma County, the allowable formula, no later than 15 days prior to the proration period for which the allowable formula is determined.

(d) Emergency allowables.

(1) When the Commission determines that an emergency gas supply situation exists, the Commission may establish an emergency allowable. The emergency allowable shall provide for the protection of correlative rights including those relating to minimum wells and penalized wells.

(2) The Commission may extend or change the emergency allowable for as long as an emergency exists. However, any authorized extension of the emergency allowable shall be by order after notice and hearing.

(e) Exceptions. Upon application, notice, and hearing, the Commission may establish a different allowable for good cause shown.

(f) Exclusion for hardship and distressed wells. The allowable established under this Section shall not limit rates established by special order for those wells classified as hardship or distressed wells.

(g) Discovery gas well.

(1) For thirty (30) months from the date of first production, a discovery gas well, as defined in this subsection, subject to the provisions of this Section, shall have a production allowable which shall be the greater of one thousand three hundred (1,300) mcf/d or sixty-five percent (65%) of the absolute open flow (AOF) as specified by the Corporation Commission. Such discovery well allowable shall not be available for any discovery gas well wherein two (2) or more separate common sources of supply are commingled and one (1) common source of supply would not qualify a new gas well as a discovery gas well, as defined in this Section.

(2) Drilling and spacing units which are downspaced after June 1, 1997, shall not qualify for the discovery gas well allowable.

(3) For purposes of this subsection, "discovery gas well" shall mean a new gas well, which is not an off-pattern well, is the first well completed in a common source of supply within a drilling and spacing unit and is at least one (1) mile from all existing gas wells which are completed in the same common source of supply. In the absence of spacing, a discovery well shall be the first well in the governmental section completed in a common source of supply, provided that the discovery gas well shall not be drilled closer than one thousand three hundred twenty (1,320) feet from the boundaries of the governmental section and is at least one (1) mile from all existing gas

wells which are completed in the same common source of supply.

(h) **Exclusion for reservoir dewatering.** Allowables shall not apply, regardless of unit size, in the instance of production of gas by reservoir dewatering to extract said gas from reservoirs having initial water saturations at or above fifty (50%) percent.

(i) **Minimum compliance.**

(1) The Conservation Division shall monitor well production at least annually. The allowable for a well shall be based on the product of the number of days in the proration period, multiplied by the applicable allowable formula, provided that said product shall be reduced for overproduction as provided by this Section or by any penalty or limitation on production imposed by applicable Commission order.

(2) Any overproduction existing at the end of the calendar year shall be applied against the allowable for the next calendar year. Furthermore, the overproduced well shall be required to make up overproduction within the first six months of the next calendar year. If the overproduction is not made up within that time period, the flow rate shall not exceed ten percent of the then current allowable until the overproduction is made up.

[Source: Amended at 10 Ok Reg 1579, eff 5-13-93; Amended at 14 Ok Reg 2198, eff 7-1-97; Amended at 15 Ok Reg 2171, eff 7-1-98; Amended at 19 Ok Reg 1947, eff 7-1-02; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 30 Ok Reg 1041, eff 7-1-13; Amended at 38 Ok Reg 1739, eff 10-1-21]

165:10-17-12. New proposed well classification for the priority schedule

(a) Any common purchaser as defined in 52 O.S. 1981, Section 240 shall purchase all the gas which may be offered for sale and which may reasonably be reached by its trunk lines or gathering lines, without discrimination in favor of one producer as against another or in favor of any one source of supply as against another, except as authorized by the Commission under (b) of this Section.

(b) In the interest of the prevention of waste and protection of correlative rights, the following priority schedule shall be implemented by any first purchaser of gas whenever the permitted production from all wells in any common source of supply in its system in this State, including gas which is processed, is in excess of that purchaser's reasonable market demand; provided, however, if the first purchaser does not contractually control wellhead production, the first taker of gas shall be responsible for implementation of the following priority schedule.

(1) Priority One - Hardship and distressed wells.

(2) Priority Two - Enhanced recovery wells.

(3) Priority Three - Wells producing casinghead gas and associated gas.

(c) With respect to all gas not identified in (b) of this Section, the collective market demand of multiple common purchasers on each pipeline system for natural gas production from each well and each common source of supply in this state shall be deemed adequate to meet statutory purchasing requirements unless the Commission, upon its own motion or upon verified application by any interested party and after notice and hearing, as hereinafter provided, shall determine that differing obligations shall be imposed upon any common purchaser in order to protect correlative rights, the interest of the public or otherwise meet the requirements of applicable law.

(d) When permitted production of gas from all Priority 1, 2, and 3 wells from which a purchaser or taker is required to take exceeds the market demand of said purchaser or taker, all reductions in gas purchases or takes from wells in each priority shall be ratable. All production from the lower priority wells shall be shut-in before production from any well in the next higher priority is curtailed.

(e) Any well which meets the definition of more than one priority shall be assigned the higher priority.

(f) When there is more than one purchaser or taker involved in the taking of gas from a well into any purchaser's system, all purchasers and takers within that system shall be responsible for compliance with this Section.

(g) Upon a verified application of the Director of the Conservation Division or any other person, the Commission, after notice and hearing, may determine if gas has been ratably purchased or taken from a common source of supply on a system-wide basis in accordance with this Section without avoidable waste and with equitable participation in production and markets by all operators and other interested parties.

(h) First purchasers or takers of gas produced from Priority 1, 2, or 3 wells, who anticipate curtailing production from such wells, shall file by the twentieth day of each month nominations of requirements for gas to be purchased and/or used by them during the following month (Form 1004B). Nominations shall be made according to priorities established in (b) of this Section. Curtailments of production and acceptance of deliveries of gas shall be performed in accordance with (a) and (b) of this Section.

(i) Any interested party may file an application requesting that the Commission, for good cause shown, authorize limited deviation from the general priority schedule provided under (b) of this Section. The Commission, on its own motion, may initiate a review of the continued need for such a limited deviation. After notice and hearing, the Commission may authorize limited deviation upon finding that the same is necessary in order to prevent waste, protect correlative rights, and is otherwise required by the public interest or authorized by law.

[Source: Amended at 12 Ok Reg 2045, eff 7-1-95]

165:10-17-13. Use of gas for carbon black

Gas may not be used for the manufacture of carbon black or similar products predominately carbon, except as specifically authorized by the Commission after notice and hearing.

165:10-17-14. Waste of tail gas at gasoline plants

The duty, obligation, and jurisdiction of the Commission to prevent waste of tail gas where an additional market is available shall not be circumvented by any exclusive provisions in private contracts between the owners and the purchasers of tail gas.

165:10-17-15. Gas removed from storage

The rules relating to gas production from pools shall not apply to gas being removed from storage except and unless waste is involved.

165:10-17-16. Reports [REVOKED]

[Source: Amended at 19 Ok Reg 1947, eff 7-1-02; Revoked at 37 Ok Reg 1121, eff 1-1-20]

SUBCHAPTER 19. NATIONAL GAS POLICY ACT DETERMINATION [REVOKED]

165:10-19-1. Definitions [REVOKED]

[Source: Revoked at 13 Ok Reg 2401, eff 7-1-96]

165:10-19-2. Applications for NPGA determination [REVOKED]

[Source: Revoked at 13 Ok Reg 2401, eff 7-1-96]

165:10-19-3. Application for additional well in existing proration unit [REVOKED]

[Source: Revoked at 13 Ok Reg 2401, eff 7-1-96]

165:10-19-4. Notice of application; service of notice [REVOKED]

[Source: Revoked at 13 Ok Reg 2401, eff 7-1-96]

165:10-19-5. Procedures for protest, administrative consideration, and hearing [REVOKED]

[Source: Revoked at 13 Ok Reg 2401, eff 7-1-96]

165:10-19-6. Stripper well determination [REVOKED]

[Source: Revoked at 13 Ok Reg 2401, eff 7-1-96]

SUBCHAPTER 21. APPLICATIONS FOR TAX EXEMPTIONS

PART 1. TERTIARY RECOVERY PROJECT [REVOKED]

165:10-21-1. Tertiary recovery project certification [REVOKED]

[Source: Revoked at 13 Ok Reg 2933, eff 7-11-96]

PART 2. ENHANCED RECOVERY PROJECT [REVOKED]

165:10-21-2. Gross production tax exemption for enhanced recovery project [REVOKED]

[Source: Revoked at 13 Ok Reg 2933, eff 7-11-96]

PART 3. HORIZONTALLY DRILLED PRODUCTION WELLS [REVOKED]

165:10-21-3. Qualification and application for exemption from the levy of gross production tax on horizontally drilled production wells [REVOKED]

[Source: Revoked at 13 Ok Reg 2933, eff 7-11-96]

PART 4. DELETERIOUS SUBSTANCES [REVOKED]

165:10-21-4. Recycling, reuse, and ultimate destruction of deleterious substances [REVOKED]

[Source: Revoked at 18 Ok Reg 226, eff 11-2-00 (emergency); Revoked at 18 Ok Reg 1035, eff 5-11-01]

PART 6. PRODUCTION ENHANCEMENT PROJECTS [REVOKED]

165:10-21-21. General [REVOKED]

[Source: Added at 12 Ok Reg 491, eff 1-1-95 (emergency); Added at 12 Ok Reg 1605, eff 7-1-95; Amended at 13 Ok Reg 2933, eff 7-1-96; Amended at 18 Ok Reg 226, eff 11-2-00 (emergency); Amended at 18 Ok Reg 1035, eff 5-11-01;

Amended at 21 Ok Reg 1960, eff 5-11-04 (emergency); Amended at 21 Ok Reg 2019, eff 7-1-04; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 29 Ok Reg 950, eff 7-1-12; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 35 Ok Reg 973, eff 9-14-18; Revoked at 36 Ok Reg 534, eff 8-1-19]

165:10-21-22. Definitions [REVOKED]

[Source: Added at 12 Ok Reg 491, eff 1-1-95 (emergency); Added at 12 Ok Reg 1605, eff 7-1-95; Amended at 13 Ok Reg 2933, eff 7-11-96; Amended at 15 Ok Reg 2171, eff 7-1-98; Amended at 18 Ok Reg 226, eff 11-2-00 (emergency); Amended at 18 Ok Reg 1035, eff 5-11-01; Amended at 21 Ok Reg 1960, eff 5-11-04 (emergency); Amended at 21 Ok Reg 2019, eff 7-1-04; Amended at 24 Ok Reg 1784, eff 7-1-07; Amended at 27 Ok Reg 2128, eff 7-11-10; Amended at 29 Ok Reg 950, eff 7-1-12; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 35 Ok Reg 973, eff 9-14-18; Revoked at 36 Ok Reg 534, eff 8-1-19]

165:10-21-23. Qualification procedure [REVOKED]

[Source: Added at 12 Ok Reg 491, eff 1-1-95 (emergency); Added at 12 Ok Reg 1605, eff 7-1-95; Amended at 13 Ok Reg 2933, eff 7-11-96; Amended at 23 Ok Reg 2229, eff 7-1-06; Amended at 27 Ok Reg 2128, eff 7-11-10; Revoked at 36 Ok Reg 534, eff 8-1-19]

165:10-21-24. Rebates - Refund procedure [REVOKED]

PART 17. SALES TAX EXEMPTION FOR ELECTRICITY AND ASSOCIATED DELIVERY AND TRANSMISSION SERVICES SOLD FOR OPERATION OF RESERVOIR DEWATERING PROJECT AND/OR UNIT

165:10-21-90. General

(a) **Scope.** This Part deals with the classification by the Oklahoma Corporation Commission (Corporation Commission or Commission) of a reservoir dewatering project and/or unit for the purpose of an exemption, beginning January 1, 2004, from sales taxes levied on electricity and associated delivery and transmission services sold to an oil and gas operator for reservoir dewatering projects and associated operations commencing on or after July 1, 2003, as provided in 68 O.S. 2002 Supp., §1357(31).

(b) **Distinction from designation as reservoir dewatering oil spacing unit or other spacing application.** The classification of an area and reservoir(s) as a "reservoir dewatering project" and/or a "reservoir dewatering unit" pursuant to this Part shall be separate and distinct from the designation of a reservoir dewatering oil spacing unit for oil allowable purposes pursuant to OAC 165:10-15-18.

Corporation Commission approval of an area and reservoir(s) for the instant sales tax exemption shall be made by application under this Part and not as a result of a spacing application filed for oil allowable purposes under OAC 165:10-15-1 and OAC 165:10-15-18, a spacing application filed for gas allowable purposes under OAC 165:10-17-2 through 10-17-16, a spacing application filed for horizontal drilling purposes under OAC 165:10-3-28, or any spacing application filed under OAC 165:10-1-22.

(c) **Reservoir Dewatering Projects for Oil Production.** Any reservoir that is the subject of an application pursuant to this Part, which produces predominantly oil, shall be evaluated to determine the initial water-to-oil ratio is equal to or greater than five-to-one (5-to-1).

(d) **Reservoir Dewatering Projects for Gas Production.** Any reservoir that is the subject of an application pursuant to this Part, which produces predominantly gas, shall be evaluated to determine the initial five-to-one (5-to-1) water-to-oil ratio using a gas conversion factor of one (1) barrel of oil converted to an MCF of natural gas based on an initial natural gas formation volume factor, BTU or price calculation or conversion accepted by the Conservation Division.

[Source: Added at 20 Ok Reg 1479, eff 4-24-03 (emergency); Added at 20 Ok Reg 1543, eff 7-1-03; Amended at 36 Ok Reg 534, eff 8-1-19]

165:10-21-91. Definitions

The following words and terms, when used in this Part, shall have the following meaning, unless the context clearly indicates otherwise:

"Reservoir dewatering project" means an oil or gas production project covering a specified area and reservoir(s), which utilizes water recovery and disposal technology to increase water production in the initial phase of reservoir development, with the primary purpose of increasing oil or gas production from the

reservoir(s) as a result of the dewatering process. For the purpose of qualification for the sales tax exemption pursuant to this Part, the definition of reservoir dewatering project shall require the proof that the reservoir's initial water-to-oil ratio is greater than or equal to five-to-one (5-to-1), or is greater than or equal to the appropriate gas-to-water ratio calculated using the gas conversion factor outlined in OAC 165:10-21-90(d).

"Reservoir dewatering unit" means an area and reservoir(s) designated a reservoir dewatering project where a reservoir dewatering process is conducted as defined in this Part.

[Source: Added at 20 Ok Reg 1479, eff 4-24-03 (emergency); Added at 20 Ok Reg 1543, eff 7-1-03; Amended at 36 Ok Reg 534, eff 8-1-19]

165:10-21-92. Qualification procedure

(a) **Applicable operations.** The provisions of this Section establish criteria for determining if an area and reservoir(s) can be classified a reservoir dewatering project and/or a reservoir dewatering unit, beginning January 1, 2004, for the purpose of an exemption from sales taxes levied on electricity and associated delivery and transmission services sold to an oil and gas operator for a reservoir dewatering project and associated operations commencing on or after July 1, 2003.

(b) **Application to the Oklahoma Corporation Commission.** An oil and gas operator seeking the classification of an area and reservoir(s) as a reservoir dewatering project and/or reservoir dewatering unit pursuant to this Part shall file an application with the Corporation Commission on a Form 1535 for a determination that the project and/or unit qualifies for the exemption, as provided in 68 O.S. 2002 Supp., §1357(31). The operator shall attach to the Form 1535 a copy of the following information:

- (1) A production test or other appropriate data showing the initial water-to-oil ratio is greater than or equal to five-to-one (5-to-1) or is greater than or equal to the appropriate gas-to-water ratio calculated using the gas conversion factor outlined in OAC 165:10-21-90(d). For this purpose, a Corporation Commission Form 1013 may be filed with the sales tax exemption application to demonstrate the initial 5-to-1 water-to-oil ratio for the reservoir.
- (2) Geological structure and isopach maps for the applicable reservoir showing its geological characteristics; and any additional engineering and geological data or information deemed necessary by the Conservation Division to evaluate the application.
- (3) A schematic diagram of the electrical grid and dewatering and water disposal equipment associated with the reservoir dewatering project covered by the application.

(c) **Administrative approval and determination.**

- (1) If the application is administratively approved, copy shall be forwarded to the operator.
- (2) To obtain the tax exemption, the operator should contact the Director's Office, Taxpayer Assistance Division, Oklahoma Tax Commission, 2501 N. Lincoln Blvd., Oklahoma City, Ok. 73194.
- (3) Any data, maps and other information submitted with the Form 1535 for determination that an area and reservoir qualify for the exemption provided in this Part shall be held as confidential information by the Conservation Division and/or Corporation Commission, and shall be returned to the applicant or destroyed upon approval of the application.

[Source: Added at 20 Ok Reg 1479, eff 4-24-03 (emergency); Added at 20 Ok Reg 1543, eff 7-1-03; Amended at 23 Ok Reg 2229, eff 7-1-06; Amended at 36 Ok Reg 534, eff 8-1-19]

PART 19. STATE SALES TAX EXEMPTION FOR ELECTRICITY SOLD FOR OPERATION OF ENHANCED RECOVERY METHODS ON A SPACING UNIT OR LEASE

165:10-21-95. General

(a) **Scope.** This Part deals with the designation by the Oklahoma Corporation Commission (Corporation Commission or Commission) of enhanced recovery methods on a spacing unit or lease for the purpose of an exemption, beginning July 1, 2006, from sales taxes levied on electricity sold to an oil and gas operator for such operations, as provided in 68 O.S. §1357(35).

(b) **Distinction from designation as enhanced recovery project pursuant to application for underground injection, spacing or unitization.** The designation of enhanced recovery methods on a spacing unit or lease pursuant to this Part shall be separate and distinct from the designation of an enhanced recovery project otherwise provided by Commission rules. The Commission's designation pertaining to the instant sales tax exemption shall be made by application under this Part and not as a result of an application for: (1) enhanced recovery project designation under OAC 165:10-5-4; (2) drilling and spacing units under OAC 165:10-15-1 and OAC 165:10-15-18 (oil allowables), OAC 165:10-17-2 through 10-17-16 (gas allowables), OAC 165:10-3-28 (horizontal drilling), or any spacing application under OAC 165:10-1-22; or (3) unitization under Title 52 O.S., § 287.1 et seq. and OAC 165:5-7-20.

[Source: Added at 23 Ok Reg 2229, eff 7-1-06; Amended at 36 Ok Reg 534, eff 8-1-19]

165:10-21-96. Definitions

The following words and terms, when used in this Part, shall have the following meaning, unless the context clearly indicates otherwise:

"Enhanced recovery methods" means production methods by which oil is produced, or is attempted to be produced, including but not limited to, increased pressure in a producing formation through use of water or saltwater if the electrical usage is associated with and necessary to the operation of equipment required to inject or circulate fluids in the producing formation for the purpose of forcing oil or petroleum into a wellbore for eventual recovery and production from the wellhead.

[Source: Added at 23 Ok Reg 2229, eff 7-1-06]

165:10-21-97. Qualification procedure

(a) **Applicable operations.** The provisions of this Section establish criteria for designating enhanced recovery methods on a spacing unit or lease, beginning July 1, 2006, for the purpose of an exemption from sales taxes levied on electricity sold to an oil and gas operator for such operations.

(b) **Application to the Oklahoma Corporation Commission.** An operator seeking the designation of enhanced recovery methods on a spacing unit or lease pursuant to this Part shall file an application with the Corporation Commission on a Form 1535 for a determination that the operations qualify for the exemption, as provided in 68 O.S. §1357(35). The operator shall attach to the Form 1535 a copy of the following information:

(1) Production test or other appropriate data showing the total content of oil recovered after the use of enhanced recovery methods does not exceed one percent (1%) by volume. For this purpose, a Corporation Commission Form 1535 may be filed with the sales tax exemption application to demonstrate the daily rate and total content of oil recovery by volume from the spacing unit or lease prior to use of enhance recovery methods.

(2) Geological structure and isopach maps for the producing formation and any additional engineering and geological data or information deemed necessary by the Conservation Division to evaluate the application.

(3) A map and schematic diagram of the producing wells, underground injection or disposal wells, and other water injection or circulating equipment associated with the enhanced recovery methods on a spacing unit or leased covered by the application.

(c) Administrative approval and determination.

(1) If the application is administratively approved, a copy shall be forwarded to the operator.

(2) To obtain the tax exemption, the operator should contact the Director's Office, Taxpayer Assistance Division, Oklahoma Tax Commission, 2501 N. Lincoln Blvd., Oklahoma City, OK 73194.

(3) Any data, maps and other information submitted with the Form 1535 for designation that enhanced recovery methods on a spacing unit or lease qualify for the exemption provided in this Part shall be held as confidential information by the Conservation Division and Corporation Commission, and upon approval of the application, shall be returned to the applicant or destroyed.

SUBCHAPTER 24. MARKET SHARING

165:10-24-1. Scope

(a) This Subchapter implements the Natural Gas Market Sharing Act of 1992, codified at 52 O.S. Section 581, et seq.

(b) This Subchapter establishes a procedure whereby an owner in a well may compel the well operator or other designated marketer to either sell gas on the owner's behalf or find a market for that owner's gas.

(c) This Subchapter shall apply to the sale of natural gas from a well except for:

(1) any sale under a gas contract for more than one year, entered into before January 1, 1985 (including any successor, replacement or roll-over contract entered into before January 1, 1990) provided that any participating mineral owners who were sharing in a contract on January 1, 1992, and continue to share in such a contract on September 1, 1992, are subject to this Subchapter;

(2) any sale under a contract which provides for:

- (A) an initial term of more than three years; and
 - (B) a guarantee or warranty of delivery of fixed volumes without limitation on specified wells or reserves; and
 - (C) delivery of such volumes;
- (3) any sale of natural gas liquids extracted by mechanical processing of the natural gas stream for removal of liquid components other than methane.
- (d) Nothing in this Subchapter shall change the obligation of a first purchaser of production under an existing gas contract unless otherwise agreed to by the parties.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93; Amended at 11 Ok Reg 3699, eff 7-11-94]

165:10-24-2. Definitions

The following words or terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Designated marketer" means the operator of the well or a producing owner substituted for the operator as provided in 165:10-24-5.

"Electing owner" means any owner who elects to produce and market its share of production pursuant to the provisions of this Subchapter.

"Nonexempt sales" means those gas sales which are subject to the provisions of this Subchapter and do not qualify for exemptions as set forth in 165:10-24-1(c) and 165:10-24-3(b).

"Overproduced owner" means an owner who has produced and sold a volume of gas in excess of his working interest percentage of cumulative sales from a well.

"Owner" means a person or persons who own a working interest in a well.

"Producing owner" means an owner who produces and sells gas from a well for its own account.

"Working interest" means the interest in a well, calculated prior to deduction for royalty, overriding royalty and other non-cost bearing interests burdening production, entitling the owner thereof to drill for and produce oil and gas, including the interest of a participating mineral owner to the extent set forth in Section 87.1 of Title 52 of the Oklahoma Statutes.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-24-3. Election to market share

(a) An owner eligible to market share as to a particular well, may elect to market share as to such well by sending written notice to the designated marketer for the well.

(b) An owner may not elect to market share as to a particular well if as to such well:

- (1) said owner is subject to a balancing agreement (or other written agreement expressly providing for gas balancing or the taking, sharing, marketing of gas); or
- (2) the term has yet to expire for a gas contract, where the owner terminated the contract for value received; or
- (3) said owner terminated market sharing within the previous 12 months; or
- (4) said owner is currently over-produced; or
- (5) the designated marketer is relieved from the duty to market share pursuant to 165:10-24-4(g) or 165:10-24-4(i) and (j).

(c) An election to market share shall be effective on the first day of the month following 60 days from receipt of the election by the designated marketer.

(d) The well operator shall serve as the designated marketer until appointment of a substitute.

(e) An owner may terminate his election by sending writing notice to the designated marketer. Notice of termination is effective on the first day of the month following 60 days after receipt of the notice.

(f) Copies of all market sharing elections and notices shall be sent to the well operator, if said operator is not the designated marketer.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-24-4. Duties and accounting

(a) The designated marketer shall find an independent, non-affiliated purchaser for the electing owner's gas, or the designated marketer shall produce and sell said gas for the account of the electing owner.

(b) During market sharing, the designated marketer shall have the right to produce and sell and electing owner's gas, without further notice and consent except in those cases where the designated marketer has secured an independent non-affiliated purchaser for the gas production of such electing owner.

(c) If the designated marketer produces and sells the electing owner's gas for the account of the electing owner, the designated marketer shall account to the electing owner at the average price, weighted by volume, received by the marketer for all of the designated marketer's non-exempt sales from the well for that month, less post production cost and expenses required to render the gas marketable and to sell and deliver the gas to market, and net of all reasonable marketing costs, expenses and administrative fees. Volumetric allocation between the designated marketer and the electing owner shall be in proportion to their working interests in the well, with one exception. If the owner's proportionate production interest is different from his working interest, the proportionate production interest shall be used.

(d) Disbursement of gas sales proceeds shall be subject to the Production Revenue Standards Act of 1992 (52 O.S. Section 570.1, et seq.).

(e) The designated marketer shall not be considered as a fiduciary to any electing owner or to any owner with an interest burdening the electing owner's interest. The designated marketer shall not be liable for losses absent bad faith, gross negligence or willful misconduct.

(f) Market sharing according to this Subchapter shall not confer any contract rights to an electing owner or his assigns, either directly or as third party beneficiaries.

(g) For a gas contract with a term in excess of one year, the designated marketer may require an electing owner to either agree in writing to be bound by the contract terms or forego market sharing under that contract. Absent a confidentiality provision in said gas contract, the designated marketer shall send a copy of the gas contract to each electing owner.

(1) After receipt of the contract, the electing owner shall have 30 days in which to:

- (A) send written consent to the contract terms, or
- (B) provide a written termination of market sharing or
- (C) elect a new designated marketer.

(2) If the electing owner fails to so respond, his election to market share shall be deemed terminated.

(h) If the designated marketer ceases to sell gas from the well and therefore has no sales, the designated marketer:

(1) may:

- (A) notify the electing owners in writing that it has no sales and that the electing owners must elect a new designated marketer, or
- (B) locate a non-affiliated purchaser for the electing owners.

(2) shall not be responsible for sharing sales with electing owners as it has no sales. If such a designated marketer again begins to produce and market gas from the well, then the electing owners may re-elect it as designated marketer.

(i) If the designated marketer provides the electing owner with a sales contract with a gas purchaser, the designated marketer shall be relieved of the duty to market share with the electing owner to the extent that the terms of said contract provide for the purchase of the electing owner's share of each withdrawal from the well during the contract period, provided:

(1) The designated marketer is not an affiliate of the gas purchaser: said term "affiliate" being defined at 18 O.S. Section 1148A(2); and

(2) The contract is of a type and with terms generally offered at the time to other producers for gas production from wells in the common source of supply; and

(3) If the designated marketer operates and controls a gathering line to the well, it does not prohibit access to downstream transportation or impose unjust or discriminatory gathering fees or tariffs upon the electing owner; and

(4) Before discontinuing market sharing if it had begun, the designated marketer provides the electing owner with at least thirty days in which to accept or reject the offer for said contract.

(j) In so far as the exemption established by subsection (i) of this Section, if the designated marketer fulfills each of the foregoing conditions, it shall be relieved from the duty to market share with the electing owner for a time period hereafter described as the "exemption period", calculated as follows:

(1) If the electing owner enters into said contract with said purchaser, then the exemption period shall be the duration of the contract as originally offered to the electing owner or the duration of the contract as entered into by the electing owner, whichever is greater;

(2) If the electing owner fails to enter into said contract for any reason, then the exemption period shall be the duration of the contract period as initially offered to the electing owner or twelve months, whichever is less.

(k) During the exemption period as determined in subsection (j) of this Section, failure to enter into said contract shall not be grounds for election or appointment of an additional designated marketer to market share with the electing owner with respect to volumes of gas which would have been purchased if the electing owner had entered into the said contract as initially offered to the electing owner.

(l) Upon request, the designated marketer or electing owner shall provide the first purchaser of production with information concerning the election to market share and the electing owner's share of monthly production.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-24-5. Replacement of the designated marketer

A new designated marketer may be appointed by a majority vote of the remaining market sharing owners. If an electing owner does not agree to the terms of a gas contract with a term greater than one year, the electing owner may elect a new designated marketer unless said election is prohibited by 165:10-24-4(i) and (j). Otherwise, substitution of the designated marketer shall occur not more than once every twelve months.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-24-6. Fees

- (a) The designated marketer may charge each electing owner with an administrative fee for marketing the electing owner's share of production. Said fee shall be assessed monthly on a per-well basis. It shall be based on a formula described in this Section subject to annual adjustments as provided below. Said formula consists of 2.5% of the electing owner's monthly share of proceeds, but not less than twenty dollars nor more than seventy-five dollars, unless application of the annual adjustment factor provides a different maximum amount. The maximum amount of the fee permitted by this Section shall be adjusted as of the first day of May each year following May 1, 1993. The annual adjustment shall be computed by multiplying the rate currently in use by the percentage of increase or decrease in the annual overhead adjustment factor established by the Council of Petroleum Accountants Societies at its annual spring meeting for purposes of adjusting the combined fixed-rate overhead charges against joint operations in a well.
- (b) If the designated marketer produces and sells gas for the account of the electing owner, the designated marketer may charge the electing owner or deduct said fee from the electing owner's share of the undistributed proceeds of production.
- (c) Administrative fees under this Section shall be in addition to and separate from any and all post-production costs and expenses, including but not limited to reasonable marketing costs and expenses which may also be deducted from the proceeds payable to eligible electing owners.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

SUBCHAPTER 25. ESCROWED ACCOUNTS FOR POOLED MONIES

165:10-25-1. Definitions

The following words or terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Escrow account" means an account established in a financial institution and held in the name of the holder and an escrow agent wherein each owner is federally insured to One Hundred Thousand Dollars (\$100,000.00).

"Financial institution" means a federally or state chartered bank, savings and loan, or credit union.

"Holder" means any person in possession of royalties, bonus payments, or other monies directed to be paid under a Commission pooling order and which cannot be paid because the persons entitled thereto are unknown or cannot be located.

"Owner" means the last known record titleholder of a mineral interest which is subject to a Commission pooling order.

"Person" means any individual, partnership, joint stock associations, trust, cooperative, unincorporated association, or corporation.

165:10-25-2. Escrow account required

- (a) Each pooling order which pools interest of unknown or unlocated owners shall contain language substantially similar to the following: "If any payment of bonus, royalty payments, or other payments due and owing under this order cannot be made because the person entitled thereto cannot be located or is unknown, then said bonus, royalty payments or other payments shall be paid into an escrow account in a financial institution within ninety (90) days after this order and shall not be commingled with any funds of the applicant or operator. Provided however, that the

commission shall retain jurisdiction to grant to financially solid and stable holders an exception to the requirement that such funds be paid into an escrow account with a financial institution and permit such holder to escrow such funds within such holder's organization. Responsibility for filing reports with the Commission as required by law and commission rule as to bonus, royalty or other payments escrowed hereunder shall be with the applicable holder. Such escrowed funds shall be held for the exclusive use of, and the sole benefit of, the person entitled thereto. It shall be the responsibility of the operator to notify all other holders of this provision and of the Commission rules regarding unclaimed monies under pooling orders".

(b) Each pooling order issuing upon an application filed on or after July 1, 1984, shall contain, in addition to the foregoing language, an attached exhibit listing all parties or interests which are unknown or cannot be located, together with each party's last known address, if available.

165:10-25-3. Escrow account requirements

(a) Monies which are directed to be paid under a Commission pooling order and which cannot be paid because the persons entitled thereto are unknown or cannot be located shall be placed into escrow accounts in a financial institution. The holder shall choose the institution. The holder and the financial institution may make such arrangements as are necessary and appropriate for the establishment of the account. Service charges, fees, and costs may be deducted from any interest generated by the monies but in no event shall such charges, fees, and costs be deducted from the principal. Any financially solid and stable holder may apply to the commission for an exception to the requirement to place monies into escrow accounts in a financial institution. The granting of an exception shall be within the sole discretion of the Commission and may only be granted upon the filing of a proper application therefor pursuant to notice given to the Manager of the Mineral Owners Escrow Account by mail at least ten days prior to the hearing and by publication one time at least 15 days prior to the hearing in a newspaper of general circulation in Oklahoma County and in a newspaper of general circulation in the county where the holder's principal office in the state is located. The granting of an exception shall not exempt the holder from any other requirements set forth in this Subchapter.

(b) Only one account need be established by each holder. If only one account is established, a record shall be made of deposits and withdrawals for each person for whom monies are being held. Either the holder or the financial institution may keep the deposit/withdrawal record.

(c) An application for an exception under (a) of this Section shall state that the holder has proof by the holder's annual financial statement that it is a solid and stable holder. The holder must introduce its annual financial statement into evidence in the cause and the order, if one is issued, shall show that the annual financial statement was in fact introduced into evidence and considered by the Administrative Law Judge in making the determination to grant holder's request for an exemption under (a) of this Section, and holder shall submit a current financial statement on an annual basis thereafter.

(d) Withdrawals from such escrow account by the holder may only be made for the following purposes:

- (1) To pay the rightful recipient of the monies upon presentation of a proper claim.

(2) To submit and pay to the commission the principal of all monies placed in escrow pursuant to 165:10-25-6.

(3) To correct an overpayment or other mistake made in the distribution of monies by the holder.

[Source: Amended at 9 Ok Reg 2337, eff 6-25-92]

165:10-25-4. Payment to owner

The holder shall have a designated officer or employee to whom claims upon the escrow account may be made. The holder shall promptly pay the appropriate sum to any person showing the holder sufficient proof of ownership and proof of identity as may be determined in good faith by the holder. The holder shall report any payments made on his annual report to the Commission.

165:10-25-5. Reports to the Commission

Each holder shall submit a report for persons who cannot be located or are unknown and for whom monies are being held in escrow no later than 30 days after such holder's annual reporting date. Each holder's initial report shall be filed no later than one year and 30 days after the date of the issuance of the first pooling order subject to this Subchapter. Such reports shall be filed each year that any monies are held in escrow, until the well is plugged.

165:10-25-6. Payment to the Commission

(a) No later than 30 days after the annual reporting date of each year, the holder shall submit to the Commission the principal of all monies placed in escrow accruing under the orders issued during the first year, and all subsequent years where the sum exceeds \$100.00 for any one person.

(b) If the holder has placed in escrow less than \$100.00 for any one person, the holder may follow the procedures for deposit, or maintain the funds in escrow. If the amount accumulates to over \$100.00 for any one person after any annual reporting date, it shall be submitted to the Commission on the next annual reporting date.

(c) Payments shall be tendered to the Finance Office of the Commission. Payments shall be made by cashier's check, certified check, or money order made payable to the "Oklahoma Corporation Commission".

165:10-25-7. Affidavit of compliance

In addition to the Plugging Record (Form 1003) and Completion Report (Form 1002A) required under 165:10-11-7, the operator shall file a compliance affidavit. No plugging bond shall be released until after the compliance affidavit is filed.

165:10-25-8. Forms

The Commission may issue appropriate forms to implement the provisions of this Subchapter.

165:10-25-9. Release from liability

Any holder who pays or delivers monies to the Commission required to be paid under this Subchapter shall be relieved of all liability for the monies so paid or delivered for any claim which then exists or thereafter may arise or be made in respect to such monies.

165:10-25-10. Construction

This Subchapter shall not be construed as limiting the Commission's authority to grant an exception to any rule in this Subchapter, unless precluded by law.

SUBCHAPTER 27. PRODUCTION REVENUE STANDARDS

165:10-27-1. Scope

This Subchapter implements the Production Revenue Standards Act of 1992, codified at 52 O.S. Section 570.1, et seq. It shall apply to all producing wells as set forth in the Production Revenue Standards Act of 1992. However, Sections 165:10-27-4 through 165:10-27-10 shall not apply to any well which is a part of a compulsory enhanced recovery project, or where royalty remittance is otherwise regulated by written agreement among all owners in the well. This Subchapter is intended to supplement and clarify as needed the language in the statutes.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-27-2. Effective date [REVOKED]

[Source: Added at 10 Ok Reg 2601, eff 6-25-93; Revoked at 11 Ok Reg 3699, eff 7-11-94]

165:10-27-3. Definitions

The following words or terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise.

"Owner" means a person or governmental entity with a legal interest in the mineral acreage under a well which entitles that person or entity to oil or gas production or the proceeds or revenues therefrom.

"Produce", "producing" and "production" mean the physical act of severance of oil and gas from a well by an owner and includes but is not limited to the sale or other disposition thereof.

"Producing owner" means an owner entitled to produce who during a given month produces oil or gas for its own account or the account of subsequently created interests as they burden its interest.

"Proportionate production interest" means that interest in production which a working interest owner is entitled to produce in order to adjust for shifting of royalty burdens among working interest owners under the royalty provisions of 52 O.S. Sections 570.1, et seq., and is equal to the quotient of:

(A) the sum of a working interest owner's net revenue interest plus the net revenue interests of any subsequently created interests as they burden such owner's working interest,

(B) divided by the remainder of one (1) less the royalty share.

"Proportionate royalty share" means the percentage of the royalty share owned by a royalty interest owner calculated by dividing such owner's royalty interest in a well by the royalty share.

"Royalty interest" means the entirety of the percentage interest in production or proceeds therefrom:

(A) reserved or granted by a mineral interest owner exclusive of any interest defined as a working interest or a subsequently created interest, or

(B) otherwise provided or ascribed to a mineral interest owner by statute, rule, order or operation of law.

"Royalty interest in a well" means an owner's royalty interest multiplied by the quotient of:

(A) the gross mineral acres under the well attributable to such interest, divided by

(B) the total mineral acres under the well.

"Royalty proceeds" means the share of proceeds or other revenue derived from or attributable to any production of oil and gas attributable to the royalty share, but shall not include payments of bonus, delay rentals, shut-in royalties or any additional royalty payable to the Commissioners of the Land Office or other governmental entity, pursuant to and valued according to the terms of its oil and gas lease, which is calculated separately from the royalty portion of actual proceeds from the sale of oil or gas.

"Royalty share" means the percentage of the well equal to the sum of all royalty interests in the well.

"Share of production" means the monthly entitlement to produce belonging to a producing owner.

"Shipper" means any entity who contracts with a transporter to move gas through the transporter's system.

"Subsequently created interest" means any interest carved from a working interest other than a royalty interest. In addition to the royalty interest contained in a lease, a non-participatory interest created by a working interest owner for the benefit of a mineral interest owner in excess of a one-eighth (1/8) royalty interest may, by separate agreement other than the oil and gas lease, be a subsequently created interest and thereby not be communitized under the terms of the Production Revenue Standards Act only if there is clear and unambiguous language expressing that intent in the creating document. The additional royalty payable to the Commissioners of the Land Office or other governmental entity pursuant to and valued according to the terms of its oil and gas lease, which is calculated separately from the sale of oil or gas, shall also be a subsequently created interest and thereby shall not be communitized under 52 O.S. Section 570.1, et seq.

"Well" means an oil or gas well, and shall include:

(A) a well having uniform ownership as to all producing zones, or

(B) a drilling and spacing unit having uniform ownership wherein multiple wells producing gas are commonly metered, and

(C) each separately metered producing zone within a single wellbore wherein ownership varies by zone.

"Working interest" means the interest in a well entitling the owner thereof to drill for an produce oil and gas, including but not limited to the interest of a participating mineral owner to the extent set forth in Section 87.1 of Title 52 of the Oklahoma Statutes.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93; Amended at 11 Ok Reg 3699, eff 7-11-94]

165:10-27-4. Well operator records

Each well operator shall establish or cause to be established records showing the production allocations and payments to each interest owner in the well. For purposes of such records, the working interest owners shall provide the well operator with accounting and remittance information as required by statute. At a minimum, the required information shall consist of the name, address, interest

amount and tax identification number of each royalty owner along with payment status. Each working interest owner shall provide said information in writing within 60 days of receipt of a written information request from the well operator. Updated information shall be provided by a working interest owner within 60 days after receipt of notice of a change.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93; Amended at 11 Ok Reg 3699, eff 7-11-94]

165:10-27-5. Pre-sale nominations

(a) Any producing owner marketing production separately from the well operator shall send pre-production nominations to the well operator for his withdrawals. A nomination shall be due five business days prior to the month in which the nomination is to be effective, but earlier if required by the first purchaser or transporter. The nomination shall consist of the name of the first purchaser or shipper, shipper contract number and the volumes of gas nominated for production for such producing owner's account.

(b) Nothing in this Section shall supersede or limit the operator's right to control gas nominations and allocations under a joint operating agreement, separate balancing agreement or Commission order.

(c) The owner of the gas meter shall confirm all nominations with the operator of the well no later than the last business day prior to the month in which production occurs.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93; Amended at 11 Ok Reg 3699, eff 7-11-94]

165:10-27-6. Entitlement

Each producing owner in a well shall be entitled to produce each month his proportionate production interest subject to balancing restrictions created by statute, rule, agreement or operation of law.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-27-7. Post-sale reports

(a) Within sixty days after the end of the month of production, each producing owner shall report and account to the operator of the well, the identity of the first purchaser or shipper of the gas and information specified in 165:10-27-13.

(b) Within fifteen days after the end of the month of production, each owner of a gas meter taking gas solely from a gathering system shall provide upon first request by the owner of such gathering system and thereafter, the gross volume of gas measured by such meter both in MCF and British Thermal Unit equivalent.

(c) Within twenty days after the end of the month of production, each owner of a gas meter shall provide or cause to be provided in writing to the operator of the well, the gross volume of gas measured by such meter, both in MCF and British Thermal Unit equivalent, and the volume of gas allocated at the meter to each first purchaser or shipper and each contracted producing owner that sold gas to the owner of the gas meter. Each meter owner shall, within the same time period, furnish each first purchaser or shipper the volume of gas allocated at the meter to that first purchaser or shipper. However, if the gas processing plant operator is performing the allocations, then within ten days after the end of the month of production, the owner of the pipeline residue gas meter shall provide, upon first request by the processing plant operator and thereafter, the volume in MCF and British Thermal Unit equivalent measured through its meter as required by the gas processing plant operator for its allocations under this subsection.

(d) As an alternative to supplying the operator with information in the manner prescribed by subsections (b) and (c) of this Section, the owner of a gas meter who has a contract with one or more producing owners, covering all of the gas flowing through its meter, may furnish monthly volume statements to the operator of the well, provided said owner of the gas meter has previously furnished the operator with names of the producing owners and the decimal interest owned by each such producing owner or owners or any method other than by decimal interest then in effect for allocating gas among the producing owners. After adopting alternative reporting under this subsection, the owner of the gas meter shall be required to supply the operator of the well with any change to the name of a producing owner, the decimal interest by a producing owner or the method, other than by decimal interest, for allocating gas among the producing owners: such change to reported by the owner of the gas meter to the operator of the well within thirty days after the owner of the gas meter receives notice of such change.

(e) Within thirty-five days after the end of the month of production, each first purchaser or shipper of gas from a gas meter shall furnish or cause to be furnished to the operator of the well, a volume allocation statement showing the volume of gas purchased from or shipper for each contracted producing owner. Within thirty days after making any retroactive gas volume adjustment for such well, the first purchaser or shipper shall furnish notice of such retroactive gas volume adjustment to the operator of the well.

(f) Any person subject to multiple reporting requirements under this Section shall not be required to re-report the same information to the operator if such information has been previously provided by such person in a different report. Such person may consolidate the required information into a single report to the operator; provided, however, that all such reporting must comply with the applicable statutory time periods for the type of information being communicated to the operator.

(g) Any first purchaser, shipper or owner of a gas meter that does not provide the information required of it by this Section shall be subject to having its takes from the well suspended by the operator of the well pursuant to 165:10-27-8.

[Source: Added at 10 Ok Reg 2601, eff 7-11-94; Amended at 11 Ok Reg 3699, eff 7-11-94]

165:10-27-8. Operator's option to confirm zero volume of gas sales because of noncompliance

(a) If a producing owner fails to timely provide the operator of the well with any of the information required by 165:10-27-4 and 165:10-27-7, or if the owner of a gas meter, first purchaser or shipper of gas fails to timely provide the operator of the well with any of the information required of it by 165:10-27-7 for the transfer, transportation, delivery or sale of gas by a producing owner, the operator of the well shall have the right, but not the obligation, to confirm zero volume of gas sales for such producing owner, and to make available for nomination and sale to other producing owners in the well, then in compliance with said Sections, all of such producing owner's share of production for the next subsequent calendar month and for each and every month thereafter of noncompliance. If the operator elects to make such producing owner's share of production available for nomination and sale, the operator shall immediately notify such producing owner by certified mail and inform such producing owner that such producing owner shall no longer have the right to nominate any volume of gas, until the next production month following the date of compliance, unless the operator of the well agrees to an earlier date. Such notice shall contain the lease or well identification, legal description, production months of noncompliance, a brief description of the noncompliance,

and a provision stating that the operator is confirming zero volume of gas sales for such producing owner. The operator shall then immediately notify each producing owner then in compliance with the aforesaid Sections and inform said producing owner about additional gas volumes available for nomination and sale. In regard to the producing owner for which the operator has confirmed zero gas sales, the operator shall also immediately notify in writing such producing owner's first purchaser or shipper, and the owner of the gas meter, and such notice shall report that such producing owner does not have the right to nominate and sell or transport any volume of gas, until the next production month following compliance, unless the operator of the well agrees to an earlier date. Such notice shall also contain the lease or well identification, legal description, a brief description of the noncompliance, and the production months of noncompliance.

(b) As soon as a noncomplying party is in compliance, but no sooner than the next production month unless otherwise agreed to, the operator of the well shall give the affected producing owner the opportunity to nominate and sell gas subject to existing agreements or by common practice within the oil and gas industry.

(c) The first purchaser or shipper and the owner of the gas meter shall be entitled to rely on and shall incorporate on a prospective basis any nomination or allocation changes pursuant to such notification from the operator under this Section. Changes pursuant to such notification may be made on a retroactive basis if so agreed to by the operator, owner of the meter, the first purchaser or shipper.

(d) The remedies provided for in this Section shall not preclude any party from pursuing the remedies available to it through the district courts, as provided by existing law, including the right of offset.

(e) All elections and notices given pursuant to the provisions of this Subchapter shall become effective as of the first day of the month following the end of any time period specified in the Production Revenue Standards Act as last amended, 52 O.S. Section 570.1, et seq.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93; Amended at 11 Ok Reg 3699, eff 7-11-94]

165:10-27-9. Designated payor for royalty distributions

(a) For royalty distributions, the well operator shall serve as payor for all proceeds of production, absent appointment of a substitute payor and/or election of a working interest owner to distribute royalties attributable to that working interest owner's sales.

(b) A substitute payor may be appointed by Commission order or by the owners owning a majority in interest of the working interest in the well. A substitute payor so appointed shall assume the rights and duties of the well operator concerning assessment of fees, royalty record maintenance and disbursement of royalties. A surety bond of \$50,000 shall be required if the substitute payor is not a working interest owner, a first purchaser of production from the well, a bank or a trust company. Such bond shall be posted with the Surety Department of the Conservation Division before receipt of sales proceeds by the substitute payor. Any such bond shall be drafted so as to compensate royalty owners if the substitute payor defaults on his disbursement obligation.

(c) A producing owner may elect to distribute royalties from his sales subject to the following conditions:

- (1) the producing owner shall provide 60 days written notice to the operator before starting or stopping the alternative procedure;
- (2) the producing owner shall assume liability for its errors;

- (3) the producing owner shall report payment information to the well operator within 30 days after each disbursement;
- (4) the producing owner cannot re-start the alternative procedure within 12 months after terminating it.

(d) For good cause shown, the Commission may cancel a producing owner's election to separately distribute royalty. Cancellation shall occur only by order after application, notice and hearing.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-27-10. Administrative fees

(a) This Section prescribes fees which may be charged by the operator of a gas producing well or substitute payor, for administrative expenses generated by the Production Revenue Standards Act.

(b) Fees shall be assessed on a per-well basis against the cost-bearing working interests in a well according to respective gross working interest. They shall not be assessed against either royalty interests or non-cost bearing working interests in the well.

(c) A one-time implementation fee shall cover any cost associated with establishing or modifying the well operator's record keeping for the well, and it shall apply to any existing gas producing well with a date of first production occurring before September 1, 1992. If operations are transferred to a different operator after assessment of the one-time implementation fee, the successor operator may not assess another implementation fee against the working interests in the well.

(d) Should any working interest owner in a well producing gas fail to fully and timely comply with the requirements of 165:10-27-4, the well operator or substitute payor shall have the right to charge against said non-complying working interest owner a late fee of two hundred-fifty dollars per affected well.

(e) An annual maintenance fee shall cover any cost associated with record keeping, issuance of gas balancing statements and any election of a producing owner regarding separate distribution of royalty proceeds. Maintenance fees shall be calculated on an annual basis using the first day of May as the anniversary date. Such fees may be prorated and billed on a monthly basis at the well operator's discretion. If a well has a date of first production after the first day of May of the calendar year, the annual maintenance fee shall be prorated based on the remaining number of months before the next anniversary date on the first day of May.

(f) No working interest owner other than the well operator shall be entitled to assess either an implementation fee or a maintenance fee.

(g) The rates for implementation fees and annual maintenance fees shall be based on the appropriate table values found in Appendix G to this Chapter, subject to annual adjustments as provided below. The appropriate table value shall be determined from a matrix using the number of working interest owners or royalty owners in a well. The table value shall be adjusted as of the first day of May each year following May 1, 1993. The annual adjustment shall be computed by multiplying the rate currently in use by the percentage of increase or decrease in the annual overhead adjustment factor established by the Council of Petroleum Accountants Societies at its annual spring meeting for purposes of adjusting the combined fixed-rate overhead charges against joint operations in a well.

(h) Any fee assessed under this Section may be billed or deducted from the working interest owner's share of undistributed proceeds of production.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-27-11. Balancing of royalty accounts

(a) In the event of a production imbalance among royalty owners in a well, the affected working interest owners may adopt a royalty payment method to balance the royalty accounts, provided it is used only to extent necessary to balance the cumulative accounts of the royalty owners, and prior notice of the plan is sent to the affected royalty owners and to the well operator along with any ongoing information necessary for said operator to discharge its duties.

(b) Nothing in this Section shall impair any balancing rights arising by contract or law.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-27-12. Record keeping

Any record required by this Subchapter shall be maintained for a period of at least five years. Upon reasonable request, the well operator or substitute payor shall make available to a royalty owner for confidential inspection a record of receipts and payment of proceeds to said royalty owner, as well as copies of information furnished to the well operator pursuant to the Production Revenue Standards Act.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

165:10-27-13. Check stub information

(a) With each royalty payment, the following information shall be provided:

- (1) lease or well identification;
- (2) month and year of sales included in the payment;
- (3) total barrels or MCF attributed to such payment;
- (4) price per barrel or MCF, including British Thermal Unit adjustment of gas sold;
- (5) gross production and severance taxes attributable to said interest;
- (6) net value of total sales attributed to such payment after deduction of gross production and severance taxes;
- (7) owner's interest in the well expressed as a decimal;
- (8) owner's share of the total value of sales attributed to such payment before any deductions;
- (9) owner's share of the sales value attributed to such payment less owner's share of the production and severance taxes.

(b) Upon payee's request, the payor shall provide a list of any other deduction from such payment.

(c) All revenue decimals shall be calculated to at least six decimal places.

(d) Gas volumes shall be measured according to 52 O.S. Section 474.

[Source: Added at 10 Ok Reg 2601, eff 6-25-93]

SUBCHAPTER 29. SPECIAL AREA RULES

165:10-29-1. Lake Atoka and McGee Creek Reservoir

(a) **Scope.** The requirements of this section will apply to wells located in the areas listed below, and will supersede all field orders related to these areas. These requirements are in addition to the Commission's existing statewide requirements. The areas controlled by this section include:

- (1) **INATOKA COUNTY**

- (A) Sections 1-35 of Township 1 North, Range 12 East;
- (B) Sections 1-18, 21-28 and 35-36 of Township 1 North, Range 13 East;
- (C) Sections 1-36 of Township 1 North, Range 14 East;
- (D) Section 6 of Township 1 North, Range 15 East;
- (E) Sections 1-5, 8-16, 20-29 and 32-36 of Township 2 North, Range 12 East;
- (F) Sections 1-36 of Township 2 North, Range 13 East;
- (G) Sections 4-9 of Township 2 North, Range 14 East;
- (H) Sections 1-2, 11-14, 23-26 and 36 of Township 1 South, Range 11 East;
- (I) Sections 2-10, 16-20, 24-25 and 30-31 of Township 1 South, Range 12 East;
- (J) Sections 1-3, 9-16, 19-30 and 32-36 of Township 1 South, range 13 East;
- (K) Sections 1-11 and 13-36 of Township 1 South, Range 14 East;
- (L) Sections 1-5, 8-17, 22-27 and 34-36 of Township 2 South, Range 13 East;
- (M) Sections 1-24 and 26-35 of Township 2 South, Range 14 East;
- (N) Sections 1-2 and 12 of Township 3 South, Range 13 East;
- (O) Sections 2-9 of Township 3 South, Range 14 East.

(2) **IN PITTSBURG COUNTY**

- (A) Sections 7, 18-22 and 25-36 of Township 2 North, Range 14 East;
- (B) Section 31 of Township 2 North, Range 15 East;
- (C) Sections 1-3, 9-16, 20-29 and 32-36 of Township 3 North, Range 12 East;
- (D) Sections 1-36 of Township 3 North, Range 13 East;
- (E) Sections 6 and 28-33 of Township 3 North, Range 14 East;
- (F) Sections 26-28 and 32-36 of Township 4 North, Range 13 East.

(3) **IN COAL COUNTY** Sections 12-14, 22-27 and 34-36 of Township 1 North, Range 11 East.

(b) **General.** The design criteria for all wells shall consider all pertinent factors for well control including formation pressures and casing setting depths such that the wellbore can be maintained under control at all times and that all surface and subsurface fresh water supplies or formations are protected.

(c) **Well site limitations.** No oil and/or gas well shall be located within 1,320 feet of the maximum water surface level contour line of either reservoir. The maximum water surface level is 609.8 feet above sea level for McGee Creek and 590 feet above sea level for Lake Atoka Reservoir.

(d) **Drill site containment.** During the drilling and completion of an oil and gas well the operator shall:

- (1) Maintain an earthen retaining wall downslope of the well, no closer than 50 feet from the wellbore, if the well is located within six (6) miles of the maximum water surface level contour line of either reservoir. The maximum water surface level is 609.8 feet above sea level for McGee Creek Reservoir and 590 feet above sea level for Lake Atoka. The retaining wall shall be constructed prior to the commencement of drilling and shall be of adequate size for the terrain involved with a minimum length of 330 feet and a minimum compacted height of two (2) feet;

(2) Maintain a diversion ditch upslope of the well. The diversion ditch shall be constructed prior to the commencement of drilling and shall be adequate to divert surface drainage water from the well location;

(3) Pump any fluid, other than storm water, trapped within the well site into steel tanks for storage and removal. Storm water may be discharged as necessary as long as there is no sheen or other visible evidence of hydrocarbons being present, the chloride concentration does not exceed 500 mg/l, and the operator maintains records of each discharge for a period of three (3) years. These records must be supplied to the Commission upon request.

(e) Production site containment.

(1) During production operations, all fluid separation and storage vessels shall be enclosed within earthen or equivalent retaining walls so that the enclosed area has a storage capacity of at least one and one-half (1.5) times the liquid capacity of the largest vessel in the storage area.

(2) Any fluid other than storm water and any storm water that cannot be discharged will be pumped into steel tanks for storage and removal. Storm water may be discharged as necessary as long as there is no sheen or other visible evidence of hydrocarbons being present, the chloride concentration does not exceed 500 mg/l, and the operator maintains records of each discharge for a period of three (3) years. These records must be supplied to the Commission upon request.

(f) Erosion control. During the drilling phase of operations, silt fencing or other suitable materials or practices shall be used on the downslope side of the drill site to control runoff from the location. The silt fencing or other suitable materials or practices used to control runoff at the location shall be maintained in a manner so as to consistently work to control run-off.

(g) Circulating and reserve pits.

(1) Steel tanks shall be used for circulating and reserve pits for all drilling operations located within one (1) mile of the maximum water surface level contour line of either reservoir. The maximum water surface level is 609.8 feet above sea level for McGee Creek Reservoir and 590 feet above sea level for Lake Atoka.

(2) Outside of the areas designated by OAC 165:10-29-1(g)(1), any pit shall be lined with a geomembrane liner that meets or exceeds each of the following specifications:

(A) be made of linear low density polyethylene;

(B) have a thickness of 20 millimeters; and

(C) conform to the test requirements prescribed in the Geosynthetic Research Institute (GRI) Test Method GM17; and

(D) The liner shall also comply with the requirements for geomembrane liners found in OAC 165:10-7-16(c)(7).

(3) No pit shall be constructed or maintained so as to receive outside runoff water and the fluid level of earthen pits shall be maintained at all times as least 24 vertical inches below the lowest point of embankment.

(4) If there is flowback during the fracing of a well, the flowback must be to steel tanks prior to being placed into a lined pit if the temperature of the flowback exceeds 150 degrees Fahrenheit.

(5) The Oklahoma Corporation Commission shall inspect all pits within the purview of these rules prior to the liner being installed. The operator shall notify the District Office at least one (1) business day prior to installation of

the liner. If the Commission has not inspected the pit within one (1) business day following the notification, the operator may proceed to install the liner.

(6) Any reserve/circulation pit shall be closed within six (6) months after drilling operations cease. Upon request by the operator, a six (6) month extension shall be granted by the District Office, after review by a field inspector to confirm the pit is in compliance with Commission requirements.

(h) **Air drilling.** When drilling with air for circulation, an unlined earthen pit to contain the wellbore cuttings is allowed, provided the chloride concentration of any fluids discharged into the pit does not exceed 1000 mg/l. Discharge of air and cuttings from the "blooey line" shall be subjected to fresh water injection or spray to eliminate, to the greatest extent possible, the drift of dust and particulates from the well site. Water and additives for liquid drilling fluid shall be maintained at the well site at all times in sufficient volumes to circulate the wellbore if needed. All water in the unlined earthen pit shall be removed and properly disposed of as soon as air drilling ceases.

(i) **Casing.** All casing shall be new or reconditioned and tested to conform to API specifications.

(1) **Surface casing.** Surface casing shall be set to a minimum depth of 700 feet, or 50 feet below the deepest treatable water, whichever depth is greater. In setting the surface casing, a minimum of six (6) centralizers shall be used in the bottom portion of the casing string.

(2) **Production casing.** Production casing of four and one-half (4.5) inches or greater OD, and all related equipment items, such as the wellhead valves, shall have a pressure rating sufficiently in excess of the highest formation pressure encountered in the well. In setting the production casing, the annular space between the wellbore and the production casing shall be filled with cement calculated to fill at least 500 feet above the shallowest planned zone to be tested. Centralizers shall be used across the planned zone(s) to be tested. The production casing shall be pressure tested to conform to OAC 165:10-3-4(g). In the event the total depth of the well is less than 500 feet, the annular space between the wellbore and the production casing shall be filled with cement calculated to fill at least that portion of the wellbore to the base of the surface casing. Centralizers shall be used across the planned zone to be tested. The production casing shall be pressure tested to comply with OAC 165:10-3-4(g).

(j) **Blowout prevention equipment.** Before drilling below the surface casing and until drilling operations are completed, a blowout preventer (BOP) with a minimum of two (2) hydraulically operated rams, one (1) blind type and one (1) pipe type to fit the drill pipe, and related well control equipment, including a manifold and a floor valve, with a working pressure that exceeds the maximum anticipated surface pressure, shall be installed, used and tested in a manner to prevent blowouts. The BOP stack shall include a drilling spool with side outlets if side outlets are not provided on the BOP body. BOPs shall be tested to the rated pressure of the blowout stack assembly. All blowout prevention equipment is to be tested prior to drilling out from the surface casing. While drilling operations are in progress, the BOP shall be actuated once each trip. When removing drill pipe from any hole that utilized drilling fluids, the annulus shall be filled with mud before the mud level drops 100 feet from surface. A Kelley-cock shall be installed below the swivel. Wells being drilled to a depth less than 4,000 feet may use annular type blowout

preventers.

(k) **Drill stem testing.** Drill stem testing shall only be allowed during daylight hours. Fluid removed from the well during testing must be flowed or pumped into steel pits or tanks and promptly removed from the location at the conclusion of testing. The formation fluids in the hole shall be reversed-out prior to the removing of the drill stem test tool from the hole.

(l) **Prevention of leakage and pollution.** Equipment, pipe, pumps, tanks, and other appurtenances used in conducting operations shall be maintained at all times to prevent leakage and the escape of saltwater, oil and other deleterious substances. All oil, water and deleterious substances from wet strings of tubing shall be drained into steel tanks. All cellars with oil and oil sumps shall be promptly pumped out.

(m) **Exceptions to this section.** When good cause is shown, and when it is not reasonably likely to result in any pollution to either reservoir, an administrative exception to a requirement of this section may be granted by the Oklahoma Corporation Commission. Notice of an application for an exception to this section shall be sent at least 15 days in advance to: (1) the manager of the District 4 Office of the Oil and Gas Conservation Division of the Oklahoma Corporation Commission; (2) the General Manager of the Oklahoma City Water Utilities Trust, 420 W. Main, Suite 500, Oklahoma City, Oklahoma 73102; and (3) the General Manager of the McGee Creek Authority, 420 W. Main, Suite 500, Oklahoma City, Oklahoma 73102. A 15-day period from the date of the written notice should be established for any party to file an objection to such an administrative application. If an objection is filed, a full hearing shall be held on the merits.

(n) **Other.** In reviewing an application for a permit-to-drill (form 1000), the Technical Services Department of the Oklahoma Corporation Commission will determine whether or not the well lies within any of the areas designated in OAC 165:10-29-1(c), OAC 165:10-29-1(d)(1) and OAC 165:10-29-1(g)(1).

[Source: Added at 25 Ok Reg 2187, eff 7-11-08]

165:10-29-2. Alternative location requirements for horizontal well units

(a) **Scope and effect.** The well location requirements of this Section apply to horizontal wells completed in horizontal well units in designated common sources of supply as specified in this Section. Horizontal wells covered by this Section are subject to OAC 165:10-3-28 and other applicable Commission rules except as provided in this Section.

(b) Woodford shale-north and south laterals.

(1) This subsection applies to horizontal wells completed in the Woodford shale common source of supply where the lateral runs north and south.

(2) The completion interval of a horizontal well subject to this subsection shall be located not less than the minimum distance from the boundary of a standard or non-standard horizontal well unit as follows:

(A) Not less than 330 feet from an east or west unit boundary.

(B) Not less than 165 feet from a north or south unit boundary.

(c) Woodford shale-east and west laterals.

(1) This subsection applies to horizontal wells completed in the Woodford shale common source of supply where the lateral runs east and west.

(2) The completion interval of a horizontal well subject to this subsection shall be located not less than the minimum distance from the boundary of a standard or non-standard horizontal well unit as follows:

(A) Not less than 165 feet from an east or west unit boundary.

(B) Not less than 330 feet from a north or south unit boundary.

(d) **Additional review.** Laterals outside the parameters in subsections (b) and (c) may require additional review by the Technical Services Department.

165:10-29-3. Rush Springs Sandstone Groundwater Basin

(a) **Scope.** The requirements of this section will apply to the areas listed below, and will supersede Commission field order number 251978 related to these areas. These requirements are in addition to the Commission's existing statewide requirements.

The areas controlled by this section include:

(1) IN BECKHAM COUNTY

(A) Sections 1-18, 21-25 and 36 of Township 8 North, Range 21 West;

(B) Sections 1-5, and 8-12 of Township 8 North, Range 22 West;

(C) Sections 19 and 26-36 of Township 9 North, Range 21 West;

(D) Sections 21-28 and 33-36 of Township 9 North, Range 22 West.

(2) IN BLAINE COUNTY

(A) Sections 2-11, 15-22 and 26-35 of Township 13 North, Range 12 West;

(B) All sections of Township 13 North, Range 13 West;

(C) Sections 2-35 of Township 14 North, Range 12 West;

(D) All sections of Township 14 North, Range 13 West;

(E) Sections 6-8, 16-21 and 27-35 of Township 15 North, Range 12 West;

(F) All sections of Township 15 North, Range 13 West;

(G) Sections 30 and 31 of Township 16 North, Range 12 West;

(H) Sections 3-11 and 13-36 of Township 16 North, Range 13 West;

(I) Sections 5-8, 16-21 and 28-34 of Township 17 North, Range 13 West;

(J) Sections 31 and 32 of Township 18 North, Range 13 West.

(3) IN CADDO COUNTY

(A) All sections of Township 5 North, Range 9 West;

(B) All sections of Township 5 North, Range 10 West;

(C) Sections 1-17, 20-29 and 33-36 of Township 5 North, Range 11 West;

(D) Sections 1, 2 and 12 of Township 5 North, Range 12 West;

(E) Sections 2-36 of Township 6 North, Range 9 West;

(F) All sections of Township 6 North, Range 10 West;

(G) All sections of Township 6 North, Range 11 West;

(H) Sections 1-5, 7-18, 21-27, 35 and 36 of Township 6 North, Range 12 West;

(I) Sections 12 and 13 of Township 6 North, Range 13 West;

(J) Sections 31-35 of Township 7 North, Range 9 West;

(K) Sections 4-10, 15-23 and 25-36 of Township 7 North, Range 10 West;

(L) All sections of Township 7 North, Range 11 West;

(M) Sections 1-30 and 32-36 of Township 7 North, Range 12 West;

(N) Sections 1-18 and 21-24 of Township 7 North, Range 13 West;

(O) Sections 6, 7, 17-20 and 28-33 of Township 8 North, Range 10 West;

(P) All sections of Township 8 North, Range 11 West;

- (Q) All sections of Township 8 North, Range 12 West;
- (R) All sections of Township 8 North, Range 13 West;
- (S) Sections 3-11, 14-23 and 26-36 of Township 9 North, Range 11 West;
- (T) All sections of Township 9 North, Range 12 West;
- (U) All sections of Township 9 North, Range 13 West;
- (V) Sections 6-9, 14-23, 26-30 and 32-34 of Township 10 North, Range 9 West;
- (W) Sections 1-27 of Township 10 North, Range 10 West;
- (X) Sections 1-8, 10-13, 17-20 and 28-33 of Township 10 North, Range 11 West;
- (Y) All sections of Township 10 North, Range 12 West;
- (Z) All sections of Township 10 North, Range 13 West;
- (AA) All sections of Township 11 North, Range 11 West;
- (BB) All sections of Township 11 North, Range 12 West;
- (CC) All sections of Township 11 North, Range 13 West;
- (DD) Sections 4, 5, 7-9 and 14-36 of Township 12 North, Range 11 West;
- (EE) Sections 2-36 of Township 12 North, Range 12 West;
- (FF) All sections of Township 12 North, Range 13 West.

(4) IN CANADIAN COUNTY

- (A) Sections 16-21 and 28-30 of Township 11 North, Range 9 West;
- (B) Sections 5-11 and 13-35 of Township 11 North, Range 10 West;
- (C) Section 31 of Township 12 North, Range 10 West.

(5) IN COMANCHE COUNTY

- (A) Sections 1-17, 21-27, 35 and 36 of Township 3 North, Range 9 West;
- (B) Sections 1, 2 and 12 of Township 3 North, Range 10 West;
- (C) All sections of Township 4 North, Range 9 West;
- (D) Sections 1-29 and 33-36 of Township 4 North, Range 10 West;
- (E) Sections 1-4 and 11-13 of Township 4 North, Range 11 West.

(6) IN CUSTER COUNTY

- (A) All sections of Township 12 North, Range 14 West;
- (B) All sections of Township 12 North, Range 15 West;
- (C) All sections of Township 12 North, Range 16 West;
- (D) Sections 1-28 and 34-36 of Township 12 North, Range 17 West;
- (E) Sections 1-4 and 11-13 of Township 12 North, Range 18 West;
- (F) All sections of Township 13 North, Range 14 West;
- (G) All sections of Township 13 North, Range 15 West;
- (H) All sections of Township 13 North, Range 16 West;
- (I) All sections of Township 13 North, Range 17 West;
- (J) Sections 1-30 and 32-36 of Township 13 North, Range 18 West;
- (K) Sections 1-5, 9-15 and 24 of Township 13 North, Range 19 West;
- (L) All sections of Township 14 North, Range 14 West;
- (M) All sections of Township 14 North, Range 15 West;
- (N) All sections of Township 14 North, Range 16 West;
- (O) All sections of Township 14 North, Range 17 West;
- (P) All sections of Township 14 North, Range 18 West;
- (Q) All sections of Township 14 North, Range 19 West;

(R) Sections 1-3, 10-14 and 23-25 of Township 14 North, Range 20 West;

(S) All sections of Township 15 North, Range 14 West;

(T) All sections of Township 15 North, Range 15 West;

(U) All sections of Township 15 North, Range 16 West;

(V) All sections of Township 15 North, Range 17 West;

(W) All sections of Township 15 North, Range 18 West;

(X) All sections of Township 15 North, Range 19 West;

(Y) Sections 1-3, 10-15, 22-27 and 34-36 of Township 15 North, Range 20 West.

(7) IN DEWEY COUNTY

(A) All sections of Township 16 North, Range 14 West;

(B) All sections of Township 16 North, Range 15 West;

(C) All sections of Township 16 North, Range 16 West;

(D) All sections of Township 16 North, Range 17 West;

(E) All sections of Township 16 North, Range 18 West;

(F) All sections of Township 16 North, Range 19 West;

(G) Sections 1-3, 10-15, 22-27 and 34-36 of Township 16 North, Range 20 West;

(H) All sections of Township 17 North, Range 14 West;

(I) All sections of Township 17 North, Range 15 West;

(J) All sections of Township 17 North, Range 16 West;

(K) All sections of Township 17 North, Range 17 West;

(L) All sections of Township 17 North, Range 18 West;

(M) All sections of Township 17 North, Range 19 West;

(N) Sections 12-14, 23-26, 35 and 36 of Township 17 North, Range 20 West;

(O) Sections 31-36 of Township 18 North, Range 14 West;

(P) Sections 31-36 of Township 18 North, Range 15 West;

(Q) Sections 31-36 of Township 18 North, Range 16 West;

(R) Sections 31-36 of Township 18 North, Range 17 West;

(S) Sections 31-36 of Township 18 North, Range 18 West;

(T) Sections 31-36 of Township 18 North, Range 19 West.

(8) IN GRADY COUNTY

(A) Sections 19, 20 and 29-32 of Township 3 North, Range 6 West;

(B) All sections of Township 3 North, Range 7 West;

(C) All sections of Township 3 North, Range 8 West;

(D) Sections 4-36 of Township 4 North, Range 7 West;

(E) All sections of Township 4 North, Range 8 West;

(F) Sections 27-29 and 31-34 of Township 5 North, Range 7 West;

(G) Sections 2-11, 14-23 and 26-36 of Township 5 North, Range 8 West;

(H) Sections 7-11, 14-23 and 25-26 of Township 6 North, Range 8 West.

(9) IN KIOWA COUNTY

(A) Sections 1-6 and 9-14 of Township 7 North, Range 14 West;

(B) Sections 1-3 of Township 7 North, Range 15 West;

(C) All sections of Township 8 North, Range 14 West.

(10) IN STEPHENS COUNTY

(A) Sections 5 and 6 of Township 2 North, Range 6 West;

(B) Sections 1-12 of Township 2 North, Range 7 West;

- (C) Sections 1-6 and 10-12 of Township 2 North, Range 8 West;
- (D) Section 1 of Township 2 North, Range 9 West.

(11) IN WASHITA COUNTY

- (A) Sections 1-6 of Township 7 North, Range 14 West;
- (B) All sections of Township 8 North, Range 14 West;
- (C) All sections of Township 8 North, Range 15 West;
- (D) Sections 1-30, 35 and 36 of Township 8 North, Range 16 West;
- (E) Sections 1-30 of Township 8 North, Range 17 West;
- (F) Sections 1-26 of Township 8 North, Range 18 West;
- (G) Sections 1-24, 30 and 31 of Township 8 North, Range 19 West;
- (H) All sections of Township 8 North, Range 20 West;
- (I) All sections of Township 9 North, Range 14 West;
- (J) All sections of Township 9 North, Range 15 West;
- (K) Sections 1-5, 8-17 and 20-36 of Township 9 North, Range 16 West;
- (L) Sections 31-36 of Township 9 North, Range 17 West;
- (M) Sections 31-36 of Township 9 North, Range 18 West;
- (N) Sections 31-36 of Township 9 North, Range 19 West;
- (O) Sections 31-36 of Township 9 North, Range 20 West;
- (P) All sections of Township 10 North, Range 14 West;
- (Q) All sections of Township 10 North, Range 15 West;
- (R) Sections 1-5, 8-17, 20-29 and 32-36 of Township 10 North, Range 16 West;
- (S) All sections of Township 11 North, Range 14 West;
- (T) All sections of Township 11 North, Range 15 West;
- (U) Sections 1-30 and 32-36 of Township 11 North, Range 16 West;
- (V) Sections 1, 2 and 11-13 of Township 11 North, Range 17 West.

(b) **Commercial pits prohibited.** The construction, enlargement, reconstruction or operation of any commercial pit (as defined in OAC 165:10-9-1) in any area listed in subsection (a) above, is prohibited.

CHAPTER 15. FUEL INSPECTION

[Authority: 17 O.S., §§ 306(12), 307, 322, 342, and 347]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:15-1-1. Purpose

The purpose of this Chapter is to provide a comprehensive regulatory program governing the sale, storage, and inspection of regulated substances such as antifreeze, motor oil, motor fuel, gasoline, kerosene, aviation fuel, and diesel fuel, and specify standards governing the measuring devices and facilities used to store, sell, dispense, or deliver these products. This Chapter is intended to protect the end user by regulating the integrity and quantity of the product sold; protect the public and the environment from fire, explosion and contamination; assist the tank owner/operator regarding how to maintain a petroleum storage tank system to avoid damages or deterioration of the system, economic loss to the owner/operator, and damages to others.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 34 Ok Reg 922, eff 9-11-17; Amended at 35 Ok Reg 974, eff 10-1-18; Amended at 36 Ok Reg 535, eff 8-1-19]

165:15-1-2. Definitions

In addition to the terms defined in 17 O.S. §§ 301 et seq., the following words or terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise.

"API (American Petroleum Institute) gravity scale" means the gravity scale in general use by the petroleum industry in the United States.

"ASTM" means the American Society for Testing and Materials. The latest ASTM revision must be the test used and is expressly incorporated in this Chapter.

"ATG" means an automatic tank gauging system.

"Aboveground storage tank" or "AST" means a "Storage tank" as defined in 17 O.S. § 303(40) that has more than ninety percent (90%) of its volume above the surface of the ground.

"Airport" means landing facility for aircraft that is routinely available for public use (whether routinely used or not). Airports as used in this Chapter do not include private residential airstrips or private airports.

"Analog type" means an indicating element or a system of indication or recording in which values are presented as a series of numbered graduations in combination with an index, and in which the most sensitive element of the indicating system moves continuously during the operation of the device.

"Ancillary equipment" means any device including, but not limited to, devices such as piping, fittings, flanges, valves, and pumps that are used to distribute, meter, or control the flow of regulated substances to or from a petroleum storage tank.

"Aviation gasoline" means a volatile hydrocarbon fuel suitable for use in an aircraft internal combustion engine.

"Bulk plant" means a petroleum storage tank facility where regulated substances are received by tank vessels, pipelines, tank cars or tank vehicles and are stored or blended in mass quantities or bulk for the purpose of distribution by a tank vessel, pipeline, tank car, tank vehicle, portable tank or other container, for wholesale or retail sale.

"Calibrate" or "Calibration" means the comparison of the indicated volume to the volume actually delivered by a retail or wholesale device into a certified test measure, prover, or through a second accurate meter.

"Cathodic protection" means a technique designed to prevent the corrosion of a metal surface by making it the cathode of an electrochemical cell. For example, protection can be accomplished with an impressed current system or a galvanic anode system.

"Computing type" means a device designed to indicate and measure the total money value of product for one of a series of unit prices.

"Digital type" means a system of indicating or recording that advances intermittently in which all values are presented digitally and without graduations.

"Face of the dispenser" means that side of a measuring device that displays the quantity measured. The face must include an indicator and a series of graduations or present values digitally. It is the side of the dispenser where the unit price, volume dispensed, and dollar amount of the sale appear.

"Fuel Specialist" means any field inspector employed by the Compliance and Inspection Department of the Petroleum Storage Tank Division of the Oklahoma Corporation Commission.

"Formal Enforcement Action" means the process of ensuring compliance with Commission regulations, rules, orders, requirements, standards, and/or state

law when a violation occurs and PSTD initiates an enforcement Complaint under the contempt procedure in OAC 165:5 Subchapter 19 to be heard at the Commission by an Administrative Law Judge or the Commissioners.

"Gasoline" means a volatile unleaded fuel that is suitable for use in a spark ignition, internal combustion engine.

"Gum" means the evaporation residue of aircraft gasoline or the heptane insoluble portion of the evaporation residue of motor gasoline.

"Important building" means a building that is considered not expendable in an exposure fire.

"Index of an indicator" means that particular portion of an indicator that is directly used in making a reading.

"Indicating element" means that component located on the face of the dispenser that signifies the amount relative to a quantity measured by a measuring device.

"Kerosene" means a refined hydrocarbon fuel intended for use in heating and illumination.

"Liquid measuring device" or **"liquid fuel device"** means any and all measuring devices (retail, wholesale, or vehicle tank measure) with which gasoline, motor fuel, kerosene, motor oil, diesel fuel, or aviation gasoline is sold, dispensed, or delivered to the public or to any person for any purpose.

"MtBE" means methyl tertiary butyl used as a component in gasoline.

"Maintenance" means the normal operational upkeep necessary to prevent a petroleum storage tank system from releasing product.

"Measuring device" or **"meter"** means a measuring device as defined in 17 O.S. § 303(23).

"Observation well" means a cased and screened boring or drilled hole, installed within the tank excavation or piping trench that can be used for the continuous or periodic evaluation of groundwater quality or the detection of soil vapors as a method of release detection.

"Octane", or **"octane number"**, or **"octane rating"** means the antiknock quality of gasoline as determined by either the ASTM Research Method or the ASTM Motor Method.

"Oxygenate" means ethyl alcohol, MtBE, TAME, or other oxygen-containing, ashless organic compounds.

"Permanent out of use" or **"POU"** means a petroleum storage tank system that is not in service/use, does not contain regulated substances, and is not intended to be placed back in service/use.

"Petroleum" means the substances as set forth in 17 O.S. § 303(31). It does not include 100% biodiesel, compressed natural gas, liquid natural gas, methanol, or propane.

"Primary indicating elements" or **"recording elements"** means those principal visual indicating elements and recording elements that may be used by an owner or operator in the normal commercial use of a device and which are readily visible to the public.

"Private airport" means an airport used only by its owner and regulated by PSTD as a fleet and commercial facility.

"PSTD" means Petroleum Storage Tank Division.

"(R+M)/2" means the arithmetic mean of the ASTM Research Method (R) and the ASTM Motor Method (M) octane numbers, and is the octane rating.

"Regulated substance" means antifreeze, motor oil, motor fuel, gasoline, kerosene, diesel or aviation fuel as set forth in 17 O.S. § 305. It does not include

compressed natural gas, liquid natural gas or propane.

"Retail device" means a measuring device or mechanism designed for single deliveries of PSTD regulated substances to individual land, air, and water vehicles.

"Retail facility" means a service station, convenience store or any other facility selling a PSTD regulated substance that is open to the general public.

"SIR" means Statistical Inventory Reconciliation.

"Security Seal" or "seal" or "lock/locking mechanism" means a lead and wire seal, lock or locking device, or similar device, attached to a petroleum storage tank system for protection against access, removal, or adjustment.

"TAME" means tertiary amyl methyl ether for use as a component in gasoline.

"Temporary out of use" or "TOU" means the status of a petroleum storage tank system that has been taken out of service/use with the intent to permanently close or return to service.

"Tolerance" means a value fixing the limit of allowable error or departure from the highest performance or value.

"Transport calibration" or "truck calibration" means the volume held to the designated marker as determined by the addition of a calibration fluid to the compartment from an accurate meter or from provers.

"Underground storage tank" or "UST" means a "Storage tank" as defined in 17 O. S. § 303(40) that has 10 percent (10%) or more of its volume beneath the surface of the ground.

"Underground storage tank system" means a closed-plumbed system including, but not limited to the underground storage tank(s), the individual storage tank compartments, the lines, dispenser for a given product, containment sump, if any, and ancillary equipment or a delivery truck that is connected to the storage tank system.

"Wet-hose type" means a device designed to be operated with the discharge hose full of liquid at all times.

"Wholesale device" means any device other than a retail device.

165:15-1-3. Application of rules

(a) The rules contained in this Chapter apply to:

(1) All manufacturers and handlers of fuel subject to the jurisdiction of the Commission.

(2) All persons who sell or distribute any regulated substance, oxygenate, or blend of products.

(b) All persons who use liquid measuring devices in the sale or distribution of motor fuel, as defined by applicable statutes and (a) of this Section, must comply with this Chapter.

(c) Motor fuel in transit or manufactured in Oklahoma for consumption in other states is not subject to inspection under the rules of this Chapter.

(d) The tolerances on metric equipment must be equivalent to those specified in English units for similar equipment.

(e) All regulated substances manufactured in, or imported into, the State of Oklahoma for use or sale must be tested by the manufacturer or importer to ensure its compliance with the rules of this Chapter.

(f) The results of these tests, together with any other information required by the Commission, must be maintained by the manufacturer in accordance with usual and customary business practices, and copies must be furnished to the Petroleum Storage Tank Division upon request. These test results, excluding trade secrets and proprietary information, must also be furnished to the wholesale dealer of the manufacturer upon request.

[Source: Amended at 9 Ok Reg 2329, eff 6-25-92; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 34 Ok Reg 922, eff 9-11-17]

165:15-1-4. Application of motor fuel rules

(a) The rules contained in this Chapter apply to all manufacturers and handlers of motor fuel intended for use in the State of Oklahoma.

(b) No person can sell any regulated substance, motor fuel, oxygenate, or blend within the State of Oklahoma that does not meet the tests, specifications, and standards set forth in this Chapter.

(c) All motor fuel manufactured in, or imported into, the State of Oklahoma for use or sale must be tested by the manufacturer or importer to ensure its compliance with the rules of this Chapter.

(d) The results of these tests, together with any other information required by the Commission, must be maintained by the manufacturer in accordance with usual and customary business practices, and copies must be furnished to the Petroleum Storage Tank Division upon request. These test results, excluding trade secrets and proprietary information, must also be furnished to the jobber or wholesale dealer of the manufacturer upon request.

165:15-1-5. [RESERVED]

[Source: Reserved at 18 Ok Reg 1052, eff 5-11-01]

165:15-1-6. Fuel Specialists' Requirements

Fuel Specialists must:

- (1) Identify themselves before they begin working and offer identification if requested.
- (2) Leave a copy of the completed inspection form.
- (3) Return all samples to their respective petroleum storage tanks.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 33 Ok Reg 594, eff 8-25-16]

165:15-1-7. [RESERVED]

[Source: Reserved at 18 Ok Reg 1052, eff 5-11-01]

165:15-1-8. Fuel Specialists' interpretation of rules [REVOKED]

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Revoked at 21 Ok Reg 2029, eff 7-1-04]

SUBCHAPTER 3. FUEL SPECIALISTS, TESTING, ACCESSIBILITY, AND ASSISTANCE

PART 1. GENERAL AUTHORITY

165:15-3-1. Authority to enter and/or stop for inspection

(a) A Fuel Specialist has the authority to enter upon the premises of any manufacturer, bulk dealer, or retailer of any regulated substance, as well as any other place where a regulated substance is or was sold or stored prior to sale or use, and perform tests required by PSTD rules, take samples, or make any other investigation in order to ensure compliance with this Chapter or the laws of the State. Fuel Specialists will also inspect TOU petroleum storage tank systems.

(b) The Fuel Specialist has the authority to inspect any records and documents pertaining to the operation, maintenance, or repair of tank systems and the ordering of, delivery of, and/or payment for petroleum products offered for sale.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16]

165:15-3-2. Authority to lock or seal for violation

A Fuel Specialist or PSTD Director's designee has the authority to place or to direct that a lock or seal be placed on any dispenser, delivery device, receptacle, or container tank used in the sale, distribution or storage of regulated substances in Oklahoma when the rules in this Chapter, OAC 165:16, 165:25, 165:26, 165:27, 165:29, state statutes, a Commission order or requirement are being violated.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 35 Ok Reg 974, eff 10-1-18; Amended at 36 Ok Reg 535, eff 8-1-19]

165:15-3-3. Authority to remove lock or seal after correction of violation

The authority to remove a lock or seal by the owner or operator after a violation is corrected may be obtained by:

- (1) Written permission from the Fuel Specialist who placed the lock or seal on the device; coupled with written confirmation to PSTD by the person removing the seal or lock; or
- (2) Written or verbal permission from the Division Director or the Director's designee; or
- (3) Application to and order of the Commission.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 32 Ok Reg 768, eff 8-27-15]

165:15-3-4. Exception [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

PART 3. MOTOR FUELS AND ANTIFREEZE

165:15-3-10. Sampling

Samples of regulated substances for testing must be obtained by Fuel Specialists from the same dispensing device used for sales to customers. Samples will be taken as often as necessary to ensure quality in one of the following manners:

- (1) At a retail or wholesale device dispensing a single grade of product, the first product to flow from the device will be taken for testing and considered representative of the product dispensed.
- (2) When the Fuel Specialist is calibrating a retail or wholesale device dispensing single or multiple products, the Fuel Specialist may take the sample from the same five (5) gallons used in the calibration of the dispenser.

- (3) At a wholesale plant using a single outlet for more than one product, the sample should be obtained directly from the storage tank or by any other convenient way that will ensure a sample representative of each product.
- (4) At a retail device dispensing a blend of products or dispensing multiple products through a single nozzle, the device must be set on the desired product to be sampled and the second sample will be taken for testing.

[Source: Amended at 9 Ok Reg 2329, eff 6-25-92; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 35 Ok Reg 974, eff 10-1-18; Amended at 36 Ok Reg 535, eff 8-1-19]

165:15-3-11. Testing methods for motor fuel

A Fuel Specialist will test the octane rating or check for any contaminants or foreign substances as necessary for each type of motor fuel sold at any retail facility, airport, bulk plant or marina using the Zeltex machine or other Commission-approved device.

[Source: Amended at 13 Ok Reg 2405, eff 7-1-96; Amended at 14 Ok Reg 2488, eff 7-1-97; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 36 Ok Reg 535, eff 8-1-19]

165:15-3-12. Fuel deliveries

Deliveries of fuel made for all facilities must be conducted as follows:

- (1) No facility owner or operator may accept delivery of lower octane fuel into a higher octane tank, except when the tank's resulting octane level meets or exceeds the tank's labeled octane level.
- (2) When delivering fuel into a storage tank, no person may purposefully disable a tank's overfill valve for any reason.
- (3) Owners, operators, their employees or agents, or transporters must ensure that the volume available in the tank (ullage) is greater than the volume of product to be transferred to the tank before the transfer is made and that the transfer operation is monitored constantly to prevent spilling and overfilling.
- (4) Any violation of this Section will be subject to the enforcement procedures of this Chapter and any other fines or contempt proceedings as provided by law.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 34 Ok Reg 922, eff 9-11-17]

165:15-3-13. Antifreeze testing

Fuel Specialists may take a sample of any antifreeze repackaged for sale in Oklahoma for the purpose of sending it to a laboratory for analysis.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01]

PART 5. LIQUID MEASURING DEVICES

165:15-3-15. Fuel Specialist's duty

Fuel Specialists have the responsibility to implement and enforce the rules of this Chapter, Chapter 16, Chapter 25 and Chapter 26, which includes determining that a measuring device and equipment are accurate and as safe as possible for the public and the environment. If a measuring device does not conform to all official requirements, the Fuel Specialist is required to prohibit its use until the device is brought into compliance.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16]

165:15-3-16. Inspection for compliance

- (a) Retail liquid measuring devices subject to the rules of this Chapter are calibrated with a five (5) gallon test measure by the Fuel Specialist from time to time or as often as deemed necessary. High volume dispensers (those that are used to pump at a rate of at least twenty (20) gallons per minute) used to fill large tanks must be calibrated using a fifty (50) or one hundred (100) gallon prover.
- (b) All wholesale liquid measuring devices subject to the rules of this Chapter must be calibrated before ten (10) million gallons of use, or more often if PSTD deems it necessary.
- (c) Before a new facility is open for business and before new dispensers are put into service at a pre-existing facility, the owner or operator must have the dispensers calibrated and be able to show written proof when requested by the Fuel Specialist.
- (d) These tests may be ordered or directed by the Commission at any time.
- (e) When a liquid measuring device is found not to be in compliance with this Chapter, the owner or operator will be advised of the problem and the device placed out of service.
- (f) A Fuel Specialist has the responsibility to place or to direct that a lock or seal be placed on a measuring device. The lock or seal must remain in place until the defective measuring device is repaired or replaced and complies with Commission standards, rules, and requirements.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 34 Ok Reg 922, eff 9-11-17; Amended at 35 Ok Reg 974, eff 10-1-18]

PART 7. STORAGE TANKS AND ANCILLARY EQUIPMENT

165:15-3-20. Water in storage tanks

- (a) **Water in storage tanks in excess of Commission standards is prohibited.** All underground storage tanks must be checked for water by the Fuel Specialist from time to time. However, water inspections by the Fuel Specialist does not remove the responsibility of the tank owner/operator that water levels in tanks do not exceed Commission standards, rules, and requirements.
- (b) **Area surrounding fill pipe.** The area surrounding the fill pipe to the storage tank must not contain any water. When water is present, the owner or operator is responsible for promptly removing the water. Upon the second notice of violation of this subsection, the owner or operator must make whatever system modifications are necessary to prevent water from entering the spill containment and may be subject to citation or formal enforcement action.
- (c) **Fill pipe.** All fill pipes to storage tanks must have watertight caps that must be securely fastened at all times, except when servicing the tank(s), for fuel deliveries, and inspections.
- (d) **Water removal; repairs.** When a Fuel Specialist checks a motor fuel storage tank at a retail outlet and finds water in it, it is the responsibility of the owner or operator of the retail outlet to completely remove the water and make necessary repairs to prevent any water intrusion to the storage tank. Water shall not exceed one inch (1") in depth when measured with water indicating paste or other acceptable means in any tank utilized in the storage of diesel, gasoline, gasoline-ether blends, and kerosene sold at retail. No water phase greater than one-fourth inch (1/4") as determined by an appropriate detection paste or other acceptable means is allowed to accumulate in any tank utilized in the storage of gasoline-

alcohol blend, biodiesel blends, E85 fuel ethanol, aviation gasoline, and aviation turbine fuel. The owner or operator is required to find the source of the water including, but not limited to, excavating and replacing the product line(s) and/or the storage tank(s) as necessary. This must be done as quickly as possible. The Fuel Specialist or Compliance and Inspection Manager may be notified verbally or by written confirmation when the necessary repairs have been completed.

(e) **Water from dispensing nozzle.** When a Fuel Specialist checks a retail outlet for water and finds water coming through the dispensing nozzle, it is the responsibility of the Fuel Specialist to immediately take the affected dispensing unit or units out of operation. The owner or operator is required to find the source of the water, including but not limited to, excavating and replacing the product lines and/or the storage tanks as necessary. The product dispensing units are to remain out of operation until the water intrusion problem(s) are corrected and permission to commence operation is given by the Fuel Specialist to the owner or operator.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 30 Ok Reg 583, eff 7-1-13; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 35 Ok Reg 974, eff 10-1-18]

165:15-3-21. Containment of petroleum products

Because petroleum product releases can pose a threat to the public health, safety and the environment, Fuel Specialists must ensure that the proper mechanisms are in place and standards, rules, and requirements are met to prevent releases.

(1) **Spill and overflow protection.** Fuel Specialists must ensure that appropriate spill and overflow protection devices are in place and operational.

(2) **Leak detection on tanks.** Fuel specialists must check the condition of an owner or operator's selected method(s) of leak detection at a location. The requirements of each method listed below are offered as a general outline; a complete list of leak detection requirements is in OAC 165:25 and 165:26.

(A) **Vapor monitoring wells.** If vapor monitoring wells are an owner or operator's selected method of leak detection, the Fuel Specialist must ensure that the requirements listed below are met:

(i) Wells must be correctly installed and sufficient in number for the particular facility.

(ii) A monitoring well site assessment must be completed with documentation of Commission acceptance kept on site for review.

(iii) Wells must be properly monitored and the results recorded every 30 days on the appropriate OCC form.

(iv) Any single vapor monitoring well reading above 4,000 units/ppm for gasoline and 1,500 units/ppm for diesel shall be reported to a Commission Project Environmental Analyst by telephone at (405) 521-4683 (if after hours or on weekends or holidays, call the PSTD emergency number at (405) 823-0994) within 24 hours of the owner, operator, employees, agents, or Monitor Well Technicians knowing of the reading. If gasoline and diesel tanks are in the same tankpit, any reading above 1,500 units/ppm shall be

reported. If high readings have not been reported, the Fuel Specialist shall immediately report it.

(B) Groundwater monitoring wells. The Fuel Specialist must ensure, if groundwater monitoring wells are an owner or operator's method of leak detection, that the requirements listed below are met:

- (i) Wells must be correctly installed and sufficient in number for the particular facility.
- (ii) A monitoring well site assessment must be completed with documentation of Commission acceptance kept on site for review.
- (iii) Wells must be properly monitored and the results recorded every thirty (30) days on the appropriate OCC form.
- (iv) Any indication of product discovered shall be reported to a Commission Project Environmental Analyst by telephone at (405) 521-4683 (if after hours or on weekends or holidays, call the PSTD emergency number at (405) 823-0994) within 24 hours of the owner, operator, employees, agents, or Monitor Well Technicians knowing of its presence. If the discovery of product has not been reported, the Fuel Specialist shall immediately report it.

(C) Statistical Inventory Reconciliation (SIR).

(i) Deliveries, withdrawals and balance remaining must be recorded each operating day and data must be reconciled every thirty (30) days. Product deliveries must be reconciled with an appropriate device, and data must be reconciled every thirty (30) days. SIR records must demonstrate the following:

- (I) Report a quantitative result with a calculated leak rate;
- (II) Be capable of detecting a leak rate of 0.2 gallon per hour or a release of one hundred fifty (150) gallons within thirty (30) days, with a probability of detection of 0.95 and a probability of false alarm of 0.05; and
- (III) Use a threshold that does not exceed one-half (1/2) the minimum detectible leak rate.

- (ii) The tank must be equipped with a drop tube and measured for water at least every thirty (30) days.
- (iii) Records must be submitted to a certified SIR vendor for evaluation. Only third party certifications that have been reviewed and approved by the National Work Group on Leak Detection Evaluations (NWGLDE), found at the NWGLDE website, will be accepted (www.nwglde.org).
- (iv) Results of SIR analysis must be on premises for inspector review every thirty (30) days.
- (v) The equipment used must be capable of measuring the level of product over the full range of the tank's height to the nearest one-eighth inch (1/8").

(vi) The regulated substance inputs are reconciled with delivery receipts by measurement of the tank inventory volume before and after delivery.

(vii) SIR analysis reports must include a summary report of the quantitative results.

(D) Automatic tank gauging (ATG).

(i) The ATG must be in operating condition. It must perform a test at least once every thirty (30) days capable of detecting a 0.1 or 0.2 gallons per hour (gph) leak rate; and if the system detects a 0.2 gph leak rate, inventory reconciliation must be completed in conjunction with it.

(ii) If the Fuel Specialist has concerns about the operation of the system, they may require notice and be present when an authorized person is printing relevant reports from the ATG.

(E) Manual tank gauging. If manual tank gauging is the selected form of release detection Fuel Specialists must determine that the test duration is appropriate, and that tank tightness testing is performed in conjunction with manual tank gauging in accordance with OAC 165:25 and 165:26. Manual tank gauging may only be used on tanks 1,000 gallons or less.

(F) Interstitial monitoring. Sampling or testing must be capable of detecting a leak at least every thirty (30) days in accordance with the manufacturer's instructions.

(G) Other methods. If a method of leak detection other than those listed in this Chapter is used, it must be approved by PSTD and checked by the Fuel Specialist.

(3) Leak detection on pressurized lines. The Fuel Specialist must check for leak detection on pressurized piping. A complete list of requirements is in OAC 165:25 and 165:26. All pressurized piping must have electronic/automatic or mechanical line leak detectors capable of detecting a three (3) gallons per hour leak. New installations and facilities replacing a piping system must have double-walled piping. An annual line tightness test is required unless the alternative criteria listed in (C) below are met.

(A) Electronic/automatic and mechanical line leak detectors; sump sensors, floats and similar mechanical devices.

(i) Automatic electronic or mechanical line leak detectors must be installed on all pressurized lines. Double-walled piping systems must have dispenser and tank sumps with a sensor, float or similar mechanical device installed at each submersible pump or at the lowest sump at the lowest island for each tank, whichever is at the lowest end of the piping gradient.

(ii) The line leak detectors, floats and other devices must be tested annually according to manufacturer's specifications.

(B) Annual line tightness testing. An annual line tightness test, either hydrostatic or electronic, must be performed unless the requirements of (C) below are met.

(C) Alternative to line tightness testing. A certified electronic line leak detector may be used in lieu of an automatic mechanical line leak detector and annual tightness test only if:

- (i) The system is capable of detecting and tests for a leak of three (3) gallons per hour before or after each operation of the submersible turbine pump; and
- (ii) The system is capable of detecting and tests for a leak of 0.2 gallons per hour at least once every thirty (30) days; and
- (iii) The system is capable of detecting and tests for a leak of 0.1 gallons per hour annually, and the system is tested annually in accordance with manufacturer's specifications.

(D) Vapor monitoring wells. If vapor monitoring wells are an owner or operator's selected method of leak detection, the Fuel Specialist must ensure that the requirements listed below are met:

- (i) There must be a sufficient number of wells limited to a twenty foot (20') radius around the lines, and the wells must be properly marked and secured.
- (ii) Wells must be correctly installed, and the PSTD approved monitoring well site assessment must be made available to the Fuel Specialist.
- (iii) Wells must be properly monitored and the results recorded every thirty (30) days.

(E) Interstitial monitoring.

- (i) All double-walled piping must be sloped to allow a leak to flow to the sump at the tank or dispensers.
- (ii) Containment sumps connected to product piping must be equipped with at least one sump sensor at the lowest end of the piping gradient.
- (iii) Sump sensors must detect any liquid or leaking petroleum product in accordance with the manufacturer's specifications.

(4) Suction piping. A line tightness test must be performed every three (3) years according to manufacturer's specifications unless one of the line leak detection methods listed above is used, or unless it is safe suction piping that meets the specifications of (5) below.

(5) Safe suction piping. No annual line tightness test and no leak detection method is required if piping meets these specifications: below-grade piping must operate under vacuum, be sloped to allow product to drain back into the tank, and have only one check valve installed on each line directly below the pump. Compliance with these standards must be readily determined by the Fuel Specialist.

(6) Cathodic protection. The Fuel Specialist must ensure that cathodic protection is installed and in proper working order for all metal tanks and piping that routinely contain regulated substances or product and are in contact with the ground. Cathodic protection can be an impressed current or galvanic system with these requirements:

- (A) A site map and anode information should be made available to the Fuel Specialist and all tanks and lines must be protected.
- (B) Continuity tests must be conducted, and the soil-to-structure potential must be at least -0.85 volts.
- (C) Rectifier and cathodic protection tests must be performed by a qualified cathodic protection tester once every three years.
- (D) Rectifier readings on impressed current systems must be recorded at least every sixty (60) days and kept on site for review.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 19 Ok Reg 1603, eff 6-13-02; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 34 Ok Reg 922, eff 9-11-17; Amended at 35 Ok Reg 974, eff 10-1-18; Amended at 36 Ok Reg 535, eff 8-1-19]

165:15-3-21.1. Leak detection and cathodic protection records

- (a) Records for the preceding 12 months must be maintained at the facility and readily available to the Fuel Specialist.
- (b) Records must be maintained on forms specified by the Commission.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15]

165:15-3-22. Equipment installation

Fuel Specialists must ensure that tanks and ancillary equipment are installed properly and conform to Commission standards. These standards apply to all facilities. Requirements are listed in detail in OAC 165:25 and 165:26.

(1) Unattended self-service stations.

(A) Operating instructions must be conspicuously posted.

(B) There must be a properly placed emergency shutoff device and conspicuously posted emergency instructions. A telephone or other approved means of communication to notify the fire department.

(2) **Emergency pressure release venting.** Aboveground storage tanks must have some form of construction or device that will relieve excessive internal pressure caused by exposure to fires, and have some form of emergency pressure venting. This applies to all compartments and interstitial spaces of tanks, and any enclosed spaces around tanks that can contain liquid.

(3) **Release vent construction.** An aboveground tank must have some form of pressure-relieving construction to appropriately control and direct a tank rupture. The tank owner or operator must present, upon request, evidence certifying the construction if the owner has the information.

(4) **Venting and venting specifications.** The Fuel Specialist will ensure that vent piping size, height, width, placement and construction meet approved standards, vent vapors upward and do not present collision or fire hazards.

(5) **Piping requirements.** The Fuel Specialist must ensure piping is appropriately constructed and protected from physical damage and corrosion where appropriate. Appropriate valves must be in place in piping to prevent leaks and fires. Aboveground storage tank piping and associated parts such as flanges and bolts must be constructed to resist fire to the appropriate extent.

(A) All new aboveground or underground piping must be installed in accordance with requirements of either OAC 165:25 and 165:26.

(B) Pressurized piping must have automatic line leak detectors with one sensor, float or similar mechanical device at each submersible pump, or at the lowest sump at the lowest island for each tank, whichever is at the lowest end of the piping gradient.

(6) **Equipment and materials.** All pipes, valves, couplings, faucets, flexible connectors, fittings and other pressure-containing parts must meet material specifications and pressure and temperature limitations, adhering to Commission standards. Underground equipment must be cathodically protected where appropriate and aboveground equipment must resist fire to

the approved extent. Impact/shear valves and breakaway valves must be in place to prevent leaks and stop their flow in an emergency.

(7) **Electrical equipment.** All electrical equipment must meet the requirements NFPA 70, the National Electrical Code, as it applies to wet, damp and hazardous conditions. All electrical wiring and equipment must be suitable for the locations in which it is installed, and required emergency switches must be installed and appropriately placed.

(8) **Vault requirements.** Vaults are not required, can be used above or below grade, and must meet NFPA 30 and NFPA 30A requirements. The Fuel Specialist will ensure that those standards are met.

(9) **Fill pipes.** Fill pipes must be properly installed and labeled, and overflow sump lids must be color-coded or properly labeled with permanent markings.

(10) **Collision barriers.** Aboveground storage tanks and all dispensers exposed to traffic must be resistant to damage from the impact of a motor vehicle or be protected by suitable collision barriers. Secondary containment may serve as a collision barrier.

(11) **Fencing requirements.** All aboveground tanks must be enclosed by an appropriate security fence.

(12) **Spill Prevention Control and Countermeasure Plan.** Owners or operators of aboveground storage tanks must have a Spill Prevention Control and Countermeasure Plan (SPCC Plan) completed in strict accordance with the requirements of Environmental Protection Agency 40 CFR 112, and updated every five (5) years. Each facility location must have its own plan.

(13) **Corrosion protection.** Any portion of a tank or its piping system that routinely contain regulated substances or product and in contact with the soil must be protected from corrosion by a properly engineered, installed and maintained cathodic protection system in accordance with recognized standards of design listed in OAC 165:26 Subchapter 2, Part 4 of Commission rules. A tank sitting on a concrete pad will be considered in contact with the soil unless it is insulated from the concrete by some dielectric material.

(14) **Storage tank spacing and buffer distances.**

(A) Aboveground storage tanks must be appropriately spaced; the Fuel Specialist will determine whether the spacing is in accordance with OAC 165:26 Subchapter 2, Part 1, of Commission rules.

(B) Minimum distances from aboveground storage tanks must also be maintained between tanks and the nearest important building, fuel dispensers, public ways, and property lines.

(15) **Secondary containment requirements for aboveground storage tanks.** Double-walled tanks do not require additional containment if conditions listed in OAC 165:26-2-31 are satisfied.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 19 Ok Reg 1603, eff 6-13-02; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 34 Ok Reg 922, eff 9-11-17; Amended at 35 Ok Reg 974, eff 10-1-18; Amended at 36 Ok Reg 535, eff 8-1-19]

165:15-3-23. Marina inspections

In addition to the inspection requirements for all facilities, Fuel Specialists must inspect items particular to marina petroleum storage tank systems.

(1) **Aboveground tanks.** The Fuel Specialist must ensure that the special requirements of marina aboveground tanks are met. The tanks must be appropriately located and have a capacity appropriate to their locations. The Fuel Specialist will also check these requirements:

(A) Atmospheric tanks, including those incorporating secondary containment, must be built in accordance with recognized standards of design or approved equivalents. Atmospheric tanks must be built, installed and used within the scope of Commission standards.

(B) If the tank produces a gravity head, it must be equipped with a normally-closed solenoid valve, and manual shutoff valves must be located at the tank and at the shoreline.

(2) **Requirements for dispensers and attached parts.** The Fuel Specialist will ensure that fueling hoses are well-maintained, and that dispensing devices at marine service stations are appropriately located apart from other structures to allow for safe ingress and egress of watercraft for fueling.

(3) **Tight fill connection requirements.** The Fuel Specialist will ensure that tight fill connection requirements at marinas are met, including appropriate valves on tanks filled through remote piping.

(4) **Attendants at marinas.** Each marine service station may have an attendant or supervisor on duty when the station is open for business. The attendant's primary function is to supervise, observe, and control the dispensing of fuels to ensure that all safety requirements are met, and that the waters of the state are not contaminated by fuel.

(5) **Miscellaneous safety requirements.** The Fuel Specialist will ensure that required signs and appropriately located fire extinguishers are in place. There must also be a knife at the fuel dock for quickly cutting mooring lines in an emergency and a push pole for shoving away a boat.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 33 Ok Reg 594, eff 8-25-16]

165:15-3-24. Bulk plant inspections

In addition to the inspection requirements for all facilities, Fuel Specialists must inspect items particular to bulk plant petroleum storage tank systems.

(1) **Requirements for dispensers.**

(A) The Fuel Specialist will ensure that bulk plants that also dispense fuel into automobile tanks comply with the requirements for dispensers at retail facilities.

(B) The Fuel Specialist will also ensure that minimum distances from tanks are met if they are required.

(2) **Requirements for loading and unloading facilities.**

(A) The Fuel Specialist will ensure that tank vehicle and tank car loading and unloading facilities are separated from tanks and other facilities by appropriate distances.

(B) Loading and unloading facilities must be checked for means to contain spills and canopies or roofs that restrict the dispersion of vapors.

(C) Loading and unloading facilities at bulk plants that are used to load motor fuel into tank vehicles through open domes must be provided with a means for electrically bonding to protect against static electricity hazards.

(i) The means for electrical bonding must consist of a metal wire that is permanently and electrically connected to the

bulk plant's fill pipe assembly or to some part of the bulk plant's rack structure that is in electrical contact with the fill pipe assembly.

(ii) The free end of this metal wire must have a clamp for convenient attachment to some metallic part of the vehicle that is in electrical contact with the cargo tank of the tank vehicle.

(iii) All parts of the fill pipe assembly, including the drop tube, must form a continuous electrically conductive path.

(D) Bulk plants where motor fuel or blending materials are loaded or unloaded through open domes of railroad tank cars must be protected against stray electrical current by permanently bonding the bulk plant's fill pipe and the individual storage tanks to at least one rail of the railroad.

(E) Before loading tank vehicles through open domes, a bonding connection must be made to the vehicle or tank before dome covers are raised and must remain in place until filling is completed and all dome covers have been closed and secured. When possible, the Fuel Specialist will observe the performance of this procedure to ensure it is done correctly and safely.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01]

165:15-3-24.1. Airport inspections

In addition to the general requirements for all facilities, Fuel Specialists must inspect items particular to airport petroleum storage tank systems.

(1) Requirements for dispensers and attached parts.

(A) The Fuel Specialist will ensure that aircraft hoses are well maintained, and that fueling hydrants, cabinets and pits are an appropriate distance from any terminal building, hangar, service building or enclosed passenger concourse (other than loading bridges).

(B) The Fuel Specialist must ensure that the valve that controls the flow of fuel to an aircraft is equipped with a deadman control. The fuel control device must be arranged to accommodate operational requirements and be either a hydrant pit valve or on the hose nozzle for overwing servicing. Deadman controls also have specific requirements that the Fuel Specialist will ensure are met.

(C) Conductive hose at airports must be used to prevent electrostatic charge but not to accomplish required bonding between the aircraft and the fueling equipment.

(D) Each overwing servicing nozzle must have a cable with a plug or clip for bonding to the aircraft.

(E) Dispensing devices or cabinets must be designed so that a proper bond between the aircraft and the fueling equipment can be established.

(2) Emergency controls. The Fuel Specialist will ensure that each fuel system has a means for quickly and completely shutting off the flow of fuel in an emergency. This requirement is in addition to the deadman fuel control requirement. The emergency fuel shutoff system must include shutoff stations located outside probable spill areas and near the route normally used to leave the spill area or to reach the fire extinguishers

provided for the area's protection.

(3) **Miscellaneous safety requirements.** Safety requirements include required signs and appropriately located fire extinguishers.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 23 Ok Reg 1650, eff 7-1-06]

165:15-3-24.2. Fleet and commercial facility inspections

In addition to the general requirements for all facilities, Fuel Specialists must inspect items particular to fleet and commercial facilities.

(1) **Requirements for dispensers.** There are no minimum distance requirements between dispensers and tanks at fleet and commercial facilities. Owners at these facilities often enclose the dispenser with the aboveground tank inside a secondary containment to protect against potential leaks caused by the dispenser.

(2) **Fencing.**

(A) Aboveground tanks at fleet and commercial facilities must have appropriate fencing.

(B) Aboveground tanks are not required to be enclosed within a fence if the property on which the tanks are located already has a perimeter security fence.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04]

165:15-3-24.3. UST inspections at farms

In addition to the general requirements for all facilities, Fuel Specialists must inspect items particular to farm underground storage tank systems.

(1) **Leak detection.** Because the primary purpose of the Commission's regulation of farm tanks over 1,100 gallons is to prevent leaks, the farmer must select some form of leak detection. Any leak detection method referenced in Chapter 25 of Commission rules may be used. Fuel Specialists will check manual tank gauging records to ensure the monthly standards are not exceeded. If the standards are exceeded, there is most likely a leak in the tank which shall be reported to a Commission Project Environmental Analyst at (405) 521-4683 (if after hours or on weekends or holidays, call the PSTD emergency number at (405) 823-0994) within 24 hours of the owner or any of his or her employees knowing the gauging results.

(2) **Cathodic protection.** The Fuel Specialist must ensure, for any metal tanks or piping, that cathodic protection is installed and in proper working order.

(3) **Electrical requirements.** Fuel Specialists will ensure that all electrical equipment meets the requirements of NFPA 70, the National Electrical Code, as it applies to wet, damp and hazardous conditions, or other approved local code, and is suitable for the locations in which it is installed.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16]

PART 9. LARGE VOLUME METERS

165:15-3-25. Testing and inspection of large volume meters

(a) All large meters at refinery terminals and pipeline terminals used to deliver a petroleum product for sale to another party must be calibrated for accuracy every

six (6) months or every ten (10) million gallons, whichever comes first. The tolerances in Appendix A apply.

(b) The owner, operator or lessor must have a certified source calibrate all meters.

(c) A certified source must complete all calibrations when maintenance or recalibration is required. If calibration is performed more than twice a year, the next calibration is due six (6) months from last calibration.

(d) The owner, operator or lessor of meters is responsible for notifying the Compliance and Inspection Department in advance of the calibration so a Fuel Specialist may witness it. A copy of the test results shall be provided to the Compliance and Inspection Department within ten (10) working days of completion of the test.

[Source: Amended at 14 Ok Reg 2448, eff 7-1-97; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 36 Ok Reg 535, eff 8-1-19]

PART 11. ACCESSIBILITY AND ASSISTANCE

165:15-3-30. Outlet accessibility for testing purposes [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

165:15-3-31. Assistance in testing operations [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

165:15-3-32. Retail facility with aboveground storage tanks

(a) At a retail facility with aboveground storage tanks, the owner or operator must provide a safe means of returning motor fuel to the storage tank or tanks used in checking the calibration of the measuring devices.

(b) When the fuel return opening to the storage tank is reached only by the use of steps, stairs, or a ladder, or is not located at ground level, the owner or operator must:

- (1) Provide safe containers with sufficient volume to complete a required inspection.
- (2) Label each container with the particular contents of product being stored.
- (3) Store containers outside the diked area.
- (4) Properly dispose of the product used in checking the calibration in accordance with applicable law.

[Source: Amended at 13 Ok Reg 2405, eff 7-1-96; Amended at 14 Ok Reg 2488, eff 7-1-97; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:15-3-33. Retail outlet with locked storage tanks [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

165:15-3-34. Authority to block off

A Fuel Specialist has the authority to block off a portion or all of a fueling facility driveway when, in the opinion of the Fuel Specialist, there is a safety problem for the Fuel Specialist, equipment, or for both. These actions should take place when the openings to the underground storage tanks are located in the driveway or parking area adjacent to the fueling facility. If necessary, the owner, operator, or attendant may be required to assist the Fuel Specialist in the performance of these actions. Driveways should never be blocked unless safety

requires it, and then only to the minimum extent necessary.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 35 Ok Reg 974, eff 10-1-18]

165:15-3-35. Marina docks

(a) At a marina dock, when the distance from the motor fuel dispensing device to the fuel return opening is fifty (50) yards or more, the owner, operator, or marina personnel must assist the Fuel Specialist, as requested, or return the fuel to the storage tank.

(b) If the petroleum storage tanks at a marina dock are aboveground, the owner, operator or marina personnel must provide a safe means of returning fuel to the storage tank(s) used for checking the calibration of measuring devices.

(c) When the fuel return opening to the storage tank is reached only by using steps, stairs or a ladder, or is not located at ground level, the owner, operator or marina personnel must:

- (1) Provide safe containers with sufficient volume to complete a required inspection.
- (2) Label each container with the particular contents of the product being stored.
- (3) Store containers outside the diked area.
- (4) Properly dispose of the product used in checking the calibration in accordance with applicable law.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 35 Ok Reg 974, eff 10-1-18]

SUBCHAPTER 5. APPLICATIONS FOR USE OF BLEND PUMPS AND SPECIAL MOTOR FUEL [REVOKED]

165:15-5-1. Administrative application for use of blend pumps [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

165:15-5-2. Application for special motor fuel [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

SUBCHAPTER 7. SPECIFICATIONS, STANDARDS, AND LABELING FOR MOTOR FUELS

165:15-7-1. Applicability and general compliance

(a) **Compliance.** All motor fuel sold in the State of Oklahoma must comply with the standards of this Subchapter.

(b) **Removal from market.** Any motor fuel that does not meet the standards and specifications of the Commission must not be sold in Oklahoma.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 31 Ok Reg 1003, eff 9-12-14; Amended at 32 Ok Reg 768, eff 8-27-15]

165:15-7-2. Gasoline

(a) **Characteristics.** Gasoline must be essentially free of undissolved water, sediment, and suspended matter, and must be suitable for use as a fuel in a spark ignition, internal combustion engine. It must be clear and bright at the ambient temperature or 70°F, whichever is higher.

(b) **The minimum value for (R+M)/2 for unleaded motor fuel.** The minimum value for (R+M)/2 stated in this subsection applies to all unleaded fuel sold in the State of Oklahoma.

(1) The measuring devices must be labeled as follows and the motor fuel dispensed must meet or exceed the stated value corresponding to the stated grade. At a minimum, labeling of measuring devices for unleaded product grade must state as follows:

- (A) West of 99 degrees west longitude, 86
- (B) 87
- (C) 88
- (D) 89
- (E) 90
- (F) 91
- (G) 92
- (H) 93
- (I) 94

(2) In addition to the labeling requirements of (1), labels may read as follows:

- (A) East of 99 degrees west longitude
 - (i) Unleaded or Unleaded Regular: 87 or 88
 - (ii) Unleaded Plus or Mid-Grade Unleaded or Mid-Grade UL: 89 or 90
 - (iii) Premium Unleaded or Super Unleaded or Premium UL or Super UL: 91 and above.
- (B) West of 99 degrees west longitude
 - (i) Unleaded or Unleaded Regular: 86 or 87
 - (ii) Unleaded Plus or Mid-Grade Unleaded or Mid-Grade UL: 88 or 89
 - (iii) Premium Unleaded or Super Unleaded or Premium UL or Super UL: 90 and above.

(3) Any labeling of measuring devices for grade(s) of products other than those described in (1) and (2) above require an application to the Director of the Petroleum Storage Tank Division.

(c) **Gum content.** The gum content of gasoline must not exceed 5 milligrams per 100 milliliters.

(d) **Additives.** Ethanol, MtBE or TAME added to gasoline as a component must not exceed concentrations permitted by the United States Environmental Protection Agency.

(e) **Other.** Any other type, grade, or mixture of gasoline must be certified pursuant to the provisions of Subchapter 5 of this Chapter.

[Source: Amended at 9 Ok Reg 2329, eff 6-25-92; Amended at 10 Ok Reg 4245, eff 8-12-93; Amended at 13 Ok Reg 2405, eff 7-1-96; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15]

165:15-7-3. Kerosene

(a) Kerosene must be free from suspended water and sediment.

(b) Kerosene must have an API gravity of not less than 40.

(c) The flash point for kerosene must be 100°F or greater.

(d) Kerosene labeled as "No. 1-K" must not exceed 0.04 percent sulfur by weight. All other kerosene must not exceed 0.3 percent sulfur by weight.

[Source: Amended at 9 Ok Reg 2329, eff 6-25-92; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15]

165:15-7-4. Aviation gasoline

Aviation gasoline must be free from suspended water and sediment and have an appropriate octane reading and color.

(1) **Octane rating.** There are three different classifications of aviation gasoline:

(A) Grade 80-87. The lean octane rating must not be less than 80. The rich octane rating must not be less than 87.

(B) Grade 100-130. The lean octane rating must not be less than 100. The rich octane rating must not be less than 130.

(C) Grade 100-130LL. The lean octane rating must not be less than 100. The rich octane rating must not be less than 130.

(2) **Aviation gasoline color.**

(A) Grade 80-87 must have a red color.

(B) Grade 100-130 must have a green color.

(C) Grade 100-130LL must have a blue color.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15]

165:15-7-5. Diesel fuel

The standard classification of diesel fuel, as described in ASTM D 975 and biodiesel as described in 52 O.S. §325, must be used.

[Source: Amended at 10 Ok Reg 4245, eff 8-12-93; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16]

165:15-7-6. Naphtha [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

165:15-7-7. Aviation turbine fuel

(a) **Characteristics.** Aviation turbine fuel must be essentially free from suspended water and sediment, clear, straw-to amber-colored and suitable for use in an aviation turbine engine.

(b) **Classification.** Aviation turbine fuel is classified as follows:

(1) **Jet A/A-1.** A relatively high flash point distillate of the kerosene type. Two grades of kerosene fuel that differ in freezing point. Other grades would be suitably identified.

(2) **Jet B.** A relatively wide boiling range volatile distillate.

[Source: Added at 14 Ok Reg 2448, eff 7-1-97; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15]

SUBCHAPTER 9. DESCRIPTION OF MOTOR FUEL

165:15-9-1. General representation; lettering

Whenever the description of any motor fuel subject to the rules of this Chapter is displayed on any receptacle, dispenser, or other delivery device used in its sale to the public, the type, grade, and quality of the motor fuel must be equal to or greater than the representation on the measuring device. The sign must be in one-quarter inch (1/4") to one-half inch (1/2") text letters that are easily legible from at least five feet (5').

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 36 Ok Reg 535, eff 8-1-19]

165:15-9-2. Display on dispenser

(a) Every dispenser or delivery device regulated by the Commission used for sale of motor fuel to the public must legibly display the type of motor fuel offered for sale.

(b) Any motor fuel must be displayed in accordance with 16 CFR Part 306.0 through 306.12, including Appendices; and sold as provided for by Commission rules and National Institute of Standards and Technology (NIST) Handbook 44, "Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices".

[Source: Amended at 9 Ok Reg 2329, eff 6-25-92; Amended at 13 Ok Reg 2405, eff 7-1-96; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 31 Ok Reg 1003, eff 9-12-14; Amended at 35 Ok Reg 974, eff 10-1-18]

165:15-9-3. Motor fuel sold at airports for fueling auxiliary support equipment

Motor fuel sold at airports for fueling auxiliary airport support equipment must be labeled with the percent of alcohol in the fuel, if any.

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

SUBCHAPTER 11. REPORTS

165:15-11-1. Refinery plant reports

(a) All refiners and manufacturers who own or operate plants of any kind or description for the manufacture of any motor fuel, or who maintain and operate any other place or device where any motor fuel is manufactured, refined, or mixed and who have not made their existence known must file a report with the Petroleum Storage Tank Division setting forth:

- (1) The physical location (block, addition, town, or city or quarter section, township, and range).
- (2) Local post office address of operator.
- (3) General office address if different from local.
- (4) Capacity of the plant.
- (5) Whether in operation or temporarily closed.
- (6) Types of motor fuels manufactured or produced.

(b) Any person who opens a new plant must file a location report within thirty (30) days of the plant opening.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-11-2. Special reports [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

SUBCHAPTER 13. LABELING OF TANKS AND PRODUCT LINES

165:15-13-1. General identification and color coding requirements

- (a) All storage tanks subject to the rules of this Chapter must be marked with a tag, lettering, or other permanent marking on the fill neck and color coded on the overfill sump lids to identify the type, grade, or quality of regulated substance they contain.
- (b) East of 99 degrees west longitude, color coded markings must be:
- (1) Unleaded motor fuel, 91 octane or above: red.
 - (2) Unleaded motor fuel, 89 or 90 octane: blue.
 - (3) Unleaded motor fuel, 86 through 88 octane: white.
 - (4) Diesel motor fuel: yellow.
 - (5) Kerosene: brown.
 - (6) Dyed diesel: half yellow, half red.
 - (7) Unleaded 87 octane E10: white with black "X" and a black border around lid.
 - (8) Premium unleaded 91 octane E10: red with black "X" and a black border around lid.
 - (9) E15: E15 tanks must be designated "E15" in black with a black border around lid, and the colors referenced above for unleaded motor fuel, 86 through 91 octane, should be used for the lid.
 - (10) Biodiesel: bronze with yellow and black border around lid.
 - (11) E85: orange with black "X" and a black border around lid.
- (c) West of 99 degrees west longitude, color coded markings must be:
- (1) Unleaded motor fuel, 90 octane or above: red.
 - (2) Unleaded motor fuel, 88 or 89 octane: blue.
 - (3) Unleaded motor fuel, 86 or 87 octane: white.
 - (4) Diesel motor fuel: yellow.
 - (5) Kerosene: brown.
 - (6) Dyed diesel: half yellow, half red.
 - (7) Unleaded 87 octane E10: white with black "X" and a black border around lid.
 - (8) Premium unleaded 91 octane E10: red with black "X" and a black border around lid.
 - (9) E15: E15 tanks must be designated "E15" in black with a black border around lid, and the colors referenced above for unleaded motor fuel, 86 through 91 octane, should be used for the lid.
 - (10) Biodiesel: bronze with yellow and black border around lid.
 - (11) E85: orange with black "X" and a black border around lid.
- (d) Vapor-recovery connections and manholes shall be marked with orange circles.
- (e) Observation and monitoring wells shall be marked with a black triangle on a white background.
- (f) At all facilities with more than one tank, the color coding applied to the fill cap or manhole cover shall extend beyond the edge of the cap or cover onto adjacent concrete or pavement.
- (g) The tag labeling and color coding must be waterproofed and fuel-proofed material so that the type, grade, or quality of the motor fuel is readily visible to persons adding to or taking a sample from the line or storage tank.

165:15-13-4. Aviation gasoline at airports

At any airport, the labeling for aviation gasoline product lines or dispensing units must be as follows:

- (1)AVGAS 80
- (2)AVGAS 100
- (3)AVGAS LL100

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

SUBCHAPTER 15. LIQUID MEASURING DEVICES

PART 1. INSTALLATION

165:15-15-1. General installation requirements

A measuring device must be installed in accordance with the manufacturer's instructions, including any instructions marked on the device. A measuring device installed in a fixed location must be installed so that neither its operation nor its performance will be adversely affected by any characteristic of the foundation, supports, or any other detail of the installation.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-2. Discharge rate

A measuring device for dispensing fuel into automobiles must be installed so that the actual maximum discharge rate will not exceed 10 gallons per minute. If necessary, means for flow regulations must be incorporated in the installation, in which case this must be fully effective and automatic in operation.

[Source: Amended at 14 Ok Reg 2448, eff 7-1-97; Amended at 18 Ok Reg 1052, eff 5-11-01]

PART 3. CALIBRATION AND TOLERANCES

165:15-15-7. Initial calibration

Before any liquid measuring device subject to the rules of this Chapter may be put into service, it must conform to the National Institute of Standards and Technology (NIST) Handbook 44. In addition, any liquid measuring device must be calibrated as nearly as practicable to zero error by the installer, who must attach a seal to the adjusting mechanism in such a manner that a readjustment of the measuring unit cannot be made without breaking the seal.

[Source: Amended at 9 Ok Reg 2329, eff 6-25-92; Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-8. Duty to zero equipment

Tolerances are primarily accuracy criteria for use by the regulatory official. However, when a liquid measuring device is being adjusted for accuracy, either initially or following repair after official rejection, the effect should be to adjust as closely as practicable to zero error. Equipment owners or operators shall not take advantage of tolerances by deliberately adjusting their equipment to have a value or to give a performance at or close to the tolerance limit, nor should the repairman or

serviceman bring measuring devices merely within tolerance range when it is possible to adjust closer to zero error. If the majority of meter tolerances measured by the fuel specialist are below zero, the fuel specialist shall require those affected meters be recalibrated as close to zero as possible.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 23 Ok Reg 1650, eff 7-1-06]

165:15-15-9. Tolerances

(a) The official tolerances prescribed by the Commission for commercial equipment are the limits of inaccuracy officially permissible within the State of Oklahoma. Tolerances are established, to fix the range of inaccuracy within which equipment will be officially approved for commercial use. Tolerances using a five (5) gallon test measure are ± 3 cubic inches when applied to new or newly reconditioned or adjusted equipment. Tolerances using a five (5) gallon test measure on all measuring devices must not exceed ± 6 cubic inches. More than -15 cubic inches in accuracy will result in immediate shut down of the affected meters.

(b) Tolerances for new or newly reconditioned equipment apply as follows:

(1) To any equipment about to be put into commercial use for the first time.

(2) To equipment that has been placed in commercial service within the preceding 30 days and is being officially tested for the first time.

(3) To equipment that has been returned to commercial service following official rejection for failure to conform to performance requirements and is being officially tested for the first time within 30 days after corrective service.

(4) To equipment that is being officially tested for the first time within 30 days after major reconditioning or overhaul.

(c) Tolerances for retail and wholesale liquid measuring devices are as set forth in the charts in Appendix A to this Chapter.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 19 Ok Reg 1603, eff 6-13-02; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 30 Ok Reg 583, eff 7-1-13]

PART 5. IDENTIFICATION

165:15-15-15. Visibility of identification

All liquid measuring devices or meters must have indicating or recording elements appropriate in design and adequate in amount. Primary indications and recorded representations must be clear, definite, accurate, and easily read under any conditions or normal operation of the device. Equipment must be installed in such a manner that all required markings are readily observable.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-16. Permanence of lettering

All required markings, instructions, graduations, indications, or recorded representations and their defining figures, words, and symbols must be easily readable and of such character that they will not easily become illegible.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-17. Identification of responsible party

A money-operated, card-operated or unattended dispenser must be legibly and permanently marked to show the name and address of the person, firm, or corporation to whom application may be made in an emergency or for adjustment

of any claim arising from failure of the device to deliver or to accurately measure an amount of petroleum product.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-18. Price and product display

There must be conspicuously displayed on each face of the liquid measuring device the identity of the product dispensed. If a liquid measuring device is designed to dispense more than one grade, brand, blend, or mixture of product, the grade, brand, blend, or mixture being dispensed must be displayed on each face of the liquid measuring device. The device must automatically and accurately compute the total money value of the petroleum product delivered at the posted unit price.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

PART 7. MONEY VALUES AND VOLUMES DISPENSED

165:15-15-25. Indication of delivery

A liquid measuring device must be constructed to show automatically its initial zero condition and the amount delivered up to the nominal capacity of the device.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-26. Repeatability of indications

A measuring device must be capable of repeating, within prescribed tolerances, its indications and recorded representations. This requirement must be met regardless of repeated manipulation of any element of the device in a manner approximating normal usage and the repeated performance of steps or operations that are part of the testing procedure.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-27. Unit price and product identity

In a computing or money-operated liquid measuring device, means must be provided for displaying on each face of the liquid measuring device the unit price at which the device is set to compute or to deliver (as the case may be). The device must automatically and accurately compute the total money value of the petroleum product delivered at the posted unit price.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-28. Position of equipment and money value divisions

(a) A measuring device equipped with a primary indicating element, as described in 165:15-15-31 and used in direct sales to the public, must be positioned so that its indications may be accurately read and the measuring operation may be observed from some reasonable "customer" position.

(b) The money value and dispensed liquid volume readings on the primary indicating elements must be the ones used for determining the money and volume amounts in any sale to the public. The device must automatically and accurately compute the total money value of the petroleum product delivered at the posted unit price.

(c) On a computing type liquid measuring device with digital indications, the money values, mathematical agreement, and the total price computation must be based on quantities not exceeding 0.001 gallon intervals for devices indicating in inch-pound units and 0.002 liters for devices indicating in metric units.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 34 Ok Reg 922, eff 9-11-17]

165:15-15-29. Digital indication and representation

Digital elements must be designed so that:

- (1) All digital values of like value in a system agree with one another.
- (2) A digital value coincides with its associated analog value to the nearest minimum graduation.
- (3) A digital value rounds off to the nearest minimum unit that can be indicated or recorded.
- (4) A digital value may be readily observable from a reasonable customer position.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-30. Values

If graduations, indications, or recorded representations are intended to have specific values, these must be adequately defined by a sufficient number of figures, words, symbols, or combinations thereof, uniformly placed with reference to the graduations, indications, or recorded representations, and as close to them as practicable, without compromising accurate reading.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-31. Primary elements

- (a) **General.** A liquid measuring device must be equipped with a primary indicating element and may also be equipped with a primary recording element.
- (b) **Units.** A liquid measuring device must be equipped to record its deliveries in terms of gallons, liter, or decimal subdivisions of the gallon or liter.
- (c) **Value of smallest unit.** The value of the smallest unit of indicated delivery, and recorded delivery if the device is equipped to record, must not exceed:
 - (1) One thousandth (.001) gallon or two thousandth (.002) liter on digital type retail devices, or one-tenth (0.1) gallon or one-tenth (0.1) liter on analog type systems.
 - (2) One gallon or one liter on wholesale devices.
- (d) **Return to zero.** Primary indicating and recording elements must advance only by the mechanical or electronic operation of the measuring device. However, a measuring device may be cleared by advancing its elements to zero, but only if:
 - (1) The advancing movement, once started, cannot be stopped until zero is reached; or
 - (2) In the case of indicating elements only, such elements are automatically obscured until the elements reach the correct zero position.
- (e) **Return to zero (key-lock).** The primary indicating elements, and primary recording elements if the device is equipped to record, must be readily returnable to a definite zero indication. However, a key-lock or other self-operated device may be equipped with cumulative indicating or recording elements, provided that it is also equipped with a zero-return indicating element. Means must be provided to prevent the return of primary indicating elements, and of primary recording

elements if the device is so equipped, beyond their correct zero position.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 34 Ok Reg 922, eff 9-11-17]

165:15-15-32. Graduations

(a) **Length.** Graduations must be varied in length so that they may be conveniently read.

(b) **Width.** In any series of graduations, the width of a graduation must not be greater than the width of the main graduations and must not be more than 50 percent greater than the width of subordinate graduations. Graduations must in no case be less than 0.008 inches in width.

(c) **Clear interval between graduations.** The clear interval must not be less than 0.04 inch. If the graduations are not parallel, the measurement must be made:

- (1) Along the line of relative movement between the graduations and the end of the indicator, or
- (2) If the indicator is continuous, at the point of widest separation of graduations.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-33. Indicators on liquid measuring devices

(a) **Symmetry.** The index of an indicator must have symmetrical graduations.

(b) **Length.** The index of an indicator must reach to the finest graduations with which it is used, unless the indicator and the graduations are in the same plane, in which case the distance between the end of the indicator and the ends of the graduations, measured along the line of graduations, must not be more than 0.04 inch.

(c) **Width.**

(1) The width of the index of an indicator in relation to the series of graduations with which it is used must not be greater than:

- (A) The width of the widest graduation, and
- (B) The width of the minimum clear interval between graduations.

(2) When the index of an indicator extends along the entire length of a graduation, that portion of the index of the indicator that may be brought into coincidence with the graduation must be of the same width throughout the length of the index that coincides with the graduation.

(d) **Clearance.** The clearance between the index of an indicator and the graduations must in no case be more than 0.06 inch.

(e) **Parallax.** Parallax effects must be reduced to the practicable minimum.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-34. Money values; mathematical agreement

Any digital money value indications and any recorded money value on a computing-type measuring device must be in mathematical agreement with its associated quantity indication or representation to one cent of money value. The readings for money value and volume of liquid dispensed on the primary indicating element, as provided in this Chapter, must be the ones used for determining the money and volume amounts in any sale to the public.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-35. Money value display and computation

- (a) **On a retail device.** Money value computations (on a retail device) must be of the full computing type in which the money value at a single unit price, or at each of a series of unit prices, is computed for every delivery within either the range of measurement of the liquid measuring device or the range of the computing elements, whichever is less. Any analog money value indication must not differ from the mathematically computed money value (Quantity X Unit Price = Sales Price), for any delivered quantity, by an amount greater than one-half the value of the money value division. Value graduations must be supplied and accurately positioned. The value of each graduated interval must be 1 cent.
- (b) **"Cash" discount.** When a discount for "cash" is offered, the discount must be paid inside the store, the discount is to be calculated, and the customer informed of the discounted amount. The cash discount price must not be posted on a marquee or remote billboards unless it is explicitly called a "cash price".
- (c) **Retail dispensing devices used in contract sales.** Those retail motor fuel dispensing devices used in contracted sales, which are normally unattended and accessed and actuated by keys, cards and/or other coding mechanisms and which are not accessible to the general public, are not required to display unit prices nor to make money value computations for every delivery.
- (d) **Airport dispensing devices.** Those retail motor fuel dispensing devices installed at airports for use in fueling aircraft are not required to display unit prices nor to make money value computations for every delivery.
- (e) **Advertised price.** The price per gallon charged at the dispenser must be the same price advertised on the facility's marquee and remote billboards. The price per gallon advertised on the facility's marquee and remote billboards must be the same price charged at the dispenser.

[Source: Amended at 9 Ok Reg 2329, eff 6-25-92; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 23 Ok Reg 1650, eff 7-1-06; Amended at 37 Ok Reg 1121, eff 10-1-20]

PART 9. EQUIPMENT AND OPERATIONS

165:15-15-40. Maintenance of equipment

All liquid measuring equipment in service and all attached mechanisms and devices or those used in connection therewith must continuously be maintained in proper operating condition throughout the period of service of the equipment. Liquid measuring devices in service at a retail facility found to be in error predominately in a direction favorable to the measuring device owner or operator and near the tolerance limits are not considered to be maintained in a proper operating condition.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15]

165:15-15-40.1. Dispenser Filters

- (a) All gasoline, gasoline-alcohol blends, gasoline-ether blends, E85 fuel ethanol and M85 methanol dispensers located at retail facilities shall have a 10 micron or smaller pore-sized filter.
- (b) All biodiesel, biodiesel blends, diesel, and kerosene dispensers located at retail facilities shall have a 30 micron or smaller sized filter.

[Source: Added at 30 Ok Reg 583, eff 7-1-13]

165:15-15-41. Vapor elimination

A liquid measuring device or metering system must be equipped with an effective vapor eliminator or other effective means automatic in operation to prevent the passage of vapor and air through the meter. Vent line from the air or vapor eliminator must be made of metal tubing or some other suitable rigid material.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-42. Provision for sealing

(a) Adequate provision must be made for applying security seals in such a manner that no adjustment may be made of:

- (1) Any measurement element, and
- (2) Any adjustable element for controlling delivery rate when such rate tends to affect the accuracy of deliveries.

(b) The adjusting mechanism must be readily accessible for purposes of affixing a security seal. This lead wire seal must be affixed by the service technician, and must be designated by the Fuel Specialist as the seal of the Corporation Commission for the purposes of this Chapter.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-43. Directional flow valves

Valves intended to prevent reversal of flow must be automatic in operation. However, on equipment used exclusively for fueling aircraft, such valves may be manual in operation.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-44. Stop mechanism

If stops or other stroke limiting elements are subject to direct pressure or impact, the security of their positions must be accomplished by positive, nonfrictional engagement of parts, and they must be adjustable to provide for deliveries within prescribed tolerances. If two or more stops or other elements may selectively be brought into operation to permit deliveries or predetermined amount, the position for the proper setting of each of such elements must be accurately defined, inadvertent displacement from position must be obstructed, and the delivery for which the device is set at any time must be conspicuously indicated.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-45. Zero-set-back interlock

A retail liquid measuring device of the meter type must be constructed so that, after a particular delivery cycle has been completed, an effective automatic interlock will prevent a subsequent delivery being started until the indicating elements and recording elements, if the device is equipped and activated to record, have been returned to their correct zero positions. Provisions must be made for the starting lever or equivalent mechanism to be in its designed shutoff position and for the zero-set-back interlock to be engaged before the discharge nozzle can be returned to its designed hanging position.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-46. Discharge hose at retail facilities

(a) A liquid measuring device that is equipped with a flexible discharge hose must be of the wet-hose type with a shutoff valve at its outlet end. This valve must be a

listed automatic type nozzle.

- (b) The discharge hose must be adequately reinforced.
- (c) At any installation where the normal flow of product may be stopped by a means other than by a hose nozzle valve, such as at pre-pay or self-service stations, the system must include listed equipment with a feature that requires the closing of the hose nozzle valve before product flow can be resumed or before the hose nozzle valve can be replaced in its normal position in the dispenser; otherwise, the hose nozzle valve must not have a latch-open device.
- (d) All discharge hoses must have a breakaway valve.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15]

165:15-15-47. Diversion of measured liquid [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-52. Use limitations

If a liquid measuring device is intended to measure accurately only products having particular properties, or to measure accurately only under specific installation or operating conditions, or to measure accurately only when used in conjunction with accessory equipment, these limitations must be clearly and permanently stated on the device.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-53. Air pressures [REVOKED]

[Source: Revoked at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-54. Wholesale devices

(a) Wholesale devices must be calibrated by a certified source. The result must be mailed to the Compliance and Inspection Department with a pass or fail rating.

Upon receipt of documentation, a Fuel Specialist from the Compliance and Inspection Department will deliver a sticker on the next routine visit.

(b) These guidelines are required for wholesale meter calibrations:

(1) **Discharge rates.** A wholesale measuring device must be marked to show its designed maximum and minimum discharge rates. However, such minimum discharge rates must not exceed 20 percent of such maximum discharge rates.

(2) **Temperature compensation.** If a measuring device is equipped with an automatic temperature compensator, the primary indicating elements,

recording elements and recorded representation must be clearly and conspicuously marked to show that the volume delivered has been adjusted to the volume at 60°F.

(3) **Test liquid.** A liquid measuring device must be tested with the liquid to be commercially measured or with a liquid of the same general physical characteristics.

(4) **Evaporation and volume change.** Care must be exercised to minimize evaporation losses and volume changes resulting from changes in temperature of the test liquid.

(5) **Normal tests.** The "normal" test of a measuring device must be made at the maximum discharge rate that may be anticipated under the conditions of installation. If a wholesale device is equipped with an automatic temperature compensator, this test should be conducted with the temperature compensator deactivated.

(6) **Automatic temperature compensation on wholesale devices.** If a measuring device is equipped with an automatic temperature compensator, it must be tested by comparing the volume indicated or recorded by the device with the compensator connected and operating, with the actual delivered volume corrected to 60°F.

(7) **Temperature correction on wholesale devices.** Corrections must be made for any changes in volume resulting from the differences in liquid temperatures between time of passage through the meter and time of volumetric determination in the test measure. When adjustments are necessary, appropriate petroleum measurement tables should be used. The temperature used to make the volumetric adjustment must be recorded on the invoice.

(8) **Sticker and seal.** Upon receipt of documentation of calibration, a Fuel Specialist will place a Commission sticker upon the meter. The Fuel Specialist will ensure that the meter is sealed, so that entry to the meter is prevented. At the time the seal is broken, the Compliance and Inspection Department must be notified within one (1) day and recalibration must be completed within ten (10) days. If after ten (10) days recalibration is not completed, that device must be taken out of service until calibration is completed.

[Source: Amended at 14 Ok Reg 2448, eff 7-1-97; Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 33 Ok Reg 594, eff 8-25-16]

165:15-15-55. Temperature compensation on wholesale devices

(a) **Use of automatic compensators.** If a wholesale liquid measuring device is equipped with an automatic temperature compensator, it must be connected, operable, and in use at all times. Such automatic temperature compensator may not be removed, nor may a compensated device be replaced with an uncompensated device, without the written approval of the Fuel Specialist.

(b) **Written invoices.** Any written invoice based on a reading of a wholesale measuring device equipped with an automatic temperature compensator must show that the volume delivered has been adjusted to the volume at 60°F.

(c) **Non-automatic temperature compensation.** If the volume of the product delivered is adjusted to the volume at 60°F, the product temperature must be taken during the delivery in the liquid chamber of the meter or in the meter inlet or discharge line adjacent to the meter, or must be taken in the compartment of the receiving vehicle at the time it is loaded. The accompanying invoice must indicate

that the volume of the product has been adjusted for temperature variations to a volume of 60°F, and must also state the product temperature and API gravity used in making the adjustment.

(d) **Replacement of non-automatic temperature compensation meters.** As non-automatic temperature compensation meters are replaced, they will be replaced with equipment to provide automatic temperature compensated readout.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01]

165:15-15-56. Travel indicator

A wholesale device must be readily operable to deliver accurately any quantity from 50 gallons to the capacity of the device. If the most sensitive element of the indicating system utilizes an indicator and graduations, the relative movement of these parts corresponding to a delivery of one (1) gallon must not be less than 0.20 inch.

SUBCHAPTER 19. INSPECTIONS, NOTICES OF VIOLATION, FIELD CITATIONS, AND FORMAL ENFORCEMENT ACTIONS

165:15-19-1. Penalty; violations and contempt

(a) The Commission, after notice and hearing, may fine or hold in contempt any person for each of the following violations:

- (1) Any person using a measuring device which does not meet the required tests, standards, and specifications.
 - (2) Any person who offers motor fuel for sale or resale within the State of Oklahoma and does not comply with the rules of this Chapter.
 - (3) Any person who tampers with, defaces or destroys any sign, label, lock, or seal placed by the Fuel Specialist upon any dispenser, delivery device, receptacle, container, tank, or service station used in the sale of any motor fuel.
 - (4) Any price misrepresentation.
 - (5) Any person who aids any person in the violation of any rule of this Chapter.
 - (6) Any person who interferes in any way with the Fuel Specialists in the performance of their duties as provided by law of the State of Oklahoma and the rules of the Commission.
 - (7) Any person otherwise failing to comply with the rules, regulations, specifications, standards, or requirements of the Commission.
- (b) Each day on which violation occurs will be deemed a separate and distinct offense.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 31 Ok Reg 1003, eff 9-12-14; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 35 Ok Reg 974, eff 10-1-18]

165:15-19-2. Enforcement procedure

In addition to the contempt procedures described in OAC 165:5, the following procedure for violations may be followed:

- (1) The PSTD Director or designee may issue a Field Citation for any violation or violations of the rules of this Chapter, and/or 17 O.S. §§301 et seq., and amendments thereto.
- (2) A copy of the Field Citation must be furnished to the owner or operator.
- (3) The Field Citation must be authorized by the PSTD Director.
- (4) Prior to issuing a Field Citation to an owner or operator, the approval of the Director of the Petroleum Storage Tank Division must be obtained.

[Source: Amended at 18 Ok Reg 1052, eff 5-11-01; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 34 Ok Reg 922, eff 9-11-17; Amended at 36 Ok Reg 535, eff 8-1-19]

165:15-19-3. Notices of Violation

- (a) When a Petroleum Storage Tank Division Fuel Specialist finds a violation of any statute, rule, requirement or order of the Commission regarding the regulation of petroleum storage tanks, the Fuel Specialist may issue a Notice of Violation (NOV).
- (b) Each violation that can have an NOV issued is listed in this Chapter, OAC 165:16, 165:25, and 165:26.
 - (1) A Notice of Violation is to alert the tank owner or operator that a violation has been found. The NOV will describe the violation and advise that further PSTD enforcement action may occur if the violation is not corrected. If the violation cannot be corrected, the violation will be referred to the PSTD Compliance and Inspection Manager or Director's designee who may initiate Formal Enforcement Action or issue a Field Citation.
 - (2) At PSTD's discretion, serious violations can be immediately turned over to the Commission's Judicial and Legislative Services Division for Formal Enforcement Action.

- (3) In all situations where an NOV is issued, it must explain to the person to whom it is given what the offense is and how the person can correct it.
- (c) A Notice of Violation will state the following information:
- (1) A clear description of the violation(s).
 - (2) A date by which the violation(s) are required to be corrected.
 - (3) The name of the Fuel Specialist issuing the NOV, along with a telephone number and address so that the tank owner or operator can ask the Fuel Specialist questions.
- (d) NOV(s) are issued to the owner or operator of the storage tank facility. If the owner or operator is not present, NOVs can be given to store personnel, but all notifications and/or correspondence will be mailed or electronically delivered to the owner and/or operator.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 33 Ok Reg 594, eff 8-25-16; Amended at 35 Ok Reg 974, eff 10-1-18; Amended at 36 Ok Reg 535, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:15-19-4. Re-inspection, Formal Enforcement and Field Citation

- (a) After the date that the violation is required to be corrected, a Fuel Specialist will re-inspect the storage tank facility to verify that the violation has been corrected.
- (b) If the re-inspection shows that the violation has not been corrected, the Fuel Specialist may:
- (1) Refer the violation to the Division's Compliance and Inspection Manager or the Director's designee who may initiate Formal Enforcement Action or issue a Field Citation; and/or
 - (2) Shut down the storage tank system pending correction of the problem or a hearing on the issue.

[Source: Added at 18 Ok Reg 1052, eff 5-11-01; Amended at 21 Ok Reg 2029, eff 7-1-04; Amended at 32 Ok Reg 768, eff 8-27-15; Amended at 34 Ok Reg 922, eff 9-11-17; Amended at 35 Ok Reg 974, eff 10-1-18; Amended at 36 Ok Reg 535, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20]

165:15-19-5. Issuance of a Field Citation and payment of fine or hearing

- (a) The storage tank owner or operator can either pay the amount of the fine as stated in the Field Citation or request a hearing.
- (b) The tank owner or operator will have thirty (30) days from the date the Field Citation was issued to pay the fine.
- (1) A fine may be paid with cash, a money order, check or electronic method approved by the Commission. Any cash payment must be made at the Commission's cashier window. All checks must be made payable to the Oklahoma Corporation Commission - Petroleum Storage Tank Division. If sending payment through the mail, a copy of the Field Citation must be sent with the payment to ensure proper credit.
 - (2) Payment of a fine within the thirty (30) day timeframe will not be considered an agreement or disagreement with the Field Citation.
- (c) If the storage tank owner or operator disagrees with the Field Citation, they may appear at the hearing at the Commission as provided in the Field Citation. If found in violation of PSTD rules at the time the Commission order is issued, the tank owner or operator must pay the amount of the fine, as well as an administrative cost of \$250.00.
- (d) Refusal to comply with an order of the Commission may result in an additional fine to be levied after notice and hearing in an amount as allowed by law, and shutdown of the storage tank system for failure to pay fines.

- (e) Failure of a tank owner or operator to appear at the hearing may result in additional enforcement action.
- (f) Any exceptions to the hearing must be made in accordance with OAC 165:5.
- (g) A tank owner or operator is still responsible for following the Commission's rules regarding petroleum storage tanks regardless of paying a fine or correcting a violation.

CHAPTER 16. ANTIFREEZE

[Authority: 17 O.S., §§ 306(12), 342, and 348.5]
[Source: Codified 6-25-92]

SUBCHAPTER 1. GENERAL PROVISIONS

165:16-1-1. Purpose

The purpose of this Chapter is to implement the provisions of 17 O.S. § 301 et seq., regarding the sale of antifreeze in the State of Oklahoma.

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Amended at 13 Ok Reg 2409, eff 7-1-96; Amended at 34 Ok Reg 929, eff 9-11-17; Amended at 36 Ok Reg 544, eff 8-1-19]

165:16-1-2. Definitions

In addition to the terms defined in 17 O.S. §§ 303 and 348, the following words or terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Antifreeze" means all substances and preparations intended for use as the cooling medium, or to be added to the cooling liquid, in the cooling system of an internal combustion engine to prevent freezing or to raise the boiling point.

"Certified" means to attest that the analysis is as represented and meets the required standards of this Chapter.

"Commission" means the Oklahoma Corporation Commission and includes its designated divisions, departments, agents or representatives.

"Ethylene glycol antifreeze" means an antifreeze containing ethylene glycol as the major component.

"Licensee" means the name and address of the person who is distributing, manufacturing, marketing, producing, selling or transporting antifreeze under a specific brand name.

"Manufacturer" means any person engaged in the manufacture of any antifreeze sold, offered for sale, displayed, distributed, produced, used, or consumed

in the State of Oklahoma.

"Methanol" means an antifreeze with an alcohol base.

"Person" means any and all persons, including any individual, firm, partnership, corporation, company, trust, LLC, LLP, and association, whether such persons are acting as owner, bailee, or agent.

"Propylene glycol antifreeze" means an antifreeze containing propylene glycol as the major component.

"Prediluted aqueous ethylene glycol" means an antifreeze containing a 50 volume percent aqueous solution.

"PSTD" means the Petroleum Storage Tank Division.

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Amended at 13 Ok Reg 2409, eff 7-1-96; Amended at 14 Ok Reg 2494, eff 7-1-97; Amended at 34 Ok Reg 929, eff 9-11-17; Amended at 36 Ok Reg 544, eff 8-1-19]

165:16-1-3. Applicability

This Chapter shall apply to persons who display, distribute, manufacture, market, produce, store, transport, warehouse, sell, offer for sale or resale antifreeze of any brand or type in the State of Oklahoma. This Chapter does not apply to antifreeze used in manufacturing processes and consumptive use on the premises.

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Amended at 34 Ok Reg 929, eff 9-11-17]

165:16-1-4. Authority of the Commission

In addition to other authority prescribed by law, the Commission shall have the authority to:

- (1) Enforce this Chapter by licensing, inspections, chemical analysis, or any other appropriate methods.
- (2) Call upon and take samples of antifreeze from the stocks of any applicant for or any holder of an antifreeze permit or any other persons suspected of distributing, displaying, manufacturing, marketing, producing, selling, storing, or transporting antifreeze.
- (3) Access, by any means, all places of businesses of such persons, including buildings, vehicles, cars, and vessels used in the display, distribution, manufacturing, marketing, producing, sale, storage, or transporting of antifreeze during regular business hours.
- (4) Open, by any means, any box, carton, parcel, or package containing or supposed to contain antifreeze, take possession of a representative container signed by receipt, for the purpose of taking samples.
- (5) Require, request, and demand a bill of lading or other proof of delivery of antifreeze that on its face appears to be unlicensed.

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Amended at 13 Ok Reg 2409, eff 7-1-96; Amended at 34 Ok Reg 929, eff 9-11-17]

SUBCHAPTER 3. APPLICATIONS AND PERMITS

165:16-3-1. General requirements

Before any antifreeze can be displayed, distributed, manufactured, marketed, produced, sold, used and/or offered for sale or resale, held with intent to sell, or transported within the State of Oklahoma, a permit, bearing an official permit number shall be obtained by the manufacturer of the antifreeze from PSTD.

- (1) Application for antifreeze permits shall be submitted with certified laboratory analysis, copies of the labels, and the fee amount set forth in Chapter 5 of Commission rules per brand and per type. If PSTD has

previously approved the formula, a new laboratory analysis is not needed.

(2) If antifreeze meets the specifications and standards as set out in OAC165:16-5-1, 165:16-5-2, 165:16-5-3 and 165:16-5-4 a permit shall be issued to the applicant authorizing the sale of such antifreeze until the end of the fiscal year, June 30.

(3) Renewal invoices will be sent sixty (60) days before the fiscal year expires. The renewal fee amount set forth in Chapter 5 of Commission rules is per brand and per type. Licensees do not need to resubmit information on individual brands and types each year unless the formula, name of the brand or the type has changed.

165:16-3-3. Cancellation of permit [REVOKED]

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Revoked at 34 Ok Reg 929, eff 9-11-17]

SUBCHAPTER 5. TESTING OF ANTIFREEZE

165:16-5-1. Testing of ethylene glycol antifreeze

The American Society for Testing and Materials (ASTM) standard D3306 (2014) shall be used to make the following tests of antifreeze.

(1) **Boiling point test.** The boiling point of an antifreeze shall be determined by the ASTM designation D-1120 (2016) test. The boiling point of a concentrated antifreeze shall not be below 311°F or 155°C. When added to the cooling system of a motor vehicle, at atmospheric pressure, an antifreeze shall increase the boiling point to a degree not less than the following:

- (A) 50% antifreeze: 226° F or 108° C
- (B) 40% antifreeze: 221° F or 105° C
- (C) 33 1/3% antifreeze: 219° F or 104° C
- (D) 20% antifreeze: 214° F or 101° C

(2) **pH test.** The pH of an antifreeze shall be determined by the ASTM designation D-1287 (2011) test. The pH of an antifreeze shall be run by using a solution composed of 50% concentrated antifreeze and 50% water, by volume. The pH of this antifreeze solution shall not be below 7.5.

(3) **Corrosion inhibition test.** The reserve alkalinity of antifreeze as determined by ASTM D-1121 (2011) shall be reported. The corrosion inhibitive properties of antifreeze shall be determined by ASTM D-1384 Test Method (2012). The average weight loss of each metal coupon shall not exceed the maximums stated as follows: copper 10 mg, solder 30 mg, brass 10 mg, steel 10 mg, cast iron 10 mg, and aluminum 30 mg.

(4) **Freezing point test.** The freezing point of antifreeze shall be determined by the ASTM designation D-1177 (2016) test. The freezing points of the various water antifreeze solutions shall be such as to protect according to the chart in Appendix A of this Chapter.

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Amended at 13 Ok Reg 2409, eff 7-1-96; Amended at 14 Ok Reg 2494, eff 7-1-97; Amended at 34 Ok Reg 929, eff 9-11-17]

165:16-5-2. Testing of methanol type antifreeze

The American Society for Testing and Materials (ASTM) standards shall be used to make the following tests of antifreeze.

(1) **Boiling point test.** The boiling point of an antifreeze shall be determined by the ASTM designation D-1120 (2016) test. The boiling point of a concentrated antifreeze when added to the cooling system of a motor vehicle at atmospheric pressure shall not be below 133° F or 56° C.

(2) **pH test.** The pH of an antifreeze shall be determined by the ASTM designation D-1287 (2011) test. The pH of an antifreeze shall not be below 7.5. The pH of an antifreeze shall be run by using a solution composed of 50% concentrated antifreeze and 50% water, by volume.

(3) **Reserve alkalinity test.** The reserve alkalinity of an antifreeze shall be determined by the ASTM designation D-1121 (2011) test. The reserve alkalinity shall not be below 10.0.

(4) **Freezing point test.** The freezing point of an antifreeze shall be determined by the ASTM designation D-1177 (2016) test. The freezing point of the various water antifreeze solutions shall be such as to protect according to the chart in Appendix B of this Chapter.

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Amended at 13 Ok Reg 2409, eff 7-1-96; Amended at 14 Ok Reg 2494, eff 7-1-97; Amended at 34 Ok Reg 929, eff 9-11-17]

165:16-5-3. Testing of prediluted aqueous ethylene glycol antifreeze

The American Society for Testing and Materials (ASTM) standards shall be used to make the following tests of antifreeze.

(1) **Boiling point test.** The boiling point of an antifreeze shall be determined by the ASTM D-1120 (2016) test. The boiling point of the prediluted coolant as packaged shall be at least 226°F or 108°C.

(2) **pH test.** The pH of an antifreeze shall be determined by the ASTM designation D-1287 (2011) test. The pH of an antifreeze shall be run by using a sample of the prediluted coolant as packaged. The pH of this antifreeze solution shall not be below 7.5.

(3) **Corrosion inhibition test.** The reserve alkalinity of antifreeze as determined by ASTM D-1121 (2011) shall be reported. The corrosion inhibitive properties of antifreeze shall be determined by ASTM D-1384 Test Method (2012). The average weight loss of each metal coupon shall not exceed the maximums stated as follows: copper 10 mg, solder 30 mg, brass 10 mg, steel 10 mg, cast iron 10 mg, and aluminum 30 mg.

(4) **Freezing point test.** The freezing point of antifreeze shall be determined by the ASTM designation D-1177 (2016) test. The freezing point of the concentrated antifreeze solution shall be at least to -34° F or -37° C.

[Source: Added at 14 Ok Reg 2494, eff 7-1-97; Amended at 34 Ok Reg 929, eff 9-11-17]

165:16-5-4. Testing of propylene glycol antifreeze

The American Society for Testing and Materials (ASTM) standards shall be used to make the following tests of antifreeze.

(1) **Boiling point test.** The boiling point of an antifreeze shall be determined by the ASTM designation D-1120 (2016) test. The boiling point of a concentrated antifreeze shall not be below 305° F or 152° C. When added to the cooling system of a motor vehicle, a 50% antifreeze solution at

atmospheric pressure shall increase the boiling point to a degree not less than 219° F or 104° C.

(2) **pH test.** The pH of an antifreeze shall be determined by the ASTM designation D-1287 (2011) test. The pH of an antifreeze shall be run by using a solution composed of 50% concentrated antifreeze and 50% distilled water, by volume. The pH of this antifreeze solution shall not be below 7.5.

(3) **Corrosion inhibition test.** The reserve alkalinity of antifreeze as determined by ASTM D-1121 (2011) shall be reported. The corrosion inhibitive properties of antifreeze shall be determined by ASTM D-1384 Test Method (2012). The average weight loss of each metal coupon shall not exceed the maximums stated as follows: copper 10 mg, solder 30 mg, brass 10 mg, steel 10 mg, cast iron 10 mg, and aluminum 30 mg.

(4) **Freezing point test.** The freezing point of antifreeze shall be determined by the ASTM designation D-1177 (2016) test. The freezing points of a 50% concentrated antifreeze and 50% distilled water solution shall not be above -26°F or -32°C.

[Source: Added at 14 Ok Reg 2494, eff 7-1-97; Amended at 34 Ok Reg 929, eff 9-11-17]

SUBCHAPTER 7. ADULTERATION AND MISBRANDING

165:16-7-1. Adulteration

Any antifreeze submitted to PSTD for permit approval and testing shall be deemed to be adulterated if the certified analysis or other testing indicates:

- (1) It consists in whole or in part of any substance which will render it injurious to the cooling system of an internal combustion engine or will make the operation of the engine dangerous to the user.
- (2) Its strength, quality, or purity falls below the professed standard of strength, quality, or purity under which it is sold.
- (3) It is a product intended to be used without further dilution and does not provide freezing point protection to -34° Fahrenheit.

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Amended at 13 Ok Reg 2409, eff 7-1-96; Amended at 34 Ok Reg 929, eff 9-11-17; Amended at 36 Ok Reg 544, eff 8-1-19]

165:16-7-2. Misbranding and labeling

Any antifreeze submitted to PSTD for permit approval shall be deemed to be misbranded if:

- (1) Labeling is false or misleading in any particular manner.
- (2) In package form it does not bear a label containing the name and place of business of the distributor, manufacturer, marketer, packer, producer, seller, warehouse or wholesaler, and an accurate statement of the quantity of contents in terms of weight or volume and these facts are not stated plainly and correctly on the outside.
- (3) The product is to be diluted with another substance for use and does not bear on the label or in an accompanying instruction sheet, folder, or booklet a statement or chart showing appropriate amounts of each substance to be used to provide protection from freezing at various degrees of temperature down to at least thirty degrees (30°) below zero Fahrenheit.
- (4) The product is intended to be used without further dilution and the freezing point is not stated on the label and the front and back labels do not bear the words "Ready to Use" in minimum one quarter inch (1/4") high

letters.

(5) Antifreeze manufacturers and licensees must provide a copy of any new version of any label change not previously submitted and approved by PSTD.

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Amended at 13 Ok Reg 2409, eff 7-1-96; Amended at 34 Ok Reg 929, eff 9-11-17; Amended at 36 Ok Reg 544, eff 8-1-19]

SUBCHAPTER 9. ADVERTISING

165:16-9-1. Advertising

No advertising literature relating to any antifreeze sold, or to be sold, in the State of Oklahoma shall contain any statement that the antifreeze advertised for sale has been approved by the Commission unless a current permit from PSTD has been issued to the distributor, manufacturer, marketer, packer, producer, seller, warehouse or wholesaler, in which event such statement, together with the permit number, may be contained in any labeling and advertising literature where such brand or trademark or antifreeze is being advertised for sale.

[Source: Added at 9 Ok Reg 2333, eff 6-25-92; Amended at 13 Ok Reg 2409, eff 7-1-96; Amended at 34 Ok Reg 929, eff 9-11-17]

SUBCHAPTER 11. PENALTY FOR VIOLATION

165:16-11-1. Penalty

(a) Any person who violates or fails to comply with the provisions of this Chapter or the laws of the State, or any person who aids and abets in the violation thereof, shall, in addition to the penalties provided by law, be deemed guilty of contempt of order of the Commission and be subject to a fine not to exceed \$500.00 for each offense.

(b) Each day such violation occurs shall constitute a separate offense.

(c) Each container of antifreeze not conforming to all requirements set forth in this Chapter shall constitute a separate offense.

CHAPTER 20. GAS & HAZARDOUS LIQUID PIPELINE SAFETY

[Authority: 52 O.S., §§ 5 and 47.3; OKLA. CONST. art IX, §§ 4 and 18]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

165:20-1-1. Purpose

The purpose of this Chapter is to provide minimum safety standards for the transportation of gas and hazardous liquids and for pipeline facilities used for this

transportation.

165:20-1-2. Definitions

For proper interpretation of this Chapter, definitions are also provided in the herein adopted C.F.R. provisions. The following words and terms, when used in this Chapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Commission" means the Oklahoma Corporation Commission.

"Intrastate" means wholly within the boundaries of the State.

"Legal staff" means the office of General Counsel of the Commission.

"Manager of Pipeline Safety" means the Manager of the Pipeline Safety Department of the Commission.

"Pipeline Safety Department" means the Department of Pipeline Safety for the Commission.

"Secretary" means the custodian of official records of the Commission.

"State" means the State of Oklahoma and all lands within its boundaries.

"Transportation of gas or hazardous liquids" means the gathering, transmission, or distribution of gas or hazardous liquids by pipeline or its storage.

165:20-1-3. Citation

The rules embodied in this Chapter shall be cited as OAC 165:20.

165:20-1-4. Forms and documentation

(a) The Commission is empowered to prescribe necessary and proper forms in order to effectuate the purpose of this Chapter. The Manager of Pipeline Safety shall prescribe the number of copies of an appropriate form which shall be necessary to comply with the filing requirements of this Chapter.

(b) Plans, specifications, maps, and other data relative to natural gas pipeline systems, underground natural gas storage facilities, and hazardous liquid pipeline systems shall be submitted to the Commission as prescribed by the Manager of Pipeline Safety in order to effectuate the purpose of this Chapter. This subsection is applicable to the operators of pipelines regulated pursuant to Subchapters 5, 6, 7, and 17 of this Chapter.

(c) Plans and maps submitted to the Commission pursuant to subsection (b) shall be deemed confidential records or trade secrets of the operator under the Open Records Act as provided for by 51 O.S. § 24A.22 and shall be kept confidential by the Commission, unless such records are successfully challenged or become subject matter of an enforcement action at the Commission.

[Source: Amended at 15 Ok Reg 3002, eff 7-15-98; Amended at 37 Ok Reg 1126, eff 10-1-20; Amended at 38 Ok Reg 1746, eff 10-1-21]

165:20-1-5. Severability

The provisions of this Chapter are severable and if any part or provision hereof shall be held void, the decision of the court so holding shall not affect or impair any of the remaining parts or provisions of this Chapter.

165:20-1-6. Office location; mailing address

(a) The office of the Commission's Pipeline Safety Department is in the Jim Thorpe Building located at 2101 North Lincoln Boulevard, Oklahoma City, Oklahoma 73105.

(b) The mailing address of the Commission is P.O. Box 52000, Oklahoma City, Oklahoma 73152-2000.

[Source: Added at 19 Ok Reg 1965, eff 7-1-02]

SUBCHAPTER 3. PIPELINE ASSESSMENTS

165:20-3-1. Pipeline assessments

(a) **Application.** Each operator of a pipeline subject to Subchapters 5 and 7 shall pay a pipeline assessment to the Commission as set forth in the provisions of this Subchapter.

(b) **Calculation.** For purposes of this Subchapter, the pipeline assessment shall be determined as follows:

(1) For gas pipeline operators required to submit an annual report pursuant to 165:20-5-13(b) and 165:20-5-14(b). On the basis of the total number of miles of pipeline as reported on their annual report multiplied by the assessment rate of \$25.00 per mile of pipeline for the fiscal year starting on July 1.

(2) For hazardous liquid pipeline operators required to submit an annual report pursuant to 165:20-7-6. On the basis of the total number of miles of pipeline as reported on their annual report multiplied by the assessment rate of \$75.00 per mile of pipeline for the fiscal year starting on July 1.

(3) For master meter operators. The annual assessment shall be \$200.00.

(4) The minimum annual pipeline assessment owed by an operator is \$200.00.

(c) **Payment.**

(1) For purposes of payment of assessment, an assessable year shall be the period of time from the first day of July of any given calendar year to the 30th of June of the following year.

(2) All operators who must pay a pipeline assessment under the provisions of this Subchapter shall pay their pipeline assessment for any given assessable year on or before the 15th of August of each assessable year.

(3) Operators who purchase or acquire pipeline systems subject to a pipeline assessment are responsible for payment of the assessment.

(4) All payments of assessments shall be deposited by the Commission in the "Corporation Commission Revolving Fund".

SUBCHAPTER 5. SAFETY REGULATIONS FOR GAS PIPELINES

PART 1. GENERAL PROVISIONS

165:20-5-1. Definitions [REVOKED]

[Source: Amended at 14 Ok Reg 2496, eff 7-1-97; Amended at 19 Ok Reg 1965, eff 7-1-02; Revoked at 36 Ok Reg 545, eff 8-1-19]

165:20-5-2. Scope

(a) This Subchapter prescribes requirements for the reporting of incidents, safety related condition reports, and annual reports by operators of gas pipelines facilities subject to this Subchapter.

(b) This Subchapter does not apply to onshore gathering of gas through a pipeline that operates at less than 0 psig or through a pipeline that is not a regulated onshore gathering line as determined in 49 C.F.R. § 192.8.

[Source: Amended at 28 Ok Reg 1125, eff 7-1-11]

165:20-5-3. Annual reports and incident reports; federal reporting requirements

The reporting requirements of 165:20-5-11, 165:20-5-12, 165:20-5-13, and 165:20-5-14 do not relieve the operator of its federal reporting requirements as found in 49 C.F.R. §§ 191.5, 191.7, 191.9, 191.11, 191.13, 191.15 and 191.17.

[Source: Amended at 36 Ok Reg 545, eff 8-1-19]

165:20-5-4. Change of ownership and/or operator

Each operator, upon finalization of an agreement to purchase or sell a gas pipeline subject to the provisions of 49 C.F.R. Part 192, must within five (5) working days submit to the Pipeline Safety Department a written notification of this agreement.

[Source: Added at 14 Ok Reg 2496, eff 7-1-97; Amended at 36 Ok Reg 545, eff 8-1-19]

PART 3. TELEPHONIC NOTICE AND REPORTING REQUIREMENTS

165:20-5-11. Telephonic notice of certain incidents

(a) At the earliest practicable moment, but no more than one (1) hour following discovery, each operator shall give notice in accordance with (b) and (c) of this Section of each incident as defined in 49 C.F.R. § 191.3.

(b) Each notice required by (a) of this Section shall be made by telephone to the Pipeline Safety Department at 405-521-2258 or submitting a report online at <http://www.occeweb.com/> and shall include the information as listed in (c) of this Section.

(c) The following information will be provided:

- (1) Names of operator and person making report and their telephone numbers.
- (2) The location of the incident.
- (3) The time of the incident.
- (4) The number of fatalities and personal injuries, if any.
- (5) All other significant facts known by the operator that are relevant to the cause of the incident or extent of the damage.

[Source: Amended at 11 Ok Reg 3703, eff 7-11-94; Amended at 14 Ok Reg 2496, eff 7-1-97; Amended at 19 Ok Reg 1965, eff 7-1-02; Amended at 36 Ok Reg 545, eff 8-1-19]

165:20-5-12. Address for written reports

Each written report required by this Subchapter must be made to the Pipeline Safety Department, Oklahoma Corporation Commission, in accordance with OAC 165:20-1-6 of this Chapter.

[Source: Amended at 19 Ok Reg 1965, eff 7-1-02]

165:20-5-13. Distribution system reporting requirements

(a) Except as provided in (3) of this subsection, each operator of a distribution pipeline system shall submit United States Department of Transportation Form RSPA F 7100.1 as soon as practicable but not more than 30 days after detection of

an incident required to be reported under 165:20-5-11.

(b) When additional, relevant information is obtained after the report is submitted under (1) of this subsection, the operator shall make supplementary reports as deemed necessary with a clear reference by date and subject to the original report.

(c) The incident report required by this subsection need not be submitted with respect to master meter systems.

[Source: Amended at 14 Ok Reg 2496, eff 7-1-97; Amended at 19 Ok Reg 1965, eff 7-1-02; Amended at 38 Ok Reg 1746, eff 10-1-21]

165:20-5-14. Transmission and gathering systems reporting requirements

(a) Except as provided in (2) of this subsection, each operator of a transmission or a gathering pipeline system shall submit United States Department of Transportation PHMSA Form F 7100.2 as soon as practicable but not more than thirty (30) days after detection of an incident.

(b) When additional, relevant information is obtained after the incident report is submitted under (1) of this subsection, the operator shall make supplementary reports as deemed necessary by referencing the date and subject of the original report.

[Source: Amended at 14 Ok Reg 2496, eff 7-1-97; Amended at 19 Ok Reg 1965, eff 7-1-02; Amended at 28 Ok Reg 1125, eff 7-1-11; Amended at 36 Ok Reg 545, eff 8-1-19; Amended at 38 Ok Reg 1746, eff 10-1-21]

165:20-5-15. Telephonic notice of an evacuation of a building [REVOKED]

[Source: Added at 14 Ok Reg 2496, eff 7-1-97; Revoked at 36 Ok Reg 545, eff 8-1-19]

165:20-5-16. Reporting safety related conditions

Pursuant to 49 C.F.R. § 191.25, each operator shall submit to the Pipeline Safety Department a duplicate of any safety related condition report filed pursuant to 49 C.F.R. § 191.23.

[Source: Added at 28 Ok Reg 1125, eff 7-1-11]

PART 5. MINIMUM SAFETY STANDARDS FOR GAS

165:20-5-21. Adoption of federal safety regulations

The Commission adopts the provisions of 49 C.F.R. Part 192, with all amendments and appendices thereto, subject to the following:

(1) 49 C.F.R. § 192.1 is replaced by the following:

(A) This Part prescribes minimum safety requirements for intrastate pipeline facilities and the transportation of gas subject to the jurisdiction of the Commission.

(B) This Part shall not apply to:

(i) Interstate transmission facilities; and

(ii) Onshore gathering of gas through a pipeline that operates at less than 0 psig or through a pipeline that is not a regulated onshore gathering line as determined by 49 C.F.R. § 192.8.

(2) The definition of "Administrator" and "State" are deleted and replaced as follows:

(A) All references to the "Administrator" are replaced with the "Commission".

(B) All references to the "State" refer to the State of Oklahoma.

[Source: Amended at 14 Ok Reg 2496, eff 7-1-97; Amended at 28 Ok Reg 1125, eff 7-1-11; Amended at 34 Ok Reg 933, eff 9-11-17; Amended at 35 Ok Reg 983, eff 10-1-18; Amended at 36 Ok Reg 545, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20; Amended at 38 Ok Reg 1746, eff 10-1-21]

PART 7. PIPELINE CONSTRUCTION AND CONSUMER SAFETY

165:20-5-31. Notice of construction [RESERVED]

165:20-5-32. Notice requirements for construction

(a) Each operator prior to the construction of a new pipeline, or a relocation or replacement of a pipeline, subject to the jurisdiction of the Commission as established by 165:20-5-2 shall:

(1) Complete and file Form 5001 with the Commission. Form 5001 shall be mailed seven (7) calendar days prior to the commencement of construction, relocation, or replacement; or

(2) In the event of an emergency, give telephonic notice of emergency construction, relocation, or replacement to the Pipeline Safety Department of the Commission followed by mailing Form 5001 within five (5) work days after telephonic notice is given.

(b) The requirements of (a) of this Section shall not apply to the installation of a pipeline of less than one (1) mile.

[Source: Amended at 14 Ok Reg 2496, eff 7-1-97]

165:20-5-33. Special safety standards for residential service [RESERVED]

165:20-5-34. Restrictions on connections to consumers [REVOKED]

[Source: Amended at 14 Ok Reg 2496, eff 7-1-97; Revoked at 36 Ok Reg 545, eff 8-1-19]

PART 9. MANDATORY PARTICIPATION IN OKLAHOMA ONE CALL

165:20-5-41. Mandatory participation in Oklahoma One Call

(a) The Commission adopts the provisions of the Oklahoma Underground Facilities Damage Prevention Act, Title 63 O.S. §§ 142.1 through 142.13.

(b) The Commission will enforce the provisions of Title 63 O.S. §§ 142.1 through 142.13 against intrastate and interstate gas pipelines, as described in 49 C.F.R. Part 192.1.

[Source: Amended at 14 Ok Reg 2496, eff 7-1-97; Amended at 35 Ok Reg 983, eff 10-1-18; Amended at 36 Ok Reg 545, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20; Amended at 38 Ok Reg 1746, eff 10-1-21]

SUBCHAPTER 6. SAFETY REGULATIONS FOR UNDERGROUND NATURAL GAS STORAGE FACILITIES

165:20-6-1. Adoption of federal safety regulations

The Commission adopts all of the provisions of 49 C.F.R. Parts 191 and 192, with all amendments and appendices thereto, pertaining to Intrastate Underground Natural Gas Storage Facilities.

[Source: Amended at 37 Ok Reg 1121, eff 10-1-20; Amended at 38 Ok Reg 1746, eff 10-1-21]

SUBCHAPTER 7. SAFETY REGULATIONS FOR HAZARDOUS LIQUIDS

165:20-7-1. Adoption of federal safety and reporting regulations

The Commission adopts the provisions of 49 C.F.R. Part 195, with all amendments and appendices thereto, subject to the following:

(1) 49 C.F.R. § 195.0 is replaced by the following: "This Part prescribes safety standards and accident reporting requirements for pipeline facilities used in the intrastate transportation of hazardous liquids subject to the jurisdiction of the Commission."

(2) 49 C.F.R. § 195.1(a) is replaced by the following: "Except as provided in paragraph (b) of 49 C.F.R. § 195.1(b), this Part applies to pipeline facilities and the transportation of hazardous liquids associated with those facilities used in the intrastate transportation of hazardous liquids subject to the jurisdiction of the Commission."

(3) The definition of "Administrator" shall be deleted and all references to the "Administrator" are replaced with the "Commission".

(4) 49 C.F.R. § 195.52(b) is replaced by the following: "(b) Reports made under paragraph (a) of 49 C.F.R. § 195.52(a) are made by telephone to 405-521-2258 (Pipeline Safety Department in Oklahoma City, OK) or submitting a report online at <http://www.Oklahoma.gov/OCC> and 800-424-8802 (in Washington, D.C. 202-462-2675), and must include the following information:

- (A) Name and address of the operator.
- (B) Name and telephone number of the reporter.
- (C) The location of the failure.
- (D) The time of the failure.
- (E) The fatalities and personal injuries, if any.
- (F) All other significant facts known by the operator that are relevant to the cause of the failure or extent of the damages."

(5) 49 C.F.R. § 195.54(a) is replaced by the following: "Each carrier that experiences an accident that is required to be reported under this subpart, as soon as practicable but not later than thirty (30) days after discovery of the accident, shall prepare and file an accident report on DOT Form 7000-1, or a facsimile, with the Pipeline Safety Department, Oklahoma Corporation Commission, in accordance with OAC 165:20-1-6 of this Chapter, and the Information Resources Manager, Office of Pipeline Safety, Department of Transportation, Washington, D.C. 20590."

(6) 49 C.F.R. § 195.54(b) is replaced by the following: "Whenever an operator receives any changes in the information reported or additions to the original report on DOT Form 7000-1, the operator shall submit a supplemental report within thirty (30) days with the Pipeline Safety Department, Oklahoma Corporation Commission, in accordance with OAC 165:20-1-6 of this Chapter, and the Information Resources Manager, Office of Pipeline Safety, Department of Transportation, Washington, D.C. 20590."

[Source: Amended at 19 Ok Reg 1965, eff 7-1-02; Amended at 28 Ok Reg 1125, eff 7-1-11; Amended at 34 Ok Reg 933, eff 9-11-17; Amended at 35 Ok Reg 983, eff 10-1-18; Amended at 36 Ok Reg 545, eff 8-1-19; Amended at 37 Ok Reg 1121, eff 10-1-20; Amended at 38 Ok Reg 1746, eff 10-1-21]

165:20-7-2. Notice requirements for pipeline construction

(a) Except as provided in (b) of this Section, each operator prior to the construction of a new pipeline, or a relocation or replacement of a pipeline, subject to the

jurisdiction of the Commission as established by 165:20-7-1(2), shall:

(1) Complete and file Form 5001 with the Commission. Form 5001 shall be mailed seven (7) calendar days prior to the commencement of construction, relocation or replacement; or

(2) In the event of an emergency, give telephonic notice of emergency construction, relocation, or replacement to the Pipeline Safety Department or the Commission, followed by mailing Form 5001 within five (5) work days after telephonic notice is given.

(b) The requirements of (a) of this Section shall not apply to the installation of a line of less than one (1) mile in length.

165:20-7-3. Mandatory participation in Oklahoma One Call

(a) The Commission adopts the provisions of the Oklahoma Underground Facilities Damage Prevention Act, Title 63 O.S. §§ 142.1 through 142.13.

(b) The Commission will enforce the provisions of Title 63 O.S. §§ 142.1 through 142.13, against intrastate and interstate hazardous liquid or carbon dioxide pipelines, as described in 49 C.F.R. Part 195.1.

SUBCHAPTER 10. NON-DOT REGULATED GAS GATHERING PIPELINES

165:20-10-1. Authority

Pursuant to 52 OKLA. STAT. Section 5.B., the Commission has adopted this Subchapter establishing rules relating to incidents on a gathering pipeline unit that is not subject to the U.S. Department of Transportation Pipeline Safety Regulations at 49 C.F.R. Parts 191 and 192.

[Source: Added at 28 Ok Reg 1125, eff 7-1-11]

165:20-10-2. Definitions

The following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"DOT" means the United States Department of Transportation,

"Gathering pipeline unit" means the portion of the nonregulated gathering pipeline involved in the incident not to exceed one mile of pipeline.

"Non-DOT gathering pipeline incident" means any of the following events:

(A) An event that involves a release of gas from a gathering pipeline unit and that results in one or more of the following consequences:

(i) A death, or personal injury necessitating in-patient hospitalization;

(ii) Estimated property damage of \$50,000.00 or more, including loss to the operator and others, or both, but excluding cost of gas lost; or

(iii) Unintentional estimated gas loss of three million cubic feet or more.

(B) Any other event that is significant in the judgment of the operator, even though it did not meet the criteria of paragraph A.

[Source: Added at 28 Ok Reg 1125, eff 7-1-11]

165:20-10-3. Telephonic notice of certain non-DOT gathering pipeline incidents

- (a) At the earliest practicable moment, but no more than 24 hours following determination of a non-DOT gathering pipeline incident, an operator shall give notice of each non-DOT gathering pipeline incident.
- (b) Notice shall be made by telephone to the Pipeline Safety Department at 405-521-2258, and shall include the following information:
- (1) Name of the operator.
 - (2) Name and telephone number of the person making the report.
 - (3) The location of the non-DOT gathering pipeline incident.
 - (4) The time of the non-DOT gathering pipeline incident.
 - (5) The number of fatalities and personal injuries, if any.
 - (6) All other significant facts known by the operator that are relevant to the cause of the non-DOT gathering pipeline incident or extent of the damages.

[Source: Added at 28 Ok Reg 1125, eff 7-1-11]

165:20-10-4. Non-DOT gathering pipeline incident reports

- (a) Each operator that experiences a non-DOT gathering pipeline incident shall, as soon as practicable but not later than 30 days after discovery, prepare and file a report on DOT PHMSA Form F 7100.2 with the Pipeline Safety Department, In addition to the information required on For m F 7100.2, the report shall contain:
- (1) In the narrative description of the event, the remedial action taken and any action taken to mitigate a similar non-DOT gathering pipeline incident on the gathering pipeline unit: and
 - (2) A map depicting the location of the non-DOT gathering incident.
- (b) Whenever an operator receives any changes in the information reported on the original report, it shall file a supplemental report within 30 days. Where additional relative information is obtained after a report is submitted under paragraph (a) of this Section, the operator shall make a supplemental report as soon as practicable with a clear reference by date and subject to the original report.

[Source: Added at 28 Ok Reg 1125, eff 7-1-11]

165:20-10-5. Remedial action

Each operator that experiences a non-DOT gathering pipeline incident shall make all repairs in accordance with 49 C.F.R. §§ 192.309, 192.311, 192.711, 192.713, 192.715, 192.717, and 192.719.

[Source: Added at 28 Ok Reg 1125, eff 7-1-11]

165:20-10-6. Record confidentiality

- (a) Except as provided in (b) of this Subchapter, all reports, data, maps or other information which the Commission may be authorized to obtain under the provisions of this Subchapter may be filed as confidential and the Commission shall maintain them as confidential and such records
- (b) Notwithstanding the above, the following information will be available upon request from the Pipeline Safety Department:
- (1) Date and time of the non-DOT gathering pipeline incident.
 - (2) Location of the non-DOT gathering pipeline incident.
 - (3) Name of the operator.

- (4) External diameter of the gathering pipeline unit involved in the non-DOT gathering pipeline incident.
- (5) Number of fatalities and injuries.

[Source: Added at 28 Ok Reg 1125, eff 7-1-11]

SUBCHAPTER 11. DRUG TESTING

165:20-11-1. Control of drug use in pipeline operations

The Commission adopts the provisions of 49 C.F.R. Part 199 with all amendments and appendices thereto.

[Source: Amended at 35 Ok Reg 983, eff 10-1-18; Amended at 37 Ok Reg 1121, eff 10-1-20; Amended at 38 Ok Reg 1746, eff 10-1-21]

165:20-11-2. Reporting of anti-drug testing results

Each operator who is required to submit anti-drug testing results pursuant to 49 C.F.R. § 199.119 shall file a duplicate with the Pipeline Safety Department.

[Source: Added at 28 Ok Reg 1125, eff 7-1-11]

SUBCHAPTER 13. ENFORCEMENT

PART 1. GENERAL

165:20-13-1. Scope and fines

This Subchapter prescribes the procedures utilized by the Oklahoma Corporation Commission in carrying out its responsibilities regarding pipeline safety under Title 52 O.S. §5 and 52 O.S. §§47.1 through 47.8, Title 63 O.S. § 142.13 of the Oklahoma Underground Facilities Damage Prevention Act, Title 63 O.S. §§ 142.1 et seq., and is designed to utilize enforcement procedures already in place by hereby adopting the Commission's Rules of Practice, OAC 165:5, that are pertinent and necessary to carry out the enforcement of pipeline safety rules and regulations.

- (1) For each violation of a Commission rule in Subchapters 5 and 10, the Commission may issue an order pursuant to Title 17 O.S. §1 et seq., fining an operator up to the maximum amount provided by Title 17 O.S. §6.1.
- (2) For each violation of a Commission rule for hazardous liquid pipelines, the Commission may issue an order pursuant to Title 52 O.S. §47.1 et seq., fining an operator up to the maximum amount provided by Title 52 O.S. §47.6.

[Source: Amended at 10 Ok Reg 2615, eff 6-25-93; Amended at 28 Ok Reg 1125, eff 7-1-11; Amended at 34 Ok Reg 933, eff 9-11-17; Amended at 36 Ok Reg 545, eff 8-1-19]

165:20-13-2. Service

- (a) Each notice of probable violation, warning letter, notice of hearing, order of the Commission, or other document required to be served under this Subchapter shall be served personally or by registered or certified mail to all respondents.
- (b) Service upon a person's duly authorized representative or agent shall constitute service upon that person.
- (c) Service by registered or certified mail is complete upon mailing. An official U.S. Postal Service receipt from the registered or certified mailing constitutes prima facie evidence of mailing.

[Source: Amended at 36 Ok Reg 545, eff 8-1-19]

165:20-13-3. Subpoenas; witness fees

The issuance of subpoenas and payment of witness fees shall be in accordance with the provisions of the Commission's Rules of Practice, OAC 165:5-11-3.

PART 3. PROCEDURE

165:20-13-11. General enforcement authority and sanctions

(a) This Subchapter describes the enforcement authority and sanctions exercised by the Oklahoma Corporation Commission Pipeline Safety Department for achieving and maintaining pipeline safety. It also prescribes the procedures governing the exercise of that authority and the imposition of those sanctions, all of which include and supplement the applicable Commission Rules of Practice, OAC 165:5.

(b) A person who is the subject of action pursuant to this Subchapter may be represented by legal counsel at all stages of the proceeding.

(c) If respondent does not submit a response prior to the hearing date or does not enter an appearance at the hearing, a confession of the allegations may be rendered in accordance with OAC 165:5-19-1(c) (5), and judgment may be rendered in accordance with OAC 165:5-19-1(f).

[Source: Amended at 36 Ok Reg 545, eff 8-1-19]

165:20-13-12. Inspections and accident investigations

(a) The Pipeline Safety Department and its agents are authorized to inspect and examine the records and/or properties of any pipeline subject to the jurisdiction of the Commission, as established by 165:20-5.21, and 165:20-7-1, to determine the operator's compliance with this Chapter or orders issued thereunder.

(b) Inspections are ordinarily conducted pursuant to one of the following:

- (1) Routine scheduling by the Manager of Pipeline Safety.
- (2) A complaint received from a member of the public.
- (3) Information obtained from a previous inspection.
- (4) Pipeline incident or accident.
- (5) Whenever deemed appropriate by the Commission, Manager of Pipeline Safety, or his designee.

(c) If, after an inspection, the Manager of Pipeline Safety believes that further information is needed to determine appropriate action, the Manager of Pipeline Safety may send the owner or operator a "Request for Specific Information" to be answered within 30 days after receipt of the letter.

(d) To the extent necessary to carry out the responsibilities under this Chapter, the Manager of Pipeline Safety may require testing of portions of pipeline facilities that have been involved in, or affected by, an accident. However, before exercising this authority, the Manager of Pipeline Safety, shall make every effort to negotiate a mutually acceptable plan with the owner of those facilities and, where appropriate, the National Transportation Safety Board for performing the testing.

(e) If a representative of the Commission investigates an incident involving a pipeline facility, the Manager of Pipeline Safety may request that the operator make available to the representative all records and information that pertain to the incident in any way, including integrity management plans and test results, and that the operator afford all reasonable assistance in the investigation.

(f) When the information obtained from an inspection or from other appropriate sources indicates that further Commission action is warranted, the Manager of Pipeline Safety may issue a notice of probable violation letter under 165:20-13-13.

[Source: Amended at 28 Ok Reg 1125, eff 7-1-11]

165:20-13-13. Notice of probable violations

(a) The Commission begins enforcement proceedings by serving a notice of probable violation of this Chapter or any regulation or order issued thereunder. This notification shall advise the operator that a written response is required and that failure to respond may result in enforcement action in accordance with 165:20-13-15.

(b) A notice of probable violation issued under this Section shall include:

- (1) Statement of the provisions of the laws, regulations, or orders which the respondent is alleged to have violated and a statement of the evidence upon which the allegations are based.
- (2) Notice of response options available to the respondent under 165:20-13-14.

165:20-13-14. Response options

Within thirty (30) days of receipt of a notice of probable violation, the respondent shall respond to the Manager of Pipeline Safety in the following ways:

- (1) Indicate that the probable violation listed in the notice of probable violation is a violation of this Chapter and that it has been corrected. The response shall indicate how the violation was corrected.
- (2) Indicate that the probable violation listed in the notice of probable violation is a violation of this Chapter and request a reasonable period of time to correct the violation. Each request for an extension of time to correct the violation must be accompanied by a detailed reason(s) as to why compliance cannot be accomplished by the original suspense date and the date the operator believes the necessary compliance actions can be completed.
- (3) Object to the probable violation and submit written explanations, information, or other material in answer to the allegations in the notice of probable violations.
- (4) Request a conference under 165:20-13-16.

165:20-13-15. Warning letter, complaint, or contempt citation

(a) If after the expiration of the thirty (30) day response period prescribed in 165:20-13-14 the owner or operator of the probable violation has not responded to the notice of probable violation, the Manager of Pipeline Safety may issue a warning letter advising the owner or operator of the probable violation to correct the violations or be subject to further Commission enforcement action under (b) of this Section.

(b) The Commission legal staff may issue a complaint or contempt citation notifying the owner or operator of the probable violation and that a hearing has been set before the Commission to address the owner's or operator's violation of this Chapter, the prosecution of which shall be in accordance with the applicable Commission Rules of Practice, OAC 165:5.

(c) The severity of the probable violation or the conduct of the owner or operator in responding to the notice of probable violation as interpreted by the Commission, may be considered in determining the type of complaint or contempt citation issued

by the Commission. These warning letters, complaints, and contempt citations shall be served as provided in 165:20-13-2.

165:20-13-16. Conference

- (a) A request for conference in response to a notice of probable violation issued under 165:20-13-13 must be accompanied by a statement of the issues which the respondent intends to raise at the conference. The issues may relate to the alleged violations, new information, or the required corrective action.
- (b) The conference is conducted informally without strict adherence to the Commission's Rules of Practice, OAC 165:5. The respondent may submit any relevant information and materials on his behalf. He may also examine the complaints against him. No detailed record of the conference is prepared.
- (c) At the outset of the conference, the complaints shall be presented by the Manager of Pipeline Safety or his designee. The respondent may examine and respond to or rebut the complaints.
- (d) After the presentation of the complaints, the respondent may offer facts, statements, explanations, documents, testimony, or other items which are relevant to the issues under consideration.
- (e) At the close of the respondent's presentation, the Manager of Pipeline Safety may present or allow the presentation of any Pipeline Safety Department rebuttal information. The respondent may then respond to that information.
- (f) The respondent may also request an opportunity to submit further written material for inclusion in the case file. The Manager of Pipeline Safety shall allow a reasonable time for submission of the material and shall specify the date by which it must be submitted.
- (g) After submission of all material during and after the conference, the Manager of Pipeline Safety shall determine if further Commission enforcement action is necessary.

PART 5. MISCELLANEOUS PROVISIONS

165:20-13-21. Cooperation with federal authorities

The Pipeline Safety Department, the Commission legal staff and all other agents of the Commission shall cooperate with the United States Department of Transportation in the investigation and prosecution of any violation of 49 C.F.R. Parts 192 and 195 occurring within this State.

165:20-13-22. Administrative enforcement

Whenever the Manager of Pipeline Safety, after inspection, finds a pipeline facility which is subject to the jurisdiction of the Commission to be hazardous to life or property, he is authorized to require the operator operating such facility to take such corrective measures as are reasonably necessary to remove such hazards.

165:20-13-23. Request for exception to rule or order

- (a) An operator may request an exception to a requirement of an order or rule of the Commission. Such a request shall be made by application conforming to the requirements of the Commission Rules of Practice, OAC 165:5.
- (b) After notice and hearing conforming to the requirements of the Commission's Rules of Practice, OAC 165:5, and the laws of this State, the Commission shall issue an order specifying such relief as it deems appropriate.

(c) Any Commission order that grants relief from the requirements of any rule as listed in 49 C.F.R. §§ 191, 192, or 195 shall be subject to the review and approval of the Office of Pipeline Safety in Washington D.C. The Commission, upon granting relief, shall submit request pursuant to the requirements of the Natural Gas Pipeline Safety Act of 1979, Section 3 (d).

(d) Neither the Pipeline Safety Department nor the Commission legal staff shall grant relief from the requirements of any rule of the Commission, unless so ordered by the Commission.

SUBCHAPTER 15. REGULATIONS FOR GRANTS TO AID STATE PIPELINE SAFETY PROGRAMS

165:20-15-1. Regulations for grants to aid state pipeline safety programs

The Commission adopts the provisions of 49 C.F.R. Part 198, with all amendments and appendices thereto as such exist on January 1, 2019.

[Source: Added at 26 Ok Reg 1127, eff 7-1-09; Amended at 34 Ok Reg 933, eff 9-11-17; Amended at 35 Ok Reg 983, eff 10-1-18; Amended at 36 Ok Reg 545, eff 8-1-19]

SUBCHAPTER 17. OBLIGATIONS UNDER THE OKLAHOMA UNDERGROUND FACILITIES DAMAGE PREVENTION ACT SUBJECT TO COMMISSION ENFORCEMENT

165:20-17-1. Scope

(a) This Subchapter applies to Commission enforcement pursuant to 63 O.S. § 142.13 of the Oklahoma Underground Facilities Damage Prevention Act, 63 O.S. §§ 142.1 et seq., with respect to those facilities described by the currently effective definition of "pipeline" in 49 C.F.R. § 192.3 and "pipeline" and "pipeline system" in 49 C.F.R. § 195.2. This Subchapter does not apply to any other underground facility, except to the extent it may qualify as a "pipeline" or "pipeline system" under the referenced regulations.

(b) This Subchapter shall not be construed as limiting the Commission's authority to grant an exception, for good cause shown, to any rule contained in this Subchapter unless otherwise precluded by law.

(c) Nothing in this Subchapter shall be construed to modify or limit any private right of action arising under the Oklahoma Underground Facilities Damage Prevention Act and enforceable in the district courts of this State.

[Source: Added at 32 Ok Reg 779, eff 8-27-15]

165:20-17-2. Definitions

In addition to terms defined in 63 O.S. § 142.2, the following words and terms, when used in this Subchapter, shall have the following meaning, unless the context clearly indicates otherwise:

"Act" means the Oklahoma Underground Facilities Damage Prevention Act, 63 O.S. §§ 142.1 et seq.

"Pipeline" means "pipeline" as defined in 49 C.F.R. § 192.3 and 49 C.F.R. § 195.2.

"Pipeline system" means "pipeline system" as defined in 49 C.F.R. § 195.2.

[Source: Added at 32 Ok Reg 779, eff 8-27-15]

165:20-17-3. Statutory citation

Citations to the Act, 49 C.F.R. § 192.3 and 49 C.F.R. § 195.2 in this Subchapter refer to the most recent codifications of the Act and such sections of the Code of Federal Regulations.

[Source: Added at 32 Ok Reg 779, eff 8-27-15]

165:20-17-4. Compliance with the Act required

(a) Compliance with the provisions of the Act applicable to a pipeline or pipeline system is required.

(b) The Commission may enforce any violation of the Act against any person to the extent:

- (1) the violation occurs with respect to a pipeline or pipeline system; and
- (2) the person against whom enforcement action is taken is subject to the provisions of the Act, including without limitation operators and excavators.

[Source: Added at 32 Ok Reg 779, eff 8-27-15]

165:20-17-5. Emergencies

An excavator shall immediately call the local 911 emergency telephone number and report any incident that results in an unintentional and uncontrolled release of flammable, toxic or corrosive gas or liquid from a pipeline or pipeline system. In this context, intentional acts refer to operator maintenance or repairs and not vandalism or other similar acts.

[Source: Added at 32 Ok Reg 779, eff 8-27-15]

165:20-17-6. Positive notification of size and material

In addition to the provisions of Title 63, O.S. § 142.6, each operator served with a notice in accordance with subsection A of Title 63, O.S. § 142.6, shall notify the excavator of the size and material of an active underground facility.

[Source: Added at 36 Ok Reg 545, eff 8-1-19]

165:20-17-7. Immediate notice of excavation damages caused by excavator to gas distribution mains, gas transmission pipelines, gas gathering pipelines, and all hazardous liquid pipelines

(a) At the earliest practicable moment following discovery, but no later than one hour after confirmed discovery, each operator must give notice in accordance with paragraph (b) of this section of excavation damage occurring to gas distribution mains, gas transmission pipelines, gas gathering pipelines and hazardous liquid pipelines that exceeds Ten Thousand dollars (\$10,000) in property damage. Property damage shall include cost to excavator, operator, property owner and lost product.

(b) Each notice required by paragraph (a) of the section must be made to the Commission's Pipeline Safety Department either by telephone to 405-521-2258 or electronically at TRPipelinesafety@occ.ok.gov and must submit the following information:

- (1) Names of operator and person making report and their telephone numbers.
- (2) The location of the excavation damage.
- (3) The time operator confirmed the excavation damage.

- (4) The number of fatalities and personal injuries, if any.
- (5) Name, contact number, and address of party causing excavation damage, if known at the time of notification.
- (6) All other significant facts that are known by the operator that are relevant to the cause of the excavation damage.

[Source: Added at 36 Ok Reg 545, eff 8-1-19; Amended at 38 Ok Reg 1746, eff 10-1-21]

165:20-17-8. Written report of all excavation damages

(a) Each operator shall submit a semiannual damage summary report to the Commission's Pipeline Safety Department. The report shall contain the following information on all damage resulting from excavation activity:

- (1) Name and address of operator;
- (2) Name, contact number, and address of party causing excavation damage;
- (3) The type of excavator equipment;
- (4) The location in which the damage occurred;
- (5) The type of facility damaged;
- (6) The date of the damage(day, month and year);
- (7) The primary cause of the damage.

(b) The semiannual damage summary reports shall be due on March 1 and September 1. For semiannual damage summary reports due on September 1, the reporting period shall be from January 1 through June 30. For semiannual damage summary reports due on March 1, the reporting period shall be from July 1 through December 31.

(c) The report referenced in paragraph (b) can be submitted on a spreadsheet, single pages for each occurrence of excavation damage, or if the operator participates in the Common Ground Alliance's Damage Reporting Tool (DIRT) they may submit a copy of the report which reflects their data.

(d) If no damages have occurred during the reporting period, a report is still required indicating "No Damages Occurred".

(e) Reports can be submitted via TRPipelines safety@occ.ok.gov.

(f) Should any of the information required in 165:20-17-8(a) not be available, the operator shall, prior to the next semiannual report, supply the missing data. An explanation of what actions were taken to secure the information must be supplied if after a good faith effort to secure the information is performed the information remains unavailable.

[Source: Added at 36 Ok Reg 545, eff 8-1-19; Amended at 38 Ok Reg 1746, eff 10-1-21]

165:20-17-9. Submitting a complaint about failure to follow the Oklahoma Underground Facilities Damage Prevention Act

Anyone can submit a complaint against an excavator or pipeline operator for failing to comply with any portion of the Oklahoma Underground Facilities Damage Prevention Act by calling the Commission's Pipeline Safety Department at 405-521-2258 or submit the complaint online at the <http://www.occeweb.com/AspxForms/PipeLineForm.aspx>. The complaint must include at a minimum the following information:

- (1) First Name;
- (2) Last Name;
- (3) E-mail address;
- (4) Contact Phone Number;
- (5) Alternate Phone Number;

- (6) Mailing address;
- (7) City;
- (8) State;
- (9) Zip Code;
- (10) Date of Complaint or excavation damage;
- (11) Name of Pipeline Company or Excavating Company;
- (12) Location of Complaint (Section, Township, Range, GPS Coordinates or Street Address).

CHAPTER 25. UNDERGROUND STORAGE TANKS

[Authority: 42 U.S.C. §§ 6991 et seq.; OKLA. CONST. art IX, §§ 18, 19; 17 O.S., §§ 306(12), 307, 322, 342, and 347; 27A O.S., §§ 1-3-101 et. seq.]

[Source: Codified 12-31-91]

SUBCHAPTER 1. GENERAL PROVISIONS

PART 1. PURPOSE

165:25-1-1. Purpose

The purpose of this Chapter is to provide a comprehensive regulatory program for the safe operation of underground storage tank systems containing PSTD regulated substances in Oklahoma and to prevent and contain contamination caused by leaking underground storage tank systems and to reduce the hazards of fire and explosion.

[Source: Amended at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-1-2. Contents [REVOKED]

[Source: Revoked at 18 Ok Reg 2378, eff 7-1-01]

165:25-1-3. Authority [REVOKED]

[Source: Amended at 10 Ok Reg 2617, eff 6-25-93; Revoked at 18 Ok Reg 2378, eff 7-1-01]

PART 3. DEFINITIONS

165:25-1-11. Definitions

In addition to the terms defined in 17 O.S. §§ 303 and 348, the following words or terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Agent" means a person authorized by another to act on their behalf, either out of employment or contract.

"Airport" means landing facility for aircraft that are routinely available for public use (whether routinely used or not). Airports as used in this Chapter do not include private airstrips or private airports.

"Airport hydrant system" means an underground storage tank system which fuels aircraft and operates under high pressure with large diameter piping that typically terminates into one (1) or more hydrants (fill stands). The airport hydrant system begins where fuel enters one (1) or more tanks from an external source, such as a pipeline, barge, rail car, or other motor fuel carrier.

"ATG" means automatic tank gauge.

"Ball float functionality" means the ball float is operational as designed.

"BTEX" means benzene, toluene, ethylbenzene and xylene.

"Bulk plant" means a petroleum storage tank facility where regulated substances are received by tank vessels, pipelines, tank cars or tank vehicles and are stored or blended in mass quantities or bulk for the purpose of distribution by a tank vessel, tank car, tank vehicle, portable tank or other container, for wholesale or retail sale.

"Cathodic protection" means a technique designed to prevent the corrosion of a metal surface by making that surface the cathode of an electrochemical cell. For example, protection can be accomplished with an impressed current system or a galvanic anode system.

"Change in service" means a change in the status of a storage tank (i.e., from currently in use to temporarily out of use); or change of regulated substance that a storage tank contains.

"Commission" or **"OCC"** means the Oklahoma Corporation Commission.

"Compatible" means the ability of two (2) or more substances to maintain their respective physical properties upon contact with one another for the design life of the petroleum storage tank system under conditions likely to be encountered in the system.

"Corrosion expert" means an individual having the requisite knowledge, experience, certification, and training to design, install, test, and maintain corrosion protection systems.

"EPA" means the United States Environmental Protection Agency.

"Electronic signature" means an electronic signature as defined in OAC 165:5-1-3.

"Farm tank" is a tank located on a tract of land devoted to the production of crops or raising animals, including fish, and associated residences and improvements. A farm tank must be located on the farm property. "Farm" includes but is not limited to fish hatcheries, rangeland, and nurseries with growing operations.

"Field constructed tank" means a tank constructed in the field such as a tank constructed of concrete that is poured in the field, or a steel or fiberglass tank primarily fabricated in the field.

"Financial responsibility" shall have the same meaning in this Chapter as in 40 CFR 280 Subpart H.

"Financial security" means holding financial security in a tank system or facility site and is not considered ownership of a tank system unless certain criteria of 40 CFR 280 Subpart H is met.

"Fleet and Commercial" means any facility as defined in this Chapter that uses underground storage tanks to store regulated substances for use in its own vehicles or equipment.

"Flow-through process tank" means a tank that forms an integral part of a production process through which there is a steady, variable, recurring or intermittent flow of material during the operation of the process. Flow-through process tanks do not include tanks used for the storage of materials prior to their introduction to the process or for the storage of finished products or by-products from the production process.

"Formal Enforcement Action" means the process of ensuring compliance with Commission regulations, rules, orders, requirements, standards, and/or state law when a violation occurs and PSTD initiates an enforcement Complaint under

the contempt procedure in Oklahoma Administrative Code (OAC) 165:5 Subchapter 19 to be heard at the Commission by an Administrative Law Judge or the Commissioners.

"Gathering lines" means a gathering line or gathering system as defined in OAC 165:45-1-2.

"Important building" means a building that is considered not expendable in an exposure fire.

"Inert material" means a solid, motionless substance that is neither chemically nor biologically reactive, is denser than water, and will not decompose. Examples of inert material include sand and concrete, or as otherwise approved by PSTD staff.

"Lender liability" shall have the same meaning in this Chapter as in 40 CFR 280 Subpart I.

"Licensed Environmental Consultant" means an individual who has a current license issued by PSTD to perform corrective action.

"Maintenance" means the normal operational upkeep necessary to prevent a petroleum storage tank system from releasing product.

"Marina" means any fuel storage tank system located on or by the water for the purpose of fueling watercraft.

"Observation well" means a cased and screened boring or drilled hole, installed within the tank excavation or piping trench that can be used for the continuous or periodic evaluation of groundwater quality or the detection of soil vapors as a method of release detection.

"Operational life" means the period beginning from the time installation of the tank or system is commenced until it is properly closed or removed as provided for in this Chapter.

"Operator" means any person in control of or having responsibility for the daily operation of the storage tank system, whether by lease, contract, or other form of agreement. The term "operator" also includes a past operator at the time of a release, tank closure, violation of the Oklahoma Petroleum Storage Tank Consolidation Act, or a rule promulgated thereunder, or a requirement of the Commission. In the case of a storage tank system in service/use before November 8, 1984, but no longer in service/use on that date, the last person to operate the storage tank system immediately before the discontinuation of its service/use.

"Out of Order tag" means tag, device or mechanism on the tank fill pipe that clearly identifies an underground storage tank as ineligible for delivery of product.

"Owner" means any person as set forth in 17 O.S. § 303(27), including the real property owner where the storage tank system is still present, the storage tank system presence is a trade fixture or improvement or both. It is not necessary that the real property owner sold, used, or stored regulated substances in, of, or from the storage tank system. However, a real property owner who has a storage tank system located on their property that was taken out of service/use prior to November 8, 1984, is not considered to be a storage tank owner for any PSTD regulated purpose.

"OWRB" means the Oklahoma Water Resources Board.

"Permanent out of use" or **"POU"** means a petroleum storage tank system that is not in service/use, does not contain regulated substances, and is not intended to be placed back in service/use.

"Private airport" means an airport used only by its owner and regulated as a fleet and commercial facility.

"Private airstrip" means a personal residential takeoff and landing facility part of the airstrip owner's residential property.

"PSTD" means Petroleum Storage Tank Division.

"Recalcitrant owner" means an owner/operator who is responsible for a tank system and after notice will not adhere to a PSTD enabling statute, Commission rule, requirement, or order.

"Regulated substance" means antifreeze, motor oil, motor fuel, gasoline, kerosene, diesel or aviation fuel as set forth in 17 O.S. § 305. It does not include compressed natural gas, liquid natural gas or propane.

"Release detection" means the methodology used in determining whether a release of regulated substances has occurred from a petroleum storage tank or system into the environment or into the interstitial area between the underground storage tank system and its secondary barrier.

"Residential tank" is a tank located on real property used primarily for dwelling purposes.

"Retail facility" means a service station, convenience store or any other facility selling a PSTD regulated substance that is open to the general public.

"Secondary containment" means an underground storage tank and/or piping with inner and outer barriers which provide a space for interstitial (the space between the inner and outer walls of a double walled tank or piping) monitoring.

"Tampering" means willful intention in an attempt to deceive, cheat or misrepresent facts to the public. Tampering also presents a risk to the environment as well as public health, safety and welfare.

"Tank tightness testing" or **"precision testing"** means a procedure for testing an underground storage tank system's integrity.

"Temporary out of use" or **"TOU"** means the status of an underground storage tank system that has been taken out of service/use with the intent to permanently close or return to service.

"TPH" means total petroleum hydrocarbons.

"Underground storage tank" or **"UST"** "storage tank" as defined in 17 O.S. § 303(40) that has ten percent (10%) or more of its volume beneath the surface of the ground.

"Underground storage tank system" means a closed-plumbed system including, but not limited to the underground storage tank(s), the individual storage tank compartments, the lines, dispenser for a given product, containment sump, if any, and ancillary equipment or a delivery truck that is connected to the storage tank system.

"Used Motor Oil" is any spent motor oil removed from a motor vehicle.

PART 5. SCOPE OF RULES

165:25-1-21. Overview of applicability and enforcement

This Chapter applies to owners, operators, their employees and agents of all underground storage tank systems for which the Commission has been given

regulatory responsibility by 27A O.S. (Supp. 1999) § 1-3-101 (E) (5) (b) and 17 O.S. § 301 et seq.

[Source: Amended at 9 Ok Reg 2305, eff 6-25-92; Amended at 18 Ok Reg 2378, eff 7-1-01; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15]

165:25-1-22. Interim prohibition [REVOKED]

[Source: Amended at 9 Ok Reg 2305, eff 6-25-92; Revoked at 18 Ok Reg 2378, eff 7-1-01]

165:25-1-23. Partial deferrals [REVOKED]

[Source: Amended at 9 Ok Reg 2305, eff 6-25-92; Revoked at 18 Ok Reg 2378, eff 7-1-01]

165:25-1-23.1. Specified applications

The following classes of underground storage tanks or systems are subject to specific regulations of this Chapter as follows:

- (1) Airport hydrant fuel distribution systems and UST systems with field-constructed tanks are subject to all of the EPA requirements in 40 CFR 280 Subpart K.
- (2) Emergency power generator tank owners and operators are subject to all requirements of this Chapter.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16]

165:25-1-24. Exclusions

The following classes of underground storage tanks or systems are specifically excluded from all provisions of this Chapter:

- (1) Farm and residential tanks with an individual capacity of 1,100 gallons or less used for storing regulated substances for non-commercial purposes.
- (2) Tanks used for storing heating oil for consumptive use on the premises where stored.
- (3) Pipeline facilities (including gathering lines) regulated under:
 - (A) The Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. App., § 1671 et seq.);
 - (B) The Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. App., § 2001 et seq.); or
 - (C) Intrastate pipeline facilities regulated under State law comparable to the provisions of law referred to in (A) or (B) of this paragraph.
- (4) Flow-through process tanks.
- (5) Liquid trap or associated gathering lines directly related to oil or gas production and gathering operations.
- (6) Tanks with a capacity of less than 110 gallons.
- (7) Tanks storing diesel fuel at plants regulated by the Atomic Energy Commission.
- (8) Any emergency spill or overflow containment UST system that is expeditiously emptied after use.

[Source: Amended at 11 Ok Reg 3705, eff 7-11-94; Amended at 18 Ok Reg 2378, eff 7-1-01; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-1-24.1. Citation of rules

This Chapter will be known as the Oklahoma Corporation Commission's Rules and Regulations Governing Underground Storage Tanks and is to be cited as Chapter 25 of Commission rules or abbreviated as OAC 165:25.

[Source: Renumbered from 165:25-1-25 at 23 Ok Reg 2261, eff 7-1-06; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 35 Ok Reg 985, eff 10-1-18]

PART 6. ADMINISTRATIVE PROVISIONS

165:25-1-25. Citation of rules [RENUMBERED]

[Source: Amended at 18 Ok Reg 2378, eff 7-1-01; Amended at 22 Ok Reg 1730, eff 7-1-05; Renumbered to 165:25-1-24.1 at 23 Ok Reg 2261, eff 7-1-06]

165:25-1-26. Effective date of rules [REVOKED]

[Source: Revoked at 18 Ok Reg 2378, eff 7-1-01]

165:25-1-26.1. Hearings, orders and exceptions

(a) The Commission will issue orders after notice and hearing as necessary to enforce the provisions of this Chapter or PSTD enabling statutes to protect property, the public health and safety, and the environment.

(b) Hearings to enforce or exceptions to the provisions of this Chapter or PSTD enabling statutes will be conducted in accordance with OAC 165:5.

165:25-1-26.2. Public participation

PSTD shall provide for public participation in the enforcement process by:

- (1) Providing notice and opportunity for public comment on all proposed settlements of civil enforcement actions (except where immediate action is necessary to adequately protect human health and the environment);
- (2) Investigating and providing responses to citizen complaints about violations; and
- (3) Not opposing citizen intervention when permission intervention is allowed by statute, rule or regulation.
- (4) PSTD hearings are open to the public and interested parties are encouraged to attend.

PART 9. NOTIFICATION AND REPORTING REQUIREMENTS

165:25-1-41. General reporting requirements

PSTD requires owners or operators of underground storage tank systems to provide information it deems necessary for the protection of human health, safety, property and the environment. Use of the designated PSTD online format is required for reporting, scheduling, tank registration, change in ownership, release detection, testing, temporary change in service, permanent closure, or return to service. Owners and operators must notify PSTD within thirty (30) days when their mailing address changes or tank status changes. Owners and operators of underground petroleum storage tank systems must notify PSTD at least thirty (30) days prior to switching to regulated substances containing greater than ten percent (10%) ethanol or regulated substances containing greater than twenty percent (20%) biodiesel in the online format established by PSTD. Required release detection forms are available on the Commission website. Failure to notify and/or submit PSTD paperwork in the online format established by PSTD within the timeframe required may result in an enforcement action.

[Source: Amended at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19; Amended at 37 Ok Reg 1128, eff 10-1-20]

165:25-1-42. New tank systems

(a) Persons intending to install a new underground storage tank and/or new underground piping must give PSTD notification of the installation at least forty-eight (48) hours before the tank and/or lines are to be installed by submitting the PSTD scheduling notification in the online format established by PSTD and receiving confirmation of the installation from PSTD. If events require a change in the date of installation, PSTD shall be given forty-eight (48) hours notice of the new date. Any underground storage tank system permanent removal or a removal associated with replacement of tanks or lines requires at least fourteen (14) day notification prior to the removal activity.

(b) Upon receipt of the scheduled installation an authorization letter giving temporary approval to receive fuel into an un-permitted tank **FOR TESTING PURPOSES ONLY** will be sent to the owner. This letter is site specific and will expire ninety (90) days after the date of issuance. After the tank installation is complete, the PSTD registration must be submitted to PSTD in the online format established by PSTD along with copies of required installation testing, photographs of the tank and piping system components before they are covered, an as-built drawing of the entire tank system, and manufacturer installation checklists within thirty (30) days. The tank owner and Licensed UST Installer are both responsible for timely submittal of all installation paperwork. The registration must be approved and tank fees paid in order to receive a tank permit to dispense fuel. No regulated storage tank system can be operated without a valid permit from the Corporation Commission.

(c) Owners and Commission-licensed UST Installers must certify on the registration that the installation of tanks and piping meet the requirements of this

Chapter.

165:25-1-48. Tank and line tightness testing

(a) Tank and line tightness testing results in which any part of the tank system tested does not pass must be reported to the PSTD within twenty-four (24) hours by the owner, operator, their employees or agents, and also independently by the person or company performing the test. Complete test results must be submitted within 7 days of testing.

(b) Tank tests must include both the wetted portion and ullage portion of the tank.

(c) Hydrostatic line tightness tests and line leak detector tests must be conducted by a certified tester, if applicable, in accordance with manufacturer's instructions, and reported on the prescribed PSTD form.

(d) The tester performing line and leak detector tests must also certify that the line leak detector is installed properly.

(e) All personnel performing tank and line testing must have the required education, experience, knowledge and competence to correctly perform testing services in accordance with the testing equipment, manufacturer certification and applicable industry standards or codes.

(f) Tank and line tightness testing must be scheduled by submitting the PSTD scheduling form and PSTD staff may be present.

165:25-1-51. Transfer of ownership

When the owner of an underground storage tank transfers ownership of the facility or tank to another person, the new owner must notify PSTD within 30 days of the transfer, by submitting the appropriate PSTD form. The former owner must advise the Commission of the name and address of the new owner. All records required by PSTD must be transferred at no cost to the new owner. Owners and operators must notify PSTD within thirty (30) days when their mailing address changes.

[Source: Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 34 Ok Reg 935, eff 9-11-17]

PART 11. RECORDKEEPING

165:25-1-53. Availability of records

- (a) Owners and operators of underground storage tank systems regulated by this Chapter must cooperate with PSTD requests for submission of records.
- (b) Each owner/operator must provide written notice of any address change within thirty (30) days to the PSTD office.
- (c) All leak detection records, including but not limited to, sampling, testing, inventory and monitoring records, must be available on site for each tank for the preceding three (3) years.
- (d) Copies of the following records must be readily available to the PSTD Fuel Specialist:
 - (1) Tank tightness tests, thirty (30) day inventory reconciliation, statistical inventory reconciliation, vapor or groundwater monitoring, automatic tank gauge tests, and interstitial monitoring results that demonstrate compliance with release detection for tanks.
 - (2) Line tightness tests, electronic line tests, all sensor and alarm history results, and line leak detector function tests that demonstrate compliance with release detection for lines.
 - (3) Installation and repair records for spill containment, overfill prevention, tank and piping construction must be maintained for three (3) years and readily available to PSTD.
 - (4) Cathodic protection records specified in this Subchapter (OAC 165:25-1-56), tank lining certificates, and any other records that demonstrate compliance with corrosion protection for the tank system must be maintained and readily available to PSTD.
 - (5) Current owner and tank system registration and current permit for all tanks located at the facility.
 - (6) Current certificate(s) of training for all classes of operators.
 - (7) Records that document compatibility with underground petroleum storage tank systems storing regulated substances containing greater than ten percent (10%) ethanol or twenty percent (20%) biodiesel. These records must be maintained at the facility for as long as the tank system is used to store these substances.
 - (8) Beginning October 13, 2018, owners and operators must maintain records of annual operation and maintenance tests on the electronic and mechanical components of release detection equipment. Records must be maintained for three (3) years and at a minimum must list each component tested, indicate whether each component needed to have action taken and

describe any action taken to correct the issue.

(9) A copy of the site assessment for groundwater or vapor monitoring must be kept at the facility for as long as this method is used as release detection.

(e) Failure to have the required records available upon request by PSTD may result in enforcement action.

(f) Release detection records, overfill prevention equipment inspection records, spill prevention equipment testing records, and containment sump testing records must be maintained on Commission forms.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 26 Ok Reg 1826, eff 7-1-09; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-1-54. Repair records

Owners and operators of underground storage tank systems regulated by this Chapter must maintain documentation that identifies the location and nature of all repairs as follows:

(1) Tank system repairs meant to restore a tank, pipe, secondary containment, spill prevention equipment, overfill prevention equipment, corrosion protection equipment, release detection equipment or other UST system component that has caused a release or a suspected release of product from the UST system or has failed to function properly must be scheduled using the OCC scheduling form.

(2) These records shall include a complete description of all repairs made, photographs before and after repair, sample results if required, an updated site map, and testing following repairs.

(3) The records must be readily available at the facility, submitted to PSTD within thirty (30) days of repair completion, and kept for the remaining operating life of the storage tank system.

(4) Requirements of this Section do not apply to routine and minor maintenance activities related to the tank and piping system or dispensers.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 30 Ok Reg 584, eff 7-1-13; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-1-55. Tank installation, closure and removal records

(a) Owners and operators of underground storage tank systems must maintain records regarding the installation for the lifetime of the system or provide copies of installation records to PSTD for retention in the Division's files.

(b) Owners and operators of underground storage tank systems must maintain records demonstrating compliance with the closure and removal requirements for tanks that are temporarily taken out of service or permanently removed at operating facilities.

(c) The owner, operator or Commission licensee hired by the owner and/or operator must submit the PSTD Closure Report Form and all required attachments to PSTD within forty-five (45) days from the date the tanks are permanently taken out of service or removed.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-1-56. Release detection and cathodic protection records

(a) Owners and operators of underground storage tank systems regulated by this Chapter must maintain release detection records for three (3) years.

- (b) Owners and operators of underground storage tank systems regulated by this Chapter who use cathodic protection must maintain the following records.
- (1) Original cathodic protection design with drawings, plans, description of materials used, and suitability study depicting all of the cathodic protection system components in accordance with National Association of Corrosion Engineers (NACE) RP0285.
 - (2) Rectifier readings for impressed current systems conducted at least every 60 days on the appropriate OCC form.
 - (3) Results of the last three inspections or cathodic protection system tests completed by a corrosion tester.
- (c) If observation wells are used as release detection, the PSTD approved site assessment must be maintained on site.
- (d) Written documentation of all calibration, maintenance, and repair of release detection equipment permanently located on-site must be maintained for at least three (3) years after the servicing work is completed. Any schedules of required calibration and maintenance provided by the release detection equipment manufacturer must be retained for five (5) years from the date of installation.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 34 Ok Reg 935, eff 9-11-17]

165:25-1-57. Spill and overflow records

- (a) Owners and operators of underground storage tank systems must keep records of spills and overfills for review and inspection by PSTD for a period of 3 years from date of such spill or overflow.
- (b) On new installations, records must be maintained that document overflow prevention inspections and records that document spill prevention equipment testing were performed at installation and at least once every three (3) years thereafter. Existing tank systems must maintain records documenting overflow prevention inspections and records documenting spill prevention equipment testing by October 13, 2018 and at least once every three (3) years thereafter.
- (c) Records demonstrating compliance with overflow inspections and spill prevention equipment testing, including double walled spill buckets that are interstitially monitored at least every thirty (30) days, must be maintained for a minimum of three (3) years.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 33 Ok Reg 604, eff 8-25-16]

165:25-1-58. Piping records

Tank owners shall maintain a current map of their underground tank system and update it within 30 days of any changes.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 34 Ok Reg 935, eff 9-11-17]

165:25-1-60. Walkthrough inspections and records

- (a) Owners and operators must conduct walkthrough inspections according to the requirements in 40 CFR 280.36. Owners and operators of underground storage tank systems must maintain a record of 30-day and annual walkthrough inspections according to EPA requirements with the first inspection due by October 13, 2018.
- (1) Every 30 days all spill prevention equipment and release detection equipment must be inspected (except spill prevention equipment at UST

systems receiving deliveries at intervals greater than 30 days may be checked prior to delivery). Containment sumps and any hand-held release detection equipment, such as tank gauge sticks, must be inspected annually. (2) Records should include a list of each area checked, whether each area checked was acceptable or needed action taken, a description of any actions taken to correct issues, and delivery records if spill prevention equipment is checked less frequently.

(b) In addition, airport hydrant systems must meet the additional walkthrough inspection requirement in 40 CFR 280.252(c).

(c) All walkthrough inspection records must be on Commission forms and maintained on site for three (3) years.

[Source: Added at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 36 Ok Reg 551, eff 8-1-19]

PART 13. FEES

165:25-1-64. Fees

This Chapter requires fees according to the schedule set out in Chapter 5 of Commission rules.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 19 Ok Reg 1609, eff 6-13-02; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 35 Ok Reg 985, eff 10-1-18]

PART 15. SHUTDOWN OF OPERATIONS

165:25-1-67. Shutdown of operations

(a) PSTD may close (shut down) a UST system:

- (1) If the system poses an imminent threat to health, safety, or the environment.
- (2) If the owner or operator is operating tanks for which permit fees have not been paid.
- (3) If the owner or operator fails to comply with a Commission requirement or order.
- (4) For failure to properly install, operate and/or maintain leak detection, spill, overfill, or corrosion equipment if the owner/operator has been issued a written notice of violation and has failed to correct the problem.
- (5) Failure to protect a buried metal flexible connector from corrosion if the owner/operator has been issued a written notice of violation and has failed to correct the problem.
- (6) Failure to perform, maintain, have readily available or present records for the previous twelve (12) thirty (30) day periods.
- (7) Failure to have a Class A, B, or C operator on premises during business hours.
- (8) Tampering with equipment.
- (9) If a Fuel Specialist issues a Notice of Violation (NOV) and the violation(s) is/are not corrected.

(b) PSTD must close (shut down) a UST system:

- (1) If required spill prevention equipment is not installed.
- (2) If required overfill protection equipment is not installed.
- (3) If required leak detection equipment is not installed.
- (4) If required corrosion equipment is not installed.

- (5) If two inches (2") or more of water is found in the tank where conventional gasoline or diesel fuel is stored and if one-half inch (1/2") or more of water is found in the tank of gasoline blended with alcohols, E85, fuel ethanol, or diesel blended with biodiesel.
- (6) If a meter is found to be off in calibration by more than minus fifteen (-15) cubic inches per every five (5) gallons.
- (c) Only PSTD designated employees have the authority to lock or seal dispensers and/or fill pipes of any UST system violating subsection (a) or (b) of this Section. The PSTD employee must explain in writing to the owner or operator the reason the UST system is being locked or sealed.
- (d) The PSTD "Out of Order" tag attached to each fill pipe of the tank(s) in violation shall serve to clearly identify the tank(s) as ineligible for delivery, deposit, or acceptance of product. Tank owners/operators and product deliverers are responsible for ensuring that product is not delivered into the tagged tank(s).
- (e) Any person who removes a lock or seal without permission from PSTD will be subject to penalties imposed by this Chapter, or formal enforcement proceedings.
- (f) Upon confirmation that the UST system no longer poses an imminent threat to health, safety, or the environment, the owner and/or operator of the facility is in compliance with PSTD rules, permit fees paid, violation(s) corrected, Commission order or requirements satisfied, the authority to remove a lock or seal by the owner or operator may be obtained as follows:
- (1) Written permission from the PSTD employee who placed the lock or seal on the device; coupled with written confirmation to PSTD by the person removing the lock or seal; or
 - (2) Verbal or written permission from the Director or Director's designee; or
 - (3) Application to and order of the Commission.
- (g) If a facility is closed under the provisions of this Section, the owner or operator of the facility will be afforded a hearing within ten (10) days of receipt by PSTD of the owner's or operator's application for a hearing.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 30 Ok Reg 584, eff 7-1-13; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19]

PART 17. LICENSING PROCEDURES

165:25-1-101. Licensing procedure for UST Installers

- (a) Any individual who would like to become a licensed UST Installer must:
- (1) Complete the OCC UST Installer application form.
 - (2) Provide sufficient proof of two (2) years related work experience, completed within the last five (5) years. Applicants must have active participation in the completion of at least three (3) UST installations. If applicant is a current UST installer license holder in another state, the work experience from another state may be substituted for each confirmed year he or she held the license.
 - (3) The individual must pass an examination approved by PSTD.
 - (4) UST Installers must pay fees for applications, examinations, and licensing prior to examination and license issuance as set forth in OAC 165:5.
 - (5) UST Installers must also certify that they will comply with all Commission rules and requirements for underground storage tanks, and applicable Occupational Safety and Health Administration (OSHA) 29 CFR

1910.120 Hazardous Waste Operations and Emergency Response (HAZWOPER) standards.

(b) All examinations and licensing procedures must be completed within one (1) year of approval of the application. Failure to complete the exam and licensing procedures will result in forfeiture of fees and will require a new application and appropriate fees.

(c) Continuing education is required to maintain a UST Installer license; this consists of four (4) hours of continuing education through a PSTD accredited program every year. Licensees may request to rollover a maximum of four (4) credit hours from the current year to satisfy the following year's continuing education requirements. Approval of any rollover hours will be at the discretion of PSTD after evaluating the class, course, or seminar.

165:25-1-102. Licensing procedure for UST Removers

(a) Any individual who would like to become a licensed UST Remover must:

- (1) Complete the OCC UST Remover application form.
- (2) Provide sufficient proof of two (2) years related work experience, completed within the last five (5) years Applicants must have active participation in the completion of at least three (3) UST removals. If applicant is a current UST remover license holder in another state, the work experience from another state may be substituted for each confirmed year he or she held the license.
- (3) Pass an examination approved by the PSTD.
- (4) Pay fees for applications, examinations, and licensing prior to examination and license issuance as set forth in OAC 165:5.
- (5) Certify that they will comply with all Commission rules and requirements for removal of underground storage tanks, and applicable Occupational Safety and Health Administration (OSHA) 29 CFR 1910.120 Hazardous Waste Operations and Emergency Response (HAZWOPER) standards.

(b) All examinations and licensing procedures must be completed within one (1) year of approval of the application. Failure to complete will result in forfeiture of fees and will require a new application and appropriate fees.

(c) Continuing education is required to maintain a UST Removers license; this consists of four (4) hours of continuing education through a Commission approved program every year. Licensees may request to rollover a maximum of four (4) credit hours from the current year to satisfy the following year's continuing education requirements. Approval of any rollover hours will be at the discretion of PSTD after evaluating the class, course, or seminar.

165:25-1-103. Licensing procedure for Vapor Monitor Well Technician

(a) Monitoring of vapor wells for the purpose of thirty (30) day release detection must be performed by an individual licensed by PSTD. An individual who applies to become a licensed Vapor Monitor Well Technician must:

- (1) Complete the OCC application form.
- (2) Demonstrate competence in the use of the monitoring equipment to PSTD. The use of new or different monitoring equipment will require the

user to display competence in the use of the new or different equipment.

(3) Certify that they will comply with all Commission rules and requirements.

(4) Fees must be paid in accordance with OAC 165:5.

(b) Individuals who are monitoring vapor observation wells for release detection purposes must report readings that exceed established levels in OAC 165:25-3-6.23 to the owner or operator and PSTD within forty-eight (48) hours.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-1-104. Licensing procedure for Groundwater Monitor Well Technician

(a) Monitoring of groundwater wells for the purpose of thirty (30) day release detection must be performed by an individual licensed by PSTD. An individual who applies to become a licensed Groundwater Monitor Well Technician must:

(1) Complete the OCC application form.

(2) Demonstrate competence by submitting, in writing, the procedures followed when checking groundwater monitoring wells.

(3) Certify that they will comply with all Commission rules and requirements.

(4) Fees must be paid in accordance with OAC 165:5.

(b) Individuals who are monitoring groundwater observation wells for release detection purposes must report readings that exceed established levels in OAC 165:25-3-6.24 to the owner or operator and PSTD within forty-eight (48) hours.

[Source: Added at 36 Ok Reg 551, eff 8-1-19]

165:25-1-105. Licensee disciplinary action procedure

A license issued by PSTD is a designation of competence to the public in the area of licensee expertise. PSTD is not limited to, but may use the following disciplinary action for PSTD licensees:

(1) **Informal reprimand.** The Manager of the appropriate PSTD department will call offending licensee for an informal discussion addressing the recent infraction and place a memo in the licensee's file documenting the discussion and nature of the violation.

(2) **Formal reprimand.** The Manager of the appropriate PSTD department will prepare a letter of reprimand to the licensee addressing the offense. The letter of reprimand will provide the licensee an opportunity to formally dispute alleged violation(s). The reprimand letter, licensee's response, all recourse actions following licensee rebuttal, if any, and the Manager's final decision(s) will be placed in the licensee's file and maintained by PSTD.

(3) **License suspension, revocation and/or refusal to renew a license.** If the Director elects to pursue suspension, revocation, or refusal to renew, a notice of such action will be sent to the licensee by certified mail/return receipt requested. The notice will state the date and time of the hearing scheduled before an Administrative Law Judge.

[Source: Added at 36 Ok Reg 551, eff 8-1-19]

165:25-1-107. License penalties

(a) The PSTD has the responsibility to deny, suspend, refuse to renew or revoke the license of, or reprimand, any licensee who is found in violation of:

- (1) The practice of any fraud or deceit in obtaining a license or in performing work pursuant to this Chapter.
 - (2) Any gross negligence, incompetence or misconduct in work performed pursuant to this Chapter.
 - (3) Knowingly making false statements or signing false statements, certificates or affidavits to the PSTD or to clients.
 - (4) Aiding or assisting another person in violating any provision of this Chapter.
 - (5) Signing a verification statement for work performed pursuant to this Chapter that was not performed by the licensee.
 - (6) Engaging in dishonorable, unethical or unprofessional conduct of a character likely to deceive, defraud or harm a customer or the public.
 - (7) Failure to comply with this Chapter, OAC 165:26, 165:27, 165:29, and/or the Oklahoma Petroleum Storage Tank Consolidation Act (17 O.S. §§ 301 et seq.) may result in PSTD seeking a suspension and/or revocation of the license.
 - (8) Being under indictment or convicted of a felony for any criminal offense that impacts their obligation to PSTD.
- (b) Failure to submit required PSTD paperwork, test results, and/or reports in the online format established by PSTD within the required timeframe may result in enforcement action.
- (c) Disciplinary action levels against PSTD licensees include but are not limited to informal reprimand, formal reprimand, license suspension, license revocation and refusal to renew.
- (d) Any licensee in violation of Commission enabling statutes, PSTD rules, requirements and/or Commission orders may be subject to disciplinary action levels mentioned above and/or fines assessed by the Commission after notice and hearing.

PART 19. OPERATOR TRAINING

165:25-1-120. Training requirements

Each underground storage tank system or group of underground storage tank systems at a facility must have a Class A, Class B, and Class C operator designated. Separate individuals may be designated for each class of operator or an individual may be designated to more than one of the operator classes. A Class A and Class B operator are required for TOU tanks.

[Source: Added at 25 Ok Reg 1867, eff 7-1-08; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-1-121. [RESERVED]

[Source: Reserved at 25 Ok Reg 1867, eff 7-1-08]

165:25-1-122. Operator Class designations

- (a) A Class A operator has primary responsibility to operate and maintain the underground storage tank system in the broader aspects of the statutory and regulatory requirements to achieve and maintain compliance.
- (b) A Class B operator implements applicable requirements and standards for one or more facilities to monitor day-to-day aspects of operation and recordkeeping.

(c) A Class C operator is an onsite employee responsible for responding to alarms or emergencies caused by spills or release from underground storage tank systems. An operator with at least a Class C Certification must be onsite during fueling operations at attended facilities.

[Source: Added at 25 Ok Reg 1867, eff 7-1-08; Amended at 33 Ok Reg 604, eff 8-25-16]

165:25-1-123. [RESERVED]

[Source: Reserved at 25 Ok Reg 1867, eff 7-1-08]

165:25-1-124. Frequency and proof of training

(a) Each operator class must obtain initial certification from a PSTD-approved training provider no later than July 1, 2011. A Class A or Class B operator may train a Class C operator.

(b) Class A and Class B operators must be trained within 30 days after assuming operation and maintenance responsibilities for an underground storage tank system. Class C operators must be trained before assuming responsibility for responding to emergencies.

(c) Class A and Class B operators must be recertified every 3 years.

(d) Class B operators must be recertified within 30 days in any areas (e.g. spill, overfill, corrosion protection) that are determined to be out of compliance with EPA and PSTD requirements for release prevention and/or release detection.

(e) Owners or operators must provide PSTD with documentation for all operator classes.

[Source: Added at 25 Ok Reg 1867, eff 7-1-08; Amended at 26 Ok Reg 1826, eff 7-1-09; Amended at 32 Ok Reg 780, eff 8-27-15]

165:25-1-125. [RESERVED]

[Source: Reserved at 25 Ok Reg 1867, eff 7-1-08]

165:25-1-126. Enforcement of operator training requirements

Failure to have in place any active certified operator class or comply with requirements of this Part will result in fines and/or formal enforcement action.

SUBCHAPTER 2. GENERAL REQUIREMENTS FOR UNDERGROUND STORAGE TANK SYSTEMS

PART 1. CODES AND STANDARDS

165:25-2-1. Sources of standards

The standards referenced in this Chapter are available for inspection at the offices of the Petroleum Storage Division during regular business hours and from the following sources. New editions of codes and standards supersedes all previous editions.

- (1) American Petroleum Institute (API), 1220 L. Street, N.W., Washington, D.C. 20005. Telephone (202) 682-8375.
- (2) National Association of Corrosion Engineers (NACE), P.O. Box 218340, Houston, Texas 77218. Telephone (713) 492-0535, ext. 810.
- (3) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, Massachusetts 02269. Telephone (800) 344-3555.

- (4) American Society for Testing and Materials (ASTM), 1916 Race Street, Philadelphia, Pennsylvania 19103. Telephone (610) 832-9500.
- (5) Underwriter's Laboratory (UL), 333 Pfingston Road, Northbrook, Illinois 60062. Telephone (708) 272-8800, ext. 42612.
- (6) Petroleum Equipment Institute (PEI), P.O. Box 2380, Tulsa, Oklahoma 74101. Telephone (918) 464-9696.
- (7) Steel Tank Institute (STI), 570 Oakwood Road, Lake Zurich, Illinois, 60047. Telephone (847) 438-8265.
- (8) American Society of Mechanical Engineers (ASME/ANSI), 22 Law Drive, Fairfield, New Jersey 07007. Telephone (800) 843-2763.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04]

165:25-2-2. Incorporated codes and standards

Specific references to documents are made in this Chapter. Each of these documents or part thereof is included by reference as a standard. New editions of codes and standards supersede all previous editions. Commission rules will supersede in all conflicts between PSTD rules and any industry standard. These codes and standards will be updated periodically through a formal rulemaking procedure initiated by PSTD to reflect any substantive or relevant changes.

- (1) National Fire Protection Association Standards:
 - (A) Standard Number 30, 2018, "Flammable and Combustible Liquids Code."
 - (B) Standard Number 329, 2015, "Handling Releases of Flammable and Combustible Liquids and Gases."
 - (C) Standard Number 385, 2017, "Tank Vehicles for Flammable and Combustible Liquids."
 - (D) Standard Number 326, 2015, "Safeguarding Tanks and Containers for Entry, Cleaning and Repair."
 - (E) Standard Number 30A, 2018, "Motor Fuel Dispensing Facilities and Repair Garages."

165:25-2-3. Other standards and regulations [REVOKED]

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Revoked at 25 Ok Reg 1867, eff 7-1-08]

165:25-2-4. Financial responsibility

An owner/operator must satisfy the requirements of Title 40 Code of Federal Regulations (CFR) 280, Subpart H by use of the Oklahoma Petroleum Storage Tank Indemnity Fund (Indemnity Fund) (ref: Okla. Stat. Tit. 17 § 327.3). Compliance may also be satisfied by use of any of the mechanisms outlined in 40 CFR 280, Subpart H, including, but not limited to Self-insurance, Guarantee, Insurance, Surety Bond, Letter of Credit, Trust fund or standby trust fund, Securities pledge, Cash or cash equivalent pledge. Use of the Indemnity Fund requires a co-pay.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 31 Ok Reg 1007, eff 9-12-14; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-2-6. Lender liability

PSTD incorporates by reference the lender liability requirements specified in 40 CFR 280, Subpart I.

[Source: Added at 34 Ok Reg 935, eff 9-11-17]

PART 3. DESIGN AND INSTALLATION

165:25-2-31. Underground storage tank installation

All tanks, piping, and associated equipment used in conjunction with a UST installation shall be installed by personnel possessing appropriate skills, experience, manufacturer's certification, and required PSTD license to complete the installation in accordance with recognized industry standards and this Chapter. A licensed UST installer must be present at all times during the installation. The PSTD Fuel Specialist monitoring the installation must be contacted before underground piping is backfilled so piping and sump tests may be observed and/or inspected. Photos of the installation of tank(s) and line(s) must accompany a completed registration form within thirty (30) days of installation and tanks fees must be paid before a permit is issued.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-2-32. Compatibility

(a) Owners and operators of all underground storage tank systems must use an underground storage tank system that is made of or lined with materials that are compatible with the substance stored in the system.

(b) Owners and operators of underground storage tanks that contain regulated substances greater than ten percent (10%) ethanol or twenty percent (20%) biodiesel must demonstrate compatibility of the tank system, piping, containment sumps, pumping equipment, release detection equipment, as well as spill and overfill equipment by using one of the following methods:

(1) Certification or listing of underground petroleum storage tank system equipment or components by a nationally recognized, independent testing laboratory for use with the regulated substance stored; or

(2) Manufacturer's approval. The manufacturer's approval must be in writing, indicating an affirmative statement of compatibility, specify the range of biofuel blends the equipment or component is compatible with, and originate from the equipment or component manufacturer.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-2-33. Approved tanks, tank design

(a) Tanks must be properly designed and constructed, and any portion underground that routinely contains a regulated substance must be protected from corrosion as specified in referenced codes and standards. All new or replacements tanks except those excluded by regulation in this Chapter must be double wall or jacketed secondarily contained in construction to prevent the release of regulated substances to the environment during the operational life of the system.

- (1) Fiberglass-reinforced plastic tanks must conform to the standards contained in UL 1316 or ASTM D4021-86.
- (2) Steel tanks clad with fiberglass-reinforced plastic must conform to the standards contained in UL 1746, ACT-100 F894, ACT-100-U F961, or STI F922.
- (3) Tanks constructed of steel and cathodically protected must conform to the standards in UL 58, UL 1746, STI-P3[®], STI F841, and NACE RP-0285 and must be protected in the following manner:
 - (A) The tank must be coated with a suitable dielectric material.
 - (B) Field-installed cathodic protection systems must be designed by a corrosion expert.
 - (C) Impressed current systems must be designed to allow determination of current operating status as required by this Chapter and manufacturer's specifications.
 - (D) Cathodic protection systems must be operated and maintained according to this Chapter and manufacturer's specifications.
- (b) PSTD may permit alternative types of tank construction, design, and corrosion protection if the owner demonstrates to PSTD's satisfaction that the proposed system will prevent the release of any stored regulated substance to the environment during the operational life of the system.
- (c) All underground storage tank systems must be properly installed in accordance with a code of practice developed by a nationally recognized association or independent testing laboratory and in accordance with the manufacturer's instructions.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 34 Ok Reg 935, eff 9-11-17]

165:25-2-34. Compliance with nationally recognized code of practice and manufacturer's instructions [REVOKED]

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Revoked at 25 Ok Reg 1867, eff 7-1-08]

165:25-2-35. Pre-installation

All installers of underground storage tank systems must perform an analysis of the installation site prior to the system's construction and installation and submit with the scheduling form. The analysis must include, at a minimum, the following:

- (1) A determination of local soil conditions.
- (2) The level of the water table in the area.
- (3) Drainage conditions.
- (4) The presence of any underground utility lines or conduits.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 32 Ok Reg 780, eff 8-27-15]

165:25-2-36. Tank system installation

(a) **Backfill material.** Backfill material used below, around, and/or above a new underground storage tank system installation must be clean, unused, non-corrosive porous material such as sand, crushed rock or pea gravel specified by the tank manufacturer. The Licensed UST Installer must be present and continuously supervise backfilling operations to ensure that proper procedures are followed.

(b) **UST installation.**

- (1) Owners/operators of all underground storage tank systems must notify PSTD at least forty-eight (48) hours prior to the installation of underground

storage tanks and/or lines by submitting the PSTD scheduling form and receiving confirmation of the installation and the Temporary Authorization for Receipt of Fuel from PSTD. Following the required forty-eight (48) hour notification of new UST installations, an on-site inspection may be required at critical junctures. The PSTD Fuel Specialist monitoring the installation must be contacted prior to initiating the following so it may be observed or inspected:

- (A) The air/soap test of tanks.
- (B) The tank pit prior to the placement of tank(s).
- (C) The backfilling of the lower quadrant of tank(s).
- (D) The air/soap test, layout of piping, and hydrostatic testing of sumps prior to backfilling.
- (E) The tightness test of tanks and piping, and leak detector tests prior to startup.
- (F) Backfilling of all piping.

(2) Precautions must be taken to prevent damage to the tank or piping coating during installation. Any damage to the coating must be repaired in accordance with the manufacturer's instructions prior to the completion of the installation.

(3) Piping must be arranged to minimize crossed lines and interference with conduits and other tank system components. If crossing is unavoidable, factory specifications must be provided to prevent contact between piping segments.

(4) Underground piping must have a minimum slope of one-eighth inch (1/8") per foot toward the tank and must be buried below ground a minimum of eighteen inches (18").

(5) If a tank is installed in an area subject to a high water table or flooding, anchoring must be used to prevent tank flotation. Anchoring straps and associated equipment must be installed in a manner that will prevent damage to the tank and/or its coating.

(6) The tank pit must contain a smooth, evenly graded bed of manufacturer approved material extending the full length of the tank bottom.

(7) The Licensed UST Installer must follow PEI RP-100 recommended practice for ballasting to prevent tank flotation during installation.

(8) Licensed UST Installers must be certified by the tank and line manufacturer, if applicable, and must be on site during all installation activities, including preparation for and placement of concrete over any part of the tank system.

(9) Photos of installation and other required documentation must be submitted with the PSTD registration form within thirty (30) days and tank fees must be paid before a permit will be issued.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 26 Ok Reg 1826, eff 7-1-09; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-2-37. Storage tank spacing

(a) Underground storage tanks must be at least thirty-six inches (36") from a property line boundary of the property on which they are installed.

(b) Fiberglass and steel underground storage tanks must be spaced in accordance with manufacturer's instructions.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-2-38. Fill pipe requirements

- (a) Fill pipes that enter the top of a tank must have drop tubes installed and terminate within 6 inches (6", or 15 cm) of the bottom of the tank.
- (b) Fill pipes should be installed or arranged so that vibration is minimized.
- (c) Each fill pipe must be labeled by a permanent marking to identify the product stored. The marking must be maintained in legible condition throughout the life of the tank installation. Color coding of the tank fill riser lids set forth in OAC 165:15-13-1 must also be used.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-2-39. Spill and overflow protection

- (a) Owners and operators of underground storage tank systems, their employees or agents, as well as those who transport regulated substances to these systems must do everything reasonably possible to ensure that releases due to spilling and overfilling do not occur.
- (b) Owners, operators, their employees or agents, or transporters must ensure that the volume available in the tank (ullage) is greater than the volume of product to be transferred to the tank before the transfer is made and that the transfer operation is monitored constantly to prevent overfilling and spilling.
- (c) Tight fill connections must be used on all deliveries made to underground storage tanks.
- (d) Tampering with overflow protection is not permitted. Any violation of this Section will be subject to the enforcement procedures of this Chapter resulting in fines, contempt proceedings, and/or shutdown of operations as provided by law.
- (e) Except as provided in (e) of this Section, in order to prevent spilling and overfilling associated with product transfer to the petroleum storage tank system, the following prevention equipment must be used:
 - (1) Spill prevention equipment that will prevent release of product to the environment when the transfer hose is detached from the fill pipe (for example, a spill bucket).
 - (2) Overflow prevention equipment that will automatically shut off flow into the tank when the tank is no more than ninety-five percent (95%) full.
 - (A) A drop tube with overflow device is required on all tank systems installed after July 1, 2001.
 - (B) Tanks installed before July 1, 2001, must be upgraded to meet these standards before July 1, 2002, unless equipped with an operational ball float overflow device. Use of ball floats is prohibited with suction systems. Staff may require a ball float functionality test.
 - (C) Ball float valves that are inoperable cannot be repaired and instead must be replaced with a drop tube with flapper valve, or
 - (D) A mechanism to prevent overfilling by sounding an alarm when the liquid level in the tank reaches ninety percent (90%) of capacity and by automatically stopping the delivery of liquid to the tank when the level in the tank reaches ninety-five percent (95%) of capacity.

(f) On new installations, overfill prevention equipment must be inspected for proper operation at installation and at least once every three (3) years thereafter. Existing systems must inspect overfill prevention equipment for proper operation by October 13, 2018 and at least once every three (3) years thereafter. When inspecting, owners and operators must at a minimum ensure the overfill prevention equipment is set to activate at the correct level in the tank and will activate when regulated substances reach that level.

(g) On new installations, spill prevention equipment must be tested for liquid tightness at installation and at least once every three (3) years thereafter or use a double-walled spill bucket with periodic interstitial monitoring that is monitored at least every thirty (30) days. Existing systems must test spill prevention equipment for liquid tightness by October 13, 2018 and at least once every three (3) years thereafter or use a double-walled spill bucket with periodic interstitial monitoring that is monitored at least every thirty (30) days.

(h) The spill and overfill prevention equipment specified in (d) of this Section is not required if the underground storage tank system is filled by transfers of no more than twenty-five (25) gallons at one time.

(i) Owners and operators must contain and immediately clean up any spill or overfill of regulated substances less than twenty-five (25) gallons within twenty-four (24) hours of incident occurrence. If the spill or overfill cannot be cleaned up within twenty-four (24) hours, is more than twenty-five (25) gallons, or it causes a sheen on nearby surface water, then owners and operators must report to the PSTD within twenty-four (24) hours and begin corrective action in accordance with Part 5 (Corrective Action Requirements) in Chapter 29 of Commission rules.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-2-40. Installation testing

(a) All tanks must be tested with air pressure prior to installation, and/or tested according to manufacturer's specifications. Pressure must not exceed 5 pounds per square inch (psi). The entire tank must be soaped during this period and inspected for bubbling.

(b) All suction piping must be tested while disconnected from the tank, pumps, and dispensing units. The piping must be subjected to an air test with the following specifications:

(1) The piping must be subjected to an air test of at least 50 psi for a period of one hour.

(2) All piping joints must be soaped while the system is under pressure, in order to detect any possible leaks.

(3) As an alternative to the preceding methods in (1) and (2) above, the piping may be subjected to a vacuum test while connected to tanks, pumps and dispensing units.

(c) Pressurized piping must be tested while connected to tanks and pumps. The piping must be subjected to an air test of at least 50 psi.

(1) Air test secondary piping for a period of one hour, using the test pressure prescribed by the piping manufacturer.

(2) Apply soap solution to all joints and piping surfaces and inspect for leaks.

(d) All piping should be air tested and monitored continuously during the installation.

(e) Tightness (also called precision) testing of the entire system must be performed after all paving over the tanks and piping has been completed and before the system is placed in operation:

(1) A precision tightness test must be performed by a certified tester, and in accordance with manufacturer's instructions; or

(2) The following alternative to a precision tightness test will be accepted, but only if conducted before the system is put into service:

(A) A certified ATG capable of detecting a leak of 0.10 gallons per hour must be used to test the filled portion of the tank and

(B) A precision tightness test of the ullage portion of the tank must be completed.

(3) Testing of both interstice and primary tank of a double wall tank as specified by tank manufacturer must be performed.

(4) Primary tank openings, manways and risers must be tested during the installation of all double wall tanks.

(5) The product line(s) must be hydrostatically tested by a NWGLDE approved testing device capable of detecting a leak of 0.10 gallons per hour with a test pressure of 50 psi or 1½ times the operating pressure, whichever is greater. The lines must be tested for a minimum of one hour.

(6) Mechanical and electronic leak detector(s) must be tested for function by simulating a leak and operate in accordance with manufacturer's specifications.

(7) If an ATG system with electronic line leak detector(s) is installed, it must complete a leak detector test in each of the modes in which it is certified as capable of detecting a leak (e.g. 3 gph, 0.2 gph and 0.1 gph).

(8) Containment sumps must be tested after all piping and conduit has been installed along with spill prevention equipment (spill buckets) by using vacuum, pressure, or liquid testing in accordance with one of the following criteria:

(A) Requirements developed by the manufacturer (owners and operators may use this option only if the manufacturer has developed requirements);

(B) Code of practice developed by a nationally recognized association or independent testing laboratory, e.g., PEI RP 1200.

165:25-2-41. Installation drawing

As built drawings, showing the location(s) of tanks, piping and associated underground storage tank equipment, monitoring wells and dispensing units, must be prepared by the installer and submitted to the Commission with the tank registration form.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-2-42. Certification of installation [REVOKED]

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 23 Ok Reg 2261, eff 7-1-06; Revoked at 25 Ok Reg 1867, eff 7-1-08]

PART 5. PROTECTION AGAINST CORROSION

165:25-2-51. Corrosion protection

Any portion of a metallic tank or piping system in contact with the soil must be protected from corrosion. A cathodic protection system must be designed by a corrosion expert, installed and maintained in accordance with recognized standards of design. One of the following codes of practice shall be used to comply with this section:

- (1) NACE International Test Method TM 0101, "Measurement Techniques Related to Criteria for Cathodic Protection of Underground Storage Tank Systems";
- (2) NACE International Test Method TM 0497, "Measurement Techniques Related to Criteria for Cathodic Protection on Underground or Submerged Metallic Piping Systems";
- (3) Steel Tank Institute Recommended Practice R051, "Cathodic Protection Testing Procedures for STI-P3[®] Underground Storage Tanks";
- (4) NACE International Standard Practice SP 0169, "Control of External Corrosion on Underground or Submerged Metallic Piping Systems"; or
- (5) NACE International Standard Practice SP 0285, "External Control of Underground Storage Tank Systems by Cathodic Protection.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 34 Ok Reg 935, eff 9-11-17]

165:25-2-52. Compliance with corrosion protection requirements and manufacturer's specifications

Corrosion protection systems shall be operated and maintained in accordance with manufacturer's instructions and specifications to provide continuous corrosion protection to the metal components of the storage tank system that routinely contain regulated substances and are in contact with the ground.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 34 Ok Reg 935, eff 9-11-17]

165:25-2-53. Frequency and criteria of inspections and tests

- (a) All cathodic protection systems must be tested within 6 months of installation and/or repair, and at least every three (3) years thereafter.
- (b) Cathodic protection testing, repair, or three (3) year recertification must be scheduled at least 24 hours before by submitting the PSTD scheduling form and PSTD staff may be present.
- (c) Every 60 days impressed current cathodic protection systems must be inspected by the owner or owner's designated representative to ensure the equipment is working properly.
- (d) The criteria that are used to determine whether cathodic protection is adequate must be in accordance with a code of practice developed by a nationally recognized organization, such as NACE RP-0285.
- (e) All personnel performing cathodic protection system testing must have the required education, current corrosion certification, experience, knowledge and competence to correctly perform testing services in accordance with a certified course and applicable industry standards or codes.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 31 Ok Reg 1007, eff 9-12-14; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-2-53.1. Underground storage tank internal lining requirements

- (a) A previously lined steel tank that fails precision tightness testing or an internal lining inspection shall not be repaired and must be removed.
- (b) Tank lining may not be used as a method of repair for an unlined tank.
- (c) Within 10 years after lining, and every five years thereafter, lined USTs must be internally inspected and found to be structurally sound, with the lining still performing in accordance with original design specifications.
- (d) Standards that must be referenced during the periodic inspection of lined USTs:
 - (1) American Petroleum Institute (API) Publication 1631.
 - (2) Ken Wilcox Associates, Inc. "Recommended Practices for Inspecting Buried Lined Steel Tanks Using a Video Camera," First Edition, 1999, Methods A and D.
 - (3) National Leak Prevention Association Standard 631.
 - (4) PSTD Internal Tank Lining Guidance document and PSTD Interior Lining Inspection Form are available on the Commission website.
- (e) UST owners/operators must submit to PSTD a copy of the certificate of performance (Interior Lining Inspection Form) completed by the inspection provider attesting that the UST meets the performance requirements for both the UST and the lining material. Any UST failing to meet the specified performance requirements cannot be relined. Minor imperfections may be repaired and the tank must be upgraded with a cathodic protection system within six months of the lining repair, or be removed.
- (f) USTs upgraded by the addition of both internal lining and cathodic protection do not require internal periodic inspection if the cathodic protection system has been properly installed and maintained on the UST system.
- (g) Tank owners or their representative must provide 48 hour notification for all lining inspections to PSTD in the online format established by PSTD.

165:25-2-54. Underground storage tank piping materials [AMMENDED AND RENUMBERED TO 165:25-2-55.1]

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended and renumbered to 165:25-2-55.1 at 23 Ok Reg 2261, eff 7-1-06]

165:25-2-55. Underground storage tank internal lining requirements [REVOKED]

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Revoked at 23 Ok Reg 2261, eff 7-1-06]

PART 6. PIPING

165:25-2-55.1. Underground storage tank piping materials

- (a) All new or replacement underground pressurized piping must be installed as follows:
 - (1) Nonmetallic;
 - (2) Double-walled;
 - (3) A tracer locator wire must be installed in all piping trenches; and
 - (4) Tank, dispenser, and transition sumps must be installed and monitored per 165:25-3-6.29.

- (b) All new or replacement suction product piping must meet the requirements of 165:25-3-6.29 as follows:
- (1) Nonmetallic;
 - (2) Double-walled;
 - (3) A tracer locator wire must be installed in all piping trenches; and
 - (4) Tank, dispenser, and transition sumps must be installed and monitored per 165:25-3-6.29.
- (c) Existing facilities that are replacing the lesser of twenty feet (20') or fifty percent (50%) of underground piping must upgrade pursuant to (a) or (b) of this Section. If a metallic line fails due to structural failure or corrosion, all metallic product lines at the facility must be immediately removed, and cannot be repaired.
- (d) Existing facilities that are making any alteration to a fuel island when concrete removal is required must install dispenser sumps and monitor as pursuant 165:25-3-6.29.
- (e) Existing facilities that are replacing dispensers must install dispenser sumps and monitor as pursuant to 165:25-3-6.29 if modifications are made below the dispenser cabinet.
- (f) Existing facilities that are replacing underground storage tanks or making repairs at a submersible pump that require excavation of dirt or concrete removal must install tank sumps and they must be monitored pursuant 165:25-3-6.29.
- (g) Existing facilities that are replacing underground storage tanks must replace all single walled piping per (a) or (b) of this section.
- (h) Piping installed as a siphon or to manifold tanks may be single wall non-metallic pipe.
- (i) Ball valves must be installed on new safe suction lines to isolate lines for testing purposes.

[Source: Amended and renumbered from 165:25-2-54 at 23 Ok Reg 2261, eff 7-1-06; Amended at 26 Ok Reg 1826, eff 7-1-09; Amended at 31 Ok Reg 1007, eff 9-12-14; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-2-55.2. Vent piping requirements

- (a) Where vent pipes installed prior to July, 2003, from tanks storing gasoline are adjacent to buildings or public ways, they must be located not less than twelve feet (12') (3.6 meters) above the adjacent ground level or three feet (3') above the roof line at the highest point of attachment. Newly installed vent pipes must be five feet (5') above the roof or canopy. All vent pipes buried below ground must be a minimum of eighteen inches (18").
- (b) In order to aid in dispersion, vapors must be discharged upward. Vent outlets must be located so that flammable vapors will not accumulate to an unsafe location or trapped under eaves and shall be at least five feet (5') (1.5 meters) from building openings and fifteen feet (15') (4.5 meters) from powered ventilation air intake devices).
- (c) All new or replacement underground vent piping must be non-metallic. Aboveground vent risers must be steel pipe.
- (d) Vent risers must be located or protected and anchored, to prevent damage from traffic, wind, or testing procedures.

[Source: Added at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 37 Ok Reg 1128, eff 10-1-20]

PART 7. DISPENSERS

165:25-2-71. Dispensers

- (a) A control must be provided that will permit the dispenser to operate only when a dispensing nozzle is removed from its bracket or normal position with respect to the dispensing device and only when the switch on this dispensing device is manually activated. This control must also stop the dispenser when all nozzles have been returned either to their brackets or to the normal non-dispensing position.
- (b) A Underwriter's Laboratory ("UL") listed emergency breakaway device designed to retain liquid on both sides of the breakaway point must be installed on each hose. These devices must be installed and maintained in accordance with the manufacturer's instructions. Where hoses are attached to a hose-retrieving mechanism, the listed emergency breakaway device must be installed between the point of attachment of the hose-retrieving mechanism to the hose and the hose nozzle valve.
- (c) If a submersible pump system is used, a UL listed emergency shutoff/shear valve must be installed at each dispensing device. Both the emergency shutoff/shear valve and dispensing device shall be rigidly anchored in place.
- (d) Liquids must be transferred from storage tanks by means of fixed dispensers designed and equipped to allow control of the flow and prevent leakage or accidental discharge.
- (e) Dispensing devices for Class I and Class II liquids must be listed.
- (1) Existing listed or labeled dispensing devices may be modified provided the modifications made are "Listed by Report" by an approved testing laboratory or as otherwise pre-approved by PSTD.
 - (2) Modification proposals must contain a description of the component parts used in the modification and the recommended methods of installation on specific dispensing devices, and they must be made available to PSTD for approval prior to installation.
- (f) All gasoline, gasoline-alcohol blends, gasoline-ether blends, E85 fuel ethanol, and M85 methanol dispensers located at retail facilities shall have a ten (10) micron or smaller nominal pore-sized filter. All biodiesel, biodiesel blends, diesel, and kerosene dispensers located at retail facilities shall have a thirty (30) micron or smaller nominal pore-sized filter.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 30 Ok Reg 584, eff 7-1-13; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-2-72. Dispenser hose

- (a) Underwriters Laboratory (UL) Listed hose assemblies must be used to dispense fuel.
- (1) Hose length at facilities must not exceed eighteen feet (18', or 5.5 m).
 - (2) Hose at facilities must be checked daily for evidence of blistering, carcass saturation or separation, cuts, nicks or abrasions that expose reinforcement material and for slippage, misalignment or leaks at couplings. If any of the defects are present, the defective hose must be removed from service immediately.
- (b) At least once each month the hose must be completely extended and inspected.
- (1) The hose couplings and the first twelve inches (12") of hose adjacent to the couplings must be examined for structural weakness.
 - (2) Structural weakness must be checked by pressing the hose in the area around its entire circumference for soft spots.

(3) Hoses that show evidence of soft spots must be removed immediately.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-2-73. Nozzles

At any installation where the normal flow of product may be stopped other than by the hose nozzle valve e.g., at pre-pay stations, the system must include UL listed equipment with a feature that causes or requires the closing of the hose nozzle valve before product flow can be resumed or before the hose nozzle valve can be replaced in its normal position in the dispenser.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-2-75. Required signs

(a) Warning signs must be conspicuously posted in the dispensing area incorporating the following or equivalent wording:

- (1) WARNING
- (2) It is unlawful and dangerous to dispense gasoline into unapproved containers.
- (3) No smoking.
- (4) Stop motor.
- (5) No filling of portable containers in or on a motor vehicle.
- (6) Place container on ground before filling.
- (7) Discharge your static electricity before fueling by touching a metal surface away from the nozzle.

(b) If blended ethanol or biodiesel product is dispensed, an OCC approved label must be displayed in a clear, conspicuous and prominent manner visible to customers using either side of the dispenser from which a blended ethanol or biodiesel product is dispensed.

(c) A sign or label must be displayed in a clear, conspicuous and prominent manner when two different types of gasoline are being dispensed from a single hose, e.g., one hundred percent (100%) gasoline and ten percent (10%) ethanol blend gasoline. The sign must be displayed in close proximity to the one hundred percent (100%) gasoline button advising the customer that small amounts of ethanol may be dispensed in the first five (5) gallons of purchase of one hundred percent (100%) gasoline.

(d) Failure to abide with signage requirements may result in fines, formal enforcement action, or shutdown of operations.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 26 Ok Reg 1826, eff 7-1-09; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-2-75.1. Display on dispenser

(a) Every dispenser or delivery device regulated by the Commission used for the sale of motor fuel to the public must legibly display the type of motor fuel offered for sale.

(b) Any motor fuel must be displayed in accordance with 16 CFR Part 306.0 through 306.12, including Appendices; and sold as provided for by Commission rules and National Institute of Standards and Technology (NIST) Handbook 44, "Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices".

[Source: Added at 37 Ok Reg 1128, eff 10-1-20]

165:25-2-76. Sources of ignition

(a) Smoking materials, including but not limited to matches and lighters, must not be used within 20 feet (20', or 6 m) of areas used for fueling, servicing fuel systems for internal combustion engines, or receiving or dispensing of Class I liquids.

(b) At least one fire extinguisher must be readily accessible in the pump area, as well as at the service bay(s), where applicable.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 25 Ok Reg 1867, eff 7-1-08]

165:25-2-77. Electrical equipment [AMMENDED AND RENUMBERED TO 165:25-2-91]

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended and renumbered to 165:25-2-91 at 23 Ok Reg 2261, eff 7-1-06]

PART 9. ELECTRICAL

165:25-2-91. Electrical requirements

(a) All electrical work must be performed by a licensed electrician.

(b) All electrical wiring and electrical equipment must be of a type specified by and must be installed in accordance with NFPA 30A and NEC 70, National Electrical Code.

(c) Clearly identified and easily accessible switch(es) or circuit breaker(s) must be provided at a location remote from dispensing devices, including remote pumping systems, to shut off the power to all dispensing devices in the event of an emergency.

(d) Electrical equipment that was installed in compliance with an earlier state or national code will not require modification unless the equipment is hazardous to people or property.

[Source: Amended and renumbered from 165:25-2-77 at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 35 Ok Reg 985, eff 10-1-18]

PART 11. REPAIRS TO UNDERGROUND STORAGE TANK SYSTEMS

165:25-2-111. Repairs to underground storage tank systems

(a) Repairs to underground storage tank systems must prevent releases due to structural failure or corrosion for the remaining operational life of the system.

(b) Repairs shall be conducted by qualified personnel possessing the appropriate skills, experience, competence, and any required license or certification to complete the work in accordance with provisions of this Chapter.

(c) Any repair shall be properly conducted in accordance with a standard or code of practice developed by a nationally recognized association or independent testing laboratory.

(d) Requirements of this Section do not apply to routine and minor maintenance activities related to the tank and piping system.

(e) Following completion of repairs, a tank or line tightness test must be performed by a certified tester and is required prior to returning tank or line to service.

(f) Repairs to secondary containment areas of tanks and piping used for interstitial monitoring and repairs to containment sumps used for interstitial monitoring of piping must have the secondary containment tested for tightness within thirty (30) days following completion of the repair. This testing must be conducted according

to the manufacturer's instructions or a code or practice developed by a nationally recognized association or independent testing laboratory.

(g) A tightness test of spill prevention equipment must be performed within thirty (30) days following repairs to such spill prevention equipment. This testing must be conducted according to the manufacturer's instructions or a code or practice developed by a nationally recognized association or independent testing laboratory.

(h) Overfill prevention equipment must be inspected within thirty (30) days following repairs to it to ensure it is operating properly. This inspection must be conducted according to the manufacturer's instructions or a code or practice developed by a nationally recognized association or independent testing laboratory.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16]

PART 13. REMOVAL AND CLOSURE OF UNDERGROUND STORAGE TANK SYSTEMS

165:25-2-131. Tank removal and closure

(a) Owners/operators of all underground storage tank systems must notify PSTD at least fourteen (14) days prior to the removal or permanent closure of underground storage tanks and/or lines by submitting the PSTD scheduling form and receiving confirmation of the scheduled removal from PSTD. If events require a change in the date of removal, PSTD shall be given forty-eight (48) hours notice prior to the new date.

(b) An authorized agent of PSTD may be present to observe the removal and to inspect the closed tank system and the surrounding environment prior to backfilling.

(c) Tanks and lines must be removed upon closure unless a Commission order grants a variance that allows the tanks and/or lines to be closed in place. Tank systems that are removed from the ground must be transported from the site and whether sold to a scrap dealer or disposed of at an acceptable facility, sufficient holes should be made in the tanks to render the tank(s) unfit for further use. A certificate of destruction must be submitted to PSTD with the UST Closure Report. After closure activities are completed, the excavation must be backfilled no later than seven (7) days upon completion of tank removal.

(d) The Licensed UST Remover must be on the job site during all removal activities, beginning with break-out of concrete. This includes Licensed UST Remover presence during cutting and removing concrete over any part of the tank system.

(e) Photos must be taken of tank(s), line(s) and soil at removal. In the event there is a hole in tank(s) or line(s), further photographic evidence is required. If tank(s), line(s) or excavated soil show evidence of a release, photos of the apparent release must be taken that indicate the release source.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-2-132. Compliance with removal and closure requirements [REVOKED]

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Revoked at 25 Ok Reg 1867, eff 7-1-08]

165:25-2-133. Temporary removal from service

(a) When an underground storage tank system is taken temporarily out of service for three (3) months or less, the owner or operator must meet the following requirements:

- (1) Continue the operation, testing, and maintenance of corrosion protection as required by this Chapter. Electricity must be maintained for an impressed current CP system to be operational.
- (2) Continue to monitor for leaks by performing release detection and release detection testing as required by this Chapter.
- (3) Perform annual inspections and testing of release detection equipment.
- (4) Perform thirty (30) day walkthrough inspections.
- (5) Perform three (3) year containment sump testing on containment sumps used for interstitial monitoring of piping.
- (6) Comply with the requirements of this Chapter concerning release reporting and corrective action.
- (7) Notify PSTD of a change in service within thirty (30) days on the prescribed TOU form.

(b) Tank systems that are temporarily closed for three (3) months or less are not required to meet spill prevention equipment testing and overfill prevention equipment inspections.

(c) When an underground storage tank system is taken out of service for three (3) months or more, the owner/operator must meet the following requirements:

- (1) All tanks must be drained to less than one inch (1") of residue remaining in the tank.
- (2) Release detection, annual release detection equipment testing and inspections, spill prevention equipment testing, overfill prevention equipment inspections, thirty (30) day walkthrough inspections, and three (3) year containment sump testing on containment sumps used for interstitial monitoring of piping, is not required as long as the underground storage tank is emptied to less than one inch (1") of residue remaining in tank.
- (3) All vent lines must be left open and functioning.
- (4) All other lines, pumps, manways, and ancillary equipment must be capped and secured.
- (5) Lock all fill caps.
- (6) Continue the operation, testing, and maintenance of corrosion protection as required by this Chapter. Electricity must be maintained for an impressed current CP system to be operational.
- (7) Comply with the requirements of this Chapter concerning release reporting and corrective action.
- (8) Notify PSTD of a change in service within thirty (30) days on the prescribed TOU form.

(d) Any facility with an underground storage tank registered as currently in use where the business is no longer open for regular business and has an underground storage tank system that is not in active use for greater than 180 days or two (2) consecutive semiannual inspections shall have the tank system deemed temporarily out of use and will be subject to OAC 165:25-2-133. PSTD will notify the current registered owner in writing of the change in tank status within ten (10) days of the date of change. The facility shall have sixty (60) days to comply with all requirements in this section.

(e) Tanks must be permanently closed if they do not meet PSTD requirements in OAC 165:25-2-133 as set forth above.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-2-134. Requirements for returning to service/use

When an underground storage tank system is returned to service/use a tank tightness test, line tightness test, and a leak detector test must be performed by a certified tester, and must be completed on the underground portion of temporarily closed systems prior to returning the system to service if it has been out of service/use for more than twelve (12) months. Any system failure will require either closure or upgrade of the failed portion. Additional testing shall be required on any portion of the tank system considered detrimental to release detection depending upon the type of tank system installed. Notify PSTD on the prescribed "Return to Service" form when returning a system to service/use along with copies of all testing and the tank registration fees.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-2-135. Permanent closure

All underground storage tanks and associated piping out of service/use for more than twelve (12) months must be removed if they do not comply with the requirements as stated in 165:25-2-133 and 165:25-2-134. A variance to close a tank and/or associated piping in place with a PSTD approved inert material must be made by application and administrative review in accordance with OAC 165:5-21-3.1. For a closure in place variance solely on the basis of financial concerns between the cost to remove and the cost to close in place, applicant must submit three (3) bids to remove and three (3) bids to close in place with their variance application. A variance is effective on order issuance.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19; Amended at 37 Ok Reg 1128, eff 10-1-20]

165:25-2-136. Assessing the site at closure or change in service

- (a) When a change in service, tank or line repair, and/or replacement is completed, the owner/operator must measure for the presence of a release where contamination is most likely to be present at the underground storage tank system site.
- (b) Please refer to the PSTD removal/closure/change of service sampling document on PSTD's website.
- (c) If contaminated soils, contaminated groundwater, or free product as a liquid or vapor is discovered, the owner must immediately begin corrective action in accordance with Chapter 29 of Commission rules.
- (d) All sampling at closures must be under the supervision of a Licensed Environmental Consultant.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 34 Ok Reg 935, eff 9-11-17]

165:25-2-137. Applicability to previously closed underground storage tank systems

- (a) When directed by PSTD, the owner/operator of an underground storage tank system closed before April 21, 1989 must assess the excavation zone and close the underground storage tank system in accordance with this Chapter. PSTD may direct the owner/operator to assess the site or may assess the site itself if a potential for a

suspicion of release from the underground storage tank system may, in the judgment of PSTD, pose a current or potential threat to human health, safety or the environment.

(b) Petroleum storage tank systems closed after April 21, 1989 and not upgraded to meet December 23, 1998 upgrade deadline must be removed and the site assessed in accordance with 165:25-2-136 of Commission rules.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15]

165:25-2-138. Closure records

Owners/Operators must maintain records that demonstrate compliance with all tank closure requirements. Records of the results of the required site assessments must be maintained for at least three (3) years after completion of permanent closure or change in service in one of the following ways:

- (1) By the owner or operator who took the UST system out of service.
- (2) By the current owner or operator of the UST system site.
- (3) Mailing these records to PSTD if they cannot be maintained at the closed facility.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08]

SUBCHAPTER 3. RELEASE PREVENTION AND DETECTION REQUIREMENTS

PART 1. RELEASE PROHIBITION REQUIREMENTS

165:25-3-1. Release prohibition

The intentional release of regulated substances from an underground storage tank or system is strictly prohibited. No person shall knowingly allow a confirmed or suspected release of regulated substances from an underground storage tank or system to continue without investigation and reporting as required by this Chapter. Owners, operators, their employees or agents of underground storage tank systems, as well as persons who transport regulated substances must ensure that spills and overfills do not occur.

PART 2. RELEASE DETECTION REQUIREMENTS AND METHODS

165:25-3-6.20. General monitoring requirements

Tanks, including any compartments within a compartmentalized tank that are not in use, must be monitored at least every 30 days for releases using one of the methods or combinations of methods listed in this Chapter.

[Source: Amended and renumbered from 165:25-3-5 at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 34 Ok Reg 935, eff 9-11-17]

165:25-3-6.21. General release detection methods and devices

(a) Owners/operators of new and existing underground storage tank systems must use a release detection method, or a combination of release detection methods, that is:

- (1) Capable of detecting a release of regulated substances from any portion of the underground storage tank system that routinely contains product.
- (2) Designed, installed, calibrated, operated, and maintained in accordance with the manufacturer's instructions, including routine maintenance and service checks for operability or running conditions.
- (3) Capable of meeting the performance requirements of this Chapter, with any performance claims and their manner of determination described in writing by the equipment manufacturer or installer.
- (4) Sampled, tested, or checked for a release at least once every 30 days.
- (5) If more than one (1) release detection method is present on a petroleum storage tank system, the owner and/or operator must notify PSTD in writing which method is designated as the primary method of release detection. In the event the owner and/or operator switches or utilizes another method of release detection as the primary method, the owner and/or operator must notify PSTD in writing within thirty (30) days of selecting a new primary release detection method.

(b) Owners/operators must keep all written manufacturer and installer performance specifications and the manner in which those specifications are determined.

(c) Interstitial monitoring must be used as the method of release detection for secondarily contained tanks and/or piping installed after July 1, 2008.

(d) Beginning October 13, 2018, the electronic and mechanical components of release detection equipment must be tested for proper operation in accordance with manufacturer's instructions or use a code of practice developed by a nationally recognized association or independent testing laboratory. A test of proper operation must be performed at least annually and, at a minimum, cover the following components and criteria as applicable to the facility:

- (1) Automatic tank gauge and other controllers: test alarm, verify system configuration; test battery backup;
- (2) Probes and sensors: inspect for residual buildup, ensure floats move freely, ensure shaft is not damaged, ensure cables are free of kinks and breaks, test alarm operability and communication with controller;
- (3) Automatic line leak detector: test operation to meet criteria in 40 CFR §280.44(a) by simulating a leak;
- (4) Vacuum pumps and pressure gauges: ensure proper communication with sensors and controller; and

- (5) Hand-held electronic sampling equipment associated with groundwater and vapor monitoring: ensure proper operation.
- (e) Owners and operators must maintain records of the annual operation tests for three (3) years. At a minimum, records must list each component tested, indicate whether each component needed to have action taken and describe any action taken to correct the issue.

[Source: Amended and renumbered from 165:25-3-5.1 at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 26 Ok Reg 1826, eff 7-1-09; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-3-6.22. Tank system tightness testing with inventory control [REVOKED]

[Source: Amended and renumbered from 165:25-3-5.2 at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18; Revoked at 36 Ok Reg 551, eff 8-1-19]

165:25-3-6.23. Testing or monitoring for vapors

- (a) Before installing a new vapor monitoring system or continuing to use an existing vapor monitoring system for thirty (30) day release detection a site-specific site assessment must be conducted to determine the following:
- (1) The exact location and total depth of the tank(s) and piping to avoid damage to the UST system during well installation and to determine the number and placement of wells.
 - (2) That the backfill is sufficiently porous to allow diffusion of vapors from a release to migrate readily to the observation wells (i.e., sand, pea gravel or crushed rock).
 - (3) That background levels of contamination or naturally occurring organic hydrocarbons are low enough to allow a release from the tank(s) or piping to be detected. To determine background concentrations, a temporary vapor well can be installed in the UST excavation area and the device that will be used for monitoring can be used to get an initial reading.
 - (4) The location and historical levels of groundwater at the site. If the backfill is saturated with water, because of a perched water table, fluctuating water table, rainfall, etc. above the tank burial depth, a vapor monitoring system should not be used because dispersion of vapors would be restricted and a release could go undetected. Approval for the use of vapor monitor wells for thirty (30) day release detection at a location where there has previously been a confirmed release will be at PSTD's discretion.
 - (5) Volatility of the stored product and its compatibility with the monitoring device that will be used.
- (b) Individuals performing this site assessment must be a PSTD Licensed Environmental Consultant and a copy of the site assessment must be maintained at the facility.
- (c) The vapor observation wells must be installed within the tank excavation. A minimum of two (2) wells are required for multi-tank excavations, with at least one (1) of the wells on the downgradient side. Wells must be spaced such that any given well is capable of detecting a release from within at least a twenty foot (20') radius of that monitoring point and no greater. One (1) well is acceptable for single tanks of 3,000 gallons or less capacity, or for not more than two (2) 2,000 gallon tanks in one excavation, provided the well is near the center of the excavation.
- (d) Observation wells must be installed in accordance with OAC 785:35, Oklahoma Water Resources Board (OWRB) rules. OWRB rules allow a PSTDlicensed UST

Installer to install observation wells during tank installations only. An OWRB licensed driller must perform all other well installations.

(e) In addition to (a) through (d) above, vapor observation wells must meet these minimum requirements:

- (1) Be constructed from two inch (2") or four inch (4") polyvinyl chloride (PVC) or stainless steel casing with factory milled well screen.
- (2) The well screen section should begin approximately two feet (2') below ground surface (bgs) for tank excavations. The well screen must extend to a depth of two feet (2') below the tank bottom.
- (3) A filter pack of graded gravel or uncontaminated quartz sand, silica, or other material that will not affect the groundwater quality must be placed around the entire length of the well screen.
- (4) The area above the well screen must be sealed (annular seal) to prevent surface spills from contaminating the well, which would result in a false indication of a release. An anti-shrink concrete or grout seal must extend at least twelve inches (12") from within the observation well manhole. The remainder of the well above the well screen must be sealed with a cement-bentonite mixture or bentonite pellets.
- (5) A concrete or cement surface pad must be installed around the casing at the surface with minimum dimensions of three feet (3') in diameter by three and a half inches (3.5") thick. The surface pad must be sloped so to ensure that all surface water flows away from the well. The surface pad is not required if the well is completed in competent concrete or asphalt paving.
- (6) The well(s) must be installed within manholes competent to withstand anticipated traffic flow. The well casing must be secured with a tight fitting cap and the manhole cover bolted to prevent unauthorized tampering. The manhole cover must be clearly marked with appropriate identification such as "test well" or "monitoring well" and/or may also be identified with an equilateral triangle to identify the well as an observation well or site assessment observation well.

(f) Records demonstrating compliance with this Section must be submitted to PSTD before a new vapor monitoring system may be used or before an existing vapor monitoring system may continue to be used after July 15, 2005. At a minimum, these records must include a site map that includes the location of tanks, piping, dispensers and all observation wells, copies of the OWRB Multi-Purpose Completion Report for each well, name of the company and individual performing the assessment.

(g) All vapor observation wells must be checked at least every thirty (30) days by a PSTD Licensed Vapor Monitor Well Technician and a copy of the results must be maintained at the facility and readily available to the PSTD Fuel Specialist.

(h) The vapor monitoring equipment must be designed and operated to allow the threshold level to be preset specifically for the type of regulated substance stored in the tank system and be capable of detecting any significant increase in the concentration of regulated substance, component or components of that substance (in a range of 0 to 10,000 units/ppm) or a tracer placed in the tank system above background levels.

(i) Observation well readings above 4,000 units/ppm for gasoline and above 1,500 units/ppm for diesel, or above 1,500 units/ppm for a tank pit containing both gasoline and diesel tanks, must be reported to PSTD by telephone at (405) 521-4683 or toll free at 1-888-621-5878 within twenty-four (24) hours of the owner, operator, any of their employees, or agents knowing the reading.

(j) An increase in vapor levels of 500 units/ppm above background or historical levels detected by thirty (30) day monitoring, even though below twenty-four (24) hour reporting level, must be reported if the increase does not correct itself in the second month of monitoring. The report must be made within twenty-four (24) hours of the owner or operator, their employees or agents knowing the second month's monitoring results.

(k) If a monitoring report under the circumstances above is not made within twenty-four (24) hours, the owner or operator, their employees or agents, may be subject to formal enforcement action.

[Source: Amended and renumbered from 165:25-3-5.3 at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-3-6.24. Testing or monitoring for liquids on the groundwater

(a) Before installing a new groundwater monitoring system, or continuing to use an existing groundwater monitoring system for thirty (30) day release detection a site-specific site assessment must be conducted to determine the following:

(1) The exact location and total depth of the tank(s) and piping to avoid damage to the UST system during well installation and to determine the number and placement of wells.

(2) That the backfill is sufficiently porous to allow migration of product from a release to the observation wells (i.e., sand, pea gravel or crushed rock).

(3) That background levels of contamination or naturally occurring organic hydrocarbons are low enough to allow a release from the tank(s) or piping to be detected. Groundwater monitoring may not be effective if the site has had prior spills or releases.

(4) The location and historical levels of groundwater at the site.

Groundwater monitoring cannot be used if the water table is less than three feet (3') below ground surface or more than twenty feet (20') below ground surface.

(5) Fluctuation of groundwater. The well screen must intercept the water table at both high and low elevations. Free product floating on top of the water surface cannot enter a well if the water level is higher than the well screen, nor can free product enter a well if the water level is below the bottom of the well screen. It must be determined that groundwater conditions are such that a release would not go undetected.

(6) The stored product's compatibility with the monitoring device that will be used. The detection device must be able to detect the presence of at least one-eighth of an inch (1/8") of free product on top of the groundwater in the monitoring wells. Groundwater monitoring is only effective if the stored product is lighter than water (i.e., has a specific gravity less than 1.0), which allows the product to float on the water surface. The stored product must not be soluble in water. Products that are highly soluble in water would not be detected as a separate liquid phase.

(b) Individuals performing this site assessment must be a PSTD Licensed Environmental Consultant and a copy of the site assessment must be maintained at the facility.

(c) The groundwater observation wells must be installed in the tank excavation. Two (2) wells are sufficient for single tanks of 3,000 gallons or less capacity or for not more than two (2) 2,000 gallon tanks in one excavation. For multiple tanks, a

minimum of three (3) wells must be installed with at least one of the wells placed on the downgradient side. A sufficient number of wells must be installed so that a release from any given tank within the tank excavation can be detected. Wells must be spaced such that any given well is capable of detecting a release from within at least at twenty foot (20') radius of that monitoring point and no greater. Under normal circumstances, groundwater monitoring on piping runs would not be appropriate due to the depth to groundwater and the associated time required to detect a leak.

(d) Observation wells must be installed in accordance with OAC 785:35, Oklahoma Water Resources Board (OWRB) rules. OWRB rules allow a PSTD licensed UST Installer to install observation wells during tank installations only. An OWRB licensed driller must perform all other well installations.

(e) Groundwater observation wells must meet these minimum requirements:

- (1) Be constructed from two inch (2") or four inch (4") polyvinyl chloride (PVC) or stainless steel casing with factory milled well screen.
- (2) The well screen section should begin approximately two feet (2') below ground surface (bgs) for tank excavations. The well screen must extend to a depth of two feet (2') below the tank bottom.
- (3) A filter pack of graded gravel or uncontaminated quartz sand, silica, or other material that will not affect the groundwater quality must be placed around the entire length of the well screen unless the tank and/or piping is backfilled with pea gravel.
- (4) The well screen must begin no less than eighteen inches (18") below ground surface. The area above the well screen must be sealed (annular seal) to prevent surface spills from contaminating the well, which would result in a false indication of a release. An anti-shrink concrete or grout seal must extend at least twelve inches (12") from within the monitoring well manhole. The remainder of the well above the well screen must be sealed with a cement-bentonite mixture or bentonite pellets.
- (5) A concrete or cement surface pad must be installed around the casing at the surface with minimum dimensions of three feet (3') in diameter by three and a half inches (3.5") thick. The surface pad must be sloped so to ensure that all surface water flows away from the well. The surface pad is not required if the well is completed in competent concrete or asphalt paving.
- (6) The well(s) must be installed within manholes competent to withstand the anticipated traffic flow. The well casing must be secured with a tight fitting cap and the manhole cover bolted to prevent unauthorized tampering. The manhole cover must be clearly marked with appropriate identification such as "test well" or "monitoring well" and may also be identified with an equilateral triangle to identify the well as an observation well or site assessment observation well.

(f) Records demonstrating compliance with this Section must be submitted to PSTD before a new groundwater monitoring system may be used or before an existing groundwater monitoring system may continue to be used after July 15, 2005. At a minimum, these records must include a site map that includes the location of tanks, piping, dispensers and all monitoring wells, copies of the OWRB Multi-Purpose Completion Report for each well, name of the company and individual performing the assessment.

- (1) Any indication of free product floating on the water table must be reported to PSTD by telephone at (405) 521-4683 within twenty-four (24) hours of the owner/operator or any of their employees or agents discovering

the product.

(2) If a monitoring report under the circumstances of above is not made within twenty-four (24) hours, the owner or operator, their employees or agents, may be subject to an enforcement action.

(g) All groundwater observation wells must be checked at least every thirty (30) days by a PSTD Licensed Groundwater Monitor Well Technician and a copy of the results must be maintained at the facility and readily available to the PSTD Fuel Specialist.

[Source: Amended and renumbered from 165:25-3-5.4 at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-3-6.25. Interstitial monitoring

(a) For double-walled underground storage tank systems, the sampling or testing method must be capable of detecting a leak at least every thirty (30 days) through the inner wall in any portion of the tank that routinely contains product in accordance with the manufacturer instructions.

(b) On new installations, the containment sumps used for interstitial monitoring of piping must be tested at installation using a PSTD approved testing method that tests the sump above the highest penetration or sump sidewall seam. After initial testing, sumps must be tested at least once every three (3) years for liquid tightness or use double-walled containment sumps with periodic interstitial monitoring of the space between the two (2) walls of the sump at least every thirty (30) days. Records demonstrating compliance must be maintained for three (3) years.

(c) Existing systems must have the containment sumps tested for liquid tightness by October 13, 2018, and at least once every three (3) years thereafter or use double-walled containment sumps with periodic interstitial monitoring of the space between the two (2) walls of the sump at least every thirty (30) days. Owners and operators using a low liquid level test must ensure that when the sensor is activated the alarm activates, and verify the submersible pumps automatically shut off when the liquid activates the sensors. Sensors must be mounted and positioned at the lowest point in the sumps. Low liquid level UST sump testing must be performed according to the procedures set forth on the Commission's Containment Sump Alternative Test form. Records demonstrating compliance must be maintained for three (3) years.

(d) Beginning October 13, 2018, owners and operators must perform operation and maintenance tests on electronic and mechanical components of release detection equipment. This testing must be conducted according to the manufacturer's instructions or a code of practice developed by a nationally recognized association or independent testing laboratory. A test of the proper operation must be performed at least annually and, at a minimum, as applicable to the facility, cover the following components and criteria:

(1) Automatic tank gauge and other controllers: test alarm, verify system configuration, test battery backup.

(2) Probes and sensors: inspect for residual buildup, ensure floats move freely, ensure shaft is not damaged, ensure cables are free of kinks and breaks, test alarm operability and communication with controller.

(3) Vacuum pumps and pressure gauges: ensure proper communication with sensors and controller.

(4) Hand-held electronic sampling equipment associated with groundwater and vapor monitoring: ensure proper operation.

(e) Owners and operators must maintain records of the annual operation tests for three (3) years. At a minimum, records must list each component tested, indicate whether each component meets the criteria listed above or needed to have action taken, and describe any action taken to correct an issue.

[Source: Amended and renumbered from 165:25-3-5.5 at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19; Amended at 37 Ok Reg 1128, eff 10-1-20]

165:25-3-6.26. Automatic tank gauging systems

(a) Automatic tank gauging systems (ATG's) that test for the loss of product must conduct an automatic product level monitor test at a minimum frequency of once every 30 days, and be capable of detecting at least a 0.2 gallon per hour (gph) leak rate for any portion of the tank that routinely contains product.

(b) The test must be performed with the system operating in one of the following modes:

- (1) Passing 0.1 gph test at least every thirty (30) days; or
- (2) Passing 0.2 gph test at least every thirty (30) days along with inventory reconciled at thirty (30) days; or
- (3) Passing continuous statistical leak detection ("CSLD") test at least every thirty (30) days along with inventory reconciled at thirty (30) days.

(c) ATGs must be third party certified for the size of tanks and for the quantity of tanks that are manifolded together. Only third party certifications that have been reviewed and approved by the National Work Group on Leak Detection Evaluations (NWGLDE), found at NWGLDE Web Site, will be accepted (www.nwglde.org).

[Source: Amended and renumbered from 165:25-3-5.6 at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-3-6.27. Manual tank gauging

(a) **Restrictions.** Manual tank gauging may be used as an approved method of release detection if the tank has a nominal capacity of 1,000 gallons or less.

(b) **Requirements.**

- (1) Tank liquid level measurements are taken at the beginning and ending of the period appearing in Appendix Q, during which no liquid is added to or removed from the tank.
- (2) Level measurements are based on an average of two (2) consecutive stick readings at both the beginning and ending of the period.
- (3) The equipment used is capable of measuring the product over the full range of the tank's height to the nearest one-eighth inch (1/8").
- (4) A leak is suspected and subject to the release reporting requirements of Subchapter 3, Part 3 of this Chapter if the variation between beginning and ending measurements exceeds the weekly or thirty (30) day standards in the table in Appendix Q.

[Source: Amended and renumbered from 165:25-3-5.7 at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-3-6.28. Statistical Inventory Reconciliation (SIR)

(a) Deliveries, withdrawals and balance remaining must be recorded each operating day and data must be reconciled every thirty (30) days. Product deliveries must be reconciled with an appropriate device and data must be reconciled every thirty (30) days.

- (b) SIR records must demonstrate the following:
- (1) Report a quantitative result with a calculated leak rate;
 - (2) Be capable of detecting a leak rate of 0.2 gallon per hour or a release of one hundred fifty (150) gallons within thirty (30) days, with a probability of detection of 0.95 and a probability of false alarm of 0.05; and
 - (3) Use a threshold that does not exceed one-half (1/2) the minimum detectible leak rate.
- (c) The tank must be equipped with a drop tube and measured for water at least every thirty (30) days.
- (d) The equipment used is capable of measuring the level of product over the full range of the tank's height to the nearest one-eighth inch (1/8").
- (e) The regulated substance inputs are reconciled with delivery receipts by measurement of the tank inventory volume before and after delivery.
- (f) Records must be submitted to a certified SIR vendor for evaluation. Only third party certifications that have been reviewed and approved by the National Work Group on Leak Detection Evaluations (NWGLDE), found at the NWGLDE Web Site, will be accepted (nwglde.org).
- (g) SIR analysis reports must include a summary report of the quantitative results.
- (h) Results of SIR analysis must be on premises for inspector review every thirty (30) days.
- (i) This method is approved as release detection for tanks only.

[Source: Added at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15; Amended at 34 Ok Reg 121, eff 9-8-16 (emergency); Amended at 34 Ok Reg 935, eff 9-11-17; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-3-6.29. Monitoring requirements for piping

Underground piping that routinely contains regulated substances must be monitored for releases in a manner that meets the following requirements:

(1) Pressurized piping.

(A) All underground piping that conveys regulated substances under pressure must be equipped with a mechanical or electronic line leak detector installed and operated in accordance with this Chapter.

(B) New installations and facilities replacing a piping system must have a sump sensor, float or similar mechanical device at each tank, transition, and dispenser sump. Sensors should be mounted near the bottom of the sump(s) and accessible for annual testing.

(C) New installations and facilities replacing a piping system must have double-walled piping. The interstitial area of the piping must be open inside the sumps to allow fuel to drain into the sumps in the event that a leak occurs.

(D) The underground pressure piping from the master dispenser to the satellite must be designed and installed so that the satellite piping is tested by the automatic line leak detector. An annual line tightness test is required on the satellite underground piping.

(2) Suction piping.

(A) Suction piping installed after July 1, 2008 must be double-walled piping. The interstitial area of the piping must be open inside the sumps to allow fuel to drain into the sumps in the event that a leak occurs.

(B) New installations and facilities replacing a piping system must have a sump sensor, float or similar mechanical device at each tank, transition, and dispenser sump. Sensors should be mounted near the bottom of the sump(s) and accessible for annual testing.

(3) **Methods of release detection for pressurized piping.** Each method of release detection for piping must be done in accordance with the following requirements.

(A) Mechanical line leak detectors and annual line tightness testing.

(i) An annual function test of the operation of the leak detector must be conducted by simulating a leak.

(ii) A hydrostatic line tightness test must be done annually by a certified tester in accordance with this Chapter.

(B) Sump sensors with automatic line leak detectors.

(i) Double walled piping with sump sensors, floats or similar mechanical devices at each sump may be used in lieu of annual line tightness testing except at marinas where a line tightness test is required by April 1st of each year.

(ii) The sump sensors, floats or other mechanical devices used must be tested annually. Sensors status and alarm history reports must be printed and retained or use an interstitial monitoring form every thirty (30) days for systems installed after July 1, 2008.

(iii) An annual function test of the operation of the leak detector must be conducted by simulating a leak.

(C) Electronic line leak detection. A certified electronic line leak detector may be used in lieu of a mechanical line leak detector and annual tightness test only if:

(i) The system is capable of detecting and tests for a leak of three (3) gallons per hour before or after each operation of the submersible turbine pump; and

(ii) The system is capable of detecting and tests for a leak of 0.2 or 0.1 gallons per hour at least once every thirty (30) days; and

(iii) The system is capable of detecting and tests for a leak of 0.1 gallons per hour annually, AND the system is function tested annually by simulating a leak, and if necessary, calibrated.

(4) **Methods of release detection for suction piping.**

(A) Safe Suction Piping. No release detection is required for suction piping installed on or prior to July 1, 2008 if it is designed and constructed to meet (i) through (iv) below:

(i) The below-grade piping operates at less than atmospheric pressure.

(ii) The below-grade piping is sloped so that the contents of the pipe will drain back into the storage tank if the suction is released.

(iii) One (1) check valve is included in each suction line.

(iv) The check valve is located directly below and as close as is practical to the suction pump.

(B) Tri-annual Line Tightness Testing. Underground piping that conveys regulated substances under suction must have a line

tightness test conducted at least every three (3) years by a certified tester.

(C) Sump sensors.

(i) Double walled piping with sump sensors, floats or similar mechanical devices at each sump may be used in lieu of tri-annual line tightness testing except at marinas where a line tightness test is required by April 1st of each year.

(ii) The sump sensors, floats or other mechanical devices used must be tested annually according to manufacturer's requirements. Sensors status and alarm history reports must be printed and retained or use an interstitial monitoring form every thirty (30) days for systems installed after July 1, 2008.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended and renumbered to 165:25-3-7.1 at 32 Ok Reg 780, eff 8-27-15]

PART 3. RELEASE INVESTIGATION REQUIREMENTS

165:25-3-7.1. Release reporting

(a) The reporting requirements of this Part do not relieve the owner/operator of the responsibility to take necessary corrective action pursuant to OAC 165:29, to protect the public health, safety and the environment, including the containment and cleanup of spills and overfills that are not required to be reported by this Chapter.

(b) All underground storage tank system owners, operators, their employees or agents, or transporters must report to PSTD within twenty-four (24) hours of discovering any substances, conditions or monitoring results that indicate a release may have occurred using the link provided on the release reporting tab on PSTD's webpage on the Commission website; by email at PSTReleaseReporting@occ.ok.gov; or by telephone at (405) 521-4683 or 1-888-621-5878. If after hours, or on weekends or holidays, call the PSTD emergency phone number at (405) 823-0994. Owners or operators must provide written confirmation to follow within twenty (20) days in accordance with the requirements established in this Chapter. Events indicating a release include, but are not limited to, the following:

(1) The discovery of released regulated substances at the facility or in the surrounding area (such as the presence of free product or vapors in soils, basements, crawlspaces, sewer and utility lines, and nearby surface water) whether on-site or off-site.

(2) Any unusual operating conditions observed, such as the unexplained erratic behavior of product dispensing equipment, the sudden loss of

product from the underground storage tank system, an unexplained presence of water in the tank, or liquid in the interstitial space of secondarily contained systems, unless the system equipment or component is found not to be releasing regulated substances to the environment; any defective system equipment or component is immediately repaired or replaced; for secondarily contained systems any liquid in the interstitial space not used as part of the interstitial monitoring method (for example brine filled) is immediately removed.

(A) In the case of inventory control, two consecutive thirty (30) day periods where the Total Gallons Over/Short is greater than the "Leak Check" (one percent (1%) of product sales plus 130 gallons) must be reported to PSTD within twenty-four (24) hours of the owner/operator discovering the inventory control results.

(B) Any UST system failure from a third party-certified Statistical Inventory Reconciliation (SIR) analysis must be reported to PSTD by the owner, operator, or agent within twenty-four (24) hours of discovering the failure. An immediate investigation into the cause of the failed report must be conducted and results reported to PSTD within seven (7) days.

(C) An "Inconclusive" report from an SIR analysis must be reported by the owner, operator, or agent within twenty-four (24) hours of report generation. An Inconclusive means that the UST system has failed to meet leak detection requirements for that month thirty (30) day period.

(3) An unusual level of vapors on the site that is of unknown origin. A vapor observation well reading in excess of 4,000 units/ppm from a pit containing gasoline tanks, and in excess of 1,500 units/ppm for a pit containing diesel or both gasoline and diesel, must be reported to PSTD within twenty-four (24) hours by the owner/operator, their employees, or agents discovering the monitoring results. Within ten (10) days, the owner/operator must submit to PSTD all vapor monitoring well data for the last twelve (12) thirty (30) day periods. Upon examination of the submitted data, PSTD will advise the owner/operator what action, if any, is needed.

(4) An increase in vapor levels of 500 units/ppm above background or historical levels detected by thirty (30) day monitoring, even though below the twenty-four (24)-hour reporting level, must be reported if the increase does not correct itself in the second thirty (30) day period of monitoring and it must be reported to PSTD within twenty-four (24) hours of the owner, operator, their employees, or agents discovering the monitoring results.

(5) Monitoring results, including investigation of an alarm, from a release detection method required by this Chapter that indicate a release may have occurred unless:

(A) The monitoring device is found to be defective, and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial result;

(B) The leak is contained in the secondary containment and;

(i) Any liquid in the interstitial space not used as the interstitial monitoring method is immediately removed.

(ii) Any defective system equipment or component is immediately repaired or replaced.

(C) The alarm was investigated and determined to be a non-release event (for example, from a power surge or caused by filling the tank during release detection testing.

(c) While aboveground releases of petroleum of less than twenty-five (25) gallons need not be reported to PSTD, they must be recorded by the owner/operator and contained and cleaned up immediately. All of the following releases must be reported to PSTD electronically or by telephone within twenty-four (24) hours of discovery, by the owner, operator, their employees, or agents, with a written confirmation to PSTD within twenty (20) days in accordance with the requirements established in this Chapter:

(1) All known belowground releases in any quantity; for example, a release resulting from a line broken during an excavation.

(2) Any aboveground release of petroleum greater than twenty-five (25) gallons.

(3) Any aboveground release of petroleum which is less than twenty-five (25) gallons, but cannot be contained and cleaned up within twenty-four (24) hours.

(d) All owners/operators of underground storage tank systems must maintain records of all reportable and nonreportable events listed in this section sufficient to permit adequate inspection and review by PSTD. These records must be kept for three (3) years following the date of the event.

(e) If any of the possible, probable or definite release conditions set forth above are not reported within twenty-four (24) hours, the owner/operator may be subject to fines, Formal Enforcement Action or shutdown of operations.

(f) Any releases requiring emergency corrective action must be reported immediately to PSTD at (405) 521-4683 or 1-888-621-5878. After office hours, weekends or holidays, calls must be reported to PSTD's emergency number at (405) 823-0994.

[Source: Renumbered from 165:25-3-7 at 32 Ok Reg 780, eff 8-27-15; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19; Amended at 37 Ok Reg 1128, eff 10-1-20]

165:25-3-8. Release investigation and confirmation

(a) This Section applies to the investigation of all reportable releases unless PSTD specifically waives any part of this Section in writing.

(b) Owners/operators must immediately investigate and confirm all suspected releases of regulated substances requiring reporting under this Chapter within seven (7) days of receipt of notice from PSTD using the following steps or another procedure approved by PSTD:

(1) **System test.** Owners/operators must conduct tightness tests and if applicable, secondary containment testing, that will determine whether a leak exists in the storage tank system or a breach of either wall of the secondary containment has occurred.

(A) Owners/operators must repair, replace or permanently closed as defined in OAC 165:25-2-135, the underground storage tank system and begin investigation in accordance with (b)(2) of this Section if the test results for the system, tank, delivery piping or the interstice indicates that a release exists.

(B) Further investigation is not required if the test results for the system, tank, delivery piping and interstice do not indicate that a release exists and chemical concentrations of regulated substances

detected in soil or water are not the basis for a suspicion of a release.

(C) Owners/operators must conduct a site check as described in (b) (2) of this Section if the test results for the system, tank, delivery piping and interstice do not indicate that a release exists but indicate concentrations of regulated substances detected in soil or water are above action levels cited in (c).

(2) **Site check.** Owners/operators must measure for the presence of a release where released chemicals are most likely to be present at the underground storage tank system site. In selecting sample types, sample locations, sample depths, and measurement methods, owners and/or operators must consider the nature of the stored substance, the type of initial alarm or cause for suspicion, the type of native soil, the depth of groundwater, and other factors appropriate for identifying the presence and source of the release. Sample locations should be approximately five feet (5') from the outside of the UST system in native soil or another location approved by PSTD. Analyses for both BTEX constituents and the appropriate TPH must be obtained in all cases. Site check investigations must be conducted by an OCC licensed Environmental Consultant.

(A) If the test results for soil and/or groundwater taken outside the excavation zone or the underground storage tank system site confirm that a release has occurred, owners and/or operators must begin corrective action in accordance with Chapter 29 of Commission rules.

(B) If the test results for the native soil and/or groundwater or the underground storage tank system site do not indicate that a release has occurred, further investigation is not required.

(c) Laboratory analysis of levels of chemical constituent concentrations that may be required to confirm a case are:

(1) Benzene

(A) Native Soils - 0.5 mg/kg

(B) Groundwater - 0.005 mg/l

(2) Toluene

(A) Native Soils - 40.0 mg/kg

(B) Groundwater - 1.0 mg/l

(3) Ethyl Benzene

(A) Native Soils - 15.0 mg/kg

(B) Groundwater - 0.7 mg/l

(4) Xylene

(A) Native Soils - 200.0 mg/kg

(B) Groundwater - 10.0 mg/l

(5) TPH

(A) Native Soils - 50.0 mg/kg

(B) Groundwater - 2.0 mg/l

(C) If BTEX concentrations are below action levels, a TPH concentration of 500 ppm or mg/kg in soil shall be required to confirm a case at the discretion of PSTD.

(d) Within twenty (20) days after the reporting of a release, the owner and/or operator must submit a report to PSTD summarizing the steps taken under (a) through (c) of this Section and any resulting information or data. If a release is confirmed through performance of the steps taken under this Section, then the

report must be submitted in accordance with a format established by the PSTD, after which corrective action may be required under the provisions of Chapter 29 of Commission rules. Failure to submit reports in a format established by PSTD within the timeframe required may result in an enforcement action.

PART 19. LICENSING FOR UST CONSULTANTS [REVOKED]

165:25-3-90. Licensing for Underground Storage Tank consultants involved with closures, investigations, removals, and remediations of releases from either underground storage tanks or aboveground storage tank [REVOKED]

[Source: Added at 10 Ok Reg 2617, eff 6-25-93; Amended at 11 Ok Reg 3705, eff 7-11-94; Amended at 12 Ok Reg 2047, eff 7-1-95; Amended at 13 Ok Reg 3237, eff 9-1-96; Amended at 17 Ok Reg 547, eff 11-30-99 (emergency); Amended at 17 Ok Reg 2315, eff 6-26-00; Revoked at 18 Ok Reg 2378, eff 7-1-01]

SUBCHAPTER 5. UPGRADES

165:25-5-1. Alternatives allowed

No later than December 23, 1998, owners/operators of existing underground storage tank systems shall:

- (1) Comply with the requirements for new underground storage tank systems under Subchapter 2 of this Chapter; or
- (2) Comply with the upgrading requirements in OAC 165:25-5-2 and 165:25-5-3; or
- (3) Permanently close the underground storage tank system and take any necessary corrective action, in accordance with this Chapter.

[Source: Revoked at 18 Ok Reg 2378, eff 7-1-01; Added at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 37 Ok Reg 1128, eff 10-1-20]

165:25-5-2. Tank upgrading requirements

Existing steel tanks must be upgraded (by December 23, 1998) to meet one of the following requirements in accordance with a code of practice developed by a nationally recognized association or an independent testing laboratory:

- (1) Interior lining. A tank may be upgraded by interior lining if:
 - (A) The tank is repaired in accordance with 165:25-2-111 of this Chapter and the liner is installed in accordance with a recognized association or an independent testing laboratory.
 - (B) Within 10 years after lining and every 5 years thereafter, the lined tank is internally inspected and found to be structurally sound with the lining still performing in accordance with original design specifications.
- (2) Cathodic protection. A tank may be upgraded by cathodic protection if the cathodic protection system meets PSTD requirements and the integrity of the tank is ensured using one of the following methods:
 - (A) The tank is internally inspected and assessed to ensure that the tank is structurally sound and free of corrosion.
 - (B) The tank has been installed for less than 10 years and is monitored monthly for releases in accordance with PSTD requirements.
 - (C) The tank has been installed for less than 10 years and is assessed for corrosion holes by conducting 2 tightness tests that meet PSTD requirements. The first tightness test must be conducted prior to installing the cathodic protection system. The second tightness test must be conducted between 3 and 6 months following the first operation of the cathodic protection system.
 - (D) The tank is assessed for corrosion holes by a method that is determined by PSTD to prevent releases in a manner that is no less protective of human health and the environment than (A), (B), or

(C) of this paragraph.

(3) Internal lining combined with cathodic protection. A tank may be upgraded by both internal lining and cathodic protection if:

(A) The lining is installed in accordance with the requirements of Subchapter 2, Part 5 of this Chapter.

(B) The cathodic protection system meets PSTD requirements.

(C) The following codes and standards may be used to comply with 165:25-5-2: API 1631, API 1632, NLP A 631, and NACE RP-0285.

[Source: Amended at 9 Ok Reg 2305, eff 6-25-92; Amended at 11 Ok Reg 3705, eff 7-11-94; Amended at 12 Ok Reg 2047, eff 7-1-95; Amended at 15 Ok Reg 3003, eff 7-15-98; Revoked at 18 Ok Reg 2378, eff 7-1-01; Added at 22 Ok Reg 1730, eff 7-1-05; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08]

165:25-5-3. Piping upgrading requirements

Metal piping of an existing underground storage tank system that routinely contains regulated substances and is in contact with the ground must be cathodically protected in accordance with a code of practice developed by a nationally recognized association or independent testing laboratory and must meet PSTD requirements.

[Source: Amended at 12 Ok Reg 2047, eff 7-1-95; Amended at 13 Ok Reg 1163, eff 9-11-95 (emergency); Amended at 13 Ok Reg 3159, eff 9-11-95 (emergency); Amended at 13 Ok Reg 2945, eff 7-11-96; Revoked at 18 Ok Reg 2378, eff 7-1-01; Added at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08]

165:25-5-4. Spill and overflow prevention requirements

Existing underground storage tank systems shall be in compliance with the specific spill and overflow requirements by December 23, 1998.

[Source: Revoked at 18 Ok Reg 2378, eff 7-1-01; Added at 22 Ok Reg 1730, eff 7-1-05]

SUBCHAPTER 6. SPECIAL REQUIREMENTS FOR UNDERGROUND STORAGE TANK SYSTEMS UTILIZED BY AIRPORTS OPEN TO THE PUBLIC

PART 1. GENERAL APPLICATION AND COMPLIANCE PROVISIONS

165:25-6-1. Application

(a) This Subchapter contains provisions that particularly apply to storage tank systems for aircraft fuel at airports. A storage tank system consists of an underground storage tank and the pipes, pumps, dispensers and transport truck attached to it. Aircraft fuel servicing vehicles are not included.

(b) This Subchapter governs airport operations only insofar as they relate to the installation, operation, maintenance and inspection of fuel storage tank systems.

(c) Subchapters 1. General Provisions, 2. General Requirements for UST's, 3. Release Prohibition and Detection, and 5. Upgrades shall also apply in addition to this Subchapter.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 35 Ok Reg 985, eff 10-1-18]

PART 3. CODES AND STANDARDS

165:25-6-7. Codes and standards

The Commission adopts NFPA 407, which serves as a basis for the standards in this Subchapter. A copy of NFPA 407 is available for inspection at the Petroleum Storage Tank Division during regular business hours.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

PART 5. DISPENSER REQUIREMENTS

165:25-6-13. Dispenser hose

(a) Aircraft fueling hose that is frequently used must be inspected before use each day.

(1) The hose must be checked for evidence of blistering, carcass saturation or separation, cuts, nicks or abrasions that expose reinforcement material, and for slippage, misalignment or leaks at couplings.

(2) If coupling slippage or leaks are found, the cause of the problem must be determined.

(b) Defective hoses must be removed immediately from service.

(c) At least once each month the hose must be thoroughly inspected.

(1) The hose couplings and the hose must be examined for a length approximately 12 inches (12", or 305 mm) adjacent to the couplings.

(2) Structural weakness must be checked by pressing the hose in the area around its entire circumference for soft spots.

(3) Hoses that show evidence of soft spots must be immediately removed from service.

(4) The nozzle screens must be examined for rubber particles. The presence of rubber particles indicates possible deterioration of the interior, and the hose must be immediately removed from service.

(5) A hose assembly that has been subjected to abuse, such as severe end-pull, flattening or crushing by a vehicle, or sharp bending or kinking, must be immediately removed from service.

(6) If inspection shows that a portion of a hose has been damaged, the hose must be immediately replaced. Two lengths of hose must not be coupled together.

(7) Before any hose assembly is placed in service, it must be visually inspected for evidence of damage or deterioration.

(8) Kinks or short loops in fueling hose must be avoided.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 22 Ok Reg 1730, eff 7-1-05]

165:25-6-14. Dispenser location at airports

(a) Fueling hydrants, cabinets and pits must be located at least 50 feet (50', or 15.2 m) from any terminal building, hangar, service building, or enclosed passenger concourse (other than loading bridges).

(b) Pumps must be located at or below ground level.

(c) Relay pumping is not allowed.

(d) Pumps installed outside of buildings must be located at least 5 feet (5', or 1.5 m) from any building opening. They must be substantially anchored and protected against physical damage from collision.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

165:25-6-15. Specific requirements for airport dispensers

- (a) The valve controlling the flow of fuel to an aircraft must have a deadman control. The deadman control device must be arranged to accommodate the operational requirements. The fuel flow control valve must be one of the following:
- (1) The hydrant pit valve; or
 - (2) On the hose nozzle for overwing servicing.
- (b) Deadman controls must be designed to preclude defeating their intended purpose.
- (c) The deadman flow control in the nozzle may be used for overwing fueling.
- (1) Notches or latches in the nozzle handle that could allow the valve to be locked open are prohibited.
 - (2) Each overwing servicing nozzle must have a cable with a plug or clip for bonding to the aircraft.
 - (3) Nozzles for underwing fueling must be designed to be attached securely to the aircraft adapter before the nozzle can be opened. It must not be possible to disengage the nozzle from the aircraft adapter until the nozzle is fully closed.
- (d) Fuel servicing pump mechanisms must be designed and arranged so that failure or seizure does not cause rupture of the pump housing, a tank, or of any component containing fuel. Fuel pressure must be controlled within the stress limits of the hose and plumbing by means of an in-line pressure controller, a system pressure relief valve, or other suitable means. The working pressure of any system component must equal or exceed any pressure to which it could be subjected.
- (e) UL listed or approved dispensing devices must be used.
- (f) Access to dispensing equipment must be controlled by means of mechanical or electronic devices designed to resist tampering and to prevent access or use by unauthorized persons.
- (g) Dispensing devices must have a UL listed or approved emergency shutoff valve, incorporating a fusible link or other thermally actuated device designed to close automatically in case of fire.
- (1) This valve must also incorporate a shear section that automatically shuts off the flow of fuel upon severe impact.
 - (2) This valve must be rigidly mounted at the base of the dispenser in accordance with the manufacturer's instructions.
 - (3) Dispensing devices or cabinets must be designed so that a proper bond between the aircraft and the fueling equipment can be established.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-6-17. Emergency controls

- (a) Each fuel system must have means for quickly and completely shutting off the flow of fuel in an emergency. This requirement is in addition to the requirement for a deadman control of fuel flow.
- (b) The emergency fuel shutoff system must include shutoff stations located outside of probable spill areas and near the route that normally is used to leave the spill area or to reach the fire extinguishers provided for the protection of the area.

[Source: Added at 21 Ok Reg 2036, eff 7-1-04]

PART 7. TANK FILLING PROCEDURES

165:25-6-21. Tightfill connection requirements

All tanks must be filled through a liquid tight connection.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

PART 9. DISPENSING PROCEDURES

165:25-6-27. Dispensing fuel into aircraft

Aircraft being fueled from a stationary dispenser must be positioned so that aircraft fuel system vents or fuel tank openings are not closer than 25 feet (25', or 8 m) from any terminal building, hangar, service building or enclosed passenger concourse other than a loading walkway. Aircraft being fueled must not be positioned so that the vent or tank openings are within 50 feet (50', or 15 m) of any combustion and ventilation air intake to any boiler, heater or incinerator room.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

165:25-6-28. Static protection and bonding

(a) Dispensing devices or cabinets must be designed so that a proper bond between the aircraft and the fueling equipment can be established.

(b) Conductive hose must be used to prevent electrostatic discharge but not to accomplish required bonding.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

PART 11. MISCELLANEOUS SAFETY REQUIREMENTS

165:25-6-34. Required signs

Entrances to fueling areas must be posted with signs that read:

- (1) NO SMOKING.
- (2) SHUT ENGINES OFF.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

165:25-6-35. Fire extinguishers

(a) Extinguishers specified for protection of fuel servicing operations should be located along the fence, near dispensers or at emergency remote control stations of airport fixed-fuel systems.

(b) Extinguishers should be located near but not in probable spill areas.

SUBCHAPTER 8. SPECIAL REQUIREMENTS FOR UNDERGROUND STORAGE TANK SYSTEMS UTILIZED BY MARINAS

PART 1. GENERAL APPLICATION AND COMPLIANCE PROVISIONS

165:25-8-1. Application

- (a) This Subchapter contains provisions that particularly apply to the storage, handling and dispensing of gasoline and diesel fuel at marinas.
- (b) Subchapters 1. General Provisions, 2. General Requirements for UST's, 3. Release Prohibition and Detection, and 5. Upgrades shall also apply in addition to this Subchapter.
- (c) The tank and piping system must come in compliance with the rules of this subchapter before July 1, 2009. Compliance may be required earlier for any part of a system that poses a threat to property, people, or to the environment.
- (d) A PSTD Licensed UST Installer must be on the jobsite at all times during the installation of an underground storage tank and/or piping.
- (e) All dock or pier product piping from the shoreline to the dispensers at new or existing facilities must be installed according to 165:25-8-3 "Over-water piping at marinas" and 165:25-8-4 "Installation requirements for over-water piping".

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 23 Ok Reg 137, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-8-2. Release detection requirements for marinas

Monitoring requirements for product lines, at a minimum, must consist of an annual line tightness test conducted no later than April 1st of each year.

[Source: Added at 23 Ok Reg 137, eff 10-6-05 (emergency); Added at 23 Ok Reg 2261, eff 7-1-06]

PART 3. OVER-WATER PIPING REQUIREMENTS

165:25-8-3. Over-water piping at marinas

- (a) The design, fabrication, assembly, test, and inspection of the piping system from the fuel tank to the fuel dispensers must be in accordance with NFPA 30 and NFPA 30A.
- (b) The piping must be installed according to the manufacturers installation recommendations and instructions.
- (c) Piping must be listed and approved by the manufacturer for aboveground installations.

165:25-8-4. Installation requirements for over-water piping

(a) Steel piping.

(1) Piping shall be installed with proper support and strain relief in order to eliminate the physical stress on the piping and piping connections caused by the constant movement of the water and floating dock. Fuel piping and electrical conduit shall be rigidly attached to the dock before the piping enters the sump area, in order to prevent strain on the entry boots and primary pipe fittings.

(2) Steel flex connectors must be used between the shore piping and the piping on the floating structure and between separate sections of the floating structure to allow for movement of the dock and changes in water levels.

(3) Onshore piping must be rigidly anchored in place to prevent movement when water levels are elevated.

(4) A listed emergency breakaway device designed to retain liquid on both sides of the breakaway point must be installed on each line serving the dock. The breakaway device shall be located where the dock piping will separate from the shore or secured ramp piping. The piping shall be secured at both ends of the breakaway device so that the piping will withstand the forces and pressures exerted upon it.

(5) There must be a normally closed explosion proof solenoid valve installed in each product line at the shoreline.

(6) A ball valve must be installed at the shoreline in order to manually shut off the flow of fuel.

(7) Containment sumps must be installed under all dispensers and monitored with sensors. If a pressure system is used all sump sensors must automatically control the electricity to both the solenoid valves and submerged pump. If a suction system is used the sump sensors should automatically control the electricity to both the solenoid valve and suction pump motor.

(8) If the onshore piping is double walled a transition sump is required at the shoreline in order to contain a release from the onshore piping. The transition sump must contain the ball valve and solenoid valve and be rigidly anchored in place.

(b) Double walled piping.

(1) Double walled piping must be installed according to the double wall piping manufacturer recommendations.

(2) All double walled piping installed above the water shall be installed inside a rigid metal chase or conduit except at joints requiring flexibility. A flexible metal conduit can be used between shore piping and piping on the floating structure or between separate sections of the floating structure to allow for movement of the dock and changes in water levels. Both the rigid and flexible metal chase/conduit must shield the fuel pipe from damage by fire and in itself be fire resistant.

(3) Due to the constant movement of the water and the floating dock, piping shall be installed with proper support and strain relief in order to eliminate the physical stress on the piping and piping connections. Fuel piping and electrical conduit shall be rigidly attached to the dock before the piping enters the sump area, in order to prevent strain on the entry boots and

primary pipe fittings.

(4) Onshore piping must be rigidly anchored in place to prevent movement when water levels are elevated.

(5) A listed emergency breakaway device designed to retain liquid on both sides of the breakaway point must be installed on each line serving the dock. The breakaway device shall be located where the dock piping will separate from the shore or secured ramp piping. The piping shall be secured at both ends of the breakaway device so that the piping will withstand the forces and pressures exerted upon it.

(6) There must be a normally closed explosion proof solenoid valve installed in each product line at the shoreline.

(7) A ball valve must be installed at the shoreline in order to manually shut off the flow of fuel. It must be installed so that it is accessible to the operator at all water levels.

(8) Containment sumps must be installed under all dispensers and monitored with sensors. If a pressure system is used all sump sensors must automatically control the electricity to both the solenoid valves and submerged pump. If a suction system is used the sump sensors should automatically control the electricity to both the solenoid valve and suction pump motor.

(9) A transition sump must be rigidly anchored in place either on the dock or at the shoreline. The transition sump must contain the ball valve, solenoid valve, and emergency breakaway device. The transition sump must be either monitored with a sensor or a bypass tube must be used in order to divert a leak from the transition sump to the dispenser sump where it would be detected by a sensor.

165:25-8-7. Aboveground piping at marinas [REVOKED]

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Revoked at 23 Ok Reg 137, eff 10-6-05 (emergency); Revoked at 23 Ok Reg 2261, eff 7-1-06]

165:25-8-8. Installation and monitoring requirements for piping [REVOKED]

[Source: Added at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Revoked at 23 Ok Reg 137, eff 10-6-05 (emergency); Revoked at 23 Ok Reg 2261, eff 7-1-06]

PART 5. DISPENSER REQUIREMENTS

165:25-8-13. Dispensers [REVOKED]

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Revoked at 21 Ok Reg 2036, eff 7-1-04]

165:25-8-14. Dispenser hose

Listed hose assemblies must be used to dispense fuel. Where hose length exceeds 18 ft (5.5m), the hose shall be secured so as to protect it from damage, such as a hose reel, and in no case shall the hose exceed 50 ft (15m) in length.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 23 Ok Reg 137, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2261, eff 7-1-06]

165:25-8-15. Nozzles

Dispensing nozzles used at marine service stations must be the automatic closing type. Hold-open latch devices from nozzles intended for marina service are not allowed.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 23 Ok Reg 137, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 37 Ok Reg 1128, eff 10-1-20]

165:25-8-16. Dispenser location at marinas

Dispensing devices at marine service stations may be located on open piers, wharves, floating docks, shore or on piers of the solid-fill type, but must be located apart from other structures to provide room for safe ingress and egress of watercraft for fueling. Dispensing devices must be in all cases at least 20 feet (20', or 6 m) from any activity involving fixed sources of ignition.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

165:25-8-17. Specific requirements for dispensers at marinas; maintenance

When maintenance of a Class I dispenser is necessary, the following precautions must be taken before maintenance begins:

- (1) Only persons knowledgeable in performing the required maintenance may perform the work.
- (2) All electrical power to the dispenser, the dispensing pump, and all associated circuits must be shut off at the main electrical panel.
- (3) The emergency shutoff valve at the dispenser, if installed, must be closed.
- (4) All unauthorized persons are prohibited from coming within 20 feet (20', or 6 m) of the dispenser while the maintenance work is being done.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

PART 7. TANK FILLING PROCEDURES [REVOKED]

165:25-8-23. Tightfill connection requirements [REVOKED]

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Revoked at 21 Ok Reg 2036, eff 7-1-04]

PART 9. DISPENSING PROCEDURES

165:25-8-29. Attendants at marinas

(a) Marinas may have an attendant or supervisor on duty when the marina is open for business. The attendant's primary function will be to supervise, observe, and control the dispensing of fuels to ensure that all safety requirements are met, and to ensure that the waters of the state are not contaminated by fuel.

(b) At unattended marine facilities an emergency shut off device must be installed to meet the following requirements:

- (1) Installed between 20 to 100 feet from the fuel dispensing devices that they serve;
- (2) Device must shut down the fuel dispensing system in the event of an emergency;
- (3) Must be readily accessible to patrons; and

(4) Emergency instructions must be conspicuously posted.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 23 Ok Reg 137, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2261, eff 7-1-06]

PART 11. MISCELLANEOUS SAFETY REQUIREMENTS

165:25-8-35. Required signs

All marinas must have a sign printed in one-fourth inch (1/4") to one-half inch (1/2") text in black or red block capital letters on a white background conspicuously posted and easily readable from the dispensing area, which reads:

- (1) BEFORE FUELING:
 - (A) Stop all engines and auxiliaries.
 - (B) Shut off all electricity, open flames and heat sources.
 - (C) Check all bilges for fuel vapors.
 - (D) Extinguish all smoking materials.
 - (E) Close access fittings and openings to prevent fuel vapors from entering enclosed spaces of the vessel.
- (2) DURING FUELING:
 - (A) Maintain nozzle contact with the fill pipe.
 - (B) Wipe up spills immediately.
 - (C) Avoid overfilling.
 - (D) Fuel filling nozzle must be attended at all times.
- (3) AFTER FUELING:
 - (A) Inspect bilges for leakage and fuel odors.
 - (B) Ventilate until odors are gone.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 23 Ok Reg 137, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 35 Ok Reg 985, eff 10-1-18]

165:25-8-36. Fire extinguishers

- (a) Each marina must have a 40B:C fire extinguisher.
- (b) A minimum of three extinguishers must be located at the fuel dock, and one or more must be located within 50 feet (50' or 15 meters) of each pump, dispenser, and underground fill pipe opening.
- (c) Piers that extend more than 500 feet (500' or) one hundred fifty-two meters (152 m) in travel distance from shore must have a Class III standpipe installed in accordance with NFPA 14, Standard for the Installation of Standpipe and Hose Systems.
- (d) There must be a knife readily accessible at the fuel dock for quickly cutting mooring lines in an emergency and a push pole for shoving away a boat.

**SUBCHAPTER 14. SPECIAL REQUIREMENTS FOR UNDERGROUND
STORAGE TANK SYSTEMS UTILIZED BY BULK PLANT FACILITIES**

PART 1. GENERAL APPLICATION AND COMPLIANCE PROVISIONS

165:25-14-1. Application

(a) This Subchapter applies to the storage, handling and use of regulated substances at bulk plant facilities. Bulk plants built after July 1, 2001 must comply with all provisions of this Chapter and Subchapter.

(b) Subchapters 1 General Provisions, 2 General Requirements for UST's, 3 Release Prohibition and Detection, and 5 Upgrades shall also apply in addition to this Subchapter.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 23 Ok Reg 2261, eff 7-1-06; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 32 Ok Reg 780, eff 8-27-15]

PART 3. DISPENSER REQUIREMENTS

165:25-14-7. Dispensers

Bulk plants which have, in addition to their distribution business, a facility for dispensing fuel directly into the fuel tanks of automobiles and trucks must comply with the dispenser requirements of retail facilities.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

PART 5. LOADING FACILITIES

165:25-14-13. Location of loading facilities

Tank vehicle and tank car loading and unloading facilities must be separated from warehouses, other plant buildings or the nearest line of adjoining

property that can be built upon by a distance of at least 25 feet (25', or 7.6 m) for Class I liquids and at least 15 feet (15', or 4.6 m) for Class II and Class III liquids, measured from the nearest fill spout or transfer connection.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

165:25-14-14. Specific requirements for loading facilities

- (a) Loading and unloading facilities must be provided with drainage systems or other means to contain spills.
- (b) A loading or unloading facility that has a canopy or roof that does not limit the dissipation of heat or dispersion of flammable vapors and does not restrict fire-fighting access and control will be treated as an outdoor facility.
- (c) Loading and unloading facilities at bulk plants that are used to load motor fuel into tank vehicles through open domes must be provided with a means for electrically bonding to protect against static electricity hazards.
 - (1) It must consist of a metal wire that is permanently and electrically connected to the bulk plant's fill pipe assembly or to some part of the bulk plant's rack structure that is in electrical contact with the fill pipe assembly.
 - (2) The free end of this wire must have a clamp for convenient attachment to some metallic part of the vehicle that is in electrical contact with the cargo tank of the tank vehicle.
 - (3) All parts of the fill pipe assembly, including the drop tube, must form a continuous electrically conductive path.
- (d) Bulk plants where motor fuel or blending materials are loaded or unloaded through open domes of railroad tank cars must be protected against stray electrical current by permanently bonding the bulk plant's fill pipe and the individual storage tanks to at least one rail of the railroad.
- (e) Equipment such as piping, pumps, and meters used for the transfer of Class I liquids between storage tanks and the fill stem of the loading facility cannot be used for the transfer of Class II or Class III liquids.
 - (1) This provision does not apply to water-miscible liquid mixtures where the class of the mixture is determined by the concentration of liquid in water.
 - (2) This provision does not apply where the equipment is cleaned between transfers.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

PART 7. TANK FILLING PROCEDURES

165:25-14-20. Switch loading

- (a) All tanks must be filled through a liquid tight connection.
- (b) To prevent hazards due to a change in flash point of liquids, no tank or tank vehicle that has previously contained a Class I liquid may be loaded with a Class II or Class III liquid unless proper precautions are taken.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

PART 9. DISPENSING PROCEDURES

165:25-14-26. Dispensing fuel into tank vehicles

Tank vehicles must be loaded and unloaded as follows:

- (1) Liquids can only be loaded into cargo tanks whose material of construction is compatible with the chemical characteristics of the liquid.
- (2) The liquid being loaded must also be chemically compatible with the liquid hauled on the previous load unless the cargo tank has been cleaned.
- (3) When transferring Class I liquids, engines of tank vehicles or motors of auxiliary or portable pumps must be shut down while making and breaking hose connections.
- (4) If loading or unloading is done without requiring the use of the motor of the tank vehicle, the vehicle's motor must be shut down throughout any transfer operations involving Class I liquids.
- (5) Filling through open domes into the tanks of tank vehicles must be by means of a downspout that extends to within 6 inches (6") of the bottom of the tank.
- (6) When top loading a tank vehicle with Class I or Class II liquids without a vapor control system, valves used for the final control of flow must be of the self-closing type and must be manually held open except where automatic means are provided for shutting off the flow when the vehicle is full.
 - (A) Automatic shutoff systems must be provided with a manual shutoff valve located at a safe distance from the loading nozzle to stop the flow if the automatic system fails.
 - (B) When bottom loading a tank vehicle, a positive means must be provided for loading a predetermined quantity of liquid, together with a secondary automatic shutoff control to prevent overflow.
 - (C) The connecting components between the loading rack and the tank vehicle that are required to operate the secondary control must be functionally compatible.
 - (D) The connection between the liquid loading hose or pipe and the truck piping must be by a dry disconnect coupling.
- (7) When bottom loading a tank vehicle that is equipped for vapor control, but when vapor control is not used, the tank must be vented to the atmosphere, at a height not lower than the top of the cargo tank of the vehicle, to prevent pressurization of the tank. Connections to the facility's vapor control system must be designed to prevent the escape of vapor into the atmosphere when not connected to a tank vehicle.
- (8) When bottom loading is used, reduced flow rates (until the fill opening is submerged), splash deflectors or other devices must be used to prevent splashing and to minimize turbulence.
- (9) To allow for the relaxation of charge, metal or conductive objects, such as gauge tapes, sample containers and thermometers must not be lowered into a compartment while the compartment is being filled or immediately after pumping stops.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01]

165:25-14-27. Static protection and bonding

Before loading tank vehicles through open domes, a bonding connection must be made to the vehicle or tank before dome covers are raised and must remain in place until filling is completed and all dome covers have been closed and secured.

SUBCHAPTER 18. INSPECTIONS, NOTICES OF VIOLATION, FIELD CITATIONS, AND FORMAL ENFORCEMENT ACTIONS

PART 1. INSPECTIONS

165:25-18-1. Owner/operator cooperation

(a) Owners/operators of storage tank systems regulated by this Chapter must cooperate with inspections, monitoring, and testing requested by or conducted by PSTD.

(b) Upon the request of PSTD, owners and operators must, at all reasonable times:

- (1) Furnish information relating to the owners/operators' storage tank facilities, the contents of those facilities, and the associated equipment connected to those facilities.

- (2) Conduct monitoring or testing of storage tank facilities.
- (3) Provide PSTD access to the facility to review, inspect, and copy records relating to storage tank facilities.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 25 Ok Reg 1867, eff 7-1-08]

165:25-18-2. Authority of the Commission

PSTD has the responsibility and authority at any reasonable time to:

- (1) Enter any facility or other place where a storage tank system is located within the State.
- (2) Inspect and obtain samples of any regulated substances stored in a storage tank system at any regulated facility.
- (3) Conduct monitoring, sampling and testing of the tanks, piping, associated equipment, contents, observation well, or the environment at these facilities.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 25 Ok Reg 1867, eff 7-1-08]

165:25-18-3. Completion of inspections

All inspections, whether done by PSTD or ordered by PSTD to be conducted by the owner or operator, must be started and completed with reasonable promptness, and the results submitted to PSTD consistent with the provisions of this Chapter.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 25 Ok Reg 1867, eff 7-1-08]

165:25-18-4. Inspection for compliance

(a) All storage tank systems regulated by this Chapter must be physically inspected for compliance with the provisions of this Chapter.

(b) These inspections may include, but not necessarily be limited to, review of:

- (1) Records of installation.
- (2) Records of repair and retrofit operations including required tightness testing.
- (3) Release containment practices.
- (4) Release detection practices.
- (5) Compliance with prior Commission orders to perform corrective action.
- (6) Records of removal and closure.
- (7) Records that document compatibility with underground storage tank systems storing regulated substances greater than ten percent (10%) ethanol or twenty percent (20%) biodiesel.
- (8) Records of annual operation and maintenance tests on the electronic and mechanical components of release detection equipment.
- (9) Site assessments for groundwater or vapor monitoring
- (10) Current permit for all tanks located at the facility
- (11) Current operator training certificates for all classes of operators.

(c) In addition, PSTD may perform any other inspection, testing, or monitoring necessary to ensure compliance with this Chapter and to protect property, human health, safety and welfare and the environment.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 34 Ok Reg 935, eff 9-11-17]

PART 3. NOTICES OF VIOLATION, FIELD CITATIONS, AND FORMAL ENFORCEMENT ACTIONS

165:25-18-10. Notices of Violation, Field Citations, and Formal Enforcement Actions

The purpose of this Section is to create a procedure that allows the PSTD Fuel Specialists to issue Notices of Violation (NOVs); and for the Manager of Compliance and Inspection to issue Field Citation(s) or refer to the Commission's Judicial and Legislative Services Division for Formal Enforcement Action for any violation(s) found during PSTD Fuel Specialists' onsite inspections of storage tank systems and facilities. The issuance of a Notice of Violation or Field Citation may allow petroleum storage tank owners and operators to promptly address and correct storage tank violation(s) before a Formal Enforcement Action is initiated.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 36 Ok Reg 551, eff 8-1-19]

165:25-18-11. Notices of Violation

(a) When a PSTD Fuel Specialist finds a violation of any statute, rule, requirement or order of the Commission regarding the regulation of petroleum storage tanks, the Fuel Specialist may issue a Notice of Violation (NOV).

(1) A Notice of Violation is to alert the tank owner or operator that a violation has been found. The NOV will describe the violation and advise that further PSTD enforcement action may occur if the violation is not corrected. If the violation cannot be corrected, the violation will be referred to the PSTD Compliance and Inspection Manager or Director's designee who may initiate Formal Enforcement Action or issue a Field Citation.

(2) At PSTD's discretion, serious violations can be immediately turned over to the Commission's Judicial and Legislative Services Division for Formal Enforcement Action.

(3) The NOV must explain what the offense is and how the person can correct it.

(b) Notices of Violation will state the following information:

(1) A clear description of the violation(s).

(2) A date by which the violation(s) must be corrected.

(3) The name of the PSTD Fuel Specialist issuing the NOV, along with a telephone number and address so that the tank owner or operator can ask the PSTD Fuel Specialist questions.

(c) NOV(s) are issued to the owner/operator of the storage tank facility. If the owner/operator is not present, NOV(s) can be given to store personnel.

(d) All notifications and/or correspondence will be mailed or electronically delivered to the owner and/or operator.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 35 Ok Reg 985, eff 10-1-18; Amended at 36 Ok Reg 551, eff 8-1-19; Amended at 37 Ok Reg 1128, eff 10-1-20]

165:25-18-12. Re-inspection, Field Citation and Formal Enforcement Action

(a) On or after the date that the violation is to be corrected, a Fuel Specialist will re-inspect the storage tank facility to verify that the violation has been corrected.

(b) If the re-inspection shows that the violation has not been corrected, the Fuel Specialist may:

(1) Refer the violation to the PSTD Compliance and Inspection Manager or the Director's designee who may initiate Formal Enforcement Action or issue a Field Citation; and/or

- (2) Shut down the storage tank system pending correction of the problem or a hearing on the issue.

[Source: Added at 18 Ok Reg 2378, eff 7-1-01; Amended at 21 Ok Reg 2036, eff 7-1-04; Amended at 22 Ok Reg 1730, eff 7-1-05; Amended at 25 Ok Reg 1867, eff 7-1-08; Amended at 33 Ok Reg 604, eff 8-25-16; Amended at 36 Ok Reg 551, eff 8-1-19; Amended at 37 Ok Reg 1128, eff 10-1-20]

165:25-18-13. Issuance of a Field Citation and payment of fine or hearing

- (a) The storage tank owner/operator can either pay the amount of the fine as stated in the Field Citation or request a hearing.
- (b) The tank owner/operator will have thirty (30) days from the date the Field Citation was issued to pay the fine.
 - (1) A fine may be paid with cash, money order, check or electronic method approved by the Commission. Any cash payment must be made at the Commission's cashier window. All checks must be made payable to the Oklahoma Corporation Commission - Petroleum Storage Tank Division. If sending payment through the mail, a copy of the Field Citation must be sent with the payment to ensure proper credit.
 - (2) Payment of a fine within the thirty (30) day timeframe will not be considered an agreement or disagreement with the Field Citation.
- (c) If the storage tank owner/operator disagrees with the Field Citation, they may appear at the hearing at the Commission as provided in the Field Citation. If found in violation of PSTD rules at the time the Commission order is issued, the tank owner or operator must pay the amount of the fine, as well as an administrative cost of \$250.00.
- (d) Refusal to comply with an order of the Commission may result in an additional fine being levied after notice and hearing in an amount as allowed by law, and shutdown of the tank system for failure to pay fines.
- (e) Failure of a tank owner/operator to appear at the hearing may result in additional enforcement action.
- (f) Any exceptions to the hearing must be made in accordance with OAC 165:5.
- (g) A tank owner/operator is still responsible for following the Commission's rules regarding petroleum storage tanks regardless of paying a fine or correcting a violation.

PART 5. PENALTIES

165:25-18-19. Penalties

- (a) Pursuant to 17 O.S. § 311(A), any person who violates any of the provisions of this Chapter shall be liable for a fine not to exceed \$10,000.00 for each day that the violation continues.
- (b) If the person disagrees with the violation(s) listed in the Formal Enforcement Action, they may appear at the hearing at the Commission. If found in violation of PSTD rules at the time the Commission order is issued, the person must pay the amount of the fine, as well as an administrative cost of \$250.00.

CHAPTER 26. ABOVEGROUND STORAGE TANKS

[Authority: OKLA. CONST. art IX, §§ 18, 19; 17 O.S., §§ 306(12), 307, 322, 342, and 347; 27A O.S., §§ 1-3-101 et seq.]

[Source: Codified 7-13-93]

SUBCHAPTER 1. GENERAL PROVISIONS

PART 1. PURPOSE AND DEFINITIONS

165:26-1-1. Purpose

The purpose of this Chapter is to provide a regulatory program for the safe operation of aboveground storage tanks in Oklahoma and to prevent and contain pollution caused by leaking aboveground storage tank systems and to reduce the hazards of fire and explosion. PSTD adopts NFPA 30 and 30A, which serves as a basis for the standards in this Chapter. A copy of NFPA 30 and 30A is available for inspection at PSTD during regular business hours.

[Source: Added at 9 Ok Reg 2719, eff 7-13-92; Amended at 17 Ok Reg 2875, eff 7-15-00; Amended at 34 Ok Reg 958, eff 9-11-17]

165:26-1-2. Definitions

In addition to the terms defined in 17 O.S. §§ 301 et seq., the following words or terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"Aboveground storage tank" or **"AST"** means a "Storage tank" as defined in 17 O.S. § 303(40) that has more than ninety percent (90%) of its volume above the surface of the ground.

"Aboveground storage tank system" means a closed-plumbed system including, but not limited to, the aboveground storage tank(s), the individual storage tank compartments, the lines, the dispenser for a given product, containment sump, if any, ancillary equipment or a delivery truck that is connected to the storage tank system.

"Agent" means a person authorized by another to act on their behalf, either out of employment or contract.

"Airports" mean landing facilities for aircraft which are routinely available for public use (whether routinely used or not). Airports as used in this Chapter do not include private airstrips or private airports.

"Ancillary equipment" means any device including, but not limited to: devices, such as piping, fittings, flanges, valves, and pumps that are used to distribute, meter, or control the flow of regulated substances to or from a petroleum storage tank.

"ATG" means automatic tank gauging.

"Backfill" is the material that is placed in piping excavation to support and separate the piping from the natural environment.

"BTEX" means benzene, toluene, ethylbenzene and xylene.

"Bulk plant" means petroleum storage tank facility where regulated substances are received by tank vessels, pipelines, tank cars, or tank vehicles and are stored or blended in mass quantities or bulk for the purpose of distributing them by a tank vessel, pipeline, tank car, tank vehicle, portable tank or other container, for wholesale or retail sale.

"Cathodic protection" means a technique designed to prevent the corrosion of a metal surface by making that surface the cathode of an electrochemical cell. For example, protection can be accomplished with an impressed current system or a galvanic anode system

"Change in service" means a change in the status of a storage tank (i.e., from currently in use to temporarily out of use); or change of regulated substance that a storage tank contains.

"Commission" or **"OCC"** means the Oklahoma Corporation Commission.

"Compatible" means the ability of two (2) or more substances to maintain their respective physical properties upon contact with one another for the design life of the PST system under conditions likely to be encountered in the system.

"Corrosion expert" means an individual having the requisite knowledge, experience, certification, and training to design, install, test, and maintain corrosion protection systems.

"Emergency venting" means a construction method or device that relieves excessive internal pressure due to fire exposure.

"EPA" means the United States Environmental Protection Agency.

"Electronic signature" means an electronic signature as defined in OAC 165:5-1-3.

"Farm tank" is a tank located on a tract of land devoted to the production of crops or raising animals, including fish, and associated residences and improvements. A farm tank must be located on the farm property. "Farm" includes but is not limited to fish hatcheries, rangeland, and nurseries with growing operations.

"Fire protected tank" means an aboveground storage tank that is listed in accordance with UL 2085, *Standard for Insulated Aboveground Tanks for Flammable and Combustible Liquids*, or an equivalent test procedure that consists of a primary tank provided with protection from physical damage and fire-resistant protection from exposure to a high-intensity liquid pool fire.

"Fire resistant tank" means a UL listed aboveground storage tank that provides fire-resistant protection from exposures to a high intensity liquid pool fire.

"Fleet and Commercial" means any facility that uses aboveground storage tanks to store regulated substances for use in its own vehicles or equipment.

"Flow-through process tank" means a tank that forms an integral part of a production process through which there is a steady, variable, recurring or intermittent flow of material during the operation of the process. Flow-through process tanks do not include tanks used for the storage of materials prior to their introduction to the process or for the storage of finished products or by-products from the production process.

"Formal Enforcement Action" means the process of ensuring compliance with Commission regulations, rules, orders, requirements, standards, and/or state law when a violation occurs and PSTD initiates an enforcement Complaint under the contempt procedure in OAC 165:5 Subchapter 19 to be heard at the Commission by an Administrative Law Judge or the Commissioners.

"Impervious barrier" means a barrier of sufficient thickness, density, and composition that is impenetrable to the regulated substance, has a permeability of at least 1×10^{-6} cm/sec., and will prevent the discharge to the environment of any regulated substance for a period of at least as long as the maximum anticipated time during which the regulated substance will be in contact with the impervious material.

"Important building" means a building that is considered not expendable in an exposure fire.

"In service" means a petroleum storage tank that contains a regulated substance, and/or has a regulated substance added to or withdrawn from it.

"Licensed Environmental Consultant" means an individual who has a current license issued by PSTD to perform corrective action.

"Maintenance" means the normal operational upkeep necessary to prevent a petroleum storage tank system from releasing product.

"Marina" means any fuel storage tank system located on or by the water for the purpose of fueling watercraft.

"Mobile or Temporary Tank at Construction Site" means a fuel tank used for less than twelve (12) months at a construction site.

"Operator" means any person in control of or having responsibility for the daily operation of the storage tank system, whether by lease, contract, or other form of agreement. The term "operator" also includes a past operator at the time of a release, tank closure, violation of the Oklahoma Petroleum Storage Tank Consolidation Act, or a rule promulgated thereunder, or a requirement of the Commission. In the case of a storage tank system in service/use before November 8, 1984, but no longer in service/use on that date, the last person to operate the storage tank system immediately before the discontinuation of its service/use.

"Owner" means any person as set forth in 17 O.S. § 303(27), including the real property owner where the storage tank system is still present, the storage tank system presence is a trade fixture or improvement or both. It is not necessary that the real property owner sold, used, or stored regulated substances in, of, or from the storage tank system. However, a real property owner who has a storage tank system located on their property that was taken out of service/use prior to November 8, 1984, is not considered to be a storage tank owner for any PSTD regulated purpose.

"Permanent out of use" or "POU" means a petroleum storage tank system that is not in service/use, does not contain regulated substances, and is not intended to be placed back in service/use.

"Pier" means dock, floating dock, and wharf.

"Positive sampling, testing, or monitoring results" means the results of sampling, testing or monitoring using any of the release detection methods described in this Chapter that indicate that a release from a petroleum storage tank

system may have occurred.

"Private airport" means an airport used only by its owner and regulated as a fleet and commercial facility.

"Private airstrip" means a personal residential takeoff and landing facility attached to the airstrip owner's residential property and used only by the owner.

"PSTD" means Petroleum Storage Tank Division.

"Public Utility" means any entity providing gas, electricity, water, or telecommunication services for public use.

"Recalcitrant owner" means an owner/operator who is responsible for a tank system and after notice will not adhere to a PSTD enabling statute, Commission rule, requirement or order.

"Regulated substances" means antifreeze, motor oil, motor fuel, gasoline, kerosene, diesel or aviation fuel as set forth in 17 O.S. § 305. It does not include compressed natural gas, liquid natural gas or propane.

"Release detection" means the methodology used in determining whether a release of regulated substances has occurred from a petroleum storage tank system into the environment or into the interstitial area between the storage tank system and its secondary barrier.

"Residential tank" is a tank located on real property used primarily for dwelling purposes.

"Retail facility" means a service station, convenience store or any other facility selling a PSTD regulated substance that is open to the general public.

"Sacrificial anode" means a device to reduce or prevent corrosion of a metal in an electrolyte by galvanic coupling to a more anodic metal.

"Secondary containment" means a system installed around a petroleum storage tank or system that is designed to prevent a release from migrating beyond the secondary containment system outer wall (in the case of a double-walled tank system) or excavation area (in the case of a liner or vault system) before the release can be detected. Such a system may include, but is not limited to, impervious barriers (both natural and synthetic), double walls, or vaults.

"TPH" means total petroleum hydrocarbons.

"Tampering" means willful intention in an attempt to deceive, cheat or misrepresent facts to the public. Tampering also presents a risk to the environment as well as public health, safety, and welfare.

"Tank tightness testing" or **"precision testing"** means a procedure for testing a petroleum storage tank system's integrity.

"Temporary out of use" or **"TOU"** means the status of a petroleum storage tank system that has been taken out of service/use with the intent to permanently close or return to service.

"Total venting capacity" means the sum of the normal and emergency vent capacities and is determined by the wetted area of the tank as provided in Appendix I.

"Used Motor Oil" is any spent motor oil removed from a motor vehicle.

"Vault" means an enclosure consisting of four (4) walls, a floor, and a top for the purpose of containing a liquid storage tank and not intended to be occupied by personnel other than for inspection, repair, or maintenance of the vault, the storage tank or related equipment.

"Wetted area of cylindrical tank" means seventy-five percent (75%) of the total exposed area of the tank ends and shell.

"Wetted area of rectangular tank" means one hundred percent (100%) of the surface area of the bottom, sides, and ends of the tank.

"Wetted area of vertical tank" means the first thirty feet (30') above grade of the exposed shell and floor.

PART 3. SCOPE OF RULES

165:26-1-21. Overview of applicability

This Chapter will apply to owners, operators, their employees and agents of aboveground storage tanks which PSTD is authorized to regulate pursuant to 27A O.S. (Supp. 1999) § 1-3-101 (E) (5) (b) and 17 O.S. §§ 301 et seq., which gives PSTD the responsibility of regulating aboveground storage tanks that contain regulated substances, including but not limited to, tanks from which these materials are dispensed into vehicles, or tanks used in wholesale or bulk distribution activities, as well as pumps, hoses, dispensers, and other ancillary equipment associated with the tanks, or the transport truck attached to it, whether above the ground or below. PSTD references the National Fire Protection Association 30 and 30A, Standard Number 30, 2018, "Flammable and Combustible Liquids Code" and Standard Number 30A, 2018, "Automotive and Marine Service Station Code". New editions of NFPA 30 and NFPA 30A supersede all previous editions.

[Source: Added at 9 Ok Reg 2719, eff 7-13-92; Amended at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-1-22. Exclusions

(a) The following classes of aboveground storage tanks or systems are specifically excluded from all provisions of this Chapter:

- (1) All tanks used in the exploration or production of oil and gas, including well service equipment and natural gas compression equipment.
- (2) All mobile or temporary tanks used at construction sites.
- (3) All farm and ranch tanks.
- (4) All tanks used by public utilities in the generation of electric power for public use.
- (5) All tanks used by manufacturers in the production of goods.
- (6) Emergency generator tanks.
- (7) All tanks that contain motor oil, used motor oil or antifreeze located at retail motor vehicle lubrication facilities or automotive service centers.
- (8) Tanks used for storing heating oil for consumptive use on the premises where stored.

(b) These exclusions do not extend to permanently located fuel storage tanks used to fuel company vehicles, even though the vehicles may be driven to production or construction sites.

PART 4. ADMINISTRATIVE PROVISIONS

165:26-1-25.1. Citation of rules

This Chapter will be known as the Oklahoma Corporation Commission's General Rules and Regulations Governing Aboveground Storage Tanks and are to be cited as Chapter 26 of Commission rules.

[Source: Renumbered from 165:26-1-23 at 23 Ok Reg 2297, eff 7-1-06; Amended at 32 Ok Reg 794, eff 8-27-15]

165:26-1-26. Hearings, orders and exceptions

(a) The Commission will issue orders after notice and hearing as necessary to enforce the provisions of this Chapter or PSTD enabling statutes to protect property, the public health and safety, and the environment.

(b) Hearings to enforce or exceptions to the provisions of this Chapter or PSTD enabling statutes will be conducted in accordance with OAC 165:5.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 37 Ok Reg 1143, eff 10-1-20]

165:26-1-26.1. Public participation

PSTD shall provide for public participation in the enforcement process by:

- (1) Providing notice and opportunity for public comment on all proposed settlements of civil enforcement actions (except where immediate action is necessary to adequately protect human health and the environment);
- (2) Investigating and providing responses to citizen complaints about violations;
- (3) Not opposing citizen intervention when permissive intervention is allowed by statute, rule or regulation; and
- (4) PSTD hearings are open to the public and interested parties are encouraged to attend.

PART 5. STANDARDS AND CODES

165:26-1-31.¹ Codes and standards

(a) Specific references to documents listed below are made throughout the Aboveground Storage Tank Rules. Each of these documents or parts thereof is adopted and incorporated by reference as a standard. In the event these rules are in conflict with any of the standards set forth below, the provisions of these rules shall prevail. New editions of codes and standards supersede all previous editions. These codes and standards will be updated periodically through a formal rulemaking procedure initiated by PSTD to reflect any substantive or relevant changes. A copy is available for inspection at the Offices of the Petroleum Storage Tank Division during regular business hours.

(1) American National Standards Institute (ANSI) Standards: American Society of Mechanical Engineers (ASME):

(A) ASME B31.3 2016, "Process Piping."

(B) ASME B31.4- 2016, "Pipeline Transportation Systems for Liquids and Slurries."

(2) American Petroleum Institute (API) Standards:

(A) API RP 652, "Lining of Aboveground Petroleum Storage Tank Bottoms," Second Edition, April, 2014.

(B) API 1628 SET, "A Guide to the Assessment and Remediation of Underground Petroleum Releases."

(C) API 653, "Tank Inspection, Repair, Alteration, and Reconstruction, 2018."

(3) American Society for Testing and Materials (ASTM) Standards: ASTM E1739-95 (2015), "Standard Guide for Risk-Based Corrective Action Applied at Petroleum Release Sites."

- (4) National Association of Corrosion Engineers (NACE) Standards: NACE SP0169-2013, "Control of External Corrosion on Underground or Submerged Metallic Piping Systems."
- (5) National Fire Protection Association (NFPA) Standards:
 - (A) Standard Number 30, 2018, "Flammable and Combustible Liquids Code."
 - (B) Standard Number 30A, 2018, "Motor Fuel Dispensing Facilities and Repair Garages."
- (6) Underwriter's Laboratory (UL) Standards:
 - (A) Standard UL142, 2006, "Steel Aboveground Tanks for Flammable and Combustible Liquids."
 - (B) Standard UL842, 2015, "Valves for Flammable Fluids."
 - (C) Standard UL971, 2011, "Nonmetallic Underground Piping for Flammable Liquids."
- (7) Petroleum Equipment Institute: Publication PEI/RP 200-13, "Recommended Practices for Installation of Aboveground Storage Systems for Motor Vehicle Fueling." (2013 Edition)
- (8) "Spill Prevention, Control and Countermeasure Regulation," 40 CFR 112

(b) The standards set forth in (a) of this Section are also available from the following sources:

[Source: Added at 9 Ok Reg 3739, eff 8-27-92; Amended at 12 Ok Reg 2057, eff 7-1-95; Amended at 14 Ok Reg 2515, eff 7-1-97; Amended at 15 Ok Reg 3020, eff 7-15-98; Amended at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 26 Ok Reg 1831, eff 7-1-09; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 34 Ok Reg 958, eff 9-11-17; Amended at 36 Ok Reg 576, eff 8-1-19]

EDITOR'S NOTE: *In 2006, the agency promulgated a new rule called "Consultation of Petroleum Storage Tank Division" at this Section number (165:26-1-31) in Chapter 26 [See 23 Ok Reg 2260, effective 7-1-06], creating a duplication in numbering. However, the new rule was promulgated in a Chapter 25 rulemaking action rather than a Chapter 26 action. To correct this scrivener's error and to avoid a duplication in numbering, the rule was editorially renumbered to an unused Section number in Chapter 25 (165:25-1-30.1) prior to codification.*

165:26-1-32. Other standards and regulations [REVOKED]

[Source: Renumbered from 165:26-1-24 at 23 Ok Reg 2297, eff 7-1-06; Revoked at 25 Ok Reg 2187, eff 7-11-08]

165:26-1-33. Local jurisdiction

Local jurisdictions, including but not limited to municipalities or rural fire districts, are allowed to adopt their own codes regarding aboveground storage tanks as long as they do not conflict with and are at least as stringent as the state's rules. Some local jurisdictions may prohibit aboveground storage tanks through zoning and/or ordinances.

[Source: Renumbered from 165:26-1-25 at 23 Ok Reg 2297, eff 7-1-06]

PART 6. FINANCIAL RESPONSIBILITY

165:26-1-36. Financial responsibility

- (a) This Subchapter applies to owners and operators of all petroleum aboveground storage tank (AST) systems except as otherwise provided in this Section.
- (b) Federal government entities whose debts and liabilities are the debts and liabilities of the United States are exempt from the requirements of this Subchapter.
- (c) The requirements of this Subchapter do not apply to owners and operators of any AST system described in 165:26-1-22, "Exclusions."
- (d) If the owner and operator of a petroleum aboveground storage tank are separate persons, only one person is required to demonstrate financial responsibility; however, both parties are liable in the event of noncompliance.
- (e) An owner or operator may satisfy the requirements of this Subchapter by use of the Oklahoma Petroleum Storage Tank Indemnity Fund (ref: Okla. Stat. Title 17 § 327.3). There is a co-pay for use of this mechanism. Compliance may also be satisfied by use of any of the mechanisms listed in 165:26-1-37.

[Source: Renumbered from 165:26-18-1 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 34 Ok Reg 958, eff 9-11-17; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-1-37. Evidence of financial responsibility

Owners and operators of AST systems will provide evidence of financial responsibility through the mechanisms set forth below, or any other mechanism that is pre-approved by the Division Director of the PSTD:

- (1) Self insurance
- (2) Guarantee
- (3) Insurance
- (4) Surety bond
- (5) Letter of Credit
- (6) Trust fund or standby trust fund
- (7) Securities pledge
- (8) Cash or cash equivalent pledge

[Source: Renumbered from 165:26-18-3 at 23 Ok Reg 2297, eff 7-1-06]

PART 7. NOTIFICATION AND REPORTING REQUIREMENTS

165:26-1-41. General reporting requirements

PSTD requires owners and/or operators of aboveground storage tank systems to provide information it deems necessary for the protection of human health, the environment and to assure the safety of people and property. Owners and operators must notify PSTD within thirty (30) days when their mailing address changes or when the status of the aboveground storage tank system changes. Use of the designated PSTD online format is required for reporting, scheduling, tank registration, change in ownership, thirty (30) day release detection, testing, temporary change in service, permanent closure, or return to service. Owners and operators of aboveground storage tanks must notify PSTD at least thirty (30) days prior to switching regulated substances containing greater than ten percent (10%) ethanol or twenty percent (20%) biodiesel in the online format established by PSTD. Required release detection forms are available on the Commission website. Failure to notify and/or submit PSTD paperwork in the online format established by PSTD within the timeframe required may result in an enforcement action.

[Source: Added at 9 Ok Reg 2719, eff 7-13-92; Amended at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 34 Ok Reg 958, eff 9-11-17; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 36 Ok Reg 576, eff 8-1-19; Amended at 37 Ok Reg 1143, eff 10-1-20]

165:26-1-42. New tank systems

(a) Persons intending to install a new aboveground storage tank and/or new aboveground or underground piping must give PSTD notification of the installation at least forty-eight (48) hours before the tank and/or lines are to be installed in the online format established by PSTD and receiving confirmation of the scheduled installation and the Temporary Authorization for Receipt of Fuel from PSTD. If events require the owner to change the date of installation, the Division should be given forty-eight (48) hours notice of the new date. Any storage tank system permanent removal or a removal associated with replacement of tanks or lines requires at least fourteen (14) day notification prior to the removal activity.

(b) After the tank installation is complete, the PSTD registration must be submitted to PSTD in the online format established by PSTD along with copies of required installation testing, photographs of the tank and piping system components before they are covered, an as-built drawing of the entire tank system, and manufacturer installation checklists within thirty (30) days. The tank owner and the AST Licensee are both responsible for timely submittal of all installation paperwork. The registration must be approved and tank fees paid in order to receive a tank permit to dispense fuel. No regulated storage tank system can be operated without a valid permit from the Corporation Commission.

(c) Owners and AST Licensees must certify on the PSTD Registration that the installation of tanks and piping meet the requirements of this Chapter. A PSTD Certification of Installation Inspection Form may also be submitted to satisfy certification of tank and piping installation.

[Source: Added at 9 Ok Reg 2719, eff 7-13-92; Amended at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 26 Ok Reg 1831, eff 7-1-09; Amended at 31 Ok Reg 1010, eff 9-12-14; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 36 Ok Reg 576, eff 8-1-19; Amended at 37 Ok Reg 1143, eff 10-1-20]

[Source: Added at 9 Ok Reg 2719, eff 7-13-92; Revoked at 17 Ok Reg 2875, eff 7-15-00]

165:26-1-44. Tank closure or change in service

Owners of aboveground storage tank systems must notify PSTD at least fourteen (14) days prior to the removal of the aboveground storage tanks and/or lines by submitting the PSTD scheduling form and receiving confirmation of the scheduled removal from PSTD. If events require the owner to change the date of removal, the Division should be given forty-eight (48) hours notice of the new date. An authorized agent of PSTD may be present to observe the removal operations and to inspect the closed tank system and the surrounding environment. Any company that removes aboveground storage tank systems must have an AST Licensee on the jobsite during removal. All UST's currently being used as AST's must be destroyed upon closure. A certificate of destruction must be included with the AST Closure Report and submitted to PSTD within forty-five (45) days of closure.

[Source: Added at 9 Ok Reg 2719, eff 7-13-92; Amended at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 35 Ok Reg 1010, eff 10-1-18]

165:26-1-45. Releases [REVOKED]

[Source: Added at 9 Ok Reg 2719, eff 7-13-92; Revoked at 17 Ok Reg 2875, eff 7-15-00]

165:26-1-46. Corrective action [REVOKED]

[Source: Added at 9 Ok Reg 2719, eff 7-13-92; Revoked at 17 Ok Reg 2875, eff 7-15-00]

165:26-1-47. Transfer of ownership

When the owner of an aboveground storage tank transfers ownership of the facility or tank to another person, the new owner must notify the Commission within thirty (30) days of the transfer. The notice must specify at a minimum, the name of the new owner, the location of the facility and the date of the transfer of ownership. In addition, the former owner must advise PSTD of the name and address of the new owner. All records required by PSTD must be transferred at no cost to the new owner. Owners and operators must notify PSTD within thirty (30) days when their mailing address changes.

[Source: Added at 9 Ok Reg 2719, eff 7-13-92; Amended at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 35 Ok Reg 1010, eff 10-1-18]

165:26-1-48. Tank and line tightness testing

- (a) Tank and line tightness test results in which any part of the tank system tested does not pass must be reported to PSTD within twenty-four (24) hours by the owner, operator, their employees or agents, and also independently by the person or company performing the test. Complete test results must be submitted within seven (7) days of the testing.
- (b) Hydrostatic line tightness tests must be conducted by a certified tester, if applicable, in accordance with manufacturer's instructions, and reported on the required PSTD form.
- (c) The tester performing line and leak detector tests must certify that the line leak detector is installed properly.
- (d) All personnel performing tank and line testing must have the required education, experience, applicable certification, knowledge and competence to correctly perform testing services in accordance with the testing equipment, manufacturer certification and applicable industry standards or codes.
- (e) Tank and line tightness testing must be scheduled by submitting the PSTD scheduling form and PSTD staff may be present.

PART 9. RECORDKEEPING

165:26-1-55. Availability of records

- (a) Owners and operators of regulated aboveground storage tank systems must cooperate with PSTD requests for submission of inventory and monitoring records. All leak detection records, including sampling, testing, inventory and monitoring records must be available for each tank for at least the preceding twelve months. Copies of all records required pursuant to this Chapter must be kept at the facility and available for immediate inspection by the PSTD Fuel Specialist or be readily available upon request.
- (b) Failure to have the required records available when requested by PSTD may result in an enforcement action.
- (c) Release detection records must be maintained for a minimum of three (3) years on forms specified by PSTD.
- (d) When a change in an owner or operator of a petroleum storage tank system occurs, all records required by PSTD must be transferred at no cost to the new owner or operator.
- (e) Each owner/operator must provide written notice of any address change within 30 days to the PSTD office.

[Source: Renumbered from 165:26-3-11 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 26 Ok Reg 1831, eff 7-1-09; Amended at 34 Ok Reg 958, eff 9-11-17]

165:26-1-56. Repair records

Owners and operators of regulated aboveground storage tank systems must maintain records that identify the location and nature of the repair, as follows:

- (1) Tank system repairs meant to restore a tank, pipe, spill prevention equipment, overfill prevention equipment, corrosion protection equipment, release detection equipment or other AST system component that has caused a release or a suspected release of product from the AST system or has failed to function properly must be scheduled using the OCC scheduling form.
- (2) These records shall include a complete description of all repairs made, photographs before and after repair, sample results if required, an updated site map, and testing following repairs.
- (3) The records must be readily available at the facility, submitted to PSTD within thirty (30) days of repair completion, and kept for the remaining operating life of the storage tank system.
- (4) Requirements of this Section do not apply to routine and minor maintenance activities related to the tank and piping system or dispensers.

[Source: Renumbered from 165:26-3-12 at 23 Ok Reg 2297, eff 7-1-06; Amended at 30 Ok Reg 586, eff 7-1-13; Amended at 35 Ok Reg 1010, eff 10-1-18]

165:26-1-57. Tank installation, closure and removal records

- (a) Owners and operators of aboveground storage tank systems must maintain records regarding the installation for the lifetime of the system; or, at the owner's option, give copies of installation records to PSTD for retention in the Division's files. Owners who have purchased systems must maintain the installation

information if it is available.

(b) Owners and operators of aboveground storage tank systems must maintain records capable of demonstrating compliance with the closure and removal requirements for tanks that are temporarily taken out of service or permanently removed at operating facilities.

(c) The owner, operator or Commission licensee hired by the owner and/or operator must submit the PSTD Closure Report Form and all required attachments to PSTD within forty-five (45) days from the date the tanks are permanently closed.

[Source: Renumbered from 165:26-3-13 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 26 Ok Reg 1831, eff 7-1-09; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-1-58. Release detection and corrosion protection records

(a) Owners and operators of regulated aboveground storage tank systems must maintain release detection records for a minimum of three (3) years.

(b) Owners and operators of regulated aboveground storage tank systems who use cathodic protection ("CP") must maintain the following records:

(1) Original cathodic protection design created in accordance with National Association of Corrosion Engineers (NACE) recommended practices with drawings depicting all of the CP system components and a description of the materials used.

(2) Suitability study performed to determine if a tank could be upgraded with corrosion protection.

(3) Rectifier readings for impressed current systems conducted at least every 60 days.

(4) Results of the last three inspections or CP system tests completed by a corrosion tester.

[Source: Renumbered from 165:26-3-14 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 34 Ok Reg 958, eff 9-11-17]

165:26-1-59. Spill and overflow records

Owners and operators of aboveground storage tank systems must keep records of spills and overfills for review and inspection by PSTD for a period of 3 years.

[Source: Renumbered from 165:26-3-15 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-1-60. Piping records

Tank owners must maintain a current map of their underground piping if that information is available to them and update it within 30 days of any changes.

[Source: Renumbered from 165:26-3-16 at 23 Ok Reg 2297, eff 7-1-06]

165:26-1-61. Inventory records [REVOKED]

PART 11. FEES

165:26-1-70. Fees

This Chapter requires fees according to the schedule set out in Chapter 5 of Commission rules.

[Source: Renumbered from 165:26-1-30.4 at 23 Ok Reg 2297, eff 7-1-06; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 35 Ok Reg 1010, eff 10-1-18]

PART 13. SHUTDOWN OF OPERATIONS

165:26-1-90. Shutdown of operations

(a) PSTD may close (shut down) a system:

- (1) If the system poses an imminent threat to health, safety, or the environment.
- (2) If the owner or operator is operating tanks for which permit fees have not been paid.
- (3) If the owner or operator fails to comply with a Commission requirement or order.
- (4) For failure to properly install, operate and/or maintain leak detection, spill, overfill, or corrosion equipment if the owner/operator has been issued a written Notice of Violation ("NOV") and has failed to correct the problem.
- (5) Failure to protect a buried metal flexible connector from corrosion if the owner/operator has been issued a written Notice of Violation ("NOV") and has failed to correct the problem.
- (6) Failure to perform, maintain, have readily available or present records for the previous twelve (12) thirty (30) day periods.
- (7) Tampering with equipment.
- (8) If a Fuel Specialist issues a Notice of Violation ("NOV") and the violation(s) is not corrected.

(b) PSTD must close (shut down) a system:

- (1) If required spill prevention equipment is not installed.
- (2) If required overfill protection equipment is not installed.
- (3) If required leak detection equipment is not installed.
- (4) If required corrosion equipment is not installed.
- (5) If two inches (2") or more of water is found in the tank where conventional gasoline or diesel fuel is stored and if one-half inch (1/2") or more of water is found in the tank of gasoline blended with alcohols, E85 fuel ethanol, or diesel blended with biodiesel.
- (6) If meter is found to be off in calibration by more than minus fifteen (-15) cubic inches per every five (5) gallons.

(c) Only PSTD designated employees have the authority to lock or seal dispensers and/or fill pipes of any system violating subsection (a) or (b) of this Section. The PSTD employee must explain in writing to the owner or operator the reason the AST system is being locked or sealed.

(d) The PSTD "Out of Order" tag attached to each fill pipe of the tank(s) in violation shall serve to clearly identify the tank(s) as ineligible for delivery, deposit, or acceptance of product. Tank owners/operators and product deliverers are responsible for ensuring that product is not delivered into the tagged tank(s).

(e) Any person who removes a lock or seal without permission from PSTD will be subject to penalties imposed by this Chapter, or formal enforcement proceedings.

(f) Upon confirmation that the AST system no longer poses an imminent threat to health, safety, or the environment, the owner and/or operator of the facility is in compliance with PSTD rules, permit fees paid, violation(s) corrected, or Commission order requirements satisfied, the authority to remove a lock or seal by the owner or operator may be obtained as follows:

- (1) Written permission from the PSTD employee who placed the lock or seal on the device; coupled with written confirmation to PSTD by the person removing the lock or seal; or

- (2) Verbal or written permission from the Director or Director's designee; or
 - (3) Application to and order of the Commission.
- (g) If a facility is closed under the provisions of this Section, the owner or operator of the facility will be afforded a hearing within ten (10) days of receipt by PSTD of the owner's or operator's application for a hearing.

PART 15. LICENSING PROCEDURES

165:26-1-110. Licensing procedure for AST Licensee

- (a) Any individual who would like to become an AST Licensee must:
- (1) Complete an application form.
 - (2) Provide sufficient proof of two (2) years' related work experience, and of active participation in the completion of three (3) aboveground storage tank handling activities, two (2) of which must be installations.
 - (3) Pass an examination approved by PSTD.
 - (4) Pay fees for applications, examinations, and licensing prior to examination and license issuance as set forth in OAC 165:5.
 - (5) Certify that they will comply with all PSTD rules and requirements for aboveground storage tanks, and applicable Occupational Safety and Health Administration (OSHA) 29 CFR 1910.120 Hazardous Waste Operations and Emergency Response (HAZWOPER) standards.
- (b) All examinations and licensing procedures must be completed within one (1) year of approval of the application. Failure to complete will result in forfeiture of fees and will require a new application and appropriate fees.
- (c) Continuing education is required to maintain an AST license; this consists of four (4) hours of continuing education through a Commission approved program every year. Licensees may request to rollover a maximum of four (4) credit hours from the current year to satisfy the following year's continuing education requirements. Approval of any rollover hours will be at the discretion of PSTD after evaluating the class, course, or seminar.
- (d) Any person who holds an AST license may install or remove AST systems.

[Source: Renumbered from 165:26-1-30.3 at 25 Ok Reg 2187, eff 7-11-08; Amended at 30 Ok Reg 586, eff 7-1-13; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-1-111. Licensee disciplinary action procedure

A license issued by PSTD is a designation of competence to the public in the area of licensee expertise. PSTD is not limited to, but may use the following disciplinary action for PSTD licensees:

- (1) **Informal reprimand.** The Manager of the appropriate PSTD department will call offending licensee for an informal discussion addressing the recent infraction and place a memo in the licensee's file documenting the discussion and nature of the violation.
- (2) **Formal reprimand.** The Manager of the appropriate PSTD department will prepare a letter of reprimand to the licensee addressing the offense. The letter of reprimand will provide the licensee an opportunity to formally dispute alleged violation(s). The reprimand letter, licensee's response, all recourse actions following licensee rebuttal, if any, and the Manager's final decision(s) will be placed in the licensee's file and maintained by PSTD.

(3) **License suspension, revocation and/or refusal to renew a license.** If the Director elects to pursue suspension, revocation, or refusal to renew, a notice of such action will be sent to the licensee by certified mail/return receipt requested. The notice will state the date and time of the hearing scheduled before an Administrative Law Judge.

[Source: Added at 36 Ok Reg 576, eff 8-1-19]

165:26-1-113. License penalties

(a) PSTD shall have the responsibility to deny, suspend, refuse to renew or revoke the license of, or reprimand, any licensee who is found in violation of:

- (1) The practice of any fraud or deceit in obtaining a license or in performing work pursuant to this Chapter.
- (2) Any gross negligence, incompetence or misconduct in installation work performed pursuant to this Chapter.
- (3) Knowingly making false statements or signing false statements, certificates or affidavits to PSTD or to clients.
- (4) Aiding or assisting another person in violating any provision of this Chapter.
- (5) Signing a verification statement for work performed pursuant to this Chapter which was not performed by the aboveground storage tank licensee.
- (6) Engaging in dishonorable, unethical or unprofessional conduct of a character likely to deceive, defraud or harm a customer or the public.
- (7) Failure to comply with this Chapter, OAC 165:25, 165:26, 165:27, 165:29, and/or the Oklahoma Petroleum Storage Tank Consolidation Act (17 O.S. §§ 301 et seq.) may result in PSTD seeking a suspension and/or revocation of the license.
- (8) Being under indictment or convicted of a felony for any criminal offense that impacts their obligation to PSTD.

(b) Failure to submit Commission required paperwork, test results, and reports in the online format established by PSTD within the required timeframe may result in enforcement action.

(c) Disciplinary action levels against PSTD licensees include but are not limited to informal reprimand, formal reprimand, license suspension, license revocation and refusal to renew.

(d) Any licensee in violation of Commission enabling statutes, PSTD rules, requirements and/or Commission orders may be subject to disciplinary action levels mentioned above and/or fines assessed by the Commission after notice and hearing.

PART 17. OPERATOR TRAINING [REVOKED]

165:26-1-130. Training requirements [REVOKED]

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Revoked at 34 Ok Reg 958, eff 9-11-17]

165:26-1-132. Operator Class designations [REVOKED]

[Source: Added at 25 Ok Reg 2187, eff 7-11-08; Revoked at 34 Ok Reg 958, eff 9-11-17]

SUBCHAPTER 2. GENERAL REQUIREMENTS FOR ABOVEGROUND STORAGE TANK SYSTEMS

PART 1. DESIGN AND INSTALLATION

165:26-2-1. Approved tanks, tank design [RENUMBERED]

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Renumbered to 165:26-2-1.3 at 23 Ok Reg 2297, eff 7-1-06]

165:26-2-1.1. Aboveground storage tank installation

All tanks, piping, and associated equipment used in conjunction with an AST installation shall be installed by personnel possessing appropriate skills, experience, applicable certification, and required PSTD license to complete the installation in accordance with recognized industry standards and this Chapter. An AST Licensee must be present at all times during the installation. The PSTD Fuel Specialist monitoring the installation must be contacted before underground piping is backfilled so piping and sump tests may be observed and/or inspected. Photos of the installation of tank(s) and line(s) must accompany a completed registration form within thirty (30) days of installation and tank fees must be paid before a permit is issued.

[Source: Added at 23 Ok Reg 144, eff 10-6-05 (emergency); Added at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 35 Ok Reg 1010, eff 10-1-18]

165:26-2-1.2. Compatibility [REVOKED]

[Source: Renumbered from 165:26-2-172 at 23 Ok Reg 2297, eff 7-1-06; Revoked at 25 Ok Reg 2187, eff 7-11-08]

165:26-2-1.3. Approved tanks, tank design

- (a) The material and construction of the tank must be compatible with the material stored and the conditions of storage such as pressure and temperature.
- (b) Underground tanks installed for aboveground use prior to July 1, 2007 may be used if installed inside secondary containment.
- (c) Only tanks designed for aboveground use may be installed aboveground after July 1, 2007.
- (d) Product lines must be installed above the maximum liquid level except for vertical tanks may have bottom openings if installed inside concrete secondary containment and meet all other general provisions in accordance with this Chapter.

[Source: Renumbered from 165:26-2-1 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 26 Ok Reg 1831, eff 7-1-09; Amended at 35 Ok Reg 1010, eff 10-1-18]

165:26-2-2. Emergency pressure release [REVOKED]

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Revoked at 25 Ok Reg 2187, eff 7-11-08]

165:26-2-3. Aboveground storage tank spacing

Spacing (shell to shell) between any two adjacent aboveground tanks for tanks storing Class I, II, or IIIA stable liquids must be according to the standards in NFPA 30. The minimum distance between tanks shall be no less than 3 feet. Variances can be made by PSTD for pre-existing facilities where deviation from these rules does not pose a serious hazard to people or property.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 37 Ok Reg 1143, eff 10-1-20]

165:26-2-4. Distance to be kept around tanks

(a) The following distances, at a minimum, must be kept around aboveground storage tanks.

- (1) 50 ft (15 meters) from the nearest important building as defined by this Chapter;
- (2) 50 ft (15 meters) from any fuel dispenser;
- (3) 50 ft (15 meters) from the nearest side of a public way; and
- (4) 100 ft (30 meters) from any property line that is or might be built upon, including the opposite side of a public way.

(b) The distances as set forth in (a) of this may be reduced by 50 percent if the tanks are fire-resistant. The distances as set forth in (a) may be further reduced if the tanks are a fire-protected tank or tanks in vaults as per NFPA 30A-4.3.2.4.

(c) A variance may be granted for pre-existing facilities where compliance would be difficult and expensive and the current distances between tanks, property lines or dispensers pose no serious threat to people or property.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 36 Ok Reg 576, eff 8-1-19; Amended at 37 Ok Reg 1143, eff 10-1-20]

165:26-2-5. Requirements on fill pipes

(a) Each fill pipe must be identified by a tag or other marking to identify the product for which the tank is used. The marking must be maintained in legible condition throughout the life of the tank. Color-coding may also be used in addition to marking.

(b) If the fill pipe is located within the containment dike a spill bucket is not required.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-2-5.1. General spill and overflow prevention requirements

(a) Owners and operators of aboveground storage tank systems, their employees or agents, as well as those who transport regulated substances to these systems must do everything reasonably possible to ensure that releases due to spilling and overfilling do not occur.

(b) Tanks with a fill pipe must be filled through a liquid tight connection mounted inside at least a five (5) gallon spill container. A spill bucket is not required if the fill pipe is located within an impervious containment dike. Where an aboveground tank is filled by means of fixed piping, either a check valve and shutoff valve with a quick-connect coupling or a check valve with a dry-break coupling shall be installed in the piping at a point where connection and disconnection is made inside the spill containment between the tank and the delivery vehicle. This device shall be protected from tampering and physical damage. Tampering with equipment is prohibited. Any violation of this section may result in fines, enforcement action and/or shutdown of operations.

(c) For existing aboveground storage tank systems installed before October 13, 2018, any one of the following methods must be used to prevent overfilling.

- (1) High liquid level alarms with an audible or visual signal that alerts personnel when the tank reaches ninety percent (90%) capacity at a constantly attended operation or surveillance station.

- (2) High liquid level pump cutoff devices set to stop flow at a predetermined container content level.
 - (3) Direct audible or code signal communication between the tank gauger and the pumping station.
 - (4) A fast response system for determining the liquid level of each bulk storage container such as digital computers, telepulse, or direct vision gauges. If this alternative is used a second person must be present to monitor gauges and the overall filling of the tank.
- (d) For installations after October 13, 2018, a fill valve which automatically stops delivery of liquid when the tank reaches ninety-five percent (95%) capacity in addition to one of the following methods must be used to prevent overfilling.
- (1) High liquid level alarms with an audible or visual signal that alerts personnel when tank reaches ninety percent (90%) capacity at a constantly attended operation or surveillance station.
 - (2) Direct audible or code signal communication between the tank gauger and the pumping station.
 - (3) A fast response system for determining the liquid level of each bulk storage container such as digital computers, telepulse, or direct vision gauges. If this alternative is used, a second person must be present to monitor gauges and the overall filling of the tank.
- (e) Liquid level sensing devices must be tested at least annually to ensure proper operation.
- (f) Means shall be provided for determining the liquid level in each tank and this means shall be accessible to the delivery operator. Tank filling shall not begin until the delivery operator has determined that the tank has sufficient available capacity (ullage).

[Source: Amended and renumbered from 165:26-3-21 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 34 Ok Reg 958, eff 9-11-17; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 36 Ok Reg 576, eff 8-1-19; Amended at 37 Ok Reg 1143, eff 10-1-20]

165:26-2-6. Vent piping requirements

- (a) For installations after October 13, 2018, each tank and each compartment of a compartment tank shall have both normal and emergency venting. The vent opening shall be in addition to the fill, withdrawal, and liquid level gauge opening.
- (b) Normal vents must be sized in accordance with either:
- (1) UL new tank manufacturing standards
 - (2) API new tank manufacturing standards
 - (3) API 2000, Venting Atmospheric and Low-Pressure Storage Tanks, or
 - (4) Other accepted standards; or
 - (5) Must be at least as large as the filling or withdrawal connection, whichever is larger, but in no case less than 1 1/4 in. (7 centimeters) nominal inside diameter.
- (c) Emergency vents must be sized in accordance with either:
- (1) UL new manufacturing standards
 - (2) API new tank manufacturing standards
 - (3) API 2000, Venting Atmospheric and Low-Pressure Storage Tanks, or
 - (4) Appendix I, or
 - (5) Other accepted standards.
- (d) Where vent pipe outlets for tanks storing Class I liquids are adjacent to buildings or public ways, they must be located so that the vapors are released at a safe point outside of buildings and not less than 12 ft. (3.6 meters) above the

adjacent ground level.

(e) In order to aid in dispersion, vapors must be discharged upward. Vent outlets must be located so that flammable vapors will not be trapped by eaves or other obstructions and be at least 5 ft. (1.5 meters) from building openings.

(f) Vent pipes that are provided for normal tank venting must extend at least 12 ft. (3.6 meters) above ground level or 5 ft. above the roof line at the highest point of attachment.

(g) Total venting capacity must be sized in accordance with:

- (1) UL new manufacturing standards
- (2) API new manufacturing standards
- (3) Wetted area calculations per tank design, and
- (4) Appendix I, or
- (5) Other approved method.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 34 Ok Reg 958, eff 9-11-17]

165:26-2-7. Collision barriers

(a) Aboveground storage tanks exposed to traffic must be resistant to damage from the impact of a motor vehicle by suitable collision barriers. The secondary containment dike may serve as a collision barrier provided that it cannot be penetrated by a motor vehicle.

(b) When guard posts or collision barriers are installed, the following design shall be acceptable:

- (1) They shall be constructed of steel not less than 4 in. (100 millimeters) in diameter and shall be filled with concrete.
- (2) They shall be spaced not more than 4 ft. (1.2 meters) on center.
- (3) They shall be set not less than 3 ft (0.9 meters) deep in a concrete footing of not less than 15-in. (380 millimeters) diameter.
- (4) They shall not be less than three feet (3') above grade and concrete barriers not less than thirty-two inches (32") above grade.
- (5) They shall not be less than five feet (5') from the tank shell.

(c) Dispensing devices, except those attached to containers, must either be mounted on a concrete island or otherwise protected against collision damage by suitable means and must be securely bolted in place. If located indoors, the dispensing device will be located in a position where it cannot be struck by a vehicle that is out of control descending a ramp or other slope. The installation must be in accordance with the manufacturer's instructions.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 37 Ok Reg 1143, eff 10-1-20]

165:26-2-8. Installation testing

(a) A tightness test must be completed on tank and lines during construction and before being put into service after the lines have been covered.

- (1) All aboveground storage tanks must be tested to manufacturers instructions. Single-wall tanks shall be air tested, soaped, and inspected for bubbling prior to installation.
- (2) Aboveground product piping shall be subjected to an air test of at least 50 psi. The test must have a duration of not less than 60 minutes. All piping joints must be soaped while the system is under pressure, in order to detect any possible leaks. The interstice area of double-wall piping must be tested according to the manufacturer's instructions.

- (3) All suction product piping must be tested while disconnected from the pumps, and dispensing units. The piping must be subjected to an air test of at least 50 psi. The test must have a duration of not less than 60 minutes. All piping joints must be soaped while the system is under pressure, in order to detect any possible leaks. The interstice area of double-wall piping must be tested according to the manufacturer's instructions
- (4) All pressurized piping must be tested while connected to tanks, pumps and dispensing units if installed at the time of installation. The piping must be subjected to an air test of at least 50 psi. The test must have a duration of not less than 60 minutes. All piping joints must be soaped while the system is under pressure, in order to detect any possible leaks. The interstice area of double-wall piping must be tested according to the manufacturer's instructions.
- (5) All piping should be air tested and monitored continuously during the installation.
- (6) All underground pressurized and suction piping must have a precision tightness test performed after all paving over the piping has been completed and before the system is placed in operation. The precision tightness test must be performed by a certified tester, and in accordance with manufacturer's instructions. The product line(s) must be hydrostatic tested by a NWGLDE approved testing device capable of detecting a leak of 0.10 gallons per hour with a test pressure of 50 psi or 1½ times the operating pressure, whichever is greater. The lines must be tested for a minimum of one hour.
- (7) Mechanical and electronic leak detector(s) must be tested for function by simulating a leak and operate in accordance with manufacturer's instructions.
- (8) If an ATG system with electronic line leak detector(s) is installed it must complete a leak detector test in each of the modes in which it is certified as capable of detecting a leak (e.g. 3gph, 0.2gph, and 0.1gph).
- (9) Containment sumps must be tested after all piping and conduit has been installed by using vacuum, pressure, or liquid testing in accordance with one of the following criteria:
 - (A) Requirements developed by the manufacturer (owners and operators may use this option only if the manufacturer has developed requirements);
 - (B) Code of practice developed by a nationally recognized association or independent testing laboratory, e.g., PEI RP 1200.

[Source: Amended and renumbered from 165:26-2-171 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 34 Ok Reg 958, eff 9-11-17]

PART 3. SECONDARY CONTAINMENT

165:26-2-31. Double-walled tanks

Double-walled tanks do not require additional containment if all the following conditions are met:

- (1) The capacity of the tank does not exceed 50,000 gallons (189,000 liters).
- (2) All piping connections to the tanks are made above the normal maximum liquid level.

- (3) A mechanism is provided to prevent the release of liquid from the tank by siphon flow.
- (4) A mechanism is provided for determining the level of liquid in the tank, which is accessible to the delivery operator.
- (5) A mechanism is provided to prevent overfilling by sounding an alarm when the liquid level in the tank reaches 90 percent of capacity and by automatically stopping the delivery of liquid to the tank when the level in the tank reaches 95 percent of capacity. In no case will these provisions restrict or interfere with the proper functioning of the normal vent or the emergency vent.
- (6) Spacing between adjacent tanks is not less than 3 ft (0.9 meters).
- (7) The tank is capable of resisting damage from the impact of a motor vehicle or suitable collision barriers are provided in locations where the tank is exposed to traffic.
- (8) Where the interstitial space is enclosed, it is provided with emergency venting.
- (9) A means is provided to establish the integrity of the interstitial space of the double wall tank.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 33 Ok Reg 615, eff 8-25-16]

165:26-2-32. Secondary containment

- (a) Aboveground storage tanks, other than those with double walls as set out in 165:26-2-31, must have secondary containment for the fuels stored in them.
- (b) Multiple products stored within the same containment area must be compatible with each other.
- (c) If the secondary containment area is open to precipitation, it must be able to contain 110 percent of the capacity of the largest tank plus the volume displaced by other tanks within the containment area.
- (d) The secondary containment area must be constructed with materials that are compatible with the product being stored.
- (e) The secondary containment area cannot have any uncapped drain that extends outside of the containment.
- (f) The secondary containment must be kept intact and free of vegetation, trash, water, and all other items not necessary for fuel storage.
- (g) Secondary containment can be made from native soil if the soil meets or exceeds the permeability rates listed in Appendix J, or it can be made of concrete or steel. Generally, soil containment may be preferred in open rural areas and concrete in more congested urban areas. In either case the secondary containment must be impermeable for the products stored in the tanks:
 - (1) When concrete is used for secondary containment the concrete must be suitable to contain the released product for as long as it would take to recover the release.
 - (2) Soil containment not meeting the permeability rates listed in Appendix J must be made impermeable by use of a synthetic membrane liner made of rubber, plastic, or a geosynthetic clay liner.
 - (3) A double-walled tank would meet the criteria of secondary containment.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2297, eff 7-1-06]

165:26-2-32.1. Spill Prevention, Control and Countermeasure Plan

- (a) Owners of aboveground storage tanks must comply with the Spill Prevention Control and Countermeasure (SPCC) rule found in Title 40 of the Code of Federal Regulations (CFR), Part 112 (Oil Pollution Prevention). If a Spill Prevention Control and Countermeasure (SPCC) plan is required, it must be kept on site.
- (b) The registered Professional Engineer or person responsible for preparation of plan must certify that plan has been prepared in accordance with good engineering practice, including consideration of applicable industry standards and the requirements of 40 CFR 112; procedures for required inspections and testing must be established; and the plan must be adequate for the facility.

[Source: Renumbered from 165:26-3-22 at 23 Ok Reg 2297, eff 7-1-06; Amended at 26 Ok Reg 1831, eff 7-1-09]

PART 4. REQUIREMENTS FOR CORROSION PROTECTION SYSTEMS

165:26-2-40. Corrosion protection

(a) Any portion of a tank or its piping system that is in contact with the soil must be protected from corrosion by a properly engineered, installed and maintained cathodic protection system in accordance with recognized standards of design, such as:

- (1) American Petroleum Institute Publication 1632-2002, Cathodic Protection of Underground Petroleum Storage Tanks and Piping Systems;
- (2) National Association of Corrosion Engineers Standard RP0193-2001, Recommended Practice of External Cathodic Protection of On-Grade Metallic Storage Tank Bottoms;
- (3) National Association of Corrosion Engineers Standard SP0169-2013, Control of External Corrosion of Underground or Submerged Metallic Piping Systems;
- (4) National Association of Corrosion Engineers Standard SP0285-2011, Control of External Corrosion on Metallic Buried, Partially Buried, or Submerged Liquid Storage Systems; and

- (b) Approved or listed corrosion-resistant materials or systems include special alloys, fiberglass reinforced plastic, or fiberglass reinforced plastic coatings.
- (c) Piping systems for liquids, both aboveground and underground, that are subject to external corrosion must be protected.

[Source: Renumbered from 165:26-3-80 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 34 Ok Reg 958, eff 9-11-17]

165:26-2-41. Compliance with corrosion protection requirements and manufacturer's specifications

Corrosion protection systems must be operated and maintained in accordance with the manufacturer's instructions and specifications to provide continuous corrosion protection to the metal components of the storage tank system that are routinely in contact with the ground. If any portion of an AST or metallic piping comes in contact with an electrolyte (dirt, sand, gravel, etc.), cathodic protection should be applied to assist in the control of corrosion. The amount of metal in contact with the electrolyte will determine the appropriate selection of cathodic protection; either galvanic anodes or an impressed current system. The selected cathodic protection system will be designed by a corrosion expert or a qualified engineer trained in the field of cathodic protection.

[Source: Renumbered from 165:26-3-81 at 23 Ok Reg 2297, eff 7-1-06]

165:26-2-42. Frequency and criteria of inspections and tests

Cathodic protection systems must be inspected for proper operation by a qualified corrosion technician in accordance with the following requirements:

- (1) Cathodic protection systems must be tested within six(6) months of installation and/or repair, and at least once every three(3) years thereafter by a qualified cathodic protection tester, who can demonstrate education and experience in the measurement of cathodic protection of buried or submerged metal piping systems and metal tanks.
- (2) Every sixty(60) days impressed current cathodic protection systems must be inspected by the owner or operator (or owner's designated representative) to ensure that the equipment is working properly.
- (3) The criteria used to determine that cathodic protection is adequate must be consistent with a code of practice developed by a nationally recognized organization, such as the National Association of Corrosion Engineers (NACE).
- (4) All personnel performing cathodic protection system testing must have the required education, current corrosion certification experience, knowledge and competence to correctly perform testing services in accordance with a certified course and applicable industry standards or codes.

[Source: Renumbered from 165:26-3-82 at 23 Ok Reg 2297, eff 7-1-06; Amended at 31 Ok Reg 1010, eff 9-12-14; Amended at 36 Ok Reg 576, eff 8-1-19]

PART 5. PIPING

165:26-2-51. Piping protection

Piping must be located for maximum practical protection from physical damage.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04]

165:26-2-52. Piping and gravity flow

Where tanks are at an elevation that produces a gravity head on the dispensing device, the tank outlet must be equipped with an anti-siphon device such as a solenoid valve, positioned adjacent to and downstream from the emergency valve, installed and adjusted so that liquid cannot flow by gravity from the tank in case of piping or hose failure when the dispenser is not in use.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 34 Ok Reg 958, eff 9-11-17]

165:26-2-53. Valves on piping

- (a) If a submersible pump system is used, a UL listed emergency shutoff/shear valve must be installed at each dispensing device. Both the emergency shutoff/shear valve and dispensing device shall be rigidly anchored in place.
- (b) If a suction pump-type dispensing device with an air eliminator is used, and where the height of liquid in the tank may exceed the height of the suction pump, a UL listed, vacuum-actuated shutoff/shear valve or equivalent-type valve must be installed directly under each dispensing device. Both the shut off/shear valve and dispensing device shall be rigidly anchored in place. Tanks installed in below-grade vaults are not required to comply with this requirement.

- (c) Manual shutoff and check valves must be equipped with a pressure-relieving device that will relieve the pressure generated by thermal expansion back to the tank. Manual shutoff valves that are normally open and only closed for maintenance do not require a pressure relieving device.
- (d) Each connection to an aboveground tank through which liquid normally flows must be provided with an internal or an external emergency fire valve located as close as practical to the shell of the tank or submerged pump. The fill line may be equipped with a check valve made of steel or nodular iron rather than a fire valve. The steel check valve must be installed downstream of the block valve on fill lines if a fire valve is not installed.
- (e) An anti-siphon or solenoid valve must be installed on each supply line according to manufacturer guidance and recognized industry standards.
- (f) A manual shut off or ball valve must be installed on each supply line according to manufacturer guidance and recognized industry standards.
- (g) All valves must meet the construction criteria of 165:26-2-54.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 34 Ok Reg 958, eff 9-11-17; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-2-54. Aboveground storage tank piping materials

- (a) The design, fabrication, assembly, test and inspection of the piping system from the fuel tank to the fuel dispensers must be in accordance with the piping manufacturers installation recommendations and instructions.
- (b) Pipes, valves, couplings, flexible connectors, fittings and other pressure containing parts must be installed in accordance with Petroleum Equipment Institute RP200, *Recommended Practices for Installation of Aboveground Storage Systems for Motor Vehicle Fueling*.
- (c) Refer to Subchapter 8 for guidelines regarding over-water piping used at marinas.
- (d) Valves at storage tanks and their connections to the tank must be of steel or nodular iron. Low melting point materials such as aluminum, copper, brass or non-ductile material such as cast iron may be used in aboveground piping provided that they are located downstream of an approved steel or nodular iron emergency valve that has been installed and located as close as practical to the shell of the tank or submerged pump.
- (e) Valves at storage tanks may be other than steel or nodular iron if the valves are installed internal to the tank.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-2-55. Underground piping materials

- (a) All new underground product piping and ancillary equipment installed at a new facility or existing facility must have the following characteristics:
 - (1) Non-metallic;
 - (2) Double-walled;
 - (3) A tracer locator wire must be installed in all piping trenches; and
 - (4) Dispenser sumps must be installed and monitored with sensors as per 165:26-3-20.2.
 - (5) Piping transition sumps must be installed and monitored with sensors if the interstice area of connecting piping cannot be connected in an approved manner.

- (b) Existing facilities that are replacing the lesser of twenty feet (20') or fifty percent (50%) of underground piping must upgrade pursuant to (a) of this Section. If a metallic line fails due to structural failure or corrosion, all metallic product lines at the facility must be removed, and cannot be repaired.
- (c) Existing facilities that are making any alteration to a fuel island when concrete removal is required must install dispenser sumps and monitor as pursuant to 165:25-3-6.29.
- (d) Existing facilities that are replacing dispensers must install dispenser sumps and monitor as pursuant to 165:25-3-6.29 if modifications are made below the dispenser cabinet.
- (e) Tracer locator wire is not required to be installed in existing piping trenches containing piping which otherwise meets the requirements in subsection (a) unless the trench is opened to repair, move, or replace the piping.
- (f) Existing facilities that are replacing aboveground storage tanks must replace all single walled piping per (a) of this section.

165:26-2-57. Commission-approved alternative methods [RENUMBERED]

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Renumbered to 165:26-3-20.3 at 23 Ok Reg 2297, eff 7-1-06]

PART 7. VAULT REQUIREMENTS

165:26-2-71. Vaults

A vault is allowed above or below grade and must meet NFPA 30 and NFPA 30A requirements.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 34 Ok Reg 958, eff 9-11-17]

PART 9. DISPENSER REQUIREMENTS

165:26-2-91. Dispensers

- (a) Liquids must be transferred from storage tanks by means of fixed pumps designed and equipped to allow control of the flow and prevent leakage or accidental discharge.
- (b) Dispensing devices for Class I and Class II liquids must be listed.
 - (1) Existing listed or labeled dispensing devices may be modified provided the modifications made are "Listed by Report" by an approved testing laboratory or as otherwise approved by PSTD.
 - (2) Modification proposals must contain a description of the component parts used in the modification and the recommended methods of installation on specific dispensing devices, and they must be made available to PSTD for approval prior to installation.
- (c) A control must be provided that will permit the dispenser to operate only when a dispensing nozzle is removed from its bracket or normal position with respect to

the dispensing device and only when the switch on this dispensing device is manually actuated. This control must also stop the dispenser when all nozzles have been returned either to their brackets or to the normal non-dispensing position.

(d) A UL listed emergency breakaway device designed to retain liquid on both sides of the breakaway point must be installed on each hose dispensing any class of liquids. These devices must be installed and maintained in accordance with the manufacturer's instructions. Where hoses are attached to a hose-retrieving mechanism, the listed emergency breakaway device must be installed between the point of attachment of the hose-retrieving mechanism to the hose and the hose nozzle valve.

(e) All gasoline, gasoline-alcohol blends, gasoline-ether blends, E85 Fuel ethanol, and M85 methanol dispensers located at retail facilities shall have a ten (10) micron or smaller nominal pore-sized filter. All biodiesel, biodiesel blends, diesel, and kerosene dispensers located at retail facilities shall have a thirty (30) micron or smaller nominal pore-sized filter.

(f) Dispensers installed after August 27, 2015, that are connected to aboveground piping must have sumps underneath the dispensers and be monitored. Dispensers that cannot meet these requirements must be in a contained area such as a dike.

(g) New dispensers installed at motor fuel facilities must be located ten feet (10') or more from any building.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 30 Ok Reg 586, eff 7-1-13; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 34 Ok Reg 958, eff 9-11-17; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-2-91.1. Display on dispenser

(a) Every dispenser or delivery device regulated by the Commission used for sale of motor fuel to the public must legibly display the type of motor fuel offered for sale.

(b) Any motor fuel must be displayed in accordance with 16 CFR Part 306.0 through 306.12, including Appendices; and sold as provided for by Commission rules and National Institute of Standards and Technology (NIST) Handbook 44, "Specifications, Tolerances, and Other Technical Requirements for Weighing and Measuring Devices".

[Source: Added at 37 Ok Reg 1143, eff 10-1-20]

165:26-2-92. Dispenser hose

(a) Listed hose assemblies must be used to dispense fuel.

(1) Hose length at facilities will not exceed eighteen feet (18') (5.5 m).

(2) Hose at retail and marina facilities must be checked daily for evidence of blistering, carcass saturation or separation, cuts, nicks or abrasions that expose reinforcement material and for slippage, misalignment or leaks at couplings.

(3) Hoses on dispensers that are connected to aboveground tanks within a fenced area may not exceed fifty feet (50') in length and must be secured, such as with a hose reel, to protect it from damage.

(b) If any defects are present, the defective hose must be immediately removed from service.

(c) At least once every thirty (30) days the hose must be completely extended and inspected.

(1) The hose couplings and the first twelve inches (12") of hose adjacent to the couplings must be examined.

- (2) Structural weakness must be checked by pressing the hose in the area around its entire circumference for soft spots.
- (3) Hoses that show evidence of soft spots must be immediately removed.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 35 Ok Reg 1010, eff 10-1-18]

165:26-2-93. Nozzles

At any installation where the normal flow of product may be stopped other than by the hose nozzle valve such as at pre-pay stations, the system must include listed equipment with a feature that causes or requires the closing of the hose nozzle valve before product flow can be resumed or before the hose nozzle valve can be replaced in its normal position in the dispenser; or the hose nozzle valve must not be equipped with a latch-open device.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04]

PART 11. TANK FILLING PROCEDURES

165:26-2-111. Tank filling operation

A delivery vehicle must be separated from any aboveground tank by at least 25 ft. (7.6 m) if possible.

- (1) No minimum separation distance is required for tanks that are filled by gravity.
- (2) The required minimum separation distance will be reduced to 15 ft. (4.6 m) where the fuel being delivered is not a Class I liquid.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04]

PART 13. MISCELLANEOUS SAFETY PROVISIONS

165:26-2-131. Fencing

- (a) Tanks not enclosed in vaults must be enclosed with a chain link fence at least 6 ft. (2m) high. The fence must be separated from the tanks by at least 10 ft (3 m) and must have a gate that is secured against unauthorized entry.
- (b) The area within the fence must be kept free of vegetation, debris and any other material that is not necessary to the proper operation of the tank and piping system.
- (c) Tanks are not required to be enclosed within a fence if the property on which the tanks are located already has a perimeter security fence.
- (d) A fence may not be required if another method effectively restricts access to the tanks.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2297, eff 7-1-06]

165:26-2-132. Required signs

(a) Warning signs must be conspicuously posted in the dispensing area incorporating the following or equivalent wording:

- (1) WARNING.
- (2) It is unlawful and dangerous to dispense gasoline into unapproved containers.
- (3) No smoking.
- (4) Stop motor.
- (5) No filling of portable containers in or on a motor vehicle.

- (6) Place container on ground before filling.
- (b) If blended ethanol or biodiesel product is dispensed, an OCC approved label must be displayed in a clear, conspicuous and prominent manner visible to customers using either side of the dispenser from which a blended ethanol or biodiesel product is dispensed.
- (c) A sign or label must be displayed in a clear, conspicuous and prominent manner when two (2) different types of gasoline are being dispensed from a single hose, e.g., one hundred percent (100%) gasoline and ten percent (10%) ethanol blend gasoline. The sign must be displayed in close proximity to the one hundred percent (100%) gasoline button advising the customer that small amounts of ethanol may be dispensed in the first five (5) gallons of purchase of one hundred percent (100%) gasoline.
- (d) Failure to abide with signage requirements may result in fines, formal enforcement action, or shutdown of operations.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 26 Ok Reg 1831, eff 7-1-09; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 35 Ok Reg 1010, eff 10-1-18]

165:26-2-133. Sources of ignition

- (a) Smoking materials, including but not limited to matches and lighters, must not be used within 20 ft. (6 m) of areas used for fueling, servicing fuel systems for internal combustion engines, or receiving or dispensing of Class I liquids.
- (b) Conspicuous and legible signs prohibiting smoking must be posted within sight of the customer being served.
- (c) The motors of all equipment being fueled must be shut off during the fueling operation, except for emergency generators, pumps, etc., where continuing operation is essential.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04]

165:26-2-134. Monitoring requirements [AMMENDED AND RENUMBERED TO 165:26-3-20.1]

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended and renumbered to 165:26-3-20.1 at 23 Ok Reg 2297, eff 7-1-06]

PART 15. ELECTRICAL

165:26-2-151. Electrical requirements

- (a) All electrical work must be performed by a licensed electrician.
- (b) All electrical wiring and electrical utilization equipment must be of a type specified by and must be installed in accordance with NFPA 30A and NFPA 70, National Electrical Code.
- (c) Clearly identified and easily accessible switch(es) or circuit breaker(s) must be provided at a location remote from dispensing devices, including remote pumping systems, to shut off the power to all dispensing devices in the event of an emergency. The switch or circuit breaker must be a minimum of twenty feet (20') and not more than one hundred feet (100') away from dispensing devices.
- (d) Electrical equipment that was installed in compliance with an earlier state or national code will not require modification unless the equipment is hazardous to people or property.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 35 Ok Reg 1010, eff 10-1-18]

PART 17. INSTALLATION OF ABOVEGROUND STORAGE TANK SYSTEMS [REVOKED]

165:26-2-171. Aboveground storage tank system installation [AMMENDED AND RENUMBERED TO 165:26-2-8]

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended and renumbered to 165:26-2-8 at 23 Ok Reg 2297, eff 7-1-06]

165:26-2-172. Compatibility [RENUMBERED]

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Renumbered to 165:26-2-1.2 at 23 Ok Reg 2297, eff 7-1-06]

PART 19. REPAIRS TO ABOVEGROUND STORAGE TANK SYSTEMS

165:26-2-191. Repairs to aboveground tank systems

Repairs to an aboveground storage tank system, excluding electrical work, must be performed by an AST Licensee. Routine maintenance such as painting and repairs to a product dispensing unit will not be considered repairs to the storage tank system.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 32 Ok Reg 794, eff 8-27-15]

PART 21. REMOVAL AND CLOSURE OF ABOVEGROUND STORAGE TANK SYSTEMS

165:26-2-210. Tank removal and closure

- (a) Owners and Operators of all aboveground storage tank systems must notify the Petroleum Storage Tank Division at least fourteen(14) days prior to the removal or permanent closure of aboveground storage tanks and/or lines by submitting the PSTD scheduling form and receiving confirmation of the scheduled removal from PSTD. If events require a change in the date of removal, the Division shall be given forty-eight (48) hours notice prior to the new date.
- (b) An authorized agent of PSTD may be present to observe the removal and to inspect the closed tank system and the surrounding environment prior to backfilling.
- (c) Tanks, lines and ancillary equipment must be removed upon closure unless a Commission order grants a variance.
- (d) An AST Licensee must remove aboveground storage tank systems.
- (e) Photos must be taken of tank(s), line(s), and soil at removal. In the event there is a hole in a tank or line, further photographic evidence is required. If tank(s), line(s) or excavated soil show evidence of a release, photos of the apparent release must be taken that indicate the release source.

[Source: Added at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-2-211. Compliance with removal and closure requirements

Owners and/or operators of aboveground storage tank systems that are temporarily taken out of service or permanently removed, must comply with all the requirements of this Part.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04]

165:26-2-212. Temporary removal from service

When an aboveground storage tank system is taken temporarily out of service, the owner or operator must:

- (1) Drain all fluid to less than one inch (1") of residue remaining in the tank.
- (2) Leave all vent lines open and functioning.
- (3) Cap and secure all other lines, pumps, manways and ancillary equipment.
- (4) Lock all fill caps.
- (5) Notify PSTD of a change in service on the prescribed form within thirty (30) days.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-2-212.1. Requirements for returning to service

- (a) All tanks out of service for more than twelve (12) months are required to be pressure and soap tested and test results submitted to PSTD before returning to service.
- (b) A tightness test must be performed by a certified tester and must be completed on the underground portion of out of service systems if more than twelve (12) months have elapsed since the last tightness test. Any system failure will require either closure or upgrade of the failed portion.
- (c) All systems out of service for more than twelve (12) months are required to meet all the requirements of this Chapter.
- (d) All underground storage tanks being used as aboveground storage tanks that have been out of service for more than twelve (12) months may not be returned to service.

[Source: Renumbered from 165:26-2-215 at 23 Ok Reg 2297, eff 7-1-06; Amended at 32 Ok Reg 794, eff 8-27-15; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-2-213. Permanent closure

Owners and/or operators of aboveground storage tank systems who do not intend to use the tanks for fuel storage in the future must close the tank systems after they have been out of service for more than twelve (12) months by performing the following:

- (1) Empty, clean, purge and devaporize the tank of all flammable products.
- (2) Separate the piping from the tank. All underground piping and ancillary equipment must be removed unless a Commission order grants a variance.
- (3) Perform a site assessment pursuant to 165:26-2-214, "Assessing the site at tank closure or change in service".
- (4) An AST Licensee must be on site at all times during the removal of an aboveground storage tank and/or lines.
- (5) All UST's currently being used as AST's must be destroyed upon closure. A certificate of destruction must be included with the AST Closure Report and submitted to PSTD within forty-five (45) days of closure.

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-2-214. Assessing the site at tank closure or change in service

- (a) Before permanent closure or a change in service is completed, the owner or operator must measure for the presence of a release where contamination is most likely to be present at the aboveground storage tank system site. Please refer to the PSTD sampling document when choosing sample locations.
- (b) For tank systems containing petroleum product, analyses must be done for both TPH and BTEX.
- (c) If contaminated soils, contaminated groundwater, or free product as a liquid or vapor is discovered, the owner must immediately begin corrective action in accordance with Chapter 29 of Commission rules.
- (d) Any sampling at closures must be conducted under the supervision of a Licensed Environmental Consultant.
- (e) The requirements of this Section do not apply to aboveground storage tanks which are located in or on buildings.

PART 4. RELEASE DETECTION

165:26-3-19. General monitoring requirements

Tanks must be monitored at least every 30 days for releases using one of the methods or combinations of methods listed in this Chapter.

[Source: Added at 23 Ok Reg 2297, eff 7-1-06]

165:26-3-20. General release detection methods and devices

(a) Owners and operators of new and existing aboveground storage tank systems must use a release detection method, or a combination of release detection methods, that is:

- (1) Capable of detecting a release of regulated substances from any portion of the aboveground storage tank system that routinely contains product.
- (2) Designed, installed, calibrated, operated, and maintained in accordance with the manufacturer's instructions, including routine maintenance and service checks for operability or running conditions.
- (3) Capable of meeting the performance requirements of this Chapter, with any performance claims and their manner of determination described in writing by the equipment manufacturer or installer.
- (4) Sampled, tested, or checked for a release at least once every 30 days.

(b) Owners and/or operators must keep all written manufacturer and installer performance specifications and the manner in which those specifications are determined.

(c) All electronic and mechanical equipment used for release detection, monitoring or warning must be tested for proper operation and calibration annually or per the manufacturer's recommendation, whichever is more frequent.

[Source: Added at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-3-20.1. Monitoring requirements for aboveground tanks and aboveground piping

One of the following methods must be used:

(1) Visual Monitoring.

(A) Visual inspection of the aboveground storage tank systems to identify cracks or other defects in the secondary containment area and product transfer area.

(B) Visual inspection of the exterior surface of the tanks, piping, valves, pumps and other equipment for cracks, corrosion, releases and maintenance deficiencies; and identify poor maintenance, operating practices or malfunctioning equipment.

(C) Visual inspection of elevated tanks or tanks on concrete slabs.

(D) Visual inspection of the area between the tank's outer shell or the tank's floor and containment area or a vapor monitoring of the soil directly under the tank bottom or perimeter and the water table, unless the tank containment has a sound concrete floor.

(E) Visual inspections are not adequate where due to the nature of the aboveground storage tank and/or its secondary containment it cannot be determined whether a leak has occurred. A good example would be a vertical tank that is not raised off the ground, making it impossible to visually inspect its bottom, and is not sitting on a sound concrete slab within sound secondary containment.

(F) An annual line tightness test performed by a certified tester may be used in lieu of thirty (30) day visual monitoring for aboveground product piping.

(2) Inventory Reconciliation. Product inventory control (or another test of equivalent performance) must be conducted at least every thirty (30) days to detect a release of at least one percent (1.0%) of flow-through plus 130 gallons on a thirty (30) day basis in the following manner:

(A) Inventory volume measurements for regulated substance inputs, withdrawals, and the amount remaining in the tank are recorded each operating day.

(B) The equipment used is capable of measuring the level of product over the full range of the tank's height to the nearest one-eighth inch (1/8").

(C) The regulated substance inputs are reconciled with delivery receipts by measurement of the tank inventory volume before and after delivery.

(D) Product dispensing is metered and recorded within an accuracy of six (6) cubic inches for every five (5) gallons of product withdrawn.

(E) The measurement of any water level in the bottom of the tank is made to the nearest one-eighth inch (1/8") at least once every thirty (30) days.

(F) Use of the PSTD Inventory Reconciliation Form or an electronic equivalent is required.

(3) Interstitial Monitoring. Interstitial monitoring must be used for double walled aboveground storage tank systems. The sampling or testing method must detect a release at least every thirty (30) days in accordance with the manufacturer instructions through the inner wall in any portion of the tank

that routinely contains product

(4) Automatic tank gauging systems.

(A) Automatic tank gauging systems (ATGs) that test for the loss of product must conduct an automatic product level monitor test at a minimum frequency of once every thirty (30) days and be capable of detecting at least a 0.2 gallon per hour leak rate with a probability of detection of 0.95 and a probability of false alarm of 0.05.

(B) Automatic tank gauging systems (ATG's) must be third party certified for the size and quantity of the tank. Only third party certifications that have been reviewed and approved by the National Work Group on Leak Detection Evaluations (NWGLDE), as evidenced by their posting on the NWGLDE Web Site, will be accepted (nwglde.org).

[Source: Amended and renumbered from 165:26-2-134 at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 26 Ok Reg 1831, eff 7-1-09; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 35 Ok Reg 1010, eff 10-1-18]

165:26-3-20.2. Installation and monitoring requirements for underground piping

Underground piping that routinely contains regulated substances must be installed and monitored for releases in a manner that meets the following requirements:

(1) Pressurized piping.

(A) Piping that conveys regulated substances under pressure must be equipped with an automatic line leak detector installed and operated in accordance with this Chapter.

(B) New installations and facilities replacing a piping system must have at least one (1) sump sensor, float or similar mechanical device for each tank system, located at the bottom of the lowest piping gradient sump. The interstitial area of the piping must be open inside the sumps to allow fuel to drain into the sumps in the event that a leak occurs. Sensors must be mounted at the bottom of the sump(s) and accessible for testing.

(C) Underground pressure piping from a master dispenser to a satellite dispenser must be designed and installed so that the satellite piping is tested by the automatic line leak detector. An annual line tightness test is required on the satellite underground piping.

(2) Suction piping. New installations and facilities replacing a piping system must have at least one (1) sump sensor, float or similar mechanical device for each tank system, located at the bottom of the lowest piping gradient sump. The interstitial area of the piping must be open inside the sumps to allow fuel to drain into the sumps in the event that a leak occurs. Sensors must be mounted at the bottom of the sump(s) and accessible for testing.

(3) Methods of release detection for pressurized piping. Each method of release detection for underground pressurized piping must be performed in accordance with the following requirements:

(A) Automatic mechanical line leak detectors and annual line tightness testing:

- (i) Methods which alert the owner and/or operator to the presence of a leak by restricting or shutting off the flow of regulated substances through piping or by triggering an audible or visual alarm may be used only if they detect leaks of three (3) gallons per hour at ten (10) psi line pressure within one (1) hour.
- (ii) An annual test of the operation of the leak detector must be conducted by simulating a leak in accordance with the manufacturer's requirements.
- (iii) Automatic line leak detectors installed on or after September 22, 1991 must be capable of detecting the leak rate with a probability of detection of 0.95 and a probability of false alarm of 0.05.
- (iv) A hydrostatic line tightness test must be performed annually by a certified tester.

(B) Sump sensors with automatic line leak detectors

- (i) Double walled piping with sump sensors, floats or similar mechanical devices at each dispenser, transition and tank sump may be used in lieu of annual line tightness testing except at marinas where a line tightness test is required by April 1st of each year.
- (ii) The sump sensors, floats or other mechanical devices used must be tested annually according to manufacturer's requirements. Sensors status and alarm history reports must be printed/manually recorded and retained for each thirty (30) day period.
- (iii) An annual function test of the operation of the leak detector must be conducted by simulating a leak in accordance with the manufacturer's requirements.

(C) Electronic line leak detection. A certified electronic line leak detector may be used in lieu of a mechanical line leak detector and annual tightness test only if:

- (i) The system is capable of detecting and tests for a leak of three (3) gallons per hour before or after each operation of the submersible turbine pump; and
- (ii) The system is capable of detecting and tests for a leak of 0.2 gallons per hour at least once every thirty (30) days; and
- (iii) The system is capable of detecting and tests for a leak of 0.1 gallons per hour annually; and
- (iv) The system must be function tested annually by simulating a leak in accordance with manufacturer's specifications. If the system has printer capabilities, attach the electronic line leak detector printout documenting the system shutdown or alarm when tested.

(4) Methods of release detection for suction piping. Each method of release detection for underground suction piping must be performed in accordance with the following requirements.

(A) Sump Sensors

- (i) Double walled piping with sump sensors, floats or similar mechanical devices at each dispenser, transition and tank sump may be used in lieu of annual line tightness

testing except at marinas where a line tightness test is required by April 1st of each year.

(ii) The sump sensors, floats or other mechanical devices used must be tested annually according to manufacturer's requirements. Sensors status and alarm history reports must be printed/manually recorded and retained for each thirty (30) day period.

(B) Annual Line Tightness Testing. A hydrostatic line tightness test must be performed annually by a certified tester.

PART 14. RELEASE REPORTING REQUIREMENTS

165:26-3-77. Release reporting

(a) The reporting requirements of this Part do not relieve the owner or operator of the responsibility to take necessary corrective action pursuant to OAC 165:29 to protect the public health, safety and the environment, including the containment and cleanup of spills and overfills that are not required to be reported by this Chapter. No person shall allow a confirmed or suspected release of regulated substances from an aboveground storage tank system to continue without reporting to PSTD or initiating an investigation within twenty-four (24) hours of discovery as required by this Chapter. Owners and operators of aboveground storage tank systems, as well as persons who transport regulated substances must ensure that spills and overfills do not occur.

(b) All aboveground storage tank system owners, operators, their employees or agents, or transporters must report to PSTD within twenty-four (24) hours of discovering any substances, conditions or monitoring results that indicate a release may have occurred using the link provided on the release reporting tab on PSTD's

webpage on the Commission website; by email at PSTReleaseReporting@occ.ok.gov; or by telephone at (405) 521-4683 or 1-888-621-5878. If after hours, or on weekends or holidays, call the PSTD emergency phone number at (405) 823-0994. Owners or operators must provide written confirmation to follow within twenty (20) days in accordance with the requirements established in this Chapter. Events indicating a release include, but are not limited to, the following:

(1) The discovery of released regulated substances at the aboveground storage tank system facility or in the surrounding area (such as the presence of free product or vapors in soils, basements, crawlspaces, sewer and utility lines, and nearby surface water) whether on-site or off-site.

(2) Any unusual operating conditions observed by owners, operators, their employees, or agents such as the unexplained erratic behavior of product dispensing equipment, the sudden loss of product from the aboveground storage tank system, or an unexplained presence of water in the tank, unless system equipment is found to be defective but not leaking, and is immediately repaired or replaced.

(3) In the case of inventory control, two (2) consecutive thirty (30) day periods where the Total Gallons Over/Short is greater than the "Leak Check" (one percent (1%) of product sales plus 130 gallons) must be reported to PSTD within twenty-four (24) hours of the owner, operator, their employees, or agents discovering the inventory control results.

(4) Monitoring results from a release detection method required by this Chapter that indicate a release may have occurred unless the monitoring device is found to be defective, and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial result.

(c) While aboveground releases of petroleum of less than twenty-five (25) gallons need not be reported to PSTD, they must be recorded by the owner or operator and contained and cleaned up immediately. All of the following releases must be reported to PSTD electronically or by telephone within twenty-four (24) hours of discovery, by the owner, operator, employee, or agent, with a written confirmation to follow within twenty (20) days in accordance with the requirements established in this Chapter:

(1) All known belowground releases in any quantity; for example, a release resulting from a line broken during an excavation.

(2) Any aboveground release of petroleum greater than twenty-five (25) gallons.

(3) Any aboveground release of petroleum that is less than twenty-five (25) gallons, but cannot be contained and cleaned up within twenty-four (24) hours.

(d) All owners and/or operators of aboveground storage tank systems must maintain records of all reportable and non-reportable events listed in this section sufficient to permit adequate inspection and review by PSTD. These records must be kept for three (3) years following the date of the event.

(e) If any of the possible, probable or definite release conditions set forth in subsections (a) through (c) above are not reported within twenty-four (24) hours, the owner, operator, their employees, or agents may be subject to fines, Formal Enforcement Action and/or shutdown of operations.

(f) Any releases requiring emergency corrective action must be reported immediately to PSTD at (405) 521-4683 or 1-888-621-5878. After office hours, weekends or holidays, calls must be reported to PSTD's emergency number at (405)

823-0994.

PART 17. RELEASE INVESTIGATION

165:26-3-171. Release investigation and confirmation

(a) This Section applies to the investigation of all reportable releases unless PSTD staff specifically waives any part of this Section in writing.

(b) Owners and/or operators must immediately investigate and confirm all suspected releases of regulated substances requiring reporting under this Chapter within 7 days of receipt of notice from PSTD, using the following steps or another procedure approved by PSTD:

(1) **System test.** Owners and/or operators must conduct tightness tests that determine whether a leak exists in the storage tank system.

(A) Owners and/or operators must repair, remove or replace the aboveground storage tank system and begin investigation in accordance with (b)(2) of this Section if the test results for the system, tank, or delivery piping indicate that a leak exists.

(B) Further investigation is not required if the test results for the system, tank, and delivery piping do not indicate that a leak exists and if indicator chemical concentrations detected in soil or water

are not the basis for suspecting a release.

(C) Owners and/or operators must conduct a site check as described in (b)(2) of this Section if the test results for the system, tank and delivery piping do not indicate that a leak exists but indicator chemical concentrations detected in soil or water are above action levels cited in (c).

(2) **Site check.** Owners and/or operators must measure for the presence of a release where regulated substances are most likely to be present at the aboveground storage tank system site. In selecting sample types, sample locations, sample depths, and measurement methods, owners and/or operators must consider the nature of the stored substance, the type of initial alarm or cause for suspicion, the type of native soil, the depth of groundwater, and other factors appropriate for identifying the presence and source of the release. Sample locations should be approximately 5 feet (5') from the outside of the AST system in native soil or another location approved by PSTD. Analyses for both BTEX constituents and the appropriate TPH must be obtained in all cases. Site check investigations must be performed by a PSTD Licensed Environmental Consultant.

(A) If the test results for soil and/or groundwater taken outside the excavation zone or the aboveground storage tank system site confirm that a release has occurred, owners and/or operators must begin corrective action in accordance with Chapter 29 of Commission rules.

(B) If the test results for the native soil and/or groundwater or the aboveground storage tank system site do not indicate that a release has occurred, further investigation is not required.

(c) Laboratory analysis of levels of chemical constituent concentrations that may be required to confirm a case are:

(1) Benzene

(A) Native Soils - 0.5 mg/kg

(B) Groundwater - 0.005 mg/l

(2) Toluene

(A) Native Soils - 40.0 mg/kg

(B) Groundwater - 1.0 mg/l

(3) Ethyl Benzene

(A) Native Soils - 15.0 mg/kg

(B) Groundwater - 0.7 mg/l

(4) Xylene

(A) Native Soils - 200.0 mg/kg

(B) Groundwater - 10.0 mg/l

(5) TPH

(A) Native Soils - 50.0 mg/kg

(B) Groundwater - 2.0 mg/l

(C) If BTEX concentrations are below action levels, a TPH concentration of 500 ppm or mg/kg in soil shall be required to confirm a case at the discretion of PSTD.

(d) Within twenty (20) days after the reporting of a release, the owner and/or operator must submit a report to PSTD summarizing the steps taken under (a) through (c) of this Section and any resulting information or data. If a release is confirmed through performance of the steps taken under this Section, then the report must be submitted in accordance with a format established by PSTD, after

which corrective action may be required under the provisions of Chapter 29 of Commission rules.

PART 19. RELEASE REPORTING REQUIREMENTS [REVOKED]

165:26-3-191. Release reporting [RENUMBERED]

[Source: Added at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Renumbered to 165:26-3-77 at 23 Ok Reg 2297, eff 7-1-06]

SUBCHAPTER 4. INSPECTIONS, NOTICES OF VIOLATION, FIELD CITATIONS AND FORMAL ENFORCEMENT ACTIONS

PART 1. INSPECTIONS

165:26-4-1. Owner/operator cooperation

- (a) Owners and operators of regulated aboveground storage tank systems must cooperate with inspections, monitoring, sampling and testing requested by or conducted by PSTD.
- (b) Upon request of PSTD, owners and operators must, at all reasonable times:
- (1) Furnish information relating to the owners' or operators' storage tank facilities, the contents of those facilities, and the associated equipment connected to those facilities.
 - (2) Conduct monitoring or testing of storage tank facilities.
 - (3) Permit PSTD to have access to, and to review, inspect, and copy records relating to storage tank facilities.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-4-2. Authority of the Commission

The Commission has the responsibility and authority at any reasonable time to:

- (1) Enter any storage tank facility or other place where a storage tank system is located within the State.
- (2) Inspect and obtain samples from any facility of any regulated substances stored in the storage tank system.
- (3) Conduct monitoring or testing of the tanks, piping, associated equipment, contents, or the environment at regulated facilities and any location impacted or potentially impacted by a release at a regulated facility.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 22 Ok Reg 1752, eff 7-1-05]

165:26-4-3. Completion of inspections

All inspections, whether done by PSTD or ordered by the PSTD to be conducted by the owner or operator, must be started and completed with reasonable promptness, and the results submitted to PSTD consistent with the provisions of this Chapter.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-4-4. [RESERVED]

[Source: Reserved at 17 Ok Reg 2875, eff 7-15-00]

165:26-4-5. Inspection for compliance

(a) All storage tank systems regulated by this Chapter must be physically inspected for compliance with the provisions of this Chapter.

(b) These inspections may include, but not necessarily be limited to:

- (1) Records of installation.
- (2) Records of repair and retrofit operations.
- (3) Review of release containment practices.
- (4) Review of release detection practices.
- (5) Compliance with prior Commission orders to perform corrective action.
- (6) Records of removal and closure.

(c) In addition, PSTD may perform any other inspection, testing, sampling or monitoring which is necessary to ensure compliance with this Chapter and to protect property, human health and safety and the environment.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-4-6. Exception and Variances [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Revoked at 25 Ok Reg 2187, eff 7-11-08]

PART 3. PENALTIES [REVOKED]

165:26-4-10. Penalties [RENUMBERED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Renumbered to 165:26-4-21 at 23 Ok Reg 2297, eff 7-1-06]

PART 5. NOTICES OF VIOLATION, FIELD CITATIONS, AND FORMAL ENFORCEMENT ACTIONS

165:26-4-15. Notices of Violation, Field Citations, and Formal Enforcement Actions

The purpose of this Section is to create a procedure that allows PSTD Fuel Specialists to issue Notices of Violation (NOVs); and for the Manager of Compliance and Inspection to issue Field Citation(s) or refer to the Commission's Judicial and Legislative Services Division for Formal Enforcement Action for any violation(s) found during Fuel Specialists' onsite inspections of storage tank systems and facilities. The issuance of an NOV or Field Citation will allow petroleum storage tank owners and operators to promptly address and correct the storage tank violation(s) before a Formal Enforcement Action is initiated.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-4-16. Notices of Violation

(a) When a PSTD Fuel Specialist finds a violation of any statute, rule, requirement, or order of the Commission regarding the regulation of petroleum storage tanks, the Fuel Specialist may issue a Notice of Violation ("NOV").

- (1) A Notice of Violation is to alert the tank owner or operator that a violation has been found. The NOV will describe the violation, and advise that further PSTD enforcement action may occur if the violation is not corrected.
 - (2) At PSTD's discretion, serious violations can be immediately turned over to the Commission's Judicial and Legislative Services Division for Formal Enforcement Action.
 - (3) The NOV must explain what the offense is and how it can be corrected.
- (b) Notices of Violation will state the following information:
- (1) A clear description of the violation(s).
 - (2) A date by which the violation(s) must be corrected.
 - (3) The name of the Fuel Specialist issuing the NOV, along with a telephone number and address so that the tank owner or operator can ask the Fuel Specialist questions.
- (c) NOV(s) are issued to the owner or operator of the storage tank facility. If the owner/operator is not present, NOV(s) can be given to store personnel.
- (d) All notifications and/or correspondence will be mailed or electronically submitted to the owner and/or operator.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 35 Ok Reg 1010, eff 10-1-18; Amended at 36 Ok Reg 576, eff 8-1-19; Amended at 37 Ok Reg 1143, eff 10-1-20]

165:26-4-17. Re-inspection, Field Citation and Formal Enforcement Actions

- (a) On or after the date that the violation is to be corrected, a Fuel Specialist will re-inspect the storage tank facility to verify that the violation has been corrected.
- (b) If the re-inspection shows that the violation has not been corrected, the Fuel Specialist may:
 - (1) Refer the violation to the PSTD Compliance and Inspection Manager or the Director's designee who may initiate Formal Enforcement Action or issue a Field Citation; and/or
 - (2) Shut down the storage tank system pending correction of the problem or a hearing on the issue.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 33 Ok Reg 615, eff 8-25-16; Amended at 36 Ok Reg 576, eff 8-1-19; Amended at 37 Ok Reg 1143, eff 10-1-20]

165:26-4-18. Issuance of a Field Citation and payment of fine or hearing

- (a) The storage tank owner or operator can either pay the amount of the fine as stated in the Field Citation or request a hearing.
- (b) The tank owner or operator will have thirty (30) days from the date the Field Citation was issued to pay the fine.
 - (1) A fine may be paid with cash, a money order, check or electronic method approved by the Commission. Any cash payment must be made at the Commission cashier window. All checks must be made payable to the Oklahoma Corporation Commission - Petroleum Storage Tank Division. If sending payment through the mail, a copy of the Field Citation must be sent with the payment to ensure proper credit.
 - (2) Payment of the citation within the thirty (30) day time frame will not be considered an agreement or disagreement with the Field Citation.
- (c) If the storage tank owner or operator disagrees with the Field Citation, they may appear at the hearing at the Commission as provided on the Field Citation. If found in violation of PSTD rules at the time the Commission order is issued, the tank

owner or operator must pay the amount of the fine, as well as an administrative cost of \$250.00.

(d) Refusal to comply with an order of the Commission may result in an additional fine being levied after notice and hearing in an amount as allowed by law, and shutdown of the storage tank system for failure to pay fines.

(e) Failure of a tank owner or operator to appear at the hearing may result in additional enforcement action.

(f) Any exceptions to the hearing may be made in accordance with OAC 165:5.

(g) A tank owner or operator is still responsible for following the Commission's rules regarding petroleum storage tanks regardless of paying a fine or correcting a violation.

PART 7. PENALTIES

165:26-4-21. Penalties

(a) Pursuant to 17 O.S. § 311(A), any person who violates any of the provisions of this Chapter shall be liable for an administrative penalty or fine not to exceed \$10,000.00 for each day that the violation continues.

(b) If the person disagrees with the violation(s) listed in the Formal Enforcement Action, they may appear at the hearing at the Commission. If found in violation of PSTD rules at the time the Commission order is issued, the person must pay the amount of the fine, as well as an administrative cost of \$250.00.

SUBCHAPTER 6. REQUIREMENTS FOR ABOVEGROUND STORAGE TANK SYSTEMS UTILIZED BY AIRPORTS OPEN TO THE PUBLIC

PART 1. GENERAL APPLICATION AND COMPLIANCE PROVISIONS

165:26-6-1. Application

- (a) This Subchapter applies to aboveground storage tank systems for aircraft fuel at airports. A storage tank system consists of a stationary tank and the pipes, pumps and dispensers attached to it. This Chapter does not extend to aircraft fuel servicing vehicles.
- (b) Private airstrips are excluded from this Subchapter.
- (c) Subchapters 1 General Provisions, 2 General Requirements for AST's, 3 Release Prevention and Detection, and 4 Inspections, Penalties, and Field Citations shall also apply in addition to this Subchapter.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-6-2. Timeframes for registration and compliance with rules

- (a) Stationary tanks greater than 110 gallons must be registered with PSTD.
- (b) Airport tank systems must come into full compliance with the rules of this Chapter and subchapters before July 1, 2009.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-6-3. Codes and standards

PSTD adopts NFPA 407, which serves as a basis for the standards in this Subchapter. A copy of NFPA 407 is available for inspection at PSTD during regular business hours.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-6-4. Local jurisdiction [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-6-5. Consultation of Petroleum Storage Tank Division [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

PART 3. TANK DESIGN, CONSTRUCTION, CAPACITY AND LOCATION REQUIREMENTS

165:26-6-9. Approved tanks, tank design [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-6-10. Maximum capacity for tanks

There is no maximum capacity for storage tanks at airports. Local jurisdictions may have more stringent regulations.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04]

165:26-6-11. Emergency pressure release venting [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-6-12. Aboveground storage tank spacing [REVOKED]

165:26-6-40. Aboveground piping at airports

- (a) Aboveground product piping must be metal and rated for the system working pressure or at least 125 psi (860 kPa), whichever is greater.
- (b) Flanged connections or approved couplings must be provided to avoid the need for cutting and welding where components are serviced or replaced. Gaskets in flanged connections must be of a material and design that resist fire exposure for a time comparable to the flange and bolts.
- (c) Piping must be adequately supported.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04]

PART 11. VAULT REQUIREMENTS [REVOKED]

165:26-6-52. Vent piping height [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

PART 15. DISPENSER REQUIREMENTS

165:26-6-60. Dispensers [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 19 Ok Reg 1616, eff 6-13-02; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-6-61. Dispenser hose

- (a) Aircraft fueling hose that is frequently used must be inspected before use each day.

- (1) The hose must be checked for evidence of blistering, carcass saturation or separation, cuts, nicks or abrasions that expose reinforcement material, and for slippage, misalignment or leaks at couplings.

- (2) If coupling slippage or leaks are found, the cause of the problem must be determined.
- (b) Defective hoses must be immediately removed from service.
- (c) At least once each month the hose must be thoroughly inspected including:
 - (1) The hose couplings and the hose must be examined for a length approximately 12 in. (305 mm) adjacent to the couplings.
 - (2) Structural weakness must be checked by pressing the hose in the area around its entire circumference for soft spots.
 - (3) Hoses that show evidence of soft spots must be immediately removed from service.
 - (4) The nozzle screens must be examined for rubber particles. The presence of rubber particles indicates possible deterioration of the interior, and the hose must be immediately removed from service.
 - (5) A hose assembly that has been subjected to abuse, such as severe end-pull, flattening or crushing by a vehicle, or sharp bending or kinking, must be immediately removed from service.
 - (6) If inspection shows that a portion of a hose has been damaged, the hose must be immediately replaced. Two lengths of hose must not be coupled together.
 - (7) Before any hose assembly is placed in service, it must be visually inspected for evidence of damage or deterioration.
 - (8) Kinks or short loops in fueling hose must be avoided.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05]

165:26-6-62. [RESERVED]

[Source: Reserved at 17 Ok Reg 2875, eff 7-15-00]

165:26-6-63. Dispenser location at airports

- (a) Fueling hydrants, cabinets and pits must be located at least 50 ft (15.2 m) from any terminal building, hangar, service building, or enclosed passenger concourse (other than loading bridges).
- (b) Pumps must be located at or below ground level.
- (c) Relay pumping is not allowed.
- (d) Pumps installed outside of buildings must be located at least 5 ft. (1.5 m) from any building opening. They must be substantially anchored and protected against physical damage from collision.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00]

165:26-6-64. Specific requirements for airport dispensers

- (a) The valve that controls the flow of fuel to an aircraft must have a deadman control. The deadman control device must be arranged to accommodate the operational requirements. The fuel flow control valve must be one of the following:
 - (1) The hydrant pit valve.
 - (2) On the hose nozzle for overwing servicing.
- (b) Deadman controls must be designed to preclude defeating their intended purpose.
- (c) The deadman flow control in the nozzle may be used for overwing fueling.
 - (1) Notches or latches in the nozzle handle that could allow the valve to be locked open are prohibited.

- (2) Each overwing servicing nozzle must have a cable with a plug or clip for bonding to the aircraft.
- (3) Nozzles for underwing fueling must be designed to be attached securely to the aircraft adapter before the nozzle can be opened. It must not be possible to disengage the nozzle from the aircraft adapter until the nozzle is fully closed.
- (d) Fuel servicing pump mechanisms must be designed and arranged so that failure or seizure does not cause rupture of the pump housing, a tank, or of any component containing fuel. Fuel pressure must be controlled within the stress limits of the hose and plumbing by means of either an in-line pressure controller, a system pressure relief valve, or other suitable means. The working pressure of any system component must equal or exceed any pressure to which it could be subjected.
- (e) Listed or approved dispensing devices must be used.
- (f) Access to dispensing equipment must be controlled by means of mechanical or electronic devices designed to resist tampering and to prevent access or use by unauthorized persons.
- (g) Dispensing devices must have a listed or approved emergency shutoff valve, incorporating a fusible link or other thermally actuated device designed to close automatically in case of fire.
 - (1) This valve must also incorporate a shear section that automatically shuts off the flow of fuel due to severe impact.
 - (2) This valve must be rigidly mounted at the base of the dispenser in accordance with the manufacturer's instructions.
 - (3) Dispensing devices or cabinets must be designed so that a proper bond between the aircraft and the fueling equipment can be established.

PART 17. TANK FILLING PROCEDURES

165:26-6-70. Tank filling operation [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-6-71. [RESERVED]

[Source: Reserved at 17 Ok Reg 2875, eff 7-15-00]

165:26-6-72. Tightfill connection requirements [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-6-73. Emergency controls

- (a) Each fuel system must have means for quickly and completely shutting off the flow of fuel in an emergency. This requirement is in addition to the requirement for a deadman control of fuel flow.
- (b) The emergency fuel shutoff system must include shutoff stations located outside of probable spill areas and near the route that normally is used to leave the spill area or to reach the fire extinguishers provided for the protection of the area.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00]

PART 19. DISPENSING PROCEDURES

165:26-6-80. Dispensing fuel into aircraft

Aircraft being fueled from a stationary dispenser must be positioned so that aircraft fuel system vents or fuel tank openings are not closer than 25 ft. (8 m) from any terminal building, hangar, service building or enclosed passenger concourse other than a loading walkway. Aircraft being fueled must not be positioned so that the vent or tank openings are within 50 ft. (15 m) of any combustion and ventilation air-intake to any boiler, heater or incinerator room.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00]

165:26-6-81. Static protection and bonding

- (a) Dispensing devices or cabinets must be designed so that a proper bond between the aircraft and the fueling equipment can be established.
- (b) Conductive hose must be used to prevent electrostatic discharge but not to accomplish required bonding.

SUBCHAPTER 8. REQUIREMENTS FOR ABOVEGROUND STORAGE TANK SYSTEMS UTILIZED BY MARINAS

PART 1. GENERAL APPLICATION AND COMPLIANCE PROVISIONS

165:26-8-1. Application

(a) This Subchapter applies to the storage, handling and use of regulated substances kept in aboveground storage tanks at marinas.

(b) Subchapters 1 General Provisions, 2 General Requirements for AST's, 3 Release Prevention and Detection, and 4 Inspections, Penalties, and Field Citations shall also apply in addition to this Subchapter.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-8-2. Timeframes for registration and compliance with rules

(a) Tanks that are greater than 110 gallons must be registered with PSTD. The tank and piping system must come in compliance with the rules of this Chapter and Subchapter before July 1, 2009. Compliance may be required sooner for any part of a system which poses a threat to property, people, or to the environment.

(b) All new underground piping at existing facilities must be installed in accordance with 165:26-2-55, "Underground piping materials," and with 165:26-3-20.2, "Installation and monitoring requirements for underground piping."

(c) All dock or pier product piping from the shoreline to the dispensers at new facilities must be installed according to 165:26-8-40.1 "Over-water piping at marinas" and 165:26-8-40.2 "Installation requirements for over-water piping".

(d) All dock or pier product piping from the shoreline to the dispensers at existing facilities must be upgraded before the deadline date of July 1, 2009 according to 165:26-8-40.1 "Over-water piping at marinas" and 165:26-8-40.2 "Installation requirements for over-water piping".

(e) Temporary tanks may not be used at marinas.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 36 Ok Reg 576, eff 8-1-19]

165:26-8-2.1. Release detection requirements for marinas

Monitoring requirements, at a minimum, must consist of an annual line tightness test conducted no later than April 1st of each year.

[Source: Added at 23 Ok Reg 144, eff 10-6-05 (emergency); Added at 23 Ok Reg 2297, eff 7-1-06]

165:26-8-3. Codes and standards [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-8-4. Local jurisdiction [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-8-5. Consultation of Petroleum Storage Tank Division [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

PART 3. TANK DESIGN, CONSTRUCTION, CAPACITY AND LOCATION REQUIREMENTS

165:26-8-9. Approved tanks, tank design [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-8-10. Maximum capacity for tanks

Aboveground storage tanks storing gasoline and diesel fuel at an individual site must be limited to a maximum capacity of 12,000 gal. (45,600 L) and an aggregate capacity of 40,000 gal. (152,000 L). Local jurisdictions may have more stringent regulations.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04]

165:26-8-11. Emergency pressure release [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-8-39. Underground piping materials [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 19 Ok Reg 1616, eff 6-13-02; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-8-40. Aboveground piping at marinas [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Revoked at 23 Ok Reg 144, eff 10-6-05 (emergency); Revoked at 23 Ok Reg 2297, eff 7-1-06]

165:26-8-40.1. Over-water piping at marinas

(a) The design, fabrication, assembly, test, and inspection of the piping system from the fuel tank to the fuel dispensers must be in accordance with NFPA 30 and NFPA 30A.

(b) The piping must be installed according to the manufacturers installation recommendations and instructions.

(c) Piping must be listed and approved by the manufacturer for aboveground installations.

[Source: Added at 23 Ok Reg 144, eff 10-6-05 (emergency); Added at 23 Ok Reg 2297, eff 7-1-06]

165:26-8-40.2. Installation requirements for over-water piping

(a) Steel piping.

(1) Piping shall be installed with proper support and strain relief in order to eliminate the physical stress on the piping and piping connections caused by the constant movement of the water and floating dock. Fuel piping and electrical conduit shall be rigidly attached to the dock before the piping

enters the sump area, in order to prevent strain on the entry boots and primary pipe fittings.

(2) Steel flex connectors must be used between the shore piping and the piping on the floating structure and between separate sections of the floating structure to allow for movement of the dock and changes in water levels.

(3) Onshore piping must be rigidly anchored in place to prevent movement when water levels are elevated.

(4) A listed emergency breakaway device designed to retain liquid on both sides of the breakaway point must be installed on each line serving the dock. The breakaway device shall be located where the dock piping will separate from the shore or secured ramp piping. The piping shall be secured at both ends of the breakaway device so that the piping will withstand the forces and pressures exerted upon it.

(5) There must be a normally closed explosion proof solenoid valve with built-in pressure relief or a normally closed explosion proof solenoid valve and a pressure relief valve installed in each product line at the shoreline.

(6) A ball valve must be installed at the shoreline in order to manually shut off the flow of fuel.

(7) Containment sumps must be installed under all dispensers and monitored with sensors. If a pressure system is used all sump sensors must automatically control the electricity to both the solenoid valves and submerged pump. If a suction system is used the sump sensors should automatically control the electricity to both the solenoid valve and suction pump motor.

(8) If the onshore piping is double walled a transition sump is required at the shoreline in order to contain a release from the onshore piping. The transition sump must contain the ball valve and solenoid valve and be rigidly anchored in place.

(b) Double walled piping.

(1) Double walled piping must be installed according to the double wall piping manufacturer recommendations.

(2) All double walled piping installed above the water shall be enclosed inside a rigid metal chase or conduit except at joints requiring flexibility. A flexible metal conduit can be used between shore piping and piping on the floating structure or between separate sections of the floating structure to allow for movement of the dock and changes in water levels. Both the rigid and flexible metal chase/conduit must shield the fuel pipe from damage by fire and in itself be fire resistant.

(3) Due to the constant movement of the water and the floating dock, piping shall be installed with proper support and strain relief in order to eliminate the physical stress on the piping and piping connections. Fuel piping and electrical conduit shall be rigidly attached to the dock before the piping enters the sump area, in order to prevent strain on the entry boots and primary pipe fittings.

(4) Onshore piping must be rigidly anchored in place to prevent movement when water levels are elevated.

(5) A listed emergency breakaway device designed to retain liquid on both sides of the breakaway point must be installed on each line serving the dock. The breakaway device shall be located where the dock piping will separate from the shore or secured ramp piping. The piping shall be secured

at both ends of the breakaway device so that the piping will withstand the forces and pressures exerted upon it.

(6) There must be a normally closed explosion proof solenoid valve with built-in pressure relief or a normally closed explosion proof solenoid valve and a pressure relief valve installed in each product line at the shoreline.

(7) A ball valve must be installed at the shoreline in order to manually shut off the flow of fuel. It must be installed so that it is accessible to the operator at all water levels.

(8) Containment sumps must be installed under all dispensers and monitored with sensors. If a pressure system is used all sump sensors must automatically control the electricity to both the solenoid valves and submerged pump. If a suction system is used the sump sensors should automatically control the electricity to both the solenoid valve and suction pump motor.

(9) A transition sump must be rigidly anchored in place either on the dock or at the shoreline. The transition sump must contain the ball valve, solenoid valve, and emergency breakaway device. The transition sump must be either monitored with a sensor or a bypass tube must be used in order to divert a leak from the transition sump to the dispenser sump where it would be detected by a sensor.

165:26-8-50. [RESERVED]

[Source: Reserved at 17 Ok Reg 2875, eff 7-15-00]

PART 13. VENTING AND VENTING SPECIFICATIONS [REVOKED]

165:26-8-51. Vent piping size [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-8-52. Vent piping height [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

PART 15. DISPENSER REQUIREMENTS

165:26-8-60. Dispensers [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-8-61. Dispenser hose

Listed hose assemblies must be used to dispense fuel. Where hose length exceeds 18 ft (5.5m), the hose shall be secured so as to protect it from damage, such as a hose reel, and in no case shall the hose exceed 50 ft (15m) in length.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2297, eff 7-1-06]

165:26-8-62. Nozzles

Dispensing nozzles used at marinas must be the automatic closing type. Hold-open latch devices from nozzles for marina service are not allowed.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 144, eff 10-6-05 (emergency); Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 37 Ok Reg 1143, eff 10-1-20]

165:26-8-63. Dispenser location at marinas

Dispensing devices at marinas may be located on open piers, wharves, floating docks, shores or on piers of the solid-fill type, but must be located apart from other structures to provide room for safe ingress and egress of watercraft for fueling. Dispensing devices must be in all cases at least 20 ft. (6 m) from any activity involving fixed sources of ignition.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 22 Ok Reg 1752, eff 7-1-05]

165:26-8-64. Specific requirements for dispensers at marinas; maintenance

When maintenance of a Class I dispenser is necessary the following precautions must be taken before maintenance begins:

- (1) Only persons knowledgeable in performing the required maintenance can perform the work.
- (2) All electrical power to the dispenser, the dispensing pump, and all associated circuits must be shut off at the main electrical panel.
- (3) The emergency shutoff valve at the dispenser, if installed, must be closed.
- (4) All unauthorized persons are prohibited from coming within 20 ft (6 m) of the dispenser while the maintenance work is being done.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00]

PART 19. DISPENSING PROCEDURES

165:26-8-80. Attendants at marinas

(a) Marinas may have an attendant or supervisor on duty when the marina is open for business. The attendant's primary function will be to supervise, observe, and control the dispensing of fuels to insure that all safety requirements are met, and to insure that the waters of the state are not contaminated by fuel.

(b) At unattended marine facilities an emergency shut off device must be installed to meet the following requirements:

- (1) Installed between 20 to 100 feet from the fuel dispensing devices that they serve.
- (2) Device must shut down the fuel dispensing system in the event of an emergency.
- (3) Must be readily accessible to patrons.
- (4) Emergency instructions must be conspicuously posted.

PART 21. MISCELLANEOUS SAFETY PROVISIONS

165:26-8-85. Fencing [REVOKED]

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

165:26-8-86. Required signs

All marinas must have a sign printed in ¼ to ½ inch text in black or red block capital letters on a white background conspicuously posted and easily readable from the dispensing area which says:

- (1) BEFORE FUELING:
 - (A) Stop all engines and auxiliaries.
 - (B) Shut off all electricity, open flames and heat sources.
 - (C) Check all bilges for fuel vapors.
 - (D) Extinguish all smoking materials.
 - (E) Close access fittings and openings to prevent fuel vapors from entering enclosed spaces of the vessel.
- (2) DURING FUELING:
 - (A) Maintain nozzle contact with the fill pipe.
 - (B) Wipe up spills immediately.
 - (C) Avoid overfilling.
 - (D) Fuel filling nozzle must be attended at all times.
- (3) AFTER FUELING:
 - (A) Inspect bilges for leakage and fuel odors.
 - (B) Ventilate until odors are gone.

165:26-8-88. Fire extinguishers

- (a) Each marina must have a 40B:C fire extinguisher.
- (b) A minimum of three (3) extinguishers must be located at the fuel dock and one or more located so they will be within fifty feet (50') or fifteen meters (15 m) of each pump, dispenser, and underground fill pipe opening.
- (c) Piers which extend more than five hundred feet (500') or one hundred fifty-two meters (152 m) in travel distance from shore must have a Class III standpipe installed in accordance with NFPA 14, Standard for the Installation of Standpipe and Hose Systems.
- (d) There must be a knife at the fuel dock for quickly cutting mooring lines in an emergency and a push pole for shoving away a boat.

SUBCHAPTER 10. REQUIREMENTS FOR ABOVEGROUND STORAGE TANK SYSTEMS UTILIZED BY RETAIL FACILITIES

PART 1. GENERAL APPLICATION AND COMPLIANCE PROVISIONS

165:26-10-1. Application

(a) This Subchapter applies to the storage, handling and use of all regulated substances which are kept in aboveground storage tanks, at facilities which engage in the retail sale of a Regulated Substance.

(b) Subchapters 1 General Provisions, 2 General Requirements for AST's, 3 Release Prevention and Detection, and 4 Inspections, Penalties, and Field Citations shall also apply in addition to this Subchapter.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08; Amended at 26 Ok Reg 1831, eff 7-1-09]

165:26-10-2. Timeframes for registration and compliance with rules

(a) Tanks at retail facilities that are greater than 110 gallons must be registered with PSTD.

(b) Temporary tanks may not be used at retail facilities.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 24 Ok Reg 1479, eff 7-1-07; Amended at 25 Ok Reg 2187, eff 7-11-08]

SUBCHAPTER 12. REQUIREMENTS FOR ABOVEGROUND STORAGE TANK SYSTEMS UTILIZED AT FLEET AND COMMERCIAL FACILITIES

PART 1. GENERAL APPLICATION AND COMPLIANCE PROVISIONS

165:26-12-1. Application

(a) This Subchapter applies to the storage, handling and use of gasoline and diesel fuel at fleet and commercial facilities which are kept in aboveground storage tanks, with an individual capacity of 2,100 gallons or more. Aboveground storage tanks with an individual capacity of less than 2,100 gallons are not subject to PSTD regulation, and may not access the Indemnity Fund in the event of a release from such aboveground storage tanks. Although PSTD does not regulate aboveground storage tanks with an individual capacity of less than 2,100 gallons, owners of such tanks should be aware they may be subject to regulation by other jurisdictions.

(b) Subchapters 1 General Provisions, 2 General Requirements for AST's, 3 Release Prevention and Detection, and 4 Inspections, Penalties, and Field Citations shall also apply in addition to this Subchapter.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 24 Ok Reg 1479, eff 7-1-07; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-12-2. Timeframes for registration and compliance with rules

(a) Tanks at fleet or commercial facilities with a capacity of 2,100 gallons or greater must be registered with PSTD.

(b) Temporary tanks may not be used at fleet and commercial facilities.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 19 Ok Reg 1616, eff 6-13-02; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 23 Ok Reg 2297, eff 7-1-06; Amended at 24 Ok Reg 1479, eff 7-1-07; Amended at 25 Ok Reg 2187, eff 7-11-08]

**SUBCHAPTER 14. REQUIREMENTS FOR ABOVEGROUND STORAGE
TANK SYSTEMS UTILIZED BY BULK PLANT FACILITIES**

PART 1. GENERAL APPLICATION AND COMPLIANCE PROVISIONS

165:26-14-1. Application

(a) This Subchapter applies to the storage, handling and use of regulated substances at bulk plant facilities which are kept in aboveground storage tanks. Bulk plants built after July 15, 2000 must comply with this Chapter and Subchapter.

(b) Bulk plants, already in existence on July 15, 2000 will not be required to comply with these rules unless they pose a threat to property, people or the environment. If a safety or environmental threat does exist at a bulk plant, the owner will be required to correct the specific problem.

(c) Subchapters 1 General Provisions, 2 General Requirements for AST's, 3 Release Prevention and Detection, and 4 Inspections, Penalties, and Field Citations shall also apply in addition to this Subchapter.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04; Amended at 22 Ok Reg 1752, eff 7-1-05; Amended at 25 Ok Reg 2187, eff 7-11-08]

165:26-14-2. Timeframes for registration and compliance with rules

(a) Tanks at bulk plants must be registered with PSTD. The tanks must come in compliance with the rules of this Subchapter before July 15, 2010. Compliance may be required sooner for any part of an existing bulk plant that poses a threat to property, people or the environment.

(b) Temporary tanks will not be allowed at bulk plant facilities.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Revoked at 21 Ok Reg 2079, eff 7-1-04]

PART 15. DISPENSER REQUIREMENTS

165:26-14-60. Dispensers

Bulk plants which have, in addition to their distribution business, a facility for dispensing fuel directly into the fuel tanks of automobiles and trucks must comply with the dispenser requirements of retail facilities.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00; Amended at 21 Ok Reg 2079, eff 7-1-04]

165:26-14-61. [RESERVED]

165:26-14-62. [RESERVED]

[Source: Reserved at 17 Ok Reg 2875, eff 7-15-00]

165:26-14-63. Location of loading facilities

Tank vehicle and tank car loading and unloading facilities must be separated from aboveground tanks, warehouses, other plant buildings or the nearest line of adjoining property that can be built upon by a distance of at least 25 ft (7.6 m) for Class I liquids and at least 15 ft (4.6 m) for Class II and Class III liquids, measured from the nearest fill spout or transfer connection.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00]

165:26-14-64. Specific requirements for loading facilities

- (a) Loading and unloading facilities must be provided with drainage systems or other means to contain spills.
- (b) A loading or unloading facility that has a canopy or roof that does not limit the dissipation of heat or dispersion of flammable vapors and does not restrict fire-fighting access and control will be treated as an outdoor facility.
- (c) Loading and unloading facilities at bulk plants that are used to load motor fuel into tank vehicles through open domes must be provided with a means for electrically bonding to protect against static electricity hazards.
 - (1) It must consist of a metal wire that is permanently and electrically connected to the bulk plants fill pipe assembly or to some part of the bulk plants rack structure that is in electrical contact with the fill pipe assembly.

- (2) The free end of this wire must have a clamp for convenient attachment to some metallic part of the vehicle that is in electrical contact with the cargo tank of the tank vehicle.
- (3) All parts of the fill pipe assembly, including the drop tube, must form a continuous electrically conductive path.
- (d) Bulk plants where motor fuel or blending materials are loaded or unloaded through open domes of railroad tank cars must be protected against stray electrical current by permanently bonding the bulk plant's fill pipe and the individual storage tanks to at least one rail of the railroad.
- (e) Equipment such as piping, pumps, and meters used for the transfer of Class I liquids between storage tanks and the fill stem of the loading facility cannot be used for the transfer of Class II or Class III liquids.
 - (1) This provision does not apply to water-miscible liquid mixtures where the class of the mixture is determined by the concentration of liquid in water.
 - (2) This provision does not apply where the equipment is cleaned between transfers.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00]

PART 17. TANK FILLING PROCEDURES

165:26-14-70. Tank filling operation

A delivery vehicle must be separated from any aboveground tank to which it is delivering fuel by at least 25 ft. (7.6 m) if possible.

- (1) No minimum separation distance is required for storage tanks that are filled by gravity.
- (2) The required minimum separation distance will be reduced to 15 ft. (4.6 m) where the fuel being delivered is not a Class I liquid.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00]

165:26-14-71. Switch loading

To prevent hazards due to a change in flash point of liquids, no tank or tank vehicle that has previously contained a Class I liquid may be loaded with a Class II or Class III liquid unless proper precautions are taken.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00]

165:26-14-72. [RESERVED]

165:26-14-73. [RESERVED]

[Source: Reserved at 17 Ok Reg 2875, eff 7-15-00]

PART 19. DISPENSING PROCEDURES

165:26-14-80. Dispensing fuel into tank vehicles

Tank vehicles must be loaded and unloaded as follows:

- (1) Liquids can only be loaded into cargo tanks whose material of construction is compatible with the chemical characteristics of the liquid.

- (2) The liquid being loaded must also be chemically compatible with the liquid hauled on the previous load unless the cargo tank has been cleaned.
- (3) When transferring Class I liquids, engines of tank vehicles or motors of auxiliary or portable pumps must be shut down while making and breaking hose connections.
- (4) If loading or unloading is done without requiring the use of the motor of the tank vehicle, the vehicle's motor must be shut down throughout any transfer operations involving Class I liquids.
- (5) Filling through open domes into the tanks of tank vehicles must be by means of a downspout that extends to within 6 in. of the bottom of the tank.
- (6) When top loading a tank vehicle with Class I or Class II liquids without a vapor control system, valves used for the final control of flow must be of the self-closing type and must be manually held open except where automatic means are provided for shutting off the flow when the vehicle is full.
 - (A) Automatic shutoff systems must be provided with a manual shutoff valve located at a safe distance from the loading nozzle to stop the flow if the automatic system fails.
 - (B) When bottom loading a tank vehicle, a positive means must be provided for loading a predetermined quantity of liquid, together with a secondary automatic shutoff control to prevent overflow.
 - (C) The connecting components between the loading rack and the tank vehicle that are required to operate the secondary control must be functionally compatible.
 - (D) The connection between the liquid loading hose or pipe and the truck piping must be by a dry disconnect coupling.
- (7) When bottom loading a tank vehicle that is equipped for vapor control, but when vapor control is not used, the tank must be vented to the atmosphere, at a height not lower than the top of the cargo tank of the vehicle, to prevent pressurization of the tank. Connections to the facility's vapor control system must be designed to prevent the escape of vapor into the atmosphere when not connected to a tank vehicle.
- (8) When bottom loading is used, reduced flow rates (until the fill opening is submerged), splash deflectors or other devices must be used to prevent splashing and to minimize turbulence.
- (9) To allow for the relaxation of charge, metal or conductive objects, such as gauge tapes, sample containers and thermometers must not be lowered into a compartment while the compartment is being filled or immediately after pumping stops.

[Source: Added at 17 Ok Reg 2875, eff 7-15-00]

165:26-14-81. Static protection and bonding

Before loading tank vehicles through open domes, a bonding connection must be made to the vehicle or tank before dome covers are raised and must remain in place until filling is completed and all dome covers have been closed and secured.

165:26-14-86. Required signs

(a) Conspicuous and legible signs prohibiting smoking must be posted within sight of the customer being served.

(b) Warning signs must be conspicuously posted in the dispensing area incorporating the following or equivalent wording:

(1) WARNING: It is unlawful and dangerous to dispense gasoline into unapproved containers.

(2) NO SMOKING.

(3) STOP MOTOR.

CHAPTER 27. INDEMNITY FUND

[Authority: 17 O.S., §§ 52, 301, 306(12), 307, 322, and 342; 27A O.S., § 1-3-101]

[Source: Codified 6-25-92]

SUBCHAPTER 1. GENERAL PROVISIONS

165:27-1-1. Purpose

The Indemnity Fund Program will provide reimbursement for corrective action performed of PSTD regulated pollution sites that have resulted from releases of petroleum from storage tank systems. The Indemnity Fund Program as a good steward of monies entrusted to it, will also prioritize cases to most effectively protect the public health, safety and welfare and minimize damage to the environment. In order to accomplish these purposes, the Indemnity Fund Program will reimburse allowable costs incurred for corrective action to eligible parties for eligible releases from eligible tank systems and advise, consult, cooperate with and assist other agencies of this state.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 12 Ok Reg 2069, eff 7-1-95; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 30 Ok Reg 589, eff 7-1-13; Amended at 32 Ok Reg 805, eff 8-27-15]

165:27-1-2. Definitions

In addition to the terms defined in 17 O.S. Sections 303, and in Oklahoma Administrative Code (OAC) 165:25-1-11, 165:26-1-2, and 165:29-1-11 the following words or terms, when used in this Chapter, are the Commission's interpretation of enabling statutes and shall have the following meaning unless the context clearly indicates otherwise:

"Actual physical damage" means those damages to real and personal property directly related to corrective action performed on a release of petroleum from a Commission regulated storage tank system. Personal property damage is limited to the replacement value of the personal property less depreciation. Real property damage is limited to the lesser of the property value or diminution in property value directly associated with a release of regulated substances from a Commission regulated storage tank system. In no event will the Indemnity Fund reimburse speculative damages, inferred damages, unrealized damages or any other damages where damage costs are not actually incurred, paid, or otherwise established to the Commission's satisfaction. The burden of proof shall be upon the person seeking compensation from actual physical damages.

"Allowable Costs" means costs that are reasonable, integral and necessary to corrective action.

"Associated costs" means expenses that are not integral to the corrective action and not subject to reimbursement.

"Chemicals of Concern" or **"COC"** means chemicals that may pose a threat to human health and the environment.

"Claim" or **"Claims"** means a properly submitted request for reimbursement from the Fund for an eligible suspicion of release ("SOR") or confirmed release case when the co-pay is paid.

"Closed case" means a petroleum release case for which final resolution has been made of all invoices submitted for corrective action taken under an application for reimbursement from the Indemnity Fund and the PSTD Technical Department deems no further corrective action is necessary.

"Commission" or **"OCC"** means the Oklahoma Corporation Commission.

"Confirmed Release" means a release of a regulated substance from a regulated storage tank system resulting in free product, contaminated soils or groundwater that exceed state action levels, organic vapor readings significantly above background levels, petroleum staining or odors or any other indication that a release has occurred that could be harmful to human health, safety or the environment and to which a PSTD case number is assigned and further corrective action is required.

"Disbursement" includes all monies, actually paid, expended, encumbered, reserved or attributable to a reimbursable event(s).

"Dispenser" means equipment, gauge(s), hose(s), nozzle(s), immediately associated pipe or fittings and other such appurtenances located aboveground and intended for dispensing PSTD-regulated substances from a tank system.

"Electronic signature" means an electronic signature as defined in OAC 165:5-1-3.

"Fund" means the Petroleum Storage Tank Indemnity Fund.

"Licensed Environmental Consultant" means an individual who has a current license issued by the PSTD to perform corrective action.

"Medical injury(ies)" means actual physical injury to a person in which medical costs have been incurred in association with the diagnosis and treatment of a physical injury directly caused by corrective action performed on a release of petroleum from a Commission regulated storage tank system.

"Modified eligibility" means the eligibility process for a suspicion of release ("SOR") case in which substantial compliance review is not required and the Indemnity Fund co-payment is paid upon closure of the SOR case. In the event the SOR case becomes a confirmed release case, a substantial compliance review is required and the statutory co-payment must be remitted within 30 days of the invoice date.

"Occurrence" means the release of a PSTD regulated substance into the soil or groundwater. Each PSTD regulated substance will be treated as one (1) occurrence regardless of the composition of the substance released. Separate occurrences of the same PSTD regulated substance may be allowed if evidence establishes the PSTD regulated substance occurred in two (2) different tank system locations, are separated by time, or both.

"Operator" means any person in control of or having responsibility for the daily operation of the storage tank system, whether by lease, contract, or other form of agreement. The term "operator" also includes a past operator at the time of a release, tank closure, violation of the Oklahoma Petroleum Storage Tank Consolidation Act, or a rule promulgated thereunder, or a requirement of the Commission. In the case of a storage tank system in service/use before November 8, 1984, but no longer in service/use on that date, the last person to operate the storage tank system immediately before the discontinuation of its service/use.

"Owner" means any person as set forth in 17 O.S. § 303(27), including the real property owner where the storage tank system is still present, the storage tank system presence is a trade fixture or improvement or both. It is not necessary that the real property owner sold, used, or stored regulated substances in, of, or from the storage tank system. However, a real property owner who has a storage tank system

located on their property that was taken out of service/use prior to November 8, 1984, is not considered to be a storage tank owner for any PSTD regulated purpose.

"Petroleum storage tank system" means a closed-plumbed system including storage tank(s), line(s) and dispenser(s) for a given product, e.g. a facility site can have a gasoline and a diesel system, or systems for different grades of gasoline, or even separate systems for the same grade of gasoline. It also includes a delivery truck when attached to a tank system, and a used oil tank.

"PSTD" means Petroleum Storage Tank Division, or Division.

"Purchase Order" means a document submitted to PSTD online to obtain pre-approval by PSTD of a scope of work and the costs associated with the scope of work.

"Recalcitrant owner" means an owner/operator who is responsible for a tank system and after notice will not adhere to a PSTD enabling statute, Commission rule, requirement or order.

"Reimbursement" means repayment of an approved claim to a qualified Claimant or Assignee, or for an Administrative Application, or payment of an approved claim submitted on behalf of a qualified Claimant for incurred allowable costs resulting from an eligible release.

"Remedial Action Plan" means a plan implementing the required and approved remediation.

"Suspicion of Release" or "SOR" means preliminary investigative work to determine if a release of a regulated substance has occurred.

"Work Plan" means a proposed scope of work submitted online to implement corrective action.

165:27-1-4. Authority

17 O.S. 2018, §§301 et seq. establishes the Oklahoma Petroleum Storage Tank Indemnity Fund.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 23 Ok Reg 1661, eff 7-1-06; Amended at 36 Ok Reg 593, eff 8-1-19]

165:27-1-5. Citation of rules

This Chapter shall be known as the Oklahoma Corporation Commission's General Rules and Regulations Governing the Petroleum Storage Tank Indemnity Fund and may be cited as Chapter 27 of Commission rules.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 32 Ok Reg 805, eff 8-27-15]

165:27-1-6. Prescribed forms

Use of the online format established by PSTD is required.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 10 Ok Reg 2627, eff 6-25-93; Amended at 12 Ok Reg 2069, eff 7-1-95; Amended at 15 Ok Reg 3033, eff 7-15-98; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 32 Ok Reg 805, eff 8-27-15; Amended at 37 Ok Reg 1155, eff 10-1-20]

SUBCHAPTER 3. ELIGIBILITY REQUIREMENTS

165:27-3-1. General requirements

In order to qualify for reimbursement from the Fund, a person must meet the following requirements:

- (1) The person must be an eligible storage tank owner or operator, property owner, adjacent property owner, or impacted party who has met applicable criteria for Fund reimbursement, to include Fund eligibility for an OCC confirmed release case, or a PSTD authorized Purchase Order for a Suspicion of Release, that does require modified eligibility. The Director of PSTD may make a formal administrative application without meeting eligibility criteria.
- (2) The claimant must have incurred eligible expenses for an eligible release from an eligible tank for which reimbursement is requested.
- (3) The claimant must submit properly completed forms, purchase orders, reports, and claims for reimbursement to the Fund in accordance with governing statutes, the rules of this Chapter, and OAC 165:25, 165:26, and 165:29 in a format established by PSTD. Failure to submit required paperwork within the required timeframe may result in an enforcement action.
- (4) The release of substances must be from an eligible tank system, either present, abandoned, or formerly present at the facility where the release occurred. It is the sole duty and responsibility of the Indemnity Fund applicant to establish to the satisfaction of the PSTD that a tank system is/was formerly present, and that the tank system contains/contained regulated substances.
- (5) If tanks were in service after November 8, 1984, the person who currently owns either the tank system or the property or both, where a tank system is located, is the eligible person regardless of the person never having sold, stored or otherwise owned or operated the storage tank system while the storage tank system contained regulated substances.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 10 Ok Reg 2627, eff 6-25-93; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 30 Ok Reg 589, eff 7-1-13; Amended at 32 Ok Reg 805, eff 8-27-15; Amended at 35 Ok Reg 1027, eff 10-1-18; Amended at 36 Ok Reg 593, eff 8-1-19]

165:27-3-2. Eligible person

An eligible person can be any of the following who has costs incurred as the result of a confirmed eligible release from a petroleum storage tank system, who has satisfied requirements for PSTD eligibility, and has been issued an Indemnity Fund Eligibility Letter by the PSTD Director.

- (1) An owner or operator of a storage tank system who fulfills the requirements of 17 O.S. § 327.3 and OAC 165:25 or OAC 165:26.
- (2) An owner whose property has been impacted by a release from an on-site or off-site petroleum storage tank system that was never owned or

- operated by the property owner and has no responsibility for the release.
- (3) A town or city which has obtained assignments from the property owners to act in their stead as "eligible party" and/or be deemed an "eligible party" itself for purposes of investigation and remediation of abandoned tank sites where a release of regulated substances has occurred on the property where the tanks are or were located and/or on nearby property within the limits of a single town or city. In any case where an abandoned petroleum storage tank system has released regulated substances onto the property where tanks are located or onto nearby property, within the limits of a single town or city, the city or town may obtain assignments from the property owners to act in their stead as "eligible party" and/or be deemed an "eligible party" itself for the purpose of investigation and remediation of the site(s).
- (4) Adjacent property owner or impacted party.

EDITOR'S NOTE: ¹Section 165:27-3-4 was disapproved in its entirety by Senate Bill 455 (Section 28), effective 6-9-93. See also related Editor's Notice published at 10 Ok Reg 4255.

SUBCHAPTER 5. QUALIFICATIONS FOR REIMBURSEMENT

165:27-5-1. Qualifications for reimbursement

In order to receive reimbursement from the Indemnity Fund, a person must, among other requirements:

- (1) In order to receive reimbursement every scope of work must have a pre-approved Purchase Order and/or a Pay for Performance Contract. The scope of work must be completed within the required timeframe in accordance with the standards, requirements, rules, and regulations of PSTD in a format established by PSTD. Initially submitted claims and resubmitted claims shall be evaluated by the Division under the system of evaluation employed by the program at the time the claim is originally submitted or re-submitted unless otherwise directed by PSTD.
- (2) The eligible person must be eligible and approved in the Fund for a confirmed release case. Modified eligibility in the Fund is required for reimbursement on Suspicions of Release, and other investigations.
- (3) The eligible person must apply for reimbursement in a format established by PSTD, including a certified affidavit by a Licensed Environmental Consultant that the corrective action costs incurred are true and correct and that the Licensed Environmental Consultant supervised the corrective action performed accompanied with supporting documentation as set forth on the Purchase Order.
- (4) Investigation and remediation work must be supervised/performed by a Licensed Environmental Consultant. Reimbursement will be paid to the

eligible person unless the eligible person provides the Fund with a written "Assignment of Benefit" directing reimbursement be paid directly to an Assignee. Any revocation of "Assignment of Benefits" must be provided to PSTD in writing. The Fund may also reimburse directly to a vendor engaged by PSTD for ancillary services deemed necessary to support a project upon presentation of a reimbursement request form accompanied by an original invoice.

(5) Investigation and remediation costs expended prior to submission of a release report to the Commission, shall not be eligible for Indemnity Fund reimbursement.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 10 Ok Reg 2627, eff 6-25-93; Amended at 12 Ok Reg 2069, eff 7-1-95; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 26 Ok Reg 1836, eff 7-1-09; Amended at 30 Ok Reg 589, eff 7-1-13; Amended at 32 Ok Reg 805, eff 8-27-15; Amended at 35 Ok Reg 1027, eff 10-1-18]

165:27-5-2. Application for reimbursement

An application for PSTD Eligibility on a confirmed release or a suspicion of release shall be made to the Administrator of the Indemnity Fund in a format established by PSTD and at a minimum include:

- (1) A properly completed "Indemnity Fund Application" with all requested information provided.
- (2) A Leak Detection Data Sheet (if applicable) with supporting documents and other information verifying regulatory compliance at the time of the reporting of the release.
- (3) Contract between Indemnity Fund applicant and Licensed Environmental Consultant.
- (4) Damage Statement or court filed petitions alleging damages from a release of regulated substances (if applicable).
- (5) Other Financial Mechanisms allowable besides the Indemnity Fund.
- (6) Information deemed sufficient by PSTD staff to substantiate a claim as an impacted party or adjacent property owner and a sworn statement that no other financial mechanisms were in place at the time of discovery of the release. The eligible person must submit any and all property insurance policies to the Indemnity Fund in place at time of the release.
- (7) Any other information requested by PSTD or Fund. When deemed warranted to support PSTD's charge to protect the public health, safety, and welfare, the Director of PSTD may execute an Administrative Application to the Fund on behalf of an unavailable or unwilling owner.

165:27-5-3. Application for supplemental reimbursement

In order to be considered complete, a request for supplemental reimbursement shall be made in a format established by PSTD and at a minimum contain:

- (1) Supplemental Indemnity Fund reimbursement request.
- (2) Itemized original invoices, if requested by PSTD.
- (3) Any other information as may be required by the Fund.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 10 Ok Reg 2627, eff 6-25-93; Amended at 12 Ok Reg 2069, eff 7-1-95; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 23 Ok Reg 1661, eff 7-1-06; Amended at 31 Ok Reg 1013, eff 9-12-14; Amended at 35 Ok Reg 1027, eff 10-1-18]

SUBCHAPTER 7. REIMBURSEMENT

165:27-7-1. Reimbursable expenses

The Fund may reimburse eligible persons for:

- (1) Reasonable, integral and necessary costs directly related to the corrective action. These costs may include but are not limited to such items as waste disposal, soil and groundwater remediation techniques, laboratory analyses, professional services, drilling, sampling, coring, transportation, and for use of third party property, on a case by case basis, for corrective actions.
- (2) Backfill on active confirmed cases.
- (3) Suspicion of release, and other costs deemed investigatory in nature.
- (4) Costs that are reasonable, integral and necessary.
- (5) Third Party property damage costs and medical injury costs that have been paid by the eligible person as set forth in 17 O.S. § 327.3(I).
- (6) Reasonable, integral and necessary costs for any county, municipality or state agency imposed permit fees, disposal fees or other such fees that may be needed to further corrective actions.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 12 Ok Reg 2069, eff 7-1-95; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 26 Ok Reg 1836, eff 7-1-09; Amended at 31 Ok Reg 1013, eff 9-12-14; Amended at 32 Ok Reg 805, eff 8-27-15; Amended at 33 Ok Reg 624, eff 8-25-16; Amended at 35 Ok Reg 1027, eff 10-1-18; Amended at 36 Ok Reg 593, eff 8-1-19]

165:27-7-2. Reimbursement

(a) Among other requirements an eligible person for reimbursement is required to show:

- (1) Allowable costs were incurred on or after December 23, 1988.
- (2) The PSTD has determined that the release or suspicion of release may pose a threat to human health or the environment.
- (3) The eligible person has fully cooperated with PSTD in responding to the release.

(b) The Petroleum Storage Tank Division will reimburse from the Indemnity Fund an eligible person, with an eligible release from an eligible tank system allowable costs in excess of one percent (1%) co-pay not to exceed Five Thousand Dollars (\$5,000.00) but not more than the statutorily set limitations on reimbursement in 17 O.S. § 327.3.

(c) Indemnity Fund co-payments must be paid by the eligible person within thirty (30) days of invoice date. If the eligible person does not timely pay any Indemnity Fund co-payment within thirty (30) days of invoice date, then corrective actions will continue and the PSTD will seek cost recovery against the eligible person after the petroleum release case closes.

(d) Reimbursement shall not be made from the Indemnity Fund pursuant to this Section until the Indemnity Fund Program has determined that the costs for which reimbursement is requested were incurred on behalf of an eligible person, of an eligible release from an eligible tank system and were reasonable, integral and necessary.

(e) Releases that occurred prior to June 4, 2004, shall not receive reimbursement until the Five Thousand Dollars (\$5,000.00) co-pay has been prepaid or a payment arrangement concerning the co-pay has been agreed to by PSTD and significant compliance with the payment agreement is achieved.

(f) All corrective action or assessment costs incurred shall be subject to reimbursement in accordance with unit cost pricing recommended by the Unit Cost Committee as approved by the PSTD Director and any adaptations, amendments or changes thereto.

(g) All corrective action costs incurred shall be subject to reimbursement that is deemed allowable, fair and reasonable by the PSTD.

(h) All purchase orders, reports, and other required paperwork must be submitted within the required timeframe in a format established by PSTD.

(i) When the technology is available, payment of Indemnity Fund claims may be in the form of Electronic Funds Transfer ("EFT").

165:27-7-3. Limited reimbursement [REVOKED]

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Revoked at 10 Ok Reg 2627, eff 6-25-93]

165:27-7-4. Cost recovery

(a) Cost recovery shall be initiated for all corrective action expenditures from either the Indemnity Fund, Oklahoma Leaking Underground Storage Tank Trust Fund ("LUST Trust Fund"), Oklahoma Leaking Underground Storage Tank Revolving Fund ("LUST Trust Revolving Fund"), or any combination thereof, through an administrative application with notice and hearing. The tank owner, operator or otherwise eligible person shall be assessed the total amount of corrective action costs, administrative and legal expenses, including attorney's fees. Upon issuance of a Commission order, the total amount assessed by order shall be due and payable and shall constitute a judgment lien of the Commission as provided by 17 O.S. § 6.

(b) LUST Trust Fund or LUST Trust Revolving Fund cost recoveries regarding an imminent threat to public health, safety, or the environment; or an unknown, unwilling, or unavailable owner, operator or otherwise eligible person, shall be upon issuance of a Commission order immediately reimbursable from the Indemnity Fund to the LUST Trust Revolving Fund. The Commission order shall establish the Indemnity Fund as the lien holder and shall include administrative and legal expenses. The amount reimbursable to the LUST Trust Revolving Fund will be for corrective action costs only.

165:27-7-5. Methods for reimbursement [REVOKED]

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 10 Ok Reg 2627, eff 6-25-93; Amended at 12 Ok Reg 2069, eff 7-1-95; Revoked at 22 Ok Reg 1775, eff 7-1-05]

165:27-7-6. Conditions for reimbursement

(a) Action taken as a result of an eligible release, other than in an emergency, may be made by competitive bid of at least two (2) bidders. When a requirement for bidding is made by PSTD, all bids received shall be forwarded to PSTD and the bid results discussed between the eligible person, PSTD and the PSTD Licensed

Environmental Consultant. Acquisition or contracts or subcontracts for corrective action or for labor or equipment which exceed Two Thousand Five Hundred Dollars (\$2,500.00) from any one vendor or subcontractor for any one (1) site shall be awarded to the lowest or best bidder as determined by PSTD. Professional engineering, geological, land surveying and other professional services or services provided by a PSTD Licensed Environmental Consultant required for investigation and the preparation of work plan and/or purchase orders, proposed corrective action plans and oversight of remediation will be reimbursed at current approved reasonable costs, or at the PSTD Director's discretion.

(b) When current costing systems cannot accommodate specific situations, contracts awarded shall be to the lowest or best bidder. The Indemnity Fund Program requires review and approval of all competitive bid actions.

(c) The owner/eligible and Licensed Environmental Consultant shall keep, and have available for review by the Indemnity Fund Program, records pertaining to the corrective action. These records include but are not limited to:

- (1) Corrective action plans.
- (2) Remedial action plans
- (3) Contracts and contract negotiations.
- (4) Accounts
- (5) Invoices
- (6) Sales tickets
- (7) Subcontractor invoices
- (8) Other forms of documentation for expenses incurred relating to such investigation, corrective action, remedial action, injury or damage.

(d) All records of costs incurred shall be certified by affidavit as true and correct and shall contain invoice dates, invoice numbers and amount of invoices being submitted.

(e) Reimbursement shall be made by the Fund only for costs that PSTD determines were actually incurred, were reasonable, allowable and are integral and necessary towards the corrective action performed.

(f) An eligible person with a release or whose property has been impacted by a release, shall not retain an environmental consulting firm to perform remediation in which the Applicant has more than a ten percent (10%) interest.

(g) An eligible person shall provide application information that will enable the Fund to determine which reimbursement method to use.

(1) Initial, supplemental and final payments. An eligible person may submit an Initial Reimbursement Request and periodic Supplemental Reimbursement Requests followed by a Final Reimbursement Request after case closure if they:

(A) Make application within two (2) years from the date of a closure letter issued by PSTD.

(B) Been determined to be eligible (eligible person, eligible release, eligible tank system) to access the Fund.

(2) An application for eligibility and all claims for reimbursement to the Fund must be made within two (2) years of the case closure letter issued by the PSTD or the date the Final Claim Confirmation form is received by the PSTD. Eligible persons are encouraged to submit claims for reimbursement as the costs are incurred and in the order incurred.

165:27-7-7. Exclusions from reimbursement

- (a) Tanks and/or systems owned or operated by the federal government are not eligible for reimbursement from the Fund.
- (b) Tanks or systems are not eligible if owned or operated by a Class I Railroad.
- (c) No reimbursement shall be made by the Indemnity Fund to any person who has received, or is eligible, for reimbursement from any other state or federal agency, insurance company, or third party payor for the corrective action taken or to any person for the same cost.
- (d) No reimbursement shall be made for loss of time.
- (e) No reimbursement shall be made for loss of business and taking of property associated with the corrective action.
- (f) No reimbursement shall be made for punitive damages from civil actions resulting from the eligible release.
- (g) No reimbursement shall be made for attorney's or legal fees incurred by or rendered against an eligible person for any reason associated with the release case.
- (h) No reimbursement shall be made for associated but non-integral costs of the corrective action such as but not limited to costs of renovating, removing or disposing of tanks and other such related items.
- (i) No reimbursement shall be made for releases from storage tank systems on Individual Allottee Indian Trust lands or Tribal Trust lands.
- (j) No reimbursement shall be made for costs incurred prior to confirmation of release or SOR investigation unless costs of an emergency response are approved in advance by the PSTD.
- (k) No reimbursement shall be made to an otherwise ineligible person, or for a release of regulated substances that cannot be tied back to an existing or former storage tank system, or for non-regulated petroleum storage tank system releases or releases of non-regulated substances.
- (l) No reimbursement for corrective action costs will be made for the portion of PSTD-regulated releases commingled with non-regulated substances.

165:27-7-8. Withholding reimbursement

The Fund may withhold reimbursement payments in whole or in part if any of the following apply:

- (1) Offsetting charges.
- (2) Conflicting, duplicate or unclear assignments.
- (3) Subrogation of reimbursements.
- (4) Pending legal action pertaining to reimbursement or claims.
- (5) Clarification of possible third party payors.
- (6) Investigation or pending investigation of suspected illegal or improper activity.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 10 Ok Reg 2627, eff 6-25-93; Amended at 12 Ok Reg 2069, eff 7-1-95; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 31 Ok Reg 1013, eff 9-12-14]

165:27-7-9. The Pre-Approval Program

- (a) The purpose of the Pre-Approval Program is to reduce, if not eliminate, disallowances of reimbursement for costs incurred and associated with corrective action, as well as to foster a spirit of cooperation between the Licensed

Environmental Consultant, PSTD and the eligible person.

(b) Parties are required to use either or both of the two (2) pre-approval processes developed by PSTD. These two (2) procedures are: Purchase Orders and Pay-For-Performance (PFP). These procedures document the agreement that all parties have reached and must comply with.

(c) An eligible person may opt out of the pre-approval program if they elect, in writing after consultation with the Administrator of the Indemnity Fund, not to participate in the pre-approval program and acknowledges in writing that the eligible person understands that all requests for reimbursement submitted without pre-approval will be subject to non-reimbursement of costs incurred which do not meet the statutory standards for reimbursement set forth in 17 O.S. §327.3 et seq.

[Source: Added at 15 Ok Reg 3033, eff 7-15-98; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 31 Ok Reg 1013, eff 9-12-14; Amended at 32 Ok Reg 805, eff 8-27-15; Amended at 35 Ok Reg 1027, eff 10-1-18; Amended at 36 Ok Reg 593, eff 8-1-19]

165:27-7-9.1. Pre-Approval for Emergency Responses - Exceptions

(a) Emergency abatements must be reported according to PSTD rules and requirements. Reimbursement of costs incurred as a result of an emergency response are subject to Fund review, and a determination by the Indemnity Fund that there is sufficient information such costs are reasonable, integral, and necessary.

(b) If an emergency response has been declared by the PSTD, immediate action is required.

[Source: Added at 22 Ok Reg 1775, eff 7-1-05; Amended at 31 Ok Reg 1013, eff 9-12-14]

165:27-7-10. Pay-For-Performance procedures

(a) Pay-For-Performance (PFP) Remediation Proposals are designed for pre-approval of work that is to be performed. Pay-For-Performances shall not be issued on work that has already been completed.

(b) Before a Pay-For-Performance (PFP) Remediation Proposal can be approved, a Remedial Action Plan which satisfies the criteria of OAC 165:29-3-80 must be approved by the PSTD.

(c) A Performance-based Remedial Action Plan must be submitted for review to the PSTD.

(d) The Performance-based Remedial Action Plan Proposal shall include the following information:

- (1) Chronologic summary of site work with type, amount, and location of the release.
- (2) General description of the site geology and hydrology with stratigraphic cross-section.
- (3) Tier I/IA and 2 (if needed) report summary with proposed contaminant clean-up levels
- (4) Description of the proposed remediation technology to be used.
- (5) Schematics showing remediation system layout and remediation equipment.
- (6) Description of performance monitoring methods and list of key monitoring wells.
- (7) Total site remediation cost, contract terms, payment schedule, contract time frame, and warranty period.
- (8) Base map with all well and soil boring locations.
- (9) Detailed facility map with current benzene and TPH groundwater and soil plume maps.

- (10) Detailed facility map with free product thickness, if present.
 - (11) Concentration maps of all other chemicals of concern that exceed Oklahoma Risk Based Corrective Action ("ORBCA") Site Specific Target Levels.
 - (12) The number of months that will be required to complete the remediation.
 - (13) The number of months that remediation will be warranted through continued operation in the event clean up levels have not been reached during the required clean up period.
 - (14) Other relevant information to explain the extent and type of the contamination, how the proposed performance based work plan will accomplish the clean up, types of monitoring to be used, and any risks that may be associated with the clean-up that should be addressed.
- (e) All costs associated with the Performance-based Proposal must be included in the Performance-based Remedial Action Plan submitted to the PSTD.
 - (f) Any change order or re-design costs will be part of the original Performance-based Work Plan unless otherwise stipulated in the PFP contract.
 - (g) Costs associated with the closing of the site may or may not be included in the PFP but will be discussed prior to the execution of the PFP.

[Source: Added at 15 Ok Reg 3033, eff 7-15-98; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 26 Ok Reg 1836, eff 7-1-09; Amended at 31 Ok Reg 1013, eff 9-12-14]

165:27-7-11. Purchase order procedures

- (a) Purchase order proposals are designed for pre-approval of work that is to be performed. Purchase orders shall not be issued on work that has been completed without pre-approval.
 - (1) All purchase orders must use the appropriate standardized method for a particular scope of work.
 - (2) All purchase order requests must be submitted online within the required timeframe by the Licensed Environmental Consultant.
 - (3) All purchase order requests submitted will be reviewed and responded to within thirty (30) days.
 - (4) If the purchase order request is approved as submitted, the PSTD staff will notify the Licensed Environmental Consultant and eligible person with the assigned purchase order number and a list of the required documents that will support the completed scope of work as described in the purchase order proposal at the agreed upon price.
 - (5) If the purchase order request is not approved as submitted, the PSTD staff will contact the Licensed Environmental Consultant or eligible person concerning the necessary changes required or will schedule a meeting, if needed.
 - (A) The Licensed Environmental Consultant will then make the agreed revisions and resubmit online the final purchase order to PSTD within the required timeframe.
 - (B) When PSTD staff recommends revisions to the purchase order request, the Licensed Environmental Consultant or eligible person will have thirty (30) days from notification of revisions to respond and submit a final purchase order proposal. If the consultant or eligible person does not respond within thirty (30) days, the purchase proposal as originally submitted is void.

(C) Unless agreed upon by PSTD, the eligible person and the Licensed Environmental Consultant, in writing, any purchase orders that have not been completed and submitted for payment within 120 days after the scope of work completion date are null and void.

(6) In the event the Licensed Environmental Consultant, eligible person, and PSTD cannot agree upon reasonable terms, the purchase order request shall be void and the following shall apply:

(A) Work will then proceed on a Work Plan basis with documentation, as provided for in 17 O.S. §327.3(C), required for reimbursement; and

(B) Multiple submissions of purchase orders for the same or similar scopes of work will only be considered at the discretion of PSTD.

(b) Change orders must be submitted prior to performing work not included in the scope of work set forth in the approved purchase order, which will require pre-notification to and pre-approval by the Technical staff, unless the total additional costs are less than five percent (5%) of the approved purchase order.

Documentation will be required to explain additional work completed and to justify additional costs. All requests for reimbursement of costs not incurred in the approved purchase order will be reviewed at the discretion of the Fund.

(c) Reimbursement format and requirements for purchase orders include the following:

(1) All scope(s) of work described in the approved purchase order must be completed in full, required reports submitted within the required timeframe and approved by PSTD, before reimbursement is requested, unless other payment terms are pre-approved by the PSTD and set forth with specificity in the purchase order.

(2) All purchase orders being submitted for reimbursement will contain:

(A) A copy of the approved purchase order (and change order, if applicable).

(B) Required documentation.

(d) Reimbursement claims on purchase orders will be paid within thirty (30) days of receipt.

(e) The Licensed Environmental Consultant, eligible person or both may make application for an Administrative Application for hearing to determine terms and conditions of purchase order approval.

SUBCHAPTER 9. ADMINISTRATIVE PROVISIONS

165:27-9-1. Hearing, orders, and exceptions

(a) Hearings to enforce or exceptions to the provisions of this Chapter or PSTD enabling statutes shall be conducted in accordance with OAC 165:5.

(b) The Commission shall issue orders after notice and hearing as necessary to enforce the provisions of this Chapter or PSTD enabling statutes to protect property, the public health and safety, and the environment.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 23 Ok Reg 1661, eff 7-1-06; Amended at 32 Ok Reg 805, eff 8-27-15; Amended at 37 Ok Reg 1155, eff 10-1-20]

165:27-9-2. Changes to rules

The adoption of this Chapter shall not preclude the PSTD from subsequently altering, amending, or changing the rules in whole or in part in accordance with 75 O.S. § 250 et seq., of the Administrative Procedures Act.

[Source: Added at 9 Ok Reg 2315, eff 6-25-92; Amended at 12 Ok Reg 2069, eff 7-1-95; Amended at 22 Ok Reg 1775, eff 7-1-05; Amended at 32 Ok Reg 805, eff 8-27-15; Amended at 36 Ok Reg 593, eff 8-1-19]

165:27-9-3. Notices

Any notices and documents required to be submitted to the Fund or PSTD shall be delivered or mailed to:

(1) Indemnity Fund mailing address: Administrator, Petroleum Storage Tank Indemnity Fund, P.O. Box 52000, Oklahoma City, Oklahoma 73152-2000.

(2) PSTD mailing address: Director, Petroleum Storage Tank Division, P.O. Box 52000, Oklahoma City, Oklahoma 73152-2000.

SUBCHAPTER 1. GENERAL PROVISIONS

PART 1. PURPOSE AND STATUTORY AUTHORITY

165:29-1-1. Purpose

The purpose of this Chapter is to provide a comprehensive program for the regulation of petroleum storage tank systems in Oklahoma to prevent, contain, abate, and remove contamination harmful to the public health, safety, welfare and the environment.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 32 Ok Reg 811, eff 8-27-15; Amended at 36 Ok Reg 598, eff 8-1-19]

165:29-1-2. Contents

This Chapter sets forth specific requirements for corrective action of releases including the investigation, site assessment, cleanup, public notice, and monitoring of systems.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 32 Ok Reg 811, eff 8-27-15]

165:29-1-3. Authority

(a) 42 U.S.C.A. § 6991 et seq., allows Oklahoma to apply for state program approval by the United States Environmental Protection Agency ("EPA"). EPA initially approved Oklahoma's petroleum storage tank program on August 12, 1992 and again on March 12, 2018.

(b) 17 O.S. § 305 authorizes the Commission to administer Subtitle I of Title VI of the Solid Waste Disposal Act (42 U.S.C.A. § 6901 et seq.).

(c) 17 O.S. § 306 requires the Commission to promulgate and enforce rules to carry out the provisions of the Oklahoma Petroleum Storage Tank Consolidation Act (17

O.S. § 301 et seq.).

(d) The Commission has jurisdiction over storage tanks that contain antifreeze, motor oil, motor fuel, gasoline, kerosene, diesel, or aviation fuel.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 32 Ok Reg 811, eff 8-27-15; Amended at 36 Ok Reg 598, eff 8-1-19]

PART 3. DEFINITIONS

165:29-1-11. Definitions

In addition to the terms defined in 17 O.S. § 303, the following words or terms, when used in this Chapter, shall have the following meaning unless the context clearly indicates otherwise:

"**ANSI**" means the American National Standards Institute.

"**API**" means the American Petroleum Institute.

"**ASTM**" means the American Society for Testing and Materials.

"**Aboveground release**" means any release to the surface of the land or to surface water. It includes, but is not limited to, releases from the aboveground portion of an underground storage tank system and aboveground releases associated with overfills and transfer operations as the regulated substance moves to or from an underground storage tank system.

"**Agent**" means a person authorized by another to act on their behalf, either out of employment or contract.

"**Aquifer**" means a formation that contains sufficient saturated, permeable material to yield significant quantities of water to wells and springs. This implies an ability to store and transmit water for beneficial uses.

"**Ancillary equipment**" means any device including, but not limited to, devices such as piping, fittings, flanges, valves, and pumps that are used to distribute, meter, or control the flow of regulated substances to or from a petroleum storage tank.

"**Backfill**" refers to only the material placed in the excavation zone to support the petroleum storage tank system.

"**Belowground release**" means any release to the subsurface of the land or to groundwater. It includes, but is not limited to, releases from belowground portions of petroleum storage tank systems and belowground releases associated with overfills and transfer operations as the regulated substance moves to or from underground storage tank systems. "Belowground release" does not include releases to a secondary containment system.

"**Beneficial uses**" means a classification of the waters of the State, according to their best uses in the interest of the public.

"**Change in service**" means a change in the status of a storage tank (i.e., from currently in use to temporarily out of use); or change of regulated substance that a storage tank contains.

"**Chemicals of Concern**" or "**COC**" means chemicals that may pose a threat to human health and the environment.

"**Commission**" or "**OCC**" means the Oklahoma Corporation Commission.

"**Confirmed Release**" means a release of a regulated substance from a regulated storage tank system resulting in free product, contaminated soils or groundwater that exceed state action levels, organic vapor readings significantly above background levels, petroleum staining or odors or any other indication that a release has occurred that could be harmful to human health, safety or the environment and to which a PSTD case number is assigned and further corrective

action is required.

"Corrective Action Plan" means any plan submitted to the Division detailing the method and manner of corrective action to be taken for a release.

"Dielectric material" means a material that does not conduct direct electric current. Dielectric coatings are used to electrically isolate underground storage tank systems from the surrounding area. Dielectric bushings are used to electrically isolate portions of the underground storage tank system (e.g., tank from piping).

"EPA" means the United States Environmental Protection Agency.

"Electronic signature" means an electronic signature as defined by OAC 165:5-1-3.

"Environmental experience" means work-related experience in any type of activities associated with soil, water or atmosphere impacted or potentially impacted by a PSTD regulated substance.

"Excavation zone" means the volume containing the underground storage tank system and backfill materials, bounded by the ground surface, walls, and floor of the pit and trenches into which the underground storage tank system is placed at the time of installation.

"Free product" means a regulated substance that is present as a non-aqueous phase liquid (e.g., liquid not dissolved in water).

"Fresh groundwater" means groundwater with total dissolved solids (TDS) less than five thousand (5,000) parts per million.

"Fund" means the Petroleum Storage Tank Release Environmental Cleanup Indemnity Fund.

"Groundwater" means that part of water that is below the water table.

"Hazard Index" means the sum of the Hazard Quotients.

"Hazard Quotient" means the estimated dose, or intake, for a specific chemical and a specific pathway, divided by the Reference Dose (RfD).

"Impervious barrier" means a barrier of sufficient thickness, density, and composition that is impenetrable to the regulated substance, has a permeability of at least 1×10^{-6} cm/sec., and will prevent the discharge to the environment of any regulated substance for a period of at least as long as the maximum anticipated time during which the regulated substance will be in contact with the impervious material.

"In service" means a petroleum storage tank that is not abandoned, or could contain regulated substances, and/or has regulated substances regularly added to or withdrawn from it.

"Inventory controls" means techniques used to identify a loss of regulated substances that are based on volumetric measurements in the tank and reconciliation of those measurements with product delivery and withdrawal records.

"Licensed Environmental Consultant" means an individual who has a current license issued by the Petroleum Storage Tank Division to perform corrective action.

"Liquid trap" means sumps, well cellars, and other traps used in association with oil or gas production, gathering, and extraction operations (including gas production plants) to collect oil, water, and other liquids. Liquid traps may temporarily collect liquids for subsequent disposition or reinjection into a production or pipeline stream, or may collect and separate liquids from a gas stream.

"MCL" means Maximum Contaminant Level.

"MtBE" means methyl tertiary butyl ether.

"Monitor well" means a piezometer or other cased and screened excavation, boring or drilled hole installed in any way that can be used for the continuous or periodic evaluation of groundwater quality or the detection of soil vapors.

"NACE" means the National Association of Corrosion Engineers.

"NFPA" means the National Fire Protection Association, Inc.

"Occurrence" means the release of a PSTD regulated substance into the soil or groundwater. Each PSTD regulated substance will be treated as one (1) occurrence regardless of the composition of the substance released. Separate occurrences of the same PSTD regulated substance may be allowed if evidence establishes that the PSTD regulated substance occurred in two (2) different tank systems locations, are separated by time, or both.

"ORBCA" or **"Oklahoma Risk-Based Corrective Action"** means a scientific risk-based analysis that governs petroleum storage tank site assessment and remediation. It determines acceptable concentration levels of petroleum constituents in order to protect the public health, safety or welfare or the environment.

"Overfill" means a release that occurs when a petroleum storage tank is filled beyond its capacity, resulting in a discharge of regulated substance to the environment.

"PEI" means the Petroleum Equipment Institute.

"POC" means Point of Compliance.

"POE" means Point of Exposure.

"PSI" means pounds per square inch.

"PSTD" means Petroleum Storage Tank Division or Division.

"Permanent out of use" or **"POU"** means a petroleum storage tank system that is not in service/use, does not contain regulated substances, and is not intended to be placed back in service/use.

"Petroleum" means the substances as set forth in 17 O.S. § 303(31). It does not include 100% biodiesel, compressed natural gas, liquid natural gas, methanol, or propane.

"Pipe" or **"Piping"** means a hollow cylinder or tubular conduit constructed of non-earthen materials.

"Pipeline facilities" means new and existing pipe rights-of-way and any equipment, facilities, or buildings regulated under:

(A) The Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. § 1671, et seq.).

(B) The Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. § 2001, et seq.).

(C) The State Hazardous Liquid Transportation System Safety Act, § 47.1 et seq. of Title 52 of the Oklahoma Statutes.

(D) Intrastate pipeline facilities regulated under state laws.

"Point of Compliance" means a select location where the concentration of a chemical released must be at or below back-calculated levels. The back-calculated levels are such that estimated concentrations at the Point of Exposure are below health-based levels.

"Point of Exposure" means a location at which an individual or population may be exposed to site-specific Chemicals of Concern through ingestion, inhalation and/or dermal contact.

"Positive sampling, testing, or monitoring results" means the results of sampling, testing, or monitoring using any of the release detection methods described in this Chapter that indicate a release from a petroleum storage tank system may have occurred.

"Potency Factor" means the plausible upper-bound estimate of the probability of a response (cancer) per unit intake of chemical over a lifetime. Also referred to as Slope Factor.

"RBCA" means Risk-Based Corrective Action.

"RfD" means Reference Dose.

"Reasonable Maximum Exposure" or "RME" means the highest rate of exposure that has a small probability five percent (5%) of being exceeded.

"Reference Dose" or "RfD" means the estimate of the daily intake of a chemical over a lifetime that is not likely to result in any significant adverse health effects (including in sensitive subpopulations).

"Regulated substances" means antifreeze, motor oil, motor fuel, gasoline, kerosene, diesel or aviation fuel as set forth in 17 O.S. § 305. It does not include compressed natural gas, liquid natural gas or propane.

"Release detection" means the methodology used in determining whether a release of regulated substances has occurred from a petroleum storage tank or system into the environment or into the interstitial area between the petroleum storage tank system and its secondary barrier.

"Remediation" means a process or technique used to reduce concentration levels of chemicals of concern in the soil and groundwater, and, or to reduce the presence of free product in the environment to levels that are protective of human health, safety and the environment. Generally remediation activities are scheduled after the site assessment is complete and the Remedial Action Plan (RAP) has been approved.

"Repair" means to restore a tank or petroleum storage tank system component to PSTD standards that has caused a release of regulated substances from the petroleum storage tank system.

"Reportable Quantity" or "RQ" means the amount of a PSTD regulated substance release required to be reported to appropriate federal, state, and/or local officials.

"Residual Product" Petroleum hydrocarbons (product) that are absorbed or otherwise bound to geological materials (sand, silt, or clay) in any soil zone (vadose, capillary, or saturated zone), in such a manner that ground water in contact with the residual product or beneath the residual product is not contaminated with any petroleum constituent regulated by the OCC.

"Risk-Based Corrective Action" means all of the activities necessary to manage a site such that concentrations of chemicals from a release are at levels that are not detrimental to public health and the environment. It includes, but is not limited to, collection of site-specific data, analysis of the data to quantify the risk, comparison of the risk with acceptable levels, and implementation of engineering and non-engineering measures to ensure that concentrations of remaining Chemicals of Concern are not detrimental to human health.

"STI" means the Steel Tank Institute.

"Saturated zone" means a subsurface zone below which all pore space is filled with water.

"Site assessment" means a multi-step process designed to determine if a site has possibly been impacted by regulated substance(s) above OCC action levels.

"Slope Factor" means the plausible upper-bound estimate of the probability of a response (cancer) per unit intake of chemical over a lifetime. Also referred to as Potency Factor.

"Soil zone" means and includes, but is not limited to, vadose zone, capillary fringe, or saturated soil zone.

"Source of contamination" means the location of the highest concentration of chemical contaminants in soil and groundwater.

"Source of release" means the location where regulated substances from a regulated tank system entered the environment.

"Spill" means a release that occurs during transfer operations of PSTD regulated substances to or from a petroleum storage tank system, resulting in a discharge of such substances into the environment.

"Suspicion of Release" or "SOR" means preliminary investigative work to determine if a release of a regulated substance has occurred.

"TCLP" means toxicity characteristic leaching procedure, a test procedure for determining if a solid waste is hazardous because it exhibits toxicity characteristics as enforced under Resource Conservation and Recovery Act.

"TDS" means Total Dissolved Solids.

"TPH" means Total Petroleum Hydrocarbon(s).

"Target Risk Level" means the level set by the Oklahoma Corporation Commission that must be achieved at each site prior to a risk-based closure of the site. For example, for current receptors this level has been set at one in a million (1E-06) and a Hazard Quotient of less than one (1.0).

"Temporary out of use" or "TOU" means the status of a petroleum storage tank system that has been taken out of service/use with the intent to permanently close or return to service.

"UL" means Underwriter's Laboratory.

"Unsaturated zone" or "vadose zone" means the subsurface zone containing water under pressure less than that of the atmosphere, including water held by capillary forces within the soil, and containing air or gases generally under atmospheric pressure. This zone is limited by the ground surface and the upper surfaces of the water table.

PART 5. SCOPE OF RULES

165:29-1-21. Overview of applicability and enforcement

This Chapter applies to the containment, control, abatement, and removal of releases of regulated substances from any petroleum storage tank system that causes pollution harmful to the public health, safety, welfare and the environment of the State of Oklahoma, regardless of whether the release occurs within or outside of the State.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 32 Ok Reg 811, eff 8-27-15]

PART 7. NATIONAL INDUSTRY CODES

165:29-1-31. Sources of standards

The standards referenced in this Chapter are available for inspection at the Petroleum Storage Tank Division offices during regular business hours and from the following sources:

- (1) American Petroleum Institute (API), 1220 L. Street, N.W., Washington, D.C. 20005-4070. Telephone (202) 682-8375.
- (2) National Association of Corrosion Engineers (NACE), P.O. Box 218340, Houston, Texas 77218-8340. Telephone (281) 228-6200.
- (3) National Fire Protection Association (NFPA), 1 Batterymarch Park, Quincy, Massachusetts 02269-9101. Telephone (800) 344-3555.
- (4) American Society for Testing and Materials (ASTM), 100 Barr Harbor Drive, West Conshohocken, Pennsylvania 19428-2959. Telephone (610) 832-9585.
- (5) Underwriter's Laboratory (UL), 333 Pfingston Road, Northbrook, Illinois 60062-2096. Telephone (847) 272-8800, ext. 42612.
- (6) Petroleum Equipment Institute (PEI), P.O. Box 2380, Tulsa, Oklahoma 74101-2380. Telephone (918) 494-9696.
- (7) Steel Tank Institute (STI), 570 Oakwood Road, Lake Zurich, Illinois 60047. Telephone (847) 438-8265.
- (8) American Society of Mechanical Engineers (ASME/ANSI), 22 Law Drive, P.O. Box 2300, Fairfield, New Jersey 07007-2300. Telephone (800) 843-2763.
- (9) National Ground Water Association, 601 Dempsey Road, Westerville, Ohio 43081. Telephone (800) 551-7379.
- (10) United States Environmental Protection Agency
 - (A) National Service Center for Environmental Publications (NSCEP), Box 42419, Cincinnati, Ohio 45242. Telephone (800) 490-9198.
 - (B) Office of Underground Storage Tanks (OUST), 1200 Pennsylvania Avenue N.W., Mail Code 5401G, Washington, DC 20460. Telephone (800) 424-9346.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 34 Ok Reg 970, eff 9-11-17]

165:29-1-32. Incorporated codes and standards

Specific references to documents listed in (1) through (13) below are made throughout this Chapter. Each of these documents or parts thereof are adopted and incorporated by reference as standards, but only to the extent that they are specifically referenced in this Chapter. These rules will supercede in any conflict between these rules and any standard. These codes and standards will be updated periodically through a formal rulemaking procedure initiated by PSTD to reflect any substantive or relevant changes.

- (1) National Fire Protection Association Standards:
 - (A) Standard Number 30, 2018, "Flammable and Combustible Liquids Code."
 - (B) Standard Number 329, 2018, "Handling Releases of Flammable and Combustible Liquids and Gases."
 - (C) Standard Number 385, 2012, "Tank Vehicles for Flammable and Combustible Liquids."
 - (D) Standard Number 326, 2015, "Safeguarding of Tanks and Containers for Entry, Cleaning or Repair."

- (E) Standard Number 30A, 2015, "Motor Fuel Dispensing Facilities and Repair Garages."
- (2) American Petroleum Institute Standards:
 - (A) Recommended Practice 1615, 2011, "Installation of Underground Hazardous Substances or Petroleum Storage Systems."
 - (B) Recommended Practice 1632, 2002, "Cathodic Protection of Underground Storage Tank and Piping Systems."
 - (C) Recommended Practice 1604, R2010, "Closure of Underground Petroleum Storage Tanks, 3rd Edition."
 - (D) Recommended Practice 1631, 2001, "Interior Lining and Periodic Inspection of Underground Storage Tanks."
 - (E) Recommended Practice 1621, 2012, "Bulk Liquid Stock Control at Retail Outlets."
 - (F) Recommended Practice 1626, 2010, "Storing and Handling Ethanol and Gasoline - Ethanol Blends at Distribution Terminals and Service Stations."
 - (G) Recommended Practice 1627, 1993, "Storing and Handling of Gasoline - Methanol/Cosolvent Blends at Distribution Terminals and Service Stations."

SUBCHAPTER 3. RELEASE PREVENTION, DETECTION AND CORRECTION

PART 1. RELEASE PROHIBITION, REPORTING, AND INVESTIGATION

165:29-3-1. Release prohibition

The intentional release of regulated substances from a petroleum storage tank or system is absolutely prohibited. No person shall knowingly allow a confirmed or suspected release of regulated substances from a petroleum storage tank or system to continue without investigation as required by this Chapter. Owners, operators, their employees, or agents of petroleum storage tank systems, as well as persons who transport regulated substances must ensure that spills and overfills do not occur. The requirements of this Chapter apply to all confirmed and suspected releases.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 32 Ok Reg 811, eff 8-27-15; Amended at 35 Ok Reg 1033, eff 10-1-18]

165:29-3-2. Release reporting

(a) These reporting requirements do not relieve the owner or operator of the responsibility to take corrective action as required by this Subchapter to protect human health and the environment, including the containment and cleanup of spills and overfills that are not required to be reported.

(b) All petroleum storage tank system owners, operators, their agents and employees, or transporters must report to PSTD within twenty-four (24) hours of discovering any substances, conditions or monitoring results that indicate a release may have occurred using the link provided on the release reporting tab located on PSTD's webpage on the Commission website; by email at PSTReleaseReporting@occ.ok.gov; or by telephone at (405) 521-4683 or 1-888-621-5878. If after hours, or on weekends or holidays, call the PSTD emergency phone number at (405) 823-0994. Owners or operators must send written confirmation within twenty (20) days in accordance with the release investigation and confirmation requirements of this Subchapter. Events indicating a release include, but are not limited to, the following:

(1) The discovery of released regulated substances at the petroleum storage tank system facility or in the surrounding area including, but not limited to, the presence of free product or vapors in soils, basements, crawlspaces, sewer and utility lines, and nearby surface water whether on-site or off-site.

(2) Any unusual operating conditions observed by the owner or operator, like the unexplained erratic behavior of product dispensing equipment, the sudden loss of product from the petroleum storage tank system, an unexplained presence of water in the tank, or liquid in the interstitial space of secondarily contained systems, unless the system equipment or component is found not to be releasing regulated substances to the environment; any defective system equipment or component is immediately repaired or replaced; for secondarily contained systems, any liquid in the interstitial space not used as part of the interstitial monitoring method (for example brine filled) is immediately removed.

(A) In the case of inventory control, two (2) consecutive thirty (30) day periods where the Total Gallons Over/Short is greater than the "Leak Check" (one percent (1%) of product sales plus 130 gallons) must be reported to PSTD within twenty-four (24) hours of the owner/operator discovering the inventory control results.

(B) Any UST system failure from a third party-certified Statistical Inventory Reconciliation (SIR) analysis must be reported to PSTD by the owner, operator, or SIR provider within twenty-four (24) hours of discovering the failure. An immediate investigation into the cause of the failed report must be conducted and results reported to PSTD within seven (7) days.

(C) An "Inconclusive" report from an SIR analysis must be reported by the SIR provider, owner or operator within twenty-four (24) hours of report generation. An Inconclusive means that the UST system has failed to meet leak detection requirements for that thirty (30) day period.

(3) An unusual level of vapor on the site that is of unknown origin. A vapor monitor well reading in excess of 4,000 units/ppm, or 1,500 units/ppm for

diesel storage tanks, must be reported to PSTD within twenty-four (24) hours by the owner, operator, their agents, or employees discovering the monitoring results. If diesel and gasoline tanks share the same tankpit, the reporting level is 1,500 units/ppm. Within ten (10) days, the owner or operator must submit to PSTD all vapor monitoring well data, including background data, for the last twelve (12) thirty (30) day periods. Upon examination of the submitted data, PSTD will advise the owner or operator what action, if any, he or she needs to take. Whenever these vapor thresholds are exceeded the tank owner must provide alternative test results that confirm the petroleum storage tank system is currently not leaking.

(4) An increase in vapor levels of 500 units/ppm above background or historical levels detected by thirty (30) day monitoring, even though below the twenty-four (24)-hour reporting level, must be reported if the increase does not correct itself in the second thirty (30) day period of monitoring and it must be reported to PSTD within twenty-four (24) hours of the owner, operator, their employees, or agents discovering the monitoring results.

(c) Monitoring results, including investigation of an alarm from a release detection method required by OAC 165:25 that indicate a release may have occurred, must be reported within twenty-four (24) hours of the owner or operator's receipt of them; and PSTD will advise what action should be taken to determine whether or not a release has occurred, unless:

(1) The monitoring device is found to be defective, and is immediately repaired, recalibrated, or replaced, and additional monitoring does not confirm the initial result;

(2) The leak is contained in the secondary containment and;

(A) Any liquid in the interstitial space not used as the interstitial monitoring method is immediately removed.

(B) Any defective system equipment or component is immediately repaired or replaced.

(3) The alarm was investigated and determined to be a non-release event (for example, from a power surge or caused by filling the tank during release detection testing).

(d) All owners and/or operators of petroleum storage tank systems shall maintain records of all reportable and nonreportable events listed in 165:29-3-2 of Commission rules sufficient to permit adequate inspection and review by PSTD. These records shall be kept in permanent form for three (3) years following the date of the event. If any of the possible, probable, or definite release conditions in this Section are not reported within twenty-four (24) hours, the owner or operator must be prepared to provide documentation or evidence that would reasonably indicate an owner or operator's knowledge of release conditions or monitoring results was delayed.

(e) The owner or operator of a petroleum storage tank system must maintain records of all reportable and nonreportable events so that adequate inspection and review can be made by PSTD. These records must be kept for three (3) years following the date of the event.

(f) While aboveground petroleum releases of less than twenty-five (25) gallons need not be reported, they must be recorded by the owner or operator and cleaned up immediately. All of the following releases must be reported to PSTD by email or telephone within twenty-four (24) hours of discovery, by the owner, operator, employee or agent, with a written confirmation to PSTD within twenty (20) days in

accordance with the requirements established in this Chapter:

- (1) All known belowground releases in any quantity; for example, a release resulting from a line broken during an excavation.
 - (2) Any aboveground release of petroleum greater than twenty-five (25) gallons.
 - (3) Any aboveground release of petroleum which is less than twenty-five (25) gallons, but cannot be contained and cleaned up within twenty-four (24) hours.
- (g) Owners and operators must contain and immediately clean up any spill or overfill of regulated substances less than twenty-five (25) gallons within twenty-four (24) hours of incident occurrence. If the spill or overfill cannot be cleaned up within twenty-four (24) hours, is more than twenty-five (25) gallons, or it causes a sheen on nearby surface water, then owners and operators must report to the PSTD within twenty-four (24) hours and begin corrective action in accordance with Part 5 (Corrective Action Requirements) of this Chapter.
- (h) Any releases requiring emergency corrective action must be reported immediately to PSTD at (405) 521-4683 or 1-888-621-5878. After office hours, weekends or holidays, calls must be reported to PSTD's emergency number at (405) 823-0994.
- (i) If any of the possible, probable or definite release conditions above are not reported within twenty-four (24) hours, the owner/operator may be subject to enforcement action.

165:29-3-3. Release investigation; confirmed release; suspected release; emergency suspected release and release reporting

(a) **Duty to inspect for release.** Owners and operators of storage tanks must routinely inspect and conduct necessary testing of their storage tanks to prevent spilling, overfilling, or leaking from a storage tank system into the native environment. The owner or operator of a petroleum storage tank system must take the following steps or use other procedures approved by PSTD:

- (1) **System test.** Owners or operators must conduct petroleum storage tank system tightness tests and, if applicable containment testing, that will determine whether a release exists in the portion of the tank that routinely contains regulated substances and the attached delivery piping or a breach of either wall of the secondary containment has occurred. If the test results for the system, tank, delivery piping, or interstice indicate that a leak exists, the owner or operator must repair, remove, replace, or permanently closed as defined in OAC 165:25-2-135 the petroleum storage tank system, delivery piping, or interstice and begin a site check. Further investigation is not required if the test results for the system, tank, delivery piping, and interstice do not indicate that a leak exists and if indicator chemical concentrations detected in soil or water are not the basis for suspecting a release. However, the owner or operator must conduct a site check as described in (B) below if the test results for the system, tank, delivery piping and interstice do not indicate that a release exists, but indicator chemical concentrations detected in soil or water are above action levels cited in (b) of this Section.

(2) **Site check.** The owner or operator must measure for the presence of a release where released regulated substances are most likely to be present at the petroleum storage tank system site. In selecting sample types, locations, depths and measurement methods, owners or operators must consider the nature of the stored substance, the type of initial alarm or cause for suspicion, the type of native soil, the depth of groundwater, and other factors appropriate for identifying the presence and source of the release. Sample locations should be approximately five feet (5') from the outside of the petroleum storage tank system in native soil or another location approved by the PSTD. Analyses for both BTEX constituents and the appropriate TPH must be obtained in all cases. For sites where used oil may be involved, as determined through a TPH analysis, TCLP analysis for metals, semi-volatiles, and volatiles may be required. The TCLP results will be used on a case-by-case basis to establish cleanup levels or to refer the case to the DEQ for regulation. The selected method must be able to detect the most stringent cleanup levels required in this Chapter. The Total Petroleum Hydrocarbon (TPH) Laboratory Methodology 418.1 will not be accepted for this Chapter.

(A) If the test results for soil and/or groundwater taken outside the excavation zone or the petroleum storage tank system site confirm that a release has occurred, the owner or operator must begin the required corrective action in accordance with this Subchapter.

(B) If the test results for the native soil and/or groundwater or the petroleum storage tank system site do not indicate that a release has occurred, further investigation is not required.

(b) Confirmed release.

(1) When one or more of the following is present from a petroleum storage tank system, a release may be considered confirmed and a confirmed release case may be activated by PSTD staff.

(A) Free product.

(B) Contaminated groundwater and/or soil that exceed OCC action levels.

(C) Organic vapor readings above background levels.

(D) Actionable levels of petroleum staining or odors.

(E) Any other indication that a release from a regulated petroleum storage tank system has occurred that is harmful to human health, safety or the environment.

(2) Laboratory analysis of levels of chemical constituent concentrations that may be required to confirm a case are:

(A) Benzene

(i) Native Soils - 0.5 mg/kg

(ii) Groundwater - 0.005 mg/l

(B) Toluene

(i) Native Soils - 40.0 mg/kg

(ii) Groundwater - 1.0 mg/l

(C) Ethyl Benzene

(i) Native Soils - 15.0 mg/kg

(ii) Groundwater - 0.7 mg/l

(D) Xylene

(i) Native Soils - 200.0 mg/kg

(ii) Groundwater - 10.0 mg/l

(E) TPH

- (i) Native Soils - 50.0 mg/kg
- (ii) Groundwater - 2.0 mg/l
- (iii) If BTEX concentrations are below action levels, a TPH concentration of 500 mg/kg may be required to confirm a case at the discretion of PSTD.

(c) **Suspected release.** When an owner, operator, or their agent has reason to believe that a release from a storage tank may have occurred, he or she must notify PSTD within twenty-four (24) hours and receive authorization from the Division prior to initiating any investigation for which subsequent payment from the Indemnity Fund may be sought.

(d) **Emergency suspected release.** Owners, operators, or their agent may begin investigation of suspected releases when the suspected release may cause immediate harm to the public health, safety, welfare or the environment. The Petroleum Storage Tank Division will approve and reimburse expenses for an investigation after it has been performed and prior to the issuance of a Suspicion of Release by the Petroleum Storage Tank Division when the owner or operator has reasonably acted upon the belief that the suspected release gave rise to the need for immediate emergency action. The determination of whether or not action was reasonable is within the discretion of PSTD.

(e) **Release reporting.** Within twenty (20) days after the reporting of a release, the owner or operator must submit a report to PSTD summarizing the steps taken under this Section and any resulting information. If a release is confirmed through performance of the steps taken under this Section, then the report must be submitted in a format established by PSTD within the required timeframe, after which corrective action may be required under the provisions of this Chapter.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Revoked at 18 Ok Reg 1085, eff 5-11-01]

PART 3. REMOVAL AND CLOSURE OF PETROLEUM STORAGE TANK SYSTEMS

165:29-3-65. Assessing the site at closure or change in service

(a) As directed by PSTD, backfill material that is removed when an underground storage tank or associated piping is removed from the subsurface may be tested for BTEX, TPH (GRO and/or DRO, whichever is appropriate) and total lead, if appropriate.

(b) As directed by PSTD excavated backfill material may be sampled at a rate of one composite sample (composed of 10 grab samples) per 50 cubic yards of material, which must be analyzed by a laboratory certified by DEQ.

(c) The consultant or tankowner may put excavated backfill back into the tankpit while waiting for sampling results, but if the backfill needs to be re-excavated and replaced with clean backfill, the re-excavation is not a reimbursable expense.

(d) After reviewing analytical results, PSTD will determine if concentrations of Chemicals of Concern are at levels that pose a threat to human health, safety and/or the environment, and should be removed. This decision will be based upon analytical levels and specific site conditions such as, but not limited to, lithology of

the tankpit walls and surrounding native soils, gradient and direction of groundwater flow, and potential receptor exposure to Chemicals of Concern.

(e) Contaminated backfill and tankpit water that poses a threat to human health and/or the environment as determined by PSTD must be removed from the site to a proper disposal site and replaced by clean backfill, or may be remediated above grade to concentrations below action levels or ORBCA-related cleanup levels.

(f) Expenses incurred in the removal and disposal (but not re-excavation, see (c) above) of contaminated backfill and tankpit water may be reimbursable by the Fund only with written or documented verbal pre-approval (i.e., confirmed by fax or email) from PSTD Technical staff. Reimbursement of eligible backfill disposal costs can only be paid when associated with an active, confirmed release case.

(g) Reimbursable backfill expenses identified in Section (f) above do not apply to new tank installations. If existing tanks are removed and replaced with new tanks, in order to ensure the efficacy of the cathodic protection, old backfill must be removed and new backfill must be placed in the tankpit. If the backfill is contaminated to the degree that it must be taken to a landfill, backfill removal and disposal costs are not reimbursable expenses.

(h) No soil, backfill material, or groundwater is to be removed from the site without prior PSTD approval and proper laboratory characterization unless otherwise directed by PSTD.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 26 Ok Reg 1841, eff 7-1-09; Amended at 32 Ok Reg 811, eff 8-27-15]

PART 5. CORRECTIVE ACTION REQUIREMENTS

165:29-3-71. General applicability; exception

- (a) Every owner or operator of a petroleum storage tank system must, in response to a confirmed release from a petroleum storage tank system, comply with the requirements of this Part, with the exception of those systems excluded from regulation in OAC 165:25 and 165:26.
- (b) All work associated with the assessment, characterization, investigation, remedial action, and closure from a release or suspected release of a regulated substance should be pre-approved by PSTD.
- (c) Upon confirmation of a release, or after a release from the petroleum storage tank system is identified, the owner or operator must perform the following initial response actions:
- (1) Report the release to PSTD using the link provided on the release reporting tab located on PSTD's webpage on the Commission website; by email at PSTReleaseReporting@occ.ok.gov; by telephone at 405-521-4683 or 1-888-621-5878; or fax to 405-521-4945. If after hours, or on weekends or holidays call the PSTD emergency number at 405-823-0994.
 - (2) Take immediate action to prevent any further release of the regulated substance into the environment, and prove that any system still containing fuel is tight by having a system tightness test performed.
 - (3) Identify and mitigate any fire, explosion, and vapor hazards.
 - (4) Remove free product to the extent practicable as determined by PSTD while continuing, as necessary, any actions required by this Subchapter.
- (d) Any corrective action work performed at a release site must have prior documented verbal or written approval by a member of PSTD staff to be considered reimbursable by the Indemnity Fund. This requirement for pre-approval excludes required emergency spill mitigation measures. Additionally, field work

associated with all corrective actions requires 48-hour (two working days excluding holidays and weekends) written notice to PSTD of scheduled field activities. Notice must be made to the PSTD staff member assigned to the case, his/her Supervisor and the PSTD Technical Manager.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 26 Ok Reg 1841, eff 7-1-09; Amended at 32 Ok Reg 811, eff 8-27-15; Amended at 33 Ok Reg 626, eff 8-25-16; Amended at 36 Ok Reg 598, eff 8-1-19; Amended at 37 Ok Reg 1157, eff 10-1-20]

165:29-3-72. Prescribed format

All reporting for investigating and corrective action requirements must be in accordance with a format established by PSTD.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 35 Ok Reg 1033, eff 10-1-18]

165:29-3-73. Initial response

Upon confirmation of a release or after a release from a petroleum storage tank system is identified in any other manner, the owner or operator must perform the following initial response actions within 24 hours of a release:

- (1) Report the release to the PSTD either by telephone, electronic mail, or facsimile.
- (2) Take and document immediate action to prevent any further release of the regulated substance into the environment.
- (3) Identify any fire, explosion, and vapor hazards and mitigate them immediately.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05]

165:29-3-74. Initial abatement measures and site check

(a) Unless directed to do otherwise by PSTD, the owner or operator must perform the following abatement measures:

- (1) Remove as much of the regulated substance from the leaking petroleum storage tank system as is necessary to prevent further release to the environment.
- (2) Visually inspect the petroleum storage tank system for any aboveground releases or exposed below-ground releases and prevent further migration of the released substance into surrounding soils and the waters of the state.
- (3) Continue to monitor and mitigate any additional fire and safety hazards posed by vapors or free product that have migrated from the petroleum storage tank system excavation zone and entered into subsurface structures such as sewers or basements.
- (4) Remedy hazards posed by impacted soils that are excavated or exposed as a result of release confirmation, site investigation, abatement, or corrective action activities. All remedies, including but not limited to treatment or disposal of soils, must comply with applicable state and local requirements where applicable.
- (5) Measure for the presence of a release where the released regulated substances are most likely to be present at the petroleum storage tank site, unless the presence and source of the release have been confirmed in accordance with the site check or the closure site assessment. In selecting sample types, sample locations and measurement methods, the owner and/or operator must consider the nature of the stored substance, the type of

backfill, the depth to groundwater and other factors appropriate for identifying the presence and source of the release. Unless directed to do otherwise by PSTD, the owner or operator must analyze for the Chemicals of Concern (COCs) using approved analytical methods. For sites where used oil is involved, as determined through TPH analysis, TCLP analysis for metals, semi-volatiles and volatiles may be required. The selected analytical method must be able to detect concentrations of Chemicals of Concern below action levels. In addition, if a release occurs from any PSTD regulated petroleum storage tank system that is contaminated or combined with a non-regulated substance, the cleanup requirements for that particular release will be determined by DEQ.

(6) Investigate to determine the presence and amount of free product.

(b) Within twenty (20) days after release confirmation, the owner or operator must submit a report to the PSTD in a format established by PSTD that summarizes the initial abatement steps taken and any resulting information or data, unless this report was required to be submitted under 165:29-3-3.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 32 Ok Reg 811, eff 8-27-15; Amended at 35 Ok Reg 1033, eff 10-1-18]

165:29-3-75. Initial Site Characterization and Corrective Action Plan

(a) Unless otherwise directed by the PSTD, the owner or operator must assemble information about the site and the nature of the release, including information obtained while confirming the release or completing the abatement measures. The report must include, but is not necessarily limited to, the following:

(1) Data on the nature and estimated quantity of the release.

(2) Data from available sources and/or site investigations concerning the following factors:

(A) Surrounding populations.

(B) Water quality (regional).

(C) Use and approximate locations of water wells, basements, storm cellars, and all subsurface crawl spaces potentially affected by the release within 330 feet from the source, and any wellhead protection delineations.

(D) Subsurface soil conditions.

(E) Locations and depths of subsurface utilities and petroleum storage tank systems.

(F) Climatological conditions.

(G) Land use.

(H) Depth to and quality of groundwater (site-specific).

(I) Latitude and longitude of the center of the tankpit to the nearest second.

(3) Results of the site check and/or the closure site assessment required by 165:29-3-65.

(4) Results of the free product investigations.

(b) Within twenty (20) days of release confirmation or according to a schedule set by the PSTD, the owner or operator must submit the information collected in compliance with this Section to the PSTD, in a manner established by PSTD that demonstrates its applicability and technical adequacy.

(c) The owner or operator must submit a Corrective Action Plan (CAP) to the PSTD as a separate part of the report required in this Section, identifying a plan of action to:

- (1) Perform an ORBCA Tier 1A analysis to determine the need, if any, for remediation and/or additional ORBCA analyses.
 - (2) Monitor air, water, and soil.
 - (3) Remediate the release to such an extent that it no longer poses a threat to human health or safety or the environment.
- (d) On Tier 1A, Tier 2 and Tier 3 ORBCA, case prioritization will be established by the PSTD using the Storage Tank Prioritization Guidance Document.

[Source: Added at 17 Ok Reg 2317, eff 6-26-00; Amended at 18 Ok Reg 1085, eff 5-11-01; Amended at 22 Ok Reg 1785, eff 7-1-05; Amended at 35 Ok Reg 1033, eff 10-1-18]

165:29-3-76. Tier 1A ORBCA

- (a) Unless otherwise directed by the PSTD, the owner or operator must compile information in order to assess the site using the Risk-Based Corrective Action (RBCA) process described in the ORBCA Guidance Document. (The ORBCA Guidance Document is available on the Commission website and at the offices of the Petroleum Storage Tank Division of the Oklahoma Corporation Commission.) The RBCA process must be implemented with a three (3) tiered approach that must involve an increase in the level of data collection and analysis from one tier to the next. Some conservative default parameters under the Initial Site Characterization Tier 1A process must be replaced with more site-specific parameters under the Tier 2 and Tier 3 process. PSTD will review the results and recommendations at the completion of the Tier 1A analysis and decide if a more site-specific tiered analysis is required by initiating a Tier 2 or Tier 3 process, or whether remedial action should be performed as provided for in this Subchapter.
- (b) PSTD will only accept and review reports, worksheets, checklists, closure reports or other relevant documents which incorporate the RBCA process, or any other acceptable risk analysis, from a Commission Licensed Environmental Consultant.
- (c) The RBCA Tier 1A process is as follows:
 - (1) Tier 1A: Non-site-specific risk-based screening method used to determine corrective action goals using limited site-specific data.
